Preface

The Graduate Medical Education Directory (93rd edition), published by the American Medical Association (AMA), lists programs accredited by the Accreditation Council for Graduate Medical Education (ACGME).

The Directory provides medical students with a list of accredited graduate medical education (GME) programs in the United States, which aids them in making important professional decisions. State licensing boards, specialty societies, and hospitals refer to the Directory to verify the authenticity of programs presented by physicians who wish to qualify for licensure, certification, or hospital privileges. The Directory provides a unique historical record of accredited GME programs and background information about the ACGME accreditation process.

Contents of the Directory
• Section I—Graduate Medical Education Information—provides descriptions of various organizations involved in GME, including the ACGME, National Resident Matching Program (NRMP), Electronic Residency Application Service (ERAS), and Educational Commission for Foreign Medical Graduates (ECFMG), as well as information on AMA products, projects, and initiatives relevant to medical students, residents/fellows, program directors, and academic physicians.
• Section II—Specialty/Subspecialty Information and Data—provides descriptions of and data for all specialties/subspecialties with ACGME-accredited residency/fellowship programs and/or ACGME Program Requirements in effect. Also included are subspecialties for which a member board of the American Board of Medical Specialties (ABMS) offers certification.
• Section III—Accredited Graduate Medical Education Programs—as the official list of ACGME-accredited programs, generally reflects accreditation actions completed by December of the previous year. The data published in this edition were transferred from the ACGME to the AMA on January 16, 2008. Programs with withdrawal dates after this date are included in Section V of the Directory. Section III provides program name, sponsoring institution, major participating institution(s), program director name, phone/fax numbers, e-mail address, approved program length, ACGME approved/offered positions, and program ID number. Specialties and subspecialties are listed in alphabetical order. Programs within each specialty or subspecialty are listed in alphabetical order by state and city. A list of accredited transitional year programs offered by hospitals or groups of hospitals is also included. Newly appointed program directors since the publication of last year's Directory are noted with an asterisk. (Note: The Directory may include programs on probation. To check a program's current accreditation status, go to the ACGME Web site, www.acgme.org, click on “public,” then click on “Search Through Accredited Programs and Sponsors” to look up information about programs and sponsors, including current accreditation status.)
• Section IV—New and Withdrawn Programs—lists GME programs newly accredited since the publication of the 2007-2008 edition of the Directory and programs that are no longer accredited to offer GME as of December 31, 2007, or earlier.
• Section V—Graduate Medical Education Teaching Institutions—lists institutions and organizations that sponsor or participate in GME programs. Teaching institution listings include type of affiliation (sponsor and/or participant) and are listed alphabetically by state and city. Institution listings include the name and address of the institution, medical school affiliations (verified biennially by the deans of accredited US medical schools), a list of the specialties and subspecialties in which the institution provides training, and the institution identification number.
• Appendix A—Combined Specialty Programs—provides information on programs that offer combined specialty training. Combined training consists of a coherent educational experience in two or more closely related specialty or subspecialty programs. The educational plan for combined training is approved by the specialty board of each of the specialties to assure that resident physicians completing combined training are eligible for board certification in each of the component specialties. Each specialty or subspecialty program is separately accredited by the ACGME through its respective specialty review committee. The duration of combined training is longer than any one of its component specialty programs standing alone, and shorter than all of its component specialty programs together.
• Appendix B—Medical Specialty Board Certification Requirements—contains information about the American Board of Medical Specialties (ABMS) and the certification requirements for each of the 24 member boards of the ABMS. Certification is the process by which a medical specialty board grants recognition to a physician who has met certain predetermined qualifications, as specified by the board. Certification requirements are also published by and available from each medical specialty board. Questions concerning certification requirements should be directed to the particular specialty board office listed in Appendix B.
• Appendix C—Medical Schools in the United States—contains a list of US medical schools accredited by the Liaison Committee on Medical Education (LCME), including the identification number, name, and location of each LCME-accredited medical school.
• Appendix D—Graduate Medical Education Glossary—defines various terms commonly used in GME.
• Appendix E—Listings of Subspecialty and Fellowship Programs—provides information on subspecialty and fellowship programs outside the purview of the ACGME accreditation process.
• Appendix F—Medical Licensure Information—contains an article on the basics of medical licensure, in addition to information on GME-related licensure policies of state medical boards, as published in 2008 edition of State Medical Licensure Requirements and Statistics.

Production of the Directory

The work of the ACGME’s review committees, which review and evaluate programs and sponsoring institutions, provides the basis for program and institutional information included in Sections III through V of the Directory. The ACGME shares its data on accreditation actions and program changes with the AMA quarterly for the exclusive purpose of maintaining an accurate database to benefit programs, residents, applicants, and the public. The AMA, in turn, shares with the ACGME information collected through its annual survey of GME programs, but program directors are reminded that most review committees require prompt notification in writing of changes in the program’s leadership. Providing information on program director changes through the National GME Census does not meet this requirement. In addition, most review committees require a current copy of the curriculum vitae for new program directors.

The Directory as the official list of ACGME-accredited programs, generally reflects accreditation actions completed by December of the previous year. The data published in this edition were transferred from the ACGME to the AMA on January 16, 2008. Directors are reminded that accreditation actions and related changes can alter the ACGME program population on a daily basis, and that the Directory serves only as a “snapshot” of this population at a given
moment. For the most current information on ACGME-accredited programs, consult the ACGME Web site: www.acgme.org.

The data for combined programs listed in Appendix A were obtained via the National GME Census (see Section I for more information).

Disclaimer
It is the AMA’s understanding that all institutions listed in the Graduate Medical Education Directory are required by law to include the phrase “EEO, M/F/D/V” (Equal Employment Opportunity, Minority/Female/Disabled/Veteran) on any information distributed for public view.

Back Issues of the Directory
Copies of previous editions of the Directory are available for purchase at $25 per copy. For more information or to order, please call 312 464-5333. In addition, the CD-ROM version of the Directory contains Adobe Acrobat files of editions from 1996-1997 to the present.

Special Acknowledgment to the ACGME
The AMA gratefully acknowledges the cooperation of the Accreditation Council for Graduate Medical Education (ACGME) in supplying the list of programs accredited by the ACGME and sponsoring/participating institutions and relevant information about the ACGME and its accreditation process. The AMA thanks all RRC executive directors and accreditation administrators as well as ACGME staff Jeanne Heard, MD, PhD, Ingrid Philibert, John Nylen, MBA, Rebecca Miller, MS, and Julie Jacob for their many ongoing contributions to the Directory.

Acknowledgments
Many people contributed to the publication of this edition of the Graduate Medical Education Directory. In addition to collaborative efforts with the ACGME (see “Special Acknowledgment,” above), the ABMS and staff of the member boards of the ABMS provided requirements for certification in each of the medical specialties and subspecialties.

Special acknowledgment is also given to the following groups and individuals:
• AMA Department of Data Collection, for data collection and information resources management: Chris Matthews, Lydia Cruz, John Wilson, P J Shoulders, and Tammy Stockton.
• Association of American Medical Colleges, for its collaboration with the AMA in collecting data on combined programs (see Appendix A) via the National GME Census: Jennifer Faerberg and Jason Cantow.
• AMA Book Group (listed on p. ii).
• AMA Medical Education Group, for data cleaning, QA, and editorial advising and assistance: Sarah Brotherton, PhD, Sylvia Ezel, Jacqueline Drake, Barbara Schneiderman, MD, Barbara Barzansky, PhD, Jeanette Harmon, Dorothy Grant-Bryant, Enza Perrone, and Arecia Washington.

In addition, we would like to acknowledge the many contributions of the following individuals/organizations for assistance with the indicated sections/appendices of this book:

Section I
• Careers in Medicine—George V Richard, PhD
• Choosing a Medical Specialty—Rebecca Gierhahn, AMA Medical Student Section
• Transitioning to Residency: What Medical Students Need to Know—Phyllis Kopriva, AMA Minority Affairs Consortium
• The Residency Interview: A Guide for Medical Students—Phyllis Kopriva, AMA Women Physicians Congress
• Electronic Residency Application Service—Renee Overton, Moira Edwards
• Find a Residency or Fellowship—Jon Fanning, Anu Gupta, AMA Resident and Fellow Section
• National Resident Matching Program—Mona Signer
• Information on Matching Programs—Robert Sabalis, PhD, Association of American Medical Colleges; Dennis S Thomatos, San Francisco Matching Program, American Academy of Ophthalmology; Susan Banner, Canadian Resident Matching Service
• Entry of Foreign-born Medical Graduates to the United States—Elizabeth M Ingraham, Educational Commission for Foreign Medical Graduates; Cathryn Cotten, Duke University Medical Center International Office
• AMA Alliance—Harry Bauer
• AMA International Medical Graduates Section—J Mori Johnson
• Virtual Mentor—Faith Lagay, PhD
• Association of American Medical Colleges—Sunny Yoder
• Association of Hospital Medical Education—Margie Kleppick
• Organization of Program Directors Associations—Sandi Trusky
• Training Administrators of Graduate Medical Education—Linda Gacioch and Ruth Nawotniak

Section II
• American Board of Medical Specialties—Lori Boukas
• Modern Healthcare—Dave Burda, Rebecca Mielcarski

We would also like to recognize the many contributions of Rod Hill of North Coast Associates, the typesetter of this publication.

Fred Donini-Lenhoff, MA, Editor
Paul H Rockey, MD, MPH, Director, Division of Undergraduate and Graduate Medical Education

2008 AMA Health Care Advocacy Agenda

The AMA believes that all Americans are worthy of a fair and affordable health system. At the center of the AMA’s vision is the concept that every American has health insurance. And that all patients maintain the freedom to choose their own doctors and health plans, maintain control over their own care, and receive the best care possible. Specifically:

The AMA urges lawmakers to implement a system of tax credits to enable individuals to buy health insurance.

Under current law, Medicare will make deep cuts in payments to doctors every year until 2015. This policy erodes patient access to care and is a barrier to practice innovations. Congress and the next Administration need to permanently replace the flawed payment formula.

Medical lawsuits are driving up health costs for everyone and making it hard for many to find a doctor. The AMA seeks reasonable limits on the noneconomic damages juries can award so that doctors aren’t forced to move, cut services or go out of business.

Physicians and other health providers must work with government and private payers on strategies to restrain rising health care costs while maintaining quality of care. Medical science and technology have moved forward at a lightning pace. Patients are ready for the American health system to follow suit. The AMA is committed to:

- Finding new ways to enable doctors to use promising new technology
- Pioneering new methods to measure and improve the quality of care
- Preventing errors by studying ones that have happened, without the threat of lawsuits
- Directing more resources and effort toward disease prevention
- Helping Americans lead more healthful lifestyles
- Eliminating gaps in care, particularly for racial and ethnic minority patients, the elderly, and low-income families
- Preparing better for large-scale health care emergencies

America’s patients will be best served when we eliminate the disproportionate influence of insurers and government into medical decision-making. These important decisions must be placed in the hands of patients and physicians.

Our nation needs a well-trained medical work force and more doctors in primary care. We must make sure our medical education stays the best in the world, and make paying for it less burdensome. So too must we address the barriers that threaten the viability of many physician practices, such as:

- Payments that do not reflect the true cost of providing care
- Health insurers’ deceptive business practices
- Antitrust rules that restrict doctors from negotiating with health insurance companies

As physicians and medical students, we see firsthand every day how urgently our patients need a better health system. Together, we can shape one America truly deserves.

Visit www.ama-assn.org/go/agenda to learn more.
AMA Medical Education Publications and Products

**Graduate Medical Education Directory**
Includes contact information for 8,500 ACGME-accredited and combined specialty programs and 1,700 GME teaching institutions. Also included are medical specialty board certification requirements, a list of US medical schools, and a GME glossary.

OP416708DIB $78 ($58 for AMA members)

**Graduate Medical Education Library on CD-ROM**
Combines all information from the text version of the Directory with advanced search functions to help you find the program or institution you're looking for. Its Web browser interface allows for quick, easy access to all program and institution data and links to program Web sites; XML format allows for quick data sorts and program comparison. Also includes copies of each Directory since 1996-1997.

OP420008DIB $105 ($80 for AMA members)

**Electronic State-level GME Data**
Aggregate statistics for each state on all resident physicians, in Adobe Acrobat format. Specific information available by state and specialty includes the number of resident physicians according to gender, race/ethnicity, and type of medical school attended. In addition, readers can determine the number of resident physicians training in the same state where they attended medical school.

Call (312) 464-4659 to order $20 to $50

**FREIDA Online**
www.ama-assn.org/go/freida
Internet database offers free access to residency/fellowship program information. Users can search by specialty/subspecialty or state/region, among other criteria. Listings include program contact information as well as data on compensation and other benefits, resident-to-faculty ratio, work schedule, policies, and educational environment.

**Guidebook for GME Directors and Coordinators**
www.ama-assn.org/go/gmeguidebook
Available online, this free guidebook provides pertinent and valuable information to directors/coordinators on all facets of AMA involvement in GME, as well as contact information for the ACGME, ABMS specialty boards, FSMB, state medical boards, and specialty societies that are part of the AMA Federation.

**Medical Education Bulletin**
Published twice a year, this free newsletter covers issues of interest to the undergraduate and graduate medical education community, including updates on AMA actions related to medical education at the annual and interim meetings of the AMA House of Delegates. To be put on the mailing list for the bulletin, contact Sylvia I. Etzel, editor, (312) 464-4693, sylvia.etzel@ama-assn.org.

**State Medical Licensure Requirements and Statistics**
Key state-by-state data on licensing requirements, fees, license renewal, continuing medical education requirements, and exam pass/fail percentages; intended for credentialing agents, physicians, recruiters, employers, and consultants who need complete information in one source.

OP399008 $80 ($65 for AMA members)

**Continuing Professional Development of Physicians: From Research to Practice**
Continuing Professional Development (CPD) of physicians, formerly known as continuing medical education, greatly expands what physicians can do with the help of educational experts to provide optimal patient care. This book takes the concept of CPD and turns it from theory into practice, as an agent for positive physician performance change, embracing a broad view of lifelong learning for physicians.

OP230503 $79 ($69 for AMA members)

**Health Care Careers Directory**
Provides information on 8,000 educational programs and 2,600 educational institutions in 77 different professions, including radiographer, physician assistant, medical assistant, music therapist, and more.

OP417508DIB $70 ($52.50 for AMA members)

## A. Residency Application and Career Planning Resources

### Match Timeline

<table>
<thead>
<tr>
<th>Class Year</th>
<th>Period</th>
<th>Suggested Activities and Tasks</th>
</tr>
</thead>
</table>
| Year 3     | October - March | • Begin working on your curriculum vitae (CV). Crafting a high quality CV can take 8-10 hours. Information for the CV can be used in the ERAS application and provided to those writing your letters of recommendation.  
  • Review the AAMC/NRMP Charting Outcomes in the Match report to assess qualifications and competitiveness for different specialties. |
|            | February - June | • Review residency programs and physician workforce data through the AAMC Careers in Medicine Specialty Pages and FREIDA Online.  
  • Depending on your school’s schedule, make an appointment with your Associate Dean to discuss the Medical School Performance Evaluation (MSPE) process (at some schools this may occur later in the year).  
  • Write your personal statement. |
|            | Summer          | • Obtain your ERAS token (a special code) from your advisor or the Student Affairs dean’s office.  
  • Register with the National Resident Matching Program (NRMP) for the Main Residency Match.  
  • Register for early Match, if applicable. |
| Year 4     | July - September| • Complete the ERAS application using the MyERAS site (www.aamc.org/students/eras/start.htm), including the designation of programs where your application is to be transmitted.  
  • Identify additional faculty for writing letters of recommendation. |
|            | September - October | • Begin preparing for residency interviews.  
  • If you haven’t taken the USMLE Step 2, consider using this time to prepare. |
|            | October - January| • MSPE released November 1.  
  • Residency interviews.  
  • Early Match deadlines usually occur in early or mid-January. |
|            | January - February| • Begin entering your Rank Order List for the NRMP match. |
|            | March           | • Match Day—typically the third Thursday in March; results are formally announced at 12:00pm EST. |
|            | April - June    | • Sign the contract with your residency program.  
  • Graduate and prepare to begin residency—Congratulations!  
  • Begin preparations for moving. |
|            | June - July     | • Residency begins. |
Fellowship and Residency Electronic Interactive Database Access (FREIDA) Online

FREIDA Online is a free Internet database of approximately 8,500 graduate medical education programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) or approved by member boards of the American Board of Medical Specialties.

Users of FREIDA Online can search the database by specialty/ subspecialty or state/region, among other criteria. The SearchPlus feature also allows users to compare programs by features of importance, such as number of first year positions, salary, and program setting. In addition, FREIDA Online also displays aggregate statistics for each specialty and subspecialty, providing averages and percents, for example, on the average number of faculty per program in the specialty, or the average number of hours on-duty.

AMA student and resident members can save their favorite programs in an electronic folder and can print their own mailing labels to contact programs.

GME programs update data for FREIDA Online via the National GME Census, an annual survey conducted by the AMA and Association of American Medical Colleges. The survey instrument, GME Track, is available online at www.aamc.org/gmetrack.

Programs: Modifying Your FREIDA Online Listing

In addition to providing data via the National GME Census, as explained above, program directors and staff can also modify the basic information that appears on FREIDA Online throughout the year by accessing www.ama-assn.org/ama/pub/category/5598.html.

For example, if there is a new program director or a new contact person, you can make these changes on FREIDA Online directly. Changes are reviewed by FREIDA staff before the data are updated; changes take approximately 2 weeks to process.

FREIDA Online Listings: Basic and Expanded

All programs listed in FREIDA include the following Basic Listing:
- Program name
- Program identifier (eg, 120-36-21-000)
- Specialty/subspecialty (eg, family medicine)
- Program director (name, mailing address, phone, fax, e-mail, Web address)
- Person to contact for more information about the program (name, mailing address, phone, fax, e-mail)
- Accredited length; required length
- Accepting applications
- Program start date
- Participates in ERAS
- Affiliated with US government
- Institution list (sponsor and participant[s])

In addition, programs that select the Expanded Detailed Listing option (as the majority of programs do) provide the following information to students and residents:

General Information
- Comments (used to highlight special qualities about the program, such as special features or description of surrounding hospital setting)
- Total program size (by year)
- Primary teaching site (eg, City University Hospital)
- Primary teaching site uses electronic medical records
- Program best described as (eg, community-based hospital)
- Previous GME required
- Preliminary positions offered
- Information on USMLE Step 2-CS
- Participation in National Resident Matching Program (NRMP); code(s)
- Participation in San Francisco match
- Participation in another matching program
- Number of interviews conducted last year for first year positions
- Required letters of recommendation
- Earliest date for applications; latest date for applications; interview period

Program faculty
- Number of faculty (physician and nonphysician)
- Full-time and part-time physicians and nonphysicians
- Percentage of full-time paid female physician faculty
- Ratio of full-time equivalent paid faculty to positions

Work schedule
- Average hours/week on duty during first year (excluding beeper call)
- Maximum consecutive hours on duty during first year (excluding beeper call)
- Average number of 24-hour off duty periods per week during first year
- Moonlighting allowed within institution
- Night float system (residents do/do not participate during first year)
- Call schedule (by year)
- Most taxing schedule and frequency per year
- Beeper or home call (weeks/year)

Educational environment
- Educational setting
- Average hours/week of regularly scheduled lectures/conferences
- Percent training at hospital outpatient clinics
- Percent training in ambulatory non-hospital community-based settings, eg, physician offices, community clinics

Educational benefits
- Curriculum on management of tobacco dependence
- Program to assess/enhance medical professionalism
- Debt management/financial counseling
- Formal program to develop teaching skills
- Formal program to foster interdisciplinary teamwork
- Formal mentoring program
- Continuous quality improvement training
- International experience
- Resident/fellow retreats
- Off-campus electives
- Hospice/home care experience
- Cultural competence awareness
- Instruction in medical Spanish or other non-English language
- Alternative/complementary medicine curriculum
- Training in identifying and reporting of domestic violence/abuse
- MPH/MBA or PhD training
- Research rotation

Educational features
- Offers additional training or educational experience beyond accredited length
- Residents supervise medical students
- Offers a primary care track, rural track, women’s health track, hospitalist track, research track/nonaccredited fellowship, and/or another special track

Resident Evaluation
- Yearly specialty in-service examination required
- Patient surveys
- Portfolio system
- 360-degree evaluations
- Objective structured clinical examinations (OSCE)
Program evaluation
  • Program graduation rates
  • Board certification rates
  • In-training examination scores
  • Performance-based assessment scores (eg, OSCE)

Employment policies and benefits
  • Part-time/shared positions
  • On-site child care; subsidized child care
  • Allowance/stipend for professional expenses
  • Leave for educational meetings/conferences
  • Moving allowance
  • Housing stipend
  • On-call meal allowance
  • Parking
  • PDAs available
  • Job placement assistance
  • Cross coverage in case of illness/disability

Compensation and leave (by year)
  • Salary compensation
  • Vacation weeks
  • Sick days

Leave availability
  • Maximum number of paid and unpaid days for family/medical leave

Major medical benefits
  • Major medical insurance for residents and dependents
  • Outpatient/inpatient mental health insurance
  • Group life insurance
  • Dental insurance
  • Disability insurance
  • Disability insurance for occupationally acquired HIV
  • When medical insurance coverage begins

Pricing for Expanded Detailed Listing in FREIDA
  • $80 Subspecialty program
  • $160 Specialty program

Note: As an added bonus for those programs that choose an expanded listing in FREIDA Online, the CD-ROM includes a link to those programs’ FREIDA Online listing, under “Other Information.”

Program Information
  • Program name
  • Program setting
  • Accredited length (years)
  • Years required
  • Program size
  • Graduate Year 1 (GY1) positions
  • Requires prior GME (years)

Work Schedule
  • Average hours/week duty
  • Maximum hours consecutive duty
  • Most taxing call schedule
  • Duration
  • Moonlighting allowed
  • Employment policies/benefits
  • Salary, program year one
  • On-site child care
  • Part-time/shared positions
  • Multiple start dates

Educational Curriculum
  • Continuous quality improvement
  • International experience
  • Resident/fellow retreats
  • Off-campus electives
  • Hospice/home care experience
  • Cultural competence awareness
  • Non-English language instruction
  • Alternative/complementary medicine
  • Research rotation/duration

Additional Training
  • MPH/MBA training or PhD training
  • Offers additional training
  • Requires additional training
  • Additional training length

Other Information
  • FREIDA listing
  • Plastic surgery integrated model
  • Preventive medicine specialty area
  • Military
  • Subspecialty code(s)
  • Sponsoring specialty

Contact Information
  • Sponsoring institution
  • Major participating institution(s)
  • Program director and program codirector
  • Address
  • Phone/fax/e-mail

Information
The CD-ROM is $105 list price or $80 for AMA members, plus shipping/handling and state tax, if applicable. To order, contact:
AMA Order Department
PO Box 930876

GME Library on CD-ROM
The Graduate Medical Education Library on CD-ROM combines all information from the text version of the Directory with advanced search functions to help users find the program or institution they’re seeking. Its Web browser interface—no installation required—allows for quick, easy access to all program and institution data and many clickable links, including hyperlinks to program Web sites.
The CD-ROM also includes archive copies of each year’s Directory since 1996-1997. The CD’s XML capabilities allow for quick data sorts and program comparison by a large number of data variables, including the majority of those listed below. These data are derived from the National GME Census, as are the data for FREIDA Online.

Note: As an added bonus for those programs that choose an expanded listing in FREIDA Online, the CD-ROM includes a link to those programs’ FREIDA Online listing, under “Other Information.”

A. Residency Application and Career Planning Resources
Careers in Medicine

Careers in Medicine is a comprehensive, four-phase career planning and development program sponsored by the Association of American Medical Colleges (AAMC). Designed to equip medical students with the skills and information needed to make informed career decisions, it focuses on helping students understand their medical career options, select their specialty, and apply to a residency program that fits their career goals. The program is offered in conjunction with medical school staff, and can also be accessed through the Internet at www.aamc.org/careersinmedicine.

As students work through the program, they engage in a process of self-assessment, career exploration, decision-making, and career planning. They can assess their career goals and aspirations online and access their results at any time through their private Personal Profile. Of special interest to students exploring specialty options are the Careers in Medicine Specialty Pages, which provide comprehensive information for 119 specialty and subspecialty areas, including nature of the work, personal characteristics, residency/fellowship training requirements, Match results, workforce statistics, physician compensation, and links to over 1,000 specialty associations, journals, and newsletters.

Careers in Medicine offers guidance and interactive decision-making tools for making these important career decisions. Students can cycle through the program several times during medical school as they develop increasingly more refined views of their preferred career paths. The program is currently available to all AAMC-member US and Canadian medical schools. It is also available to medical students in osteopathic medical schools that have completed licensing agreements with the AAMC. Staffs in medical schools offer workshops using the Careers in Medicine model throughout all 4 years of medical school.

To obtain information about the program and to find out more about accessing the password-protected Web site, students should contact their Careers in Medicine Liaison, or the student affairs dean, in their medical school. Residents should contact the Careers in Medicine Office at careersinmedicine@aamc.org.

Choosing a Medical Specialty

Since 1994, the AMA Medical Student Section has maintained Choosing a Medical Specialty, a bibliography of current sources for information on the medical and surgical specialties for students preparing to enter into the residency selection process. This online publication directs students to numerous resources available to help them make informed career choices.

Information

ERAS

ERAS®—the Electronic Residency Application Service, provided by the AAMC—has been working together with applicants, medical schools, and training programs to streamline the application process for 13 years. Using the ERAS service, applicants to residency and fellowship programs transmit applications and supporting documents to training programs over the Internet. Each year, the ERAS system transmits more than 22 million documents, bypassing the laborious paper process and the US Postal Service.

Specialties using ERAS 2009 (residency positions begin July 2009) include:
- Anesthesiology (most positions begin July 2010)
- Dermatology (most positions begin July 2010)
- Diagnostic Radiology (positions begin July 2010)
- Emergency Medicine
- Family Medicine
- Family Medicine/Physical Medicine and Rehabilitation combined programs
- Internal Medicine (preliminary and categorical)
- Internal Medicine/Dermatology combined programs
- Internal Medicine/Emergency Medicine combined programs
- Internal Medicine/Family Medicine combined programs
- Internal Medicine/Pediatrics combined programs
- Internal Medicine/Physical Medicine and Rehabilitation combined programs
- Internal Medicine/Psychiatry combined programs
- Neurological Surgery*
- Neurology
- Nuclear Medicine
- Obstetrics/Gynecology
- Orthopaedic Surgery
- Otolaryngology
- Pathology
- Pediatrics
- Pediatrics/Emergency Medicine combined programs
- Pediatrics/Physical Medicine and Rehabilitation combined programs
- Pediatrics/Psychiatry/Child Psychiatry Triple Board programs
- Physical Medicine and Rehabilitation (most positions begin July 2010)
- Plastic Surgery Integrated Programs offering PGY1 positions
- Psychiatry
- Psychiatry/Neurology
- Radiation Oncology
- Surgery (General)
- Transitional Year
- Urology
- Vascular Surgery - Integrated
- All US Air Force* Army/Navy programs offering PGY1 positions
* Specialties debuting in ERAS 2009

Having successfully implemented ERAS in residency specialties, the service focused its attention on offering fellowship applicants and programs the same benefits available to residency participants. ERAS Fellowships, introduced in 2003, offers two cycles for fellowship applications. The July application cycle has fellowship programs receiving applications in July for positions that commence 12 months later. The December application cycle has programs receiving applications in December for positions that begin 18 months later. Fellowship specialties using ERAS 2009 include:

July Application Cycle Specialties
(Apply July 2008; Positions begin July 2009)
- Colon and Rectal Surgery
- Geriatric Medicine (Family Practice and Internal Medicine)
- Pediatric Emergency Medicine (Emergency Medicine and Pediatrics)
Deciding where to apply for residency can be a daunting task, but understanding the process is key to making informed decisions. This guide, developed by the AMA Minority Affairs Consortium (MAC), aims to provide an overview of the residency application and interview process, intended as a guide to start students’ thinking about what they will encounter.

Sections include the following:

- Getting Ready: Medical School Years 1-3
- The Residency Application: Information & Procedures
- The Application Process: A Timetable for Success
- Writing Your Personal Statement
- Selecting Your Residency Programs
- The Residency Interview: Making the Most of It
- Not Matched? The Decision to Reapply
- Making the Most of Your Residency
- Residency Programs: An Inside Look
- General Residency Questions

This online resource guide, available to AMA members, is published by the AMA Women Physicians Congress (AMA WPC), a special interest group comprised of physicians and medical students who advocate for women’s health issues and women in medicine professional and life balancing issues. This resource addresses the following topics:

- Handling gender-based questions
- Couples match
- Shared and part-time residencies
- Preparing for your interview
- Interview questions to ask
- Common and uncommon questions that will be asked of you
- What to bring with you

Both men and women medical students report anxiety and confusion when faced with interviews for residency placement. Women medical students reported that they had difficulty with their residency training interviews when asked questions dealing with gender. Some women reported that they were never asked gender-based questions, but others reported being asked questions about their marriages and plans for childbearing. Men and women respondents alike said they were often asked questions which they found to be vague or provocative.

The interview process is stressful for all medical students, and medical schools seldom coach their students in how to approach residency placement. In publishing this guide, the AMA WPC Governing Council felt that it would meet the needs of all medical students and would include a special section for women on gender-based questions.

This guide is not intended to help students pick a specialty or how to interview specifically in the different specialties, nor does it suggest how to plan electives. Rather, it is an overview of the interviewing process, intended as a guide to start students’ thinking about what they will encounter.

Find a Residency or Fellowship

In response to many requests from medical school graduates seeking unfilled positions in residency programs, the AMA Resident and Fellow Section (AMA-RFS) offers a Web-based list of open residency and fellowship positions.

Postings on the “Find a Residency or Fellowship” Web site include a short description of the position and the program, as provided by program officials, as well as contact information. The site also provides links to specialty societies that offer information on residency vacancies.

Programs that wish to list a vacant position can enter the required data at www.ama-assn.org/ama/pub/category/6436.html.

For information on positions in a given specialty, applicants for positions may also wish to contact the appropriate specialty society, as shown in Section II.
AMA Alliance Resident Physician Spouses and Medical Student Spouses (RPS-MSS) Groups

The American Medical Association Alliance (Alliance), a nationwide grass roots network of more than 25,000 physician spouses and physicians, is the largest volunteer arm of the AMA. The Alliance offers support and advocacy for the family of medicine, a convenient portal for help when you need it, and the opportunity to make a difference in your community while advancing personal development and leadership skills.

Resident physicians and their spouses (RPS) and medical students and their spouses (MSS) are encouraged to join this resource for “surviving the training years.” Annual membership is only $10.

Special features include scholarship resources, Physicians in Training Host Program for medical students traveling to interview for residency, access to a nationwide network of physician families that help introduce new physicians’ families to their new community, and opportunities to have a voice in legislative issues that affect physicians and health care. Children’s activity books and resources on the medical marriage are also available.

B. Information on Matching Programs

Most US medical students and other applicants to US GME programs secure positions through a “matching program.” The National Resident Matching Program (NRMP) is the largest matching program; other residency matching programs include the San Francisco Matching Program and the matching programs sponsored by the American Urology Association (AUA) and the American Osteopathic Association (AOA). In addition, the various US Armed Services select applicants participating in military programs at US medical schools for Armed Forces-sponsored GME programs. Finally, the Canadian Resident Matching Service (CaRMS) sponsors a two-phased match for Canadian medical school students and other applicants.

National Resident Matching Program

The National Resident Matching Program (NRMP) has been matching the preferences of applicants and programs for residency positions since 1952. The program was created to provide both applicants and residency program directors a fair opportunity to consider their options for appointment, to make reasoned decisions, and to have their decisions announced at a specified time. Participants in the NRMP agree to honor the commitment to offer or to accept an appointment if a match results.

In 2007, in addition to 15,667 US medical students, another 19,308 “independent” applicants competed for 21,845 graduate year one (GY1) positions and 2,840 graduate year two positions offered in the NRMP. Independent applicants include prior graduates of US allopathic medical schools and eligible students/graduates of osteopathic, Canadian, and international medical schools, and Fifth Pathway programs. The numbers of US medical students, independent applicants, and programs participating in the 2007 match increased slightly from the previous year.

Since July 2001, all NRMP services have been Web-based. Participants register for the Match, pay their registration fees, submit rank order lists, and receive match results via the NRMP Web site at www.nrmp.org.

The NRMP is not a centralized application service. Applicants apply through ERAS or directly to residency programs, and the programs administer their own selection process, including requests for interviews. Programs that participate in the NRMP require applicants to register with the NRMP. In January and February, after interviewing has been completed, applicants and programs submit to the NRMP via the Web rank order lists indicating their choices in order of preference. The system is in real time with up-to-the-minute information on applicants and programs participating in the match.

Both applicants and programs must agree that neither will ask the other to make a commitment before Match Day, although a high level of interest may be expressed. Verbal or written contracts prior to Match Day should not be made and are violations of the NRMP Match Participation Agreement signed by all participants. The final preferences of program directors and applicants as reflected on the submitted rank order lists will determine the offering of positions and the placement of applicants.

Through the NRMP process, each applicant and program submits a list of preferences in rank order. The matching algorithm places an applicant into a program he or she prefers that 1) has ranked the applicant and 2) has not been filled with other applicants who also prefer the program and are ranked higher on the program’s list. Match results are announced in mid-March and are available...
on the NRMP Web site to participants. Applicants who fail to obtain a position and programs that do not fill all their offered positions are informed 2 days before the general announcement so that they may contact one another to secure appointments. The majority of appointments to residency programs begin on or about July 1.

Positions Offered Through the NRMP
The positions offered by programs participating in the NRMP are typically those sought by US medical school seniors; that is, positions that provide the first year of graduate medical education. In addition, specialties that start their training at graduate year two offer positions in the NRMP so that applicants may link their first and second years of training on their rank order lists.

- Categorical positions are offered by programs that expect applicants who enter in graduate year one to continue until completion of training required for specialty certification, provided their performance is satisfactory (normally 3 to 4 years).
- Preliminary positions provide 1 or 2 years of prerequisite training for entry into advanced programs that require 1 or more years of clinical training. Internal medicine, surgery, and transitional year programs commonly offer preliminary positions.
- Advanced positions at graduate year two, which do not commence until a year after the Match, are in specialty programs that require completion of 1 or more years of preliminary training. Applicants without prior graduate medical education may apply for these positions while also applying for preliminary positions that are compatible with their plans.
- Resident positions at graduate year two that begin in July of the year of the match are reserved for physicians who have had prior graduate medical education. These positions are not available to senior US medical students.

Couples and Shared Residency Positions
Applicants who are members of a couple may link their program choices together. In creating pairs of program choices, couples can mix specialties, program types, and geographic locations.

Some programs offer shared residency positions. In a shared residency, two residents share one position, usually alternating months on clinical rotations with time off to devote to family, research, or other interests. Obtaining a shared residency position through the NRMP requires that two applicants who have enrolled separately in other interests. Obtaining a shared residency position through the NRMP become partners to be matched together in a single position.

Specialties Matching Service
In addition to conducting the match for graduate year one and graduate year two residency positions, the NRMP conducts matches for advanced residency or fellowship positions through the Specialties Matching Service. These specialty matches occur throughout the year, and each requires its own registration with the NRMP. Specialty matches currently include the following:

- Combined Musculoskeletal Matching Program (participating subspecialties of orthopaedic surgery)
- Abdominal transplant surgery
- Allergy and immunology
- Child and adolescent psychiatry
- Colon and rectal surgery
- Medical Specialties Matching Program (participating subspecialties of internal medicine)
- Minimally invasive and gastrointestinal surgery
- Neonatal-perinatal medicine
- Obstetrics-Gynecology Fellowship Match (participating subspecialties of obstetrics and gynecology)
- Ophthalmic plastic and reconstructive surgery
- Pediatric cardiology
- Pediatric critical care medicine
- Pediatric emergency medicine
- Pediatric gastroenterology
- Pediatric hematology/oncology
- Pediatric rheumatology
- Pediatric surgery
- Primary care sports medicine
- Radiology (participating subspecialties in radiology)
- Surgical critical care
- Thoracic surgery
- Vascular surgery

Important Dates
August 15 The NRMP Main Residency Match Web site opens for applicant registration. US seniors and independent applicants begin registering for the following year’s Match.
September 1 Registration opens for institutions and programs participating in the Main Match.
November 30 Deadline for applicant registration. Registration after November 30 requires an additional $50 late registration fee.
January 15 The submission of rank order lists begins on the Web at www.nrmp.org.
February The ranking process culminates with the closing of rank order lists in the third week of February.
March Applicants and institutions receive the Match results the third week of March. Unmatched applicants are notified at noon on Monday, and unfilled specialty positions are posted to the Web that Tuesday at noon Eastern Standard Time.
July 1 Most appointments to residency programs begin.

Information and Inquiries
The National Resident Matching Program is sponsored by the Council of Medical Specialty Societies, American Board of Medical Specialties, American Hospital Association, American Medical Association, and Association of American Medical Colleges. The NRMP is managed and operated by the Association of American Medical Colleges.

Inquiries regarding the NRMP should be directed to:
National Resident Matching Program
2450 N St, NW
Washington, DC 20037-1127
202 828-0566
E-mail: nrmp@aamc.org
www.nrmp.org

San Francisco Matching Program
For 2008, the San Francisco Matching Program offers residency positions in specialties that do not participate in the National Resident Matching Program (NRMP), including child neurology, ophthalmology, orthopedic trauma, and plastic surgery. It also offers fellowship positions in several subspecialties, including Mohs micrographic surgery, ophthalmology fellowships, rhinology, pediatric otolaryngology, facial plastic surgery, and craniofacial surgery. Applicants are advised to review carefully the information provided on the San Francisco Match Web site at www.sfmatch.org.

Because the San Francisco Match does not offer GY1 positions, applicants must obtain their preliminary positions outside of the San Francisco Match. Some programs have designated preliminary positions in the same institution for applicants who match through the San Francisco Match; therefore, these applicants do not have to
B. Information on Matching Programs

go through a matching program to obtain a GY1 position. The pro-
grams are not required to be ACGME-accredited to participate in the
matching program.

To participate in the San Francisco Match, applicants complete
the online registration form, print it, and mail or fax it along with
the required payment to the San Francisco Matching Program. Ap-
licants are then e-mailed a registration number, as well as addi-
tional information on matching procedures. Most, but not all of, the
programs participating in the San Francisco Match use the Central
Application Service (CAS); programs in those specialties not using
the CAS must be contacted directly for their individual applica-
tions. The Central Application can be downloaded and saved to
one’s personal computer for completion and electronic submission.

The ranking function for the San Francisco Match is completed
online for applicants and on paper for programs. Applicants com-
plete the rank form that is posted on the San Francisco Match Web
site and submit online. Receipt is confirmed by e-mail. The San
Francisco Match uses an “applicant-proposing algorithm,” and all
matches are tentative until the matching process has been com-
pleted, with the outcome determined by the rank order lists submit-
ted by programs and applicants. All matches are binding com-
mitments.

Registration for the San Francisco Match begins in May for oph-
thalmology and throughout the year for other specialties. The pe-
riod for submitting rank order lists varies according to specialty.
Unfilled positions are posted on the San Francisco Match Web site
throughout the year, and all programs participating have access to
statistical data not provided to the general public.

reserved. Reproduced with permission of the Association of Ameri-
can Medical Colleges.]

Urology Match
The American Urological Association (AUA) sponsors a match for
residency positions in urology only. Each year, about 350 applicants
compete for approximately 235 positions, virtually all of which are
filled through the AUA Match. AUA Match statistics, as well as gen-
eral information about the AUA matching process, can be found on
the AUA Residency Match Web site. Applicants are advised to re-
view the Web site information carefully.

The prerequisite training for a prospective urology resident is 1 or
2 years, preferably in a general surgery program. Because the
Urology Match does not offer GY1 positions, applicants obtain their
preliminary positions outside of the AUA Match. Some programs
have designated preliminary positions in the same institution for
applicants who match through the Urology Match; therefore, those
applicants do not have to go through a matching program to obtain
a GY1 position. Other programs require applicants to participate in
the NRMP Main Residency Match to obtain a position for prelimi-
nary training. Preliminary positions for US allopathic medical
school seniors must be offered through the NRMP Main Residency
Match.

The registration form and fee for the AUA Match are submitted
using an online form that can be accessed on the AUA Web site. The
Web site also lists participating programs and indicates whether
each uses ERAS or another method for receipt of applications. It is
important to note that registration for the AUA Match does not reg-
ister an applicant with ERAS, or vice versa.

The AUA Match ranking function is paper-based. Preference lists
must be submitted to the AUA Match by the first week in January,
and they cannot be changed after the deadline date. A sample pref-
erence list form can be printed from the AUA Match Web site, but it
must be sent by US Postal Service or fax to the AUA Match office.
As with the NRMP, the AUA Match uses an “applicant-proposing algo-
rithm,” and the AUA Match outcome is determined by applicants’
and programs’ preference lists. All matches are binding
commitments.

Applicants can register for the AUA Match as early as the spring
of the year prior to the AUA Match; the final registration deadline is
the first week of January. The period for submitting rank order lists
is December through the first week of January, and Match Day is in
the third week in January. Vacancies available after the AUA Match
may be listed on the phone-in AUA vacancy hotline. Unmatched ap-
plicants may make individual arrangements with programs that
have vacant positions.

Canadian Resident Matching Service
The Canadian Resident Matching Service (CaRMS) is a two-phased
match. The First Iteration Match is open to Canadian medical
school seniors and international medical graduates who are Cana-
dian citizens or permanent residents. They compete for approxi-
mately 2,600 positions. The Second Iteration Match is open to un-
matched Canadian students and applicants with prior North
American GME experience.

CaRMS receives directly from the Canadian medical schools a
list of current year graduates and automatically sends them a token
to access the Applicant Webstation. Independent applicants must
complete the online request for registration. Once eligibility has
been confirmed by CaRMS, an access token is sent by e-mail. Regis-
tration for the First Iteration match opens in August, and the appli-
cation process continues through the fall. The Applicant Webstation
opens for First Iteration Match participants in September, and for
those in the Second Iteration Match in January. For the First Ite-
ration Match, the ranking function opens in the beginning of Febru-
ary and closes on February 26, and Match Day is March 5. For the
Second Iteration Match, the ranking function opens in early April,
and Match Day is in mid-April.

CaRMS also allows couples to link their rank order lists so they
will match to programs suited to their needs. The partners enroll
individually in the CaRMS Match and indicate in the system that
they want to participate as a couple. Both partners of a couple must
submit the same number of ranks on their rank order lists. The couple
matches to the most preferred pair of programs on the rank or-
der order lists where each partner has been offered a position.
Match Outcomes

1. A Binding Commitment

It is the policy of every matching program that a match between an applicant and a program is a binding commitment. Failure to honor that commitment is a violation of the contract signed during the registration process. Penalties for violations vary among the matches. Some matches permit applicants to seek a waiver of their match commitment, either by mutual agreement of the applicant and program or by contacting the match office directly. The applicable rules are available on each match program’s Web site.

2. The “Early Matches”

Applicants participating in some early matches—the San Francisco Match and the AUA Urology Match—receive their match results in January or early February. In some cases, a preliminary position will be “held” by the same institution to which the applicant matched. In other cases, applicants who obtained positions through the early matches will be required to register for the NRMP Main Residency Match to secure a position for their preliminary training. (In all cases, US allopathic medical school seniors must participate in the NRMP for their preliminary positions.)

3. Unmatched “Early Match” Applicants

Applicants who do not match in one of the early matches may seek positions after the match concludes, using the list of available positions that is typically posted on the relevant matching program’s Web site.

The San Francisco Matching Program uses a Vacancy Information System that lists vacant post-Match positions, as well as positions that become available throughout the year. Applicants must complete the “Applying to Post Match Vacancies” form that is posted on the San Francisco Match Web site (www.sfmatch.org).

The AUA Urology Match posts vacancies in urology on its Web site (www.auanet.org/residents/resmatch.cfm) after the AUA Match concludes and throughout the year. Applicants must contact programs directly.

The NRMP begins to release the results of the Main Residency Match on Monday of Match Week, when applicants are told whether, but not to which programs, they have been matched. At Noon EST on Tuesday of Match Week, when the NRMP releases the list of unfilled programs, “the Scramble” begins. Information about vacant positions is posted to the NRMP R3 System (www.nrmp.org) in a “dynamic” format so that programs can delete positions from the list as they are filled. The list indicates how the program will receive applications: through ERAS or by e-mail or fax. The List of Unfilled Programs remains on the NRMP Web site until May 1.

After May 1, services such as FindAResident (www.aamc.org/findaresident) provide a continuously updated list of residency vacancies.

B. Information on Matching Programs

Military Matches

Positions in US military residency training programs are open only to applicants who are graduates of the Uniformed Services University of the Health Sciences (USUHS), medical students with an individual military commitment through the Health Professions Scholarship Programs (HPSP), and participants in the Reserve Officers Training Corps (ROTC). Although applicants and programs submit rank order lists, and applicants to Army and Navy programs apply through the Electronic Residency Application Service (ERAS) as their civilian counterparts do, only the Army uses a computerized matching process similar to the NRMP matching process to select residents. The Navy and the Air Force employ a scoring board, using applicant and program rank order lists to make their selections.

Decisions are made in early December, and results are sent to the NRMP so that applicants who registered for the NRMP Main Residency Match, but who obtained a military residency training position, can be withdrawn from the NRMP. Applicants who have been notified by the military in early December that they are authorized to seek civilian deferred residency training can participate in the NRMP or another appropriate civilian matching program.

Couple’s Matching

Some matching programs, including the NRMP and CaRMS, offer the opportunity for two partners to link their rank order lists so that both residency applicants can match to programs suited to their needs. The partners enroll individually in the match and indicate that they want to be in the match as a couple. They form pairs of choices on their rank order lists, which are then considered in rank on the program’s Web site.

Applicants, therefore, should not accept advice to try to find out about another match under the guise of creating a “couple’s match,” since that attempt would represent a match violation. More specifically, a matching program may advise an applicant that it offers a couple’s match when a couple’s match is not possible. When two partners participate in different matching programs, they cannot link rank order lists between matches. If one matching program requests that an applicant’s partner contact a residency program that participates in another match in order to inquire about the likelihood of matching, the partner is being asked to violate the terms of that match. Almost every match contract prohibits applicants and programs from inquiring about how one plans to rank the other. Consequently, when partners participate in different matches, the only way to ensure that both partners will match to programs in the same geographic region is for the partner participating in the later match to rank only programs in the same geographic area in which the partner in the earlier match obtained a position.
C. GME Information for IMGs

Entry of Foreign-Born Medical Graduates to the United States

[Note: The following information is provided by Catheryn Cotten, Director, Duke University and Medical Center International Office.]

The entry of foreign-born graduates of non-US medical schools to the United States is governed by the US Immigration and Nationality Act (INA), as amended, which is administered by the US Department of Homeland Security (DHS), the US Department of State (DOS), the US Department of Labor (DOL), and other departments and agencies specified in the Act. It is a violation of federal law to provide employment to a non-US citizen who does not hold employment authorization in the US. Federal law also places special restrictions on the activities, training, and employment of foreign physicians. Residency program directors considering foreign-born international medical graduates (IMGs) should understand and consider these limitations. The most common nonimmigrant classifications that permit training are the exchange visitor (J-1), and the temporary worker (H-1B). Lawful Permanent Resident (LPR or “green card”) status permits general work, including a residency, as do certain DHS-issued work permits. Foreign-born IMGs must also hold the Standard Certificate of the Educational Commission for Foreign Medical Graduates for participation in a training program regardless of the immigration classification they may hold.

[Note: The following information is provided by the Educational Commission for Foreign Medical Graduates.]

The Educational Commission for Foreign Medical Graduates (ECFMG®), through its program of certification, assesses the readiness of IMGs to enter US residency or fellowship programs that are accredited by the Accreditation Council for Graduate Medical Education (ACGME). The ECFMG and its organizational members provide employment to a non-US citizen who does not hold employment authorization in the US. Federal law also places special restrictions on the activities, training, and employment of foreign physicians. Residency program directors considering foreign-born international medical graduates (IMGs) should understand and consider these limitations. The most common nonimmigrant classifications that permit training are the exchange visitor (J-1), and the temporary worker (H-1B). Lawful Permanent Resident (LPR or “green card”) status permits general work, including a residency, as do certain DHS-issued work permits. Foreign-born IMGs must also hold the Standard Certificate of the Educational Commission for Foreign Medical Graduates for participation in a training program regardless of the immigration classification they may hold.

ECFMG Certification

ECFMG certification provides assurance to ACGME-accredited residency and fellowship program directors and to the people of the United States that IMGs have met minimum standards of eligibility required to enter such programs. ECFMG certification is one of the eligibility requirements to take Step 5 of the United States Medical Licensing Examination (USMLE), and is required to obtain an unrestricted license to practice medicine in the United States. To be certified by ECFMG, applicants must meet medical education credential requirements and examination requirements.

Medical Education Credential Requirements

1. Applicants must have had at least 4 credit years (academic years for which credit has been given toward completion of the medical curriculum) in attendance at a medical school that is listed in the FAIMER International Medical Education Directory (IMED). There are restrictions on credits transferred to the medical school that awards an applicant’s medical degree that can be used to meet this requirement. The physician’s graduation year must be included in the medical school’s IMED listing. (The FAIMER IMED contains information supplied by countries about their medical schools. FAIMER is not an accrediting agency.)

2. Applicants must document the completion of all requirements for, and receipt of, the final medical diploma. ECFMG verifies every applicant’s medical diploma with the appropriate officials of the medical school that issued the diploma. When ECFMG sends the medical diploma to the medical school for verification, ECFMG requests that the medical school include the applicant’s final medical school transcript when the school returns the verification of the medical diploma to ECFMG. Verification by ECFMG with the issuing school may also be required for transcripts that are submitted by applicants to document transferred academic credits. ECFMG medical education credential requirements are not fulfilled until verification of the final medical diploma, final medical school transcript, and, if required, transfer credit transcript(s) are received directly from the issuing school(s) and accepted by ECFMG.

Examination Requirements

The examination requirements for ECFMG certification include passing Step 1 and Step 2 of the USMLE. The Step 2 exam has two components, the clinical knowledge (CK) component and the clinical skills (CS) component. To meet the examination requirements for ECFMG certification, applicants must:

1. Satisfy the medical science examination requirement. Step 1 and Step 2 CK of the USMLE are the exams currently administered that satisfy this requirement. To meet the medical science examination requirement for ECFMG certification, applicants must pass both Step 1 and Step 2 CK within a specified period of time. See Time Limit for Completing Examination Requirements, below.

Examinations Accepted for ECFMG Certification:
The ECFMG also accepts a passing performance on the following former examinations to satisfy the medical science examination requirement for ECFMG certification, for ECFMG examinations, Visa Qualifying Examination (VQE), Foreign Medical Graduate Examination in the Medical Sciences (FMGE), and Part I and Part II Examinations of the National Board of Medical Examiners (NBME). Additionally, the ECFMG accepts, for the purpose of its certification, a score of 75 or higher on each of the 3 days of a single administration of the former Federation Licensing Examination (FLEX), if taken prior to June 1985. Certain combinations of examinations are also acceptable. Applicants who have passed only part of the former VQE, FMGE, or the NBME Part I or Part II may combine a passing performance on the basic medical science component of one of these examinations or USMLE Step 2 CK, provided that the components are passed within the period specified for the examination program. While these examination combinations are accepted by the ECFMG for its certification, applicants should be aware that after December 31, 1999, use of portions of FLEX or portions of the Part examination sequence of the NBME to fulfill the eligibility requirements for USMLE Step 3 is no longer accepted. Additionally, although the ECFMG Examination and FLEX, if taken prior to June 1985, satisfy the medical science examination requirement for ECFMG certification, they have
not been recognized by the US Secretary of Health and Human Services as meeting the medical science examination requirement to obtain a visa to enter the United States (see below).

2. Satisfy the clinical skills requirement. Step 2 CS of the USMLE is the exam currently administered that satisfies the clinical skills requirement for ECFMG certification. Specific time limits for passing Step 2 CS for ECFMG certification may apply. See Time Limit for Completing Examination Requirements.

**Former Examinations Accepted for ECFMG Certification:**

Applicants who have both passed the former ECFMG Clinical Skills Assessment (CSA®) and achieved a score acceptable to ECFMG on an English language proficiency test (such as the Test of English as a Foreign Language [TOEFL] exam or the former ECFMG English Test) can use these passing performances to satisfy the clinical skills requirement.

**Time Limit for Completing Examination Requirements**

*Note: These policies apply only to ECFMG certification.* The USMLE program recommends to state medical licensing authorities that they require applicants to pass the full USMLE sequence (including Step 5, which is not required for ECFMG certification) within a 7-year period. The USMLE program also recommends to state medical licensing authorities a limit on the number of attempts allowed to pass each Step or Step Component. (Refer to Time Limit and Number of Attempts Allowed to Complete All Steps and Retakes in the USMLE Bulletin of Information.) Additionally, applicants who retake a previously passed Step or Step Component to comply with a time limit should understand the implications for applicants who retake a previously passed Step or Step Component.

**Clinical Skills Examinations:**

For applicants who satisfy the clinical skills requirement for ECFMG certification by passing Step 2 CS, this passing performance is not subject to expiration for the purpose of entering GME programs.

For applicants who satisfied the clinical skills requirement for ECFMG certification by passing the former ECFMG CSA and an English language proficiency test, passing performance on the CSA remains valid for entry into GME programs.

ECFMG policy requires that applicants pass those USMLE Steps or Step Components required for ECFMG certification within a 7-year period. Once an applicant passes a Step or Step Component, the applicant will have 7 years to pass the other Step(s) or Step Component(s) required for ECFMG certification. This 7-year period begins on the exam date for the first Step or Step Component passed and ends exactly 7 years from this exam date. If an applicant does not pass all required Steps and Step Components within a maximum of 7 years, the applicant’s earliest USMLE passing performance will no longer be valid for ECFMG certification.

This 7-year limit does not apply to the former ECFMG CSA, because the CSA was not a USMLE Step or Step Component. Applicants who satisfied the clinical skills requirement for ECFMG certification by passing the CSA are required to pass only Step 1 and Step 2 CK within a 7-year period for ECFMG certification. For these applicants, the 7-year period begins on the date the first USMLE Step or Step Component is taken and passed, regardless of when the CSA was passed.

On June 14, 2004, USMLE Step 2 CS became a requirement for ECFMG certification, replacing the ECFMG CSA as the exam that satisfies the clinical skills requirement. As part of the USMLE, Step 2 CS may be subject to the 7-year time limit for ECFMG certification as described below.

**Earliest USMLE Passing Performance Before June 15, 2004**

If an applicant’s earliest USMLE passing performance that is valid for ECFMG certification took place before June 14, 2004, the applicant is required to pass only Step 1 and Step 2 CK within a 7-year period for ECFMG certification; if required for ECFMG certification, Step 2 CS can be passed outside the 7-year period.

**Earliest USMLE Passing Performance on or After June 14, 2004**

If an applicant’s earliest USMLE passing performance that is valid for ECFMG certification took place on or after June 14, 2004, the applicant is required to pass Step 1, Step 2 CK, and, if required for ECFMG certification, Step 2 CS within a 7-year period for ECFMG certification.

**Standard ECFMG Certificate**

The Standard ECFMG Certificate is issued to applicants who fulfill the medical education credential requirements, meet the examination requirements, and clear their financial accounts with the ECFMG. The Standard ECFMG Certificate may be used for entry into accredited GME programs in the United States.

**Validity of Examinations for Entry Into Graduate Medical Education**

*Note: The following discussion of validity and expiration of examinations, and the “valid through” and “valid indefinitely” designations on the Standard ECFMG Certificate (if applicable), are relevant only for the purpose of entry into US GME programs. They do not pertain to eligibility for USMLE Step 3 or to any time limits imposed by medical licensing authorities or other entities for the completion of all USMLE Steps.*

**Clinical Skills Examinations:**

For applicants who satisfy the clinical skills requirement for ECFMG certification by passing Step 2 CS, this passing performance is not subject to expiration for the purpose of entering GME programs.

For applicants who satisfied the clinical skills requirement for ECFMG certification by passing the former ECFMG CSA and an English language proficiency test, passing performance on the CSA remains valid for entry into GME programs within 3 years from the date passed for the purpose of entering GME programs. The date through which passing performance on the CSA remains valid for entry into GME programs (the CSA “valid through” date) will be listed on the applicant’s Standard ECFMG Certificate. If the applicant entered a program before expiration of the valid through date, the applicant may request permanent validation. This means that the CSA date is no longer subject to expiration. To request permanent validation, the applicant and an authorized official of the training institution must complete a Request for Permanent Validation (Form 246). On receipt of this form, ECFMG will provide a permanent validation sticker to be affixed to the certificate. If an applicant who passed CSA before June 14, 2001, did not enter a GME program within 3 years of the CSA pass date, the applicant’s CSA passing performance has expired for the purpose of entering GME. Before entering a program, these applicants must pass Step 2 CS. Passing performance on Step 2 CS does not expire for the purpose of entry into GME.

**Passing performances on CSA administrations that took place before June 14, 2001, are valid for 3 years from the date passed for the purpose of entering GME programs. The date through which passing performance on the CSA remains valid for entry into GME (the CSA “valid through” date) will be listed on the applicant’s Standard ECFMG Certificate. If the applicant entered a program before expiration of the valid through date, the applicant may request permanent validation. This means that the CSA date is no longer subject to expiration. To request permanent validation, the applicant and an authorized official of the training institution must complete a Request for Permanent Validation (Form 246). On receipt of this form, ECFMG will provide a permanent validation sticker to be affixed to the certificate. If an applicant who passed CSA before June 14, 2001, did not enter a GME program within 3 years of the CSA pass date, the applicant’s CSA passing performance has expired for the purpose of entering GME. Before entering a program, these applicants must pass Step 2 CS. Passing performance on Step 2 CS does not expire for the purpose of entry into GME.

**Passing performances on CSA administrations that took place on or after June 14, 2001, are not subject to expiration for the purpose of entering GME programs. Applicants who are certified by ECFMG and whose Standard ECFMG Certificate lists a “valid through” date for an administration of the CSA that took place on or after June 14, 2001 may contact ECFMG for a permanent validation sticker.**

**English Examinations:** Passing performances on the English language proficiency test formerly required by ECFMG, regardless of the date passed, are not subject to expiration for the purpose of entering GME programs. Applicants who are certified by ECFMG and whose Standard ECFMG Certificate lists a “valid through” date for an English language proficiency test may contact ECFMG for a permanent validation sticker.

For further information on ECFMG certification, contact:
Visas (Immigration Status or Classifications) That Permit Graduate Medical Education or Training
[Note: The following information is provided by Catheryn Cotten, Director, Duke University and Medical Center International Office.]

The purpose of this section is to describe whether IMGs may engage in clinical training in the United States:

1. Educational preparation. The physician must meet the usual education, examination, and certification requirements described in the ACGME’s Essentials of Accredited Residencies in Graduate Medical Education for admission to a GME program.

2. State law requirements. The physician must meet state licensure requirements for the intended training in the intended venue.

3. Federal employment laws and regulations. The physician must hold visa documentation that not only meets federal requirements for employment in general, but also permits employment as a physician trainee.

In all cases of clinical training, the physician must meet the educational and licensure requirements (items 1 and 2). This section discusses the variations possible to meet the federal employment requirements (item 3).

The J-1 Exchange Visitor Program and ECFMG Sponsorship
The J-1 is a common visa class used by foreign national physicians who enter the United States to pursue programs of graduate medical education (GME) or training. The J-1 Exchange Visitor Program is administered by the US Department of State-Exchange Visitor Program (DOS-EVP) in accordance with the Code of Federal Regulations, 22 CFR Part 62. The objectives of the Exchange Visitor Program are to enhance international exchange and to promote mutual understanding between the people of the United States and other nations through the interchange of persons, knowledge, and skills. The DOS-EVP designates various US educational institutions and training organizations to serve as J-1 exchange visitor program sponsors. Each J-1 designation is designed for a specific educational purpose and may include authorization to sponsor foreign nationals in categories such as “professor,” “research scholar,” “short-term scholar,” “student,” or “alien physician.”

The DOS-EVP has designated ECFMG as the only organization authorized to sponsor foreign national physicians in J-1 status in the “alien physician” category. Physicians who enter the United States in J-1 status to participate in clinical programs of graduate medical education or training must do so in the “alien physician” category under ECFMG sponsorship. According to federal regulations, a program of graduate medical education or training may include a medical specialty, a directly related medical subspecialty, or both [(INA 101(a)(15)(j), INA 212(j), 22 CFR 62.27].

Foreign national physicians seeking ECFMG sponsorship as J-1 exchange visitors for enrollment in programs of graduate medical education or training in the United States must meet, among other requirements, a number of general requirements, which are detailed in the ECFMG’s application materials for J-1 visa sponsorship. At a minimum, applicants must:

- Have passed USMLE Step 1 and Step 2 CK and CS; or the former VQE, NBME Part I and Part II, or FMGE; or an acceptable combination thereof, as specified by ECFMG
- Hold a Standard ECFMG Certificate without expired examination dates, if applicable [Note: See Validity of Examinations for Entry into Graduate Medical Education, above, for important information.]
- Hold a contract or an official letter of offer for a position in a program of graduate medical education or training that is affiliated with a medical school
- Provide a Statement of Need from the Ministry of Health of the country of most recent legal permanent residence (LPR), regardless of country of citizenship. This statement provides written assurance that the country needs physicians trained in the proposed specialty and/or subspecialty. It also serves to confirm the applicant physician’s commitment to return to that country upon completion of training in the United States, as required by §212(e) of the Immigration and Nationality Act, as amended.

ECFMG facilitates the visa sponsorship of physicians through the coordinated efforts of training institutions and the foreign national physicians. The host institution is responsible for providing the J-1 physician with the approved clinical training. Each host institution designates an individual to serve as the Training Program Liaison (TPL). The TPL cooperates with ECFMG by providing administrative oversight and ensuring regulatory compliance. Communication regarding all aspects of ECFMG sponsorship must be channeled through the TPL.

The US Government requires that all J program sponsors, including ECFMG, process visa sponsorship for J-1 exchange visitors and J-2 dependents through the Student and Exchange Visitor Information System (SEVIS). SEVIS is a national, Web-based monitoring system designed to assist educational institutions and government agencies in managing student and exchange visitor data. As the designated visa sponsor for J-1 physicians, ECFMG is required to interface directly with SEVIS. Host institutions/TPLs must communicate with ECFMG regarding arrival and any change in program activity for the ECFMG-sponsored physicians. GME programs do not have access to SEVIS for physician trainee sponsorship purposes.

Upon establishing an applicant’s eligibility, ECFMG creates or updates the SEVIS record and issues Form DS-2019, Certificate of Eligibility for Exchange Visitor (J-1) Status. Issuance of Form DS-2019 indicates that the TPL is eligible to apply for the J-1 visa. The DS-2019 is one of many factors considered by the US Government in determining visa eligibility. Policies and procedures vary and are subject to change. J-1 physicians are responsible for complying with all US laws and regulations pertaining to foreign nationals.

Issuance of DS-2019 reflects an approved application for training in a specific program. It is not transferable for participation in any other activity, program, or institution. J-1 sponsorship requires full time participation and progression in an approved training program. J-1 sponsorship is dependent on a valid GME contract, which is generally renewed on an annual basis.

Federal Regulations That Govern Exchange Visitor Physicians and Their Activities
Physicians who obtain J-1 status for the purpose of graduate medical education or training are obligated to comply with associated regulations. Following is a review of specific federal regulations governing the J-1 “alien physician” category. See 22 CFR 62.27 for complete regulations.

Duration of Participation
The duration of participation for exchange visitors in GME is the “time typically required” to complete the program. This generally refers to the minimum number of training years required by an ABMS member board for specialty or subspecialty certification and/or the accredited length of training as defined by the ACGME. Duration is further limited to 7 years, provided that the J-1 physi-
cian is advancing in an approved program of graduate medical education or training. The J-1 visa, however, does not entitle J-1 physicians to status as permanent residents. J-1 physicians are encouraged to consult with ECFMG regarding proposed educational pathways and sponsorship eligibility. GME programs should also contact the ECFMG directly to determine whether a particular training period can be sponsored completely in J-1 status. The director of the DOS-EVP may consider an extension beyond 7 years based on a documented exceptional need in an exchange visitor’s home country.

**Two-Year Home Country Physical Presence Requirement**

In accordance with Section 212(e) of the Immigration and Nationality Act, as amended, all J-1 exchange visitors who are sponsored by ECFMG for the purpose of graduate medical education or training (and all accompanying J-2 dependents) are automatically obligated to return to their country of last legal permanent residence for an aggregate of at least 2 years. At the initiation of J-1 sponsorship, J-1 applicants declare their country of last legal permanent residence and submit the corresponding Statement of Need, thereby committing themselves to return to that country. The 212(e) obligation may not be fulfilled in a different country. An individual must fulfill (or obtain a waiver of) this obligation before being eligible for an H, temporary worker visa; an L, intra-company transferee visa; an immigrant visa; or adjustment of status to US Lawful Permanent Resident (LPR or “green card”).

**Change of J-1 Category**

Each J-1 category defines the foreign national’s educational objective in coming to the US. The categories most often used by foreign national physicians are “research scholar,” “professor,” “short-term scholar,” “student,” and “alien physician.” Exchange Visitors may not, as a matter of course, change from one J-1 category to another. In rare cases, ECFMG petitions the DOS to request a change of J category. The regulations limit consideration to cases that clearly demonstrate that the proposed change in category is consistent with and closely related to the participant’s original exchange objective and necessary due to unusual or exceptional circumstances. [22CFR §62.41(a)](a)

**Training Authorization/Employment**

Federal regulations prohibit work, training, and/or financial compensation for activities that are outside of the approved exchange visitor program. In accredited programs of graduate medical education, the program curriculum is established by the ACGME. The J-1 physician “…who engages in unauthorized employment shall be deemed to be in violation of his or her program status and is subject to termination as a participant in an exchange visitor program” (22CFR 62.16). Furthermore, US employers who hire unauthorized foreign nationals are subject to penalties.

**Change of Specialty**

The regulations state that “...the alien physician may once, and not later than 2 years after the date the alien physician enters the US as an Exchange Visitor (or acquires exchange visitor status), change his/her designated program of graduate medical education or training.” [22CFR 62.27(a)](a). Once an Exchange Visitor enters the third year of sponsorship, a change of specialty is no longer permitted.

The Exchange Visitor Sponsorship Program is administered by ECFMG in accordance with the provisions set forth in a Memorandum of Understanding between ECFMG and the DOS-EVP and the federal regulations established to implement the Mutual Educational and Cultural Exchange Act. ECFMG is responsible to ensure that J-1 physicians and host institutions meet the federal requirements for participation. For additional information about the Exchange Visitor Sponsorship Program, contact:

**Temporary Worker H-1B**

The H-1B visa is for temporary workers in specialty occupations who hold professional-level degrees (bachelor’s degree minimum) appropriate to the employment in which they will be engaged. Between 1976 and 1991, graduates of foreign medical schools were not permitted to use the H-1B for residencies, except in cases where individuals were of national or international renown. The Immigration Act of 1990, and subsequent technical amendments, made the H-1B available to graduates of foreign medical schools who have passed FLEX or the equivalent, have passed an English language exam, and hold a license appropriate to the activity. The Secretary of the Department of Health and Human Services (HHS) has determined that USMLE Steps 1, 2, and 3 or the former NBME Parts I, II, and III are equivalent to FLEX for this purpose. The HHS regulation does not permit combinations of the USMLE and NBME for H-1B purposes; only the full series of one type of exam meets the H-1B requirement. For example, a physician who has passed Part I of the NBME and Steps 2 and 3 of the USMLE has not met the exam requirements for the H-1B because the types of exams differ. Individual states determine the level of licensure required for each level of clinical activity. For example, many states offer a limited or training license for residency training, and that limited or training license meets the licensure requirement for the H-1B.

The federal FLEX or equivalent examination requirement, coupled with the requirement in most states that physicians complete a certain amount of US training prior to admission to the third or final portion of the licensure exam, creates a difficult examination hurdle and limits the number of physicians who can qualify for and use the H-1B visa for clinical training. Note, however, that state licensing authorities set their own rules for administration of Step 3 of the USMLE. Some states permit IMGs to sit for the exam prior to receiving US training, but withhold full licensure until the IMG has completed training. For the purpose of meeting the examination requirement for the H-1B, the IMG may sit for Step 3 in any state, not necessarily the state in which he/she intends to train. In short, a physician may sit for Step 3 in state “X” and use that exam to meet the H-1B requirement for training in state “Y.” Some individuals and organizations believe that the J-1 visa is the only appropriate temporary visa for the purpose of graduate medical education and that programs should never use the H-1B. They cite the purpose of the J-1 (exchange visitor) classification, to provide foreign nationals with opportunities to participate in educational and cultural programs in the United States, as the basis for that belief. This is a matter of philosophy, not law. Any training program may, for its own reasons, elect to file or refrain from filing H-1B petitions for trainees. For their own reasons or at the request of the trainee, some GME programs will sponsor H-1B status, and others will not. The law subjects programs neither to prohibition nor obligation in this regard.

During the training years from July 1997 through June 2000, the annual statutory limit or “cap” on the number of H-1B approvals the US Government could issue each year made it difficult or impossible for trainees to get H-1B approval early enough to begin programs on time. Confronting this uncertainty and the disruption it caused in training and patient care, many GME programs that had previously offered the H-1B option changed their policies and declined to offer the H-1B. In October 2000, Congress passed an immi-
GME training purposes: may qualify for the national or international renown exemption. Physicians may have an established reputation at the specialty level and be exempt from the special examination requirements for the H-1B, but must meet licensure requirements for the intended training. Certification from a LCME-accredited Canadian medical schools are exempt from the FLEX (or equivalent) exam. The English exam associated with obtaining ECFMG certification normally meets that requirement.

There are some exceptions and special circumstances regarding the examination requirements for the H-1B. Graduates of LCME-accredited US medical schools are exempt from the FLEX (or equivalent) and English language examination requirements. Graduates of LCME-accredited Canadian medical schools are exempt from the English language exam, but not the FLEX (or equivalent) exam. Interestingly, full licensure in Canada based on Canadian examinations, which may be reciprocal for full licensure in a US state, is not equivalent to FLEX for H-1B purposes. The FLEX, or its equivalent (currently the USMLE Steps 1, 2, and 3), is still required even if these physicians hold full licensure in the state in which training will occur. Physicians of national or international renown are exempt from the special examination requirements for the H-1B, but must meet the usual examination and certification requirements described in the ACGME’s Essentials of Accredited Residencies in Graduate Medical Education for admission to a GME program and must meet licensure requirements for the intended training. Certain physicians admitted to subspecialty or upper-level GME programs may have an established reputation at the specialty level and may qualify for the national or international renown exemption.

GME program directors may wish to consider the key elements that differentiate the H-1B from J-1 under ECFMG sponsorship for GME training purposes:

- Processing methods and times. The ECFMG J-1 was specifically designed to facilitate GME training. (Note: The ECFMG does not process J-1 applications but rather J-1 sponsorship applications. In addition, the ECFMG issues the DS-2019, not the J-1 visa.) The ECFMG reserves 6 weeks to process a completed J-1 sponsorship application. The H-1B was designed to permit temporary employment in a number of professional areas. A petition must be filed with and approved by DHS for a physician to obtain H-1B status. The combined Department of Labor (DOL) and DHS processes can take 12-16 weeks or longer for approval of the H-1B petition.

For an additional Premium Processing Service (PPS) fee of $1,000, DHS will do its adjudication in 15 calendar days. PPS cannot speed up the DOL part of the process.

- Examination requirements. The documentation for the J-1 requires that the physician pass the USMLE, Steps 1 and 2 (or an equivalent exam). The documentation for the H-1B requires that the physician pass the USMLE, Steps 1, 2, and 3 (or an equivalent exam). Certain exceptions exist for H-1B visa purposes for physicians of national or international renown.

- Maximum duration. The J-1 has a maximum 7-year limit, provided the training is accredited or otherwise approved by DOS-EVP. The H-1B has a 6-year limit, but a break of 1 year can restart the 6-year clock.

- Nonstandard or very specialized programs. The DOS-EVP limits and controls the type and duration of programs and activities that ECFMG is permitted to sponsor. Longer programs that contain a research component or those doing training in new or unique procedures and techniques may be outside the range of sponsorship for the J-1. The H-1B relates to the general activities of the physician, not to the length of training required by the board or whether the training is accredited. Therefore, the H-1B can be used for extended or specialized programs that DOS-EVP does not permit ECFMG to sponsor on the J-1.

- Funding sources. The J-1 is designed for exchange. Funding can come from a variety of sources in addition to or instead of the training stipend. Sources might include government funds, funds from the hospital or employer in the home country, foreign or US grants from public or private sources, or personal funds. The H-1B is an employment-based classification. The funding must come from the US employer in the form of salary compensation, and it must meet a minimum wage level under DOL regulations.

- Two-year home country requirement. The J-1 subjects the physician to the 2-year home country physical presence requirement [INA 212(e) and 22 CFR 41.63]. The H-1B has no such requirement, thus making the H-1B an attractive alternative for those trainees who might be prospective faculty upon completion of training.

- Spouse/dependent employment. The J-2 spouse or child of a J-1 can apply to DHS for work permission. The H-4 spouse or child of an H-1B is not permitted to work while in H-4 status.

F-1 Student Optional Practical Training

The DHS may authorize students in F-1 status to engage in optional practical training (OPT) for up to 12 months after completion of studies, provided the appointment can be completed in 12 months. This OPT authorization is appropriate for the first or matched year, which is a 1-year contract. IGMS who receive US medical degrees while in F-1 status may apply to the DHS for OPT work authorization. If the DHS grants employment authorization, the individual may use that authorization for residency education for a period of 12 months. The F-1 "Designated School Official" (DSO) at the US medical school can usually provide information necessary to make employment eligibility determinations for these graduates. Note that graduation from a US PhD program does not permit OPT in graduate medical education, even though the student may hold a medical degree. The PhD prepares one for research but not for clinical practice, and the OPT must relate directly to the immediate past US degree, not to a prior degree. Program directors and physicians who plan to use the F-1 OPT for training should pay close attention to the dates of the OPT. Often these dates do not match the training program dates exactly. The student should work closely with the DSO and the program director to ensure that the OPT can cover the first full year of training. If the OPT expires before the end of the training year, the physician may not be able to complete the training year. At the end of the OPT period, the physician must

14 Graduate Medical Education Directory 2008-2009
Students who graduate from a US medical school in the J-1 “student” category are eligible for up to 36 months of Academic Training (AT) related to the field of study. These students may use their AT time for residency training. The J-1 exchange visitor program “Responsible Officer” (RO) at the medical school may authorize this work permission; it does not require DHS approval. Note that graduation from a US PhD program does not permit AT in graduate medical education, even though the student may hold a medical degree. The PhD prepares one for research but not for clinical practice, and the AT must relate directly to the immediate past US degree, not to a prior degree. Program directors and physicians who plan to use the J-1 AT for training should pay close attention to the dates of the AT. The student and RO have some flexibility as to the starting and ending dates of employment authorization within the regulatory parameters of the program. The student should work closely with the RO and the program director to ensure that the AT can cover the training appointment period. At the end of the AT period, the physician must acquire a different status, such as J-1 under ECFMG or H-1B, to continue training in the US.

Persons of Extraordinary Ability O-1

The O-1 is for persons of extraordinary ability as demonstrated by sustained national or international acclaim. Although rare at the GME level, it is possible and not unknown. In medicine most often this is someone who, as the definition indicates, has an established and exceptional reputation in a particular field based on original research or in development of specialized techniques for patient care. These physicians come into or remain in GME programs to apply their research clinically or to enhance or improve their techniques by acquiring related skills.

For J-1 physicians or those with a J-1 AT, the O-1 may provide an avenue for continuing education beyond those limits. An important characteristic of the O-1 is that the J-1 2-year home country physical presence requirement does not prevent one from obtaining O-1 status. That requirement’s restrictions apply only to obtaining H, L, and immigrant visas. For example, one can depart from the United States as a J-1 and return almost immediately as an O-1, provided an appropriate O-1 petition has been approved by DHS and an O-1 visa obtained at a post abroad. (See "J-1 Exchange Visitor Program and ECFMG Sponsorship" for information on the 2-year home country physical presence requirement.)

Obtaining the O-1 does not waive the home country physical presence requirement of the J-1 Exchange Visitor status. Regardless of how long one remains in the United States in O-1 status, the requirement continues to attach to the physician’s immigration status until the physician returns home for the requisite 2 years or obtains a waiver of that requirement. Nothing in the O-1 status ameliorates the prohibition against H, L, or permanent resident status.

As with the H-1B, the training program must file the O-1 petition with the DHS for a particular GME program at a particular location. The physician may work only for the employer who filed the petition in the capacity described in the petition. Unlike the H-1B, no special examination requirements apply to the O-1, other than those necessary for licensure at the appropriate level to perform the duties attendant to the position and described in the petition.

Employment Authorization from the Department of Homeland Security (DHS)

Immigration law empowers the DHS to grant employment authorization to certain nonimmigrants or intending immigrants. Such authorization is usually temporary and may have terms or conditions. Frequently, academic institutions sponsor professors, teachers, researchers, and students in J-1 status. J-2 dependents, the spouse or children of a J-1 exchange visitor, may apply to the DHS for work authorization. DHS generally grants that permission, provided the J-2 does not need to work to support the principal J-1. When granted, J-2 work authorization permits general employment, including residency training. Program directors should take special note that this employment authorization depends absolutely upon the J-1 exchange visitor maintaining status. If the J-1 leaves the United States or fails to maintain status, the J-2 work authorization ends, even though the spouse or child may hold a J-2 employment authorization document that appears to be valid. Extension of the J-2 work permission requires a new application to and approval from DHS. If the J-1 experiences delays in his/her extension, those delays cascade into delay of extension of status and of work permission for the J-2. The J-2 may have breaks in employment authorization due to these timing issues.

Other classifications or circumstances under which the DHS may grant work authorization include, but are not limited to, G-4 dependents of a foreign government employee in the United States, temporary protected status, voluntary departure, refugee, asylee, or certain lawful permanent resident applicants. Most employment authorization in these classifications permits general employment, including clinical training, but employers must evaluate the work authorization documents case by case.

In almost all cases the work authorization has a specific beginning and ending date, and work outside those dates is not permitted. The alien must apply for extension in a timely way to ensure continuous, unbroken work permission. If the current authorization expires and the DHS has not yet granted the extension authorization and issued the extension document, then the alien may have to stop work and wait for the extension approval. Unbroken continuation of work permission depends on the basis upon which DHS granted employment authorization initially and whether the alien files a timely application for extension. This characteristic of discontinuity of the employment authorization can cause serious interruptions in training if the alien fails to file for extension in a timely way or if documents are lost or delayed in DHS processing.

Occasionally, the DHS issues a blanket declaration that employers may consider some expired employment authorization documents to be valid for a period of time beyond the expiration date on the face of the document. This happens most often with those persons who have been granted humanitarian safe haven in the United States for a limited period of time through a number of different legal avenues. Prospective employers must evaluate these situations case-by-case.

Lawful Permanent Resident (LPR, Immigrant or “Green Card”) Status

Persons who hold lawful permanent resident (LPR) or “green card” status are permitted to remain in the United States permanently and to accept any employment.

Foreign-born IMGs may immigrate to the United States based on a relationship to a US citizen or lawful permanent resident, or based on employment and skills. In general, the rules for immigration are the same for IMGs as for any other immigrant, but special rules apply to physicians who immigrate based on their intention and ability to practice the profession of medicine, including practice at the residency level. Employment-based immigration based on a job offer for the practice of medicine requires that the physician pass the NBME Parts I and II examinations or the equivalent, as determined by the Secretary of the US Department of Health and Human Services. These are the same examinations needed for ECFMG sponsorship for clinical training and are included among the examinations accepted for ECFMG certification described ear-
lier. Certain examination exceptions apply to physicians who are of national or international renown.

Nonclinical Observation, Consultation, Teaching, and Research

Foreign national physicians who wish to enter the United States in J-1 status for research and nonclinical training may do so in programs involving observation, consultation, teaching, or research that involve “no patient care” or “incidental patient contact” related to one or more of these activities.

DOS has authorized ECFMG to sponsor foreign national physicians for this purpose under the J-1 “research scholar” category. Foreign national physicians applying for ECFMG sponsorship as J-1 research scholars must meet the requirements specified by ECFMG for that nonclinical sponsorship.

The DOS-EVP also authorizes universities and other health science institutions to sponsor foreign national physicians for these purposes in the categories of “professor,” “research scholar,” and “short-term scholar,” provided they will engage in activities that involve “no patient care” or only “incidental patient contact” as defined in the regulations. The “incidental patient contact” option allows physicians to be in clinical areas, but in no way permits clinical training or patient care. Physicians applying for sponsorship by a university or other similar institution should contact that program directly for specific requirements and procedures.

If physicians undertake these nonclinical activities in the “professor or research scholar” category, two important limitations apply.

• Limited Prior J Status. To begin such a program they must not have been physically present in the United States in J-1 or J-2 nonimmigrant status for more than 6 months during the 12-month period immediately preceding the new program start date [22 CFR 62.20(d)].

• Bar to Clinical Training. After completing a nonclinical program, they must wait 12 months before being eligible for ECFMG J-1 sponsorship for clinical training. [EVP Policy Statement. Federal Register 6-29-1999, pages 34982-34983.]

Exchange visitors in programs involving observation, consultation, teaching, or research may remain in the United States for a maximum of 5 years, with no extension beyond that time.

Physicians engaging in nonclinical research with no patient care may also use the H-1B. The H-1B for nonclinical activities does not require medical knowledge exams such as USMLE and generally should not require a medical license, as no patient care is involved.

Fifth Pathway Program

American Students in Foreign Medical Schools: The AMA’s “Fifth Pathway” Statement

1. A pathway for entrance to approved GME programs, other than those existing under previous policies, became available as of July 1, 1971, for students who have fulfilled the following conditions:

a. Have completed, in an accredited American college or university, undergraduate premedical work of the quality acceptable for matriculation in an accredited United States medical school, evaluated by measures such as college grade point average and scores on the Medical College Admission Test.

b. Have studied medicine at a medical school located outside the United States, Puerto Rico, and Canada that is listed in the International Medical Education Directory published by the Foundation for Advancement of International Medical Education and Research; see www.ecfmg.org for more information.

c. Have completed all of the formal requirements for a diploma of the foreign medical school except internship and/or social service. Those who have completed all of the formal graduation requirements, including internship and/or social service, and are, consequently, eligible to apply for ECFMG certification, are not eligible for the Fifth Pathway.

2. Students who have completed the academic curriculum at a foreign medical school and who have fulfilled the above conditions may be offered the opportunity to substitute an academic year of supervised clinical training for the internship/social service required by the foreign medical school. The supervised training should consist of the clinical education provided in the third year of a US medical school or in appropriate clinical subinternships. The supervised clinical training must be provided by faculty of a program in medical education accredited by the Liaison Committee on Medical Education and should be conducted in its affiliated hospitals, so as to assure that individuals who complete Fifth Pathway programs are reasonably comparable to the school’s regularly graduated students. The medical school should ensure that resources are adequate for the conduct of the Fifth Pathway program, without jeopardizing its other academic programs. Fifth Pathway education should be provided only with the written approval of the dean or other appropriate official of the medical school.
Graduate Medical Education Directory 2008-2009

3. Students must pass Step 1 of the United States Medical Licensing Examination (USMLE) in order to be eligible for admission to a Fifth Pathway program.

4. Students must successfully complete clinical training, on the judgment of the medical school’s faculty based on a final evaluation comparable to that used to judge regularly-enrolled students. With the approval of the faculty, and upon passing Step 2 of the USMLE, Fifth Pathway students are eligible to enter the first year of approved graduate medical education, without completing the social service and/or internship required by the foreign country and without obtaining ECFMG certification.

5. Fifth Pathway certificates must be provided only with the approval of the dean or other medical school official and must be recorded with the registrar. The medical school must notify the American Medical Association that a student has successfully completed the Fifth Pathway program.

6. The Council on Medical Education recommends that all state medical licensing boards consider for licensure all candidates who have successfully completed a Fifth Pathway program on the same basis as they consider candidates who have received ECFMG certification.

Fifth Pathway Requirements and Availability

At present, Fifth Pathway graduates must pass Step 1 and Step 2 Clinical Knowledge (Step 2 CK) as well as Step 2 Clinical Skills (Step 2 CS) of the USMLE for participation in the NRMP Matching Program.

Currently, three medical schools offer the Fifth Pathway in the United States:

- New York Medical College, Valhalla, New York. For more information, call 914 594-4490.
- Ponce Medical School, Puerto Rico; 787 844-3710.

Fifth Pathway Web Site

The AMA has a Web site on the Fifth Pathway that answers many questions about the program, including:

- What is a Pathway?
- What is the Fifth Pathway?
- Who can qualify for a Fifth Pathway?
- How are Fifth Pathway students different from International Medical Graduates?
- How can I verify a physician’s Fifth Pathway credentials?
- Current programs

The site is available at:

www.ama-assn.org/ama/pub/category/9306.html

The Fifth Pathway to Residency Education: A Brief History

At the AMA annual meeting in July 1971, the AMA Council on Medical Education adopted a policy, “A New Pathway for Entrance to AMA Approved Internship and Residency Programs.” This policy established a new route, or pathway, to residency training for graduates of foreign medical schools. This route came to be called the Fifth Pathway, a name adopted because there were already four pathways to residency education: transfer to and graduation from a US medical school, ECFMG certification, full and unrestricted licensure by a US licensing jurisdiction, and passing the Spanish language licensing examination in Puerto Rico.

The new AMA policy resolved a controversy surrounding access to residency and practice for a group of US citizens who had studied medicine in Mexico but were unable to meet all the requirements for certification by the ECFMG. Medical education in Mexico, then and now, includes a period of internship and government social service after a student has completed the academic requirements of a medical school. Many of the US citizens who had completed the medical school academic requirements were not successful in finding internship appointments and, consequently, could not be provided with a final diploma, required for ECFMG certification. These students and their parents believed that since they had completed the required 4 years of medical school education, they were being unfairly deprived of entry to residency training and practice in the United States.

The Fifth Pathway program got under way almost immediately after the Council policy statement was issued, with five Fifth Pathway clerkship programs under way by early 1972. Eventually, 45 medical schools in 26 states and in three Canadian provinces offered the Fifth Pathway clerkship. The numerical peak of the Fifth Pathway was in 1980, when 546 Fifth Pathway physicians completed medical school.

The number of US medical schools providing the clerkship declined over the years: By 1991, only the University of California, Irvine, Mount Sinai School of Medicine in New York, and New York Medical College in Valhalla offered the clerkship. As of 2007, New York Medical College, Ponce Medical School, and Mount Sinai School of Medicine in New York University offer the Fifth Pathway program.

By far the largest number of Fifth Pathway physicians have come from the Autonomous University of Guadalajara. Most of the other Fifth Pathway graduates are also from Mexican medical schools or from other Latin American schools. Fifth Pathway physicians are involved in every aspect of medical practice, that is, in direct patient care and medical teaching, administration, and research. They are also spread throughout the major medical specialties and a number of subspecialties, such as neonatal perinatal medicine, sports medicine, and addiction psychiatry, although they are not well represented in the preventive medicine specialties. The largest number of Fifth Pathway physicians practice in New York, California, and New Jersey.

The AMA has maintained a list of the US medical schools that have provided Fifth Pathway clerkships, as well as a list of physicians who have completed Fifth Pathway education at those schools, and Fifth Pathway information is included in the AMA Masterfile. As of June 30, 2009, through action of the AMA Council on Medical Education (CME Report 1-I-07, available at: www.ama-assn.org/ama/pub/category/18155.html), the Fifth Pathway will be discontinued. The Council will no longer support the Fifth Pathway as a mechanism for eligibility to enter the first year of ACGME-accredited graduate medical education programs. The AMA will continue to maintain record of former graduates of Fifth Pathway programs, but will cease to add records of individuals completing a year of supervised clinical education at an LCME-accredited medical school in the US after July 1, 2009, although entrants beginning in January 2009 will be included.

www.ama-assn.org/ama/pub/category/9306.html

AMA International Medical Graduates Section

The International Medical Graduates Section (IMG) of the AMA advocates for IMG physicians by enhancing their participation in organized medicine, increasing AMA communication and interchange among IMGs, and studying issues of concern to IMGs such as the
impact of IMGs on the physician workforce. An IMG member of the AMA is automatically a member of the IMG Section and can participate in the Section’s annual elections and Caucus activities. The IMG Section is dedicated to improving opportunities for IMGs in the areas of licensure, training, and practicing medicine in the US. The IMG Section Web site contains information of interest to IMGs, including:

- ECFMG certification
- Immigration
- Residency program requirements, including application tips and interview hints
- State licensure board requirements for IMGs
- IMG Governing Council and leadership opportunities
- IMG policies related to IMGs and IMG issues
- Significant dates in US immigration policy affecting IMGs
- IMG physician demographics
- History and development of the AMA IMG Section

D. AMA Medical Education Products, Services, and Activities

Note: For a Reference List of AMA Contacts and Web Sites, see the QuickConsult insert included with this publication.

AMA Council on Medical Education
Recognizing the relationship between quality medical education and quality health care, the AMA established the Council on Medical Education in 1904 to formulate and implement policy. After studying and evaluating medical education across the continuum, the current Council recommends educational policies and standards to the AMA House of Delegates (HOD) and to the medical education community. The council also prepares numerous reports responding to AMA HOD actions and initiates relevant studies in areas of high concern to the educational community. For example, recent initiatives have focused on:

- The need for workforce policy that supports an adequate continuing supply of well-qualified physicians to meet the medical needs of the public
- Medical student debt and its possible influence on the decision to apply to medical school and on the career choices of graduates
- Resident working conditions, duty hours and the impact of sleep deprivation and fatigue on medical student and resident education and patient safety

The council also reviews and recommends nominees to the AMA Board of Trustees for appointment or nomination to accrediting bodies, specialty-certifying boards and other national organizations.

Key Dates in the History of the Council on Medical Education and GME

1847 American Medical Association organized; Committee on Medical Education appointed
1901 First publication of the Annual Medical Education issue of the Journal of the American Medical Association
1904 Formation of the Council on Medical Education
1910 Publication of “Flexner Report” evaluating medical schools
1912 First survey of hospitals for the training of interns
1914 First publication of what was to become the GME Directory, as the Provisional List of Hospitals Furnishing Acceptable Internships for Medical Graduates (15 cents per copy)
1919 Establishment of the Essentials for Approved Internships
1927 Beginning of approval of residency programs in hospitals; publication of Hospitals Approved for Residencies in Specialties, with 270 hospitals in 14 different specialties
1928 Establishment of Essentials for registered hospitals and for approved residencies and fellowships
1934 Approval of examining boards for the certification of specialists; establishment of standards for the formation of American boards in the specialties
1948 Establishment of the Liaison Committee for Specialty Boards between the AMA Council on Medical Education and Advisory Board for Medical Specialties
1949 Conference Committee on Internal Medicine, established in 1939, reactivated
1950 Conference Committee on Graduate Training in Surgery established
1951 First operation of the National Intern Matching Program
AMA Medical Education Group

The AMA Medical Education Group, under the guidance of the Council on Medical Education and the Section on Medical Schools, supports the development, promulgation, and implementation of policies that fulfill the profession’s responsibility to ensure the competence of its members.

The group facilitates the development of national medical education policy, collects survey data, and widely disseminates information on undergraduate, graduate, and continuing medical education as well as educational programs in 71 health-related professions. The group serves as a valuable resource for physicians, educators, policymakers, researchers, and the public.

National GME Census

The National GME Census is a joint effort of the AMA and the Association of American Medical Colleges (AAMC) and replaces the AMA Annual Survey of GME Programs. Every summer, all programs accredited by the ACGME and combined specialty programs approved by their respective boards are asked to complete this online census, available at www.aamc.org/gmetrack. The census collects data on program characteristics, such as program size, work hours, program evaluation, educational characteristics, and health benefits. GME program directors also confirm or edit information about individual residents and provide information on new residents, if necessary. These data are stored in the AMA Physician Masterfile and are used to verify the education and training credentials of physicians. Program data are used to update listings in FREIDA Online and Appendix A of the Graduate Medical Education Directory. During the 2007 survey cycle, 90% of programs completed the census as of January 31, 2008, either online via the AAMC Web site or by completing a paper survey.

Medical Education Issue of JAMA

Every September, the Journal of the American Medical Association (JAMA) publishes a special issue on medical education. The GME tables in the appendix are based on data collected through the National GME Census. Program directors, specialty societies, and health workforce researchers and planners at national and state levels all rely on the data published in this issue of JAMA. The contributions of program directors to the Census are very important to the provision of accurate and timely data to the GME community. Program directors’ early and complete participation in the Census is thus strongly encouraged and appreciated; without the information they provide, such reporting on GME data would be difficult, if not impossible.

The September 5, 2007 issue included:
D. AMA Medical Education Products, Services, and Activities

- Mortality Among Hospitalized Medicare Beneficiaries in the First 2 Years Following ACGME Resident Duty Hour Reform
- Mortality Among Patients in VA Hospitals in the First 2 Years Following ACGME Resident Duty Hour Reform
- Physician Scores on a National Clinical Skills Examination as Predictors of Complaints to Medical Regulatory Authorities
- Association Between Funding and Quality of Published Medical Education Research
- Medicine Residents’ Understanding of the Biostatistics and Results in the Medical Literature
- Effectiveness of Teaching Quality Improvement to Clinicians: A Systematic Review
- Trends in Study Methods Used in Undergraduate Medical Education Research, 1969-2007
- Justifying Patient Risks Associated With Medical Education
- Evaluating Medical Training Programs by the Quality of Care Delivered by Their Alumni
- Medical Education in Post-Katrina New Orleans: A Story of Survival and Renewal
- Evaluating Resident Duty Hour Reforms: More Work to Do
- The Value of Assessing and Addressing Communication Skills
- Teaching Quality Improvement: The Devil Is in the Details

www.jama.com

Medical Education Data Service, Mailing Labels
The AMA Medical Education Data Service provides published information, existing tables, custom tables, electronic data and mailing labels to students, educational institutions, professional associations, government agencies, foundations and others interested in collecting, analyzing and disseminating medical education data. Requests for data are screened for merit and must include the purpose of the project, specific data service requested, expected due date for data, and name, address, phone and fax number of the project contact. When requests require staff contribution or organizational overhead, a fee is assessed; program directors requesting data receive a substantial discount.

Electronic State-level GME Data
The AMA offers aggregate statistics for each state on all resident physicians, in Adobe Acrobat format. There are six different tables for each state, including Puerto Rico and the District of Columbia, as well as a set of six tables for the United States:
- Total Number of Resident Physicians and Program Year 1 Resident Physicians in GME Programs
- Resident Physicians by Type of Medical School Attended
- Resident Physicians by Gender and Race/Ethnicity
- Resident Physicians Without Prior US GME in GY1 Positions by Type of Medical School Attended
- Resident Physicians Who Completed a Graduate Medical Education Program or Completed a Preliminary Year
- Plans of Resident Physicians Completing a Program

Information
For more information on these tables, or for inquiries about other GME data, contact
AMA Data Acquisition Services
312 464-4487
Price for state-level GME data is $20 to $50 (based on number of states ordered). To order, contact:
Jackie Edwards
312 464-4659

GME e-Letter
The GME e-Letter, a free monthly e-mail newsletter from the AMA, is a popular source of news and information for the GME community. Comments from subscribers include:
- “Clear, concise, and relevant!”
- “Very useful since it is focused, brief and contains information of importance to program directors.”
- “Loved the e-letter. Thought it was well-written, informative and appropriately succinct.”
- “A great resource and the best way to share cutting-edge news re: GME.”

Since its debut in May 2001, the GME e-Letter has grown to encompass more than 13,000 subscribers, including:
- Program directors and staff of residency and fellowship programs
- Hospital administrators
- Professional associations
- Certifying/licensing boards
- Physician recruiters
- Governmental and regulatory organizations

The e-Letter covers a wide range of issues affecting GME—everything from resident work hours and pharmaceutical industry access to residency programs to updates on accreditation activities and development of new subspecialties. The publication also references peer-reviewed studies and articles in the medical literature that are related to GME.

GME Articles from American Medical News
American Medical News (AMNews) is a weekly newspaper for physicians, published by the AMA, that covers professional, educational, social, economic, and policy issues in medicine. AMNews frequently covers key issues in medical education; recent articles, for example, include:
- California medical schools tailor programs for diverse populations
- Personality can guide specialty choice
- Proposed law would rework residency spending to increase primary care
- Student loan deferment program restored — for now

www.ama-assn.org/go/enews

20 Graduate Medical Education Directory 2008-2009
Lack of supervision add to resident errors, study finds
Record number vied for 2007-08 medical school slots
We have more students. Now what?
More residents, more subspecialization
Online open house may be a first in recruiting residents
First for-profit med school nears approval
Links to these and other articles of specific interest to academic physicians, program directors, medical students, and physicians in training are available free of charge at www.ama-assn.org/ama/pub/category/8731.html.

Medical Education Bulletin
The Medical Education Bulletin is a newsletter published twice a year by the AMA Medical Education Group. It covers issues of interest to the undergraduate and graduate medical education community, including updates on AMA actions related to medical education at the annual and interim meetings of the AMA House of Delegates.

Recent issues have included such articles as:
• AMA House of Delegates Actions, 2007 Annual Meeting
• Innovative strategies for transforming the education of physicians
• National Disaster Life Support Education Consortium
• Coalition for Physician Enhancement

The Bulletin is mailed to GME program directors, medical education directors at teaching hospitals, members of the Section on Medical Schools, medical school deans, and the AMA appointees to the Residency Review Committees.

AMA Introduction to the Practice of Medicine Educational Series
The AMA is offering the Introduction to the Practice of Medicine (IPM) program, a Web-based educational series developed through collaboration with the Ohio State Medical Association and The Ohio State University Medical Center. The series is designed to help meet the dual challenges of educating residents in ACGME general competency requirements and supplementing their education in a variety of nontraditional curricular topics. IPM features include:
• 24/7 accessibility, so residents can complete the modules and post-assessments at their own convenience.
• Easy navigation, with quick and easy access to learning modules, assessments, reports and a host of other features.
• Comprehensive library of more than 20 learning modules, assembled by experts from across the country, covering such topics as Health Care Quality, Physician Employment Contracts, and Sleep Deprivation, with more modules under construction. Each module includes a formal lecture, post-assessment, evaluation, and course certificate of completion.
• Extensive reporting features, making it simple to track and document progress. The IPM features easy-to-use tools for GME departments to seamlessly track how their institutions—and residents—are using the program. Reports can be produced to show which residents have completed each module and how they scored on each post-assessment. Administrators can view aggregate evaluation scores to measure performance at the resident, program, and institution level. These documentation capabilities can present a real-time picture of an institution’s overall progress toward fulfilling competency requirements.

AMA Continuing Medical Education
Advances in biomedical science and changes in the other facets of the US health care delivery environment engage physicians in a continuous process of professional development. To ensure that they provide patients with the most current and appropriate treatment, services, and information, physicians keep learning through participation in a wide array of conferences and other teaching experiences, as well as through independent study of published materials. The AMA supports these physician efforts by:
• Administering the only nonspecialty-specific credit system that recognizes physician completion of continuing medical education (CME) activities
• Offering CME publications and programs (both conferences and enduring materials, such as monographs and course materials)
• Establishing new learning modalities (performance improvement and Internet point of care) appropriate for physician professional development and investigating international opportunities for reciprocal CME relationships

The AMA Physician’s Recognition Award
In 1968, the AMA House of Delegates established the AMA Physician’s Recognition Award (PRA) to both encourage physicians to participate in CME and acknowledge when individual physicians complete CME activities. Activities that meet education standards established by the AMA can be designated AMA PRA Category 1 Credit™ by educational institutions accredited by the Accreditation

Guidebook for GME Directors and Coordinators
Published by the AMA Division of Graduate Medical Education, this 70-page guidebook provides residency/fellowship program directors, program coordinators, institution officials, and others information about AMA services, products, and activities related to GME. Also included are descriptions of and contact information for a number of organizations involved in GME, including American Board of Medical Specialties (ABMS) certification boards and medical licensing boards.

TheAMA PRA application form and the new Physician's Recognition Award and Credit System Information Booklet (2006 revision) are available via: Department of Accreditation and Certification Activities Continuing Physician Professional Development 312 464-4941 312 464-4567 fax E-mail: pra@ama-assn.org www.ama-assn.org/go/prabooklet and www.ama-assn.org/go/applypra For bulk orders of the booklet, contact the AMA at 800 621-8335.

AMAPRA Rules for Performance Improvement and Internet Point of Care (PoC) CME

In 2004, the AMA Council on Medical Education approved new rules governing how Performance Improvement (PI) activities could be conducted for AMAPRA Category 1 Credit. Performance improvement activities described structured, long-term processes by which a physician or group of physicians can learn about specific performance measures, retrospectively assess their practice, apply these measures prospectively over a useful interval, and reevaluate their performance. The AMA helped the ACCME develop guidance for providers on how to implement the requirements for this format to develop effective PI activities.

Similarly, in 2005, the Council approved new rules governing how Internet PoC CME activities could be conducted for AMAPRA Category 1 Credit. Internet PoC CME describes a process developed by accredited CME providers that provides structured, self-directed, online learning by physicians on topics relevant to their clinical practice. Learning for this activity is driven by a reflective process in which physicians must document their clinical question, the sources consulted, and the application to practice for the accredited CME provider. The AMA also assisted the ACCME in developing guidance for providers on how to implement the requirements for this format.

For more information on either of these two new formats, visit www.ama-assn.org/go/ethicalgifts. Each module is rich with case examples. An overview of ethical, professional, and legal issues for physicians' relationships with industry

Gifts to Physicians from Industry

Starting in 2001, the AMA led this initiative to create awareness among physicians and physicians-in-training about the ethical implications of receiving gifts from industry.

The initiative consists of a series of four free online educational modules available at www.ama-assn.org/go/ethicalgifts. Each module presents important general concepts, then uses gifts as the context to illustrate the idea. Every module is rich with case examples. The educational modules will also help satisfy the requirements from the Accreditation Council for Graduate Medical Education (ACGME) for education on professionalism as one of the six competencies expected of residents in training.

The four educational modules cover these topics:

- An overview of ethical, professional, and legal issues for physicians' relationships with industry
- Physicians’ expectations from industry and sales personnel
- Professionalism, including the issues of gifts to physicians from industry
- The AMA guidelines on gifts to physicians from industry
  Using the Internet, each module is available in two formats at no cost and with 24-hour access:
  • Downloadable resource materials for instructors, at any level of medical education, to use to build 1-hour learning experiences. Materials include a presenter’s guide, PowerPoint slides, and a participant’s handout. CME providers can adapt these resources for use in their local sites.
  • Online self-study modules designed for individual learners, designated for AMA PRA Category 1 Credit.

The material in the educational modules is based on the 1990 AMA Council on Ethical and Judicial Affairs (CEJA) Opinion 8.061, “Gifts to Physicians from Industry,” which is part of the AMA Code of Medical Ethics. There are no new policies or guidelines in the modules.

The modules also refer to the Pharmaceutical Research and Manufacturers of America (PhRMA) guidelines, as well as those developed by other medical, industry, and government groups, as appropriate, to give a broad-based understanding of the issues involved in the ethics of gift giving. The PhRMA code and others are very similar in spirit and substance to the AMA Ethical Opinion. The recent guidance to pharmaceutical and device companies by the Office of the Inspector General is provided as a reference.

Virtual Mentor

Virtual Mentor is the AMA’S online ethics journal. Published since 1999, Virtual Mentor (VM) explores the ethical issues and challenges that students, residents, and other physicians are likely to confront in their training and daily practice. For this reason, the journal is a valuable teaching resource for medical educators at all levels as well as for doctors and doctors-to-be. Each monthly issue of VM contains original articles and commentary on a given theme—e.g., access to care, quality of life considerations in clinical decisionmaking, public roles of physicians, ethical issues in endocrinology, conflict of values in the clinic.

Virtual Mentor is student- and resident-driven. Theme issue editors are selected each year through a competitive process from among medical students and residents who seek to broaden and deepen their education by taking the time to examine medicine’s ever-increasing ethical challenges. The issue editors meet annually with VM editorial staff, based in Chicago, where we discuss potential topics for the upcoming year. Each editor identifies a theme and month of publication for his or her issue and then solicits articles and case commentary from experienced physicians and other experts in the field who can help VM readers think productively about the topic under discussion. The application process for theme issue editors is announced in VM each September.

Virtual Mentor is also home to the John Conley Ethics Essay Contest, publishing the winning student essay in an appropriately themed issue of VM. Announcement of the annual Conley Contest topic and instructions for entering appear in the February VM.

Themes for upcoming issues of VM are listed at the bottom of each month’s home page. If you have expertise in a field or topic that will be a VM focus in the future and you would like to contribute to the journal, contact VM at virtualmentor@ama-assn.org.

GME Information
D. AMA Medical Education Products, Services, and Activities
Graduate Medical Education Directory 2008-2009 23
E. GME-related Organizations

Accreditation Council for Graduate Medical Education (ACGME)

The Accreditation Council for Graduate Medical Education (ACGME) is a separately incorporated organization, responsible for the accreditation of more than 8,500 allopathic graduate medical education programs. It has five member organizations:

- American Board of Medical Specialties
- American Hospital Association
- American Medical Association
- Association of American Medical Colleges
- Council of Medical Specialty Societies

Each member organization nominates four individuals to the ACGME’s Board of Directors. In addition, the Board of Directors includes three public representatives, two resident representatives, and the chair of the Council of Review Committee Chairs. A representative for the federal government also serves on the Board in a non-voting capacity.

The mission of the ACGME is to improve health care by assessing and advancing the quality of resident physicians’ education through accreditation. The ACGME’s vision is exemplary accreditation and its values are:

- Accountability through processes and results that are open and transparent; responsive to the educational community and the health care community; and reliable, valid, and consistent.
- Excellence through accreditation that is efficient and effective, outcomes-based, improvement-oriented, and innovative.
- Professionalism through actions that are respectful and collaborative, responsible, ethical, and fair.

Under the aegis of the ACGME, the accreditation of graduate medical education programs and the institutions that sponsor them is carried out by 27 residency review committees and an institutional review committee. These committees have been delegated accreditation authority by the ACGME. A Residency Review Committee (RRC) consists of representatives appointed by the American Medical Association, the appropriate specialty board, and, in some cases, a national specialty organization (see table on p. 25).

The Transitional Year Review Committee is composed of ten members who are appointed by the chair of the ACGME in conjunction with the Executive Committee. The term “review committee” is used to denote a Residency Review Committee, the Transitional Year Review Committee, and the Institutional Review Committee. The Institutional Review Committee (IRC) is composed of ten members appointed by the Chair of the ACGME in conjunction with the Executive Committee. The Institutional Review Committee assumes the responsibility for accrediting institutions which sponsor multiple programs. It evaluates institutions for substantial compliance with the Institutional Requirements.

GME programs are accredited when they are judged to be in substantial compliance with ACGME institutional, common, and specialty-specific program requirements.

At its February 2007 meeting, the ACGME approved the following program requirements, effective July 1, 2007, unless noted:

- Common Program Requirements
- Institutional Requirements
- Allergy and Immunology
- Subspecialties of Emergency Medicine
- Pediatric Emergency Medicine (Pediatrics and Emergency Medicine)
- Dermatology
- Pathology
- Medical Genetics
- Molecular Genetic Pathology
- Medical Biochemical Genetics (new subspecialty)
- Diagnostic Radiology (effective July 1, 2008)
- Neuroradiology
- At its June meeting, the ACGME approved major revisions, with modifications, to four sets of program requirements, effective January 1, 2008:
- Obstetrics and Gynecology
- Surgery
- Thoracic Surgery
- Endovascular Surgical Neuroradiology

At its September 2007 meeting, the ACGME approved revisions to the following sets of program requirements, effective July 1, 2008, unless noted:

- Orthopaedic surgery subspecialties
- Adult Reconstructive Surgery
- Foot and Ankle Surgery
- Hand Surgery
- Musculoskeletal Oncology
- Pediatric Orthopaedic Surgery
- Spinal Surgery
- Sports Medicine
- Trauma
- Otolaryngology subspecialties
- Neurotology
- Pediatric Otolaryngology

(Minor revisions, effective November 9, 2007)

Parker J. Palmer Award and Courage to Lead Award

In February 2001, the ACGME established the Parker J. Palmer Courage to Teach Award to recognize outstanding GME program directors. Criteria for selection include a demonstrated commitment

to education with evidence of successful mentoring, program development, and improvement. The ACGME recognizes ten outstanding program directors each year with the award. The winners of the Parker J. Palmer award from 2002 to 2008 are listed below:

**2002**
- Robert W. Block, MD, University of Oklahoma, Tulsa (Pediatrics)
- Virginia U. Collier, MD, Christiana Care Health Services (Internal Medicine)
- George C. Curry, MD, University of Texas Southwestern Medical Center (Diagnostic Radiology)
- Alfred D. Fleming, MD, Creighton University (Obstetrics-Gynecology/Maternal Fetal Medicine)
- William H. Hester, MD, McLeod Family Medicine Center (Family Medicine)
- Earl D. Kemp, MD, Sioux Falls Family Medicine Residency (Family Medicine)
- Gail A. McGuinness, MD, University of Iowa (Pediatrics)
- Claude H. Organ, Jr, MD, University of California-San Francisco-East Bay (General Surgery)
- Keith D. Wrenn, MD, Vanderbilt University Medical Center (Emergency Medicine)
- Nikitas J. Zervanos, MD, Lancaster General Hospital (Family Medicine)

**2003**
- C. Bruce Alexander, MD, University of Alabama, Birmingham (Pathology)
- Keith B. Armitage, MD, University Hospitals of Cleveland (Internal Medicine)
- Eugene V. Beresin, MD, Massachusetts General Hospital (Child-Adolescent Psychiatry)
- Frank J. Eismont, MD, Jackson Memorial Hospital/Jackson Health System (Orthopaedic Surgery)
E. GME-related Organizations

- Steven K. Feske, MD, Brigham and Women's Hospital (Neurology)
- Joseph T. Gilhooley, MD, Oregon Health & Sciences University (Pediatrics)
- Harold L. Johnston, MD, Alaska Family Medicine/Providence Hospital (Family Medicine)
- Henry J. Schultz, MD, Mayo Clinic (Retired, Internal Medicine)
- John L. Tarpley, MD, Vanderbilt University (General Surgery)
- Bennett S. Vogelman, MD, University of Wisconsin-Madison (Internal Medicine)
- Kathleen V. Watson, MD, University of Minnesota (Internal Medicine)

2004

- William L. Bockeneck, MD, Charlotte Institute of Rehabilitation (Physical Medicine & Rehabilitation)
- Carol Carraccio, MD, University of Maryland Medical System (Pediatrics)
- Carlyle H. Chan, MD, Medical College of Wisconsin (Psychiatry)
- Paul H. Gerst, MD, Bronx-Lebanon Hospital Center, (General Surgery)
- DuFont Guerry, IV, MD, University of Pennsylvania (Hematology-Oncology)
- J. Peter Harris, MD, Golisano Children's Hospital at Strong University of Rochester (Pediatrics)
- John B. Jeffers, MD, Wills Eye Hospital (Ophthalmology)
- Catherine K. Lineberger, MD, Duke University Medical Center (Anesthesiology)
- Gordon E. Schutze, MD, University of Arkansas for Medical Sciences/Arkansas Children's Hospital (Pediatrics)
- Eric Walsh, MD, Oregon Health & Science University (Family Medicine)

2005

- Patricia L. Blanchette, MD, University of Hawaii (Geriatric Medicine)
- Francis L. Counselman, MD, Eastern Virginia Medical School (Emergency Medicine)
- Daniel Dedrick, MD, Brigham and Women's Hospital (Anesthesiology)
- Richard W. Dow, MD, Dartmouth-Hitchcock Medical Center (General Surgery)
- David L. George, MD, Reading Hospital and Medical Center (Transitional Year)
- Mark S. Juzycz, MD, Kresge Eye Institute (Ophthalmology)
- Teresa L. Massagli, MD, University of Washington (Physical Medicine & Rehabilitation)
- Anthony A. Meyer, MD, PhD, University of North Carolina, Chapel Hill (General Surgery)
- Glenn C. Newell, MD, UMDNJ-Robert Wood Johnson (Internal Medicine)
- Eric Scher, MD, Henry Ford Hospital (Internal Medicine)

2006

- Steven R. Cohen, MD, MPH, Mount Sinai School of Medicine (Dermatology)
- Deborah S. Cowley, MD, University of Washington School of Medicine (Psychiatry)
- Karen E. Deveney, MD, Oregon Health and Sciences University (General Surgery)
- Jehan El-Bayoumi, MD, George Washington University (Internal Medicine)
- Ralph S. Greco, MD, Stanford University School of Medicine (General Surgery)
- Kirk A. Keegan, Jr, MD, University of California, Orange (Obstetrics-Gynecology)

- Dorothy S. Lane, MD, Stony Brook University (Preventive Medicine)
- Shaila Masood, MD, University of Florida, Jacksonville (Pathology)
- Kemuel L. Philbrick, MD, Mayo Clinic (Psychiatry)
- Volkner K. H. Sonntag, MD, Barrow Institute for Neurological Institute (Neurosurgery)

2007

- David Allen, MD, University of Wisconsin Children's Hospital, Madison (Pediatrics)
- Hasan Bazari, MD, Massachusetts General Hospital, Boston (Internal Medicine)
- Carey Chisholm, MD, Indiana University School of Medicine, Indianapolis (Emergency Medicine)
- Gary Clark, MD, MetroHealth Rehabilitation Institute, Cleveland (Physical Medicine and Rehabilitation)
- Javier Alfonso Gonzalez del Rey, MD, Cincinnati Children's Hospital, Ohio (Pediatric Emergency Medicine)
- Robert Heros, MD, University of Miami (Neurological Surgery)
- Neil Mintick, DO, Albany Medical College, New York (Family Medicine)
- Humberto Quintana, MD, Louisiana State University Health Sciences Center, New Orleans (Child and Adolescent Psychiatry)
- Allen Silbergeld, MD, St. Joseph Mercy Oakland, Pontiac, Michigan (General Surgery)
- Jeffrey Wiese, MD, Tulane University School of Medicine, New Orleans (Internal Medicine)

2008

- Robert Brown, MD, Beth Israel Deaconess Medical Center, Boston (Nephrology)
- Steve Gajetka, MD, University of Pennsylvania, Philadelphia (Neurology)
- Kalpalatha Guntupalli, MD, Baylor College of Medicine, Houston (Pulmonary/Critical Care)
- Karen Horvath, MD, University of Washington, Seattle (General Surgery)
- Richard Lackman, MD, University of Pennsylvania, Philadelphia (Orthopaedic Surgery)
- John Jane, MD, University of Virginia, Charlottesville (Neurosurgery)
- Mukta Panda, MD, University of Tennessee, Knoxville (Internal Medicine)
- Susan Promes, MD, Duke University, Durham (Emergency Medicine)
- Richard Shugarman, MD, University of Washington (Pediatrics)
- William Sonis, MD, Drexel University College of Medicine, Philadelphia (Neurosurgery)

Parker J. Palmer, educator and author of *The Courage to Teach*, promotes the concept of “living divided no more,” which has proven relevant to teaching in academic health centers. See www.acgme.org/acWebsite/palmerAward/ pa_leachMemo.asp.

ACGME Staff

The following list is updated as of January 2008. Main Office: 312 755-5000

**Office of the Executive Director**

Thomas J. Nasca, MD, MACP, executive director
312 755-7492 tnasca@acgme.org

Marsha A. Miller, special assistant to Dr. Nasca/complaint manager
312 755-5041 mmiller@acgme.org

Rose Cross, executive secretary
312 755-5008  rmc@acgme.org

Department of Accreditation Committees
Jeanne K. Heard, MD, PhD, senior vice president
312 755-5040  jkh@acgme.org
Mary Cleveland, executive assistant
312 755-5010  mcleveland@acgme.org
Kathy Malloy, executive director, Accreditation Standards
312 755-5046  kmalley@acgme.org

Residency Review Committees (RRCs) for
Allergy and Immunology
Patricia Levenberg, PhD, executive director
312 755-5048  plevenberg@acgme.org
Eileen Anthony, MJ, associate executive director
312 755-5047  eanthony@acgme.org

Anesthesiology
Missy Fleming, MEd, PhD, executive director
312 755-5043  mfleming@acgme.org
Linda Thorsen, MA, associate executive director
312 755-5029  lmt@acgme.org

Colon and Rectal Surgery
Paul O’Connor, PhD, executive director
312 755-5039  poc@acgme.org

Dermatology
Georgia Andrianopoulos, PhD, senior executive director

Association of American Medical Colleges (AAMC)

The Association of American Medical Colleges (AAMC), founded in 1876, is a nonprofit association representing all 126 LCME-accredited US medical schools and 17 accredited Canadian medical schools; some 400 major teaching hospitals and health systems, including 68 Department of Veterans Affairs medical centers; and nearly 100 academic and scientific societies. Through these institutions and organizations, the AAMC represents 109,000 faculty members, 67,000 medical students, and 104,000 resident physicians. The AAMC seeks to improve the nation's health by enhancing the effectiveness of academic medicine. The AAMC assists academic medicine's institutions, organizations, and individuals in the three main mission areas of medical education, medical research, and patient care.

In GME, the AAMC represents and supports members in improving educational quality, strengthening institutional GME leadership and institutional accountability for GME, developing faculty, and setting a national agenda for the support of GME. It carries out this work through a variety of activities.

Compact Between Resident Physicians and Their Teachers

www.aamc.org/meded/residentcompact
Contact: Nicole Buckley
E-mail: nambuckley@aamc.org

The Compact is a declaration of the fundamental principles of GME and the major commitments of both residents and faculty to the educational process, to each other, and to the patients they serve. The Compact’s purpose is to provide institutional GME sponsors, program directors, and residents with a model statement that will foster more open communication, clarify expectations, and re-energize the commitment to the primary educational mission of training tomorrow’s doctors.

MedEdPORTALSM

www.aamc.org/mededportal
Contact: Bobby Reynolds
E-mail: mededportal@aamc.org

This free online resource enables faculty to publish, share, and discover peer-reviewed educational materials. It is designed to promote collaboration and educational scholarship by facilitating the exchange of peer-reviewed teaching resources such as animations, tutorials, lab manuals, assessment instruments, faculty development materials, and computer-based resources, including an inventory of virtual patients. The AAMC and the McGill University Faculty of Medicine have also announced a new collaboration between MedEdPORTAL and the McGill Molson Medical Informatics (MIMI) project. Through this collaboration, MedEdPORTAL will serve as the primary outlet for more than 8,000 MIMI multimedia teaching materials, helping significantly expand the existing collection of free, high-quality MedEdPORTAL publications currently available online. Recently, MedEdPORTAL has added user comment functionality to promote interactivity and has launched free online training workshops that have reached participants across the globe. In Spring 2008, MedEdPORTAL launched a new Web site, including an online repository, to host online its entire collection of peer-reviewed, high-quality published resources online covering the continuum of medical education.

Project Medical Education (PME)

www.aamc.org/members/pme
Contact: Sallyann Bergh
E-mail: sbergh@aamc.org

Project Medical Education (PME) helps educate policymakers and others about the missions of medical schools and teaching hospitals. During visits to medical schools and teaching hospitals, policymakers assume the roles of medical students, resident physicians, and faculty physicians in a 1- to 2-day program that shows them first-hand how medical education benefits all Americans. More than 600 legislators and staff members have participated in at least one PME program held in conjunction with over 60 AAMC member institutions in 24 states since the program’s inception in 1999.

Organization of Resident Representatives (ORR)

www.aamc.org/members/orr
Contact: Alexis L. Ruffin
E-mail: alruffin@aamc.org

The AAMC has a number of programs and initiatives aimed at improving the health of Americans by fostering innovations in medical education to better align the knowledge, skills, and professionalism of medical students, residents, and practicing physicians with the needs and expectations of the public. Employing expert panels, convening special topic colloquia, and collaborating with external funding partners to administer school-based curriculum improvement grants, the AAMC strives to highlight creative and dynamic approaches employed by medical educators to develop enriching learning experiences and teaching models.
Group on Education Affairs (GEA)
www.aamc.org/members/gebra
Contact: M. Brownell (Brownie) Anderson
E-mail: mbanderson@aamc.org
The group’s purpose is to promote excellence in the education of physicians throughout their professional lives and, thereby, to contribute to improving the health of the public. Reflecting the continuum of medical education, the GEA is organized by four sections, including the Graduate Medical Education Section, which focuses on supporting the development and continued improvement of GME programs. The Research in Medical Education (RIME) Conference, held in conjunction with the AAMC Annual Meeting, includes research papers, symposia, and abstract sessions. The Innovations in Medical Education Exhibits (IME) also are held during the Annual Meeting.

Group on Resident Affairs (GRA)
www.aamc.org/members/gra
Contact: Sunny Ioder
E-mail: syoder@aamc.org
This group’s purpose is to develop leaders who provide GME oversight, administration, organization, financing, and quality in their respective medical schools, teaching hospitals and health systems, and academic societies. The Group offers a GME Leadership Development Course that explores the range of responsibilities from leading a sponsoring institution successfully through an accreditation review to improving the quality of GME, advocating for and managing institutional resources for GME, and developing advanced leadership skills.

Other AAMC Activities
The AAMC also helps students make career decisions and enter residency programs. It assists residents in managing their medical education loans. In collaboration with the AMA, it tracks residents from entry to residency through completion and beyond. The AAMC also offers GME-related online publications.

Careers in Medicine
www.aamc.org/students/cim
Contact: George Richard
E-mail: grichard@aamc.org
This program helps students choose a medical specialty and select and apply to residency programs (see listing under “Residency Application and Career Planning Resources” for more information).

VSAS®
www.aamc.org/vsas
Contact: Melissa Donner
E-mail: mdonner@aamc.org
The Visiting Student Application Service (VSAS) is a new centralized application service for senior clinical electives piloting in 2008-09. The goal is to streamline what is currently a time-consuming and cumbersome process of locating and applying to away electives. Ten schools will pilot VSAS starting in March 2008 and the service is expected to be open to all schools in spring 2009.

ERAS®
www.aamc.org/audienceereras.htm
Contact: Renee Overton
E-mail: broverton@aamc.org
ERAS®—the Electronic Resident Application Service—works with applicants, designated dean’s offices, and training programs to streamline the residency and fellowship application process for all involved. ERAS users transmit application materials and supporting credentials to training programs using the Internet. ERAS serves almost 39,000 applicants, 168 medical schools and designated dean’s offices, and just over 5,500 training programs annually (see listing under “Residency Application and Career Planning Resources” for more information).

FindAResident®
www.aamc.org/audiencefindaresident.htm
Contact: Nancy Nelson Ortiz
E-mail: nortiz@aamc.org
FindAResident® is a Web-based service designed to provide a direct and efficient way for program administrators to connect with residency and fellowship candidates. Residency and fellowship programs can share information about their programs and open positions with applicants; applicants post their resume and contact information for programs to review. FindAResident® is a supplement to ERAS®—the Electronic Residency Application Service, providing services not fulfilled by ERAS.

GME Track
www.aamc.org/programs/gmetrack/start.htm
Contact: Jennifer Faerberg
E-mail: jfaerberg@aamc.org
This resident/fellow database and tracking system was developed to assist GME administrators and program directors in the collection and management of GME data. GME Track contains the National GME Census, which is jointly conducted by the AAMC and the AMA, and includes both the Program and Resident/Fellow surveys. The Program survey collects detailed information on residency program characteristics and is primarily used to update FREIDA Online. The Resident/Fellow survey collects demographic, educational, and training information on each resident/fellow and is used to create national GME statistics. All data collected in the National GME Census are available to programs and medical schools to view, print, and download.

Center for Workforce Studies
www.aamc.org/workforce/
Contact: Edward Salsberg
E-mail: esalsberg@aamc.org
In light of the need to increase medical school and GME capacity to meet the needs of the nation in 2015 and beyond, the Center for Workforce Studies works to:
- Develop the capacity to effectively document and study physician workforce issues related to physician supply, demand, utilization, and distribution across specialty and geographic region
- Support informed decision-making by the medical education community (medical schools, teaching hospitals, faculty, medical students and residents) and policy makers
- Support AAMC policy goals that related to physician workforce, such as increasing underrepresented minorities in medicine

AAMC Publications
The following publications are available via the AAMC Web site at www.aamc.org/publications:
- After the Boston Medical Center Case: The Nuts and Bolts of Resident Unions
- Terrorism Education for Medical Students: Knowledge of Public Health System Key to Preparing Future Physicians
- GME Core Curriculum
- Institutional Accountability for Graduate Medical Education (Report of a Working Group)
- Integrating Education and Patient Care: Observations from the GME Task Force
E. GME-related Organizations

Organization of Program Directors Associations (OPDA)
The Organization of Program Directors Associations (OPDA), a component group of the Council of Medical Specialty Societies (CMSS), works to promote the role of the residency director and residency program director societies in achieving excellence in GME.

Created in 2000, OPDA is a leadership consortium of residency program director (or chair) societies in each of the 27 medical and surgical specialties that correspond to 27 ACGME Residency Review Committees. Consisting of one liaison representative from each program director society, OPDA meets regularly to provide peer interaction, information sharing, and collaborative problem solving. In addition, OPDA sponsors periodic symposia and meetings on timely GME issues, provides a forum for communication with leaders in GME, and monitors and promotes GME excellence in the activities of the AAMC, ACGME, NRMP, NBME, ECFMG, and other organizations that regulate and impact GME.

Recently, OPDA was invited to appoint representatives to two key organizations in medical education (ie, the NRMP and the ACGME) to represent OPDA and program director interests in matters of relevance to GME.

The following societies of program directors (or chairs) are currently represented on OPDA:

- Allergy and Immunology
  Allergy/Immunology Training Program Directors (ATTPD)
  www.caai.org/Member/Committees/allergy_training_program_directors_advisory.htm

Publications
AHME News
www.ahme.org/publications/news.html

AHME News, published as a paper copy once per year, with quarterly "electronic" versions, offers news about the Association’s divisions, committees, and councils in addition to updates on governmental and accreditation issues affecting medical education.
Training Administrators of Graduate Medical Education (TAGME)

The National Board for Certification of Training Administrators of Graduate Medical Education (TAGME) programs was created in 2003 to establish standards for the profession, acknowledge the expertise needed to successfully manage GME programs, and recognize those training program administrators who have achieved competence in all fields related to their profession.

Criteria for Certification
- Years of on-the-job experience: at least 3 continuous years in the same clinical specialty
- National meeting attendance: at least one GME-related meeting within the past 3 years
- Site visit/internal review: participation in at least one site visit or internal review within the past 3 years
- Personal professional development within the past 3 years:
  - Oral/poster presentations
  - Abstracts and/or publications
  - Participation and/or leadership in national organizations within the profession
  - Participation and/or leadership in sponsoring institutional/GME committees
  - Departmental presentations, such as orientation or in-service training sessions on program procedures for attendings and/or residents
- Successful completion of the Assessment Tools

Criteria for Recertification
- Five years between certification periods
- National meeting attendance: at least two GME-related meetings within the 5-year period
- Institution/Department Committee participation: at least one committee per year
- Personal professional development activities (3 activities within the 5-year period)
- Oral or poster presentations
E. GME-related Organizations

- GME-related workshop attendance
- Abstracts and/or publications
- Committee leadership
- Participation on a national or regional level committee
- Continued education coursework to enhance professional development (eg, online professional education modules, such as SoftSkills or institutional-based learning courses)
- Higher education coursework
- Successful completion of the Maintenance of Certification Tool

Information
National Board for Certification of Training Administrators of Graduate Medical Education
E-mail: resicoordinator@tagme.biz
www.tagme.org
Included in this section are descriptions of the specialties/subspecialties with residency/fellowship programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) and/or ACGME Program Requirements in effect. Also included are subspecialties for which a member board of the American Board of Medical Specialties (ABMS) offers certification. Subspecialties are listed alphabetically under each specialty.

Sources for the information and data in this section include:

- *Guide to Physician Specialties*, ABMS. [Note: Unless otherwise indicated, all text in the “Professional Description” section of each specialty/subspecialty is taken from this document.]
- ACGME, Number and Percent of New Program Directors, July 1, 2006-June 30, 2007 academic year, www.acgme.org/adspublic/ (Note: Overall program director turnover rate was 1,115 out of 8,354 ACGME-accredited programs, or 13.3%)
- “Bigger paydays,” *Modern Healthcare*, July 16, 2007 [Note: Generally, data are shown for specialties/subspecialties in which at least one third of programs in that specialty/subspecialty selected an expanded listing in FREIDA Online®.]

Data

Following are 2007 data, showing totals or averages for all ACGME-accredited and ABMS board-approved programs in Section III and in Appendix A.

Allergy and Immunology

Professional Description
An allergist-immunologist is trained in evaluation, physical and laboratory diagnosis, and management of disorders involving the immune system. Selected examples of such conditions include asthma, anaphylaxis, rhinitis, eczema, and adverse reactions to drugs, foods, and insect stings as well as immune deficiency diseases (both acquired and congenital), defects in host defense, and problems related to autoimmune disease, organ transplantation or malignancies of the immune system. As our understanding of the immune system develops, the scope of this specialty is widening.

Training programs are available at some medical centers to provide individuals with expertise in both allergy/immunology and adult rheumatology, or in both allergy/immunology and pediatric pulmonology. Such individuals are candidates for dual certification.

Source: American Board of Medical Specialties, Guide to Physician Specialties

A certified specialist in allergy and immunology is a physician who previously has passed the certification examination of the American Board of Internal Medicine (ABIM) and/or the American Board of Pediatrics (ABP) with additional certification by the American Board of Allergy and Immunology (ABAI), a Conjoint Board of the ABIM and the ABP. Diplomates of the ABAI have detailed knowledge of the underlying pathophysiology and the diagnosis, treatment, and prevention of allergic diseases such as allergic rhinitis, allergic asthma, urticaria, anaphylaxis, hypersensitivity pneumonitis, atopic and contact dermatitis, and allergic gastrointestinal disorders, as well as comparable clinical problems without an apparent allergic etiology or component such as vasomotor rhinitis, nonallergic asthma, and idiopathic and/or hereditary forms of urticaria and/or angioedema. Diplomates also have expertise in the management of pulmonary complications of certain of these diseases.

Diplomates of the ABAI also possess advanced understanding of the biology of inflammation, immunochemistry, immunobiology, and pharmacology and experience in the application of this knowledge to the diagnosis, management, and therapy of immunologic diseases. This includes inborn or acquired defects of host resistance, autoimmune diseases, bone marrow and solid organ transplantation, gene replacement therapy, adverse drug reactions, and related conditions. Diplomates have demonstrated to the satisfaction of their peers that they possess the general qualifications specified and are ethical and humanistic practitioners of medicine.

Source: American Board of Allergy and Immunology

Prerequisites; Length of Training
Prior completion of internal medicine or pediatrics program; length of accredited programs is 2 years.

Subspecialties
No subspecialty programs accredited by the Accreditation Council for Graduate Medical Education; no subspecialty certificates offered by the ABAI. The ABAI, however, does offer formal special pathways for physicians seeking dual certification in allergy/immunology and pediatric pulmonology; allergy/immunology and pediatric rheumatology; and allergy/immunology and adult rheumatology. Additional information regarding special pathways is available upon request to the ABAI.

Anesthesiology

Professional Description
An anesthesiologist is trained to provide pain relief and maintenance, or restoration, of a stable condition during and immediately following an operation or an obstetric or diagnostic procedure. The anesthesiologist assesses the risk of the patient undergoing surgery and optimizes the patient's condition prior to, during, and after surgery. In addition to these management responsibilities, the anesthesiologist provides medical management and consultation in pain management and critical care medicine. Anesthesiologists

- Diagnose and treat acute, long-standing and cancer pain problems
- Diagnose and treat patients with critical illnesses or severe injuries
- Direct resuscitation in the care of patients with cardiac or respiratory emergencies, including the need for artificial ventilation
- Supervise post-anesthesia recovery

Prerequisites; Length of Training
Length of accredited programs is 3 years or 4 years (the latter includes the clinical base year).

Subspecialties
Subspecialty programs accredited by the ACGME
- Adult cardiothoracic anesthesiology
- Critical care medicine
- Pain medicine*
- Pediatric anesthesiology
  * In 2007, ACGME-accredited pain medicine programs under anesthesiology, neurology, physical medicine and rehabilitation, and psychiatry were combined into a multidisciplinary pain medicine subspecialty.

Subspecialty certificates offered by the American Board of Anesthesiology
- Critical care medicine
- Hospice and palliative medicine
- Pain medicine

Data
Unless otherwise noted, all data are for 2007.

Adult Cardiothoracic Anesthesiology

Professional Description
Adult cardiothoracic anesthesiology is “devoted to the preoperative, intraoperative, and postoperative care of adult patients undergoing cardiothoracic surgery and related invasive procedures.”

Fellows “should be proficient in providing anesthesia care for patients undergoing cardiac surgery with and without extracorporeal circulation, and thoracic surgery including operations on the lung, esophagus, and thoracic aorta. The curriculum should also include experience with patients undergoing nonoperative diagnostic and interventional cardiac, thoracic, and electrophysiological procedures. In addition, the cardiothoracic anesthesiology fellow should develop skills in the conduct of preoperative patient evaluation and interpretation of cardiovascular and pulmonary diagnostic test data, hemodynamic and respiratory monitoring, advanced-level perioperative transesophageal echocardiography (TEE), management of cardiopulmonary bypass (CPB), pharmacological and mechanical hemodynamic support, perioperative critical care, including ventilatory support and perioperative pain management.”

Source: Adult Cardiothoracic Anesthesiology Program Requirements, ACGME
www.acgme.org/acWebsite/downloads/RRC_progReq/041pr206.pdf

Prerequisites; Length of Training
Completion of an anesthesiology residency is required; length of accredited programs is 1 year.

Critical Care Medicine

Professional Description
An anesthesiologist who specializes in critical care medicine diagnoses, treats and supports patients with multiple organ dysfunction. This specialist may have administrative responsibilities for intensive care units and may also facilitate and coordinate patient care among the primary physician, the critical care staff, and other specialists.

Prerequisites; Length of Training
Completion of an anesthesiology residency is required; length of accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2007.

Pediatric Anesthesiology

Professional Description
A pediatric anesthesiologist is a fully trained anesthesiologist who has completed at least 1 year of specialized training in anesthesia care of infants and children. Most pediatric surgeons deliver care to children in the operating room along with a pediatric anesthesiologist. Many children who need surgery have very complex medical problems that affect many parts of the body. The pediatric anesthesiologist is best qualified to evaluate these complex problems and plan a safe anesthetic for each child.

Pediatric anesthesiologists treat children from the newborn period through the teenage years. They choose to make pediatric care the core of their medical practice, and the unique nature of medical and surgical care of children is learned from advanced training and experience in practice.

Pediatric anesthesiologists are responsible for the general anesthesia, sedation, and pain management needs of infants and children. Pediatric anesthesiologists generally provide the following services:
- Evaluation of complex medical problems in infants and children when surgery is needed
- Planning and care for before and after surgery
- A nonthreatening environment for children in the operating room
- Pain control, if needed after surgery, either with intravenous (IV) medications or other anesthetic techniques
- Anesthesia and sedation for many procedures out of the operating room such as MRI, CT scan, and radiation therapy

Prerequisites; Length of Training
Completion of an anesthesiology residency is required; length of accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2007.

Colon and Rectal Surgery

Professional Description
A colon and rectal surgeon is trained to diagnose and treat various diseases of the intestinal tract, colon, rectum, anal canal, and perianal area by medical and surgical means. This specialist also deals with other organs and tissues (such as the liver, urinary, and female reproductive system) involved with primary intestinal disease.

Colon and rectal surgeons have the expertise to diagnose and often manage anorectal conditions such as hemorrhoids, fissures (painful tears in the anal lining), abscesses, and fistulae (infections located around the anus and rectum) in the office setting.

They also treat problems of the intestine and colon and perform endoscopic procedures to evaluate and treat problems such as cancer, polyps (precancerous growths), and inflammatory conditions.

Prerequisites; Length of Training
Prior completion a minimum of 5 years of a general surgery program; length of accredited programs is 1 year.

Subspecialties
No subspecialty programs accredited by the Accreditation Council for Graduate Medical Education; no subspecialty certificates offered by the American Board of Colon and Rectal Surgery.

Data
Unless otherwise noted, all data are for 2007.

Dermatology

Professional Description
A dermatologist is trained to diagnose and treat pediatric and adult patients with benign and malignant disorders of the skin, mouth, external genitalia, hair, and nails, and those with a number of sexually transmitted diseases. The dermatologist has had additional training and experience in the diagnosis and treatment of skin cancers, melanomas, moles, and other tumors of the skin, the management of contact dermatitis, and other allergic and nonallergic skin disorders, and in the recognition of the skin manifestations of systemic (including internal malignancy) and infectious diseases. Dermatologists have special training in dermatopathology and in the surgical techniques used in dermatology. They also have expertise in the management of cosmetic disorders of the skin, such as hair loss and scars, and the skin changes associated with aging.

Source: American Board of Medical Specialties, Guide to Physician Specialties

Dermatologists perform many specialized diagnostic procedures including microscopic examination of skin biopsy specimens, cyto logical smears, patch tests, photo tests, potassium hydroxide (KOH) preparations, fungus cultures, and other microbiologic examination of skin scrapings and secretions. Treatment methods used by dermatologists include externally applied, injected, and internal medications, selected x-ray and ultraviolet light therapy, and a range of dermatologic surgical procedures. The training and experience of dermatologists in dermatologic surgery include electrosurgery, cryosurgery with the use of freezing surgical units, laser surgery, nail surgery, biopsy techniques and excisional surgery with appropriate closures, including flaps and grafts. Among some of the techniques used by dermatologists for the correction of cosmetic defects are dermabrasion, chemical face peels, hair transplants, injections of materials into the skin for scar revision, sclerosis of veins, and laser surgery of vascular lesions of the skin, including certain birth marks. Patients seeking a dermatologist may come directly or may be referred by another physician. A certified specialist in dermatology may subspecialize and become certified for Special Qualification.

Source: American Academy of Dermatology

Prerequisites; Length of Training
No prerequisites required when entering programs with an accredited length of 4 years. A broad-based clinical year of training in an ACGME-accredited program is required when entering a 3-year program.

Subspecialties
Subspecialty programs accredited by the ACGME
- Dermatopathology
- Procedural dermatology

American Board of Dermatology subspecialty certificates:
- Clinical and laboratory dermatological immunology
- Dermatopathology
- Pediatric dermatology

Data

Clinical and Laboratory Dermatological Immunology

**Professional Description**
A dermatologist who utilizes various specialized laboratory procedures to diagnose disorders characterized by defective responses of the body's immune system. Immunodermatologists also may provide consultation in the management of these disorders and administer specialized forms of therapy for these diseases.

**Prerequisites; Length of Training**
Completion of an dermatology residency is required; length of accredited programs is 1 year.

Dermatopathology

**Professional Description**
A dermatopathologist has the expertise to diagnose and monitor diseases of the skin including infectious, immunologic, degenerative, and neoplastic diseases. This entails the examination and interpretation of specially prepared tissue sections, cellular scrapings, and smears of skin lesions by means of routine and special (electron and fluorescent) microscopes.

**Prerequisites; Length of Training**
Completion of an dermatology or pathology residency is required; length of accredited programs is 1 year.

Pediatric Dermatology

**Professional Description**
A pediatric dermatologist has, through additional special training, developed expertise in the treatment of specific skin disease categories with emphasis on those diseases which predominate in infants, children, and adolescents.

**Prerequisites; Length of Training**
Completion of an dermatology residency is required; length of accredited programs is 1 or 2 years.

Procedural Dermatology

**Professional Description**
A pediatric dermatologist has, through additional special training, developed expertise in the treatment of specific skin disease...
categories with emphasis on those diseases which predominate in infants, children, and adolescents.

*Source: American Board of Medical Specialties, Guide to Physician Specialties*

**Prerequisites; Length of Training**
Completion of an dermatology residency is required; length of accredited programs is 1 year.

---

**Emergency Medicine**

**Professional Description**
An emergency physician focuses on the immediate decision-making and action necessary to prevent death or any further disability both in the pre-hospital setting by directing emergency medical technicians and in the emergency department. The emergency physician provides immediate recognition, evaluation, care, stabilization, and disposition of a generally diversified population of adult and pediatric patients in response to acute illness and injury.

**Prerequisites; Length of Training**
No prerequisites required when entering programs with an accredited length of 4 years. A broad-based clinical year of training in an ACGME-accredited program is required when entering a 3-year program.

Specialty/Subspecialty Information for Emergency Medicine
Family Medicine

Professional Description
A family physician is concerned with the total health care of the individual and the family, and is trained to diagnose and treat a wide variety of ailments in patients of all ages. The family physician receives a broad range of training that includes internal medicine, pediatrics, obstetrics and gynecology, psychiatry, and geriatrics. Special emphasis is placed on prevention and the primary care of entire families, utilizing consultations and community resources when appropriate.

Source: American Board of Medical Specialties, Guide to Physician Specialties

Family medicine is the medical specialty which is concerned with the total health care of the individual and the family. It is the specialty in breadth which integrates the biological, clinical, and behavioral sciences. The scope of family medicine is not limited by age, sex, organ system, or disease entity.

Source: American Board of Family Medicine

Prerequisites; Length of Training
No prerequisites required; ACGME-accredited programs are 3 years.

Subspecialties

Subspecialty programs accredited by the ACGME
- Geriatric medicine
- Sports medicine

American Board of Family Medicine subspecialty certificates
- Adolescent medicine
- Geriatric medicine
- Hospice and palliative medicine
- Sports medicine

Sports Medicine

Professional Description
A family physician who is trained to be responsible for continuous care in the field of sports medicine, not only for the enhancement of health and fitness, but also for the prevention of injury and illness. A sports medicine physician must have knowledge and experience in the promotion of wellness and the prevention of injury. Knowledge about special areas of medicine such as exercise physiology, biomechanics, nutrition, psychology, physical rehabilitation, epidemiology, physical evaluation, injuries (treatment and prevention and referral practice), and the role of exercise in promoting a healthy lifestyle are essential to the practice of sports medicine. The sports medicine physician requires special education to provide the knowledge to improve the health care of the individual engaged in physical exercise (sports) whether as an individual or in team participation.

Prerequisites; Length of Training
Completion of an ACGME-accredited residency is required; ACGME-accredited programs are 1 year.

Data
Unless otherwise noted, all data are for 2007.

Board certification rates 95.2%
In-training examinations 21.4%
Internal Medicine

Professional Description
Internal medicine is the largest primary care specialty in the United States and is an ever-changing and rapidly advancing discipline. Doctors of internal medicine are known as “internists” or “general internists,” and should not be confused with “interns” who are doctors in their first year of training after medical school. Internists are not the same as “general practitioners” (GPs) or “family physicians” (FPs) whose practices may include surgery, obstetrics, and pediatrics and whose training is not solely concentrated on adults.

Because internal medicine is expansive, internists must continually update their knowledge in many areas including allergy, arthritis, blood diseases, cancer, diabetes, digestive diseases, illness in the elderly, diseases of the heart and blood vessels, hormonal disorders, infections, intensive care, kidney diseases, and respiratory disorders.

The practice of internal medicine also incorporates an understanding of wellness (disease prevention and health promotion), women’s health, substance abuse, mental health, and medical ethics, as well as effective treatment of common problems of the eyes, ears, skin, nervous system, and reproductive organs.

Clinical Cardiac Electrophysiology

Professional Description

A field of special interest within the subspecialty of cardiovascular disease that involves intricate technical procedures to evaluate heart rhythms and determine appropriate treatment for them.

Prerequisites; Length of Training

Completion of a 3-year ACGME-accredited residency program in cardiovascular disease is required; ACGME-accredited programs in clinical cardiology are 1 year.

Data

Unless otherwise noted, all data are for 2007.

Specialty/Subspecialty Information for Internal Medicine

Graduate Medical Education Directory 2008-2009 57
Critical Care Medicine

Professional Description
An internist who diagnoses, treats, and supports patients with multiple organ dysfunction. This specialist may have administrative responsibilities for intensive care units and may also facilitate and coordinate patient care among the primary physician, the critical care staff, and other specialists.

Prerequisites; Length of Training
Completion of a 3-year ACGME-accredited residency program in internal medicine is required; ACGME-accredited programs in critical care medicine are 2 years.

Data
Unless otherwise noted, all data are for 2007.

Gastroenterology

Professional Description
An internist who specializes in diagnosis and treatment of diseases of the digestive organs, including the stomach, bowels, liver, and gallbladder. This specialist treats conditions such as abdominal pain, ulcers, diarrhea, cancer, and jaundice, and performs complex diagnostic and therapeutic procedures using endoscopes to visualize internal organs.

Prerequisites; Length of Training
Completion of a 3-year ACGME-accredited residency program in internal medicine is required; ACGME-accredited programs in gastroenterology are 3 years.

Data
Unless otherwise noted, all data are for 2007.

Geriatric Medicine

Professional Description

An internist who has special knowledge of the aging process and special skills in the diagnostic, therapeutic, preventive, and rehabilitative aspects of illness in the elderly. This specialist cares for geriatric patients in the patient’s home, the office, long-term care settings such as nursing homes, and the hospital.

Prerequisites; Length of Training

Completion of a 3-year ACGME-accredited residency program in internal medicine is required; ACGME-accredited programs in geriatric medicine are 1 year.

Data

Unless otherwise noted, all data are for 2007.

Hematology

Professional Description
An internist with additional training who specializes in blood diseases. This specialist treats diseases such as anemia, hemophilia, and sickle cell disease as well as cancers such as leukemia, lymphoma, and multiple myeloma.

Source: American Society of Hematology

Prerequisites; Length of Training
Completion of a 3-year ACGME-accredited residency program in internal medicine is required; ACGME-accredited programs in hematology are 2 years.

Data
Unless otherwise noted, all data are for 2007.

Table 1. Hematology Programs
Number of accredited programs 9

Program Data
Length of accredited training 2
Minimum number of prior years of GME required 3
Offers graduate year 1 positions, available immediately upon medical school completion No
Average number of applicants per program 11.1
Percent new program directors, 2006-2007 academic year (source: ACGME) 9.1%

Residents/Fellows
Total number of active residents/fellows 43
Average number of residents/fellows per program 4.8
Average percent female 34.9%
Average percent international medical graduate (IMG) 45.6%

Program Faculty
Average number of full-time physician faculty 10.6
Average number of part-time physician faculty 0.5
Average percent female full-time physician faculty 30.8%
Average ratio of full-time physician faculty to resident/fellow 1.2

Number of programs providing data 4

Work Schedule (Program Year 1)
Average hours on duty per week 51.2
Average maximum consecutive hours on duty 16.2
Average days off duty per week 1.3
Moonlighting allowed within institution 100.0%
Night float system 25.0%
Offers awareness and management of fatigue in residents/fellows 75.0%

Educational Setting (Program Year 1)
Average hours/week of regularly scheduled lectures/conferences 5.0
Average percent of training in hospital outpatient clinics 27.5%
Average percent of training in nonhospital ambulatory care community settings 0.0%

Educational Benefits
Curriculum on management of tobacco dependence 0.0%
Program to assess/enhance medical professionalism 50.0%
Debt management/financial counseling 50.0%
Formal program to develop teaching skills 25.0%
Formal mentoring program 25.0%
Formal program to foster interdisciplinary teamwork 0.0%
Continuous quality improvement training 50.0%
International experience 0.0%
Resident/fellow retreats 25.0%
Hematology and Oncology

Professional Description
See descriptions of each component subspecialty elsewhere in this section.

Prerequisites; Length of Training
Completion of a 3-year ACGME-accredited residency program in internal medicine is required; ACGME-accredited programs in hematology and oncology are 2 years.

Data
Unless otherwise noted, all data are for 2007.

### Infectious Disease

#### Professional Description

An internist who deals with infectious diseases of all types and in all organ systems. Conditions requiring selective use of antibiotics call for this special skill. This physician often diagnoses and treats AIDS patients and patients who have fevers that have not been explained. Infectious disease specialists may also have expertise in preventive medicine and travel medicine.

#### Prerequisites; Length of Training

Completion of a 3-year ACGME-accredited residency program in internal medicine is required; ACGME-accredited programs in infectious disease are 2 years.

#### Data

Unless otherwise noted, all data are for 2007.

Interventional Cardiology

Professional Description
An area of medicine within the subspecialty of cardiology that uses specialized imaging and other diagnostic techniques to evaluate blood flow and pressure in the coronary arteries and chambers of the heart and uses technical procedures and medications to treat abnormalities that impair the function of the cardiovascular system.

Prerequisites; Length of Training
Completion of a 3-year ACGME-accredited residency program in cardiovascular disease is required; ACGME-accredited programs in interventional cardiology are 1 year.

Data
Unless otherwise noted, all data are for 2007.

Table 1. Interventional Cardiology Programs

Oncology

Professional Description
An internist who specializes in the diagnosis and treatment of all types of cancer and other benign and malignant tumors. This specialist decides on and administers therapy for these malignancies as well as consults with surgeons and radiotherapists on other treatments for cancer.

Prerequisites; Length of Training
Completion of a 3-year ACGME-accredited residency program in internal medicine is required; ACGME-accredited programs in oncology are 2 years.

Data
Unless otherwise noted, all data are for 2007.

Sleep Medicine

Professional Description
An internist trained to be responsible for continuous care in the field of sports medicine, not only for the enhancement of health and fitness, but also for the prevention of injury and illness. A sports medicine physician must have knowledge and experience in the promotion of wellness and the prevention of injury. Knowledge about special areas of medicine such as exercise physiology, biomechanics, nutrition, psychology, physical rehabilitation, epidemiology, physical evaluation, injuries (treatment and prevention and referral practice), and the role of exercise in promoting a healthy lifestyle are essential to the practice of sports medicine. The sports medicine physician requires special education to provide the knowledge to improve the health care of the individual engaged in physical exercise (sports) whether as an individual or in team participation.

Prerequisites; Length of Training
Completion of a 3-year ACGME-accredited residency program in internal medicine is required; ACGME-accredited programs in sports medicine (as a subspecialty of emergency medicine, family medicine, or pediatrics) are 1 year. Note: As of June 2006, programs in sports medicine as a subspecialty of internal medicine are no longer accredited by the ACGME.

Sports Medicine

Transplant Hepatology

Professional Description
An internist with special knowledge and the skill required of a gastroenterologist to care for patients prior to and following hepatic transplantation that spans all phases of liver transplantation. Selection of appropriate recipients requires assessment by a team having experience in evaluating the severity and prognosis of patients with liver disease.

Prerequisites; Length of Training
Completion of a 3-year ACGME-accredited gastroenterology program is required; programs are 1 year.

Internal Medicine/Pediatrics

Description
Internal medicine/pediatrics is a combined specialty program that allows physicians to meet eligibility requirements for dual certification by the American Board of Internal Medicine and American Board of Pediatrics. Internal medicine/pediatrics programs were formerly jointly approved (not accredited) by the two boards, but are now fully accredited through the ACGME (Program Requirements effective June 26, 2006).

Prerequisites; Length of Training
No prerequisites; length of accredited programs is 4 years.

Data
Unless otherwise noted, all data are for 2007.

| Alternative/complementary medicine curriculum      | 58.2% |
| Training in identifying and reporting of domestic violence/abuse | 89.6% |
| MPH/MBA or PhD training                           | 28.4% |
| Research rotation                                 | 11.9% |

Educational Features
Offers additional training or educational experience beyond accredited length 4.5%
Offers a primary care track 16.4%
Offers a rural track 0.0%
Offers a women’s health track 4.5%
Offers a hospitalist track 3.0%
Offers a research track/nonaccredited fellowship 3.0%
Offers an other track 6.0%

Resident Evaluation
Yearly specialty in-service examination required 98.3%
Patient surveys 59.7%
Portfolio system 55.2%
360 degree evaluations 63.6%
Objective structured clinical examinations (OSCE) 43.3%

Program Evaluation
Program graduation rates 91.0%
Board certification rates 100.0%
In-training examinations 98.5%
Performance-based assessments 65.7%

Employment Policies and Benefits
Part-time/shared positions 19.4%
On-site child care 44.6%
Subsidized child care 4.5%
Allowance/stipend for professional expenses 95.5%
Leave for educational meetings/conferences 58.8%
Moving allowance 25.4%
Housing stipend 1.5%
On-call meal allowance 95.5%
Free parking 73.1%
PDAs 47.8%
Placement assistance upon completion of program 43.3%
Cross coverage in case of illness/disability 98.5%

Compensation and Leave (Graduate Year 1)
Average resident/fellow compensation $43,811
Average number weeks of vacation 3.5
Sick days (paid) 15.3
Maximum number of paid days for family/medical leave 50
Maximum number of unpaid days for family/medical leave 76

Major Medical Benefits
Major medical insurance for residents 97.0%
Major medical insurance for dependents 92.5%
Outpatient mental health insurance 94.0%
Inpatient mental health insurance 94.0%
Group life insurance 95.5%
Dental insurance 82.1%
Disability insurance 91.0%
Disability insurance for occupationally acquired HIV 77.6%
Medical insurance coverage begins when starting program 82.1%
Medical Genetics

Professional Description
A specialist trained in diagnostic and therapeutic procedures for patients with genetically linked diseases. This specialist uses modern cytogenetic, radiologic, and biochemical testing to assist in specialized genetic counseling, implements needed therapeutic interventions, and provides prevention through prenatal diagnosis.

A medical geneticist plans and coordinates large-scale screening programs for inborn errors of metabolism, hemoglobinopathies, chromosome abnormalities, and neural tube defects.

Prerequisites; Length of Training
No prerequisites are required when entering a 4-year program; 2 years of ACGME-accredited GME are required when entering a 2-year program. Length of accredited programs is 2 years or 4 years.

Subspecialties
Subspecialty programs accredited by the ACGME
- Molecular genetic pathology
- Medical biochemical genetics

Note: Molecular genetic pathology programs are jointly accredited by the Residency Review Committees for Medical Genetics and Pathology.

American Board of Medical Genetics specialty certificates
- Clinical biochemical genetics
- Clinical cytogenetics
- Clinical genetics
- Clinical molecular genetics
- Molecular genetic pathology (subspecialty)

Note: Molecular genetic pathology certification is jointly offered by the American Board of Medical Genetics and American Board of Pathology.

Data
Unless otherwise noted, all data are for 2007.

Clinical Biochemical Genetics

Professional Description
A clinical biochemical geneticist is an individual with a US- or Canadian-earned, or the equivalent of an earned, doctoral degree (MD, DO, PhD) who can correctly perform and interpret biochemical analyses relevant to the diagnosis and management of human genetic diseases and who acts as a consultant regarding laboratory diagnosis of a broad range of biochemical genetic disorders.

These requirements imply that the individual possesses
- The ability to supervise and direct the operations of a clinical biochemical genetics diagnostic laboratory, including technical expertise and knowledge in quality control and quality assessment procedures
- Broad knowledge of (1) basic biochemistry and genetics, (2) the application of biochemical techniques to the diagnosis and management of genetic diseases, and (3) the etiology, pathogenesis, clinical manifestations, and management of human inherited biochemical disorders
- An understanding of the heterogeneity, variability, and natural history of biochemical genetic disorders
- Diagnostic and interpretive skills in a wide range of biochemical genetic problems
- The ability to communicate biochemical laboratory results in the capacity of consultant to medical genetics professionals and other clinicians and directly to patients in concert with other professional staff

Source: American Board of Medical Genetics

Prerequisites; Length of Training
A US-earned doctoral degree (MD, DO, PhD, or the equivalent) is required. Length of ABMG-accredited programs is 2 years.

Clinical Cytogenetics

Professional Description
A clinical cytogeneticist is an individual with a US- or Canadian-earned, or the equivalent of an earned, doctoral degree (MD, DO, PhD) who can correctly perform and interpret cytogenetic analyses relevant to the diagnosis and management of human genetic diseases and who acts as a consultant regarding laboratory diagnosis of a broad range of cytogenetic disorders, including inherited and acquired conditions.

These requirements imply that the individual possesses
- The ability to supervise and direct the operations of a clinical cytogenetic diagnostic laboratory, including technical expertise and knowledge in quality control and quality assessment procedures
- Broad knowledge in human cytogenetics, including prenatal and postnatal cytogenetic diagnosis, infertility and pregnancy loss, cancer, and leukemia
- An understanding of the heterogeneity, variability, and natural history of cytogenetic disorders

Clinical Genetics (MD)

Professional Description
A clinical geneticist is an individual who holds a US- or Canadian-earned, or the equivalent of an earned, MD or DO degree, has had 2 years in an ACGME-accredited clinical residency program in another medical specialty, 2 years in an accredited clinical genetics residency program, valid medical license, and demonstrates competence to provide comprehensive genetic diagnostic, management, therapeutic, and counseling services.

These requirements imply that the individual possesses
- Broad knowledge in human and medical genetics, including an understanding of heterogeneity, variability, and natural history of genetic disorders
- Diagnostic and therapeutic skills in a wide range of genetic disorders
- The ability to elicit and interpret individual and family histories
- The ability to integrate clinical and genetic information and understand the uses, limitations, interpretation, and significance of specialized laboratory and clinical procedures
- Expertise in genetic and mathematical principles to perform risk assessment
- Skills in interviewing and counseling techniques required to (1) elicit from the patient or family the information necessary to reach an appropriate conclusion; (2) anticipate areas of difficulty and conflict; (3) help families and individuals recognize and cope with their emotional and psychological needs; (4) recognize situations requiring psychiatric referral; and (5) transmit pertinent information in a way that is comprehensible to the individual or family
- Knowledge of available health care resources (community, regional, and national) required for appropriate referral or support

Clinical Molecular Genetics

Professional Description
A clinical molecular geneticist is an individual with a US- or Canadian-earned, or the equivalent of an earned, doctoral degree (MD, DO, PhD) who can correctly perform and interpret molecular analyses relevant to the diagnosis and management of human genetic diseases and who can act as a consultant regarding laboratory diagnosis of a broad range of molecular genetic disorders.

These requirements imply that the individual possesses
- The ability to supervise and direct the operations of a clinical molecular genetic laboratory, including technical experience and knowledge in quality control and quality assessment procedures
- The ability to perform a variety of molecular diagnostic assays
- An understanding of the heterogeneity, variability, and natural history of molecular genetic disorders
- A broad knowledge of (1) basic molecular biology and genetics; (2) the application of recombinant DNA techniques and linkage analysis to the diagnosis of genetic diseases; and (3) the etiology, pathogenesis, clinical manifestations, and management of human genetic disorders
- Diagnostic and interpretive skills in a wide range of clinical molecular genetics problems
- The ability to communicate molecular diagnostic laboratory results in the capacity of a consultant to medical genetics professionals and other clinicians and directly to patients in concert with other professional staff

Prerequisites; Length of Training
A US earned doctoral degree (MD, DO, PhD, or the equivalent) is required. Length of ABMG-accredited programs is 2 years.

Molecular Genetic Pathology

Professional Description
A molecular genetic pathologist is expert in the principles, theory, and technologies of molecular biology and molecular genetics. This expertise is used to make or confirm diagnoses of Mendelian genetic disorders, of human development, infectious diseases and malignancies, and to assess the natural history of those disorders. A molecular genetic pathologist provides information about gene
structure, function, and alteration and applies laboratory tech-
niques for diagnosis, treatment, and prognosis for individuals with
related disorders.

Source: American Board of Medical Genetics

Prerequisites; Length of Training
Completion of a 4-year ACGME-accredited program in pathology or
medical genetics is required. Length of ACGME-accredited molecu-
lar genetic pathology programs is 1 year.

Neurological Surgery

Professional Description
Neurological surgery is a discipline of medicine and the specialty of
surgery that provides the operative and nonoperative management
of disorders of the central, peripheral, and auton-
mic nervous systems, including their supporting structures and
vascular supply; the evaluation and treatment of pathological pro-
cesses that modify the function or activity of the nervous system,
including the hypophysis, and the operative and nonoperative man-
gement of pain. As such, neurological surgery encompasses the
surgical, nonsurgical, and stereotactic radiosurgical treatment of
adult and pediatric patients with disorders of the nervous system:
disorders of the brain, meninges, skull, and skull base, and their
blood supply, including the surgical and endovascular treatment of
disorders of the intracranial and extracranial vasculature supplying
the brain and spinal cord; disorders of the pituitary gland; disorders
of the spinal cord, meninges, and vertebral column, including those
that may require treatment by fusion, instrumentation, or endo-
vascular techniques; and disorders of the cranial, peripheral, and
spinal nerves throughout their distribution.

Source: American Board of Neurological Surgery

Prerequisites; Length of Training
One year in an ACGME-accredited general surgery program or at
least 1 year in a program accredited for the acquisition of funda-
mental clinical skills is required. Length of accredited programs is
5 years.

Subspecialties
Subspecialty programs accredited by the ACGME

Endovascular Surgical Neuroradiology

Professional Description
Endovascular surgical neuroradiology is a subspecialty that uses catheter technology, radiologic imaging, and clinical expertise to diagnose and treat diseases of the central nervous system. Practitioners have training and experience in:
- Signs and symptoms of disorders amenable to diagnosis and treatment by endovascular surgical neuroradiology techniques
- Neurological examinations to evaluate patients with neurological disorders
- Pathophysiology and natural history of these disorders
- Indications and contraindications to endovascular surgical neuroradiology procedures
- Clinical and technical aspects of endovascular surgical neuroradiology procedures
- Medical and surgical alternatives
- Preoperative and postoperative management of endovascular patients
- Neurointensive care management
- Fundamentals of imaging physics and radiation biology
- Interpretation of radiographic studies pertinent to the practice

Neurology

Professional Description
A neurologist specializes in the diagnosis and treatment of all types of disease or impaired function of the brain, spinal cord, peripheral nerves, muscles, and autonomic nervous system, as well as the blood vessels that relate to these structures. A child neurologist has special skills in the diagnosis and management of neurologic disorders of the neonatal period, infancy, early childhood, and adolescence.

Prerequisites; Length of Training
Programs are either 3 years or 4 years. Residents entering a 3-year program must have completed 1 year in an accredited program in the US or Canada.

Subspecialties
Subspecialty programs accredited by the ACGME
- Child neurology
- Clinical neurophysiology
- Endovascular surgical neuroradiology
- Neurodevelopmental disabilities
- Neuromuscular medicine
- Pain medicine*
- Sleep medicine
- Vascular neurology

* In 2007, ACGME-accredited pain medicine programs under anesthesiology, neurology, physical medicine and rehabilitation, and psychiatry were combined into a multidisciplinary pain medicine subspecialty.

American Board of Psychiatry and Neurology subspecialty certificates
- Child neurology (special certification)
- Clinical neurophysiology
- Hospice and palliative medicine
- Neurodevelopmental disabilities
- Pain medicine
- Sleep medicine
- Vascular neurology

Data
Unless otherwise noted, all data are for 2007.

Residents/Fellows
- Total number of active residents/fellows: 1,588
- Average number of residents/fellows per program: 12.8
- Average percent female: 43.6%
- Average percent international medical graduate (IMG): 37.4%

Program Faculty
- Average number of full-time physician faculty: 27.6
- Average number of part-time physician faculty: 2.6
- Average percent female full-time physician faculty: 21.6%
Average ratio of full-time physician faculty to resident/fellow: 1.5

Table 2. Data for Neurology Programs Listed in FREIDA
Number of programs providing data: 73

Work Schedule (Program Year 1)
- Average hours on duty per week: 62.9
- Average maximum consecutive hours on duty: 26.0
- Average days off duty per week: 1.2
- Moonlighting allowed within institution: 47.9%
- Night float system: 31.5%
- Offers awareness and management of fatigue in residents/fellows: 84.9%

Educational Setting (Program Year 1)
- Average hours/week of regularly scheduled lectures/conferences: 7.2
- Average percent of training in hospital outpatient clinics: 25.4%
- Average percent of training in nonhospital ambulatory care community settings: 2.7%

Educational Benefits
- Curriculum on management of tobacco dependence: 2.7%
- Program to assess/enhance medical professionalism: 72.6%
- Debt management/financial counseling: 54.8%
- Formal program to develop teaching skills: 21.9%
- Formal mentoring program: 21.9%
- Training in identifying and reporting of domestic violence/abuse: 54.8%
- MPH/MBA or Ph.D training: 27.4%
- Research rotation: 17.8%

Educational Features
- Offers additional training or educational experience beyond accredited length: 28.5%
- Offers a primary care track: 9.6%
- Offers a rural track: 0.0%
- Offers a women's health track: 2.7%
- Offers a hospitalist track: 5.5%
- Offers a research track/nonaccredited fellowship: 24.7%
- Offers an other track: 5.5%

Resident Evaluation
- Yearly specialty in-service examination required: 98.5%
- Patient surveys: 53.4%
- Portfolio system: 47.9%
- 360 degree evaluations: 83.6%
- Objective structured clinical examinations (OSCE): 43.8%

Program Evaluation
- Program graduation rates: 87.7%
- Board certification rates: 94.5%
- In-training examinations: 98.6%
- Performance-based assessments: 74.0%

Employment Policies and Benefits
- Part-time/shared positions: 6.8%
- On-site child care: 35.6%
- Subsidized child care: 9.6%
- Allowance/stipend for professional expenses: 98.6%
- Leave for educational meetings/conferences: 81.3%
- Moving allowance: 4.1%
- Housing stipend: 5.5%

On-call meal allowance: 91.8%
Free parking: 57.5%
PDA: 34.3%
Placement assistance upon completion of program: 20.5%
Cross coverage in case of illness/disability: 91.8%

Compensation and Leave (Graduate Year 1)
- Average resident/fellow compensation: $45,365
- Average number weeks of vacation: 3.4
- Sick days (paid): 22.0
- Maximum number of paid days for family/medical leave: 53
- Maximum number of unpaid days for family/medical leave: 63

Major Medical Benefits
- Major medical insurance for residents: 100.0%
- Major medical insurance for dependents: 90.4%
- Outpatient mental health insurance: 88.3%
- Inpatient mental health insurance: 89.0%
- Group life insurance: 94.5%
- Dental insurance: 90.4%
- Disability insurance: 92.2%
- Disability insurance for occupationally acquired HIV: 65.8%
- Medical insurance coverage begins when starting program: 83.6%

Child Neurology

Professional Description
A child neurologist has special skills in the diagnosis and management of neurologic disorders of the neonatal period, infancy, early childhood, and adolescence.

Prerequisites; Length of Training
The three options for prerequisite training are 2 years of pediatrics training in the US or Canada; 1 year of internal medicine and 1 year of pediatrics; or 1 year of pediatrics and 1 year of basic neuroscience training. Length of ACGME-accredited programs is 3 years.

Data
Unless otherwise noted, all data are for 2007.

Table 1. Child Neurology Programs

| Number of accredited programs | 69 |

Program Data
| Length of accredited training | 3 |
| Minimum number of prior years of GME required | 2 |
| Offers graduate year 1 positions, available immediately upon medical school completion | No |

- Average number of paid days for family/medical leave | 51
- Maximum number of paid days for family/medical leave | 55

Major Medical Benefits
- Major medical insurance for residents | 100.0%
- Major medical insurance for dependents | 92.3%
- Outpatient mental health insurance | 100.0%
- Inpatient mental health insurance | 100.0%
Clinical Neurophysiology

Professional Description
A neurologist who specializes in the diagnosis and management of central, peripheral, and autonomic nervous system disorders using a combination of clinical evaluation and electrophysiologic testing, such as electroencephalography (EEG), electromyography (EMG), and nerve conduction studies (NCS), among others.

Prerequisites; Length of Training
Completion of an accredited neurology, child neurology, or psychiatry program in the US or Canada is required. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2007.

**Endovascular Surgical Neuroradiology**

See description under Neurological Surgery.

**Neurodevelopmental Disabilities**

**Professional Description**
A pediatrician or neurologist who specializes in the diagnosis and management of chronic conditions that affect the developing and mature nervous system, such as cerebral palsy, mental retardation, and chronic behavioral syndromes or neurologic conditions.

**Prerequisites; Length of Training**
Completion of 2 years of an accredited pediatrics program in the US or Canada is required. Length of ACGME-accredited programs is 4 years.

**Neuromuscular Medicine**

**Professional Description**
A neurologist or child neurologist specializing in the diagnosis and management of disorders of nerve, muscle, or neuromuscular junction, including amyotrophic lateral sclerosis, peripheral neuropathies (e.g., diabetic and immune mediated neuropathies), various muscular dystrophies, congenital and acquired myopathies, inflammatory myopathies (e.g., polymyositis, inclusion body myositis), and neuromuscular transmission disorders (e.g., myasthenia gravis, Lambert-Eaton myasthenic syndrome).

*Source: American Board of Psychiatry and Neurology*

**Vascular Neurology**

**Professional Description**
A neurologist or child neurologist who specializes in the evaluation, prevention, treatment, and recovery from vascular diseases of the nervous system. This subspecialty includes the diagnosis and treatment of vascular events of arterial or venous origin from a large number of causes that affect the brain or spinal cord; such as ischemic stroke, intracranial hemorrhage, spinal cord ischemia, and spinal cord hemorrhage.

*Source: American Board of Psychiatry and Neurology*

**Prerequisites; Length of Training**
Completion of an accredited neurology program is required. Length of ACGME-accredited programs is 1 year.

**Pain Medicine**
See page 99.

**Sleep Medicine**
See p. 152.
**Nuclear Medicine**

**Professional Description**
A nuclear medicine specialist employs the properties of radioactive atoms and molecules in the diagnosis and treatment of disease and in research. Radiation detection and imaging instrument systems are used to detect disease as it changes the function and metabolism of normal cells, tissues, and organs. A wide variety of diseases can be found in this way, usually before the structure of the organ involved by the disease can be seen to be abnormal by any other techniques. Early detection of coronary artery disease (including acute heart attack); early cancer detection and evaluation of the effect of tumor treatment; diagnosis of infection and inflammation anywhere in the body; and early detection of blood clot in the lungs are all possible with these techniques. Unique forms of radioactive molecules can attack and kill cancer cells (e.g., lymphoma, thyroid cancer) or can relieve the severe pain of cancer that has spread to bone.

The nuclear medicine specialist has special knowledge in the biologic effects of radiation exposure, the fundamentals of the physical sciences, and the principles and operation of radiation detection and imaging instrumentation systems.

**Prerequisites; Length of Training**
Prior to entering a nuclear medicine program, residents must have completed 1 year of broad clinical education in an accredited program in the US or Canada. Nuclear medicine programs are 3 years (as of July 1, 2007).

**Subspecialties**
No subspecialty programs accredited by the Accreditation Council for Graduate Medical Education; no subspecialty certificates offered by the American Board of Nuclear Medicine.

**Data**
Unless otherwise noted, all data are for 2007.

**Table 1. Nuclear Medicine Programs**
| Number of accredited programs | 56 |
| Program Data |  |
| Length of accredited training | 3 |

Obstetrics and Gynecology

Professional Description
An obstetrician-gynecologist possesses special knowledge, skills, and professional capability in the medical and surgical care of the female reproductive system and associated disorders. This physician serves as a consultant to other physicians, and as a primary physician for women.

Prerequisites; Length of Training
No prerequisites required; length of ACGME-accredited programs is 4 years.

Subspecialties
Subspecialty programs accredited by the ACGME
None

Subspecialty programs accredited by the American Board of Obstetrics and Gynecology
- Female pelvic medicine and reconstructive surgery
- Gynecologic oncology
- Maternal-fetal medicine
- Reproductive endocrinology/infertility

American Board of Obstetrics and Gynecology subspecialty certificates
- Critical care medicine
- Gynecologic oncology
- Hospice and palliative medicine
- Maternal-fetal medicine
- Reproductive endocrinology/infertility

Data
Unless otherwise noted, all data are for 2007.

Table 1. Obstetrics and Gynecology Programs
Number of accredited programs 247

Program Data
Length of accredited training 4
Minimum number of prior years of GME required 0
Offers graduate year 1 positions, available immediately upon medical school completion Yes
Average number of interviews for program year 1 positions 57.9
Percent new program directors, 2006-2007 academic year (source: ACGME) 17.6%

Residents/Fellows
Total number of active residents/fellows 4,732
Average number of residents/fellows per program 19.2
Average percent female 76.4%
Average percent international medical graduate (IMG) 21.1%

Program Faculty
Average number of full-time physician faculty 19.5
Average number of part-time physician faculty 6.4
Average percent female full-time physician faculty 43.7%
Average ratio of full-time physician faculty to resident/fellow 0.8

Table 2. Data for Obstetrics and Gynecology Programs Listed in FREIDA
Number of programs providing data 199

Work Schedule (Program Year 1)
Average hours on duty per week 72.1
Average maximum consecutive hours on duty 26.3
Average days off duty per week 1.3
Moonlighting allowed within institution 22.1%

Educational Setting (Program Year 1)
Average hours/week of regularly scheduled lectures/conferences 6.0
Average percent of training in hospital outpatient clinics 27.8%
Average percent of training in nonhospital ambulatory care community settings 7.5%

Educational Benefits
Curriculum on management of fatigue in residents/fellows 86.0%
Offers awareness and management of fatigue in residents/fellows 86.0%

Educational Features
Offers additional training or educational experience beyond accredited length 1.9%
Offers a primary care track 25.1%
Offers a rural track 2.0%
Offers a women’s health track 38.2%
Offers a hospitalist track 2.5%
Offers a research track/nonaccredited fellowship 5.0%
Offers an other track 2.0%

In-training examinations 97.5%
Performance-based assessments 57.8%

Employment Policies and Benefits
Part-time/shared positions 0.5%
On-site child care 38.7%
Subsidized child care 6.0%
Allowance/stipend for professional expenses 97.0%
Leave for educational meetings/conferences 89.7%
Moving allowance 15.6%
Housing stipend 8.5%
On-call meal allowance 96.5%
Free parking 68.3%
PDAs 44.2%
Placement assistance upon completion of program 36.7%
Cross coverage in case of illness/disability 88.9%

Compensation and Leave (Graduate Year 1)
Average resident/fellow compensation $44,084
Average number weeks of vacation 3.4
Sick days (paid) 16.4
Critical Care Medicine

Professional Description
An obstetrician-gynecologist who specializes in critical care medicine diagnoses, treats, and supports female patients with multiple organ dysfunction. This specialist may have administrative responsibilities for intensive care units and may also facilitate and coordinate patient care among the primary physician, the critical care staff, and other specialists.

Prerequisites; Length of Training
To earn the certificate in Obstetrics and Gynecology with Added Qualification in Critical Care from the ABOG, the applicant must have completed a program of no less than 1 year in length that fulfills the requirements of the American Board of Surgery for Surgical Critical Care or the American Board of Anesthesiology for Critical Care Medicine.

Maternal-Fetal Medicine

Professional Description
An obstetrician-gynecologist who cares for, or provides consultation on, patients with complications of pregnancy. This specialist has advanced knowledge of the obstetrical, medical, and surgical complications of pregnancy and their effect on both the mother and the fetus. He/she also possesses expertise in the most current diagnostic and treatment modalities used in the care of patients with complicated pregnancies.

Prerequisites; Length of Training
Completion of an ACGME-accredited obstetrics-gynecology program is required. Length of ABOG-accredited maternal-fetal medicine programs is 3 years.

Ophthalmology

Professional Description
An ophthalmologist has the knowledge and professional skills needed to provide comprehensive eye and vision care. Ophthalmologists are medically trained to diagnose, monitor, and medically or surgically treat all ocular and visual disorders. This includes problems affecting the eye and its component structures, the eyelids, the orbit, and the visual pathways. In so doing, an ophthalmologist prescribes vision services, including glasses and contact lenses.

Prerequisites; Length of Training
One year of education in an accredited program is required prior to entry. Ophthalmology programs are 3 years.

Subspecialties
No subspecialty programs accredited by the Accreditation Council for Graduate Medical Education; no subspecialty certificates offered by the American Board of Ophthalmology.

Data
Unless otherwise noted, all data are for 2007.

Graduate Medical Education Directory 2008-2009
Orthopaedic Surgery

Professional Description
An orthopaedic surgeon is trained in preserving, investigating, and restoring the form and function of the extremities, spine, and associated structures by medical, surgical, and physical means.

An orthopaedic surgeon is involved with the care of patients whose musculoskeletal problems include congenital deformities, trauma, infections, tumors, metabolic disturbances of the musculoskeletal system, deformities, injuries, and degenerative diseases of the spine, hands, feet, knee, hip, shoulder, and elbow in children and adults. An orthopaedic surgeon is also concerned with primary and secondary muscular disorders and the effects of central or peripheral nervous system lesions of the musculoskeletal system.

Prerequisites; Length of Training
No previous GME is required; length of accredited programs is 5 years.

Subspecialties
Subspecialty programs accredited by the ACGME
- Adult reconstructive orthopaedics
- Foot and ankle orthopaedics
- Hand surgery
- Musculoskeletal oncology
- Orthopaedic sports medicine
- Orthopaedic surgery of the spine
- Orthopaedic trauma
- Pediatric orthopaedics

American Board of Orthopaedic Surgery subspecialty certificates
- Orthopaedic sports medicine
- Surgery of the hand

Data
Unless otherwise noted, all data are for 2007.

Musculoskeletal Oncology
Professional Description
Musculoskeletal oncology is the component of orthopaedic surgery that is focused on the diagnosis and treatment of children and adults with benign and malignant tumors of bone and connective soft tissues. The field also includes the diagnosis, treatment, and palliative care of patients with metastatic carcinoma to the skeleton. Musculoskeletal oncologists work in concert with experts from musculoskeletal radiology, pathology, medical and pediatric oncology, radiotherapy, and surgery to care for patients with sarcomas of bone and soft tissue.

Prerequisites; Length of Training
Completion of an accredited residency is required. Length of ACGME-accredited programs is 1 year.

Orthopaedic Sports Medicine
Professional Description
An orthopaedic surgeon trained in sports medicine provides appropriate care for all structures of the musculoskeletal system directly affected by participation in sporting activity.

A sports medicine surgeon is proficient in areas including conditioning, training, and fitness; athletic performance and the impact of dietary supplements, pharmaceuticals, and nutrition on performance and health; coordination of care within the team setting and utilizing other health care professionals; field evaluation and management; and soft tissue biomechanics injury, healing and repair. The specialist understands treatment options, both surgical and nonsurgical, as they relate to sports specific injuries and competition. Knowledge in understanding the principles and techniques of rehabilitation, athletic equipment, and orthotic devices enables the specialist to prevent and manage athletic injuries.

Prerequisites; Length of Training
Completion of an accredited residency is required. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2007.

Orthopaedic Surgery of the Spine

Professional Description
Orthopaedic surgery of the spine is the component of orthopaedic surgery that is focused on the study and prevention of spinal column diseases, disorders, and injuries and their treatment by medical, physical, and surgical methods.

Prerequisites; Length of Training
Completion of an accredited residency is required. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2007.

Table 1. Orthopaedic Surgery of the Spine Programs
| Number of accredited programs | 12 |
| Program Data | |
| Length of accredited training | 1 |
| Minimum number of prior years of GME required | 5 |
| Offers graduate year 1 positions, available immediately upon medical school completion | No |
| Average number of interviews for program year 1 positions | 8.8 |
| Percent new program directors, 2006-2007 academic year (source: ACGME) | 16.7% |

Otolaryngology

Professional Description
An otolaryngologist-head and neck surgeon provides comprehensive medical and surgical care for patients with diseases and disorders that affect the ears, nose, throat, respiratory and upper alimentary systems, and related structures of the head and neck.

An otolaryngologist diagnoses and provides medical and/or surgical therapy or prevention of diseases, allergies, neoplasms, deformities, disorders, and/or injuries of the ears, nose, sinuses, throat, respiratory and upper alimentary systems, face, jaws, and the other head and neck systems. Head and neck oncology, facial plastic and reconstructive surgery, and the treatment of disorders of hearing and voice are fundamental areas of expertise.

Prerequisites; Length of Training
No previous GME is required; length of accredited programs is 5 years.

Subspecialties

Subspecialty programs accredited by the ACGME
- Neurotology
- Pediatric otolaryngology
- Sleep medicine

American Board of Otolaryngology subspecialty certificates
- Neurotology
- Pediatric otolaryngology
- Plastic surgery within the head and neck
- Sleep medicine

Data
Unless otherwise noted, all data are for 2007.

**Neurology**

**Professional Description**

An otolaryngologist who treats diseases of the ear and temporal bone, including disorders of hearing and balance. The additional training in otology and neurotology emphasizes the study of embryology, anatomy, physiology, epidemiology, pathophysiology, pathology, genetics, immunology, microbiology, and the etiology of diseases of the ear and temporal bone.

The neurotologist should have command of the core knowledge and understanding of:

- The basic medical sciences relevant to the temporal bone, lateral skull base, and related structures; the communication sciences, including knowledge of audiology, endocrinology, and neurology as they relate to the temporal bone, lateral skull base, and related structures
- Advanced diagnostic expertise and advanced medical and surgical management skills for the care of diseases and disorders of the petrous apex, infratemporal fossa, internal auditory canals, cranial nerves, and lateral skull base (including the occipital bone, sphenoid bone, temporal bone, mesial aspect of the dura and intradural management), in conjunction with neurological surgery

A neurotologist has acquired expertise in the medical and surgical management of diseases and disorders of the temporal bone, lateral skull base, and related structures beyond that inherent to the practice of otolaryngology-head and neck surgery.

**Source:** American Board of Otolaryngology

**Prerequisites; Length of Training**

Completion of an accredited otolaryngology residency is required. Length of ACGME-accredited programs is 2 years.

**For more information**

American Neurotology Society
www.otology-neurotology.org/ANS/ans-main.html

**Pediatric Otolaryngology**

**Professional Description**

A pediatric otolaryngologist has special expertise in the management of infants and children with disorders that include congenital and acquired conditions involving the aerodigestive tract, nose and paranasal sinuses, the ear, and other areas of the head and neck. The pediatric otolaryngologist has special skills in diagnosing, treating, and managing childhood disorders of voice, speech, language, and hearing.
**Specialty/Subspecialty Information for Otolaryngology**

**Prerequisites; Length of Training**
Completion of an accredited otolaryngology residency is required. Length of ACGME-accredited programs is 1 year (as of July 1, 2006).

**Data**
Unless otherwise noted, all data are for 2007.

Plastic Surgery within the Head and Neck

Professional Description
An otolaryngologist with additional training in plastic and reconstructive procedures within the head, face, neck, and associated structures, including cutaneous head and neck oncology and reconstruction, management of maxillofacial trauma, soft tissue repair, and neural surgery.

The field is diverse and involves a wide age range of patients, from the newborn to the aged. While both cosmetic and reconstructive surgery are practiced, there are many additional procedures which interface with them.

Sleep Medicine
See p. 152.

Pain Medicine

Note: In 2007, ACGME-accredited pain medicine programs under anesthesiology, neurology, physical medicine and rehabilitation, and psychiatry were combined into a multidisciplinary pain medicine subspecialty.

Professional Description
A psychiatrist who provides a high level of care, either as a primary physician or consultant, for patients experiencing problems with acute, chronic, or cancer pain in both hospital and ambulatory settings. Patient care needs may also be coordinated with other specialists.

Prerequisites; Length of Training
A minimum of 4 years of prior GME is required. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2007.

Table 1. Pain Medicine Programs

| Number of accredited programs | 92 |

Program Data
| Length of accredited training | 1 |
| Minimum number of prior years of GME required | 3/4 |

Pathology

Professional Description
A pathologist deals with the causes and nature of disease and contributes to diagnosis, prognosis, and treatment through knowledge gained by the laboratory application of the biologic, chemical, and physical sciences.

A pathologist uses information gathered from the microscopic examination of tissue specimens, cells, and body fluids, and from clinical laboratory tests on body fluids and secretions, for the diagnosis, exclusion, and monitoring of disease.

Prerequisites; Length of Training
No previous GME is required; length of accredited programs is either 3 years or 4 years.

Subspecialties
Subspecialty programs accredited by the ACGME
• Selective pathology
• Blood banking/transfusion medicine
• Chemical pathology
• Cytology
• Dermatopathology
• Forensic pathology
• Hematology
• Medical microbiology
• Molecular genetic pathology
• Neuropathology
• Pediatric pathology

American Board of Pathology subspecialty certificates
• Blood banking/transfusion medicine
• Chemical pathology
• Cytology
• Dermatopathology
• Forensic pathology
• Hematology
• Medical microbiology
• Molecular genetic pathology
• Neuropathology
• Pediatric pathology

Data
Unless otherwise noted, all data are for 2007.

Blood Banking/Transfusion Medicine

Professional Description
A physician who specializes in blood banking/transfusion medicine is responsible for the maintenance of an adequate blood supply, blood donor and patient-recipient safety, and appropriate blood utilization. Pretransfusion compatibility testing and antibody testing assure that blood transfusions, when indicated, are as safe as possible. This physician directs the preparation and safe use of specially prepared blood components, including red blood cells, white blood cells, platelets, plasma constituents, and marrow or stem cells for transplantation.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2007.

Chemical Pathology

Professional Description
A chemical pathologist has expertise in the biochemistry of the human body as it applies to the understanding of the cause and progress of disease. This physician functions as a clinical consultant in the diagnosis and treatment of human disease. Chemical pathology entails the application of biochemical data to the detection, confirmation, or monitoring of disease.

Prerequisites; Length of Training
Completion of an ACGME-accredited residency in anatomic pathology and clinical pathology, anatomic pathology, or clinical pathology is required. Length of ACGME-accredited programs is 1 year.

Cytopathology

Professional Description
A cytopathologist is an anatomic pathologist trained in the diagnosis of human disease by means of the study of cells obtained from body secretions and fluids, by scraping, washing, or sponging the surface of a lesion, or by the aspiration of a tumor mass or body organ with a fine needle. A major aspect of a cytopathologist’s practice is the interpretation of Papanicolaou-stained smears of cells from the female reproductive systems, the “Pap” test. However, the cytopathologist’s expertise is applied to the diagnosis of cells from all systems and areas of the body. He/she is a consultant to all medical specialists.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2007.

**Dermatopathology**

**Professional Description**
A dermatopathologist is expert in diagnosing and monitoring diseases of the skin, including infectious, immunologic, degenerative, and neoplastic diseases. This entails the examination and interpretation of specially prepared tissue sections, cellular scrapings, and smears of skin lesions by means of light microscopy, electron microscopy, and fluorescence microscopy.

**Prerequisites; Length of Training**
Completion of an dermatology or pathology residency is required; length of accredited programs is 1 year.

For more information
American Society of Dermatopathology
111 Deer Lake Road, Suite 100
Deerfield, IL 60015
847 480-9282 Fax
E-mail: info@asdp.org
www.asdp.org

**Forensic Pathology**

**Professional Description**
A forensic pathologist is expert in investigating and evaluating cases of sudden, unexpected, suspicious, and violent death as well as other specific classes of death defined by law. The forensic pathologist serves the public as coroner or medical examiner, or by performing medicolegal autopsies for such officials.

**Prerequisites; Length of Training**
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 1 year.

Medical Microbiology

Professional Description
A medical microbiologist is expert in the isolation and identification of microbial agents that cause infectious disease. Viruses, bacteria, and fungi, as well as parasites, are identified and, where possible, tested for susceptibility to appropriate antimicrobial agents.

Prerequisites; Length of Training
Required prerequisites are completion of an ACGME-accredited residency in anatomic pathology and clinical pathology, anatomic pathology, or clinical pathology, or completion of an ACGME-accredited residency in another primary medical specialty and completion of an ACGME-accredited fellowship in infectious disease. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2007.

Molecular Genetic Pathology

Professional Description
A molecular genetic pathologist is expert in the principles, theory, and technologies of molecular biology and molecular genetics. This expertise is used to make or confirm diagnoses of Mendelian genetic disorders, disorders of human development, and infectious diseases and malignancies, and to assess the natural history of those disorders. A molecular genetic pathologist provides information about gene structure, function, and alteration and applies laboratory techniques for diagnosis, treatment, and prognosis for individuals with related disorders.

Prerequisites; Length of Training
Completion of a 4-year ACGME-accredited program in pathology or medical genetics is required. Length of ACGME-accredited molecular genetic pathology programs is 1 year.

Neuropathology

Professional Description
A neuropathologist is expert in the diagnosis of diseases of the nervous system and skeletal muscles and functions as a consultant primarily to neurologists and neurosurgeons. The neuropathologist is knowledgeable in the infirmities of humans as they affect the nervous and neuromuscular systems, be they degenerative, infectious, metabolic, immunologic, neoplastic, vascular, or physical in nature.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 2 years.

Data
Unless otherwise noted, all data are for 2007.

Pediatric Pathology

Professional Description
A pediatric pathologist is expert in the laboratory diagnosis of diseases that occur during fetal growth, infancy, and child development. The practice requires a strong foundation in general pathology and substantial understanding of normal growth and development, along with extensive knowledge of pediatric medicine.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 2 years.
Selective Pathology

Professional Description
Selective pathology programs are typically sponsored by institutions that provide unique educational resources in a specialized area of pathology.

Length of Training
Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2007.

Pediatrics

Professional Description

Pediatrics is the specialty of medical science concerned with the physical, emotional, and social health of children from birth to young adulthood. Pediatric care encompasses a broad spectrum of health services ranging from preventive health care to the diagnosis and treatment of acute and chronic diseases.

Pediatrics is a discipline that deals with biological, social, and environmental influences on the developing child and with the impact of disease and dysfunction on development. Children differ from adults anatomically, physiologically, immunologically, psychologically, developmentally, and metabolically.

The pediatrician understands this constantly changing functional status of his or her patients incident to growth and development and the consequent changing standards of “normal” for age. A pediatrician is a medical specialist who is primarily concerned with the health, welfare, and development of children and is uniquely qualified for these endeavors by virtue of interest and initial training. Maintenance of these competencies is achieved by experience, training, continuous education, self-assessment, and practice improvement.

A pediatrician is able to define accurately the child’s health status as well as to serve as a consultant and to make use of other specialists as consultants. Because the child’s welfare is heavily dependent on the home and family, the pediatrician supports efforts to create a nurturing environment. Such support includes education about healthful living and anticipatory guidance for both patients and parents.

A pediatrician participates at the community level in preventing or solving problems in child health care and publicly advocates the causes of children.

Developmental-Behavioral Pediatrics
Professional Description
A developmental-behavioral specialist is a pediatrician with special training and experience who aims to foster understanding and promotion of optimal development of children and families through research, education, clinical care, and advocacy efforts. This physician assists in the prevention, diagnosis, and management of developmental difficulties and problematic behaviors in children, and in the family dysfunctions that compromise children's development.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

**Pediatric Critical Care Medicine**

**Professional Description**
A pediatrician expert in advanced life support for children from the term or near-term neonate to the adolescent. This competence extends to the critical care management of life-threatening organ system failure from any cause in both medical and surgical patients and to the support of vital physiological functions.

This specialist may have administrative responsibilities for intensive care units and also facilitate patient care among other specialists.

**Prerequisites; Length of Training**
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

**Data**
Unless otherwise noted, all data are for 2007.

Pediatric Infectious Diseases

Professional Description
A pediatrician trained to care for children in the diagnosis, treatment and prevention of infectious diseases. This specialist can apply specific knowledge to affect a better outcome for pediatric infections with complicated courses, underlying diseases that predispose to unusual or severe infections, unclear diagnoses, uncommon diseases, and complex or investigational treatments.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

Data
Unless otherwise noted, all data are for 2007.

Table 1. Pediatric Infectious Diseases Programs
| Number of accredited programs | 61 |

Pediatric Nephrology

Professional Description
A pediatrician who deals with the normal and abnormal development and maturation of the kidney and urinary tract, the mechanisms by which the kidney can be damaged, the evaluation and treatment of renal diseases, fluid and electrolyte abnormalities, hypertension, and renal replacement therapy.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

Data
Unless otherwise noted, all data are for 2007.

Table 1. Pediatric Nephrology Programs
Number of accredited programs 35
Program Data
Length of accredited training 3
Minimum number of prior years of GME required 3
Offer graduate year 1 positions, available immediately upon medical school completion No
Average number of interviews for program year 1 positions 2.8
Percent new program directors, 2006-2007 academic year (source: ACGME) 8.8%
Residents/Fellows
Total number of active residents/fellows 98
Average number of residents/fellows per program 2.8
Average percent female 66.3%
Average percent international medical graduate (IMG) 35.7%
Program Faculty
Average number of full-time physician faculty 4.9
Average number of part-time physician faculty 0.7
Average percent female full-time physician faculty 37.3%
Average ratio of full-time physician faculty to resident/fellow 1.0

Table 2. Data for Pediatric Nephrology Programs Listed in FREIDA
Number of programs providing data 14
Work Schedule (Program Year 1)
Average hours on duty per week 45.2
Average maximum consecutive hours on duty 19.1
Average days off duty per week 1.4
Moonlighting allowed within institution 78.6%
Night float system 0.0%
Offers awareness and management of fatigue in residents/fellows 78.6%
### Educational Setting (Program Year 1)

- Average hours/week of regularly scheduled lectures/conferences: 5.1
- Average percent of training in hospital outpatient clinics: 32.5%
- Average percent of training in nonhospital ambulatory care community settings: 0.8%

### Educational Benefits

- Curriculum on management of tobacco dependence: 0.0%
- Program to assess/enhance medical professionalism: 78.6%
- Debt management/financial counseling: 42.9%
- Formal program to develop teaching skills: 100.0%
- Formal mentoring program: 92.9%
- Formal program to foster interdisciplinary teamwork: 21.4%
- Continuous quality improvement training: 78.6%
- International experience: 14.3%
- Resident/fellow retreats: 28.6%
- Off-campus electives: 42.9%

### Pediatric Pulmonology

#### Professional Description

A pediatrician dedicated to the prevention and treatment of all respiratory diseases affecting infants, children, and young adults. This specialist is knowledgeable about the growth and development of the lung, assessment of respiratory function in infants and children, and experienced in a variety of invasive and noninvasive diagnostic techniques.

#### Prerequisites; Length of Training

A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

#### Data

Unless otherwise noted, all data are for 2007.

Pediatric Rheumatology

Professional Description
A pediatrician who treats diseases of joints, muscle, bones, and tendons. A pediatric rheumatologist diagnoses and treats arthritis, back pain, muscle strains, common athletic injuries, and “collagen” diseases.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

Pediatric Sports Medicine

Professional Description
A pediatrician responsible for continuous care in the field of sports medicine, not only for the enhancement of health and fitness, but also for the prevention of injury and illness. A sports medicine physician must have knowledge and experience in the promotion of wellness and the prevention of injury. Knowledge about special areas of medicine such as exercise physiology, biomechanics, nutrition, psychology, physical rehabilitation, epidemiology, physical evaluation, injuries (treatment and prevention and referral practice), and the role of exercise in promoting a healthy lifestyle are essential to the practice of sports medicine. The sports medicine physician requires special education to provide the knowledge to improve the health care of the individual engaged in physical exercise (sports) whether as an individual or as part of a team.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 1 year.

Pediatric Transplant Hepatology

Professional Description
A pediatrician with expertise in transplant hepatology encompasses the special knowledge and skill required of pediatric gastroenterologists to care for patients prior to and following hepatic transplantation; it spans all phases of liver transplantation.

Prerequisites; Length of Training
A minimum of 6 years of prior GME is required. For certification, the ABP requires 1 year in a transplant hepatology program that is associated with a pediatric gastroenterology program accredited by the ACGME or RCPSC.

Sleep Medicine
See p. 152.
Physical Medicine and Rehabilitation

Professional Description
A physician certified in physical medicine and rehabilitation is often called a physiatrist. The primary goal of the physiatrist is to achieve maximal restoration of physical, psychological, social, and vocational function through comprehensive rehabilitation. Pain management is often an important part of the role of the physiatrist. For diagnosis and evaluation, a physiatrist may include the techniques of electromyography to supplement the standard history, physical, X-ray, and laboratory examinations. The physiatrist has expertise in the appropriate use of therapeutic exercise, prosthetics (artificial limbs), orthotics, and mechanical and electrical devices.

Prerequisites; Length of Training
No previous GME is required when entering an accredited 4-year program that includes 12 months of fundamental clinical skills in areas other than physical medicine and rehabilitation; 1 year of previous GME (eg, Transitional Year) is required when entering a 3-year program.

Subspecialties
Subspecialty programs accredited by the ACGME
- Pain medicine*
- Pediatric rehabilitation medicine
- Spinal cord injury medicine
* In 2007, ACGME-accredited pain medicine programs under anesthesiology, neurology, physical medicine and rehabilitation, and psychiatry were combined into a multidisciplinary pain medicine subspecialty.

American Board of Physical Medicine and Rehabilitation subspecialty certificates
- Hospice and palliative medicine
- Neuromuscular medicine
- Pain medicine
- Pediatric rehabilitation medicine
- Spinal cord injury medicine

Data
Unless otherwise noted, all data are for 2007.

Neuromuscular Medicine

Professional Description
A physiatrist who specializes in neuromuscular medicine possesses specialized knowledge in the science, clinical evaluation, and management of these disorders. This encompasses the knowledge of the pathology, diagnosis, and treatment of these disorders at a level that is significantly beyond the training and knowledge expected of a general physiatrist.

Neuromuscular medicine includes the evaluation and treatment of a wide range of diseases, including motor neuron disease, myopathy/neuromuscular transmission disorders, peripheral neuropathy, cranial/spinal single and multiple mononeuropathies, polyneuropathy (infectious/inflammatory), inherited neuropathy, polyneuropathy (ischemia/physical agents/toxins), and polyneuropathy/systemic disease.

Pain Medicine

See description on p. 99.

Pediatric Rehabilitation Medicine

Professional Description
A physiatrist who utilizes an interdisciplinary approach and addresses the prevention, diagnosis, treatment, and management of congenital and childhood onset physical impairments including related or secondary medical, physical, functional, psychosocial, and vocational limitations or conditions, with an understanding of the life course of disability.
This physician is trained in the identification of functional capabilities and selection of the best rehabilitation intervention strategies, with an understanding of the continuum of care.

**Prerequisites; Length of Training**
A minimum of 4 years of prior GME is required. Length of ACGME-accredited programs is 2 years (or 1 year for trainees who have completed ACGME-approved combined or consecutive programs in both physical medicine and rehabilitation and pediatrics).

**Spinal Cord Injury Medicine**

**Professional Description**
A physician who addresses the prevention, diagnosis, treatment, and management of traumatic spinal cord injury and nontraumatic etiologies of spinal cord dysfunction by working in an interdisciplinary manner. Care is provided to patients of all ages on a lifelong basis and covers related medical, physical, psychological, and vocational disabilities and complications.

**Prerequisites; Length of Training**
A minimum of 3 years of prior GME is required in a specialty relevant to spinal cord injury medicine, such as anesthesiology, emergency medicine, family medicine, internal medicine, neurological surgery, neurology, orthopaedic surgery, pediatrics, physical medicine and rehabilitation, plastic surgery, surgery, or urology. Length of ACGME-accredited programs is 1 year.

**Data**
Unless otherwise noted, all data are for 2007.

Plastic Surgery

Professional Description
Plastic surgery deals with the repair, reconstruction, or replacement of physical defects of form or function involving the skin, musculoskeletal system, craniofacial structures, hand, extremities, breast and trunk, external genitalia or cosmetic enhancement of these areas of the body. Cosmetic surgery is an essential component of plastic surgery. The plastic surgeon uses cosmetic surgical principles both to improve overall appearance and to optimize the outcome of reconstructive procedures.

Special knowledge and skill in the design and surgery of grafts, flaps, free tissue transfer and replantation is necessary. Competence in the management of complex wounds, the use of implantable materials, and in tumor surgery is required. Plastic surgeons have been prominent in the development of innovative techniques such as microvascular and craniofacial surgery, liposuction, and tissue transfer. Anatomy, physiology, pathology, and other basic sciences are fundamental to the specialty.

Competency in plastic surgery implies an amalgam of basic medical and surgical knowledge, operative judgment, technical expertise, ethical behavior, and interpersonal skills to achieve problem resolution and patient satisfaction.

Source: American Board of Plastic Surgery

Prerequisites; Length of Training
Accredited plastic surgery programs are either independent (2 to 3 years length) or integrated (5 to 6 years). Prerequisites for the independent programs are 1) a minimum of 3 years clinical education with progressive responsibility in a general surgery program; 2) completion of a neurological surgery, orthopaedic surgery, otolaryngology, or urology residency; or 3) completion of an educational program in oral and maxillofacial surgery approved by the American Dental Association (for individuals holding the DMD/MD or DDS/MD degree).

Subspecialties
Subspecialty programs accredited by the ACGME

Specialty/Subspecialty Information for Plastic Surgery

Graduate Medical Education Directory 2008-2009 129
Craniofacial Surgery (Plastic Surgery within the Head and Neck)

Professional Description
A plastic surgeon with additional training in plastic and reconstructive procedures within the head, face, neck, and associated structures, including cutaneous head and neck oncology and reconstruction, management of maxillofacial trauma, soft tissue repair, and neural surgery.

The field is diverse and involves a wide age range of patients, from the newborn to the aged. While both cosmetic and reconstructive surgery are practiced, there are many additional procedures that interface with them. Cosmetic procedures include otoplasty; surgery of the aging face (brow lift, blepharoplasty, face lift); rhinoplasty; facial implants (cheek, nasal, and chin); facial resurfacing; and liposuction/lipo-plasty. Reconstructive procedures performed include maxillofacial trauma; skin grafts and flaps; repair of congenital facial defects (hemangioma, cleft lip and palate, nasal abnormalities); reconstruction of the jaws and other facial bones; reanimation/rehabilitation of the paralyzed face; nerve repair; peri-orbital surgery; and biomedical implant insertion. Areas of research in this field include materials biocompatibility; wound healing adjuncts; skin repair/regeneration; and bone reconstruction.

Prerequisites; Length of Training
Completion of a 6-year plastic surgery program or other appropriate surgery training is required. Length of ACGME-accredited programs is 1 year.

Hand Surgery

Professional Description
A plastic surgeon with additional training in the investigation, preservation, and restoration—by medical, surgical, and rehabilitative means—of all structures of the upper extremity directly affecting the form and function of the hand and wrist.

Prerequisites; Length of Training
Completion of an ACGME-accredited general surgery, orthopaedic surgery, or plastic surgery program is required. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2007.

Table 1. Hand Surgery Programs

Preventive Medicine

Professional Description
A preventive medicine specialist focuses on the health of individuals and defined populations to protect, promote, and maintain health and well-being and to prevent disease, disability, and premature death. The distinctive components of preventive medicine include:

- Biostatistics and the application of biostatistical principles and methodology
- Epidemiology and its application to population-based medicine and research
- Health services management and administration, including developing, assessing, and assuring health policies; planning, implementing, directing, budgeting, and evaluating population health and disease management programs; and utilizing legislative and regulatory processes to enhance health
- Control of environmental factors that may adversely affect health
- Clinical preventive medicine activities, including measures to promote health and prevent the occurrence, progression, and disabling effects of disease and injury
- Assessment of social, cultural, and behavioral influences on health

A preventive medicine physician may be a specialist in general preventive medicine, public health, occupational medicine, or aerospace medicine. This specialist works with large population groups as well as with individual patients to promote health and understand the risks of disease, injury, disability, and death, seeking to modify and eliminate these risks.

Prerequisites; Length of Training
Accredited programs are either 1, 2, or 3 years in length.

Specialty Areas

- Average percent female full-time physician faculty: 33.7%
- Average ratio of full-time physician faculty to resident/fellow: 1.3

Table 2. Data for Preventive Medicine Programs Listed in FREIDA
| Number of programs providing data | 21 |
| Work Schedule (Program Year 1) | Average hours on duty per week: 41.4 |
| Average maximum consecutive hours on duty: 12.3 |
| Average days off duty per week: 2.0 |
| Moonlighting allowed within institution: 68.7% |
| Night float system: 0.0% |
| Offers awareness and management of fatigue in residents/fellows: 71.4% |

Educational Setting (Program Year 1)
- Average hours/week of regularly scheduled lectures/conferences: 8.7
- Average percent of training in hospital outpatient clinics: 12.4%
- Average percent of training in nonhospital ambulatory care community settings: 28.0%

Educational Benefits
- Curriculum on management of tobacco dependence: 18.0%
- Program to assess/enhance medical professionalism: 76.2%
- Debt management/financial counseling: 33.3%
- Formal program to develop teaching skills: 47.6%
- Formal mentoring program: 33.3%
- Formal program to foster interdisciplinary teamwork: 19.0%
- Continuous quality improvement training: 81.0%
- International experience: 19.0%
- Resident/fellow retreats: 28.6%
- Off-campus electives: 100.0%
- Hospice/home care experience: 0.0%
- Cultural competence awareness: 81.0%
- Instruction in medical Spanish or other non-English language: 9.5%
- Alternative/complementary medicine curriculum: 23.8%
- Training in identifying and reporting of domestic violence/abuse: 28.8%
- MPH/MBA or PhD training: 95.2%
- Research rotation: 61.9%

Educational Features
- Offers additional training or educational experience beyond accredited length: 17.3%
- Offers a primary care track: 9.5%
- Offers a rural track: 23.8%
- Offers a women’s health track: 9.5%
- Offers a hospitalist track: 0.0%
Specialty/Subspecialty Information for Preventive Medicine

Offers a research track/nonaccredited fellowship 14.3%
Offers an other track 61.9%

Resident Evaluation
Yearly specialty in-service examination required 80.4%
Patient surveys 19.0%
Portfolio system 47.6%
360 degree evaluations 66.7%
Objective structured clinical examinations (OSCE) 14.3%

Program Evaluation
Program graduation rates 85.7%
Board certification rates 100.0%
In-training examinations 95.2%
Performance-based assessments 33.3%

Employment Policies and Benefits
Part-time/shared positions 28.6%
On-site child care 28.6%
Subsidized child care 4.8%
Allowance/stipend for professional expenses 95.2%
Leave for educational meetings/conferences 80.0%
Moving allowance 4.8%
Housing stipend 4.8%
On-call meal allowance 9.5%
Free parking 71.4%
PDAs 4.8%
Placement assistance upon completion of program 33.3%
Cross coverage in case of illness/disability 47.6%

Compensation and Leave (Graduate Year 1)
Average resident/fellow compensation $45,177
Average number weeks of vacation 2.9
Sick days (paid) 23.8
Maximum number of paid days for family/medical leave 29
Maximum number of unpaid days for family/medical leave 53

Major Medical Benefits
Major medical insurance for residents 100.0%
Major medical insurance for dependents 95.2%
Outpatient mental health insurance 95.2%
Inpatient mental health insurance 85.7%
Group life insurance 81.0%
Dental insurance 90.5%
Disability insurance 85.7%
Disability insurance for occupationally acquired HIV 61.9%
Medical insurance coverage begins when starting program 71.4%

Aerospace Medicine

Professional Description
Aerospace medicine concerns the determination and maintenance of the health, safety, and performance of persons involved in air and space travel. Aerospace medicine, as a broad field of endeavor, offers dynamic challenges and opportunities for physicians, nurses, physiologists, bienvironmental engineers, industrial hygienists, environmental health practitioners, human factors specialists, psychologists, and other professionals. Those in the field are dedicated to enhancing health, promoting safety, and improving performance of individuals who work or travel in unusual environments. The environments of space and aviation provide significant challenges, such as microgravity, radiation exposure, G-forces, emergency ejection injuries, and hypoxic conditions, for those embarking in their exploration. Areas of interest range from space and atmospheric flight to undersea activities, and the environments that are studied cover a wide spectrum, extending from the “microenvironments” of space or diving suits to those of “Spaceship Earth.”

Occupational Medicine

Professional Description
Occupational and environmental medicine is perhaps the most wide-ranging of all medical specialties. It is the medical specialty devoted to prevention and management of occupational and environmental injury, illness and disability, and promotion of health and productivity of workers, their families, and communities.

Occupational medicine was previously identified as “industrial medicine.” This term was used when heavy industry (eg, lumbering, automobile manufacturing, mining, railroads, steel manufacturers, etc) employed physicians to provide acute medical and surgical care for employees. By 1945, medical programs had spread to business organizations with a predominance of clerical and service employees. Large banks, insurance companies, mercantile establishments, etc., could not be described as industrial; therefore, the broader designation of “occupational medicine” came into common use.

Today, the complexity and pervasiveness of modern industrial processes afford occupational and environmental medicine physicians the opportunity to address work site and environmental concerns and such community health and policy issues as atmospheric pollution, product safety, health promotion, and benefits value management. The term “environmental medicine” has also recently been used to describe this growing, challenging, modern medical specialty. Environmental medicine has been defined as the branch of medical science that addresses the impact of chemical and physical stressors on individuals and groups. Both occupational and environmental medicine use similar skills and focus on the recognition and prevention of hazardous exposures.

Public Health and General Preventive Medicine

Professional Description
A public health physician helps guide a community, agency, health organization, medical office, or program in pursuit of group or community health goals. This includes physicians who plan, provide, and administer public health and preventive medicine services in public, private, or voluntary settings.

The public health practitioner:
• Performs epidemiological investigations of acute and chronic diseases and injuries
• Uses appropriate statistical techniques in the design of studies and interpretation of findings relative to disease interventions performed on individuals and in monitoring and experimental protocols
• Plans, administers, and evaluates programs to promote health and prevent disease in medical practice settings and in public health agencies
• Designs, performs, and evaluates clinical trials
• Applies clinical interventions in the general population
• Assesses health risk factors in individual persons and groups and prescribes appropriate interventions
• Assesses and ameliorates the impact of environmental and occupational risk factors on individual persons and on groups
• Assesses the clinical and public health program needs of populations, eg, workers, communities, and military groups

Medical Toxicology

Professional Description
A specialist who is expert in evaluating and managing patients with accidental or intentional poisoning through exposure to prescription and nonprescription medications, drugs of abuse, household or industrial toxins, and environmental toxins.

Important areas of medical toxicology include acute pediatric and adult drug ingestion; drug abuse, addiction, and withdrawal; chemical poisoning exposure and toxicity; hazardous materials exposure and toxicity; and occupational toxicology.

Prerequisites; Length of Training
Completion of an ACGME-accredited residency is required; length of accredited programs is 2 years.

For more information
American College of Medical Toxicology
1901 North Roselle Road, Suite 920
Schaumburg, IL 60195
847 885-0674
847 885-8393 Fax
E-mail: info@acmt.net
www.acmt.net

Undersea and Hyperbaric Medicine

Professional Description
A specialist who treats decompression illness and diving accident cases and uses hyperbaric oxygen therapy to treat such conditions as carbon monoxide poisoning, gas gangrene, nonhealing wounds, tissue damage from radiation and burns, and bone infections. This specialist also serves as consultant to other physicians in all aspects of hyperbaric chamber operations, and assesses risks and applies appropriate standards to prevent disease and disability in divers and other persons working in altered atmospheric conditions.

Prerequisites; Length of Training
Completion of an ACGME-accredited residency is required; length of accredited programs is 1 year.
Psychiatry

Professional Description
A psychiatrist specializes in the prevention, diagnosis, and treatment of mental, addictive, and emotional disorders such as schizophrenia and other psychotic disorders, mood disorders, anxiety disorders, substance-related disorders, sexual and gender identity disorders, and adjustment disorders. The psychiatrist is able to understand the biologic, psychologic, and social components of illness, and therefore is uniquely prepared to treat the whole person. A psychiatrist is qualified to order diagnostic laboratory tests and to prescribe medications, evaluate and treat psychologic and interpersonal problems, and intervene with families who are coping with stress, crises, and other problems in living.

Prerequisites; Length of Training
No previous GME is required. ACGME-accredited programs are 4 years.
Physicians may also enter programs at the GY2 level only after successfully completing one of the following:
• One clinical year of training in an ACGME-accredited internal medicine, family medicine, or pediatrics program
• An ACGME-accredited transitional year program
• One year of an ACGME-accredited residency in a clinical specialty requiring comprehensive and continuous patient care

For physicians entering at the GY2 level, the GY1 year may be credited toward the 48-month requirement.

Subspecialties
Subspecialty programs accredited by the ACGME
• Addiction psychiatry
• Child and adolescent psychiatry
• Forensic psychiatry
• Geriatric psychiatry
• Pain medicine
• Psychosomatic medicine
• Sleep medicine

American Board of Psychiatry and Neurology subspecialty certificates
• Addiction psychiatry
• Child and adolescent psychiatry
• Forensic psychiatry
• Geriatric psychiatry
• Hospice and palliative medicine
• Pain medicine
• Psychosomatic medicine
• Sleep medicine

Addiction Psychiatry

Professional Description
A psychiatrist who focuses on the evaluation and treatment of individuals with alcohol, drug, or other substance-related disorders and of individuals with the dual diagnosis of substance-related and other psychiatric disorders.

Prerequisites; Length of Training
A minimum of 4 years of prior GME is required. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2007.

### Forensic Psychiatry

#### Professional Description

A psychiatrist who focuses on the interrelationships between psychiatry and civil, criminal, and administrative law. This specialist evaluates individuals involved with the legal system and provides specialized treatment to those incarcerated in jails, prisons, and forensic psychiatry hospitals.

#### Prerequisites; Length of Training

A minimum of 4 years of prior GME is required. Length of ACGME-accredited programs is 1 year.

#### Data

Unless otherwise noted, all data are for 2007.

### Specialty/Subspecialty Information for Psychiatry

Average number of interviews for program year 1 positions: 5.3

Percent new program directors, 2006-2007 academic year (source: ACGME): 14.6%

### Residents/Fellows

Total number of active residents/fellows: 61

Average number of residents/fellows per program: 1.5

Average percent female: 32.8%

Average percent international medical graduate (IMG): 23.0%

### Program Faculty

Average number of full-time physician faculty: 4.9

Average number of part-time physician faculty: 3.4

Average percent female full-time physician faculty: 31.7%

### Average ratio of full-time physician faculty to resident/fellow: 1.3

### Educational Setting (Program Year 1)

Average hours of regularly scheduled lectures/conferences: 6.2

Average percent of training in hospital outpatient clinics: 21.0%

Average percent of training in nonhospital ambulatory care community settings: 32.7%

### Educational Benefits

Curriculum on management of tobacco dependence: 0.0%

Program to assess/enhance medical professionalism: 53.8%

Debt management/financial counseling: 15.4%

Formal program to develop teaching skills: 61.5%

Formal program to foster interdisciplinary teamwork: 23.1%

Continuous quality improvement training: 61.5%

International experience: 0.0%

Resident/fellow retreats: 30.8%

Off-campus electives: 61.5%

Hospice/home care experience: 0.0%

Cultural competence awareness: 94.5%

Instruction in medical Spanish or other non-English language: 7.7%

Alternative/complementary medicine curriculum: 7.7%

Training in identifying and reporting of domestic violence/abuse: 61.5%

MPH/MBA or PhD training: 0.0%

Research rotation: 46.2%

### Educational Features

Offers additional training or educational experience beyond accredited length: 2.3%

Offers a primary care track: 0.0%

Offers a rural track: 0.0%

Offers a women’s health track: 0.0%

Offers a hospitalist track: 0.0%

Offers a research track/nonaccredited fellowship: 7.7%

Offers an other track: 38.5%

### Resident Evaluation

Yearly specialty in-service examination required: 39.6%

Patient surveys: 23.1%

Portfolio system: 46.2%

360 degree evaluations: 53.8%

Objective structured clinical examinations (OSCE): 15.4%

Geriatric Psychiatry

Professional Description
A psychiatrist with expertise in the prevention, evaluation, diagnosis, and treatment of mental and emotional disorders in the elderly. The geriatric psychiatrist seeks to improve the psychiatric care of the elderly both in health and in disease.

Prerequisites; Length of Training
A minimum of 4 years of prior GME is required. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2007.

Table 1. Geriatric Psychiatry Programs
Number of accredited programs 60

Psychosomatic Medicine

Professional Description
A psychiatrist who specializes in the diagnosis and treatment of psychiatric disorders and symptoms in complex medically ill patients. This subspecialty includes treatment of patients with acute or chronic medical, neurological, obstetrical, or surgical illness in which psychiatric illness is affecting their medical care and/or quality of life; such as HIV infection, organ transplantation, heart disease, renal failure, cancer, stroke, traumatic brain injury, high-risk pregnancy, and chronic obstructive pulmonary disease, among others. Patients may also be those who have a psychiatric disorder that is the direct consequence of a primary medical condition, or a somatoform disorder or psychological factors affecting a general medical condition. Psychiatrists specializing in psychosomatic medicine provide consultation-liaison services in general medical hospitals, attend on medical psychiatry inpatient units, and provide collaborative care in primary care and other outpatient settings.

Source: American Board of Psychiatry and Neurology

Prerequisites; Length of Training
A minimum of 4 years of prior GME is required. Length of ACGME-accredited programs is 1 year.

Pain Medicine

See page 99.
Radiation Oncology

Professional Description
A radiologist who deals with the therapeutic applications of radiant energy and its modifiers and the study and management of disease, especially malignant tumors.

Prerequisites; Length of Training
Resident education in radiation oncology includes 5 years of accredited, clinically oriented GME, of which 4 years must be in radiation oncology. GY1 training must be spent in internal medicine, family medicine, obstetrics/gynecology, surgery or surgical specialties, pediatrics, a year of categorical radiation oncology, or a transitional year program. ACGME-accredited programs in radiation oncology are 4 years.

Subspecialties
No subspecialty programs accredited by the Accreditation Council for Graduate Medical Education; no subspecialty certificates offered by the American Board of Radiology.

Data
Unless otherwise noted, all data are for 2007.

Radiology-Diagnostic

Professional Description
A radiologist utilizes radiologic methodologies to diagnose and treat disease. Physicians practicing in the field of radiology must often specialize in radiology, diagnostic radiology, radiation oncology, or radiologic physics.
A diagnostic radiologist utilizes x-ray, radionuclides, ultrasound, and electromagnetic radiation to diagnose and treat disease.

Prerequisites; Length of Training
Resident education in diagnostic radiology includes 5 years of clinically-oriented GME, of which 4 years must be in diagnostic radiology. The clinical year must consist of ACGME, RCPSC, or equivalent accredited training in internal medicine, pediatrics, surgery or surgical specialties, obstetrics and gynecology, neurology, family medicine, emergency medicine, or any combination of these, or an ACGME- or equivalent accredited transitional year. ACGME-accredited programs in diagnostic radiology are 4 years.

Subspecialties
Subspecialty programs accredited by the ACGME
- Abdominal radiology
- Cardiothoracic radiology
- Endovascular surgical neuroradiology
- Musculoskeletal radiology
- Neuroradiology
- Nuclear radiology
- Pediatric radiology
- Vascular and interventional radiology

American Board of Radiology subspecialty certificates
- Hospice and palliative medicine
- Neuroradiology
- Nuclear radiology
- Pediatric radiology
- Vascular and interventional radiology

Data

Abdominal Radiology

Professional Description
Abdominal radiology constitutes the application and interpretation of conventional radiology, computed tomography, ultrasonography, magnetic resonance (MR) imaging, nuclear medicine, fluoroscopy, and interventional methods customarily included within the specialty of diagnostic radiology as they apply to diseases involving the gastrointestinal tract, genitourinary tract, and the intraperitoneal and extra peritoneal abdominal organs.

Prerequisites; Length of Training
Satisfactory completion of an ACGME- or RCPSC-accredited diagnostic radiology residency, or other training judged suitable by the program director, is required. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2007.

Cardiothoracic Radiology

Professional Description
The cardiothoracic radiologist works as a diagnostic and therapeutic consultant and practitioner in the application and interpretation of imaging examinations and interventional procedures related to the lungs, pleura, mediastinum, chest wall, heart, pericardium, and the thoracic vascular system in the adult. The imaging methods and procedures include, but are not necessarily limited to, routine radiography, fluoroscopy, computed tomography (CT), magnetic resonance (MR) imaging, ultrasound, and interventional techniques.

Endovascular Surgical Neuroradiology

Professional Description
Endovascular surgical neuroradiology is a subspecialty that uses catheter technology, radiologic imaging, and clinical expertise to diagnose and treat diseases of the central nervous system. Practitioners have training and experience in:

• Signs and symptoms of disorders amenable to diagnosis and treatment by endovascular surgical neuroradiology techniques
• Neurological examinations to evaluate patients with neurological disorders
• Pathophysiology and natural history of these disorders
• Indications and contraindications to endovascular surgical neuroradiology procedures
• Clinical and technical aspects of endovascular surgical neuroradiology procedures
• Medical and surgical alternatives
• Preoperative and postoperative management of endovascular patients
• Neurointensive care management
• Fundamentals of imaging physics and radiation biology
• Interpretation of radiographic studies pertinent to the practice

Prerequisites; Length of Training
A minimum of 4 years of prior GME is required. Length of ACGME-accredited programs is 1 year.

Musculoskeletal Radiology

Professional Description
Musculoskeletal radiologists use imaging examinations and procedures to analyze disorders of the musculoskeletal system, including bones, joints, and soft tissues. The imaging methods and procedures include, but are not necessarily limited to, routine radiography, computed tomography, ultrasonography, radionuclide scintigraphy, magnetic resonance, arthrography, and image-guided percutaneous biopsy techniques.

Prerequisites; Length of Training
Satisfactory completion of an ACGME- or RCPSC-accredited diagnostic radiology residency, or other training judged suitable by the program director, is required. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2007.

Pediatric Radiology

Professional Description
A pediatric radiologist is proficient in all forms of diagnostic imaging as it pertains to treating diseases in the newborn, infant, child, and adolescent. This specialist has knowledge of both imaging and interventional procedures related to the care and management of diseases of children. A pediatric radiologist must be highly knowledgeable of all organ systems as they relate to growth and development, congenital malformations, diseases peculiar to infants and children, and diseases that begin in childhood but cause substantial residual impairment in adulthood.

Prerequisites; Length of Training
Satisfactory completion of an ACGME- or RCPSC-accredited diagnostic radiology residency, or other training judged suitable by the program director, is required. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2007.

Specialty/Subspecialty Information for Radiology-Diagnostic

Graduate Medical Education Directory 2008-2009 151
Sleep Medicine

Professional Description
Sleep medicine is a multidisciplinary subspecialty of family medicine, internal medicine, psychiatry, pediatrics, neurology, and otolaryngology.

Sleep medicine is a discipline of medical practice in which sleep disorders are assessed, monitored, treated, and prevented by using a combination of techniques (clinical evaluation, physiologic testing, imaging, and intervention) and medication. Specialists in sleep medicine are expected to:

- Participate in an interdisciplinary care of patients of all ages that incorporates aspects of psychiatry, neurology, internal medicine, epidemiology, surgery, pediatrics and basic science
- Acquire detailed knowledge of the sleep and respiratory control centers, physiology, and neurobiology underlying sleep and wakefulness
- Diagnose and manage sleep disorder patients in outpatient and inpatient settings

Source: Sleep Medicine Program Requirements, ACGME
www.acgme.org/acWebsite/downloads/RRC_progReq/520pr604_u605.pdf

This subspecialty includes the clinical assessment, polysomnographic evaluation, and treatment of sleep disorders, including insomnias, disorders of excessive sleepiness (eg, narcolepsy), sleep-related breathing disorders (such as obstructive sleep apnea), parasomnias, circadian rhythm disorders, sleep-related movement disorders, and other conditions pertaining to the sleep-wake cycle.

Source: American Board of Psychiatry and Neurology

Prerequisites; Length of Training
Completion of an ACGME-accredited residency program in family medicine, internal medicine, pulmonology, psychiatry, pediatrics, neurology, or otolaryngology is required; ACGME-accredited programs in sleep medicine are 1 year.

**Surgery-General**

**Professional Description**

The discipline of general surgery has a central core of knowledge embracing anatomy, physiology, metabolism, immunology, nutrition, pathology, wound healing, shock and resuscitation, intensive care, and neoplasia within the essential content areas outlined below.

Surgeons certified by the American Board of Surgery (ABS) have through their training acquired knowledge and experience related to the diagnosis and preoperative, operative, and postoperative management, including the management of complications, in the essential content areas listed below.

- Alimentary tract
- Abdomen and its contents
- Breast, skin, and soft tissue
- Endocrine system
- Head and neck surgery
- Pediatric surgery
- Surgical critical care
- Surgical oncology
- Trauma/burns
- Vascular surgery

The certified general surgeon is also expected to have:

- Preoperative, operative, and postoperative experience in transplantation surgery, plastic surgery (including familiarity with the role of breast reconstruction after mastectomy), and cardiothoracic surgery
- Significant experience in performing minimally invasive surgical procedures, including basic and advanced laparoscopic procedures
- Experience with endoscopic techniques, particularly proctosigmoidoscopy, colonoscopy, esophagogastroduodenoscopy, laryngoscopy, and bronchoscopy
- Experience with sentinel lymph node mapping for breast cancer and melanoma
- Experience with diagnostic ultrasonography, particularly of the following areas:
  - head and neck;
  - breast;
  - abdomen, including intraoperative and laparoscopic ultrasound; and
  - endorectal.
- Knowledge and skills in palliative care and management of pain, weight loss, and cachexia in patients with malignant and chronic conditions
- Familiarity with diagnostic and therapeutic techniques:
  - fine needle aspiration techniques for cytologic biopsy;
  - investigation and manipulation of the distal common bile duct (including sphincterotomy);
  - physiologic testing and evaluation of the gastrointestinal tract; and
  - noninvasive diagnostic evaluation of the vascular system and invasive vascular intervention techniques.
- Familiarity with the special requirements of bariatric and geriatric surgical patients, including operative care and counseling of patients and families
- An understanding of the administration of anesthetic agents, airway intubation, and conscious sedation
- An understanding of the diagnosis and management of urgent and emergent problems in gynecologic, neurological, orthopaedic, and urologic surgery

**Prerequisites; Length of Training**

No prior GME is required. ACGME-accredited programs in general surgery are 5 years.

**Subspecialties**

**Subspecialty programs accredited by the ACGME**

- Hand surgery
- Pediatric surgery
- Surgical critical care
- Vascular surgery

**American Board of Surgery subspecialty certificates**

- Hospice and palliative medicine
- Pediatric surgery
- Surgery of the hand
- Surgical critical care
- Vascular surgery (general certificate)

**Surgery residency performance data for board certification examinations**

The American Board of Surgery has posted online the 5-year average pass rate of first-time examinees for all ACGME-accredited surgery residency programs on the Surgery Qualifying and Surgery Certifying Examinations, as well as a combined first-time pass rate for both examinations. These data are intended for use by medical students who are interested in surgical residencies, as one factor that may be relevant in choosing which programs to pursue.

Surgical Critical Care

Professional Description
A surgeon with expertise in managing the critically ill and postoperative patient, particularly the trauma victim, and specializing in critical care medicine diagnoses and treating and supporting patients with multiple organ dysfunction. This specialist may have administrative responsibilities for intensive care units and may also facilitate and coordinate patient care among the primary physician, the critical care staff, and other specialists.

Prerequisites; Length of Training
A minimum of 5 years of prior GME is required. Length of ACGME-accredited programs is 1 year.

## Congenital Cardiac Surgery

### Professional Description

“Educational programs in congenital cardiac surgery must provide the educational resources appropriate for the development of proficiency in the diagnosis and treatment of diseases of congenital arterial, venous, and lymphatic circulatory systems, including those components intrinsic to the heart.”

In addition, “[f]ellows must be provided with education with special diagnostic techniques for the management of congenital cardiac lesions; the methods and techniques of cardiac catheterization, and competence in the interpretation of such findings; and experience with the application, interpretation, and limitations of echocardiography and other imaging techniques.”

*Source: Congenital Cardiac Surgery Program Requirements, ACGME, www.acgme.org/acWebsite/downloads/RRC_progReq/466pr206.pdf*

### Prerequisites; Length of Training

Satisfactory completion of a thoracic surgery program accredited by the ACGME or Royal College of Physicians and Surgeons of Canada is required. Length of ACGME-accredited programs is 1 year.

Transitional Year

Description
The objective of the transitional year is to provide a well-balanced program of GME in multiple clinical disciplines to facilitate the choice of and/or preparation for a specific specialty. The transitional year is not meant to be a complete graduate education program in preparation for the practice of medicine.

Source: Transitional Year Program Requirements, ACGME

Prerequisites; Length of Training
No prior GME is required. ACGME-accredited programs are 1 year.

Data
Unless otherwise noted, all data are for 2007.

Table 1. Transitional Year Programs
Number of accredited programs 124
Length of accredited training 1
Minimum number of prior years of GME required 0

Urology

Professional Description
A urologist manages benign and malignant medical and surgical disorders of the genitourinary system and the adrenal gland. This specialist has comprehensive knowledge of, and skills in, endoscopic, percutaneous, and open surgery of congenital and acquired conditions of the urinary and reproductive systems and their contiguous structures.

Prerequisites; Length of Training
Satisfactory completion of 1 year of an ACGME-accredited general surgery residency is required. ACGME-accredited urology programs are 3 years or 4 years.

Subspecialties
Subspecialty programs accredited by the ACGME
- Pediatric urology

Data
Unless otherwise noted, all data are for 2007.

Pediatric Urology

Professional Description
Pediatric urology involves all aspects of congenital anomalies, childhood-acquired urologic problems such as tumors and trauma, and overlapping problems of adolescence. Pediatric urologists have advanced skills in the management of congenital anomalies and pediatric urologic problems.

Source: Pediatric Urology Program Requirements, ACGME

Prerequisites; Length of Training
Satisfactory completion of an accredited urology residency program is required. Length of ACGME-accredited programs is 1 year.

Bigger paydays

Oncologists see largest average increase in 2007

Supply and demand mixing with quality-of-life issues drove the results of Modern Healthcare’s annual survey of physician compensation, which shows oncologists, pathologists and psychiatrists receiving on average double-digit pay increases in 2007, and the average compensation for orthopedic surgeons, invasive cardiologists, radiologists and gastroenterologists topping $400,000.

Collected from 14 healthcare-staffing groups and trade organizations, the survey tracks compensation for 20 specialties. Dermatologist, gastroenterologist, invasive cardiologist and plastic surgeon compensation are included in the survey for the first time.

The compensation range for some specialties is particularly dramatic, with more than a $200,000 difference between the top and bottom numbers for dermatologists, gastroenterologists, invasive cardiologists, and oncologists. The biggest gap was in compensation for dermatologists, which ranges from $465,000 to $223,000. In contrast, the ranges for hospitalists and internists are less than $26,000. For hospitalists, the top number provided is $201,357—only $22,457 higher than the lowest figure of $178,900.

For some specialties, compensation can be linked to supply and demand, but for others—particularly emergency medicine—this year’s figures have more-complex explanations. Although the Centers for Disease Control and Prevention released figures last month showing that there were 5 million more emergency-room visits in 2005 than 2004 and total visits reached an all-time high of 115 million, average ER physician compensation increased only 6.25%—less than half the increase registered for oncologists.

“There is an ER crunch,” says Travis Singleton, vice president of marketing with Irving, Texas-based recruiter Merritt, Hawkins & Associates, one of the groups participating in the survey. “But just because numbers have risen less than expected doesn’t mean there is less of a demand. With ER physicians, I think we’ve hit a plateau and groups are doing other things to be attractive.”

According to the survey, compensation for emergency physicians ranges $272,500 to $207,600. Singleton says salaries have just about reached the threshold that most emergency-medicine groups can afford to offer, so they are offering a shorter workday instead. Where 12-hour shifts were once the norm, he says today’s emergency doctor may only have to fill an eight- to 10-hour slot and work during the busiest trauma times only once or twice a month.

“The buzzwords for the new physician are ‘quality of life,’” he says. “An ER physician coming out of training can get a job anywhere and be paid something that—by some people—would be considered much.”

Singleton also says some rural hospitals now pay between $210,000 and $230,000.

Graduate Medical Education Directory 2008-2009
Salary Information Supplement from Modern Healthcare

Special Feature

Data Trackers
Fourteen groups provide numbers for survey

American Medical Group Association
The Alexandria, Va.-based trade group’s Medical Group Compensation and Financial Survey was conducted in December 2006 in partnership with the Minneapolis-based accounting and consulting firm RSM McGladrey. The survey costs $235 for AMGA members and $485 for nonmembers. For more information, call Brad Vaudrey at 612-376-9530. Data submitted by the AMGA for Modern Healthcare’s Physician Compensation Survey are preliminary and subject to change.

Cejka Search
The St. Louis-based physician and healthcare executive search firm has provided services exclusively to the healthcare industry for more than 25 years. Data reported were compiled from Cejka Search’s proprietary database from January to December 2006. The compensation includes salaries, bonuses and estimated forms of cash compensation for 235 physicians in 16 specialties. For more information or to purchase the survey, contact Mary Barber at 314-729-1603.

Delta Physician Placement
The Irving, Texas-based physician-staffing firm’s survey was conducted in April and is based on the surveys of 1,721 physicians representing more than 50 physician specialties at 530 organizations, including hospitals (65% of the sample), group practices (25%), managed-care or insurance plans (9%) and others (1%). Nationwide data are compiled from job offers and search assignments on an annual basis. For more information on the free survey, contact Mike Gianas at 800-521-5060, ext. 4113.

Hay Group
The Philadelphia-based consulting firm surveyed 118 organizations in September 2006. Included in the survey are salaries for 12,000 physicians representing 122 specialties. For more information or to purchase the survey, contact Jacyn DiScullo at 215-861-2388.

Hospital & Healthcare Compensation Service
The Oakland, N.J.-based consulting firm’s survey of employed physicians is published each March. This year’s 31st annual survey, conducted in January, includes 302 organizations and more than 21,412 physicians in 45 specialties. Organizations surveyed were hospitals (82.4%) and group practices (17.6%). For further information or to order the survey, which costs $295 plus shipping, call Erica Bednarz at 201-405-0075, ext. 13.

Jackson & Coker
The national, full-service physician-recruitment firm is based in Alpharetta, Ga. Specializing in locum tenens and permanent placement, Jackson & Coker offers solutions to any physician staffing opportunity. The data reported for this survey were compiled using an e-mail and Web-response system and were sent to more than 88,000 physicians nationwide. The free survey is available by contacting Edward McEachem at 800-272-2707.

Martin, Fletcher
The Irving, Texas-based healthcare staffing firm surveyed 3,549 physicians at 1,064 organizations representing 17 specialties for its annual Physician Compensation and Benefits Report, conducted from April 2006 to April 2007. For more information about the complimentary report, contact Dana Bucher at 800-668-8822.

MD Network
The Coppell, Texas-based healthcare staffing firm publishes an annual Physician Compensation, Incentives and Benefits Survey. The 2007 survey is based on data compiled during the 2006 calendar year and reflects information received from 4,726 physicians and 1,279 senior-level administrative personnel from hospitals and physician group practices. Physician compensation details are available for 32 different medical specialties and subspecialties in 48 states. For more information, call physician Mark Valentine at 972-745-9030.

Medical Group Management Association
The Englewood, Colo.-based professional membership association’s annual physician compensation survey of members and nonmember practices represents 52,785 providers nationwide. This year’s report will be published in August. To order a copy of the report, call 877-275-6462, ext. 1888. Data submitted by the MGMA for Modern Healthcare’s Physician Compensation Survey are preliminary and subject to change based on further validation by the MGMA.

Medicus Partners
Dallas-based Medicus Partners conducted its fourth-annual Physician Compensation and Relocation Survey in March. Respondents totaled 3,827 and included practicing physicians as well as final-year residents and fellows. Compensation figures represent only in-practice physicians. For a free copy of the survey contact Jeff Katon at 888-260-4242, ext. 236.

Merritt, Hawkins & Associates
The survey tracks the Irving, Texas-based company’s recruiting assignments from March 31, 2006, to April 1, 2007, and indicates the recruiting incentives offered by the firm’s clients to recruit doctors in a wide range of specialties. It should be noted that financial recruiting incentives may vary on a regional basis. To receive a free copy of this survey, call Stephanie Godwin at 800-876-0500.

Pacific Cos.
Costa Mesa, Calif.-based Pacific Cos. surveyed 749 organizations from April 2006 to April 2007. The organizations represented include hospitals (58% of the sample), group practices (16%) and solo-practice physicians (26%). Data represent 15,895 physicians in 23 specialties. For more information, call Michael Moore at 800-741-7629.

Pinnacle Health Group
The Atlanta-based physician recruitment firm included 2006 first-year compensation information on hospital-employed and group-practice affiliated physicians working in 39 specialties. For a copy of the free survey, call Molly Howell at 800-492-7771.

Sullivan, Cotter and Associates
More than 180 organizations took part in the Detroit-based company’s survey, including hospitals (62% of the sample), group practices (36%), managed-care or insurance plans (5%) and other plans including medical foundations and faculty practice plans (18%). The cost is $375 for survey participants, $1,500 for nonparticipating healthcare organizations and $3,000 for nonhealthcare providers. For more information or to order the survey, contact Janis D’Amourze at 313-872-1760. Data submitted by Sullivan for Modern Healthcare’s Physician Compensation Survey are preliminary and subject to change.

To order extra copies of this issue, contact customer service at 888-446-1422.

For reprints of this article, call 800-290-5460, ext. 139 or by e-mail, modernhealthcare@reprintbuyer.com

S5 Modern Healthcare • July 16, 2007
Introduction
This section of the Directory contains a list of graduate medical education (GME) programs accredited by the Accreditation Council for Graduate Medical Education (ACGME).

Programs are listed by specialty under the state and city of the sponsoring institution (refer to sample, below). Listed under the program name is the institution that sponsors the residency program, followed by the major participating institution(s), if any, which are recognized by at least one ACGME Residency Review Committee (RRC) as providing a major portion of required GME. Hospitals and other institutions that provide rotations of less than one-sixth of the program length or less than a total of 6 months are not listed in the Directory.

Listings contain the program director's name and program address, telephone and fax numbers, and e-mail address. Newly appointed program directors since the publication of last year's Directory are noted with an asterisk. Additional information on each program includes the ACGME-accredited length of the program and number of ACGME approved/offered positions. [Note: The published program length reflects the length approved by the RRC. The program may require or offer additional years; these data are included in FREIDA Online, at www.ama-assn.org/go/freida, and the GME Library on CD-ROM.] The program identification number appears at the bottom of each listing; the first three digits of this number indicate the specialty/subspecialty code (see “Specialties/Subspecialties with ACGME Program Requirements,” p 173) and the next two the state code.

Sample Listing
Title of the Program
Sponsor: The program's sponsoring institution
The program's major participating institution(s) (if any)
Prgm Director: Name (* = new director since publication of last Directory)
Address
City, state, zip code
Telephone number, fax number
E-mail address
Length: Program length
ACGME Approved/Offered Positions:
Program ID: 000-00-00-000

The Role of the ACGME
The population of programs listed in Section III is set by the ACGME, which shares with the AMA information about accreditation actions and other changes through regular electronic data transfers.

The Directory, as the official list of ACGME-accredited programs, generally reflects accreditation actions completed by December of the previous year. The data published in this edition were transferred from the ACGME to the AMA on January 16, 2008. [Programs with withdrawal dates after this date are included in Section III.

Readers are reminded that accreditation actions and related changes can alter the ACGME program population on a daily basis and that the Directory serves only as a “snapshot” of this population at a given moment. For updated information on ACGME-accredited programs, consult the ACGME Web site at www.acgme.org.

Preventive Medicine Programs
The preventive medicine programs listed in Section III include programs that offer areas of specialization in aerospace medicine, general preventive medicine, occupational medicine, and public health and general preventive medicine.
Transitional Year Programs

Transitional Year programs are available for physicians seeking broad clinical experience before entering GME in their chosen field or for physicians who have not yet decided on a medical specialty.

Combined Specialty Programs

Combined training consists of a coherent educational experience in two or more closely related specialty or subspecialty programs. The educational plan for combined training is approved by the specialty board of each of the specialties to assure that resident physicians completing combined training are eligible for board certification in each of the component specialties. Each specialty or subspecialty program is separately accredited by the ACGME through its respective Residency Review Committee (RRC). The duration of combined training is longer than any one of its component specialty programs standing alone, and shorter than all of its component specialty programs together. Applicants to combined specialty programs, listed in Appendix A, are encouraged to review requirements for admission to the certification process of each board (see Appendix B).

Restricted-entry GME Programs

Centers for Disease Control and Prevention Programs

GME programs at the Centers for Disease Control and Prevention (CDC) are usually open only to CDC physicians.

US Uniformed Services Programs

US Uniformed Services (Army, Navy, Air Force, Public Health Service) first-year GME positions are filled by graduates of accredited schools of medicine and osteopathic medicine. Only those individuals who have graduated from accredited US medical schools are eligible to apply for these first-year GME positions. The majority of the Uniformed Services’ first-year GME positions are filled by individuals with an existing active duty service obligation. In most cases, only those individuals already serving in the Uniformed Services are eligible for appointment to military graduate year 2 and beyond residency positions. Graduates of non-US or non-Canadian medical schools are eligible to apply for graduate year 2 positions if they possess the standard ECFMG Certificate and have completed 1 year of GME training at an ACGME-accredited program.

It is important to note that an individual seeking to be trained in a Uniformed Services medical treatment facility must be qualified for appointment as a commissioned officer in the Uniformed Services. An active duty service obligation is required for participation in Uniformed Services GME training. Acceptance of GME applications from civilian applicants may vary among the four services. Selection priorities for Uniformed Services positions for year 2 and beyond are given to officers on active duty. For more information, interested individuals should contact their local Uniformed Services recruiting office.

Programs on Probation

The Directory may include programs on probation. To check a program’s current accreditation status, go to the ACGME Web site, www.acgme.org, click on “public,” then click on “Search Through Accredited Programs and Sponsors” to look up information about programs and sponsors, including current accreditation status.

Disclaimer

It is the AMA's understanding that all institutions listed in the Graduate Medical Education Directory are required by law to include the phrase “EEO, M/F/D/V” on any information distributed for public view.

Sources for Additional Information

FREIDA Online (Fellowship and Residency Electronic Interactive Database Access), an Internet database available through the AMA home page at www.ama-assn.org/go/freida, offers additional information on GME programs. In addition, the GME e-Letter, a free monthly publication available via e-mail, offers news and updates on all facets of GME. Current/archive issues are available at www.ama-assn.org/go/gmenews.
