

Faculty Roster Instructions
Review Committee for Pediatrics
ACGME

The Review Committee for Pediatrics has outlined the following expectations for programs to follow when completing the Faculty Roster section in the ACGME's Accreditation Data System (ADS). These instructions will also be added to ADS:

Pediatrics Programs:

In addition to the members of the core faculty, be sure to include the following faculty members on the roster:

1. at least one faculty member in each of the following:
 - developmental behavioral pediatrics
 - adolescent medicine
 - neonatal-perinatal medicine
 - pediatric critical care medicine
2. faculty members from at least five of the pediatric subspecialties listed in section IV.A.6.b).(3).(c) of the Program Requirements
3. any other pediatric faculty members who play a significant role in the program (i.e., anyone responsible for a required experience)

Pediatric Subspecialty Programs:

- Identify only the divisional faculty members, regardless of the amount of time devoted to the program, on the Faculty Roster, (e.g., pediatric cardiology programs should only list the pediatric cardiology faculty members). Do not list any faculty members from other disciplines, or physician faculty members who serve only as research mentors.
