ACGME Program Requirements for Graduate Medical Education in Pediatric Emergency Medicine

ACGME-approved: February 13, 2007; effective: July 1, 2007
Revised Common Program Requirements effective: July 1, 2011
ACGME approved focused revision: September 30, 2012; effective: July 1, 2013
Editorial revision: April 2014
Revised Common Program Requirements effective: July 1, 2015
Revised Common Program Requirements effective: July 1, 2016
Revised Common Program Requirements effective: July 1, 2017
ACGME Program Requirements for Graduate Medical Education
in Pediatric Emergency Medicine

Common Program Requirements are in Bold

Where applicable, text in italics describes the underlying philosophy of the requirements in that section. These philosophic statements are not program requirements and are therefore not citable.

Introduction

Int.A. Residency is an essential dimension of the transformation of the medical student to the independent practitioner along the continuum of medical education. It is physically, emotionally, and intellectually demanding, and requires longitudinally-concentrated effort on the part of the fellow.

The specialty education of physicians to practice independently is experiential, and necessarily occurs within the context of the health care delivery system. Developing the skills, knowledge, and attitudes leading to proficiency in all the domains of clinical competency requires the fellow physician to assume personal responsibility for the care of individual patients. For the fellow, the essential learning activity is interaction with patients under the guidance and supervision of faculty members who give value, context, and meaning to those interactions. As fellows gain experience and demonstrate growth in their ability to care for patients, they assume roles that permit them to exercise those skills with greater independence. This concept—graded and progressive responsibility—is one of the core tenets of American graduate medical education. Supervision in the setting of graduate medical education has the goals of assuring the provision of safe and effective care to the individual patient; assuring each fellow’s development of the skills, knowledge, and attitudes required to enter the unsupervised practice of medicine; and establishing a foundation for continued professional growth.

The goal of a residency program in pediatric emergency medicine is to produce physicians who are clinically in the management of the acutely ill or injured child in the setting of an emergency department that is approved as a 911-receiving facility or its equivalent and that has an emergency medical services system.

Fellows seeking certification in the subspecialty of pediatric emergency medicine should consult their primary specialty board, i.e., the American Board of Pediatrics (ABP) or the American Board of Emergency Medicine (ABEM), regarding the criteria for certification eligibility in this subspecialty.

Int.B. Duration and Scope of Educational Experience

Int.B.1. All fellows must receive at least two years of training. Pediatrics graduates must be provided with a third year of training to meet the ABP requirements for scholarly activity. *(Core)*

Int.B.1.a) Emergency medicine programs must provide a third year of
training so that pediatrics graduates may complete the ABP requirements for scholarly activity. *(Core)*

Int.B.1.b) Pediatrics sponsored programs that wish to accept emergency medicine trained graduates must provide a two-year residency curriculum. *(Core)*

I. Institutions

I.A. Sponsoring Institution

One sponsoring institution must assume ultimate responsibility for the program, as described in the Institutional Requirements, and this responsibility extends to fellow assignments at all participating sites. *(Core)*

The sponsoring institution and the program must ensure that the program director has sufficient protected time and financial support for his or her educational and administrative responsibilities to the program. *(Core)*

I.A.1. The same institution that sponsors the related core Emergency Medicine program should sponsor the subspecialty program. *(Core)*

I.A.2. Sponsorship of the program must be in compliance with the policy detailed in section 15.00 of the ACGME Manual of Policies and Procedures. *(Core)*

I.A.3. A program in pediatric emergency medicine must be administered by, and be an integral part of, an Accreditation Council for Graduate Medical Education (ACGME)-accredited program in either emergency medicine or pediatrics. The program must also be affiliated with an ACGME-accredited residency program in the reciprocal discipline (i.e., pediatrics for those programs administered by an emergency medicine program; emergency medicine for those administered by pediatrics). *(Core)*

I.A.4. Interaction among the pediatric emergency medicine fellows, faculty, and residents in the core residency program is required. Lines of responsibility for the fellows must be clearly defined. The presence of a subspecialty program should not adversely affect the education of the Emergency Medicine residents. *(Core)*

I.B. Participating Sites

I.B.1. There must be a program letter of agreement (PLA) between the program and each participating site providing a required assignment. The PLA must be renewed at least every five years. *(Core)*

The PLA should:

I.B.1.a) identify the faculty who will assume both educational and supervisory responsibilities for fellows; *(Detail)*
I.B.1.b) specify their responsibilities for teaching, supervision, and formal evaluation of fellows, as specified later in this document; (Detail)

I.B.1.c) specify the duration and content of the educational experience; and, (Detail)

I.B.1.d) state the policies and procedures that will govern fellow education during the assignment. (Detail)

I.B.2. The program director must submit any additions or deletions of participating sites routinely providing an educational experience, required for all fellows, of one month full time equivalent (FTE) or more through the Accreditation Council for Graduate Medical Education (ACGME) Accreditation Data System (ADS). (Core)

I.B.3. An accredited program may span one or more sites. Use of a participating site that provides four or more months of the inpatient and/or outpatient training requires approval by the Review Committee. (Detail)

II. Program Personnel and Resources

II.A. Program Director

II.A.1. There must be a single program director with authority and accountability for the operation of the program. The sponsoring institution’s GMEC must approve a change in program director. (Core)

II.A.1.a) The program director must submit this change to the ACGME via the ADS. (Core)

II.A.2. The program director should continue in his or her position for a length of time adequate to maintain continuity of leadership and program stability. (Detail)

II.A.3. Qualifications of the program director must include:

II.A.3.a) requisite specialty expertise and documented educational and administrative experience acceptable to the Review Committee; (Core)

II.A.3.b) current certification in the subspecialty by the American Board of Medical Specialties in Pediatric Emergency Medicine, or subspecialty qualifications that are acceptable to the Review Committee; (Core)

II.A.3.c) current medical licensure and appropriate medical staff appointment; (Core)

II.A.3.d) three years’ experience as a clinician, teacher, and administrator in pediatric emergency medicine; and, (Core)
II.A.3.e) a record of ongoing involvement in scholarly activities, including peer review publications, and mentoring (i.e., guiding fellows in the acquisition of competence in the clinical, teaching, research and advocacy skills pertinent to the discipline). (Core)

II.A.4. The program director must administer and maintain an educational environment conducive to educating the fellows in each of the ACGME competency areas. (Core)

The program director must:

II.A.4.a) oversee and ensure the quality of didactic and clinical education in all sites that participate in the program; (Core)

II.A.4.b) approve a local director at each participating site who is accountable for fellow education; (Core)

II.A.4.c) approve the selection of program faculty as appropriate; (Core)

II.A.4.d) evaluate program faculty; (Core)

II.A.4.e) approve the continued participation of program faculty based on evaluation; (Core)

II.A.4.f) monitor fellow supervision at all participating sites; (Core)

II.A.4.g) prepare and submit all information required and requested by the ACGME, (Core)

II.A.4.g).(1) This includes but is not limited to the program application forms and annual program updates to the ADS, and ensure that the information submitted is accurate and complete. (Core)

II.A.4.h) ensure compliance with grievance and due process procedures as set forth in the Institutional Requirements and implemented by the sponsoring institution; (Detail)

II.A.4.i) provide verification of residency education for all fellows, including those who leave the program prior to completion; (Detail)

II.A.4.j) implement policies and procedures consistent with the institutional and program requirements for fellow duty hours and the working environment, including moonlighting, (Core)

and, to that end, must:

II.A.4.j).(1) distribute these policies and procedures to the fellows and faculty; (Detail)
II.A.4.j).(2) monitor fellow duty hours, according to sponsoring institutional policies, with a frequency sufficient to ensure compliance with ACGME requirements; (Core)

II.A.4.j).(3) adjust schedules as necessary to mitigate excessive service demands and/or fatigue; and, (Detail)

II.A.4.j).(4) if applicable, monitor the demands of at-home call and adjust schedules as necessary to mitigate excessive service demands and/or fatigue. (Detail)

II.A.4.k) monitor the need for and ensure the provision of back up support systems when patient care responsibilities are unusually difficult or prolonged; (Detail)

II.A.4.l) comply with the sponsoring institution’s written policies and procedures, including those specified in the Institutional Requirements, for selection, evaluation and promotion of fellows, disciplinary action, and supervision of fellows; (Detail)

II.A.4.m) be familiar with and comply with ACGME and Review Committee policies and procedures as outlined in the ACGME Manual of Policies and Procedures; (Detail)

II.A.4.n) obtain review and approval of the sponsoring institution’s GMEC/DIO before submitting information or requests to the ACGME, including:

II.A.4.n).(1) all applications for ACGME accreditation of new programs; (Detail)

II.A.4.n).(2) changes in fellow complement; (Detail)

II.A.4.n).(3) major changes in program structure or length of training; (Detail)

II.A.4.n).(4) progress reports requested by the Review Committee; (Detail)

II.A.4.n).(5) requests for increases or any change to fellow duty hours; (Detail)

II.A.4.n).(6) voluntary withdrawals of ACGME-accredited programs; (Detail)

II.A.4.n).(7) requests for appeal of an adverse action; and, (Detail)

II.A.4.n).(8) appeal presentations to a Board of Appeal or the ACGME. (Detail)
II.A.4.o) obtain DIO review and co-signature on all program application forms, as well as any correspondence or document submitted to the ACGME that addresses: (Detail)

II.A.4.o).(1) program citations, and/or, (Detail)

II.A.4.o).(2) request for changes in the program that would have significant impact, including financial, on the program or institution. (Detail)

II.A.4.p) be a member of the core teaching faculty, (Core)

II.A.4.p).(1) Core and subspecialty program directors should work together to achieve the ACGME Common Program Requirements and the fellowship competencies. Close coordination among core and subspecialty program directors will foster consistent expectations for fellows with regard to their achievement of competencies, and for faculty with regard to evaluation processes. (Core)

II.A.4.q) ensure that the fellows are mentored in their development of clinical, educational, and administrative skills; (Detail)

II.A.4.r) monitor and document the procedural skills of the fellows; and, (Detail)

II.A.4.s) ensure documentation of meetings that describe ongoing interaction among subspecialty and core program directors. (Detail)

II.A.4.s).(1) These must take place at least annually and more frequently as needed. These meetings should address a departmental approach to common educational issues and concerns (e.g., core curriculum, competencies, and evaluation). (Detail)

II.B. Faculty

II.B.1. At each participating site, there must be a sufficient number of faculty with documented qualifications to instruct and supervise all fellows at that location. (Core)

The faculty must:

II.B.1.a) devote sufficient time to the educational program to fulfill their supervisory and teaching responsibilities; and to demonstrate a strong interest in the education of fellows, and (Core)

II.B.1.b) administer and maintain an educational environment conducive to educating fellows in each of the ACGME competency areas. (Core)
II.B.2. **The physician faculty must have current certification in the subspecialty by the American Board of Medical Specialties in Pediatric Emergency Medicine, or possess qualifications judged acceptable to the Review Committee.** *(Core)*

II.B.2.a) Two faculty members must be certified in pediatric emergency medicine or possess qualifications acceptable to the residency Review Committee. *(Core)*

II.B.2.b) The remaining faculty members must be certified in pediatrics, emergency medicine, pediatric emergency medicine or possess qualifications acceptable to the Review Committee. *(Core)*

II.B.2.c) Fellows must have ready access to appropriate teaching and consultant faculty in the full range of Emergency Medicine subspecialties and in other appropriate related disciplines. *(Core)*

II.B.2.c).(1) Other related disciplines should include medical genetics, child neurology, child and adolescent psychiatry, as well as surgery and surgical subspecialties, as appropriate to Pediatric Emergency Medicine. *(Detail)*

II.B.3. **The physician faculty must possess current medical licensure and appropriate medical staff appointment.** *(Core)*

II.B.4. **The non-physician faculty must have appropriate qualifications in their field and hold appropriate institutional appointments.** *(Core)*

II.B.5. **The faculty must establish and maintain an environment of inquiry and scholarship with an active research component.** *(Core)*

II.B.5.a) The faculty must regularly participate in organized clinical discussions, rounds, journal clubs, and conferences. *(Detail)*

II.B.5.b) Some members of the faculty should also demonstrate scholarship by one or more of the following:

II.B.5.b).(1) **peer-reviewed funding;** *(Detail)*

II.B.5.b).(2) **publication of original research or review articles in peer reviewed journals, or chapters in textbooks;** *(Detail)*

II.B.5.b).(3) **publication or presentation of case reports or clinical series at local, regional, or national professional and scientific society meetings; or,** *(Detail)*

II.B.5.b).(4) **participation in national committees or educational organizations.** *(Detail)*

II.B.5.c) Faculty should encourage and support fellows in scholarly
II.B.5.d) There must be at least four members of the teaching staff who have experience and knowledge of the care of acute pediatric illness and injuries so as to:

II.B.5.d).(1) provide adequate supervision of fellows, and.

II.B.5.d).(2) ensure the educational and research quality of the program.

II.B.5.e) The pediatric emergency medicine faculty must:

II.B.5.e).(1) have an active role in curriculum development and in the supervision and evaluation of fellows;

II.B.5.e).(2) contribute both clinically and academically to the program; and,

II.B.5.e).(3) have protected time to allow for teaching and active participation in scholarly activity.

II.B.5.f) The program must ensure that fellows have access to consultants and collaborative faculty in related medical and surgical disciplines who have training and experience in the care of children and adolescents.

II.C. Other Program Personnel

The institution and the program must jointly ensure the availability of all necessary professional, technical, and clerical personnel for the effective administration of the program.

II.D. Resources

The institution and the program must jointly ensure the availability of adequate resources for fellow education, as defined in the specialty program requirements.

II.D.1. There must be an acute care facility that receives patients via ambulance from the pre-hospital setting, is equipped to handle trauma, and has the full range of services associated with residencies in pediatrics and emergency medicine.

II.D.1.a) This facility should be accredited by the Joint Commission on Accreditation of Healthcare Organizations.

II.D.2. There must be comprehensive radiologic and laboratory support systems and readily available operative suites and intensive care unit beds.

II.D.3. Patient Population
II.D.3.a) The available patient population should encompass the full spectrum of infants, children, adolescents, and young adults. (Core)

II.D.3.b) To meet the educational objectives of the program, there should be a minimum of 20,000 pediatric patient visits per year in the program’s primary emergency department. (Core)

II.D.3.b).(1) The Review Committee will consider patient acuity and the total number of trainees in assessing the adequacy of the patient population.

II.D.3.c) The population must include a sufficient number of acutely ill patients with major and minor trauma, airway insufficiency, ingestions, obstetric and gynecologic disorders, psychosocial disturbances, and emergent problems from all pediatric medical and surgical subspecialties. (Core)

II.E. Medical Information Access

Fellows must have ready access to specialty-specific and other appropriate reference material in print or electronic format. Electronic medical literature databases with search capabilities should be available. (Detail)

III. Fellow Appointments

III.A. Eligibility Criteria

The program director must comply with the criteria for resident eligibility as specified in the Institutional Requirements. (Core)

III.A.1. Eligibility Requirements – Residency Programs

III.A.1.a) All prerequisite post-graduate clinical education required for initial entry or transfer into ACGME-accredited residency programs must be completed in ACGME-accredited residency programs, or in Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of Canada (CFPC)-accredited residency programs located in Canada. Residency programs must receive verification of each applicant’s level of competency in the required clinical field using ACGME or CanMEDS Milestones assessments from the prior training program. (Core)

III.A.1.b) A physician who has completed a residency program that was not accredited by ACGME, RCPSC, or CFPC may enter an ACGME-accredited residency program in the same specialty at the PGY-1 level and, at the discretion of the program director at the ACGME-accredited program may be advanced to the PGY-2 level based on ACGME Milestones assessments at the ACGME-accredited program. This
provision applies only to entry into residency in those specialties for which an initial clinical year is not required for entry. (Core)

III.A.1.c) A Review Committee may grant the exception to the eligibility requirements specified in Section III.A.2.b) for residency programs that require completion of a prerequisite residency program prior to admission. (Core)

III.A.1.d) Review Committees will grant no other exceptions to these eligibility requirements for residency education. (Core)

III.A.2. Eligibility Requirements – Fellowship Programs

All required clinical education for entry into ACGME-accredited fellowship programs must be completed in an ACGME-accredited residency program, or in an RCPSC-accredited or CFPC-accredited residency program located in Canada. (Core)

Prerequisite training should include satisfactory completion of an ACGME- or RCPSC-accredited residency program in either emergency medicine or pediatrics. (Core)

III.A.2.a) Fellowship programs must receive verification of each entering fellow’s level of competency in the required field using ACGME or CanMEDS Milestones assessments from the core residency program. (Core)

III.A.2.b) Fellow Eligibility Exception

A Review Committee may grant the following exception to the fellowship eligibility requirements:

An ACGME-accredited fellowship program may accept an exceptionally qualified applicant**, who does not satisfy the eligibility requirements listed in Sections III.A.2. and III.A.2.a), but who does meet all of the following additional qualifications and conditions: (Core)

III.A.2.b).(1) Assessment by the program director and fellowship selection committee of the applicant’s suitability to enter the program, based on prior training and review of the summative evaluations of training in the core specialty; and (Core)

III.A.2.b).(2) Review and approval of the applicant’s exceptional qualifications by the GMEC or a subcommittee of the GMEC; and (Core)
III.A.2.b).(3) Satisfactory completion of the United States Medical Licensing Examination (USMLE) Steps 1, 2, and, if the applicant is eligible, 3, and; (Core)

III.A.2.b).(4) For an international graduate, verification of Educational Commission for Foreign Medical Graduates (ECFMG) certification; and, (Core)

III.A.2.b).(5) Applicants accepted by this exception must complete fellowship Milestones evaluation (for the purposes of establishment of baseline performance by the Clinical Competency Committee), conducted by the receiving fellowship program within six weeks of matriculation. This evaluation may be waived for an applicant who has completed an ACGME International-accredited residency based on the applicant’s Milestones evaluation conducted at the conclusion of the residency program. (Core)

III.A.2.b).(5).(a) If the trainee does not meet the expected level of Milestones competency following entry into the fellowship program, the trainee must undergo a period of remediation, overseen by the Clinical Competency Committee and monitored by the GMEC or a subcommittee of the GMEC. This period of remediation must not count toward time in fellowship training. (Core)

** An exceptionally qualified applicant has (1) completed a non-ACGME-accredited residency program in the core specialty, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; (c) demonstrated leadership during or after residency training; (d) completion of an ACGME-International-accredited residency program.

III.A.2.c) The Review Committee for Emergency Medicine does allow exceptions to the Eligibility Requirements for Fellowship Programs in Section III.A.2. (Core)

III.A.2.d) The program should inform fellows in writing as to the length of their curriculum before they begin the fellowship. (Core)

III.B. Number of Fellows

The program’s educational resources must be adequate to support the number of fellows appointed to the program. (Core)
III.B.1. The program director may not appoint more fellows than approved by the Review Committee, unless otherwise stated in the specialty-specific requirements. (Core)

III.C. Fellow Transfers

III.C.1. Before accepting a fellow who is transferring from another program, the program director must obtain written or electronic verification of previous educational experiences and a summative competency-based performance evaluation of the transferring fellow. (Detail)

III.C.2. A program director must provide timely verification of residency education and summative performance evaluations for fellows who may leave the program prior to completion. (Detail)

III.D. Appointment of Fellows and Other Learners

The presence of other learners (including, but not limited to, fellows from other specialties, subspecialty fellows, PhD students, and nurse practitioners) in the program must not interfere with the appointed fellows’ education. (Core)

III.D.1. The program director must report the presence of other learners to the DIO and GMEC in accordance with sponsoring institution guidelines. (Detail)

IV. Educational Program

IV.A. The curriculum must contain the following educational components:

IV.A.1. Overall educational goals for the program, which the program must make available to fellows and faculty; (Core)

IV.A.2. Competency-based goals and objectives for each assignment at each educational level, which the program must distribute to fellows and faculty at least annually, in either written or electronic form; (Core)

IV.A.3. Regularly scheduled didactic sessions; (Core)

IV.A.3.a) Multidisciplinary conferences should include lectures, morbidity and mortality conferences, case conferences, general reviews, and research seminars. (Detail)

IV.A.3.a).(1) The program must include education in related basic sciences, including physiology, growth and development, pathophysiology, and the epidemiology and prevention of pediatric illnesses and injuries. (Detail)

IV.A.3.a).(2) Fellows should attend conferences related to understanding diversity, family presence during
resuscitations, cultural competence, professionalism, communication skills, the giving and receiving of feedback, and self-directed assessment and learning.  

IV.A.3.a).(3) The program should also provide education on physician wellness and stress management.  

IV.A.3.b) Faculty and fellows’ attendance must be documented.  

IV.A.3.c) Both faculty members and fellows must participate meaningfully in the didactic activities offered by the program.  

IV.A.3.c).(1) Subspecialty conferences must be regularly scheduled, and should involve active participation by the fellows in the planning and implementation of these meetings.  

IV.A.4. Delineation of fellow responsibilities for patient care, progressive responsibility for patient management, and supervision of fellows over the continuum of the program; and,  

IV.A.5. ACGME Competencies  
The program must integrate the following ACGME competencies into the curriculum:  

IV.A.5.a) Patient Care and Procedural Skills  

IV.A.5.a).(1) Fellows must be able to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health. Fellows:  

IV.A.5.a).(1).(a) must competently perform a history and physical examination, make diagnostic and therapeutic decisions, develop and carry out management plans, counsel patients and families, and use information technology to optimize patient care;  

IV.A.5.a).(1).(b) must demonstrate competence in providing initial evaluation and treatment to all kinds of patients. Fellows must evaluate the patient with an undifferentiated chief complaint and diagnose whether it falls in areas traditionally designated medical, surgical or subspecialty. Fellows must perform such evaluations rapidly, with simultaneous stabilization of any life threatening process, and to proceed with appropriate life-saving interventions before arriving at a definitive diagnosis;  

IV.A.5.a).(1).(c) must have supervised experience to demonstrate
competence in performing and interpreting the results of laboratory tests and diagnostic procedures for use in patient care; (Outcome)

IV.A.5.a).(1).(d) must demonstrate, under faculty member supervision, the skills appropriate to a supervisor, teacher, and decision maker in pediatric emergencies in the final year of education; (Outcome)

IV.A.5.a).(1).(e) must assume leadership responsibility for the pediatric emergency department; (Outcome)

IV.A.5.a).(1).(f) must demonstrate competence when providing supervision and consultation to other residents caring for patients in the emergency department; and, (Outcome)

IV.A.5.a).(1).(g) must demonstrate competence in compassionate understanding of the stress associated with sudden illness, injury, and death so that they are responsive to the emotional needs of patients, their families, and the emergency department staff. (Outcome)

IV.A.5.a).(2) Fellows must be able to competently perform all medical, diagnostic, and surgical procedures considered essential for the area of practice. Fellows: (Outcome)

IV.A.5.a).(2).(a) must demonstrate competence in the skills necessary to prioritize and simultaneously manage the emergency care of multiple patients; (Outcome)

IV.A.5.a).(2).(b) must demonstrate competency in technical/procedural and resuscitation skills for pediatric patients of all ages; (Outcome)

IV.A.5.a).(2).(c) must attain competency in the following procedures:

IV.A.5.a).(2).(c).(i) abscess incision and drainage; (Outcome)

IV.A.5.a).(2).(c).(ii) arterial catheterization; (Outcome)

IV.A.5.a).(2).(c).(iii) arthrocentesis; (Outcome)

IV.A.5.a).(2).(c).(iv) artificial ventilation; (Outcome)

IV.A.5.a).(2).(c).(v) cardiac pacing, external; (Outcome)

IV.A.5.a).(2).(c).(vi) cardiopulmonary resuscitation in all of the
following groups:  

IV.A.5.a).(2).(c).(vi).(a) pediatric medical resuscitation <2 years;  

IV.A.5.a).(2).(c).(vi).(b) pediatric medical resuscitation 2-18 years;  

IV.A.5.a).(2).(c).(vi).(c) adult medical resuscitation >18 years;  

IV.A.5.a).(2).(c).(vi).(d) pediatric trauma resuscitation <2 years;  

IV.A.5.a).(2).(c).(vi).(e) pediatric trauma resuscitation 2-18 years; and,  

IV.A.5.a).(2).(c).(vi).(f) adult trauma resuscitation >18 years;  

IV.A.5.a).(2).(c).(vii) cardioversion/defibrillation;  

IV.A.5.a).(2).(c).(viii) central venous catheterization;  

IV.A.5.a).(2).(c).(ix) closed reduction/splinting;  

IV.A.5.a).(2).(c).(x) conversion of supraventricular tachycardia;  

IV.A.5.a).(2).(c).(xi) cricothyrotomy – translaryngeal ventilation;  

IV.A.5.a).(2).(c).(xii) dislocation/reduction;  

IV.A.5.a).(2).(c).(xiii) endotracheal intubation;  

IV.A.5.a).(2).(c).(xiv) foreign body removal;  

IV.A.5.a).(2).(c).(xv) gastric lavage;  

IV.A.5.a).(2).(c).(xvi) gastrostomy tube replacement;  

IV.A.5.a).(2).(c).(xvii) intraosseous access;  

IV.A.5.a).(2).(c).(xviii) laceration repair;  

IV.A.5.a).(2).(c).(xix) pericardiocentesis;  

IV.A.5.a).(2).(c).(xx) nasal packing;  

IV.A.5.a).(2).(c).(xxi) peritoneal lavage;
IV.A.5.a).(2).(c).(xxii) rapid sequence intubation; (Outcome)

IV.A.5.a).(2).(c).(xxiii) regional nerve blocks; (Outcome)

IV.A.5.a).(2).(c).(xxiv) sedation and analgesia; (Outcome)

IV.A.5.a).(2).(c).(xxv) slit lamp examination; (Outcome)

IV.A.5.a).(2).(c).(xxvi) tracheostomy tube replacement; (Outcome)

IV.A.5.a).(2).(c).(xxvii) tube thoracostomy; (Outcome)

IV.A.5.a).(2).(c).(xxviii) umbilical vessel catheterization; and, (Outcome)

IV.A.5.a).(2).(c).(xxix) vaginal delivery. (Outcome)

IV.A.5.b) Medical Knowledge

Fellows must demonstrate knowledge of established and evolving biomedical, clinical, epidemiological and social-behavioral sciences, as well as the application of this knowledge to patient care. Fellows: (Outcome)

IV.A.5.b).(1) must demonstrate knowledge of the clinical and basic sciences as related to pediatric emergency medicine. (Outcome)

IV.A.5.c) Practice-based Learning and Improvement

Fellows must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and life-long learning. (Outcome)

Fellows are expected to develop skills and habits to be able to meet the following goals:

IV.A.5.c).(1) identify strengths, deficiencies, and limits in one’s knowledge and expertise; (Outcome)

IV.A.5.c).(2) set learning and improvement goals; (Outcome)

IV.A.5.c).(3) identify and perform appropriate learning activities; (Outcome)

IV.A.5.c).(4) systematically analyze practice using quality improvement methods, and implement changes with the goal of practice improvement; (Outcome)
IV.A.5.c).(5) incorporate formative evaluation feedback into daily practice; (Outcome)

IV.A.5.c).(6) locate, appraise, and assimilate evidence from scientific studies related to their patients’ health problems; (Outcome)

IV.A.5.c).(7) use information technology to optimize learning; (Outcome)

IV.A.5.c).(8) participate in the education of patients, families, students, residents and other health professionals; (Outcome)

IV.A.5.c).(9) teach by conducting lectures, seminars, and clinical conferences and by preparing written reports and teaching materials; (Outcome)

IV.A.5.c).(10) participate in clinical and/or professional quality improvement activities. Evidence of self-evaluation, incorporating faculty, peer, and patient assessments, must be demonstrated in the fellow’s development of his or her individual learning plan; and, (Outcome)

IV.A.5.c).(11) teach and participate in undergraduate, graduate, and continuing education activities, as well as assume some departmental administrative responsibilities. (Outcome)

IV.A.5.d) Interpersonal and Communication Skills

Fellows must demonstrate interpersonal and communication skills that result in the effective exchange of information and collaboration with patients, their families, and health professionals. (Outcome)

Fellows are expected to:

IV.A.5.d).(1) communicate effectively with patients, families, and the public, as appropriate, across a broad range of socioeconomic and cultural backgrounds; (Outcome)

IV.A.5.d).(2) communicate effectively with physicians, other health professionals, and health related agencies; (Outcome)

IV.A.5.d).(3) work effectively as a member or leader of a health care team or other professional group; (Outcome)

IV.A.5.d).(4) act in a consultative role to other physicians and health professionals; (Outcome)

IV.A.5.d).(5) maintain comprehensive, timely, and legible medical
records, if applicable; and, (Outcome)

IV.A.5.d).(6) demonstrate competence in the unique roles of the consultant, team leader, and team member. (Outcome)

IV.A.5.e) Professionalism

Fellows must demonstrate a commitment to carrying out professional responsibilities and an adherence to ethical principles. (Outcome)

Fellows are expected to demonstrate:

IV.A.5.e).(1) compassion, integrity, and respect for others; (Outcome)

IV.A.5.e).(2) responsiveness to patient needs that supersedes self-interest; (Outcome)

IV.A.5.e).(3) respect for patient privacy and autonomy; (Outcome)

IV.A.5.e).(4) accountability to patients, society and the profession; (Outcome)

IV.A.5.e).(5) sensitivity and responsiveness to a diverse patient population, including but not limited to diversity in gender, age, culture, race, religion, disabilities, and sexual orientation; and, (Outcome)

IV.A.5.e).(6) high standards of professionalism and a commitment to continued improvement. (Outcome)

IV.A.5.f) Systems-based Practice

Fellows must demonstrate an awareness of and responsiveness to the larger context and system of health care, as well as the ability to call effectively on other resources in the system to provide optimal health care. (Outcome)

Fellows are expected to:

IV.A.5.f).(1) work effectively in various health care delivery settings and systems relevant to their clinical specialty; (Outcome)

IV.A.5.f).(2) coordinate patient care within the health care system relevant to their clinical specialty; (Outcome)

IV.A.5.f).(3) incorporate considerations of cost awareness and risk-benefit analysis in patient and/or population-based care as appropriate; (Outcome)
IV.A.5.f).(4) advocate for quality patient care and optimal patient care systems; (Outcome)

IV.A.5.f).(5) work in interprofessional teams to enhance patient safety and improve patient care quality; (Outcome)

IV.A.5.f).(6) participate in identifying system errors and implementing potential systems solutions; (Outcome)

IV.A.5.f).(7) demonstrate competence in the economics of health care and current health care management issues including cost-effective patient care, practice management, preventive care, quality improvement, resource allocation, and clinical outcomes; and, (Outcome)

IV.A.5.f).(8) demonstrate competence in the prevention of medical errors. (Outcome)

IV.A.6. Curriculum Organization and Fellow Experiences

IV.A.6.a) Agreements Between Programs

There must be written agreements between the director of the program in pediatric emergency medicine and the directors of the participating residencies in pediatrics and emergency medicine specifying the experiences that will comprise this subspecialty program. These agreements should address appropriate curriculum content, supervision of fellows, amount and distribution of clinical and non-clinical time, conferences, clinical performance criteria, and mechanisms for resolving performance problems. (Detail)

IV.A.6.b) Length of Curriculum

Emergency medicine sponsored programs that wish to accept pediatrics trained graduates must specify two residency curricula: a two-year curriculum for emergency medicine graduates and a three-year curriculum for pediatrics graduates. (Core)

IV.A.6.c) Reciprocal Training

Specialty-specific content must include at least four months of training in the specialty reciprocal to the fellow’s prior residency. (Core)

IV.A.6.c).(1) For the emergency medicine graduate, reciprocal time must include four months spent in pediatric subspecialty and ambulatory clinics and in the management of critically ill neonates and children in an ACGME-accredited pediatric residency program. (Detail)
IV.A.6.c).(2) For the pediatrics graduate, reciprocal time must include four months spent in an adult emergency department that is part of an ACGME-accredited emergency medicine residency program. One block month of that experience must be spent caring for adults with traumatic injuries, ideally on a trauma service. During the time spent in the adult emergency department, there must be structured educational experiences in emergency medical services and toxicology. These should include both didactic and experiential components that may be longitudinally integrated into other parts of the curriculum or designed as block rotations. (Detail)

IV.A.6.c).(3) Additional elective months of reciprocal training should be scheduled when deemed necessary by the program director to ensure fellows acquire the essential skills of a pediatric emergency specialist. (Detail)

IV.A.6.d) Program Design

IV.A.6.d).(1) Fellows in pediatric emergency medicine must participate in the care of pediatric patients of all ages, from infancy through young adulthood, and with a broad spectrum of illnesses and injuries of all severities. (Core)

IV.A.6.d).(2) At least 12 months of the clinical experience must be obtained seeing children in an emergency department where patients, ages 21 years of age or younger, are treated for the full spectrum of illnesses and injuries. (Core)

IV.A.6.d).(3) Fellows must be given progressive responsibility for patient care as they advance through the program. (Core)

IV.A.6.d).(4) The fellows' training must include experience with blunt and penetrating trauma, significant gynecologic and obstetrical emergencies, as well as psychiatric emergencies of the adolescent. (Detail)

IV.A.6.d).(5) The core content of the program must include training in emergency medical services for children (EMSC), administration, legal issues, procedures, patient safety, medical errors, ethics, and professionalism. (Detail)

IV.A.6.d).(6) The curriculum must also include experiences in cardiopulmonary resuscitation; trauma; disaster and environmental medicine; transport; triage; sedation; emergencies arising from toxicologic, obstetric, gynecologic, allergic/immunologic, cardiovascular, congenital, dermatologic, dental, endocrine/metabolic, gastrointestinal, hematologic/oncologic, infectious,
musculoskeletal, neurologic, ophthalmic, psychosocial, and pulmonary causes; renal/genitourinary and surgical disorders; and physical and sexual abuse. (Detail)

IV.A.6.d).(7) The educational program must be organized and conducted in a way that ensures an appropriate environment for the well-being and care of patients and their families, while providing fellows the opportunity to become skilled clinicians, competent teachers, and knowledgeable investigators. (Detail)

IV.A.6.d).(8) The program must emphasize the fundamentals of assessment, diagnosis, and management. (Detail)

IV.A.6.d).(9) Fellows must have supervised experience in performing and interpreting the results of laboratory tests and diagnostic procedures for use in patient care. (Core)

IV.A.6.d).(10) Fellows must have instruction and experience to acquire the necessary procedural skills and to develop an understanding of laboratory tests and diagnostic procedures, indications, risks, and limitations. (Core)

IV.A.6.d).(11) Fellows should also be exposed to academic debate, intensive research review, and interaction between the specialties of pediatrics and emergency medicine. (Detail)

IV.A.6.d).(12) For a subspecialty program that functions as an integral part of a pediatric residency program, there must be adequate exposure to faculty who are certified by the ABEM. Conversely, for a subspecialty program based in an emergency medicine residency program, there must be adequate exposure to faculty certified by the ABP. (Core)

IV.A.6.d).(12).(a) Fellows must be exposed to both ABEM-certified faculty and ABP-certified faculty over the course of the residency, both didactically and in the clinical management of acutely ill and injured patients. (Detail)

IV.A.6.d).(13) There should be opportunities to participate in regularly scheduled, multi-disciplinary conferences. (Detail)

IV.A.6.d).(14) The program must foster professionalism throughout training. The formal curriculum must include bioethics, including attention to physician-patient, physician-family, physician-physician/allied health professional, and physician-society relationships. (Detail)

IV.A.6.d).(14).(a) Discussion and appreciation of ethical issues involved in pediatric emergency medicine should be part of the educational program. (Detail)
IV.A.6.d).(15) There should be instruction in curriculum design, information delivery in clinical settings and classrooms, provision of feedback to learners, assessment of educational outcomes, and the development of teaching materials. (Detail)

IV.A.6.d).(16) Instruction in Program Administration

IV.A.6.d).(16).(a) Fellows should have formal sessions on organizing teaching programs, medical writing, and oral presentation. (Detail)

IV.A.6.d).(16).(b) Fellows must receive instruction and experience in administrative and management skills, including quality improvement principles, necessary to oversee a division or department. (Detail)

IV.A.6.d).(17) Fellows should receive instruction in such topics as the economics of health care and current health care management issues, such as cost-effective patient care, practice management, preventive care, quality improvement, resource allocation, and clinical outcomes. (Detail)

IV.A.6.d).(18) Fellows should receive didactic instruction and experience in the prevention of medical errors. (Detail)

IV.B. Fellows' Scholarly Activities

IV.B.1. The curriculum must advance fellows’ knowledge of the basic principles of research, including how research is conducted, evaluated, explained to patients, and applied to patient care. (Core)

IV.B.2. Fellows should participate in scholarly activity. (Core)

IV.B.3. The sponsoring institution and program should allocate adequate educational resources to facilitate fellow involvement in scholarly activities. (Detail)

V. Evaluation

V.A. Fellow Evaluation

V.A.1. The program director must appoint the Clinical Competency Committee. (Core)

V.A.1.a) At a minimum the Clinical Competency Committee must be composed of three members of the program faculty. (Core)
V.A.1.a).(1) The program director may appoint additional members of the Clinical Competency Committee.

V.A.1.a).(1).(a) These additional members must be physician faculty members from the same program or other programs, or other health professionals who have extensive contact and experience with the program's fellows in patient care and other health care settings. (Core)

V.A.1.a).(1).(b) Chief residents who have completed core residency programs in their specialty and are eligible for specialty board certification may be members of the Clinical Competency Committee. (Core)

V.A.1.b) There must be a written description of the responsibilities of the Clinical Competency Committee. (Core)

V.A.1.b).(1) The Clinical Competency Committee should:

V.A.1.b).(1).(a) review all fellow evaluations semi-annually; (Core)

V.A.1.b).(1).(b) prepare and ensure the reporting of Milestones evaluations of each fellow semi-annually to ACGME; and, (Core)

V.A.1.b).(1).(c) advise the program director regarding fellow progress, including promotion, remediation, and dismissal. (Detail)

V.A.2. Formative Evaluation

V.A.2.a) The faculty must evaluate fellow performance in a timely manner during each rotation or similar educational assignment, and document this evaluation at completion of the assignment. (Core)

V.A.2.b) The program must:

V.A.2.b).(1) provide objective assessments of competence in patient care and procedural skills, medical knowledge, practice-based learning and improvement, interpersonal and communication skills, professionalism, and systems-based practice based on the specialty-specific Milestones; (Core)

V.A.2.b).(2) use multiple evaluators (e.g., faculty, peers, patients, self, and other professional staff); (Detail)

V.A.2.b).(3) document progressive fellow performance
improvement appropriate to educational level; and,
(Core)

V.A.2.b).(4) provide each fellow with documented semiannual evaluation of performance with feedback. (Core)

V.A.2.c) The evaluations of fellow performance must be accessible for review by the fellow, in accordance with institutional policy. (Detail)

V.A.2.c).(1) To ensure an acceptable level of fellow performance and procedural and resuscitation competency, the program must:

V.A.2.c).(1).(a) discuss assessment tools, measurement process and outcomes with each fellow; (Detail)

V.A.2.c).(1).(b) document performance and procedural and resuscitation competency in fellow files; and, (Detail)

V.A.2.c).(1).(c) maintain documentation of these activities for review with the site visitor at the time of the site visit. (Detail)

V.A.2.c).(2) These efforts must be reviewed and evaluated by the supervising faculty in light of using competency-based objectives developed by the program. (Detail)

V.A.3. Summative Evaluation

V.A.3.a) The specialty-specific Milestones must be used as one of the tools to ensure fellows are able to practice core professional activities without supervision upon completion of the program. (Core)

V.A.3.b) The program director must provide a summative evaluation for each fellow upon completion of the program. (Core)

This evaluation must:

V.A.3.b).(1) become part of the fellow’s permanent record maintained by the institution, and must be accessible for review by the fellow in accordance with institutional policy. (Detail)

V.A.3.b).(2) document the fellow’s performance during the final period of education; and, (Detail)

V.A.3.b).(3) verify that the fellow has demonstrated sufficient competence to enter practice without direct supervision. (Detail)
V.B. Faculty Evaluation

V.B.1. At least annually, the program must evaluate faculty performance as it relates to the educational program. (Core)

V.B.2. These evaluations should include a review of the faculty’s clinical teaching abilities, commitment to the educational program, clinical knowledge, professionalism, and scholarly activities. (Detail)

V.B.3. This evaluation must include at least annual written confidential evaluations by the fellows. (Detail)

V.B.4. Faculty should receive formal feedback from these evaluations. (Detail)

V.C. Program Evaluation and Improvement

V.C.1. The program director must appoint the Program Evaluation Committee (PEC). (Core)

V.C.1.a) The Program Evaluation Committee:

V.C.1.a).(1) must be composed of at least two program faculty members and should include at least one fellow; (Core)

V.C.1.a).(2) must have a written description of its responsibilities; and, (Core)

V.C.1.a).(3) should participate actively in:

V.C.1.a).(3).(a) planning, developing, implementing, and evaluating educational activities of the program; (Detail)

V.C.1.a).(3).(b) reviewing and making recommendations for revision of competency-based curriculum goals and objectives; (Detail)

V.C.1.a).(3).(c) addressing areas of non-compliance with ACGME standards; and,

V.C.1.a).(3).(d) reviewing the program annually using evaluations of faculty, fellows, and others, as specified below. (Detail)

V.C.2. The program, through the PEC, must document formal, systematic evaluation of the curriculum at least annually, and is responsible for rendering a written, annual program evaluation. (Core)

The program must monitor and track each of the following areas:
V.C.2.a) fellow performance; (Core)
V.C.2.b) faculty development; (Core)
V.C.2.c) graduate performance, including performance of program graduates on the certification examination; (Core)
V.C.2.d) program quality; and, (Core)
V.C.2.d).(1) Fellows and faculty must have the opportunity to evaluate the program confidentially and in writing at least annually, and (Detail)
V.C.2.d).(2) The program must use the results of fellows’ and faculty members’ assessments of the program together with other program evaluation results to improve the program, (Detail)
V.C.2.e) progress on the previous year’s action plan(s). (Core)
V.C.3. The PEC must prepare a written plan of action to document initiatives to improve performance in one or more of the areas listed in section V.C.2., as well as delineate how they will be measured and monitored (Core)
V.C.3.a) The action plan should be reviewed and approved by the teaching faculty and documented in meeting minutes. (Detail)
V.C.4. The annual evaluation should include an assessment of resources available to the program. (Core)
V.C.4.a) The contribution of participating sites, the financial and administrative support of the program, the volume and variety of patients available for educational purposes, the performance of teaching staff, and the quality of supervision of fellows should all be considered in the evaluation. (Detail)
V.C.4.b) Information gained from these evaluations should be used to implement improvements in the program. (Outcome)
V.C.5. The same evaluation mechanisms used in the related residency program must be adapted for and implemented in the pediatric emergency medicine program that function with it. (Core)
V.C.5.a) In order to maintain the confidentiality of responses from fellows in small programs, evaluations of faculty may be consolidated with the core faculty evaluations. (Detail)
VI. The Learning and Working Environment

Residency education must occur in the context of a learning and working
environment that emphasizes the following principles:

- **Excellence in the safety and quality of care rendered to patients by residents today**
- **Excellence in the safety and quality of care rendered to patients by today’s residents in their future practice**
- **Excellence in professionalism through faculty modeling of:**
  - the effacement of self-interest in a humanistic environment that supports the professional development of physicians
  - the joy of curiosity, problem-solving, intellectual rigor, and discovery
- **Commitment to the well-being of the students, residents, faculty members, and all members of the health care team**

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare residents to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by residents who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Residents must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating residents will apply these skills to critique their future unsupervised practice and effect quality improvement measures.

It is necessary for residents and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.

VI.A.1.a) Patient Safety

VI.A.1.a).(1) Culture of Safety

A culture of safety requires continuous identification of vulnerabilities and a willingness to transparently deal with them. An effective organization has formal mechanisms to assess the knowledge, skills, and
attitudes of its personnel toward safety in order to identify areas for improvement.

VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows must actively participate in patient safety systems and contribute to a culture of safety. (Core)

VI.A.1.a).(1).(b) The program must have a structure that promotes safe, interprofessional, team-based care. (Core)

VI.A.1.a).(2) Education on Patient Safety

Programs must provide formal educational activities that promote patient safety-related goals, tools, and techniques. (Core)

VI.A.1.a).(3) Patient Safety Events

Reporting, investigation, and follow-up of adverse events, near misses, and unsafe conditions are pivotal mechanisms for improving patient safety, and are essential for the success of any patient safety program. Feedback and experiential learning are essential to developing true competence in the ability to identify causes and institute sustainable systems-based changes to ameliorate patient safety vulnerabilities.

VI.A.1.a).(3).(a) Residents, fellows, faculty members, and other clinical staff members must:

VI.A.1.a).(3).(a).(i) know their responsibilities in reporting patient safety events at the clinical site; (Core)

VI.A.1.a).(3).(a).(ii) know how to report patient safety events, including near misses, at the clinical site; and, (Core)

VI.A.1.a).(3).(a).(iii) be provided with summary information of their institution’s patient safety reports. (Core)

VI.A.1.a).(3).(b) Residents must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions. (Core)
VI.A.1.a).(4) Resident Education and Experience in Disclosure of Adverse Events

*Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for residents to develop and apply.*

VI.A.1.a).(4).(a) All residents must receive training in how to disclose adverse events to patients and families. *(Core)*

VI.A.1.a).(4).(b) Residents should have the opportunity to participate in the disclosure of patient safety events, real or simulated. *(Detail)*

VI.A.1.b) Quality Improvement

VI.A.1.b).(1) Education in Quality Improvement

*A cohesive model of health care includes quality-related goals, tools, and techniques that are necessary in order for health care professionals to achieve quality improvement goals.*

VI.A.1.b).(1).(a) Residents must receive training and experience in quality improvement processes, including an understanding of health care disparities. *(Core)*

VI.A.1.b).(2) Quality Metrics

*Access to data is essential to prioritizing activities for care improvement and evaluating success of improvement efforts.*

VI.A.1.b).(2).(a) Residents and faculty members must receive data on quality metrics and benchmarks related to their patient populations. *(Core)*

VI.A.1.b).(3) Engagement in Quality Improvement Activities

*Experiential learning is essential to developing the ability to identify and institute sustainable systems-based changes to improve patient care.*

VI.A.1.b).(3).(a) residents must have the opportunity to participate in interprofessional quality improvement activities. *(Core)*
VI.A.1.b).(3).(a).(i) This should include activities aimed at reducing health care disparities. (Detail)

VI.A.2. Supervision and Accountability

VI.A.2.a) Although the attending physician is ultimately responsible for the care of the patient, every physician shares in the responsibility and accountability for their efforts in the provision of care. Effective programs, in partnership with their Sponsoring Institutions, define, widely communicate, and monitor a structured chain of responsibility and accountability as it relates to the supervision of all patient care.

Supervision in the setting of graduate medical education provides safe and effective care to patients; ensures each resident’s development of the skills, knowledge, and attitudes required to enter the unsupervised practice of medicine; and establishes a foundation for continued professional growth.

VI.A.2.a).(1) Each patient must have an identifiable and appropriately-credentialed and privileged attending physician (or licensed independent practitioner as specified by the applicable Review Committee) who is responsible and accountable for the patient’s care. (Core)

VI.A.2.a).(1).(a) This information must be available to residents, faculty members, other members of the health care team, and patients. (Core)

VI.A.2.a).(1).(b) Residents and faculty members must inform each patient of their respective roles in that patient’s care when providing direct patient care. (Core)

VI.A.2.b) Supervision may be exercised through a variety of methods. For many aspects of patient care, the supervising physician may be a more advanced resident or fellow. Other portions of care provided by the resident can be adequately supervised by the immediate availability of the supervising faculty member, fellow, or senior resident physician, either on site or by means of telephonic and/or electronic modalities. Some activities require the physical presence of the supervising faculty member. In some circumstances, supervision may include post-hoc review of resident-delivered care with feedback.

VI.A.2.b).(1) The program must demonstrate that the appropriate level of supervision in place for all residents is based on each resident’s level of training and ability, as well
as patient complexity and acuity. Supervision may be exercised through a variety of methods, as appropriate to the situation. (Core)

VI.A.2.c) Levels of Supervision

To promote oversight of resident supervision while providing for graded authority and responsibility, the program must use the following classification of supervision: (Core)

VI.A.2.c).(1) Direct Supervision – the supervising physician is physically present with the resident and patient. (Core)

VI.A.2.c).(2) Indirect Supervision:

VI.A.2.c).(2).(a) with Direct Supervision immediately available – the supervising physician is physically within the hospital or other site of patient care, and is immediately available to provide Direct Supervision. (Core)

VI.A.2.c).(2).(b) with Direct Supervision available – the supervising physician is not physically present within the hospital or other site of patient care, but is immediately available by means of telephonic and/or electronic modalities, and is available to provide Direct Supervision. (Core)

VI.A.2.c).(3) Oversight – the supervising physician is available to provide review of procedures/encounters with feedback provided after care is delivered. (Core)

VI.A.2.d) The privilege of progressive authority and responsibility, conditional independence, and a supervisory role in patient care delegated to each resident must be assigned by the program director and faculty members. (Core)

VI.A.2.d).(1) The program director must evaluate each resident’s abilities based on specific criteria, guided by the Milestones. (Core)

VI.A.2.d).(2) Faculty members functioning as supervising physicians must delegate portions of care to residents based on the needs of the patient and the skills of each resident. (Core)

VI.A.2.d).(3) Senior residents or fellows should serve in a supervisory role to junior residents in recognition of their progress toward independence, based on the needs of each patient and the skills of the individual resident or fellow. (Detail)
VI.A.2.e) Programs must set guidelines for circumstances and events in which residents must communicate with the supervising faculty member(s). (Core)

VI.A.2.e).(1) Each resident must know the limits of their scope of authority, and the circumstances under which the resident is permitted to act with conditional independence. (Outcome)

VI.A.2.e).(1).(a) Initially, PGY-1 residents must be supervised either directly, or indirectly with direct supervision immediately available. (Core)

VI.A.2.f) Faculty supervision assignments must be of sufficient duration to assess the knowledge and skills of each resident and to delegate to the resident the appropriate level of patient care authority and responsibility. (Core)

VI.B. Professionalism

VI.B.1. Programs, in partnership with their Sponsoring Institutions, must educate residents and faculty members concerning the professional responsibilities of physicians, including their obligation to be appropriately rested and fit to provide the care required by their patients. (Core)

VI.B.2. The learning objectives of the program must:

VI.B.2.a) be accomplished through an appropriate blend of supervised patient care responsibilities, clinical teaching, and didactic educational events; (Core)

VI.B.2.b) be accomplished without excessive reliance on residents to fulfill non-physician obligations; and, (Core)

VI.B.2.c) ensure manageable patient care responsibilities. (Core)

VI.B.3. The program director, in partnership with the Sponsoring Institution, must provide a culture of professionalism that supports patient safety and personal responsibility. (Core)

VI.B.4. Residents and faculty members must demonstrate an understanding of their personal role in the:

VI.B.4.a) provision of patient- and family-centered care; (Outcome)

VI.B.4.b) safety and welfare of patients entrusted to their care, including the ability to report unsafe conditions and adverse events; (Outcome)
VI.B.4.c) assurance of their fitness for work, including: (Outcome)

VI.B.4.c).(1) management of their time before, during, and after clinical assignments; and, (Outcome)

VI.B.4.c).(2) recognition of impairment, including from illness, fatigue, and substance use, in themselves, their peers, and other members of the health care team. (Outcome)

VI.B.4.d) commitment to lifelong learning; (Outcome)

VI.B.4.e) monitoring of their patient care performance improvement indicators; and, (Outcome)

VI.B.4.f) accurate reporting of clinical and educational work hours, patient outcomes, and clinical experience data. (Outcome)

VI.B.5. All residents and faculty members must demonstrate responsiveness to patient needs that supersedes self-interest. This includes the recognition that under certain circumstances, the best interests of the patient may be served by transitioning that patient’s care to another qualified and rested provider. (Outcome)

VI.B.6. Programs must provide a professional, respectful, and civil environment that is free from mistreatment, abuse, or coercion of students, residents, faculty, and staff. Programs, in partnership with their Sponsoring Institutions, should have a process for education of residents and faculty regarding unprofessional behavior and a confidential process for reporting, investigating, and addressing such concerns. (Core)

VI.C. Well-Being

In the current health care environment, residents and faculty members are at increased risk for burnout and depression. Psychological, emotional, and physical well-being are critical in the development of the competent, caring, and resilient physician. Self-care is an important component of professionalism; it is also a skill that must be learned and nurtured in the context of other aspects of residency training. Programs, in partnership with their Sponsoring Institutions, have the same responsibility to address well-being as they do to evaluate other aspects of resident competence.

VI.C.1. This responsibility must include:

VI.C.1.a) efforts to enhance the meaning that each resident finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; (Core)
VI.C.1.b) attention to scheduling, work intensity, and work compression that impacts resident well-being; (Core)

VI.C.1.c) evaluating workplace safety data and addressing the safety of residents and faculty members; (Core)

VI.C.1.d) policies and programs that encourage optimal resident and faculty member well-being; and, (Core)

VI.C.1.d).(1) Residents must be given the opportunity to attend medical, mental health, and dental care appointments, including those scheduled during their working hours. (Core)

VI.C.1.e) attention to resident and faculty member burnout, depression, and substance abuse. The program, in partnership with its Sponsoring Institution, must educate faculty members and residents in identification of the symptoms of burnout, depression, and substance abuse, including means to assist those who experience these conditions. Residents and faculty members must also be educated to recognize those symptoms in themselves and how to seek appropriate care. The program, in partnership with its Sponsoring Institution, must; (Core)

VI.C.1.e).(1) encourage residents and faculty members to alert the program director or other designated personnel or programs when they are concerned that another resident, fellow, or faculty member may be displaying signs of burnout, depression, substance abuse, suicidal ideation, or potential for violence; (Core)

VI.C.1.e).(2) provide access to appropriate tools for self-screening; and, (Core)

VI.C.1.e).(3) provide access to confidential, affordable mental health assessment, counseling, and treatment, including access to urgent and emergent care 24 hours a day, seven days a week. (Core)

VI.C.2. There are circumstances in which residents may be unable to attend work, including but not limited to fatigue, illness, and family emergencies. Each program must have policies and procedures in place that ensure coverage of patient care in the event that a resident may be unable to perform their patient care responsibilities. These policies must be implemented without fear of negative consequences for the resident who is unable to provide the clinical work. (Core)

VI.D. Fatigue Mitigation
VI.D.1. Programs must:

VI.D.1.a) educate all faculty members and residents to recognize the signs of fatigue and sleep deprivation; (Core)

VI.D.1.b) educate all faculty members and residents in alertness management and fatigue mitigation processes; and, (Core)

VI.D.1.c) encourage residents to use fatigue mitigation processes to manage the potential negative effects of fatigue on patient care and learning. (Detail)

VI.D.2. Each program must ensure continuity of patient care, consistent with the program’s policies and procedures referenced in VI.C.2, in the event that a resident may be unable to perform their patient care responsibilities due to excessive fatigue. (Core)

VI.D.3. The program, in partnership with its Sponsoring Institution, must ensure adequate sleep facilities and safe transportation options for residents who may be too fatigued to safely return home. (Core)

VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care

VI.E.1. Clinical Responsibilities

The clinical responsibilities for each resident must be based on PGY level, patient safety, resident ability, severity and complexity of patient illness/condition, and available support services. (Core)

VI.E.2. Teamwork

Residents must care for patients in an environment that maximizes communication. This must include the opportunity to work as a member of effective interprofessional teams that are appropriate to the delivery of care in the specialty and larger health system. (Core)

VI.E.3. Transitions of Care

VI.E.3.a) Programs must design clinical assignments to optimize transitions in patient care, including their safety, frequency, and structure. (Core)

VI.E.3.b) Programs, in partnership with their Sponsoring Institutions, must ensure and monitor effective, structured hand-over processes to facilitate both continuity of care and patient safety. (Core)

VI.E.3.c) Programs must ensure that residents are competent in communicating with team members in the hand-over process. (Outcome)
VI.E.3.d) Programs and clinical sites must maintain and communicate schedules of attending physicians and residents currently responsible for care. (Core)

VI.E.3.e) Each program must ensure continuity of patient care, consistent with the program’s policies and procedures referenced in VI.C.2, in the event that a resident may be unable to perform their patient care responsibilities due to excessive fatigue or illness, or family emergency. (Core)

VI.F. Clinical Experience and Education

Programs, in partnership with their Sponsoring Institutions, must design an effective program structure that is configured to provide residents with educational and clinical experience opportunities, as well as reasonable opportunities for rest and personal activities.

VI.F.1. Maximum Hours of Clinical and Educational Work per Week

Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting. (Core)

VI.F.2. Mandatory Time Free of Clinical Work and Education

VI.F.2.a) The program must design an effective program structure that is configured to provide residents with educational opportunities, as well as reasonable opportunities for rest and personal well-being. (Core)

VI.F.2.b) Residents should have eight hours off between scheduled clinical work and education periods. (Detail)

VI.F.2.b).(1) There may be circumstances when residents choose to stay to care for their patients or return to the hospital with fewer than eight hours free of clinical experience and education. This must occur within the context of the 80-hour and the one-day-off-in-seven requirements. (Detail)

VI.F.2.c) Residents must have at least 14 hours free of clinical work and education after 24 hours of in-house call. (Core)

VI.F.2.d) Residents must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. (Core)

VI.F.3. Maximum Clinical Work and Education Period Length
VI.F.3.a) Clinical and educational work periods for residents must not exceed 24 hours of continuous scheduled clinical assignments. (Core)

VI.F.3.a).(1) Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or resident education. (Core)

VI.F.3.a).(1).(a) Additional patient care responsibilities must not be assigned to a resident during this time. (Core)

VI.F.4. Clinical and Educational Work Hour Exceptions

VI.F.4.a) In rare circumstances, after handing off all other responsibilities, a resident, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:

VI.F.4.a).(1) to continue to provide care to a single severely ill or unstable patient; (Detail)

VI.F.4.a).(2) humanistic attention to the needs of a patient or family; or, (Detail)

VI.F.4.a).(3) to attend unique educational events. (Detail)

VI.F.4.b) These additional hours of care or education will be counted toward the 80-hour weekly limit. (Detail)

VI.F.4.c) A Review Committee may grant rotation-specific exceptions for up to 10 percent or a maximum of 88 clinical and educational work hours to individual programs based on a sound educational rationale.

The Review Committee for Emergency Medicine will not consider requests for exceptions to the 80-hour limit to the fellows’ work week.

VI.F.4.c).(1) In preparing a request for an exception, the program director must follow the clinical and educational work hour exception policy from the ACGME Manual of Policies and Procedures. (Core)

VI.F.4.c).(2) Prior to submitting the request to the Review Committee, the program director must obtain approval from the Sponsoring Institution’s GMEC and DIO. (Core)

VI.F.5. Moonlighting

VI.F.5.a) Moonlighting must not interfere with the ability of the resident
to achieve the goals and objectives of the educational program, and must not interfere with the resident’s fitness for work nor compromise patient safety. (Core)

VI.F.5.b) Time spent by residents in internal and external moonlighting (as defined in the ACGME Glossary of Terms) must be counted toward the 80-hour maximum weekly limit. (Core)

VI.F.5.c) PGY-1 residents are not permitted to moonlight. (Core)

VI.F.6. In-House Night Float

Night float must occur within the context of the 80-hour and one-day-off-in-seven requirements. (Core)

VI.F.7. Maximum In-House On-Call Frequency

Residents must be scheduled for in-house call no more frequently than every third night (when averaged over a four-week period). (Core)

VI.F.8. At-Home Call

VI.F.8.a) Time spent on patient care activities by residents on at-home call must count toward the 80-hour maximum weekly limit. The frequency of at-home call is not subject to the every-third-night limitation, but must satisfy the requirement for one day in seven free of clinical work and education, when averaged over four weeks. (Core)

VI.F.8.a).(1) At-home call must not be so frequent or taxing as to preclude rest or reasonable personal time for each resident. (Core)

VI.F.8.b) Residents are permitted to return to the hospital while on at-home call to provide direct care for new or established patients. These hours of inpatient patient care must be included in the 80-hour maximum weekly limit. (Detail)

***

*Core Requirements*: Statements that define structure, resource, or process elements essential to every graduate medical educational program.

*Detail Requirements*: Statements that describe a specific structure, resource, or process, for achieving compliance with a Core Requirement. Programs and sponsoring institutions in substantial compliance with the Outcome Requirements may utilize alternative or innovative approaches to meet Core Requirements.

*Outcome Requirements*: Statements that specify expected measurable or observable attributes (knowledge, abilities, skills, or attitudes) of residents or fellows at key stages of their graduate medical education.

Osteopathic Recognition
For programs seeking Osteopathic Recognition for the entire program, or for a track within the program, the Osteopathic Recognition Requirements are also applicable. (http://www.acgme.org/Portals/0/PFAssets/ProgramRequirements/Osteopathic_Recognition_Requirements.pdf)
