University of Illinois Hospital
Mercy Hospital and Medical Center
Columbus/Cabrini Medical Center
Program Director:
Edwin J Lebrun, MD
University of Illinois Hospital (MC 931)
1740 W Taylor St
Chicago IL 60612
Length: 3 Year(s); Total Positions: 5 (GY1: 0)
Program ID#: 430-16-21-030

HINES
Loyola University Medical Center Program
Edward Hines Jr Veterans Affairs Hospital
Program Director:
James E Marks, MD
Loyola Hines Radiation Therapy Dept.
114-8
Edward Hines Jr Hospital
Hines IL 60414
Length: 3 Year(s); Total Positions: 5 (GY1: 0)
Program ID#: 430-16-22-031

INDIANAPOLIS
Indiana University Medical Center Program
Indiana University Hospitals
William N Winslow Memorial Hospital
Richard L Roodbech Veterans Affairs Medical Center
Program Director:
Ned B Hornback, MD
Indiana University Hospital
535 Barnhill Dr
Indianapolis IN 46202-5289
Length: 3 Year(s); Total Positions: 7 (GY1: 0)
Program ID#: 430-17-11-032

IOWA
IOWA CITY
University of Iowa Hospitals and Clinics Program
University of Iowa Hospitals and Clinics
Program Director:
David H Hussey, MD
University of Iowa Hospitals and Clinics
Dept of Radiology
Iowa City IA 52242
Length: 3 Year(s); Total Positions: 5 (GY1: 0)
Program ID#: 430-18-11-033

KANSAS
KANSAS CITY
University of Kansas Medical Center Program
University of Kansas School of Medicine (Kansas City)
University of Kansas Medical Center
Program Director:
Stephen R Smalley, MD**
University of Kansas Med Ctr, Dept of Radiation Oncology
Rainbow Blvd at 39th
Kansas City KS 66103
Length: 3 Year(s); Total Positions: 6 (GY1: 0)
Program ID#: 430-19-21-034

KENTUCKY
LEXINGTON
University of Kentucky Medical Center Program
University Hospital-Albert B Chandler Medical Center
Program Director:
Yosh Maruyama, MD
Pushpa Patel, MD
University of Kentucky, Dept of Radiation Medicine
800 Rose St, C14
Lexington KY 40536
Length: 3 Year(s); Total Positions: 6 (GY1: 0)
Program ID#: 430-20-11-035

LOUISVILLE
University of Louisville Program
Humane Hospital-University of Louisville
Program Director:
Robert D Lindberg, MD
Kristie J Paris, MD
Univ of Louisville, Brown Cancer Center
529 S Jackson St
Louisville KY 40202
Length: 3 Year(s); Total Positions: 5 (GY1: 0)
Program ID#: 430-22-11-036

MARYLAND
BALTIMORE
Johns Hopkins University Program
Johns Hopkins Hospital
Program Director:
Stanley E Order, MD
Johns Hopkins Hospital
630 N Wolfe St
Baltimore MD 21205
Length: 3 Year(s); Total Positions: 10 (GY1: 0)
Program ID#: 430-23-11-039

University of Maryland Program
University of Maryland Medical System
Program Director:
Robert G Slawson, MD
Omar M Salazar, MD
University of Maryland Medical System
Dept of Radiation Oncology
22 S Greene St
Baltimore MD 21201
Length: 3 Year(s); Total Positions: 8 (GY1: 0)
Program ID#: 430-23-21-040

BETHESDA
Uniformed Services University of The Health Sciences Program
National Cancer Institute
Walter Reed Army Medical Center
National Naval Medical Center (Bethesda)
Program Director:
Thomas Gofman, MD**
National Cancer Institute
9000 Rockville Pike
Bldg 10 B3269
Bethesda MD 20892
Length: 3 Year(s); Total Positions: 12 (GY1: 0)
Program ID#: 430-23-21-113

MICHIGAN
ANN ARBOR
University of Michigan Program
University of Michigan Hospitals
Providence Hospital
Program Director:
Andrew T Turrisi, III, MD**
Univ of Michigan Medical School, Dept of Radiation Oncology
UM 82 CA438, Box 0010
1500 E Medical Center Drive
Ann Arbor MI 48109-0010
Length: 3 Year(s); Total Positions: 12 (GY1: 0)
Program ID#: 430-25-11-045

* Updated Information Not Provided
** Program director listed was provided on 1996 Residency Survey and may differ from ACGME records.
NEW YORK

BRONX
Albert Einstein College of Medicine Program
Monellote Medical Center - Henry and Lucy Moses Hosp Division
Weir Hospital of Albert Einstein College of Medicine
Program Director:
Edward Valentine, MD
Monellote Medical Center, Dept of Radiation Oncology
1825 Eastchester Rd
Bronx NY 10461
Length: 3 Year(s); Total Positions: 4 (GYI: 1)
Program ID#: 430-33-31-057

NEW YORK

ROYAL OAK
William Beaumont Hospital Program
William Beaumont Hospital
Program Director:
Alvaro Martinez, MD
William Beaumont Hospital, Dept of Radiation Oncology
360 W 13 Mile Rd
Royal Oak, MI 48073
Length: 3 Year(s); Total Positions: 6 (GYI: 0)
Program ID#: 430-25-12-049

MINNESOTA

MINNEAPOLIS
University of Minnesota Program*
University of Minnesota Hospital and Clinic
Veterans Affairs Medical Center (Minneapolis)
Program Director:
Seymour H. Levitt, MD
University of Minnesota Hospital, Dept of Therapeutic Rad
420 Delaware St, S E
Minneapolis MN 55456
Length: 3 Year(s); Total Positions: 6 (GYI: 0)
Program ID#: 430-26-21-050

ROCHESTER
Mayo Graduate School of Medicine Program
Mayo Graduate School of Medicine-Mayo Clinic
Program Director:
James A Martenson, MD
Mayo Graduate School of Medicine
200 First St, S W
Rochester MN 55905

Washington University Program
Maiohnklnof Institute of Radiology - Barnes Hospital
St Louis Children's Hospital
Jewish Hospital of St Louis at Washington Univ Medical Center
Program Director:
Carlos A Perez, MD
Robert J Myerson, MD
Maiohnklnof Institute of Radiology
4009 Audubon, Suite 5500
St Louis MO 63110
Length: 3 Year(s); Total Positions: 14 (GYI: 0)
Program ID#: 430-26-11-054

* Updated Information Not Provided
** Program director listed was provided on 1990 Residency Survey and may differ from ACGME records.
NORTH CAROLINA—cont’d

DUHRAM
Duke University Program
Duke University Medical Center
Veterans Affairs Medical Center (Durham)
Program Director:
Edward C Halperin, MD
Duke University Medical Center, Div Radiation Oncology
Box 3088
Durham NC 27710
Length: 3 Year(s); Total Positions: 8 (GY: 1)
Program ID#: 430-36-21-074

Winston-Salem
Bowman Gray School of Medicine Program
North Carolina Baptist Hospital
Program Director:
Warren W Ols, MD
Dept of Radiology
Bowman Gray School of Medicine
300 S Hawthorne Road
Winston-Salem NC 27103
Length: 3 Year(s); Total Positions: 5 (GY: 1)
Program ID#: 430-36-11-075

OHIO
CINCINNATI
University of Cincinnati Hospital Group Program
University of Cincinnati Hospital
Veterans Affairs Medical Center (Cincinnati)
Program Director:
Bernard S Aron, MD
Univ of Cincinnati Medical Center Radiation Oncology
224 Goodman St
Cincinnati OH 45267-0757
Length: 3 Year(s); Total Positions: 6 (GY: 1)
Program ID#: 430-38-21-076

CLEVELAND
Case Western Reserve University Program
University Hospitals of Cleveland
Program Director:
Louis J Novak, MD
University Hospitals of Cleveland
2078 Abington Rd
Cleveland OH 44106
Length: 3 Year(s); Total Positions: 6 (GY: 1)
Program ID#: 430-38-11-077

Cleveland Clinic Foundation Program
Cleveland Clinic Foundation
Program Director:
Melvin Tefft, MD
The Cleveland Clinic Foundation
One Clinic Center-7332
9500 Euclid Ave
Cleveland OH 44195-5242
Length: 3 Year(s); Total Positions: 8 (GY: 2)
Program ID#: 430-38-12-078

COLUMBUS
Ohio State University Program
Ohio State University Hospital
Program Director:
Reinhard Galtbauer, MD
Arthur G James Cancer Hospital and Research Institute
Ohio State University
300 W 10th Ave
Columbus OH 43210
Length: 3 Year(s); Total Positions: 4 (GY: 1)
Program ID#: 430-38-11-079

OKLAHOMA
OKLAHOMA CITY
University of Oklahoma Health Sciences Center Program
University of Oklahoma Health Sciences Center
Program O2011316
Univ of Oklahoma Health Sciences Center
800 N E 13th, PO Box 26901
Oklahoma City OK 73109-26901
Length: 3 Year(s); Total Positions: 5 (GY: 1)
Program ID#: 430-39-21-080

PORTLAND
Oregon Health Sciences University Program
Oregon Health Sciences University Program
Program Director:
Kenneth R Stevens, MD
Oregon Health Sciences University
Dept of Radiation Oncology
3181 S W Sam Jackson Park Road
Portland OR 97201-3089
Length: 3 Year(s); Total Positions: 4 (GY: 1)
Program ID#: 430-40-21-081

OREGON
PHILADELPHIA
Albert Einstein Medical Center Program
Albert Einstein Medical Center Program
Program Director:
Sucha O Asbell, MD
Myron P Nober, MD
Albert Einstein Medical Center-Northern Division
York and Tabor Bldg
Philadelphia PA 19141-5903
Length: 3 Year(s); Total Positions: 4 (GY: 1)
Program ID#: 430-41-12-082

Hahnemann University Program
Hahnemann University Hospital
Program Director:
Blair Macalz, MD
Hahnemann University Hospital
230 N Broad St
Philadelphia PA 19102-1192
Length: 3 Year(s); Total Positions: 6 (GY: 2)
Program ID#: 430-41-11-084

Thomas Jefferson University Program
Thomas Jefferson University Hospital
Program Director:
Carl M Sautenfeld, MD
Mohammed Mounim, MD
Thomas Jefferson University Hospital
Dept of Radiology Oncology
11th and Sansom
Philadelphia PA 19107
Length: 3 Year(s); Total Positions: 9 (GY: 1)
Program ID#: 430-41-11-086

University of Pennsylvania Program
Hospital of The University of Pennsylvania
Veterans Affairs Medical Center (Philadelphia)
American Oncological Hospital of The Fox Chase Cancer Center
Program Director:
Lawrence R Coia, MD
Giulio J D’Angio, MD
Hospital of The University of Pennsylvania
3400 Spruce St
Philadelphia PA 19104-2889
Length: 3 Year(s); Total Positions: 15 (GY: 1)
Program ID#: 430-41-21-087

PITTSBURGH
Allegheny General Hospital Program
Allegheny General Hospital
Program Director:
Prabha Bansal, MD
Janet E Potts, PhD
Division of Radiation Oncology
Allegheny General Hospital
320 East North Ave
Pittsburgh PA 15212-9966

Program ID#: 420-01-11-007

MOBILE
University of South Alabama Program
University of South Alabama Medical Center
Program Director:
Bryan G. Brophy, MD
Allan E. Green, Jr., MD
Univ of South Alabama Medical Center
2451 Fillinger St
Mobile AL 36617
Length: 4 Year(s); Total Positions: 14 (GY1: 0)
Program ID#: 420-01-11-008

* Updated Information Not Provided
** Program director listed was provided on 1990 Residency Survey and may differ from ACGME records.

PHOENIX
St. Joseph's Hospital and Medical Center Program
St. Joseph's Hospital and Medical Center
Program Director:
Robert E. Stejskal, MD
Paul O. Hette, MD
St. Joseph's Hospital and Medical Center
350 West Thomas Road
P.O. Box 2071
Phoenix AZ 85001-2071
Length: 4 Year(s); Total Positions: 14 (GY1: 0)
Program ID#: 420-03-12-010

ARIZONA
ARIZONA—cont’d

TUCSON
University of Arizona Program
University Medical Center
Veterans Affairs Medical Center (Tucson)
Program Director:
Joelchin F Seeger, MD
Univ. of Arizona Health Sciences Center, Dept. of Radiology
1501 N Campbell
Tucson AZ 85724
Length: 4 year(s); Total Positions: 21 (GY1: 2)
Program ID#: 420-03-21-011

ARKANSAS

LITTLE ROCK
University of Arkansas For Medical Sciences Program
University Hospital of Arkansas
John L. Mc Cielian Memorial Veterans Hospital
Program Director:
Steven K Teplick, MD
Joannal J Seibert, MD
Univ. of Arkansas For Medical Sciences Dept of Radiology, Sot 556
4301 W Markham St
Little Rock AR 72205-7199
Length: 4 year(s); Total Positions: 24 (GY1: 6)
Program ID#: 420-04-21-012

CALIFORNIA

FRESNO
University of California (San Francisco)Fresno Program
U C S F:Fresno Medical Education Program
Valley Medical Center of Fresno
Veterans Affairs Medical Center (Fresno)
Program Director:
Malcolm F Anderson, MD
Veterans Affairs Medical Center
2615 E Clinton Ave
Fresno CA 93703
Length: 4 year(s); Total Positions: 8 (GY1: 0)
Program ID#: 420-05-21-219

LOMA LINDA
Loma Linda University Program
Loma Linda University Medical Center
Jerry L. Pettis Memorial Veterans Hospital
Program Director:
Douglas C Smith, MD
Loma Linda University Medical Center, Radiation Sciences
5224 Anderson St, P O Box 2000
Loma Linda CA 92354
Length: 4 year(s); Total Positions: 26 (GY1: 2)
Program ID#: 420-05-21-015

SACRAMENTO
University of California (Davis) Program
University of California (Davis) Medical Center
Veterans Affairs Medical Center (Martinez)
Program Director:
John P McGahan MD
Univ. of California (Davis) Medical Center

# Accredited Programs in Radiology-Diagnostic

## California—cont’d

**Stanford**
- Stanford University Program
  - Stanford University Hospital
  - Veterans Affairs Medical Center (Palo Alto)
  - Program Director: Barton Lane, MD
  - Stanford University
    - Dept of Diagnostic Radiology
    - H-1307
    - Stanford CA 94305-5105
  - Length: 4 Year(s); Total Positions: 24 (GY1: -)
  - Program ID#: 420-05-21-034

**Torrance**
- Los Angeles County-Harbor-U C L A Medical Center
  - Program Director: Joseph Tabakis, MD
  - Length: 4 Year(s); Total Positions: 20 (GY1: -)
  - Program ID#: 420-05-11-035

**Travis AFB**
- David Grant U S A F Medical Center Program
  - Program Director: Col David K Shelton, MD
  - David Grant U S A F Medical Center
    - Dept of Radiology
    - Travis A F C A 94353-5300
  - Length: 4 Year(s); Total Positions: 16 (GY1: 0)
  - Program ID#: 420-05-21-001

## Colorado

**Aurora**
- U S Army Coordinated Program-Fitzsimons Army Medical Center
  - Fitzsimons Army Medical Center
  - Program Director: Col Frank L Quattrinamani, MD
  - Fitzsimons Army Medical Center
    - Aurora CO 80045-5001
  - Length: 4 Year(s); Total Positions: 16 (GY1: 0)
  - Program ID#: 420-07-12-013

**Denver**
- Am I Presbyterian/St Luke’s Medical Center Program
  - Am I Presbyterian Denver Hospital
  - Program Director: Sydney S Stevens, MD
  - Lawrence L Emmens, MD
  - Lawrence L Emmens MD
  - A M I Presbyterian-St Luke's Medical Center
    - 1719 E 18th Ave.
    - Denver CO 80218
  - Length: 4 Year(s); Total Positions: 22 (GY1: 0)
  - Program ID#: 420-07-22-036

## Connecticut

**Bridgeport**
- Bridgeport Hospital Program
  - Bridgeport Hospital
  - Program Director: Octavo G Choy, MD
  - Bridgeport Hospital
    - 207 Grant St
    - Bridgeport CT 06610-2870
  - Length: 4 Year(s); Total Positions: 8 (GY1: 0)
  - Program ID#: 420-08-12-039

**St Vincent’s Medical Center Program**
- St Vincent’s Medical Center
  - Program Director: Robert D Russo, MD
  - St Vincent’s Medical Center
    - 2800 Main St
    - Bridgeport CT 06606
  - Length: 4 Year(s); Total Positions: 9 (GY1: 0)
  - Program ID#: 420-08-11-040

**Farmington**
- University of Connecticut Program
  - Univ of Connecticut Health Center
    - John Dempsey Hospital
  - Program Director: Faith A Weidner, MD
  - Dept of Radiology
    - Farmington CT 06032
  - Length: 4 Year(s); Total Positions: 8 (GY1: 0)
  - Program ID#: 420-06-21-225

## Delaware

**New Haven**
- Hospital of St Raphael Program
  - Hospital of St Raphael
  - Program Director: Lee H Greenwood, MD
  - Hospital of St Raphael
    - Dept of Radiologic Science
    - 1450 Chapel St
    - New Haven CT 06510
  - Length: 4 Year(s); Total Positions: 14 (GY1: 0)
  - Program ID#: 420-08-22-046

**Yale-New Haven Medical Center Program**
- Yale-New Haven Hospital
  - Veterans Affairs Medical Center (West Haven)
  - Program Director: Coralie Shaw, MD
  - Yale University School of Medicine
    - 332 Cedar St, P O Box 3333
    - New Haven CT 06510
  - Length: 4 Year(s); Total Positions: 24 (GY1: 0)
  - Program ID#: 420-09-21-046

## Florida

**Gainesville**
- University of Florida Program
  - Shands Hospital at The University of Florida
    - Veterans Affairs Medical Center (Gainesville)
  - Program Director: William J Montgomery, MD
    - University of Florida, Dept of Radiology
      - Box J-374
      - Gainesville FL 32610-0374
  - Length: 4 Year(s); Total Positions: 27 (GY1: 0)
  - Program ID#: 420-11-21-048

ACREDITED PROGRAMS IN RADIOLOGY-DIAGNOSTIC

FLORIDA — cont’d

JACKSONVILLE
University of Florida Health Science Center/Jacksonville Program
University Medical Center, Inc
Program Director:
Frederick S Vines, MD
Dept of Radiology/UFHSCJ
University Medical Center
655 West Eighth St
Jacksonville FL 32209
Length: 4 Year(s); Total Positions: 16 (GY1: 4)
Program ID#: 420-11-21-223

MIAMI
University of Miami-Jackson Memorial Medical Center Program
University of Miami-Jackson Memorial Medical Center
Program Director:
Sandra A Oldham, MD
Jackson Memorial Hospital
Dept of Radiology
611 NW 12 Ave
Miami FL 33136
Length: 4 Year(s); Total Positions: 30 (GY1: 0)
Program ID#: 420-11-21-049

MIAMI BEACH
Mount Sinai Medical Center of Greater Miami Program
Mount Sinai Medical Center of Greater Miami
Program Director:
Manuel Villanueva Jr, MD
Mount Sinai Medical Center of Greater Miami
4300 Alton Rd
Miami Beach FL 33140
Length: 4 Year(s); Total Positions: 20 (GY1: 0)
Program ID#: 420-11-21-050

TAMPA
University of South Florida Program
Tampa General Hospital
James A Haley Veterans Hospital
H Lee Moffitt Cancer Center and Research Institute
Program Director:
Martin L Silber, MD
Univ of South Florida College of Medicine, Dept of Radiology
12001 N Bruce B Downs Blvd
Box 17
Tampa FL 33612
Length: 4 Year(s); Total Positions: 17 (GY1: 0)
Program ID#: 420-11-21-061

GEORGIA
ATLANTA
Emory University Program
Emory University School of Medicine
Emory University Hospital
Grady Memorial Hospital
Program Director:
Richard S Colvin, MD
Bruce R Baumgartner, MD
Emory University Hospital
Dept of Radiology
1364 Clifton Road, NE
Atlanta GA 30322-2000
Length: 4 Year(s); Total Positions: 41 (GY1: 0)
Program ID#: 420-12-21-052

AUGUSTA
Medical College of Georgia Program
Medical College of Georgia Hospital and Clinics
Veterans Affairs Medical Center (Augusta)
Program Director:
Theodore Vanderzam, MD
Dept of Radiology
Medical College of Georgia
1120 15th St
Augusta GA 30912-3900
Length: 4 Year(s); Total Positions: 13 (GY1: 0)
Program ID#: 420-12-21-053

SAVANNAH
Memorial Medical Center Program
Memorial Medical Center
Program Director:
Michael P Carter, MD
Terry L Reynolds, MD
Memorial Medical Center, Inc
P O Box 23089
Savannah GA 31403
Length: 4 Year(s); Total Positions: 16 (GY1: 8)
Program ID#: 420-12-12-054

HAWAII
HONOLULU
U.S. Army Coordinated Program-Tripler Army Medical Center
Tripler Army Medical Center
Program Director:
Mark F Hansen, MD
Tripler Army Medical Center
Dept of Radiology
Honolulu HI 96843-5000
Length: 4 Year(s); Total Positions: 16 (GY1: 8)
Program ID#: 420-14-21-033

ILLINOIS
CHICAGO
Cook County Hospital Program
Cook County Hospital
Program Director:
Simirios G Spigos, MD
Cook County Hospital, Dept of Radiology
1835 West Harrison St
Chicago IL 60612-9585
Length: 4 Year(s); Total Positions: 28 (GY1: 4)
Program ID#: 420-16-21-055

Illinois Masonic Medical Center Program
Illinois Masonic Medical Center
Program Director:
Robert P Cavallino, MD
Illinois Masonic Medical Center
836 W Wellington Ave
Chicago IL 60657-5193
Length: 4 Year(s); Total Positions: 6 (GY1: 0)
Program ID#: 420-16-21-217

Michael Reese Hospital and Medical Center Program
Michael Reese Hospital and Medical Center
Program Director:
N L Brown, MD
Howard J Rose, DO
Michael Reese Hospital and Medical Center
Diagnostic Radiology Dept
Lake Shore Dr at 41st St
Chicago IL 60616
Length: 4 Year(s); Total Positions: 24 (GY1: 0)
Program ID#: 420-16-12-057

Northwestern University Medical School Program
Northwestern Memorial Hospital
Evanston Hospital
Veterans Affairs Lakeside Medical Center (Chicago)
Program Director:
Lee F Rogers, MD
Leonid Galvanoz, MD
Northwestern University Medical School
Dept of Radiology
710 N Fairbanks Ct
Chicago IL 60611

** Program director listed was provided on 1990 Residency Survey and may differ from ACGME records.
Section IV

DIRECTORY OF INSTITUTIONS AND ORGANIZATIONS PARTICIPATING IN TRAINING

This Section contains a list of hospitals and other organizations participating in graduate medical education. There are 1,570 institutions listed in this Section.

Approximately three-fifths of these institutions are identified as the "sponsoring organization" for at least one residency program. The definition of sponsoring organization indicates that this organization has administrative responsibilities for the programs under its purview; that is, the organization monitors the quality of the education, coordinates accreditation activity, and administers the funding of the program. The sponsoring organization can be either a hospital, a medical school, an educational consortium, or a corporation. The sponsor may or may not be the major site of training, may or may not be the geographic location of the program director, and may or may not be a clinical facility.

The list is intended as a reference for information about the institutions which are part of a residency program. Candidates seeking a residency should refer to the list of programs in Section III. Applications for a residency position should be addressed to the program director rather than to an institution.

Relationship Between Hospitals and Medical Schools

It is not a requirement that hospitals have a formal relationship with a medical school to have an accredited program. The type of medical school relationship of an institution has been provided by the dean of the medical school, and is listed as an item of information. The type of medical school-hospital relationship is indicated as M (Major), G (Graduate Only), or L (Limited). The number code following identifies the medical school. (See Appendix D for a list of schools.)

MAJOR signifies that the hospital is an important part of the teaching program of the medical school and is a major unit in the clinical clerkship program.

GRADUATE indicates that the hospital is used by the school for graduate training programs only. Thus the GRADUATE designation is used only for hospitals not designated as MAJOR or LIMITED and only in cases in which one or more of the following arrangements is in effect:

a) The house staff are selected by officials of a medical school department or by a joint committee of the hospital teaching staff and medical school faculty;

b) The medical school faculty (other than the hospital's attending staff) are regularly scheduled to participate in the teaching programs of the hospital. If the medical school faculty participation at the hospital is limited to an occasional lecture or consultation visit, or if the hospital's residents attend medical school teaching conferences only as visitors, the hospital is not designated as having a graduate affiliation.

c) A contractual arrangement (with or without financial commitment) specifies the medical school participation in the organization and supervision of the graduate training program in the hospital.

d) There is some degree of exchange of residents between this hospital and the principal teaching hospital of the medical school.

If the hospital is used for undergraduate clerkship teaching, the medical school relationship will be designated as either MAJOR or LIMITED, but not GRADUATE.

LIMITED indicates that the hospital is used in the school's teaching program only for brief and/or unique rotations of students or residents.

There are several additional hospitals to which residents rotate for a brief period during the training program. Space limitations preclude listing these institutions in this DIRECTORY.
A. The following institutions and agencies are SPONSORS of residency programs.

APPENDIX A

COMBINED SPECIALTY TRAINING PROGRAMS
COMBINED SPECIALTY TRAINING PROGRAMS

COMBINED INTERNAL MEDICINE/EMERGENCY MEDICINE PROGRAMS

The programs listed below offer five years of combined training, two and a half years in each specialty, acceptable to both the American Board of Internal Medicine and the American Board of Emergency Medicine toward certification.

The two Boards believe that all five years should be completed in the same combined training program. The training in both specialties should be undertaken in a single academic health center. All five years of training must be satisfactorily completed prior to admission to the certifying examinations of each Board. Applicants to combined training programs are encouraged to review all of the requirements for admission to the certification process of each Board, which appear in other sections of this Directory.

Neither the ACGME nor the Residency Review Committees have reviewed these combined programs. This list has been provided by the staffs of the American Board of Internal Medicine and the American Board of Emergency Medicine and is printed here as a service to the reader.

Requests for information about the guidelines for these programs should be directed to the American Board of Internal Medicine or to the American Board of Emergency Medicine.

COMBINED INTERNAL MEDICINE/PEDIATRICS PROGRAMS

The programs listed below offer four years of combined training, two years in each specialty, acceptable to both the American Board of Internal Medicine and the American Board of Pediatrics toward certification.

The two boards believe that all four years should be completed in the same combined training program and that continuity clinics in each specialty should be provided throughout at least three years. The training in each specialty should be undertaken in a single institution. All four years of training must be satisfactorily completed prior to admission to the certifying examinations of each Board. Applicants to combined training programs are encouraged to review all of the requirements for admission to the certification process of each Board, which appear in other sections of this Directory.

Neither the ACGME nor the Residency Review Committees have reviewed these combined programs. This list has been provided by the staffs of the American Board of Internal Medicine and the American Board of Pediatrics and is printed here as a service to the reader.

Requests for information about the guidelines for these programs should be directed to the American Board of Internal Medicine or to the American Board of Pediatrics.

COMBINED INTERNAL MEDICINE/PHYSICAL MEDICINE AND REHABILITATION PROGRAMS

The programs listed below offer five years of combined training, two and a half years in each specialty, acceptable to both the American Board of Internal Medicine and the American Board of Physical Medicine and Rehabilitation toward certification.

The two Boards believe that all five years should be completed in the same combined training program. The training in each specialty should be undertaken in an academic health center. All five years of training must be satisfactorily completed prior to admission to the certifying examinations of each Board. Applicants to combined training programs are encouraged to review all of the requirements for admission to the certification process of each Board, which appear in other sections of this Directory.

Neither the ACGME nor the Residency Review Committees have reviewed these combined programs. This list has been provided by the staffs of the American Board of Internal Medicine and the American Board of Physical Medicine and Rehabilitation and is printed here as a service to the reader.

Requests for information about the guidelines for these programs should be directed to the American Board of Internal Medicine or to the American Board of Physical Medicine and Rehabilitation.

COMBINED SPECIALTY TRAINING PROGRAMS

COMBINED PEDIATRICS/EMERGENCY MEDICINE PROGRAMS

The programs listed below offer five years of combined training, acceptable to both the American Board of Pediatrics and the American Board of Emergency Medicine toward certification.

A special agreement exists between the American Board of Pediatrics and the American Board of Emergency Medicine whereby an applicant may fulfill the training requirements of both Boards by completing joint training in five years. All five years should be completed in the same combined training program. Exceptions must be approved by both Boards. Training programs must be approved prospectively by both Boards.

Neither the ACGME nor the Residency Review Committees have reviewed these combined programs. This list has been provided by the staff of the American Board of Pediatrics and the American Board of Emergency Medicine and is printed here as a service to the reader.

Requests for information about the guidelines for these programs should be directed to the American Board of Pediatrics or the American Board of Emergency Medicine.

COMBINED PEDIATRICS/PHYSICAL MEDICINE AND REHABILITATION PROGRAMS

The programs listed below offer five years of combined training, acceptable to both the American Board of Pediatrics and the American Board of Physical Medicine and Rehabilitation toward certification.

A special agreement exists between the American Board of Pediatrics and the American Board of Physical Medicine and Rehabilitation whereby an applicant interested in pediatric rehabilitation can qualify for admission to the certifying examinations of both Boards. The residency training can be completed in five years. It is recommended that all training be completed at one academic institution; any deviation will require prospective approval by both Boards.

Neither the ACGME nor the Residency Review Committees have reviewed these combined programs. This list has been provided by the staffs of the American Board of Pediatrics and the American Board of Emergency Medicine and is printed here as a service to the reader.

Requests for information about the guidelines for these programs should be directed to the American Board of Pediatrics or to the American Board of Physical Medicine and Rehabilitation.

COMBINED PEDIATRICS/PSYCHIATRY/CHILD PSYCHIATRY PROGRAMS

The programs listed below offer five years of combined training. The American Board of Pediatrics, the American Board of Psychiatry and Neurology, and its Committee on Certification in Child Psychiatry have developed a pilot project to determine the feasibility of training child psychiatrists via a different format. This is a five-year curriculum with two years of pediatrics, one and a half years of adult psychiatry, and one and half years of child and adolescent psychiatry.

Neither the ACGME nor the Residency Review Committees have reviewed these combined programs. This list has been provided by the staffs of the American Board of Pediatrics and the American Board of Emergency Medicine and is printed here as a service to the reader.

For further information please write the program director at the institutions or the American Board of Pediatrics.

APPENDIX B
CERTIFICATION REQUIREMENTS
The Council on Medical Education of the American Medical Association and the American Board of Medical Specialties (formerly the Advisory Board for Medical Specialties) have now approved 23 examining and certifying boards on the basis of minimal standards listed in the "Essentials for Approval of Examining Boards in Medical Specialties." The primary purposes of the boards are (1) to conduct investigations and examinations to determine the competence of voluntary candidates, (2) to grant and issue certificates of qualification to candidates successful in demonstrating their proficiency, (3) to stimulate the development of adequate training facilities, (4) to cooperate with the Accreditation Council for Graduate Medical Education in evaluating residency training programs, and (5) to advise physicians desiring certification as to the course of study and training to be pursued.

The boards are in no sense educational institutions, and the certificate of a board is not to be considered a degree. It does not confer on any person legal qualifications, privileges, nor a license to practice medicine or a specialty. The boards do not in any way interfere with or limit the professional activities of a licensed physician, nor do they desire to interfere in the regular or legitimate duties of any practitioners of medicine.

The ABMS Board of Certification, Medical Specialties, publishes for the American Board of Medical Specialties, contains biographical and educational information on each living specialist who has been certified by the ABMS Board. Executive Vice President of the American Board of Medical Specialties is Donald C. Langley, M.D., One Rotary Center, Suite 805, Evanston, Illinois 60201-4839.

Urology

Note: In this table, those items are marked "x" on which the Board makes specific statement. In most instances, there are additional qualifying statements not indicated in this table. In all instances, refer to details of the board requirements which follow. While all boards accept the foreign medical graduate under certain circumstances, they do not all specify that ECFMG certification is required. ALL FOREIGN GRADUATES WHO CONSIDER SPECIALITY BOARD CERTIFICATION SHOULD CORRESPOND WITH THE APPROPRIATE BOARD AT THE EARLIEST POSSIBLE MOMENT.
The American Board of Medical Specialties is actively concerned with the establishment, maintenance, and elevation of standards for the education and qualification of physicians recognized as specialists through the certification procedures of its member specialty boards. As a corollary, the American Board of Medical Specialties cooperates actively with all other groups concerned in establishing standards, policies, and procedures for assuring the maintenance of continued competence of such physicians.

The American Board and the Council on Medical Education of the American Medical Association, through the Liaison Committee for Specialty Boards, jointly issue the "Essentials for Approval of Examining Boards in Medical Specialties," which document is approved by the House of Delegates of the American Medical Association. Copies of the "Essentials" may be obtained from the Executive Vice President of the American Board of Medical Specialties or from the Council on Medical Education, American Medical Association, Chicago, Illinois 60610.

American Board of Allergy and Immunology
A Conjoint Board of the American Board of Internal Medicine and the American Board of Pediatrics
3624 Market Street
Philadelphia, Pennsylvania 19104

(EDITOR'S NOTE: These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Allergy and Immunology to ascertain whether the information they have is current.)

Organization

The American Board of Allergy and Immunology, A Conjoint Board of the American Board of Internal Medicine and the American Board of Pediatrics, (ABAI) was established in 1971 as a non-profit organization. It is sponsored jointly by the American Board of Internal Medicine (ABIM), the American Board of Pediatrics (ABP), the American Academy of Allergy and Immunology (AAAAI), the American Academy of Pediatrics - Section on Allergy, the American College of Allergy and Immunology (ACAI), and the American Medical Association - Section on Allergy and Immunology. The Board consists of an even number of directors.

The Board reserves the right to make changes in its Policies and Procedures and fees at any time, and cannot assume responsibility for giving advance notice thereof. The provisions of this publication are not to be construed as a contract between any candidate and the American Board of Allergy and Immunology, a Conjoint Board of the American Board of Internal Medicine and the American Board of Pediatrics. All inquiries should be directed in writing to the American Board of Allergy and Immunology, 3624 Market Street, Philadelphia, Pennsylvania 19104. Telephone 215-346-9466.

Significance of Certification

A certified specialist in Allergy and Immunology is a physician who has fulfilled the requirements of and has received certification as a Diplomate of the American Board of Internal Medicine (ABIM) or the American Board of Pediatrics (ABP) followed by additional certification by the American Board of Allergy and Immunology, a Conjoint Board of the American Board of Internal Medicine and the American Board of Pediatrics (ABAI). (NOTE: For the period 1971 through July 1, 1978, physicians could qualify for admission to examination for certification by the ABAI without prior certification by ABIM or ABP under a ten-year practice credential.) Diplomates of the ABAI have detailed knowledge of the underlying pathophysiology and the method of diagnosis, treatment and prevention of allergic diseases such as allergic rhinitis, asthma, urticaria, anaphylaxis, hypersensitivity pneumonitis, anergic and contact dermatitis and allergic gastrointestinal disorders as well as comparable clinical problems without an apparent allergic etiology or component such as vasomotor rhinitis, idiopathic or intrinsic asthma and idiopathic and/or hereditary forms of urticaria and/or angioedema. Expertise in the management of pulmonary complications of these diseases is a further prerequisite.

In addition, Diplomates of the ABAI possess breadth and depth in the understanding of immunochemistry, immunohistochemistry and applied pharmacology and experience in the application of this knowledge to the diagnosis, management and prevention of immunologic diseases, such as inborn or acquired defects of host resistance, autoimmune diseases, bone marrow and solid organ transplantation, adverse drug reactions, and other conditions associated with an abnormality of the immune system. Because allergy and clinical immunology is an evolving and expanding area of medicine, Diplomates may vary in their detailed knowledge of some of the aspects of allergy/immunology as defined above. Diplomates have demonstrated to the satisfaction of their peers that they possess the general qualifications specified. (Adopted 7/18/75; Reaffirmed 12/2/84; 7/26/88)

Certification Process

The ABAI is interested in candidates who have embarked voluntarily on a graduate program of study, with the express purpose of excelling in the practice of the specialty of allergy/immunology. In outlining its requirements, the ABAI hopes to help the candidates select superior educational programs that will develop his/her competency in allergy/immunology. The ABAI believes that all allergists and immunologists should have a fundamental knowledge of the biological science basic to this discipline. Such knowledge is essential to the continued professional progress of any qualified allergist and immunologist. The ABAI anticipates that adequate knowledge in basic science, as applied to this discipline, will be acquired by the candidates during a post-medical school training program. The ABAI wishes to emphasize that time and training are but a means to the end of acquiring a broad knowledge of allergy/immunology.

The candidate must demonstrate his/her competency to the ABAI in order to justify certification in this discipline. The responsibility of acquiring the knowledge resides with the candidate. The ABAI is responsible for the establishment and maintenance of the standards of knowledge required for certification. Each candidate for certification must satisfy the general and professional qualifications listed below.

The candidate must qualify for examination by having passed the certification examination of the American Board of Internal Medicine or the American Board of Pediatrics, which requires three years of postgraduate general training in programs accredited by the Accreditation Council for Graduate Medical Education (ACGME), and by presentation of evidence, acceptable to the Board of Directors, of the at least two years of full-time residency/fellowship in programs accredited by the ACGME or other acceptable training in allergy/immunology programs. These programs are listed in the Directory of Graduate Medical Education Programs, published by the American Medical Association.

Conjoint Committees - The nature of a Conjoint Board requires involvement of the sponsoring primary boards through understanding, evaluation, trust and input into critical areas of decision making. With these concepts in mind, the ABAI has formed two advisory committees with representation by the ABAI, the ABIM, and the ABP. The Conjoint Credentials Committee will review and recommend the credentials of candidates for the certification examination to the Board for its determination. The Conjoint Standards Committee will review and recommend the passing grade for the certification and recertification examination to the Board for its determination.

Program Directors' Evaluation and Substantiation of Competence in Allergy and Immunology - All candidates will be required to have documentation from ACGME-accredited training program directors to
Allergy and Immunology

support the chronological training and the quality of health care they deliver. In compliance with the ACGME Special Requirements for Residency Training in Allergy and Immunology, a semiannual record should be maintained with copies to the ABAI for tracking purposes. The Evaluation Form together with the Explanation of Ratings Scale may be obtained from the ABAI. The program directors are further required to submit a Letter of Recommendation to summarize the resident’s clinical experience, competency, and readiness to sit for the certification examination.

Substantiation Form/Recommendation Letter - Upon the written release by the candidate, Chiefs of Medicine, Chiefs of Pediatrics, ACGME-accredited Training Program Directors in Allergy and Immunology, ABAI Diplomates in the geographical area, Chiefs of hospitals in the community, and officer of state or regional society will be asked to verify the medical, ethical, and moral standing together with the clinical competence of the candidate as a specialist in allergy/immunology to further support entry to the certification process. Candidates beyond two years of their training or who plan to retake the examination will be required to provide such bona fide documentation, including an appointment in good standing on a hospital staff.

The ABAI no longer issues statements of or implying “Board Eligibility” for any reason. This policy has been recommended by the American Board of Medical Specialties (ABMS). Medical specialty certification is a process of advancement through several individual steps including examination. Having completed one step, such as the minimal educational requirements, should not imply that a candidate is now possessed of some special qualification which is more or less equivalent to certification. Upon written request the ABAI will reveal progress toward certification of registered candidates. Otherwise, the Board will verify only whether a physician is or is not certified and recertified.

The act of filing an application is the candidate's responsibility. The examination is an eight-hour cognitive, proctored examination which will be administered simultaneously in at least two U.S. locations in alternate years. The times and places are determined by the Board and announced in the appropriate specialty journals. Annual of Allergy, the Annals of Internal Medicine, Immunology and Allergy Practice, Journal of Allergy and Clinical Immunology, Journal of Clinical Immunology, Journal of Immunology, Pediatrics, etc.

The candidate should be prepared for examination in the anatomy, pathology, physiology, immunology, and biochemistry of allergic and immunologic disease and should be proficient in clinical diagnosis, including laboratory procedures, and in the treatment of allergic and immunologic diseases in children and adults. In addition to a familiarity with atopic diseases, such as hay fever, asthma, eczema, and urticaria, the candidate will be expected to have a good understanding of other clinical series in which hypersensitivity or immune dysfunction plays a major or contributory role, such as autoimmune diseases, transplantation immunity, connective tissue or rheumatic disease, and those infective and parasitic diseases characterized by hypersensitivity reactions. The candidate should be familiar with the physiology of organ systems involved in allergic diseases, most particularly the lungs, especially as modified by asthma, emphysema, chronic bronchitis and other pathological states related to or confused with immunologic reactions in this organ. He/she should be thoroughly familiar with the benefits and dangers of drugs used in the management of allergy and immunological diseases in general and asthma in particular. The candidate should be competent in recognition of many non-allergic states that resemble allergy, including such clinical entities as physical allergies, autonomic dysfunctions, and psychogenic factors in allergic disease. Evidence of knowledge of current research in the field of hypersensitivity will be tested by questions concerning, but not limited to lymphocytes, monocytes/macrophages, mast cells/basophils, eosinophils, neutrophils as well as the structure and function of all cell types involved in the immune response. Knowledge of the various arguments, both pro and con, on controversial subjects such as gastrointestinal allergy, allergy to foods and allergy to bacteria will be required. Also the candidate will be expected to be familiar with the difficulties inherent in clinical investigation, as well as the reliability and limitations of data obtained by various methodologies.

Time-Limited Certificates and Recertification Process

Beginning with 1989, new Diplomates receive certificates valid for ten years. Diplomates certified prior to 1989 are not affected by this policy change. However, all Diplomates, especially those involved in training programs, are strongly encouraged to recertify as often as possible, but at a minimum of every ten years. It is Board policy that each Diplomate receive only one certificate; duplicates will not be available.

Certificates issued by the ABAI shall be subject to revocation under specific circumstances, including but not limited to larceny, fraud, violation of law or order, suspension or revocation by any governmental body, professional incompetence, professional misconduct, unethical conduct or harmful, deceptive, or fraudulent advertising.

Since 1977, the ABAI has offered its Diplomates a voluntary recertification examination. Diplomates may wish to accept this challenge by sitting for the recertification examination. The examination focuses upon testing areas of clinical competence. Recertification is urged at a minimum every six years in order to encourage continued medical education and to maintain competence in this specialty. It is fully recognized by the ABAI that the evaluation of continued clinical competence is a difficult and complex task within the confines of available methods. The primary objective recertification is to evaluate the effectiveness of each Diplomate's own efforts in continuing medical education. The emphasis will remain on continuing scholarship rather than competence.

Special/Added Qualification in Diagnostic Laboratory Immunology

In 1983 the ABMS approved Certification of Special Qualification in Diagnostic Laboratory Immunology (DLI). The examination is offered to Diplomates of the ABAI, ABIM, and ABP periodically. Such recognition will be made to those specialists involved in the teaching, research, or practice setting in which the diagnostic immunology laboratory is of central importance. Through 1990, the examination will be administered to those ABAI, ABIM, or ABP Diplomates, who have had significant experience (at least four years) in comprehensive DLI, at least one year's training in DLI, have made significant contributions to DLI in practice, teaching and/or research, and who are recognized by their peers as competent in DLI.

After 1990, the examination will be administered to those ABAI diplomates with one year of DLI training in programs accredited by the Accreditation Council for Graduate Medical Education. For those ABIM and ABP diplomates without DLI training, it is suggested that they contact directly the ABIM or ABP for further instructions.

Topics to be covered include, but are not limited to, the theoretical and practical aspects of all current methods 1) for the qualification of immunoglobulins, 2) for complement and component determinations, 3) for detecting autoantibodies and evaluating immunohistochemistry, 4) used in immunocytology, including rapid diagnosis of infectious diseases, 5) of tissue typing, 6) used in assay of immune complexes, 7) used in the evaluation of phagocytic cell function, 8) of studying lymphocyte phenotypes and function, 9) for detecting and quantifying tumor antigens, and 10) for molecular analysis and characterization of genetic systems relevant to immunologic diseases. In addition, principles of quality control, laboratory management and interaction with regulatory agencies will be covered. Announcements will appear in the appropriate subspecialty journals.
CERTIFICATION REQUIREMENTS

Special Pathways for Dual Certification

Special pathways exist for individuals wishing to qualify for dual certification in either:
1) allergy/immunology and PEDIATRIC PULMONOLOGY; or
2) allergy/immunology and ADULT RHEUMATOLOGY.

A dual certification pathway does not exist between allergy/immunology and ADULT PULMONOLOGY nor does it exist between allergy/immunology and PEDIATRIC RHEUMATOLOGY. Additional information regarding special pathways is available upon request from the ABAI.

Hartford, Connecticut 06103-1721

(EDITOR’S NOTE: These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Anesthesiology to ascertain whether the information they have is current.)

Primary Certification in Anesthesiology Certification Requirements

To be certified as a Diplomate of the American Board of Anesthesiology, each applicant must:
A. Hold a permanent and unrestricted license to practice medicine or osteopathy in one state of the United States or in Canada whose registration currently is unexpired.
B. Fulfill all the requirements of the four-year Continuum of Education in Anesthesiology.
C. Have on file with the American Board of Anesthesiology a satisfactory Certificate of Competence covering the final six-month period of clinical anesthesia training in each anesthesia residency program.
D. Satisfy all examination requirements of the Board.

Persons certified by this Board are designated as Diplomates in The American Medical Directory and publications of the American Board of Medical Specialties and the American Society of Anesthesiologists.

The Continuum of Education in Anesthesiology

The Continuum of Education in Anesthesiology consists of four years of training subsequent to the date that the medical or osteopathic degree has been conferred. It includes 12 months of nonanesthesia clinical training (clinical base year) and 36 months of graded and increasingly complex clinical training in anesthesia (CA-1, CA-2 and CA-3 years).

The time during the Continuum at which the resident receives training in either clinical base or clinical anesthesia will be decided by the director of the anesthesia training program following consultation with the individual resident. The program director is encouraged to plan that at least a portion of the clinical base occurs early in the Continuum.

A. The clinical base year must be devoted to clinical training other than clinical anesthesia. Acceptable training for the 12 months of clinical base shall include training in a transitional year, internal medicine, pediatrics, surgery, or any of the surgical specialties, obstetrics and gynecology, neurology, family practice or any combination of these as approved for the individual resident by the director of his or her training program in anesthesiology.

The clinical base year must be spent in programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) or, in Canada, in an institution approved by the Royal College of Physicians and Surgeons. It may also be spent in programs accredited by the American Osteopathic Association.

B. The three-year clinical anesthesia curriculum (CA-1-3) consists of experience in basic anesthesiology training, subspecialty anesthesia training and advanced anesthesia training. It is a graded curriculum of increasing difficulty and learning that is progressively more challenging to the resident’s intellect and technical skills.

1. Experience in basic anesthesia training is intended to emphasize basic and fundamental aspects of the management of anesthesia. It is recommended that at least 12 months of the CA-1 and CA-2 years be spent in basic anesthesia training with a majority of this time occurring during the CA-1 year.

2. Subspecialty anesthesia training experiences are required in order to emphasize the theoretical background, subject matter and practice of the subspecialties of anesthesiology. These subspecialties include obstetric anesthesia, pediatric anesthesia, cardiovascular anesthesia, neuroanesthesia, anesthesia for outpatient surgery, recovery room care, regional anesthesiology and pain management. It is recommended that these experiences be in the form of subspecialty rotations, and that they occupy 7-12 months of the CA-1 and CA-2 years. The sequencing of these rotations in the CA-1 and CA-2 years is optional and is left to the discretion of the program director.

In addition to the above requirements for subspecialty experiences, two months of training in the subspecialty of critical care medicine are required at some time during the clinical anesthesia years. An acceptable critical care rotation should include active participation in patient care by anesthesia residents, active involvement by anesthesia faculty experienced in the practice and teaching of critical care, and an appropriate population of critically ill patients which includes a substantial number with multi-system disease whose care requires invasive monitoring or mechanical ventilation. Experience in routine, short-term or overnight post-anesthesia units or intermediate, step-down units or emergency rooms does not fulfill this requirement.

3. Experience in advanced anesthesia training constitutes the CA-3 year. Clinical rotations in fulfillment of the CA-3 year must follow completion of the CA-1-2 years. The resident and program director in collaboration will select one of the three tracks designated as the advanced clinical track, subspecialty clinical track or clinical scientist track. Regardless of the track selected, resident assignments in the CA-3 year should include the more difficult or complex anesthetic procedures and care of the most seriously ill patients.

Residents in the advanced clinical track are required to complete a minimum of six months of experience in advanced and complex clinical anesthesia assignments. The remaining six months may be spent in one to three selected subspecialty rotations or, alternatively, additional complex clinical anesthesia assignments may be selected.

Residents in the subspecialty clinical track may complete 9-12 months experience in one subspecialty rotation along with up to three months of advanced experience in complex clinical anesthesia assign-
Anesthesiology

ments. Alternatively, six months' experience in each of two subspecialty rotations may be selected. Such rotations may include some time assigned to medical or surgical activities directly related to the anesthetic subspecialty.

Residents in the clinical scientist track must complete six months of advanced experience in complex clinical anesthesia assignments or in one selected anesthesia subspecialty rotation. The remaining block of six months or more of training will be devoted to laboratory or clinical investigation. At least twelve months of clinical anesthesia training must be completed before the resident begins a block of six months or more of research training.

4. The ABA acknowledges the potential value of prior nonanesthesia medical or research training. At the discretion of the anesthesiology program director up to six months of credit toward the CA-3 year requirement may be requested for training which has concluded with the awarding of Board certification in a specialty recognized by the American Board of Medical Specialties (ABMS) or the Ph.D. degree in an appropriate discipline of relevance to anesthesiology. Requests for approval of CA-3 year credit for such nonanesthesia training will be considered on an individual basis by the Credentials Committee of the ABA.

Requests based on Board certification in a specialty recognized by ABMS will be considered following receipt of the current anesthesiology program director's written recommendation that a specific number of months of credit be granted and acceptable documentation of currently unexpired Board certification.

Individuals who request CA-3 year credit on the basis of the Ph.D. degree and who begin the second year of the Continuum of Education in Anesthesiology after April 30, 1991, should have been awarded the Ph.D. degree by a school approved by the ICMCE or a component of the Council on Post Secondary Accreditation within eight years of the date they begin the second year of the Continuum of Education in Anesthesiology. Such requests will be considered following receipt of acceptable documentation of the Ph.D. degree and its discipline, evidence of continued scholarship related to the Ph.D. degree, and a letter from the current anesthesiology program director attesting to the resident's commitment to a career in academic medicine and recommending that a specific number of months of credit be granted.

The Credentials Committee also will continue to consider on an individual basis requests for up to six months of CA-3 year credit for residents who have been awarded the Ph.D. degree and do not meet the above guidelines.

The maximum amount of credit granted toward the CA-3 year for nonanesthesia training occurring prior to the CA-1 year or during the CA-3 year is six months. Residents seeking such credit will be required to pursue either the advanced clinical track or the subspecialty clinical track, but not the clinical scientist track, for the remaining portion of the CA-3 year. Thus, every resident must complete at least 30 months of clinical training involving increasingly complex anesthesia assignments.

C. Credit toward the CA 1–3 year requirements is granted by the ABA for clinical anesthesia training which satisfies all of the following conditions:

1. The training is spent in or under the sponsorship of at most two ACGME-accredited anesthesia residency programs.

2. The period of clinical anesthesia training in or under the sponsorship of any single program is at least six months. When the Continuum of Education in Anesthesiology specifies that the duration of a specific component exceeds six months, at least this length of time is spent on that component in one program.

3. The final six-month period of training in each program ends with receipt of a satisfactory Certificate of Clinical Competence. The final Certificate of Clinical Competence must cover a six month period of clinical anesthesia training if the penultimate period of training in the program ended with an unsatisfactory certificate. When the final period of training in any program ends with receipt of an unsatisfactory certificate, credit is granted for clinical anesthesia training in that program only to the date of the most recent satisfactory certificate received by the resident from that program.

4. No more than six months during the first two clinical anesthesia years, and a maximum of 12 months during the three years of clinical anesthesia training, are spent training outside the parent programs in affiliated or non-affiliated institutions.

D. Requests for prospective approval of planned anesthesia training which will not meet one or more of the conditions specified above, or will be spent in non-affiliated institutions whether or not they are accredited by ACGME, will be considered by the Credentials Committee on an individual basis.

Each request must include a chronological description of the planned training rotations and a letter of support from the director of the parent program. The resident must remain on the roster of the parent program during those months spent training in affiliated or non-affiliated institutions.

Credit toward training requirements other than those described above may be recommended prospectively to the Board by the Credentials Committee when it has determined that exceptional educational or other experience warrants such judgment.

Principal Objectives

The anesthesiology examination system of the American Board of Anesthesiology is designed to identify those candidates who possess the knowledge, judgment, communicative skills and decision-making abilities that are considered essential for the Diplomate to function as a consultant in anesthesiology and as the leader of the anesthesia care team. The critical care medicine examination system is designed to identify those Diplomates who have obtained special qualifications in critical care medicine through additional training and experience.

The written examination analyzes primarily the cognitive and deductive skills of the candidates. It is necessary for candidates to pass the written examination to qualify for the oral examination.

The oral examination is designed to measure those components of the candidate's competence that cannot be evaluated by written examinations or other instruments. Specifically, it is designed to measure not only how and what candidates do to reach their conclusions concerning diagnosis and therapy, but why the formulations are made in the particular way or sequence. Further, it analyzes whether candidates can recognize and treat the complications of anesthesiology practice. The principal thrust is to determine that candidates can synthesize their knowledge, judgment and analytical skills so as to reach rational diagnoses, prevention and treatment protocols, and to establish that candidates can communicate this information effectively to others.

The Board acts to maintain the integrity of its examination and certification process and to ensure the equitable and objective administration of its examinations to all candidates. Information about behavior which the Board considers a violation of the integrity of its examination and certification process is sent to all candidates scheduled for examination. Statistical analyses may be conducted to verify observations and reports of suspected irregularities in the conduct of an examination. The examination of a candidate whose conduct, in the Board's judgment, violates or attempts to violate the integrity of its examination and certification process will be invalidated and no results will be reported. Furthermore, the candidate will be subject to punitive action as determined by the Board. In that event the candidate would be informed of the reasons for the Board's actions and could request an opportunity to present information deemed relevant to the issue and to petition the Board to reconsider its decision.
CERTIFICATION REQUIREMENTS 625

Anesthesiology

Application Form

Application for admission to the examination system of the American Board of Anesthesiology must be made to the Secretary upon a form prescribed by the Board. Photocopies or facsimiles of the application form are not acceptable.

Proper forms for making application and other information may be obtained by writing to the Secretary, The American Board of Anesthesiology, 30 Constitution Plaza, Hartford, Connecticut 06103. An applicant must request an application form by writing to the Board. Telephone requests are not acceptable.

Applicant Declaration and Consent

The application form includes the following statement which the applicant shall be required to sign:

"I hereby make application to The American Board of Anesthesiology, Inc. for the issuance to me of a Certificate, and for examination relative thereto, all in accordance with and subject to its rules and regulations, and the fee requested. I agree to disqualification from examination or from the issuance of a Certificate or to forfeiture and recovery of such Certification in the event that any of the statements heretofore made by me are false or in the event that any of the rules governing such examinations are violated by me or in the event that I did not comply with or shall violate any of the provisions of the Certificate of Incorporation or By-Laws of The American Board of Anesthesiology, Inc., or both, as then constituted. I understand that The American Board of Anesthesiology, Inc. may report my status in the examination system, including the result of any written or oral examination, to the Director of the program in which I completed my training in clinical anesthesiology either routinely or upon the request of such program director, use any score in psychometric analyses to confirm observations and reports of suspected irregularities in the conduct of an examination, and respond to any inquiry about my status in its examination system in accordance with its policies as then constituted. I authorize any and all repositories to grant access to or to produce copies for The American Board of Anesthesiology, Inc. of all documents and records containing information and data pertaining to my practice of the medical specialty of anesthesiology which includes and its subspecialties. I understand that such information and data will be used exclusively to study and assess the certification processes of The American Board of Anesthesiology, Inc. More particularly, such information as it pertains to me shall be held in confidence and shall be reported or released only as a part of the aggregate of such information gathered and studied without specific reference to myself or any other individuals. Such information and data will not be kept in any way whatsoever upon the decision of The American Board of Anesthesiology, Inc. whether or not to grant me a certificate. I agree to hold The American Board of Anesthesiology, Inc., its members, examiners, officers, and agents free from any damage or complaint by reason of any action they, or any of them, take in connection with this application, such examination, the grade or grades given with respect to any examination, the failure of said Board or Corporation to issue to me such certification, the gathering and collecting of information and data about my practice of anesthesiology, or the use of such information or data in studies of the certification processes of The American Board of Anesthesiology, Inc. as described above."

The application form also includes the following consent which the applicant shall be required to sign.

"If, the undersigned, in connection with my application for certification by The American Board of Anesthesiology, Inc., hereby authorize the American Board of Anesthesiology, Inc., to request, procure and review any information regarding my medical practice, professional standing and character, including any information related to any disciplinary action related to the practice of medicine by any state licensing agency or any institution in which I have practiced medicine and any information related to any history of substance abuse or chemical dependency and any treatment or rehabilitation related thereto."

"I hereby authorize The American Board of Anesthesiology, Inc. to request and procure such information from any individual or institution, each of which shall be absolutely immune from civil liability arising from any act, communication, report, recommendation or disclosure of any such information even where the information involved would otherwise be deemed privileged so long as any such act, communication, report, recommendation or disclosure is performed or made in good faith and without malice."

"I hereby authorize The American Board of Anesthesiology, Inc. to supply a copy of this consent, which has been executed by me, to any individual or institution from which it requests information relating to me."

Entrance Requirements

To enter the examination system of the American Board of Anesthesiology the applicant shall:

A. Have graduated from a medical school approved by the Liaison Committee for Medical Education, or have met medical educational requirements otherwise acceptable to the American Board of Anesthesiology.

B. Provide evidence satisfactory to the Board of having been awarded a medical or osteopathic degree acceptable to the Board.

C. Provide evidence acceptable to the Board of having a permanent and unrestricted license to practice medicine or osteopathy in one state of the United States or in Canada whose registration currently is unexpired.

Residents in training may submit evidence with their application of having qualified on examinations that provide eligibility for medical licensure (e.g., NBME Part III or FLEX I and II). Residents who do so must have evidence of permanent and unrestricted medical licensure on file in the ABA office by November 30 of the year for which written examination application was made.

D. Have on file in the Board office evidence of having satisfactorily fulfilled all requirements of the four-year Continuum of Education in Anesthesiology before the date of examination and after receiving a medical or osteopathic degree. Such evidence must include a satisfactory Certificate of Clinical Competence covering the final six months of clinical anesthesia training in each residency program (see paragraph C in the Continuum of Education in Anesthesiology and Certificate of Clinical Competence sections). A grace period will be permitted so that applicants completing this requirement by August 31 may apply for the immediately preceding July written examination.

E. Have on file with the Board evaluations of various aspects of his or her current practice of anesthesiology, as solicited by the Board in determining the applicant's qualifications for admission to the examination system. Such evaluations may be requested from the residency program director and others familiar with the applicant's current practice of anesthesiology: The Clinical Competence Committee Report from the department and the evaluation of the program director and others will be used as the basis for assessing admission qualifications. The response of the program director will be given considerable weight in these deliberations.

F. Submit proof with the application of having reestablished his or her qualifications for admission to the examination system only if residency training was completed more than 12 years before the date of application or a second or subsequent application has been declared void. Acceptable proof is documentation of having qualified on an entry examination designated by the Board or of having completed a 12 month term of additional clinical training in anesthesiology in an ACGME
Anesthesiology

accredited program with receipt of a satisfactory Certificate of Clinical Competence covering the final six months.

The Board has designated the examination administered annually by the Joint Council on In-Training Examinations as the entry examination. Information about the entry examination and a registration form may be obtained by writing the Joint Council of the American Society of Anesthesiologists.

The Board shall determine that entry into the examination system is merited when a judgment of adequate levels of scholarship and clinical competence can be made from the information submitted.

Certificate of Clinical Competence

The Board requires every residency training program to file, on forms provided by the Board, an Evaluation of Clinical Competence in January and July on behalf of each resident who has spent any portion of the prior six months in clinical anesthesia training in or under the sponsorship of the residency program and its affiliates. Entry into the examination system is contingent upon the applicant having a Certificate of Clinical Competence on file with the Board attesting to satisfactory clinical competence during the final period of clinical anesthesia training in or under the sponsorship of each program. The Board, therefore, will deny entry into the examination system until this requirement is fulfilled.

Absence from Training

The total of any and all absences during clinical anesthesia training may not exceed the equivalent of twenty working days per year. Attendance at scientific meetings, not to exceed five working days per year, shall be considered a part of the training program. Duration of absence during the clinical base year may conform to the policy of the institution and department in which that portion of the training is served. Absences in excess of those specified will require lengthening of the total training time to the extent of the additional absence.

Admission to the Examination

An applicant who is admissible to the examination system will be so notified by the American Board of Anesthesiology after approval of all credentials. The Board, as a committee of the whole, reserves the right to reject an applicant for any reason deemed appropriate. The Board reserves the right to correct clerical errors affecting its decisions.

The Board office is not responsible for breaks in communication with candidates that are due to circumstances beyond its control. Candidates are advised to send the Board written notice of an address change immediately so that the Board's examination notices will not go astray and to call the Board office if they do not receive an examination notice they are expecting within the time frame described. The candidate’s social security number is used by the Board for identification purposes and should be included on all correspondence with the Board.

The Board sends notification of an examination and a reply form to every candidate eligible to appear for the examination approximately four months prior to the examination date. The notification is sent to candidates at their address of record on file in the Board office.

Candidates are required to respond to every written and oral examination notice by the response date established by the ABA, whether or not they accept the examination opportunity. Every reply to an examination notice will be acknowledged within two weeks of its receipt in the Board office.

Under certain circumstances the ABA, entirely at its discretion, may grant a candidate's request for an excused absence from any scheduled examination without forfeiture of the opportunity. Such a request must be filed in writing, include the candidate's reason, and arrive in the ABA office by the response deadline specified in the examination notice or, for scheduled candidates, by the examination date. A candidate may be excused from examination if it is determined the reason warrants such a decision and there is sufficient time remaining in the application period to provide the number of examination opportunities the candidate is permitted. Candidates excused from an examination are required to appear at the next examination for which they are eligible.

1. Written Examination. Written examinations are held annually in locations throughout the United States and Canada on a Saturday in July. Written examinations cover the basic and applied aspects of physiological, physical and clinical sciences. A passing grade, as determined by the Board, is required.

2. Oral Examination. Candidates who complete the written examination successfully must wait at least six months before being declared eligible for oral examination. Oral examinations are conducted in the spring and fall of each year at a single location in the United States. Examiners consist of Directors of the Board and others who assist as associate examiners. Oral examinations evaluate all phases of anesthesia, but emphasize clinical practice. A passing grade, as determined by the Board, is required.

It is an ABA regulation that candidates not be scheduled to appear at consecutive oral examinations. Therefore, candidates who do not pass an oral examination for which they are scheduled, for whatever reason, will not be eligible to appear at the next regularly scheduled oral examination.

The Board reserves the right to limit the number of candidates to be admitted to any examination. Places in the oral examination schedule are limited and assigned in the sequence acceptances are received. Candidates who are not given an examination appointment, whether or not they accepted the examination opportunity, are required to appear at the next examination for which they are eligible.

Fees

The application fee for primary certification in anesthesiology is $850.00. It must accompany the application. The completed application and required documentation must arrive in the office of the American Board of Anesthesiology on or before January 10 of the year in which the written examination is to be administered. For completed applications received between January 11 and November 20 of the previous year, the application fee is $800.00—a reduction of $50.00 for early filing. The January 10 deadline is absolute and no applications will be accepted after that date for any reason.

The reexamination fee is $200.00 for the anesthesiology written examination and $300.00 for the oral examination. The reexamination fee will be charged candidates whether they have failed a previous examination, canceled a scheduled appointment for examination or failed to appear for any examination for which they were properly scheduled. A charge of $50.00 will be made whenever a check in payment of a fee is returned for nonpayment.

The application fee includes a fee for administrative services. It is $150.00 for applications for primary certification that arrive after November 20 and $100.00 for those received before that date. In the event an application is not accepted, or the application is accepted and subsequently withdrawn by the candidate, the fee for administrative services will be retained and the balance of the application fee will be refunded. No fee will be remitted if the candidate's notice of withdrawal from the examination system is received in the Board office after the deadline by which candidates must notify the Board of their choice of test center for the first written examination for which they are eligible.

The American Board of Anesthesiology is a nonprofit organization. The fees for application and examination are computed on a basis of cost of maintaining the functions of the Board. The Board reserves the right to change the fees when necessary.
Reapplication

The application of a candidate who has failed to satisfy the examination requirements in the prescribed number of opportunities or time for whatever reason shall be declared void. The physician may reapply by submitting a new application. Such application shall be subject to the fees, rules, privileges and requirements that apply at the time of reapplication. The applicant who is adjudged to meet existing requirements will be readmitted into the examination system.

The reapplicant for primary certification who has had a second or subsequent application declared void for any cause or has completed anesthesia residency training more than 12 years before the date of reapplication must reestablish his or her qualifications for admission to the examination system before filing another application. The manner in which this may be done is described in paragraph F of the Entrance Requirements section. In all instances, the candidate must pass both the written and oral examinations under the new application.

Status of Individuals

The ABA reserves to itself exclusively the right to define and confer Board eligible status whenever such status refers to an individual's relationship to the ABA examination and certification system. The ABA shall consider Board eligible status only on physicians who are candidates in its examination system. Thus, applicants become Board eligible only when they are accepted by the American Board of Anesthesiology as candidates for the purpose of examination. Board eligible status is not conferred indefinitely.

Inquiries about the current status of individuals should be addressed to the ABA office which will respond with one of the following statements:

A. The physician is certified by the American Board of Anesthesiology.
B. The physician is certified by the American Board of Anesthesiology with special qualifications in critical care medicine.
C. The physician is certified by the American Board of Anesthesiology and is Board eligible in critical care medicine.
D. The physician is Board eligible in anesthesiology.
E. The physician is neither certified by the American Board of Anesthesiology nor Board eligible.

Equivalence of Royal College Certification

The Fellowship certificate awarded by the Royal College of Physicians and Surgeons of Canada, the College of Anaesthetists of England, the College of Medicine of South Africa, and the Faculty of Anaesthetists of the Royal College of Surgeons of Australasia and of the Royal College of Surgeons in Ireland is considered by this Board to be comparable to certification by the American Board of Anesthesiology. Nevertheless, there are fellowship certificate holders who continue to seek entrance into the ABA examination and certification system. For those physicians who have such interest, the requirement of a clinical base year and of two of the three years of clinical anesthesia training in a program accredited by ACGME is waived. Holders of the fellowship certificate who wish to enter the American Board of Anesthesiology examination system may fulfill the training requirement by satisfactorily completing one year of clinical training in anesthesiology in an ACGME-accredited program. The content of this year must be approved prospectively by the Credentials Committee of the ABA.

Chemical Dependency

Qualified applicants who have had a history of chemical dependency as reported to the Board and who submit documentation acceptable to the Board that their disease currently is known to be under control will be admitted into the examination system and to examination.

Anesthesiology

Candidates already in the examination system who have had a history of chemical dependency as reported to the Board and who submit documentation acceptable to the Board that their disease currently is known to be under control will be admitted to examination.

Candidates who have a current problem of chemical dependency or who are still in active treatment for a problem of chemical dependency as reported to the Board will not be admitted to examination. Denial of admission to examination may result in the loss of opportunities to take an examination and, ultimately, in the Board's decision to declare the candidate's application void for failure to successfully complete the requirements for certification within the time allotted to every candidate.

Candidates who have had a history of chemical dependency as reported to the Board will not be issued a certificate upon completion of all requirements for certification unless they submit documentation acceptable to the Board that their disease is known to be under control for five years from the date of the most recent occurrence of their disease.

Revocation of Certificate

A certificate is issued by the Board with the understanding that it remains the property of the Board during the life of the Diplomate. Any certificate issued by the Board shall be subject to revocation in the event that:

A. The issuance of such certificate or its receipt by the person so certified shall have been contrary to, or in violation of, any provision of the Certificate of Incorporation of this Board or its By-Laws; or
B. The person certified shall not have been eligible to receive such certificate whether or not the facts making him or her ineligible were known to, or could have been ascertained by, the Board or any of the Directors at the time of issuance of such certificate; or
C. The person certified shall have made any misstatement of fact in his or her application for such certificate or in any other statement or representation to the Board or its representatives; or
D. The person certified shall fail to maintain a moral, ethical and professional standing satisfactory to the Board.

The Board shall be the sole judge of whether or not the evidence or information before it is sufficient to require or permit revocation of any certificate issued by the Board, and the decision of the Board shall be final.

Recertification

Insufficient confidence in currently available methods of assessing continuing competence of the practicing anesthesiologist makes it inappropriate to implement a recertification program as yet. The American Board of Anesthesiology will continue to study all options for a meaningful recertification program but intends to expend its major effort and resources toward improvement of the process leading to primary certification.

The ABA policy regarding recertification is not affected by the announcement of its intention to develop a voluntary mechanism for Continued Demonstration of Qualifications (CDQ). The CDQ process will allow ABA diplomates to demonstrate current knowledge and quality of practice for credentialing where state, local or federal legislation mandates.

Important Deadlines and Test Dates

For 1991 Anesthesiology Examinations:
- January 10 — Receipt of completed applications for the July 1991 written examination.
- January 31 — Receipt of response to spring oral examination notice.
- April 22—26 — Spring oral examinations in Coronado, California.
Colon and Rectal Surgery

May 1 — Receipt of response to written examination notice.
May 31 — Receipt of validation forms for the 1991 Fall oral examination.
July 13 — Written examination.
July 31 — Receipt of response to fall oral examination notice.
October 7–11 — Fall oral examinations in Tarpon Springs, Florida.
November 20 — Receipt of completed applications for the July 1992 written examination with reduced fee for early filing.
November 30 — Receipt of validation forms for the 1992 spring oral examination.

Critical Care Medicine Examination:
April 30 — Application deadline for 1991 examination.
September 27 — Written CCM examination in Chicago, Illinois.

Annually for training Program Directors:
January 31 — Receipt of Clinical Competence Reports (green forms) for anesthesia residents and CCM trainees covering period of July 1–December 31.
July 31 — Receipt of Clinical Competence Reports (green forms) for anesthesia residents and CCM trainees (blue forms) covering period of January 1–June 30. Data Forms (white) for anesthesia residents and CCM trainees, and Annual Training Reports (pink) for anesthesia residents.
August 31 — Receipt of Clinical Competence Reports (green forms) for residents completing their Clinical Anesthesia training between July 1 and August 31.

AMERICAN BOARD OF COLON AND RECTAL SURGERY

Ira J. Kodner, MD, President, St. Louis, Missouri
Victor W. Fazio, MD, Vice President, Cleveland, Ohio
H. Randolph Bailey, MD, Houston, Texas
Robert W. Beart, Jr., MD, Scottsdale, Arizona
Kirby I. Bland, MD, Gainesville, Florida
Marvin L. Corman, MD, Santa Barbara, California
Theodore E. Eisenstat, MD, Plainfield, New Jersey
J. Byron Gathright, Jr., MD, New Orleans, Louisiana
John M. MacKeigan, MD, Grand Rapids, Michigan
David J. Schoetz, Jr., MD, Burlington, Massachusetts
Lee E. Smith, MD, Washington, DC
Herard Abkarian, MD, Secretary-Treasurer/Executive Director

8750 Telegraph Road, Suite #410
Taylor, Michigan 48180

(Editor's Note: These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Colon and Rectal Surgery to ascertain whether the information they have is current.)

General Qualifications and Requirements

All candidates shall comply with the following regulations:
1. A candidate shall appear personally before the Board and shall submit to the required examinations.
2. A candidate shall limit the majority of his practice to colon and rectal surgery.
3. A candidate may be required to deliver to the Board sufficient case reports to demonstrate proficiency in colon and rectal surgery.
4. A bibliography of papers and books published by the candidate shall be submitted to the Board upon its request.

Professional Qualifications

1. A candidate must successfully complete the Qualifying Examination of the American Board of Surgery before being admitted to the American Board of Colon and Rectal Surgery Written Examination (Part I).
2. A candidate must achieve certification by the American Board of Surgery before being admitted to the American Board of Colon and Rectal Surgery Oral Examination (Part II).
3. A candidate must have completed an accredited residency program in colon and rectal surgery.
4. A candidate must have an unrestricted license to practice medicine in the country of his residence.

Application for Examination

Each candidate for examination must complete and submit an Application for Examination which may be obtained from the Secretary of the Board. Applications must be submitted before July 15 of each year.

Within two weeks after conclusion of the training program, the applicant must submit to the Secretary of the Board a prescribed form, listing all operative procedures performed during the training period. This form is available from the Secretary of the Board and must be countersigned by the Program Director when it is submitted.

The application must also be accompanied by two unmounted, recent photographs of the applicant, and the required application fee.

The acceptability of a candidate for examination depends not only upon completion of the requirements listed under “Qualifications of Candidates,” but also upon information available to the Board regarding the candidate’s professional maturity, surgical judgment, and technical competence.

Examinations

To achieve certification by the American Board of Colon and Rectal Surgery, a candidate must pass a Written Examination (Part I) and an Oral Examination (Part II). The written examination is offered in the spring of the year and a candidate is required to pass this examination before being permitted to take the oral examination. The oral examination is given in the fall of the year.

Examinations are conducted at times and places determined by the Board and this information may be obtained from the Board office. It is also published in DISEASES OF THE COLON AND RECTUM and in the Journal of the American Medical Association. Examinations will be held in one designated city in the United States.

Part I — Written Examination

The written examination is an assessment of a candidate’s knowledge of the theory and practice of colon and rectal surgery with separate exams in pathology and radiology. The written portion of the examination is a four-hour test of multiple choice questions covering the spectrum of colon and rectal surgery and the body of basic science pertinent to it. The pathology and radiology portions of the examination each are each one hour in length and consist of questions and slide presentations.

Part II — Oral Examination

The oral examination is conducted by members of the Board or its designated examiners. Its objective is to evaluate the candidate’s clinical experience, problem-solving ability, and surgical judgment, and to ascertain the candidate’s knowledge of current literature on colon and rectal diseases and surgery. Each candidate will undergo at least three 30-minute oral examinations by three 2-member examining teams.

Examination Results

The Board makes every effort to be as prompt as possible in notifying candidates of their examination results and letters of notification may be expected from four to six weeks following the examination.

Re-examinations

A candidate who has failed either the written or oral part of the examination may be re-examined after one year has elapsed.
A candidate who fails to pass either the written or oral portion of the examination may repeat that part of the examination twice, thus offering the candidate three opportunities to pass each part of the examination.

A candidate who fails to pass either the written or oral portion of the examination three times may not repeat the examination without satisfactory completion of an approved colon and rectal residency program and submission of a new application for examination.

Status of Applicant

The Board does not use or sanction the terms “Board eligible” or “Board qualified.” The status of an applicant with the Board is determined by and varies with the current status of his/her credentials.

A candidate must apply to the Board’s certification process within five (5) years after completion of approved colon and rectal training.

The entire certification process must be successfully completed within seven (7) years following approval of the formal application. In addition, a candidate whose application for examination has been approved but who does not take the examination within three (3) years must submit a new application.

In exceptional or unusual circumstances, the Board may, at its discretion, waive one or more of the limitations specified under “Status of Applicant.”

NOTE: Candidates with an approved application in 1988 or before will be permitted to follow the guidelines previously published by this Board, which allowed five (5) years to pass the (Part I) Written Examination and an additional five (5) years to pass the (Part II) Oral Examination.

Fees

Application fees: A non-refundable fee of $250 shall accompany the application.

Written Examination fee (Part I): A fee of $400 is due and payable when the candidate is notified of approval to take the Written Examination.

Oral Examination fee (Part II): A fee of $400 is due and payable when the candidate is notified of approval to take the Oral Examination.

Re-examination fee: Fees for re-examination are the same as shown above for each examination.

Withdrawal from Examination: A candidate who withdraws must notify the Board office at least ten (10) days before a scheduled examination. A candidate who fails to appear for examination or who withdraws without giving at least ten (10) days notice as defined above, will forfeit $100 of the designated examination fee and will have to resubmit the forfeited amount before being admitted to the next scheduled examination.

Fees are subject to change as directed by the Board.

Appeals

Any candidate who is not acceptable to the Board for examination or who has failed an examination, totally or in part, may appeal such a decision by the Board and may, by registered letter to the Secretary of the Board, request a hearing, specifying the reasons thereof. An ad hoc Hearing Committee shall be appointed within thirty days to conduct the hearing.

If the decision of the Hearing Committee is not satisfactory, the candidate, by registered letter to the Secretary of the Board within 21 days after receipt of the notice of an adverse decision, may request an appellate review by the Board.

Certification

A candidate who has met all the requirements and successfully completed the examinations of The American Board of Colon and Rectal Surgery will be issued a Certificate attesting to his qualifications in colon and rectal surgery. The certificate shall be signed by the President or Vice President and the Secretary, and shall bear the corporate seal of the Board.

The Certificate granted by the Board does not confer privilege or license to practice colon and rectal surgery but is evidence that a physician's qualifications for specialty practice are recognized by his peers. It is not intended to define the requirements for membership on hospital staffs, to gain special recognition or privileges for its diplomates, to define the scope of specialty practice, or to state who may or may not engage in the practice of the specialty.

Unless the candidate specifies otherwise, the Board forwards the names of candidates who have achieved certification to the American Board of Medical Specialties for listing in the ABMS COMPRENDIUM OF MEDICAL SPECIALISTS.

Time-Limited Certification

Beginning with those candidates who pass the certifying examination in 1990 and thereafter, the American Board of Colon and Rectal Surgery will issue time-limited certificates. Certificates will be valid for eight (8) years from the date of certification, after which the certificates will no longer be valid.

Recertification

The American Board of Colon and Rectal Surgery offers recertification in the specialty. Certificates can be renewed prior to expiration by fulfilling the requirements for recertification specified by the Board. The recertification examination is offered annually, on a voluntary basis, to all certified colon and rectal surgeons who apply and meet the Board’s requirements. A recertification information booklet, which outlines the requirements and procedures, is available by writing the Board office.

Revocation of Certificates

The filing of an application for examination, participating in examination, and accepting a Certificate are voluntary acts. Therefore, the Board assumes no responsibility for any effect which certification or failure to obtain certification may have on the private or professional activities of candidates.

When an application is submitted, candidates are required to sign an agreement, a portion of which reads as follows: "I agree to disqualification from examination or from the issuance of a certificate of qualification or to forfeiture and redelivery of such certificate of qualification to the Secretary of the Board in the event that any of the statements hereinafter made by me are false or in the event that any of the rules governing such examinations are violated by me."

Certificates which have been issued are subject to the provisions of the Articles of Incorporation, the Constitution and Bylaws of The American Board of Colon and Rectal Surgery, Inc., and may be revoked for violation of any of these provisions.

Upper Darby, Pennsylvania

(Editor's Note: These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Dermatology to ascertain whether the information they have is current.)

Requirements for Eligibility to Take the Examination

Each applicant must satisfy the following requirements before he or she is eligible to take the certifying examination of the Board.

A. General Qualifications

(1) The candidate must have graduated from a medical school in the United States accredited by the Liaison Committee on Medical Education (LCME), an accredited medical school in Canada, an accredited osteopathic school in the United States, or if a graduate of a foreign medical school, the candidate must possess the standard certificate of the Educational Commission for Foreign Medical Graduates (ECFMG).

(2) The candidate must hold a current valid, full and unrestricted license to practice medicine or osteopathy in either the United States or Canada.

B. Residency Training Requirements

(1) Candidates for certification by the American Board of Dermatology are required to have a total of four years of postgraduate training, all of which must be in the United States or Canada as described below in Sections a) and b).

a) The first year must consist of clinical training in one of the following types of broad-based programs in the United States accredited by the Accreditation Council for Graduate Medical Education (ACGME) or a similar program in Canada accredited by the Royal College of Physicians and Surgeons of Canada: transitional year, flexible first postgraduate year, and first year residences in internal medicine, general surgery, family practice, obstetrics and gynecology, or pediatrics.

b) Three years of full-time training as a resident in a dermatology residency training program in the United States accredited by the ACGME or three years of full-time training as a resident in a dermatology residency training program in Canada, accredited by the Royal College of Physicians and Surgeons of Canada. Accreditation of dermatology training programs in the United States is the responsibility of the Residency Review Committee for Dermatology acting with authority delegated to it by the ACGME (accredited dermatology residency training programs and clinical programs for first postgraduate year credit are listed in this Directory).

At least 75% of the resident's time throughout each year of dermatology residency training must be related to the direct care of dermatologic outpatients and inpatients; this includes clinical conferences, directly related to patient care, consultations, and inpatient rounds.

Dermatopathology, microbiology, and other basic science lectures, seminars, and conferences are essential components of the resident's training (see the Special Requirements for Residency Training in Dermatology).

The Board also emphasizes the importance of basic and clinical investigation in the educational experience of trainees. Accordingly, all residents should participate in basic and/or clinical research during their training.

During or following the first year of dermatology training (PGY-2), which must conform to the requirements above (75% of time related to the direct care of patients), the training director may request prospective approval from the American Board of Dermatology for a special final two years for those trainees whose career plans involve a primary commitment to investigative dermatology. For residents entering this track, additional time may be devoted to research training during these years. The training director must provide assurance that clinical competence at a level consonant with the standards of the American Board of Dermatology will be attained by the completion of the training period.

(2) A preliminary Registration Form must be filed by the candidate and signed by his/her training director as soon as the resident begins residency training in dermatology.

(3) It is mandatory that the training director submit a Yearly Report Form for each resident to the Board office by August 1st after completion of the first and second year of training and by May 15th for residents who will complete their third year of training on June 30th. The training director must document whether each year of training was completed in a satisfactory manner.

(4) Training must be completed within five years after the beginning of dermatology residency, except when military service or other compelling circumstances intervene.

Registration for the Examination of the Board

Candidates who have completed the training requirements as outlined above are eligible to apply for examination by the Board. Candidates should request an Application for Certification form from the office of the Executive Director of the Board. The completed application must be filed with the Board office before May 1st of the year in which the candidate plans to take the examination. Physicians who complete their residency training in dermatology by July 1st of a given year are eligible to apply to take the examination in the fall of that year. It is emphasized that it is the candidate's responsibility to send a completed application form to the Board if he or she plans to take the certifying examination of the Board.

In assessing the credentials of candidates who apply for certification by the Board, the Requirements Committee reviews the application, letters of reference, and annual evaluation reports from the candidate's training director.

A candidate is not considered an "active" candidate until his or her application has been received and approved by the Board. After the application is approved, the candidate is required to take the examination within three years. Candidates who do not exercise the examination privilege within three years of the date they are declared eligible will be required to file a new application and have their eligibility for examination reviewed by the Requirements Committee. If the reapplication is approved by the Board, the candidate is again eligible to take the examination for another three-year period.

The Board does not use the term "Board-eligible" in correspondence with directors of hospitals or others who send inquiries to the Board office. On written request by a candidate, the Board will send to the candidate a letter stating his or her status with the Board at any given time; this letter may be used in applying for hospital privileges or for other purposes.

Board Examination

The certifying examination consists of two parts. Part I is a comprehensive written examination. Among the topics included in this part of the examination are the following: clinical dermatology, pediatric dermatology, preventive dermatology, dermatopathology, cutaneous allergy and immunology, dermatologic surgery, cutaneous oncology, sexually transmitted diseases, internal medicine as it pertains to dermatology, pharmacology and cutaneous microbiology as well as anatomy, physiology, biochemistry, radiation physics, radiation therapy, physical therapy,
pharmacology, genetics, and electron microscopy as related to dermatology. Considerable emphasis is placed on comprehensive knowledge of the literature.

Part II of the certifying examination utilizes visual aids and histopathologic sections to assess the candidates' knowledge of the topics listed for the Part I examination but with special emphasis on clinical and laboratory dermatology, dermatologic surgery and microscopic dermatopathology. Examples of the types of projected pictorial material which are used include photographs of patients, diagrams of dermatologic surgical procedures, histopathologic sections, fungal cultures, culture mounts, bacterial cultures, Tzanck preparations, skin scrapings and smears, roentgenograms, photofluorescent microscopic slides, darkfield examinations, parasites affecting the skin, and electron photomicroscopic slides. In microscopic dermatopathology, which accounts for 25% of the Part II examination, the questions relate to histopathologic slides which candidates examine. Candidates are required to furnish microscopes for the dermatopathology section of the Part II examination.

It is necessary for candidates to pass both Part I and Part II of the examination in order to be certified. If a candidate passes one part of the examination and not the other, only the failed portion must be repeated.

The examination is given annually in the fall over a two-day period involving a total of approximately ten hours. In 1991, it will be held on November 3 and 4 at the Holiday Inn O'Hare Airport in Rosemont, Illinois, which is in the O'Hare Airport area of Chicago.

Re-examination

Candidates who fail Part I, Part II or both parts of the certifying examination are eligible to repeat the examination the following year. A candidate who application is approved, has three years of eligibility to take the certifying examination. If the candidate has not passed the examination during this three year period, he or she is eligible to reapply.

It is the responsibility of the candidate to notify the Board of his or her intent to take the re-examination. The request for re-examination and the appropriate fee (see Fees for Examination and Re-examination) must be mailed to the office of the Board no later than May 1st of the year in which the candidate wishes re-examination.

Certification

After meeting the above requirements and passing the examination the candidate will be awarded a certificate which acknowledges that he or she has completed the required course of graduate study and clinical training, has met other specific standards and qualifications, and has passed the examination conducted by the Board. The candidate is then referred to as a diplomate of the American Board of Dermatology, Inc.

The names of diplomates of the Board appear in the ABMS Directory of Certified Diplomates and the ABMS Compendium of Certified Medical Specialists, published by the American Board of Medical Specialists. The names are also submitted to the Directory of Medical Specialists, published by Marquis Who's Who.

Each certificate is subject to revocation in the event that (a) the physician so certified shall not have been eligible to receive such certificate, whether or not the facts concerning his or her ineligibility were known or could have been ascertained by the Directors of the Board at the time of the issuance of the certificate; (b) the physician so certified shall have made any material misrepresentation or omission in the application for such certificate or in any other statement to the Board or its representatives; (c) the physician so certified shall have been convicted by a court of competent jurisdiction of a crime relating to or arising out of the practice of medicine.

Dermatology

Time-Limited Certificates

Beginning with those candidates who pass the certifying examination in 1991 and thereafter, the American Board of Dermatology will issue time-limited certificates. These certificates will remain valid for ten (10) years. The process by which they may be renewed, will be announced at a later date.

Fees for Examination and Re-examination

The Directors of the Board serve without compensation. Fees are based on the actual expenses incurred in office administration and in conducting the examination.

The examination fee for the certifying examination is $850 payable when the application is submitted. The fee for re-examination is $750. All checks are to be made payable to the American Board of Dermatology, Inc.

When a candidate's application for the certifying examination or a special qualification examination is disapproved or when the candidate withdraws, the Board retains an administrative fee of $50.

Publication

The American Board of Dermatology, Inc. publishes a Booklet of Information which may be obtained from the Board office.

All correspondence should be sent to:
Clarence S. Livingood, M.D.

Henry Ford Hospital
Detroit, Michigan 48212

Certification for Special Qualification in Dermatopathology

Special Qualification certification in Dermatopathology is a joint and equal function of The American Board of Dermatology (ABD) and The American Board of Pathology (ABP). Such function will relate to qualifications of candidates, standards of examination, and the form of the certificate.

All candidates applying for examination must hold a current valid, full and unrestricted license to practice medicine or osteopathy in either the United States or Canada.

A. Prerequisites

The American Boards of Dermatology and Pathology will admit candidates to examination for certificates of Special Qualification in Dermatopathology who are otherwise qualified and who have met one of the following requirements:

1. Applicants already holding a primary certificate from the American Board of Dermatology or the American Board of Pathology (anatomic pathology, or anatomic and clinical pathology) and the addition of one year of training in dermatopathology in a program accredited by the ACGME. This additional training shall be taken after the candidate has met the full training requirements for certification in dermatology or pathology. The dermatologist applicant must spend one-half of the required training time in pathology. The pathologist applicant must spend one-half of the required training time in clinical dermatology.

2. Applicants who are diplomates of both The American Board of Dermatology and The American Board of Pathology.

B. Training

Accredited institutional training programs in dermatopathology are an equal and joint function of the Departments of Dermatology and Pathology of that institution. Training programs in dermatopathology...
Emergency Medicine

are reviewed and accredited by the Residency Review Subcommittee for Dermatopathology, which includes three members from the Residency Review Committee for Dermatology and three members from the Residency Review Committee for Pathology acting with authority delegated to it by the Accreditation Council for Graduate Medical Education (ACGME). Information concerning accredited dermatopathology training programs may be found in this Directory.

C. Deadline for Application and Date of Examination

The deadline for receipt of applications to take the examination for Special Qualification in Dermatopathology is July 1st of the year in which the candidate plans to take the examination. In 1991, the examination will be given in Chicago, Illinois on November 1, 1991.

D. Fee

The fee for the examination for Special Qualification in Dermatopathology is $1000, payable when the application is submitted.

COMMITTEE FOR DERMATOPATHOLOGY:

William A. Caro, MD (ABD)
Merle W. Delmer, MD (ABP)
Mark Allen Everett, MD (ABD)
Thomas J. Gill III, MD (ABP)
Loren E. Golitz, MD (ABD)
William H. Hartman, MD (ABP)
M. R. Abell, MD, (Staff, ABP)
Harry J. Hurley, MD (Staff, ABP)

Special Qualification in Dermatological Immunology/Diagnostic and Laboratory Immunology

A. Prerequisite

The requirements for Special Qualification Certification in Dermatological Immunology/Diagnostic and Laboratory Immunology (DI/DLI) are as follows:

1. An applicant must be a diplomate of the American Board of Dermatology.
2. An applicant must:
   a. have satisfactorily completed an accredited one year fellowship or residency in Dermatological Immunology/Diagnostic and Laboratory Immunology, OR
   b. have had four years experience in the practice of dermatological immunopathology under conditions acceptable to the American Board of Dermatology. Candidates following this pathway must submit their application for the examination on or before April 1, 1991 and must have successfully passed the examination prior to December 31, 1991.

B. Training

A minimum of one year of full-time training in an accredited DI/DLI training program will be required of all candidates except those who qualify under paragraph 2b above.

C. Deadline for Application and Date of Examination

The deadline for receipt of applications to take the examination for Special Qualification in DI/DLI is April 1st of the year in which the candidate plans to take the examination. The next examination in DI/DLI will be given in Chicago, Illinois on November 1, 1991.

D. Fee

The fee for the examination for Special Qualification in DI/DLI is $850, payable when the application is submitted.

TEST COMMITTEE FOR DERMATOLOGICAL IMMUNOLOGY/DIAGNOSTIC AND LABORATORY IMMUNOLOGY

(EDITOR'S NOTE: These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Emergency Medicine to ascertain whether the information they have is current.)

Requirements for Certification in Emergency Medicine

An applicant must satisfy all credential requirements at the time the application is submitted. Requirements fulfilled after the date of application will not be considered.

The applicant must have graduated from medical school.
1. Graduates of approved schools of osteopathic medicine in the United States of America are considered when they have satisfactorily met the credential requirements as outlined.
2. An applicant graduating from a medical school other than one in the United States of America, its territories or Canada must provide the Board with a verified and translated diploma.

The applicant must hold a valid and unrestricted license to practice medicine in the United States of America, its territories or Canada, throughout the certification process. All licenses held by the applicant must fulfill this requirement.

The applicant must have successfully completed a total of 36 months of post-medical school training, under the control of an accredited Emergency Medicine residency program. Emergency Medicine programs must be accredited by the Residency Review Committee for Emergency Medicine or the Royal College of Physicians & Surgeons of Canada for Canadian programs.
CERTIFICATION REQUIREMENTS

If the Emergency Medicine residency training program is structured so that it exceeds the length of training specified above, the resident must successfully complete the requirements of his/her residency program to apply under the Emergency Medicine residency category of application.

NOTE: For residents who began their Emergency Medicine training prior to July 1, 1987, the candidate must have successfully completed a total of 36 months of post-medical school training, at least 24 months of which were under the control of an accredited Emergency Medicine residency program at the PGY II level and above.

The applicant must submit 50 hours of continuing medical education in Emergency Medicine annually, acceptable to the Board, starting one year from the date of graduation from the Emergency Medicine residency program and continuing until the date of application. If a resident applies to the Board within one year of graduation no CME is required.

**Special Application**

An applicant who does not meet the requirements for certification as printed but who believes he/she has equivalent experience and/or training may submit an application under the special category.

If you are suggesting or requesting credit for any experience which does not fit within the requirements for certification you must apply under the special application category and provide a detailed description and rationale for your situation/experiences.

This category of application is not intended to bypass the credential requirements but rather, equivalency must be demonstrated.

It is the responsibility of the applicant to provide a sufficient rationale under the special application category. All material submitted in support of a special application must be typewritten.

A special application, by its nature, involves a more lengthy review and a decision may not be rendered prior to the written examination of the year in which the application was submitted.

**Combined Training Programs**

A special agreement exists with the American Board of Pediatrics whereby an applicant may fulfill the training requirements of both Boards by completing joint training in five years. Training programs must be approved prospectively by both Boards. Guidelines for combined training have been approved by both Boards and are available by writing either Board office. Applicants may not appear for the certifying examination until all training has been satisfactorily completed.

A special agreement exists with the American Board of Internal Medicine whereby an applicant may fulfill the training requirements of both Boards by completing joint training in five years. Training programs must be approved prospectively by both Boards. Guidelines for combined training have been approved by both Boards and are available by writing either Board office.

Applicants may not appear for the certifying examination until all training has been satisfactorily completed.

**Applications**

Applications are distributed in the spring of each year (mid-April) and are available from the Board office. Applications are accepted from May 1 through July 15 of each year. A mailing list is maintained throughout the year for requests received during times when applications are not available.

A non-refundable processing fee must accompany the application at the time it is submitted.

Applicants wishing to be considered for examination must submit a fully completed application form to the Board. The Board will not be responsible for any opinion expressed concerning the individual's credentials for the examination unless it is in writing and over the signature of the president or secretary of the Board.

**Examination Information**

The certifying examination in Emergency Medicine is composed of two parts. The first part is a 6.25-hour comprehensive written examination, administered one time each year. It includes multiple choice and pictorial multiple choice items.

The oral certification examination includes seven simulated patient encounters: five single patient encounters and two multiple patient encounters.

A candidate must successfully complete the written examination to be scheduled for the oral examination.

The written examination is offered in the fall of each year and oral examinations are scheduled the following year.

Examination fees are due upon assignment to an exam administration.

**Certification**

All candidates who successfully complete the examination shall be known as diplomates of the American Board of Emergency Medicine and shall receive an appropriate certificate which shall remain the property of the American Board of Emergency Medicine.

Any certificate issued by the Board shall be subject to revocation at any time should the Board determine, in its sole judgment, that a candidate who has received a certificate was in some respect not properly qualified to receive or retain it.

**Recertification**

Certification is for a period of 10 years. ABEM diplomates will have four options for achieving recertification: passing either the written or the oral certification examination or the written or the oral recertification examination. Passing either examination will earn the diplomate an additional ten year certificate.

**AMERICAN BOARD OF FAMILY PRACTICE**

Hannon E. Holverson, MD, President, Emmett, Idaho
Janet P. Realini, MD, Vice President, San Antonio, Texas
Charles W. Smith, Jr., MD, Treasurer, Little Rock, Arkansas
William G. Bernhardt, MD, Midwest City, Oklahoma
Edward T. Bope, MD, Columbus, Ohio
Larr: R. Copeland, MD, Moultrie, Georgia
Kenneth A. Frederick, MD, Cincinnati, Ohio
Norman F. Gant, MD, Dallas, Texas
Norton J. Greenberger, MD, Kansas City, Missouri
John R. Hayes, MD, Indianapolis, Indiana
Joseph E. Johnston, MD, Mount Olive, Mississippi
Arlie Mannersberger, Jr., MD, Augusta, Georgia
James C. Puffer, MD, Los Angeles, California
Howard K. Rabinowitz, MD, Philadelphia, Pennsylvania
George S. Sturitz, MD, Watertown, New York
Paul R. Young, MD, Executive Director
2228 Young Drive
Lexington, Kentucky 40504-4294

(EDITOR'S NOTE: These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Family Practice to ascertain whether the information they have is current.)

**ABFP Official Definition of Family Practice**

"Family Practice is the medical specialty which is concerned with the total health care of the individual and the family. It is the specialty in
Family Practice

broadness which integrates the biological, clinical and behavioral sciences. The scope of Family Practice is not limited by age, sex, organ system or disease entity.

The Certification Process

The American Board of Family Practice (ABFP) administers the certification and recertification examinations in various centers throughout the United States annually, on the second Friday in July.

The American Board of Family Practice Certification and Recertification Examinations are written tests of cognitive knowledge and problem solving abilities relevant to Family Practice.

Appropriate subject areas of the following disciplines are included: Internal Medicine, Pediatrics, Surgery, Obstetrics, Gynecology, Psychiatry, Behavioral Sciences, Community Medicine, and Geriatrics.

Elements of the examination include but are not limited to diagnosis, management, and prevention of illness.

Requirements for Certification

A. GENERAL

1. All candidates for the American Board of Family Practice Certification Examination must have completed three years of training (a total of 36 months of training) in each of the G-1, G-2, and G-3 years in a Family Practice residency program accredited by the Accreditation Council for Graduate Medical Education (ACGME) subsequent to receipt of the MD or DO degree, and when applicable, a Fifth Pathway Year, or receipt of a Standard Certificate from the Educational Council for Foreign Medical Graduates, or compliance with other ACGME requirements for entry into graduate medical training in the United States.

2. The Board prefers all three years of training to be in the same ACGME-accredited Family Practice Program, however, other first year training may be considered equivalent (e.g., Flexible/Transitional Year, AOA Osteopathic Internship, etc.).

In these cases, and for physicians who have foreign training, each individual's training will be evaluated by the Board.

Foreign trained physicians must meet all of the requirements of the Residency Qualifying Examination and obtain a passing score to receive any credit toward certification for their prior training. If a program admits a resident into training with the expectation of advanced placement credit toward certification but there has been no prior written communication between the program and the Board concerning transfer/advanced placement the resident will be required to complete 36 months of training in order to make application for certification.

The last two years of family practice residency training must be completed in the same accredited program unless written approval for transfer from one ACGME program to another is granted by the Board prior to the transfer. Transfers after the beginning of the G-2 year are approved only in extraordinary circumstances.

Verification of satisfactory completion of residency training must be stated in writing by the director of the program. All applicants for the Certification Examination are subject to the approval of the Board, and the final decision regarding any application rests solely with the ABFP.

2. All candidates' education and training experiences are subject to review and approval by the ABFP. Any variance from the above must have prior written approval of the Board. No credit may be given for any previous training as equivalent to Family Practice training without the prior written approval of the Board.

3. Candidates must complete all requirements of the Board no later than June 30 of the year of the examination. Complete documentation from the program director that the resident has or is expected to have satisfactorily completed the residency must be received by the Board by June 30. Applications, supplied to the residents directly through the program director, are made available only to residents expected to complete the required training by June 30 of the current year. Residents who complete their training at an interim date, must write to the Board for an application.

4. All candidates must hold a currently valid, full and unrestricted license to practice medicine in the United States or Canada. Furthermore, every license to practice medicine held by the candidate in any state or territory of the United States or province of Canada must be currently valid, full and unrestricted, whether or not the candidate in effect practices in such state, territory or province. Candidates shall be required to maintain a full and unrestricted medical license in the United States or Canada even if they are out of the country for extended periods of time. Involuntary loss of a license will result in the simultaneous loss of Diplomate status and/or the inability to make application for certification, recertification, or other examinations offered by the Board.

Any candidate whose license to practice medicine has been revoked, suspended, or restricted in any state or territory of the United States or province of Canada, shall be ineligible for certification until such time as the encumbered license is reinstated in full. Should a license be revoked, suspended, or restricted following the submission of an application for certification but prior to the notification of examination results, the application and certification will be simultaneously invalidated. It is the responsibility of the candidate to inform the Board immediately upon a change in licensure status. Failure to notify the Board of any suspension, revocation, restriction or probation within 60 days after the effective date, the physician shall be ineligible to seek certification for up to one year following the reinstatement of full and unrestricted licensure.

5. No candidate will be allowed to take the examination until all fees are paid, and all of the above requirements have been satisfactorily met.

B. OSTEOPATHIC PHYSICIANS

Osteopathic physicians who have graduated from an American Osteopathic Association (AOA) approved school of Osteopathic Medicine in the United States may qualify for certification if they meet all the same requirements as specified for allopathic medical school graduates. They may apply to ACGME accredited Family Practice programs for entry into the first year (G-1). Osteopathic physicians who have documented satisfactory completion of an AOA approved internship (G-1) year may receive credit for that portion of the G-1 year which meets the American Board of Family Practice guidelines for Advanced Level Entry or Inter-program Transfers.

All candidates (MD or DO) must satisfactorily complete at least 36 calendar months of accredited graduate medical education. Only the G-1 year may be fulfilled by an AOA-approved internship year. The training beyond the G-1 year must be in continuity in an ACGME accredited Family Practice residency program.

C. CANADIAN APPLICANTS

Canadian applicants may qualify for examination via either of the following routes:

1. Physicians who have satisfactorily met the requirements of the College of Family Physicians of Canada (CFPC) by completion of two years of training in a program accredited by the College of Family Physicians of Canada must have a third year of accredited Family Practice residency. This third year of training must be satisfactorily completed in an ACGME accredited Family Practice program or, if taken in Canada, must be approved by the College of Family Physicians of Canada and must have the prior approval of the American Board of Family Practice. Only those programs that bring the third-year experience into compliance with the ACGME "Special Requirements for Training in
Family Practice will be considered as being equivalent to a third year in a U.S. accredited Family Practice training program. The request must be accompanied by documentation of satisfactory performance of the first two years of training (including a description of the curriculum) signed by the program director.

2. Physicians who have been certified by examination by the College of Family Physicians of Canada (Certificants), and who:
   a. have established legal residence in the U.S. for not less than the immediate past two (2) years at the time of application; and
   b. since residing in the U.S. have accumulated a minimum of 50 hours per year of continuing medical education approved by the American Board of Family Practice; and
   c. are actively engaged professionally full-time and exclusively in Family Practice (practice, and/or teaching, administration); may be permitted to apply for examination for certification by the American Board of Family Practice. In cases of Canadian Certificants, a special application form must be submitted.

The Recertification Process

The American Board of Family Practice confers Diplomate status for the specified period of time noted on the certificate. The certificate is dated for a seven-year period. In order to maintain Diplomate status, the Diplomate must be recertified before the certificate expires. Although the certificate is dated for seven years, the Board routinely administers the recertification process on a six-year cycle. This allows a “reserve” year for those Diplomates who for some reason are unable to participate in the sixth year, or in cases where the Diplomate fails to receive a satisfactory score in the sixth year.

Should a Diplomate not be recertified by the end of the seventh year, the certificate will expire and the physician will lose Diplomate status. However, the physician may reapply for the Recertification Process, but must meet all criteria in effect at that time.

For Diplomates who participate in the recertification process during the sixth year and pass, the new certificate of seven years duration is dated from the time of that examination.

Diplomates will be given advance notice of any changes in the recertification requirements.

Requirements for Recertification

A. Submission of a formal application.
B. Documentation of 300 hours of approved continuing medical education.
C. Submission of statement of acknowledgement and compliance with Board policy regarding medical licensure.
D. Satisfactory completion of the Office Record Review portion of the recertification process.
E. Satisfactory performance on the written test of cognitive knowledge.

Re-examination

Candidates who fail the examination will be given the opportunity of taking it again as given annually. There is no limit to the number of times a qualified candidate may take the examination. Full fees are charged for each examination.

Certificate of Added Qualifications in Geriatric Medicine

Geriatric Medicine is an integral part of family practice and internal medicine concerned with the aging process and the diagnostic, therapeutic, preventive and rehabilitative aspects of illness in the elderly. Therefore, the American Board of Family Practice and the American Board of Internal Medicine in a JOINT venture have initiated a Certificate of Added Qualifications (CAQ) in Geriatric Medicine. This “added certificate” is designed to recognize the excellence among those Diplomates who provide care to the elderly.

A. REQUIREMENTS FOR CAQ IN GERIATRIC MEDICINE

1. Family physicians must be certified by the American Board of Family Practice and must be Diplomates in good standing at the time of the examination.
2. The Diplomate must hold a valid and unrestricted license to practice medicine in the United States or Canada.
3. Diplomates must qualify through one of the following plans:
   a. Plan I (Fellowship Pathway): for Diplomates who have successfully completed two years of acceptable formal training in Geriatric Medicine. The Accreditation Council for Graduate Medical Education (ACGME) is in the process of setting up accreditation of geriatric fellowship programs. Plan II (Practice Pathway): for the Diplomate who has practiced geriatrics for at least four years of substantial practice involving patients 65 years or older. Plans II-A and II-B will be available only through the 1994 examination. After the 1994 exam, Diplomates must complete a formal geriatric fellowship program to be eligible to sit for this exam.
4. Achievement of satisfactory score on a one-day examination.

B. RECOGNITION OF SUCCESSFUL CANDIDATES

Successful candidates will be awarded an ABFP Certificate of Added Qualifications in Geriatric Medicine. The certificate will be valid for ten years at which time reissuement will be required for renewal of the certificate.

Loss or expiration of PRIMARY certification in Family Practice will automatically result in simultaneous loss of certification in Added Qualifications in Geriatrics.

In cases where a CAQ is lost because the Diplomate does not re-certify in the primary specialty (Family Practice) and later that individual does re-certify, the CAQ will be reinstated for the remaining period of time, if any, as stated on the CAQ certificate.

C. EXAMINATION SCHEDULE

It is anticipated that these examinations will be given biannually in even-numbered years. Announcements will be made in the Journal of the American Board of Family Practice concerning dates and the application process.

Revocation

A. GENERAL

Each certificate issued by the Board of Directors of the American Board of Family Practice shall be subject to revocation in any of the following circumstances:

The issuance of such certificate or its receipt by the person so certified shall have been contrary to, or in violation of, any provision of the Articles of Incorporation of the American Board of Family Practice, Inc. or of the Bylaws of the American Board of Family Practice.

The person so certified shall not have been eligible to receive such certificate, irrespective of whether or not the facts constituting such ineligibility were known to, or could have been ascertained by, the Directors of the corporation or its representatives.
**Internal Medicine**

The person so certified shall have made a misstatement of fact in the application for such certificate or in any other statement or representation to the corporation or its representatives.

The person so certified shall at any time have neglected to maintain the degree of competency in the field of Family Practice as established by the Board.

**B. LICENSURE STATUS**

A Diplomate of the American Board of Family Practice shall be required to hold a currently valid, full and unrestricted license to practice medicine in the United States or Canada. Furthermore, every license to practice medicine held by a Diplomate in any state or territory of the U.S. or province of Canada must be currently valid, full, and unrestricted, whether or not the Diplomate in effect practices in such state. Diplomates shall be required to retain a full and unrestricted medical license in the United States or Canada even if they are out of the country for extended periods of time. Failure to retain a license will result in loss of Diplomate status and the inability to make application for certification, recertification, or other examinations offered by the Board.

In the event a Diplomate’s license to practice in any state or territory of the United States or province of Canada is revoked, restricted, or suspended, the Diplomate’s status with the American Board of Family Practice is to be simultaneously rescinded at the time of the licensure revocation, restriction, or suspension. The physician shall within 60 days so advise the American Board of Family Practice and shall cease immediately identifying himself/herself in any way directly or indirectly as a Diplomate of the American Board of Family Medicine.

If and when the physician’s revoked, restricted or suspended license is reinstated in full (with no restrictions) and official documentation of reinstatement is provided to the ABFP, the physician, in order to retain Diplomate status, must meet all the recertification requirements in effect at the time, including, but not necessarily limited to, the written Recertification Examination which is held annually.

If the physician fails to notify the American Board of Family Practice of any revocation, restriction, or suspension within 60 days after the effective date, he/she shall be ineligible to seek reinstatement of Diplomate status for up to one year following the reinstatement of full and unrestricted license.

If and when the physician’s revoked or suspended license is reinstated in full (with no restrictions) and official documentation of reinstatement is provided to the ABFP, the physician may seek reinstatement of Diplomate status. Reinstatement as a Diplomate shall require the submission of an application for reinstatement and successful compliance with the requirements of certification or recertification, as determined by the Boards, in effect at that time, including, but not necessarily limited to, the written examination held annually.

**C. AUTHORITY**

The Board of Directors of the American Board of Family Practice, Inc. shall have sole power and authority to determine whether or not the evidence or information before it is sufficient to constitute grounds for revocation of any certificate issued by this corporation. The Board of Directors may, however, at its discretion, require any person so certified to appear before the Board of Directors upon not less than thirty (30) days written notice by registered mail, and to show cause, at the time and place specified in such notice, why the certificate should not be revoked. The failure of any person so notified to appear as required in such notice shall, at the discretion of the Board of Directors, constitute cause for revocation of the certificate. The decision of the Board of Directors in all such matters shall be final.

**Board Eligibility**

The American Board of Family Practice has never used the term "board eligible." The current requirements for admission to the Certifying Examination include satisfactory completion of a three-year Family Practice residency program as accredited by the ACGME (Accreditation Council for Graduate Medical Education). No other pathway to the Certifying Examination currently exists. The term "board eligible" is now an OBSOLETE term for all specialty boards under the aegis of the American Board of Medical Specialties (ABMS).

**Applying for the Certification Examination in Family Practice**

An application must be submitted with a check or money order in the amount of $500 (U.S. Dollars), payable to the American Board of Family Practice and postmarked no later than the published deadline.

The application must be accompanied by a copy of all licenses to practice medicine held by the candidate in the United States or Canada. Examination fees may be refundable in part if the candidate notifies the American Board of Family Practice by registered or certified mail, postmarked at least 30 days prior to examination, of his/her intent to withdraw.

If a candidate fails to notify the Board by certified or registered mail of his/her intent to withdraw, the entire fee will be forfeited. Any resident whose application is not approved for examination will be refunded $50.

No candidate will be admitted to the examination until all fees have been paid and all other requirements have been met.

All applications must be returned to the following address:

American Board of Family Practice
2228 Young Drive
Lexington, Kentucky 40503
(606) 269-5626

General Policies and Procedures

This document supersedes all previous publications of the Board concerning policies and procedures.

The Board's decision about a candidate's admissibility to examination is governed by the policies and procedures described in this brochure.

All candidates are admitted to examinations at the discretion of the Board. The Board reserves the right to cancel and reschedule examinations under unusual circumstances. In addition, the Board reserves the right to delete questions or portions of the examination.

The Board does not offer or endorse any specific publications or courses to prepare for its examinations.

The Board reserves the right to make changes in its fees, policies, and procedures at any time. It cannot assume responsibility for giving advance notice thereof. The Board also reserves the right, under extraordinary circumstances, to waive certain of its requirements.

The provisions of this publication are not to be construed as a contract between any candidate and the American Board of Internal Medicine.

History and Status of the Board

The Board was established in 1936 by joint action of the Section on Medical Practice of the American Medical Association and the Board of Regents of the American College of Physicians.

The Board is a private, non-profit corporation which is not a part of or affiliated with any other organization. Its members serve rotating terms with new members annually elected by the Board. It receives no public funds and has no licensing function.

Purpose of the Board

The purpose of the American Board of Internal Medicine is to improve the quality of medical care by developing standards to ensure that the certified internist possesses the knowledge, skills, and attitudes essential to the provision of excellent care. Certification is recognition by peers of a superior level of ability.

Meaning of Certification and Recertification

Certification by the ABIM recognizes excellence in the discipline of internal medicine, now over the careers of its Diplomates. Certification by the Board is not a requirement to practice internal medicine, and the Board does not confer privilege to practice. The Board does not intend either to interfere with or to restrict the professional activities of a licensed physician because the physician is not certified, or to restrict the professional activities of a Diplomate because the Diplomate is not certified in a subspecialty.

The Board's goals for recertification are to improve the quality of patient care, to set standards of clinical competence for the practice of internal medicine and its subspecialties and added qualifications, and to foster the continuing scholarship required for professional excellence over a lifetime of practice.

Beginning in 1990, the duration of the validity of all certificates issued by the Board will be ten years, and the dates of this period will be noted on certificates. Because of the contract with their holders, certificates issued before 1990, with the exceptions of those in Critical Care Medicine and Geriatric Medicine, will continue to be valid indefinitely. Nonetheless, Diplomates with certificates issued prior to 1990 will be offered the same opportunity to recertify as those who must revalidate their certificates to remain listed as Diplomates. Maintaining a current certificate is an expression of professional accountability.

Responsibilities of the Board

The primary function of the Board is to administer the certification process. It does this by:

a) establishing postdoctoral training requirements for Board candidates,
b) assessing the credentials of candidates,
c) obtaining substantiation by appropriate authorities of the clinical skills and professional standing of candidates, and
d) developing and conducting examinations for certification and recertification.

The Board conducts research to improve the definition of its certification standards and to evaluate certification procedures.

Areas of Certification and Recertification Offered

Specialty of Internal Medicine

Physicians who are awarded a Diplomate certificate in the specialty of internal medicine have completed a minimum of three years of acceptable postdoctoral education, demonstrated competence in the clinical care of patients, and passed the Certifying Examination in Internal Medicine. Physicians who are awarded this certificate will have demonstrated their preparation for the practice of internal medicine.

Subspecialties of Internal Medicine

Subsequently Board Diplomates may seek certification in a subspecialty of internal medicine. They must meet the Board's postdoctoral training requirements in the subspecialty before taking the subspecialty examination. Physicians who are awarded these certificates will have demonstrated their preparation for the practice of a subspecialty. The Board offers examinations in the following subspecialties:

Cardiovascular Disease
Critical Care Medicine
Internal Medicine

Endocrinology & Metabolism
Gastroenterology
Hematology
Infectious Disease
Medical Oncology
Nephrology
Pulmonary Disease
Rheumatology

For information concerning certification in Allergy and Immunology, please write to:
American Board of Allergy and Immunology
3624 Market Street
Philadelphia, Pennsylvania 19104

Added Qualifications in Internal Medicine
Certified internists and/or subspecialists may seek certificates of added competence following additional training in the following fields:

Critical Care Medicine
Diagnostic Laboratory Immunology
Geriatic Medicine

Time-Limited Board Eligibility

Consistent with its establishment of time-limited certification, the Board now recognizes the term Board Eligible which is defined as the status conferred by ABIM at the time a candidate receives notice from the Board of admission to an examination. It indicates that the candidate has completed the required training, has been rated as having satisfactory clinical competence by the faculty responsible for that training, and that other credentialing requirements have been met. The Board Eligible status will be of limited duration.

Candidates for certification in internal medicine will be considered Board Eligible for four examinations, or for a period of six years, whichever limit is reached first, regardless of sanctions during the interval. Candidates admitted to an examination before 1989 will be considered Board Eligible for four more examinations up to and including examinations given in 1995.

Similarly, candidates will be considered Board Eligible for subspecialty or "Added Qualification" certification at the time a candidate receives notice from the Board of admission to a specific examination. This eligibility will be limited to three examinations or a period of six years, whichever occurs first, regardless of sanctions during the interval. Candidates admitted to a subspecialty or Added Qualification examination before 1989 will be considered Board Eligible for three more examinations up to and including 1995 (for examinations administered in odd-numbered years) or 1996 (for examinations in even-numbered years).

Board Eligible candidates will continue to be required to reapply for each examination, and admission to that examination will be determined under policies in force at that time.

In the event that certification is not achieved during these periods, candidates will be required to meet all of the following requirements in order to reestablish their Board Eligible Status:

1. Valid and unrestricted licensure.
2. Verification of satisfactory clinical competence.
3. Completion of an acceptable course of continuing medical education accredited by the Accreditation Council on Continuing Medical Education (100 hours Category I) within the preceding two years.
4. Success on an ABIM qualifying examination. Should adverse information about a candidate come to the attention of the Board, the Board at its discretion may revoke this status.

Certification in the Specialty of Internal Medicine

Prerequisites

1. Predoctoral Medical Education

Candidates from medical schools in the United States or Canada must have attended a school accredited at the date of graduation by the Liaison Committee on Medical Education or formerly by the American Medical Association, or the Committee for Accreditation of Canadian Medical Schools. Candidates from osteopathic medical schools must have graduated from a college of osteopathic medicine accredited by the American Osteopathic Association.

Graduates of foreign medical schools are required to have one of the following:

1) a permanent (valid indefinitely) certificate of the Educational Commission for Foreign Medical Graduates, or
2) comparable credentials from the Medical Council of Canada.

A photostatic copy of the certificate or credentials must accompany the application for admission to the examination.

Candidates whose ECFMG certificates are undergoing revalidation will not be admitted to the examination even if licensed.

Candidates who entered postdoctoral medical training in the United States via the "Fifth Pathway," as proposed by the American Medical Association, must document such training to the Board.

2. Postdoctoral Training Requirements

Candidates must meet the training requirements outlined below.

Requirements for graduates of foreign and osteopathic medical schools are the same as those for other candidates.

The Board believes that all internists should have a sound knowledge of the biologic and social sciences basic to internal medicine, this knowledge should be acquired during the candidate's predoctoral and postdoctoral training, and should be maintained by habits of continuing scholarship. The Board has defined its requirements for duration and quality of training to assure an educational experience that is likely to develop competence in internal medicine. Residents are urged to discuss specific modifications of their training with their program directors.

To ensure that all Diplomates are competent to fulfill the responsibility of an internist for the care of patients, whether they plan to practice general internal medicine or a subspecialty, the Board requires that all candidates have at least three years of accredited training in the broad field of internal medicine.

No internship, residency, or fellowship training taken before the date of completion of requirements for the M.D. or D.O. degree may be credited toward the Board's training requirements.

To be admitted to an examination, physicians should have completed required postdoctoral training before July 1 of the year of examination.

The three years of required training must satisfy all the following conditions:

1. A candidate must complete three years of training as a resident in an accredited program(s) in internal medicine.

Accredited indicates training approved by the Accreditation Council for Graduate Medical Education (ACGME) or training completed in Canada and accredited either by The Royal College of Physicians and Surgeons of Canada or by the Professional Corporation of Physicians of Quebec.

2. A director of an accredited training program in internal medicine must have responsibility for the educational process during all of the 36 months of training.

The program director may assign up to six of the 36 months of the internal medicine residency to specialties other than internal medicine,
and these 6 months may be credited toward the 36 months of required training. This is designed to permit interdisciplinary experiences consistent with primary care internal medicine. It is not intended to permit credit for training while the candidate is a resident in another specialty.

The Board has several policies to determine credit for the first post-doctoral year of training (PGY-1), depending on which type of training was undertaken in the first year.

a) **Categorical First Year in Internal Medicine**—This refers to PGY-1 training undertaken in the department of internal medicine under the supervision of the director of an accredited internal medicine program. Twelve months of credit are given for Categorical first years.

b) **Preliminary First Year In Internal Medicine**—This refers to the type of training offered by the National Resident Matching Program which is undertaken in more than one department, under the supervision of the director of an accredited internal medicine program. Twelve months are credited if training included a minimum of eight months of internal medicine, or six months in internal medicine and two months of pediatrics, dermatology, neurology, and/or emergency room care.

c) **Flexible First Year**—This refers to training in 1975–1982 that was never reviewed or accredited by a national authority; Therefore, no credit is normally given for Flexible first years.

d) **Transitional Year**—Beginning in July 1982 the Accreditation Council on Graduate Medical Education has accredited broad PGY-1 training experiences with a designated director and an institutional supervisory committee and sponsored by at least two accredited residencies in the same institution. In such programs where one sponsoring residency is internal medicine, candidates will receive month-for-month credit for training in internal medicine. Twelve months are credited if training included a minimum of eight months of internal medicine, or six months in internal medicine and two months of pediatrics, dermatology, neurology, and/or emergency room care.

3. Training must include a minimum of 24 months of meaningful patient responsibility.

**Meaningful patient responsibility** refers to time spent in direct and comprehensive care of patients. This includes responsibility for record keeping and management under the supervision of faculty and/or personal physicians. Care provided in the capacity of a consultant does not apply to the requirement for meaningful patient responsibility. Twenty of the 24 required months of meaningful patient responsibility must occur in:

a) inpatient services where disorders of general internal medicine are managed, or

b) inpatient services where disorders of one subspecialty of internal medicine are managed, or

c) emergency rooms, general medical or subspecialty out-patient clinics, or

d) dermatology or neurology services.

For the purposes of determining the amount of meaningful patient responsibility, four months may be taken outside internal medicine at the discretion of the internal medicine program director, provided these months involve meaningful patient responsibility.

4. In each year of training, the level of responsibility for patient care must increase.

In summary, the standard, recommended training pattern includes:

- **Year 1 — A Categorical first year of training in internal medicine, or A Preliminary-IM first year which includes 8 months of internal medicine; and**

- **Year 2 — 12 months of accredited residency in internal medicine, as a medicine resident; and**

Year 3—12 months of accredited residency in internal medicine, as a medicine resident.

Of the total 36 months of training, at least 24 must include meaningful patient responsibility. In each year of training, responsibility for patient care must increase.

3. Components of Clinical Competence

It is essential that the internist have the skills required to make logical diagnoses and to prescribe optimal medical care. These skills include appropriate medical knowledge, clinical judgment, personal attitudes and behavior, humanistic qualities, procedural skills, and abilities to gather data—by an organized and complete medical interview, a thorough physical examination, and the appropriate use of diagnostic studies. Since directors of training programs can appropriately assess these components, and have established committees to assist them in this evaluation, they will be asked to provide the Board with documentation of this competence. The evaluation should be a continuing process throughout a trainee’s tenure in a hospital program.

For candidates beginning postgraduate training in June 1987 and after, the Board will require that they be judged by their program directors to have demonstrated satisfactory overall clinical competence, humanistic qualities and moral and ethical standing during each of the three years of training. In the R-3 year, all candidates must also be judged to be satisfactory in each of the other components of competence defined by the Board.

The Board’s expectation is that applicants who have a problem with substance abuse will provide documentation of at least twenty-four months of successful supervised rehabilitation.

The Board requires each program director to submit to the Board an annual evaluation summary at the end of each year of training. This form should be reviewed by the resident prior to its submission to the Board. While it is the primary responsibility of the program director to submit this form to the Board, it is the resident’s (prospective candidate’s) responsibility to ensure that it is submitted and to provide the training institution with any consents necessary. For more information about the role of the program director in certification, see following pages.

Every four years following formal evaluation, the Board requires verification that candidates are currently recognized as internal medicine specialists in good standing. Verification is sought from the chief of medical service at the institution where the candidate’s principal staff appointment is held. Any challenge to good standing must be resolved locally to the Board’s satisfaction before admission to the examination.

Substance abuse, convictions for felonies related to medical practice, or substantial disciplinary action by a hospital staff may lead to deferred admission to examination.

4. Licensure

A valid, unrestricted, and unchallenged license to practice medicine in a state, territory, possession, or province of the United States or Canada will be required of all candidates who will have been out of formal training one or more years as of July 1 of the year of examination. A photocopy of every active registration card bearing a date which has not yet expired must be submitted to the Board. Candidates with a restricted, suspended, or revoked license in any jurisdiction at the time of application and/or examination will not be admitted to examination or certified.

**Parental Leave Policy**

ABIM maintains a flexible policy concerning acceptable reductions in its training requirements for leaves of absence pertaining to maternity/paternity/adoption. The Board’s staff is permitted to grant credit for up to one month in any one year for vacation time, illnesses, or delayed
stays. In addition, up to six weeks credit can be granted for pregnancy, adoption, and subsequent newborn care. Credit for longer absences must be justified by the program director, and must be judged as acceptable by the Board.

The Board recognizes that program directors know the skills of their trainees far better than the Board, and rules from a national organization may not be applicable to all local situations. Other considerations include Federal anti-discrimination law, safeguarding the health of mother and infant, uninterrupted patient care, graded responsibility and other precepts of the education of physicians, and assurances of fair treatment of and tolerable work levels for the pregnant trainee and her colleagues.

Program directors may find the position paper in the December 15, 1989 Archives of Internal Medicine, "Parental Leave for Residents" helpful in establishing written policies for their programs.

Candidates for Special Consideration

Outstanding candidates with unusual training who seek certification in general internal medicine may be proposed to the Board as candidates for special consideration. A separate Clinical Investigator Pathway is described on the following pages.

Training Taken in Accredited Programs Other than Internal Medicine

For physicians transferring to the first or second year of internal medicine programs from other accredited residencies, the internal medicine program director may grant a maximum of six months credit for months of training in internal medicine which were under the supervision of the director of an accredited program in internal medicine. These six months may not include rotations in the first postgraduate year such as emergency room, pediatrics or rotations through other specialties. Please refer to following pages for information about proposals of exceptions to these requirements.

The Certifying Examination in Internal Medicine

The certifying examination in Internal Medicine is a written examination. The material covered on the examination is clinically oriented relevant to the practice of internal medicine in a hospital and ambulatory care setting, both for consultants and primary-care physicians. The questions are objective; they are designed to test the candidate's knowledge, clinical judgment, problem-solving skills, and, to an appropriate degree, knowledge of the basic sciences fundamental to internal medicine. Some items on the examination are included for calibration and experimental purposes only; these items will not contribute to the candidate's score.

The Certifying Examination is administered annually in many centers throughout the United States and in a few centers in Canada, Puerto Rico, and overseas. It is given in four parts on two consecutive days. The next Certifying Examination in Internal Medicine will be held September 24-25, 1991.

Candidates will be informed of the results of the examination within four months of administration.

Those who pass the examination are certified as Diplomates in the specialty of internal medicine. They are awarded a certificate indicating the duration of its validity.

Certification in a Subspecialty of Internal Medicine

Prerequisites

1. Prior Certification in Internal Medicine

A candidate for examination in a subspecialty must first be certified by ABIM as a Diplomate in internal medicine.

2. Training Requirements

The Board requires a minimum of two years of full-time graduate training in a subspecialty, completed in a program associated with an accredited residency in internal medicine in the United States, or Canadian fellowship training that was accredited either by The Royal College of Physicians and Surgeons of Canada or the Professional Corporation of Physicians of Quebec. Beginning July 1, 1989 the Board will accept only subspecialty training that has been accredited by the Accreditation Council for Graduate Medical Education or the Canadian authorities mentioned above.

If subspecialty rotations completed during training in internal medicine are used to meet the requirements for admission to a Certifying Examination in Internal Medicine, they cannot be credited toward the requirement for subspecialty training. Practice experience or attendance at postgraduate courses cannot be credited toward the requirement.

Educational experience in a subspecialty while the candidate holds a full-time junior faculty appointment in an approved medical school in the United States or Canada may be applicable toward the requirements. Such clinical experience must have been approved by the appropriate program director. Plans for such training should be reviewed prospectively by the Board.

To be admitted to an examination, physicians should have completed required postdoctoral training before July 1 of the year of examination.

In general, part-time training, even though continuous, is not acceptable. Interrupted full-time training, however, is acceptable, provided that no period of full-time training is shorter than six months. Individuals planning such training should seek the guidance of the Board before acting on their plans.

3. Clinical Competence

The Board, after receiving an application for examination, requires substantiation of the candidate's clinical competence as a subspecialty consultant. This substantiation will be sought by the Board from the directors of the subspecialty training program(s) and of the associated residency in internal medicine. For more information about the role of program directors in certification.

In addition to satisfactory ratings of overall competence as a subspecialist-consultant, all candidates for subspecialty certification must demonstrate satisfactory humanistic qualities and moral and ethical behavior in the medical profession in each year of required training and thereafter. The departmental chairman and the subspecialty program director have the responsibility to assure the Board of such satisfactory behavior.

Every four years following formal evaluation, the Board requires verification that candidates are currently recognized as subspecialists in good standing in the appropriate subspecialty. Verification is sought from the chief of medical service at the institution where the candidate's principal staff appointment is held. Any challenge to good standing must be resolved locally to the Board's satisfaction before admission to the examination. Substance abuse, convictions for felonies related to medical practice, or substantial disciplinary action by a hospital staff may lead to deferred admission to examination.

The Board's expectation is that applicants who have a problem with substance abuse will provide documentation of at least twenty-four months of successful supervised rehabilitation.

4. Licensure

A valid, unrestricted, and unchallenged license to practice medicine in a state, territory, possession, or province of the United States or Canada will be required of all candidates who will have been out of formal training one or more years as of July 1 of the year of examination. A photocopy of every active registration card bearing a date which
CERTIFICATION REQUIREMENTS

Internal Medicine

has not yet expired must be submitted to the Board. Candidates with a restricted, suspended, or revoked license in any jurisdiction at the time of application and/or examination will not be admitted to examination or certified.

Parental Leave Policy
The Board’s parental leave policy is described on the following pages.

Candidates for Special Consideration
Outstanding candidates with unusual training who seek certification in a subspecialty may be proposed to the Board as candidates for special consideration. A separate Clinical Investigator Pathway is described on the following pages.

Specific Subspecialty Training Requirements
Beginning in 1993 all candidates applying for the Cardiovascular Disease Examination for the first time will be required to have completed three years of accredited training in cardiovascular disease including at least two years of clinical training.

For certification in either Hematology or Medical Oncology alone, the two-year training program must include at least 12 months of full-time clinical training in the diagnosis and management of a broad spectrum of diseases. It must also be accompanied by a minimum of 24 months of experience in an ambulatory care setting, during which time the candidate attended at least one outpatient clinic for a minimum of one-half day per week and had the responsibility for providing continuous care to a defined cohort of patients being managed for neoplastic or hematological disorders. For a definition of full-time clinical training see following pages.

Certification in Two Subspecialties
Candidates who seek dual certification in subspecialty combinations should submit written inquiries to the Board. New requirements for dual certification in Hematology and Medical Oncology and Rheumatology and Allergy and Immunology have been established and are described below.

Dual Certification in Hematology and Medical Oncology
The training requirements for dual certification in Hematology and Medical Oncology involve 3 years of full-time fellowship training. The 3 years of combined training must include a minimum of 18 months of prospectively designed full-time clinical training with patient care responsibility. This full-time clinical training must include a minimum of 12 months of training in the diagnosis and management of a broad spectrum of neoplastic diseases including hematological malignancies and the equivalent of a minimum of 6 months of training in the diagnosis and management of a broad spectrum of non-neoplastic hematological disorders. This need not be in sequential months of block time. During the entire 36 months the candidate must attend at least one outpatient clinic for a minimum of 1/2 day per week and have the responsibility for providing continuous care to a defined cohort of patients being managed for neoplastic disorders and others with specific hematological disorders.

The combined training must be taken in programs in the same institution, or in an acceptably coherent program, accredited both in Hematology and Medical Oncology by the Accreditation Council for Graduate Medical Education or by The Royal College of Physicians and Surgeons of Canada or by the Professional Corporation of Quebec. Examples of an acceptable combined program are:

1. a single program with one program director.
2. a joint program sponsored by the same institution with a coordinated effort by two different program directors regarding curricular design (e.g., the program director of the Hematology fellowship and the program director of the Medical Oncology fellowship).
Internal Medicine

For admission to the ABIM Rheumatology Examination and the ABAI Certifying Examination the following criteria must be met:
1. Certification in Internal Medicine by the American Board of Internal Medicine.
2. Satisfactory or higher assessment ratings on Clinical Competence Evaluation Forms, as submitted to the ABIM Subspecialty Board on Rheumatology and ABAI, respectively, by the rheumatology and the allergy and immunology training program directors.
3. Completion of the three-year combined program to the satisfaction of both Boards before admission to either examination.

Dual Certification in the Subspecialty of Pulmonary Disease and the Added Qualification of Critical Care Medicine After Combined Training

Candidates seeking dual certification in Pulmonary Disease and Critical Care Medicine with three years of combined accredited training in pulmonary disease and critical care medicine must complete the entire three-year fellowship, including 18 months of clinical training, before admission to the Subspecialty Examination in Pulmonary Disease. They must become certified in pulmonary disease before they will be permitted to apply for admission to the Critical Care Medicine Examination. This new policy becomes effective for fellows entering combined training in pulmonary disease and critical care medicine on or after June 1, 1991.

Subspecialty Examinations

The subspecialty examinations are written examinations. The questions are objective. An outline of the general subject areas covered by a specific subspecialty examination is provided with the application form.

The subspecialty examinations are offered on an alternate-year schedule. The examinations are administered in centers in the United States, Puerto Rico, Canada, and overseas. They are given during one day; the sole exception is the examination in Cardiovascular Disease, which is given during one and one-half days. The 1991 Subspecialty Examinations will be held on November 5–6, 1991.

candidates will be informed of the results of examination within four months of administration.

Those who pass a subspecialty examination are certified as Diplomates in the particular subspecialty; they are awarded a certificate indicating the duration of its validity.

Certification of Added Qualifications

The Board offers certification of added qualifications to Diplomates with additional training and/or experience in the following areas:

Geriatric Medicine

Certification of added qualifications in Geriatric Medicine is a program for certified internists and family practitioners, designed to recognize excellence among those who provide care to the elderly.

The American Board of Internal Medicine and the American Board of Family Practice will offer the next examination in Geriatric Medicine on April 10, 1992. Successful internists will be awarded a Certificate of Added Qualifications by the American Board of Internal Medicine. The certificate will bear a date limiting the duration of its validity to ten years. Reassessment will be required for renewal of the certificate. Please write to the Board office for additional information regarding certification in Geriatric Medicine.

Beginning July 1, 1991 the Board will accept only geriatric medicine training that has been accredited by the Accreditation Council for Graduate Medical Education or by The Royal College of Physicians and Surgeons of Canada or the Professional Corporation of Physicians of Quebec.

Critical Care Medicine

Certification in Critical Care Medicine is a program for certified internal medicine specialists, designed to recognize excellence among those who provide critical care. The next examination in Critical Care Medicine is scheduled for November 5, 1991. Those who pass the examination will be awarded a certificate bearing a date limiting its validity to ten years. Reassessment will be required for renewal of the certificate.

Beginning July 1, 1991 the Board will accept only critical care medicine training that has been accredited by the Accreditation Council for Graduate Medical Education or by The Royal College of Physicians and Surgeons of Canada.

Please write to the Board office for additional information regarding the Critical Care Medicine Examination.

Cardiac Electrophysiology

Certified cardiologists may be eligible to undertake an added qualifications examination beginning in 1992. Specific details regarding the requirements will become available from the Board office on March 1, 1991.

Diagnostic Laboratory Immunology

The American Board of Allergy and Immunology, Internal Medicine and Pediatrics certify qualified internists and pediatricians involved in teaching, research and/or practice settings in which the diagnostic immunology laboratory is of central importance. For information and application forms, please contact:
American Board of Allergy and Immunology
3624 Market Street
Philadelphia, Pennsylvania 19104

Role of Program Directors

Responsibility for Training

The Board believes that an internal medicine program director should have responsibility for the candidate's entire educational process during training. The program director together with the candidate can design some flexibility within the basic training requirements.

The program director may permit up to six months of training in areas outside internal medicine, as long as the program director maintains contractual responsibility for the resident in internal medicine during this time. Such rotations may be dispersed by the program director throughout the 36 months of training.

A maximum of four months outside internal medicine (e.g., pediatrics, psychiatry, neurology, etc.) may be credited toward the requirement for 24 months of meaningful patient responsibility if the rotations are taken with the approval of the internal medicine program director and if they involve meaningful patient responsibility.

The Board welcomes the opportunity to evaluate prospective plans for unusual training.

Substantiation of Clinical Competence

The level of competence of the internist or subspecialist is determined in large part by the duration and quality of training and experience. It is for this reason that the Board seeks assistance from training program directors in the certification process. The Board asks program directors to substantiate that candidates for certification have the requisite medical knowledge, clinical judgment, history-taking, physical examination, and procedural skills (i.e., critical life-saving procedures including basic cardiopulmonary resuscitation and cardiac defibrillation; basic diagnostic procedures necessary for obtaining relevant biochemical fluids for evaluation including arterial and venous blood, urine, cerebrospinal fluid, pleural and ascitic fluids, and cerebral and vaginal secretions; and procedures used by internists to obtain additional diagnostic information, such as breast and pelvic examinations and sigmoidoscopy), humanistic qualities, skills and abilities in the provision of medical care, professional attitudes and behavior, and moral and
Ethical behavior to be certified by the Board. Such substantiation is a requirement of certification. Deficiencies in these attributes should be identified by the program director as early in the training period as possible, so that remedial action can occur. The Board provides guidelines to program directors for the definition and evaluation of clinical competence.

Humanistic Qualities and Moral and Ethical Behavior

Program directors have the responsibility to assure the Board that candidates for Board certification have demonstrated satisfactory humanistic qualities and moral and ethical behavior in the medical profession during each of the three years of required training.

Candidates who are judged to have unsatisfactory humanistic qualities and/or moral and ethical behavior should be offered the opportunity to meet with their program directors and/or their local committees on evaluation of clinical competence in order to reply to the evaluations.

When the program director cannot recommend a candidate for admission to a certification examination on the basis of these deficiencies, this judgment will be indicated to the Board on an evaluation form with a description of the available documentation including critical incidents that illustrate adverse behavior.

Internal Medicine—Tracking Competence and Performance

Program directors are asked to rate the clinical competence and performance of residents finishing their first and second years of training as superior, satisfactory, unsatisfactory or marginal on an ABIM annual evaluation summary form. The Board defines marginal clinical competence as possessing "almost adequate" knowledge, skills and attitudes to function as an internist. Residents rated as superior or satisfactory will receive full credit for the designated year of training. Residents rated as unsatisfactory will be informed that their R-1 or R-2 year will not be credited toward the requirements for admission to a future Certifying Examination. Residents rated as unsatisfactory will be notified of the Board's decision to grant credit for the second marginal year.

The Board requires that residents who receive ratings of marginal or unsatisfactory on the ABIM tracking form must sign the form before it is returned to the Board.

While it is the primary responsibility of the program director to complete and send the annual evaluation summary to the Board, it is the responsibility of the resident (prospective candidate) to ensure that it is submitted and, therefore, to provide the training institution with any consent necessary.

The Board will continue to require program directors to complete the traditional candidate evaluation form for all candidates during the final year of training.

Verification of Satisfactory Clinical Competence in Internal Medicine

Candidates applying for certification must be judged to have satisfactory overall clinical competence. Any candidate for any certification whose competence is judged to be less than satisfactory may, at the discretion of the Board, be excluded from the next examination.

For candidates beginning postgraduate training in June 1987 and after, the Board requires that they be judged by their program directors to have demonstrated satisfactory overall clinical competence, humanistic qualities and moral and ethical standing during each of the three years of training. In the R-3 year, the candidate must also be judged to be satisfactory in each of the other components of competence defined by the Board.

The Board believes that additional training is required to correct deficiencies in components of overall clinical competence. Individuals demonstrating deficiencies solely in the areas of humanistic qualities or moral and ethical behavior may, at the discretion of the Board, be denied credit until additional training and/or a specified period of close observation is completed.

Candidates who are judged by their program directors to have less than satisfactory overall clinical competence in the R-2 year of training will be required to undertake an additional twenty-four months of accredited residency in general internal medicine before requesting admission to the Certifying Examination.

Candidates who are judged by their program directors to have less than satisfactory clinical competence in the R-3 year of training will be required to undertake an additional twelve months of accredited residency in general internal medicine before requesting admission to the Certifying Examination. It is the candidate's responsibility to arrange for this training. If this additional training is taken in a different program, the Board requires that residents inform the new training program director of such a rating to assure that the new program director recognizes the candidate's needs and devotes special attention to the improvement of deficient skills. Residents are urged to obtain documentation of the program directors' evaluations of their clinical competence for all years of training.

Candidates whose clinical competence has improved and are judged by the program director to be satisfactory after the additional training will be admitted to the Certifying Examination.

Verification of Satisfactory Clinical Competence in the Subspecialties and Added Qualifications of Internal Medicine

For certification in the subspecialties of internal medicine, substantiation of clinical competence of the trainee as a subspecialist/consultant must be provided by both the director of the subspecialty training program and the director of the associated residency in internal medicine.

Candidates must have a satisfactory rating of overall clinical competence in each of the required years of subspecialty training. Otherwise, an additional year of acceptable training is required for each unsatisfactory year before requesting admission to examination.

It is the candidate's responsibility to arrange for this additional training. Trainees who change programs must inform the new program director of any previous unsatisfactory rating, so that the program director providing the additional training can devote special attention to improving the candidate's deficient skills. Candidates who neglect to inform the new program director of unsatisfactory ratings or who do not improve the previously identified deficiencies during the required additional training will not be admitted to examination.

For those entering subspecialty training at the F-1 level after June 1, 1987, satisfactory ratings of all component skills will be required, including proficiency in performing essential procedures where specified by the Subspecialty Board. Any unsatisfactory rating will exclude the candidate from examination, regardless of a satisfactory rating of overall clinical competence.

Specified procedures for the respective subspecialties include:

- Cardiovascular Disease—advanced cardiac life support (ACLS), including cardioversion; electrocardiography; including ambulatory ECG monitoring and exercise testing; echocardiography; insertion of arterial lines; right heart catheterization, including insertion of temporary pacemakers; and interpretation of nuclear cardiology tests, peripheral vascular studies, left heart catheterization and coronary angiography, and electrophysiologic studies.
Internal Medicine

Critical Care Medicine—maintenance of open airway in non-intubated, unconscious, paralyzed patients; intubation (oral, naso-tracheal); ventilation by bag and mask; mechanical ventilation using pressure-cycled, volume-cycled, and negative pressure mechanical ventilators; use of reservoir and PEEP masks for delivery of supplemental oxygen, humidifiers, nebulizers, and incentive spirometry; management of pneumothorax (needle insertion and drainage systems); basic and advanced cardio-pulmonary resuscitation; arterial puncture and blood sampling; insertion of central venous, arterial, and pulmonary artery catheters; cardioversion; utilization, zeroing, calibration of transducers; and use of amplifiers and recorders.

Gastroenterology—proctoscopy and/or flexible sigmoidoscopy; esophagogastroduodenoscopy; colonoscopy, including biopsy and polypectomy; dilatation procedures for esophageal disease; peroral small intestinal biopsy-capsule or endoscopic; and percutaneous aspiration liver biopsy.

Hematology—preparation of blood smears; bone marrow aspiration and biopsy; administration of chemotherapy, management including repair and/or maintenance of indwelling vascular access; lumbar puncture with chemotherapy; and phlebotomy and exchange transfusion.

Medical Oncology—serial measurement of palpable tumor masses; bone marrow aspiration and biopsy; administration of chemotherapeutic agents and biological response modifiers through all therapeutic routes (intravenous, intra-ventricular, intra-arterial, and through implanted venous access catheters); and management and care of indwelling venous access catheters.

Nephrology—temporary vascular access for hemodialysis and related procedures; hemodialysis; peritoneal dialysis; and percutaneous renal biopsies.

Pulmonary Disease—endotracheal intubation, fiberoptic bronchoscopy and accompanying procedures; mechanical ventilatory support; thoracentesis and percutaneous pleural biopsy; percutaneous arterial puncture; vascular monitoring including percutaneous insertion of indwelling arterial catheter and pulmonary artery flotation catheter; calibration and operation of hemodynamic recording systems; supervision of the technical aspects of pulmonary function testing; and progressive exercise testing.

Rheumatology—diagnostic aspiration of and analysis by light and polarized light microscopy of synovial fluid from diarthrodial joints, bursae, and tenosynovial structures; and therapeutic injection of diarthrodial joints, bursae, tenosynovial structures, and entheses.

Board Position Regarding Breach of Contract

The relationship between program directors and trainees has been one of mutual trust and honesty. Sometimes trainees become dissatisfied with their programs and desire a change. Other legitimate reasons for transfer include a change in the specialty/subspecialty interest of the resident/fellow, change in the desired location of training (e.g., spouse relocation, family illness), and the trainee's desire to transfer to a program more suitable to his or her goals. Such legitimate reasons for breaking a contract should be discussed with the program director in time to permit a suitable replacement.

Program directors should exercise the utmost caution in recruiting or accepting trainees who are under a contractual commitment to another program. The program director who intends to accept a transferring resident should personally contact the director of the previous program prior to accepting the transferring resident.

When the Board is informed that irregular breach of contract has occurred, it may at its discretion regard such evidence of unethical professional behavior (i.e., lack of honesty and integrity), in which case the incident will be evaluated along with other criteria for admission to examination.

A decision to provide to the Board an unsatisfactory rating for a resident based on the resident's breach of contract is an action which requires that due process be afforded the resident under the ACGME General Requirements of the Essentials for Accredited Residencies. This is true whether or not the resident is still at the training institution with which the breached contract existed.

Candidates for Special Consideration

Guidelines for Proposing

All candidates are admitted to examinations at the discretion of the Board. The Board recognizes that it must be flexible in its evaluation of the credentials of worthy candidates whose training or experience in internal medicine differs from the standard requirements, either in its accreditation or its duration. The Board must also be fair to such candidates regardless of their internal medicine career choices or locations of their clinical activity. Therefore, guidelines have been established for proposing Candidates for Special Consideration.

The principle which guides the Board in its assessment of such candidates is that 1) the Board must consider the candidate's training and experience to be at least equivalent in duration and quality to that required in accredited programs in the published, standard pathway to admission to an examination; and that 2) the level of overall clinical competence achieved by the candidate as an internist be at least equivalent to that achieved by candidates completing the required training.

It should not be inferred that these guide lines define new pathways or lessen the requirements for admission to examinations. Proposed candidates should be made aware of the fact that the receipt by the Board of a proposal meeting these guidelines in no way implies that the proposal will be approved. Complete proposals for special consideration should be received in the Board office by January of the year in which the examination is to be taken. Review of the proposal may require several months.

Candidates for Admission to the Certifying Examination in Internal Medicine

Potential candidates who might merit proposal as a Special Candidate fall into two main categories. Description of these categories is provided to assist proposers in identifying potential candidates. The Board does not consider training in subspecialty fellowships to be equivalent to internal medicine training.

Candidates with substantial training in internal medicine in accredited programs in the United States or Canada.

The Board will review proposals for candidates with at least two years of training in internal medicine in accredited programs in the United States or Canada that has occurred:

- a. after three or more years of verified foreign training in internal medicine or
- b. after three or more years of accredited training in another specialty in the United States or Canada.

Proposals requesting up to two months credit per year for time spent on non-internal medicine specialty training will also be considered on behalf of individuals with less than three years of training in another specialty:

- a. These candidates must demonstrate satisfactory overall clinical competence.
- b. The candidate must be proposed by the chairman of a department of medicine in an accredited medical school or the program director of an accredited residency in internal medicine. Before being proposed the candidate should have been observed by the proposer for at least one year.
CERTIFICATION REQUIREMENTS

Internal Medicine

Candidates for Admission to a Subspecialty Examination

All of the following requirements must be met for candidates seeking admission to a Subspecialty Examination who have not met the training requirements for that examination:

a. The candidate must be a Diplomate of the American Board of Internal Medicine at the date of proposal.

b. The candidate must have been professionally active in the United States or Canada for at least one year at the time of the proposal and must present a valid, unrestricted license to practice in a state, territory, province or possession of the United States or Canada.

c. The candidate's training and/or experience must be interpreted by the Board to be at least equivalent to the standard training required for admission to the specified subspecialty.

d. The candidate must be proposed by one of the following individuals who has personal knowledge of the qualifications of the candidate, who is certified by ABIM in the subspecialty for which the candidate is being proposed, and who has observed the candidate's clinical competence during the past year.

1) The program director of an accredited subspecialty program, or

2) A current or past member of the appropriate ABIM Subspecialty Board.

e. The proposal:

1) Must describe the candidate's professional training and experience in the subspecialty area.

2) Must document the reasons the proposer feels the candidate merits consideration as a Special Candidate, such as his or her reputation as an outstanding clinician or consultant, unique contribution to medical education and/or research, leadership in the medical community, etc.

3) Must substantiate the candidate's superior clinical competence as a subspecialty consultant.

4) Must include the candidate's curriculum vitae and bibliography.

5) Must be accompanied by endorsements by at least three Diplomates of the ABIM of the proposed candidate's superior competence. The endorsements must include observations of the clinical competence of the candidate during the year preceding the date of the proposal. The endorsers must include:

a. The chief and/or chairman of the department of medicine at the institution where the candidate holds his or her current principal staff appointment.

b. Two Diplomates of the ABIM in the subspecialty for which the candidate is being proposed.

Clinical Investigator Pathway

The Board's mission is to certify clinical expertise in internal medicine and to assure that training in this discipline has been broad. At the same time, the ABIM continues to encourage careers in clinical investigation. Therefore, the Board has established a pathway for investigators highly trained both in clinical sciences and clinical or biomedical research. This pathway leads to certification in internal medicine with...
Internal Medicine

four years of training. Combined certification in internal medicine and a subspecialty can be achieved with six years of training (seven years for Cardiovascular Disease and Hematology/Medical Oncology). Before submitting proposals for the use of this pathway, it is incumbent on both, the trainee and the involved program directors to understand their commitments to each other.

1. Clinical Training

a. Internal Medicine: Candidates must complete two years of accredited residency training in internal medicine with at least 20 months of meaningful patient responsibility and an appropriately balanced curriculum. Candidates must demonstrate superior overall competence in general internal medicine.

b. Subspecialties of Internal Medicine: Candidates seeking certification in both internal medicine and a subspecialty must meet the clinical training requirements for that subspecialty examination.

c. During research training, candidates are strongly encouraged to maintain a continuity clinic appropriate for their stage of clinical training (general internal medicine during residency training and subspecialty clinic during fellowship training).

d. The clinical training and research may be taken in any sequence so long as the eligibility requirements for each examination are met prior to application to the examination.

2. Research Training

a. Candidates must complete two years of full-time research (three years if the candidate plans to pursue subspecialty certification) during which at least 80% of the candidate’s professional time and effort is dedicated to investigative activities.

b. The candidate’s research plan must be prospectively approved by the Board prior to the completion of internal medicine clinical training. Research to be credited towards subspecialty training must be appropriate for the relevant subspecialty Board.

c. Research must take place in the United States or Canada.

d. Credit will be granted for research undertaken prior to the award of the M.D. degree only in rare instances.

3. Eligibility for Certifying Examinations

a. The Certifying Examination in Internal Medicine can be taken in the fall of the PGY-4, so long as two years of accredited residency training in internal medicine precede admission to the examination. Candidates who are not in an accredited fellowship must provide documentation that they are in research training during PGY-4.

b. A subspecialty examination may be taken in the fall of PGY-6 (PGY-7 for Cardiovascular Disease in 1993 and thereafter for Hematology/Medical Oncology).

c. Candidates for a subspecialty examination must provide documentation in PGY-6 that they are in full-time research training, or in a full-time faculty position with substantial (i.e., > 50% professional time and effort) research involvement. Candidates who are no longer in a research program in the fall of PGY-6 will not be admitted routinely to a subspecialty examination. The credentials of such candidates must be reviewed by the Board to determine admissibility to the examination.

4. Proposal Requirements

a. A letter of recommendation from the residency program director, including documentation of a Superior rating of clinical competence.

b. A letter of support from the sponsor of the research training describing the proposed program and documenting that it will be of the required duration.

c. A letter of support from the subspecialty program director, if the research training is to occur during fellowship training.

d. Curriculum vitae.

e. Application for this pathway should be sent to the ABIM as early as possible and must be received no later than March 1st of the R-2 level year.

Combined Training Leading to Certification by The Boards

Candidates who are otherwise eligible for certification by each Board may be admitted to the examinations of both Boards after such candidates complete suitable accredited residency training in each specialty in a single academic medical center involving a coherent educational program, collaborative direction, graded responsibility, and continuity clinics. Guidelines for combined residency training, effective for those entering residency training after June 1, 1989, are available from either Board.

- Pediatrics—at least 2 years of training in each specialty.
- Emergency Medicine—at least 2 1/2 years of training in each specialty.
- Physical Medicine and Rehabilitation—at least 2 1/2 years of training in each specialty.

Procedures for Application

Awareness of registration deadlines is the candidate’s responsibility. Candidates for all examinations should have completed the required training by July 1 of the year of examination. Candidates must use an application form which may be obtained by written request to the Board office during the scheduled period of registration.

After review and acceptance of a candidate’s qualifications as presented on the application form, the candidate is informed by letter that the initial stage of processing the application form has been completed. When appropriate, the Board then seeks verification of training and substantiation of the candidate’s clinical competence from the candidate’s program director. If these reports are satisfactory, the candidate will receive an admission card and examination center assignment approximately three weeks before the date of the examination.

Late Applications

There is a non-refundable penalty fee of $200.00 for any application postmarked after the published registration period.

No applications will be accepted after April 1 for the Certifying Examination, July 1 for Subspecialty and Critical Care Medicine Examinations, or December 1 for the Geriatric Medicine Examination.

Cancellations

In order to obtain a partial refund, cancellations for all examinations must be submitted to the Board in writing before August 1 for the Certifying Examination in Internal Medicine, October 1 for Subspecialty and Critical Care Medicine Examinations or February 1 for the Geriatric Medicine Examination.

Refunds

Candidates who cancel their applications before the deadline or whose applications are not approved by the Board will receive a partial refund of their fees; $65.00 will be retained to defray the cost of processing and evaluating the application.

Rescore

On written request and payment of a fee of $25.00 candidates may obtain rescoring of any examination within a year of receiving results. The candidates’ answer sheets will be destroyed 18 months after administration of the examination.

Re-Examination

Any candidate who does not pass any certification examination may apply for re-examination. There is a restriction on the number of opportunities for re-examination.
CERTIFICATION REQUIREMENTS

Internal Medicine

Announcements of Examination Information

Annals of Internal Medicine (Medical News Section)
Careers in Internal Medicine
The Internist
Journal of the American Medical Association
(Examinations and Licensure Section)
Journal of General Internal Medicine
Observer of the American College of Physicians
Resident and Staff Physician
Appropriate subspecialty journals

In addition, each fall the Board sends bulletins for display to the directors of all accredited residency programs.

Confidentiality

The Board considers a candidate's examination scores to be confidential. Candidates are provided an opportunity on the application form to authorize the release of individual scores to their program directors. Because of the importance of such data to program directors, the Board urges candidates to authorize their release. The Board otherwise endeavors to protect the anonymity of the candidate in any data released.

Candidates should be aware that the Board may, at its discretion, release the results of an examination under the following circumstances:

a) The Board will release group examination results to the director of each program in which a sufficient number of candidates received training for credit toward Board requirements in order to help program directors evaluate the effectiveness of their programs.

b) The Board will release group examination results to the Residency Review Committee for Internal Medicine for each program in which a sufficient number of candidates received training for credit toward Board requirements in order to help in the evaluation of the program's educational effectiveness.

c) The Board may release examination results, examination scores, and other pertinent information to qualified researchers; these researchers are required to maintain the confidentiality of such material.

Appeals

As required by the Accreditation Council for Graduate Medical Education in its Essentials for Accreditation, trainees must be provided due process at the educational institution. The Board will hear candidates' appeals only after all local remedies to resolve disputes over adverse judgments (e.g., unsatisfactory clinical competence, humanistic qualities, professional attitudes and behavior, and moral and ethical behavior) have been exhausted.

Irregular or Improper Behavior

All Board examinations are supervised by proctors, who are required to assign seats and are empowered to change seats during an examination at their discretion. Proctors are required to report to the Board any irregular behavior by a candidate. Improper behavior including, but not limited to, giving or obtaining unauthorized information or aid, looking at the test material of others, removing an examination book from the testing center, taking notes, failing to comply with proctors' instructions, disregarding time limits, talking, or other disruptive behavior will be considered a possible subversion of the certification process. Candidates must not discuss the examination while a session is in progress. Furthermore, candidates must not disclose the content to others or reproduce any portion of the examination in any manner. Irregular or improper behavior that is observed, that is made apparent by statistical analysis, or that is shown by other means will constitute grounds for invalidation of the candidate's examination. Other sanctions, such as exclusion from future examinations and informing the candidate's program director(s), licensing bodies, or law enforcement agencies, may be invoked at the Board's discretion.

Revocation of Certificates

Under the following circumstances the Board may, at its discretion, revoke any certificate it issued:

1. the Diplomate was not in fact qualified to receive the certificate at the time it was issued, even if the certificate was issued as a result of an error on the part of the Board;
2. the Diplomate made any material misstatement of fact or omission of fact to the Board in connection with the Diplomate's application or otherwise; or
3. the Diplomate's license to practice medicine has been revoked in any jurisdiction.

Handicapped Candidates

The Board recognizes that some candidates may be unable to fulfill the requirement for proficiency in performing procedures because of physical handicap. For such individuals, the procedural skills requirement may be waived. Program directors are urged to write to the Board for approval before such residents enter training.

Candidates who may need accommodation during the examination should provide written details to the Board at the time of application for examination.

Additional Information and Inquiries

Please address all inquiries concerning examination applications to:

American Board of Internal Medicine
3624 Market Street
Philadelphia, Pennsylvania 19104
(215) 243-1500 (800) 441-ABIM

The Board staff is ready to discuss certification with candidates. Candidates seeking an interview must request an appointment.

Examinations Schedule

Certifying Examination in Internal Medicine
Date: September 24–25, 1991
Registration Period: November 1, 1990 to February 1, 1991
Fee (U.S.): $600.00
Cancellation Deadline: August 1, 1991
Refund: $535.00

Cardiovascular Disease
Date: November 5–6, 1991
Registration Period: January 1, 1991 to April 1, 1991
Fee (U.S.): $770.00
Cancellation Deadline: October 1, 1991
Refund: $705.00

Endocrinology and Metabolism
Date: November 5, 1991
Registration Period: January 1, 1991 to April 1, 1991
Fee (U.S.): $770.00
Cancellation Deadline: October 1, 1991
Refund: $705.00

Gastroenterology
Date: November 5, 1991
Registration Period: January 1, 1991 to April 1, 1991
Fee (U.S.): $770.00
Cancellation Deadline: October 1, 1991
Refund: $705.00

Medical Oncology
Date: November 5, 1991
Registration Period: January 1, 1991 to April 1, 1991
Fee (U.S.): $770.00
Cancellation Deadline: October 1, 1991
Refund: $705.00

Critical Care Medicine
Date: November 5, 1991
Registration Period: January 1, 1991 to April 1, 1991
Fee (U.S.): $770.00
Cancellation Deadline: October 1, 1991
Refund: $705.00

Hematology
Date: November 4, 1992
Registration Period: January 1, 1992 to April 1, 1992
Fee (U.S.): Not Determined
Cancellation Deadline: October 1, 1992

Infectious Disease
Date: November 4, 1992
Registration Period: January 1, 1992 to April 1, 1992
Fee (U.S.): Not Determined
Cancellation Deadline: October 1, 1992

Nephrology
Date: November 4, 1992
Registration Period: January 1, 1992 to April 1, 1992
Fee (U.S.): Not Determined
Cancellation Deadline: October 1, 1992

Pulmonary Disease
Date: November 4, 1992
Registration Period: January 1, 1992 to April 1, 1992
Fee (U.S.): Not Determined
Cancellation Deadline: October 1, 1992

Rheumatology
Date: November 4, 1992
Registration Period: January 1, 1992 to April 1, 1992
Fee (U.S.): Not Determined
Cancellation Deadline: October 1, 1992

Geriatric Medicine
Date: April 10, 1992
Registration Period: July 1, 1991 to November 1, 1991
Fee (U.S.): Not Determined
Cancellation Deadline: February 17, 1992

*Please see previous pages for penalty fee for late applications and policy regarding cancellations.

American Board of Neurological Surgery

Nicholas T. Zervas, MD, Chairman, Boston, Massachusetts
Albert L. Rhoto, Jr, MD, Vice Chairman, Gainesville, Florida
Julian T. Hoff, MD, Secretary-Treasurer, Ann Arbor, Michigan
Edward S Connolly, MD, New Orleans, Louisiana
Howard M. Eisenberg, MD, Galveston, Texas
John A. Jane, MD, Charlottesville, Virginia
Edward R. Laws, Jr, MD, Washington, DC
Mary Louise Davis, Administrator
7550 Fannin Street, Suite 2139
Houston, Texas 77030–2701

(EDITOR'S NOTE: These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Neurological Surgery to ascertain whether the information they have is current.)

Diplomates

A list of Diplomates and Bylaws of The American Board of Neurological Surgery are published in the DIRECTORY OF MEDICAL SPECIALISTS which can be obtained from Marquis Who's Who, Inc., 200 East Ohio Street, Chicago, Illinois 60611 as well as in the ABMS Compendium of Certified Medical Specialists which can be obtained from the American Board of Medical Specialties, One Rotary Center, Suite 805, Evanston, Illinois 60201. In addition, a list of new Diplomates is published in the JOURNAL OF NEUROSURGERY shortly after each examination.

Information regarding training programs acceptable for certification can be found in the DIRECTORY OF GRADUATE MEDICAL EDUCATION PROGRAMS which is issued annually under the supervision of the Accreditation Council for Graduate Medical Education. This Directory can be secured from the American Medical Association, 535 North Dearborn Street, Chicago, Illinois 60610.

Qualifications

The American Board of Neurological Surgery evaluates all qualified applicants for their proficiency in neurological surgery.
The minimal educational requirements of the Board should not be interpreted as restricting programs to these minimum standards. If necessary, neurosurgical program directors may retain residents in their programs beyond the required five years of residency training in order to insure satisfactory competence in neurological surgery.

It is the responsibility of the candidate to seek information concerning current requirements for certification by The American Board of Neurological Surgery. Even though directors of approved neurosurgical programs are well informed regarding requirements for certification, placement in an approved training program does not guarantee adequate training for certification. The candidate must make sure he or she receives such training.

Training Prior to Neurosurgery Residency
1. Graduation from a medical school which is acceptable to the Board.
2. Currently valid license to practice medicine in the state, province or country of residence.
3. Twelve months devoted to acquiring adequate knowledge of fundamental clinical skills. This is known as postgraduate year one (PGY 1), general surgery year one, or internship; recommended for completion prior to beginning neurosurgical training; but must be completed prior to beginning the third year of that training. This may be achieved by:
   a. one year of training in an approved general surgery program in the United States or Canada, or
   b. one year of training in an accredited neurosurgical residency program to include not less than six months in surgical disciplines other than neurosurgery; the remaining six months should include training in fundamental clinical skills considered appropriate by the program director, but this portion of the year may not include more than six weeks of neurosurgery and/or neurology, or
   c. holding a certificate from the American Board of Surgery or a Fellowship (in surgery, not neurosurgery) of the Royal College of Surgeons of England, Edinburgh, Canada, Ireland, Australasia, or Glasgow.

Neurological Surgery Training Requirements

For Residents Beginning the Neurological Surgery Portion of Their Training on or After July 1, 1979
1. Completion of five years of training following postgraduate year one: Neurological surgery training must occur in residency programs recognized by the American Board of Neurological Surgery, and accredited by the ACGME in Neurosurgery, or its Canadian equivalent.
2. The 60 months of training must include at least 36 months of clinical neurosurgery in accredited programs. Twelve months of this period must be served as a senior resident.
3. The training in clinical neurosurgery must be progressive and not obtained during repeated short intervals in a number of institutions. At least 24 months of training in clinical neurosurgery must be obtained in one institution.
4. At least three months must be devoted to training in clinical neurology. Six months is recommended.
5. The unobligated 21 months may be devoted to neuropathology, neuroradiology, basic neurosciences, research, or other disciplines related to neurological surgery.
6. Exchange of residents between approved neurosurgical training centers in the United States and Canada may be arranged by the respective training program directors with the resident's consent. In such instances, the Secretary of the Board must be notified of this rotation before the exchange period begins. Such an exchange should in no way compromise any other training requirement. Training in any institution other than in the parent institution and its affiliated hospitals will not be considered as counting toward the requirements unless specified in advance by the program director and approved by the Board.
7. The program director must notify the Board of the appointment of each new neurosurgical resident and whether they are entering the program with intent to obtain certification and, if so, whether the director has informed the trainee of the requirements necessary to obtain such certification.
8. Residents in training after June 30, 1983 are required to record, in a fashion determined by the Board, their operative procedures.
9. Prior to acceptance for the certification process, the Board requires a statement from the candidate's program director to the effect that the candidate has met the minimum time requirements, has performed in training in a satisfactory manner and, in the judgment of the program director, is well prepared to enter into the independent practice of neurosurgery.

Exceptional Modifying Circumstances

Upon recommendation of the program director and ratification by the Board, credit may be given for previous training if a candidate:
1. Before entering an approved neurosurgical training program, has had substantially more than the prerequisite training in general surgery, medical neurology or the basic neurological sciences; such credit must be approved by the Board.
2. a) Transfers from one approved neurosurgical training program to another approved program with the consent of the directors of both programs, or
   b) Transfers from one approved neurosurgical training program to another approved program without the consent of one of the program directors, but with the approval of the Board for the transfer.

In the above cases, the director of the program from which the candidate transfers must indicate in writing to the new program director the credit for training, both in time and category, which he or she is prepared to certify that the candidate has successfully completed. A copy of such statement must be submitted to the Secretary of the Board. The new program director may or may not honor such credit, depending upon appraisal of the resident's professional and educational progress in the new program. A statement of how much training credit will be accepted must also be submitted to the Secretary of the Board.

Requests for training away from a parent institution or for transfer from one program to another should be submitted in writing to the Board prospectively, not retroactively.

Training by preceptorship is not considered as fulfilling certification requirements. No credit is given for time spent in such training.

Credit for partial training in foreign or other non-approved centers may be granted by the Board on an individual basis when this training is carried out as an integral part of the training program and with the advice and approval of the candidate's program director. The Board must be informed of such a rotation prior to its occurrence.

The above provisions in no way alter the basic minimum requirement of 60 months of residency training in neurosurgery, including a minimum of 3 months training in clinical neurology and 36 months of clinical neurosurgery in accredited institutions, 12 months of which must be as senior resident and 24 months in one institution.

Primary Examination

Each applicant for the Board's Oral Examination must first successfully pass for credit the Primary Examination, which is a written examination prepared by the Board with the assistance of a professional testing organization. The exam includes information on neuroanatomy,
Neurological Surgery

neurochemistry, neurology, neuropathology, neuropharmacology, neuropathology, neuroradiology, neurosurgery, fundamental clinical skills and material from other relevant disciplines deemed suitable and important by the Board.

The Primary Examination is given once each year, usually in March, at training programs throughout the U.S. and Canada.

Candidates and Diplomates may take the Examination as often as desired for either credit or self-assessment. Residents in an accredited training program may take it for credit at the discretion of their program directors. It is open for self-assessment to all neurosurgeons. It is open for credit or self-assessment to all neurosurgeons who have successfully completed training at accredited programs.

An application must be filed to take the Primary Examination. The deadline for receipt of this application by the Board is usually the first of January. The form must be accompanied by the fee set by the Board. This fee will be refunded only if the candidate informs the Secretary's office that he or she is not going to sit for examination prior to the deadline date for receipt of applications.

Examinees are required to sign a pledge which states that they agree to be bound by the Board's ruling regarding credentials irrespective of scores on the exam. By signing the pledge, candidates also grant permission to the American Board of Neurological Surgery and the testing organization to release the results, either credit or self-assessment, to the candidate's program director.

Candidates should keep in mind that they must be scheduled for Oral Examination by the Board within five years of passing the Primary Examination for credit or within five years of completing a formal training program, whichever occurs later. Compliance with this regulation requires early submission of applications for oral examination and certification once candidates finish training. If a candidate cannot be scheduled within the five year limit due to late submission of an application, he or she must once again pass the Primary Examination for credit before being scheduled for Oral Examination within the succeeding three year period. Candidates should also keep in mind that usually 18 months are required between submission of an application and Oral Examination.

Practice Requirements

Following completion of a neurosurgical training program, an additional period of at least two years of satisfactory practice of neurosurgical surgery is required prior to Oral Examination. Medical officers in the military may meet this practice requirement by hospital assignments in which their duties are limited to the practice of neurological surgery. After one year of practice, the candidate shall furnish to the Board the names of three physicians (one ABNS Diplomate) who are knowledgeable about the quality of the candidate's practice. The Board will request reference letters from these physicians. It is the prerogative of the Board to inquire of other physicians in the community and to send representatives to review the candidate's practice.

In addition to these letters, the candidate will submit either the names and addresses or actual letters from either the Medical Director of the hospital or the Chief of Staff at each hospital where the candidate has hospital privileges. These letters are intended to advise the Board of the candidate's status regarding admitting and operating privileges in each hospital where he/she practices.

Prior to Oral Examination candidates must forward to the Board a typewritten, chronological list of all inpatients for whom he or she has been the responsible physician or surgeon for 12 consecutive months. Information must include, but not be limited to:

a. Identifying hospital number and date of admission
b. Clinical diagnosis
c. Diagnostic procedures, if performed
d. Operations, if performed
e. Specific results, including all complications, and autopsy findings, if applicable, immediate and 3 months later.

No minimum volume of diagnostic or operative procedures is required. The total experience must be tabulated by the candidate in a format defined by the Board. This case material must be accompanied by a summary form signed by chief of staff, chief of service, president of the medical staff or hospital administrator of the hospitals where the candidate practices indicating the essential accuracy of the data.

These data must be approved by the Board prior to scheduling for Oral Examination.

Candidates are responsible for retaining duplicate copies of these records.

Certification of Those Training in Canadian Programs

Those satisfactorily completing approved Canadian training programs and holding a Fellowship in neurosurgery from the Royal College of Surgeons (Canada) are eligible for certification through the same route as candidates training in the United States and outlined above.

Applications

Applications for oral examination and certification are automatically sent to residents in June of their last year of training. Additional applications are available from the Board's office. The application and accompanying information should be filled out and returned to the Board as soon as possible after completion of training so that inquiries may be made from references, as well as from others in the community; the individual's training program faculty, and hospitals where the candidate practices.

A pledge is part of the application for oral examination. By signing the application, the applicant agrees to abide by all of the terms and conditions of this pledge.

Upon receipt of an application, the Board takes such steps as deemed appropriate to verify the statements of facts made in the application. Inquiries are made from references and others familiar with the candidate to obtain information relevant to the requirements for examination.

Prior to oral examination, each candidate must be in possession of hospital staff privileges in all hospitals in which he or she cares for patients. Such privileges must be unrestricted in respect to the hospital's requirements for a neurosurgeon.

The Board makes the final decision regarding a candidate's eligibility for oral examination and potential certification after considering all available information pertaining to the entire process of certification.

Applications must be typewritten.

Application fees, once received, will not be refunded.

Oral Examination

The oral examination is given two or three times a year. This is a clinical problem solving and patient management test. Candidates are given case histories and, where appropriate, x-rays, scans and other visual aids to augment the presentation and development of cases. The candidate must be able to explain verbally how he or she would proceed in evaluating and/or managing the case, and plan and perform the proposed operation or operations, if indicated. One hour is devoted to neurological surgery—intracranial disease; one hour to neurological surgery—spinal and peripheral nerve disease; and one hour to neurology. Each of the three hours is conducted in an interview setting with two examiners.
CERTIFICATION REQUIREMENTS

Nuclear Medicine

Requirements for Certification

A. General Requirements for Each Candidate
Assurance that the applicant represents himself/herself to be a specialist in nuclear medicine.

B. General Professional Education
Graduation from a medical school approved by the Liaison Committee on Medical Education or from a school of osteopathy. If the applicant is a graduate of a medical school outside the United States or Canada, he/she must hold a currently valid ECFMG certificate issued by the ECFMG, 2000 Pennsylvania Avenue, N.W., Suite 3500, Washington, D.C. 20037.

C. Preparatory Post-Doctoral Training
Training required for admission to the certifying examination in nuclear medicine shall be comprised of two or more years of preparatory post-doctoral training, and two or more years of residency training in nuclear medicine.

Preparatory post-doctoral training shall consist of two or more years of residency training in programs satisfactory to the American Board of Nuclear Medicine. Such programs shall provide broad experience in clinical medicine in which the primary emphasis is on the patient and his clinical problems. Preparatory training may be in any specialty in a residency program in the USA approved by the Accreditation Council for Graduate Medical Education (ACGME), or programs in Canada approved by the Royal College of Physicians and Surgeons of Canada, or the Professional Corporation of Physicians of Quebec. The American Board of Nuclear Medicine recommends that preparatory post-doctoral training should precede training in nuclear medicine. However, this preparatory post-doctoral training may be interspersed with or may follow the two years of nuclear medicine training.

Each nuclear medicine residency training program director must ensure that for each resident entering his program the preparatory post-doctoral training has been in a USA program approved by the ACGME, or in a Canadian program approved by the Royal College of Physicians and Surgeons of Canada (RCPS), or the Professional Corporation of Physicians of Quebec (PCPQ).

D. Special Post-Doctoral Training in Nuclear Medicine
1. After completion of the preparatory post-doctoral training programs, there shall be satisfactory completion of a two-year formal residency training program in nuclear medicine in a nuclear medicine residency training program recognized and approved by the Residency Review Committee for Nuclear Medicine and the ACGME or a Canadian program approved by the RCPS or the PCPQ as competent to provide a satisfactory training in nuclear medicine.

2. The two-year formal residency training program in nuclear medicine must include:
   a. A minimum of eighteen months of training in clinical nuclear medicine which will include, but not be limited to, radiobiology, in vitro and in vivo measurements, nuclear imaging, the principles of nuclear magnetic resonance imaging, therapy with unsalted radionuclides, medical management of individuals exposed to ionizing radiation, the safe management and disposal of radioactive substances, and the direction of radiation safety programs.
   b. Training in allied sciences which must include: medical nuclear physics, radiation biology, radiation protection, instrumentation, radiopharmaceutical chemistry, statistics, and computer sciences; and may also include pathology, physiology; and other basic sciences associated with nuclear medicine. The time spent in training in allied science may be spaced throughout the period of training in nuclear medicine and in a manner that does not exceed six complete months of training.
Nuclear Medicine

c. For candidates who have completed one or more years of residency in clinical disciplines closely related to nuclear medicine, a maximum of three months credit may be given for prior training in allied sciences (described in the preceding paragraph) if obtained during a residency in an AGME, RCPSC or PCPQ approved program. Likewise, a maximum credit of three months may be given for approved training in radiogram/y radiobiology, internal medicine or for training in ultrasound imaging and/or emission and transmission computed tomography. Regardless of the amount of training in fields allied to nuclear medicine, however, each candidate must satisfactorily complete a minimum of 18 months of clinical training in an AGME, RCPSC or PCPQ approved program in nuclear medicine. Credit may be given for prior clinical training in nuclear medicine, nuclear radiology, and radiotopic pathology obtained in programs approved by the AGME, RCPSC or PCPQ. Candidates desiring credit toward the nuclear medicine requirements should write to the Board requesting such credit.

3. The Board considers demonstration of clinical competence in the management of the nuclear medicine patient of paramount importance in its qualification of the applicant to take the certifying examination. The Board designates the directors of nuclear medicine residency programs and their supporting evaluation committees as the authorities who most appropriately can provide to the Board the necessary documentation of competence in clinical nuclear medicine, and requires that all program directors certify to the Board that each applicant from their programs is competent in clinical nuclear medicine. These reports will be reviewed by the Board before accepting an applicant to take the certifying examination.

If a residency program director’s evaluation indicates a candidate’s competence in clinical nuclear medicine is unsatisfactory, the applicant will not be admitted to the examination unless the Board finds that the applicant’s overall performance meets its standards. An applicant not admitted to an examination on the basis of these findings may appeal in writing to the Board for a special evaluation of competence in clinical nuclear medicine within 45 days of receipt of notification. The appeal should state that a request is made for review of the decision not to admit to the examination and why the candidate considers the decision to be in error. Applicants whose clinical competence is judged satisfactory in this evaluation will be admitted to the next examination for which they apply. Candidates judged not satisfactory in this evaluation are advised to spend an additional year training before applying again for special evaluation of competence.

Candidates submitting false credentials are subject to disqualification from examination or revocation of certification.

E. Patient Care Responsibility

Candidates for certification in nuclear medicine will have the equivalent of at least two years training in which the primary emphasis is on the patient and his clinical problems. This minimum period may be spaced throughout the entire post-doctoral training but should be of sufficient duration for the trainee to become knowledgeable in the aspects of clinical medicine relevant to nuclear medicine, including patient care.

F. Canadian Training

Physicians who satisfactorily complete training in Canadian nuclear medicine programs approved by the Royal College of Physicians and Surgeons of Canada or the Professional Corporation of Physicians of Quebec are eligible for admission to the ABNM certifying examinations.

G. Completion of Training

All preliminary and nuclear medicine residency training must be completed prior to September 1st of the year the candidate takes the certifying examination.

Approved Residency Training Programs

Residency training programs in nuclear medicine accreditation by the AGME may be found in the Directory of Graduate Medical Education Programs, published annually by the American Medical Association or may be obtained by contacting: Secretary, Residency Review Committee for Nuclear Medicine, AGME, 555 North Dearborn Street, Chicago, Illinois 60610.

Examination

An objective type examination is administered in a morning and an afternoon session. The examination evaluates the applicant’s knowledge and competence in the management of patients in the area of clinical nuclear medicine, including, but not limited to, radiogram/radiobiology, in vitro and in vivo measurements, nuclear imaging, the principals of nuclear magnetic resonance imaging, and therapy with unsealed radionuclides, the medical effects of exposure to ionizing radiation, the medical management of persons exposed to ionizing radiation, radiation safety, and the safe management and disposal of radioactive substances. Also included is an evaluation of the candidate’s knowledge in the related sciences of medical nuclear physics, radiation biology, radiation protection, instrumentation, radiopharmaceutical chemistry, computer sciences, and statistics; it may also include pathology, physiology, and other basic sciences associated with nuclear medicine.

Applications

Applications who wish to be examined by the Board must complete, sign and file with the Board office an application on the official form together with the supporting data required by the application. The applicant must enclose a check to cover the examination fee and a self-addressed postcard which will be returned to the applicant when all application materials have been received by the ABNM. It is the responsibility of the applicant to make certain that the required evaluation forms have been completed by his/her Program Director, and sent to and received by the ABNM.

As soon as determination is made concerning admission or nonadmission to the examination, the candidate will be notified by mail, and if admitted, assignment of the candidate number and notification of the examination site will be given.

Before the final action on applications, office, members, and employees of the Board are not authorized to estimate the eligibility of applicants. Applicants are requested not to discuss or write for opinions regarding the status of their application. The Board decides on eligibility to take the examination only by approving or disapproving individual applications, and accordingly has no “Board Eligible” category.

Inquiries concerning the applicability of previous training and experience must be sent with complete documentation of all education and training to the Board office. A copy of the Board’s response to these inquiries should be forwarded with any subsequent examination application.

Release of Information

Candidates will receive the results of their examinations (passfail letter) approximately four months after the examination.

A list of diplomates of the ABNM will be found in the ABMS Compendium of Certified Medical Specialists, published by the American Board of Medical Specialties and in the Directory of Medical Specialists, published by Marquis Who’s Who.

Upon request and with the approval of the Board Chairman, the Board releases information on diplomates to federal and state licensing
CERTIFICATION REQUIREMENTS

bodies and to educational and professional organizations for specific, limited, and appropriate professional use. An authorization for release of this information is a part of the examination application form.

Policy on Re-examination

Applicants who fail the examination are eligible for re-examination. Applicants who qualified for the 1976 examination, by fulfilling one of the alternative training requirements, but who failed or who withdrew for a valid reason may take a subsequent examination. An examination fee must accompany each completed application for re-examination. If an applicant is disqualified from the examination by reason of dishonesty in the application or in taking the examination and his/her examination is invalidated by the Board, re-examination shall be at the Board’s discretion.

Recertification

The ABNM offers its diplomates voluntary recertification based upon fulfillment of certain requirements including passing an objective cognitive examination. The ABNM will not rescind initial certification granted prior to 1992. Beginning in 1992, certification will be valid for a period of ten years and may be revalidated by recertification.

Journals Publishing Information on Application and Examination Schedules

*Annals of Internal Medicine* (Medical News Section)
*The Journal of the American Medical Association* (Examinations and Licensure Monthly Section)
*The Journal of Nuclear Medicine*
*Radiology*
*Journal of Clinical Pathology*

Changes in Policies and Procedures

The Board reserves the right to make changes in its fees, policies, and procedures at any time, and cannot assume responsibility for giving advance notice thereof. The provisions of this publication are not to be construed as a contract between any candidate and the American Board of Nuclear Medicine.

Fees

The examination fee must accompany the application. If the applicant is rejected by the Board, or withdraws prior to August 1, the application processing fee will be retained by the Board. If the applicant withdraws after August 1, the entire examination fee will be retained by the Board.

AMERICAN BOARD OF OBSTETRICS AND GYNECOLOGY

Albert B. Gerbie, MD, President, Chicago, Illinois
Moran A. Stench, MD, Vice President, Seattle, Washington
William Droegemueller, MD, Director of Evaluation, Chapel Hill, North Carolina
Robert C. Crescim, MD, PhD, Treasurer, Chapel Hill, North Carolina
Daniel R. Mishell, Jr., MD, Chairman of the Board, Los Angeles, California
Clarence E. Ehrlich, MD, Indianapolis, Indiana
Norman F. Gant, Dallas, Texas
Arthur L. Herbst, MD, Chicago, Illinois
Luella Klein, MD, Atlanta, Georgia
Mary J. O’Sullivan, MD, Miami, Florida
Edward E. Wallach, MD, Baltimore, Maryland

James A. Merrill, MD, Executive Director
4225 Roosevelt Way, NE, Suite 305
Seattle, Washington 98105
Deborah L. Burlett, EdD, Educational Associate, Troup, Texas
Joanne E. Smith, Assistant Executive Director, Seattle, Washington
Division of Gynecologic Oncology
Arthur L. Herbst, MD, Director and Representative, Chicago, Illinois
Barrie Anderson, MD, Iowa City, Iowa
Philip J. Disaita, MD, Orange, California
Wesley C. Fowler, Jr., MD, Chapel Hill, North Carolina
Paul B. Underwood, Jr., MD, Charlottesville, Virginia
Division of Maternal and Fetal Medicine
Norman F. Gant, MD, Director, Dallas, Texas
Steven G. Gabbe, MD, Columbus, Ohio
Larry C. Gilstrap III, MD, Dallas, Texas
Luella Klein, MD, Representative, Atlanta, Georgia
Michael T. Memutti, MD, Philadelphia, Pennsylvania
Division of Reproductive Endocrinology
Edward E. Wallach, MD, Director and Representative, Baltimore, Maryland
Eli Y. Adashi, MD, Baltimore, Maryland
Alan H. DeCherney, MD, New Haven, Connecticut
Howard L. Jud, MD, Los Angeles, California
Paul G. McDonaugh, MD, Augusta, Georgia

(EDITOR’S NOTE: These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Obstetrics and Gynecology to ascertain whether the information they have is current.)

Types of Board Status

1. Residency Graduate
   An individual for certification is registered with the Board when, upon application, the Board rules that he/she has fulfilled the requirements to take the written examination (see “Requirements” for the written examination).

2. Active Candidate
   A. An individual may achieve active candidate status by passing the written examination.
   B. To maintain active candidate status, the candidate must not have exceeded the limitations to admissibility for the oral examination (see “Limitations”).
   C. Active candidate status which has expired may be regained by repeating and passing the Board’s examination.

3. Diplomate Status
   A. An individual becomes a Diplomate of the Board when he/she has fulfilled all requirements, has satisfactorily completed the written and oral examinations and has been awarded the Board’s certifying diploma.
   B. Diplomates have limited duration of validity (see “Duration”).

The Certification Process

Certification as a specialist in obstetrics and gynecology is the end of a process lasting many years. The required minimum duration of graduate education is four years.

During the final year of graduate training, it is necessary to initiate certain measures. Because most graduate training programs begin on July 1 and end on June 30, the following summary of the certification process is based on these dates. However, applicants who complete
Obstetrics and Gynecology

Residency training at unusual times will have an extended time in the certification process.

Between September 1 and November 30 of the final year of residency, the candidate should request and complete the application for the written examination. If he/she is ruled admissible to the examination, he/she will do so in June of the final year of residency.

If he/she passes the written examination, the candidate enters a two-year period of practice in the specialty. The candidate is required to provide a list of patients under his/her care for a 12-month period beginning on July 1 of his/her second year of practice. Between January 1 and February 28 of his/her second year of practice, the candidate should request and complete the application for the oral examination.

The candidate may enter a 2-year Board-approved post-residency fellowship. Upon completion, this candidate will then enter a one-year period of practice in the specialty. This candidate is required to provide a list of patients under his/her care during this year of practice. Between January 1 and February 28 of this year of practice, the candidate should request and complete the application for the oral examination.

The candidate's list of patients must be mailed to the Board office between July 1 and August 15 following the completion of the 12-month period of patient care. If ruled admissible the candidate thus takes the oral examination in December.

Important Dates in the Certification Process

I. Final year of residency
   - July 1 — commence
   - September 1 — November 30 — Apply for written examination
   - June — Take written examination

II. Practice
   - A. First year of practice
     - No Board activities necessary
   - B. Second year of practice
     - July 1 to June 30 — Patient list
     - January 1-February 28 — Apply for oral examination
   - C. Third year of practice
     - August 15 — Deadline for submission of patient list
     - December — Take oral examination

III. Fellowship in Subspecialty
   - A. First year (fellowship)
     - No Board activities
   - B. Second year (fellowship)
     - No Basic Board activities
     - (September 1-November 30 — Apply for Subspecialty Written Examination)
   - C. Third year — First year of practice
     - July 1-June 30 — Patient list
     - January 1-February 28 — Apply for the oral examination
   - D. Fourth year — Second year of practice
     - August 15 — Deadline for submission of patient list
     - December — Take oral examination

Responsibility of a Candidate

It is the responsibility of the candidate to seek information concerning the current requirements for certification as an obstetrician and gynecologist. The Board does not assume responsibility for notifying a candidate of changing requirements or the impending loss of his/her admissibility to an examination.

The Written Examination

The Written Examination is a 3 1/3 hour examination consisting of questions of the objective (multiple choice) type. Questions will be chosen from each of the following areas of knowledge:

A. Anatomy, Embryology and Genetics.
B. Physiology.
C. Endocrinology, Fertility and Infertility.
D. Gynecology.
E. Obstetrics.
F. Medicine, Surgery and Psychosomatic Problems.
G. Pathology.
H. Oncology.

The candidate will be expected to demonstrate skills necessary to apply basic knowledge to the management of clinical problems. These skills include:

1. Obtaining needed information.
2. Interpretation and use of data obtained.
5. Following and continuing care.

The areas of information and skills examined for are further outlined in "Educational Objectives for Resident Education in Obstetrics and Gynecology" published by the Council on Resident Education in Obstetrics and Gynecology.

Requirements

1. Degree of Doctor of Medicine, or an equivalent degree, and unrestricted license (not educational or institutional) to practice medicine in one of the states or territories of the United States or a province of Canada.

   The REQUIREMENT OF UNRESTRICTED LICENSE MUST HAVE BEEN MET PRIOR TO THE TIME THAT THE APPLICATION IS SUBMITTED. AN EDUCATIONAL OR INSTITUTIONAL LICENSE IS NOT SATISFACTORY.

   Candidates with a D.O. degree must have graduated from a school of osteopathy accredited by the American Osteopathic Association.

2. The candidate will be required to have completed or be near completion (see "Application") of no less than four years in clinical programs accredited by the Accreditation Council for Graduate Medical Education or the Council of the Royal College of Physicians and Surgeons of Canada. This must include a least 36 months of obstetrics and gynecology including the usual time as chief (senior) resident in the program. Completion of a year of "PG 1" plus a three year residency program, or a four year residency program will fulfill this requirement, but if the program consists of more than four years, the entire program must be completed.

   TIME SPENT IN AN OSTEOPATHIC HOSPITAL OR IN ANY PROGRAM NOT ACCREDITED BY THE ACCREDITATION COUNCIL FOR GRADUATE MEDICAL EDUCATION WILL NOT FULFILL THIS REQUIREMENT.

3. A statement signed by the program director certifying that the candidate has:

   a. followed satisfactorily the course of instruction designed for this program;
   b. completed and submitted to the program director a satisfactory resident experience log;
   c. achieved the appropriate knowledge, ability, and judgment in order to provide competent clinical care in obstetrics and gynecology, as documented by ongoing evaluation during the entire resident program;
   d. demonstrated the necessary technical skills to competently perform:

   1. major abdominal and vaginal surgical procedures upon the female pelvis and related structures,
   2. spontaneous and operative obstetric deliveries,
   3. surgical exploration of the abdomen,
   4. endoscopic procedures in the pelvis,
(5) diagnostic evaluation including electronic monitoring, ultrasound, colposcopy and amniocentesis;
(6) diagnosis and treatment of complications of the above, and
e. demonstrated good moral and ethical character.

Application for Examination in 1991

A candidate who has completed an accredited residency program and a candidate scheduled to complete an accredited residency program on or before August 31, 1991 may apply on or before November 30, 1990 to write the examination on June 24, 1991.

THE REQUIREMENT OF UNRESTRICTED LICENSE MUST HAVE BEEN MET PRIOR TO THE TIME THAT THE APPLICATION IS SUBMITTED. AN EDUCATIONAL OR INSTITUTIONAL LICENSE IS NOT SATISFACTORY.
The form on which to apply to write the examination on June 24, 1991 may be obtained by writing to the Board office after September 1, 1990. Each applicant must meet the requirements effective in the year he/she requests admission to the examination. As a part of the application form endorsement and verification of the resident's experience, competence, SATISFACTORY PERFORMANCE AND confirmation of the scheduled date for completion of the candidate's residency are requested of the director of the obstetric-gynecologic residency program.

The Board will make the final decision concerning the applicant's admission to the examination after considering all circumstances affecting his/her situation.

A candidate's application to write the examination on June 24, 1991, completed in all detail, together with payment of the application fee of $125, must be received in the Board office postmarked on or before November 30, 1990. A copy of the candidate's current license registration and two passport-type photographs also are required.

THE REQUIREMENT OF UNRESTRICTED LICENSE MUST HAVE BEEN MET PRIOR TO THE TIME THAT THE APPLICATION IS SUBMITTED. AN EDUCATIONAL OR INSTITUTIONAL LICENSE IS NOT SATISFACTORY.

When the candidate is ruled admissible to the examination he/she will be notified in early April (1) that the $300 examination fee is payable and (2) the date the fee must be paid (see "Fees"), if the candidate is to be scheduled to write the examination in June.

If a candidate is found to be involved in litigation or investigation regarding ethical or moral issues, he/she will not be scheduled for examination and the application will be re-examined. Typically the Credentials Committee will defer such a decision for one year to gain further information.

Falsification of data (including case lists) or evidence of other egregious ethical, moral or professional misbehavior may result in a denial of consideration of a candidate's application for at least three years and the candidate must meet all eligibility requirements in effect at the end of the deferred period.

When the Credentials Committee rules an applicant not admissible to the written examination, a new application and fee may be submitted at a later date, but the candidate must then have fulfilled the requirements effective in the year of the new application.

Admission to the Written Examination

The candidate ruled admissible to the examination will be sent an AUTHORIZATION for ADMISSION form which must be presented to the Proctor at the time and place of examination. When a candidate is scheduled to complete his/her residency program after submission of the application (but before September of that year), verification of the currently satisfactory manner in which the candidate is completing his/her residency must be reaffirmed by the signature of the director of the residency program on the AUTHORIZATION for ADMISSION form, dated within the month the candidate is scheduled to write the examination.

Obstetrics and Gynecology

Results of the Examination

The results of the examination written in June will usually be reported to each candidate in approximately nine weeks.

A passing grade on the written examination does not establish a candidate's admittance to the oral examination for certification. (See "Requirements to Take the Oral Examination.")

Requests for Re-examination

A candidate previously scheduled to write the examination who fails to do so, as well as the candidate who writes but fails to pass a previous examination must write the Board office after September 1, 1990 to request reapplication materials for the 1991 examination. It is necessary for each applicant to meet the requirements effective in the year he/she requests admission to the examination. Reapplicants must have submitted completed reapplication materials, a copy of current license registration and two passport-type photographs, as well as the reapplication fee of $125, prior to the November 30, 1990 deadline.

The application fee and examination fee (see Fees) must be paid each year a candidate is to be scheduled to write the examination.

The Oral Examination

(All correspondence, applications and information directed to the Board must be in English.)

(All fees must be paid in U.S. currency.)

The Oral Examination is designed to evaluate the candidate's knowledge and skills in solving clinical problems in obstetrics-gynecology. It is emphasized that candidates will be examined in all areas of obstetrics and gynecology. More than half of the examination will consist of questions concerning patient management problems. The candidate's list of patients will be used freely by the examiners for this purpose but additional basic clinical problems will be included. The remainder of the examination will include recall of basic knowledge in obstetrics-gynecology and interpretation of gross and microscopic pathology, x-rays films, sonograms and related material from photographic slides.

Microscopes and slide projectors will be used. The knowledge and skills required for the Oral Examination are the same as those listed in regard to the Written Examination.

Recording devices will not be permitted during the oral examination. Candidates will be expected to demonstrate that they have acquired the capability to perform, independently, major gynecologic operations, spontaneous and operative obstetric deliveries, to manage the complications thereof and to perform the essential diagnostic procedures required of a consultant in obstetrics and gynecology.

CANDIDATES WILL BE EXPECTED TO DEMONSTRATE A LEVEE OF PERFORMANCE WHICH ALLOWS THEM TO SERVE AS CONSULTANTS TO PHYSICIANS WHO ARE NON OBSTETRICIAN-GYNECOLOGISTS IN THEIR COMMUNITY.

The report of the examining team will be reviewed by the Board of Directors and each candidate is passed if/failed by vote of the Board.

You can expect the examination to be completed within a half day, with the following exception:

At the completion of the oral examination—if a candidate believes his or her examination has not been conducted in a fair and unprejudiced manner, the candidate may report within the hour to the Board Office staff and ask for a second examination. If the appeal is granted:

a. A second examination will be provided at the next regularly scheduled annual oral examination at no additional charge.

b. The repeat examination will be conducted by an entirely different team of examiners, no one of whom shall have previously participated in an examination of the candidate.
Obstetrics and Gynecology

c. Neither the questions nor the candidate's answers on the first examination will be known to or taken into account by the second group of examiners.

d. The decision of the examiners conducting the second examination shall determine the results of the candidate’s oral examination.

Requirements

1. Passing grade on the written examination.
2. Good moral and ethical character.
3. Unrestricted license to practice medicine in one of the States or Territories of the United States or a Province of Canada, since at least February 28, 1990.
4. Actively engaged in (private or nonprivate) unsupervised practice.
   a. Independent unsupervised patient care limited to obstetrics and gynecology.
   1) for at least the time from February 18, 1990 through June 30, 1991 (time spent in a Critical Care fellowship does not meet this requirement) or
   2) for at least the time from July 1, 1990 through June 30, 1991, for candidates who have successfully completed a Board-approved fellowship (this includes Critical Care fellowship ONLY if taken in continuity with a Board-approved specialty fellowship).
   b. Unrestricted hospital privileges to practice as an obstetrician-gynecologist since at least 1 July 1990. Such privileges must be granted in each of the hospitals in which the candidates has been responsible for patient care during this time. If the candidate is under investigation or on probation, the examination will be deferred until the investigation is completed, the probation is lifted and full and unrestricted privileges are granted.
5. Submission of typewritten lists (in duplicate) on or before August 15 preceding the examination, of all patients dismissed from care in all hospitals during the 12 months ending June 30 prior to the scheduled examination and also a list of 25 patients from ambulatory (office) practice.
   THE CANDIDATE IS PERSONALLY RESPONSIBLE FOR THE PROPER PREPARATION, ACCURACY AND COMPLETENESS OF THE CASE LISTS, WHICH WILL REFLECT THE UNSUPERVISED PRACTICE (PRIVATE OR NONPRIVATE) ACTIVITY FOLLOWING RESIDENCY AND FELLOWSHIP.
6. On the day of the examination the candidate will be expected to sign the following statement: “There have been no restrictions in my hospital privileges since the date of my application.” Candidates who are unable to sign this statement will not be admitted to the examination until and unless they present evidence that full and unrestricted privileges have been restored.
7. Practice which consists of ambulatory care exclusively will not be considered adequate to fulfill these requirements.
   ADDITIONAL REQUIREMENTS FOR CANDIDATES PRACTICING IN A COUNTRY OTHER THAN THE UNITED STATES OR CANADA;
8. Submission with the application of a letter(s) from a senior responsible officer in the hospital(s) where the candidate practices, verifying the candidate’s responsibility for independent, unsupervised care of obstetric and gynecologic patients.

Limitations

Duration of active candidate status is limited. Candidates must pass the oral examination within six years following passing the written examination and may take the oral examination only three times. If they fail the oral examination three times, or fail to pass the oral examination within six years, they become ineligible to repeat the examination at that time. They must repeat and pass the written examination to become admissible to the oral examination again. The repeat written examination may be taken only three times.

Candidates who fail the repeat written examination three times are no longer admissible for the examinations of The American Board of Obstetrics and Gynecology unless they successfully repeat a full residency in an accredited program in obstetrics and gynecology.

Candidates who do pass the repeat examination may repeat the oral examination only three times. If they fail the oral examination three times they will no longer be admissible for the examinations of The American Board of Obstetrics and Gynecology. Admissibility may be re-established only by successfully repeating a full residency in an accredited program in obstetrics and gynecology—a minimum of 36 months including 12 months as chief resident.

Determination of Qualifications

The Board will require, by confidential inquiry, documented evidence concerning a candidate’s professional reputation, moral and ethical character and in-hospital practice privileges from administrative officers of organizations and institutions to whom the candidate and his/her conduct of practice is known.

Time as a “resident” or “house officer” in excess of that necessary to fulfill the requirements to take the written examination or time in a “student” or a teaching or research appointment which does not involve appointment to the staff of an approved hospital with unrestricted privileges to practice as an obstetrician and gynecologist, will not be acceptable evidence of a degree of responsibility for patient care that is acceptable fulfillment of the required “independent practice.”

Each candidate will be required to furnish the Board with certain prescribed information concerning his/her performance in practice (maternal mortality rate—perinatal mortality rate—Caesarean Section rate—etc.).

If a candidate is found to be involved in litigation or investigation regarding ethical or moral issues, he/she will not be scheduled for examination and the application will be re-examined. Typically the Credentials Committee will defer such a decision for one year to gain further information.

Falsification of data (including case lists) or evidence of other egregious ethical, moral or professional misbehavior may result in deferral of consideration of a candidate’s application for at least three years and the candidate must meet all requirements in effect at the end of the deferred period.

PATIENT LISTS (a) NOT PROVIDING THE INFORMATION REQUESTED (b) NOT PREPARED IN ACCORDANCE WITH THE FORMAT REQUESTED OR (c) WHICH DO NOT HAVE ADEQUATE NUMBERS OF PATIENTS OR DO NOT INCLUDE ADEQUATE BREADTH AND DEPTH OF CLINICAL PROBLEMS MAY DISQUALIFY THE CANDIDATE FOR ADMISSION TO THE ORAL EXAMINATION.

Application for Examination in 1991

Application to take the oral examination in December 1991 must be made on the “application for the 1991 examination” form. The application, complete in all details, with payment of the application fee of $225, and two passport-type photographs, must be received in the Board office during January or February 1991. THE DEADLINE DATE FOR RECEIPT OF APPLICATIONS IN THE BOARD OFFICE IS A POSTMARK OF FEBRUARY 28, 1991. REQUESTS FOR THE APPROPRIATE FORM MUST BE MADE IN WRITING.

The Board will make the final decision concerning the applicant’s admission to the oral examination after considering all circumstances affecting his/her situation.
Obstetrics and Gynecology

Standard nomenclature should be used. Abbreviations are not acceptable. Only English language will be acceptable.

The duplicate lists of patients will not be returned after the examination. The candidate should bring a duplicate list to the examination.

1. GYNECOLOGY

A list of all gynecologic patients—(a) hospitalized (b) ambulatory or short-stay surgery—should be prepared in the format accompanying the application listed in order as follows:

1) major operative procedures
2) minor operative procedures
3) non-surgical admissions

The preoperative diagnosis should appear for all major and minor surgical procedures. For non-surgical conditions the admission diagnosis should be recorded. The treatment recorded should include all surgical procedures as well as primary nonsurgical therapy. Surgical diagnosis refers to the pathology diagnosis. FOR HYSTERECTOMY SPECIMENS THE UTERINE WEIGHT IN GRAMS MUST BE RECORDED. In cases without tissue for histologic diagnosis the final clinical diagnosis should be listed.

Days in hospital on this listing of patients, as well as on all other lists, is the arithmetic difference between date of discharge and date of admission.

2. OBSTETRICS

A list of obstetric patients should be prepared in the format accompanying the application. List separately each patient with a complication or abnormality, as well as medical and surgical intervention during pregnancy, labor, delivery and the puerperium. In addition, a total of the number of normal, uncomplicated obstetric patients, managed during the same 12 month period should appear at the end of the obstetric list.

Interpretation of "normal obstetric patients" for this listing implies that:

- Pregnancy, labor, delivery and the puerperium were uncomplicated, labor began spontaneously between the 37th and 42nd week of gestation.
- The membranes ruptured or were ruptured after labor began.
- Presentation was vertex, position was occiput anterior or transverse.
- Labor was less than 24 hours in duration.
- Delivery was spontaneous or by outlet forceps with or without episiotomy, from an anterior position.
- The infant was not asphyxiated (Apgar 6 or more), of normal size and healthy.
- The placental stage was normal and blood loss was not excessive.
- Deliveries not fulfilling these criteria must be listed individually.

3. PREGNANCY TERMINATIONS

The total number of uncomplicated terminations of pregnancy of twelve or less weeks duration, managed during this same 12 month period, should be reported simply as a total number.

Interruptions of pregnancy of more than twelve weeks (menstrual age) duration should be prepared in the format accompanying the application. List each patient separately, indicating the duration of pregnancy, the technique employed, the duration of (1) hospitalization, and/or (2) your observation of the patient.

Also list separately as individual patients, all with complications following terminations of pregnancy, either observed or reported to you following an interruption of pregnancy, regardless of the duration of the pregnancy when termination was initiated.
Obstetrics and Gynecology

4. COVER SHEETS
Each list of patients, (1) gynecologic, (2) obstetric, and (3) terminations of pregnancy, from each hospital should be verified as illustrated by the form accompanying the application. Note that the record librarian or other hospital official must attest that (a) the patients listed were cared for by the candidate, and (b) that all of the hospitalized patients dismissed from the candidate's care have been separately listed or reported in the totals reported for the period indicated.

5. SUMMARY SHEET
Using the form provided for this purpose, prepare a summary of all cases for all hospitals combined.

6. AMBULATORY (OFFICE) PATIENTS:
A list of 25 patients from the candidate's ambulatory (office) practice should be prepared in the format accompanying the application. List separately patients who have presented with any of the following problems. List no more than five patients from any one category.

- Genetic Problems
- Amenorrhea
- Infertility
- Abnormal Uterine Bleeding
- Developmental Problems
- Sexual Dysfunction
- Contraception Complications
- Hirsutism
- Abnormal Cervical-Vaginal Cytology
- Pelvic Pain
- Vaginal Discharge/Pruritus
- Breast Problems
- Medical Complications of Pregnancy
- Premenstrual Tension
- Postoperative Problems
- Sexually Transmitted Disease
- Asymptomatic Pelvic Mass
- Pelvic Relaxation Problems
- Urinary Tract Infection
- Psychosomatic Problems
- Menopause

List separately each patient and include the problem (one of the listed categories), diagnostic procedures, treatment, results and number of office visits during the 12 month period.

Admission to the Oral Examination

If the examination fee has been paid AND the duplicate lists of patients have been submitted by August 15, 1991, the candidate will receive an Authorization for Admission Form and a Reservation Card for the date at least one month prior to the examination, indicating the day, time and place to report for the examination. PLEASE KEEP US INFORMED OF YOUR CURRENT MAILING ADDRESS.

Ruling Not Admissible

A candidate not admitted to an oral examination, may subsequently re-apply, but must then submit a new application, pay the application fee, and meet the requirements applicable at the time he/she re-applies.

If the candidate was disqualified because the case lists were judged insufficient for a fair examination, the new case lists will be added to those already submitted. Thus the requirement of sufficient numbers, breadth and depth in the case list makes time in practice the variable and experience the constant.

Re-examinations

A candidate who is disqualified or who fails to pass the oral examination must re-apply in order to take the examination another year by submission of a new application during January or February, with payment of the reapplication fee of $225.

A candidate reapplying for re-examination will again be asked to provide verification of his/her responsibilities for patient care and will again be notified, early in July in regard to his/her admittance to the next examination.

A candidate accepted for re-examination must again submit, on or before August 15 prior to examination, new case lists of patients for the 12 months prior to June 30 prior to the oral examination.

The examination fee of $375 is due each time a candidate receives notice that he/she can be scheduled to take the oral examination. Each re-examination will be conducted by examiners who have no knowledge of the fact or circumstances of a candidate's previous failure.

Postponement of Oral Examination

A candidate failing to take an oral examination for which he/she had been scheduled must submit a new application during January or February of the following year when his/her admittance to the next examination will be determined on the basis of the candidate's professional activities as reported during the current year. Payment of the $225 re-application fee must accompany each re-application.

If notified of his/her admittance to the next oral examination he/she must again submit, before August 15 a listing of all patients dismissed from his/her care in all hospitals during the 12 months ending June 30 prior to the oral examination and a list of 25 patients from ambulatory (office) practice.

Fees

Since the fees have been computed to cover the costs of examination and administrative expense, they will not be refunded or credited. All fees must be paid in United States currency. The candidate's canceled check is to be considered the receipt.

The Written Examination

The application fee of $125 must be enclosed with each application, reapplication or request to write the examination. The candidate will usually be notified early in April that his/her application or request has been approved, at which time the $300 examination fee will be due. If payment of the examination fee has not been received in the Board office postmarked on or before May 1, the candidate will not be scheduled to write the examination in June.

No application fees will be either credited against a future application or refunded.

Examination fees may be refunded provided candidates inform the Board office of their inability to write the examination prior to June 1.

The Oral Examination

The application fee of $225 must be enclosed with each application to take the oral examination. A candidate notified in mid-July of his/her admittance to the oral examination in December is required to pay the $375 examination fee before he/she will be scheduled to take the oral examination. If the examination fee has not been received in the Board office postmarked on or before August 15, the candidate will not be scheduled to take the examination the following December.

No application fees will be either credited against a future application or refunded.

Examination fees may be refunded provided candidates inform the Board office of their inability to write the examination prior to October 31.
Listings of Certified Diplomates

Each year the Board office notifies the American College of Obstetricians and Gynecologists of the names and addresses of the Diplomates certified in that year. A list of the names of the most recently certified Diplomates is sent also to the American Medical Association and to the American Board of Medical Specialties with the request that they be included in the next issues of (1) the American Medical Association Directory and (2) in the Directory of Certified Obstetrician-Gynecologists.

A candidate's name will be included in the lists to be published only if the candidate has authorized inclusion of his/her name in the specific listings by signing accordingly on the Authorization for Admission Form at the time of his/her oral examination.

After this effort to assure initial listings of the newly certified Diplomate, the Board assumes no responsibility for a Diplomate's listing in subsequent issues of any Directory.

Revocation of Diploma or Certificate

Each candidate, when making application, signs an agreement regarding disqualification or revocation of his/her diploma, certificate, or other evidence of qualification for cause. Revocation may occur whenever:

1. The physician shall not now be unemployed or ready to receive the diploma or certificate, irrespective of whether or not the facts constituting such ineligibility were known to or could have been ascertained by this Board, its members, directors, examiners, or officials at or before the time of issuance of such diploma or certificate.

2. Any rule governing examination for a diploma or certificate shall have been violated by the physician but the fact of such violation shall not have been ascertained until after the issuance of his diploma or certificate.

3. The physician shall have violated the moral or ethical standards of the practice of medicine then accepted by organized medicine in which he/she shall be practicing and, without limitation of the foregoing, the forfeiture, revocation or suspension of his/her license to practice medicine, or the expulsion from, or suspension from the rights and privileges of membership in a local, regional or national organization of his/her professional peers shall be evidence of a violation of such standards of the ethical practice of medicine.

4. The physician shall fail to comply with the rules and regulations of this Board.

5. The issuance of, or receipt by him/her of such diploma, certificate or other evidence of qualification shall have been contrary to or in violation of the Certificate of Incorporation or the By-laws of this Board.

Upon revocation of any diploma or certificate by this Board as aforesaid, the holder shall return his/her diploma or certificate and other evidence of qualification to the Executive Director of the Board and his/her name shall be removed from the list of certified specialists.

AMERICAN BOARD OF OPHTHALMOLOGY

Ronald M. Burde, MD, Chairman, Bronx, New York
William Tasman, MD, Vice Chairman, Philadelphia, Pennsylvania
Douglas R. Anderson, MD, Miami, Florida
W. Banks Anderson, MD, Durham, North Carolina
George R. Beauchamp, MD, Cleveland, Ohio
J. Brooks Crawford, MD, San Francisco, California
Robert C. Drews, MD, Clayton, Missouri
John T. Flynn, MD, Miami, Florida
George Edw. Garcia, MD, Boston, Massachusetts
B. Thomas Hutchinson, MD, Boston, Massachusetts
John L. Kelner, MD, Davis, California

Malcolm N. Luxenberg, MD, Augusta, Georgia
Denis M. O'Day, MD, Nashville, Tennessee
Dennis M. Robertson, MD, Rochester, Minnesota
Ronald F. Smith, MD, Los Angeles, California
H. Stanley Thompson, MD, Iowa City, Iowa
William H. Spencer, MD, Executive Director
Philadelphia, Office of the Board
111 Presidential Blvd.
Bala Cynwyd, Pennsylvania 19004

(EDITOR'S NOTE: These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Ophthalmology to ascertain whether the information they have is current.)

Governing Rules and Regulations

The Board's Rules and Regulations, which are subject to change from time to time without notice, contain specific provisions concerning eligibility for the examinations administered by the Board; an admission appeals process, which is available under certain circumstances; the application process; the examination processes; a description of the circumstances under which an applicant will be required to revalidate an existing application, or submit a new application, or repeat part or all of an examination; a list of occurrences that could lead the Board to revoke a certificate previously issued by it to a Diplomate or to place the Diplomate on probation; and other matters relating to the Board's examination and certification processes. Many, but not all, of these provisions are summarized or described in this publication. In the event of any inconsistency between the Board's Rules and Regulations and this publication, or any omission from this publication of any provision of the Rules and Regulations, the Rules and Regulations shall govern. Copies of the Rules and Regulations are available upon request from the Board's Executive Office.

Requirements

Many physicians write to the Board outlining their training and asking for an estimate of their qualifications and whether further training is required. The Board's requirements, as published herewith, provide this information and any potential applicant should be able to estimate his/her status after studying these requirements. Individual officers or Directors of the Board cannot and will not make such determinations. All evaluations of an applicant's status will be made by the Committee on Admissions in accordance with the rules and regulations of the Board, after submission of an application for examination and payment of the registration fee, which must accompany the application. Personal interviews with officers and Directors of the Board should not be requested at any time.

It is the responsibility of the candidate to seek information concerning the current requirements for certification as an ophthalmologist. The Board does not assume responsibility for notifying a candidate of changing requirements or the impending loss of his/her eligibility to take an examination.

Educational

All candidates must have graduated from a medical school or from a school of osteopathy.

All candidates entering ophthalmology training programs must have taken a postgraduate clinical year (PG-1) in a program accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada. The PG-1 year must be comprised of training in which the resident has primary responsibility for patient care in fields such as internal medicine, neurology, pediatrics, surgery, family practice, or emergency med-
Ophthalmology

As a minimum, six months of this year must consist of a broad experience in direct patient care.

In addition to a PG-1 year, all applicants must have satisfactorily completed an entire formal graduated residency training program in ophthalmology of at least thirty-six (36) months duration (PG-4 or better) in either the United States, accredited by the Accreditation Council for Graduate Medical Education, or in Canada approved by the Royal College of Physicians and Surgeons of Canada.

The applicant's chairman is required to verify satisfactory completion of an entire formal graduated ophthalmology residency training program of at least thirty-six (36) months duration.

When a resident's graduate education and clinical experience has been gained in more than one residency program, each Chairman will be required to complete a satisfactory completion form. Less than six month's service in an accredited program is not acceptable as a part of the required training in ophthalmology. The Chairman's verification form(s) cannot be submitted to the Board until the applicant has completed the entire residency training program.

If a program is disapproved or withdrawn during the course of a resident's training, he/she must complete the remaining required number of months of training in another accredited program. Only those applicants who have completed their entire ophthalmology training program, PGY 4 or beyond, by August 1st are eligible to apply for the Written Qualifying Examination given in April of the following year.

Licensure

An applicant may have graduated from a medical school of a country other than the United States or Canada. Graduates of foreign medical schools must have a certificate from the Educational Commission for Foreign Medical Graduates (ECFMG).

All applicants including those in the military must also have a valid and unrestricted license to practice medicine in the place or places in which the practice of medicine is regularly conducted in the United States, its territories or Canada. Applicants must reveal if a license in any state or province has previously been restricted or revoked.

Applications

An applicant who wishes to be examined by the Board shall complete, sign, and file with the Executive Director an application on the official form then in use by the Board. The application shall be considered complete only when all supporting data required by the application including the chairman's verification form are also filed with the Executive Director. Applications can be obtained from the chairman of accredited residency programs or from the Office of the Board. If an applicant wishes to be considered for a Written Qualifying Examination to be conducted in a particular year, his or her application and all supporting data, including supporting data furnished directly by others with respect to the applicant, must be postmarked between January 1st and August 1st except for the chairman's verification form which must be postmarked on or before October 1st of the calendar year immediately preceding the calendar year in which the Written Qualifying Examination is to be conducted.

By paying a late fee the deadline for postmarking the completed application may be extended from August 1st to September 1st. No other exceptions to, or extensions of, these requirements will be made for any reason. The dates of future examinations will be announced in Ophthalmology and the Journal of the American Medical Association.

An applicant who does not receive notification from the Board office by January 15 of the acceptance or rejection of his or her application must contact the Board office in writing to inquire about the status of the application. Failure to contact the Board office in writing by February 15 will result in such applicant's removal from the examination roster.

If a completed application and all required supporting data are not timely postmarked the application will not be valid, and the application fee shall be returned. It is best not to mail application materials just before the postmark deadline because packets are sometimes postmarked a day or two after mailing. Caution: If there is a discrepancy between a metered postmark and an official U.S. Postal Service postmark, the later will be considered official.

The application shall be accompanied by a check payable to the Board for the application fee. No application will be considered to be complete until the fee and all required supporting data, including a copy of your current registration to practice medicine and two recent photographs for identification at the written qualifying examination and the oral examination, have been received by the Executive Director.

Fees

Review of application and registration for Written Qualifying Examination, $65, payable with application.

Late application fee after August 1st, $50.

Oral examination, $540, payable on successful completion of the Written Qualifying Examination.

To repeat the Written Qualifying Examination, $45.

To repeat the entire oral examination, $450.

To repeat a single subject of the oral examination, $245.

To repeat two or three subjects of the oral examination, $365.

Fees for accepted candidates for the written qualifying examination and the oral examination are not refundable. The fees for examinations shall be established annually by the Board of Directors on the basis of the actual and anticipated costs of the Board in the examination of applicants and the administration of its business. The Directors of the Board serve without compensation except for reimbursement of expenses.

Cancellations

To cover the administrative expenses an additional charge equal to fifty percent of the original fee for the particular examination will be imposed on any applicant who cancels or fails to keep an examination assignment, written or oral, regardless of reason.

Written Qualifying Examination

In order to qualify for an oral examination, each applicant must pass a Written Qualifying Examination. This is a multiple choice test which may cover any topic in ophthalmology and is especially devoted to the following subjects:

1. Optics, Refraction and Contact Lenses
2. Retina, Vitreous, and Uvea
3. Neuro-ophthalmology
4. Pediatric Ophthalmology
5. External Disease and Cornea
6. Glaucoma, Cataract and Anterior Segment Dysfunction
7. Plastic Surgery and Orbital Diseases
8. General Medicine
9. Ophthalmic Pathology

The Ophthalmic Pathology portion of this examination is given in a different format. Slides are projected depicting the gross and histopathologic appearance of several ocular and ocular adnexal disorders as well as of normal structures. Candidates will be expected to recognize and identify these entities. In addition, some questions within the nine subject areas will be oriented toward ophthalmic pathology.

The examination has also been described in the Board's booklet entitled "Written Qualifying Examination."

The Written Qualifying Examination is given simultaneously in designated cities in the United States in April of each year.
CERTIFICATION REQUIREMENTS

Ophthalmology

An applicant who, on three (3) consecutive occasions, fails to take a Written Qualifying Examination for which the applicant is scheduled will not be permitted to apply for a subsequent Written Qualifying Examination until twenty-four (24) months have elapsed following the date of the last examination for which the applicant was scheduled but which he or she failed to take.

In addition, an applicant who fails the Written Qualifying Examination may apply for re-examination and will be permitted to repeat the test upon payment of the current re-examination fee.

Oral Examinations

Upon successful completion of the Written Qualifying Examination, applicants will be sent specific instructions for registration for the Oral Examination. A check payable to the Board for the amount then in effect for the Oral Examination must accompany the completed registration form and be forwarded to the Board office within the appropriate time frame.

Change in Oral Examination Schedule

It has been the custom of the Board to hold two oral examinations a year with candidates who have passed the April Written Qualifying Examination assigned either to a group taking the Oral Examinations in the Fall of that year, or to a group taking the Oral Examinations in the Spring of the following year. Thus candidates who passed the April 1990 Written Qualifying Examination were assigned to take the Oral examinations either in November 1990 or in May 1991.

Commencing in November 1991 the Oral Examinations will be held only once each year. All candidates passing the April Written Qualifying Examination will be scheduled for the Fall Oral Examination.

Oral Examination Subjects

The Oral Examination will be divided into the subjects listed and described in the following paragraphs. All subjects are given by appointment within a half day period utilizing a panel system. Information about the examination procedures and scheduling is sent to all candidates after they have been registered for the Oral Examinations.

Subjects

The oral examination is divided into the following subjects:
1. Optics, Refraction and Visual Physiology
2. Pediatric Ophthalmology and Strabismus
3. Neuro-ophthalmology and Orbit
4. External Eye and Adnexa
5. Anterior Segment of the Eye
6. Posterior Segment of the Eye

In each of the oral examinations emphasis is placed upon recognition of depicted or described abnormalities and diseases that affect the eye, ocular adnexa and the visual pathways, and upon the ability of the candidate to synthesize clinical, laboratory, and histopathologic data in order to arrive at a correct diagnosis and differential diagnosis. Candidates are expected to provide a reasonable and appropriate plan for medical and/or surgical management of patients with the conditions depicted or described. These examinations include developmental, dystrophic, degenerative, inflammatory, infectious, toxic, traumatic, neoplastic, and vascular diseases affecting the eye and its surrounding structures.

1. Optics, Refraction and Visual Physiology

Candidates should be familiar with the basic principles of physical and geometrical optics and the operation of standard optical instruments. They should understand the essentials of visual physiology including visual acuity, light and dark adaptation, accommodation, and color vision. They should know the various forms of ametropia, principles and techniques of refraction, principles of lens design, and methods of correction of ametropia including spectacles, contact lenses, intraocular lenses and keratorefractive surgery. Candidates should be familiar with the methods for prescribing protective lenses, absorptive lenses, and aids for low vision.

2. Pediatric Ophthalmology and Strabismus

Candidates should be familiar with the eye of infants and children and associated systemic abnormalities.

Candidates should understand the anatomy, pathology, and physiology of the neuro-muscular mechanisms subserving ocular motility and binocular vision. Candidates should be familiar with the methods of examination for detection and assessment of sensory and ocular motor disorders. They should also know the clinical features, differential diagnosis, natural course, and management of the various types of compliant and noncompliant deviations. They should be familiar with the principles and complications of surgery upon the extraocular muscles.

3. Neuro-Ophthalmology and Orbit

Candidates should know the anatomy of the orbit and the neuroanatomy of the afferent and efferent visual systems. They should understand the principles and techniques of various diagnostic procedures, including visual field testing, visually evoked responses, ultrasonography, conventional x-ray imaging, CT scanning and magnetic resonance imaging. Candidates should be familiar with the clinical features, pathology, differential diagnosis, and management of various disorders of the orbit, visual pathways, ocularmotor system, and pupillomotor pathways, including the indications for, principles of, and complications of orbital surgery.

4. External Eye and Adnexa

Candidates should know the anatomy, embryology and physiology of the structures comprising the lacrimal system, lids, cornea, conjunctiva, and anterior sclera. They should demonstrate knowledge of the pathologic substrate, differential diagnosis and medical therapy as well as indications for, principles of, and complications of surgical procedures utilized to alleviate abnormalities and diseases affecting these tissues.

5. Anterior Segment of the Eye

This examination concerns the anatomy, embryology, physiology, and pathology of abnormalities and diseases of the cornea, anterior chamber angle, iris, ciliary body, and lens.

Candidates are expected to discuss conditions affecting these structures and those to be considered in their differential diagnosis. They should also be able to describe and provide indications for medical and surgical therapy directed toward alleviating or curing these conditions.

6. Posterior Segment of the Eye

This examination concerns the anatomy, embryology, physiology, and pathology of abnormalities and diseases of the vitreous, retina, choroid, and posterior sclera.

Candidates are expected to discuss conditions affecting these structures and those to be considered in their differential diagnosis. They should also be able to describe and provide indications for medical and surgical therapy directed toward alleviating or curing these conditions.

Re-activation

Written Qualifying Examination

An applicant who fails to take the Written Qualifying Examination within twenty-four (24) months after notice has been sent to him/her that his/her application has been accepted will not thereafter be accepted for examination unless he/she reactivates the application for approval and submits an additional application fee.
Ophthalmology

In addition, any applicant who does not repeat the Written Qualifying Examination within twenty-four (24) months after failing will be required to revalidate the application for approval and submit an additional application fee. For every two consecutive failures the application must be reactivated and the current fee must be submitted. Re-examination may be taken as often as necessary until the applicant is successful.

Oral Examination

An applicant who fails one or two subjects in an oral examination will be required to repeat these subjects. An applicant who fails three or more subjects will be required to repeat all subjects of the oral examination. An applicant who fails three or more subjects on the first repeat examination will be required to pass another Written Qualifying Examination before being permitted to repeat the Oral Examination. Additional information on grading is specified in the "Rules for Grading" which are sent to all applicants at the time of their Oral Examination registration. (See Governing Rules and Regulations.)

An applicant shall be required to reactivate his/her application for approval, submit an additional application fee, and pass another Written Qualifying Examination before being admitted to the Oral Examination under the following circumstances: a) If a candidate does not take the Oral Qualification Examination within twenty-four (24) months after notice has been sent to the applicant that he/she has passed the Written Qualifying Examination; b) if a candidate who is eligible to do so fails to repeat the Oral Examination within twenty-four (24) months after failing or conditioning part of such examination; c) if the candidate does not pass all subjects covered therein in three or fewer partial or complete examinations; or d) if the candidate does not pass the Written Qualifying Examination and the entire Oral Examination within seventy-two (72) months after notice has been sent to him/her that his/her original application is accepted.

Reactivation Procedure

In order to reevaluate an application, the request and accompanying fee must be postmarked on or before August 1st of the calendar year immediately preceding the calendar year in which the Written Qualifying Examination is to be conducted. The applicant must indicate continuation of a valid and unrestricted license to practice medicine in one of the United States, its territories, or in a province of Canada. By paying a late fee the deadline for reactivation of the application may be extended from August 1st to September 1st.

Inactive Applications

When an application has not been reactivated it is considered by the Board to have lapsed. Inquiries to the Board by outside agencies about the certification status of a physician with an inactive application will be answered by stating that said physician is not certified, and is not scheduled for an examination.

Results of Examinations

Within a reasonable time after completion of the written or oral examinations, the applicant shall be notified by the Executive Director as to the results thereof. The decision of the Board as to the results of the written or oral examination shall be final and conclusive. Grades are not subject to appeal. Because such is the case, individual Directors of the Board or Associate Examiners should not be contacted about specific examination results. To preserve confidentiality, results of an examination will not be given over the telephone.

Certification

An applicant who successfully passes both the Written Qualifying and oral examinations within the required time limitations hereinabove set forth, as determined by the Board in its sole discretion, shall be entitled to receive a certificate without further consideration of his/her qualifications by the Board. Physicians who have received the certificate are DIPLOMATES of the Board.

Duration of Certification

Certificates issued by the Board after July 1, 1992 will be valid for a period of ten (10) years. Thereafter, a diplomate will be required to satisfactorily complete a designated renewal program every ten years in order to extend the validity of his/her certificate. Certificates issued prior to July 1, 1992 are valid during the diplomate's lifetime.

Candidates who have entered the examination process prior to 1991 and have not passed the Written Qualifying Examination as well as all portions of the Oral Examination before, or at the November 1991 Oral Examinations, will receive time limited certificates when they subsequently pass the Written and Oral Examinations of the Board.

Revocation and Probation

The Board shall have authority to revoke any certificate issued by it or to place the Diplomate on probation for a fixed or indefinite time or some combination of these if:

a. The certificate was issued contrary to or in violation of any rule or regulation of the Board;
b. The person to whom the certificate was issued was not eligible to receive it;
c. The person to whom the certificate was issued either made a substantial misstatement of a material fact to the Board in his/her application or, if such was received in any supporting data presented to the Board and accompanying or relating to the application or if a material fact was omitted from the application or the supporting data;
d. The license to practice of the person to whom the certificate was issued has been revoked in any state or territory of the United States or province of Canada in which he/she is licensed.

Statements of Eligibility

The Board does not issue statements of "eligibility" for its examinations. The only information the Board will divulge is whether a candidate is or is not certified or is or is not scheduled for an examination.

American Board of Medical Specialties

The American Board of Medical Specialties (ABMS), previously called the Advisory Board for Medical Specialties, was established in 1933 to serve in an advisory capacity to the American Specialty Boards and to cooperate with organizations that seek its advice concerning the certification of medical specialists. The American Board of Ophthalmology is officially recognized by the ABMS, and contributes an annual fee of $2000 in addition to a per capita fee for each Diplomate certified to the American Board of Medical Specialties as do all other medical specialty boards in support of the activities of ABMS.

The American Board of Ophthalmology provides an annual listing of new Diplomates for inclusion in the ABMS Compendium of Medical Specialists and in the ABMS Directory of Certified Ophthalmologists. The ABMS will contact each Diplomate directly for biographical information and to update information every one to two years.

Associate Examiners

All Associate Examiners are informed by the Board that they shall not promote, or permit others to promote, his or her participation in commercial or educational activities under circumstances which do, or might be perceived to, exploit his or her familiarity with examinations.
CERTIFICATION REQUIREMENTS

Orthopaedic Surgery

D. Organization

Directors of the Board elect a President, President-elect, Secretary, and Treasurer annually. An Executive Director, who is a Diplomate, serves as an ex-officio director of the Board. The President appoints directors to serve on standing committees on Credentials, Examinations, Finance, Graduate Education and Research. Other committees may be formed as deemed necessary. The Board holds regularly scheduled meetings yearly.

E. Directory

A current directory of certified orthopaedic surgeons is maintained and published by the Board. The names of Diplomates also appear in the Compendium of Certified Medical Specialists published by the American Board of Medical Specialties.

General Statement of Educational Goal for Orthopaedic Surgery

The goal of orthopaedic education is to prepare orthopaedic residents to be competent and ethical practitioners of orthopaedic surgery. In fulfillment of this goal, applicants for certification must have received through their orthopaedic residency:

A. Education in the entire field of orthopaedic surgery, including inpatient and outpatient diagnosis and care as well as operative and nonoperative management and rehabilitation.

B. The opportunity to develop, through experience, the necessary cognitive, technical, interpersonal, teaching, and research skills.

C. The opportunity to create new knowledge and to become skilled in the critical evaluation of information.

D. Education in the recognition and management of basic medical and surgical problems.

E. An evaluation of their ethical performance.

Minimum Educational Requirements for Board Certification

The Board has established the following minimum educational requirements for certification. These requirements should not be interpreted as restricting programs to minimum standards. Throughout these rules, the term "accredited" means accredited by the Accreditation Council for Graduate Medical Education.

These educational requirements apply to all residents who began their first year of accredited orthopaedic surgery residency on or after January 1, 1985 with the following exception. Residents in programs providing only three years of orthopaedic education may receive credit for two years of accredited non-orthopaedic clinical education if they enter the orthopaedic program before January 1, 1989. This exception is available only to residents enrolled in a three-year orthopaedic program which has specifically requested the Board to make its residents eligible for this exception and has presented the Board with a plan for implementing the four-year program. The deadline for receiving such a plan was December 31, 1985. Residents entering orthopaedic residency programs structured for four or five years may receive credit for one but not two years of accredited non-orthopaedic clinical education.

A. Time Requirements

1. Five years (60 months) of accredited postdoctoral residency are required.

2. Four of these years (48 months) must be served in a program whose curriculum is determined by the director of an accredited orthopaedic surgery residency. Three of these years (36 months) must be served in an accredited orthopaedic surgery residency program and one year (12 months) may be served in an accredited graduate medical educational program whose educational content is determined by the director of an accredited orthopaedic surgery residency program.

Introduction

A. Definition

Orthopaedic surgery is the medical specialty that includes the preservation, investigation, and restoration of the form and function of the extremities, spine and associated structures by medical, surgical and physical methods.

B. Purpose

The American Board of Orthopaedic Surgery, Inc., was founded in 1934 as a private, voluntary, non-profit, autonomous organization. Its functions are to serve the best interests of the public and of the medical profession by establishing educational standards for orthopaedic residents and evaluating the initial and continuing qualifications and competence of orthopaedic surgeons. For this purpose, the Board reviews the credentials and practices of voluntary candidates, conducts examinations for these candidates, and issues certificates as appropriate. It defines minimum educational requirements in the specialty, stimulates graduate medical education and continuing medical education, and aids in the evaluation of educational facilities.

The Board does not confer any rights on its Diplomates, nor does it purport to direct licensed physicians in any way in the conduct of their professional duties. It is neither the intent nor the purpose of the Board to define requirements for membership in any organization or on the staff of any hospital.

C. Directors

The directors of The American Board of Orthopaedic Surgery are elected from the Diplomates of the Board who are nominated by the American Orthopaedic Association, the American Medical Association, and the American Academy of Orthopaedic Surgeons. They serve without salary.

administered by the American Board of Ophthalmology or otherwise compromise the integrity of those examinations.

AMERICAN BOARD OF ORTHOPAEDIC SURGERY

Robert B. Greer III, MD, President, Hershey, Pennsylvania
James H. Herndon, MD, President-Elect, Pittsburgh, Pennsylvania
Gordon B. McFarland, Jr., MD, Secretary, New Orleans, Louisiana
Robert E. Leach, MD, Treasurer, Boston, Massachusetts
David S. Bradford, MD, Minneapolis, Minnesota
Joseph A. Buckwalter, MD, Iowa City, Iowa
Richard I. Burton, MD, Rochester, New York
Michael W. Chapman, MD, Sacramento, California
Neil E. Green, MD, Nashville, Tennessee
John A. Murray, MD, Houston, Texas
Dan M. Spengler, MD, Nashville, Tennessee
James H. Van Oist, MD, Corvallis, Oregon

Senior Directors

Harold K. Dunn, MD, Salt Lake City, Utah
George E. Omer, Jr., MD, Albuquerque, New Mexico
James R. Urbaniaik, MD, Durham, North Carolina
Frank C. Wilson, MD, Chapel Hill, North Carolina
Donald B. Kettelkamp, MD, Executive Director

Office of the Board

737 North Michigan Avenue, Suite 1150,
Chicago, Illinois 60611

(EDITOR'S NOTE: These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Orthopaedic Surgery to ascertain whether the information they have is current.)
Orthopaedic Surgery

3. Each program may develop individual sick and vacation times for the resident in accordance with overall institutional policy. However, one year of credit must include at least 48 weeks in full-time orthopaedic education; furthermore, vacation or leave time may not be accumulated to reduce the five-year requirement.

4. Program directors may retain a resident in the educational program for as long as necessary beyond the minimum time specified so that the resident can achieve the necessary degree of competence in orthopaedic surgery. Currently, according to the Special Requirements of the Residency Review Committee for Orthopaedic Surgery, the committee must be notified of such retention. This information must also be provided to the Board on the Record of Residency Assignments form.

B. Content Requirements

1. General Requirements

A minimum of nine months during the first year of graduate medical education must be broadly based on clinical services other than orthopaedics. This requirement may be fulfilled by a year of accredited residency in any broadly based program involving patient care.

2. Orthopaedic Requirements

a) The orthopaedic education must be broadly representative of the entire field of orthopaedic surgery. The distribution of educational experience must include a minimum of:

- Adult orthopaedics — 12 months
- Fractures/trauma — 12 months
- Children’s orthopaedics — 6 months
- Basic science and/or clinical specialties — 6 months

Experience may be received in two or more subject areas concurrently. Concurrent or integrated programs may allocate time by proportion of experience.

b) Orthopaedic education must provide experience with all patient age groups, pertinent anatomic areas, acute and chronic care, related clinical subjects and basic science, and exposure to research.

1. Children’s orthopaedics: The educational experience in children’s orthopaedics must be obtained in an accredited position in the specific residency program in which the resident is enrolled or in a children’s hospital in an assigned accredited residency position.

2. Anatomic areas: Orthopaedic education must include all aspects of diagnosis and care of disorders affecting the bones, joints, and soft tissues of the upper and lower extremities, including the hand and foot, the entire spine, specifically including intervertebral discs, and the bony pelvis.

3. Acute and chronic care: Orthopaedic education must include the diagnosis and care, both operative and nonoperative, of acute trauma (including athletic injuries), infectious disease, neuromuscular impairment, and chronic orthopaedic problems including reconstructive surgery, neuromuscular disease, metabolic bone disease, benign and malignant tumors, and rehabilitation.

4. Related clinical subjects: Orthopaedic education must include musculoskeletal imaging procedures, use and interpretation of clinical laboratory tests, prosthetics, orthotics, physical modalities and exercises, and neurological and rheumatological disorders.

5. Research: Orthopaedic education must include exposure to clinical and/or laboratory research.

6. Basic science: Orthopaedic education must include instruction in anatomy, biochemistry, biomaterials, biomechanics, microbiology, pathology, pharmacology, physiology; and other basic sciences related to orthopaedic surgery. The resident must have the opportunity to apply these basic sciences to all phases of orthopaedic surgery.

7. Options: Twelve (12) months of the four years required to be under the direction of the orthopaedic surgery residency program director may be spent on services consisting partially or entirely of:

- Additional experience in general adult or children’s orthopaedics or fractures/trauma;
- An orthopaedic clinical specialty;
- Orthopaedically related research;
- Experience in an accredited graduate medical educational program whose educational content is reviewed and approved by the director of the orthopaedic surgery residency program.

C. Accreditation Requirements

1. The educational experience in orthopaedic surgery obtained in the United States must be in programs accredited by the Residency Review Committee for Orthopaedic Surgery and by the Accreditation Council for Graduate Medical Education. All other clinical education obtained in the United States must be in programs accredited by the Accreditation Council for Graduate Medical Education and the appropriate Residency Review Committee for the category of education for which credit is sought. (The Directory of Graduate Medical Education Programs accredited by the Accreditation Council for Graduate Medical Education, published annually and available from the American Medical Association, 515 North State Street, Chicago, IL 60610, lists accredited rotations of six months or longer.)

2. Within the five years of accredited residency, a total period of no more than six months may be served in unaccredited institutions.

3. Credit for time spent in residency education will be granted only for the period during which the residency program is accredited, and only for time served in an approved position within an accredited program.

4. If an orthopaedic residency program has its accreditation withdrawn by the Residency Review Committee for Orthopaedic Surgery and the Accreditation Council for Graduate Medical Education, no educational credit will be granted past the effective date of withdrawal of accreditation.

5. Educational credit may be granted for clinical experience in the military and/or public health services of the United States of America if the experience is accepted by the director of the orthopaedic surgery residency program that the applicant enters. Up to one month of credit may be granted for two months of clinical experience, not to exceed 12 months of credit, subject to approval by the Committee on Credentials. This approval should be sought prior to entry into the program.

6. Educational experience obtained in Canada must be on services approved by the Royal College of Physicians and Surgeons of Canada and must extend over a minimum of five years. The content requirements outlined in “B. Content Requirements” must be met.

7. The Board does not grant credit for foreign educational experience, other than as permitted in C2 and C6.

8. The term “fellow” is not synonymous with the term “resident” for the purpose of obtaining Board credit for educational experience. A resident is an individual enrolled in an approved position in an accredited educational program.

D. Achievement Requirements

1. The director of the program providing general graduate medical education must certify the satisfactory completion of that segment of education.

2. In orthopaedic surgery residency programs, the program director must certify the satisfactory completion of each rotation for which credit is awarded. (See “E Documentation Requirements.”)

3. The program director responsible for the final year of the resident’s education must certify that the resident has achieved a satisfactory level of competence and is qualified for the certifying process.

4. The certification referred to in 2. and 3. above must be made on the appropriate Record of Residency Assignments form and must be countersigned by the resident.

5. Medical practice outside the residency must not be allowed to interfere with deriving maximum benefit from the educational
experience. Residents may not engage in such activities without the specific prior approval of the program director; such approval must be based on the judgment of the director that rotations are being completed without compromise and that the circumstances of the resident warrant such activity.

E. **Continuity Requirements**

The resident should have progressively increasing patient care responsibility. A part-time or piecemeal approach to residency requirements is discouraged. The final 24 months of orthopaedic residency education must be obtained in a single orthopaedic residency program unless prior approval of the Committee on Credentials is obtained.

F. **Documentation Requirements**

1. For orthopaedic education obtained in the United States, the program director must provide the Board with yearly documentation during the residency. Each June, directors will receive two computer diskettes on which the required information will be recorded. The appropriate forms will be printed after the data has been entered. The forms will be signed by the program director and the resident, and the forms and diskettes will be returned to the Board office within 30 days of the end of the academic year.

2. Form 1 of the Record of Residency Assignments must be submitted the year the resident enters the program. Form 1-A must be provided for residents receiving educational credit in a non-orthopaedic ACGME accredited program and for non-orthopaedic education taken within the ACGME accredited orthopaedic residency. Form 2-A must be completed yearly for each resident in the orthopaedic program and must detail the content and time spent on rotations, information on any unaccredited rotations and whether or not credit was granted for a full year. Form 3 is the final evaluation. The computer diskettes and printed, signed forms are due in the Board office within 30 days of completion of the academic year. It should be noted that Part I examination results of candidates who take the examination the year in which they complete their residency will not be mailed to the candidate or the program director until Form 3 has been received in the Board office.

3. When a resident leaves a program prematurely, the program director must notify the Board office in writing within 30 days. The letter must record the reasons for leaving and confirm the rotations during the academic year in which the resident left for which credit is granted. At the end of the academic year in which the resident left, Form 2-A and Form 3 information must be provided on the computer diskettes. Before a resident enters a new program, it is the responsibility of the new program director to obtain a copy of the resident's Record of Residency Assignments forms from the Board office, to review them thoroughly, and to develop an appropriate program for the resident that will result in progressively increasing responsibility and will otherwise meet the minimum educational requirements.

**Requirements for Taking the Certifying Examination**

The certifying examination is divided into two parts. Part I is a written examination which may be taken any time after the completion of the educational requirements. Part II is an oral examination which may be taken upon passing Part I, completion of the practice requirement, evaluation of the applicant's practice and determination of admission to the examination. A candidate must pass both parts of the certifying examination to be certified.

After taking and passing the written examination, candidates have five years to take or retest the oral examination. Candidates who do not pass the oral examination within those five years must retest and repass the written examination before applying to take the oral examination.

An applicant desiring certification by the American Board of Orthopaedic Surgery must satisfy the educational requirements of the Rules and Procedures in effect when the applicant first enrolls in an accredited orthopaedic residency. An applicant must satisfy all other requirements in effect at the time of application.

A. **Educational Requirements**

1. An applicant must satisfactorily complete and document the minimum educational requirements in effect when he or she first enrolls in an accredited orthopaedic residency.

2. Upon successful completion of 54 months of the 60 months of required education and upon the recommendation of the program director, a candidate may apply to take Part I of the examination.

3. In order to be admitted to the examination, the candidate must complete the full 60 months of required education and must present an examination admission card signed by the program director confirming satisfactory completion of all educational requirements.

4. An applicant who has received orthopaedic surgery residency education in Canada must have fulfilled the requirements of the American Board of Orthopaedic Surgery and must have passed the qualifying examination in orthopaedic surgery of the Royal College of Physicians and Surgeons of Canada before applying for either part of the examination of the American Board of Orthopaedic Surgery.

B. **License Requirements**

Applicants who are in practice at the time they apply for Part I and all applicants for Part II must possess a full and unrestricted license to practice medicine in the United States or Canada, or be engaged in full-time practice in the United States Federal Government for which licensure is not required. An applicant will be rendered ineligible for any part of the certification examination by limitation, suspension, or termination of any right associated with the practice of medicine in any state, province, or country because of violation of a medical practice act or other statute or governmental regulation, disciplinary action by any medical licensing authority, or voluntary surrender while under investigation.

C. **Practice Requirements**

1. An applicant must be continuously and actively engaged in the practice of operative orthopaedic surgery, other than as a resident or fellow (or equivalent), for at least twenty-two (22) full months immediately prior to the Part II of the examination. An applicant must be in one practice location for a minimum of twelve (12) consecutive months. A change in location, type of hospital practice, or practice association may result in deferral. The practice must be located in the United States or its territories, Canada, or a United States service installation. It must include hospital admitting and surgical privileges in effect at the time of application for the examination and at the time of examination. The applicant must demonstrate professional competence and adherence to acceptable ethical and professional standards. The practice must allow independent decision-making in matters of patient care. A reduction, restriction, suspension, termination, or resignation at the request of a hospital of all or any portion of an applicant's surgical staff privileges, or pending action to do so, will normally result in a deferral until such action is finally resolved and the applicant's practice has stabilized sufficiently for it to be evaluated.

2. An applicant in the United States uniformed services may satisfy the practice requirement if the applicant has been assigned as an orthopaedic surgeon for at least twenty-two (22) full months prior to the date of examination. The applicant must submit a letter from his or her immediate supervisor evaluating his or her capability in the practice of orthopaedic surgery, as well as such other documentation as the Credentials Committee may require to demonstrate professional competence and adherence to acceptable ethical and professional standards.

D. **Evaluation of Applicant**

1. Individuals who do not engage in traditional orthopaedic surgery cannot currently be adequately evaluated for the Part II examination and will not be certified.
Orthopaedic Surgery

2. Qualifications for taking Part II of the examination will be determined by the Credentials Committee after review of the application, letters of recommendation, and other relevant information.

3. It is the responsibility of the applicant to provide the information on which the Credentials Committee bases its evaluation of the qualifications of the applicant. This responsibility extends to information that the Credentials Committee requests from other persons. If the Credentials Committee does not receive requested information that it believes to be relevant to the qualifications of an applicant from the applicant, a program director, a reference, a hospital representative, or another source, the Board will notify the applicant and defer making a decision as to the admission of the applicant to the examination until the information is received.

4. Representatives of the Board may visit the site of an applicant's practice if the Credentials Committee believes that this is necessary for adequate evaluation of the work of the applicant.

E. Practice-Based Oral

1. The Part II examination is composed of a standardized examination and a practice-based examination. The purpose of the practice-based portion of the Part II examination is to evaluate a candidate's particular unique practice as broadly as possible. The Board will select fifteen (15) cases from the candidate's six-month case list, from which the candidate will then select ten (10) cases to bring to the examination for detailed presentation.

2. The exam will be conducted as much as rounds or conference might have been during residency. The candidate will be expected to present his or her cases as he or she might for a conference and will be expected to respond to the examiners' questions and comments as he or she would during such an exercise.

3. The following steps must be followed exactly in order for this process to work successfully:
   a. The applicant is to collect all operative cases (including same-day surgery) for which he or she was the responsible operating surgeon, from each hospital and/or surgery center where he or she has practiced, for six (6) consecutive months beginning July 1 of the year prior to the year of the Part II examination for which the applicant is applying. If time is taken off during those six months, a two-week vacation, for example, that same length of time, prior to July 1, must be added to the collection period. Case information must include the patient's name or initials, unit or hospital number, sex, age, diagnosis, treatment or surgical procedure, length of hospitalization, and outcomes, including complications.

If you did no cases at any hospitals and/or surgery centers where you practiced during the case collection period, this fact must be verified by a letter from the hospital. The letter(s) should be sent to the Board office along with your case list as described in E.3.d. If you did no cases in one or more of the ten categories at any hospital and/or surgery center where you practiced during the collection period, and for which you are providing a case list, this information must be noted on the category sheet(s) and verified by the hospital.

b. The cases are to be grouped into the general categories defined on the forms provided by the Board and are to be recorded chronologically within each category. Use only these forms. A separate list must be prepared for each hospital or surgery center. The information requested on the list should be typed. Regardless of how specialized or general an individual's practice may be, it should be possible for all candidates to use these general categories to group their surgical cases. The surgical categories are:

1) Incision: includes such procedures as arthroscopy with exploration, soft tissue biopsy, superficial abscess drainage, removal of calcific deposits, etc.

2) Excision: includes such procedures as synovectomy; meniscectomy; sequestrectomy; excision of tumors of bone and soft tissue, etc.

3) Introduction or Removal: foreign body removal, injections of steroids, antibiotics, chymopapain, etc.

4) Repair, Revision or Reconstruction: includes arthroplasty, osteotomy, tenodesis, capsulorraphy; repair of nonunion with or without bone graft, etc.

5) Fracture and/or Dislocation: includes open reduction and/or internal fixation of fractures and dislocations, closed reductions or fractures and dislocations, etc.

6) Manipulation: under anesthesia such as manipulation of a knee or shoulder, etc.

7) Arthrodesis: all techniques.

8) Amputation: any level.

9) Miscellaneous: any surgical procedure which does not fit into any of the categories listed.

10) Complications: systemic, such as pulmonary embolus, cardiac abnormalities, abdominal problems such as ileus, stress ulcer, etc., cerebrovascular accident, urinary difficulties, occurring in pre-operative period up to six weeks post-op. Local complications, such as wound infection, failure of fracture fixation, dislocation of a total joint arthroplasty, skin slough, compartment syndrome, neurologic impairment, and the like, related to a surgical procedure.

   c. The first page of each category for each case list must be certified by the hospital record administrator or director of medical records. It is imperative that all cases be listed each under the single-most-appealing category. If no cases are reported for a category, indicate this on the category sheet, complete the certifications, and include it with the case list. The final list from each hospital or surgery center must include at least ten pages, one for each of the ten categories.

   If a case list on one of the first nine lists incurs a complication that must be listed on the tenth list, indicate that the case also appears on the complications list by making a notation in the "length of follow-up and outcome" column. Then list the complication on the tenth list.

   Arthroscopic procedures that do not fit into categories one through eight should be listed in category nine.

d. The candidate must send two copies of his or her case lists to the Board office by registered mail on or before January 31 of the year of the examination. Directors of the Board will select fifteen (15) cases from which the candidate will pick ten (10) cases to present in detail at the examination. A list of the fifteen (15) cases selected will be returned to the candidates so that he or she can compile the information requested below on the ten (10) cases that will be brought to the examination.

e. The candidate must bring to the examination:

1) Three copies of his or her complete case lists for each hospital and/or surgery center, regardless of whether or not a case has been selected from any given list, remember that these must be on the forms provided by the Board. The cases that are brought to the examination should be circled on the case list.

2) The pertinent pre-operative, intra-operative or immediate post-operative, and the most recent post-operative x-rays for each case that has been chosen. These pertinent x-rays should be arranged in advance in the order they are to be presented and should be clearly marked in terms of dates pre- and post-operative.

3) Copies of admission and discharge notes, operative notes, and any other documentation from the patient's charts that will aid in the presentation of the selected cases.

4) For any case that you have selected to bring to the examination that is a complication, copies of pertinent consultations and x-rays that bear on the complication and its treatment.

5) The candidate must bring the above-requested documentation of the selected cases and three (3) copies of all of the complete case lists and three (3) copies of the list of the fifteen (15) cases selected by the Board to the Part II examination. Failure to do so may result in a failure of the examination.
f. Although the examiners will be primarily interested in discussing cases brought for presentation, they may ask any questions pertaining to a candidate’s case lists or practice. In addition, candidates should not be concerned if all the material brought to the exam is not covered by the examiners; the candidate and examiners may focus on one area or become involved in a few cases in such detail that time will not allow all cases to be covered. This will not penalize the candidate during the grading caucus following the exam.

4. Candidates who have questions about this process should call or write to the Board office well in advance of the exam. Failure to comply with the steps outlined may invalidate an examination.

Impaired Physicians

A. Chemical Dependency

Applicants who have a history of chemical dependency will not be admitted to either Part I or Part II of the certifying examination unless they present evidence satisfactory to the Board that they both (1) have been drug free for at least three years and (2) have satisfactorily completed the program of treatment prescribed for their condition. In addition, any such applicants for Part II of the examination may have a site visit of their practices by representatives of the Board as described in “Requirements for Taking the Certifying Examination,” D.4.

B. Mental and Physical Impairment

Applicants who have a history of mental or physical impairment will not be admitted to either Part I or Part II of the certifying examination unless they present medical evidence satisfactory to the Board that the impairment does not compromise their ability to render quality care to their patients. In addition, any such applicants for Part II of the examination may have a site visit of their practices by representatives of the Board as described in “Requirements for Taking the Certifying Examination,” D.4.

Procedure for Application for Part I and Part II of the Certifying Examination

The dates and places for Part I and Part II of the certifying examination and deadlines for submission of applications and fees are announced in the Journal of the American Medical Association and the Journal of Bone and Joint Surgery. Examination dates may be changed at the discretion of the Board. Because of the journals’ publication deadlines, confirmation of published examination dates can be obtained from the Board’s office.

A. Application Deadlines

1. Part I. A completed application for Part I of the certifying examination must be postmarked by registered mail on or before March 1 of the year of the examination. The application must be accompanied by a nonrefundable examination fee of $650.00 and must be sent by registered mail.

2. Part II. A completed application for Part II of the certifying examination must be postmarked by registered mail on or before October 31 of the year preceding the examination. The application must be accompanied by a nonrefundable fee of $750.00 and must be sent by registered mail.

3. Late or incomplete applications. Applications postmarked after the deadlines for Part I and Part II of the certifying examination and applications received incomplete will be returned to the applicant together with the fee check. If a Part I applicant wishes to resubmit the Part I application by registered mail postmarked on or before March 31, the non-refundable examination fee of $650.00 and a late fee of $250.00 must be enclosed. If a Part II applicant wishes to resubmit the Part II application by registered mail postmarked on or before November 30, the non-refundable application and credentialing fee of $750.00 and a late fee of $250.00 must be enclosed. No applications will be accepted after the final deadlines. Late fees are non-refundable.

4. All applications are to be requested in writing.

B. Notifying the Board of Application Changes

It is the responsibility of the applicant to notify the Board office of any change of address, practice association, or hospital affiliation. If an applicant changes practice location or practice association, or acquires new hospital staff affiliations, new references will be solicited by the Board for Part II applicants. An applicant is also required to notify the Board of any denial of any request for hospital privileges, of any action to restrict, suspend, or terminate all or any portion of the applicant’s surgical staff privileges; or any request by a hospital to resign all or any portion of the applicant’s surgical staff privileges, and of any action by a government agency which would result in the restriction, suspension, or probation of the applicant’s license or any right associated with the practice of medicine.

C. Notifying the Applicant of Examination Admission

1. Part I. The applicant will receive examination information, an assigned examination number and an admission card not later than 30 days prior to the examination date.

2. Part II. The decision of the Credentials Committee is mailed to the applicant not later than 60 days prior to the examination date.

D. Fees

1. Part I. The nonrefundable examination fee is $650.00 and must be submitted with the application form.

2. Part II. The nonrefundable application and credentialing fee is $750.00 and must be submitted with the application form.

3. Part II. The candidate must submit a fee of $650.00 on or before the date specified in the letter of notification of admission to Part II of the examination. This fee will be forfeited if the candidate fails to appear for the examination or cancels after being scheduled.

4. There will be a $50.00 charge levied for any application or examination fee check that is returned not paid by the Board’s bank.

Fees

Part I Examination Fee—$650.00
Part II Application and Credentialing Fee—$750.00
Part II Examination Fee—$650.00
Late Fee—$250.00
Returned Check Service Charge—$50.00

Fees must be sent by registered mail.

E. Falsified Information and Irregular Behavior

1. If it is determined that an applicant has falsified information on the application form or failed to provide material information, the applicant will not be considered for either part of the examination not already passed and must wait for three years before being allowed to file a new application. The applicant will not be considered for admission to either part of the examination during this three-year period.

2. Examination applicants should understand that: (1) the giving or receiving of aid in the examination as evidenced either by observation or by statistical analysis of incorrect answers of one or more participants in the examination; or (2) the unauthorized possession, reproduction, or disclosure of any materials, including, but not limited to, examination questions or answers, before, during, or after the examination; or (3) the offering of any benefit to any agent of the Board in return for any right, privilege, or benefit which is not usually granted by the Board to other similarly situated candidates or persons may be sufficient cause to bar applicants from future examinations, to terminate participation in the examination, to invalidate the results of a candidate’s examination, to withhold or revoke a candidate’s scores or certificate, or to take other appropriate action.

Applicants should also understand that the Board may or may not require a candidate to retake one or more portions of the examination if presented with sufficient evidence that the security of the examination has been compromised, notwithstanding the absence of any evidence of a candidate’s personal involvement in such activities.
Orthopaedic Surgery

Credentials Decisions

A. Determining Admission to Examinations

1. The Credentials Committee meets at least once each year to consider applications for the examinations. At this meeting a decision will be made approving admission to the next examination or denying admission or the decision may be deferred for further evaluation.

2. A decision approving admission to an examination applies only until the next available examination and does not carry over from one examination until the next. A new application is required for each examination.

B. Deferral of Admission Decision

A decision on an applicant’s admission to either Part I or Part II of the examination may be deferred if information is insufficient for the Credentials Committee to make a judgment. Typically, the committee will defer such a decision for one year to gather further information. If a still has insufficient information to make a judgment, the decision will be deferred for a second year to enable representatives of the Board to conduct a site visit as described in “Requirements for Taking the Certifying Examination,” D.4. A deferral of not more than two consecutive years is not viewed by the Board as an adverse action; thus, no appeal from a decision of the Credentials Committee is permitted unless an applicant has either been denied admission or has been deferred for more than two consecutive years.

C. Appeal of Admission Decision

An applicant denied admission to the examination will be informed of the basis for such action and may request a hearing by an appeals committee of the American Board of Orthopaedic Surgery.

Certification and Recredentialing by the American Board of Orthopaedic Surgery

A. Awarding Certificates

The American Board of Orthopaedic Surgery awards a certificate to a candidate who specializes in orthopaedic surgery, has met the educational requirements of the Board, has demonstrated competence in orthopaedic surgery and adherence to ethical and professional standards, and has passed both parts of the certifying examination. Certificates issued after 1985 are valid for ten years. This portion of the Board’s responsibility is discharged by issuance of a certificate to an individual found qualified as of the date of certification.

B. Certificate Revocation

A certificate may be revoked prior to its expiration because of intentional and substantive misrepresentation to the Board with respect to the applicant’s education and other requirements for admission to either part of the examination, or because of limitation, suspension, or termination of the right to practice medicine in any state, province, or country by reason of a violation of a medical practice act or other statute or governmental regulation, or disciplinary action by any medical licensing authority, or voluntary surrender while under investigation. Before a certificate is revoked, the Diplomate will be informed of the basis of such action and will be afforded a hearing according to procedures formulated by the American Board of Orthopaedic Surgery.

C. Certificate Reinstatement

Should the circumstances that were considered in justification for revocation or surrender of the Diplomate’s certificate be corrected, the Board may reinstate the certificate after appropriate review of the individual’s qualifications and performance, using the same standards as applied to other applicants for certification.

D. Recredentialing Process

The Board offers a recredentialing process to its Diplomates. Diplomates are encouraged to undertake periodic recredentialing. Information about recredentialing can be obtained from the Secretary of the Board.

Unsuccessful Candidates

Unsuccessful Part I candidates may repeat the examination by submitting a new application form for the examination and again being found admissible. (See preceding pages.)

Unsuccessful Part II candidates may repeat the examination by submitting a new application form for the examination and again being found admissible. Candidates who do not pass the Part II examination within five years of passing Part I must retake and repass the Part I examination before applying to take Part II. (See preceding pages.)

Appeals Procedure

1. An individual who has received an unfavorable ruling from a committee of the Board may appeal such determination by mailing a notice of appeal to the office of the American Board of Orthopaedic Surgery within sixty (60) days of the date such ruling was mailed to him or her, except that decisions of the Examinations Committee that a candidate has failed either part of the certifying examination may be appealed only in the manner and to the extent provided in paragraphs 8 and 9.

2. Upon receipt of a notice of appeal, the concerned Board committee shall consider any information submitted therewith by the candidate in support of his or her appeal and make such further investigation appropriate to the appealing individual as it deems appropriate. If the committee then decides in a manner favorable to the individual, it shall so notify the individual. If the committee does not so determine, it shall notify the individual and the President of the American Board of Orthopaedic Surgery.

3. The President of the American Board of Orthopaedic Surgery will then appoint an ad hoc appeals committee consisting of three members who did not participate in making the determination being appealed. The chairman of the ad hoc committee shall convene a meeting of the committee within a reasonable time but no sooner than sixty (60) days from the date of its appointment to conduct a hearing.

4. The committee concerned shall provide the Executive Director with such written information concerning its decisions as it deems appropriate, a list of the witnesses, if any, which it expects will testify, and a list of information and documents which the individual is to produce at the hearing. This material together with a written notice stating the time and place of the hearing shall be sent to the individual not less than thirty (30) days prior to the hearing of the appeals committee. The Executive Director shall, at the request of either the individual concerned or the committee concerned, submit written material provided by the individual or the committee, including the material referred to in the preceding sentence, to the members of the appeals committee prior to the hearing, provided a copy of such material is submitted to the individual or to the committee no later than the time it is submitted to the appeals committee.

5. At the hearing, the Board committee concerned, and its legal or other representatives shall present such information as it deems appropriate to support its previously made determinations. The individual may be represented by legal counsel or any person of his or her choice, may present such relevant information as he or she deems appropriate in support of his or her position, may call, examine and cross-examine witnesses, and may submit a written statement at the close of the hearing. The failure of the individual to produce information or documents requested by the concerned committee pursuant to paragraph 4 shall be grounds for upholding the determination of the concerned committee. A written record of the hearing will be made and made available to the individual at one-half the cost of its preparation.

6. If a majority of the members of the appeals committee present at the hearing determines, on the basis of the information presented or circulated to them, that the committee determination should not be overruled, it shall so declare, and if a majority determines the commit-
tee's determination should be overruled, it shall so declare. The appeals committee shall inform the individual and the concerned committee of its decision and the basis on which it is made in writing within a reasonable time following the hearing. The decision of the appeals committee with respect to the matter being appealed shall be final and binding.

7. The peer review process of the American Board of Orthopaedic Surgery is conducted as part of a professional review action described in the Health Care Improvement Act of 1986. Pursuant to that Act, adverse actions are reported to the appropriate board of medical examiners.

8. A candidate who believes that the Part II examination was administered in an unfair or inaccurate manner or that one or more of his or her oral examiners was acquainted with him or her or was impartial, may immediately upon completion of the examination, request that he or she be reexamined. The request shall be made to the Chairman of the Oral Examination Committee and reviewed by the President and the Secretary. If after discussing the matter with the candidate and making such other investigation as they may deem appropriate, a majority of the President, the Secretary, and the Chairman of the Oral Examination Committee determines that reasonable grounds exist for the candidate's request, he or she shall be immediately reexamined by another panel of oral examiners. In such event, the first oral examination will be disregarded and only the candidate's performance on the reexamination shall be considered in determining his or her score on the examination.

9. A candidate who fails the Part I examination may request in writing that his or her examination be rescored by hand to certify the accuracy of the results as reported to him or her. Such a request is to be made within sixty (60) days of his or her being notified of the results of the examination. The request must be accompanied by a check for $50.00 payable to the American Board of Orthopaedic Surgery to cover the cost of the hand scoring. There shall be no further appeal from a failure on the Part I examination.

**AMERICAN BOARD OF OTOLARYNGOLOGY**

Frank N. Ritter, MD, President, Ann Arbor, Michigan
Byron J. Bailey, MD, Vice President, Galveston, Texas
Patrick J. Doyle, MD, Past President, Vancouver, British Columbia

Paul H. Ward, MD, Los Angeles, California
Robert W. Cantrell, MD, Executive Vice President
5615 Kirby Drive, Suite 936
Houston, TX 77005

(EDITOR'S NOTE: These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Otolaryngology to ascertain whether the information they have is current.)

**Examination Process**

The American Board of Otolaryngology (ABO) certification process consists of two phases: a written exam and oral exam.

All candidates take a written (qualifying) examination which is offered in the fall of each year. Candidates who do not achieve the qualifying score are considered to have failed the examination. These individuals do not become certified, and are not eligible to take the oral examination. They may retake the written examination in a subsequent year.

Candidates who meet or exceed the qualifying score must then complete an oral examination, which is offered in the spring of each year. Candidates will be given up to three consecutive opportunities to take the oral exam. If a passing score is not achieved after three exam cycles, the candidate must reapply to take the written exam, and must again achieve the qualifying score in order to be permitted to retake the oral exam.

The written and oral exam scores are not combined (i.e., a passing score must be achieved on each portion of the exam). Failure to successfully complete both the written and the oral exam constitutes failure of the examination.

**Certification**

A certificate is granted by the American Board of Otolaryngology to a candidate who has met all the requirements and has satisfactorily passed its examination.

**Requirements for Examination**

There is no required time interval between completion of the residency program and making application for examination. However, all residency training must be successfully completed before the date of the examination in any given year. Applications for the written examination in any given year become available January 2, and must be completed and returned by May 1 of that year.

The following qualifications are minimal requirements for examination by the American Board of Otolaryngology:

1. The applicant shall possess high moral, ethical and professional qualifications as determined by, and in the sole discretion of, the Board.
2. The applicant must be a graduate of a college of medicine or osteopathy.
3. Proof of a valid, non-restricted medical license indicating the date of expiration must be submitted not less than one month prior to the actual date of the examination.

Individuals who have completed residency training but who will enter a fellowship program utilizing an institutional license must submit a statement from the program director as evidence of this fact.

Individuals who have completed residency training but who will go on to practice medicine in a foreign country not requiring licensure must make a written request to be accepted for the examination without medical license. Such requests should be addressed to the Executive Vice President and submitted with the application.

4. The applicant whose post-M.D./D.O. training (accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada) began prior to July 1, 1981 must have satisfactorily completed a minimum of four years of residency training accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada. This training must include:
Otolaryngology

(a) ONE YEAR of general surgical training in a residency program accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada.

(b) THREE YEARS of residency training in otolaryngology accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada. The training in otolaryngology must involve increasing responsibility each year and must include a final year of senior experience. This final year must be spent within the institutions which are approved as part of the program, unless prior approval of an outside rotation has been obtained from the Residency Review Committee. It is preferred that the year or years of general surgical residency be taken prior to the otolaryngologic training, but if they may not be taken following otolaryngologic training. The residency training must be completed in a manner acceptable to the head of that residency program.

5. The applicant whose post-A.M./D.O. training (accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada) began July 1, 1981 or thereafter must have satisfactorily completed a minimum of five years of residency training accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada. This training must include:

(a) at least ONE YEAR of general surgical training in a residency program accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada.

(b) at least THREE YEARS of residency training in otolaryngology accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada. The training in otolaryngology must involve increasing responsibility each year and must include a final year of senior experience. This final year must be spent within the institutions which are approved as part of the program, unless prior approval of an outside rotation has been obtained from the Residency Review Committee. It is preferred that the year or years of general surgical residency be taken prior to the otolaryngologic training, but if they may not be taken following otolaryngologic training. The residency training must be completed in a manner acceptable to the head of that residency program.

(c) an ADDITIONAL YEAR of residency training which may be in otolaryngology, general surgery or other residencies accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada. If this year of training is in other than otolaryngology, it must be taken prior to the final year of otolaryngology residency.

Foreign Training

1. The applicant who has completed otolaryngologic training in the United Kingdom or the Republic of Ireland in a program accredited by the Specialist Advisory Committee, and who has received a certificate of accreditation in otolaryngology from the Joint Committee on Higher Surgical Training in the United Kingdom and the Republic of Ireland may be considered for examination.

2. The applicant who has completed otolaryngologic training under the New Zealand program after January 1, 1984 and has passed the examination leading to Fellowship of the Royal Australasian College of Surgeons or who has completed training under the Australian program after January 1, 1986 and has passed the examination leading to Fellowship of the Royal Australasian College of Surgeons may be considered for examination.

Application for Examination

The applicant must submit the following:

1. Application, signed by the Program Director and another diplomate of the American Board of Otolaryngology. A current photograph, signed on the front, must be attached to the application. A duplicate photograph, also signed on the front, must be attached to a 5x8 card provided with the application.

2. Verification of Otolaryngology Residency Form, signed by the Program Director, attesting to satisfactory completion of the training program.

3. Verification of Surgical Residency Form, signed by the Chief of Surgery, attesting to satisfactory completion of the training program.

4. Verification of Additional Residency Form, signed by the appropriate Program Director, attesting to satisfactory completion of the training program or internship.

5. Report of Operative Procedures, which lists procedures assisted in and performed by the candidate during otolaryngologic residency.

6. Verification of any and all licenses to practice medicine held by the candidate.

7. Verification of medical degree.

Additional information may be requested by the Board from the following: local medical society, board certified otolaryngologists from the geographical area in which the applicant practices, the director of the applicant's training program, hospital chiefs of staff, and/or other individuals and entities who may have knowledge of the applicant's moral and ethical standing, qualifications or abilities.

Applications are approved by the Credentials Committee in June, and applicants are then notified if they have been approved for examination. The Board reserves the right to reject any application.

Reapplication

Applications are considered current for a period encompassing three consecutive examination cycles. At the conclusion of said period, the application will expire, and candidates will be required to submit new forms.

Fees

1. The fee for the written examination is $1,400, subject to change at the discretion of the Board. For first-time applicants, $700 must accompany the application and is not refundable. This fee must be paid in full by May 1 and no application will be processed until this fee is received by the Board Office. The additional $700 is due and payable upon notification of acceptance for examination and no part of this fee is refundable.

2. Individuals who become oral candidates (by achieving the qualifying score on the written examination) take their first oral examination at no additional cost. Candidates will be given three consecutive opportunities to take the oral exam. A fee of $900 will be charged for the second and/or third oral examination.

3. If a passing score is not achieved after three exam cycles, the individual must reapply to take the written exam and $1,400 must accompany the reapplication form. This fee must be paid in full by May 1 and is not refundable. No reapplication will be processed until this fee is received in the Board Office. Individuals who again become oral candidates will follow the same procedure and be required to pay the same fees as outlined in paragraph #2 above.

4. All fees must be paid in U.S. funds. Applicants residing outside the United States must submit payment in the form of an International Money Order.

5. A fee of $200 will be charged for any application postmarked between May 1 and May 15. NO APPLICATION WILL BE ACCEPTED AFTER MAY 15. A fee of $25 will be charged for any check returned by the bank for insufficient funds.
Board Eligibility and Status Inquiries

The American Board of Otolaryngology does not recognize or use the term “board eligible.” When a request is received regarding the status of a physician, the Board will only state whether s/he is or is not certified. The Board feels it is inappropriate to provide any additional information.

Leaves of Absence

Leaves of absence and vacation may be granted to residents at the discretion of the program director in accordance with local rules. Within the five years of graduate medical education, the total of such leaves and vacation time may not exceed six weeks in any one year. If a longer leave of absence is granted in any year, the required period of graduate medical education may be extended accordingly.

Applicants With Special Disabilities

Whenever possible and necessary, reasonable accommodations will be made for the administration of ABO examinations to examinees with special disabilities (such as dyslexia). Persons who wish to make arrangements for such accommodations should contact the Board Office prior to May 1 of any given year.

Purpose of Examination

The purpose of the examination is to determine the candidate’s knowledge, skill and understanding in the following categories:

1. Morphology, physiology, pharmacology, pathology, microbiology, biochemistry, genetics and immunology relevant to the head and neck, the respiratory and upper alimentary systems, the communication sciences, including knowledge of audiology and speech-language pathology; the chemical senses and allergic, endocrinology and neurology as they relate to the head and neck.
2. Diagnosis and diagnostic methods including audiologic and vestibular assessments, electrophysiologic techniques and other related laboratory procedures for diseases and disorders of the ears, the respiratory and upper alimentary systems and the head and neck.
3. Therapeutic and diagnostic radiologic, including the interpretation of medical imaging techniques relevant to the head and neck and thorax including the temporal bone, skull, nose, paranasal sinuses, salivary and thyroid glands, larynx, neck, lungs and esophagus.
4. Diagnostic evaluation and management of congenital anomalies, allergy, trauma and other diseases in the regions and systems mentioned above.
5. The cognitive management including operative intervention with its preoperative and postoperative care of congenital, inflammatory, endocrine, neoplastic, degenerative and traumatic states, including:
   a. Temporal bone surgery;
   b. Paranasal sinus and nasal surgery;
   c. Skull-base surgery;
   d. Maxillofacial surgery including the orbits, jaws and facial skeleton;
   e. Esthetic, plastic and reconstructive surgery of the face, head and neck;
   f. Surgery of the thyroid, parathyroid, pituitary and salivary glands;
   g. Head and neck reconstructive surgery relating to the restoration of form and function in congenital anomalies and head and neck trauma and associated with ablative operations;
   h. Endoscopy, both diagnostic and therapeutic, and;
   i. Surgery of the lymphatic tissues of the head and neck.

6. The habilitation and rehabilitation techniques and procedures pertaining to respiration, deglutition, chemoreception, balance, speech and hearing.
7. The current literature, especially pertaining to the areas listed above.

In order to assist directors of residency training programs in otolaryngology in evaluating their programs, the Board will report each applicant’s examination results to the director of the program in which the applicant completed his/her senior resident year.

Examination Procedure

The Board intends to vigorously enforce the highest standards of honesty and integrity in the examination and the entire certification process. Accordingly, (a) the giving or receiving of aid in the examination, (b) the unauthorized possession, reproduction, or disclosure of any material, including, but not limited to, examination questions or answers before, during, or after the examination or (c) the offer of any financial or other benefit to any director, officer, employee, proctor, or other agent or representative of the Board in return for any right, privilege or benefit which is not usually granted by the Board to other similarly situated candidates or persons, may be sufficient cause for the Board to terminate an applicant’s participation in the examination, to invalidate the results of the examination, to withhold an applicant’s score or certificate, to bar an applicant permanently from all future examinations, to revoke a certificate or to take other appropriate action.

During the course of the written examination, proctors will be circulating among the candidates to observe any irregularities. If there is a suspicion of any irregularity, a candidate may be moved to a more isolated area, or his or her participation in the examination may be terminated. Additionally, in any case of suspected irregularity, the Board’s educational consultants may undertake statistical studies of a candidate’s answers compared with the answers of other participants in the examination to provide evidence that would support or fail to support the suspected irregularities. If, in the opinion of the Board, there exists a probability that an irregularity has occurred, the Board will afford the suspected individual(s) a procedural due process in order to assure fairness in the determination as to whether an irregularity has occurred. The Board will not, however, report scores or grant certification on the basis of scores which it has determined to be invalid.

Certification, Rejection and Revocation (From the Bylaws, Article VI)

The Board shall issue an appropriate certificate of qualification in otolaryngology (or in a subdivision thereof) to those who show themselves worthy of such certification according to the requirements of training, experience and demonstrated competence as stated in the current ABO Booklet of Information.

No certificate shall be issued, and any certificate issued by the Board shall be subject to revocation at any time by the Board, if it shall determine that the person involved:

1. Did not possess the required qualification and requirements for examination, whether or not such deficiency was known to the Board or any member thereof, or could have been ascertained by the Board prior to examination or at the time of the issuance of a certificate as the case may be.
2. Made a material misstatement or withheld information in his/her application or any other representation to the Board or any Committee thereof, whether intentional or unintentional.
3. Has been convicted by a court of competent jurisdiction of any felony or misdemeanor involving moral turpitude and in the opinion of the Board, having a material relationship to the practice of medicine.
Pathology

4. Had a license to practice medicine revoked or shall have been disciplined or censured by any court or other body having proper jurisdiction and authority because of any act or omission arising from the practice of medicine.

If the Board determines to withhold or revoke any certificate for any reason, the person affected thereby shall be given written notice of the reasons therefor. Such action by the Board shall be regarded as final unless such person requests a review of such action within thirty days after notice thereof has been mailed to him by the Board.

THE AMERICAN BOARD OF PATHOLOGY

Charles S. Hirsch, MD, President, New York, New York
Thomas J. Gill III, MD, Vice President, Pittsburgh, Pennsylvania

Tampa, Florida 33622-5915

(EDITOR’S NOTE: These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Pathology to ascertain whether the information they have is current.)

Qualification Requirements for Examination

All applications for certification are evaluated by the Credentials Committee of The American Board of Pathology (ABP). The evaluation process requires the consideration of:

I. Professional Education
II. Medical Licensure
III. Pathology Training Requirements
   A. Primary Certification
   B. Special Qualification Certification
   C. Added Qualification Certification
   D. Combined Primary and Subspecialty Certification
IV. Additional Credentialing/Experience Requirement

An applicant who has fulfilled these requirements is declared qualified for examination by the Credentials Committee for a period not to exceed three years.

I. PROFESSIONAL EDUCATION

A candidate must have graduated from a medical school in the United States or Canada accredited by the Liaison Committee on Medical Education, graduated from an osteopathic college of medicine accredited by the Bureau of Professional Education of the American Osteopathic Association, or graduated from a medical school in another country acceptable to the ABP.

Graduates of foreign medical schools must submit with their application a notarized copy of their medical school diploma showing the medical degree and the date it was awarded. A certificate showing that the applicant has passed a final examination is not acceptable.

II. MEDICAL LICENSURE

The candidate must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in either the United States or Canada.

III. PATHOLOGY TRAINING REQUIREMENTS

To acknowledge the diverse activities in the practice of pathology and to accommodate the interests of individuals wishing to enter the field, the ABP offers primary certification through one of four routes: combined anatomic and clinical pathology, anatomic pathology only, clinical pathology only, and combined anatomic or clinical pathology. A variety of special and added qualification certificates are offered for certified pathologists who wish to demonstrate expertise in one facet of anatomic or clinical pathology.

Only pathology training taken in the United States or Canada is acceptable toward meeting the ABP requirements. The training must be in programs that have been inspected and accredited by the Accreditation Council for Graduate Medical Education (ACGME) or specifically approved by the ABP.

A. PRIMARY CERTIFICATION

1. Training—the candidate must satisfactorily complete pathology training in a program accredited by the ACGME as outlined below.

   All applicants for primary certification in 1990 and thereafter must meet the credentialing/training requirement of one full year of clinical training, clinical experience, or clinical related research.

   a. Combined anatomic and clinical pathology (APCP) certification

      Four full years of full-time, approved training in an accredited APCP program that includes at least 18 months of formal training in anatomic pathology and 18 months of formal training in clinical pathology, and either an additional 12 months of full-time, continued formal training in anatomic and/or clinical pathology or 12 months of full-time approved training in a specialty facet of pathology as part of the accredited training program.

   b. Anatomic pathology (AP) certification

      (1) Three full years of full-time, approved training in anatomic pathology in an accredited APCP-4 or AP-3 program that includes at least 24 months of formal training in anatomic pathology, and either an additional 12 months of full-time, continued formal training in clinical pathology or 12 months of full-time approved training in a specialty facet of pathology as part of the accredited training program.

      (2) Primary certification in clinical pathology and two full years of full-time, approved training in anatomic pathology in an accredited APCP-4 or AP-3 program, with at least 18 months being formal training in anatomic pathology. Six months may be full-time approved training in a specialty facet of pathology as part of the accredited training program.

   c. Clinical pathology (CP) certification

      (1) Three full years of full-time, approved training in clinical pathology in an accredited APCP-4 or CP-3 program that includes at least 24 months of formal training in clinical pathology, and either an additional 12 months of full-time, continued formal training in clinical pathology or 12 months of full-time approved training in a specialty facet of pathology as part of the accredited training program.

      (2) Primary certificate in anatomic pathology and two full years of full-time, approved training in clinical pathology in an accredited APCP-4 or CP-3 program, with at least 18 months being formal training in clinical pathology. Six months may be full-time training in a specialty facet of pathology approved by the director of the pathology training program.

2. Experience—only under exceptional circumstances will experience credit or other forms of advanced training credit be given toward the pathology training requirements for primary certification. Two months of pathology experience acceptable to the ABP is equivalent to
one month of pathology training credit. The substitution of experience credit for a portion of approved pathology training requires the assessment and approval of the director of the pathology training program to ensure that such will permit a broad and adequate experience in anatomic and/or clinical pathology.

Credit for extensive full-time training or experience in a country other than the United States or Canada may be granted toward the requirements for a primary certificate, provided that the candidate has had a total of eight years of full-time validated experience in pathology acceptable to the ABP with four years having been in the United States or Canada. For AP qualification the training and experience must have been in AP, for CP, in CP, and for combined AP/CP, four years in AP and four years in CP.

3. Other credit mechanisms—the acceptability of other credits as substitutions for approved pathology training toward anatomic and/or clinical pathology certification is not automatic and is evaluated on an individual basis. Credit is given only for activities that have occurred in either the United States or Canada. The total combined period of advanced pathology training credit allowed for sections a, b, c, and d below will not exceed one year (12 months) and will be applied to the flexible year of required pathology training necessary for certification in AP/CP, AP, or CP.

To avoid any misunderstanding, potential applicants should communicate with the office of the ABP early in the training period to ascertain if credit may be acceptable.

The training program director will be asked to assess the proposal and to provide a recommendation as to the amount of credit that the director believes the candidate should receive.

The Board will notify the director of the pathology training program of such potential credit. Prior to admission to the certifying examination, the director of the final year of training must certify that the candidate is fully qualified to sit for the examination.

a. Student fellowship training during medical school—credit toward the pathology training requirements for primary certification may be granted for medical student fellowship training or research taken after the sophomore year in a department of pathology that has an accredited training program providing that the candidate did not receive credit for such toward graduation from medical school, that the training is validated by the director of the student fellowship activity, and that it is approved as an acceptable experience by the director of the accredited pathology training program in which the candidate is registered. No credit is given for electives or for courses that are part of the medical school curriculum.

b. Candidates holding a master's degree or doctor's degree in a special discipline of pathology or a basic science related to pathology may under certain circumstances obtain pathology training credit regardless of whether it was received before or after the medical degree. The evaluation and approval of the amount of training credit will depend on an assessment by the ABP regarding relevance of the subjects to anatomic or clinical pathology.

c. Research with a direct application to the practice of anatomic or clinical pathology may be considered for credit not to exceed, in combination with other credits, one year (12 months). The ABP encourages research and believes that all candidates should carry on investigation, teaching, and the publication of scientific papers during primary training.

d. The ABP will allow pathology training credit for time spent in a related clinical activity. The evaluation and approval of the amount of credit will depend on an assessment by the ABP and the pathology training director with regard to relevance of the experience. Credit for clinical activity or a combination of research and clinical training (a, b, c, and d) will not exceed one year (12 months).

e. Criteria for acceptance of a year of postbaccalaureate pathology fellowship toward pathology training requirements for certification—under certain circumstances, candidates may receive advanced pathology training credit toward the primary certification requirements for postbaccalaureate fellowship training in pathology. Such credit is not given toward the requirements for special or added qualification certification. The credit is assessed on an individual basis. Any granted credit will be assigned to the flexible year of required training in an accredited pathology program. Credit will not be given toward the required 18 months of formal (structured) anatomic pathology training or the required 18 months of formal (structured) clinical pathology training necessary to qualify for combined anatomic and clinical pathology certification.

Advanced credit toward single certification in anatomic pathology or single certification in clinical pathology will be given toward the flexible year of required pathology training and not toward the 24 months of required formal (structured) training.

The guidelines for acceptable postbaccalaureate fellowship training for credit are:

(1) Fellow must have fully and satisfactorily completed the sophomore year of medical school.

(2) Fellow must not receive credit for fellowship activities toward the requirements for graduation from medical school.

(3) Training must be full-time for a period not to exceed 12 months in a department of pathology that has a fully accredited pathology training program.

(4) Training must be under the direction of the director of the pathology training program or the chairman of the department of pathology.

(5) A description of proposed activities, responsibilities, and assignments for the anatomic pathology, clinical pathology, and research must be available and on file prior to beginning of fellowship. If a formal institutional program exists, a copy should be filed with the ABP.

(6) A validation and evaluation report must be submitted on completion of the fellowship by the program director or chairman of the department of pathology if the fellow wishes credit toward certification requirements.

Credit toward the additional credential clinical training/experience requirement is given only for an activity that has taken place after the applicant has obtained the medical (M.D.) degree.

4. Additional training or experience—A candidate for primary certification who has completed the required pathology training five years or more prior to date of submission of an application for examination must have either one year of additional training in pathology in a program accredited for such training by the ACCME or two full years of additional experience in pathology in the United States or Canada in a situation acceptable to the Board. This additional requirement must be met during the five-year period immediately preceding the date of submission of an application.

B. SPECIAL QUALIFICATION CERTIFICATION

All candidates applying for special qualification certification must hold a primary certificate from the ABP or from a recognized speciality board of the American Board of Medical Specialties (ABMS).

Credit is not given for pathology training taken outside of the United States and Canada. Also, credit is not given for training in areas of special qualification that was part of the training program leading to the requirements necessary to qualify for the primary examination in AP and/or CP.

No advanced credit will be given toward the requirements for special qualification certification by the mechanisms described in Section III A 3, Other Credit Mechanisms.
Pathology

1. Blood Banking/Transfusion Medicine (BB/TM)
   a. Applicants who **hold** a certificate in anatomic and clinical pathology, clinical pathology only, or a primary certificate plus a special qualification certificate in hematology from another primary medical board of ABMS:
      (1) One full year of additional supervised training in blood banking/transfusion medicine in a program accredited for such training by the ACGME or otherwise acceptable to the ABP or
      (2) Two additional years of full-time experience or its equivalence in blood banking/transfusion medicine under circumstances acceptable to the ABP.
   b. Applicants, other than those described in 1a, who hold a primary certificate from a primary medical board of ABMS: Two full years of full-time training in blood banking/ transfusion medicine in a program accredited for such training by the ACGME.
   c. Applicants seeking combined certification in clinical pathology and blood banking/tra nsfusion medicine (CP/BB/TM) see Section III D, Combined Certification.

2. Chemical Pathology (Chem P)
   a. Applicants who **hold** a certificate in anatomic and clinical pathology or clinical pathology only:
      (1) One full year of additional training in chemical pathology in a program accredited for such training by the ACGME or otherwise acceptable to the ABP or
      (2) Two additional years of full-time experience or its equivalence in chemical pathology in circumstances acceptable to the ABP.
   b. Applicants, other than those described in 2a, who hold a primary certificate from a primary medical board of ABMS: Two full years of full-time training in chemical pathology in a program accredited for such training by the ACGME.
   c. Applicants seeking combined certification in clinical pathology and chemical pathology (CP/Chem P) see Section III D, Combined Certification.

3. Dermatopathology (DP)
   Certification in dermatopathology is a joint and equal function of The American Board of Pathology (ABP) and The American Board of Dermatology (ABD). Such function relates to qualifications of candidates, standards of examinations, and the form of the certificate.
   All candidates applying for examination must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in either the United States or Canada.
   a. Prerequisites
      The American Boards of Pathology and Dermatology will admit candidates to examination for certificates of special qualification in dermatopathology who are otherwise qualified and who have met one of the following requirements:
      (1) Applicants who are diplomates of both the ABP and the ABD.
      (2) Applicants already holding a primary certificate from the ABP (anatomic pathology, or combined anatomic and clinical pathology) or the ABD and the addition of one year of training in dermatopathology in a program accredited for such training by the ACGME. This additional training must be after the candidate has met the full training requirements for certification in pathology or dermatology.
   b. Training
      Training programs in dermatopathology are a joint and equal function of the departments of pathology and dermatology. The pathologist applicant must spend one-half of the required training time in clinical dermatology.

COMMITTEE FOR DERMATOPATHOLOGY:
William A. Caro, MD, Chicago, Illinois
Merle W. Delmer, MD, San Antonio, Texas
Mark Allen Everett, MD, Oklahoma City, Oklahoma
Thomas J. Gill III, MD, Pittsburgh, Pennsylvania
Loren E. Golitz, MD, Denver, Colorado
William H. Hartmann, MD, Long Beach, California

Candidates may obtain an application as follows:
Pathologists—
   M. R. Abell, M.D., Ph.D.
   Executive Director
   American Board of Pathology
   P. O. Box 25915
   Tampa, Florida 33622
Dermatologists—
   Clarence S. Livingood, MD
   Executive Director
   The American Board of Dermatology, Inc.
   Henry Ford Hospital
   2799 West Grand Boulevard
   Detroit, Michigan 48202

4. Forensic Pathology (FP)
   a. Applicants who **hold** a certificate in anatomic and clinical pathology, anatomic pathology only, or in special instances, clinical pathology only:
      (1) One full year of additional supervised training in forensic pathology in a program accredited for such training by the ACGME or approved for such training by the ABP or
      (2) Two additional years of full-time experience in forensic pathology or its equivalence in a situation comparable to that of a program accredited for such training by the ACGME.
   b. Applicants seeking combined certification in anatomic pathology and forensic pathology (AP/FP) see Section III D, Combined Certification.

5. Hematology (HEM)
   a. Applicants who **hold** a certificate in anatomic and clinical pathology, clinical pathology only, or a primary certificate plus a special qualification in hematology from another primary medical board of ABMS:
      (1) One full year of additional supervised training in hematology (pathology) in a program accredited for such training by the ACGME or otherwise acceptable to the ABP or
      (2) Two additional years of full-time experience or its equivalence in clinical laboratory hematology under circumstances acceptable to the ABP.
   b. Applicants, other than those described in 5a, who hold a primary certificate from a primary medical board of ABMS: Two full years of full-time training in hematology (pathology) in a program accredited for such training by the ACGME.
   c. Applicants seeking combined certification in clinical or anatomic pathology and hematology (CP/HEM, AP/HEM) see Section III D, Combined Certification.

6. Immunopathology (IP)
   a. Applicants who **hold** a certificate in anatomic and clinical pathology:
      (1) One full year of additional supervised training in immunopathology in a program accredited for such training by the ACGME or approved for such training by the ABP or
      (2) Two additional years of full-time experience in immunopathology or its equivalence under circumstances acceptable to the ABP.
   b. Applicants who **hold** a certificate in anatomic pathology only or clinical pathology only:
      (1) Two full years of additional supervised training in immunopathology in a program accredited for such training by the ACGME or approved for such training by the ABP or
CERTIFICATION REQUIREMENTS

(2) Four additional years of full-time experience in immunopathology or its equivalence under circumstances acceptable to the ABP.

c. Applicants who hold a certificate in anatomic pathology only or clinical pathology only plus a certificate of Special Qualification in Blood Banking/Transfusion Medicine, Hematology, Medical Microbiology, or Chemical Pathology:
   (1) One full year of additional supervised training in immunopathology in a program accredited for such training by the ACGME or approved for such training by the ABP or
   (2) Two additional years of full-time experience in immunopathology or its equivalence under circumstances acceptable to the ABP.

d. Applicants seeking combined certification in anatomic pathology or clinical pathology and immunopathology (AP/IP, CP/IP), see Section III D, Combined Certification.

7. Medical Microbiology (MMB)
   a. Applicants who hold a certificate in anatomic and clinical pathology, clinical pathology only, or a primary certificate plus a special qualification certificate in infectious disease from another primary medical board of ABMS:
      (1) One full year of additional training in medical microbiology in a program accredited for such training by the ACGME or otherwise acceptable to the ABP or
      (2) Two additional years of full-time experience or its equivalence in clinical laboratory medical microbiology or its equivalence under circumstances acceptable to the ABP.
   b. Applicants, other than those described in 7a, who hold a primary certificate from a primary medical board of ABMS: Two full years of full-time training in medical microbiology in a program accredited for such training by the ACGME.

8. Neuropathology (NP)
   a. Applicants who hold a certificate in anatomic and clinical pathology or anatomic pathology only: Two full years of additional supervised training in neuropathology in a program accredited for such training by the ACGME or approved for such training by the ABP.
   b. Applicants who hold a certificate in clinical pathology or a primary certificate from another primary medical specialty board:
      (1) One full year of approved training in anatomic pathology in a program accredited for such training by the ACGME or approved for such training by the ABP plus
      (2) Two full years of additional supervised training in neuropathology in a program accredited for such training by the ACGME or approved for such training by the ABP.

9. Pediatric Pathology (PP)
   a. Applicants who hold a certificate in anatomic and clinical pathology or anatomic pathology only:
      (1) Two full years of additional supervised training in pediatric pathology in a program accredited for such training by the ACGME or approved for such training by the ABP or
      (2) Four additional years of full-time experience in pediatric pathology or its equivalence in a situation offering experience opportunities comparable to those of an accredited or approved training program in pediatric pathology and acceptable to the ABP.
   b. The pediatric pathology training or experience should occur after the completion of the full training requirements necessary to qualify for certification in APCP or AP.

C. ADDED QUALIFICATION CERTIFICATION
   All candidates applying for added qualification certification must hold a primary certificate from the ABP.
   Credit is not given for training outside of the United States and Canada. Also, credit is not given for training in an area of additional qualification that was part of the training program leading to the requirements necessary to qualify to sit for the primary examination in AP or APCP.
   No advanced credit will be given toward the requirements for added qualification certification by the mechanisms described in Section III A 3, Other Credit Mechanisms.

   Cytopathology: Training/Experience
   a. Applicants who hold a certificate in anatomic pathology or combined anatomic and clinical pathology:
      (1) One full year of full-time supervised training in cytopathology in a program accredited for such training by the ACGME or approved for such training by the ABP or
      (2) Two years of full-time experience in cytopathology or its equivalence under circumstances acceptable to the ABP.
   b. Applicants seeking combined certification in anatomic pathology and cytopathology (APCYP), see Section III D, Combined Certification.

   D. COMBINED PRIMARY AND SUBSPECIALTY CERTIFICATION
   Under certain circumstances special qualification or added qualification training may be arranged in conjunction with the primary training requirements, permitting a candidate to qualify for a combined certificate. All applicants for combined certification in 1990 and thereafter must also meet the additional credential training/experience requirement of one full year of clinical training, clinical experience, or clinically related research. (See Section F, Credential Training/Experience Requirement.)
   Advanced credit will not be given toward the requirements for combined certificates (involving primary training and special or added qualification training) by the mechanisms described in Section III A 3, Other Credit Mechanisms.

   The acceptable combinations of certification and the required training are:
   1. Anatomic pathology and forensic pathology (APFP)—two full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and one full year of approved training in forensic pathology in a program accredited for such training by the ACGME and one additional year of approved training in anatomic pathology or one of the specialties areas of pathology such as neuropathology, toxicology, or chemical pathology.
   2. Anatomic pathology and neuropathology (APNP)—two full years of approved training in anatomic pathology and two full years of approved training in neuropathology in a program accredited for such training by the ACGME with adequate experience in diagnostic neuropathology.
   3. Anatomic pathology and hematology (APHem)—two full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and two full years of approved training in hematology in a program accredited for such training by the ACGME with adequate training or experience in the clinical pathology aspects of hematology.
   4. Anatomic pathology and immunopathology (APIP)—two full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and two full years of approved training in immunopathology in a program accredited for such training by the ACGME.
   5. Clinical pathology (CP) plus special qualification—three full years of approved training in clinical pathology in a program accredited for such training by the ACGME plus one full year of approved special qualification training in blood banking/transfusion medicine, chemical...
Pathology

pathology, hematology, or medical microbiology in a program accredited for such training by the ACGME as defined in Section III B, Special Qualification Certification; or

Two full years of approved training in clinical pathology plus two full years of approved special qualification training in blood banking/transfusion medicine, chemical pathology, hematology, immunopathology, or medical microbiology in a program accredited for such training by the ACGME as defined in Section III B, Special Qualification Certification.

6. Anatomic Pathology and Cytopathology (APCyP)—Three full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and one full year of approved training in cytopathology in a program accredited for such training by the ACGME or approved for such training by the ABP.

Additional Credential Training/Experience Requirement

The requirement of one full year of clinical training, experience, or clinically related research is in addition to the required pathology training in an accredited program. It must be taken after having obtained the medical degree.

The ABP considers the most appropriate and, for applicants, the most beneficial approach to meeting this requirement to be one full year of full-time, approved clinical training in the United States or Canada (Pathway a). The Board recognizes that such is not always possible and thus offers alternate pathways to meeting the requirement. The requirement can be met by:

a. One full year of full-time, approved graduate medical education in a transitional year training program; or in a clinical area of medicine such as Internal Medicine, surgery, obstetrics and gynecology, pediatrics, emergency medicine, or family practice.

OR

b. One year of full-time research in pathology or in another clinical discipline providing that the research has clearly defined clinical implications. The guidelines for acceptance of research activity are:

1. Research activity must have taken place after the candidate has obtained the M.D. or equivalent degree.

2. The research must involve patients directly or materials obtained from patients, or techniques that can be applied directly to the diagnosis of human disease or to the understanding of the basic mechanisms of disease.

3. Prospective approval of a research program for credentialing credit must be given by the director of the pathology training program.

4. Credit for research activity prior to entering a pathology training program must be approved by the director of the pathology training program and the ABP. Such research must have occurred in an institution in the United States or Canada.

OR

c. One year of training in one of the recognized specialty fields of pathology that includes clinical correlation and patient contact. (This year cannot be used to meet the requirements both for clinical training and for special or added qualification certification.)

OR

d. The satisfactory completion of one full year of a combination of clinical training, clinical experience, clinical research, or subspecialty pathology training in addition to the required pathology training necessary to qualify for certification in anatomic and clinical pathology, anatomic pathology, or clinical pathology. The training director is responsible for defining and justifying this year of clinical activity to the ABP. In meeting the credential clinical requirement by combinations of pathways a, b, c, the ABP recommends that the periods of activity be at least four months in duration wherever possible.

Clinical Training—Outside the United States and Canada

Under certain circumstances, clinical training taken in countries other than the United States and Canada may be acceptable toward meeting the ABP credential requirement of clinical training provided that the following criteria are fully met and validated:

1. The clinical training was taken after obtaining the M.D. or equivalent degree acceptable to the ABP.

2. Satisfactory completion of one full year of full-time training in clinical medicine in a multidisciplinary training program (internship) or in a training program in internal medicine, pediatric medicine, general surgery, or obstetrics and gynecology.

3. Proof from the responsible independent national organization that the clinical training was taken in a program that was:

a. Inspected and accredited for clinical training by the agency responsible for the accreditation of all graduate medical education programs in the country; OR

b. approved by the respective national medical specialty organization toward meeting its requirements for certification.

4. Indication from the director of the training program that the candidate was registered in the program, completed the training satisfactorily, and was the physician of record in the diagnosis and treatment of patients throughout the full 12 months.

5. Recommendation from the pathology program director in regard to the person's request.

The acceptability of clinical training toward meeting the ABP requirements is assessed on an individual basis, and it is imperative that an opinion be obtained from the ABP well in advance of the submission of an application for certification. The amount of advanced credit for clinical training outside of the United States and Canada toward the ABP requirements for certification cannot exceed a total of 12 months.

It is the responsibility of the person seeking credit to ensure that all validating items for these criteria are submitted to the ABP for consideration. No assessment of possible credit will be given until all validating and reference information has been received.

Application for Examination

Requests for application forms must be made in writing to the office of the ABP. Completed forms should be returned with the required credentials and the application-examination fee. An application cannot be given consideration unless it is accompanied by the application-examination fee.

Fees

The application examination fee schedule for 1991 is as follows:

- Anatomic pathology only—$900
- Clinical pathology only—$900
- Anatomic pathology portion of combined APCP—$900
- Clinical pathology portion of combined APCP—$900
- Combined anatomic and clinical pathology—$1000
- Special qualification—$1000
- Added qualification—$1000
- Combined anatomic or clinical pathology and special qualification or added qualification (both parts taken at one sitting)—$1200

The application-examination fee includes a nonrefundable processing fee of $100. If the different divisions of the APCP and the combined primary and special or added qualification examinations are taken at separate sittings, there is a separate examination fee for each sitting. If the candidate fails in the examination, admission to a repeat examination is permitted, but any reexamination must occur within the three-
year period of qualification described under “Qualification Period for Examination.” The applicant must pay the examination fee according to the current fee schedule before another examination will be given. If, after having applied for a specific examination, the candidate requests a transfer to a future examination prior to the final filing date, there is a transfer fee of $100.

In the event of the candidate’s illness at the time of the examination, validated by the candidate’s attending physician, a major portion of the application-examination fee will be either transferred to the next examination or refunded.

**Vacation, Maternity, and Other Leave**

Each program may develop individual sick, vacation, and other leave policies for the resident. However, one year of approved training credit toward ABP certification requirements must be 52 weeks in duration and must include at least 48 weeks of full-time pathology training. Furthermore, unused vacation and other leave time may not be accumulated to reduce the overall duration of training.

**Irregular Behavior**

In the interest of protecting the integrity of the ABP and its certification examinations, the following irregular behaviors may be sufficient to bar a person from future examinations, to terminate one’s participation in the examination, or invalidate the results of one’s examination, to cause the withholding or revocation of one’s scores or certificate, or to merit other appropriate action by the Board:

1. The giving or receiving of aid in the examination as evidenced either by observation or by statistical analysis of candidates’ answers;
2. The unauthorized possession, reproduction, or disclosure of any ABP examination-related materials, including, but not limited to, examination questions or answers, before, during, or after the examination; and/or
3. The offering of any benefit to any agent of the Board in return for any right, privilege, or benefit that is not usually granted by the Board to other similarly situated candidates or persons.

In addition, the Board may withhold a candidate’s scores and require that the candidate retook one or more portions of the examination if presented with sufficient evidence that the security of the examination has been compromised, notwithstanding the absence of any evidence of the candidate’s personal involvement in such activities.

**Chemical Dependency**

Applications for certification from persons who have had a history of chemical dependency as reported to the Board will not be accepted unless the applicant submits documented evidence acceptable to the Board that the disease is known to be under control for five years from the time of its most recent occurrence.

Candidates who have been declared qualified to sit for a certifying examination and who have a current problem of chemical dependency, as reported to the Board, will not be admitted to examination. Denial of admission to examination may result in the loss of opportunities for examination and, ultimately, in the decision to declare the candidate’s application void for failure to complete the requirements for certification within the qualification time period allotted to every candidate.

**Qualification Period for Examination**

The ABP does not recognize or use the term “Board Eligible” and does not issue statements concerning “Board Eligibility.” An applicant is declared qualified for examination only after a formal application has been received and approved by the Credentials Committee.

The ABP will permit a candidate who has qualified for examination on the basis of approved training and/or experience to sit for examination during a period not to exceed three years after being declared qualified to take the examination. When this period has expired, additional periods of qualification for examination will be permitted upon submission of documented evidence that the candidate has obtained further training or experience subsequent to the termination of the period of qualification. This must be in the form of an additional year of approved training in an accredited program or two years of experience acceptable to the ABP.

At any time after declaring a candidate qualified for examination, the Credentials Committee at its discretion may withdraw such qualification or may as a condition require satisfaction by the candidate of specified conditions. In the exercise of its discretion under this regulation, the Credentials Committee shall be entitled to act without reason assigned.

If it be determined that an applicant has falsified information in the application form, the applicant will not be approved for the certifying examination and must wait a period of three years before being permitted to file a new application. The applicant will not be considered qualified to sit for the certifying examination during the three-year interim.

**Examination Dates and Sites**

Examinations are held at the discretion of the Board. The tentative schedules for forthcoming examinations are:

**ANATOMIC AND CLINICAL PATHOLOGY EXAMINATIONS**

4, 5, 6 June 1991 — Columbus, Ohio
18, 19, 20 November 1991 — San Diego, California
2, 3, 4 June 1992 — Indianapolis, Indiana

**EXAMINATIONS FOR SPECIAL AND ADDITIONAL QUALIFICATION**

The examinations for Special Qualification in Chemical Pathology, Medical Microbiology, and Immunopathology will be given every two years beginning after the 1991 examination. Thus there will be no examinations in these areas in 1992. Examinations will be given in 1993 and every other year thereafter.

3 June 1991 — Columbus, Ohio
1 June 1992 — Indianapolis, Indiana

The dermatopathology examination is scheduled separately at a time and place mutually agreed upon by The American Board of Pathology and The American Board of Dermatology.

**DERMATOPATHOLOGY EXAMINATION**

The examination in dermatopathology will be given every two years beginning after the 1991 examination. Thus there will be no examination in dermatopathology in 1992. An examination will be given in 1993 and every other year thereafter.

1 November 1991 — Chicago, Illinois

**Final Filing and Cut-off Dates**

The final filing dates for receipt of applications or registrations are as follows:

February 1 for spring examinations
August 1 for fall examinations

If the candidate cancels an appearance for the examination after those dates or does not appear for the examination, the entire application-examination fee is forfeited.
Pediatrics

Issuance of Certificate

Upon satisfactorily passing the appropriate examination(s), a candidate will be issued a certificate by the ABP in those fields of pathology for which the ABP accepted the credentials. Thus, a candidate who is qualified for the combined examination in anatomic and clinical pathology, having fulfilled the minimum pathology training requirement of 48 months and the credential clinical requirements of 12 months will receive a certificate only after both parts (anatomic and clinical pathology) of the examination have been passed.

Candidates qualified for examination in anatomic or clinical pathology and a specialty area of pathology and claiming qualification on the basis of the required training in each area will receive a certificate only after each of the examinations has been passed.

A candidate who has fulfilled all the prerequisites, including the minimal requirements of 36 months of approved training in anatomic pathology only or clinical pathology only, plus the 12 credential months of activity, will receive a certificate after passing the examination in anatomic pathology or in clinical pathology.

If a candidate's certificate is lost or destroyed, the ABP will issue a duplicate certificate upon written request and justification, together with the necessary engraving and handling charge of $50.

Revocation of Certificate

In its discretion, the ABP may revoke a certificate for due cause, including, but not limited to, the following causes:

- a. The diplomate did not possess the required qualifications and requirements for examination whether or not such deficiency was known to the ABP or any committee thereof prior to examination or at the time of the issuance of the certificate as the case may be;
- b. The diplomate made a material misstatement or withheld information in his application or in any other representation to the ABP or any committee thereof, whether intentional or unintentional;
- c. The diplomate engaged in irregular behavior in connection with an examination of the ABP, whether or not such practices has an effect on the performance of the candidate on an examination;
- d. The diplomate was convicted by a court of competent jurisdiction of any felony or misdemeanor involving moral turpitude and, in the opinion of the ABP, having a material relationship to the practice of medicine;
- e. There has been a limitation or termination of any right of the diplomate associated with the practice of medicine in any state, province, or country, including the imposition of any requirement of surveillance, supervision, or review by reason of violation of a medical practice act or other statute or governmental regulation, disciplinary action by any medical licensing authority, entry into a consent order, or voluntary surrender of license.

Revocation of certificates shall be governed by procedures set forth in the ABP Bylaws as amended from time to time.

Limitation of Number of Certificates of Special Qualification (Competence)

As a condition of admission to an examination for Special Qualification in Pathology, an individual holding two or more certificates of Special Competence and/or Special Qualification shall surrender a sufficient number of certificates to reduce their number to one. In the event that the individual fails the examination, the surrendered certificate(s) shall be restored. This action does not include certificates of Special Competence (Qualification) in Radioscopy Pathology and in Dermatopathology.

Update of ABP Certificate

The ABP will permit diplomates of the Board to retake the examination in the area of pathology in which they are already certified for the purpose of updating their certificate(s). The application examination fee and the passing requirements are the same as for initial candidates. Successful candidates will be issued a new, currently dated certificate(s).

Handicapped Candidates

The ABP will make every endeavor to assist handicapped candidates during its examinations. Candidates who may need assistance or other special arrangements must provide written details with a request for special consideration when submitting their application for examination.

Appeals Procedure

An individual who has received an unfavorable ruling regarding qualification to take the examination may initiate an appeal of such determination by making a written request for reconsideration to the ABP office within 90 days of the date such ruling was mailed.

A candidate who fails a certifying examination may request that the examination be rescinded to verify the accuracy of the results as reported. Such request must be made in writing within 90 days of the date of mailing of the results of the examination to the candidate and must be accompanied by the fee of $50 per certifying examination or part thereof. There shall be no further appeal from failure of an examination.

Thomas K. Oliver, Jr., MD, Senior Vice-President, Chapel Hill, North Carolina
Diane W. Buzzin, Vice President, Chapel Hill, North Carolina
Robert C. Guerin, PhD, Vice President, Chapel Hill, North Carolina
Fred G. Smith, Jr., MD, Vice President, Chapel Hill, North Carolina

(EDITOR'S NOTE: These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Pediatrics to ascertain whether the information they have is current.)

Requirements for Admission to Examination

All applicants for examination for certification must meet the following general requirements:
I. THE APPLICANT MUST BE A GRADUATE OF AN APPROVED MEDICAL SCHOOL in the United States or have graduated from a recognized Canadian or foreign medical school. (For more detailed information, please read below.)

II. THE APPLICANT MUST HAVE AN UNRESTRICTED LICENSE TO PRACTICE MEDICINE in one of the states, districts, or territories of the United States or a province of Canada or unrestricted privileges to practice medicine in the United States armed forces. A copy of the unrestricted license must be received before the date of the certifying examination. (For more detailed information, please read below.)

III. THE APPLICANT MUST COMPLETE THREE YEARS OF HOSPITAL-BASED PEDIATRIC TRAINING in programs accredited by the Residency Review Committee for Pediatrics (RCPSC) or in programs in Canada approved by the Royal College of Physicians and Surgeons of Canada (RCPSC). (For more detailed information, please read below.)

IV. THE BOARD WILL REQUEST PROGRAM DIRECTORS TO VERIFY SATISFACTORY COMPLETION OF TRAINING AND TO EVALUATE THE ACCEPTABILITY OF THE APPLICANT AS A PRACTITIONER OF PEDIATRICS. (For more detailed information, please read below.)

V. OTHER CONSIDERATIONS: The American Board of Pediatrics reserves the right to withhold certification and/or permission to take its examinations in the event of exceptional circumstances demonstrating that an applicant is not capable of performing the role of physician and advocate for infants, children, and adolescents. In such instances, the applicant will be notified and may appeal the decision to the Credentials Committee of the Board.

1. GRADUATION FROM MEDICAL SCHOOL

The applicant must be a graduate of a medical school which has been accredited by the Liaison Committee on Medical Education (LCME) in the United States or Puerto Rico or must have graduated from a Canadian or foreign medical school. Graduates of medical schools in Canada which are approved by the RCPSC may apply for examination under the same regulations that apply to graduates of LCME-accredited schools.

APPLICANTS WHO ARE GRADUATES OF MEDICAL SCHOOLS which have not been accredited by the LCME or RCPSC may apply for examination if they hold the standard certificate of the Educational Commission for Foreign Medical Graduates (ECFMG) and if they fulfill the training requirements established for certification by the American Board of Pediatrics.

Graduates of foreign medical schools must submit a photocopy of their medical school diploma showing the medical degree and the date it was awarded. A certificate showing that the applicant has passed a final examination is not acceptable.

Graduates of accredited osteopathic medical schools in the United States will be accepted for examination if they satisfy the training requirements of the Board. Training must be completed in programs accredited by the RCPSC.

1. LICENSE TO PRACTICE MEDICINE

If an applicant has any action pending against him/her regarding the right to have an unrestricted license to practice medicine, he/she will not be admitted to the examination. The Board must be notified if there are technical difficulties in obtaining an unrestricted license.

1. TRAINING REQUIREMENTS

Applicants must complete three years of postgraduate hospital-based pediatric training in programs accredited by the RCPSC or in programs in Canada approved for general pediatric specialty training by the RCPSC. The training curriculum must be compatible with the Special Requirements for program accreditation, which are published annually in the Directory of Graduate Medical Education Programs. During this period of training, the applicant is expected to assume progressively responsible care of patients. CREDIT WILL NOT BE GIVEN FOR TRAINING COMPLETED BEFORE THE MEDICAL DEGREE IS AWARDED.

The Board recognizes five levels of pediatric training (PL-0 through PL-4) and defines these levels as follows:

PL-0: Internships or residencies that are accredited in fields other than pediatrics, e.g., rotating, flexible, family practice, internal medicine, general surgery, psychiatry. Applicants who are graduates of foreign medical schools and who received their degrees prior to July 1, 1975, may request PL-0 credit for hospital-based training in another country; provided (1) it was at least one year in duration, (2) it was exclusively in the field of pediatrics, and (3) it is evaluated by the Credentials Committee of the Board and deemed to be acceptable. Applicants requesting PL-0 level credit for hospital-based pediatric training completed in another country must submit a letter from the physician in charge of their training program indicating the dates and specialty area of their training. TRAINING AT THE PL-0 LEVEL IS NOT ACCEPTABLE TOWARD FULFILLMENT OF THE CERTIFICATION REQUIREMENTS FOR THOSE WHO RECEIVED THEIR MEDICAL DEGREES ON OR AFTER JULY 1, 1975.

PL-1: The first postgraduate year in general comprehensive pediatric training in an accredited program.

PL-2: The second postgraduate year in general comprehensive pediatric training in an accredited program following PL-1, but with increased responsibility for patient care and for the supervision of junior staff and medical students.

PL-3: The third postgraduate year in general comprehensive pediatric training in an accredited program. This year must be an integral part of the total three years of general pediatric training required of all medical school graduates who received their degrees after June 30, 1978. It may be a chief residency or a senior supervising residency.

PL-5: A residency in a pediatric subspecialty in which the proportion of time in nonclinical or laboratory activities is so large that a minimum of two years must be spent to gain the equivalent of a year of clinical training. SUBSPECIALTY TRAINING AT THE PL-4 LEVEL IS NOT ACCEPTABLE TOWARD FULFILLMENT OF THE CERTIFICATION REQUIREMENTS FOR THOSE WHO RECEIVED THEIR MEDICAL DEGREES AFTER JUNE 30, 1978.

Training Requirements by Year of Graduation From Medical School

The requirements for admission to the certifying examination of the Board vary depending upon the date an applicant received his/her medical school diploma. Applicants who received their medical degrees after June 30, 1978, must complete three years of hospital-based training in general comprehensive pediatrics in programs that are accredited by the RCPSC or approved by the RCPSC. A year of supervisory experience must be an integral part of the total three-year program; this year must include at least six months of direct and senior supervisory responsibility in general pediatrics.

The American Board of Pediatrics recognizes that occasionally there will be an exceptional applicant who should be given special consideration to substitute other training for the third year of general comprehensive pediatrics required of medical graduates who received their degrees after June 30, 1978. Information concerning this Special Alternative Pathway may be obtained by writing to the Board Office. The
Certification Requirements

Pediatrics

Pediatric department chairman may initiate such a request for prospective review by the Board after the resident has completed one year of general comprehensive pediatric training. The completed petition (obtained from the Board office) must be received by September 15 of the resident’s PGY-2 year. Physicians initially approved by the Credentials Committee for special consideration will be asked to take a screening examination. The examination must be taken by November 1. The score on this examination then will be used by the Credentials Committee for final action on the petition.

Training Programs: The American Board of Pediatrics approves applicants for admission to its certifying process. The Board does not accredit training programs. Requests by directors for accreditation of their programs should be addressed to: Executive Secretary, Residency Review Committee for Pediatrics, 515 North State Street, Chicago, IL 60610.

Credit for Training in Accredited Programs Other Than Pediatrics: Physicians transferring to pediatric residency training from other accredited residencies, e.g., family practice, internal medicine, transitional, are advised to correspond with the Board to determine whether credit may be awarded for previous training. Requests for credit should be submitted prior to entering pediatric residency training.

Credit for Pediatric Training in Non-Accredited Programs: The American Board of Pediatrics has established the requirements for individuals who have had at least three years of pediatric training in non-accredited programs. Interested individuals should write the Board.

Special Programs:

The Medicine/Pediatric Program: A special agreement exists with the American Board of Internal Medicine whereby an applicant may fulfill the training requirements of both Boards by completing two years of accredited training in general comprehensive pediatrics and two years of accredited training in internal medicine. All four years should be completed in the same combined training program. Exceptions must be approved by both Boards. Continuity of each specialty should be provided throughout the four years. Guidelines for combined training have been approved by both Boards and are available by writing either Board office. They are published in Pediatr. 1998; 84:190–195. A list of institutions offering combined programs is published in the Directory of Graduate Medical Education Programs. Applicants may not appear for the certifying examination of the Board until all training has been satisfactorily completed.

The Pediatrics/Neurology Program: A special agreement exists with the American Board of Psychiatry and Neurology whereby an applicant who completes two years of accredited training in general comprehensive pediatrics and the neurology training necessary to meet the requirements for certification in neurology with special competence in Child Neurology fulfills the training requirements of both the American Board of Pediatrics and the American Board of Psychiatry and Neurology. Applicants may not appear for the certifying examination until all training has been satisfactorily completed.

The Pediatrics/Physical Medicine and Rehabilitation Program: A special agreement exists with the American Board of Physical Medicine and Rehabilitation whereby a physician interested in pediatric rehabilitation can qualify for admission to the certifying examinations of both Boards. The residency training can be completed in five years. Interested applicants may obtain details from either Board office. Proposed programs must be submitted in detail to the Credentials Committee of each specialty Board for approval. It is recommended that all training be completed at one academic institution; any deviation will require prospective approval by both Boards.

The Pediatrics/Emergency Medicine Program: A special agreement exists with the American Board of Emergency Medicine whereby an applicant may fulfill the training requirements of both Boards by completing joint training in five years. All five years should be completed in the same combined training program. Exceptions must be approved by both Boards. Training programs must be approved prospectively by both Boards. Guidelines for combined training have been approved by both Boards and are available by writing either Board office. They are scheduled to be published in Annals of Emergency Medicine in February 1991. Applicants may not appear for the certifying examination until all training has been satisfactorily completed.

Any applicant, regardless of the year of graduation from medical school, may fulfill the training requirements of the Board by completing the training routes outlined in the Special Programs.

The American Board of Pediatrics, the American Board of Psychiatry and Neurology, and the Committee on Certification in Child Psychiatry have formed a committee that is overseeing training in six pilot programs. Training includes 24 months of general comprehensive pediatrics, 18 months of child and adolescent psychiatry, and 18 months of adult psychiatry which will satisfy the training requirements for certification in all three areas. Physicians pursuing training in these six pilot programs may not appear for the certifying examination until all training has been completed. Credit for training via this route may be obtained only by training in one of these programs. Further information concerning these combined pilot training programs may be obtained by contacting the Board office.

Graduate School Courses: It is a fundamental concept of the American Board of Pediatrics that a residency training program should provide for properly organized progressive responsibility for the care of sick children. The Board believes that this can be accomplished through continuity of clinical experience under the supervision of attending physicians who are themselves responsible for the care of the children of that service. The substitution of a formal graduate or postgraduate school course that does not carry the essential ingredient of responsibility for patient care is inconsistent with this principle. Accordingly, the Board will not accept such courses in fulfillment of its training requirements.

Military Service: Military assignments will not be accepted in lieu of a year of required training unless served as a resident in a military hospital that is accredited by the RRC.

Special Situations: The Board recognizes that situations may arise that are not explained by the preceding information. A physician may have worked in a pediatric field for many years yet be deficient in the formal prerequisites for examination, or a physician may have completed specialized training not explained in the above requirements. In such cases, the individual should present his/her credentials to the Senior Vice-President of the Board, who may ask the Credentials Committee to review them and decide whether permission should be given to enter the certification process.

Statement of Eligibility: The Board does not issue statements of "eligibility" for its examinations. The Board will verify whether a physician is certified or is not certified or if he/she has been approved to take the certifying examination.

IV. Verification of Training and Evaluation by Directors of Hospital-Based Pediatric Training Programs

The Board regards the evaluation of trainee competency as a continuum that begins during training and concludes with the certifying examination following formal training. The Board depends upon program directors and their faculties to provide assessments of an applicant's clinical competency as demonstrated in the training setting. The certifying examination gives candidates the opportunity to demonstrate to the Board the knowledge and clinical problem-solving abilities needed to diagnose and manage the health problems of children.
A. The Board will request program directors to verify completion of training and to sign the following statement on the Verification of Clinical Competence Form: "I certify that the above-named applicant has demonstrated the necessary attitudes, knowledge, clinical judgment, technical skills, and interpersonal skills and is judged to be fully prepared for independent responsibility as a general pediatrician; to my knowledge he/she has moral and ethical integrity. The applicant is recommended for examination."

In recommending a candidate for the examination, a program director should keep in mind the Definition of a Passing Candidate as determined by the Board:

A candidate shall demonstrate the following abilities as they pertain to infants, children, and adolescents:

1. assessment of the clinical issues and formulation of a management plan for any medical or health maintenance problem;
2. execution of the management plan with the patient and family, without further medical consultation, for all common problems of disease and health maintenance and for all medically life-threatening situations;
3. consultation, when appropriate, with physicians and other professionals regarding common problems and life-threatening situations; and
4. arrangement for help for the patient and knowledge of what to anticipate from the consultant, being prepared personally to guide further management with assistance, when appropriate, for unusual problems requiring subspecialty, surgical, or other specialized skills.

All applicants must have verification of training and verification of clinical competence on file in the Board office to be admitted to the certifying examination. It is the applicant's responsibility to be sure the program director submits all the required documents by the appropriate deadline.

When an applicant has not attained the appropriate knowledge and skills, the program director should sign Statement B on the Verification of Clinical Competence Form. By signing this statement, the program director is recommending that the applicant not be admitted to the examination.

If an applicant's training is not verified and/or he/she is not recommended for admission to the examination, the applicant will be required to complete satisfactorily an additional period of hospital-based training in general comprehensive pediatrics, either in an accredited program in the United States or in an approved program in Canada before reapplying to the Board. Alternatively, the applicant may appeal to the Credentials Committee of the Board. The Credentials Committee will gather additional information about the applicant and decide if permission to take the examination should be given. For an appeal, the applicant will be asked to submit copies of certificates of satisfactory completion of training. If the applicant has been denied such a certificate, then admission will be refused on the basis of incomplete training. However, possession of such a certificate will not automatically admit the person to the Board's certification process. Most training certificates attest to the achievement of a minimal level of competence or the fulfillment of an employment contract. Therefore, the program director's statement on the Verification of Clinical Competence Form will take precedence over the certificate from the hospital. The Board must have the program director's assurance that an applicant meets the standards expected of a certified pediatrician. Program directors are urged not to issue certificates of successful completion of training when the resident is deemed not to have met those standards.

At least 33 months of training is required. Absences in excess of three months, whether for vacation, sick leave, maternity leave, etc., should be made up. If the program director believes that an extended absence of more than three months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

B. The program director is required to provide further information about the applicant. The program director is asked to evaluate the applicant on a nine-point scale in the following areas: gathering data by history, by physical examination, and by laboratory studies; assessing data and arriving at a diagnosis; managing problems and maintaining health; interpersonal relationships with patients and families; interpersonal relationships with other members of the health team; and work habits and personal qualities.

The program director is asked to rate the applicant's overall clinical competency by indicating which of the following phrases best describes the applicant in terms of his/her ability to care for children in the United States or Canada. In these phrases, the word "manage" is defined as identifying the nature of the problem, determining methods of resolving or alleviating the problem, and carrying out management plans, including the appropriate and timely use of consultants.

1. Unable to manage many pediatric problems including the most routine ones
2. 3. Able to manage only the most routine problems of pediatrics
4. 5. Able to manage the common problems of pediatrics adequately
6. 7. Able to manage most pediatric problems in an effective way
8. 9. Able to manage almost any pediatric problem in a highly effective manner

If an applicant receives a rating of 3 or less in any single area, or a rating of 4 or less for overall clinical competency, the Credentials Committee requires that the program director submit documentation with the completed Verification of Clinical Competency Form. If the applicant's documented weaknesses are in the domain of data gathering, data assessment, or patient management, the applicant must pass a screening examination before being admitted to the certifying examination. If the applicant is unsuccessful or if a screening examination or if the documented weaknesses are in the domain of interpersonal relationships or work habits and personal qualities, the applicant must complete satisfactorily an additional period of hospital-based training in general comprehensive pediatrics, either in an accredited program in the United States or in an approved program in Canada before reapplying to the Board. Alternatively, the applicant may appeal to the Credentials Committee as described in section IV A.

C. Program directors are encouraged to have residents in their programs take the Board's In-training Examination (ITE). The results of the ITE can provide valuable information for both the resident and the program.

D. Program directors and their faculty should explore and develop evaluation procedures for assessment of physician performance. Examples are medical record audits, rating scales for assessment of work habits, observational checklists for assessment of technical skills, oral examinations, and consumer questionnaires.

The Board will continue to participate in and support research efforts to develop methods for evaluating the day-to-day performance of residents in caring for infants, children, and adolescents.

E. The pediatric program director has responsibilities to the residents who plan to enter subspecialty training. Since ultimate certification in a pediatric subspecialty area is contingent upon certification in general pediatrics, program directors should ensure that residents offered pediatric subspecialty residencies have a thorough grounding in general comprehensive pediatrics as an entering qualification and that
the residents meet the training requirements established for certification by the Board.

V. POLICY REGARDING CHEMICAL USE AND DEPENDENCY
An applicant who has a history of chemical dependency as reported to the American Board of Pediatrics and who submits documentation acceptable to the Board that the disease is known to be under control may apply for and take the certifying examination provided he/she meets the general admission requirements. This policy also pertains to individuals who wish to participate in the Program for Renewal of Certification in Pediatrics (FRCP). (For more detailed information, see below.) If the candidate passes the certifying examination or the examination for certification renewal, he/she will not be issued a certificate unless documentation acceptable to the Board is submitted verifying that the disease has been under control for five years from the time of the most recent occurrence of the disease. If a certificate is issued, it will be effective for a seven-year period from the date the examination was passed.

An applicant who has a history of chemical dependency, as reported to the Board, who cannot submit documentation acceptable to the Board that the disease is under control will not be allowed to take the certifying examination or to participate in FRCP.

The Certifying Examination

The content of the examination for certification is appropriate to the practice of general comprehensive pediatrics. Emphasis is placed on practical aspects; however, good practice is founded on sound scientific knowledge, and the candidate should be prepared to demonstrate an understanding of basic science.

The examination consists of multiple-choice questions. Examples of the types of questions to be used are matched to candidates prior to the administration of each examination. Some items on the examination are included for experimental purposes only. These items will not contribute to the score. Each candidate’s examination score will be reported to his/her general pediatric program director.

The Board does not sponsor or maintain records on any courses which claim to be review courses in preparation for its examination. A physician who has dyslexia or a serious physical handicap and who wishes to be given special consideration will be required to submit documentation of his/her condition prior to appearing for the certifying examination. Applicants should notify the Board office at the time the initial application is submitted.

The certifying examination is given once a year in the fall in a number of locations throughout the United States and Canada.

The examination is a two-day examination. There are two sessions of three hours’ duration each day with a luncheon break between sessions. The dates of the 1991 certifying examination are November 12-13.

The validity of the performance of candidates on the certifying examination of the Board is secured by every means available. Information is available by contacting the Board office concerning procedures to be taken by the Board in the event of irregular behavior such as giving or obtaining unauthorized information or aid before, during, or after the examination or offering financial or other benefit to a proctor, employee, or agent of the Board.

Application material for admission to the certifying examination of the Board may be obtained by contacting the Board office. The registration period for the certifying examination extends from December through February. APPLICATIONS MUST BE POSTMARKED BY MARCH 1, 1991. Notification of receipt of the application will be sent promptly. Those applications received by this deadline will be processed and evaluated and the Board will request directors of general pediatric training programs to verify completion of training. Those applicants who meet the training requirements of the Board and who are recommended by their program director(s) for examination will be accepted and registered for the certifying examination. An applicant who does not receive notification of the acceptance or rejection of his/her application by August 1 should contact the Board office promptly in writing to inquire about the status of the application.

Applicants for the certifying examination must satisfactorily complete their training by the date of the examination.

Beginning in 1990, new applicants must achieve certification within seven years. Candidates who were admitted to the certification process in 1986-1989 will have ten years to complete the certification process. Candidates who were admitted to the certification process prior to 1986 will have until December 31, 1995, to complete the certification process. Candidates who have not been certified within the time limit must re-apply and pass a screening assessment before being re-admitted to the certification process.

When re-applying for the certification process, an applicant is subject to the policies of the Board in effect at that time.

The cost of certification includes the following fees, payable in United States dollars only:

- Processing and Evaluation Fee—$250.00
- Examination Fee—650.00
- TOTAL EXAMINATION FEES—$900.00

The Board offers a program of partial payment of the examination fees for new applicants. The details are provided with the registration material.

A physician whose application or re-registration material is postmarked after the published deadline (March 1 for new applications and April 1 for re-registration material) will be assessed an additional fee of $200 before the application or registration material will be processed. This fee is non-refundable. NEW APPLICATIONS AND RE-REGISTRATION MATERIAL WILL NOT BE ACCEPTED AFTER MAY 15, 1991.

If an applicant is not approved to take the certifying examination of the Board, the $650 examination fee will be refunded. The remaining $250 is not refundable. If the applicant wishes to pursue certification in the future, he/she will be required to complete a new application and submit the full fee ($900) again.

After the Board has accepted an application, the candidate is expected to take the next certifying examination offered. Candidates who withdraw from the certifying examination on or before August 31 are entitled to a refund of $325. Candidates who withdraw from the certifying examination after August 31, or who do not appear for the examination, will forfeit all fees paid and will be required to submit a re-registration fee before being admitted to a future examination. Registration material will be sent automatically to qualified candidates during the registration period for the next examination.

These and other fees mentioned in this Booklet are subject to change without notice.

Certification by the Board

A certificate is awarded by the American Board of Pediatrics to those candidates who have met the requirements and have passed the examination.

The duration of original certificates issued after May 1, 1988, will be seven years. Individuals who wish to be issued a new certificate after the seven year period will have to successfully pass the FRCP.

The names of certified pediatricians, but not their scores, will be sent to the appropriate organizations, directories, and journals.

Certification Renewal in Pediatrics

The Board offers a certification renewal program that is open to all certified diplomates of the American Board of Pediatrics.
CERTIFICATION REQUIREMENTS

Anyone certified prior to May 2, 1988, will not be affected by the policy of time-limited certification; however, those who choose to do so may achieve certification renewal on a voluntary basis.

Revocation of Certificates

All certificates issued by the American Board of Pediatrics are subject to the provisions of the certificate of incorporation and the bylaws of the Board. Each certificate is subject to revocation in the event that:
1. The issuance of such certificate or its receipt by the physician so certified shall have been contrary to or in violation of any of the provisions of the Board’s certificate of incorporation or bylaws; or
2. The physician so certified shall not have been eligible to receive such certificate, irrespective of whether or not the facts constituting him/her so ineligible were known to any or all of the members of the Board at the time of the issuance of such certificate; or
3. The physician so certified shall have made any misstatement of fact in his/her application for such certificate or in any other statement or representation to the Board, its members, representatives, or agents; or
4. The physician so certified shall have been convicted by a court of competent jurisdiction of a felony or of any misdemeanor involving, in the opinion of the Board of Directors, moral turpitude in connection with his/her practice of medicine; or
5. The physician so certified shall have had one or more of his/her licenses to practice medicine revoked or shall have been placed on probation by any court or other body having proper jurisdiction and authority; or
6. The physician so certified has repeatedly made statements contrary to sound medical science and practice, raising fundamental questions about his/her competency.

If the Board obtains probable cause to believe that a certificate should be revoked for any of the reasons set forth above, it may institute proceedings for revocation thereof by mailing written notice to the holder of such certificate that a hearing will be held to determine whether or not the certificate should be revoked. The steps to be taken are outlined in the Rules of Appearances Procedure of the American Board of Pediatrics, which may be obtained by writing to the Board office.

Certification in Pediatric Subspecialties

The American Board of Pediatrics has established a procedure for certification in the following subspecialties: pediatric cardiology, pediatric critical care medicine, pediatric endocrinology, pediatric gastroenterology, pediatric hematology/oncology, pediatric nephrology, neonatal-perinatal medicine, pediatric pulmonology and pediatric rheumatology.

Sub-board of Pediatric Cardiology
Robert A. Williams, MD, Chairman, Los Angeles, California
Hugh D. Allen, MD, Columbus, Ohio
Donald A. Girod, MD, Indianapolis, Indiana
Charles S. Kleinman, MD, New Haven, Connecticut
Grace S. Wolff, MD, Miami, Florida

Sub-board of Pediatric Critical Care Medicine
Thomas P. Green, MD, Chairman, Minneapolis, Minnesota
Robert K. Crone, MD, Seattle, Washington
Michael V. Johnston, MD, Baltimore, Maryland
Robert W. Katz, MD, Albuquerque, New Mexico
Daniel L. Levin, MD, Dallas, Texas
George Lister, MD, New Haven, Connecticut
Murray M. Pollack, MD, Washington, DC
Ann E. Thompson, MD, Pittsburgh, Pennsylvania

Sub-board of Pediatric Endocrinology
Margaret H. MacGillivray, MD, Chairman, Buffalo, New York

Sub-board of Pediatric Gastroenterology
William F. Balistreri, MD, Chairman, Cincinnati, Ohio
Richard J. Grant, MD, Boston, Massachusetts
Harry L. Greene, MD, Nashville, Tennessee
William J. Klish, MD, Houston, Texas
Judith M. Sondheimer, MD, Denver, Colorado
W. Allan Walker, MD, Boston, Massachusetts
John B. Watkins, MD, Philadelphia, Pennsylvania

Sub-board of Pediatric Hematology-Oncology
Gerald S. Gilchrist, MD, Chairman, Rochester, Minnesota
Herbert T. Abelson, MD, Seattle, Washington
William E. Hathaway, MD, Denver, Colorado
John N. Lukens, Jr., MD, Nashville, Tennessee
Sharon B. Murphy, MD, Chicago, Illinois
Norma K.C. Ramsey, MD, Minneapolis, Minnesota
Ruth A. Seeler, MD, Chicago, Illinois

Sub-board of Neonatal-Perinatal Medicine
Avroy A. Fanaroff, MD, BCH, Chairman, Cleveland, Ohio
Robert A. Brillard, MD, San Francisco, California
George Cassidy, MD, San Francisco, California
Robert D. Christensen, MD, Salt Lake City, Utah
M. Douglas Jones, MD, Denver, Colorado
Frank H. Morris, Jr., MD, Iowa City, Iowa
Lucille Ann Papile, MD, Albuquerque, New Mexico

Sub-board of Pediatric Nephrology
Jean E. Robillard, MD, Chairman, Iowa City, Iowa
Robert B. Estenger, MD, Los Angeles, California
Julie R. Ingelfinger, MD, Boston, Massachusetts
Craig B. Langman, MD, Chicago, Illinois
Michael A. Linshaw, MD, Farmington, Connecticut
Robert H. McLean, MD, Baltimore, Maryland
P. Bruder Stelton, MD, Buffalo, New York

Sub-board of Pediatric Pulmonology
Gary L. Larsen, MD, Chairman, Denver, Colorado
Richard J. Lennen, MD, Phoenix, Arizona
Gerald M. Loughlin, MD, Baltimore, Maryland
Shirley Murphy, MD, Albuquerque, New Mexico
Hugh M. O’Broodovich, MD, Toronto, Ontario
Gregory J. Redding, MD, Seattle, Washington
Michael Wall, MD, Portland, Oregon

Sub-board of Pediatric Rheumatology
Deborah W. Kredich, MD, Chairman, Durham, North Carolina
Balu Athreya, MD, Philadelphia, Pennsylvania
Peter B. Dent, MD, Hamilton, Ontario
Helen M. Enery, MD, San Francisco, California
J. Roger Hollister, MD, Denver, Colorado
Carol J. Lindsay, MD, Kansas City, Kansas
Lauren S. Pachman, MD, Chicago, Illinois

Certification in Pediatric Cardiology

The American Board of Pediatrics has established a procedure for certification in pediatric cardiology.

Eligibility Criteria

1. Certification by the American Board of Pediatrics. Applicants may submit their application prior to taking the certifying examination in
Pediatrics

general pediatrics. However, an applicant must take and pass the certifying examination before being permitted to take the pediatric cardiology examination.

2. Three years of full-time broadly-based subspecialty residency training in an accredited pediatric cardiology program is required of those physicians entering training on or after January 1, 1988. Physicians who entered pediatric cardiology training prior to January 1, 1988, may apply for admission on the basis of their completion of two years of subspecialty residency in an accredited pediatric cardiology program. Training must be completed in a pediatric cardiology program accredited by the Residency Review Committee for Pediatrics (RCP).

For subspecialty residents who begin training on or after January 1, 1988, it is expected that at the conclusion of training, subspecialty residents will be able to demonstrate competence both in the clinical skills of the discipline as well as in research. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training and as verification of clinical and research competence; the resident must meet the criteria as stated in the Principles Regarding the Assessment of Research Competence; and he/she must pass the certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual general pediatric residency years (PL 1, 2, 3).

All subspecialty training must be completed in the United States, unless the Credentials Committee of the Sub-board has given approval for foreign subspecialty training to an applicant before he/she enrols in such a program. Applicants wishing to obtain such approval should contact the American Board of Pediatrics.

Subspecialty residents completing their pediatric cardiology training in Canada in programs approved for general pediatrics by the Royal College of Physicians and Surgeons of Canada will be considered on an individual basis by the Credentials Committee of the Sub-board.

Applicants who receive credit for training in pediatric cardiology cannot use this same training toward the training requirements of any other pediatric subspecialty.

3. Verification of training. Applicants will be asked to list the program(s) where they completed subspecialty residency training in pediatric cardiology as well as the name(s) of their program director(s). The Sub-board will send a Verification of Competence Form to the program director(s) for completion.

Principles Regarding the Assessment of Research Competence

1. Research experience is an essential part of the training of subspecialists.

2. The Residency Review Committee for Pediatrics (RCP) accreditation process must include the evaluation of opportunities for research experience. The Sub-boards should avoid duplicating RCP functions.

3. A requirement for admission to the certifying subspecialty examination must be evidence of productive research participation.

4. Necessary, but not sufficient verification of productive research participation is a statement by the program director that the applicant has actually participated in research and that in the program director's opinion the applicant has knowledge of and is able to apply the scientific method. When the program director is asked to sign or make this statement, instructions should be precise about what the Sub-board will consider sufficient evidence of participation.

5. Evidence of productive research participation must be submitted.
   a. A list of acceptable evidence should allow the majority of applicants to be approved without putting the Sub-board in the position of judging the quality of research efforts.
   b. Acceptable evidence should be defined by the Sub-board of Pediatric Cardiology. Evidence considered in the evaluation of productive research participation could include one of the following:
      (1) First author of a research paper accepted for publication in a peer-reviewed journal deemed acceptable by the Sub-board.
      (2) Submission of a research grant proposal which has been approved by an extramural organization with a critical review process.
      (3) A postgraduate degree in a field of science relevant to the subspecialty.
      (4) A thesis accepted as partial fulfillment of the requirements for a postgraduate degree in a field of science relevant to the subspecialty.
      (5) A research progress report (signed by both the applicant and preceptor) no more than 5 pages in length to include (a) a statement of hypothesis, (b) delineation of methodology, (c) results and analysis, (d) significance of research, (e) applicant's plans for future research. This report would be for a person with research in progress, which for legitimate reason, has not been completed.
      (6) Any other evidence acceptable to the Sub-board must be approved by the Board.

6. The program director is responsible for notifying all residents of the research requirements necessary for certification upon entry to the subspecialty training program.

7. Subspecialty examinations should include questions on research design, analysis, and interpretation.

Subspecialty "Fast Tracking"

Candidates who are believed to have demonstrated research competence, either prior to or during residency, such as those with a Ph.D. degree or M.D./Ph.D. degree, may have a part of their training waived. The subspecialty program director, preferably petitioning the Sub-board prospectively, can ask the Sub-board to waive the research competence requirements and to reduce the time of subspecialty training by as much as one year. Candidates for this pathway must have completed three core years of pediatrics in an accredited program in the United States or Canada and would not have the option of the Special Alternative Pathway. Furthermore, candidates who receive a waiver by the Sub-board must complete at least two years of training in the subspecialty with at least one year of broad-based clinical training.

Role of the Pediatric Cardiology Program Director

The role of the pediatric cardiology program director in the certification process is to verify completion of training and to sign the following statement on the Verification of Competence Form:

"I certify that the above named applicant has demonstrated the necessary attitudes, knowledge, clinical judgment, research abilities, technical skills and interpersonal skills and is judged to be fully prepared for independent responsibility as a pediatric cardiologist; to my knowledge, he/she has moral and ethical integrity. The applicant is recommended for examination."

All applicants must have Verification and Evaluation Form(s) on file in the Board office to be admitted to the pediatric cardiology examination. If an applicant's training is not verified and/or he/she is not recommended for admission, the applicant will be required to satisfactorily complete an additional period of subspecialty residency training in pediatric cardiology before reapplying. Alternatively, the applicant may appeal to the Credentials Committee of the Sub-board. The Credentials Committee will gather additional information about the applicant and decide if permission should be given to take the examination. For an appeal, the applicant will be asked to submit copies of certificates of
satisfactory completion of training. If the applicant has been denied such a certificate, then admission will be refused on the basis of incomplete training. However, possession of such a certificate will not automatically admit the person to the certification process of the Sub-board. Most training certificates attest to the achievement of a minimal level of competence or the fulfillment of an employment contract. Therefore, the program director's statement on the Verification of Competence Form will take precedence over the certificate from the institution. Program directors are urged not to issue certificates of successful completion of training when a resident is deemed not to have met those standards.

The Sub-board requires that the period of training be at least 22 months for those subspecialty residents entering training prior to January 1, 1988, and at least 35 months for those entering training on or after January 1, 1988. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. Applicants beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Each applicant is considered individually and must be acceptable to the Sub-board of Pediatric Cardiology. The Sub-board recognizes that situations may arise that are not explained by the preceding information. Questions concerning eligibility will be considered by the Credentials Committee of the Sub-board.

Training Programs

Subspecialty residency training programs in pediatric cardiology are accredited by the Residency Review Committee for Pediatrics (RRC). The list of accredited programs appears in the Directory of Graduate Medical Education Programs.

Special Requirements for Training Programs

Special Requirements for Training Programs in Pediatric Cardiology have been approved by the Residency Review Committee for Pediatrics and the Accreditation Council for Graduate Medical Education. Copies of the Special Requirements are available from the Office of the Residency Review Committee for Pediatrics, 515 North State Street, Chicago, IL 60610. The Special Requirements are published in the Directory of Graduate Medical Education Programs.

Examinations

The purpose of these examinations is to determine a candidate's competency to practice the subspecialty. Therefore, emphasis is placed on practical aspects. Since good practice is founded on knowledge and sound use of basic sciences, a candidate must be prepared to demonstrate an adequate grasp of relevant basic information in genetics, embryology, anatomy, physiology, pharmacology, biochemistry, etc.

Examination results will be reported by name and score to the pediatric department chairperson and subspecialty program director at the institution(s) where a candidate trained.

Failure in Examinations

Candidates who are unsuccessful on an examination will be admitted for re-examination at the next examination upon specific application and payment of the re-registration fee.

Candidates who are unsuccessful on an examination must contact the Board office within one year of the date of the examination if they have questions concerning their performance.

Irregularities

The validity of the performance of candidates on the examination of the Sub-board is secured by every means available. Information concerning the procedures to be taken by the Sub-board in the event of irregular behavior during the examination, such as giving or obtaining unauthorized information or aid before, during, or after the examination, or offering financial or other benefit to a proctor, employee, or agent of the Board or Sub-board is available by contacting the Board office.

Postponement of Examinations

After the Sub-board has accepted an application, the candidate is expected to take the next examination offered. Candidates who withdraw from the examination after the site assignment/approval letters are prepared will forfeit a portion of the fees paid. Candidates who withdraw after the date set for postponement will forfeit all fees paid. To register for a future examination, payment of the re-registration fee will be required.

Time in Which to Complete Certification Process

Candidates should achieve certification within seven years of their initial acceptance into the certification process for pediatric cardiology. Candidates who have not been certified within the seven-year time limit must reapply and pass a screening assessment before being readmitted to the certification process.

Applications

The next certifying examination in pediatric cardiology will be given in 1991. Within the next few years the Board anticipates that the certification examination will be given semi-annually using computer technology. Application forms are available only during the registration period for a particular examination from the American Board of Pediatrics, 111 Silver Cedar Court, Chapel Hill, NC 27514-1651. Telephone: (919) 929-0461.

A physician who has dyslexia or a serious physical handicap and who wishes to be given special consideration will be required to submit documentation of his/her condition prior to appearing for the examination. Applicants should notify the Board office at the time the initial application is submitted.

Late Applications

A physician whose application or re-registration material is postmarked after the published deadline will be expected to pay an additional fee of $200 before the application or registration material will be processed.

Fees

The cost of certification includes the following fees:

New application:

$ 250 processing and evaluation fee
$ 750 written examination fee for one examination
$1000 TOTAL payment at the time of initial application

Re-registration:

$ 500 fee for one written examination

If an applicant is not approved to take the pediatric cardiology examination, the $750 written examination fee will be refunded. The remaining $250 processing and evaluation fee is not refundable. If the applicant wishes to pursue certification in the future, he/she will be required to complete a new application and submit the full initial application fee again.

Fees are subject to change at any time. Checks (U.S. funds only) should be made payable to the AMERICAN BOARD OF PEDIATRICS.
Pediatrics

Certification

A certificate of special qualifications, valid for seven years, is awarded by the American Board of Pediatrics to those candidates who have met the requirements and have passed the examination of the Sub-board. A program for renewal of certification has been developed by the Board. Details may be obtained by writing the Board office.

The names of those certified are sent to the American Board of Medical Specialties (ABMS) for publication in its Directory of Certified Physicians and to various pediatric journals. Scores are not sent to ABMS or the journals.

Revocation of Certificates

All certificates issued by the American Board of Pediatrics are issued subject to the provisions of the certificate of incorporation and the bylaws of the Board. Each such certificate is subject to revocation in the event that:

1. the issuance of such certificate or its receipt by the physician so certified shall have been contrary to or in violation of any of the provisions of the Board's certificate of incorporation or bylaws; or
2. the physician so certified shall not have been eligible to receive such certificate, irrespective of whether or not the fact constituting him/her so ineligible was known to any or all of the members of the Board at the time of issuance of such certificate; or
3. the physician so certified shall have made any misstatement of fact in his/her application for such certificate or in any other statement or representation to the Board, its members, representatives, or agents; or
4. the physician so certified shall have been convicted by a court of competent jurisdiction of a felony; or of any misdemeanor involving, in the opinion of the Board of Directors, moral turpitude in connection with his/her practice of medicine; or
5. the physician so certified shall have had one or more of his/her licenses to practice medicine revoked or shall have been placed on probation by any court or other body having proper jurisdiction and authority; or
6. the physician so certified has repeatedly made statements contrary to sound medical science and practice, raising such fundamental questions about his/her competency.

If the Board obtains probable cause to believe that a certificate should be revoked for any of the reasons set forth above, it may institute proceedings for revocation thereof by mailing written notice to the holder of such certificate that a hearing will be held to determine whether or not the certificate should be revoked. The steps to be taken are outlined in the Rules of Appellate Procedure of the American Board of Pediatrics, which may be obtained by writing to the Board office.

POLICY REGARDING CHEMICAL USE AND DEPENDENCY (INCLUDING DRUGS AND ALCOHOL)

An applicant who has a history of chemical dependency as reported to the American Board of Pediatrics and who submits documentation acceptable to the Board that the disease is under control will not be allowed to take the certifying examination or to participate in the program for renewal of certification.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to consult the American Board of Pediatrics at the above address to ascertain whether the information they have is current.

Certification in Pediatric Critical Care Medicine

The American Board of Pediatrics has established a procedure for certification in pediatric critical care medicine.

Eligibility Criteria

1. Certification by the American Board of Pediatrics. Applicants may submit their application prior to taking the certifying examination in general pediatrics. However, an applicant must take and pass the certifying examination before being permitted to take the pediatric critical care medicine examination.
2. Subspecialty training or experience. Prior to the examination, the applicant must have COMPLETED one of the following to qualify for admission to the examination:
   a. Three years of full-time broadly-based subspecialty residency training in pediatric critical care medicine is required of those physicians entering training on or after January 1, 1988, in a program under the supervision of a director who is certified in pediatric critical care medicine or, lacking such certification, possesses equivalent credentials. Physicians who entered pediatric critical care medicine training prior to January 1, 1988, may apply for admission on the basis of their completion of two years of subspecialty residency in pediatric critical care medicine. Clinical training must be comprehensive and intensive. Only those pediatric critical care medicine training programs which are operated in association with general comprehensive pediatric residency programs accredited by the Residency Review Committee for Pediatrics will be considered.
   b. Subspecialty residents who began training on or after January 1, 1988, it is expected that at the conclusion of training, they will be able to demonstrate competence both in the clinical skills of the discipline as well as in research. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical and research competence; the resident must meet the criteria as stated in the Principles Regarding the Assessment of Research Competence; and he/she must pass the certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual general pediatric residency years (PL 1, 2, 3).
   All subspecialty training must be completed in the United States, unless the Credentials Committee of the Sub-board has given approval for foreign subspecialty training to an applicant before he/she enroll in such a program. Applicants wishing to obtain such approval should contact the American Board of Pediatrics.
   Subspecialty residents completing their pediatric critical care medicine training in Canada in programs approved for general pediatrics by the Royal College of Physicians and Surgeons of Canada will be considered on an individual basis by the Credentials Committee of the Sub-board.
   b. Certification in pediatric cardiology, neonatal-perinatal medicine, pediatric pulmonology, or anesthesiology (by the American Board of Anesthesiology) based on completion of the full-time residency training
requirements in a program providing experience in pediatric critical care medicine relevant to the area in which the applicant is certified.

2. Five years of subspecialty residency training in pediatric critical care medicine in a program under the supervision of a director who is certified in pediatric critical care medicine or, lacking such certification, possesses equivalent credentials. Physicians who entered training in pediatric critical care medicine prior to January 1, 1988, will need only one year of training. At least one year must be in broad-based clinical training.

c. Five years in the practice of comprehensive pediatric critical care medicine. A minimum of 50% of full-time professional activities must be spent in the practice of pediatric critical care medicine to receive credit. It is assumed that night and weekend practice time would be distributed in the same manner as regular practice time. These five years of practice should be of such type and quality that they substitute for the clinical exposure one might have encountered during pediatric critical care medicine residency training. All practice time must be accrued before December 31, 1991. No foreign practice time will be accepted by the Credentials Committee in fulfillment of the requirements.

d. Subspecialty residency training plus pediatric critical care medicine experience to equal five years as outlined in either of the methods below:

(1) Applicants who have completed less than 12 months of subspecialty residency training in pediatric critical care medicine may receive credit on a month-for-month basis. For example, a nine-month subspecialty residency would be credited as nine months of pediatric critical care medicine experience; this, added to four years and three months of pediatric critical care medicine experience would total 60 months or five years. These five years must be accrued prior to December 31, 1991.

(2) Applicants who have completed 12 to 23 months of subspecialty residency training in pediatric critical care medicine may receive credit on a two-for-one basis. For example, an 18-month subspecialty residency would be credited as 36 months of pediatric critical care medicine; this, added to 24 months of pediatric critical care medicine experience would total 60 months or five years. These five years must be accrued prior to December 31, 1991. No credit for partial training will be given for subspecialty residency who began their training after January 1, 1988.

Applicants entering the examination via the practice or combination routes must make application and be approved for the examination given in or prior to 1992.

Applicants seeking certification in more than one subspecialty area on the basis of practice alone may not apply the same practice period toward fulfillment of the requirements of two different certifying boards. Applicants may not apply the same training period toward fulfillment of the requirements of two different certifying Boards or Subboards except as outlined under Item 2B.

3. Verification of Training and/or Practice

a. For those utilizing the subspecialty residency training route, Verification of Competence Form(s) will be required from the director(s) of the applicant's pediatric critical care medicine training program(s).

b. For those utilizing the subspecialty certification or certification by the American Board of Anesthesiology and one or two years of pediatric critical care medicine training routes, Verification of Competence Form(s) will be required from:

(1) the director(s) of the applicant's pediatric cardiology, neonatal-perinatal medicine, pediatric pulmonology, or anesthesiology training program(s); and

(2) the director(s) of the applicant's pediatric critical care medicine training program(s).

c. For those utilizing the practice route, Evaluation Form(s) will be required from the pediatric critical care medicine program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing pediatric critical care medicine.

d. For those utilizing the combination subspecialty residency-practice route:

(1) Verification Form(s) will be required from the director(s) of the applicant's pediatric critical care medicine training program(s) and

(2) Evaluation Form(s) will be required from the pediatric critical care medicine program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing pediatric critical care medicine.

The completed Verification Form should be sent by the program director and Evaluation Forms should be sent by the program director, chief of pediatrics, or department chairman directly to the American Board of Pediatrics.

Principles Regarding the Assessment of Research Competence

1. Research experience is an essential part of the training of subspecialists.

2. The Research Review Committee for Pediatrics (RRC) accreditation process must include the evaluation of opportunities for research experience. The Sub-boards should avoid duplicating RRC functions.

3. A requirement for admission to the certifying subspecialty examination must be evidence of productive research participation.

4. Necessary, but not sufficient verification of productive research participation, is a statement by the program director that the applicant has actually participated in research and that in the program director's opinion the applicant has knowledge of and is able to apply the scientific method. When the program director is asked to sign or make this statement, instructions should be precise about what the Sub-board will consider sufficient evidence of participation.

5. Evidence of productive research participation must be submitted:

a. A list of acceptable evidence should allow the majority of applicants to be approved without putting the Sub-board in the position of judging the quality of the research efforts.

b. Acceptable evidence should be defined by the Sub-board of Pediatric Critical Care Medicine. Evidence considered in the evaluation of productive research participation could include one of the following:

(1) First author of a research paper accepted for publication in a peer-reviewed journal deemed acceptable by the Sub-board.

(2) Submission of a research grant proposal which has been approved by an extramural organization with a critical review process.

(3) A postgraduate degree in a field of science relevant to the subspecialty.

(4) A thesis accepted as partial fulfillment of the requirements for a postgraduate degree in a field of science relevant to the subspecialty.

(5) A research progress report (signed by both the applicant and preceptor) no more than 5 pages in length to include (a) a statement of hypothesis, (b) outline of methodology, (c) results and analysis, (d) significance of research. (e) applicant's plans for future research. This report would be for a person with research in progress, which for legitimate reason, has not been completed.

(6) Any other evidence acceptable to the Sub-board must be approved by the Board.
Pediatrics

6. The program director is responsible for notifying all residents of the research requirements necessary for certification upon entry to the subspecialty training program.

7. Subspecialty examinations should include questions on research, design, analysis, and interpretation.

Subspecialty “Fast Tracking”

Candidates who are believed to have demonstrated research competence, either prior to or during residency, such as those with a Ph.D. degree or M.D./Ph.D. degree, may have a part of their training waived. The subspecialty program director, preferably petitioning the Sub-board prospectively, can ask the Sub-board to waive the research competence requirements and to reduce the time of subspecialty training by as much as one year. Candidates for this pathway must have completed three core years of pediatrics in an accredited program in the United States or Canada and would not have the option of the Special Alternative Pathway. Furthermore, candidates who receive a waiver by the Sub-board must complete at least two years of training in the subspecialty with at least one year of broad-based clinical training.

Role of the Pediatric Critical Care Medicine Program Director

The role of the pediatric critical care medicine program director in the certification process is to verify completion of training and sign the following statement on the Verification of Competence Form:

“I certify that the above named applicant has demonstrated the necessary attitudes, knowledge, clinical judgment, research abilities, technical skills and interpersonal skills and is judged to be fully prepared for independent responsibility as a pediatric critical care medicine specialist, to my knowledge, he/she has moral and ethical integrity. The applicant is recommended for examination.”

All applicants must have Verification and Evaluation Form(s) on file in the Board office to be admitted to the pediatric critical care medicine examination. If an applicant’s training is not verified and/or he/she is not recommended for admission, the applicant will be required to satisfactorily complete an additional period of subspecialty residency training in pediatric critical care medicine before reapplying. Alternatively, the applicant may appeal to the Credentials Committee of the Sub-board. The Credentials Committee will gather additional information about the applicant and decide if permission should be given to take the examination. For an appeal, the applicant will be asked to submit copies of certificates of satisfactory completion of training. If the applicant has been denied such a certificate, then admission will be refused on the basis of incomplete training. However, possession of such a certificate will not automatically admit the person to the certification process of the Sub-board. Most training certificates attest to the achievement of a minimal level of competence or the fulfillment of an employment contract. Therefore, the program director’s statement on the Verification of Competence Form will take precedence over a certificate from the institution. Program directors are urged not to issue certificates of successful completion of training when a resident is deemed not to have met those standards.

The Sub-board requires that the period of training be at least 22 months for those subspecialty residents entering training prior to January 1, 1988, and at least 33 months for those entering training on or after January 1, 1988. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. Applicants beginning training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Each applicant is considered individually and must be acceptable to the Sub-board of Pediatric Critical Care Medicine. The Sub-board recognizes that situations may arise that are not explained by the preceding information. Questions concerning eligibility will be considered by the Credentials Committee of the Sub-board.

Training Programs

At the present time, there are no accredited training programs in pediatric critical care medicine. In February 1989, the Accreditation Council for Graduate Medical Education granted the Residency Review Committee for Pediatrics (RRC) the authority to review and accredit subspecialty training programs. Physicians entering subspecialty training in pediatric critical care medicine prior to completion of the accreditation process by the RRC are advised to enter those programs in which the director or senior faculty of the program is certified in pediatric critical care medicine or possesses equivalent credentials. Once programs are accredited, training requirements must be completed in accredited programs or in other programs acceptable as described in paragraph 2A of the Eligibility Criteria.

Special Requirements for Training Programs

Special Requirements for Training Programs in Pediatric Critical Care Medicine were approved by the Accreditation Council for Graduate Medical Education in February 1989. The Credentials Committee of the Sub-board will be guided by these requirements in evaluating an applicant’s qualifications.

Examinations

The purpose of the examination is to determine a candidate’s competence to practice the subspecialty. Therefore, emphasis is placed on practical aspects. Since good practice is founded on knowledge and sound use of basic sciences, a candidate must be prepared to demonstrate an adequate grasp of relevant basic information in genetics, embryology, anatomy, physiology, pharmacology, biochemistry, etc. Examination results will be reported by name and score to the pediatric department chairperson and subspecialty program director at the institution(s) where a candidate trained.

Failure in Examinations

Candidates who are unsuccessful on an examination will be admitted for re-examination upon specific re-registration and payment of the re-registration fee. Candidates who are unsuccessful on an examination must contact the Board office within one year of the date of the examination if they have questions concerning their performance.

Irregularities

The validity of the performance of candidates on the examination of the Sub-board is secured by every means available. Information concerning the procedure to be taken by the Sub-board in the event of irregular behavior during the examination, such as giving or obtaining unauthorized information or aid before, during or after the examination, or offering financial or other benefit to a proctor, employee, or agent of the Board or Sub-board, is available by contacting the Board office.

Postponement of Examinations

After the Sub-board has accepted an application, the candidate is expected to take the next examination offered. Candidates who withdraw from the examination after the site assignment/approval letters are prepared will forfeit a portion of the fees paid. Candidates who withdraw after the date set for postponement will forfeit all fees paid. To
register for a future examination, payment of the re-registration fee will be required.

Time in Which to Complete Certification Process

Candidates should achieve certification within seven years of their initial acceptance into the certification process for pediatric critical care medicine. Candidates who have not been certified within the seven-year time limit must reapply and pass a screening assessment before being readmitted to the certification process.

Applications

The next certifying examination in pediatric critical care medicine will be given in 1992. Within the next few years, the Board anticipates that the certification examination will be given semi-annually using computer technology. Application forms are available only during the registration period for a particular examination from the American Board of Pediatrics, 111 Silver Cedar Court, Chapel Hill, NC 27514-1651. Telephone: (919) 929-0461.

A physician who has dyslexia or a serious physical handicap and who wishes to be given special consideration will be required to submit documentation of his/her condition prior to appearing for the examination. Applicants should notify the Board office at the time the initial application is submitted.

Late Applications

A physician whose application or re-registration material is postmarked after the published deadline will be expected to pay an additional fee of $200 before the application or registration material will be processed.

Fees

The cost of certification includes the following fees:

New application:
- $250 processing and evaluation fee
- $750 examination fee for one examination
- $1000 TOTAL payment at the time of initial application

Re-registration:
- $900 fee for one examination

If an applicant is not approved to take the pediatric critical care medicine examination, the $750 examination fee will be refunded. The remaining $250 processing and evaluation fee is not refundable. If the applicant wishes to pursue certification in the future, he/she will be required to complete a new application and submit the full initial application fee again.

Fees are subject to change at any time. Checks (U.S. funds only) should be made payable to the AMERICAN BOARD OF PEDIATRICS.

Certification

A certificate of special qualifications, valid for seven years, is awarded by the American Board of Pediatrics to those candidates who have met the requirements and have satisfactorily passed the examination of the Sub-board. A program for renewal of certification has been developed by the Board. Details may be obtained by writing to the Board office.

The names of those certified are sent to the American Board of Medical Specialties (ABMS) for publication in its Directory of Certified Pediatricians and to various pediatric journals. Scores are not sent to ABMS or the journals.

Revocation of Certificates

All certificates issued by the American Board of Pediatrics are issued subject to the provisions of the certificate of incorporation and the bylaws of the Board. Each such certificate is subject to revocation in the event that:

1. if the certificate shall have been contrary to or in violation of any of the provisions of the Board's certificate of incorporation or bylaws, or
2. if the physician so certified shall not have been eligible to receive such certificate, irrespective of whether or not the fact constituting him/her ineligible was known to any or all of the members of the Board at the time of the issuance of such certificate, or
3. if the physician so certified shall have made any misstatement of fact in his/her application for such certificate or in any other statement or representation to the Board, its members, representatives, or agents, or
4. if the physician so certified shall have been convicted of a court of competent jurisdiction of a felony or of any misdemeanor involving, in the opinion of the Board of Directors, moral turpitude in connection with his/her practice of medicine, or
5. if the physician so certified shall have had one or more of his/her licenses to practice medicine revoked or shall have been placed on probation by any court or other body having proper jurisdiction and authority, or
6. if the physician so certified has repeatedly made statements contrary to sound medical science and practice, raising such fundamental questions about his/her competency.

If the Board obtains probable cause to believe that a certificate should be revoked for any of the reasons set forth above, it may institute proceedings by revocation thereof by mailing written notice to the holder of such certificate that a hearing will be held to determine whether or not the certificate should be revoked. The steps to be taken are outlined in the Rules of Appellate Procedure of the American Board of Pediatrics, which may be obtained by writing to the Board office.

Policy Regarding Chemical Use and Dependency (Including Drugs and Alcohol)

An applicant who has a history of chemical dependency, as reported to the American Board of Pediatrics and who submits documentation acceptable to the Board that the disease is known to be under control may apply for and take the certifying examination provided he/she meets the general admission requirements. This policy also pertains to individuals who wish to participate in the Program for Renewal of Certification. If the candidate passes the certifying examination or the examination for certification renewal, he/she will not be issued a certificate unless documentation acceptable to the Board is submitted verifying that the disease has been under control for five years from the time of the most recent occurrence of the disease. If a certificate is issued, it will be effective for a seven-year period from the date the examination was passed.

An applicant who has a history of chemical dependency, as reported to the Board, who cannot submit documentation acceptable to the Board that the disease is under control will not be allowed to take the certifying examination or to participate in the program for renewal of certification.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to consult the American Board of Pediatrics at the above address to ascertain whether the information they have is current.

Certification in Pediatric Endocrinology

The American Board of Pediatrics has established a procedure for certification in pediatric endocrinology.
Eligibility Criteria

1. Certification by the American Board of Pediatrics. Applicants may submit their application prior to taking the certifying examination in general pediatrics. However, an applicant must take and pass the certifying examination before being permitted to take the pediatric endocrinology examination.

2. Three years of full-time broadly based subspecialty residency training in pediatric endocrinology is required of those physicians entering training on or after January 2, 1988. Physicians who entered pediatric endocrinology training prior to January 1, 1988, may apply for admission on the basis of their completion of two years of subspecialty residency in pediatric endocrinology.

Physicians who enter training in pediatric endocrinology on or after January 1, 1987, will be required to complete their subspecialty residency in a program accredited for training in pediatric endocrinology by the Residency Review Committee for Pediatrics (RRC).

For subspecialty residents who begin training on or after January 1, 1988, it is expected that at the conclusion of training, subspecialty residents will be able to demonstrate competence both in the clinical skills of the discipline as well as in research. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical and research competence; the resident must meet the criteria as stated in the Principles Regarding the Assessment of Research Competence; and he/she must pass the certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual general pediatric residency years (PL 1, 2, 3).

All subspecialty training must be completed in the United States, unless the Credentials Committee of the Sub-board has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. Applicants wishing to obtain such approval should contact the American Board of Pediatrics.

Subspecialty residents completing their pediatric endocrinology training in Canada in programs approved for general pediatrics by the Royal College of Physicians and Surgeons of Canada will be considered on an individual basis by the Credentials Committee of the Sub-board.

Applicants who receive credit for training in a pediatric endocrinology cannot use this same training toward the training requirements of another pediatric subspecialty.

3. Verification of training. Applicants will be asked to list the program(s) where they completed subspecialty residency training in pediatric endocrinology as well as the name(s) of their program director(s). The Sub-board will send a Verification of Competence Form to the program director(s) for completion.

Principles Regarding the Assessment of Research Competence

1. Research experience is an essential part of the training of subspecialists.

2. The Residency Review Committee for Pediatrics (RRC) accreditation process must include the evaluation of opportunities for research experience. The Sub-boards should avoid duplicating RRC functions.

3. A requirement for admission to the certifying subspecialty examination must be evidence of productive research participation.

4. Necessary, but not sufficient verification of productive research participation, is a statement by the program director that the applicant has actually participated in research and that in the program director's opinion the applicant has knowledge of and is able to apply the scientific method. When the program director is asked to sign or make this statement, instructions should be precise about what the Sub-board will consider sufficient evidence of participation.

5. Evidence of productive research participation must be submitted.

a. A list of acceptable evidence should allow the majority of applicants to be approved without putting the Sub-board in the position of judging the quality of research efforts.

b. Acceptable evidence should be defined by the Sub-board of Pediatric Endocrinology. Evidence considered in the evaluation of productive research participation could include one of the following:

(1) First author of a research paper accepted for publication in a peer-reviewed journal deemed acceptable by the Sub-board.

(2) Submission of a research grant proposal which has been approved by an extramural organization with a critical review process.

(3) A postgraduate degree in a field of science relevant to the subspecialty.

(4) A thesis accepted as partial fulfillment of the requirements for a postgraduate degree in a field of science relevant to the subspecialty.

(5) A research progress report (signed by both the applicant and preceptor) no more than 5 pages in length to include (a) a statement of hypothesis, (b) delineation of methodology, (c) results and analysis, (d) significance of research, (e) applicant's plans for future research. This report would be for a person with research in progress, which for legitimate reason, has not been completed.

(6) Any other evidence acceptable to the Sub-board must be approved by the Board.

6. The program director is responsible for notifying all residents of the research requirements necessary for certification upon entry to the subspecialty training program.

7. Subspecialty examinations should include questions on research design, analysis, and interpretation.

Subspecialty “Fast Tracking”

Candidates who are believed to have demonstrated research competence, either prior to or during residency, such as those with a Ph.D. degree or M.D./Ph.D. degree, may have a part of their training waived. The subspecialty program director, preferably petitioning the Sub-board prospectively, can ask the Sub-board to waive the research competence requirements and to reduce the time of subspecialty training by as much as one year. Candidates for this pathway must have completed three core years of pediatrics in an accredited program in the United States or Canada and would not have the option of the Special Alternative Pathway. Furthermore, candidates who receive a waiver by the Sub-board must complete at least two years of training in the subspecialty with at least one year of broad-based clinical training.

Role of the Pediatric Endocrinology Program Director

The role of the pediatric endocrinology program director in the certification process is to verify completion of training and to sign the following statement on the Verification of Competence Form:

“I certify that the above named applicant has demonstrated the necessary attitudes, knowledge, clinical judgment, research abilities, technical skills and interpersonal skills and is judged to be fully prepared for independent responsibility as a pediatric endocrinologist, to my knowledge, he/she has moral and ethical integrity. The applicant is recommended for examination.”

All applicants must have Verification and Evaluation Form(s) on file in the Board office to be admitted to the pediatric endocrinology ex-
Examinations

The purpose of the examination is to determine a candidate's competency to practice the subspecialty. Therefore, emphasis is placed on practical aspects. Since good practice is founded on knowledge and sound use of basic sciences, a candidate must be prepared to demonstrate an adequate grasp of relevant basic information in genetics, embryology, anatomy, physiology, pharmacology, biochemistry, etc. Examination results will be reported by name and score to the pediatric department chairman and subspecialty program director at the institution(s) where a candidate trained.

The 1992 examination will be the last examination for which applicants may apply unaccredited training toward fulfillment of the certification requirements.

Failure in Examinations

Candidates who are unsuccessful on an examination will be admitted for re-examination at the next examination upon specific application and payment of the re-registration fee.

Candidates who are unsuccessful on an examination must contact the Board office within one year of the date of the examination if they have questions concerning their performance.

Irregularities

The validity of the performance of candidates on the examination of the Sub-board is secured by every means available. Information concerning the procedures to be taken by the Sub-board in the event of irregular behavior during the examination, such as giving or obtaining unauthorized information or aid before, during, or after the examination, or offering financial or other benefit to a proctor, employee, or agent of the Board or Sub-board is available by contacting the Board office.

Postponement of Examinations

After the Sub-board has accepted an application, the candidate is expected to take the next examination offered. Candidates who withdraw from the examination after the site assignment/approval letters are prepared will forfeit a portion of the fees paid. Candidates who withdraw after the date set for postponement will forfeit all fees paid. To register for a future examination, payment of the re-registration fee will be required.

Time in Which to Complete Certification Process

Candidates should achieve certification within seven years of their initial acceptance into the certification process for pediatric endocrinology. Candidates who have not been certified within the seven-year time limit must reapply and pass a screening assessment before being readmitted to the certification process.

Applications

The next certifying examination in pediatric endocrinology is scheduled to be given in 1991. Within the next few years the Board anticipates that the certification examination will be given semi-annually using computer technology. Application forms are available only during the registration period for a particular examination from the American Board of Pediatrics, 111 Silver Cedar Court, Chapel Hill, NC 27514-1651. Telephone: (919) 929-0461.

A physician who has dyslexia or a serious physical handicap and who wishes to be given special consideration will be required to submit
Pediatrics

documentation of his/her condition prior to appearing for the examination. Applicants should notify the Board office at the time the initial application is submitted.

Late Applications

A physician whose application or re-registration material is post-marked after the published deadline will be expected to pay an additional fee of $200 before the application or registration material will be processed.

Fees

The cost of certification includes the following fees:

New application:
- $250 processing and evaluation fee
- $750 examination fee for one examination
- $1000 TOTAL payment at the time of initial application

Re-registration:
- $900 fee for one written examination

If an applicant is not approved to take the pediatric endocrinology examination, the $750 examination fee will be refunded. The remaining $250 processing and evaluation fee is not refundable. If the applicant wishes to pursue certification in the future, he/she will be required to complete a new application and submit the full initial application fee again.

Fees are subject to change at any time. Checks (U.S. funds only) should be made payable to the AMERICAN BOARD OF PEDIATRICS.

Certification

A certificate of special qualifications, valid for seven years, is awarded by the American Board of Pediatrics to those candidates who have met the requirements and have satisfactorily passed the examination of the Sub-board. A program for renewal of certification has been developed by the Board. Details may be obtained by writing the Board office.

The names of those certified are sent to the American Board of Medical Specialties (ABMS) for publication in its Directory of Certified Pediatricians and to various pediatric journals. Scores are not sent to ABMS or the journals.

Revocation of Certificates

All certificates issued by the American Board of Pediatrics are issued subject to the provisions of the certificate of incorporation and the bylaws of the Board. Each such certificate is subject to revocation in the event that:

1. the issuance of such certificate or its receipt by the physician so certified shall have been contrary to or in violation of any of the provisions of the Board's certificate of incorporation or bylaws; or
2. the physician so certified shall not have been eligible to receive such certificate, irrespective of whether or not the fact constituting him/her so ineligible were known to any or all of the members of the Board at the time of the issuance of such certificate; or
3. the physician so certified shall have made any misstatement of fact in his/her application for such certificate or in any other statement or representation to the Board, its members, representatives, or agents; or
4. the physician so certified shall have been convicted by a court of competent jurisdiction of a felony or of any misdemeanor involving, in the opinion of the Board of Directors, moral turpitude in connection with his/her practice of medicine; or
5. the physician so certified shall have had one or more of his/her licenses to practice medicine revoked or shall have been placed on probation by any court or other body having proper jurisdiction and authority; or
6. the physician so certified has repeatedly made statements contrary to sound medical science and practice, raising such fundamental questions about his/her competency.

If the Board obtains probable cause to believe that a certificate should be revoked for any of the reasons set forth above, it may institute proceedings for revocation thereof by mailing written notice to the holder of such certificate that a hearing will be held to determine whether or not the certificate should be revoked. The steps to be taken are outlined in the Rules of Appellate Procedure of the American Board of Pediatrics, which may be obtained by writing to the Board office.

POLICY REGARDING CHEMICAL USE AND DEPENDENCY (INCLUDING DRUGS AND ALCOHOL)

An applicant who has a history of chemical dependency as reported to the American Board of Pediatrics and who submits documentation acceptable to the Board that the disease is known to be under control may apply for and take the certifying examination provided he/she meets the general admission requirements. This policy also pertains to individuals who wish to participate in the Program for Renewal of Certification. If the candidate passes the certifying examination or the examination for certification renewal, he/she will not be issued a certificate unless documentation acceptable to the Board is submitted verifying that the disease has been under control for five years from the time of the most recent occurrence of the disease. If a certificate is issued, it will be effective for a seven-year period from the date the examination was passed.

An applicant who has a history of chemical dependency, as reported to the Board, who cannot submit documentation acceptable to the Board that the disease is under control will not be allowed to take the certifying examination or to participate in the program for renewal of certification.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to consult the American Board of Pediatrics at the above address to ascertain whether the information they have is current.

Certification in Pediatric Gastroenterology

The American Board of Pediatrics has established a procedure for certification in pediatric gastroenterology.

Eligibility Criteria

1. Certification by the American Board of Pediatrics. Applicants may submit their application prior to taking the certifying examination in general pediatrics. However, an applicant must take and pass the certifying examination before being permitted to take the pediatric gastroenterology examination.

2. Subspecialty training or experience. Prior to the examination, the applicant must have COMPLETED one of the following to qualify for admission to the examination:
   a. Three years of full-time broadly based subspecialty residency training in pediatric gastroenterology is required of those physicians entering training on or after January 1, 1990, in a program under the supervision of a director who is certified in pediatric gastroenterology, or, lacking such certification, possesses equivalent credentials.
   b. Physicians who entered pediatric gastroenterology training prior to January 1, 1990, may apply for admission on the basis of their completion of two years of subspecialty residency in pediatric gastroenterology.

   For pediatric gastroenterology residents who begin training on or after January 1, 1990, it is expected that at the conclusion of training, the subspecialty residents will be able to demonstrate competence both in the clinical skills of the discipline as well as in research. In order for a pediatric gastroenterology resident to become certified in the subspecialty:
   1. a Verification of Competence Form must be completed by the
program director(s) stating satisfactory completion of the required training as well as verification of clinical and research competence; (2) the resident must meet the criteria as stated in the Principles Regarding the Assessment of Research Competence; and (3) he/she must pass the certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in the subspecialty areas during the usual general pediatric residency years (PL 1, 2, 3).

All subspecialty training must be completed in the United States or Canada, unless the Credentials Committee of the Sub-board has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. Applicants wishing to obtain such approval should contact the American Board of Pediatrics.

Subspecialty residents completing their pediatric gastroenterology training in Canada in programs approved for general pediatrics by the Royal College of Physicians and Surgeons of Canada (RCPC) will be considered on an individual basis by the Credentials Committee of the Sub-board.

b. Five years of broadly based pediatric gastroenterology. Broadly based pediatric gastroenterology is defined as encompassing the majority of the clinical components which are a modification of the Guidelines for Subspecialty Training in Gastroenterology published in 1980 by the Committee on Training and Education of the American Gastroenterological Association (Winship DH, Grand RJ, Gray G, et al: Guidelines for Subspecialty Training in Gastroenterology, Gastroenterology 79:955–957, 1980). This modification was published in Gastroenterology 1987; 93:432–43 (Motil KJ, et al). A minimum of 50% of full-time professional activities must have been spent in pediatric gastroenterology to receive credit. It is assumed that night and weekend time would be distributed in the same manner as regular time. These five years should be of such type and quality that they substitute for the clinical exposure one might have encountered during subspecialty residency training. All pediatric gastroenterology experience must be accrued before December 31, 1994. No foreign pediatric gastroenterology experience will be accepted by the Credentials Committee in fulfillment of the requirements.

c. Subspecialty residency training/pediatric gastroenterology experience to equal five years as outlined in either of the methods below.

(1) Those applicants who completed less than 12 months of subspecialty residency training in pediatric gastroenterology may receive credit on a month-for-month basis. For example, a nine-month subspecialty residency would be credited as nine months of pediatric gastroenterology experience; this, added to four years and three months of pediatric gastroenterology experience would total 60 months or five years. These five years must be accrued prior to December 31, 1994.

(2) Those applicants completing 12 to 23 months of subspecialty residency training in pediatric gastroenterology may receive credit on a two-for-one basis. For example, an 18-month subspecialty residency would be credited as 36 months of pediatric gastroenterology; this, added to 24 months of pediatric gastroenterology experience would total 60 months or five years. These five years must be accrued prior to December 31, 1994. No credit for partial training will be given for subspecialty residents who begin training on or after January 1, 1990.

Those applicants entering the examination via the pediatric gastroenterology experience (B) or subspecialty residency experience (C) routes must make application, be approved for, and sit for the examination given in or prior to 1996. The Credentials Committee will evaluate these applicants based upon the pediatric gastroenterology experience accrued during the five years prior to the date of the examination.

Applicants seeking certification in more than one subspecialty area on the basis of practice alone may not apply the same practice period toward fulfillment of the requirements of two different certifying Sub-boards. Applicants may not apply the same training period toward fulfillment of the requirements of two different certifying Boards or Sub-boards.

3. Verification of training and/or experience.

a. For those utilizing the subspecialty residency training route, Verification of Competence Form(s) will be required from the director(s) of the applicant's pediatric gastroenterology training program(s).

b. For those utilizing the pediatric gastroenterology experience route (B), Evaluation Form(s) will be required from the pediatric gastroenterology program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now or has been involved in pediatric gastroenterology.

c. For those utilizing the combination subspecialty residency training/pediatric gastroenterology experience route (C).

(1) Verification Form(s) will be required from the director of the applicant's pediatric gastroenterology training program(s) and (2) Evaluation Form(s) will be required from the pediatric gastroenterology program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now or has been involved in pediatric gastroenterology.

The completed Verification and Evaluation Form(s) should be signed by the program director, chief of pediatrics, or department chairman directly to the American Board of Pediatrics.

Principles Regarding the Assessment of Research Competence

1. Research experience is an essential part of the training of subspecialists.

2. The Residency Review Committee for Pediatrics (RRC) accreditation process must include the evaluation of opportunities for research experience. The Sub-boards should avoid duplicating RRC functions.

3. A requirement for admission to the certifying subspecialty examination must be evidence of productive research participation.

4. Necessary, but not sufficient verification of productive research participation, is a statement by the program director that the applicant has actually participated in research and that in the program director's opinion the applicant has knowledge of and is able to apply the scientific method. When the program director is asked to sign or make this statement, instructions should be precise about what the Sub-board will consider sufficient evidence of participation.

5. Evidence of productive research participation must be submitted.

a. A list of acceptable evidence should allow the majority of applicants to be approved without putting the Sub-board in the position of judging the quality of research efforts.

b. Acceptable evidence should be defined by the Sub-board of Pediatric Gastroenterology. Evidence considered in the evaluation of productive research participation could include one of the following:

(1) First author of a research paper accepted for publication in a peer-reviewed journal deemed acceptable by the Sub-board.

(2) Submission of a research grant proposal which has been approved by an extramural organization with a critical review process.

(3) A post-graduate degree in a field of science relevant to the subspecialty.

(4) A thesis accepted as partial fulfillment of the requirements for a post-graduate degree in a field of science relevant to the subspecialty.

(5) A research progress report (signed by both the applicant and preceptor) no more than 5 pages in length to include (a) a
Pediatrics

statement of hypothesis, (b) delineation of methodology, (c) results and analysis, (d) significance of research, (e) applicant's plans for future research. This report would be for a person with research in progress, which for legitimate reason, has not been completed.

(6) Any other evidence acceptable to the Sub-board must be approved by the Board.

6. The program director is responsible for notifying all residents of the research requirements necessary for certification upon entry to the subspecialty training program.

7. Subspecialty examinations should include questions on research design, analysis, and interpretation.

Subspecialty “Fast Tracking”

Candidates who are believed to have demonstrated research competence, either prior to or during residency, as those with a Ph.D. degree or M.D./Ph.D. degree, may have 2 years of their training waived. The subspecialty program director, preferably petitioning the Sub-board and, prospectively, can ask the Sub-board to waive the research competency requirements and to reduce the time of subspecialty training by as much as one year. Candidates for this pathway must have completed three core years of pediatrics in an accredited program in the United States or Canada and would not have the option of the Special Alternative Pathway. Furthermore, candidates who receive a waiver by the Sub-board must complete at least two years of training in the subspecialty with at least one year of on-the-job training.

Role of the Pediatric Gastroenterology Program Director

The role of the pediatric gastroenterology program director in the certification process is to verify completion of training and to sign the following statement on the Verification of Competence Form:

“I certify that the above-named applicant has demonstrated the necessary duties, knowledge, clinical judgment, research abilities, technical skills and interpersonal skills and is judged to be fully prepared for independent responsibility as a pediatric gastroenterologist; to my knowledge, he/she has moral and ethical integrity. The applicant is recommended for examination.”

All applicants must have Verification and Evaluation Forms(s) on file in the Board office to be admitted to the pediatric gastroenterology examination. If an applicant's training is not verified and/or the he/she is not recommended for admission, the applicant will be required to satisfactorily complete an additional period of subspecialty residency training in pediatric gastroenterology before reapplying. Alternatively, the applicant may appeal to the Credentials Committee of the Sub-board. The Credentials Committee will gather additional information about the applicant and decide if permission should be given to take the examination. For an appeal, the applicant will be asked to submit copies of certificates of satisfactory completion of training. If the applicant has been denied such a certificate, then admission will be refused on the basis of incomplete training. However, possession of such a certificate will not automatically admit the person to the certification process of the Sub-board. Most training certificates attest to the achievement of a minimal level of competence or the fulfillment of an employment contract. Therefore, the program director's statement on the Verification of Competence Form will take precedence over the certificate from the institution. Program directors are urged not to issue certificates of successful completion of training when the resident is deemed not to have met those standards.

The Sub-board requires that the period of training be at least 22 months for those subspecialty residents entering training prior to January 1, 1990, and at least 33 months for those entering training on or after January 1, 1990. Extended absences; whether for vacation, maternity leave, illness, etc., must be made up. Applicants beginning part-time training after January 1, 1990, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Each applicant is considered individually and must be acceptable to the Sub-board of Pediatric Gastroenterology. The Sub-board recognizes that situations may arise that are not explained by the preceding information. Questions concerning eligibility will be considered by the Credentials Committee of the Sub-board.

Training Programs

At the present time, the RRC has not begun the process of accrediting training programs in pediatric gastroenterology. Physicians entering subspecialty training in pediatric gastroenterology prior to completion of the accreditation process by the RRC are advised to enter those programs in which the director or senior faculty of the program is certified in pediatric gastroenterology or possesses equivalent credentials. Programs in pediatric gastroenterology that are accredited by the RCPSC will be considered equivalent to programs accredited by the RRC.

Only those pediatric gastroenterology training programs which are operated in association with general comprehensive pediatric programs accredited by the RRC will be considered.

Special Requirements for Training Programs

Special Requirements for Training Programs in Pediatric Gastroenterology have been drafted but not yet approved by the RRC or the Accreditation Council for Graduate Medical Education. These Special Requirements are thought of as suggested criteria for training programs in pediatric gastroenterology until the RRC begins to accredit training programs. The Credentials Committee of the Sub-board will be guided by these requirements in evaluating an applicant's qualifications.

Examinations

The purpose of the examination is to determine the candidate's competency in the subspecialty of pediatric gastroenterology. Since such competency is founded on knowledge of basic sciences, the candidate must be prepared to demonstrate an adequate grasp of relevant basic information in areas such as genetics, embryology, anatomy, physiology, pharmacology, biochemistry, and clinical gastroenterology.

Examination results will be reported by name and score to the pediatric department chairman and subspecialty program director at the institution(s) where a candidate trained.

Failure in Examinations

Candidates who are unsuccessful on an examination will be admitted for reexamination at the next examination upon specific application and payment of the re-registration fee.

Candidates who are unsuccessful on an examination must contact the Board office within one year of the date of the examination if they have questions concerning their performance.

Irregularities

The validity of the performance of candidates on the examination of the Sub-board is secured by every means available. Information concerning the procedure to be taken by the Sub-board in the event of irregular behavior during the examination, such as giving or obtaining unauthorized information or aid before, during, or after the examina-
tion, offering financial or other benefit to a proctor, employee, or agent of the Board or Sub-board, is available by contacting the Board office.

Postponement of Examinations

After the Sub-board has accepted an application, the candidate is expected to take the next examination offered. Candidates who withdraw from the examination after the site assignment/approval letters are prepared will forfeit a portion of the fees paid. Candidates who withdraw after the date set for postponement will forfeit all fees paid. To register for a future examination, payment of the re-registration fee will be required.

Time in Which to Complete Certification Process

Candidates should achieve certification within seven years of initial acceptance into the certification process for pediatric gastroenterology. Candidates who have not been certified within the seven-year time limit must reapply and pass a screening assessment before being readmitted to the certification process.

Applications

The next certifying examination in pediatric gastroenterology is scheduled to be given in 1992. Within the next few years the Board anticipates that the certification examination will be given semi-annually using computer technology. Application forms are available only during the registration period for a particular examination from the American Board of Pediatrics, 111 Silver Cedar Court, Chapel Hill, NC 27514-1651. Telephone: (919) 929-0461.

A physician who has dyslexia or a serious physical handicap and who wishes to be given special consideration will be required to submit documentation of his/her condition prior to appearing for the examination. Applicants should notify the Board office at the time the initial application is submitted.

Late Applications

A physician whose application or re-registration material is postmarked after the published deadline will be expected to pay an additional fee of $200 before the application or registration material will be processed.

Fees

The cost of certification includes the following fees:

**New application:**
- $ 250 processing and evaluation fee
- $ 750 examination fee for one examination
- $1000 TOTAL payment at the time of initial application

**Re-registration:**
- $ 900 fee for one written examination

If an applicant is not approved to take the pediatric gastroenterology examination, the $750 written examination fee will be refunded. The remaining $250 processing and evaluation fee is not refundable. If the applicant wishes to pursue certification in the future, he/she will be required to complete a new application and submit the full initial application fee again.

Fees are subject to change at any time. Checks (U.S. funds only) should be made payable to the AMERICAN BOARD OF PEDIATRICS.

Certification

A certificate of special qualifications, valid for seven years, is awarded by the American Board of Pediatrics to those candidates who have met the requirements and have satisfactorily passed the examination of the Sub-board. A program for renewal of certification has been developed by the Board. Details may be obtained by writing the Board office.

The names of those certified will be sent to the American Board of Medical Specialties (ABMS) for publication in its Directory of Certified Pediatricians and to various pediatric journals for publication. Scores are not sent to ABMS or the journals.

Revocation of Certificates

All certificates issued by the American Board of Pediatrics are issued subject to the provisions of the certificate of incorporation and the bylaws of the Board. Each such certificate is subject to revocation in the event that:

1. the issuance of such certificate or its receipt by the physician so certified shall have been contrary to or in violation of any of the provisions of the Board’s certificate of incorporation or bylaws; or
2. the physician so certified shall not have been eligible to receive such certificate, irrespective of whether or not the fact constituting him/her so ineligible were known to any or all of the members of the Board at the time of the issuance of such certificate; or
3. the physician so certified shall have made any misstatement of fact in his/her application for such certificate or in any other statement or representation to the Board, its members, representatives, or agents; or
4. the physician so certified shall have been convicted by a court of competent jurisdiction of a felony or of any misdemeanor involving, in the opinion of the Board of Directors, moral turpitude in connection with his/her practice of medicine; or
5. the physician so certified shall have had one or more of his/her licenses to practice medicine revoked or shall have been placed on probation by any court or other body having proper jurisdiction and authority; or
6. the physician so certified has repeatedly made statements contrary to sound medical science and practice, raising such fundamental questions about his/her competency.

If the Board obtains probable cause to believe that a certificate should be revoked for any of the reasons set forth above, it may institute proceedings for revocation thereof by mailing written notice to the holder of such certificate that a hearing will be held to determine whether or not the certificate should be revoked. The steps to be taken are outlined in the Rules of Appellate Procedure of the American Board of Pediatrics, which may be obtained by writing to the Board office.

POLICY REGARDING CHEMICAL USE AND DEPENDENCY (INCLUDING DRUGS AND ALCOHOL)

An applicant who has a history of chemical dependency as reported to the American Board of Pediatrics and who submits documentation acceptable to the Board that the disease is known to be under control may apply for and take the certifying examination provided he/she meets the general admission requirements. This policy also pertains to individuals who wish to participate in the Program for Renewal of Certification. If the candidate passes the certifying examination or the examination for certification renewal, he/she will not be issued a certificate unless documentation acceptable to the Board is submitted verifying that the disease has been under control for five years from the time of the most recent occurrence of the disease. If a certificate is issued, it will be effective for a seven-year period from the date the examination was passed.

An applicant who has a history of chemical dependency, as reported to the Board, who cannot submit documentation acceptable to the Board that the disease is under control will not be allowed to take the certifying examination or to participate in the program for renewal of certification.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to consult the Amer-
Pediatrics

American Board of Pediatrics at the above address to ascertain whether the information they have is current.

Certification in Pediatric Hematology-Oncology

The American Board of Pediatrics has established a procedure for certification in pediatric hematology-oncology.

Eligibility Criteria

1. Certification by the American Board of Pediatrics. Applicants may submit their application prior to taking the certifying examination in general pediatrics. However, an applicant must take and pass the certifying examination before being permitted to take the pediatric hematology-oncology examination.

2. Three years of full-time broadly based subspecialty residency training in pediatric hematology-oncology is required of those physicians entering training on or after January 1, 1988, in a program under the supervision of a director who is certified in pediatric hematology-oncology, or lacking such certification, possesses equivalent credentials.

Physicians who entered training in pediatric hematology-oncology on or after January 1, 1987, will be required to complete their three years of subspecialty residency in a program accredited for training in pediatric hematology-oncology by the Residency Review Committee for Pediatrics (RCP). Physicians who entered pediatric hematology-oncology training prior to January 1, 1986, may apply for admission on the basis of their completion of two years of subspecialty residency in pediatric hematology-oncology; such physicians are not required to complete their two years of required training in an accredited subspecialty program.

For subspecialty residents who begin training on or after January 1, 1988, it is expected that at the conclusion of training, subspecialty residents will be able to demonstrate competence both in the clinical skills of the discipline as well as in research. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical and research competence; the resident must meet the criteria as stated in the Principles Regarding the Assessment of Research Competence; and the resident must pass the certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual general pediatric residency years (PL. 1, 2, 3).

All subspecialty training must be completed in the United States, unless the Credentials Committee of the Sub-board has given approval for foreign subspecialty training on an individual basis. Applicants wishing to obtain such approval should contact the American Board of Pediatrics.

Subspecialty residents completing their pediatric hematology-oncology training in Canada in programs approved for general pediatrics by the Royal College of Physicians and Surgeons of Canada will be considered on an individual basis by the Credentials Committee of the Sub-board.

Applicants who receive credit for training in pediatric hematology-oncology cannot use this training toward the training requirements of another pediatric subspecialty.

3. Verification of training. Applicants will be asked to list the program(s) where they completed subspecialty residency training in pediatric hematology-oncology as well as the name(s) of their program director(s). The Sub-board will send a Verification of Competence Form to the program director(s) for completion.

Principles Regarding the Assessment of Research Competence

1. Research experience is an essential part of the training of subspecialists.

2. The Residency Review Committee for Pediatrics (RCP) accreditation process must include the evaluation of opportunities for research experience. The Sub-boards should avoid duplicating RCP functions.

3. A requirement for admission to subspecialty examinations should be evidence of productive research participation.

4. Necessary, but not sufficient verification of productive research participation, is a statement by the program director that the applicant has actually participated in research and that in the program director's opinion the applicant has knowledge of and is able to apply the scientific method. When the program director is asked to sign or make this statement, instructions should be precise about what the Sub-board will consider sufficient evidence of participation.

5. Evidence of productive research participation must be submitted.

   a. A list of acceptable evidence should allow the majority of applicants to be approved without putting the Sub-board in the position of judging the quality of research efforts.

   b. Acceptable evidence should be defined by the Sub-board of Pediatric Hematology-oncology. Evidence considered in the evaluation of productive research participation could include one of the following:

      (1) First author of a research paper accepted for publication in a peer-reviewed journal deemed acceptable by the Sub-board.

      (2) Submission of a research grant proposal which has been approved by an extramural organization with a critical review process.

      (3) A postgraduate degree in a field of science relevant to the subspecialty.

      (4) A thesis accepted as partial fulfillment of the requirements for a postgraduate degree in a field of science relevant to the subspecialty.

      (5) A research progress report (signed by both the applicant and the preceptor) no more than 5 pages in length to include (a) a statement of hypothesis, (b) delineation of methodology, (c) results and analysis, (d) significance of research, (e) applicant's plans for future research. This report would be for a person with research in progress, which for legitimate reason, has not been completed.

      (6) Any other evidence acceptable to the Sub-board must be approved by the Board.

6. The program director is responsible for notifying all residents of the research requirements necessary for certification upon entry to the subspecialty training program.

7. Subspecialty examinations should include questions on research design, analysis, and interpretation.

Subspecialty “Fast Tracking”

Candidates who are believed to have demonstrated research competence, either prior to or during residency, such as those with a Ph.D. degree or M.D./Ph.D. degree, may have a part of their training waived. The subspecialty program director, preferably petitioning the Sub-board prospectively, can ask the Sub-board to waive the research competence requirements and to reduce the time of subspecialty training by as much as one year. Candidates for this pathway must have completed three core years of pediatrics in an accredited program in the United States or Canada and would not have the option of the Special Alternative Pathway. Furthermore, candidates who receive a waiver by the Sub-board must complete at least two years of training in the subspecialty with at least one year of broad-based clinical training.
Role of the Pediatric Hematology-Oncology Program Director

The role of the pediatric hematology-oncology program director in the certification process is to verify completion of training and to sign the following statement on the Verification of Competence Form:

"I certify that the above named applicant has demonstrated the necessary attitudes, knowledge, clinical judgment, research abilities, technical skills and interpersonal skills and is judged to be fully prepared for independent responsibility as a pediatric hematologist-oncologist; to my knowledge, he/she has moral and ethical integrity. The applicant is recommended for examination."

All applicants must have Verification and Evaluation Form(s) on file in the Board office to be admitted to the pediatric hematology-oncology examination. If an applicant's training is not verified and/or he/she is not recommended for admission, the applicant will be required to satisfactorily complete an additional period of subspecialty residency training in pediatric hematology-oncology before reapplying. Alternatively, the applicant may appeal to the Credentials Committee of the Sub-board. The Credentials Committee will gather additional information about the applicant and decide if permission should be given to take the examination. For an appeal, the applicant will be asked to submit copies of certificates of satisfactory completion of training. If the applicant has been denied such a certificate, then admission will be refused on the basis of incomplete training. However, possession of such a certificate will not automatically admit the person to the certification process of the Sub-board. Most training certificates attest to the achievement of a minimal level of competence or the fulfillment of an employment contract. Therefore, the program director's statement on the Verification of Competence Form will take precedence over the certificate from the institution. Program directors are urged not to issue certificates of successful completion of training when the resident is deemed not to have met those standards.

The Sub-board requires that the period of training be at least 22 months for those subspecialty residents entering training prior to January 1, 1986, and at least 33 months of those entering training on or after January 1, 1986. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. Applicants beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Each applicant is considered individually and must be acceptable to the Sub-board of Pediatric Hematology-Oncology. The Sub-board recognizes that situations may arise that are not explained by the preceding information. Questions concerning eligibility will be considered by the Credentials Committee of the Sub-board.

Training Programs

Subspecialty residency training programs in pediatric hematology-oncology are accredited by the Residency Review Committee for Pediatrics (RRC). The list of accredited programs appears in the Directory of Graduate Medical Education Programs. A physician entering subspecialty residency in pediatric hematology-oncology on or after January 1, 1987, must train in a program accredited for training in pediatric hematology-oncology by the RRC in order to qualify for admission to the certifying examination of the Sub-board.

Residents who entered subspecialty training in pediatric hematology-oncology prior to January 1, 1986, are not required to complete three years of training nor are they required to complete their training in an accredited program. They are required, however, to complete their pediatric hematology-oncology training in programs which are approved in association with general comprehensive pediatric programs accredited by the Residency Review Committee for Pediatrics.

Subspecialty residents who do not meet these training requirements will be considered on an individual basis by the Credentials Committee of the Sub-board of Pediatric Hematology-Oncology.

Special Requirements for Training Programs

Special Requirements for Training Programs in Pediatric Hematology-Oncology have been approved by the Residency Review Committee for Pediatrics and the Accreditation Council for Graduate Medical Education. Copies of the Special Requirements are available from the office of the Residency Review Committee for Pediatrics, 515 North State Street, Chicago, IL 60610. The Special Requirements are published in the Directory of Graduate Medical Education Programs.

Examinations

The purpose of the examination is to determine a candidate's competence to practice the subspecialty. Therefore, emphasis is placed on practical aspects. Since good practice is founded on knowledge and sound use of basic sciences, a candidate must be prepared to demonstrate an adequate grasp of relevant basic information in genetics, embryology, anatomy, physiology, pharmacology, biochemistry, etc.

Examination results will be reported by name and score to the pediatric department chairman and subspecialty program director at the institution(s) where a candidate trained.

The 1993 examination will be the last examination for which applicants may apply unaccredited training toward fulfillment of the certification requirements.

Failure in Examinations

Candidates who are unsuccessful on an examination will be admitted for re-examination at the next examination upon specific application and payment of the re-registration fee.

Candidates who are unsuccessful on an examination must contact the Board office within one year of the date of the examination if they have questions concerning their performance.

Irregularities

The validity of the performance of candidates on the examination of the Sub-board is secured by every means available. Information concerning the procedures to be taken by the Sub-board in the event of irregular behavior during the examination, such as giving or obtaining unauthorized information or aid before, during, or after the examination, or offering financial or other benefit to a proctor, employee, or agent of the Board or Sub-board is available by contacting the Board office.

Postponement of Examinations

After the Sub-board has accepted an application, the candidate is expected to take the next examination offered. Candidates who withdraw from the examination after the site assignment/approval letters are prepared will forfeit a portion of the fees paid. Candidates who withdraw after the date set for postponement will forfeit all fees paid. To register for a future examination, payment of the re-registration fee will be required.

Time in Which to Complete Certification Process

Candidates should achieve certification within seven years of their initial acceptance into the certification process for pediatric hematology-
oncology. Candidates who have not been certified within the seven-year time limit must reaply and pass a screening assessment before being readmitted to the certification process.

Applications

The next certifying examination in pediatric hematology-oncology will be given in 1992. Within the next few years the Board anticipates that the certification examination will be given semi-annually using computer technology. Application forms are available only during the registration period for a particular examination from the American Board of Pediatrics, 111 Silver Cedar Court, Chapel Hill, NC 27514-1651. Telephone: (919) 929-0461.

A physician who has dyslexia or a serious physical handicap and who wishes to be given special consideration will be required to submit documentation of his/her condition prior to appearing for the examination. Applicants should notify the Board office at the time the initial application is submitted.

Late Applications

A physician whose application or re-registration material is postmarked after the published deadline will be expected to pay an additional fee of $200 before the application or registration material will be processed.

Fees

The cost of certification includes the following fees:

New application:
- $250 processing and evaluation fee
- $750 examination fee for one examination
- $1002 TOTAL payment at the time of initial application

Re-registration:
- $900 fee for one written examination

If an applicant is not approved to take the pediatric hematology-oncology examination, the $750 examination fee will be refunded. The $250 processing and evaluation fee is not refundable. If the applicant wishes to pursue certification in the future, he/she will be required to complete a new application and submit the full initial application fee again.

Fees are subject to change at any time. Checks (U.S. funds only) should be made payable to the AMERICAN BOARD OF PEDIATRICS.

Certification

A certificate of special qualifications, valid for seven years, is awarded by the American Board of Pediatrics to those candidates who have met the requirements and have satisfactorily passed the examination of the Sub-board. A program for renewal of certification has been developed by the Board. Details may be obtained by writing the Board office.

The names of those certified are sent to the American Board of Medical Specialties (ABMS) for publication in its Directory of Certified Pediatricians and to various pediatric journals. Scores are not sent to ABMS or the journals.

Revocation of Certificates

All certificates issued by the American Board of Pediatrics are issued subject to the provisions of the certificate of incorporation and the bylaws of the Board. Each such certificate is subject to revocation in the event that:

1. the issuance of such certificate or its receipt by the physician so certified shall have been contrary to or in violation of any of the provisions of the Board’s certificate of incorporation or bylaws; or

2. the physician so certified shall not have been eligible to receive such certificate, irrespective of whether or not the fact constituting him/her so ineligible were known to any or all of the members of the Board at the time of the issuance of such certificate; or

3. the physician so certified shall have made any misstatement of fact in his/her application for such certificate or in any other statement or representation to the Board, its members, representatives, or agents; or

4. the physician so certified shall have been convicted by a court of competent jurisdiction of a felony or of any misdemeanor involving, in the opinion of the Board of Directors, moral turpitude in connection with his/her practice of medicine; or

5. the physician so certified shall have had one or more of his/her licenses to practice medicine revoked or shall have been placed on probation by any court or other body having proper jurisdiction and authority; or

6. the physician so certified has repeatedly made statements contrary to sound medical science and practice, raising such fundamental questions about his/her competency.

If the Board obtains probable cause to believe that a certificate should be revoked for any of the reasons set forth above, it may institute proceedings for revocation thereof by mailing written notice to the holder of such certificate that a hearing will be held to determine whether or not the certificate should be revoked. The steps to be taken are outlined in the Rules of Appellate Procedure of the American Board of Pediatrics, which may be obtained by writing to the Board office.

POLICY REGARDING CHEMICAL USE AND DEPENDENCY (INCLUDING DRUGS AND ALCOHOL)

An applicant who has a history of chemical dependency as reported to the American Board of Pediatrics and who submits documentation acceptable to the Board that the disease is known to be under control may apply for and take the certifying examination provided he/she meets the general admission requirements. This policy also pertains to individuals who wish to participate in the Program for Renewal of Certification. If the candidate passes the certifying examination or the examination for certification renewal, he/she will not be issued a certificate unless documentation acceptable to the Board is submitted verifying that the disease has been under control for five years from the time of the most recent occurrence of the disease. If a certificate is issued, it will be effective for a seven-year period from the date the examination was passed.

An applicant who has a history of chemical dependency, as reported to the Board, who cannot submit documentation acceptable to the Board that the disease is under control will not be allowed to take the certifying examination or to participate in the program for renewal of certification.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to consult the American Board of Pediatrics at the above address to ascertain whether the information they have is current.

Certification in Neonatal-Perinatal Medicine

The American Board of Pediatrics has established a procedure for certification in neonatal-perinatal medicine.

Eligibility Criteria

1. Certification by the American Board of Pediatrics. Applicants may submit their application prior to taking the certifying examination in general pediatrics. However, an applicant must take and pass the certifying examination before being permitted to take the neonatal-perinatal medicine examination.
2. Two years of full-time subspecialty residency training in neonatal-perinatal medicine is required of physicians in a program under the supervision of a director who is certified in neonatal-perinatal medicine or, lacking such certification, possesses equivalent credentials. Physicians who entered training in neonatal-perinatal medicine on or after January 1, 1986, are required to complete their training in a program accredited for training in neonatal-perinatal medicine by the Residency Review Committee for Pediatrics.

Three years of full-time broadly based subspecialty residency training in neonatal-perinatal medicine is required of those physicians entering training on or after January 1, 1989.

For subspecialty residents who begin training on or after January 1, 1989, it is expected that at the conclusion of training, subspecialty residents will be able to demonstrate competence both in the clinical skills of the discipline as well as in research. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical and research competence; the resident must meet the criteria as stated in the Principles Regarding the Assessment of Research Competence; and he/she must pass the certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual general pediatric residency years (PL 1, 2, 3).

All subspecialty training must be completed in the United States, unless the Credentials Committee of the Sub-board has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. Applicants wishing to obtain such approval should contact the American Board of Pediatrics. Subspecialty residents completing their neonatal-perinatal medicine training in Canada in programs approved for general pediatrics by the Royal College of Physicians and Surgeons of Canada will be considered on an individual basis by the Credentials Committee of the Sub-board.

Applicants who receive credit for training in neonatal-perinatal medicine cannot use this same training toward the training requirements of another pediatric subspecialty.

3. Verification of training. Applicants will be asked to list the program(s) where they completed subspecialty residency training in neonatal-perinatal medicine as well as the name(s) of their program director(s). The Sub-board will send a Verification of Competence Form to the program director(s) for completion.

Principles Regarding the Assessment of Research Competence

1. Research experience is an essential part of the training of subspecialists.
2. The Residency Review Committee for Pediatrics (RRC) accreditation process must include the evaluation of opportunities for research experience. The Sub-boards should avoid duplicating RRC functions.
3. A requirement for admission to the certifying subspecialty examination must be evidence of productive research participation.
4. Necessary, but not sufficient verification of productive research participation, is a statement by the program director that the applicant has actually participated in research and that in the program director's opinion the applicant has knowledge of and is able to apply the scientific method. When the program director is asked to sign or make this statement, instructions should be precise about what the Sub-board will consider sufficient evidence of participation.
5. Evidence of productive research participation must be submitted.
   a. A list of acceptable evidence should allow the majority of applicants to be approved without putting the Sub-board in the position of judging the quality of research efforts.

   b. Acceptable evidence should be defined by the Sub-board of Neonatal-Perinatal Medicine. Evidence considered in the evaluation of productive research participation could include one of the following:
      (1) First author of a research paper accepted for publication in a peer-reviewed journal deemed acceptable by the Sub-board.
      (2) Submission of a research grant proposal which has been approved by an extramural organization with a critical review process.
      (3) A post-graduate degree in a field of science relevant to the subspecialty.
      (4) A thesis accepted as partial fulfillment of the requirements for a post-graduate degree in a field of science relevant to the subspecialty.
      (5) A research progress report (signed by both the applicant and preceptor) no more than 5 pages in length to include (a) a statement of hypothesis, (b) definition of methodology, (c) results and analysis, (d) significance of research, (e) applicant's plans for future research. This report would be for a person with research in progress, which for legitimate reason, has not been completed.
      (6) Any other evidence acceptable to the Sub-board must be approved by the Board.
6. The program director is responsible for notifying all residents of the research requirements necessary for certification upon entry to the subspecialty training program.
7. Subspecialty examinations should include questions on research design, analysis, and interpretation.

Subspecialty "Fast Tracking"

Candidates who are believed to have demonstrated research competence, either prior to or during residency, such as those with a Ph.D. degree or M.D./Ph.D. degree, may have a part of their training waived. The subspecialty program director, preferably petitioning the Sub-board prospectively, can ask the Sub-board to waive the research competency requirements and to reduce the time of subspecialty training by as much as one year. Candidates for this pathway must have completed three core years of pediatrics in an accredited program in the United States or Canada and would not have the option of the Special Alternative Pathway. Furthermore, candidates who receive a waiver by the Sub-board must complete at least two years of training in the subspecialty with at least one year of broad-based clinical training.

Role of the Neonatal-Perinatal Medicine Program Director

The role of the neonatal-perinatal medicine program director in the certification process is to verify completion of training and to sign the following statement on the Verification of Competence Form:

"I certify that the above named applicant has demonstrated the necessary attitudes, knowledge, clinical judgment, research abilities, technical skills and interpersonal skills and is judged to be fully prepared for independent responsibility as a subspecialist in neonatal-perinatal medicine, to my knowledge, he/she has moral and ethical integrity. The applicant is recommended for examination."

All applicants must have Verification and Evaluation Form(s) on file in the Board office to be admitted to the neonatal-perinatal medicine examination. If an applicant's training is not verified and/or he/she is not recommended for admission, the applicant will be required to satisfactorily complete an additional period of subspecialty residency training in neonatal-perinatal medicine before reapplying. Alternatively, the applicant may appeal to the Credentials Committee of the Sub-board. The Credentials Committee will gather additional information about the applicant and decide if permission should be given to take the
Pediatrics

examination. For an appeal, the applicant will be asked to submit copies of certificates of satisfactory completion of training. If the applicant has been denied such a certificate, then admission will be refused on the basis of incomplete training. However, possession of such a certificate will not automatically admit the person to the certification process of the Sub-board. Most training certificates attest to the achievement of a minimal level of competence or the fulfillment of an employment contract. Therefore, the program director’s statement on the Verification of Competence Form will take precedence over the certificate from the institution. Program directors are urged not to issue certificates of successful completion of training when a resident is deemed not to have met those standards.

The Sub-board requires that the period of training be at least 22 months for those subspecialty residents entering training prior to January 1, 1989, and at least 33 months for those entering training on or after January 1, 1989. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. Applicants beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 5 years. No continuous absence of more than 1 year will be permitted.

Each applicant is considered individually and must be acceptable to the Sub-board of Neonatal-Perinatal Medicine. The Sub-board recognizes that situations may arise that are not explained by the preceding information. Questions concerning eligibility will be considered by the Credentials Committee of the Sub-board.

Training Programs

Subspecialty residency training programs in neonatal-perinatal medicine are accredited by the Residency Review Committee for Pediatrics (RCP). The list of accredited programs appears in the Directory of Graduate Medical Education Programs. A physician entering subspecialty residency in neonatal-perinatal medicine on or after January 1, 1986, must train in a program accredited for training in neonatal-perinatal medicine by the RCP in order to qualify for admission to the certifying examination of the Sub-board.

Residents who entered subspecialty training in neonatal-perinatal medicine prior to January 1, 1986, are not required to complete their training in an accredited program. They are required, however, to complete their training in programs which are operated in association with general comprehensive pediatric programs accredited by the Residency Review Committee for Pediatrics. Also, only those programs which are a part of an institution which offers residency or fellowship training in obstetrics and gynecology and include experience in fetal-maternal-perinatal medicine will be considered.

Subspecialty residents who do not meet these training requirements will be considered on an individual basis by the Credentials Committee of the Sub-board of Neonatal-Perinatal Medicine.

Special Requirements for Training Programs

Special Requirements for Training Programs in Neonatal-Perinatal Medicine have been approved by the Residency Review Committee for Pediatrics and the Accreditation Council for Graduate Medical Education. Copies of the Special Requirements are available from the office of the Residency Review Committee for Pediatrics, 515 North State Street, Chicago, IL 60610. The Special Requirements are published in the Directory of Graduate Medical Education Programs.

Examinations

The purpose of the examination is to determine a candidate’s competency to practice the subspecialty. Therefore, emphasis is placed on practical aspects. Since good practice is founded on knowledge and sound use of basic sciences, a candidate must be prepared to demonstrate an adequate grasp of relevant basic information in genetics, embryology, anatomy, physiology, pharmacology, biochemistry, etc.

Examination results will be reported by name and score to the pediatric department chairman and subspecialty program director at the institution(s) where a candidate trained.

The 1991 examination will be the last examination for which applicants may apply unaccredited training toward fulfillment of the certification requirements.

Failure in Examinations

Candidates who are unsuccessful on an examination will be admitted for re-examination at the next examination upon specific application and payment of the re-registration fee.

Candidates who are unsuccessful on an examination must contact the Board office within one year of the date of the examination if they have questions concerning their performance.

Irregularities

The validity of the performance of candidates on the written examination of the Sub-board is secured by every means available. Information concerning the procedures to be taken by the Sub-board in the event of irregular behavior during the written examination, such as giving or obtaining unauthorized information or aid before, during, or after the examination, or offering financial or other benefits to a proctor, employee, or agent of the Board or Sub-board is available by contacting the Board office.

Postponement of Examinations

After the Sub-board has accepted an application, the candidate is expected to take the next examination offered. Candidates who withdraw from the examination after the site assignment/approval letters are prepared will forfeit a portion of the fees paid.

Candidates who withdraw after the date set for postponement will forfeit all fees paid. To register for a future examination, payment of the re-registration fee will be required.

Time in Which to Complete Certification Process

Candidates should achieve certification within seven years of their initial acceptance into the certification process for neonatal-perinatal medicine. Candidates who have not been certified within the seven-year time limit must reapply and pass a screening assessment before being readmitted to the certification process.

Applications

The next certifying examination in neonatal-perinatal medicine will be given in 1999. Within the next few years the Board anticipates that the certification examination will be given semi-annually using computer technology. Application forms are available only during the registration period for a particular examination from the American Board of Pediatrics, 111 Silver Cedar Court, Chapel Hill, NC 27514-1651. Telephone: (919) 929-1061.

A physician who has dyslexia or a serious physical handicap and who wishes to be given special consideration will be required to submit documentation of his/her condition prior to appearing for the examination. Applicants should notify the Board office at the time the initial application is submitted.
CERTIFICATION REQUIREMENTS

Late Applications

A physician whose application or re-registration material is post-marked after the published deadline will be expected to pay an additional fee of $200 before the application or registration material will be processed.

Fees

The cost of certification includes the following fees:

New application:
- $250 processing and evaluation fee
- $750 examination fee for one examination
- $1000 TOTAL payment at the time of initial application

Re-registration:
- $900 fee for one written examination

If an applicant is not approved to take the neonatal-perinatal medicine examination, the $750 written examination fee will be refunded. The remaining $250 processing and evaluation fee is not refundable. If the applicant wishes to pursue certification in the future, he/she will be required to complete a new application and submit the full initial application fee again.

Fees are subject to change at any time. Checks (U.S. funds only) should be made payable to the AMERICAN BOARD OF PEDIiatrics.

Certification

A certificate of special qualifications, valid for seven years, is awarded by the American Board of Pediatrics to those candidates who have met the requirements and have passed the examination of the Sub-board. A program for renewal of certification has been developed by the Board. Details may be obtained by writing the Board office.

The names of those certified are sent to the American Board of Medical Specialties (ABMS) for publication in its Directory of Certified Pediatricians and to various pediatric journals. Scores are not sent to ABMS or the journals.

Revocation of Certificates

All certificates issued by the American Board of Pediatrics are issued subject to the provisions of the certificate of incorporation and the bylaws of the Board. Each such certificate is subject to revocation in the event that:

1. the issuance of such certificate or its receipt by the physician so certified shall have been contrary to or in violation of any of the provisions of the Board's certificate of incorporation or bylaws; or
2. the physician so certified shall not have been eligible to receive such certificate, irrespective of whether or not the fact constituting him/her so ineligible were known to any or all of the members of the Board at the time of issuance of such certificate; or
3. the physician so certified shall have made any misstatement of fact in his/her application for such certificate or in any other statement or representation to the Board, its members, representatives, or agents; or
4. the physician so certified shall have been convicted by a court of competent jurisdiction of a felony or of any misdemeanor involving, in the opinion of the Board of Directors, moral turpitude in connection with his/her practice of medicine; or
5. the physician so certified shall have had one or more of his/her licenses to practice medicine revoked or shall have been placed on probation by any court or other body having proper jurisdiction and authority; or
6. the physician so certified has repeatedly made statements contrary to sound medical science and practice, raising such fundamental questions about his/her competency.

If the Board obtains probable cause to believe that a certificate should be revoked for any of the reasons set forth above, it may institute proceedings for revocation thereof by mailing written notice to the holder of such certificate that a hearing will be held to determine whether or not the certificate should be revoked. The steps to be taken are outlined in the Rules of Appellate Procedure of the American Board of Pediatrics, which may be obtained by writing to the Board office.

POLICY REGARDING CHEMICAL USE AND DEPENDENCY (INCLUDING DRUGS AND ALCOHOL)

An applicant who has a history of chemical dependency as reported to the American Board of Pediatrics and who submits documentation acceptable to the Board that the disease is known to be under control may apply for and take the certifying examination provided he/she meets the general admission requirements. This policy also pertains to individuals who wish to participate in the Program for Renewal of Certification. If the candidate passes the certifying examination or the examination for certification renewal, he/she will not be issued a certificate unless documentation acceptable to the Board is submitted verifying that the disease has been under control for five years from the time of the most recent occurrence of the disease. If a certificate is issued, it will be effective for a seven-year period from the date the examination was passed.

An applicant who has a history of chemical dependency, as reported to the Board, who cannot submit documentation acceptable to the Board that the disease is under control will not be allowed to take the certifying examination or to participate in the Program for Renewal of Certification.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to consult the American Board of Pediatrics at the above address to ascertain whether the information they have is current.

Certification in Pediatric Nephrology

The American Board of Pediatrics has established a procedure for certification in pediatric nephrology.

Eligibility Criteria

1. Certification by the American Board of Pediatrics. Applicants may submit their application prior to taking the certifying examination in general pediatrics. However, an applicant must take and pass the certifying examination before being permitted to take the pediatric nephrology examination.

2. Three years of full-time subspecialty residency training in pediatric nephrology is required of those physicians entering training on or after January 1, 1987. This training must be completed in a program that is accredited for pediatric nephrology by the Residency Review Committee for Pediatrics (RCC).

Physicians who entered pediatric nephrology training prior to January 1, 1987, may apply for admission on the basis of their completion of two years of subspecialty residency in pediatric nephrology; such physicians are not required to complete their two years of required training in an accredited subspecialty program.

For subspecialty residents who begin training on or after January 1, 1988, it is expected that at the conclusion of training, subspecialty residents will be able to demonstrate competence both in the clinical skills of the discipline as well as in research. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical and research competence; the resident must meet the criteria as stated in the Principles Regarding the Assessment of Research Competence; and he/she must pass the certifi-
CERTIFICATION REQUIREMENTS

Pediatrics

ing examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual general pediatric residency years (F1, 2, 3).

All subspecialty training must be completed in the United States, unless the Credentials Committee of the Sub-board has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. Applicants wishing to obtain such approval should contact the American Board of Pediatrics.

Subspecialty residents completing their pediatric nephrology training in Canada in programs approved for general pediatrics by the Royal College of Physicians and Surgeons of Canada will be considered on an individual basis by the Credentials Committee of the Sub-board.

Applicants who receive credit for training in pediatric nephrology cannot use this same training toward the training requirements of another pediatric subspecialty.

3. Verification of training. Applicants will be asked to list the program(s) where they completed subspecialty residency training in pediatric nephrology as well as the name(s) of their program director(s). The Sub-board will send a Verification of Competence Form to the program director(s) for completion.

Principles Regarding the Assessment of Research Competence

1. Research experience is an essential part of the training of subspecialists.

2. The Residency Review Committee for Pediatrics (RRC) accreditation process must include the evaluation of opportunities for research experience. The Sub-boards should avoid duplicating RRC functions.

3. A requirement for admission to the certifying subspecialty examination must be evidence of productive research participation.

4. Necessary, but not sufficient verification of productive research participation is a statement by the program director that the applicant has actually participated in research and that in the program director's opinion the applicant has knowledge of and is able to apply the scientific method. When the program director is asked to sign or make this statement, instructions should be precise about what the Sub-board will consider sufficient evidence of participation.

5. Evidence of productive research participation must be submitted.
   a. A list of acceptable evidence should allow the majority of applicants to be approved without putting the Sub-board in the position of judging the quality of research efforts.
   b. Acceptable evidence should be defined by the Sub-board of Pediatric Nephrology. Evidence considered in the evaluation of productive research participation could include one of the following:
      (1) First author of a research paper accepted for publication in a peer-reviewed journal deemed acceptable by the Sub-board.
      (2) Submission of a research grant proposal which has been approved by an extramural organization with a critical review process.
      (3) A postgraduate degree in a field of science relevant to the subspecialty.
      (4) A thesis accepted as partial fulfillment of the requirements for a postgraduate degree in a field of science relevant to the subspecialty.
      (5) A research progress report (signed by both the applicant and preceptor) no more than 5 pages in length to include (a) a statement of hypothesis, (b) delineation of methodology, (c) results and analysis, (d) significance of research, (e) applicant's plans for future research. This report would be for a person with research in progress, which for legitimate reason, has not been completed.

6. Any other evidence acceptable to the Sub-board must be approved by the Board.

6. The program director is responsible for notifying all residents of the research requirements necessary for certification upon entry to the subspecialty training program.

7. Subspecialty examinations should include questions on research design, analysis, and interpretation.

Subspecialty 'Fast Tracking'

Candidates who are believed to have demonstrated research competence, either prior to or during residency, such as those with a Ph.D. degree or M.D./Ph.D. degree, may have a part of their training waivered. The subspecialty program director, preferably petitioning the Sub-board prospectively, can ask the Sub-board to waive the research competence requirements and to reduce the time of subspecialty training by as much as one year. Candidates for this pathway must have completed three core years of pediatrics in an accredited program in the United States or Canada and would not have the option of the Special Alternative Pathway. Furthermore, candidates who receive a waiver by the Sub-board must complete at least two years of training in the subspecialty with at least one year of broad-based clinical training.

Role of the Pediatric Nephrology Program Director

The role of the pediatric nephrology program director in the certification process is to verify completion of training and to sign the following statement on the Verification of Competence Form:

"I certify that the above named applicant has demonstrated the necessary attitudes, knowledge, clinical judgment, research abilities, technical skills and interpersonal skills and is judged to be fully prepared for independent responsibility as a pediatric nephrologist; to my knowledge, he/she has moral and ethical integrity. The applicant is recommended for examination."

All applicants must have Verification and Evaluation Form(s) on file in the Board office to be admitted to the pediatric nephrology examination. If an applicant's training is not verified and/or he/she is not recommended for admission, the applicant will be required to satisfactorily complete an additional period of subspecialty residency training in pediatric nephrology before reapplying. Alternatively, the applicant may appeal to the Credentials Committee of the Sub-board. The Credentials Committee will gather additional information about the applicant and decide if permission should be given to take the examination. For an appeal, the applicant will be asked to submit copies of certificates of satisfactory completion of training. If the applicant has been denied such a certificate, then admission will be refused on the basis of incomplete training. However, possession of such a certificate will not automatically admit the person to the certification process of the Sub-board. Most training certificates attest to the achievement of a minimal level of competence or the fulfillment of an employment contract. Therefore, the program director's statement on the Verification of Competence Form will take precedence over the certificate from the institution. Program directors are urged not to issue certificates of successful completion of training when the resident is deemed not to have met those standards.

The Sub-board requires that the period of training be at least 22 months for those subspecialty residents entering training prior to January 1, 1987, and at least 33 months of those entering training on or after January 1, 1987. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. Applicants beginning part-time training after January 1, 1987, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.
CERTIFICATION REQUIREMENTS

Each applicant is considered individually and must be acceptable to the Sub-board of Pediatric Nephrology. The Sub-board recognizes that situations may arise that are not explained by the preceding information. Questions concerning eligibility will be considered by the Credentials Committee of the Sub-board upon completion of the application and payment of the fee.

Training Programs

Subspecialty residency training programs in pediatric nephrology are accredited by the Residency Review Committee for Pediatrics (RRC). The list of accredited programs appears in the Directory of Graduate Medical Education Programs. A physician entering subspecialty residency in pediatric nephrology on or after January 1, 1987, must train in a program accredited for training in pediatric nephrology by the RRC in order to qualify for admission to the certifying examination of the Sub-board.

Residents who entered subspecialty training in pediatric nephrology prior to January 1, 1987, are not required to complete three years of training nor are they required to complete their training in an accredited program. They are required, however, to complete their pediatric nephrology training in programs which are operated in association with general comprehensive pediatric programs accredited by the Residency Review Committee for Pediatrics.

Subspecialty residents who do not meet these training requirements will be considered on an individual basis by the Credentials Committee of the Sub-board of Pediatric Nephrology.

Special Requirements for Training Programs

Special Requirements for Training Programs in Pediatric Nephrology have been approved by the Residency Review Committee for Pediatrics and the Accreditation Council for Graduate Medical Education. Copies of the Special Requirements are available from the office of the Residency Review Committee for Pediatrics, 515 North State Street, Chicago, IL 60610. The Special Requirements are published in the Directory of Graduate Medical Education Programs.

Examinations

The purpose of the examination is to determine a candidate’s competency to practice the subspecialty. Therefore, emphasis is placed on practical aspects. Since good practice is founded on knowledge and sound use of basic sciences, a candidate must be prepared to demonstrate an adequate grasp of relevant basic information in genetics, embryology, anatomy, physiology, pharmacology, biochemistry, etc.

Examination results will be reported by name and score to the pediatric department chairman and subspecialty program director at the institution(s) where a candidate trained.

The 1994 examination will be the last examination that applicants may apply unaccredited training toward fulfillment of the certification requirements.

Failure in Examinations

Candidates who are unsuccessful on an examination will be admitted for re-examination at the next examination upon specific application and payment of the re-registration fee.

Candidates who are unsuccessful on an examination must contact the Board office within one year of the date of the examination if they have questions concerning their performance.

Irregularities

The validity of the performance of candidates on the examination of the Sub-board is secured by every means available. Information concerning the procedures to be taken by the Sub-board in the event of irregular behavior during the written examination, such as giving or obtaining unauthorized information or aid before, during, or after the examination, or offering financial or other benefit to a proctor, employee, or agent of the Board or Sub-board is available by contacting the Board office.

Postponement of Examinations

After the Sub-board has accepted an application, the candidate is expected to take the next examination offered. Candidates who withdraw from the examination after the site assignment/approval letters are prepared will forfeit a portion of the fees paid. Candidates who withdraw after the date set for postponement will forfeit all fees paid. To register for a future examination, payment of the reapplication fee will be required.

Time in Which to Complete Certification Process

Candidates should achieve certification within seven years of their initial acceptance into the certification process for pediatric nephrology. Candidates who have not been certified within the seven-year time limit must reapply and pass a screening assessment before being readmitted to the certification process.

Applications

The next certifying examination in pediatric nephrology is scheduled to be given in 1991. Within the next few years the Board anticipates that the certification examination will be given semi-annually using computer technology. Application forms are available only during the registration period for a particular examination from the American Board of Pediatrics, 111 Silver Cedar Court, Chapel Hill, NC 27514-1651. Telephone: (919) 929-0461.

A physician who has dyslexia or a serious physical handicap and who wishes to be given special consideration will be required to submit documentation of his/her condition prior to appearing for the examination. Applicants should notify the Board office at the time the initial application is submitted.

Late Applications

A physician whose application or re-registration material is postmarked after the published deadline will be expected to pay an additional fee of $250 before the application or registration material will be processed.

Fees

The cost of certification includes the following fees:

New application:
- $250 processing and evaluation fee
- $750 examination fee for one examination
- $1000 TOTAL payment at the time of initial application

Re-registration:
- $900 fee for one written examination

If an applicant is not approved to take the pediatric nephrology examination, the $750 written examination fee will be refunded. The remaining $250 processing and evaluation fee is not refundable. If the applicant wishes to pursue certification in the future, he/she will be required to complete a new application and submit the full initial application fee again.
CERTIFICATION REQUIREMENTS

Pediatrics

Fees are subject to change at any time. Checks (U.S. funds only) should be made payable to the AMERICAN BOARD OF PEDIATRICS.

Certification

A certificate of special qualifications, valid for seven years, is awarded by the American Board of Pediatrics to those candidates who have met the requirements and have passed the examination of the Sub-board. A program for renewal of certification has been developed by the Board. Details may be obtained by writing the Board office.

The names of those certified are sent to the American Board of Medical Specialties (ABMS) for publication in its Directory of Certified Pediatricians and to various pediatric journals. Scores are not sent to ABMS or the journals.

Revocation of Certificates

All certificates issued by the American Board of Pediatrics are issued subject to the provisions of the certificate of incorporation and the bylaws of the Board. Each such certificate is subject to revocation in the event that:

1. the issuance of such certificate or its receipt by the physician so certified shall have been contrary to or in violation of any of the provisions of the Board's certificate of incorporation or bylaws; or
2. the physician so certified shall not have been eligible to receive such certificate, irrespective of whether or not the fact constituting his/her ineligibility were known to any or all of the members of the Board at the time of the issuance of such certificate; or
3. the physician so certified shall have made any misstatement of fact in his/her application for such certificate or in any other statement or representation to the Board, its members, representatives, or agents; or
4. the physician so certified shall have been convicted by a court of competent jurisdiction of a felony or of any misdemeanor involving, in the opinion of the Board of Directors, moral turpitude in connection with his/her practice of medicine; or
5. the physician so certified shall have had one or more of his/her licenses to practice medicine revoked or shall have been placed on probation by any court or other body having proper jurisdiction and authority; or
6. the physician so certified has repeatedly made statements contrary to sound medical science and practice, raising such fundamental questions about his/her competency.

If the Board obtains probable cause to believe that a certificate should be revoked for any of the reasons set forth above, it may institute proceedings for revocation thereof by mailing written notice to the holder of such certificate that a hearing will be held to determine whether or not the certificate should be revoked. The steps to be taken are outlined in the Rules of Appellate Procedure of the American Board of Pediatrics, which may be obtained by writing to the Board office.

POLICY REGARDING CHEMICAL USE AND DEPENDENCY (INCLUDING DRUGS AND ALCOHOL)

An applicant who has a history of chemical dependency as reported to the American Board of Pediatrics and who submits documentation acceptable to the Board that the disease is known to be under control may apply for and take the certifying examination provided he/she meets the general admission requirements. This policy also pertains to individuals who wish to participate in the Program for Renewal of Certification. If the candidate passes the certifying examination or the examination for certification renewal, he/she will not be issued a certificate unless documentation acceptable to the Board is submitted verifying that the disease has been under control for five years from the time of the most recent occurrence of the disease. If a certificate is issued, it will be effective for a seven-year period from the date the examination was passed.

An applicant who has a history of chemical dependency, as reported to the Board, who cannot submit documentation acceptable to the Board that the disease is under control will not be allowed to take the certifying examination or to participate in the program for renewal of certification.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to consult the American Board of Pediatrics at the above address to ascertain whether the information they have is current.

Certification in Pediatric Pulmonology

The American Board of Pediatrics has established a procedure for certification in pediatric pulmonology.

Eligibility Criteria

1. Certification by the American Board of Pediatrics. Applicants may submit their application prior to taking the certifying examination in general pediatrics. However, an applicant must take and pass the certifying examination before being permitted to take the pediatric pulmonology examination.

2. Subspecialty Training or Experience. Prior to the examination, the applicant must have COMPLETED one of the following to qualify for admission to the examination:

   a. Three years of full-time broadly-based subspecialty residency training in pediatric pulmonology is required of those physicians entering training on or after January 1, 1986, in a program under the supervision of a director who is certified in pediatric pulmonology or, lacking such certification, possesses equivalent credentials. Physicians who entered pediatric pulmonology training prior to January 1, 1986, may apply for admission on the basis of their completion of two years of subspecialty residency in pediatric pulmonology. Only those pediatric pulmonology training programs which are operated in association with general comprehensive pediatric residency programs accredited by the Residency Review Committee for Pediatrics will be considered.

   For subspecialty residents who began training on or after January 1, 1988, it is expected that at the conclusion of training, they will be able to demonstrate competence both in the clinical skills of the discipline as well as in research. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: A Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical and research competence; the resident must meet the criteria as stated in the Principles Regarding the Assessment of Research Competence; and he/she must pass the certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual general pediatric residency years (PL 1, 2, 3).

   All subspecialty training must be completed in the United States, unless the Credentials Committee of the Sub-board has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. Applicants wishing to obtain such approval should contact the American Board of Pediatrics.

   Subspecialty residents completing their pediatric pulmonology training in Canada in programs approved for general pediatrics by the Royal College of Physicians and Surgeons of Canada will be considered on an individual basis by the Credentials Committee of the Sub-board.

   b. Five years of broadly based pediatric pulmonology: Broadly based pediatric pulmonology encompasses the majority of the clinical components which are included in the 1978 Guidelines for Pediatric Pul-
CERTIFICATION REQUIREMENTS

The completed Verification and Evaluation Form(s) should be sent by the program director, chief of pediatrics, or department chairman directly to the American Board of Pediatrics.

Principles Regarding the Assessment of Research Competence

1. Research experience is an essential part of the training of subspecialists.
2. The Residency Review Committee for Pediatrics (RRC) accreditation process must include the evaluation of opportunities for research experience. The Sub-boards should avoid duplicating RRC functions.
3. A requirement for admission to the certifying subspecialty examination must be evidence of productive research participation.
4. Necessary, but not sufficient verification of productive research participation, is a statement by the program director that the applicant has actually participated in research and that in the program director's opinion the applicant has knowledge of and is able to apply the scientific method. When the program director is asked to sign or make this statement, instructions should be precise about what the Sub-board will consider sufficient evidence of participation.
5. Evidence of productive research participation must be submitted.
   a. A list of acceptable evidence should allow the majority of applicants to be approved without putting the Sub-board in the position of judging the quality of research efforts.
   b. Acceptable evidence should be defined by the Sub-board of Pediatric Pulmonology. Evidence considered in the evaluation of productive research participation could include one of the following:
      (1) First author of a research paper accepted for publication in a peer-reviewed journal deemed acceptable by the Sub-board.
      (2) Submission of a research grant proposal which has been approved by an extramural organization with a critical review process.
      (3) A post-graduate degree in a field of science relevant to the subspecialty.
      (4) A thesis accepted as partial fulfillment of the requirements for a post-graduate degree in a field of science relevant to the subspecialty.
      (5) A research progress report (signed by both the applicant and preceptor) no more than 5 pages in length to include (a) a statement of hypothesis, (b) delineation of methodology, (c) results and analysis, (d) significance of research, (e) applicant's plans for future research. This report would be for a person with research in progress, which for legitimate reason, has not been completed.
      (6) Any other evidence acceptable to the Sub-board must be approved by the Board.
6. The program director is responsible for notifying all residents of the research requirements necessary for certification upon entry to the subspecialty training program.
7. Subspecialty examinations should include questions on research design, analysis, and interpretation.

Subspecialty “Fast Tracking”

Candidates who are believed to have demonstrated research competence, either prior to or during residency, such as those with a Ph.D. degree or M.D./Ph.D. degree, may have a part of their training waived. The subspecialty program director, preferably petitioning the Sub-board prospectively, can ask the Sub-board to waive the research competency requirements and to reduce the time of subspecialty training by as much as one year. Candidates for this pathway must have completed three core years of pediatrics in an accredited program in the United
CERTIFICATION REQUIREMENTS

Pediatrics

States or Canada and would not have the option of the Special Alternative Pathway. Furthermore, candidates who receive a waiver by the Sub-board must complete at least two years of training in the subspecialty with at least one year of broad-based clinical training.

Role of the Pediatric Pulmonology Program Director

The role of the pediatric pulmonology program director in the certification process is to verify completion of training and sign the following statement on the Verification of Competence Form:

"I certify that the above named applicant has demonstrated the necessary attitudes, knowledge, clinical judgment, research abilities, technical skills and interpersonal skills and is judged to be fully prepared for independent responsibility as a pediatric pulmonology specialist, to my knowledge, he/she has moral and ethical integrity. The applicant is recommended for examination."

All applicants must have Verification and Evaluation Form(s) on file in the Board office to be admitted to the pediatric pulmonology examination. If an applicant's training is not verified and/or he/she is not recommended for admission, the applicant will be required to satisfactorily complete an additional period of subspecialty residency training in pediatric pulmonology before reapplying. Alternatively, the applicant may appeal to the Credentials Committee of the Sub-board. The Credentials Committee will gather additional information about the applicant and decide if permission should be given to take the examination. For an appeal, the applicant will be asked to submit copies of certificates of satisfactory completion of training. If the applicant has been denied such a certificate, then admission will be refused on the basis of incomplete training. However, possession of such a certificate will not automatically admit the person to the certification process of the Sub-board. Most training certificates attest to the achievement of a minimal level of competence or the fulfillment of an employment contract. Therefore, the program director's statement on the Verification of Competence Form will take precedence over a certificate from the institution. Program directors are urged not to issue certificates of successful completion of training when a resident is deemed not to have met those standards.

The Sub-board requires that the period of training be at least 22 months for those subspecialty residents entering training prior to January 1, 1986, and at least 33 months for those entering training on or after January 1, 1986. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. Applicants beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Each applicant is considered individually and must be acceptable to the Sub-board of Pediatric Pulmonology. The Sub-board recognizes that situations may arise that are not explained by the preceding information. Questions concerning eligibility will be considered by the Credentials Committee of the Sub-board.

Training Programs

At the present time, there are no accredited training programs in pediatric pulmonology. In February 1989, the Accreditation Council for Graduate Medical Education granted the Residency Review Committee for Pediatrics (RRC) the authority to review and accredit subspecialty training programs. Physicians entering subspecialty training in pediatric pulmonology prior to completion of the accreditation process by the RRC are advised to enter those programs in which the director or senior faculty of the program is certified in pediatric pulmonology or possesses equivalent credentials. Once programs are accredited, training requirements must be completed in accredited programs or in other programs acceptable as described in paragraph 2A of the Eligibility Criteria.

Special Requirements for Training Programs

Special Requirements for Training Programs in Pediatric Pulmonology were approved by the Accreditation Council for Graduate Medical Education in February 1989. The Credentials Committee of the Sub-board will be guided by these requirements in evaluating an applicant's qualifications.

Examinations

The purpose of the examination is to determine a candidate's competency to practice the subspecialty. Therefore, emphasis is placed on practical aspects. Since good practice is founded on knowledge and sound use of basic sciences, a candidate must be prepared to demonstrate an adequate grasp of relevant basic information in genetics, embryology, anatomy, physiology, pharmacology, biochemistry, etc.

Examination results will be reported by name and score to the pediatric department chairman and subspecialty program director at the institution(s) where a candidate trained.

Failure in Examinations

Candidates who are unsuccessful on an examination will be admitted for re-examination upon specific application and payment of the re-registration fee.

Candidates who are unsuccessful on an examination must contact the Board office within one year of the date of the examination if they have questions concerning their performance.

Irregularities

The validity of the performance of candidates on the written examination of the Sub-board is secured by every means available. Information concerning the procedure to be taken by the Sub-board in the event of irregular behavior during the written examination, such as giving or obtaining unauthorized information or aid before, during or after the examination, or offering financial or other benefits to a proctor, employee, or agent of the Board or Sub-board, is available by contacting the Board office.

Postponement of Examinations

After the Sub-board has accepted an application, the candidate is expected to take the next examination offered. Candidates who withdraw from the examination after the site assignment/approval letters are prepared will forfeit a portion of the fees paid. Candidates who withdraw after the date set for postponement will forfeit all fees paid. To register for a future examination, payment of the re-registration fee will be required.

Time in Which to Complete Certification Process

Candidates should achieve certification within seven years of their initial acceptance into the certification process for pediatric pulmonology. Candidates who have not been certified within the seven-year time limit must reapply and pass a screening assessment before being readmitted to the certification process.

Applications

The next certifying examination in pediatric pulmonology is scheduled to be given in 1992. Within the next few years, the Board anticipates that the certification examination will be given semi-annually using computer technology. Application forms are available only during
the registration period for a particular examination from the American Board of Pediatrics, 111 Silver Cedar Court, Chapel Hill, NC 27514-1651. Telephone: (919) 929-0461.

A physician who has dyslexia or a serious physical handicap and who wishes to be given special consideration will be required to submit documentation of his/her condition prior to appearing for the examination. Applicants should notify the Board office at the time the initial application is submitted.

Late Applications
A physician whose application or re-registration material is postmarked after the published deadline will be expected to pay an additional fee of $200 before the application or registration material will be processed.

Fees
The cost of certification includes the following fees:

*New application:*
  - $250 processing and evaluation fee
  - $750 examination fee for one examination
  - $1000 TOTAL payment at the time of initial application

*Re-registration:*
  - $300 fee for one examination
  - If an applicant is not approved to take the pediatric pulmonology examination, the $750 examination fee will be refunded. The remaining $250 processing and evaluation fee is not refundable. If the applicant wishes to pursue certification in the future, he/she will be required to complete a new application and submit the full initial application fee again.

Fees are subject to change at any time. Checks (U.S. funds only) should be made payable to the AMERICAN BOARD OF PEDIATRICS.

Certification
A certificate of special qualifications, valid for seven years, is awarded by the American Board of Pediatrics to those candidates who have met the requirements and have satisfactorily passed the examination of the Sub-board. A program for renewal of certification has been developed by the Board. Details may be obtained by writing to the Board office.

The names of those certified are sent to the American Board of Medical Specialties (ABMS) for publication in its Directory of Certified Pediatricians and to various pediatric journals. Scores are not sent to ABMS or the journals.

Revocation of Certificates
All certificates issued by the American Board of Pediatrics are issued subject to the provisions of the certificate of incorporation and the bylaws of the Board. Each such certificate is subject to revocation in the event that:

1. the issuance of such certificate or its receipt by the physician so certified shall have been contrary to or in violation of any of the provisions of the Board's certificate of incorporation or bylaws; or
2. the physician so certified shall not have been eligible to receive such certificate, irrespective of whether or not the fact constituting his/her so ineligible were known to any or all of the members of the Board at the time of the issuance of such certificate; or
3. the physician so certified shall have made any misstatement of fact in his/her application for such certificate or in any other statement or representation to the Board, its members, representatives, or agents; or
4. the physician so certified shall have been convicted by a court of competent jurisdiction of a felony or of any misdemeanor involving, in the opinion of the Board of Directors, moral turpitude in connection with his/her practice of medicine; or
5. the physician so certified shall have had one or more of his/her licenses to practice medicine revoked or shall have been placed on probation by any court or other body having proper jurisdiction and authority; or
6. the physician so certified has repeatedly made statements contrary to sound medical science and practice, raising such fundamental questions about his/her competency.

If the Board obtains probable cause to believe that a certificate should be revoked for any of the reasons set forth above, it may institute proceedings for revocation thereof by mailing written notice to the holder of such certificate that a hearing will be held to determine whether or not the certificate should be revoked. The steps to be taken are outlined in the Rules of Appellate Procedure of the American Board of Pediatrics, which may be obtained by writing to the Board office.

POLICY REGARDING CHEMICAL USE AND DEPENDENCY (INCLUDING DRUGS AND ALCOHOL)

An applicant who has a history of chemical dependency as reported to the American Board of Pediatrics and who submits documentation acceptable to the Board that the disease is known to be under control may apply for and take the certifying examination provided he/she meets the general admission requirements. This policy also pertains to individuals who wish to participate in the Program for Renewal of Certification. If the candidate passes the certifying examination or the examination for certification renewal, he/she will not be issued a certificate unless documentation acceptable to the Board is submitted verifying that the disease has been under control for five years from the time of the most recent occurrence of the disease. If a certificate is issued, it will be effective for a seven-year period from the date the examination was passed.

An applicant who has a history of chemical dependency, as reported to the Board, who cannot submit documentation acceptable to the Board that the disease is under control will not be allowed to take the certifying examination or to participate in the program for renewal of certification.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to consult the American Board of Pediatrics at the above address to ascertain whether the information they have is current.

Certification in Pediatric Rheumatology
The American Board of Pediatrics has established a procedure for certification in pediatric rheumatology.

Eligibility Criteria
1. Certification by the American Board of Pediatrics. Applicants may submit their application prior to taking the certifying examination in general pediatrics. However, an applicant must take and pass the certifying examination before being permitted to take the pediatric rheumatology examination.
2. Subspecialty training or experience. Prior to the examination, the applicant must have COMPLETED one of the following to qualify for admission to the examination:
   a. Three years of full-time broadly based subspecialty residency training in pediatric rheumatology is required of those physicians entering training on or after January 1, 1992, in a program under the supervision of a director who is certified in pediatric rheumatology; or, lacking such certification, possesses equivalent credentials.
   b. Physicians who entered pediatric rheumatology training prior to January 1, 1992, may apply for admission on the basis of their completion of two years of subspecialty residency in pediatric rheumatology.
Pediatrics

For pediatric rheumatology residents who begin training on or after January 1, 1992, it is expected that at the conclusion of training, the subspecialty residents will be able to demonstrate competence both in the clinical skills of the discipline as well as in research. In order for a pediatric rheumatology resident to become certified in the subspecialty, (1) a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical and research competence; (2) the resident must meet the criteria as stated in the Principles Regarding the Assessment of Research Competence; and (3) the resident must pass the certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in the subspecialty areas during the usual general pediatric residency years (PL 1, 2, 3).

All subspecialty training must be completed in the United States or Canada, unless the Credentials Committee of the Sub-board has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. Applicants wishing to obtain such approval should contact the American Board of Pediatrics.

Subspecialty residents completing their pediatric rheumatology training in Canada in programs approved for general pediatrics by the Royal College of Physicians and Surgeons of Canada (RCPSC) will be considered on an individual basis by the Credentials Committee of the Sub-board.

b. Five years of broadly based pediatric rheumatology: Five years in the practice of comprehensive pediatric rheumatology: A minimum of 50% of full-time professional activities must be spent in the practice of pediatric rheumatology to receive credit. These five years of practice should be of such type and quality that they substitute for the clinical exposure one might have encountered during subspecialty residency training. All pediatric rheumatology experience must be accrued before December 31, 1996. No foreign pediatric rheumatology experience will be accepted by the Credentials Committee in fulfillment of the requirements.

c. Subspecialty residency training/pediatric rheumatology experience to equal five years as outlined in either of the methods below:

(1) Those applicants who completed less than 12 months of subspecialty residency training in pediatric rheumatology: may receive credit on a month-for-month basis. For example, a nine-month subspecialty residency would be credited as nine months of pediatric rheumatology experience; this, added to four years and three months of pediatric rheumatology experience would total 60 months or five years. These five years must be accrued prior to December 31, 1996.

(2) Those applicants completing 12 to 23 months of subspecialty residency training in pediatric rheumatology: may receive credit on a two-for-one basis. For example, an 18-month subspecialty residency would be credited as 36 months of pediatric rheumatology; this, added to 24 months of pediatric rheumatology experience would total 60 months or five years. These five years must be accrued prior to December 31, 1996. No credit for partial training will be given for subspecialty residents who begin training on or after January 1, 1992.

Those applicants entering the examination via the pediatric rheumatology experience (B) or subspecialty residency experience (C) routes must make application, be approved for, and sit for the examination given in or prior to 1997. The Credentials Committee will evaluate these applicants based upon the pediatric rheumatology experience accrued during the five years prior to the date of the examination.

Applicants seeking certification in more than one subspecialty area on the basis of practice alone may not apply the same practice period toward fulfillment of the requirements of two different certifying Sub-boards. Applicants may not apply the same training period toward fulfillment of the requirements of two different certifying Boards or Sub-boards.

3. Verification of training and/or experience

a. For those utilizing the subspecialty residency training route, Verification of Competence Form(s) will be required from the director(s) of the applicant's pediatric rheumatology training program(s).

b. For those utilizing the pediatric rheumatology experience route (B), Evaluation Form(s) will be required from the pediatric rheumatology program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now or has been involved in pediatric rheumatology.

c. For those utilizing the combination subspecialty residency training/pediatric rheumatology experience route (C):

   (1) Verification Form(s) will be required from the director of the applicant's pediatric rheumatology training program(s) and

   (2) Evaluation Form(s) will be required from the pediatric rheumatology program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now or has been involved in pediatric rheumatology.

The completed Verification and Evaluation Form(s) should be sent by the program director, chief of pediatrics, or department chairman directly to the American Board of Pediatrics.

Principles Regarding the Assessment of Research Competence

1. Research experience is an essential part of the training of subspecialty.

2. The Residency Review Committee for Pediatrics (RRC) accreditation process must include the evaluation of opportunities for research experience. The Sub-boards should avoid duplicating RRC functions.

3. A requirement for admission to the certifying subspecialty examination must be evidence of productive research participation.

4. Necessary, but not sufficient verification of productive research participation, is a statement by the program director that the applicant has actually participated in research and that in the program director's opinion the applicant has knowledge of and is able to apply the scientific method. When the program director is asked to sign or make this statement, instructions should be precise about what the Sub-board will consider sufficient evidence of participation.

5. Evidence of productive research participation must be submitted.

a. A list of acceptable evidence should allow the majority of applicants to be approved without putting the Sub-board in the position of judging the quality of research efforts.

b. Acceptable evidence should be defined by the Sub-board of Pediatric Rheumatology. Evidence considered in the evaluation of productive research participation could include one of the following:

   (1) First author of a research paper accepted for publication in a peer-reviewed journal deemed acceptable by the Sub-board.

   (2) Submission of a research grant proposal which has been approved by an extramural organization with a critical review process.

   (3) A post-graduate degree in a field of science relevant to the subspecialty.

   (4) A thesis accepted as partial fulfillment of the requirements for a post-graduate degree in a field of science relevant to the subspecialty.

   (5) A research progress report (signed by both the applicant and preceptor) no more than 5 pages in length to include (a) a statement of hypothesis, (b) delineation of methodology,

Pediatrics

Training Programs

At the present time, the RRC has not begun the process of accrediting training programs in pediatric rheumatology. Physicians entering subspecialty training in pediatric rheumatology prior to completion of the accreditation process by the RRC are advised to enter those programs in which the director or senior faculty of the program is certified in pediatric rheumatology or possesses equivalent credentials. Programs in pediatric rheumatology that are accredited by the RCPSC will be considered equivalent to programs accredited by the RRC.

Only those pediatric rheumatology training programs which are operated in association with general comprehensive pediatric programs accredited by the RRC will be considered.

Special Requirements for Training Programs

Special Requirements for Training Programs in Pediatric Rheumatology have been drafted but not yet approved by the RRC or the Accreditation Council for Graduate Medical Education. These special requirements are thought of as suggested criteria for training programs in pediatric rheumatology until the RRC begins to accredit training programs. The Credentials Committee of the Sub-board will be guided by these requirements in evaluating an applicant's qualifications.

Examinations

The purpose of the examination is to determine the candidate's competency in the subspecialty of pediatric rheumatology. Since such competency is founded on knowledge of basic sciences, the candidate must be prepared to demonstrate an adequate grasp of relevant basic information in areas such as genetics, embryology, anatomy, physiology, pharmacology, biochemistry as well as clinical rheumatology. Examination results will be reported by name and score to the pediatric department chairman and subspecialty program director at the institution(s) where a candidate trained.

Failure in Examinations

Candidates who are unsuccessful on an examination will be admitted for reexamination at the next examination upon specific application and payment of the re-registration fee.

Candidates who are unsuccessful on an examination must contact the Board office within one year of the date of the examination if they have questions concerning their performance.

Irregularities

The validity of the performance of candidates on the examination of the Sub-board is secured by every means available. Information concerning the procedure to be taken by the Sub-board in the event of irregular behavior during the examination, such as giving or obtaining unauthorized information or aid before, during, or after the examina-
Pediatrics

tion, offering financial or other benefit to a proctor, employee, or agent of the Board or Sub-board, is available by contacting the Board office.

Postponement of Examinations

After the Sub-board has accepted an application, the candidate is expected to take the next examination offered. Candidates who withdraw from the examination after the site assignment/approval letters are prepared will forfeit a portion of the fees paid. Candidates who withdraw after the date set for postponement will forfeit all fees paid. To register for a future examination, payment of the re-registration fee will be required.

Time in Which to Complete Certification Process

Candidates should achieve certification within seven years of initial acceptance into the certification process for pediatric rheumatology. Candidates who have not been certified within the seven-year time limit must reapply and pass a screening assessment before being readmitted to the certification process.

Applications

A written examination in pediatric rheumatology will be given for the first time in 1992. Within the next few years the Board anticipates that the certification examination will be given semi-annually using computer technology. Application forms are available only during the registration period for a particular examination from the American Board of Pediatrics, 111 Silver Cedar Court, Chapel Hill, NC 27514-1651. Telephone: (919) 929-0461.

A physician who has dyslexia or a serious physical handicap and who wishes to be given special consideration will be required to submit documentation of his/her condition prior to appearing for the examination. Applicants should notify the Board office at the time the initial application is submitted.

Late Applications

A physician whose application or re-registration material is postmarked after the published deadline will be expected to pay an additional fee of $200 before the application or registration material will be processed.

Fees

The cost of certification includes the following fees:

New application:
- $250 processing and evaluation fee
- $750 examination fee for one examination
- $1000 TOTAL payment at the time of initial application

Re-registration:
- $900 fee for one written examination

If an applicant is not approved to take the pediatric rheumatology examination, the $750 written examination fee will be refunded. The remaining $250 processing and evaluation fee is not refundable. If the applicant wishes to pursue certification in the future, he/she will be required to complete a new application and submit the full initial application fee again.

Fees are subject to change at any time. Checks (U.S. funds only) should be made payable to the AMERICAN BOARD OF PEDIATRICS.

Certification

A certificate of special qualifications, valid for seven years, is awarded by the American Board of Pediatrics to those candidates who have met the requirements and have satisfactorily passed the examination of the Sub-board. A program for renewal of certification has been developed by the Board. Details may be obtained by writing the Board office.

The names of those certified will be sent to the American Board of Medical Specialties (ABMS) for publication in its Directory of Certified Pediatricians and to various pediatric journals for publication. Scores are not sent to ABMS or the journals.

Revocation of Certificates

All certificates issued by the American Board of Pediatrics are issued subject to the provisions of the certificate of incorporation and the bylaws of the Board. Each such certificate is subject to revocation in the event that:

1. the issuance of such certificate or its receipt by the physician so certified shall have been contrary to or in violation of any of the provisions of the Board’s certificate of incorporation or bylaws; or
2. the physician so certified shall not have been eligible to receive such certificate, irrespective of whether or not the fact constituting his/her so ineligible were known to any or all of the members of the Board at the time of the issuance of such certificate; or
3. the physician so certified shall have made any misstatement of fact in his/her application for such certificate or in any other statement or representation to the Board, its members, representatives, or agents; or
4. the physician so certified shall have been convicted by a court of competent jurisdiction of a felony or of any misdemeanor involving, in the opinion of the Board of Directors, moral turpitude in connection with his/her practice of medicine; or
5. the physician so certified shall have had one or more of his/her licenses to practice medicine revoked or shall have been placed on probation by any court or other body having proper jurisdiction and authority; or
6. the physician so certified has repeatedly made statements contrary to sound medical science and practice, raising such fundamental questions about his/her competency.

If the Board obtains probable cause to believe that a certificate should be revoked for any of the reasons set forth above, it may institute proceedings for revocation thereof by mailing written notice to the holder of such certificate that a hearing will be held to determine whether or not the certificate should be revoked. The steps to be taken are outlined in the Rules of Appellate Procedure of the American Board of Pediatrics, which may be obtained by writing to the Board office.

Policy Regarding Chemical Use and Dependency
(Including Drugs and Alcohol)

An applicant who has a history of chemical dependency as reported to the American Board of Pediatrics and who submits documentation acceptable to the Board that the disease is known to be under control may apply for and take the certifying examination provided he/she meets the general admission requirements. This policy also pertains to individuals who wish to participate in the Program for Renewal of Certification. If the candidate passes the certifying examination or the examination for certification renewal, he/she will not be issued a certificate unless documentation acceptable to the Board is submitted verifying that the disease has been under control for five years from the time of the most recent occurrence of the disease. If a certificate is issued, it will be effective for a seven-year period from the date the examination was passed.

An applicant who has a history of chemical dependency, as reported to the Board, who cannot submit documentation acceptable to the Board that the disease is under control will not be allowed to take the certifying examination or to participate in the program for renewal of certification.
It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to consult the American Board of Pediatrics at the above address to ascertain whether the information they have is current.

(EDITOR'S NOTE: These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Physical Medicine and Rehabilitation to ascertain whether the information they have is current.)

General Requirements for Certification

A. Graduates of Educational Institutions in the United States and Canada.

1. Graduation from a medical school approved by the Liaison Committee on Medical Education, or graduation from a Canadian medical school approved by the Canadian Medical Association, or graduation from an osteopathic medical school approved by the American Osteopathic Association.

2. Satisfactory completion of the requirements of the Board for graduate education and experience in physical medicine and rehabilitation as set forth below.

3. Satisfactory compliance with rules and regulations of the Board pertaining to the completion and filing of the application for examination and the payment of required fees.

B. Graduates of Educational Institutions NOT in the United States and Canada.

1. Graduation from a school which, in the opinion of the Board, offers medical education equivalent to a medical school approved by the Liaison Committee on Medical Education.

2. Possession of a valid certificate from the Educational Commission for Foreign Medical Graduates (ECFMG) and, optionally, a certificate from the Federation Licensing Examination (FLEX), or the Fifth Pathway. Foreign medical graduates (both alien and U.S. citizens) will be expected to complete the ECFMG examination format, FMG EMS (Foreign Medical Graduate Examination in Medical Science), including basic and clinical examinations, and, when indicated, English proficiency, or NBME parts I, II, or III. This is required by the Accreditation Council on Graduate Medical Education (ACGME) before a resident can enter accredited graduate medical education programs in the United States.

3. Satisfactory completion of the Board's requirements for graduate education and experience in physical medicine and rehabilitation as set forth below.

4. Satisfactory compliance with rules and regulations of the Board pertaining to the completion and filing of the application for examination and the payment of required fees.

Physical Medicine and Rehabilitation

C. Having a full and unrestricted license to practice in one or more of the 50 United States or Puerto Rico, or holding the Federation Licensing Examination (FLEX) certificate, may be supportive, but not required, of an application submitted by an American and/or non-American graduate.

Residency Training Requirements

Applicants for the certifying examinations must have satisfactorily completed 48 months (4 years) of training in a physical medicine and rehabilitation residency approved by the ACGME on recommendation of the Residency Review Committee for Physical Medicine and Rehabilitation. The program must include 36 months of training in physical medicine and rehabilitation. Twelve of the 48 months of training should consist of a coordinated program of experience in fundamental clinical skills which includes six months in family practice, internal medicine, pediatrics, or general surgery, or a combination of these. The other six months of the year of experience may include no less than one month in any of the following specific categories: cardiology, radiology, neurology, urology, rheumatology, nephrology, vascular medicine, pediatrics, pulmonary medicine, neurosurgery, orthopedic surgery, family practice, general surgery, general internal medicine, emergency medicine, psychiatry, oncology, critical care medicine, and anesthesiology.

The program director and the Credentials Committee of the Board, at the beginning of the residency, will make the decision regarding the acceptability for credit for the year of non-physical medicine and rehabilitation training of an ACGME-approved year of residency in family practice, internal medicine, pediatrics, neurology, orthopedics, or general surgery or an accredited "transitional" year as defined by the ACGME.

This format is mandatory for all residents who enter training in 1985 or subsequently. In some instances, three years of physical medicine and rehabilitation residency may be acceptable on recommendation of the program director, with one year of credit being granted on the basis of training criteria described above, such as a nonintegrated transitional year or other residency training.

Credit for Other Specialty Training

Candidates who have had one year or more of residency training (up to and including certification) in a residency approved by the ACGME or by the Royal College of Physicians and Surgeons of Canada or an osteopathic internship approved by the American Osteopathic Association may receive up to 12 months of non-physical medicine and rehabilitation training credit on recommendation of the program director and the discretion of the Board. However, completion of 36 months of the physical medicine and rehabilitation training requirement is mandatory. The maximum of 12 months of training credit will be considered for approval by the Board only upon recommendation of the certification program director.

No credit will be given towards shortening the basic required four year program for internships; for non-ACGME approved residencies or fellowships; for Fifth Pathway or in a United States AMA designated training institution; or for hospital house physician experience.

A resident entering or beginning the required four year program in physical medicine and rehabilitation with previous approved graduate training or educational experience may qualify for an institutional appointment at the second year level. However, such an appointment may not be interpreted to mean that the resident is in the second year of a physical medicine and rehabilitation residency. Such a resident will be considered by the Board to be in the first year of the required four year residency training program as stated above, unless other arrangements are made by the program director and the specialty Board.
Physical Medicine and Rehabilitation

Essentially all of the required training and experience as stated above must have been taken in the United States or Canada. However, a candidate who received graduate medical education beyond an internship in a foreign country may, at the discretion of the Board, and recommended by the program director, be granted limited credit for such training but not more than six months.

Requirements for Admissibility to Part I of the Board Examination

To be admissible to Part I of the Board examination, candidates are required to complete satisfactorily at least 48 months of postgraduate residency training of which at least 36 months are spent in supervised education and clinical practice in physical medicine and rehabilitation and 12 months in internal medicine or an acceptable alternative in an ACGME accredited training program.

Satisfactory completion of educational and training requirements in force at the beginning of the resident's training in an accredited program will be considered acceptable for application for admissibility to the certifying examination. Residents in approved physical medicine and rehabilitation training programs in Canada, on satisfactory completion of all the requirements for certification in that country, may apply for admissibility to Part I of the American Board.

Final admissibility is contingent upon receipt of the final-year evaluation by the program director by May 1 in the examination year.

If a resident is placed on probationary status during the final year of his or her residency program, this status must be rescinded by the program director before May 1 for the resident to be admissible.

Requirements for Admissibility to Part II of the Board Examination

At least a full year of broad-based clinical practice of physical medicine and rehabilitation following completion of residency training is required. The clinical practice should provide evidence of professional, ethical, and humanitarian standards attested to by two fellows of the American Academy of Physical Medicine and Rehabilitation. In rare instances in which a physiatrist is not geographically available, two licensed physicians may support the candidate’s application for Part II.

Alternatively, a candidate may take Part I and II together if all residency training and the practice time requirement are completed. However, if the candidate fails Part I, Part II will not count or be recognized in any way.

An optional fifth year in a physical medicine and rehabilitation residency which includes at least six months of advanced clinical practice of physical medicine and rehabilitation with essentially full patient responsibility, and also includes teaching experience, plus opportunities for time in research or relevant clinical or basic science electives may qualify such resident for admissibility to Part II of the certifying examinations upon the recommendation of the training program director. An optional fifth year may be valuable for those anticipating a full or part time academic career.

Dual Specialty Certification

For those desiring to pursue double specialty certification the Board will participate with the other Boards provided there is completion of 36 months of accredited training in general comprehensive physical medicine and rehabilitation. The proposed program agreed to by the respective training program directors should be submitted to both Boards for approval before or during the first quarter of training. Admissibility to Part I of the certification examinations may be sought at the end of training.

Special Agreement Between the American Board of Pediatrics and The American Board of Physical Medicine and Rehabilitation

There exists a special agreement between the American Board of Pediatrics (ABP) and the American Board of Physical Medicine and Rehabilitation (ABPM&R) whereby a physician interested in pediatric rehabilitation can qualify for admission to the certifying examinations of both Boards. The residency programs may be designed to be completed in approximately 60 months. The non-PM&R 12-month segment of the four-year PM&R residency will be credited on the basis of satisfactory completion of the regular first year of pediatric residency.

The American Board of Pediatrics requires a minimum of 36 months of general comprehensive pediatric training with six months' credit for pediatric rehabilitation within the PM&R training. The American Board of Physical Medicine and Rehabilitation requires a minimum of 36 months accredited PM&R residency with six months' credit for related rotations during the pediatric training. Six months of full-time equivalent (FTE) of pediatric rehabilitation is required.

It is recommended that all training be completed at one academic institution but any deviation will require prospective approval by both Boards. At the beginning of the residency, both proposed individual programs must be submitted in detail to the Credentials Committee of each specialty Board for approval. When two separate institutions are involved, there should be evidence of adequate coordination to provide an appropriate educational experience. Vacation is shared pro rata between the training time spent in pediatrics and physical medicine and rehabilitation.

Special Agreement Between the American Board of Internal Medicine and the American Board of Physical Medicine and Rehabilitation

There exists a special agreement between the American Board of Internal Medicine (ABIM) and the American Board of Physical Medicine and Rehabilitation (ABPM&R) whereby a prospective resident interested in dual specialty certification in Internal Medicine and in Physical Medicine and Rehabilitation can qualify to apply to admission to the certifying examinations of each Board by satisfactory completion of a preplanned coordinated program which could be designed to be completed in a minimum of 60 months.

The non PM&R 12-month segment of the 4-year PM&R residency concerned with basic fundamental clinical skills will be credited on the basis of satisfactory completion of the regular first year of internal medicine residency. In addition, the ABPM&R requires a minimum of 36 months of accredited PM&R residency. It would be agreed that up to six months of pertinent and related internal medicine rotations of one to three months in such areas as cardiology, endocrinology, cardiovascular, or pulmonary could be accepted for elective credit in the 36-month PM&R segment. The ABPM&R requirements for 12 months of clinical practice, for admissibility to Part II of the Board examination, can be met by documented evidence that at least 50% of this practice is devoted to PM&R.

The 3-year internal medicine residency requirement could be in part met by ABIM recognizing six months credit to PM&R residency training involving PM&R management of patients with internal medicine related problems such as occur in those with various rheumatologic, cardiovascular, pulmonary, stroke and oncologic conditions.

It is recommended that all training be completed at one academic institution, however, any deviation will require prospective approval by both Boards. At least before the end of the R-1 level of training in either
specify, each Board would prospectively approve detailed curricular plans for a given trainee submitted by the two program directors. When two separate institutions are involved, there should be evidence of adequate coordination to provide an appropriate educational experience. Vacation is shared pro rata between the training time spent in Internal Medicine and in Physical Medicine and Rehabilitation.

Application

The application form which must be submitted by a candidate applying for the examination leading to certification can be obtained only by writing to the Executive Director of the Board. The completed application shall contain a record of the candidate’s undergraduate and postgraduate training and a copy of the medical degree diploma or certificate, the program director’s statement that the candidate has or will have satisfactorily completed an approved graduate program, other graduate study, hospital staff appointments, teaching positions, length of time in a practice which has been limited to physical medicine and rehabilitation, medical papers published, and any other information the candidate deems relevant to the determination of his admisibility for examination.

In addition, there must be submitted with the application the names of three physicians or other physicians to whom the Board may write for professional and character references. At the option of the applicant, he or she may include the names of any additional physicians. The candidate will submit to the program director a form requesting him/her to rate the professional ability of the applicant; which will promptly return to the Board office. No decision regarding admisibility to the examination will be made until the physicians from whom references are requested have replied.

All information submitted to the Board by the physician from whom a reference has been requested shall remain confidential and will not be disclosed to the candidate without the permission of the said physician. Strict confidentiality of references submitted is required to assure that the Board receives complete and accurate evaluations of all candidates.

A candidate who plans to take Part I only must submit a fee of $625, $200 of which is a processing fee and not refundable or reexamined. The fees must accompany the application. The candidate who is applying for Part II must write a letter of application which includes a brief description of his/her year of broadly based clinical practice and send an examination fee of $425, and must also submit a statement from a physician, preferably a Board certified physiatrist, verifying that the candidate has practiced physical medicine and rehabilitation full-time for one year. A candidate who plans to take both Parts I and II, initially the same year, must send with the application, the fee of $1050. Two hundred dollars ($200), as heretofore mentioned, is an evaluation fee and not refundable. Fees for re-examination are $425 for either Part I or II, or if both Parts I and II are retaken the same year, the fee is $900.

1. The completed application form or letter of application, as applicable and appropriate fee must be submitted by November 15 of the year before the scheduled examination. A penalty fee of one hundred dollars ($100) will be required before consideration of applications post-marked after November 15 and before December 15. Once a candidate is declared admissible, fees are forfeited if the candidate withdraws for any reason or does not appear for the examination.

The candidate must have completed his graduate education or clinical practice requirements on or before August 31 following the scheduled examination date for which he has applied in order to have his application considered for the examination of that year. Except as hereafter provided, no fees paid hereunder will be refunded. Only in the event that a candidate withdraws his application prior to the meeting of the Board to act thereon or in the event that a candidate is declared not admissible to the examination, will the Board return to the candidate the refundable portion of his fee.

The Board is a non-profit organization and the fees of the candidates are used solely for defraying the actual expenses of the Board. The members of the Board serve without remuneration. The Board reserves the right to change the fees when necessary.

Designation of Admissibility

Board admissible is a term used by the Board to define the status of the candidate who has been accepted by the Board to take the examination for which the candidate has applied; designation of "Board admissible" does not continue beyond the date such examination is given, regardless of results.

A. For those candidates who have not previously applied or who have previously applied and withdrawn their application or who have previously applied and have been declared not admissible, the procedures required of candidates to be designated Board admissible are as follows:

1. Timely filing of the application form and educational credentials with the Executive Director of the Board by the applicants.
2. Payment of the fee for the examination by the applicant.
3. Receipt of the program directors and other requested references.
4. Transmission of a letter of permission from the Executive Director of the Board to the candidate verifying that the applicant has fulfilled all requirements, and by Board action has been declared admissible.

B. For those candidates who are reapplying for Part I, having failed Part I, or who are applying for Part II, having successfully completed Part I, or who are reapplying for Part II, having failed Part II but who have successfully passed Part I, the procedures required of candidates to be designated Board admissible are as follows:

1. Submitting a letter of reapplication for Part I of the examination by the applicant to the Executive Director of the Board or, as requested, the resubmission of an application form.
2. Submitting a letter of application for Part II of the examination by the applicant to the Executive Director of the Board. The letter should contain a statement describing the one year of full-time broadly based clinical practice.
3. Payment of the examination fee by the applicant.
4. At least a full year of broadly based clinical practice following completion of residency training is required. The clinical practice should provide evidence of professional, ethical, and humanistic standards attested to by two Fellows of the American Academy of Physical Medicine and Rehabilitation. In rare instances, the Board may consider the experience of a candidate who has not met the full-time requirements of Part II.
5. Transmission of a letter of permission from the Executive Director of the Board to the candidate verifying that the applicant has fulfilled all requirements, and by Board action has been declared admissible.

Following the establishment of Board admisibility, the candidate will be notified of the time and place for the examination.

A candidate who fails Part I or Part II or both Parts of the examination may re-apply for admisibility for re-examination, if done before November 15th of the year before the scheduled examination.

Absence from Training

The Board stipulates that a resident should not be absent from the residency training for more than six weeks yearly. Any leave time or
Physical Medicine and Rehabilitation

absence beyond six weeks would need to be made up by arrangement with the program director. "Leave time" includes sick leave, vacation, maternity leave, leave for locum tenens, clinical trips or work in another institution that is not an ACGME accredited residency. Leave time or vacation may not be accumulated to reduce the overall duration of training. Institutional policies regarding absences will be respected.

Forfeiture of Fees

Once a candidate is declared admissible, the fees are forfeited if the candidate withdraws for any reason or does not appear for the examination.

Examinations

As part of the requirements for certification by the American Board of Physical Medicine and Rehabilitation, candidates must demonstrate satisfactory performance in an examination conducted by the Board covering the field of physical medicine and rehabilitation.

The examination for certification is given in two parts. Part I is written, Part II is oral.

Part I (written) may be taken after the satisfactory completion of the specialized graduate education required by the Board outlined above.

Part II (oral) may be taken only after one year of full-time broadly based practice in physical medicine and rehabilitation, following residency training.

In the event a candidate taking both Part I and Part II in the same year fails Part I of the examination, results of Part II shall not be considered or disclosed.

Both the written and oral examinations will cover certain aspects of the basic sciences as well as clinical physical medicine and rehabilitation. Those basic sciences will include:

1. Anatomy, including kinesiology and functional anatomy.
2. Physics, related to the field.
3. Physiology, including physiology of nerve, muscle, and bone and physiologic effects of the various physical agents used in physical medicine and rehabilitation.
4. Pathology, particularly nervous system and skeletal.
5. Other fundamental sciences: The applicant may be examined concerning his knowledge of other subjects related to physical medicine and rehabilitation.

The clinical aspects will include:

1. Those diseases and conditions that come within the field of physical medicine and rehabilitation including those of children. These include various rheumatic diseases; neuromuscular diseases; cerebral and spinal cord injuries and diseases (e.g. cerebral vascular accidents, postoperative sequelae of surgery of the brain and spinal cord, cerebral palsy and paraplegia) and musculoskeletal diseases, including the large group of traumatic and orthopedic conditions.
2. The clinical use of such physical agents as heat, water, electricity, ultraviolet radiation, massage, exercise, and rehabilitation techniques.
3. Diagnostic procedures including electromyography and electrodiagnosis.
4. A knowledge of the roles of allied personnel within or associated with the field of physical medicine and rehabilitation, such as the physical therapist, occupational therapist, clinical psychologist, speech pathologist and therapist, medical social worker, and vocational counselors; and the ability to coordinate the services of such personnel.
5. An understanding of the basic principles of physical medicine and rehabilitation, and the ability to prescribe and supervise specific treatment to be executed by allied health personnel.

Method of Examination

Part I and Part II of the Board examination are given once each year, usually in May or June, at such time and place as the Board shall designate.

Part I is a written examination. This examination is divided into morning and afternoon periods of approximately three hours each. The questions are designed to test the candidate's knowledge of basic sciences and clinical management as related to physical medicine and rehabilitation, and will be in the form of objective testing.

Part II is an oral examination. The oral examinations are given by the members of the Board with the assistance of selected guest examiners. Candidates will be expected to present in a concise, orderly fashion evidence of their proficiency in the management of various clinical conditions which come within the field of physical medicine and rehabilitation. During the oral examination, questions will be asked about diagnostic procedures, therapeutic procedures and patient management. The candidate should be prepared to demonstrate his ability to interpret roentgenologic, electrodiagnostic and other material related to patient management. The candidate should demonstrate familiarity with the literature of basic and clinical research. Conciseness and clarity of statement is expected. Evidence of the maturity of the candidate in a clinical procedure and of factual knowledge will be sought.

Unethical Behavior

The Board believes that the ethics of candidates for certification is a proper matter for its concern. Scores on the Part I examination may be invalidated for reasons of irregular behavior that indicates cheating. Reports of irregular behavior may be checked by statistical methods, and if they are confirmed, sanctions may be imposed. If the examination score is invalidated because of irregular behavior, the Board will not consider the candidate's application for a period of at least three years. A repeat application and Part I examination fee will be required.

Certificate

Upon approval of the candidate's application and successful completion of the examinations, the Board will grant a certificate to the effect that the candidate has met the qualifications required by the Board for the specialty of Physical Medicine and Rehabilitation. The recipient of a certificate shall be known as a certificant or a diplomate of the American Board of Physical Medicine and Rehabilitation.

The Board will issue ten-year time-limited diplomate certificates in 1993 and subsequently. Recertification procedures and requirements are to be determined and will be published four years prior to the first anticipated recertification in 2002. Certification issued prior to 1993 will have no time-limited stipulations nor will there be requirements for recertification. Residents entering a training program in 1988 and subsequently are hereby informed and must be aware regarding time-limited certification beginning in 1993.

A certificate granted by this Board does not of itself confer or purport to confer any degree or legal qualifications, privileges, or license to practice physical medicine and rehabilitation. The Board does not limit or interfere with the professional activity of any duly licensed physician who is not certified by this Board. Privileges granted physicians in the practice of physical medicine and rehabilitation in any hospital or clinic are the prerogatives of that hospital or clinic, not of this Board.

The chief aim of the Board is to establish the training requirements, to standardize qualifications for specialists in physical medicine and rehabilitation and to certify as specialists those who voluntarily appear before the Board for such recognition and certification, according to its regulations and requirements, and thereby provide assurance to the

(EDITOR'S NOTE: These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Plastic Surgery to ascertain whether the information they have is current.)

Pre-requisite Training

A minimum of five (5) years prerequisite and requisite training in plastic surgery will be required, as detailed on following pages.

Preliminary Evaluation of Pre-requisite Training

As noted at the beginning of this booklet, preliminary evaluation of pre-requisite training by the Board is required prior to the initiation of residency training in plastic surgery. This simple preliminary step will prevent later disappointment. It is the responsibility of all prospective trainees in plastic surgery to secure this evaluation. Each prospective trainee should obtain a Preliminary Evaluation of Training form from the office of the Board either prior to or immediately following the completion of the pre-requisite training described below for the evaluation of his or her pre-requisite training.

Directors of accredited residency training programs in plastic surgery must require all prospective trainees to have an official evaluation and approval of their pre-requisite training by the American Board of Plastic Surgery, Inc. before they begin training.

Approval for residency training in plastic surgery will be provided to those individuals who clearly meet the Board's stated requirements. Further information for detailed credential review will be obtained on all other individuals where training was in other than accredited programs. Official evaluations will be made by the Committee on Credentials and Requirements. Individual officers or members of the Board cannot and will not make such estimates or rulings. It should be emphasized that the answers to many questions require a decision by one or more of the committees of the Board. This applies particularly to evaluation of training and questions of admissibility. Decisions are referred to the entire Board at the next scheduled Board meeting. The process of reaching a final decision may require several months, since the full Board meets only twice annually.

The Board will issue neither a letter verifying pre-requisite training nor an Application for Examination and Certification form until the Preliminary Evaluation of Training form has been received and approved.

Licensure

All candidates must have a currently valid registered full and unrestricted license to practice medicine in a state, territory, or possession of the United States or by a Canadian province, and must continue to be licensed throughout the certification process. A temporary limited license such as an educational, institutional, or house permit is not acceptable. A photocopy of an active registration card bearing a date which will be valid at the time of examination(s) must be submitted by the candidate.

For admission to the Certifying Examination, candidates must be actively engaged primarily in the practice of plastic surgery and hold active operating privileges in a hospital approved by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO).

Commissioned officers of the medical service of the armed forces of the United States or Canada on active duty need not present evidence of current registration of licensure, but must provide appropriate information regarding their status.

Undergraduate Medical or Osteopathic Education

Before beginning pre-requisite training, candidates must have graduated from an accredited school of medicine in the United States or Canada which grants an MD degree, or from an osteopathic school accredited by the American Osteopathic Association. Graduates of medical schools in other countries must either (1) be certified by the ECFMG, or (2) have completed a Fifth Pathway program in an accredited school of medicine in the United States or Canada.

Graduate Education in Surgery

Effective July 1, 1986, the pre-requisite graduate education in surgery is as follows.

For U.S. or Canadian Doctors of Medicine

A candidate with an MD degree from the United States or Canada must have completed one of the following:

1. A minimum of three years of clinical training with progressive responsibility in the same program in general surgery. Rotating internships will not be accepted in lieu of a clinical year in general surgery. This program must be approved by the Residency Review Committee for Surgery and accredited in the United States by the Accreditation Council for Graduate Medical Education (ACGME) or in Canada by the Royal College of Physicians and Surgeons for full training. The minimum of three years of clinical training with progressive responsibility in the same program in general surgery must be completed before the candidate enters a plastic surgery residency. The general surgery program director must verify in writing the successful completion of a minimum of three years of progressive residency in his or her program. Each case will be evaluated by the Board on its own merits.

OR
Plastic Surgery

2. An accredited residency training program in orthopaedic surgery. Prospective candidates may initiate residency training in plastic surgery following satisfactory completion of the entire course of training in the United States or Canada as prescribed for certification by the American Board of Orthopaedic Surgery. The satisfactory completion of orthopaedic training must be verified in writing by the orthopaedic surgery program director. (To be granted admission to the examinations of the American Board of Plastic Surgery, Inc. prospective candidates will be required to have successfully completed the Canadian Orthopaedic Fellowship Examination if their orthopaedic training was taken in Canada.)

OR

3. Certification by the American Board of Otolaryngology. Prospective candidates may initiate residency training in plastic surgery following satisfactory completion of the entire course of training as prescribed for certification by the American Board of Otolaryngology, but they may sit for the examination(s) of The American Board of Plastic Surgery, Inc. only after becoming certified in that specialty. Satisfactory completion of training must be verified in writing by the appropriate program director.

For Doctors of Osteopathy

Effective July 1, 1984, a doctor of osteopathy must satisfactorily complete an entire general surgery program approved by the Residency Review Committee for Surgery and accredited by the Accreditation Council for Graduate Medical Education (ACGME), including the year of senior responsibility. The minimum of three years of clinical training with progressive responsibility in the same program in general surgery must be completed before the candidate enters a plastic surgery residency. The program director must verify in writing the successful completion of the entire program in general surgery.

For Doctors of Medicine with Medical Degrees Outside of the U.S. or Canada

Effective July 1, 1986, candidates entering the PGY1 level in general surgery must satisfactorily complete an entire program in general surgery approved by the Residency Review Committee for Surgery and accredited in the United States by the Accreditation Council for Graduate Medical Education (ACGME) or in Canada by the Royal College of Physicians and Surgeons for full training, including the year of senior responsibility. The entire general surgery residency program must be completed before the candidate enters a plastic surgery residency. The program director must verify in writing the successful completion of the entire program in general surgery.

The Board grants no credit for training/residency and/or experience in disciplines other than those named above.

Graduate Education in Plastic Surgery

Training in plastic surgery for not less than two years is required, and the final year must be at the senior level. Prospective candidates entering a plastic surgery residency accredited for three years of training must complete the entire three years, with one year of senior responsibility.

Training in plastic surgery must be obtained in either the United States or Canada. The American Board of Plastic Surgery, Inc. recognizes training in those programs in the United States that have been approved by the Residency Review Committee for Plastic Surgery and accredited by the Accreditation Council for Graduate Medical Education (ACGME) or those programs in Canada approved by the Royal College of Physicians and Surgeons of Canada.

Non Approved Residencies

No other residencies in either the United States or Canada or other countries are acceptable in lieu of these specified above. This in no way implies that quality training cannot be acquired elsewhere, but the Board has no method of evaluating the quality of such programs and must be consistent in its requirements.

Content of Training

A candidate must hold positions of increasing responsibility for the care of patients during these years of training. For this reason, major operative experience and senior responsibility are essential to surgical education and training. An important factor in the development of a surgeon is an opportunity to grow, under guidance and supervision, by progressive and succeeding stages to eventually assume complete responsibility for the surgical care of the patient.

It is imperative that a resident hold positions of increasing responsibility when he or she receives training in more than one institution, and one full year of experience must be at the senior level. The normal training year for the program must be completed. No credit is granted for part of a year of training.

The Board considers a residency in plastic surgery to be a full-time endeavor and looks with disfavor upon any other arrangement. The minimum acceptable training year is 48 weeks. Should leave of absence exceed four weeks per annum and result in overlap or duplication of resident positions, specific documentation that this irregular training arrangement was approved by the Residency Review Committee for Plastic Surgery, must be provided to the Board by the program director.

Training in plastic surgery must cover the wide field of plastic surgery. It should include experience in both the functional and aesthetic (cosmetic) management of congenital and acquired defects of the head and neck, trunk, and extremities. Sufficient material of a diversified nature should be available to prepare the trainee to pass the examination(s) of the Board after the prescribed period of training. If the available material on a service is inadequate, the program director may correct the deficiency by establishing an affiliation with one or more surgeons on other services within that hospital or by regular rotation of residents on other approved affiliated services in order that a broad experience might be obtained. The trainee should be provided an opportunity to operate independently on suitable cases under more remote supervision.

This period of specialized training should emphasize the relationship of basic science—anatomy, pathology, physiology, biochemistry, and microbiology—to surgical principles fundamental to all branches of surgery and especially to plastic surgery. In addition, the training program must provide in-depth exposure to the following subjects: the care of emergencies, shock, wound healing, blood replacement, fluid and electrolyte balance, pharmacology, anesthesiology, and chemotherapy.

Accredited Residency Programs

Information concerning accredited training programs may be found in the Directory of Graduate Medical Education Programs ("the green book") published by the American Medical Association (AMA) under the aegis of the Accreditation Council for Graduate Medical Education. Copies of this directory are available at many medical schools and libraries. Or the candidate may order "the green book" directly from the AMA by calling 312-464-0183 or writing to AMA Order Department, PO. Box 1946, Chicago, IL 60610-0946. Candidates should inquire of the office of the Board before initiating training if there is any question whether a residency is accredited.
The American Board of Plastic Surgery, Inc. does not inspect or approve residencies. The Residency Review Committee for Plastic Surgery (RRC) inspects and makes recommendations for or against approval of a residency training program in plastic surgery only after the director of the residency has filed an application for approval with the secretary of the Residency Review Committee for Plastic Surgery, 515 North State Street, Chicago, IL 60610. The RRC consists of nine members, three representatives from each of the following: the American Board of Plastic Surgery, Inc., the American College of Surgeons, and the American Medical Association.

Neither the Board nor its individual members can be responsible for the placement of applicants for training. The Board does not maintain a list of available openings in programs. Prospective candidates seeking accredited training in plastic surgery should correspond directly with the directors of those training programs in which they are interested.

For additional information candidates may contact Director, Registry of Residency, Plastic Surgery Academic Advisory Council, University of Louisville, Division of Plastic Surgery, Louisville, KY 40292.

Applying for Examination and Certification

The prime purpose of the Board is to pass judgment on the education, training, and knowledge of broadly competent and responsible plastic surgeons. Certification by the Board indicates qualification of a specialist at a superior level of excellence. The quality of training of a surgeon, as shown by his or her successful completion of the Board examinations, will be reflected in his or her ability to achieve good results in practice.

In order to be admitted to the examinations leading to Board certification, a candidate should submit to the office of the Board a formal Application For Examination and Certification immediately following completion of his or her residency training in plastic surgery. The Board will issue no letters attesting to admittance for its examinations to any person, institution, or organization until this formal application, along with the required supporting documents, has been received and approved.

The Application Process

Prospective candidates desiring certification by the American Board of Plastic Surgery, Inc. should write to the office of the Board immediately following completion of required training in plastic surgery requesting application materials. This first contact with the Board should be made by writing to the office of the Board during the last two months of residency. At this time, an Application for Examination and Certification form will be provided.

Prospective candidates who do not contact the Board Office within five (5) years after completion of their residency in plastic surgery will not be considered for admission to the examinations leading to Board certification.

Deadline

You must complete the application form and return it to the office of the Board as soon as possible. Applications for admission to the upcoming Qualifying (written) Examination, to be given in the spring of the following year must be received or postmarked on or before December 1st.

Required Signatures

The application must be completed accurately and signed by you. It must also be signed twice by your program director, once acknowledging the completion of your residency in plastic surgery and once recommending you for examination. Accompanying forms must be completed properly, and the required photographs must be provided.

Please Note: For plastic surgery residents completing their residency on June 30, 1991 and thereafter, a STANDARD FORM will be provided by the Board to program directors for completion at the end of the RRC for Plastic Surgery prescribed duration of the training program for each trainee. This form shall require two signatures by the program director: one affirming that the trainee has completed the program and a second that the trainee is recommended for admission to the examinations for certification.

If the program director elects not to sign either statement, he or she shall state in writing, the reasons and basis why he or she makes such decision.

This Standard Form shall be completed and returned to the Board Office within thirty days of the completion, by the trainee, of the prescribed duration of the program.

Failure on the part of the program director to complete this assessment and documentation shall be conveyed to the RRC for Plastic Surgery as a reflection of the abrogation of a responsibility of the program director.

Fees

The required registration fee must also accompany the application.

Letters of Recommendation

It is your responsibility to obtain letters of recommendation as requested in the application. If you have completed training in more than one program in plastic surgery, the director of each such program must verify completion of that program and recommend you for examination. Additionally, the Board may require favorable evaluations and recommendations from other surgeons.

Examination of Candidates with Dyslexia

The Board has special requirements and procedures for the examination of dyslectics. If you feel it necessary to make use of those requirements and procedures, you MUST make that fact known to the Board at the time your application is filed. If your application is approved, a copy of the Board's policy in this regard will be mailed to you with the notification of approval.

Notification

If your application is approved, you will be notified of the time and place of the Qualifying Examination. If it appears that the stated requirements have not been met, further details will be requested, and the information will be reviewed by the Committee on Credentials and Requirements. The Committee on Credentials and Requirements meets only twice yearly and decisions are not rendered at other times.

Until the application has been received and approved, the Board will not notify any person, institution, or organization that a candidate is admissible to examination.

General Requirements

The following requirements for admittance are in agreement with those promulgated by the American Board of Medical Specialties.

1. The Board will accept only those persons whose major professional activity is limited to the field of plastic surgery.

2. Moral and ethical fitness must be satisfactory to the Board and in conformity with the Code of Ethics of the American Society of Plastic and Reconstructive Surgeons, Inc. Practices which do not conform
Plastic Surgery

therewith may result in rejection of application or in deferral of examination until such matters have been resolved satisfactorily.

The Board may deny a candidate the privilege of sitting for an examination, or may refuse issuance of a certificate, if it is found by additional disclosures or a recent change in status that the candidate no longer meets the general or professional requirements.

Professional Requirements

The Board considers the requirements detailed in Prerequisite Training and Graduate Education in Plastic Surgery to be minimal. Candidates are encouraged to take advantage of broadening experiences in other fields.

The Board reserves the right:
1. To request lists of operations performed solely by the candidate for one or more years.
2. To request special and extra examinations, written or oral and practical.
3. To request any specific data concerning the candidate that may be deemed necessary before making a final decision for certification.
4. At the Board's discretion it may give consideration to exceptional individuals who did not conform to all of the stipulations concerning the prerequisite and requisite training requirements.

Admissibility to the Examinations

Each qualified candidate shall be entitled to take an examination or examinations as required by the Board.

All candidates must comply with the Board regulations in effect for the year in which the examination is taken regardless of the time when the original application was approved.

All candidates taking an examination of The American Board of Plastic Surgery, Inc. must complete the entire examination.

Certification by another medical or surgical specialty Board does not exempt a candidate from any part of the examination(s).

Qualifying Examination (Written)

If you are a candidate approved for admission to the examination, you may take the Qualifying Examination immediately after successful completion of your residency in plastic surgery. However, those candidates approved after July 1, 1986 must have passed the Qualifying Examination and have been in the independent practice of plastic surgery for at least a two-year period before becoming admissible to the Certifying Examination. Candidates beginning the independent practice of plastic surgery on July 1, 1989 and thereafter, must have passed the Qualifying Examination and have been in the independent practice of plastic surgery for at least a two-year period, in the same location, before becoming admissible to the Certifying Examination.

The two years of practice need not be consecutive but the candidate must be in practice during the twelve-month period required for completion of the case list. Currently, that period ends on February 1st of the same year as the Certifying Examination.

If a candidate has not passed the Qualifying Examination within seven (7) years after notification of admissibility, or if a candidate fails the Qualifying Examination five (5) times, he or she will no longer be a candidate for examination.

Certifying Examination (Oral)

Candidates approved for admission to the examinations of The American Board of Plastic Surgery, Inc., prior to July 1, 1986, will be offered seven (7) consecutive opportunities to appear for the Certifying (oral) Examination beginning with the calendar year after passing the Qualifying (written) Examination. The admissibility expiration date shall be established as December 31 of the seventh calendar year after passing of the Qualifying Examination.

Candidates approved for admission to the examinations of The American Board of Plastic Surgery, Inc., July 1, 1986 and thereafter, will be offered seven (7) consecutive opportunities to appear, beginning with the calendar year of admissibility to the Certifying Examination. Before becoming admissible to the Certifying Examination, the candidate must have passed the Qualifying Examination and have been in the independent practice of plastic surgery for at least a two-year period.

Candidates beginning the independent practice of plastic surgery, July 1, 1989 and thereafter, must have passed the Qualifying Examination and have been in the independent practice of plastic surgery for at least a two-year period, in the same location, before becoming admissible to the Certifying Examination.

The two years of practice need not be consecutive but the candidate must be in practice during the twelve-month period required for completion of the case list. Currently, that period ends on February 1st of the same year as the Certifying Examination.

A Fellowship is not considered independent practice. The admissibility expiration date shall be December 31 of the seventh calendar year after completion of the two-year independent practice period.

For admission to the Certifying Examination, candidates must be actively engaged primarily in the practice of plastic surgery and hold active operating privileges in a hospital approved by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO). If a candidate has not passed the Certifying Examination within seven (7) years after notification of admissibility, or if a candidate fails the Certifying Examination five (5) times, he or she will no longer be a candidate for examination.

Fees

Registration—U.S. $250.00 (not refundable)
Qualifying Examination—U.S. $700.00
Certifying Examination—U.S. $850.00

Fees must be submitted in U.S. currency only. Foreign currencies, including Canadian, are unacceptable.

A charge of $50.00 will be made whenever a check in payment of a fee is returned for nonpayment.

Fees are subject to change by the Board. The fee schedule applicable to current examinations will apply regardless of when you are approved for admission to examination.

The Board is a nonprofit organization, and the fees of candidates are used solely for defraying the actual expenses of the Board. The directors of the Board serve without remuneration. Because of the limited number of surgeons certified by The American Board of Plastic Surgery, Inc., it may be necessary for the Board to request a voluntary annual contribution from its diplomats.

Registration Fee

The registration fee ($250.00) must be submitted with the application and is not refundable.

Qualifying Examination Fee

The fee for the Qualifying Examination ($700.00) must be submitted when the reply card requesting examination is returned to the office of the Board. The fee for the Qualifying Examination must accompany the card only if you wish to be scheduled for examination.

Certifying Examination Fee

The fee for the Certifying Examination ($850.00) must be submitted when the reply card requesting examination is returned to the office of
the Board. The fee for the Certifying Examination is to accompany the card only if you wish to be scheduled for examination.

Refunds
For both the Qualifying and Certifying Examinations, only if written notice is received or postmarked from candidates at least thirty (30) calendar days before the date of the examination in the office of the Board that they wish to withdraw, will they be refunded the examination fee, less a processing charge of $100.00. Candidates who notify the office of the Board in writing less than thirty (30) calendar days prior to the examination of their intent to withdraw, or who fail to appear for examination, will forfeit the entire fee. The Board may waive this rule if the circumstances warrant.

Repeat Examinations
Fees for repeat examinations are the same as for the current original examinations.

The Qualifying Examination
The Qualifying Examination of The American Board of Plastic Surgery, Inc. will be conducted in the spring each year or at any other time deemed suitable by the Board. The examination will be given on the date specified and at the time specified. No exceptions will be made, and no special examinations will be given.

Admission Procedures
An announcement of examination and a reply card will be sent to each admissible candidate approximately three months before the date of the Qualifying Examination. When you receive the announcement, you must signify your intent to take the examination by completing and returning the reply card and examination fee immediately.

Be sure to complete both sides of the reply card. You will not be scheduled for examination if your hospital appointments are not recorded.

If the reply card (green) and examination fee for the Qualifying Examination are not received or postmarked on or before March 1st, a candidate will not be admitted to the examination.

(The names of candidates who are late returning the reply cards will be kept on file. If openings develop by the withdrawal of other candidates, the late candidates may be admitted in the order of the receipt of the reply cards. No candidate will be admitted less than four weeks preceding the examination.

If you wish to withdraw from the examination, written notification must be received or postmarked at least thirty (30) calendar days before the date of the examination in the office of the Board. The examination fee will be refunded less a processing charge of $100.00. Candidates who withdraw from the examination after this date or who fail to appear for the examination will forfeit the entire fee. The Board may waive this rule if the circumstances warrant.

Once you have been scheduled for the Qualifying Examination, you will be sent an admission card five to six weeks before the date of the examination. You must present this card when you register for the examination at both the morning and afternoon sessions. This card will be printed your name; your candidate number; the date, time, and location of the test; the specific room in which you are to take the examination; and the “date results to be mailed.” You must use your candidate number throughout the examination. Late arrival may result in denial of admission to the examination.

If your address as shown on the admission card is incorrect or will change before the “date results to be mailed,” print the change on the back of this card before you turn it in to the proctor at the end of the afternoon session. Admission cards will be collected from all candidates at the conclusion of the examination.

Each candidate is responsible for his or her own travel, hotel accommodations, and expenses. A hotel reservation card will be included with the admission card. You may use this if you wish to stay at the hotel in which the examination is to be given.

Advise the office of The American Board of Plastic Surgery, Inc. immediately by telephone (215-587-9322) if your admission card is lost prior to the examination.

Registration and Administration of the Examination
All candidates must take the entire examination on the same day and at the same time.

Candidates must register for the morning and afternoon sessions at the date, time, and location specified on their admission cards. If for any reason you are delayed or cannot arrive on time, you must notify the proctor or the office of the Board. If you are unable to attend the examination, you must notify the office of the Board either by letter or by telephone prior to the time of registration for the morning session. Anyone who is more than 30 minutes late will not be admitted to the examination.

The office of the Board will provide each candidate lead pencils for use during the examination. No other writing implements may be used. Candidates are not permitted to bring any notes, textbooks, or other reference materials into the examination. Scratch paper is not permitted, but space for notes and calculations is provided in the examination test booklet.

Examination booklets are copyrighted and are the sole property of The American Board of Plastic Surgery, Inc. They must not be removed from the test area or reproduced. Reproduction of copyrighted material is a federal offense.

Content of the Examination
The Qualifying Examination will consist of a morning session and an afternoon session, as follows.

Morning Session
This part of the examination is a three-hour and 15 minute multiple-choice written test covering the spectrum of clinical plastic reconstructive surgery and the body of basic science pertinent to it. It shall include:

1. Basic techniques, wound healing, microsurgery, transplantation.
2. Burns, sepsis, metabolism, trauma, resuscitation, nutrition, endocrinology, shock, hematology.
3. Pre- and postoperative care, anesthesia, cardiorespiratory care, complications, clinical pharmacology.
4. Tumors of head and neck, skin, and breast; including treatment by radiation therapy, immunotherapy, chemotherapy, and surgery.
5. Trunk, lower extremity, musculoskeletal system, pressure ulcers, rehabilitation.
6. Hand, peripheral nerves, rehabilitation.
7. Maxillofacial and craniofacial surgery and the microsurgery.
8. Congenital anomalies, genetics, teratology, facial deformity, speech pathology, gynecology, and genitourinary problems.
9. Aesthetic (cosmetic) surgery, psychiatry, and legal medicine.

Afternoon Session
In the afternoon there will be a multiple-choice written examination covering pertinent:

1. Basic knowledge of pathology, e.g., the biologic behavior of neoplasms, inflammation, and repair.
2. Gross and functional anatomy, and embryology.
Plastic Surgery

The questions for the examination cover subjects considered to be of fundamental importance to competent performance in the field of plastic surgery. Every effort is made to avoid “trick” questions, ambiguity, and questions involving irrelevant facts. All questions are analyzed by psychometric techniques to assure their quality.

The candidate will pass or fail on the strength of his or her performance on the entire Qualifying Examination.

Irregularities

The validity of scores on the examination is protected by every means available. The Board will not report a score which it has determined to be invalid, i.e., which does not represent a reasonable assessment of the candidate’s knowledge or competence sampled by the examination. The performance of all candidates is monitored and may be analyzed for the purpose of detecting invalid scores.

Candidates are not permitted to bring any notes, textbooks, or other reference materials into the examination. Scratch paper is permitted, but space for notes and calculations is provided in the written examination test booklet so that notes and calculations can be made as necessary.

The examination will be supervised by proctors to ensure that the examination is properly conducted. If evidence by observation or analysis suggests that a candidate’s score may be invalid because of irregular behavior, the Board will withhold those scores pending further investigation and the affected candidate will be notified.

Examples of irregularities affecting the validity of scores would include (but not limited to) the following: using notes; sharing information or discussing the examination in progress; copying answers from another candidate; permitting one’s answers to be copied; or unauthorized possession, reproduction, or disclosure of examination questions or answers or other specific information regarding the content of the examination before, during, or after the examination.

In such circumstances, upon analysis of all available information, the Board will make a determination as to the validity of the scores in question. If the Board determines that the scores are invalid, it will not release them, and notification of that determination may be made to legitimately interested third parties.

Candidates or other persons who are directly implicated in an irregularity are subject to additional sanctions. For example, the Board may bar the persons permanently from all future examinations, terminate a candidate’s participation in an ongoing examination, invalidate the results of the candidate’s examination, and withhold or revoke a certificate or take other appropriate action. Candidates or other persons subject to additional sanctions will be provided with a written notice of the charges and an opportunity to respond to such charges in accordance with the reconsideration and appeal procedure established by the Board.

Grades

Letters of notification of the results of the Qualifying Examination will be mailed on the date indicated on your admission card. The time period between administration of the examination and notification is necessary to allow for extensive analysis and to assure that individual results are reliable and accurate.

Results of the examination will be divulged to NO ONE until after the Board letter has had time to reach you. If a week has elapsed AFTER the "Results Mailing Date" and you have not received your letter from the Board, then you may call for information. Information will be given to NO ONE BUT YOU PERSONALLY. The Board staff will verify your identity prior to releasing results to you.

Pass

If you pass the Qualifying Examination, you will be informed of this fact. You will also be notified approximately three months in advance of the date and place of the next Certifying Examination. Note, however, that the Board requires that a candidate for certification be in the independent practice of plastic surgery for at least two (2) years before he or she may take the Certifying Examination, ONLY if their application was approved after July 1, 1986. Candidates beginning the independent practice of plastic surgery, July 1, 1989 and thereafter, must have completed at least two (2) years of practice, in the SAME location, before he or she may take the Certifying Examination.

The two years of practice need not be consecutive but the candidate must be in practice during the twelve month period required for compilation of the case list. Currently, that period ends on February 1st of the same year as the Certifying Examination.

Fail

If you fail the Qualifying Examination, you will be informed of this fact. In case of failure, you must repeat the entire Qualifying Examination.

You will receive a single final grade for the entire examination. To complete the Qualifying Examination successfully, you must achieve a passing grade for the entire examination rather than for each specific section separately.

You will be judged to have successfully completed the Qualifying Examination if your grade is at or above the mean score of a peer reference group. The characteristics of the peer reference group will be determined by the Board and will set the standard of performance. You will receive an individual computer-generated letter concerning your performance on the examination.

The American Board of Plastic Surgery, Inc. will obtain from an appropriate contractor a report, which will be sent to candidates’ plastic surgery residency training directors and to the Residency Review Committee for Plastic Surgery, concerning the performance of the candidates on the Qualifying and Certifying Examinations.

Hand scoring of the Qualifying Examination will be performed upon written request. To request hand scoring, write to the office of the Board within 30 days from notification of the results. You will be responsible for an extra charge for hand scoring of the examination; this charge will be determined by the secretary-treasurer of the Board.

A candidate may review his or her Qualifying Examination, administered within the past twelve months, by writing to the Board Office for an appointment within 30 days from notification of the results, and payment of the fee.

The Certifying Examination

The Certifying Examination will be conducted each fall or at such other time as deemed suitable by the Board.

Admission Procedures

An announcement of examination and a reply card will be sent to each admissible candidate approximately three months before the date of the Certifying Examination. When you receive the announcement, you must sign your intent to take the examination by completing and returning the reply card and examination fee immediately. Be sure to complete both sides of the reply card. You will not be scheduled for examination if your hospital appointments are not recorded.

As a reminder, for admission to the Certifying Examination, candidates must be actively engaged primarily in the practice of plastic sur-
surgery and hold active operating privileges in a hospital approved by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO).

Each candidate is responsible for his or her own travel, hotel accommodations, and expenses. A hotel reservation card will be included with the reply card. You may use this if you wish to stay at the hotel in which the examination is to be given.

If the reply card (green) and examination fee for the Certifying (oral) Examination are not received or postmarked on or before September 1st a candidate will not be admitted to the examination.

(The names of candidates who are late returning the reply cards will be kept on file. If openings develop by the withdrawal of other candidates, the late candidates may be admitted in the order of the receipt of the reply cards. No candidate will be admitted less than four weeks preceding the examination.)

Once you have been scheduled for the Certifying Examination, you will be sent an admission card five to six weeks before the date of the examination. On this card will be printed your name, your assigned candidate number, the date and time to report, the location of the testing center, the specific room in which candidates are to assemble, and the “date results to be mailed.”

You must keep your admission card and bring it to the examination. You will be responsible for delivering the admission card to the temporary Board office at the examination center before 11:00 a.m. on the day of registration for the Certifying Examination ONLY if your address as printed on the admission card is incorrect, or if your address will change before the “date results to be mailed.” Please enter your new (or corrected) address on this card in the space provided.

Advise the office of The American Board of Plastic Surgery, Inc. immediately by telephone (215-587-5942) if your admission card is lost prior to the examination.

The office of the Board will also send you six (6) blue folders for binding of Candidate-selected case reports and five (5) red folders for binding of Board-selected case reports. It is imperative that you place your assigned candidate number (which appears on your admission card) on the cover of each one of the case reports, along with the other required information.

If you wish to withdraw from the examination, written notification must be received or postmarked at least thirty (30) calendar days before the date of the examination in the office of the Board. The examination fee will be refunded less a processing charge of $100.00. Candidates who withdraw from the examination after this date or who fail to appear for the examination will forfeit the entire fee. The Board may waive this rule if the circumstances warrant.

Instructions for Compilation of Case List

Each candidate for the 1990 Certifying Examination should provide the Board with a compilation of operative cases and hospitalized patients for a twelve (12) month period, February 1, 1989 to February 1, 1990. The list should be in chronological order and include: patient’s name and hospital or other identifying number, age and sex, date of operation, diagnosis, procedure performed (if any), and outcome including complications. All operative procedures must be included, whether in-patient, ambulatory outpatient, or office based surgery. All patients hospitalized by the candidate as the Admitting physician must also be included, even if the patient was managed non-operatively.

Each candidate for the 1990 Certifying Examination should complete the Case Classification form and list, by category, number of cases performed. The form will facilitate the review process of the Board. Place one (1) copy in front of each of the two complete case lists. List cases by the broad categories only. The subcategories (e.g., flexor, extensor tendon repair) are intended as a guide only. List only by case, not by individual procedure. For example, repair of tendon, nerves and split-thickness skin graft of avulsive injury of hand should be listed as a single case—Hand.

The completed list is required by the medical record librarian at each hospital or ambulatory surgery center and be properly notarized as a complete list of the respective candidate’s operative procedures. Surgery performed by the candidate in his or her office must also be listed and signed by the appropriate office personnel who can attest to completeness.

1. All case lists MUST be typed and placed on the standard case list form.

a. A separate form must be used for each institution and/or office based surgery. Number all pages consecutively regardless of the institution. All cases should be listed in chronological order with the date performed except the list must be keyed for multiple operative procedures on the same patient. The candidate should indicate such instances by use of two options:

1) List in sequential fashion all procedures performed on the same patient even though such listing will not be in temporal order for the remaining of the case list. For example:

<table>
<thead>
<tr>
<th>Date of Procedure</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2/1/89</td>
<td>Debridement</td>
</tr>
<tr>
<td>2/4/89</td>
<td>Free flap transfer to tibial defect</td>
</tr>
<tr>
<td>2/5/89</td>
<td>Re-exploration for thrombosis</td>
</tr>
<tr>
<td>2/9/89</td>
<td>Debridement of partially necrotic flap</td>
</tr>
<tr>
<td>2/14/89</td>
<td>Split thickness skin graft to defect</td>
</tr>
</tbody>
</table>

OR, for example:

b. Complete all information categories including outcome thoroughly. Give an accurate description of the operative procedure as taken from the operative note. If the case was non-operative, include the diagnosis from the discharge summary.

c. Adequate information should be provided under “outcome.” A short statement with respect to the outcome of each case will help guide the Board. Not all cases will “heal without problems.” Examples would include “necrosis of tip of flap” or “normal sensation return but index finger stiff after tendon repair”.

2. The Board will select a number of cases from the compiled twelve (12) month case list and request the candidate to prepare case reports. Those Board-selected case reports will be in addition to the candidates selection and submission of case reports. Requirements for preparation of case reports will be the same as in past years, pre and postoperative photographs, operative and pathology reports, x-rays where pertinent; and postoperative and office progress notes. Photographic documentation is crucial. Preoperative photographs should reflect preoperative planning and intraoperative photographs may aid in further illustration of the clinical problem.

3. Those cases selected by the candidates as case reports should appear with an asterisk (*), if those cases appear in the twelve (12) month case list. Of course, the candidate is not limited to the twelve (12) month time period for the selection of his/her case reports. The candidate may not asterisk (*) (reserve) more than four (4) cases. List asterisked (*) cases on a separate sheet of paper with the following information: patient’s name, number, date of procedure and page number. Place one (1) copy in front of each of the two complete case lists.

4. The guidelines with respect to the necessity of inclusion of emergency room and outpatient cases is that the candidate must include all admitted emergency room patients and all out-patient emergency room...
Plastic Surgery

cases which require a dictated operative note. Simple outpatient surgery performed in the office (noses) that does not require a dictated note should not be included. Inpatient consultations on other services that did not culminate in surgery performed by the candidate should also not be included.

5. Do not list assistant cases, namely cases billed by the candidate as assistant surgeon. This inclusion does not cover cases performed by a resident and attended by the candidate or cases billed as a co-surgeon.

Such cases should be included on the case list.

As a reminder, two (2) copies of the completed case lists (February 1, 1989 to February 1, 1990) plus two (2) copies of the completed Affidavits, Case Classification Forms, and list of Candidate-selected (*) Case Reports must be received or postmarked on or before March 1, 1990 in the office of the Board. No case lists or other material will be accepted after this date.

The list of Board-selected cases for preparation as case reports will be sent to you by July 15, 1990. Do not contact the office of the Board prior to that date with respect to such list.

Please be advised that the format for the 1991 Certifying Examination will be similar and will require a twelve (12) month case list (February 1, 1990 to February 1, 1991) and must be postmarked on or before March 1, 1991 in the office of the Board. No case lists or other material will be accepted after this date.

Schedule for the Certifying Examination

The oral examination for each candidate will occupy one full day. Late arrival may result in denial of admission to the examination. The office of the Board will assign the day (second or third day) on which you will be examined.

First Day
8:00 a.m. to 9:00 a.m.—All candidates register and hand deliver case reports to the room designated on their admission cards.
11:30 a.m. to 12:30 p.m.—Orientation Conference for candidates for discussion of Oral Examination format. Attendance is not mandatory.

Candidates should be available in their hotel rooms (or reachable by telephone) between 1:00 p.m. and 7:00 p.m. on the first day in case the Board wishes to contact them.

Second Day
7:00 a.m.—Candidates assemble for instructions.
8:00 a.m. to 11:30 a.m.—Oral examinations
12:45 p.m. to 4:15 p.m.—Oral examinations
3:30 p.m. to 6:45 p.m.—Reexaminations
8:30 p.m. to 9:30 p.m.—Debriefing

Third Day
7:00 a.m.—Candidates assemble for instructions.
8:00 a.m. to 11:30 a.m.—Oral examinations
12:45 p.m. to 4:15 p.m.—Oral examinations
3:30 p.m. to 6:45 p.m.—Reexaminations
8:30 p.m. to 9:30 p.m.—Debriefing

Instructions and Procedure

You will receive specific instructions concerning the examination at the assembly on the morning of the day of your examination. You will also be given a schedule showing the time and the place of each examination session. Failure to appear on time for any section of your examination will lead to a grade of Fail on that section. You should be outside the examination room five (5) minutes before your assigned time. It is not necessary for you to announce your presence. If, however, you have not been invited into the examination room by the examiners by ten (10) minutes after the scheduled time, you should notify the temporary Board office immediately.

The Board has made every effort to assign you to Examiners who know nothing about your background. If you find that one of the examiners to whom you have been assigned played a role in your training, is a close friend or relative, or is a close professional associate, or has examined you previously, you must inform the Board staff immediately.

The candidate numbers of those who have completed the two parts of the examination will be posted outside the temporary Board office beginning at 3:30 p.m. each day. The Candidates who are "cleared" (not scheduled for a re-examination) are free to leave the examination center after their numbers are posted. Candidates who are posted for re-examination MUST be available in the examination center. Candidates who have a re-examination may leave the examination center after completion of the re-examination.

Debriefing

On the evenings of the second and third days, there will be voluntary debriefing sessions. The Board encourages candidates to attend for the purpose of evaluating the examination just completed.

Description of the Examination

Each examination session is designed to evaluate the candidate's breadth and depth of knowledge, his or her ability to apply it in the solution of a wide range of clinical problems and matters related to ethics. Each session is structured in that the examiners are given a schema to be followed. This approach assures uniformity and prevents duplication. Each of the examiners on each team is expected to pose problems and questions to the candidate.

All examiners are Diplomates of The American Board of Plastic Surgery, Inc., are active in the practice and/or teaching of plastic surgery, and have been certified by the Board for more than five years. They are respected members of the profession known for their surgical knowledge, expertise, and scientific contributions. They have been instructed in the technique and purposes of the examination process. Ordinarily, each team includes a present or past director of the Board.

The Certifying Examination is given on one day. It consists of two parts:

1. A one-hour oral examination on ten (10) major cases (see Case Reports, below) submitted by the candidate and indicative of the candidate's work in the field of plastic surgery.

2. A one-hour oral examination on the theory and practice of plastic surgery on material prepared by the Board.

Each Candidate will be examined by at least two teams of examiners. You may be examined by a third team under one of two circumstances. (a) In the first instance, you may petition the chairman of the Certifying Examination Committee or his designee for re-examination immediately following the examination, if you feel that you have been unfairly or inadequately examined by one of the two teams. If your petition is judged to have merit and if its outcome can affect your final grade, you will be given one additional one-hour oral examination. (b) Secondly, if your performance has been judged marginal by the original two teams, you may, at the direction of the chairman of the Certifying Examination Committee, be required to undergo examination by a third team. In either of the above circumstances, your performance as judged by all three examining teams shall be considered in determining your grade.

Case Reports (Candidate-Selected)

Every candidate must assemble four (4) case reports in the blue (candidate-selected) folders provided by the Board and bring the reports to the Certifying Examination. (See Presentation of Case Reports.) Each case report will be judged on the basis of degree of difficulty as well as on the quality of execution.
When you bring your case reports before the examiners, you must be prepared to defend your choice of operation, to present alternate treatment plans, and to discuss pertinent literature on the subject. The Board, at its discretion, may request certification of your case reports by the hospital(s) where you performed the operations.

You may bring an additional case to the examination. This case may be substituted for one that is deemed unacceptable by a representative of the Certifying Examination Committee. The total of four (4) cases must comply with the requirements spelled out below.

All cases must be performed by you as the independent, responsible surgeon.

Patients managed by the candidate within the context of a residency, fellowship or other similar supervised training program are not acceptable as Case Reports and no cases from that time period may be used for the Board's Certifying Examination.

Hospital and office records must clearly identify you as the attending physician and surgeon.

However, you need not necessarily be the admitting physician, so long as you are clearly the responsible surgeon. No significant portion of submitted operative procedures may have been performed by any individual other than you.

You will not be admitted to the examination if preliminary review of your cases suggests the possibility that you received supervision or guidance.

If you received assistance on a case from anyone other than a resident, intern, physician's assistant, medical student, or nurse, the following disclaimer statement must be signed by the person(s) who helped you and included in your case report:

Patient's name:
This is to certify that I did not provide supervision or guidance in the planning and execution of the operative treatment of this patient.
Signed:
The Board recommends, but does not require, that you bring new case reports if you are presenting yourself for a repeat examination after previous failure.

The Board recommends, but does not require, if you are refused admission at the time of examination for failure to meet the Case Report criteria that you bring new Case Reports to any subsequent examination.

Requirements for Case Reports

The following materials, collated in this order, must be presented in each of the case reports you submit:

1. A brief narrative summary of preoperative, operative, and postoperative course of the patient.
2. Properly authorized pre- and postoperative photographs: approximately 3 1/2" × 5" black-and-white or color prints mounted on 8 1/2" × 11" paper. Descriptive legends and dates of the photos must be placed adjacent to each photo. Transparencies will not be accepted.
3. Photocopies of the original operative reports.
4. Photocopies of original anesthetic records.
5. Photocopies of pertinent laboratory data.
6. Photocopies of the pathologist's reports.
7. Photographs of pertinent x-rays or scans. (Actual x-rays are unacceptable.) Each x-ray or scan should be dated in a manner that is easily seen.
8. Drawings, if they would clarify a presentation.
9. Photocopies of the original progress notes, including patient's history and physical examination, and all post-operative and post-discharge progress notes, both in the hospital and from the office records including the initial consultation. If legibility is a problem include a typewritten copy also.
10. Information indicating the final outcome of the treatment.

Note: If the records are not in English, an accurate and complete English translation must accompany them.

Candidates are responsible for obtaining appropriate releases from patients for material submitted to the Board.

The diversified nature of the case material submitted is evidence of the candidate's expertise in the representative areas of plastic surgery. Case material should be drawn from the following six surgical categories. You must have cases in four of the six categories. The cases may have been performed in the hospital or in an ambulatory setting. All cases must have had operative treatment.

1. Defects requiring reconstructive surgery (reduction mammoplasty is included in this category):
   a. Cancer reconstruction
   b. Burn grafting and reconstruction
   c. Facial bone fractures (simple nasal fractures are not acceptable).
   d. Aesthetic (cosmetic) operations (reduction mammoplasty is considered reconstructive for purposes of this examination).
   e. Malignancies or conditions prone to malignancy. (Reconstruction alone or post-extirpative defects for neoplasm are considered reconstruction for this examination.)
   f. Hand surgery.
   g. Congenital anomalies. Examples: cleft lip and plates, syringomelia, microtia, hypoplasia, extensive neo, congenital constriction bands, and craniofacial dysostosis. (Prominent ears or otoplasty is considered aesthetic for purposes of this examination.)

The four cases must include at least three of the following anatomical regions:

1. Head and neck.
2. Upper extremity.
3. Trunk.
4. Lower extremity.
5. Genitourinary system.

Trivial (Inadequate) Cases

Each of your cases should represent your best achievement in the specific clinical area during your practice to date. These case reports are the only means by which your clinical skills can be judged. A case report that does not demonstrate clinical judgment and skills equal to or beyond that reasonably expected of an individual completing the requisite training for a plastic surgical residency will be considered inadequate and judged trivial. Examples of trivial (inadequate) cases are: Excision of benign skin lesions of less than two centimeters in diameter on the thigh with primary closure; treatment of a second-degree burn of less than 50 percent of the surface of the forearm; excision and reclosure of an abdominal scar without tissue rearrangement.

Presentation of Case Reports

Each report must be typed or reproduced on standard, letter-sized paper (8 1/2" × 11") with your name and candidate number, the number of the case, the hospital case number, the principal diagnosis, and the primary operation listed on the title page. Bind the cases singly in the blue folders supplied by the Board. Do not place any pages or photographs in acetate (sheet protectors). Photos MUST be glued to plain bond paper.

You must also supply three (3) copies of a list of your cases. Type the list on a single sheet of paper. Identify this list, with your name and candidate number. For each case, include the following information:

1. Category
2. Patient's hospital number
3. Primary diagnosis
4. Procedure(s) done by you.
Plastic Surgery

Bind one copy of this list at the beginning of the first case in its folder. The other two (2) copies should be separate and unbound to be handed in with the case report.

Include the following signed statement in the front of the folder containing your first case. (Only one statement is necessary for the entire group of cases.) "I hereby certify that the planning and essential surgical procedures herein were performed by me as an independent operator and that I have obtained appropriate authorization from the patients for the use of the enclosed photographs and documents."

The American Board of Plastic Surgery, Inc. regards the case reports submitted as important evidence of your basic ability to carry out plastic surgical procedures and to organize and present information in a succinct and complete fashion.

Improper or disorganized preparation of this material will be sufficient cause to disqualify you for continued examination. If you are disqualified for continuation in the examination process because your case reports are judged unacceptable, for whatever reason, you are considered to have not taken the examination and it is not recorded as a failure. However, because the Board has incurred expenses to provide you with an examination, your examination fee less the processing fee of $100.00 will be refunded.

Case Reports (Board-Selected)

Each candidate will be asked to assemble six (6) case reports as chosen by the Board in the red (Board-selected) folders provided by the Board and bring these case reports to the Certifying Examination. (See Presentation of Case Reports.)

When you bring your case reports before the examiners, you must be prepared to defend your choice of operation, to present alternate treatment plans, and to discuss pertinent literature on the subject. The Board, at its discretion, may request certification of your case reports by the hospital(s) where you performed the operation(s).

Hospital and office records must clearly identify you as the attending physician and surgeon. However, you need not necessarily be the admitting physician, so long as you are clearly the attending physician.

Requirements for Case Reports

The following materials, collated in this order, must be present in each of the case reports you submit:

1. A brief narrative summary of preoperative, operative, and postoperative course of the patient.

2. Properly authorized pre- and postoperative photographs: approximately 3 1/2" x 5" black-and-white or color prints mounted on 8 1/2" x 11" paper. Descriptive legends and dates of the photos must be placed adjacent to each photo. Transparencies will not be accepted.

3. Photocopies of the original operative reports.

4. Photocopies of original anesthetic records.

5. Photocopies of pertinent laboratory data.

6. Photocopies of the pathologist's reports.

7. Photographs of pertinent x-rays or scans. (Actual x-rays are unacceptable.) Each x-ray or scan should be dated in a manner that is easily seen.

8. Drawings, if they would clarify a presentation.

9. Photocopies of the original progress notes, including patient's history and physical examination, and all postoperative and post-discharge progress notes, both in the hospital and from the office records including the initial consultation. If legibility is a problem include a typewritten copy also.

10. Information indicating the final outcome of the treatment.

Note: if the records are not in English, an accurate and complete English translation must accompany them.

Candidates are responsible for obtaining appropriate releases from patients for material submitted to the Board.

Presentation of Case Reports

Each report must be typed or reproduced on standard, letter-sized paper (8 1/2" x 11") with your name and candidate number, the number of the case, the hospital case number, the principal diagnosis, and the primary operation listed on the title page. Bind the cases singly in the red folders supplied by the Board. Do not place any pages or photographs in acetate (sheet protectors). Photos MUST be glued to plain bond paper.

You must also supply three (3) copies of a list of your cases. Type the list on a single sheet of paper. Identify this list, with your name and candidate number. For each case, include the following information:

1. Category
2. Patient's hospital number
3. Primary diagnosis
4. Procedure(s) done by you.

Bind one copy of this list at the beginning of the first case in its folder. The other two (2) copies should be separate and unbound to be handed in with the case reports.

The American Board of Plastic Surgery, Inc. regards the case reports submitted as important evidence of your basic ability to carry out plastic surgical procedures and to organize and present information in a succinct and complete fashion.

Improper or disorganized preparation of this material will be sufficient cause to disqualify you for continued examination. If you are disqualified for continuation in the examination process because your case reports are judged unacceptable, for whatever reason, you are considered to have not taken the examination and it is not recorded as a failure. However, because the Board has incurred expenses to provide you with an examination, your examination fee less the processing fee of $100.00 will be refunded.

Irregularities

The provisions regarding irregularities described in the section on the Qualifying Examination are applicable also to the Certifying Examination.

Grades

Each candidate will be evaluated by each member of his or her examining team, and performance may be discussed in detail by the entire Board. The final decision regarding certification will be rendered by the entire Board at its meeting following the completion of the Certifying Examination.

Do not call the Board office for information. Do not call your examiners. Results will be provided in the letter you will receive after the "Result Mailing Date" shown on your admission card. Regardless of your reason, the results of the examination will be divulged to no one until after the Board has had time to review your results. If a week has elapsed AFTER the "Results Mailing Date" and you have not received your letter from the Board, then you may call for information. Information will be given to NO ONE BUT YOU PERSONALLY. The Board staff will verify your identity prior to releasing results to you.

If you wish information about your performance after you have received your letter of notification you may correspond within 30 days of notification, by writing to the secretary of The American Board of Plastic Surgery, Inc., at the office of the Board.

The Board is determined that the examination shall be as comprehensive and objective as practical. Its intention is that every candidate be provided an equal opportunity to become Board certified. The same standard is applied to each candidate insular as is possible.
Certification

After a candidate has met the requirements for admittance and passed the examinations of the Board, a certificate attesting to his or her qualifications in plastic surgery will be issued by the Board. A surgeon who is granted certification by the Board is known as a diplomate of the board.

It shall be the prerogative of the Board to determine the fitness, professionally and ethically, of any candidate for a certificate; and the Board, for cause, may defer or deny certification to any candidate.

Certificates

Certificates issued by the Board shall be in such form as the directors may from time to time determine. They shall be signed by the chairman, the vice-chairman, and the secretary-treasurer of the Board and shall have placed upon them the official seal of the Board.

Certificates of the Board shall state that the holder has met the requirements of the Board and is certified by the Board as a medical specialist in plastic surgery and is entitled to be known as a “diplomate of The American Board of Plastic Surgery, Inc.” The names of all diplomates will be submitted to the American Board of Medical Specialties and Marquis Who’s Who, Inc. for publication in their directories unless they notify the Board in advance that they do not wish to be listed.

Revocation

Any certificate issued by the Board shall be subject to revocation at any time that the Board determines that an individual was not properly qualified to receive it. The Board may revoke the certificate of any diplomate who, after opportunity for full and fair hearing by the medical staff or other appropriate body of a hospital, state or county medical society, government licensing body, professional specialty society, or court of law, has been found guilty of or pleaded guilty to a felony, professional incompetence, professional misconduct, unethical conduct, or harmful, deceptive, or fraudulent advertising.

The American Board of Plastic Surgery, Inc. shall have the jurisdiction and right to determine whether or not the information placed before it is sufficient to constitute grounds for the revocation of any certificate. The individual will be provided with a copy of the appeals policy of the Board, and this policy will be observed in pursuing resolution of the problem.

Each certificate issued by the Board shall be subject to revocation if the physician so certified has made any misstatement of material fact, or has failed to make any statement of material fact, in his or her application for such certificate or in any other statement or representation to the Board or its representatives, or has otherwise acquired the certificate by deception. Upon revocation the certificate shall be returned to the Board.

Foreign Certificates

Persons holding the foreign certificate issued prior to June 30, 1973 by The American Board of Plastic Surgery, Inc., must relinquish their certificates to the Board in the event that they return to the United States for the purpose of practicing plastic surgery. Such individuals may apply for examination and certification in the manner described herein.

Inquiries as to Status

The Board considers a candidate’s record not to be in the public domain. When an inquiry is received by the Board regarding an individual’s status with the Board, a general—but factual—statement is provided which indicates that person’s location within the process of certification. The Board provides this information only to individuals, organizations, and institutions with a reasonably valid “need to know” for professional reasons.

The Board does not use or recognize the terms Board “eligible” or Board “qualified” and does not condone the use of those terms by candidates or any other person or organization.

The directors may adopt such further rules and regulations governing requirements, examinations and issuance and revocation of certification as they may from time to time determine.

AMERICAN BOARD OF PREVENTIVE MEDICINE

Alice R. Rie, MD, Atlanta, Georgia
Stanley R. Moltitz, MD, Secretary-Treasurer,
Department of Community Medicine
Wright State University School of Medicine
PO Box 927, Dayton, Ohio 45401

(EDITOR’S NOTE: These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Preventive Medicine to ascertain whether the information they have is current.)

Eligibility Requirements for Examination

Each applicant for a certificate in public health and general preventive medicine, aerospace medicine, or occupational medicine is required to meet certain eligibility requirements and to pass an examination. Such eligibility requirements are set forth in the By-laws of the Board. For the information of applicants such requirements are briefly outlined below, but for a full statement thereof reference must be made to the By-laws, as from time to time in force, by which alone such requirements are governed.

General Requirements

1. Graduation from a medical school in the United States or Canada approved by the Council on Medical Education of the American Medical Association, or from a school of osteopathic medicine which was at the time approved by the American Osteopathic Association, or from a foreign school satisfactory to the Board.

2. A year of postgraduate clinical training developed as part of an approved residency program in preventive medicine or in a clinical program approved by one or more Residency Review Committees and comprising experience involving direct patient care.
Preventive Medicine

3. An unrestricted license to practice medicine in a State, Territory, Commonwealth or possession of the United States or in a Province of Canada.

4. Residency of not less than one year which shall have provided supervised experience in the practice of public health, aerospace medicine, occupational medicine or general preventive medicine including planned instruction, observation and active participation in a comprehensive organized program in one of the specialty areas, approved by the Accreditation Council for Graduate Medical Education on the recommendation of the Joint Residency Review Committee for Preventive Medicine of the American Medical Association’s Council on Medical Education and the American Board of Preventive Medicine; or a period of experience deemed by the Board to be substantially equivalent to such residency.

5. A period of academic training consisting of completion of a course of study leading to a master’s degree in preventive medicine or public health, the content of which shall include biostatistics, epidemiology, health services administration and environmental health; or successful completion of post-baccalaureate study of the extent, depth, content and rigor generally required in such master’s degree program.

Special Requirements in Public Health and General Preventive Medicine

1. In addition to the general requirements, a period of not less than one year of special training or research in, or teaching or practice of, preventive medicine. Candidates may be permitted to take examinations four months prior to the completion of this period but final certification is contingent upon such completion.

2. The applicant must have been engaged in training for, or the practice of, public health for at least two of the five years preceding application for certification.

Special Requirements in Aerospace Medicine

1. In addition to the general requirements, a period of not less than one year of special training or research in, or teaching or practice of, aerospace medicine. Candidates may be permitted to take examinations four months prior to the completion of this period but final certification is contingent upon such completion.

2. The applicant must have been engaged in training for, or the practice of, aerospace medicine for at least two of the five years preceding application for certification.

Special Requirements in Occupational Medicine

1. In addition to the general requirements, a period of not less than one year of special training or research in, or teaching or practice of, occupational medicine. Candidates may be permitted to take examinations four months prior to the completion of this period but final certification is contingent upon such completion.

2. The applicant must have been engaged in training for, or the practice of, occupational medicine for at least two of the five years preceding application for certification.

Equivalencies for Eligibility Determination

Individuals who have not formally completed all of the components previously described may be considered eligible if their training and experience is considered by the Board to provide suitable equivalency for that formal training.

The Board will consider granting certain credit toward satisfying requirements for eligibility for such factors as:

1. certification by one of the American specialty boards with significant preventive medicine components in their practice (e.g., internal medicine, pediatrics, family practice) plus a minimum of two years of full-time practice of preventive medicine;

2. teaching or research experience in fields relevant to preventive medicine; and

3. suitable periods of practice, research or teaching in preventive medicine.

An applicant who is lacking a formal academic year may substitute four additional years of practice in the special area of aerospace medicine, occupational medicine, general preventive medicine or public health.

Each applicant is considered individually by the Board in accordance with the existing guidelines.

Applications for Examination and Re-examination

Each application for examination must be made on the prescribed form (which may be obtained from the Secretary of the American Board of Preventive Medicine). It must be accompanied by the required documentation, application fee, and two recent, clear, autographed photographs of the applicant. An official transcript of all graduate academic training in preventive medicine should be sent directly to the Board from the registrar of the institution where the training was undertaken.

No member of the Board is authorized to give an opinion as to the eligibility of candidates. The determination of eligibility will be made only by the full Board, after receiving full application information. Each candidate must comply with Board regulations in effect at the time the examination is taken and also those in effect at the time the certificate (if any) is issued, regardless of when his original application was filed.

An applicant declared ineligible for admission to examination may file a request for re-examination, at the discretion of the Board. The applicant may not file a request for re-examination if the candidate failed to file the required application forms or fulfill all requirements for admission to examination.

Multiple Certification

An individual may establish eligibility for certification in multiple fields of preventive medicine by submitting separate applications and fees for each field. Eligibility determination will be carried out independently and candidates may be given credit for any period of appropriate training or experience, regardless of its having been used to establish eligibility in another field.

Fees

Application fee—$150
Must be submitted with application; is not refundable.
Examination fee—$700
Fee is payable 45 days prior to the examination date.

Examination

The examination is a one-day examination. It is a multiple choice examination covering all of preventive medicine but weighted in those areas for which candidate is declared.
CERTIFICATION REQUIREMENTS

Psychiatry and Neurology

Certification

Upon satisfactory completion of the examination and proof to the satisfaction of the Board that the applicant is eligible for certification, a certificate will be issued to the effect that the applicant has been found to be possessed of special knowledge in the field specified. The certificate will be signed by officers of the Board and will have its seal affixed. Each certificate remains the property of the Board, but the person to whom it is issued is entitled to its possession unless and until it is revoked. Any certificate issued by the Board may be revoked if evidence, satisfactory to the Board, is presented that the applicant was not entitled to receive it at the time of application or issuance, or that any pertinent fact had been misrepresented, concealed, or concealed. The issuance of a certificate to any person does not confer such person a member of the Board.

Stephen C. Scheiber, MD, Executive Vice President
500 Lake Cook Road, Suite 335
Deerfield, Illinois 60015
(708) 945-7000

(EDITOR’S NOTE: These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Psychiatry and Neurology to ascertain whether the information they have is current.)

(‘Please note that this is not an official document of the American Board of Psychiatry and Neurology, Inc. The Board cannot accept responsibility for errors made in the printing of this material. Please contact the Board’s Executive Office for official policies and procedures of the Board.)

Certificates

The Board currently issues six types of certificates: (1) in psychiatry, (2) in neurology, (3) in neurology with special qualification in child neurology, (4) in child and adolescent psychiatry, in added qualification in geriatric psychiatry, and (6) in added qualification in clinical neurophysiology. An applicant may be certified in more than one area. The applicant shall receive a separate certificate for each area in which he or she qualifies. Each certificate shall be in such form and for such period of time as may be specified by the Board.

Effective October 1, 1994 all individuals achieving board certification by the American Board of Psychiatry and Neurology, Inc. in psychiatry, neurology, neurology with special qualification in child neurology, and child and adolescent psychiatry will be issued 10-year time-limited certificates.

Revocation of Certificates

The Board shall have authority to revoke any certificate issued by it or to place a certificate holder on probation for a fixed or indefinite time if:

a. The certificate was issued contrary to or in violation of the Bylaws or any rule or regulation of the Board.

b. The person to whom the certificate was issued made any material misstatement or omission of fact to the Board in his or her application or otherwise.

Certification is in force so long as the holder has a valid license to practice medicine.

Board Eligibility

The American Board of Psychiatry and Neurology, in accord with the policy of the American Board of Medical Specialties, does not recognize or use the term “Board Eligible” and does not issue statements concerning “Board Eligibility.” The Board informs any applicant of inadmissibility to examination only when the applicant has an active, approved application on file in the Board office.

Application

ALL LICENSING AND TRAINING REQUIREMENTS MUST BE MET PRIOR TO MAKING APPLICATION FOR EXAMINATION.

An applicant who wishes to be examined by the Board shall complete, sign and file with the Executive Vice President a current application on the current official form, together with the required Part I examination fee and supporting data. Photocopies of applications are not acceptable. Application forms may be obtained from the Executive Vice President. Part I examination fees are not refundable.

Deadline for receipt of completed applications in the Executive Office of the Board is the September 1 preceding the scheduled date of the Part I examination.

Applications which are not accompanied by the Part I examination fee will not be processed. Part I examination fees unaccompanied by the formal current application will be returned.

An acknowledgement postcard accompanies each application. That card, when stamped, self-addressed, and enclosed with the application, will be returned to the candidate as acknowledgment that the application has been received by the Board office.

Once the card is returned to the candidate, it will be a minimum of ten weeks before the candidate will receive information regarding the status of the application. Applications received on or after the deadline date will take longer because of the volume received at that time.

An applicant who does not receive notification from the Board office by December 31 of the acceptance or rejection of his or her application should contact the Board office. Only one application per candidate is considered at any one time. For example, if an application is being considered for psychiatry, an application for neurology will not be considered until certification is achieved in psychiatry or unless the application for psychiatry is withdrawn.

Appeal Procedure for Negative Determinations Regarding Applications

The rejection of credentials for admission to an examination is considered a “negative determination.” An applicant who has submitted a formal application and receives a negative determination regarding his/her application, may appeal by complying with the following procedures.

Within thirty (30) days after date of notice of a negative determination, the applicant may, by writing, indicate his/her request for a formal
Psychiatry and Neurology

appeal of his/her application rejection. The following materials must accompany this request: appeal fee of $275.00, any additional written information (plus three copies), tending to rebut the negative determination. The Credentials Committee will review the materials and recommend action to the Board. The Board will review the materials and make a decision which, in all events, will be final and binding on the Board and on the applicant. All correspondence or other materials should be sent to the Board office.

General Requirements

At the time of submission of the application, the applicant must establish that:

a. He or she has an unlimited license to practice medicine in a state, commonwealth, or territory of the United States, or a province of Canada. All applicants are required to submit copies of licenses with current registrations and expiration date with their Part I applications.

b. He or she has satisfactorily completed the Board’s specialized training requirements in psychiatry, neurology, or neurology with special qualification in child neurology.

Training Requirements

Certificate in Psychiatry

References to “residency” refer to entry at the PGY-2 level unless stated otherwise.

An applicant who seeks admission to examination for certification in psychiatry must have satisfactorily completed an approved PGY-1 and three full years of postgraduate, specialized residency training in a program accredited by the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada. This training must be in the specialty of psychiatry. No residency training credit can be given for time spent in a residency program in another specialty. Training programs approved by the Residency Review Committee and accredited by the Accreditation Council for Graduate Medical Education can be found in the current issue of the Directory of Graduate Medical Education Programs published by the American Medical Association. This directory includes the “Essentials of Accredited Residencies.”

Training may be completed on a part-time basis, provided that it is no less than half-time, and credit will not be given for less than one-year blocks of training except under special circumstances which must be approved by the ABPN Credentials Committee for Psychiatry.

To ensure continuity of training, the Board requires that two years of the three years of residency following the PGY-1 be spent in a single program. On occasion, the Board will consider alternate patterns of training that have not included the required two years spent in a single program, provided that the total residency permitted the applicant to assume progressive levels of responsibility and that a comprehensive curriculum was covered. In such cases, it is the responsibility of the applicant to provide detailed documentation from the respective training directors outlining training content, duties, and responsibilities. Each case will be considered on an individual basis.

Satisfaction of the following training requirements for residency is mandatory for physicians entering residency training programs on or after July 1, 1977 and before July 1, 1986 for psychiatry:

Two patterns of training are acceptable:

1. Three Years Training Following a First Postgraduate Year

Prior to entering an approved three-year training program in psychiatry, a physician must have completed one year of approved training after receiving the degree of Doctor of Medicine or Doctor of Osteopathy. This year of clinical experience should emphasize internal medi-
Certificate in Neurology

References to "residency" refer to entry at the PGY-2 level unless stated otherwise.

An applicant who seeks admission to examination for certification in neurology must have satisfactorily completed an approved PGY-1 and three full years of postgraduate, specialized training in a neurology program accredited by the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada. The training must be in the specialty of neurology. No residency training credit can be given for time spent in a residency program in another specialty. Training programs approved by the Residency Review Committees and accredited by the Accreditation Council for Graduate Medical Education can be found in the current issue of the Directory of Graduate Medical Education Programs published by the American Medical Association. This directory includes the "Essentials of Accredited Residencies."

Training may be completed on a part-time basis, provided that it is no less than half-time, and credit will not be given for less than one-year blocks of training.

To ensure continuity of training, the Board requires that two years of the three years of residency spent in a single program. On occasion, the Board will consider alternate patterns of training that have not included the required two years spent in a single program, provided that the total residency permitted the applicant to assume progressive levels of responsibility and that a comprehensive curriculum was covered. In such cases, it is the responsibility of the applicant to provide detailed documentation from the respective training directors outlining training content, duties, and responsibilities. Each case will be considered on an individual basis.

Satisfaction of the following training requirements for residency is mandatory for physicians entering either a three or four year residency training program as of July 1, 1987.

Two patterns of training are acceptable:

1. Three Year Training Program Following a First Postgraduate Year.

Prior to entering an approved three-year training program in neurology a physician must have completed one year of approved graduate training (PGY-1) after receiving the degree of Doctor of Medicine or Doctor of Osteopathy as follows:

a. Physicians entering neurology residency training as of July 1, 1987 and before July 1, 1991 may enter neurology residency training programs ONLY after an initial first year of graduate training in programs accredited by the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada in internal medicine or an ACGME-approved transitional program which includes at least six months experience in internal medicine. In lieu of such PGY-1 training, the MRCP(UK), the MRCP (New Zealand and Australia), the FCP(SA) (South Africa), and the MRCP(I) (Ireland) certificates will also be accepted. "Transitional Programs—Transitional programs are provided for physicians who desire in their first or later graduate year an experience in several specialties prior to embarking on further training in a single specialty." The criteria for a transitional year are outlined in the Directory of Graduate Medical Education Programs published by the American Medical Association.

b. Physicians entering neurology residency training as of July 1, 1991 must complete a year of graduate training in accredited programs in the United States or Canada, or after receiving the MRCP(UK) or the MRCP (New Zealand or Australia), the FCP(SA) (South Africa), and the MRCP(I) (Ireland) certificates in addition to three years of approved neurology residency training. It is strongly suggested that this full year consist of training in internal medicine. An acceptable, though less desirable, alternative is a full year in which a minimum of eight (8) months of training is in internal medicine, the details of which must be documented by the internal medicine training director. The composition of these eight (8) months cannot include rotations in neurology or emergency medicine. To ensure that these eight (8) months constitute a high quality experience, they should be obtained with an emphasis on progressive responsibility for the resident.

Beginning July 1, 1988, all osteopathic physicians entering a PGY-2 in neurology must have successfully completed an approved PGY-1 as described above.

2. Four-Year Training Program:

Four years of training in a neurology residency program approved by the ACGME for four years of training is acceptable.

Satisfaction of the following training requirements for residency is mandatory for physicians entering training programs on or after July 1, 1977 and before July 1, 1987 for neurology.

Two Patterns of training are acceptable:

1. Three Years Training Following a First Postgraduate Year.

Prior to entering an approved three-year training program in neurology, a physician must have completed one year of approved training after receiving the degree of Doctor of Medicine or Doctor of Osteopathy. This year of clinical experience should emphasize internal medicine, pediatrics or family practice. The following programs would be acceptable:

The categorical first year, categorical first year, and the flexible first year are in accord with those defined by the Department of Graduate Medical Education, American Medical Association. These were in effect from 1977 through 1981. Effective July 1, 1982, ACGME-approved first postgraduate year training programs include only categorical and transitional programs.

"Categorical First Year—These are first-year programs planned, sponsored, and conducted by a single, approved residency program as part of that residency. The content of such a first year will be limited to the specialty field of the sponsoring residency program."

The categorical first year (beginning after 1977 and before 1986 for neurology candidates) must be completed in internal medicine, family practice, pediatrics, surgery or obstetrics and gynecology.

"Categorical First Year—The asterisk designates a first-year program that was planned, sponsored, and supervised by a single, approved residency program as part of that residency's program of graduate medical education, the content of which will not be limited to the single specialty of the sponsoring residency program but may have included experience in two or more specialty fields."

The categorical first year in neurology must have included at least four months with direct patient care responsibility in internal medicine, family practice or pediatrics.

"Flexible First Year—The first year will be sponsored by two or more approved residencies and will be jointly planned and supervised by the residencies that sponsor it. Such a first year is designed to give a broad clinical experience for: (a) students who feel the need for this type of first year, (b) program directors who feel that such an experience will best serve the purpose of subsequent graduate education in their field; and (c) students who have not yet decided on their specialty but may wish to choose among several fields during their first graduate year. The content of a flexible first year must include four months of internal medicine, but the remainder of the year may be designed in accordance with the purposes of the two or more sponsoring residency programs, and the interests and needs of the student."

"Transitional Programs—Transitional programs are provided for physicians who desire in their first or later graduate year an experience in several specialties prior to embarking on further training in a single specialty."

Psychiatry and Neurology
Psychiatry and Neurology

The criteria for a transitional year are outlined in the Directory of Graduate Medical Education Programs published by the American Medical Association.

2. Four-Year Training Programs:
A neurology residency program approved by the ACGME for four years of training would be acceptable.

Certificate in Neurology With Special Qualification in Child Neurology

References to “residency” refer to entry at the FGY-2 level unless stated otherwise.

Proper preparation for the practice of child neurology requires that the practitioner be a qualified neurologist who has had additional training in pediatrics and child neurology. To qualify for this certificate a different type of preparation and certifying examination are required. The same diploma will be used, the only difference being that instead of certifying qualification in “neurology,” it certifies qualification in “neurology with special qualification in child neurology.” Training may be completed on a part-time basis, provided that it is no less than half-time, and credit will not be given for less than one-year blocks of training except under special circumstances which must be approved by the ABPN Credentials Committee for Neurology. To ensure continuity of training, the Board requires that two years of the three years of neurology residency be spent in a single program. An applicant seeking admission to examination for certification in neurology with special qualification in child neurology must have completed the following training in ACGME-approved programs:

1. Two (2) years of residency training in general pediatrics; or
   One (1) year of residency training in general pediatrics and one (1) year of residency training in internal medicine.
2. Three (3) years of residency training in neurology which includes:
   a. One (1) year of adult clinical neurological residency.
   b. One (1) year of neurological residency devoted to clinical child neurology.
   c. One (1) year in neurology in which the trainee may be offered experience in (a) basic neurological sciences such as: neuroanatomy, neurophysiology, neuropathology, neuropharmacology, neurochemistry, neurogenetics, and molecular biology; (b) closely related specialties such as neuroradiology, neurosurgery, neuroophthalmology, child psychiatry, and child psychology; and (c) special studies and laboratory procedures; and (d) clinical and/or laboratory research, all relevant to the training of an effective practitioner and investigator in the field of child neurology.

Applicants for special qualification in child neurology who begin residency training as of July 1, 1991, must complete their child neurology training in ACGME-approved child neurology programs.

Certificate in Child and Adolescent Psychiatry

Each applicant for certification in child and adolescent psychiatry must be certified by the Board in the specialty of general psychiatry prior to applying for examination in child and adolescent psychiatry. The general policies regarding training, application and examination in child and adolescent psychiatry are contained in the pamphlet “Information for Applicants for Certification in Child and Adolescent Psychiatry,” which is available from the Executive Office.

Certificate in Added Qualification in Geriatric Psychiatry

Each applicant for certification in added qualification in geriatric psychiatry must be certified by the Board in the specialty of psychiatry prior to applying for examination in added qualification in geriatric psychiatry. The general policies regarding training, application and examination in added qualification in geriatric psychiatry are contained in the pamphlet “Information for Applicants for Certification in Added Qualification in Geriatric Psychiatry,” which is available from the Executive Office.

Certificate in Added Qualification in Clinical Neurophysiology

Each applicant for certification in added qualification in clinical neurophysiology must be certified by the Board in the specialty of neurology, neurology with special qualification in child neurology, or psychiatry, prior to applying for examination in added qualification in clinical neurophysiology. The general policies regarding training, application and examination in added qualification in clinical neurophysiology are contained in the pamphlet “Information for Applicants for Certification in Added Qualification in Clinical Neurophysiology,” which is available from the Executive Office.

Experimental Triple-Board Requirements

The American Board of Pediatrics, the American Board of Psychiatry and Neurology, and the Committee on Certification in Child and Adolescent Psychiatry of the American Board of Psychiatry and Neurology, have developed a committee that is overseeing training via a different format in six pilot programs. This is a five year curriculum with 24 months of pediatrics, 18 months of adult psychiatry and 18 months of child and adolescent psychiatry. Completion of the program will satisfy the training requirements for certification in all three areas. Physicians pursing training in one of these six pilot programs may not apply for examination until all training has been completed. The six programs involved are located at Albert Einstein College of Medicine, Brown University, Mount Sinai School of Medicine, Tufts University School of Medicine, the University of Kentucky, and the University of Utah. For further information please contact the American Board of Pediatrics, 111 Silver Cedar Court, Chapel Hill, NC 27514-1651.

Supplementary Certification

References to “residency” refer to entry at the FGY-2 level unless stated otherwise.

A candidate who has been certified in psychiatry, neurology or neurology with special qualification in child neurology may apply for supplementary certification in another specialty upon submission of a new Part I application and Part I examination fee. If the credentials for such other certificate are acceptable to the Board, the candidate will be scheduled for the next available Part I examination in the supplementary subject.

Only one application per candidate is considered at one time. For example, if an application is being considered for psychiatry, an application for neurology will not be considered until certification is achieved in psychiatry or if the application for psychiatry is withdrawn.

A. DUAL CERTIFICATION IN PSYCHIATRY AND NEUROLOGY

1. For applicants seeking certification both in psychiatry and neurology who have begun residency training prior to January 1, 1988, a total of five years of ACGME-approved postgraduate training is required. A PGY-1 which meets requirements for either psychiatry or neurology; two years of approved residency in psychiatry in a single training program; and two years of approved residency in neurology in a single training program.
2. Applicants seeking certification both in psychiatry and neurology who begin postgraduate training as of January 1, 1988, must complete a PGY-1 which meets the requirements for entry into a neurology program. Additionally, applicants must complete (a) six full years of postgraduate residency training in approved programs in the United States or Canada including three full years in psychiatry and three full years in neurology, or, (b) at the discretion and approval of both training directors and in accordance with Residency Review Committee requirements, the applicant may complete five full years of postgraduate training in approved programs in the United States or Canada, including two full years of residency training in psychiatry in a single program, two full years of residency training in neurology in a single program, and a full year that is jointly sponsored and coordinated by the Psychiatry and Neurology training directors to allow the resident to successfully complete all of the essentials for an approved residency program in psychiatry and an approved residency program in neurology.

The five years of residency training are usually taken at one approved institution, but may be taken at no more than two approved institutions. An application for examination may be submitted after completion of an approved PGY-1, two full years of approved residency training in one specialty, and the full year of approved, jointly-sponsored residency training.

B. DUAL CERTIFICATION IN NEUROLOGY AND NEUROLOGY WITH SPECIAL QUALIFICATION IN CHILD NEUROLOGY

Candidates who have achieved certification in neurology and are desirous of gaining certification in neurology with special qualification in child neurology shall be required to request and submit a new, completed Part I application and a $275.00 processing fee. Such candidates will not be required to re-take the Part I examination in neurology. The Part II examination fee will be requested after the application has been approved. Two one-hour examinations in child neurology will be taken during Part II examinations.

C. DUAL CERTIFICATION IN CHILD AND ADOLESCENT PSYCHIATRY AND IN NEUROLOGY WITH SPECIAL QUALIFICATION IN CHILD NEUROLOGY

An applicant who wishes to obtain certificates both in child and adolescent psychiatry and in neurology with special qualification in child neurology, must meet the following requirements. He or she must be certified by the Board in the specialty of general psychiatry prior to applying for examination in child psychiatry. The applicant must also meet the requirements for certification in neurology with special qualification in child neurology. A minimum of two years of approved residency training in general psychiatry is required.

Applicants with Non-U.S./Non-Canadian Training

The following criteria pertain to all applicants whose residency training was undertaken at a center located outside the United States or Canada. The candidate must possess an unlimited license to practice medicine in a state, commonwealth, or territory of the United States or province of Canada.

For Neurology

The only training which will be considered is, training completed in programs approved by the Accreditation Council for Graduate Medical Education (ACGME) in the United States, or the Royal College of Physicians and Surgeons in Canada, will be considered. In lieu of a PGY-1 in an accredited program in the United States or Canada, the MRCP(UK), the MRACP (New Zealand and Australia), the MRCP(I) (Ireland), and the FCP(SA) (South Africa) certificates will be accepted.

For Psychiatry

These criteria also apply to applicants who completed residency training in the United Kingdom prior to July 1, 1976.

1. The candidate must have had full-time specialty training in a manner equivalent in length of time and content to that required for U.S. training and

2. The candidate must successfully complete a comparable national certification examination in the country of training in the specialty in which the physician is seeking admission to examination and

3. The candidate must have achieved certification within the past seven (7) years. If certification was achieved earlier, then the candidate must have had one year of clinical practice in a setting in which his or her professional work has been observed by at least two ABPN diplomates in that specialty and documented by two letters of sponsorship from such diplomates.

At present, the only certifications recognized by the Board as clearly equivalent for psychiatry are the United Kingdom's MRCPsych (Member of the Royal College of Psychiatrists), Australia and New Zealand's FRANZCP (Fellow of the Royal Australian and New Zealand College of Psychiatrists), the South African Medical and Dental Council's F.F. Psych (SA) (Fellowship of the Faculty of Psychiatry of the College of Medicine of South Africa) and Israel's Specialty Certification of the Scientific Council of the Israel Medical Association.

As of July 1, 1985, all applicants for admission to examination, with the exception of those who have a certificate and training in its entirety in one of the above-mentioned countries, must have an approved year of primary care training in the United States or Canada.

Training Credit for Applicants in Psychiatry from the United Kingdom

The following criteria apply to all applicants for Psychiatry who began their psychiatric residency training on or after July 1, 1976.

For each year of psychiatric residency training completed in an approved hospital program in the United Kingdom, one year of training credit will be given toward eligibility for examination by the Board in Psychiatry.

The hospital program must be among those approved by the Visiting Inspecting Specialty Committee in Psychiatry of the Royal College of Physicians.

In order to obtain credit for two or three years of approved training in the United Kingdom, at least two years of the training must be spent at the same training center in psychiatry.

The applicant will be responsible for sending the details of his or her training to the American Board of Psychiatry and Neurology's Executive Office, along with verification of this training from the approved hospital or hospitals in the United Kingdom. The applicant's program director must certify that the applicant was engaged in full-time residency training.

As of July 1, 1985, all applicants for admission to examination must have an approved year of primary care training in the United States or Canada. The exception is restricted to those applicants who hold the MRCPsych certificate and training completed in the United Kingdom in its entirety. If training in its entirety was not completed in the United Kingdom, the applicant must complete an additional year of approved primary care training in the U.S. or Canada.

Applicants who have completed residency training in the United Kingdom prior to July 1, 1976, must meet the criteria outlined in the section "Applicants With Non-U.S. Training."

Examinations

The Board does not endorse or recommend any tests or other teaching aids identified as "Board Preparation" material. Furthermore, the Board does not have any affiliation with or responsibility for programs identifying themselves as "Board Review Courses."
Psychiatry and Neurology

Though the purpose of the examination is to test the qualification of the candidate in psychiatry or neurology, or both, it must not be forgotten that both these medical disciplines constitute part of the broad field of general medicine. The Board requires proficiency in neurology on the part of those it certifies in psychiatry and vice versa, but examines the candidate in accordance with the certificate he or she seeks. The Board uses DSM-III-R as its primary authority in psychiatric diagnostic nomenclature.

Each candidate must pass both Part I and Part II of the examinations given by the Board. Each examination shall cover such subjects as the Board may determine.

The Board may conduct such examinations at such times and places as it deems appropriate. The Board reserves the right to limit the number of candidates admitted to any scheduled examination. The administration and grading of all examinations shall be at the sole discretion of the Board. After completion of such examinations, the candidate will be notified in writing by the Executive Vice President as to the results.

The Board is not liable for candidate travel and/or related expenses incurred as a result of an examination cancellation.

Rules on Forfeiture of Part II Examination Fees

A candidate who is unable to attend the Part II examination to which he or she has been admitted and who fails to notify the Executive Vice President in writing at least three (3) months before the start of such examination shall forfeit the examination fee. All fees may be modified from time to time as necessary.

Part I Examination Content

Successful completion of the Part I written examination in psychiatry and neurology is required of candidates seeking certification in either psychiatry, neurology; or neurology with special qualification in child neurology.

Examination for Psychiatry Candidates

The psychiatric portion of the examination will include questions on the following areas in psychiatry: normal and abnormal growth and development through the life cycle, biological dimensions of psychiatry, psychosocial dimensions, and clinical psychiatry (phenomenological, diagnosis and treatment).

The neurologic portion of the examination will include questions on the following areas in neurology: clinical neurology, neuroanatomy, neuropathology, neuropharmacology and clinical diagnostic procedures (including questions on cerebrospinal fluid, neuroophthalmology, electroencephalography, and neuroimaging) and therapy and management of patients with neurologic disorders.

Examination for Neurology Candidates

The neurological portion of the examination will include questions on the following areas in adult and child neurology: neuroanatomy, neuropathology, neurochemistry, neurophysiology, basic and clinical neuropharmacology, neuroimrnunology/neurovirology, genetics, neuroendocrinology, neuroimaging, neuro-ophthalmology, neuro-otology, and cerebrospinal fluid.

The psychiatric portion of the examination will include questions on the following areas in psychiatry: developmental and other disorders of childhood, psychopathology and diagnostic criteria, the doctor-patient relationship, behavioral and personality changes associated with structural alterations, alcoholism, and substance abuse, altered states of consciousness, memory disorders and cortical dysfunction, psychiatric problems associated with medical disease, diagnostic procedures, psychopharmacology, and other nonpharmacologic therapeutic modalities.

Part I Examination Procedures

The Part I examination is given once a year, in the spring, on a regional basis throughout the United States and Canada, as well as in selected sites outside the continental limits of the United States. Applicants will be expected to indicate, in order of preference, their choice of four examination sites. Every effort is made to accommodate candidates in the locale of their choice, but transfer to another site cannot be made during the three-month period preceding the Part I examination.

An applicant will be advised by the Board of acceptance for examination.

One month prior to the examination candidates will receive an admission notice specifying their examination date and time to report for examination.

All candidates are required to sit for Part I examination for which they have applied. Applicants who fail to do so will be required to request and submit a new application, supporting documentation and Part I examination fee.

A candidate who passes Part I shall, upon request, submit to the Executive Vice President a check payable to the Board to cover the fee for Part II. The Part II examination is given three to four times a year at selected locations in the United States. Candidates who pass Part I will automatically be assigned to a Part II examination with a specific date and location. The limited space available and the complicated logistics involved in administering the Part II examination make it impossible for the Board to allow candidates to select either the site or the date for Part II examination. Candidates assigned to Part II examination are expected to be present as scheduled. All candidates will be scheduled for the Part II examination within one year following notification of successful completion of Part I.

A candidate who fails the initial Part I examination may, upon payment of the Part I re-examination fee, repeat the examination the following year. Re-examinees who do not sit for re-examination as scheduled will be required to request and submit a new application, all supporting documentation and Part I examination fee. Two failures necessitate re-application (request for a new application, all supporting documentation and Part I examination fee).

Through April, 1986, a passing grade on the Part I examination will be valid for a period of seven (7) years from the date of passing. All individuals holding such a grade may apply or re-apply for the Part II examination. Effective March, 1987, a passing grade on the Part I examination dated March, 1987 or thereafter, will be valid for a period of six (6) years or three (3) attempts to complete the Part II examination successfully, whichever comes first.

Appeal Procedure for Negative Determinations Regarding Part I Examinations

A failing grade on the Part I examination is considered a "negative determination." A candidate who receives a negative determination may appeal by complying with the following procedures:

Within thirty (30) days after notice of a negative determination, the unsuccessful candidate may, by writing, indicate his/her request to have his/her examination hand-scored. The appeal fee of $300.00 must accompany the request. The candidate will be informed of the results of the handscoring in writing which, in all events, will be final and binding on the Board and on the candidate. All correspondence or other materials should be sent to the Board office.
Part II Examination Content

Part II, an oral examination, will include the examination of patients under the supervision of one or more examiners. The manner of examining patients, and the reasoning and deductions therefrom will constitute an important part of the examination. Knowledge of basic science principles, special diagnostic procedures, and management recommendations and risks are also essential parts of this examination, which is focused upon evaluation of clinical skills.

Candidates are expected to discuss the patient and their findings with their examiners. Questions frequently cover such areas as diagnosis, differential diagnosis, treatment, prognosis and management. Reference to the basic sciences of psychiatry and neurology may be made.

**Psychiatry candidates** will take two examinations:

1. One-hour examination in clinical psychiatry (patient)
2. One-hour examination in clinical psychiatry (audio-visual)

In the patient section, the psychiatry candidate will be given 30 minutes to examine a patient under the supervision of one or more examiners. Following the examination of the patient, the candidate will be examined by one or more examiners. This section will stress physician-patient interaction, conduct of the clinical examination, capacity to elicit clinical data, formulation, differential diagnosis and prognosis, therapeutic management and knowledge of therapies. Additional questions may be addressed to the basic science of psychiatry.

The psychiatry audio-visual section will consist of a 20-minute videotaped psychiatric examination which the candidate will observe. Candidates will then be individually examined by one or more examiners with particular reference to content of the tape. This discussion may also include other clinical topics.

**Neurology candidates** will take three examinations:

1. One-hour examination in clinical neurology (patient)
2. One-hour examination in clinical neurology (without patient)
3. One-hour examination in clinical child neurology (without patient)

**Child neurology candidates** will take three examinations:

1. One-hour examination in clinical neurology (without patient)
2. One-hour examination in clinical child neurology (patient)
3. One-hour examination in clinical child neurology (without patient)

Since candidates in child neurology are to be certified in "Neurology with Special Qualification in Child Neurology," it is agreed that those candidates will be expected to pass a one-hour oral examination in clinical neurology (without patient) which is set at the same level of difficulty established for neurology candidates. The pass/fail standards for that hour in clinical neurology (without patient) will be the same whether the candidate is seeking certification in neurology or in neurology with special qualification in child neurology.

In the neurology and child neurology patient sections, the candidate will be given 30 minutes to examine the patient under the supervision of one or more examiners. During the conduct of the examination, the candidate's ability to obtain an adequate history and perform a neurological examination will be observed. Following examination of the patient, the 30-minute discussion with examiners will focus on the evaluation of the findings and discussion of the diagnosis, treatment and management. This discussion may not be limited to the patient examined and may also include other clinical topics. The examiners may also ask additional questions concerning the basic science of the particular section. Multiple written simulated patient encounters will be utilized as a basis for discussion of diagnosis and treatment in those sections in which there is no patient present.

**Part II Examination Procedures**

All successful Part I candidates will receive a notice of assignment to a Part II examination together with a request to submit the required examination fee. Scheduling for the Part II examination will be made on a regional basis as much as is possible. Candidates who fail to take Part II as scheduled by the Board will be required to reapply for the Part II examination.

The limited space available and the complicated logistics involved in administering the Part II make it impossible for the Board to allow candidates to select either the site or the date for examination. It is the candidate's privilege to decline the assigned examination, but there is no guarantee that another date or location will be available within the year's examination cycle.

Candidates who do not pay the Part II examination fee for their scheduled examination by the deadline specified, will be removed from the roster of candidates for that examination. Such candidates will be required to request and submit a Part II application in order to be scheduled for a future Part II examination. Examination fees will be requested at the appropriate time.

Candidates who pay their Part II examination fee but fail to appear at their scheduled Part II examination, will forfeit the fee unless three months written notice has been given. Such candidates will be required to request and submit a Part II application in order to be scheduled for a future Part II examination. Examination fees will be requested at the appropriate time.

One month prior to the date of the assigned Part II examination, a candidate will receive informational materials and an admission notice specifying the time and date to report for registration. Candidates are requested to report for registration only at the time indicated on the admission notice. Registration schedules are arranged to accommodate candidates in accordance with their examination schedules.

The Board office is unable to provide information concerning specific examination schedules prior to registration.

**Policy for Retaking of Part II Examination**

Through April 1986 a passing grade on the Part I examination will be valid for a period of seven (7) years from the date of passing.

Effective March, 1987, a passing grade on the Part I examination dated March, 1987, or thereafter, will be valid for a period of six (6) years, or three (3) attempts to complete the Part II examination successfully, whichever comes first.

In order to complete the Part II examination successfully, a candidate must pass both major and minor subjects.

1. A candidate who passes both sections of the major subject of the Part II examination need not repeat this portion of the examination. To pass the major subject, the candidate must achieve final passing grades on both sections of the major subject at the same examination. A candidate who fails one or both sections of the major subject must take both hours of examination in the major subject at each subsequently scheduled examination until he or she passes both sections at the same examination.

2. Candidates who pass the Part II examination in the minor subject(s) need not repeat this portion of the examination.

3. Candidates who are unsuccessful in the Part II examination during the time period allowed to complete the Part II examination will be required to request and submit a new Part I application, documentation and Part I examination fee.

**Procedures for Retaking of Part II Examination**

Candidates who have failed the Part II examination are automatically assigned to another Part II examination and are required to be present as scheduled. Candidates who fail to take the re-examination at the time specified are required to request and submit a Part II application. Candidates submitting the Part II application will be scheduled for exami-
Psychiatry and Neurology

nition within one year, if possible, from the date the Part II application is received in the Board office. Candidates will be scheduled for exam- ination based on space availability and order of receipt of application. Invitations will be sent at least two months prior to the scheduled examination. A request for the examination fee will be made at that time. The examination fee should not be sent with the application.

Candidates who have submitted a Part II application may choose to decline two invitations to Part II examinations. If the third invitation is declined, the candidate will be required to request and submit a new Part II application and will be placed at the end of the waiting list once the application is received in the Board office.

Candidates should be aware of the expiration date of their passing the Part I examination and the number of times they have taken the Part II examination.

Feedback to Unsuccessful Candidates on the Part II Examination

A failing grade on a Part II examination is considered a "negative determination." Within thirty (30) days after date of notice of a negative determination, the unsuccessful candidate may, by writing, indicate his/her request for feedback. The fee for providing feedback is $100.00 and must accompany the written request. After such request, the candidate will be provided information concerning his/her performance in the form of a checklist of categories passed and not passed. All correspondence or other materials should be sent to the Board office.

Appeal Procedure for Negative Determinations Regarding Part II Examinations

A failing grade on a Part II examination is considered a "negative determination." A candidate who receives a negative determination may appeal by complying with the following procedure: Within fifty-five (55) days after date of notice of a negative determination, the unsuccessful candidate may, by writing, indicate his/her request for a formal appeal of the examination results. The following materials must accompany this request: appeal fee which is equal to the candidate's re-examination fee, written information (plus three copies) tending to rebut the negative determination. The Committee to Review Appeals will review the materials and recommend action to the Board. The Board will review the materials and make a decision which, in all events, will be final and binding on the Board and on the candidate. All correspondence or other materials should be sent to the Board office.

Unethical Behavior of Candidates

Since the Board believes that the ethics of candidates for certification is a matter for its proper concern, it has adopted the following rules:

1. The falsification of credentials will be cause for the Board's refusal to admit a candidate to examination for at least four (4) years.

2. The Board will consider legal action against anyone for forges an ABPN certificate, copies ABPN examinations or otherwise uses them in conflict with copyright laws, or in any other way violates the legal prerogatives of the Board. Such activities will also be cause for the Board's refusal to admit a candidate to examination for at least four (4) years.

3. Scores on the Part I examination may be invalidated for reasons of irregular behavior that indicates cheating. Statistical analyses may be used to confirm such behavior. If the examination score is invalidated the candidate may submit a written appeal within 30 days of notice of invalidation. An appeal fee of $275.00 must accompany the written appeal. The Committee to Review Appeals will review the materials and recommend action to the Board. The Board will review the materials and make a decision which, in all cases, will be final and binding on the Board and on the candidate. All correspondence or other materials should be sent to the Board office. If the examination score is invalidated because of irregular behavior, the Board will not consider the candidate for examination for a period of at least four (4) years. A repeat application and Part I examination fee will be required.

4. Irregular behavior that indicates cheating on the Part II examination may be considered sufficient reason to invalidate the candidate's score. In that event, the Board will not consider the candidate's repeat application for Part II for a period of at least four (4) years. Another Part II examination fee will be required.

5. "Irregular behavior that indicates cheating" shall include, but not be limited to, the following conduct: (i) copying of answers from another candidate's examination; (ii) knowingly permitting another candidate to copy one's answers on an examination; (iii) unauthorized possession, reproduction, or disclosure of materials, including examination questions or answers, before, during or after the examination; (iv) use of audio equipment to record any part of the Part II examination; (v) offering any financial or other benefit to any Director, officer, employee, proctor, diplomat, or other agent or representative of the Board in return for any right, privilege or benefit which is not granted by the Board to other similarly situated candidates or persons.

6. Notice of the Board's action may be sent to legitimately interested third parties, including the American Medical Association, state medical societies, and appropriate specialty societies.

7. A proposal to impose on a candidate one of the penalties identified in paragraphs 1, 2, 4, and 6 hereof shall constitute a "negative determination" subject to the "Appeal Procedure for Negative Determinations Regarding Application," or the "Appeal Procedure for Negative Determinations Regarding Part II Examinations."

8. Upon the expiration of the four-year period cited in paragraphs 1, 2, 3 and 4 hereof, the candidate may send to the Board a written request for lifting of the ban, together with a written explanation of the reasons for lifting of the ban, which will then be reviewed by the Board for a final decision. The decision will be final and binding on the Board and on the candidate. All correspondence and other materials should be sent to the Board office.

Committee on Certification in Child and Adolescent Psychiatry

Joel P. Znall, MD, Chair, Toledo, Ohio
Theodore Shapiro, MD, Vice Chair, New York, New York
Lois T. Flaherty, MD, Secretary-Treasurer, Baltimore, Maryland
Catherine DelAngelis, MD, Baltimore, Maryland
Thomas Hanzl, MD, Raleigh, North Carolina
Kenneth Robson, MD, Hartford, Connecticut
William H. Sack, MD, Portland, Oregon

Application and Fees

An applicant who wishes to be certified in child and adolescent psychiatry shall complete, sign and file with the Executive Vice President of the Board an application on the official form together with the required supporting data. Photocopies and old applications are not acceptable. Applications may be obtained from the Executive Vice President. The application shall be accompanied by a check payable to the Board for the application fee of $250.00 and the examination fee of $825.00. The application fee is not refundable. Examination fees are not refundable unless the application is rejected.

No application will be considered until the fee and all required data have been received by the Executive Vice President. The application, supporting data and fee must be received by the Board no later than the May 1 preceding the Fall examination for which the candidate is applying.
Determinations of applicants' acceptability will be made in accordance with the rules and regulations of the Board. Those applicants accepted for examination will be notified and scheduled for examination.

Applicants denied admission to the examination will be notified of their deficiencies in meeting the standards of the Committee.

Applications will remain active for two consecutive examinations only. Candidates who fail to present themselves for the next scheduled examination following the date of acceptance of the applications will be required to submit a new application and all documentation and pay a new application fee and examination fee.

The number of spaces available for examination may be limited. After the quota is filled, applications will be placed on a waiting list in order of receipt in the Board office. In the event that a candidate is not accepted for the examination for which he or she applied due to space limitations, his or her application will be held over for the following year's examination.

All completed applications must be received in the Board office no later than May 1 preceding the date of examination for which the candidate is applying. Applicants who do not receive notification from the Board office by July 1 of acceptance or rejection of their application should contact the Board office promptly in writing to inquire about the status of the application.

General Requirements

Each applicant for certification in child and adolescent psychiatry must comply with the following requirements:

a. He or she must have been certified by the Board in the specialty of general psychiatry prior to submitting an application for examination in child and adolescent psychiatry. He or she must at all times continue to meet all requirements of the Board for certification in general psychiatry.

b. He or she must have satisfactorily completed the Board's specialized training requirements in child and adolescent psychiatry.

Training Requirements

All candidates beginning their specialized training in child psychiatry must have the equivalent of two years of full time training in child psychiatric centers approved by the Residency Review Committee for Psychiatry of the Accreditation Council for Graduate Medical Education. All training must be completed in the U.S.

The exposure to child psychiatry given to most general psychiatry residents as part of their basic psychiatric curriculum will not qualify for this credit.

The two years of full time specialized training in child psychiatry are usually taken at one center, but may be taken at no more than two centers. If training is taken at two centers, the training director of each center must evaluate the candidate's training in that center. Training may also be completed in three years at two-thirds time or two years at one-half time plus one year at full time. No credit will be given for training done less than one-half time.

The training director of the second center is responsible for ensuring that the total two years of the candidate's specialized child psychiatry training in the combined program is balanced to meet the essentials of the second training program as these have been described and submitted to the Board. A minimum of one year of training must be taken at the second center.

Candidates who have completed at least one year of approved pediatric training at RESIDENCY level (PL-2 and beyond the categorical PGY-1 or PL-1 year) may be granted up to six months' credit toward child psychiatry training requirements. The six months' credit may be granted if the director of the child psychiatry training program recommends such credit, and if the candidate completes a minimum of one year of training in that child psychiatry program (in the event that training is split between two child psychiatry training programs). This recommendation should be set forth in the form of a letter from the director of the training program to the child psychiatry trainee. A copy should be attached to the application for examination in child psychiatry. This letter should specify the following:

1. The exact dates of the pediatric training for which child psychiatry training credit is being granted and the pediatric residency program in which the training was obtained;

2. The exact number of months of credit being granted toward child psychiatry training.

Thus, the following patterns of specialized training in child psychiatry are acceptable:

1. Two years of training in basic psychiatry, plus two years of training in child psychiatry;

2. Two years of training in basic psychiatry and at least 18 months of training in child psychiatry, plus up to (but not more than) six months of child psychiatry training credit for one year of pediatric training at RESIDENCY level (PL-2 and beyond the categorical PGY-1 or PL-1 year). The total minimum amount of child psychiatry training is TWO FULL YEARS.

Any trainee or potential trainee in child psychiatry who contemplates a training program at variance with one of the above training patterns is advised to submit his or her proposed training sequence to the Executive Vice President of the Board. This advice is given for the purpose of aiding the Board in determining whether the proposed training is likely to meet requirements for admission to examination.

The applicant should obtain from his or her training director(s) a statement certifying satisfactory completion of the training requirements during the period for which training credit was granted.

The Committee may require, at its discretion, submission of the publications of the applicant and/or a series of case reports of children treated by the applicant, as part of the qualifications of acceptability for examination for certification in child psychiatry.

Examinations

The Committee on Certification in Child and Adolescent Psychiatry does not endorse or recommend any texts or other teaching aids identified as "Board preparation" material. Furthermore, this Committee does not have any affiliation with or responsibility for programs identifying themselves as "Board Review Courses."

Examinations are given once a year. The Committee reserves the right to limit the number of candidates admitted to any scheduled examination. There will be oral and written examinations which will include examination in all areas relating to normal personality development and pathological deviations from infancy through adolescence. The examinations will cover any area of developmental disturbance, etiological mechanisms, and therapeutic measures and planning. Knowledge and critical understanding of the history and literature of child psychiatry as they apply to practice in the field will constitute a part of the examination. The utilization of psychological testing, contributions of collaborative personnel, and types of social planning will be included in the examination. A major part of the examination will assess the candidate's ability to make use of their observations and of material presented, to formulate a differential diagnosis, and to organize a practical program of therapy and management from these data. The focus of the written examination is on the general literature in child psychiatry, including history, theory, child development and child psychopathology. The majority of questions are from the literature of the past ten years, with emphasis on the past five years. The written examination is not
Psychiatry and Neurology

designed to test primarily for clinical skill, since this is done in the oral examination sections.

The examination consists of a written examination, covering all areas of child and adolescent psychiatry noted above, plus the following three oral examinations:

1) A 75-minute examination on preschool/grade school;
2) A 60-minute examination on adolescence;
3) A 45-minute examination on consultation.

The examination covering the preschool and grade school aged children will be given as one continuous examination lasting 75 minutes. During this time the candidate will be presented with one videotape segment and one typewritten vignette, each depicting a clinical case example. In the instance where the videotape is of a preschool aged patient, the written vignette will be based on the case of a grade school aged child, and vice versa. Candidates are evaluated on their ability to observe and describe the most significant behaviors of the child and to determine the additional data needed to define the clinical situation, formulate a differential diagnosis and treatment plan.

The examination in adolescence will include the psychiatric examination of an adolescent under the supervision of an examiner. The manner and process of interviewing the adolescent and the reasoning and deductions therefrom, including differential diagnosis and treatment plan, will constitute an important part of the examination.

The examination on consultation will include short vignettes focusing on consultation with medical colleagues, schools, courts, and social agencies. The examination allows time for candidates to show their familiarity with community resources and how to facilitate their utilization. The candidate should demonstrate understanding of the principles of consulting and working appropriately with other professional disciplines. Questions may also be asked about consultative problems such as child abuse, psychophysiological disorders, deinstitutionalization and learning disabilities.

Certification requires successful completion of all sections of the examination.

The current regulations for failure or conditional pass (condition) of the examination for certification in child psychiatry are as follows:

Failure: Fails two (2) or more oral sections of examination.
Fails two (2) or more oral sections and the written examination.

A candidate who fails the examination must upon re-examination repeat the entire oral examination. The written examination must be repeated only if it has been specified that the written examination has been failed.

Condition: Fails one (1) oral section of the examination and/or the written examination.

A candidate who fails only one section of the oral examination must repeat only that section. If only one oral section and the written examination are failed then only that section and the written examination must be repeated.

Effective with the February 1978 examination passage of the written examination is valid for a period of seven (7) years.

Effective with the February 1980 examination passage of all portions of the oral examination is valid for a period of four (4) years.

Candidates who are unsuccessful in their initial examination must appear for the next child and adolescent psychiatry examination as scheduled.

Candidates who are unsuccessful in completing any portion of the oral examination in their re-examination or candidates who do not take their scheduled re-examination must request and submit a new completed application, application fee, and examination fee in order to pursue certification. Any candidate who elects not to attend an examination to which they have been admitted will forfeit the examination fee and the application fee. Such candidates must request and submit a new application and application fee and examination fee.

Appeal Procedure for Negative Determinations Regarding Applications

A rejection of credentials for admission to an examination is considered a "negative determination." An applicant who has submitted a formal application and receives a negative determination regarding his/her application may appeal by complying with the following procedures:

Within thirty (30) days after date of notice of a negative determination the applicant may, by writing, indicate his/her request for a formal appeal of his/her application rejection. The following materials must accompany this request: appeal fee which is equal to the application fee, any additional written information (plus three copies), tending to rebut the negative determination. The Credentials Subcommittee will review the materials and recommend action to the Committee. The Committee will review the materials and make a decision which, in all events, will be final and binding on the Committee and on the applicant. All correspondence or other materials should be sent to the Board office.

Appeal Procedure for Negative Determinations Regarding the Written Examination

A failing grade on the written examination is considered a "negative determination." A candidate who receives a negative determination may appeal by complying with the following procedures:

Within fifty-five (55) days after date of notice of a negative determination, the unsuccessful candidate may, by writing, indicate his/her request to have his/her examination hand-scored. The appeal fee of $25.00 must accompany the request. The candidate will be informed of the results of the hand-scoring in writing which, in all events, will be final and binding on the Committee and on the candidate. All correspondence or other materials should be sent to the Board office.

Appeal Procedure for Negative Determinations Regarding Oral Examinations

A failing grade on the oral examination is considered a "negative determination." A candidate who receives a negative determination may appeal by complying with the following procedure:

Within fifty-five (55) days after date of notice of a negative determination the unsuccessful candidate may, by writing, indicate his/her request for a formal appeal of the examination results. The following materials may accompany this request: appeal fee which is equal to the candidate’s re-examination fee, written information (plus three copies) tending to rebut the negative determination. The Subcommittee on Review Appeals will review the materials and recommend action to the Committee. The Committee will review the materials and make a decision which, in all events, will be final and binding on the Committee and on the candidate. All correspondence or other materials should be sent to the Board office.

Amendment of Rules and Regulations

The Board of Directors has authority to issue and amend from time to time, rules and regulations relating to the issuance and revocation of certificates in child and adolescent psychiatry.
Revocation of Certificates

The Board and Committee shall have the authority to revoke any certificate issued by it or to place a certificate holder on probation for a fixed or indefinite time if:

(a) The certificate was issued contrary to or in violation of the Bylaws or any rules and regulations of the Board or Committee.

(b) The person to whom the certificate was issued made any material misstatement or omission of fact to the Board or Committee in his or her application or otherwise.

Certification is in force so long as the holder has a valid license to practice medicine.

AMERICAN BOARD OF RADIOLOGY

Thomas F. Meaney, MD, President, Englewood, Florida

(EDITOR'S NOTE: These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Radiology to ascertain whether the information they have is current.)

Certificates

A certificate will be issued to each candidate who has finished a prescribed and approved period of training and study and has passed a written and oral examination demonstrating an adequate level of knowledge and ability in diagnostic radiology and/or diagnostic radiology with special competence in nuclear radiology; or radiation oncology in accordance with the definitions as stated in the Bylaws and Rules and Regulations of The American Board of Radiology.

A certificate granted by the Board does not of itself confer, or purport to confer, any degree, or legal qualifications, privileges, or license to practice radiology.

Definitions

1. DIAGNOSTIC RADIOLGY is that branch of radiology which deals with the utilization of all modalities of radiant energy in medical diagnosis and therapeutic procedures utilizing radiologic guidance. This includes, but is not restricted to imaging techniques and methodologies utilizing radiations emitted by x-ray tubes, radionuclides, ultrasonographic devices, and radiofrequency electromagnetic radiation emitted by atoms.

2. NUCLEAR RADIOLGY is that branch of radiology which involves the analysis and imaging of radionuclides and radiolabeled substances for in-vivo imaging and nonimaging procedures for diagnosis and the administration of radionuclides and radiolabeled substances for the treatment of disease.

3. RADIATION ONCOLGY is that branch of radiology which deals with the therapeutic applications of radiant energy and its modifiers and the study and management of disease, especially malignant tumors.

Qualifications of Applicants for Certification by the American Board of Radiology

Each applicant for admission to an examination for a certificate to be issued by The American Board of Radiology in diagnostic radiology, diagnostic radiology with special competence in nuclear radiology, and/or radiation oncology shall be required to present evidence satisfactory to the Board that the applicant has met the following standards:

A. General Qualifications

That the applicant is a specialist in diagnostic radiology, diagnostic radiology with special competence in nuclear radiology, and/or radiation oncology as outlined in Article II, Section 2, of the Rules and Regulations, AND IS RECOGNIZED BY HIS HER PEERS TO HAVE HIGH MORAL AND ETHICAL STANDARDS IN HIS HER PROFESSION.

B. General Professional Education

Graduation from a medical school accredited at the date of graduation by the Liaison Committee on Medical Education of the American Medical Association; or the Royal College of Physicians and Surgeons of Canada; or from a College of Osteopathic Medicine approved by the American Osteopathic Association. If the applicant is a graduate of a medical school outside the United States or Canada, the applicant must be screened with approval by an agency approved by the Board of Trustees.

C. Special Training

This period of special training shall be as the Board of Trustees by resolution or motion shall determine from time to time.

Effective for candidates beginning their training July 1, 1981 and thereafter, the Board of Trustees shall require a written statement from the program director atesting that the applicant will have satisfactorily completed the prescribed special training at the time of the written examination and is prepared to take that examination.

D. In special instances these requirements may be modified by majority vote of the entire Board of Trustees, or by the Executive Committee acting in its stead.

E. If the program director fails to indicate in writing that the applicant is adequately trained and prepared for the examination, documentation of the reason(s) must be submitted along with evidence that the candidate has been appropriately apprised of his deficiencies. The Executive Committee of the Board will notify the applicant in writing that an appeals mechanism exists as outlined in paragraphs (F) and (G) below.

F. In utilizing the appeals mechanism, the applicant must provide the Executive Committee of the Board with the written statement describing the reasons which he/she believes will support his/her appeal. The Executive Committee may ask the program director to submit a written response to the applicant's appeal.

G. The Executive Committee must reach a final decision with the least possible delay in order that the applicant who wins his/her appeal...
Radiology

does not lose the opportunity to be accepted for the examination for which he/she has applied.

Diagnostic Radiology

1. Candidates beginning their training in diagnostic radiology after June 30, 1975 and who have not had an approved internship will be required to have four years of approved post-graduate training. Three of these years must be spent in a department approved to train in diagnostic radiology by the Residency Review Committee for Radiology representing The American Board of Radiology and the Council on Medical Education of the American Medical Association and accredited by the Accreditation Council for Graduate Medical Education. The other year may be spent in one of the following programs: a categorical year; a categorical* year; a flexible year; a year of approved residency in radiology or one of its branches; or in a year of another approved specialty. No credit will be allowed for a foreign internship.

2. Candidates beginning their training in diagnostic radiology after June 30, 1984 will be required to have four years of approved postgraduate training in that field, exclusive of an internship or clinical year (if the latter is required by the program director). A minimum of six months but no more than twelve months must be spent in nuclear radiology in the four-year program. Candidates will be eligible for the written examination when they have completed 36 of the required 48 months of approved training, or if they complete this amount by September 30 of the year in which the examination is given.

A maximum of three months may be spent in therapeutic radiology.

Diagnostic Radiology with Special Competence in Nuclear Radiology

1. The American Board of Radiology will give a special examination leading to a certificate in diagnostic radiology with special competence in nuclear radiology to those diplomates in radiology, roentgenology, diagnostic radiology or diagnostic roentgenology who have fulfilled the requirements of one full year of formal training in nuclear radiology in an approved department of diagnostic radiology, nuclear medicine, or diagnostic radiology with special competence in nuclear radiology. This examination will consist of three examiners. The categories to be covered are: (1) bone, bone marrow, genitourinary tract, tumor and abscess localization; (2) central nervous system, endocrinology, gastrointestinal tract, hepatobiliary tract, and spleen, and (3) cardiovascular/pulmonary systems.

2. Candidates applying for certification in diagnostic radiology with special competence in nuclear radiology in 1971 must first be certified in diagnostic radiology. They must have a minimum of 12 months of approved training in nuclear radiology.

3. Continuing its policy adopted in June 1979, the Board will give an oral examination to candidates for the certificate in diagnostic radiology with special competence in nuclear radiology. This examination will consist of eleven examiners (twelve if candidate previously failed physics in the written examination in diagnostic radiology). The categories to be covered are: bones and joints, chest, gastrointestinal tract, genitourinary tract, neuroradiology, cardiovascular radiology, nuclear radiology (three examiners) (see above), ultrasound, pediatric radiology, and mammography. This examination will be given to candidates who have not been previously certified, who have passed the written examination in diagnostic radiology, and who will have completed four years of approved postgraduate education in the United States or Canada, four years of which have been spent in residency training comprising at least thirty-six months of diagnostic radiology and its subspecialties and twelve months in nuclear radiology.

4. Candidates beginning their training in diagnostic radiology with special competence in nuclear radiology July 1, 1981 or thereafter will be required to have four years of approved postgraduate training. Three of these years must be spent in a department approved to train in diagnostic radiology by the Residency Review Committee for Radiology representing The American Board of Radiology, the Council on Medical Education of the American Medical Association, and the American College of Radiology and accredited by the Accreditation Council for Graduate Medical Education. The fourth year must be spent in nuclear radiology in an accredited training program for diagnostic radiology; diagnostic radiology with special competence in nuclear radiology; or for nuclear medicine.

Radiation Oncology

Candidates beginning their training in radiation oncology after June 30, 1975 and who have not had an approved internship will be required to have four years of approved postgraduate training. Three of these years must be spent in a department approved to train in radiation oncology by the Residency Review Committee for Radiology representing The American Board of Radiology, the Council on Medical Education of the American Medical Association, and the American Board of Radiology, and accredited by the Accreditation Council for Graduate Medical Education. The other year may be spent in one of the following programs: a categorical year; a categorical* year; a flexible year; a year of approved residency in radiology or one of its branches; or in a year in another approved specialty. No credit will be allowed for a foreign internship.

The three-year residency training period must include training in Pathology and training in the therapeutic aspects of nuclear medicine. Credit may not exceed three months for time spent in either subject. A maximum of three months' training in diagnostic radiology will be allowed.

Candidates in this category will be eligible for the written examination when they have completed the required 48 months of approved training, or if they will complete this amount by September 30 of the year in which the examination is given.

Application and Fee

Application for examination must be made in exact duplicate (2 'original copies on prescribed forms which may be obtained from the Secretary). No xerox or any other kind of copy will be accepted. The data summary form enclosed with the application is an integral part that must be completed. These forms shall be forwarded with the required data, three unmounted photographs autographed on the front, and the current application fee (U.S. Currency) by the deadline established for filing. A certified check or money order is required to be made payable to THE AMERICAN BOARD OF RADIOLOGY, INC. APPLICATIONS FOR THE WRITTEN EXAMINATION TO BE GIVEN IN ANY YEAR WILL NOT BE ACCEPTED PRIOR TO JULY 1 OF THE PRECEDING YEAR AND MUST BE FILED NO LATER THAN THE DEADLINE OF SEPTEMBER 30 OF THE PRECEDING YEAR. The application fee will cover both the written and the oral examinations provided the candidate is successful on his/her first attempt in both the written and oral examinations.

Incomplete applications will not be accepted. The postmark affixed to the last item received to complete the application must be on or before the deadline date.

All applications must be typed or neatly printed (in ink).

In the event of withdrawal of an application, only a portion of the fee can be refunded.

Beginning July 1, 1981:

A candidate will have three consecutive opportunities to pass the written examination beginning with the written examination for which he/she is first declared admissible. If a candidate fails to accomplish this, he/she must submit a new application and the fee in effect at that time. Failure to accept an appointment, cancellation of an appointment or
failure to appear for a scheduled written examination will be regarded as one of the three opportunities.

A candidate who fails the written examination after three attempts must submit a new application together with the fee in effect at that time.

A candidate who has passed the written examination will have three consecutive opportunities to appear for and pass the oral examination beginning with the oral examination for which he/she is first declared admissible. If a candidate fails to accomplish this, he/she must submit a new application and the fee in effect at that time and reinstate the examination process, including the written examination. Failure to accept an appointment, cancellation of an appointment or failure to appear for a scheduled oral examination will be regarded as one of the three opportunities.

A candidate who finds it necessary for any reason to cancel after acceptance of an appointment for either the written or oral examination shall be required to submit an additional fee. This amount represents administrative costs to the Board. A candidate who FAILS TO APPEAR for an examination without notifying the office of the ABR at least twenty (20) days prior to the first date of the examination will be charged the full examination fee in existence at the time of payment. (Under certain circumstances, the ABR, entirely at its discretion, may excuse such a candidate from this penalty, provided the reason for such absence is substantiated in writing.

Objectives of the Written Examination

In 1965 it became apparent to the Board of Trustees of The American Board of Radiology that the then current oral examination could not cover the entire burgeoning field of Radiology without the addition of more segments, and in turn more examiners. This would not only impose a further burden on candidates but also on the Board itself. It was decided, therefore, to search for other methods of examination. At that time, it was agreed to adopt a written examination to be given annually as a prerequisite for the oral examination.

The content of the examination will include the basic sciences of anatomy, pathology, physiology and pharmacology as these subjects relate to clinical practice. Also to be included are radiological techniques, radiological physics, and radiation biology. The content of the examination in radiation oncology will include the basic sciences of physics, radiation biology, and clinical oncology as well as anatomy, pathology, physiology and chemotherapy as these subjects relate to the clinical practice of radiation oncology.

A pool of multiple-choice questions was developed and the first examination was given in 1969 to all candidates seeking certification in diagnostic radiology and in radiation oncology.

Content of Written Examination in Each Field

Each examination consists of between 320 and 375 multiple-choice questions to be administered over a period of approximately eight hours. About one-half of the questions are distributed on the afternoon of one day and the other half distributed on the morning of the following day.

New written examinations are formulated each year in all categories of radiology and the content of the examinations is carefully evaluated in order to keep pace with new information and developments. Even the number of questions in each category may be changed as necessity dictates from year to year.

Beginning in 1987, a candidate who fails the diagnostic portion but fails physics must repeat the physics portion and pass before admission to the oral examination.

Beginning in 1984, a candidate who takes the written examination in diagnostic radiology and fails the diagnostic portion but passes physics must repeat the diagnostic portion but will NOT be required to repeat physics.

Beginning in 1984, a candidate who takes the written examination in radiation oncology and passes the clinical portion but fails EITHER physics or radiation biology must repeat ONLY the portion which he/she failed. Those candidates who fail the physics AND the radiation biology portions of the examination OR the clinical oncology portion of the examination must repeat the entire examination.

Candidates in diagnostic radiology may expect to be asked questions on magnetic resonance imaging in the written and oral examinations.

Oral Examination

Oral examinations are given at a time designated by the Board of Trustees. At the present time the oral examinations are conducted yearly in May and/or June.

Admissibility to the oral examination is determined by the Executive Committee. Experience has shown that to delay taking the oral examination does not benefit the candidate.

No recording device of any kind may be brought to the examination.

Content of Oral Examination for Diagnostic Radiology

The categories to be covered are: Bones and Joints, Chest, Gastrointestinal Tract, Genitourinary Tract, Neuroradiology; Cardiovascular Radiology, Nuclear Radiology; Ultrasonography, Pediatric Radiology, and Breast Radiology. Questions may be asked on interventional techniques and magnetic resonance imaging.

Content of Oral Examination for Radiation Oncology

The categories to be covered are: Gastrointestinal Malignancies, Gynecologic Malignancies, Genitourinary Malignancies: Diseases of the Reticuloendothelial System, Thymus and Mediastinum; Diseases of the Upper Respiratory Tract and Head and Neck; Malignancies of the Breast, Skin, Bones and Soft Tissues; Pediatric Tumors and Tumors of the Central Nervous System. Brachytherapy techniques and the effect of radiation on normal tissue may be included in all categories.

Re-examinations

FAILURES

A candidate who fails or conditions the oral examination in diagnostic radiology or in radiation oncology may be scheduled for re-examination. The re-examination fee in effect at that time must be submitted by certified check or money order.

Candidates in diagnostic radiology who have conditioned one, two, or three categories in the oral examination will be re-examined by two examiners in each conditioned category. Candidates in radiation oncology who have conditioned one or two categories in the oral examination will be re-examined by two examiners in each conditioned category. Candidates must pass the re-examination by both examiners in each category to remove the condition.

Effective July 1, 1981 a candidate who has failed the oral examination three times must start the examination procedure from the beginning with the submission of a new application, pay the fee in effect at that time and retake the entire written examination.

Status of a Physician

The Board will reply to an inquiry concerning the status of a physician in one of the following statements.
CERTIFICATION REQUIREMENTS

Surgery

1. The physician is Board certified.
2. The physician is in the examination process.
3. The physician is neither certified nor in the examination process.

NOTE: No official status of “Board Qualified” or “Board Eligible” is recognized by the Board.

Final Action of the Board

The final action of the Board is based on the applicant’s professional record, training, and attainment in the field of diagnostic radiology, diagnostic radiology with special competence in nuclear radiology, or in radiation oncology, as well as on the results of his examination. This Board has been organized to assist qualified radiologists to become recognized in their communities as men and women competent to practice diagnostic radiology, diagnostic radiology with special competence in nuclear radiology, or radiation oncology.

Revocation of Certificates

Certificates issued by this Board are subject to the provisions of Articles of Incorporation and the Bylaws. According to Article IX, Section 4, of the Bylaws, “Any certificate issued by the Board of Trustees shall be subject to revocation in the event that:

a. The issuance of such certificate or its receipt by the individual so certified shall have been contrary to or in violation of any provision of the Certificate of Incorporation of this, The American Board of Radiology, or of these Bylaws or rules and regulations adopted by the Board of Trustees; or

b. The individual so certified shall not have been eligible in fact to receive such certificate; or

c. The individual so certified shall have made any misstatement of fact in the application or in any other communication to the Corporation or its representatives; or

d. The individual so certified shall have been convicted by a court of competent jurisdiction of a felony or of any misdemeanor involving, in the opinion of the Board of Trustees, moral turpitude; or

e. The licensee to practice medicine of the individual so certified shall be revoked.

Before any such certificate shall be revoked a notice shall be sent by registered or certified mail to the last known address of the holder of such certificate, as it appears on the records of this Corporation, setting forth the act omission or conduct alleged or complained of, and giving the holder of such certificate a reasonable opportunity to answer in writing thereto. Such certificate holder shall have not less than 30 days in which to reply thereto. The Board of Trustees may, at its discretion, make such further investigation as it deems necessary and proper.

The Board of Trustees of this Corporation shall have the sole power, jurisdiction and right to determine and decide whether or not the evidence or information before it is sufficient to constitute one of the grounds for revocation of any certificate issued by this Corporation, and the decision of such Board of Trustees in the premises shall be final.

All correspondence should be addressed to the Executive Director:

(EDITORS’ NOTE: These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Surgery to obtain current information.)

Specialty of Surgery (“General Surgery”) Defined

The Board interprets the term “general surgery” in a comprehensive but specific manner, as a discipline having a central core of knowledge embracing anatomy, physiology, metabolism, immunology, nutrition, pathology, wound healing, shock and resuscitation, intensive care and neoplasia, which are common to all surgical specialties.

The general surgeon is one who has specialized knowledge and skill relating to the diagnosis, preoperative, operative, and postoperative management in the following areas of primary responsibility:

- ALIMENTARY TRACT
- ABDOMEN AND ITS CONTENTS
- BREAST, SKIN AND SOFT TISSUE
- HEAD AND NECK, including trauma; vascular, endocrine, congenital and oncologic disorders—particularly tumors of the skin, salivary glands, thyroid, parathyroid, and the oral cavity.
- VASCULAR SYSTEM, excluding the intracranial vessels, the heart and those vessels intrinsic and immediately adjacent thereto.
- ENDOCRINE SYSTEM
- SURGICAL ONCOLOGY, including coordinated multimodality management of the cancer patient by screening, surveillance, surgical adjunctive therapy, rehabilitation, and follow-up.
CERTIFICATION REQUIREMENTS

Surgery

I. ACCEPTABLE PROGRAMS

The residency programs in surgery in the United States which are reviewed and approved by the Residency Review Committee for Surgery or the Accreditation Council for Graduate Medical Education (ACGME) are acceptable to the Board as an adequate educational experience.

In Canada, those university residency programs in surgery which bear accreditation by the Royal College of Physicians and Surgeons are an acceptable educational experience. Applicants from such programs must meet the Board’s specific requirements and cannot receive credit for training in countries other than the United States or Canada.

Except as mentioned above, participation in surgical training programs in countries other than the United States is not creditable toward the Board’s educational requirements unless under the specific conditions set forth in the section “Credit for Foreign Graduate Education.”

To provide flexibility and the opportunity for experimentation in surgical education, proposed programs at variance with the requirements outlined will be considered upon request by program directors to the Residency Review Committee for Surgery (515 North State Street, Chicago, Illinois 60610).

Listings of accredited programs in the United States may be found in the Directory of Graduate Medical Education Programs published annually under the aegis of the Accreditation Council for Graduate Medical Education (ACGME).

Requirements for General Certification in Surgery

I. GENERAL

A. Must have demonstrated to the satisfaction of the authorities of the graduate educational program in surgery, to their peers and to the Board, that one has attained the level of qualifications in surgery required by the Board.

B. Must have a moral and ethical standing satisfactory to the Board and in conformity with the Statements on Principles of the American College of Surgeons and its interpretations.

C. Must be actively engaged in the practice of surgery as indicated by holding admitting privileges to a surgical service in an accredited hospital, or be currently engaged in pursuing additional graduate education in a component of surgery or one of the other recognized surgical specialties.

D. Must have a currently registered full and unrestricted license to practice medicine granted by a state, or other United States jurisdiction, or by a Canadian province. The license must be valid at the time of examination. A temporary limited license such as an educational, institutional or house staff permit is not acceptable to the Board.

- COMPREHENSIVE MANAGEMENT OF TRAUMA, including musculoskeletal, hand and head injuries. The responsibility for all phases of care of the injured patient is an essential component of general surgery.

- COMPLETE CARE OF CRITICALLY ILL PATIENTS with underlying surgical conditions, in the emergency room, intensive care unit and trauma/burn units.

Additionally, the general surgeon is expected to have significant preoperative, operative and postoperative experience in pediatric, plastic and general thoracic surgery. Also, the surgeon must have understanding of the management of the more common problems in cardiac, gynecologic, neurologic, orthopedic, transplant, and urologic surgery, and of the administration of anesthetic agents.

The general surgeon must be capable of employing endoscopic techniques, particularly proctosigmoidoscopy and operative cholecystoscopy, and must have experience with a variety of other endoscopic techniques such as laryngoscopy, bronchoscopy, esophagogastroduodenoscopy, colonoscopy and peritoneoscopy. It is desirable that the general surgeon have opportunity, wherever possible, to gain some knowledge and experience of evolving technological methods, e.g., laser applications, lithotripsy, and endoscopic operations.

The Meaning of Certification

The Board considers certification to be based upon a process which includes the educational and evaluation phases and an examination phase. It holds that undergraduate and graduate education are of the utmost importance and requires the program director’s endorsement, attesting that the applicant has had an appropriate educational experience and has attained a sufficiently high level of knowledge, judgment and skills to be prepared for designation, by the Board’s Certificate as a specialist in surgery, upon successful completion of the examinations, and to enter into independent practice of the specialty.

Graduate Education in Surgery

I. GENERAL INFORMATION

The purpose of graduate education in surgery is to provide the opportunity to acquire a broad understanding of human biology as it relates to disorders of a surgical nature and the technical knowledge and skills appropriate to be applied by a specialist in surgery. This goal can best be attained by means of a progressively graded curriculum of study and clinical experience under guidance and supervision of senior surgeons and which provides progression through succeeding stages of responsibility for patient care up to the final one of complete management. Major operative experience and senior/chief responsibility at the final stage of the program are essential components of surgical education. The Board will not accept into the process of certification anyone who has not had such an experience in the specialty of surgery, as previously defined, regardless of the number of years spent in educational programs.

The graduate educational requirements set forth in these columns are considered to be the minimal requirements of the Board and should not be interpreted to be restrictive in nature. The Board recognizes that the time required for the total educational process should be sufficient to provide adequate clinical experience for the development of sound surgical judgment and adequate technical skill. The requirements do not preclude additional desirable educational experience and program directors are encouraged to retain residents in a program as long as is required to achieve the necessary level of qualifications.

The integration of basic sciences with clinical training is considered to be superior to formal courses in such subjects. Accordingly, while recognizing the value of formal courses in the study of surgery and the basic sciences at approved graduate schools of medicine, the Board will not accept such courses in lieu of any part of the required clinical years of surgical education.

The Board may, at its discretion, require that a member of the Board or a designated Diplomate observe and report upon the clinical performance of an applicant before establishing admissibility to examination or awarding certification.

While a program may develop its own vacation, illness and other leave policies for the resident, one year of approved training toward the Board’s requirements must be fifty-two (52) weeks in duration and must include at least forty-eight (48) weeks of full-time surgical training. Furthermore, unused vacation and other leave time may not be accumulated to reduce the overall duration of training expected by the Board.

All phases of the graduate educational process must be completed in a manner satisfactory to the Board.
Surgery

II. EDUCATIONAL

A. Undergraduate Medical
1. Must have graduated from an accredited school of medicine in the United States or Canada.
2. Graduates of schools of medicine from countries other than the United States or Canada must present evidence of (a) final certification by the Educational Commission for Foreign Medical Graduates (ECFMG), or (b) successful passing of the Foreign Medical Graduate Examination in the Medical Sciences (FMGE).

B. Graduate Education in Surgery
1. Must have satisfactorily completed a MINIMUM OF FIVE YEARS of progressive education, following graduation from medical school, in a program in surgery (general surgery) accredited by the ACGME.
2. Must have completed ALL PHASES of graduate education in surgery in a program in surgery accredited by the ACGME. Training received in accredited programs in other recognized specialties, although containing some exposure to surgery, is not acceptable. A FLEXIBLE or TRANSITIONAL first year is NOT creditable toward the Board's requirements as a PGY-1 unless it is accomplished in an institution having an accredited program in surgery and at least six months of the year is spent in surgical disciplines and under the jurisdiction of the surgery program director.
3. Must successfully complete the ENTIRE PROGRAM as accredited. If an accredited program is lengthened by one year, residents in the final year of the program as previously accredited may be acceptable upon completion of that year. All others would be required to complete all years of the program under the new accreditation status.
4. Must have, in a program accredited for a minimum of five years, at least four years of clinical surgical experience with progressively increasing levels of responsibility. There must be no less than thirty-six months devoted to the primary components of surgery (general surgery) as previously defined. The ENTIRE FINAL “CHIEF RESIDENT" YEAR MUST BE DEVOTED TO THE PRIMARY COMPONENTS OF THE SPECIALTY OF SURGERY. No more than four months of the chief residency year may be devoted to any one of the primary components of surgery. During junior years a total of six months may be assigned to non-surgical disciplines such as medicine, gastroenterology, pediatrics, etc. No more than a total of twelve months during junior years may be allocated to training in any ONE surgical specialty other than general surgery. Training in surgical pathology and endoscopy is considered to be surgical, but obstetrics and ophthalmology are not. One year of the minimal five may be allocated to non-clinical activities such as laboratory research or basic sciences.
5. Must have twelve (12) months in the capacity of chief resident in general surgery. The Board considers the terms chief resident and senior resident to be synonymous and to mean the twelve months in the program in which the resident assumes the ultimate clinical responsibilities for patient care under the supervision of the teaching staff. The majority of the twelve months of chief residency must be served in the final year. However, to take advantage of a unique training opportunity in a program during a resident's final year, a portion of the chief residency may be served in the last year, provided it is no earlier than the fourth clinical year. The chief residency must be spent only in the parent or an integrated institution unless rotation to an affiliated institution has been specifically approved by the Residency Review Committee for Surgery.
6. The Board expects a training year to include no less than forty-eight (48) weeks of full-time surgical training.
7. All phases of the graduate educational process must be in accordance with the Special Requirements for Residency Training in General Surgery as promulgated by the Accreditation Council for Graduate Medical Education and approved by the Residency Review Committee for Surgery.
8. The Board believes that for optimal surgical education the resident should spend at least the final two years of training in the same program.

III. OPERATIVE EXPERIENCE

Applicants for examination must have had an operative experience of such breadth and depth as may be deemed adequate by the Board and which must include operative experience in each of the areas of primary responsibility included in the “Definition of Surgery (General Surgery)” set forth previously.

Each applicant must submit a tabulation of the operative procedures performed as surgeon, and those performed as first assistant or teaching assistant. The Board provides an Operative Experience form for this purpose when application material is obtained by the applicant. The Resident’s Record form, available to program directors for residents’ use through the Residency Review Committee for Surgery, may be submitted in lieu of the Board’s Operative Experience form.

In tabulating cases toward Board requirements, credit may be claimed “As Surgeon” when the resident has actively participated in the patient’s care; has made or confirmed the diagnosis; participated in selection of the appropriate operative procedure; has either performed or has been responsibly involved in performing the critical portions of the operative procedure; and has been a responsible participant in both pre- and post-operative care.

Credit may be claimed as a “teaching assistant” only when the resident has actually been at the table, scrubbed, and has guided a more junior resident through at least the critical parts of an operation. All this must be accomplished under the supervision of the responsible member of the senior staff.

An individual cannot claim credit as both “surgeon” and as “teaching assistant.”

Failure to submit a complete and properly authenticated list of operative procedures will constitute an incomplete application.

Applicants are advised to keep a copy of the lists of operative work they submit, for their records, as the Board cannot furnish copies.

IV. SPECIAL INFORMATION FOR PROGRAM DIRECTORS

A. Program directors are cautioned that appointment of residents at advanced levels without being certain that their previous training is in accordance with the Board’s requirements, may result in the affected residents not being accepted by the Board upon completion of the program. In any case in which there is question, program directors should make inquiry of the Board prior to taking action.

B. According to the Special Requirements for Residency Training in General Surgery promulgated by the Accreditation Council for Graduate Medical Education, special approval of the Residency Review Committee for Surgery must be obtained (1) if a chief resident is assigned to an institution other than the parent one or an “integrated” one; (2) if rotations to any one approved “affiliate” exceed six months; (3) if more than one year of the total program is spent away from the parent and integrated institutions; or (4) if more than six months’ total is spent in any assignment outside the parent, the integrated and approved affiliated institutions. The Board concurs in this and will find any violations of these requirements to be non-acceptable training.

C. Since the Residency Review Committee does not act upon the adequacy of training outside the United States, program directors must request the Board’s approval, in advance, if they wish periods of training abroad to be creditable toward the Board’s requirements. The Board will rule on individual requests.
Credit for Military Service

Credit will not be granted toward the minimum requirements of the Board for service in the Armed Forces, the Public Health Service, the National Institutes of Health or other governmental agencies unless the service was as a duly appointed resident in an accredited program in surgery.

Credit for Foreign Graduate Education

Acceptance for examination and certification by the American Board of Surgery is based upon satisfactory completion of the stated requirements in accredited residency programs in surgery in the United States. Regardless of the individual's professional attainments here or abroad, no credit will be granted directly to a candidate for surgical education in a foreign country. The Board will consider granting partial credit only upon the request of the director of an accredited program who has observed the candidates as a junior resident for nine to twelve months and wishes to advance the candidate to a higher level in that program. The credit granted will not be valid until the candidate has successfully completed that program. If the candidate moves to another program, the credit is not transferable and must again be requested by the new program director.

Applicants from approved Canadian programs must have completed all of the requirements in the Canadian program or in combination with an accredited U.S. program. No credit for training outside the U.S. and Canada will be granted to those applicants seeking certification who completed a Canadian program. Applicants from Canadian programs must complete the Board's stipulated requirements.

Rules Governing Admissibility to Examinations for General Certification in Surgery

1. An applicant is admissible to the examinations only when all of the preliminary and graduate educational requirements of the Board, currently in force at the time of receipt of the formal application, have been satisfactorily fulfilled, the operative experience has been reviewed and deemed acceptable, general credentials are in order, the program director has certified to the Board in writing that the applicant has attained the required clinical skills, and the formal application has been reviewed and approved. The applicant then must successfully complete the qualifying examination before becoming a "candidate for certification" and admissible to the certifying examination.

2. Applicants will be offered five opportunities for taking the Qualifying Examination within the five-year period following approval of the formal application at centers designated by the Board in accord with their last recorded address. Applicants who do not take the qualifying examination within two years following approval of the application and do not participate in at least three examinations within the five-year period of admissibility will no longer have any status with the Board and will not be considered for readmission to the examination.

3. If applicants are not successful in completing the qualifying examination within the stated admissibility period, the satisfactory completion of an additional year of residency in general surgery will be required in order to be considered for readmission to the qualifying examination. This must be in a general surgery program accredited by the ACCME and at an advanced level (not necessarily the senior/chief year). The Board's approval of the proposed training must be secured in advance.

3. The certifying examination will be offered to those who have passed the qualifying examination and have thus become "candidates for certification," at the earliest practicable time consistent with the Board's geographical examination schedule.

Candidates will be offered three (3) and only three opportunities to appear for examination during the five academic years following completion of the qualifying examination. The admittance expiration date shall be established as June 30th of the fifth calendar year after passing the qualifying examination. An opportunity offered which is refused or not taken will be counted as one of the three available.

If a candidate fails the certifying examination three times or fails to accept or to appear at the opportunities offered, the admittance date will be revised to indicate expiration of admittance. Satisfactory completion of at least one year of residency in general surgery at an advanced level in an accredited program, with a favorable endorsement to the Board from the program director, will be required before further consideration by the Board. This year of training must be approved in advance by the Board.

If the Board approves the candidate's application for readmission to the certifying examination upon completion of the specified additional year of residency in general surgery, the candidate will then be offered three further opportunities within the ensuing five years. If not successful within that time, the candidate cannot again be considered until completion of a minimum of three (3) years of residency in general surgery; including a chief year, in an accredited program, and favorable endorsement to the Board by the program director. The candidate must then reapply as a "new applicant." This necessitated submission of a reapplication for admission to examination and all supporting documents, payment of all the established fees, and successful completion again of the qualifying examination before advancing to the status of "candidate for certification."

4. Those who, ten years after approval of their original application or re-application, have not become certified and who are not actively pursuing completion of the appropriate above-stated requirements applicable in each case will have their files destroyed. If they wish to reapply later they must fulfill the requirements then in place.

5. The Board, on the basis of its judgment, may deny or grant an "applicant" or "candidate for certification" the privilege of examination whenever the facts in the case are deemed by the Board to so warrant.

The Board does not use or sanction the terms "board eligible" or "board qualified." The standing of an individual with the Board varies according to the current status of credentials and will be so reported.

Special Certification

The Board has been authorized by the American Board of Medical Specialties to award Certification of Special or Added Qualifications in certain disciplines pertinent to the overall specialty of surgery; to those Diplomates of this Board who meet the defined requirements. These disciplines include general vascular surgery, pediatric surgery, surgery of the hand, and surgical critical care.

The Board considers all the above disciplines to be an integral part of the specialty of surgery and expects that all surgeons certified in surgery by this Board will be qualified to practice in these areas if they so desire and demonstrate the capability. The Certificates of Special or Added Qualifications are designed to recognize those Diplomates who have acquired, through advanced education and training and other activities, qualifications in these disciplines beyond those expected of the well-trained general surgeon.

Those seeking the American Board of Surgery's Certification of Special or Added Qualifications must have a currently valid Certificate in Surgery issued by this Board, must have completed the required additional training in the discipline beyond that required for General Certification; and operative experience and/or patient care data acceptable.
Surgery

to the Board; must show evidence of dedication to the discipline by the
means specified by the Board and receive favorable peer review by
recognized Diplomates in the particular discipline. Finally, successful
completion of the prescribed examinations is required.

Those who are interested in obtaining information regarding certi-
fication in general vascular surgery, pediatric surgery, surgery of the
hand, or surgical critical care may obtain it from the Board upon request.

The Examinations Offered by the Board

The Board offers examinations leading to Certification in Surgery, General Vascular Surgery, Pediatric Surgery, Surgery of the Hand, and in
Surgical Critical Care; also, an In-Training Examination.

The examinations leading to certification are offered to individuals,
but the in-training examination is offered to program directors for their
use as an educational tool, for the assessment of the individual resi-
dent’s grasp of surgical fundamentals.

The Board notifies candidates for general and special certification of
their performance on examinations. The Board also reports examinee
performance to the director of the program in which the candidate
completed the final year of residency. All reports pertaining to the
in-training examination are provided only to the program director.

All examinations are developed by Directors of the American Board
of Surgery with contributions by invited Examination Consultants.

I. EXAMINATIONS FOR GENERAL CERTIFICATION IN SURGERY

A. THE QUALIFYING EXAMINATION

This examination is written and is offered once a year in the fall. It
is given simultaneously in a number of locations in the United States.

Applicants whose applications have been approved by the Board are
sent annually, throughout their period of admissibility, an announce-
ment of the examination. With the announcement is a reply card which
must be returned to the Board if the applicant wishes to be scheduled
for this examination. Shortly before the date of examination an admis-
sion card is sent to the candidate indicating the specific location of
the examination center and reporting times, with a pamphlet describing
the examination and the types of questions to be expected.

The one-day Qualifying Examination consists of multiple-choice
questions designed to evaluate knowledge of general surgical prin-
ciples and the basic sciences applicable to surgery.

Successful completion of the qualifying examination is a require-
ment for all, to attain the status of “active candidate for certification” and
admission to the certifying examination.

Those unsuccessful on the Qualifying Examination may review the
examination at the Board Office if such a request is made within 90 days
after the examination results are mailed. The review requires an ap-
pointment and payment of a fee.

B. CERTIFYING EXAMINATIONS

Examinations are ordinarily held six times a year, within the conti-
nental United States. Candidates for certification will receive an an-
ouncement of the examination to which they may be assigned, based
on their geographic location, approximately two months prior to the
examination session, with a reply card which must be returned at once
if a candidate wishes to be included in that examination. Failure to
return or late return of the card will result in that examination being
counted as one of the three opportunities to be offered. If the Board
cannot accommodate a candidate at that particular examination it will
not be counted as an opportunity. A candidate assigned to an examina-
tion will be sent an admission card indicating the specific time and
place to report for examination.

The examinations are conducted by members of the American Board
of Surgery and selected Associate Examiners who are Diplomates of the
Board and usually from the local geographic area.

The examinations consist of three oral sessions conducted by teams
of two examiners each, directed toward determining the candidate’s
understanding of clinical entities, level of surgical judgment, and prob-
lem solving ability. During all sessions, the ability to apply knowledge of
anatomy, physiology, pathology, biochemistry, and bacteriology to clin-
ic problems is also evaluated.

II. EXAMINATIONS FOR CERTIFICATION OF SPECIAL OR ADDED
QUALIFICATIONS

The Board offers examinations for Certification of Special or Added
Qualifications in General Vascular Surgery, Pediatric Surgery, Surgery of
the Hand, and in Surgical Critical Care. These examinations are de-
scribed in the separate pamphlets pertaining to the respective disci-
plines, which may be obtained from the Board Office upon request.

III. IN-TRAINING EXAMINATION

The Board offers annually to program directors of accredited resi-
dency programs in surgery, a written “in-training examination” which is
designed to test the general level of knowledge which has been attained
by residents regarding the fundamentals and the basic sciences related
to surgery. This examination is constructed to evaluate the knowledge
of the resident who has completed two years of graduate education in
surgery, but at the program director’s discretion, may be administered
to any one. It is also designed to meet the first milestone which is
required by the “Essentials” for residencies in general surgery.

The Board will normally furnish pertinent information to the direc-
tors of all accredited programs in surgery several months in advance of
each year’s examination and ascertain the number of test booklets de-
sired.

The examination, administered by the participating program direc-
tor, takes place each winter.

Program directors should take note of the fact that the Board does
not contact each institution in which residents are located, but depends
upon the director of the program to order an adequate number of test
booklets for all residents in the total program, which includes not only
the parent institution but also all those included under the program
designation in the Directory of Graduate Medical Education Programs.

It is important to note that the in-training examination is not offered
to individuals, but only to program directors.

The in-training examination is not required by the Board as part of
the certification process.

The in-training examination is prepared by the Board as a conve-
nience to program directors, to be used as an assessment of residents’
progress and not as a pool of questions for study or other purposes.
Duplication and improper use of the examination material defeats the
purpose of the examination and will not be tolerated by the Board. The
examination is protected under the copyright laws.

Application for Examination for
General Certification in Surgery

Prospective candidates for examination by the Board should care-
fully read the requirements set forth in its most recent Booklet of
Information. If they need advice concerning plans for graduate educa-
tion in surgery, or believe that they are within six months of meeting
the requirements, they should write the Board and request an Evaluation
Form. This form must be completed precisely and returned to the
Board. Candidates will then be advised as to whether or not it appears
that they have met or will meet the requirements, or what will be
necessary. Candidates should not submit documents, testimonials, let-
ters of recommendation, case reports or other information unless re-
quested by the Board.
Candidates should communicate with the Board at least four months before completion of their educational requirements and not later than May 1st if they wish to receive the formal Application for Examination and be considered for the qualifying examination to be given in that year. The application for examination form will not be sent to candidates until they are within several months of completing the educational requirements and appear to have met all other requirements.

The application for examination form must be completed and returned to the Board no later than July 31st or the candidate will not be considered for the qualifying examination to be given in that year.

Candidates who complete the educational requirements after September 30th will not be considered for admission to the qualifying examination in that year, but must wait until the following year.

The acceptability of a candidate does not depend solely upon the completion of an approved program of education, but also upon information available to the Board regarding professional maturity, surgical judgment, technical capabilities and ethical standing.

A candidate who has submitted an application for examination will be notified regarding admissibility to examination.

Fees (General Certification)

Registration—payable with
Application Form—U.S. $150.00
Qualifying Examination—U.S. $350.00
Certifying Examination—U.S. $500.00
(Both examination fees payable with the Reply Card.)
Fees for a re-examination are the same as shown above, for each Examination.

Each fee for examination or re-examination includes a U.S. $100.00 processing charge which is not refunded if the candidate withdraws after he has been scheduled for an examination.

To withdraw one must notify the Board Office at least fifteen (15) business days before a scheduled examination. Failure to appear for examination, or withdrawal without giving at least fifteen (15) days’ notice as defined above, will result in forfeiture of the entire fee for examination.

Fees are subject to change as directed by the Board.
The Board is a non-profit organization. The Directors of the Board, except those on the Executive Staff, serve without remuneration.

Issuance of Certificates

A candidate who has met all requirements and has successfully completed the examinations of the American Board of Surgery in one or another of the areas of certification will then be issued a certificate by this Board, signed by its Officers, attesting to qualifications in that area.

Those certified in surgery prior to December 31, 1975 were issued a certificate with no indication of time limited validity. All Certificates issued on or after January 1, 1976, bear a limiting date of ten years, after which they are no longer valid.

Those whose certificates have expired and who have not achieved recertification will no longer be listed in directories as Diplomates in the discipline concerned.

Recertification

The American Board of Surgery offers recertification in surgery to its Diplomates and in all the disciplines in which it offers Certificate in Surgery or Added Qualifications. The Board considers recertification to be voluntary in the same connotation as is original certification.

The purpose of recertification is to demonstrate to the profession and the public, through periodic evaluations, that the surgical specialist has maintained continuing qualifications on a currently acceptable level in the Diplomate's chosen area of practice. The American Board of Surgery believes that such periodic evaluation of its Diplomates is in their own interest as well as in the public interest.

A Diplomate can initiate the recertification process when certification has been held at least seven years. Pamphlets outlining requirements for recertification in the various disciplines may be obtained from the Board upon request. To facilitate receiving the Board's mailings pertaining to the recertification process, it is important for all Diplomates to notify the Board promptly whenever their addresses change.

Recertification in Special Disciplines

Recertification in special disciplines is offered to Diplomates holding Certificates of Added Special Qualifications, in general vascular surgery, in pediatric surgery, in surgery of the hand, and in surgical critical care.

Details concerning requirements for recertification in the disciplines mentioned above are similar to those for recertification in surgery, and pertinent pamphlets may be obtained from the Board upon request.

Inquiry as to Status

The Board considers an individual's record not to be in the public domain. When an inquiry is received by the Board regarding an individual's status, a general but factual statement is provided which indicates the person's location within the examination process. The information will be provided only to individuals, organizations, and institutions with a "need to know" for professional reasons.

Special Situations

SUBSTANCE ABUSE

Applicants with a history of substance abuse will not be admitted to any examination unless they present evidence satisfactory to the Board that they have successfully completed the program of treatment prescribed for their condition. Further, the Board must be satisfied that they are currently free of substance abuse.

DYSLEXIA

The American Board of Surgery has a policy regarding dyslexia. If an applicant has dyslexia, he should be made known to the Board at the time of initial inquiry. If it is determined that the applicant meets the requirements for admission to examination, a copy of the dyslexia policy will be sent with the application. There will be no special consideration on the basis of dyslexia unless it is requested prior to being accepted for examination.

Irregularities

The furnishing of false information to the Board or examination irregularities may result in the rejection of an application, the barring of a candidate from examination, the denial or revocation of a certificate, or other appropriate sanctions, all as more fully set forth in the Application for Admission to Examination and the Instructions to Examinees.

Reconsideration and Appeals

The Board has adopted a policy with regard to reconsideration and appeals of decisions adverse to applicants regarding their individual credentials and admissibility to the examinations and questions regarding the form, administration and results of examinations. A copy of that policy is available from the Board Office to anyone considering a request for reconsideration or an appeal. A request made for reconsider-
Thoracic Surgery

eration, which is the first step, must be made in writing to the Board office within 90 days of receipt of notice from the Board of the action in question.

Revocation of Certificate

Any certificate issued by the American Board of Surgery, Inc. shall be subject to revocation at any time that the Directors shall determine, in their sole judgment, that a candidate who has received the certificate was in some respect not properly qualified to receive it.

AMERICAN BOARD OF THORACIC SURGERY

Harvey W. Bender, Jr., MD, Chairman, Nashville, Tennessee
Benson R. Wilcox, MD, Vice-Chairman, Chapel Hill, North Carolina
James V. Maloney, Jr., MD, Secretary-Treasurer, Los Angeles, California
Mortimer J. Buckley, MD, Boston, Massachusetts
James A. DeWeese, MD, Rochester, New York
L. Penfield Faber, MD, Chicago, Illinois

John L. Ochser, MD, New Orleans, Louisiana
Mark B. Orringer, MD, Ann Arbor, Michigan
Mavin Pomerantz, MD, Denver, Colorado
John A. Walzhausen, MD, Hershey, Pennsylvania
Andrew S. Wechsler, MD, Richmond, Virginia
Glennis Lundberg, Administrative Director, One Rotary Center, Suite 803
Evanston, Illinois 60201

(EDITORS NOTE: These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Thoracic Surgery to ascertain whether the information they have is current.)

General Requirements

Certification by the American Board of Thoracic Surgery may be achieved by fulfilling the following requirements:
1. Certification by the American Board of Surgery.
3. Must have an ethical standing in the profession and a moral status in the community acceptable to the Board.

Training Requirements

Candidates must fulfill all the training requirements of the Board in force at the time their applications are received.

Candidates for certification must complete a minimum of 24 months of identifiable training in thoracic and cardiovascular surgery in a program approved by the Residency Review Committee for Thoracic Surgery. This must include 12 months of senior responsibility which should be continuous. The director of the thoracic training program is required to approve the application form by signature stating that the candidate has satisfactorily completed training in thoracic surgery of which the last 12 months were of senior responsibility.

Training in both general thoracic surgery and cardiovascular surgery is an essential part of any approved program no matter what area of thoracic surgery a candidate may choose for his/her practice.

Candidates who apply for examination more than five years after the satisfactory completion of their residency must have an additional year of training in an approved program before they will be eligible to apply for examination.

Operative Experience Criteria

1. The application of candidates whose supervised operative experience falls below the minimal numerical acceptable standard based on 1 standard deviation of the mean value of the number of operations performed by each candidate for the previous year will be referred to the Credentials Committee for review. For candidates applying in 1990, 180 major operative cases are required.
2. The applications of candidates whose supervised operative experience in a setting approved by the Residency Review Committee for Thoracic Surgery falls below minimal acceptable standards for one or more areas within thoracic and cardiovascular surgery will be referred to the Credentials Committee for review. The number of procedures, required to meet minimal acceptable standards in the various areas for 1990 are:

   - Lungs, pleura, chest wall: 50
   - Pneumonectomy, lobectomy, segmentectomy: 30
   - Other: 20
   - Esophagus, mediastinum, diaphragm: 15
   - Esophageal operations: 8
   - Other: 7
   - Congenital heart: 25
   - Open operations: 10
   - Other: 15
   - Acquired valvular heart: 20
   - Myocardial revascularization: 35
   - Pacemaker implants: 10
   - Bronchoscopy and esophagoscopy: 25
   - Endoscopic procedures may be counted for credit whether they are performed as independent procedures or immediately preceding a thoracic operation.

   Major vascular operations outside the thorax should be listed.

   The Board recognizes that supervised operative experience in a well-organized teaching setting approved by the Residency Review Committee for Thoracic Surgery protects the patient who, in most instances, is the personal and identifiable responsibility of a faculty surgeon. This supervised experience optimally prepares the candidate to begin the independent practice of cardiothoracic surgery after the completion of residency training.

   The Credentials Committee has been authorized by the Board to reject a candidate if his/her training is considered to be inadequate. The candidate, the program director, and the Residency Review Committee for Thoracic Surgery will be notified if such actions are taken.

   Even though emphasis on one or another facet of thoracic surgery (pulmonary, cardiovascular, esophageal, thoracic trauma, etc.) may characterize the candidate's training experience, a candidate is nevertheless held accountable for knowledge concerning all phases of the field. This includes a knowledge of extracorporeal perfusion (physiologic concepts, techniques, and complications) and knowledge of thoracic oncology. In addition, a candidate should have had responsibility for the care of pediatric general thoracic surgical patients. The candidate should also be skilled in the management of acutely ill patients in the intensive care unit. This requires a knowledge of respirators, blood gases, metabolic alterations, cardiac output, hyperalimentation, and many other areas. By virtue of his/her training in cardiothoracic surgery, the candidate is expected to be fully qualified in the care of critically ill patients.
Criteria for Credit

Credit will be allowed for supervised operative experience in a well-organized teaching setting only when the following criteria are met:

a. The resident participated in the diagnosis, pre-operative planning and selection of appropriate operation and surgical indication;

b. The resident performed under appropriate supervision in a well-organized teaching setting approved by the Residency Review Committee for Thoracic Surgery those technical manipulations that constituted essential parts of the procedure itself;

c. The resident was substantially involved in post-operative care.

Supervision and active participation by the cardiothoracic faculty is required in preoperative, intraoperative, and postoperative care.

The Board wishes to emphasize, in addition, that first-assisting at operations is considered an important part of resident training, particularly in complex or relatively uncommon cases such as certain kinds of congenital heart surgery and certain operations to correct disorders of the esophagus.

Applications

Prospective candidates desiring to apply for examination should consider whether they are able to meet the minimum requirements of the Board. They should then submit a letter to the office of the Secretary of the Board, outlining briefly their training and experience in thoracic surgery.

An application blank will be sent to those candidates who have completed residency training programs which have been approved by the Residency Review Committee for Thoracic Surgery.

Candidates are notified of their eligibility for examination when their applications have been approved. Candidates who do not exercise the examination privilege within three years of the date they are declared eligible will be required to file a new application, have their eligibility for examination reviewed by the Credentials Committee, and pay a new registration fee.

Examinations

It is the policy of the American Board of Thoracic Surgery to examine candidates only upon completion of their thoracic surgery residency.

Separate written and oral examinations are held annually at times and places determined by the Board. Information regarding the dates and places of the examinations is published in the Examination and Licensure column of the Journal of the American Medical Association, the Journal of Thoracic and Cardiovascular Surgery, and the Annals of Thoracic Surgery.

Part I—Written Examination

The examination consists of an objective multiple choice written examination designed primarily to assess cognitive skills.

Part II—Oral Examination

Successful completion of the Part I (written) examination will be a requirement for admission to the Part II (oral) examination. The oral examination must be taken within three years after the candidate has passed the written examination, or the candidate will be required to submit a new application for approval by the Board and pay a new registration and examination fee. The oral examination is designed to test the candidate's knowledge, judgment, and ability to correlate information in the management of clinical problems in thoracic and cardiovascular surgery.

Re-examinations

Candidates who fail an examination (Part I or Part II) are eligible to repeat the examination the following year.

Thoracic Surgery

Candidates who fail an examination (Part I or Part II) three times must complete an additional year of training, preferably in a program approved by the Residency Review Committee for Thoracic Surgery, before they will be considered for examination again. If training in an approved program cannot be obtained, training may take place in an unapproved program if the training has been reviewed and approved in advance by the Credentials Committee.

Candidates who are eligible for re-examination and who do not exercise the re-examination privilege within three years of the date they fail will be required to file a new application blank, have their eligibility for examination reviewed by the Credentials Committee, and pay a new registration and examination fee.

Fees

(Beginning with the 1990 examinations)

Registration fee—$100.00
Part I examination fee—$500.00
Part I re-examination fee—$550.00
Part II examination fee—$850.00
Part II re-examination fee—$850.00

Candidates who do not appear for the examination (Part I or Part II) or who cancel less than six weeks before either examination may forfeit their examination fee.

The Board is a non-profit corporation, and the fees from candidates are used solely for defraying actual expenses incurred in office administration and conducting examinations and the business of the Board. The directors of the Board serve without compensation.

Appeals

Individuals who receive an unfavorable ruling from the Credentials Committee of the Board may appeal such determination by mailing a notice of appeal to the office of the American Board of Thoracic Surgery within 30 days of the date such ruling was mailed. Copies of the appeals procedures of the American Board of Thoracic Surgery may be obtained from the office of the Board. Under the appeals procedures of the American Board of Thoracic Surgery, the only appeal permitted from a failure of the written examination is a hand rescoring to verify the accuracy of the score as reported. The request for re-scoring must be made within 30 days of the time the examination results are received by the candidate. The only appeal with respect to the oral examination is the opportunity to request a re-examination immediately following the completion of the oral examination.

Certification

After a candidate has met the requirements for eligibility and passed the examination, a certificate attesting to his qualifications in thoracic surgery will be issued by the Board.

Recertification

Applicants who are certified in thoracic surgery after December 31, 1975, will be issued certificates valid for ten years from the date of certification, after which the certificates will no longer be valid. Certificates can be renewed prior to expiration by fulfilling the requirements for recertification specified by the American Board of Thoracic Surgery at that time. A Recertification Booklet is available upon request.

Revocation of Certificate

No certificate shall be issued and any certificate may be revoked by the Board if it shall determine that:
Urology

a. the candidate for certification did not possess the required qualifications and requirements for examination whether or not such deficiency was known to the Board or any Committee thereof prior to examination or at the time of the issuance of the certificate as the case may be,

b. the candidate for certification withheld information in his/her application, made a material misstatement or any other representation to the Board or any Committee thereof, whether intentional or unintentional,

c. the candidate for certification or certified physician was convicted by a court of competent jurisdiction of any felony or misdemeanor involving moral turpitude and, in the opinion of the Board, having a material relationship to the practice of medicine, or

d. the candidate for certification or certified physician had his license to practice medicine revoked or was disciplined or censured by any court or other body having proper jurisdiction and authority because of any act or omission arising from the practice of medicine.

(EDITOR'S NOTE: These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Urology to ascertain whether the information they have is current.)

Requirements

An applicant may initiate application for certification by the American Board of Urology during the final year of his or her residency training or at some point thereafter. For details of the certification process see “The Certification Process.” Every applicant, however, must meet certain basic requirements as follows:

A. PREREQUISITES

1. Except as noted below the applicant must be a graduate of a medical school approved by the Liaison Committee on Medical Education or a school of osteopathy approved by the Bureau of Professional Education of the American Osteopathic Association, and have completed an ACGME accredited urology residency program as designated in the AMA Directory of Graduate Medical Education Programs, Section II, “The Essentials of Accredited Residencies and Graduate Medical Education,” Part I, Section III, “Eligibility and Selection of Residents.” The applicant must satisfactorily complete a minimum of 5 years of ACGME approved postgraduate education of which 12 months must be spent in general surgery and 36 months must be spent in clinical urology. Of the remaining 12 months, a minimum of 6 months must be spent in general surgery, urology, or other clinical disciplines relevant to urology. Irrespective of the training format provided, the final 12 months of training must be spent as a senior/chief resident in urology with appropriate clinical responsibility under supervision in institutions which are an approved part of the program. To be admissible to the certification process of the Board, the applicant must complete the requirements for his/her specific program, in effect at the time he/she is accepted in the program, as established by the Residency Review Committee for Urology.

2. In a specific program approved by the Residency Review Committee for Urology, the Board may accept a training program curriculum of one year of general surgery and four years of urology.

3. A Canadian-trained urologist, who receives all of his medical training (including medical school, a minimum of two years of pre-urology and three years of urology with final year as chief resident) in programs approved by the Liaison Committee for Medical Education (LCME) and the Accreditation Council for Graduate Medical Education (ACGME) or the Accreditation Committee of the Royal College of Physicians and Surgeons of Canada, may, upon successful completion of this training, sit for the American Board of Urology examination without first having to undergo certification by the Royal College of Physicians and Surgeons of Canada.

A Canadian-trained urologist, who receives any part of his training (including medical schools, pre-urology, or urology) outside of U.S. or Canadian approved programs, may, upon successful completion of his training (as defined by the American Board of Urology), sit for the American Board of Urology examination only after first being certified by the Royal College of Physicians and Surgeons of Canada.

In any event, the Board continues its current policy of giving no more than one year of pre-urology credit toward certification for any post graduate training in programs not approved by the ACGME or the Accreditation Committee of the Royal College of Physicians and Surgeons of Canada.

A Canadian-trained urologist, who receives any part of his training (including medical schools, pre-urology, or urology) outside of U.S. or Canadian approved programs, may, upon successful completion of his training (as defined by the American Board of Urology), sit for the American Board of Urology examination only after first being certified by the Royal College of Physicians and Surgeons of Canada.

4. Foreign medical graduates from schools providing an equivalent medical background, who have completed an approved urology residency in the United States or Canada, may also qualify for examination by the American Board of Urology, but pre-urology training taken outside the United States or Canada may be approved for no more than one year of the two year prerequisite non-urology training. All such applicants must have at least one year of surgical training in an approved general surgery training program in the United States or Canada.

5. In addition to the training requirements noted above, applicants seeking certification by the American Board of Urology must also have a valid medical license that is not subject to any restrictions, conditions, or limitations, and must demonstrate competence in clinical practice. The Board will obtain evidence of this through a review of logs of cases performed by the applicant and by direct communication with the applicant's peers.

6. Deviations from the requirements described above may be permitted at the discretion of the Board when the Board is satisfied that the deviation provides equivalent or superior education or training. Any such deviations must be approved by the Board before the applicant enters the urological portion of training.

B. APPLICATION

1. A special application form provided by the Executive Secretary shall be completed by applicant and returned to the Board Office by registered, certified, or express mail with return receipt requested. Application must be in the Board Office by January 1 in order to permit the applicant to be admitted for the Qualifying Examination (Part I, written), the following May or June. Applications and documentation material postmarked before, but not received in the Board Office by January 1 will incur a late fee of $225. NO APPLICATIONS WILL BE ACCEPTED AFTER FEBRUARY 1. NO APPLICATION WILL BE CONSIDERED BY THE CREDENTIALS COMMITTEE OR THE BOARD UNLESS IT IS SUBMITTED BY THE DEADLINE SET FORTH AND IS COMPLETE.
The Certification Process

Applicants approved by the Board to enter the certification process must complete both a written "Qualifying Examination" (Part I) and, after passing this examination, a subsequent "Certifying Examination" (Part II). Assessment of clinical competence through review of practice logs and peer review will also be carried out prior to admission to the Certifying Examination (Part II). Applicants who have not taken the Qualifying Examination (Part I) within five years of the completion of their urological residency will be required to complete 200 hours of Continuing Medical Education (CME) in urology and must pass a preliminary written examination before being permitted to enter the certification process.

A. THE QUALIFYING EXAMINATION (Part I)

The Qualifying Examination is a written examination given in May or June of each year, simultaneously at several different locations. Applicants who fail this examination must take it again the following year unless the absence is excused by the Board Office. Failure to retake the examination at the first available opportunity will result in administrative withdrawal of the application.

Applicants who fail the Qualifying Examination (Part I) on three occasions are inadmissible for a three-year period following which they may reapply to reenter the certification process at the Qualifying Examination (Part I) level.

The Qualifying Examination is designed to assess knowledge of the entire field of urology and allied subjects. This includes: andrology (including infertility); calculous disease (including endourology and shock-wave lithotripsy); congenital anomalies; pediatric urology; female urology; infectious diseases; neuro-urology and urodynamics; obstructive diseases; psychic disorders; renovascular hypertension and renal transplantation; sexuality and impotence; adrenal diseases and endocrinology; trauma and urologic oncology.

B. THE CERTIFYING EXAMINATION (Part II)

Candidates for the Certifying Examination must have met all training requirements and have passed the Qualifying Examination (Part I). The Certifying Examination includes assessment of clinical competence through review of practice logs and peer review and three practical examinations (an oral examination, and written examinations in radiology and pathology). In addition, the candidate must have engaged in a minimum of 18 months of urological practice with a primary patient responsibility in a single community, and academic institution, or in the Armed Forces or Public Health Service. Six months credit toward this 18-month practice period may be awarded an individual in a fellowship relevant to urology for one year or longer.

Application for admission to the Certifying Examination (Part II) is made by completing the Supplemental Application Form available from the Board Office. This application must be returned by registered, certified, or express mail with return receipt requested, and be received in the Board Office by July 1 prior to the Certifying Examination of the following year. In addition, a minimum one year log of all major and minor cases performed as the primary surgeon prepared in accordance with the form provided by the American Board of Urology and verified in writing by the administrator of every facility, where the candidate practices must be received in the Board Office by December 1 prior to the Certifying Examination in the following year. Express mail is recommended. Applicants will be assessed $225 for logs received between December 1-15. No surgical logs will be accepted after December 15.

A candidate not under review by the Credentials Committee must take and pass the Certifying Examination (Part II) within five years after first entering the certification process. Failure to do so will result in inadmissibility for a three-year period following which the candidate may reapply to reenter the certification process at the Qualifying Examination (Part I) level.
Urology

The oral examination, urologic imaging examination and pathology examination are all regarded as separate examinations. A candidate failing all or any portion of the Certifying Examination (Part II) must repeat the failed portion the next year unless excused by the Executive Secretary or the Board for cause. A candidate failing all or any portion of the Certifying Examination (Part II) on three occasions is inadmissible for a three year period following which the candidate may reapply to reenter the certification process at the Qualifying Examination (Part I) level.

C. STEPS IN THE CERTIFYING EXAMINATION:

1. Assessment of Clinical Experience

Candidates for the Certifying Examination (Part II) must be in the full-time practice of urology or performing research relevant to urology, and must be licensed to practice medicine in the area of current practice or research activity. As evidence of competency, the candidate must submit a log of cases performed as primary surgeon during the most recent 12-18 months in the area of current practice as described earlier in this section. In the case of military or public health physicians subject to unexpected changes of assignment, the Board may accept cases from the previous assignment. Photostatic copies from the patient care facility and/or office record of any one or more of the above cases may be requested by the Board. The candidate shall be responsible for obtaining patient consent for the disclosure of patient records to the Board, or for ensuring that the patient records disclosed to the Board do not contain any patient-identifying information. The candidate is expected to furnish such records within one month of the request.

To further ascertain and document the candidate’s qualification for certification, the American Board of Urology will solicit information and comments from appropriate individuals, such as fellow practitioners, or from organizations, such as medical societies, licensing agencies, etc. The Board will be authorized by the candidate and will be held harmless to conduct investigations of professional ethics, reputation, and practice patterns. Under no circumstances, will the source of peer review letters be revealed to any person other than members of the American Board of Urology.

Upon receipt of the practice logs and peer review information, the credentials of the candidate will be reviewed by the Credentials Committee of the Board. Evidence of ethical, moral, and professional behavior, and an appropriate pattern of urologic practice including experience with an adequate volume and variety of clinical material will be sought. Areas of inadequacy may be cause for deterrence or discontinuation of the certifying process until these areas are clarified or corrected. Actions of the Board to achieve clarification may include:

a) Inquiry into practice irregularities by the Credentials Committee of the Board.

b) Request for certified copies of candidate’s health care facility and/or office records for review.

c) A site visit to the candidate’s community at the candidate’s expense.

d) Other appropriate measures that may be deemed necessary to assess apparent deviations from standard urologic practice.

The candidate will not be permitted to continue the certification process until the Board has satisfied itself of the appropriateness of the candidate’s practice pattern and professional behavior. The Board may elect to deny or terminate the certifying process until certain temporary inadequacies or deviations are corrected. It may deny certification if serious professional deviations or unethical conduct are involved, including but not limited to, cheating on, or improper or disruptive conduct during any examination conducted by the Board.

2. The Oral, Pathology, and Urologic Imaging Examinations

These examinations are given annually in February at a single site. The pathology and urologic imaging examinations are written and are based on projected photographic slide material. The oral examination is an interactive process between examiner and candidate during which an assessment is made of ability to diagnose and manage urologic problems. Since the candidate has passed the Qualifying Examination (Part I), the examiner presumes in the oral examination that the candidate has a satisfactory degree of cognitive knowledge of urology. Therefore, the oral examination will concentrate upon the following:

a) Problem Solving Ability. Evaluation is made of the candidate’s ability to collect pertinent information systematically, integrate it, assess the problem, and propose an appropriate solution.

b) Response to a Change in a Clinical Situation. The candidate’s ability to manage changing clinical conditions is evaluated through the flexible interaction between the examiner and the candidate. Changed clinical conditions may be posed arbitrarily by the examiner in order to assess various responses by the candidate, or may be developed by the examiner from the outcome of management recommendations offered by the candidate during the interview.

c) Professional Behavior in the Role of a Urologist. The candidate’s attitude, interaction with the examiner, and expression of patient management concerns contribute to the assessment of professional behavior.

Final Action of the Board

Final action regarding each applicant is the sole prerogative of the Board and is based on the applicant’s training, professional record, performance in clinical practice, and the results of the examinations given by the Board. REGARDLESS OF THE SEQUENCE IN WHICH THE VARIOUS STEPS OF CERTIFICATION MAY HAVE BEEN ACCOMPLISHED, THE PROCESS ITSELF IS NOT CONSIDERED COMPLETE UNTIL THE BOARD’S FINAL ACTION. AT ANY POINT IN THE PROCESS, THE BOARD MAY DELAY OR EVEN DENY CERTIFICATION UPON CONSIDERATION OF INFORMATION WHICH APPEARS TO THE BOARD TO JUSTIFY SUCH ACTION. An appeals procedure is available to all applicants at any stage of the certification process. Details of this procedure are available upon request from the Board Office. IF AN APPEAL IS INITIATED, IT MUST BE FILED WITHIN 30 DAYS FROM THE TIME THE CANDIDATE WAS NOTIFIED OF A BOARD DECISION.

THE ACTIVITIES DESCRIBED IN ARTICLES OF THIS GUIDEBOOK PROCEED FROM THE CERTIFICATE OF INCORPORATION AND BY-LAWS WHICH STATE THE NATURE OF THE BUSINESS, OBJECTS, AND PURPOSES PROPOSED TO BE TRANSACTED AND CARRIED OUT BY THIS CORPORATION.

Guidelines for Special Training

Although certificates of special qualifications in certain areas of urology are not offered by the Board, it is recognized that special expertise in some aspects of the discipline may be achieved through an organized program of study, observation, and practice additional to formal residency training. The Board has established guidelines for such special training programs in the fields of pediatric urology, renal transplantation, urologic oncology, and male and female reproductive surgery. These guidelines and others to be developed in the future can be obtained by program directors and prospective trainees from the office of The American Board of Urology, Inc.

Recertification

Certificates issued by the American Board of Urology on or after January 1, 1983, are valid for ten years only. A physician who fails to be recertified by the expiration date is no longer a Diplomate of the Board. It is recommended, therefore, that Diplomates possessing a time-limited certificate make plans to recertification at least one year before the expiration date of their current certificate. Recertification accomplished before the date of expiration of the existing certificate will be valid for a period of ten years from the date of issuance of the
new certificate, not from the date of expiration of the old one. Recertification is based upon an assessment of the following evidence:

A. An existing certificate issued by The American Board of Urology.
B. A currently valid medical license that is not subject to any restrictions, conditions, or limitations issued by a State Board of Medical Licensure.
C. Active involvement in the practice, teaching, research or administration of urology;
D. Currently valid privileges to practice urology in a hospital accredited by the Joint Commission on Accreditation of Hospitals (JCAH) or such other patient care facility as may be judged acceptable by the Board.
E. Documentation of satisfactory performance by the hospital administrator, the medical director, chief of urology, chief of medical staff, or other such appropriate official in every patient care facility where the applicant exercises practice privileges.
F. Documentation of good standing in the medical profession. The applicant must submit a list of no more than five local physicians, preferably urologists, who are willing to provide a letter of reference on request, but the Board reserves the right to solicit information from other physicians or organizations.
G. Verified participation during the three years preceding application in at least 150 hours of continuing education in urology. At least 60 hours must have been earned in Category I activities accredited by the Accreditation Council for Continuing Medical Education (ACCME), and the other 90 hours may be accrued through Categories II-VI activities, as designated currently by the Council of Medical Education of the AMA. These requirements may be met by submitting an current valid certificate which document such as CME credits.
H. The most recent one-year log listing all major and minor cases performed within all hospitals and outpatient surgical settings utilized by the candidate.
I. Agreement to an on-site visit, which may be at the expense of the applicant, to the applicant’s community, by a representative of the Board if deemed necessary.
J. Evidence of a level of cognitive knowledge of urology acceptable to the Board as determined by direct examination by the Board. Currently, Diplomates may select either a self-assessment examination or the examinations of the original certification process which are given annually in various parts of the country.

Revocation of Certificate

Certificates issued by this Board are the property of the Board, and are issued pursuant to the rules and regulations of the Board. Each certificate is issued to an individual physician who, by signature, agrees to revocation in the event that:

A. The issuance of such certificate or its receipt by the physician so certified shall have been contrary to, or in violation of, any provision of the Certificate of Incorporation, Bylaws or rules and regulations of the Board in force at the time of issue; or
B. The physician or party certified shall not have been eligible to receive such certificate, irrespective of whether or not the facts constituting ineligibility were known to, or could have been ascertained by, the Directors of the Board at the time of issuance of such certificate; or
C. The physician or party so certified shall have made a material misrepresentation in application for such certificate or in any other statement or representation to the Board or its representatives; or
D. The physician so certified shall at any time have neglected to maintain the degree of competency in the practice of the specialty of urology as set up by the Board, and shall refuse to submit to reexamination by the Board; or
E. The physician so certified has been found to be guilty of unethical practices or immoral conduct or of conduct leading to revocation of his license. These objective standards include conduct that violates state medical laws, rules and regulations of local and state urologic Boards and relevant AMA guidelines, and conduct leading to revocation of license.

The Board of Trustees of this Corporation shall have the sole power, jurisdiction and right to determine and decide whether the evidence or information before it is sufficient to constitute one of the grounds for revocation of any certificate issued by this Board. When the Board is made aware of facts possibly constituting grounds for revocation, the Board shall give the physician written notification identifying the specific facts that have come to its attention. The Board may require any physician so notified to appear before the Board of Trustees. The Board shall convene, and cause to be served upon the physician, notice of hearing, and such other persons as the Board may designate, to present evidence in support of any actions. The failure of any physician so notified to appear as required in such notice, without due excuse deemed sufficient to the Board of Trustees, shall constitute, ipso facto, cause for revocation of the certificate. The decisions of the Board of Trustees relating to all matters under this Section shall be final and binding.

The Diplomate will be required to attest that he/she has read and understands the above provision regarding the grounds for revocation of certificates issued and the procedures to be followed in determining whether or not a certificate should be revoked and to agree to hold the Board, its officers and agents harmless from any damage, claim or complaint by reason of any action taken in good faith and consistent with such procedures.
APPENDIX C
MEDICAL LICENSURE REQUIREMENTS
MEDICAL LICENSURE REQUIREMENTS

The following information has been provided by Catherine M. Bidese of the staff of the AMA Department of Data Resource Development in cooperation with Amiir Osten, Ph.D. of the Office of Physician Credentials and Qualifications. The tables are taken (with publication corrections) from "U.S. Medical Licensure Statistics and Current Licensure Requirements, 1990 Edition" published by the American Medical Association.

Policies for Initial Medical Licensure for Graduates of U.S. Medical Schools

The initial medical license of most U.S. medical school graduates is granted by endorsement of their National Board Certificates. All licensing jurisdictions, except Texas and the Virgin Islands, will endorse certificates from the National Board under certain circumstances. The Texas licensing board will endorse National Board certificates, and state licenses based on the National Board certificate when Part III of the National Board examination was passed after January 1, 1978, if the candidate passes Component 2 of the Federation Licensing Examination (FLEX). In all other cases the reciprocal endorsement candidate must pass the Federation's Special Purpose Examination (FLEX) in Texas. Those graduates who are not licensed by endorsement of a National Board certificate, must pass the FLEX which is used by all states as the medical licensing examination. In many states the certificate of the National Board of Examiners for Osteopathic Physicians and Surgeons can be endorsed for licensure. Boards of medical examiners in Guam, Massachusetts, Nevada, New Jersey, Tennessee, and Vermont will endorse U.S. specialty board certificates for licensing purposes in specific circumstances as delineated by the licensure regulations of those states.

Policies for Licensure of Graduates of Foreign Medical Schools

Most of the state medical boards will accept graduate training in Canada as equivalent to training undertaken in the U.S. Forty-one states will issue a medical license to a graduate of a Canadian medical school who holds a license in one of the provinces of Canada. Thirty licensing boards will, under certain specified conditions, endorse a Licensee of the Medical Council of Canada certificate held by a foreign medical graduate.

In the most recent survey conducted by the AMA Department of Data Resource Development, 39 states have indicated they will license foreign medical graduates who hold a Fifth Pathway certificate, but do not hold a standard ECFMG certificate.

Foreign educated candidates for licensure are permitted by seven state boards to take the FLEX before they have had graduate training. Applicants must hold the ECFMG certificate. Candidates are not awarded a license until they have undertaken one or more years of training in the U.S. and have met other specific requirements of the individual boards, e.g., an Educational Commission for Foreign Medical Graduates (ECFMG) certificate, personal interview, fees, etc. Six licensing boards those in Alabama, Florida, Maryland, Ohio, Puerto Rico, and Virginia maintain lists of foreign medical schools, only graduates of these schools can be licensed.

Tables 1, 2, 3, 4, and 5 on the following pages summarize the licensure policies of state boards. It is strongly recommended that candidates contact the specific state board for the most current information on licensure requirements in that state. Names and addresses of the corresponding officers are listed in Table 6 of this Appendix.

Restricted Licenses and Educational Permits

Fifty boards provide for the issuance of educational permits, limited and temporary licenses, or other certificates for the restricted practice of medicine. The terms for the issuance of such certificates vary. Such certificates may be issued (1) for hospital training of those eligible for licensure, (2) for supervised employment in state or private hospitals, and (3) for full-time practice until the next regular session of the licensing board. These permits must generally be renewed once a year with a stipulated maximum number of renewals allowed (usually five years).

Amendments to the Immigration and Nationality Act made through Public Law 94-484, the Health Professions Educational Assistance Act of 1976, establish requirements for the admission of alien physicians to the United States, whether for permanent residency or for participation in graduate medical education training programs. The amendments require that alien graduates of foreign medical schools pass an examination determined by the Secretary of Health and Human Services to be the equivalent to Parts I and II of the National Board of Medical Examiners examination. The amendments also require that alien medical graduates demonstrate competence in oral and written English.

The Secretary of Health and Human Services has determined that the Foreign Medical Graduate Examination in the Medical Sciences (FMGEE), which is prepared by the National Board of Medical Examiners and administered by the Educational Commission for Foreign Medical Graduates, is the equivalent of Parts I and II of the National Board of Medical Examiners examination for purposes of the amendments to the Immigration and Nationality Act. This examination, which lasts for two days and is composed of equal proportions of clinical science and basic science questions in a multiple choice format, is given twice a year at examination centers abroad and in the United States. Applications for the examination and questions should be addressed to the Educational Commission for Foreign Medical Graduates, 3624 Market Street, Philadelphia, PA 19104, U.S.A. Since 1989, graduates of foreign schools have also been able to take Parts I and II of the examination on the National Board of Medical Examiners. This is also given in the U.S. and abroad.

Graduates of foreign medical schools who are citizens of the United States and lawful permanent residents of the United States must pass the FMGEE in order to be provided with the ECFMG Certificate.

NL—indicates no limit.

1—SPEX Examination.
2—Not required of University of Arkansas students.
3—Oral examination is required.
4—Before taking Component II.
♭—0-1 indicates that physician may sit for examination upon acceptance to or during the first year of accredited residency training.
♯—Applicant must be "board-eligible" by an American Specialty Board. Years of training will vary by specialty.
14—Four months required.
▴—Residents entering training programs prior to 1/1/86 need one year; from 1/1/86 on, two years are required.
♯—Two years are required for graduates of Canadian medical schools.
19—First year of residency in pathology and psychiatry not accepted.
19—One year is required. A physician had no U.S. training prior to July 1, 1987.

*—All State Boards of Medical Examiners consider Canadian citizens who have graduated from an accredited Canadian medical school on the same basis for licensure as graduates of accredited U.S. medical schools.

1—Applicant must have received LMC in or after May 1970. (After 12/31/69 [WA]; 1/1/78 [WI].)
2—Must be endorsed by provincial licensing board.
3—Training not required.
4—LMC will be considered only in conjunction with a valid Canadian provincial license.
5—Two years formal postgraduate training required.
6—By vote of the Board.
7—At discretion of Board.
8—Must be endorsed by provincial licensing board. If Medical Council of Canada examination was taken after 1/1/78, candidate must also pass SPHER.

*NOTE—This summary should be verified by direct communication with the corresponding officer of the licensing board in the state in which the physician is interested. In all states licenses based on the endorsement/acceptance of a physician's credentials are granted to those physicians meeting all state requirements—AT THE DISCRETION OF THE LICENSING BOARD. Additional information provided by the state follows:

1. Oral examination is required.
2. Must include four months of general medicine.
3. Before taking Component II.
4. Oral examination may be required.
5. ECFMG certificate is required. Applicant is not a graduate of a certified foreign medical school. Graduate of certified foreign medical schools where the language of instruction is other than English must demonstrate competency in English.
6. Applicant must be "board-eligible" by an American Specialty Board.
7. Varies by specialty. Canadian training not accepted.
8. Four months of residency training must be completed in the U.S. or Canada prior to being eligible to sit for the examination.
9. One year residency required for persons entering residency training prior to 1/1/88 January 1, 1988 or after, two years is required.
10. Only in conjunction with a valid Canadian provincial license and provided all other licensure requirements are met.

---

*—O-1 indicates that physician may sit for exam upon acceptance to or during the first year of accredited residency training.
12—Zero years required for Component I; three years required for Component II (see U.S.).
13—Three years required with one U.S.
14—May be counted as one year of required postgraduate training.
15—Postgraduate training taken outside the U.S. or Canada may be found qualifying under certain circumstances.
16—FLEX not administered in North Dakota.
17—A standard ECFMG certificate is required of the graduates of foreign medical schools except graduates of foreign medical schools located in Canada, England, Scotland, Ireland, Australia, and New Zealand. An ECFMG certificate can be waived by unanimous vote of the entire Board if the physician holds an American Board Certificate (CB).
18—Poinsett or May 1975 (PA); 1/175 (IN). It passed before 1/175 (TN). It passed after 1/175 (WA).
19—One year required. Physician had no U.S. training prior to 7/1977.
20—Up to three years at Board discretion.
21—Only if resident of U.S. prior to entering Fifth Pathway Program.
22—If the Medical Council of Canada was passed after 1/178, candidate must also pass FLEX Component II.
23—One year if graduated 7/1965.
Table 4.—Fees for Issuing Medical Licenses by Examination and by Reciprocity or Endorsement* and License Reregistration Intervals and Fees.

</table>

NOTE: All boards require that each component must be passed with a score of 75 or better. In all states, licenses are granted to physicians meeting all state requirements—At the discretion of the board. This summary should be verified by direct communication with the licensing board in the state in which the physician is interested.

x—Indicates no answer or rules pending.

1—Penalties vary from state to state. In some, once the maximum has been reached, the candidate is ineligible for licensure. In other states, the candidate will be required to show evidence of additional study or meet other board regulations.

2—Completes three years as a Clinical Instructor (Assistant Professor or higher position) in an approved U.S. or Canadian medical school.

3—Not required of University of Arkansas students.

4—Scores are valid for four years or until 1/1/82, whichever is later.

5— Indicates that physician may sit for exam only upon acceptance to or during the first year of accredited residency training.

6—Before taking Component II.

7—After October 1, 1969, the number of times the examination has been previously failed.

8—Four months residency training completed in U.S. or Canada prior to being eligible for sit for examination.

9—If graduated before 1/1/70, only one year is required. 7/28/85 (WA).

10—Thirteen years [two years of some specialty] if the school is "new" or "unapproved".

11—Candidate must pass both Components within five years of first sitting for old FLEX, Components I & new FLEX or Components II of new FLEX.

12—If graduated after 7/28/65, three years are required.

13—FLEX is no longer administered in North Dakota after December 1985 admistration.

14—FLEX only if not sitting together or separately.

15—Three years for graduates from non-approved Caribbean schools.

16—Failed component(s) must be passed within the next three times the FLEX is offered.
