

DELETE RESIDENTS

If a resident has left your program and is no longer active, you can request to archive the resident.

Please send an email to Oplog@acgme.org along with your program number, reason for email, name of the resident, the date the resident left/completed the program and we will remove the resident from your existing residents list.

The resident will be placed within the Reports tab under the Resident Operative – Archived Data link. **Please note:** Once a resident is archived, only the resident operative report is accessible, along with a raw text data file available by request.
