

# ACGME Program Requirements for Graduate Medical Education in Surgery

*Common Program Requirements are in BOLD*

*Effective: January 1, 2008*

## Introduction

### Int.A. Definition and Scope of the Specialty

The goal of a surgical residency program is to prepare the resident to function as a qualified practitioner of surgery at the advanced level of performance expected of a board-certified specialist. The education of surgeons in the practice of general surgery encompasses both didactic instruction in the basic and clinical sciences of surgical diseases and conditions, as well as education in procedural skills and operative techniques. The educational process must lead to the acquisition of an appropriate fund of knowledge and technical skills, the ability to integrate the acquired knowledge into the clinical situation, and the development of surgical judgment.

### Int.B. Duration and Scope of Education

The length of a surgery residency program is five clinical years. Each resident must be notified in writing of the length of the program prior to admission. Programs must comply with the resident eligibility and admission prerequisites as outlined in the Institutional Requirements.

## I. Institutions

### I.A. Sponsoring Institution

**One sponsoring institution must assume ultimate responsibility for the program, as described in the Institutional Requirements, and this responsibility extends to resident assignments at all participating sites.**

**The sponsoring institution and the program must ensure that the program director has sufficient protected time and financial support for his or her educational and administrative responsibilities to the program.**

I.A.1. An accredited surgery program must be conducted in an institution that can document a sufficient breadth of patient care. At a minimum, the institution must routinely care for patients with a broad spectrum of surgical diseases and conditions, including all of the essential content areas in surgical education. In addition, these institutions must include facilities and staff for a variety of other services that provide a critical role in the care of patients with surgical conditions, including radiology and pathology.

I.A.2. The program director must be provided with a minimum of 30% protected time, which may take the form of direct or indirect salary support, such as release from clinical activities provided by the institution.

**I.B. Participating Sites**

**I.B.1. There must be a program letter of agreement (PLA) between the program and each participating site providing a required assignment. The PLA must be renewed at least every five years.**

**The PLA should:**

**I.B.1.a) identify the faculty who will assume both educational and supervisory responsibilities for residents;**

**I.B.1.b) specify their responsibilities for teaching, supervision, and formal evaluation of residents, as specified later in this document;**

**I.B.1.c) specify the duration and content of the educational experience; and,**

**I.B.1.d) state the policies and procedures that will govern resident education during the assignment.**

**I.B.2. The program director must submit any additions or deletions of participating sites routinely providing an educational experience, required for all residents, of one month full time equivalent (FTE) or more through the Accreditation Council for Graduate Medical Education (ACGME) Accreditation Data System (ADS).**

**I.B.3. Integrated and Non-Integrated Sites**

An integrated or non-integrated site is defined as any site to which residents rotate for an assigned experience. There are two types of institutional relationships: integrated and non-integrated.

**I.B.3.a) An integrated site contributes substantially to the educational activities of the residency program.**

**I.B.3.a).(1) The program director must appoint the members of the teaching staff and the local program director at an integrated site.**

**I.B.3.a).(2) The faculty at an integrated site must demonstrate a commitment to scholarly pursuits.**

**I.B.3.a).(3) Clinical experiences in the essential content areas should be obtained in integrated sites. Exceptions will be considered on a case-by-case basis.**

**I.B.3.a).(4) An integrated site should be in geographic proximity to allow all residents to attend core conferences. If the integrated site is geographically remote and joint**

conferences cannot be held, an equivalent educational program of lectures and conferences in the integrated site must occur and must be fully documented. Morbidity and mortality reviews must occur at each integrated site or at a combined central location.

- I.B.3.a).(5) Integration will not be approved between two sites if both have an accredited residency program in the same specialty.
- I.B.3.a).(6) Chief residents may be assigned only to participating integrated sites or to the primary clinical site/sponsoring institution.
- I.B.3.b) A participating non-integrated site should supplement resident education by providing focused clinical experience not available at the primary clinical site or at the integrated site.
- I.B.3.b).(1) Assignment to participating non-integrated sites must have a clear educational rationale.
- I.B.3.b).(2) Advance approval of the Review Committee is required for resident assignment of six months or more at a participating non-integrated site.
- I.B.3.b).(3) Advance approval of the Review Committee is not required for resident assignment of less than six months, but the educational rationale for such assignments will be evaluated at the time of each site-visit and accreditation review.

## **II. Program Personnel and Resources**

### **II.A. Program Director**

- II.A.1. There must be a single program director with authority and accountability for the operation of the program. The sponsoring institution's GMEC must approve a change in program director. After approval, the program director must submit this change to the ACGME via the ADS.**
- II.A.2. The program director should continue in his or her position for a length of time adequate to maintain continuity of leadership and program stability.**
  - II.A.2.a) The program director's initial appointment should be for at least the duration of the program.
- II.A.3. Qualifications of the program director must include:**

- II.A.3.a) **requisite specialty expertise and documented educational and administrative experience acceptable to the Review Committee;**
- II.A.3.b) **current certification in the specialty by the American Board of Surgery, or specialty qualifications that are acceptable to the Review Committee; and,**
- II.A.3.c) **current medical licensure and appropriate medical staff appointment.**
- II.A.3.d) **unrestricted credentials at the primary clinical site/sponsoring institution, and license to practice medicine in the state where the sponsoring institution is located.**
- II.A.3.e) **scholarly activity in at least one of the areas of scholarly activity delineated in Section II.B.5 of this document.**
- II.A.4. **The program director must administer and maintain an educational environment conducive to educating the residents in each of the ACGME competency areas. The program director must:**
  - II.A.4.a) **oversee and ensure the quality of didactic and clinical education in all sites that participate in the program;**
  - II.A.4.b) **approve a local director at each participating site who is accountable for resident education;**
  - II.A.4.c) **approve the selection of program faculty as appropriate;**
  - II.A.4.d) **evaluate program faculty and approve the continued participation of program faculty based on evaluation;**
  - II.A.4.e) **monitor resident supervision at all participating sites;**
  - II.A.4.f) **prepare and submit all information required and requested by the ACGME, including but not limited to the program information forms and annual program resident updates to the ADS, and ensure that the information submitted is accurate and complete;**
  - II.A.4.g) **provide each resident with documented semiannual evaluation of performance with feedback;**
  - II.A.4.h) **ensure compliance with grievance and due process procedures as set forth in the Institutional Requirements and implemented by the sponsoring institution;**
  - II.A.4.i) **provide verification of residency education for all residents, including those who leave the program prior to completion;**

- II.A.4.j) implement policies and procedures consistent with the institutional and program requirements for resident duty hours and the working environment, including moonlighting, and, to that end, must:**
- II.A.4.j).(1) distribute these policies and procedures to the residents and faculty;**
- II.A.4.j).(2) monitor resident duty hours, according to sponsoring institutional policies, with a frequency sufficient to ensure compliance with ACGME requirements;**
- II.A.4.j).(3) adjust schedules as necessary to mitigate excessive service demands and/or fatigue; and,**
- II.A.4.j).(4) if applicable, monitor the demands of at-home call and adjust schedules as necessary to mitigate excessive service demands and/or fatigue.**
- II.A.4.k) monitor the need for and ensure the provision of back up support systems when patient care responsibilities are unusually difficult or prolonged;**
- II.A.4.l) comply with the sponsoring institution's written policies and procedures, including those specified in the Institutional Requirements, for selection, evaluation and promotion of residents, disciplinary action, and supervision of residents;**
- II.A.4.m) be familiar with and comply with ACGME and Review Committee policies and procedures as outlined in the ACGME Manual of Policies and Procedures;**
- II.A.4.n) obtain review and approval of the sponsoring institution's GMEC/DIO before submitting to the ACGME information or requests for the following:**
- II.A.4.n).(1) all applications for ACGME accreditation of new programs;**
- II.A.4.n).(2) changes in resident complement;**
- II.A.4.n).(3) major changes in program structure or length of training;**
- II.A.4.n).(4) progress reports requested by the Review Committee;**
- II.A.4.n).(5) responses to all proposed adverse actions;**
- II.A.4.n).(6) requests for increases or any change to resident duty hours;**

- II.A.4.n).(7) **voluntary withdrawals of ACGME-accredited programs;**
- II.A.4.n).(8) **requests for appeal of an adverse action;**
- II.A.4.n).(9) **appeal presentations to a Board of Appeal or the ACGME; and,**
- II.A.4.n).(10) **proposals to ACGME for approval of innovative educational approaches.**
- II.A.4.o) **obtain DIO review and co-signature on all program information forms, as well as any correspondence or document submitted to the ACGME that addresses:**
  - II.A.4.o).(1) **program citations, and/or**
  - II.A.4.o).(2) **request for changes in the program that would have significant impact, including financial, on the program or institution.**
- II.A.4.p) devote his or her principal effort to the program.
- II.A.4.q) designate other well-qualified surgeons to assist in the supervision and education of the residents;
- II.A.4.r) be responsible for all clinical assignments and input into the teaching staff appointments at all sites;
- II.A.4.s) along with the faculty, be responsible for the preparation and implementation of a comprehensive, effective, and well-organized educational curriculum;
- II.A.4.t) ensure that conferences should be scheduled to permit resident attendance on a regular basis, and resident time must be protected from interruption by routine clinical duties. Documentation of attendance by 75% of residents at the core conferences must be achieved; and,
- II.A.4.u) ensure that the following types of conferences must exist within a program:
  - II.A.4.u).(1) a course or a structured series of lectures that ensures education in the basic and clinical sciences fundamental to surgery, including technological advances that relate to surgery and the care of patients with surgical diseases, as well as education in critical thinking, design of experiments and evaluation of data;
  - II.A.4.u).(2) regular organized clinical teaching, such as grand rounds, ward rounds, and clinical conferences;

- II.A.4.u).(3) a weekly morbidity and mortality or quality improvement conference.
- II.A.4.u).(3).(a) Sole reliance on textbook review is inadequate;
- II.A.4.v) along with the physician faculty, assess the technical competence of each resident. The Review Committee requires that each resident perform a minimum number of certain cases for accreditation. Performance of this minimum number of cases by a resident must not be interpreted as an equivalent to competence achievement;
- II.A.4.w) ensure that each resident has at least 750 major cases across the five years of training. This must include a minimum of 150 major cases in the resident's chief year;
- II.A.4.x) ensure that residents have required experience with a variety of endoscopic procedures, including esophogastro-duodenoscopy, colonoscopy and bronchoscopy as well as experience in advanced laparoscopy; and,
- II.A.4.y) ensure that residents have required experience with evolving diagnostic and therapeutic methods.

## **II.B. Faculty**

**II.B.1. At each participating institution, there must be a sufficient number of faculty with documented qualifications to instruct and supervise all residents at that location.**

**The faculty must:**

- II.B.1.a) **devote sufficient time to the educational program to fulfill their supervisory and teaching responsibilities; and to demonstrate a strong interest in the education of residents, and**
- II.B.1.b) **administer and maintain an educational environment conducive to educating residents in each of the ACGME competency areas.**
- II.B.1.c) for each approved chief resident position, consist of at least one full-time faculty member in addition to the program director (i.e., if there are three approved chief residents, there must be at least four fulltime faculty). The major function of these faculty is to support the program. These faculty must be appointed for a period sufficient to ensure continuity in the educational activities of the residency program and, (N.B.: moved from III. A. 4f)

- II.B.1.d) appoint an associate program director for programs with more than 20 categorical residents.
- II.B.2. **The physician faculty must have current certification in the specialty by the American Board of Surgery, or possess qualifications acceptable to the Review Committee.**
- II.B.3. **The physician faculty must possess current medical licensure and appropriate medical staff appointment.**
- II.B.4. **The nonphysician faculty must have appropriate qualifications in their field and hold appropriate institutional appointments.**
- II.B.5. **The faculty must establish and maintain an environment of inquiry and scholarship with an active research component.**
  - II.B.5.a) **The faculty must regularly participate in organized clinical discussions, rounds, journal clubs, and conferences.**
  - II.B.5.b) **Some members of the faculty should also demonstrate scholarship by one or more of the following:**
    - II.B.5.b).(1) **peer-reviewed funding;**
    - II.B.5.b).(2) **publication of original research or review articles in peer-reviewed journals, or chapters in textbooks;**
    - II.B.5.b).(3) **publication or presentation of case reports or clinical series at local, regional, or national professional and scientific society meetings; or,**
    - II.B.5.b).(4) **participation in national committees or educational organizations.**
  - II.B.5.c) **Faculty should encourage and support residents in scholarly activities.**
  - II.B.5.d) The faculty must collectively document active involvement in scholarly activity.
  - II.B.5.e) While not all members of the faculty can be investigators, clinical and/or basic science research must be:
    - II.B.5.e).(1) ongoing in the residency program;
    - II.B.5.e).(2) based at the institution where residents spend the majority of their clinical time; and,
    - II.B.5.e).(3) performed by faculty with frequent, direct resident involvement.

II.B.5.e).(4) Resident research is not a substitute for the involvement of the program director and faculty in research.

## **II.C. Other Program Personnel**

**The institution and the program must jointly ensure the availability of all necessary professional, technical, and clerical personnel for the effective administration of the program.**

## **II.D. Resources**

**The institution and the program must jointly ensure the availability of adequate resources for resident education, as defined in the specialty program requirements.**

II.D.1. These resources must include:

II.D.1.a) a common office space for residents that includes a sufficient number of computers and adequate workspace at the primary clinical site;

II.D.1.b) internet access to appropriate full-text journals and electronic medical reference resources for education and patient care at all participating sites;

II.D.1.c) on-line radiographic and laboratory reporting systems at the primary clinical site and integrated sites; and

II.D.1.d) software resources for production of presentations, manuscripts, and portfolios.

II.D.2. Resources should include simulation and skills laboratories.

II.D.3. There must be a full-time surgery program coordinator designated specifically for surgical education. Programs with more than 20 categorical residents should be provided with additional administrative personnel.

II.D.4. The institutional volume and variety of operative experience must be adequate to ensure a sufficient number and distribution of complex cases (as determined by the Review Committee) for each resident in the program.

## **II.E. Medical Information Access**

**Residents must have ready access to specialty-specific and other appropriate reference material in print or electronic format. Electronic medical literature databases with search capabilities should be available.**

## **III. Resident Appointments**

**III.A. Eligibility Criteria**

**The program director must comply with the criteria for resident eligibility as specified in the Institutional Requirements.**

**III.B. Number of Residents**

**The program director may not appoint more residents than approved by the Review Committee, unless otherwise stated in the specialty-specific requirements. The program's educational resources must be adequate to support the number of residents appointed to the program.**

All resident positions must be approved in advance by the Review Committee.

III.B.1. Residency positions must be allocated to one of these three groups: categorical, designated preliminary, or nondesignated preliminary positions.

III.B.1.a) Categorical (C) residents are accepted into the residency program with the expectation of completing the surgery program, assuming satisfactory performance. At the PG1, PG2, PG3, and PG4 levels, the number of categorical residents must not exceed the number of approved chief residency positions.

III.B.1.b) Designated preliminary (DP) residents are accepted for one, two, or three years before continuing education in another ACGME-accredited surgical or nonsurgical specialty or in an ACGME subspecialty program.

III.B.1.b).(1) On admission to the program, a letter of commitment to continue education must be on file for each resident in a designated preliminary position.

III.B.1.b).(2) The number of designated preliminary positions will not be limited, as long as the total number of these residents does not exceed the educational capacity of the residency program.

III.B.1.c) Nondesignated preliminary (NDP) residents are accepted into the program for one or two years before continuing their education. At the time of recruitment these residents will not have obtained a position for further residency education.

III.B.1.c).(1) The number of nondesignated preliminary positions in the PG1 and PG2 years combined must not exceed 200% of the number of approved categorical chief resident positions.

III.B.1.c).(2) Documentation of continuation in graduate medical education for the NDP residents must be provided at the time of each site visit.

III.B.1.c).(3) It is the responsibility of the program director to counsel and assist nondesignated preliminary residents in obtaining future positions.

III.B.2. Increases in resident complement:

III.B.2.a) Both temporary and permanent increases in resident complement must be approved in advance by the Review Committee.

III.B.2.b) A sound educational rationale for an increase in complement must be submitted. Documentation of adequate clinical material and complex operative cases, as well as documentation of a quality didactic education, must also be submitted. A clearly outlined block diagram must accompany the request to illustrate the proposed clinical assignments.

### III.C. Resident Transfers

**III.C.1. Before accepting a resident who is transferring from another program, the program director must obtain written or electronic verification of previous educational experiences and a summative competency-based performance evaluation of the transferring resident.**

III.C.1.a) The final two years of residency education (i.e., the PG 4 and PG 5 [chief] years) must be spent in the same program.

**III.C.2. A program director must provide timely verification of residency education and summative performance evaluations for residents who leave the program prior to completion.**

### III.D. Appointment of Fellows and Other Learners

**The presence of other learners (including, but not limited to, residents from other specialties, subspecialty fellows, PhD students, and nurse practitioners) in the program must not interfere with the appointed residents' education. The program director must report the presence of other learners to the DIO and GMEC in accordance with sponsoring institution guidelines.**

III.D.1. All trainees in both ACGME-accredited and non-accredited programs in the sponsoring and integrated sites that may impact the educational experience of the surgery residents must be identified and their relationship to the surgery residents must be detailed.

III.D.2. A chief resident and a fellow (whether the fellow is in an ACGME-accredited position or not) must not have primary responsibility for the same patient except that general surgeon and surgical critical care fellows may co-manage the non-operative care of the same patient.

#### **IV. Educational Program**

**IV.A. The curriculum must contain the following educational components:**

**IV.A.1. Overall educational goals for the program, which the program must distribute to residents and faculty annually;**

**IV.A.2. Competency-based goals and objectives for each assignment at each educational level, which the program must distribute to residents and faculty annually, in either written or electronic form. These should be reviewed by the resident at the start of each rotation;**

**IV.A.3. Regularly scheduled didactic sessions;**

**IV.A.4. Delineation of resident responsibilities for patient care, progressive responsibility for patient management, and supervision of residents over the continuum of the program; and,**

**IV.A.5. ACGME Competencies**

**The program must integrate the following ACGME competencies into the curriculum:**

**IV.A.5.a) Patient Care**

**Residents must be able to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health. Residents:**

**IV.A.5.a).(1) will demonstrate manual dexterity appropriate for their level;**

**IV.A.5.a).(2) will develop and execute patient care plans appropriate for the resident's level, including management of pain;**

**IV.A.5.a).(3) will participate in a program that must document a clinical curriculum that is sequential, comprehensive, and organized from basic to complex. The clinical assignments should be carefully structured to ensure that graded levels of responsibility, continuity in patient care, a balance between education and service, and progressive clinical experiences are achieved for each resident;**

**The 60-month clinical program should be organized as follows:**

**IV.A.5.a).(3).(a) At least 54 months of the 60-month program must be spent on clinical assignments in surgery, with documented experience in emergency care and surgical critical care in order to enable residents to**

manage patients with severe and complex illnesses and with major injuries;

IV.A.5.a).(3).(b)

42 months of these 54 months must be spent on clinical assignments in the essential content areas of surgery. The essential content areas are: the abdomen and its contents; the alimentary tract; skin, soft tissues, and breast; endocrine surgery; head and neck surgery; pediatric surgery; surgical critical care; surgical oncology; trauma and non-operative trauma (burn experience that includes patient management may be counted toward non-operative trauma); and the vascular system;

IV.A.5.a).(3).(c)

A formal rotation in burn care, gynecology, neurosurgery, orthopaedic surgery, cardiac surgery, and urology is not required. Clearly documented goals and objectives must be presented if these components are included as rotations;

IV.A.5.a).(3).(c).(i)

Knowledge of burn physiology and initial burn management is required;

IV.A.5.a).(3).(d)

A formal transplant rotation is required. It must include patient management and cover knowledge of the principles of immunology, immunosuppression, and the management of general surgical conditions arising in transplant patients. Clearly documented goals and objectives must be presented for this experience;

IV.A.5.a).(3).(e)

No more than six months total may be allocated to research or to non- surgical disciplines such as anesthesiology, internal medicine, pediatrics, or surgical pathology. (Gastroenterology is exempt from this limit if this rotation provides endoscopic experiences.)

No more than 12 months may be devoted to surgical discipline other than the principal components of surgery;

IV.A.5.a).(3).(f)

The Chief Year

IV.A.5.a).(3).(f).(i)

Clinical assignments at the chief resident level should be scheduled in the final (5<sup>th</sup>) year of the program;

IV.A.5.a).(3).(f).(ii)

To take advantage of a unique educational opportunity in a program, up to 6 months of

the chief year may be served in the next to the last year (4<sup>th</sup>). This experience must not occur any earlier than the 4<sup>th</sup> clinical year. Any special Program of this type must be approved in advance by the Review Committee. Operative cases counted as the chief cases must be performed during the 12 months designated as the chief year;

IV.A.5.a).(3).(f).(iii)

The clinical assignments during the chief year must be scheduled at the primary clinical site or at participating integrated site(s);

IV.A.5.a).(3).(f).(iv)

Clinical assignments during the chief year must be in the essential content areas of general surgery. No more than four months of the chief year may be devoted exclusively to any one essential content area;

IV.A.5.a).(3).(f).(v)

Noncardiac thoracic surgery and transplantation rotations may be considered an acceptable chief resident assignment as long as the chief resident performs an appropriate number of complex cases with documented participation in pre and post-operative care (program director may use the flexibility outlined in IV.A.5.a.3.d.ii.);

IV.A.5.a).(3).(g)

#### Operative Experience

IV.A.5.a).(3).(g).(i)

The program must document that residents are performing a sufficient breadth of complex procedures to graduate qualified surgeons;

IV.A.5.a).(3).(g).(ii)

All residents (categorical, designated preliminary, and nondesignated preliminary residents in ACGME-accredited positions) must enter their operative experience concurrently during each year of the residency in the ACGME case log system;

IV.A.5.a).(3).(g).(iii)

A resident may be considered the surgeon only when he or she can document a significant role in the following aspects of management: determination or confirmation of the diagnosis, provision of preoperative care, selection, and accomplishment of the appropriate operative procedure, and direction of the postoperative care;

IV.A.5.a).(3).(g).(iv)

When justified by experience, a PG 5 (chief) resident may act as a teaching assistant (TA) to a more junior resident with appropriate faculty supervision. Up to 50 cases listed by the chief resident as TA will be credited for the total requirement of 750 cases. TA cases may not count towards the 150 minimum cases needed to fulfill the operative requirements for the chief resident year. The junior resident performing the case will also be credited as surgeon for these cases; and,

IV.A.5.a).(3).(g).(v)

Each program is required to provide residents with an outpatient experience to evaluate patients both pre-operatively, including initial evaluation, and post-operatively. At least 75% of the assignments in the essential content areas must include an outpatient experience of 1/2 day per week. (An outpatient experience is not required for assignments in the secondary components of surgery or surgical critical care).

**IV.A.5.b)**

**Medical Knowledge**

**Residents must demonstrate knowledge of established and evolving biomedical, clinical, epidemiological and social-behavioral sciences, as well as the application of this knowledge to patient care. Residents:**

IV.A.5.b).(1)

will critically evaluate and demonstrate knowledge of pertinent scientific information and,

IV.A.5.b).(2)

will participate in an educational program that should include the fundamentals of basic science as applied to clinical surgery, including: applied surgical anatomy and surgical pathology; the elements of wound healing; homeostasis, shock and circulatory physiology; hematologic disorders; immunobiology and transplantation; oncology; surgical endocrinology; surgical nutrition, fluid and electrolyte balance; and the metabolic response to injury, including burns.

**IV.A.5.c)**

**Practice-based Learning and Improvement**

**Residents must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care**

**based on constant self-evaluation and life-long learning. Residents are expected to develop skills and habits to be able to meet the following goals:**

- IV.A.5.c).(1) identify strengths, deficiencies, and limits in one's knowledge and expertise;**
- IV.A.5.c).(2) set learning and improvement goals;**
- IV.A.5.c).(3) identify and perform appropriate learning activities;**
- IV.A.5.c).(4) systematically analyze practice using quality improvement methods, and implement changes with the goal of practice improvement;**
- IV.A.5.c).(5) incorporate formative evaluation feedback into daily practice;**
- IV.A.5.c).(6) locate, appraise, and assimilate evidence from scientific studies related to their patients' health problems;**
- IV.A.5.c).(7) use information technology to optimize learning; and,**
- IV.A.5.c).(8) participate in the education of patients, families, students, residents and other health professionals.**
- IV.A.5.c).(9) participate in mortality and morbidity conferences that evaluate and analyze patient care outcomes, and**
- IV.A.5.c).(10) utilize an evidence-based approach to patient care**

**IV.A.5.d)**

**Interpersonal and Communication Skills**

**Residents must demonstrate interpersonal and communication skills that result in the effective exchange of information and collaboration with patients, their families, and health professionals. Residents are expected to:**

- IV.A.5.d).(1) communicate effectively with patients, families, and the public, as appropriate, across a broad range of socioeconomic and cultural backgrounds;**
- IV.A.5.d).(2) communicate effectively with physicians, other health professionals, and health related agencies;**
- IV.A.5.d).(3) work effectively as a member or leader of a health care team or other professional group;**
- IV.A.5.d).(4) act in a consultative role to other physicians and health professionals; and,**

**IV.A.5.d).(5)** maintain comprehensive, timely, and legible medical records, if applicable.

IV.A.5.d).(6) counsel and educate patients and families; and

IV.A.5.d).(7) effectively document practice activities.

**IV.A.5.e) Professionalism**

**Residents must demonstrate a commitment to carrying out professional responsibilities and an adherence to ethical principles. Residents are expected to demonstrate:**

**IV.A.5.e).(1)** compassion, integrity, and respect for others;

**IV.A.5.e).(2)** responsiveness to patient needs that supersedes self-interest;

**IV.A.5.e).(3)** respect for patient privacy and autonomy;

**IV.A.5.e).(4)** accountability to patients, society and the profession; and,

**IV.A.5.e).(5)** sensitivity and responsiveness to a diverse patient population, including but not limited to diversity in gender, age, culture, race, religion, disabilities, and sexual orientation.

IV.A.5.e).(6) high standards of ethical behavior, and

IV.A.5.e).(7) a commitment to continuity of patient care

**IV.A.5.f) Systems-based Practice**

**Residents must demonstrate an awareness of and responsiveness to the larger context and system of health care, as well as the ability to call effectively on other resources in the system to provide optimal health care. Residents are expected to:**

**IV.A.5.f).(1)** work effectively in various health care delivery settings and systems relevant to their clinical specialty;

**IV.A.5.f).(2)** coordinate patient care within the health care system relevant to their clinical specialty;

**IV.A.5.f).(3)** incorporate considerations of cost awareness and risk-benefit analysis in patient and/or population-based care as appropriate;

- IV.A.5.f).(4) **advocate for quality patient care and optimal patient care systems;**
- IV.A.5.f).(5) **work in interprofessional teams to enhance patient safety and improve patient care quality; and,**
- IV.A.5.f).(6) **participate in identifying system errors and implementing potential systems solutions.**
- IV.A.5.f).(7) practice high quality, cost effective patient care;
- IV.A.5.f).(8) demonstrate knowledge of risk-benefit analysis; and,
- IV.A.5.f).(9) demonstrate an understanding of the role of different specialists and other health care professionals in overall patient management.

**IV.B. Residents' Scholarly Activities**

**IV.B.1. The curriculum must advance residents' knowledge of the basic principles of research, including how research is conducted, evaluated, explained to patients, and applied to patient care.**

**IV.B.2. Residents should participate in scholarly activity.**

IV.B.2.a) The participation of residents in clinical and/or laboratory research is encouraged.

**IV.B.3. The sponsoring institution and program should allocate adequate educational resources to facilitate resident involvement in scholarly activities.**

**V. Evaluation**

**V.A. Resident Evaluation**

**V.A.1. Formative Evaluation**

**V.A.1.a) The faculty must evaluate resident performance in a timely manner during each rotation or similar educational assignment, and document this evaluation at completion of the assignment.**

**V.A.1.b) The program must:**

**V.A.1.b).(1) provide objective assessments of competence in patient care, medical knowledge, practice-based learning and improvement, interpersonal and communication skills, professionalism, and systems-based practice;**

- V.A.1.b).(2) use multiple evaluators (e.g., faculty, peers, patients, self, and other professional staff);
- V.A.1.b).(3) document progressive resident performance improvement appropriate to educational level; and,
- V.A.1.b).(4) provide each resident with documented semiannual evaluation of performance with feedback.
- V.A.1.c) **The evaluations of resident performance must be accessible for review by the resident, in accordance with institutional policy.**
- V.A.1.d) Biannual assessment must include a review of case volume, breadth, and complexity, and must ensure that residents are entering cases concurrently.
- V.A.1.e) Assessment should specifically monitor the resident's knowledge by use of a formal exam such as the American Board of Surgery In Training Examination (ABSITE) or other cognitive exams. Test results should not be the sole criterion of resident knowledge, and should not be used as the sole criterion for promotion to a subsequent PG level.

**V.A.2. Summative Evaluation**

**The program director must provide a summative evaluation for each resident upon completion of the program. This evaluation must become part of the resident's permanent record maintained by the institution, and must be accessible for review by the resident in accordance with institutional policy. This evaluation must:**

- V.A.2.a) document the resident's performance during the final period of education, and
- V.A.2.b) verify that the resident has demonstrated sufficient competence to enter practice without direct supervision.

**V.B. Faculty Evaluation**

- V.B.1. **At least annually, the program must evaluate faculty performance as it relates to the educational program.**
- V.B.2. **These evaluations should include a review of the faculty's clinical teaching abilities, commitment to the educational program, clinical knowledge, professionalism, and scholarly activities.**
- V.B.3. **This evaluation must include at least annual written confidential evaluations by the residents.**

**V.C. Program Evaluation and Improvement**

**V.C.1. The program must document formal, systematic evaluation of the curriculum at least annually. The program must monitor and track each of the following areas:**

**V.C.1.a) resident performance;**

**V.C.1.b) faculty development;**

**V.C.1.c) graduate performance, including performance of program graduates on the certification examination; and,**

**V.C.1.d) program quality. Specifically:**

**V.C.1.d).(1) Residents and faculty must have the opportunity to evaluate the program confidentially and in writing at least annually, and**

**V.C.1.d).(2) The program must use the results of residents' assessments of the program together with other program evaluation results to improve the program.**

**V.C.2. If deficiencies are found, the program should prepare a written plan of action to document initiatives to improve performance in the areas listed in section V.C.1. The action plan should be reviewed and approved by the teaching faculty and documented in meeting minutes.**

**V.C.3. The performance of program graduates on the certification examination should be used as one measure of evaluating program effectiveness. At minimum, for the most recent five-year period, 65% of the graduates must pass each of the qualifying and certifying examinations on the first attempt.**

**VI. Resident Duty Hours in the Learning and Working Environment**

**VI.A. Principles**

**VI.A.1. The program must be committed to and be responsible for promoting patient safety and resident well-being and to providing a supportive educational environment.**

**VI.A.2. The learning objectives of the program must not be compromised by excessive reliance on residents to fulfill service obligations.**

**VI.A.3. Didactic and clinical education must have priority in the allotment of residents' time and energy.**

**VI.A.4. Duty hour assignments must recognize that faculty and residents collectively have responsibility for the safety and welfare of patients.**

## **VI.B. Supervision of Residents**

**The program must ensure that qualified faculty provide appropriate supervision of residents in patient care activities.**

- VI.B.1. The attending physician has both an ethical and a legal responsibility for the overall care of the individual patient and for the supervision of the resident involved in the care of that patient.
- VI.B.2. Although senior residents require less direction than junior residents, even the most senior resident must be supervised. The program should establish a chain of command that emphasizes graded authority and increasing responsibility as experience is gained must be established.
- VI.B.3. The attending surgeon who is ultimately responsible for the patient's care should make judgments on this delegation of responsibility; such judgments shall be based on the attending surgeon's direct observation and knowledge of each resident's skills and ability.
- VI.B.4. A fellow may not supervise chief residents.

## **VI.C. Fatigue**

**Faculty and residents must be educated to recognize the signs of fatigue and sleep deprivation and must adopt and apply policies to prevent and counteract its potential negative effects on patient care and learning.**

## **VI.D. Duty Hours (the terms in this section are defined in the ACGME Glossary and apply to all programs)**

**Duty hours are defined as all clinical and academic activities related to the program; i.e., patient care (both inpatient and outpatient), administrative duties relative to patient care, the provision for transfer of patient care, time spent in-house during call activities, and scheduled activities, such as conferences. Duty hours do *not* include reading and preparation time spent away from the duty site.**

- VI.D.1. **Duty hours must be limited to 80 hours per week, averaged over a four-week period, inclusive of all in-house call activities.**
- VI.D.2. **Residents must be provided with one day in seven free from all educational and clinical responsibilities, averaged over a four-week period, inclusive of call.**
- VI.D.3. **Adequate time for rest and personal activities must be provided. This should consist of a 10-hour time period provided between all daily duty periods and after in-house call.**

**VI.E. On-call Activities**

**VI.E.1. In-house call must occur no more frequently than every third night, averaged over a four-week period.**

**VI.E.2. Continuous on-site duty, including in-house call, must not exceed 24 consecutive hours. Residents may remain on duty for up to six additional hours to participate in didactic activities, transfer care of patients, conduct outpatient clinics, and maintain continuity of medical and surgical care.**

**VI.E.3. No new patients may be accepted after 24 hours of continuous duty.**

**VI.E.3.a) A new patient is defined as any patient for whom the surgery service or department has not previously provided care. The resident should evaluate the patient before surgery.**

**VI.E.4. At-home call (or pager call)**

**VI.E.4.a) The frequency of at-home call is not subject to the every-third-night, or 24+6 limitation. However at-home call must not be so frequent as to preclude rest and reasonable personal time for each resident.**

**VI.E.4.b) Residents taking at-home call must be provided with one day in seven completely free from all educational and clinical responsibilities, averaged over a four-week period.**

**VI.E.4.c) When residents are called into the hospital from home, the hours residents spend in-house are counted toward the 80-hour limit.**

**VI.F. Moonlighting**

**VI.F.1. Moonlighting must not interfere with the ability of the resident to achieve the goals and objectives of the educational program.**

**VI.F.2. Internal moonlighting must be considered part of the 80-hour weekly limit on duty hours.**

**VI.G. Duty Hours Exceptions**

**A Review Committee may grant exceptions for up to 10% or a maximum of 88 hours to individual programs based on a sound educational rationale.**

**VI.G.1. In preparing a request for an exception the program director must follow the duty hour exception policy from the ACGME Manual on Policies and Procedures.**

**VI.G.2. Prior to submitting the request to the Review Committee, the program director must obtain approval of the institution's GMEC and**

**DIO.**

**VII. Experimentation and Innovation**

**Requests for experimentation or innovative projects that may deviate from the institutional, common and/or specialty specific program requirements must be approved in advance by the Review Committee. In preparing requests, the program director must follow Procedures for Approving Proposals for Experimentation or Innovative Projects located in the ACGME Manual on Policies and Procedures. Once a Review Committee approves a project, the sponsoring institution and program are jointly responsible for the quality of education offered to residents for the duration of such a project.**
