ACGME Program Requirements for Graduate Medical Education in Pediatric Nephrology

ACGME approved: June 10, 2008; effective: July 1, 2009
ACGME approved focused revision: September 30, 2012; effective: July 1, 2013
ACGME Program Requirements for Graduate Medical Education in Pediatric Nephrology

Introduction

Int.A. Scope of Training

Int.A.1. Pediatric nephrology programs must provide the fellow with the capability and experience to diagnose and manage renal diseases and to understand the physiology of fluid and electrolyte and acid-base regulation. *(Core)*

Int.A.2. There should also be training in the evaluation of psychosocial aspects of life-threatening and chronic diseases as they affect the patient and the family and in counseling both acutely and chronically ill patients and their families. *(Core)*

VII. Program Personnel and Resources

VII.A. Faculty

VII.A.1. Pediatric Nephrology Specialists

There must be at least two pediatric nephrologists. *(Core)*

VII.A.2. Other Physician Teaching and Consultant Faculty

The following faculty from other disciplines must be available: pediatric urology, pediatric surgery, pathology, radiology, psychiatry/psychology, and organ transplantation. *(Detail)*

VII.B. Resources

The following must be available to the program:

VII.B.1. There must be facilities for renal replacement therapy and renal biopsy. *(Core)*

VII.B.1.a) Space in an ambulatory setting for optimal evaluation and care of outpatients and an inpatient area with a full array of pediatric and related services staffed by pediatric residents and faculty. *(Detail)*

VII.B.2. Laboratory and diagnostic services. *(Core)*

VII.B.2.a) Including: comprehensive diagnostic imaging, electron microscopy, immunology, immunopathology, histocompatibility, and diagnostic radionuclide imaging. *(Detail)*

VII.B.3. A nutrition support service; social and psychological services and other relevant healthcare providers (e.g., nurse specialists, PAs). *(Detail)*
VII.B.4. Patient Population

VII.B.4.a) Adequate numbers of patients with a wide variety and complexity of renal disorders must be available to the training program to ensure that each fellow achieves competence in patient care. *(Core)*

VII.B.4.b) The patient population should be of sufficient size to ensure adequate exposure of fellows to patients with acute renal injury and chronic dialysis, including patients who utilize home dialysis treatment modalities, to ensure adequate training in chronic dialysis and who require renal transplantation (living related donor and deceased donor) and patients who previously had renal transplantation and require long-term follow-up. *(Core)*

VII.B.4.c) Fellows must have the opportunity to care for patients with renal and other disorders in the intensive care unit setting. *(Detail)*

VII.B.4.d) Fellows must have responsibility for providing continuity of care for a panel of outpatients throughout their training. *(Core)*

VIII. Educational Program

VIII.A. Patient Care

VIII.A.1. The fellows must demonstrate competence in the prevention, evaluation, and management of the following: *(Outcome)*

VIII.A.1.a) perinatal and neonatal conditions including congenital anomalies of the kidneys and genitourinary tract *(Outcome)*

VIII.A.1.b) hypertension *(Outcome)*

VIII.A.1.c) acute kidney injury *(Outcome)*

VIII.A.1.d) chronic kidney disease and end-stage renal disease *(Outcome)*

VIII.A.1.e) urinary tract infections, voiding dysfunction, nephrolithiasis, and urologic disorders *(Outcome)*

VIII.A.1.f) renal transplantation *(Outcome)*

VIII.A.1.g) fluid and electrolyte and acid base disorders *(Outcome)*

VIII.A.1.h) acute and chronic glomerular diseases *(Outcome)*

VIII.A.1.i) inherited renal disorders including genetic syndromes, tubular disorders, and cystic diseases *(Outcome)*

VIII.A.2. In addition, fellows must have experience in the following: *(Detail)*

VIII.A.2.a) evaluation and selection of transplant candidates *(Detail)*
VIII.A.2.b) preoperative evaluation and preparation of transplant recipients (Detail)

VIII.A.2.c) recognition and medical management of surgical and non-surgical complications of transplantation (Detail)

VIII.A.3. Fellows should demonstrate competence in: (Outcome)

VIII.A.3.a) acute and chronic dialysis and extracorporeal therapies including:

VIII.A.3.a).(1) evaluation and selection of patients for continuous renal replacement therapies (Outcome)

VIII.A.3.a).(2) initiation of hemodialysis, peritoneal dialysis, and CRRT (Outcome)

VIII.A.3.a).(3) long-term follow-up of patients undergoing chronic dialysis (Outcome)

VIII.A.3.a).(4) understanding of the principles and management of access for acute and chronic dialysis (Outcome)

VIII.A.3.a).(5) understanding the special nutritional requirements of acute and chronic dialysis patients (Outcome)

VIII.A.3.b) performance of percutaneous biopsy of native and transplanted kidneys (Outcome)

VIII.A.3.c) interpretation of urinalysis (Outcome)

VIII.A.3.d) performance of peritoneal dialysis and acute and chronic dialysis and CRRT (Outcome)

VIII.A.4. Fellows should demonstrate competence in clinical applications of: (Outcome)

VIII.A.4.a) interpretation and evaluation of renal pathology specimens (Outcome)

VIII.A.4.b) interpretation of renal imaging procedures (Outcome)

VIII.B. Medical Knowledge

The program must offer instruction through courses, workshops, seminars, and laboratory experience to provide appropriate background for fellows in laboratory diagnostic techniques, radiologic imaging, as well as renal development and physiology, pathophysiology, immunopathology, cell and molecular biology, and genetics. (Detail)

***

Pediatric Nephrology 3
Core Requirements: Statements that define structure, resource, or process elements essential to every graduate medical educational program.

Detail Requirements: Statements that describe a specific structure, resource, or process, for achieving compliance with a Core Requirement. Programs and sponsoring institutions in substantial compliance with the Outcome Requirements may utilize alternative or innovative approaches to meet Core Requirements.

Outcome Requirements: Statements that specify expected measurable or observable attributes (knowledge, abilities, skills, or attitudes) of residents or fellows at key stages of their graduate medical education.

Osteopathic Principles Recognition
For programs seeking Osteopathic Principles Recognition for the entire program, or for a track within the program, the Osteopathic Recognition Requirements are also applicable. (http://www.acgme.org/acgmeweb/Portals/0/PFAssets/ProgramRequirements/Osteopathic_Recognition_Requirements.pdf)
