The following Case Log Coding Recommendations have been provided in an attempt to establish some degree of uniformity for all otolaryngology residents in terms of the logging of cases into the ACGME Case Log System.

The Review Committee for Otolaryngology publicly thanks and credits the Harvard Otolaryngology Residency Program for drafting the initially-proposed document which was utilized in the development of these recommendations.

Please note that these recommendations additionally provide role definitions for \textit{Resident Surgeon}, \textit{Resident Assistant}, and \textit{Resident Supervisor}, and demarcate those procedural codes that define \textit{Key Indicator Cases}. Also included are instructions for the proper un-bundling of procedures for Case Log recording (but not billing) purposes.

This document contains a linkable Table of Contents for electronic use, but is also designed to print in booklet form (pages 2-5). It will be periodically updated by the Review Committee for Otolaryngology. Notification of such updates will appear in the newsletter, \textit{RRC News for Otolaryngology}.
