| <b>Anesthesiology</b> | <p><i>Are individuals who completed a broad-based clinical year in an AOA-approved program eligible to apply to ACGME-accredited anesthesiology programs?</i><br/> <i>[Program Requirement: III.A.1.]</i></p> <p>The Review Committee understands that during this period of transition to a single GME accreditation system, core programs requiring a pre-requisite year may wish to consider applicants from AOA-approved programs that are not yet pre-accredited or accredited by the ACGME. Core programs will not jeopardize their accreditation status if they accept these individuals. Programs should check with the American Board of Anesthesiology (ABA) and/or the American Osteopathic Board of Anesthesiology (AOBA) regarding certification eligibility.</p> |                  |

| <p><b>Diagnostic Radiology</b></p> |  | <p>A document titled “Radiology Eligibility Considerations” is posted to the RC webpage. The excerpt below addresses eligibility to enter a diagnostic radiology residency:</p> <p><b>Eligibility for R1 class July 1, 2016</b><br/> The Review Committee announced in 2015 that radiology programs with matched residents whose prerequisite clinical year education did not meet the 2016 clinical year eligibility criteria could accept these individuals without consequence. This was allowed due to the 2015 match occurring prior to AOA programs applying for pre-accreditation in the transition to a single GME accreditation system. Other individual exceptions were also granted.</p> <p><b>AOA Consideration</b><br/> The Review Committee understands that during the period of the formal transition to a single GME accreditation system, program directors may wish to consider applicants from AOA-approved programs that are not yet pre-accredited or accredited by the ACGME. As such, the Committee will allow radiology programs that accept candidates who completed an AOA-approved clinical year to do so without consequence through the end of the transition period on June 30, 2020.</p> <p><b>Eligibility for R1 class July 1, 2017 and beyond</b><br/> Other than residents with previous AOA training, all residents entering ACGME-accredited radiology residency programs must be compliant</p> |
