

# Accreditation Council for Graduate Medical Education

## Pediatric Surgery Case Logs

### National Data Report

**Prepared by:** Department of Applications and Data Analysis

- I. National Resident Statistics Main Table
  - A. This main table provides a national picture of educational experiences. The report is ideal for establishing and assessing national policy related to resident practical experiences. Data is broken out by resident role.
  - B. Descriptive statistics have been carefully chosen to provide the most useful information for judging performance at that national level.
    - i. "Natl Res AVE" – The national average describes the mean number of procedures performed per resident in the nation.
    - ii. "Natl Res STD" – The standard deviation indicates how tightly the scores are clustered around the mean in the set of data.
    - iii. "Natl Res MED" – The median value among procedure counts in the nation.
    - iv. "Natl Res MODE" – The most commonly occurring value among procedure counts in the nation.
    - v. "Natl Res MIN" – The minimum value among procedure counts in the nation.
    - vi. "Natl Res MAX" – The maximum value seen among procedure counts in the nation.
    - vii. "Natl Res SUM" – This statistics represents the sum of all procedure counts in the nation.
