

**ACGME Program Requirements for Graduate Medical Education
in Vascular Neurology
Summary and Impact of Major Requirement Revisions**

Requirement #: IV.B.1.b).(1).(a)

Requirement Revision (significant change only):

IV.B.1.b).(1).(a)

Fellows must demonstrate competence in providing patient care that is informed by an understanding of social determinants of health, including but not limited to race, ethnicity, sexual orientation, gender identity, religion, socioeconomic status, neighborhood, and disability status. ^(Core)

1. Describe the Review Committee's rationale for this revision:
The new requirement for fellows to understand social determinants of health aims to improve patient outcomes, promote health equity, and enhance cultural competence. By recognizing factors like socioeconomic status, race, and neighborhood, health care practitioners can offer more personalized and effective care. This holistic approach not only strengthens patient-provider relationships but also fosters preventive health care and encourages advocacy for better health policies.
2. How will the proposed requirement or revision improve resident/fellow education, patient safety, and/or patient care quality?
These changes should improve fellow education, patient safety, and patient care quality.
3. How will the proposed requirement or revision impact continuity of patient care?
No impact is expected.
4. Will the proposed requirement or revision necessitate additional institutional resources (e.g., facilities, organization of other services, addition of faculty members, financial support; volume and variety of patients), if so, how?
No impact is expected.
5. How will the proposed revision impact other accredited programs?
The proposed revisions will not impact other accredited programs.
