Case Log Coding Guidelines
Review Committee for Otolaryngology
ACGME

The following Case Log Coding Guidelines have been provided in an attempt to establish some degree of uniformity for all otolaryngology residents for logging cases into the ACGME Case Log System.

The Review Committee for Otolaryngology publicly thanks and credits the Harvard otolaryngology residency program, for drafting the initially proposed document that was utilized in the development of these guidelines, and the University of Michigan program for the most recent revisions.

Please note that these guidelines additionally provide role definitions for Resident Surgeon, Resident Assistant, and Resident Supervisor, and demarcate those procedural codes that define Key Indicator Cases (as indicated by red asterisks *). These cases constitute the 14 procedure categories identified by the Review Committee to be representative of otolaryngology surgical education. Also included are instructions for the proper un-bundling of procedures (as indicated by blue text) for Case Log recording (but not billing) purposes.

This document contains a linkable Table of Contents for electronic use, but is also designed to print in booklet form (pages 2-9). This document will be periodically updated by the Review Committee for Otolaryngology based on updates to key indicator cases and procedures. Program directors will be notified of such updates via the ACGME e-Communication or other correspondence.

Role Definitions:

Resident surgeon: performs ≥ 50% of the operation with the attending physician or resident supervisor, including the key portions of the procedure

Resident assistant: performs < 50% of the operation, or ≥ 50% of the operation but not the key portions of the procedure.

Resident supervisor: instructs/assists a more junior resident during a procedure in which the junior resident performs ≥ 50% of the operation, including the key portions of the procedure; the attending physician acts as an assistant or observer.
