# MILESTONES NATIONAL REPORT 2023

## EXECUTIVE SUMMARY

Starting in 2019, the *Milestones National Report* included a new tool called predictive probability values (PPVs) for specialties and subspecialties that have an adequate volume of data for analysis. PPVs are estimates that a resident or fellow who received a particular Milestones rating at one point in training will fall below Level 4 (the recommended graduation target) at the time of graduation. Program directors and Clinical Competency Committees (CCCs) can examine PPVs that are based on national longitudinal Milestones ratings for their specialty.

PPVs are provided to help program directors and CCC members identify residents and fellows who may be struggling by using national data during each six-month block of the educational program. Milestones and PPVs are designed to be formative and to support the professional development of residents and fellows. PPV data can be used to support decisions for remediation or individualized learning plans.

The PPVs are provided as matrices using a heat map approach, from yellow (lower risk) to red (higher risk) zones. When a program director or CCC member identifies a resident or fellow at elevated risk for not achieving Level 4 at time of graduation within one or more subcompetencies, the most important next step is to ask, "Why?" Program directors and CCC members are in the best position to determine the cause(s) for why an individual's developmental trajectory may not be on track and work with the resident or fellow to create a remediation plan.

The 2023 PPV report will only provide Milestones 2.0 data. The number of data points available for the 2023 PPV report for each specialty will vary depending on the timing of the specialty's implementation of Milestones 2.0.

## General Summary of Findings

- 1) Longitudinal PPVs show variation over assessment periods, which may be useful for program directors in knowing when to implement individualized learning plans for a struggling resident or fellow.
- 2) The predictive power of the PPVs varies by subcompetency and by specialty.
- 3) Due to the COVID-19 pandemic and transitions to Milestones 2.0, PPVs are calculated using data obtained during and after the July-December 2020 assessment period.

The [Milestones Resources](#) page of the ACGME website includes many resources to help develop an understanding of the purpose and effective use of the Milestones and Milestones ratings, including the *Milestones Guidebook*, Milestones FAQs, *Clinical Competency Committee Guidebook*, *Milestones Guidebook for Residents and Fellows*, and *Assessment Guidebook*. A *Milestones Bibliography* is available on the ACGME website to track the published literature on the Milestones (ACGME 2022).

## Intended Audience

The intended audience for this report includes program directors, CCC members, leaders within specialty societies who oversee the development of national curricula, ACGME Review Committee members who oversee accreditation of individual programs, and the residents, fellows, and faculty members in ACGME-accredited programs. Other stakeholders who may benefit from this report include specialty boards, designated institutional officials (DIOs), policymakers, and the public.

# MILESTONES NATIONAL REPORT 2023

## BACKGROUND

The Milestones and PPVs are intended to be used as tools to better prepare physicians for a changing health care system by emphasizing a focus on the abilities of residents and fellows and ensuring their skill sets match patients' needs in a variety of critical ways (Batalden et al. 2002; Ericsson 2007; Hodges 2010).

The Milestones and PPVs allow for continuous monitoring and quality improvement for graduate medical education (GME). Individual programs can focus on making improvements that align with the specific competencies outlined by the Milestones, up to the point of graduation. This effort will help to ensure that graduates from these programs meet the expected standards of the specialty community and the goal of independent practice.

Specialties that have not used Milestones for at least two years are excluded from the report. This report focuses on specialties having implemented Milestones 2.0 to provide meaningful data and insights. Additionally, exclusions have been made in cases where the size of a residency or fellowship program is small. The parameter is used to prevent inaccurate or unreliable conclusions based on limited data, or to prevent inadvertently revealing an individual's performance evaluation.

### Intended Purpose of Milestones and PPVs

Tracking of Milestones data for individual residents and fellows is part of the ACGME's commitment to meeting the responsibility of professional self-regulation (Nasca et al. 2012; IOM 2014; Nasca 2015), and the expectations for quality and safety from its primary stakeholder, the public. The PPVs leverage the national data by creating a helpful tool that residency and fellowship programs could use to support learner professional development.

Program directors, CCCs, and specialty societies are encouraged to support programs and the ACGME in interpreting and refining the effective use of PPV data, taking advantage of the rich contextual knowledge provided by these stakeholders. Program directors and CCC members can contribute by exploring alternative explanations for observed PPV patterns and sharing insights with the broader community, including fellow program directors in their specialty/subspecialty and ACGME Milestones staff. This collaborative effort ensures proper interpretation of the data, ultimately maximizing their potential to enhance GME.

### Development of the Milestones

The development of individual Milestones was based on subcompetencies within each specialty/subspecialty (Sullivan et al. 2013). The creation of these detailed developmental markers of resident and fellow progression included members of the ACGME Review Committees, representatives from the ABMS Member Boards, program directors of ACGME-accredited residency and fellowship programs, residents, fellows, representatives from specialty societies, and the public. The Milestones were written to cover the six Core Competencies and resulted in an average of 20-24 subcompetencies per specialty/subspecialty, with educational program periods ranging from single-year fellowships to residencies lasting seven years. Milestones 2.0 builds on a body of research and lessons learned to improve the quality and clarity of the Milestones. The subcompetencies for Professionalism (PROF), Interpersonal and Communication Skills (ICS), Practice-Based Learning and Improvement (PBLI), and Systems-Based Practice (SBP) in Milestones 2.0 sets are now shared across almost all specialties. This collaboration may enable DIOs and program directors to share effective practices in assessment of these competencies and use of PPVs.

# MILESTONES NATIONAL REPORT 2023

## METHODS

### Predictive Probability Values (PPV)

PPVs are included in tables for each core specialty. They are estimates that Milestone ratings will fall below Level 4 (the recommended graduation target) at time of graduation, based on national longitudinal Milestones ratings (Holmboe et al.2020). In each table, PPVs are listed in columns that correspond to each six-month period in which Milestones data are reported. For example, a value of 65.0 indicates a 65 percent probability that residents/fellows rated at a certain level or lower at that point in time would fall short of Level 4 at time of graduation. These estimates are based on longitudinal national Milestones ratings collected for the trainees graduating in June 2023. It is assumed that CCCs would rate current learners in training based on similar rating practices used for those in the previous year.

**Table 1** provides guidance on how to use the PPVs.

### Acknowledgments

The authors want to thank the program directors who attended the feedback sessions at ACGME Annual Educational Conferences for their valuable insights. We also thank the diverse stakeholder groups to whom these results have been presented. The authors also owe a great debt of gratitude to the staff members in the ACGME Department of Applications and Data Analysis and Kenji Yamazaki, PhD for inventing PPV reporting, continuously developing analytical models, and preparing the PPVs.

For further inquiries or to engage with our team the following contact information is provided below.

# MILESTONES NATIONAL REPORT 2023

## KEY TO PPV TABLES

PPV tables provide the probability (in percentages) that a resident or fellow at or below a certain Milestones rating (Level) would not achieve the recommended Level 4 at time of graduation. Specifically in the current report, PPVs are determined by using data from the Milestones 2.0 assessments. If a specialty has a group of residents who completed their entire training by June 2023, the PPVs are calculated using assessment data from the entire duration of their residency. For specialties not completing full training by June 2023, the PPVs are calculated using only the assessments from the last two years of residency. An example of PPVs for patient care subcompetencies that could be calculated as of June 2023 is provided below.

**Table 1: Example of PPV Reporting**

*The example is from Family Medicine, Patient Care (PC) Subcompetency 1*

| Subcompetency                         | Threshold  | Yr1, Mid-Year | Yr1, Year-End | Yr2, Mid-Year | Yr2, Year-End | Yr3, Mid-Year |
|---------------------------------------|------------|---------------|---------------|---------------|---------------|---------------|
| <b>PC01</b><br><i>Family Medicine</i> | <= Lev 5.0 |               |               |               |               |               |
|                                       | <= Lev 4.5 |               |               |               |               | 23.9          |
|                                       | <= Lev 4.0 |               | 24.3          | 24.4          | 24.2          | 23.5          |
|                                       | <= Lev 3.5 | 24.2          | 24.2          | 24.0          | 24.1          | 33.6          |
|                                       | <= Lev 3.0 | 24.1          | 24.1          | 24.4          | 30.1          | 62.2          |
|                                       | <= Lev 2.5 | 23.9          | 24.1          | 30.6          | 57.9          | 73.7          |
|                                       | <= Lev 2.0 | 23.8          | 27.3          | 44.5          | 60.9          | 67.6          |
|                                       | <= Lev 1.5 | 25.3          | 40.4          | 53.5          | 68.7          | 60.8          |
|                                       | <= Lev 1.0 | 32.5          | 48.7          | 62.5          |               | 64.9          |

In this example, a family medicine resident receiving a rating of 2.0 or lower at the year-end of PGY-2 Milestones review occasion (dashed lines) has a **60.9** percent probability (based on national data) of not achieving Level 4 at the end of the three-year residency in the Patient Care Subcompetency 1.

PPVs are provided to help identify residents within a program who may be struggling to match normative national data during each six-month block of the educational program. This information can then be used to support decisions for remediation or individualized learning plans.

## Specialties with Milestones 2.0 Implemented July 2022

The specialties in this section implemented Milestones 2.0 in July 2022. The number of PPVs available and the applicable PGY level(s) will depend on the length of the program and when Milestones 2.0 was implemented.

## Specialties with Milestones 2.0 Implemented July 2022

### SPECIALTY: Colon and Rectal Surgery

| Subcompetency | Threshold | Yr1, Mid-Year |
|---------------|-----------|---------------|
| <b>PC01</b>   |           |               |
|               | ≤ Lev 5.0 |               |

## Specialties with Milestones 2.0 Implemented July 2020 or Before

The specialties in this section implemented Milestones 2.0 in July 2020 or earlier. The number of PPVs available and the applicable PGY level(s) will depend on the length of the program and when Milestones 2.0 was implemented.

## Specialties with Milestones 2.0 Implemented July 2020
