INTRODUCTION

The Resident Case Log System is an Internet-based data collection system utilizing CPT codes.

The system was designed to permit residents to enter procedures on a regular basis at their convenience. However, some programs may prefer to have residents report their procedures to one individual who will enter all procedures for all residents. Data may be entered from any PC connected to the World Wide Web.

The site is secured by an encryption certificate obtained through the Verisign Corporation.

GETTING STARTED

The RRC office provides each program director with a "User ID" and "Password" to access the collection. The program enters program specific information such as residents, attending physicians, institutions, and users.

Access to the system is available through most commonly used Internet browsers and providers, such as Microsoft Internet Explorer 4.01, Netscape 4.0, AOL, and Prodigy. No special download is required.

TECHNICAL NOTE: "Cookies" are small pieces of information stored on a web browser that improve computer performance. In order for the Resident Case Log System to work properly, your computer must be set up so that Cookies are *NOT* disabled. Contact your local technical support staff if your computer's default settings need to be changed.

When running reports the system will ask you to download the "Crystal Smart Viewer." This is a Seagate Crystal Report application, which allows you to search and print reports. Please answer yes to the download.

CONTACT US

As you use this application, please do not hesitate to contact the ACGME Help Desk (312/755-7464) when you have questions or suggestions. Additionally, you can contact us via e-mail at oplog@acgme.org

312.755.7464

oplog@acgme.org

LOGGING ON

Using your Internet-browser, go to the ACGME homepage at www.acgme.org. Select “Resident Case Log System”.

Enter the User ID and Password (provided by your program’s system coordinator) and click on the “Login” button. *If you want to change your password, click on the “Change Password” box **before** you log in.*

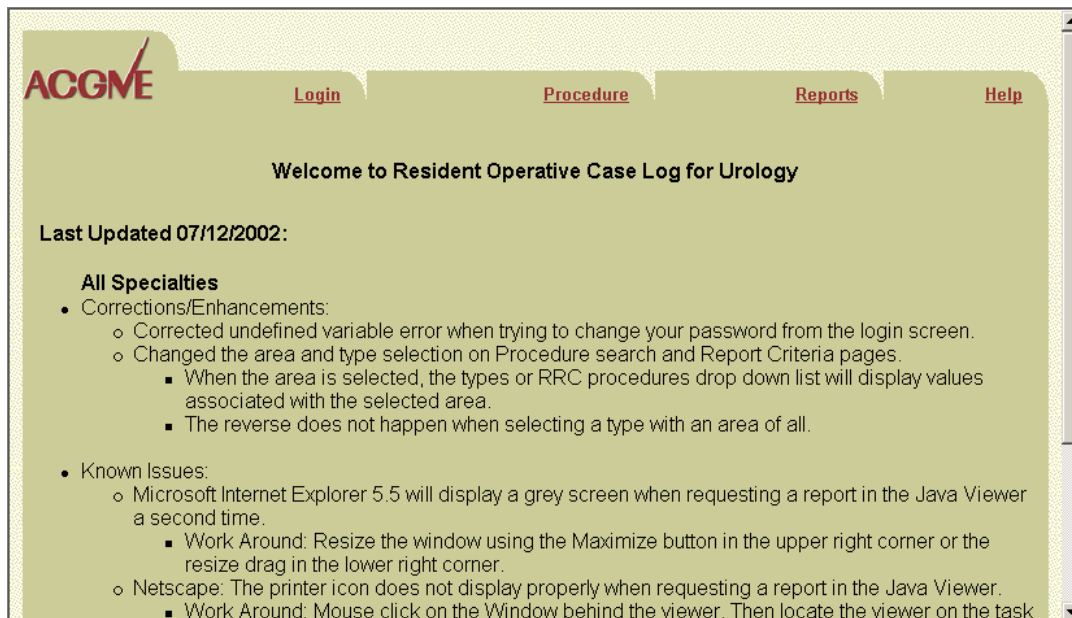

CHANGING YOUR PASSWORD

Enter your User ID and Password, click on the “Change password” check box, and press the “Login” button. A new window will open to request your password and confirm the new one. **If you forget your password, your program’s system coordinator is the only person who can assign you a new one.** Enter the required data and press the save button. If you decide you don’t want to change the password press the Cancel button. You will still be logged on to the system.

The screenshot shows a dialog box titled "Program 4800011111 : Urology Test Program" with the subtitle "Update User Password for uroldir". It contains three input fields: "Old Password", "New Password", and "Verify Password". Below these fields are "Save" and "Cancel" buttons. At the bottom, a note states: "Password length must be a minimum of 5 characters and a maximum of 15."

WELCOME PAGE

The Welcome Page will be the starting point of any login. It will confirm that you are logged on and keep you abreast of changes or issues. It will also provide you with the necessary tabs to perform your entry.

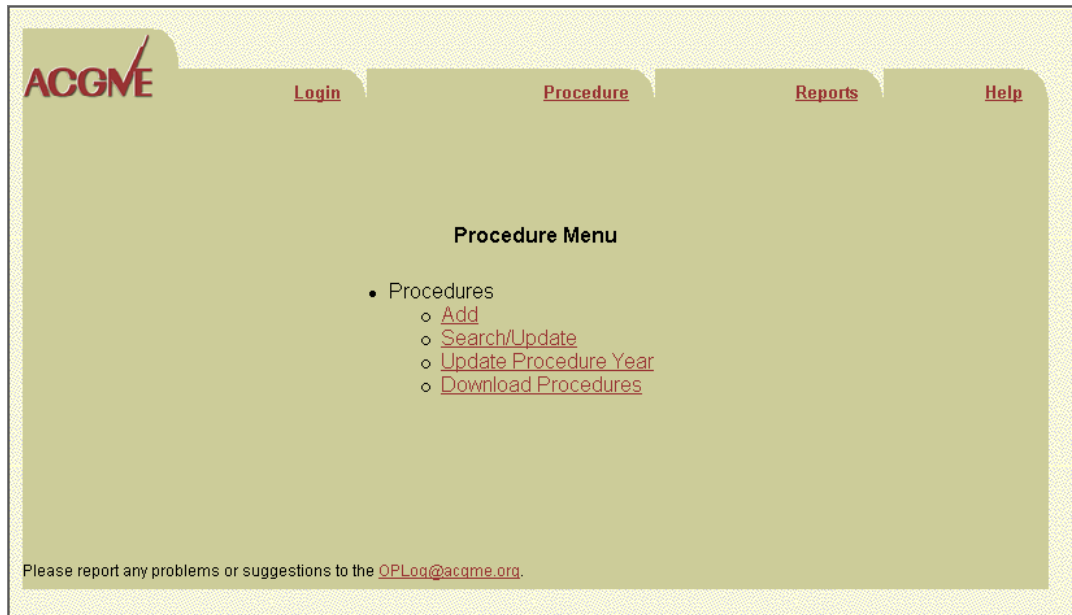

LIST OF OPTIONS

The Welcome Page has a group of tabs listed across the top of the Page.

1. **“Login”** will place you on the Login page and permit you to log onto the system. (At this point, however, you are already logged on.)
2. **“Procedure”** will allow you to add, edit, delete, and view procedures.
3. **“Reports”** allows you to view and print:
 - a. “Resident Operative” report lists total procedures by area and type, which can be filtered by date range, attending, and institution, etc;
 - b. “Resident Full Detail” report is an itemized, chronological list of all your entries, which also can be filtered by date range, attending, and institution, etc.; or
 - c. “Resident Activity” report lists the procedure date that was entered; or
 - d. “Resident Brief Detail” report shows a chronological list of all your entries, which also can be filtered by date range, attending, and institution, etc.; or
 - e. “Available CPT Codes” which can be displayed either “by CPT” or by “Area and Type.” (These could be handy, timesaving reference guides, were you to print them out).
4. **“Help”** will provide you with an index of topics and information about the system.

PROCEDURES

Click on the “Procedure” tab and the Procedure Menu will display. To add new procedures, click on “Add.” To change, delete or view procedures, click on “Search/Update.” To change and incorrect resident procedure year, click on “Update Procedure Year”. To download all procedures click on “Download Procedures”.

To add a new procedure, click on “Add”.

When entering procedures, please keep the following in mind:

Under “Resident’s Role” - “Surgeon” should be selected when you had the substantial responsibility during the procedure; “Assistant” should be selected if you had a primarily assisting role with the attending as the surgeon.

ADDING A NEW PROCEDURE

After you click on the **Add** link, the Procedure Entry page will display:

The screenshot shows the ACGME Procedure Entry form. At the top, there are tabs for Login, Procedure, Reports, and Help. The main form area is titled "Procedure Entry" and contains the following fields and controls:

- Resident: Resident Urology (dropdown)
- Resident Year: 1 (text input)
- Attending: < Please select a value > (dropdown)
- Residents Role: < Please select a value > (dropdown)
- Institution: < Please select a value > (dropdown)
- Patient Type: < Please select a value > (dropdown)
- Proc Date: (text input)
- Case ID: (text input)
- CPT Code: (text input) with "Select" and "Search" buttons
- Comments: (text area)
- Buttons: Save, Help, Clear, Cancel
- Selected Procedures: A section with a message "No CPT Descriptions have been currently selected for display." and a "Remove CPT" button.
- Technique: (text input)
- Full CPT Desc: (text input)
- Area: (text input)
- Type: (text input)

Required Fields

- Resident:** Resident name is automatically entered based on your login.
- Attending:** Select the Attending Physician using the down arrow.
- Institution:** Select the Institution where the procedure was performed using the down arrow.
- Resident Year:** Enter your year of residency at the time of the procedure. The year will default to the year entered on the resident setup screen by your local system administrator.
- Resident Role:** Select Role using the down arrow. "Surgeon" should be selected when you had the substantial responsibility during the procedure; "Assistant" should be selected if you had a primarily assisting role with the attending as the surgeon.
- Procedure Date:** Enter Date including / or – to separate month/day/year. Format mm/dd/ccyy.
- CPT Code:** If you know the CPT code: Enter the CPT code and click on the "Select" button. If you don't know the CPT code: Click on the "Search" button.

Case ID is a 20-character field that is optional. It can be used to search for specific procedures or tracking patients. It is also used to avoid making duplicate entries or credit.

Comments is an optional field added to list the outcome of the procedure, which will display in the Resident Full Detail Report and the Critical Care Index Report.

Selecting a CPT code

If you know the appropriate CPT code(s), type the value, and click on the “Select” button. In the pictured example, CPT code 15782 was entered. If the CPT code is valid it will automatically be placed in the “Selected Procedures” list.

The screenshot shows the ACGME Procedure Entry interface. At the top, there are tabs for Login, Procedure, Reports, and Help. The Procedure tab is active. The form includes fields for Resident (Resident Urology), Atending (Cooms, Sarah L.), Institution (Cook County), Resident Year (1), Residents Role (Surgeon), Patient Type (Adult), Proc Date (07-23-2002), and Case ID (123456). A CPT Code field contains the value 15782, with 'Select' and 'Search' buttons next to it. Below this is a large text area for Comments. At the bottom of the form are buttons for Save, Help, Clear, and Cancel. A section titled 'Selected Procedures 1' contains a list with one entry: '51800 Cystoplasty or cystourethroplasty, plastic operation'. Below this list is a 'Remove CPT' button. Further down, there are fields for Technique, Full CPT Desc (Cystoplasty or cystourethroplasty, plastic operation on bladder and/or vesical neck (anterior Y-plasty,)), Area (Adult), and Type (Female Incontinence, All Categories).

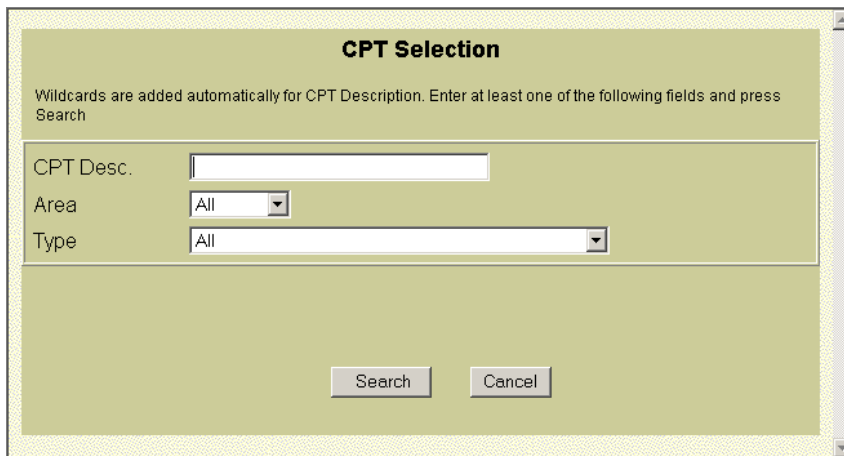

Selected Procedure Field

The “Selected Procedures” field allows you to browse CPTs added to this entry. Use the mouse to point and click on a CPT code, and the selection is highlighted and expanded in the text fields below. To remove the highlighted procedure, click on the “Remove CPT” button. To remove all of them click on the “Clear” button.

This is a close-up view of the 'Selected Procedures' section from the previous screenshot. It shows the list with '51800 Cystoplasty or cystourethroplasty, plastic operation' highlighted. Below the list is the 'Remove CPT' button. The 'Technique' field is empty. The 'Full CPT Desc' field shows the full description: 'Cystoplasty or cystourethroplasty, plastic operation on bladder and/or vesical neck (anterior Y-plasty, ...'. The 'Area' is set to 'Adult' and the 'Type' is 'Female Incontinence, All Categories'.

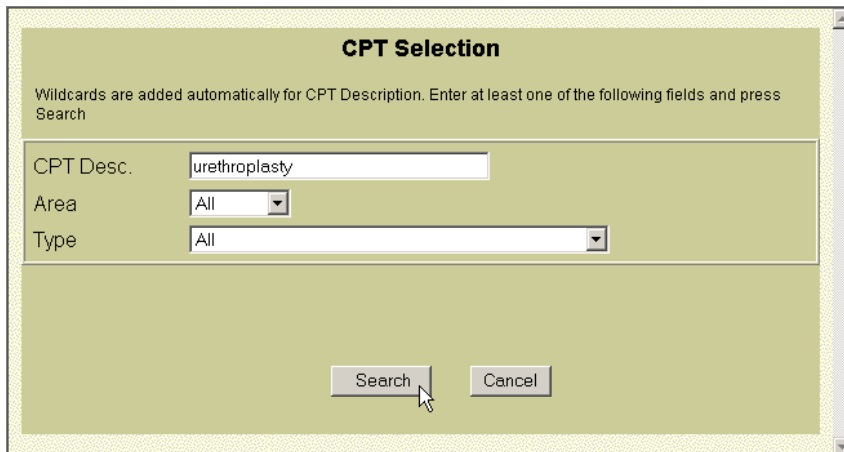

Searching for a CPT Code

To search for a CPT, click on the “Search” button next to the CPT code field. The “CPT Selection” window will display:

The screenshot shows a window titled "CPT Selection" with a light green background. At the top, it says "Wildcards are added automatically for CPT Description. Enter at least one of the following fields and press Search". Below this are three input fields: "CPT Desc." (an empty text box), "Area" (a dropdown menu with "All" selected), and "Type" (a dropdown menu with "All" selected). At the bottom are two buttons: "Search" and "Cancel".

CPT Selection allows the user to look for CPTs in multiple ways. A user can search for a specific phrase or word in the description, or select an area or type to view all CPT descriptions available. Below is an example of entering a word or phrase that exists in the description.

This screenshot is identical to the previous one, but the "CPT Desc." text box now contains the word "urethroplasty". A mouse cursor is pointing at the "Search" button.

When “urethroplasty” is entered and the “Search” button is clicked, the results are displayed for all of the CPT descriptions containing the word “urethroplasty” (see next page):

Searching for a CPT Code (cont.)

CPT Selection

* -indicates CPT is found in multiple area/types

CPT	
51800 Cystoplasty or cystourethroplasty, plastic operation on bladder and/or vesical neck (anterior Y-plasty, vesical fundus resection), any procedure, with or without wedge resection of posterior vesical neck	select
51820 Cystourethroplasty with unilateral or bilateral ureteroneocystostomy	select
54328 One stage distal hypospadias repair (with or without chordee or circumcision); with extensive dissection to correct chordee and urethroplasty with local skin flaps, skin graft patch, and/or island flap	select
54324 One stage distal hypospadias repair (with or without chordee or circumcision); with urethroplasty by local skin flaps (eg, flip-flap, prepuccial flap)	select*
54326 One stage distal hypospadias repair (with or without chordee or circumcision); with urethroplasty by local skin flaps and mobilization of urethra	select*
54336 One stage perineal hypospadias repair requiring extensive dissection to correct chordee and urethroplasty by use of skin graft tube and/or island flap	select
54332 One stage proximal penile or penoscrotal hypospadias repair requiring extensive dissection to correct chordee and urethroplasty by use of skin graft tube and/or island flap	select

Click on the “select” link and the CPT code is returned to the procedure entry screen and entered in the “Selected Procedures” box.

ADDING A NEW PROCEDURE (CONT.)

Once all the CPT codes have been selected for a procedure click on the Save button.

Filters (you may set the following filters)

- Institution:** A drop-down box will list all of the institutions that the program has entered.
- Attending:** A drop-down box will list all of the attendings entered by the program.
- Resident:** Defaults to you, the resident that is logged on.
- Date Range:** If you enter the beginning date only, the system will filter procedure data since and including that date. Likewise, if you enter the ending date only, the system will filter procedure data up to and including that date. Of course, entering both the beginning and ending dates yields all procedure data entered between the two dates, inclusively.
- Residents Role:** Select "All," "Surgeon", "Assistant" from the drop-down box.
- Proc Resident Year:** Select which year's data from the drop-down menu.
- Resident Year:** Select which year's data from the drop-down menu.
- Area Description:** Select the Area Description from the drop-down menu.
- Type Description:** Select the Type Description from the drop-down menu.
- Records per Page:** How many procedures do you want to appear on one display page?
If you want all of the procedures to appear on one page, enter "9999."

Editing, Deleting, or Viewing a Procedure

Locate the procedure that you want to edit, delete, or view the details of, and click on the appropriate link. Either the "Procedure Edit," "Procedure View", or "Procedure Delete" screen will display.

Procedure Edit/Update Screen

To **edit**, make the necessary changes on the screen. To add a new CPT code, type the new desired code in the CPT code box and press the “Select” button. See page 9 for **Selecting a CPT Code** to search for an unknown CPT code to add to the procedure list. Select only one code for credit. To choose a different CPT code for credit, click on the CPT code with the asterisk next to it and unclick the credit box. When you click on the “Update” button, all changes will be saved and you will be returned to the result list.

Procedure Delete Screen

To **delete** a procedure, click on the “Delete “ button. Click on the “Cancel” button to return to the result list.

The screenshot shows a web-based form titled "Procedure Delete". The form is divided into two main sections. The top section contains input fields for: Resident (Resident Urology), Resident Year (1), Attending (Herlihy, Jim), Residents Role (Assistant), Institution (Cook County), Patient Type (Adult), Proc Date (06-21-2001), Case ID (empty), CPT Code (empty), and a Comments text area. Below these fields are buttons for "Delete", "Help", and "Cancel". The bottom section is titled "Selected Procedures 1" and contains a list box with one entry: "52353 Cystourethroscopy, with ureteroscopy and/or pyeloscopy". Below the list box is a "Remove CPT" button. At the bottom of the form are fields for "Technique" (empty), "Full CPT Desc" (Cystourethroscopy, with ureteroscopy and/or pyeloscopy; with lithotripsy (ureteral catheterization)), "Area" (Adult), and "Type" (ESWL).

UPDATE PROCEDURE YEAR

The update procedure year enables a program to quickly change the resident year in program for a large number of procedures. The resident year may be incorrect from converting the data from the old system or if the data originated in another system and was uploaded into the internet system. This feature also allows you to change a resident's year in program for past entries if the resident year was not updated in the program setup section.

The screenshot shows a web application interface with a light green background. At the top left is the ACGME logo. To its right are four navigation tabs: 'Login', 'Procedure', 'Reports', and 'Help'. The main heading is 'Update Resident Year on Procedures'. Below this, a section titled 'Please specify procedure data for changing the Resident year' contains the following fields: 'Resident' with a dropdown menu showing 'Resident Urology', 'Date Range' with two date input fields separated by 'to', and 'Procedure Resident Year' with a dropdown menu showing 'All'. A second section titled 'Procedures matching the criteria specified above will have the resident year update to' contains a 'New Procedure Resident Year' dropdown menu. At the bottom center are 'OK' and 'Cancel' buttons.

To update the resident year, first select the resident whose data needs to be updated. Then, specify the appropriate date range. Next, choose which year is currently entered for the incorrect procedures and needs to be changed (selecting all will cause every procedure for that resident to be updated to the new value). Finally, choose the correct year to update the procedures with. After you click "OK," you will receive a message indicating how many procedures were updated.

DOWNLOADING PROCEDURES

The Download Procedure section is used to generate an electronic text file of procedures entered for your program. This is a 2-step process; first the file needs to be selected for exporting and then the file will need to be downloaded.

To generate the file for exporting, click on the “Request new export file” button. You can export the data for an individual resident, as well as a particular date range. If you leave the fields blank, a listing of all procedures will be generated. If logged in as a resident, only procedures for that resident can be exported.

DOWNLOADING PROCEDURES (CONT.)

The screenshot shows the ACGME web interface. At the top, there are navigation tabs for 'Login', 'Procedure', 'Reports', and 'Help'. The main heading is 'Procedure Export List'. Below this, there are two sections:

Files ready for download

Build Date	Expires	Selection Criteria	Size	Filename
5/4/01 8:07:00 PM	8/4/01	All Procedures for Resident, Number1	89 K	4409912345276144974.exe

Files waiting for processing

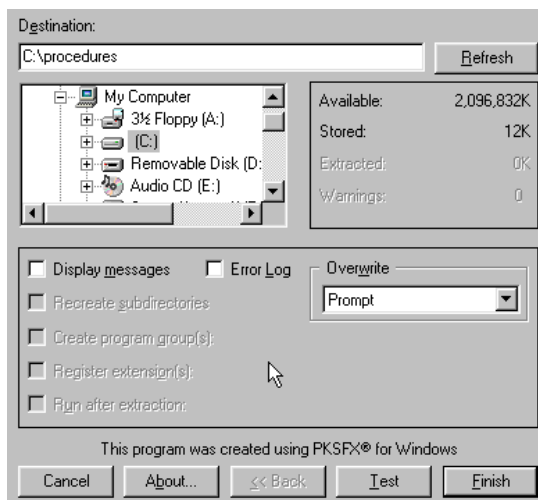

Request Date	Selection Criteria	Status
5/11/01 9:32:00 AM	All Procedures for Resident, Number1	Cancel Request

At the bottom of the interface, there are two buttons: 'Request new export file' and 'Cancel'.

In the example above, a file for all residents' procedures performed will be generated. To cancel a request, click on "Cancel Request" before the file is generated. The export requests are processed four times daily at 2:00 a.m., 8:00 a.m., 12:30 p.m., and 5:00 p.m. Central time. Once the file has been generated you will need to download it to your computer.

To download the file to your computer, click on the file name link. A message box will open allowing you to select "open this file under current location" or "save this file to disk". Select "Save this File to disk," and specify where you want to save the file on your computer.

The downloaded file is a self-extracting zip file named 'procedures'. Simply double-click on it and a window will pop up. Specify in which directory you want to put the data, and click finish. This will extract the file (the first ten characters of the name will be the program id). The resulting text file is tab-delimited with field names on the first row. It can be imported into Excel, Access, FoxPro, etc.

REPORTS

System reports are written in Crystal Report Writer and viewed with a smart viewer that allows you to search and navigate through groupings while viewing the report. Occasionally, printing reports can be problematic. For example, at times the Netscape browser increases the font size by approximately 50%. The reports do print consistently better on the latest printers which use the Print Control Language 6 (PCL6) drivers.

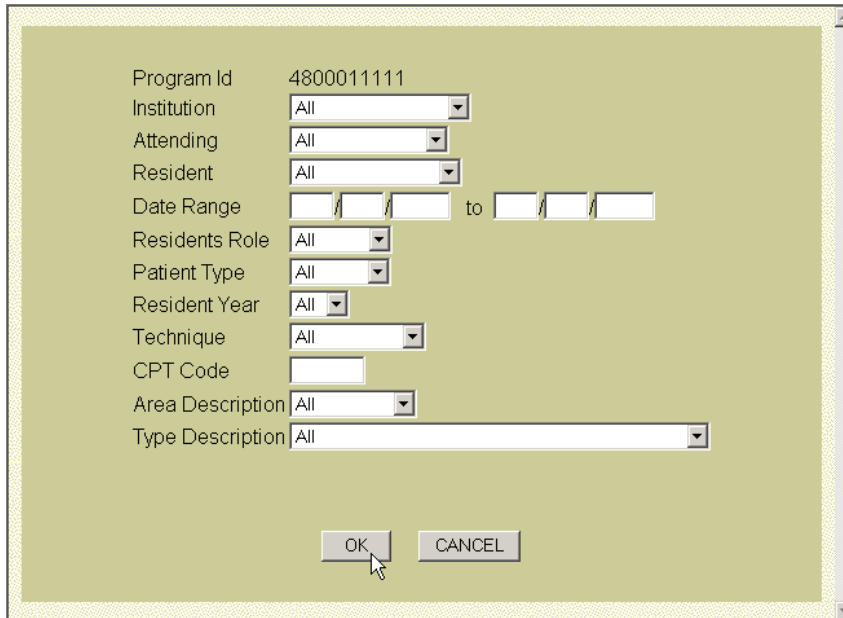

There are two ways to view reports:

1. Java Smart viewer, which uses an 'Active X' control.
2. HTML viewer is a generic report viewer that should work on all browsers.

If you are using a PC, select JavaViewer. Mac users will have to use the HTML Viewer, which will at least allow you to view the reports. Currently, we are still experiencing printing problems with Macs.

REPORTS (cont.)

Select the report you want by clicking on the appropriate link. The selection criteria page displays.

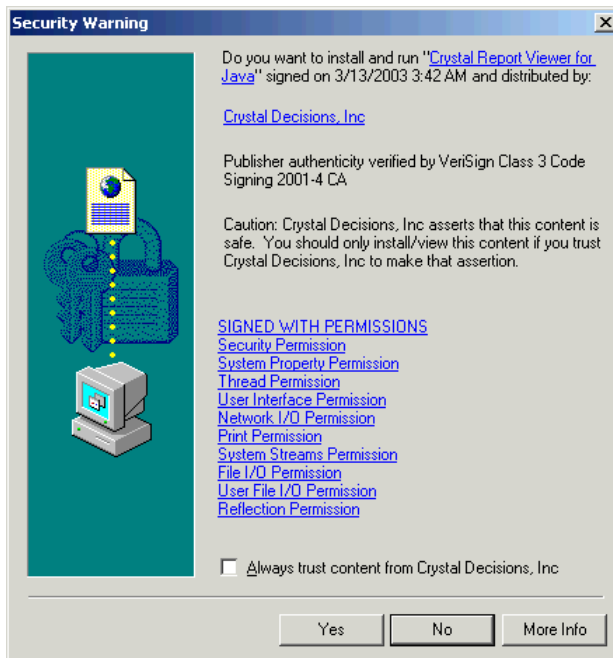

A screenshot of a web-based selection criteria dialog box. The dialog has a light green background and a white border. It contains the following fields and controls:

- Program Id: 4800011111
- Institution: All (dropdown)
- Attending: All (dropdown)
- Resident: All (dropdown)
- Date Range: [] / [] / [] to [] / [] / []
- Residents Role: All (dropdown)
- Patient Type: All (dropdown)
- Resident Year: All (dropdown)
- Technique: All (dropdown)
- CPT Code: []
- Area Description: All (dropdown)
- Type Description: All (dropdown)

At the bottom of the dialog are two buttons: "OK" and "CANCEL". A mouse cursor is pointing at the "OK" button.

Use the selection box to filter data presented on reports and click the OK button to generate the report.

A new window will open displaying the report. The first time you run a report, the ACGME sends a Java applet called Crystal Report Viewer for Java. You will see a security warning asking if you want to install and run the viewer. Click the Yes button see the report (if you press the No button you will see the report but will not be able to print it in its proper format).

The report will display in a new window that will provide you with special functions described below.

AVAILABLE CPT CODES REPORTS

You can view and print all available CPT Codes, sorted either numerically or by area and type, from the "Reports Menu" screen. Printing them may save you time in the long run, as searching through a printed document often takes less time than searching a computer's database.

Available CPT Codes by CPT Report

CPT Code	CPT Description
10040	Acne surgery (eg, marsupialization, opening or removal of multiple milia, comedones, cysts, pustules)
10060	Incision and drainage of abscess (eg, carbuncle, suppurative hidradenitis, cutaneous or subcutaneous abscess, cyst, furuncle, or paronychia); simple or single
10061	Incision and drainage of abscess (eg, carbuncle, suppurative hidradenitis, cutaneous or subcutaneous abscess, cyst, furuncle, or paronychia); complicated or multiple
10080	Incision and drainage of pilonidal cyst; simple
10081	Incision and drainage of pilonidal cyst; complicated
10120	Incision and removal of foreign body, subcutaneous tissues; simple
10121	Incision and removal of foreign body, subcutaneous tissues; complicated
10140	Incision and drainage of hematoma, seroma or fluid collection
10160	Puncture aspiration of abscess, hematoma, bulla, or cyst
10180	Incision and drainage, complex, postoperative wound infection
11000	Debridement of extensive eczematous or infected skin; up to 10% of body surface
11001	Debridement of extensive eczematous or infected skin; each additional 10% of the body surface
