Section IV

Graduate Medical Education Teaching Institutions

Section IV lists hospitals and organizations that sponsor graduate medical education (GME) programs, serve as primary clinical sites, or participate in GME. Sponsoring institutions (formerly parent institutions) assume final responsibility for a GME program. Most GME programs are sponsored by specific clinical departments within a hospital, another health care institution such as a medical school, or an educational consortium. Primary clinical sites exist when the location of the primary teaching institution differs from that of the sponsoring institution. Participating institutions (formerly affiliated institutions) include hospitals or other sites recognized by at least one residency review committee as providing a major portion of required GME.

Separate listings for sponsoring institutions, primary clinical sites, and participating institutions are provided in alphabetical order by state and city. Each listing includes the institution name, address, and identification code. Also provided are codes of medical schools affiliated with each institution (where applicable) and abbreviations for the specialty and subspecialty programs sponsored by the institution. (A key for specialty and subspecialty abbreviation codes is provided in Appendix F.)

Candidates seeking a residency should refer to the list of programs in Section III. Applications for a residency position should be addressed to the program director rather than to an institution.

Relationships Between Hospitals and Medical Schools (Medical School Affiliation)

Hospitals that sponsor an accredited program are not required to have a formal relationship with a medical school. Where such a relationship exists, the affiliation is identified by the dean of the medical school as M (major), G (graduate only), or L (limited). The medical school associated with the code number in this listing is identified in Appendix F.

Major affiliation (M) signifies that an institution is an important part of the teaching program of the medical school and is a major unit in the clinical clerkship program. Major teaching institutions provide clerkship experience in two or more of the major specialties: internal medicine, surgery, pediatrics, and obstetrics-gynecology. An institution responsible for most of the teaching in a single specialty, such as psychiatry or pediatrics, may also be considered a major affiliation. In a major teaching institution, medical students serve clinical clerkships regularly on inpatient services, under the direct supervision of medical school faculty. A major teaching institution may or may not be used for medical school residencies.

Graduate affiliation (G) indicates that the institution is affiliated with the medical school only for its graduate programs and that one or more of the following arrangements is in effect:

1. House staff of the GME programs are selected by officials of a medical school department or by a joint committee of the institution teaching staff and medical school faculty.
2. Medical school faculty (other than the institution's attending staff) are regularly scheduled to participate in the teaching programs of the institution. No graduate affiliation is indicated if medical school faculty participation at the institution is limited to an occasional lecture or consultation visit, or if the institution's residents attend medical school teaching conferences only as visitors.
3. A contractual arrangement (with or without financial commitment) specifies the medical school participation in the organization and supervision of the GME program in the institution.
4. There is some degree of exchange of residents between this institution and the principal teaching institution of the medical school. Limited affiliation (L) signifies that the institution is affiliated with the medical school's teaching program only for brief and/or unique rotations of students or residents.

Appendix A
Combined Specialty Programs

Combined specialty programs have been approved by each respective specialty board; resident physicians completing the program are accepted for board certification. Neither the Accreditation Council for Graduate Medical Education (ACGME) nor the Residency Review Committees accredit combined programs; they accredit each specialty program separately. Information in the combined program list was provided by specialty boards. Requests for information about the guidelines for these programs should be directed to the specialty boards at the address listed in Appendix B. Applicants to combined specialty programs are encouraged to review requirements for admission to the certification process of each board in Appendix B of this directory.

Internal Medicine/Emergency Medicine
The American Board of Internal Medicine and the American Board of Emergency Medicine offer dual certification for candidates who have completed at least 2 and a half years of suitable accredited training in each specialty. A combined residency consists of 5 years of balanced education in the two disciplines. It is strongly recommended that the participating residencies be in the same academic health center.

To meet eligibility for dual certification, the resident must satisfactorily complete 60 months of combined education, which must be verified by the directors of both programs. The certifying examinations cannot be taken until all 5 years are satisfactorily completed.

Internal Medicine/Neurology
The American Board of Internal Medicine and the American Board of Psychiatry and Neurology offer dual certification for candidates who have completed 5 years of combined training suitable to both boards. A combined residency in internal medicine and neurology must include at least 5 years of coherent education integral to residencies in the two disciplines. It is strongly recommended that the participating residencies be in the same institution.

To meet eligibility for dual certification, the resident must satisfactorily complete 60 months of training, which must be verified by the directors of both programs. The written certifying examinations cannot be taken until all required years in both specialties are satisfactorily completed.

Internal Medicine/Pediatrics
The American Board of Internal Medicine and the American Board of Pediatrics offer dual certification in internal medicine and pediatrics. A combined residency must include at least 2 years in each specialty, for a total of 4 years of coherent training integral to residencies in the two disciplines. The participating residencies should be in the same academic health center. Continuity clinics in each specialty should be provided throughout the 4 years.

To meet eligibility requirements for dual certification, the resident must satisfactorily complete 48 months of combined education, and clinical competence in both specialties must be verified by the directors of both programs. The certifying examinations cannot be taken until all required years in both specialties are satisfactorily completed.

Internal Medicine/Physical Medicine and Rehabilitation
The American Board of Internal Medicine and the American Board of Physical Medicine and Rehabilitation offer dual certification for candidates who have completed at least 2 and a half years of suitable accredited training in each specialty. A combined residency must include at least 5 years of coherent training integral to resi-
encies in the two disciplines. It is strongly recommended that the participating residencies be in the same institution.

To meet eligibility requirements for dual certification, the resident must satisfactorily complete 60 months of combined education, which must be verified by the directors of both programs. The written certifying examinations cannot be taken until required training in a specialty has been satisfactorily completed. The certifying examination in internal medicine cannot be taken prior to the fall of the fifth year in the combined program.

Internal Medicine/Psychiatry

The American Board of Internal Medicine and the American Board of Psychiatry and Neurology offer dual certification in internal medicine and psychiatry. A combined residency must include at least 5 years of coherent education integral to residencies in the two disciplines. Participating residencies must be in the same institution.

To meet eligibility requirements for dual certification, the resident must satisfactorily complete 60 months of combined education, which must be verified by the directors of both programs. The written certifying examinations cannot be taken until all required years in both specialties are satisfactorily completed.

Neurology/Physical Medicine and Rehabilitation

The American Board of Psychiatry and Neurology and the American Board of Physical Medicine and Rehabilitation offer dual certification in neurology and physical medicine and rehabilitation. A combined residency must include 5 years of combined education. This combined training must follow a year in a residency program that meets the requirements for neurology and should be completed in the same institution. All required years in both specialties must be satisfactorily completed prior to admission to the certifying examinations of each board.

Pediatrics/Emergency Medicine

The American Board of Pediatrics and the American Board of Emergency Medicine offer dual certification for candidates who fulfill the requirements of both boards by completing joint training in 5 years. All 5 years should be completed in the same combined program; exceptions must be approved in advance by both boards. Applicants may not take the certifying examinations until all required years in both specialties have been completed.

Pediatrics/Physical Medicine and Rehabilitation

The American Board of Pediatrics and the American Board of Physical Medicine and Rehabilitation permit applicants interested in pediatric rehabilitation to qualify for admission to the certifying examinations of both boards by completing a 5-year combined program. All 5 years should be completed at one academic institution; exceptions must be approved in advance by both boards.

Applicants may not take the certifying examinations until all required years in both specialties have been completed.

Pediatrics/Psychiatry/Child and Adolescent Psychiatry

The American Board of Pediatrics, the American Board of Psychiatry and Neurology, Inc., and the Committee on Certification in Child and Adolescent Psychiatry have developed a committee that is overseeing training via a different format. This is a five year curriculum with 24 months of pediatrics, 18 months of adult psychiatry, and 18 months of child and adolescent psychiatry. Completion of the program will satisfy the training requirement for certification in all three areas. Applicants pursuing training in these programs may not take the certifying examinations until all training has been completed. Credit for training via this route may be obtained only by training in one of these programs.

Psychiatry/Neurology

The American Board of Psychiatry and Neurology has established guidelines for combined training in Psychiatry and Neurology. A combined residency must include postgraduate year one (PGY1) training that is acceptable to neurology plus a minimum of 5 years of combined residency training. The five years of residency training are usually taken at one approved institution but may be taken at no more than two approved institutions.

Surgery/Plastic Surgery

Combined specialty programs in general surgery and plastic surgery operate in an integrated format whereby residents are matched directly into plastic surgery out of medical school; some plastic surgery rotations may be included during the first 3 years of general surgery. Upon completion of the combined program, physicians are eligible for certification by the American Board of Plastic Surgery.

Appendix B

Medical Specialty Board Certification Requirements

Twenty-four medical specialty boards have been approved by the American Board of Medical Specialties (ABMS) and the American Medical Association (AMA) Council on Medical Education through the Liaison Committee for Specialty Boards (LCSB). Applications for recognition as a specialty board are submitted to the LCSB and reviewed for compliance with the requirements and criteria published in the Essentials for Approval of New Examining Boards in Medical Specialties approved by both the ABMS and the AMA. If an applicant is approved for recognition as a medical specialty board by the LCSB, the application must then be approved by the membership of the ABMS and the AMA Council on Medical Education. The Essentials may be obtained from the office of the Executive Vice President of the American Board of Medical Specialties, 1007 Church St./Ste 404, Evanston, IL 60201-5913, or from the Council on Medical Education, American Medical Association, 515 N State St, Chicago, IL 60610.

The primary objective of medical specialty boards is the improvement of the quality of medical education and medical care. The primary functions of each of the medical specialty boards are to evaluate candidates in a medical specialty field who voluntarily appear for examination and to certify as diplomates those candidates who are qualified. To accomplish these functions, medical specialty boards determine whether candidates have received adequate preparation in accordance with established educational standards; provide comprehensive examinations designed to assess knowledge, skills, and experience requisite to the provision of high-quality patient care in that specialty; and certify those candidates who have satisfied the requirements.

In collaboration with the other organizations and agencies concerned, the approved medical specialty boards assist in improving the quality of medical education by elevating the standards of graduate medical education and approving facilities for specialty training.

The actual accreditation review for the approval of residency programs in each specialty is conducted by a Residency Review Committee on which the respective specialty board has equal representation with the AMA Council on Medical Education and, in some cases, with a related specialty society.

Medical specialty board certification is an additional process to receiving a medical degree, completing residency training, and receiving a license to practice medicine.

Certification requirements of each member board of ABMS are included on subsequent pages. Inquiries regarding specialty board certification requirements should be directed to the specialty board executive offices listed in Table 1. The member boards of ABMS publish materials containing statements on the requirements for certification, which are also reprinted in each edition of the Official American Board of Medical Specialties Directory of Board Certified Medical Specialists. This publication contains certification and biographical information on each specialist who has been certified by a member board of ABMS. The Directory is available from the ABMS or from Marquis Who's Who, 121 Channlon Rd, New Providence, NJ 07974.

(The Board reserves the right to make changes in its policies and procedures at any time and cannot assume responsibility for giving advance notice thereof. All applicants are advised to contact the ABIm to determine whether the following information remains current.)

Organization

The American Board of Allergy and Immunology (ABAI), a Conjoint Board of the American Board of Internal Medicine (ABIM) and the American Board of Pediatrics (ABP) was established in 1971 as a nonprofit organization. It is a member Board of the American Board of Medical Specialties (ABMS). It is sponsored jointly by the American College of Allergy and Immunology (AAAAI), the American Academy of Pediatrics (AAP) - Section on Allergy and Immunology, the American College of Allergy and Immunology (ACAI), the American Medical Association (AMA) - Section on Allergy and Immunology, and the Clinical Immunology Society (CIS).

ABAI's major purposes are: (a) establish qualifications and examine physician candidates for certification as specialists in allergy/immunology; (b) serve the public, physicians, hospitals, and medical schools by providing the names of physicians certified as allergists/immunologists; (c) improve the quality of care in allergy/immunology to the public; (d) establish and improve standards for the teaching and practice of allergy/immunology; and (e) establish standards for training programs in allergy/immunology.

Significance of Certification

A certified specialist in allergy and immunology is a physician who has fulfilled the requirements of and has received certification as a diplomate of the ABIM and/or ABP followed by additional certification by the ABAI. Diplomates of the ABAI have detailed knowledge of the underlying pathophysiology and the method of diagnosis, treatment and prevention of allergic diseases such as allergic rhinitis, allergic asthma, urticaria, anaphylaxis, hypersensitivity pneumonitis, atopic and contact dermatitis, and allergic gastrointestinal disorders, as well as comparable clinical problems with an apparent allergic etiology or component such as vasomotor rhinitis, nonallergic asthma and idiopathic and/or hereditary forms of urticaria and/or angioedema. Expertise in the management of immunologic complications of these diseases is a further prerequisite.

In addition, diplomates of the ABAI possess breadth and depth in the understanding of immunochemistry, immunobiology and applied pharmacology and experience in the application of this knowledge in the diagnosis, management and prevention of immunologic diseases, such as inborn or acquired defects of host resistance, autoimmune diseases, bone marrow and solid organ transplantation, gene replacement therapy, adverse drug reactions, and other conditions associated with an abnormality of the immune system. Because allergy and clinical immunology is an evolving and expanding area of medicine, diplomates may vary in their detailed knowledge of some of the aspects of allergy/immunology as defined above. Diplomates have demonstrated to the satisfaction of their peers that they possess the general qualifications specified.

Certification Process

The ABAI is interested in candidates who have embarked voluntarily on a graduate program of study, with the express purpose of excelling in the practice of the specialty of allergy/immunology. In outlining its requirements, the ABAI hopes to help the candidate select superior educational programs that will develop his/her competency in allergy/immunology. The ABAI believes that all allergists/immunologists should have a fundamental knowledge of the biological science basic to this discipline. Such knowledge is essential to the continued professional progress of any qualified allergist/immunologist. The ABAI anticipates that adequate knowledge in basic science, as applied to this discipline, will be acquired by the candidates during a post-medical school training program. The ABAI wishes to emphasize that time and training are but a means to the end of acquiring a broad knowledge of allergy/immunology.

The candidate must demonstrate competency to the ABAI in order to justify certification in this discipline. The responsibility of achieving the knowledge rests with the candidate. The ABAI is responsible for the establishment and maintenance of the standards of knowledge required for certification. Each candidate for certification must satisfy the general and professional qualifications listed below.

The examination reflects the current Special Requirements for Residency Training in Allergy and Immunology and the Content Outline determined by the Board of Directors, which is distributed with the application, and the following:

Candidates for certification must be familiar with the fundamental elements of the immune system, such as the types of immune cells contained in the immune system, the collections of immune cells that form anatomical organs of immunity, the circulation patterns of immune cells, the biologic role of products of the immune system, and the abnormal conditions of the immune system that constitute immunopathology. Moreover, the candidate will be expected to be proficient in understanding the molecular basis of allergic and other immune reactions, including interaction between immune cells, cell membrane signal transduction pathways, gene expression, cytokine release, receptor targeting, cellular differentiation, and death. Proficiency must be demonstrated in the diagnosis and treatment of allergies and other immunologic diseases.

Since the ABAI is a Conjoint Board representing pediatric and adult medicine, the candidate must master the spectrum of allergic and immunologic diseases as it presents in children and adults. In
addition to a familiarity with allergic diseases, including allergic rhinitis, asthma, atopic dermatitis, and urticaria, the candidate must be knowledgeable in autoimmune conditions such as rheumatologic disease, inflammatory bowel disease, immune-based endocrinopathies, and neuroimmunodulatory disorders. Equally important as competence in diseases of immune dysfunction is the knowledge of human pathology that results from an absence of immunity, either whole or partial, congenital or acquired. Thus, an understanding of the primary immunodeficiency states is required, including congenital disorders, such as severe combined immunodeficiency and X-linked agammaglobulinemia; absence of specific complement components, such as C2 deficiency; lack of specific neutrophil function, such as chronic granulomatous disease; absence of specific adhesives cellular glycoproteins, such as leukocyte adhesion deficiency; and dysfunctional states of the immune system produced by external agents, such as the acquired immunodeficiency syndrome resulting from infection with the human immunodeficiency virus.

It is important for the candidate to demonstrate proficiency in the proper selection of appropriate clinical and laboratory tests that aid in the formulation of a clinical diagnosis based on first obtaining a detailed medical history and performing a complete physical examination. The candidate must understand the scientific basis of the following list (nonexclusive) of tests: serum immunoglobulin determination, functional antibody measurement, complement component and functional assays, lymphocyte subset analysis using monoclonal antibodies and flow cytometry, lymphocyte proliferation assays with mitogens and antigens, and neutrophil and monocyte chemotaxis, phagocytosis, and killing assessment. In addition, competence must be demonstrated with the use of molecular diagnostic techniques involving the binding of ligands to nucleic acid or polypeptide sequences, such as assays involving restriction fragment length polymorphisms, DNA binding proteins, messenger RNA, and Western blots. The importance of DNA replication technology must be understood, such as that demonstrated in the polymerase chain reaction. The molecular basis for immediate hypersensitivity skin testing must be understood in the context of the detailed molecular events occurring in the tissue mast cell and blood basophil, particularly the release of preformed mediators, such as histamine, and in the generation of newly formed mediators, such as leukotrienes and prostaglandins. Similarly, skin testing for T cell competence with recall antigens must be understood in relation to antigen presentation, cytokine secretion and interaction, and lymphocyte subset activation and function. Candidates must also have familiarity with the misuse of standard tests and with controversial tests in allergy and immunology. The candidate must understand the principles and analytic methods employed in experimental clinical studies for determining the diagnostic utility of specific tests and in evaluating the safety, toxicity, and efficacy of treatments and drugs for allergic and immunologic diseases. Candidates must also be familiar with the principles and methods employed in epidemiologic studies.

A corollary of the competence of the candidate in the pathophysiology, clinical presentation, and immunologic testing of allergic and other immunologic diseases is the knowledge of appropriate treatment options. For example, the common aspect of all types of asthma is the presence of airway inflammation. Definitive treatment of asthma demands that therapies be utilized that include interruption of the inflammatory response. Thus, use of drugs that decrease airway inflammation in asthma must be understood by candidates for certification. Based on the molecular knowledge of the allergic response, the candidate must appreciate the importance of allergen avoidance and medical treatment of allergic rhinitis before initiation of the more intense treatment of immunotherapy. In the latter therapy, candidates must demonstrate competence in allergen selection and administration in successful treatment regimens. Therapy for immunologic diseases must be understood, such as (noninvasive) Intravenous immune globulin for antibody deficiency, interferon for chronic granulomatous disease, HLA-identical and HLA-haploidentical (T cell-depleted) bone marrow transplants for cellular immunodeficiencies, and gene replacement therapy currently used for the immunodeficiency associated with adenosine deaminase deficiency as well as theoretical principles/potential in other congenital immune disorders.

The candidate qualifies for examination

1. By having passed the certification examination of the ABIM and/or ABP, which requires 3 years of postdoctoral training in programs accredited by the Accreditation Council for Graduate Medical Education (ACGME).
2. By presentation of evidence, acceptable to the Board of Directors, of at least 2 years of full-time residency/fellowship in allergy/immunology programs accredited by the ACGME or other acceptable training in allergy/immunology programs. (Programs are listed in the Graduate Medical Education Directory, published by the American Medical Association. Application forms for accreditation of new residency programs may be obtained on written request to the Secretary of the Residency Review Committee for Allergy and Immunology, 515 State St / Ste 2000, Chicago, IL 60610, 312 464-5505, 312 464-4088 fax).
3. By documentation from the training program director evaluating and substantiating clinical competence and 2 full-time years of allergy/immunology training. Areas to be reviewed include clinical judgment, medical knowledge, clinical skills of history taking, physical examination, and procedural skills, humanitarian qualities, attitudes and professional behavior, medical care (utilizing laboratory tests and diagnostic procedures), commitment to scholarship, and work habits. The training program director must also provide written evidence of the candidate's clinical experience and readiness to sit for the examination. In compliance with the ACGME Special Requirements for Residency Training in Allergy and Immunology, a semiannual record must be maintained with copies to the ABAI for tracking purposes. The Evaluation Form together with the Explanation of Ratings Scale may be obtained from the ABAI.
4. Upon written release of the candidate, documentation from the Chief of Medicine or Pediatrics, ABAI diplomates in the geographical area, chiefs of community hospitals, or officers of state or regional societies to verify the medical, ethical, and moral standing and clinical competence of the candidate as a specialist in allergy/immunology.
5. By evidence of a valid, unrestricted license to practice medicine in a state, territory, possession, or province of the United States or Canada or in the United States armed forces or a written explanation of extenuating circumstances.

Candidates with a restricted, suspended, or revoked license, at the time of application or examination, will not be admitted to the examination or certified.

As of January 1, 1992, ABAI limits the time interval for candidates to become certified to 6 years following completion of allergy/immunology training. In the case of candidates whose applications were received after January 1, 1992, certification is available according to ABAI policy in force at the time of initial registration. New candidates accepted after January 1, 1992, who do not gain certification within this 6-year interval can re-register in the certification process with documentation of:

1. A valid, unrestricted medical license as defined above
2. Evidence of good standing within the medical community
2. Recommendation letters from 2 ABAI diplomats attesting to the candidate's medical, ethical, and moral standing and clinical competence as a specialist in allergy/immunology

4. One hundred hours CME Category I credit in the previous 2 years

5. Successful performance on an ABAI qualifying examination

6. Payment of current registration and examination fees

Candidates beyond 2 years of their training will be required to include an appointment in good standing on a hospital staff.

Conjoint Committees—The nature of a Conjoint Board requires involvement of the sponsoring primary Boards through understanding, evaluation, trust, and input into critical areas of decision making. With these concepts in mind, the ABAI has formed two advisory committees with representation by the ABAI, the ABIM, and the ABP. The Conjoint Credentials Committee will review and recommend the credentials of candidates for the certification examination to the Board for its determination. The Conjoint Standards Committee will review and recommend the passing grade for the certification examination to the Board for its determination.

Recertification Process

Since 1977, the ABAI has offered its diplomates a clinically relevant voluntary recertification process every other year so that the effectiveness of each diplomate’s own efforts in continuing education would be evaluated. Driven by public pressure for accountability and credibility, most of the 34 member boards of the ABMS have adopted policies to award time-limited certificates with renewal through a program of mandatory recertification.

Beginning with 1988, new ABAI diplomates received certificates valid for ten years. Diplomates certified prior to 1989 are not affected by this policy. However, all diplomates, especially those involved in training programs, are strongly encouraged to recertify as often as possible, but at a maximum of every ten years. Maintaining a current certificate is an expression of professional accountability. Presently 746 ABAI diplomates hold time-limited certificates; renewal may be achieved in the interim. ABAI recommends recertification for diplomates holding time-unlimited certificates.

The recertification process is composed of the following: Part I—a home study, open-book examination available August 1 through December 31. The diplomate is required to attain a 90% correct score in order to gain entry to Part II—a proctored examination administered October 9, 1996. If such an absolute score is not attained, the diplomate will be required to pass a subsequent remedial home examination with a 90% correct score. ABAI anticipates that most diplomates seeking recertification will be successful. Standards are established to justify public confidence. As an alternative pathway, diplomates may recertify by passing the 1996 certification examination and meeting its rigorous standard for candidates completing accredited training.

Diplomates for recertification will be examined in the following areas of clinical science: immediate hypersensitivity, immunological disorders, pharmacology and therapeutics, specific diagnostic modalities, and allergens and antigens. Attention will also be given to the following areas of basic science: immune mechanisms, cells involved in immune responses, specific immune mechanisms, and laboratory tests.

The diplomate qualifies for examination by

1. Having previously been certified by the ABAI. Recertification in internal medicine or pediatrics is encouraged of ABAI diplomates. Mechanisms to facilitate dual recertification in the primary specialty and allergy/immunology are currently under negotiation with the parent Boards in cooperation with their plans for their subspecialties.

2. Documentation from physicians in the ABAI diplomate’s community that he/she currently practices the specialty of allergy and immunology.

3. Evidence of a valid, unrestricted license to practice medicine in a state, territory, possession, or province of the United States or Canada or in the United States armed forces or a written explanation of extenuating circumstances. Diplomates with a restricted, suspended, or revoked license at the time of application or examination will not be admitted to the examination or recertified.

Clinical and Laboratory Immunology

In 1983 the ABMS approved Certification of Special Qualification in Diagnostic Laboratory Immunology (DLI) for diplomates of the ABAI, ABIM, and ABP periodically. Such recognition was awarded in 1986, 1988, and 1990 following successful examination performance to specialists with significant experience (at least 4 years) in comprehensive DLI, or at least one year’s training in DLI who were involved in the teaching, research, or practice setting in which the diagnostic immunology laboratory is of central importance and were recognized by their peers as competent by way of their significant contributions to DLI.

In 1991 ABMS approved the change to a Certificate of Added Qualification in Clinical and Laboratory Immunology for those specialists with one year of formal training following subspecialty certification in an immunologically based subspecialty in order to indicate the clinical interpretative skills inherent in such training. Within the last 20 years in the combined clinical practice of allergy and immunology, the most rapid expansion of knowledge has occurred within the area of clinical immunology. This explosion of information has impacted both clinical practice and diagnostic laboratory testing. Previous certification in diagnostic laboratory immunology has been interpreted as demonstration of skills in laboratory testing in immunology rather than the broad span of both clinical and laboratory skills. With the goal of certifying candidates in the broader sense of clinical skills and laboratory expertise in clinical immunology, the ABAI recommends that candidates be prepared to demonstrate competency by examination in the theory and practice of the following (noninclusive) clinical areas: (1) allergic diseases, (2) primary and secondary immunodeficiency diseases, (3) autoimmune diseases, (4) immunologic aspects of bone marrow and organ transplantation, (5) immune aspects of gene replacement therapy, (6) immunologic aspects of organ-specific inflammatory conditions, and (7) immune aspects of malignancy and cancer. Although these clinical areas of competence are expected of the traditional candidate in allergy/immunology, the candidate for CLI will be expected to master these concepts to a far greater degree. Moreover, since upon certification the CLI candidate should be ready to supervise an immunology laboratory, competence will be demanded in the following (noninclusive) areas: (1) quantitation of immunoglobulins; (2) measurement of specific antibodies; (3) functional and quantitative complement tests; (4) assays of lymphocyte, monocyte, neutrophil, and basophil function and quantitation; (5) autoantibody assessment; (6) rapid tests for infectious diseases; (7) DNA amplification and binding tests; (8) genetic testing; (9) histocompatibility testing; (10) prenatal diagnosis; (11) quality control testing; (12) data management and statistical analysis; and (13) regulatory agency interactions.

The examination reflects the current Special Requirements for Residency training and the Content Outline determined by the Joint Testing Committee of the ABAI, ABIM, and ABP, which is distributed with the application.

The next examination will be administered to those ABAI, ABIM and ABP diplomates following a 2-year allergy/immunology training.
program or an immunologically related subspecialty training, e.g., rheumatology or infectious disease, etc., and such subspecialty certification where available, and a third year of CLI training. Competence must be verified by the program director responsible for the third year of training. Candidates whose applications were previously approved and whose training meets the Special Requirements for Residency Training in CLI may also file an application. Time-limited certificates will be awarded subject to revocation by the appropriate Board for cause.

Physicians taking the examination are expected to be concerned with applying laboratory methods to problems in human diseases involving changes in immune responses and will be able to perform, develop, interpret, and evaluate the clinical relevance of special laboratory procedures related to immunologically based diseases.

**Dual Certification**

Formal special pathways exist for individuals wishing to qualify for dual certification in either allergy/immunology and pediatric pulmonology or adult rheumatology. Additional information regarding special pathways is available upon request.

**Examination Methodology**

**A. Announcements**

The proctored certification and recertification examination is administered simultaneously in at least two United States locations in alternate years. The times and places are determined by the Board and announced in the appropriate specialty journals.

**B. Applications**

The act of filing an application is the candidate's responsibility. Application forms are available from the ABAI. They must be accompanied by two recently signed photographs and the necessary fees. Completed applications must be received on or before the close of registration (postmark applicable).

**C. Fees**

The fees are set forth in the instruction sheet included with the application. Candidates whose applications are rejected will receive a refund of the examination fee; however, the ABAI will retain the registration fee to cover the processing and evaluation costs. A non-refundable late fee will apply to those applications received after the close of registration and prior to the cancellation deadline.

**D. Cancellations**

Candidates who are accepted for examination, but fail to appear or who withdraw after the deadline for cancellation will have their examination fee placed into an escrow account for the next examination. For each subsequent examination, candidates will be required to pay the current registration and examination fees.

**E. Description**

The written examinations vary in length from certification being two 4-hour sessions, recertification being one 4-hour session, and CLI being two 3-hour sessions. The multiple-choice questions are objective and designed to test the individual's knowledge through recall, interpretation, and problem-solving. Each examination may contain previously used questions, new questions, or questions undergoing field testing. The individual's performance on field test questions will not be counted in determining results.

The ABAI does not sponsor or maintain any records on any courses that claim to be review courses in preparation for its examinations nor does it offer or endorse any specific publications or courses to prepare for its examinations.

**F. Disabled Candidates**

Individuals who may need accommodation during the examination must provide written details to the Board at the time of application for examination in order to receive information about ABAI's disability policy and approval.

**G. Irregular Behavior**

All Board examinations are supervised by proctors, who are required to report any irregular behavior, which includes, but is not limited to, giving or obtaining unauthorized information or aid before, during, or after the examination as evidenced by observation or subsequent statistical analysis of answer sheets. Offering financial or other benefit to a proctor, employee, or agent of the ABAI is forbidden.

**H. Results**

Individuals will be informed of the results of the examinations within 3 months of administration. The validity of the individual's performance on the examination is secured by every means available.

**I. Rescoring**

On written request and payment of a nominal fee, candidates may obtain rescoring within 3 months of receiving results. Answer sheets will be destroyed 12 months after administration of the examination.

**J. Certificates**

Candidates/diplomates who pass the Board's examinations will be certified or recertified in the specialty of allergy/immunology as of the date of the examination and receive a 10-year time limited certificate, subject to revocation by the Board for cause. This information becomes public information and will be listed in the *Official ABMS Directory of Board-Certified Specialists* and the *Official ABMS Directory of Certified Allergists and Immunologists*.

**Special Policies**

**A. Verification of Board Status**

The ABAI does not issue statements of or implying "Board eligibility" for any reason. The ABMS has recommended this policy. Medical specialty certification is a process of advancement through several individual steps including examination. Having completed one step, such as the minimal educational requirements, should not imply that a candidate is now possessed of some special qualification that is more or less equivalent to certification. For written verification of the status of an allergist/immunologist, ABAI charges a nominal fee per name.

**B. Revocation of Certificate**

Certificates issued by the ABAI shall be subject to revocation under specific circumstances, including but not limited to licensure revocation, restriction or suspension and/or establishment of guilt of felony, professional incompetence, professional misconduct, unethical conduct, harmful, deceptive, fraudulent advertising, or documented chemical use and dependency.

**C. Absences During Residency**

Absences during residency in excess of 2 months over the 2-year allergy/immunology training program, whether for vacation, sick leave, maternity leave, etc., should be made up. If the training program director believes that an absence of more than 2 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

**Changes in Policies and Procedures**

The Board reserves the right to make changes in its policies and procedures and fees at any time, and cannot assume responsibility
for giving advance notice thereof. The provisions of this publication are not to be construed as a contract between any candidate and the ABAL.

American Board of Anesthesiology

David E. Longnecker, MD, President, Philadelphia, Pennsylvania
D. David Glass, MD, Secretary-Treasurer, Lebanon, New Hampshire
John R. Ammon, MD, Phoenix, Arizona
Bruce F. Cullen, MD, Seattle, Washington
Carl C. Hug, Jr., MD, PhD, Atlanta, Georgia
Francis M. James III, MD, Winston-Salem, North Carolina
M. Jane Matjaszek, MD, Baltimore, Maryland
William D. Owens, MD, St. Louis, Missouri
Myer H. Rosenthal, MD, Stanford, California
Raymond C. Roy, PhD, Charleston, South Carolina
Lawrence J. Saidman, MD, San Diego, California
Stephen J. Thomas, MD, New York, New York
Francis P. Hughes, PhD, Executive Vice President

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Anesthesiology [ABA] to ascertain whether the information below is current.)

Introduction

The chair of the anesthesiology department is the director of the residency program. Although the department chair may delegate responsibility for administering the program, the ABA corresponds officially about training matters only with the department chair.

The department chair (i.e., program director) has the responsibility to ensure that the training each resident completes under the aegis of the program will be acceptable to the ABA if the resident applies for certification. Nevertheless, every resident whose goal is to attain ABA certification has a responsibility to ensure that the training experiences will be acceptable to the ABA, since the resident ultimately bears the consequences if the training proves unacceptable. The responsibility of the one does not absolve the other from sharing the responsibility.

The department chair and the resident must know the Board's policies, published in the Booklet of Information, as they relate to acceptable training sequences, experiences and settings. Residents with specific questions about the acceptance of their training should read this booklet and speak with their department chair. If there remains any doubt about the acceptance of the training, the resident should then write the Secretary of the Board at the address of the ABA office.

Applicants and candidates for ABA examinations have the responsibility to know the Board's policies, procedures, requirements and deadlines regarding admission to and opportunities for examination.

Primary Certification in Anesthesiology Certification Requirements

To be certified as a diplomate of the American Board of Anesthesiology (ABA), each applicant must

A. Hold a permanent, unconditional, unrestricted, and unexpired license to practice medicine or osteopathy in one state or jurisdiction of the United States or province of Canada. The applicant must inform the ABA of any conditions or restrictions in force on any active medical license he or she holds. When there is a restriction or condition in force on any of the applicant's medical licenses, the Credentials Committee of the ABA will determine whether the applicant satisfies the licensure requirement of the ABA.

B. Fulfill all the requirements of the continuum of education in anesthesiology.

C. Have on file with the ABA a satisfactory certificate of clinical competence covering the final 6-month period of clinical anesthesia training in each anesthesiology residency program.

D. Satisfy all examination requirements of the Board.

E. Have a moral, ethical, and professional standing satisfactory to the ABA.

Persons certified by this Board are designated as diplomates in publications of the American Board of Medical Specialties and the American Society of Anesthesiologists.

Continuum of Education in Anesthesiology

The continuum of education in anesthesiology consists of 4 years of training subsequent to the date that the medical or osteopathic degree has been conferred. It includes 12 months of nonanesthesia clinical training (clinical base year) and 36 months of graded and increasingly complex clinical training in anesthesia (CA-1, CA-2, and CA-3 years).

A. The clinical base year must be devoted to clinical training other than clinical anesthesia. Acceptable training for the 12 months of clinical base shall include training in a transitional year, internal or emergency medicine, pediatrics, surgery or any of the surgical specialties, obstetrics and gynecology, neurology, family practice, or any combination of these as approved for the individual resident by the director of his/her training program in anesthesiology. Residents who begin the continuum after December 31, 1981, must complete the clinical base requirement before beginning clinical rotations in fulfillment of the CA-3 year requirement.

The clinical base year must be spent in residency programs in the United States that are accredited by the Accreditation Council for Graduate Medical Education (ACGME) or approved by the American Osteopathic Association. It also may be spent in Canadian institutions that are approved by the Royal College of Physicians and Surgeons of Canada and are affiliated with medical schools approved by the Liaison Committee on Medical Education.

B. The 3-year clinical anesthesia curriculum (CA-1-3) consists of experience in basic anesthesia training, subspecialty anesthesia training, and advanced anesthesia training. It is a graded curriculum of increasing difficulty and learning that is progressively more challenging of the resident's intellect and technical skills.

1. Experience in basic anesthesia training is intended to emphasize basic and fundamental aspects of the management of anesthesia. It is recommended that at least 12 months of the CA-1 and CA-2 years be spent in basic anesthesia training with a majority of this time occurring during the CA-1 year.

2. Subspecialty anesthesia training experiences are required in order to emphasize the theoretical background, subject material, and practice of subspecialties of anesthesiology. These subspecialties include obstetric anesthesia, pediatric anesthesia, cardiothoracic anesthesia, neuroanesthesia, anesthesia for outpatient surgery, recovery room care, regional anesthesia, and pain management. It is recommended that these experiences be in the form of subspecialty rotations, and that they occupy 7 to 12 months of the CA-1 and CA-2 years. The sequencing of these rotations in the CA-1 and CA-2 years is left to the discretion of the program director.
In addition to the above requirements for subspecialty experience, 2 months of training in the subspecialty of critical care medicine are required at some time during the clinical anesthesia years. An acceptable critical care rotation should include active participation in patient care by anesthesia residents, active involvement by anesthesia faculty experienced in the practice and teaching of critical care, and an appropriate population of critically ill patients, which includes a substantial number with multisystem disease whose care requires invasive monitoring and mechanical ventilation. Experience in routine, short-term, or overnight postanesthesia units or intermediate step-down units or emergency rooms does not fulfill this requirement.

3. Experience in advanced anesthesia training constitutes the CA-3 year. Clinical rotations in fulfillment of the CA-3 year requirement must follow completion of the clinical base and CA-1-2 years. The resident and program director in collaboration will select one of the three tracks designated as the advanced clinical track, subspecialty clinical track, or clinical scientist track. Regardless of the track selected, resident assignments in the CA-3 year should include the more difficult or complex anesthetic procedures and care of the most seriously ill patients.

Residents in the advanced clinical track are required to complete a minimum of 6 months of experience in advanced and complex clinical anesthesia assignments. The remaining 6 months may be spent in one to three selected subspecialty rotations or, alternatively, additional complex clinical anesthesia assignments may be selected.

Residents in the subspecialty clinical track may complete 5 to 12 months' experience in one subspecialty rotation along with up to 3 months of advanced experience in complex clinical anesthesia assignments. Alternatively, 6 months' experience in each of two subspecialty rotations may be selected. Such rotations may include some time assigned to medical or surgical activities directly related to the anesthetic subspecialty.

The clinical scientist track consists of clinical training and research experience during the anesthesia residency. There are two options for fulfilling the requirements of this track. Regardless of the option chosen, residents who elect this track must have a satisfactory clinical competence committee report for the 6-month period immediately preceding the beginning of the research experience.

Option A of the clinical scientist track may be fulfilled by completing 6 months of advanced or subspecialty clinical training and 6 months of clinical or laboratory investigative experience in the CA-3 year. Exceptions to this sequencing requirement must be requested prospectively by the resident's anesthesiology program director.

Option B of the clinical scientist track is intended for residents who plan a career as an academic investigator. After completing the clinical base year and 12 months of clinical anesthesia, the residents must complete 18 months of clinical anesthesiology training and 18 months of research experience. The anesthesiology program director may request up to 6 months of credit toward the research component of the academic investigator option for residents with a PhD degree in a discipline of relevance to the science or practice of anesthesiology, as determined by the Credentials Committee of the ABA. The ABA must receive the request after the resident has completed a minimum of six months of clinical anesthesia training satisfactorily and before the resident begins the research component. The request must include the anesthesiology program director's recommendation that a specific number of months of credit be granted, acceptable documentation of the resident's PhD degree and discipline, and a current copy of the resident's curriculum vitae.

The Credentials Committee of the ABA will consider such requests on an individual basis. Approval of requests for research credit for a PhD degree is at the discretion of the Credentials Committee. Credit that has been approved will be granted upon completion of the remaining requirements of the continuum of education in anesthesiology only for the resident whose overall clinical competence is graded satisfactory for every period of clinical anesthesia training.

C. Credit toward the CA-1-3 year requirements is granted by the ABA for clinical anesthesia training that satisfies all of the following conditions:

1. The CA-1-3 years of training are spent in or under the sponsorship of at most two ACGME-accredited anesthesia residency programs.

2. The period of clinical anesthesia training is in or under the sponsorship of any single program is at least 6 months.

3. The final period of training in each program ends with receipt of a satisfactory certificate of clinical competence. The final period must cover at least 6 months of clinical anesthesia training if the certificate of clinical competence for the immediately preceding period of training in the program was unsatisfactory. When the final period of training in any program ends with receipt of an unsatisfactory certificate, credit is granted for clinical anesthesia training in that program only to the date of the most recent satisfactory certificate received by the resident from that program.

4. No more than 6 months during the first 2 clinical anesthesia years, and a maximum of 12 months during the 3 years of clinical anesthesia training, are spent training outside the parent programs in affiliated or nonaffiliated institutions.

D. The Credentials Committee of the ABA considers requests for exceptions to policies regarding the training planned for residents, or other requests, on an individual basis. The ABA office must receive the request from the department chair on behalf of a resident at least 2 months before the resident begins the training in question. It is the responsibility of the department chair and the resident to ensure that the request is timely received.

Requests for approval of clinical anesthesia training outside the parent program must include a chronological description of the rotations, information about the supervision of the resident, and assurances that the resident will be in compliance with the limits on training outside the parent program if the request is approved. Further, the resident must remain enrolled in the parent program while training at an affiliated or nonaffiliated institution, and the parent program must report the training on the clinical competence committee report filed for the period on the resident's behalf.

**Principal Objectives**

The anesthesiology examination system of the ABA has two distinct parts, the written examination and the oral examination. Each is designed to assess different aspects of the candidate's ability to function as a consultant in anesthesiology as defined by the ABA.
A consultant in anesthesiology is a physician who possesses knowledge, judgment, adaptability, clinical skills, technical facility, and personal characteristics sufficient to carry out the entire scope of anesthesiology practice. A consultant in anesthesiology is able to communicate effectively with peers, patients, their families, and others involved in the medical community. The consultant can serve as an expert in matters related to anesthesiology, deliberate with others, and provide advice and defend opinions in all aspects of the specialty of anesthesiology. A Board-certified anesthesiologist is able to function as the leader of the anesthesiology care team.

Because of the nature of the role of the consultant anesthesiologist, the consultant must be able to deal with emergent life-threatening situations in an independent and timely fashion. The ability to acquire and process information in an independent and timely manner is central to ensure individual responsibility for all aspects of anesthesiology care. Adequate physical and sensory faculties, such as eyesight, hearing, speech, and coordinated function of the extremities, are essential to the independent performance of the functions of a consultant anesthesiologist. Freedom from the influence of or dependency on chemical substances that impair cognitive, physical, sensory, or motor functions also is an essential characteristic of the consultant anesthesiologist.

The written examination is designed to assess the knowledge base and the cognitive and deductive skills of the candidates. It is necessary for candidates to pass the written examination to qualify for the oral examination.

The oral examination is designed to measure those aspects of the candidate's ability not readily tested by written examination. Specifically, it is designed to assess the candidate's ability to manage patients presented in clinical scenarios. The candidate's decision-making ability is evaluated with particular emphasis on the scientific and clinical rationale that led to those decisions. In addition, the candidate's ability to manage surgical and anesthetic complications, as well as unexpected changes in the clinical situation, is assessed. The principal thrust is to determine whether candidates recognize the pertinent aspects of a clinical scenario, make rational diagnoses, and develop appropriate treatment protocols. Equally important, the oral examination is designed to establish whether the candidate can effectively communicate this information to others.

Irregular Behavior
The Board acts to maintain the integrity of its examination and certification process and to ensure the equitable and objective administration of its examinations to all candidates. Information about behavior that the Board considers a violation of the integrity of its examination and certification process is sent to all candidates scheduled for examination. Statistical analyses may be conducted to verify observations and reports of suspected irregularities in the conduct of an examination. The examination of a candidate whose conduct, in the Board's judgment, violates or attempts to violate the integrity of its examination and certification process will be invalidated and no results will be reported. Furthermore, the candidate will be subject to punitive action as determined by the Board. In that event the candidate would be informed of the reasons for the Board's actions and could request an opportunity to present information deemed relevant to the issue and to petition the Board to reconsider its decision.

Nonstandard Examination Administration
The ABA supports the intent of the Americans with Disabilities Act (ADA) and has a process for considering requests that its assessment programs be modified to accommodate an individual with a disability. Anyone having questions about the process should write or call the Executive Vice President of the Board at the ABA office.

Unforeseeable Events
In the event a natural disaster, war, government regulations, strikes, civil disorders, curtailment of transportation facilities, or other unforeseeable events make it inadvisable, illegal or impossible for the ABA to administer an examination to a candidate at the appointed date, time, and location, or to conclude a candidate's examination, the ABA is not responsible for any of the expense the candidate may have incurred to be present for the examination, nor for any such expense the candidate may incur for any substitute examination.

Application Form
Application for admission to the examination system of the ABA must be made to the Secretary upon a form prescribed by the Board. Photocopies or facsimiles of the application form are not acceptable.

Proper forms for making application and other information may be obtained by writing to the Secretary, American Board of Anesthesiology (100 Constitution Plaza, Hartford, CT 06103-1796). An applicant must request an application form by writing to the Board. Telephone requests are not acceptable.

Filing and Documentation Deadlines
The completed application and the appropriate fee must be received by the ABA on or before January 10 of the year in which the written examination is to be administered. The January 10 deadline for receipt of completed applications is absolute, and no application will be accepted after that date for any reason.

The ABA must receive all documentation it requires to make a determination about an applicant's qualifications for admission to examination no later than 60 calendar days after the deadline for filing an application for the examination. This includes, but is not limited to, references and evidence of medical licensure or of having qualified for such licensure. An application will not be accepted if the required documentation is not received by that date.

Applicant Declaration and Consent
The application form includes the following statement, which the applicant shall be required to sign.

"I hereby make application to the American Board of Anesthesiology, Inc., for the issuance to me of a certificate, and for examination relative thereto, all in accordance with and subject to its rules and regulations, and the fee requested. I agree to disqualification from examination or from the issuance of a certificate or to forfeiture and redelivery of such certification in the event that any of the statements hereofore made by me are false or in the event that any of the rules governing such examinations are violated by me or in the event that I did not comply with or shall violate any of the provisions of the Certificate of Incorporation or By-laws of the American Board of Anesthesiology, Inc., or both, as then constituted. I understand that the American Board of Anesthesiology, Inc. may report my status in the examination system, including the result of any written or oral examination, to the director of the program in which I completed my training in clinical anesthesiology either routinely or upon the request of such program director, and any score in psychometric analyses to confirm observations and reports of suspected irregularities in the conduct of an examination, and respond to any inquiry about my status in its examination system in accordance with its policy as then constituted. I authorize any and all repositories to grant access to or produce copies for the American Board of Anesthesiology, Inc. of all documents and records containing information and data pertaining to my practice of the medical specialty of anesthesiology and its subspecialties. I understand that such information and data will be used exclusively to study and as-
The application form also includes the following consent, which the applicant shall be required to sign.

"I, the undersigned, in connection with my application for certification by the American Board of Anesthesiology, Inc. hereby authorize the American Board of Anesthesiology, Inc. to request, procure and review any information regarding my medical practice, professional standing and character, including any information related to any disciplinary action related to the practice of medicine by any state licensing agency or any institution in which I have practiced medicine and any information related to any history of substance abuse or chemical dependency and any treatment or rehabilitation related thereto.

"I hereby authorize the American Board of Anesthesiology, Inc., to request and procure such information from any individual or institution, each of which shall be absolutely immune from civil liability arising from any act, communication, report, recommendation or disclosure of any such information even where the information involved would otherwise be deemed privileged so long as any such act, communication, report, recommendation or disclosure is performed or made in good faith and without malice.

"I hereby authorize the American Board of Anesthesiology, Inc., to supply a copy of this consent, which has been executed by me, to any individual or institution from which it requests information relating to me."

Entrance Requirements
To enter the examination system of the ABA, the applicant shall
A. Have graduated from a medical school approved by the Liaison Committee for Medical Education, or have met medical educational requirements otherwise acceptable to the ABA.
B. Provide evidence satisfactory to the Board of having been awarded a medical or osteopathic degree acceptable to the Board.
C. Provide evidence acceptable to the Board of having satisfied the licensure requirement for certification (see "Primary Certification in Anesthesiology Certification Requirements A").
Resident in training may submit evidence with their application of having qualified on examinations that provide eligibility for medical licensure (eg, NBME Part III or FLEX I and II). Residents who do so must have evidence of permanent and unrestricted medical licensure on file in the ABA office by November 30 of the year in which the written examination for which they applied is administered.
D. Have on file in the Board Office evidence of having satisfactorily fulfilled all requirements of the continuum of education in anesthesiology before the date of examination and after receiving a medical or osteopathic degree. Such evidence must include a satisfactory certificate of clinical competence covering the final 6 months of clinical anesthesia training in each residency program (see paragraph C in "Continuum of Education in Anesthesiology" and "Certificate of Clinical Competence"). A grace period will be permitted so that applicants completing this requirement by August 31 may apply for the immediately preceding July written examination.

E. Have on file with the Board evaluations of various aspects of his or her current practice of anesthesia as solicited by the Board in determining the applicant's qualifications for admission to the examination system. Such evaluations may be requested from the residency program director or others familiar with the applicant's current practice of anesthesiology. The clinical competence committee report from the department and the evaluation of the program director and others will be used as the basis for assessing admission qualifications. The response of the program director will be given considerable weight in these deliberations.

F. Submit proof with the application of having reestablished his or her qualifications for admission to the examination system only if residency training was completed more than 12 years before the date of application or a second or subsequent application has been declared void. Acceptable proof is documentation of having qualified on an entry examination designated by the Board or of having completed a 12-month term of additional clinical training in anesthesia in an ACGME-accredited program with receipt of a satisfactory certificate of clinical competence covering the final 6 months.

The Board has designated the examination administered annually by the Joint Council on In-Training Examinations as the entry examination. Information about the entry examination and a registration form may be obtained by writing the Joint Council c/o the American Society of Anesthesiologists.

The Board shall determine that entry into the examination system is merited when a judgment of adequate levels of scholarship and clinical competence can be made from the information submitted.

Certificate of Clinical Competence
The Board requires every residency training program to file, on forms provided by the Board, an evaluation of clinical competence in January and July on behalf of each resident who has spent any portion of the prior 6 months in clinical anesthesia training in or under the sponsorship of the residency program and its affiliates.

Entry into the examination system is contingent upon the applicant having a certificate of clinical competence on file with the Board attesting to satisfactory clinical competence during the final period of clinical anesthesia training in or under the sponsorship of each program (see "Continuum of Education in Anesthesiology" C[5] for details). The Board, therefore, will deny entry into the examination system until this requirement is fulfilled.

Absence from Training
The total of any and all absences during clinical anesthesia training may not exceed the equivalent of 20 working days per year. Attendance at scientific meetings, not to exceed 5 working days per year, shall be considered a part of the training program. Duration of absence during the clinical base year may conform to the policy of the institution and department in which that portion of the training is served. Absences in excess of those specified will require lengthening of the total training time to the extent of the additional absence.

A lengthy interruption in training may have a deleterious effect upon the resident's knowledge or clinical competence. Therefore, when there is an absence for a period in excess of 6 months, the cre-
dentals committee of the ABA shall determine the number of months of training the resident will have to complete subsequent to resumption of the residency program to satisfy the training required for admission to the ABA examination system.

Entrance Into the System
The ABA will notify an applicant who is admissible to its examination system after approval of all credentials. The Board, acting as a committee of the whole, reserves the right to reject an applicant for any reason deemed appropriate. If the applicant wishes to exercise the right to appeal this decision, the applicant shall inform the Board of this intention within 30 days of the date of receipt of the notification. The Board reserves the right to correct clerical errors affecting its decisions.

The Board Office is not responsible for breaks in communication with candidates that are due to circumstances beyond its control. Candidates must send the Board written notice of an address change immediately so that the Board's examination notices will not go astray, and they must call the Board Office if they do not receive an examination notice they are expecting within the time frame described above. The candidate's social security number is used by the Board for identification purposes and should be included on all correspondence with the Board.

Examination Notices
The ABA sends notification of an examination and a reply form to every candidate eligible to appear for the examination at least 4 months prior to the examination date. The notification is sent to candidates at their address of record on file in the Board Office.

Candidates are required to respond to every written and oral examination notice by the response date established by the ABA, whether or not they accept the examination opportunity. Every reply to an examination notice will be acknowledged within 2 weeks of its receipt in the Board Office.

Candidates scheduled to appear for examination are notified of the exact date, time, and location of their examination and the rules for its conduct approximately 2 months before the date of examination.

Under certain circumstances the ABA, entirely at its discretion, may grant a candidate's request for an excuse in advance from any scheduled examination without forfeiture of the opportunity. Such a request must be in writing, include the candidate's reason, and arrive in the ABA office by the response deadline specified in the examination notice or, for scheduled candidates, by the examination date. A candidate may be excused from examination if it is determined the reason warrants such a decision and there is sufficient time remaining in the application period to provide the number of examination opportunities the candidate is permitted. Candidates excused from an examination are required to appear at the next examination for which they are eligible.

Written Examination
Written examinations are held annually in locations throughout the United States and Canada on a Saturday in July. Written examinations cover the basic and applied aspects of physiological, physical, and clinical sciences. A passing grade, as determined by the Board, is required.

Oral Examination
Candidates who complete the written examination successfully must wait at least 6 months before being declared eligible for oral examination. Oral examinations are conducted in the spring and fall of each year at a single location in the United States. Examiners consist of Directors of the Board and others who assist as associate examiners. Oral examinations evaluate all phases of anesthesia, but emphasize clinical practice. A passing grade, as determined by the Board, is required.

It is an ABA regulation that candidates will not be scheduled to appear at consecutive oral examinations. Therefore, candidates who do not pass an oral examination for which they are scheduled, for whatever reason, are not eligible to appear at the next regularly scheduled oral examination.

The Board reserves the right to limit the number of candidates to be admitted to any examination. Places in the oral examination schedule are limited and assigned in the sequence acceptances are received. Candidates who are not given an examination appointment, whether or not they accepted the examination opportunity, are required to appear at the next examination for which they are eligible.

Fees
The application fee for primary certification in anesthesia is $1,100. It must accompany the application. For completed applications received between January 11 and November 20 of the previous year, the application fee is $1,300—a reduction of $100 for early filing.

The reexamination fee is $200 for the anesthesia written examination and $700 for the oral examination. The reexamination fee will be charged candidates whether they have failed a previous examination, canceled a scheduled appointment for examination, or failed to appear for any examination for which they were properly scheduled.

A charge of $50 will be made whenever a check in payment of a fee is returned for nonpayment.

A nonrefundable fee for administrative services is included in the application fee. It is $200 for applications for primary certification that arrive after November 20 and $100 for those received before that date. In the event an application is not accepted, or the application is accepted and subsequently withdrawn by the candidate, the fee for administrative services will be retained and the balance of the application fee will be refunded. No fee will be refunded if the candidate's notice of withdrawal from the examination system is received in the Board Office after the deadline by which candidates must notify the Board of their choice of test center for the first written examination for which they are eligible.

The ABA is a nonprofit organization. The fees for application and examination are computed on a basis of cost of maintaining the functions of the Board. The Board reserves the right to change the fees when necessary.

Reapplication
The application of a candidate who has failed to satisfy the examination requirements in the prescribed number of opportunities or for whatever reason shall be declared void. The physician may reapply by submitting a new application. Such application shall be subject to the fees, rules, privileges, and requirements that apply at the time of reapplication. The applicant who is adjudged to meet existing requirements will be readmitted into the examination system.

The reapplicant for primary certification who has had a second or subsequent application declared void for any cause, or has completed anesthesia residency training more than 12 years before the date of reapplication, must reestablish his/her qualifications for admission to the examination system before filing another application. The manner in which this may be done is described in paragraph F of the "Entrance Requirements" section. In all instances, the candidate must pass both the written and oral examinations under the new application.
Status of Individuals

The ABA reserves to itself exclusively the right to define and confer Board-eligible status whenever such status refers to an individual's relationship to the ABA examination and certification system. The ABA shall confer Board-eligible status only on physicians who are candidates in its examination system. Thus, physicians are Board-eligible only when they are eligible to appear for an ABA examination. Board-eligible status is not conferred indefinitely.

Inquiries about the current status of individuals should be addressed to the ABA office, which will respond with one of the following statements:
A. The physician is certified by the ABA.
B. The physician is Board-eligible in anesthesiology.
C. The physician is neither certified by the ABA nor Board-eligible.

Royal College Certification

The policy of the ABA regarding the Fellowship certificates awarded by the Australian and New Zealand College of Anaesthetists, the Royal College of Physicians and Surgeons of Canada, the Royal College of Anaesthetists of England, the Faculty of Anaesthetists of the Royal College of Surgeons in Ireland, and the College of Anaesthetists of South Africa expired December 31, 1989.

Holders of one of these Fellowships (ie, FFA) who wish to attain primary certification by the ABA may qualify to apply to the ABA for examination by satisfactorily completing one year of training as a CA-3 year resident in an ACGME-accredited program no later than August 31, 1996. The content of the year of training must have been approved prospectively by the Credentials Committee of the ABA. The ABA office had to receive the program director's request for prospective approval by December 31, 1993.

Alternatively, FFA may qualify to apply for admission to the ABA examination system by completing two years of full-time anesthesiology practice in the United States or its jurisdictions, the second year of which must have occurred between January 1, 1992, and December 31, 1995.

FFAs who qualify for ABA examination on the basis of a CA-3 year of training or two years of anesthesia practice in the United States must sit for their first ABA examination no later than 1997. The deadline for filing an application for the 1997 ABA examination is January 10, 1997.

All ABA policies that apply to other applicants and candidates for primary certification will apply to FFA applicants and candidates EXCEPT that FFA who completed their most recent year of clinical training in anesthesiology more than twelve years ago will not have to reestablish their admission qualifications before filing their first application with the ABA.

In order to be eligible to qualify for an ABA subspecialty certificate or the certificate of continued demonstration of qualifications, FFA who wish to attain an ABA subspecialty certificate are advised that one year of residency training in an ACGME-accredited anesthesiology program will not satisfy the training requirements for both primary and subspecialty certification. The ABA policies that apply to other applicants and candidates for subspecialty examination and certification will apply to FFA applicants and candidates without exception.

Alcoholism and Substance Abuse

The Americans with Disabilities Act (ADA) protects individuals with a history of alcoholism who are rehabilitated and protects former drug users who currently do not use drugs illegally. The ADA supports the intent of the ADA.

The ABA will admit qualified applicants and candidates with a history of alcoholism to its examination system and to examination if they submit documentation acceptable to the ABA that they do not currently pose a direct threat to the health and safety of others.

The ABA will admit qualified applicants and candidates with a history of illegal use of drugs to its examination system and to examination if they submit documentation acceptable to the ABA that they currently are not actively engaged in the illegal use of drugs.

After a candidate with a history of alcoholism or illegal use of drugs satisfies the examination requirements for certification, the ABA will determine whether it should defer awarding its certification to the candidate for a period of time in order to avoid certification of a candidate who poses a direct threat to the health and safety of others. If the ABA determines that deferral of the candidate's certification is appropriate because the candidate does currently pose a threat to the health and safety of others, the ABA will determine the length of time the candidate's certification is deferred following an individual assessment of the specific circumstances of the candidate's history of alcoholism or illegal use of drugs.

Revocation of Certificate

A certificate is issued by the Board with the understanding that it remains the property of the Board during the life of the diplomate. Any certificate issued by the Board shall be subject to revocation in the event that
A. The issuance of such certificate or its receipt by the person so certified shall have been contrary to, or in violation of, any provision of the certificate of incorporation of this Board or its by-laws; or
B. The person certified shall not have been eligible to receive such certificate whether or not the facts making him/her ineligible were known to, or could have been ascertained by, the Board or any of the directors at the time of issuance of such certificate; or
C. The person certified shall have made any misstatement of fact in his or her application for such certificate or in any other statement or representation to the Board or its representatives; or
D. The person certified shall fail to maintain a moral, ethical, and professional standing satisfactory to the Board.

The Board shall be the sole judge of whether the evidence or information before it is sufficient to require or permit revocation of any certificate issued by the Board, and the decision of the Board shall be final.

Recertification

Insufficient confidence in currently available methods of assessing continuing competence of the practicing anesthesiologist makes it inappropriate to implement a recertification process at this time. The ABA will continue to study all options for a meaningful recertification program but intends to expend its major effort and resources toward improvement of the process leading to primary certification and the voluntary program for continued demonstration of qualifications.

Records Retention

The ABA retains documents pertaining to an individual's residency training, application for certification, examination opportunities, and examination results for the sole purpose of determining that its requirements for admission to examination for certification are fulfilled.

In the absence of an application for certification, documents pertaining to the ABA entrance requirements are retained for 7 years from the date of the most recent correspondence to or from the ABA regarding the requirements. Documents pertaining to an unsuccessful application are retained until the individual submits another application to the ABA or the aforementioned 7-year period expires, whichever occurs first. Documentation corroborating the re-
sults of a candidate's examination is retained until one year after the date of the most recent correspondence to or from the ABA regarding the results. Documentation corroborating the candidate's fulfillment of the ABA certification requirements is retained until 1 year after the date of the most recent correspondence to or from the ABA regarding the candidate's certification by the ABA. The ABA sees to the secure destruction of the documents in its file for an individual when the period specified for retention of the documents has expired.

The ABA retains indefinitely an electronic record for residents who trained in an AGMME-accredited anesthesiology program. This record includes entries that identify the training program, the dates of training, and the overall evaluation of the resident.

The ABA retains indefinitely microfiche and electronic records for candidates issued its certification. These records include documents and entries attesting that each certification requirement was met.

Certification of Special Qualifications in Critical Care Medicine

A. Definition of Critical Care Medicine
The discipline of critical care medicine has evolved over the past few decades in parallel with the development of techniques and technology for acute and long-term life support of patients with multiple organ system derangement. Because the problems encountered in the critically ill patient encompass aspects of many different specialties, critical care medicine is a multidisciplinary endeavor that crosses traditional department and specialty lines.

The critical care medicine physician is a specialist whose knowledge is of necessity broad, involving all aspects of management of the critically ill patient, and whose primary base of operation is the intensive care unit (ICU). This physician has completed training in a primary specialty and has received additional training in critical care medicine aspects of many disciplines. This background enables the physician to: work in concert with the various specialists on the patient care team in the ICU; utilize recognized techniques for vital support; teach other physicians, nurses, and health professionals the practice of intensive care; and foster research.

Thus, critical care medicine is a discipline based in an intensive care unit with its primary concern being the care of the patient with a critical illness.

B. Certification Requirements
To be awarded a certificate of special qualifications in critical care medicine by the ABA, each applicant must
1. Be a diplomate of the ABA.
2. Fulfill the licensure requirement for certification (see "Primary Certification in Anesthesiology Certification Requirements" A).
3. Fulfill the requirement of the continuum of education in critical care medicine as defined by the ABA.
4. Satisfy the critical care medicine examination requirement of the ABA.

C. Continuum of Education in Critical Care Medicine
The continuum of education in critical care medicine consists of 12 months of formal training in critical care medicine following completion of the continuum of education in anesthesiology. The training must be in a critical care medicine program accredited by the Residency Review Committee for Anesthesiology.

Training in critical care medicine should not be interrupted by frequent or prolonged periods of absence. Absences during the year of formal training in excess of that permitted by the institution or department will require lengthening of the total training time to the extent of the additional absence.

D. Entrance Requirements
To enter the critical care medicine examination system of the ABA, the applicant shall
1. Submit evidence that he/she is certified by the ABA.
2. Submit proof of having fulfilled the licensure requirement for certification.
3. Have on file in the ABA office documentation of having fulfilled the requirement of the continuum of education in critical care medicine.

Evaluation of various aspects of the applicant's credentials and performance will be solicited by the ABA in assessing his or her qualifications for admission to its critical care medicine examination system. The Board shall determine that entry into its critical care medicine examination system is merited when judgment of adequate levels of scholarship and clinical competence can be made from the information submitted.

Certification by other entities will not be considered as meeting any of the requirements for entrance into the ABA critical care medicine examination system.

E. Application Procedure
1. The proper application form and other information may be obtained by writing to the Secretary, the American Board of Anesthesiology (100 Constitution Plaza, Hartford, CT 06106-1786). An applicant must request an application form by writing to the Board. Telephone requests are not acceptable.

Application for admission to the examination system of the ABA must be made to the Secretary upon a form prescribed by the Board. Photocopies or facsimiles of the application form are not acceptable.

2. The application form includes the identical statements of declaration and consent included in the application for primary certification. The applicant for examination in critical care medicine shall be required to sign each statement.

F. Filing and Documentation Deadlines
The completed application and the appropriate fee for the 1995 critical care medicine examination must be received by the ABA on or before March 1, 1995. Applications received after the deadline will not be accepted.

The ABA must receive all documentation it requires to make a determination about an applicant's qualifications for admission to examination no later than May 1, 1995. This includes but is not limited to references, evidence of medical licensure, and verification that the training requirement is met. An application will not be accepted if the required documentation is not received by that date.

G. Fees
The application fee for admission to the critical care medicine examination system is $1,000. It must accompany the application. A nonrefundable fee for administrative services of $250 is included in the application fee. The reexamination fee for the critical care medicine examination is $750. The ABA policies regarding the administrative services fee and the reexamination fee are stated under "Filing and Documentation Deadlines."

A charge of $50 will be made whenever a check in payment of a fee is returned for nonpayment.

H. Examination System
The ABA will notify an applicant who is accepted as a candidate for its critical care medicine examination after approval of all credentials. The Board, acting as a committee of the whole, reserves the right to reject an applicant for any reason deemed appropriate. The Board reserves the right to correct clerical errors affecting its decisions.
The written examination in critical care medicine is designed to test for the presence of basic knowledge that is considered essential for the ABA diplomate to function as a practitioner of critical care medicine. The examination analyzes the cognitive and deductive skills, as well as the clinical judgment, of the candidates.

Current plans are to administer the critical care medicine examination at one or more locations in the United States no more frequently than once every 2 years. The ABA will mail notice to all eligible candidates announcing the location(s) and date of the critical care medicine examination approximately 4 months prior to the date of its scheduled administration.

Every candidate is given three opportunities to satisfy the critical care medicine examination requirement. Failure to satisfy the examination requirement within the three opportunities or the prescribed time, whichever comes first, will result in the candidate's application being declared void.

The prescribed period of time for the successful completion of the examination for certification of special qualifications in critical care medicine is the time between the date of the first examination for which the candidate is declared eligible and the next three consecutive administrations of the critical care medicine examination. Thus, the ABA, at its discretion, may excuse a candidate from at most one critical care medicine examination without forfeiture of an opportunity.

The ABA policies regarding examination notices, candidate responses, address changes, and excused absences are stated on the preceding pages. Its policies regarding examination under nonstandard conditions, irregular examination behavior, and unforeseeable events may also be found on the preceding pages.

I. Status of Individual

Inquiries about the current status of physicians relative to the ABA critical care medicine certification system should be addressed to the ABA office. The ABA will affirm the status of physicians who are certified in critical care medicine by the ABA. For others, the response to the inquiry will be in keeping with the ABA policy.

J. Reapplication

The application of a candidate who has failed to satisfy the critical care medicine examination requirement in the prescribed number of opportunities or time, for whatever reason, shall be declared void. The physician may reapply by submitting a new application. Such application shall be subject to the fees, rules, privileges, and requirements that apply at the time of reapplication. The applicant who is adjudged to meet existing requirements will be readmitted into the examination system.

Every reapplicant who qualified previously by Temporary Criteria is required to have completed satisfactorily the 1-year Continuum of Education in Critical Care Medicine.

Certification of Added Qualifications in Pain Management

A. Definition of Pain Management

Pain management is the medical discipline concerned with the diagnosis and treatment of the entire range of painful disorders. Because of the vast scope of the field, pain management is often considered a multidisciplinary subspecialty. The expertise of several disciplines is brought together in an effort to provide the maximum benefit to each patient. Although the care of patients is heavily influenced by the primary specialty of physicians who subspecialize in pain management, each member of the pain treatment team understands the anatomical and physiological basis of pain perception, the psychological factors that modify the pain experience, and the basic principles of pain management.

B. Certification Requirements

To be awarded a certificate of added qualifications in pain management by the ABA, each applicant must

1. Be a diplomate of the ABA.
2. Fulfill the licensure requirement for certification (see "Primary Certification in Anesthesiology Certification Requirements").
3. Fulfill the requirement of the continuum of education in pain management as defined by the ABA.
4. Satisfy the pain management examination requirement of the ABA.

The ABA certificate of added qualifications in pain management will be valid for a period of 10 years from its date of issuance. It is left to the holder of the subspecialty certificate when is reapply to the ABA for examination and renewal of the pain management certification.

C. Continuum of Education in Pain Management

The continuum of education in pain management consists of 12 months of formal training in acute, chronic, and oncology pain management. The 12 months of pain management training must follow the successful completion of the continuum of education in anesthesia. The training must be in a pain management program accredited by the Residency Review Committee for Anesthesiology. However, if the training begins before January 1, 1995, and is approved prospectively by the Credentials Committee of the ABA, it may be in an ACGME-accredited anesthesiology program that does not yet have an accredited pain management program.

Training in pain management should not be interrupted by frequent or prolonged periods of absence. Absences during the year of formal training in excess of that permitted by the institution or department will require lengthening of the total training time to the extent of the additional absence.

D. Entrance Requirements

To enter the pain management examination system of the ABA, the applicant shall

1. Submit evidence that he/she is certified by the ABA.
2. Submit evidence acceptable to the Board of having satisfied the medical licensure requirement for certification.
3. Have on file in the Board Office documentation of having fulfilled the requirements of the continuum of education in pain management (see "Continuum of Education in Pain Management" or "Temporary Criteria").

Evaluation of various aspects of the applicant's credentials and performance will be solicited by the ABA in assessing his/her qualifications for admission to its pain management examination system. The Board shall determine that entry into its pain management examination system is merited when judgment of adequate levels of scholarship and clinical competence can be made from the information submitted.

Certification by other entities will not be considered as meeting any of the requirements for entrance into the ABA pain management examination system.

E. Temporary Criteria

The ABA recognizes that initially many applicants will not have received formal pain management training. Therefore, it has established temporary criteria that eligible pain management practitioners can fulfill to satisfy the requirement of the Continuum of Education in Pain Management. Applicants who qualify under the temporary criteria must satisfy the entrance requirements listed under "Entrance Requirements" 1 and 2.

Applicants cannot qualify under temporary criteria for pain management examinations that are administered after 1998.
1. Applicants are eligible to qualify under the temporary criteria only if they complete the Continuum of Education in Anesthesiology before September 1, 1993. Candidates whose first application is declared void following three opportunities to satisfy the examination requirement may not qualify for readmission to the examination system under the temporary criteria.

2. The temporary criteria can be fulfilled in the following ways:
   a. The satisfactory completion of 12 months of formal training in acute, chronic, and oncology pain management, whose content and setting is acceptable to the ABA. Training in fulfillment of the temporary criteria that begins after May 1, 1994, must be approved prospectively by the Credentials Committee of the ABA. The Credentials Committee will not accept requests for prospective approval that are received after May 1, 1997.
   b. The completion of the equivalent of 24 months of continuous, full-time pain management practice.

   Credit will be granted for pain management practice only during the 8 years immediately preceding the date of the examination for which application is made. The applicant must be practicing pain management continuously during the period for which credit is requested. Practice credit will be granted in proportion to the percent of the applicant’s time each year spent practicing pain management, except that no credit will be granted for any year in which less than 25% of the applicant’s professional time was spent practicing pain management.

   Verification of the percent of professional time devoted annually to the practice of pain management and of clinical competence in anesthesiology pain management must be documented for the applicant by the Chief of Anesthesiology or the Pain Management Director. If the applicant holds both of these titles, another diplomate of the ABA must document these facts for the applicant.

   c. A combination of pain management training and continuous practice that the Credentials Committee of the ABA deems to be the equivalent of 12 months of full-time pain management training.

   Exceptions to the above temporary criteria that could be considered equivalent combinations of training and practice will be considered by the Credentials Committee of the ABA on an individual basis.

F. Application Procedure

The proper application form and other information may be obtained by writing to the Secretary, American Board of Anesthesiology, 100 Constitution Plaza, Hartford, CT 06103-1796. An applicant must request an application form by writing to the Board. Telephone requests are not acceptable.

Application for admission to the examination system of the ABA must be made to the Secretary upon a form prescribed by the Board. Photocopies or facsimiles of the application form are not acceptable.

The application form includes the identical statements of declaration and consent included in the application for primary certification. The applicant for examination in pain management shall be required to sign each statement.

G. Filing and Documentation Deadlines

The completed application and the appropriate fee for the 1996 pain management examination must be received by the ABA on or before March 1, 1996. Applications received after the deadline will not be accepted.

The ABA must receive all documentation it requires to make a determination about an applicant’s qualifications for admission to examination no later than May 1, 1996. This includes but is not limited to references, evidence of medical licensure, and verification that the training requirement or temporary criteria are met. An application will not be accepted if the required documentation is not received by that date.

H. Fees

The application fee for admission to the pain management examination system is $1,000. The fee must accompany the application. A nonrefundable fee for administrative services of $250 is included in the application fee. The reexamination fee for the pain management examination is $750. The ABA policies regarding the administrative services fee and the reexamination fee are stated on the preceding pages.

A charge of $50 will be made whenever a check in payment of a fee is returned for nonpayment.

I. Examination System

The ABA will notify an applicant who is accepted as a candidate for its pain management examination after approval of all credentials. The Board, acting as a committee of the whole, reserves the right to reject an applicant for any reason deemed appropriate. The Board reserves the right to correct clerical errors affecting its decisions.

The written examination in pain management is designed to test for the presence of basic knowledge that is considered essential for the ABA diplomate to function as a practitioner of pain management. The examination analyzes the cognitive and deductive skills as well as the clinical judgment of the candidates.

Current plans are to administer the pain management examination at one or more locations in the United States no more frequently than once every 2 years. The ABA will mail notice to all eligible candidates announcing the location(s) of the pain management examination at least 4 months prior to the date of its scheduled administration.

Every candidate is given three opportunities to satisfy the pain management examination requirement. Failure to satisfy the examination requirement within the three opportunities or the prescribed time, whichever comes first, will result in the candidate’s application being declared void.

The prescribed period of time for the successful completion of the examination for certification of added qualifications in pain management is the time between the date of the first examination for which the candidate is declared eligible and the next three consecutive administrations of the pain management examination. Thus, the ABA, at its discretion, may excuse a candidate from at most one pain management examination without forfeiture of an opportunity.

The ABA policies regarding examination notices, candidate responses, address changes, and excused absences are stated on the preceding pages. Its policies regarding nonstandard examination administration, irregular examination behavior, and unforeseeable events may also be found on the preceding pages.

J. Status of Individuals

Inquiries about the current status of physicians relative to the ABA pain management certification system should be addressed to the ABA office. The ABA will affirm the status of physicians who are certified in pain management by the ABA. For others, the response to the inquiry will be in keeping with ABA policy.

K. Reapplication

The application of a candidate who has failed to satisfy the examination requirement in the prescribed number of opportunities or time for whatever reason shall be declared void. The physician may reapply by submitting a new application. Such application shall be subject to the fees, rules, privileges, and requirements that apply at the
time of reapplication. The applicant who is adjudged to meet existing requirements will be readmitted into the examination system.

Every applicant who qualified previously by temporary criteria is required to have completed satisfactorily the 1-year continuum of education in pain management.

Test Dates and Deadlines

American Board of Colon and Rectal Surgery

John M MacKeigan, MD, President, Grand Rapids, Michigan
David J Schoetz, Jr, MD, Vice President, Burlington, Massachusetts
H Randolph Bailey, MD, Houston, Texas
Robert W Beart, Jr, MD, Los Angeles, California
Marvin L Corman, MD, Santa Barbara, California
Thomas H Dailey, MD, New York, New York
John M Daly, MD, New York, New York
Theodore E Eisenstat, MD, Plainfield, New Jersey
Philip H Gordon, MD, Montreal, Quebec
Richard L Nelson, MD, Chicago, Illinois
David A Rothenberger, MD, St Paul, Minnesota
Herard Abarcanid, MD, Secretary-Treasurer/Executive Director, Taylor, Michigan

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Colon and Rectal Surgery to ascertain whether the information below is current.)

General Qualifications and Requirements

All candidates shall comply with the following regulations:
1. A candidate shall appear personally before the Board and shall submit to the required examinations.
2. A candidate shall limit the majority of his/her practice to colon and rectal surgery.
3. A candidate may be required to deliver to the Board sufficient case reports to demonstrate proficiency in colon and rectal surgery.
4. A bibliography of papers and books published by the candidate shall be submitted to the Board upon its request.
5. The moral and ethical fitness of a candidate must be satisfactory to the Board and in conformity with the Statements of Principles of the American College of Surgeons, and the Principles of Medical Ethics of the American Medical Association. Practices not conforming therewith may result in rejection of an application or in deferral of examination until such matters have been resolved satisfactorily.

Professional Qualifications

1. A candidate must have completed an accredited residency program in colon and rectal surgery.
2. A candidate must have an unrestricted license to practice medicine in the country of his/her residence.
3. A candidate must successfully complete the qualifying examination of the American Board of Surgery before being admitted to the American Board of Colon and Rectal Surgery written examination (Part I).
4. A candidate must achieve certification by the American Board of Surgery before being admitted to the American Board of Colon and Rectal Surgery oral examination (Part II).

Application for Examination

Each candidate for examination must complete and submit an application for examination, which may be obtained from the Secretary of the Board. Applications must be submitted before July 15 of each year.

Within 2 weeks after conclusion of the training program, the applicant must submit to the Secretary of the Board a prescribed form, listing all operative procedures performed during the training period. This form is available from the Secretary of the Board and must be countersigned by the program director when it is submitted.

The application must also be accompanied by two unmounted, recent photographs of the applicant and the required application fee.

The acceptability of a candidate for examination depends not only upon completion of the requirements listed under General Qualifications and Requirements and Professional Qualifications but also upon information available to the Board regarding the candidate’s professional maturity, surgical judgment, and technical competence.

Examinations

To achieve certification by the American Board of Colon and Rectal Surgery, a candidate must pass a written examination (Part I) and an oral examination (Part II). The written examination is offered in the spring of the year and a candidate is required to pass this examination before being permitted to take the oral examination. The oral examination is given in the fall of the year.

Examinations are conducted at times and places determined by the Board, and this information may be obtained from the Board Office. It is also published in Diseases of the Colon and Rectum and in the Journal of the American Medical Association. Examinations will be held in one designated city in the United States.

Part I—Written Examination

The written examination is an assessment of a candidate’s knowledge of the theory and practice of colon and rectal surgery with separate examinations in pathology and radiology. The written portion of the examination is a 4-hour test of multiple choice questions covering the spectrum of colon and rectal surgery and the body of
basic science pertinent to it. The pathology and radiology portions of the examination each are 1 hour in length and consist of questions and slide presentations.

Part II—Oral Examination
The oral examination is conducted by members of the Board or its designated examiners. Its objective is to evaluate the candidate’s clinical experience, problem-solving ability, and surgical judgment, and to ascertain the candidate’s knowledge of current literature on colon and rectal diseases and surgery. Each candidate will undergo at least three 36-minute oral examinations by three two-member examining teams.

Examination Results
The Board makes every effort to be as prompt as possible in notifying candidates of their examination results, and letters of notification may be expected from 4 to 6 weeks following the examination.

Reexaminations
A candidate who has failed either the written or oral part of the examination may be reexamined after 1 year has elapsed.

A candidate who fails to pass either the written or oral portion of the examination may repeat that part of the examination twice, thus offering the candidate three opportunities to pass each part of the examination.

A candidate who fails to pass either the written or oral portion of the examination three times may not repeat the examination without satisfactory completion of an approved colon and rectal surgery residency program and submission of a new application for examination.

Status of Applicant
The Board does not use or sanction the terms “Board-eligible” or “Board-qualified.” The status of an applicant with the Board is determined by and varies with the current status of his/her credentials.

A candidate must apply to the Board’s certification process within 5 years after completion of approved colon and rectal surgery training.

The entire certification process with the Board must be successfully completed within 7 years following approval of the formal application. In addition, a candidate whose application for examination has been approved, but who does not take the examination within 3 years, must submit a new application.

In exceptional or unusual circumstances, the Board may, at its discretion, waive one or more of the limitations specified under “Status of Applicant.”

Fees
Application fee: a nonrefundable fee of $300 shall accompany the application.

Written examination fee (Part I): a fee of $400 is due and payable when the candidate is notified of approval to take the written examination.

Oral examination fee (Part II): a fee of $500 is due and payable when the candidate is notified of approval to take the oral examination.

Reexamination fee: fees for reexamination are the same as shown above for each examination.

Withdrawal from examination: a candidate who withdraws must notify the Board Office at least 10 business days before a scheduled examination. A candidate who fails to appear for examination or who withdraws without giving at least 10 days’ notice as defined above will forfeit $100 of the designated examination fee and will have to resubmit the forfeited amount before being admitted to the next scheduled examination.

Late applications: recognizing that a situation may arise that prevents an applicant from meeting the July 15 deadline, the Board has a provision for late applications. Late applications are those that are postmarked from July 16-August 15 each year. There is a nonrefundable late application fee of $100, bringing the total processing fee of a late application to $400. No applications postmarked after August 15 will be accepted.

Fees are subject to change as directed by the Board.

Appeals
Any candidate who is not acceptable to the Board for examination or who has failed an examination, totally or in part, may appeal such a decision by the Board and may, by registered letter to the Secretary of the Board, request a hearing, specifying the reasons therefor. An ad hoc hearing committee shall be appointed within 30 days to conduct the hearing.

If the decision of the hearing committee is not satisfactory, the candidate, by registered letter to the Secretary of the Board within 21 days after receipt of the notice of an adverse decision, may request an appellate review by the Board.

Certification
A candidate who has met all the requirements and successfully completed the examinations of the American Board of Colon and Rectal Surgery will be issued a certificate attesting to his/her qualifications in colon and rectal surgery. The certificate shall be signed by the president or vice president, and the secretary, and shall bear the corporate seal of the Board.

The certificate granted by the Board does not confer privilege or license to practice colon and rectal surgery, but is evidence that a physician’s qualifications for specialty practice are recognized by his/her peers. It is not intended to define the requirements for membership on hospital staffs, to gain special recognition or privileges for its diplomates, to define the scope of specialty practice, or to state who may or may not engage in the practice of the specialty.

Unless the candidate specifies otherwise, the Board forwards the names of candidates who have achieved certification to the American Board of Medical Specialties for publication in the Official American Board of Medical Specialties Directory of Board Certified Medical Specialists, published jointly by the American Board of Medical Specialties (ABMS) and Marquis Who’s Who.

Time-Limited Certification
Beginning with those candidates who passed the certifying examination in 1980 and thereafter, the American Board of Colon and Rectal Surgery will issue time-limited certificates. Certificates will be valid for 5 years from the date of certification, after which the certificates will no longer be valid.

Recertification
The American Board of Colon and Rectal Surgery offers recertification in the specialty. Certificates can be renewed prior to expiration by fulfilling the requirements for recertification specified by the Board. The recertification examination is offered annually, on a voluntary basis, to all certified colon and rectal surgeons who apply and meet the Board’s requirements. A recertification information booklet, which outlines the requirements and procedures, is available by writing to the Board Office.

Revocation of Certificates
The filing of an application for examination, participating in examination, and accepting a certificate are voluntary acts. Therefore,
the Board assumes no responsibility for any effect that certification or failure to obtain certification may have on the private or professional activities of candidates.

When an application is submitted, candidates are required to sign an agreement, a portion of which reads as follows: "I agree to disqualification from examination or from the issuance of a certificate, and I agree to the forfeiture and redelivery of such certificate in the event that any of the statements herein made by me at this time or at any time in the past or future in regard to my application for a certificate are false, or in the event that any of the rules and regulations of the Board governing such examinations and certificate are violated by me."

Certificates which have been issued are subject to the provisions of the Articles of Incorporation, the Constitution and Bylaws of the American Board of Colon and Rectal Surgery, Inc, and may be revoked for violation of any of these provisions.

Examination of Candidates With Disabilities
The American Board of Colon and Rectal Surgery supports the intent of the Americans with Disabilities Act (ADA). The Board will make a reasonable effort to provide Board applicants who have documented disabilities with modifications in its examination process that are appropriate for such disabilities but that do not alter the measurement of the skills or knowledge that the examination process is intended to test.

American Board of Dermatology

Clarence S Livingood, MD, Executive Consultant, Detroit, Michigan

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Dermatology to ascertain whether the information below is current.)

Requirements for Eligibility to Take the Examination
Each applicant must satisfy the following requirements before he or she is eligible to take the certifying examination of the Board.

General Qualifications
1. The candidate must have graduated from a medical school in the United States accredited by the Liaison Committee for Medical Education (LCME), an accredited medical school in Canada, an accredited osteopathic school in the United States, or if a graduate of a foreign medical school, must possess the standard certific-
Certification Requirements

competence as well as the execution of their investigative or academic responsibilities. Moreover, the program director must continue to closely monitor the training of these residents and must validate their clinical experience at the completion of their residencies.

2. A Preliminary Registration form must be filed by the candidate and signed by his/her training director shortly after the resident begins residency training in dermatology.

3. It is mandatory that the training director submit a Yearly Report form for each resident to the Board Office by August 1 after completion of the first and second year of training and by May 15 for residents who will complete their third year of training on June 30. In order for a candidate to take the certifying examination, the training director must certify that each year of training was completed in a satisfactory manner.

4. Training must be completed within 5 years after the beginning of dermatology residency, except when military service or other compelling circumstances intervene.

5. It is the responsibility of the residency program director to determine if a resident has satisfactorily completed the required 3 years of dermatology training and is therefore eligible to sit for the certifying examination of the American Board of Dermatology. The Board has established guidelines to assist program directors in making this determination, particularly for residents whose training experience differs from the standard 36 months of full-time clinical training, as, for example, might result from a protracted medical leave of absence. These guidelines are available on request from the Board Office.

Registration for the Examination of the Board

Candidates who have completed the training requirements as outlined above are eligible to apply for examination by the Board. Candidates should request an Application for Certification form from the office of the executive director of the Board. The completed application must be filed with the Board Office before May 1 of the year in which the candidate plans to take the examination. Physicians who complete their residency training in dermatology by July 1 of a given year are eligible to apply to take the examination in the fall of that year. It is emphasized that it is the candidate's responsibility to send a completed application form to the Board if he or she plans to take the certifying examination of the Board.

A candidate is not considered an "active" candidate until his or her application has been received and approved by the Board. This approval includes a review of the application and annual evaluation reports from the candidate's training director. After the application is approved, the candidate is required to take the examination within 3 years. Candidates who do not exercise the examination privilege within 3 years of the date they are declared eligible will be required to file a new application and have their eligibility for examination reviewed by the Requirements Committee. If the reaplication is approved by the Board, the candidate is again eligible to take the examination for another 3-year period.

The Board does not use the term "Board-eligible" in correspondence with directors of hospitals or others who send inquiries to the Board Office. On written request by a candidate, the Board will send to the candidate a letter stating his or her status with the Board at any given time.

Board Examination

The certifying examination in dermatology, which is administered over a period of 2 days, includes the following:

1. Comprehensive Multiple Choice Examination in Dermatology: This is a 6-hour comprehensive examination, and was formerly referred to as the Written or Part I examination. It tests the candidate's knowledge of the basic science and clinical aspects of dermatology, including all the related disciplines. Among the topics included in this part of the examination are clinical dermatology, pediatric dermatology, preventive dermatology, entomology, epidemiology, dermatopathology, cutaneous allergy and immunology, dermatologic surgery, cutaneous oncology, sexually transmitted diseases, internal medicine as it pertains to dermatology, medical ethics, photobiology, and cutaneous microbiology, as well as anatomy, physiology, biochemistry, molecular biology, radiation physics, radiation therapy, physical therapy, pharmacology, genetics, and electron microscopy as related to dermatology. Considerable emphasis is placed on comprehensive knowledge of the literature.

2. Examination in Clinical and Laboratory Dermatology: Projected 2×3 slides are utilized in this part of the examination. Candidates must answer multiple-choice type questions about the projected pictorial material, which is drawn from all areas of clinical and laboratory dermatology. Examples of the types of slides used include photographs of patients, diagrams and ilustrative drawings and pictures of dermatologic surgical procedures, histopathologic sections, fungal cultures, culture mounts, bacterial cultures, Tzanck preparations, skin scrapings and smears, roentgenograms, histochemical and fluorescent photomicrographs, electron micrographs, darkfield micrographs and drawings or photographs of organisms, including viruses, rickettsiae, bacteria, and parasites that affect the skin.

3. Examination in Dermatopathology: In this section, candidates are questioned on histopathologic slides that they examine microscopically, utilizing personal or rented microscopes. This section of the examination encompasses the entire spectrum of dermatopathology.

For the purposes of scoring, the Examination in Clinical and Laboratory Dermatology is combined with the Examination in Dermatopathology, and candidates must pass this combined examination (formerly designated the Part II examination), as well as the Comprehensive Multiple Choice Examination in Dermatology (formerly designated the Part I examination) in order to be certified. If a candidate fails either the combined Examination in Clinical and Laboratory Dermatology/Examination in Dermatopathology or the Comprehensive Multiple Choice Examination in Dermatology and not the other, only the failed component must be repeated.

The examination is given annually in the fall over a 2-day period involving a total of approximately 10 hours. It will be held on October 22 and 23, 1995, at the Holiday Inn O'Hare Airport in Rosemont, Illinois, which is in the O'Hare Airport area of Chicago.

Reexamination

With their initial examination application, candidates have a 3-year period during which they may take the examination or any necessary reexamination on either a failed part (see above) or both parts of the examination. For a reexamination, they must notify the Board Office by May 1 of the year they plan to reexamine. If a candidate has not passed or does not take the examination during this 3-year period, he/she must reapply and complete the necessary forms, after which he/she will have another 3-year period of eligibility during which to take the examination or reexamination. Contact the Board Office for further information concerning this as well as the appropriate fees required (see "Fees").

Handicapped or Disabled Candidates

The American Board of Dermatology supports the intent of the Americans with Disabilities Act (ADA) and, therefore, will provide or allow the use of necessary auxiliary aids, services or testing conditions that do not fundamentally alter the measurement of the skills.
or knowledge the Board assessment program is intended to test. In order to implement this policy, notification of the need for special testing circumstances must be given to the American Board of Dermatology by a candidate for certification at the time that he/she submits the application for any of the Board's certifying examinations. This deadline is necessary in order to allow the Board to request the necessary documentation, to review the records, and to verify the disability, if necessary. In addition, since this policy also applies to the In-Training Examination, which is under the jurisdiction of the American Board of Dermatology, appropriate advance notification of the need for special testing circumstances must be provided when the application for the In-Training Examination is submitted by the department.

Upon receipt of your request, the American Board of Dermatology will initiate the appropriate procedural steps, but it should be understood that all special arrangements must be made and agreed upon in advance; special arrangements cannot be made at the time the examination is given. Therefore, earlier notification of the need for special testing circumstances is encouraged.

**Chemical Dependency or Substance Abuse**

A candidate with chemical dependency or substance abuse will not be permitted to take the examination unless he or she can submit evidence, which must be verifiable, that the disorder is being treated and under control. Individuals with such problems or a history thereof must provide the necessary documentation at the time of application to take the examination. A confirmatory letter from a licensed physician within 1 month of the examination that the disorder no longer exists or is currently controlled is also necessary.

**Certification**

After meeting the above requirements and passing the examination, the candidate will be awarded a certificate that acknowledges that he or she has completed the required course of graduate study and clinical training, has met other specific standards and qualifications, and has passed the examination conducted by the Board. The candidate is then referred to as a diplomate of the American Board of Dermatology, Inc. The names of diplomates of the Board appear in the *Official ABMS Directory of Board Certified Dermatologists and the Official ABMS Compendium of Board Certified Medical Specialists*, published by Marquis Who's Who in cooperation with the American Board of Medical Specialties.

Each certificate is subject to revocation in the event that (a) the physician so certified shall not have been eligible to receive such certificate, whether or not the facts concerning his or her ineligibility were known or could have been ascertained by the directors of the Board at the time of the issuance of the certificate; (b) the physician so certified shall have made any material misrepresentation or omission in the application for such certificate or in any other statement to the Board or its representatives; (c) the physician so certified shall have been convicted by a court of competent jurisdiction of a crime relating to or arising out of the practice of medicine.

**Appeals Procedure**

The American Board of Dermatology recognizes a candidate's right of appeal following an adverse action at any stage of the certification process. Within the residency program, trainees must be accorded due process in compliance with provisions established by the parent institution and as stipulated in the *Essentials of Accredited Residencies in Graduate Medical Education* (July 1, 1983) of the Accreditation Council for Graduate Medical Education.

Candidates whom the Board has declared ineligible to sit for the certifying examination on the basis of qualifications may appeal such decisions by written request within 90 days of the date of notification of the Board's ruling. A candidate failing a certifying examination may request in writing that his or her examination be rescinded by hand to verify the accuracy of the results as reported. Such requests must be received in the Board Office within 90 days of the date of mailing of the examination results to the candidates. A check in the amount of $35 payable to the American Board of Dermatology must accompany this written request. There shall be no further appeal from failure of an examination.

**Time-Limited Certificates**

Since 1991 the American Board of Dermatology has issued time-limited certificates to all candidates who pass the certifying examination. These certificates will remain valid for 10 years. The process by which these candidates may be recertified will be announced at a later date.

**Fees for Examination and Reexamination**

The Directors of the Board serve without compensation. Fees are based on the actual expenses incurred in office administration and in conducting the examination.

The examination fee for the certifying examination in Dermatology is $1,250, payable when the application is submitted. The fee for reexamination is $1,150. All checks are to be made payable to the American Board of Dermatology, Inc.

When a candidate's application for the Certifying Examination in Dermatology or a Special Qualification Examination is disapproved or when the candidate withdraws by September 1 of the year of the examination, the Board retains an administrative fee of $100. If the candidate withdraws from the examination after September 1 and up until 10 days before the examination, the Board will retain half of the examination fee ($625 for the Certifying Examination in Dermatology, $575 for reexamination, $600 for the Special Qualification Examination in Dermatopathology, and $500 for the Special Qualification Examination in Clinical and Laboratory Dermatological Immunology). If the candidate withdraws within 10 days of the examination or fails to appear for the examination and does not provide verifiable evidence of extenuating circumstances that prevented him or her from appearing for the examination, the Board will retain the entire examination fee. On reapplying, such candidates will be required to again submit the examination fee in effect at the time of the application.

**Publication**

The American Board of Dermatology, Inc., publishes a booklet of information that may be obtained from the Board Office. All correspondence should be sent to

Harry J Hurley, MD, Executive Director
American Board of Dermatology, Inc
Henry Ford Hospital
One Ford Pl
Detroit, MI 48202-4350

**Certification for Special Qualification in Dermatopathology**

Special Qualification certification in Dermatopathology is a joint and equal function of the American Board of Dermatology (ABD) and the American Board of Pathology (ABP). Such function will relate to qualifications of candidates, standards of examination, and the form of the certificate.

All candidates applying for examination must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in either the United States or Canada.
Prerequisites
The American Boards of Dermatology and Pathology will admit candidates to examination for certificates of Special Qualification in Dermatopathology who are otherwise qualified and who have met one of the following requirements

1. Applicants already holding a primary certificate from the American Board of Dermatology or from the American Board of Pathology (anatomic pathology, or anatomic and clinical pathology) and the addition of a year of training in dermatopathology in a program accredited for such training by the ACGME. Additional training must be taken after the candidate has met the full training requirements for certification in dermatology or pathology. The dermatologist applicant must spend one-half of the required training time in pathology. The pathologist applicant must spend one-half of the required training time in clinical dermatology.

2. Applicants who are diplomates of both the American Board of Dermatology and the American Board of Pathology.

Training
Accredited institutional training programs in dermatopathology are an equal and joint function of the Departments of Dermatology and Pathology of that institution. Training programs in dermatopathology are reviewed and accredited by the Residency Review Subcommittee for Dermatopathology, which includes three members from the Residency Review Committee for Dermatology and three members from the Residency Review Committee for Pathology. Upon recommendation by this subcommittee, training programs in dermatopathology are accredited by joint action of the Residency Review Committees for Dermatology and Pathology acting with authority delegated by the Accreditation Council for Graduate Medical Education (ACGME). Information concerning accredited dermatopathology training programs may be found in this directory.

Deadline for Application and Date of Examination
The deadline for receipt of applications to take the examination for Special Qualification in Dermatopathology is June 1 of the year in which the candidate plans to take the examination. The next examination will be given on Friday, October 20, 1995, in Chicago, Illinois.

Fee
The fee for the examination for Special Qualification in Dermatopathology is $1,200, payable when the application is submitted.

Certification for Special Qualification in Clinical and Laboratory Dermatological Immunology

Prerequisites
The requirements for Special Qualification certification in Clinical and Laboratory Dermatological Immunology (CLDI) are as follows:

1. An applicant must be a diplomate of the American Board of Dermatology.

2. An applicant must have satisfactorily completed an accredited 1-year fellowship in CLDI.

Training
A minimum of 1 year of full-time training in an accredited CLDI training program will be required of all candidates. Information concerning accredited training programs in CLDI is available from the office of the American Board of Dermatology.

Deadline for Application and Date of Examination
The deadline for receipt of applications to take the examination for Special Qualification in CLDI is April 1 of the year in which the candidate plans to take the examination. The next examination in CLDI will be given on Friday, October 20, 1995, in Chicago, Illinois.

American Board of Emergency Medicine

Mary Ann Reinhard, PhD, Associate Executive Director

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Emergency Medicine to ascertain whether the information below is current.)

Requirements for Certification in Emergency Medicine
An applicant must satisfy all credential requirements at the time the application is submitted. Requirements fulfilled after the date of application will not be considered.

1. Graduates of approved schools of osteopathic medicine in the United States are considered when they have satisfactorily met the credential requirements as outlined.

2. An applicant graduating from a medical school other than one in the United States, its territories, or Canada must provide the Board with a verified and translated diploma. Throughout the certification process, applicants and candidates must hold a current, valid, unrestricted, and unqualified license to practice medicine in the jurisdiction(s) (within the United States, its territories, or Canada) in which they practice. A physician must hold at least one license that meets these criteria to fulfill the Board's licensure requirement.

The applicant must have successfully completed a total of 36 months of post-medical school training, under the control of an accredited emergency medicine residency program. Emergency medicine programs must be accredited by the Accreditation Council for Graduate Medical Education (ACGME) or the Royal College of Physicians and Surgeons of Canada for Canadian programs.

If the emergency medicine residency training program is structured so that it exceeds the length of training specified above, the resident must successfully complete the requirements of his/her
residency program to apply under the emergency medicine residency category of application.

Note: For residents who began their emergency medicine training prior to July 1, 1987, the candidate must have successfully completed a total of 36 months of post-medical school training, at least 24 months of which were under the control of an accredited emergency medicine residency program at the PGY 2 level and above.

The applicant must submit 50 hours of continuing medical education in emergency medicine annually, acceptable to the Board, starting 1 year from the date of graduation from the emergency medicine residency program and continuing until the date of application. If a resident applies to the Board within 1 year of graduation no continuing medical education is required.

**Combined Training Programs**
A special agreement exists with the American Board of Pediatrics whereby an applicant may fulfill the training requirements of both Boards by completing joint training in 5 years. Training programs must be approved prospectively by both Boards. Guidelines for combined training have been approved by both Boards and are available by writing either Board Office. Applicants may not appear for the certifying examination until all training has been satisfactorily completed.

A special agreement exists with the American Board of Internal Medicine whereby an applicant may fulfill the training requirements of both Boards by completing joint training in 5 years. Training programs must be approved prospectively by both Boards. Guidelines for combined training have been approved by both Boards and are available by writing either Board Office. Applicants may not appear for the certifying examination until all training has been satisfactorily completed.

**Applications**
Applications are distributed in the spring of each year (mid-April) and are available from the Board Office. Applications are accepted from May 1 through July 15 of each year. A mailing list is maintained throughout the year for requests received during times when applications are not available.

A nonrefundable processing fee must accompany the application at the time it is submitted.

Applicants wishing to be considered for examination must submit a fully completed application form to the Board. The Board will not be responsible for any opinion expressed concerning the individual’s credentials for the examination unless it is in writing and over the signature of the president or secretary of the Board.

**Examination Information**
The certification examination in emergency medicine is composed of two parts. The first part is a 6.25-hour comprehensive written examination, administered one time each year. It includes multiple choice and pictorial multiple choice items.

The oral certification examination includes seven simulated patient encounters: five single-patient encounters and two multiple-patient encounters.

A candidate must successfully complete the written examination to be scheduled for the oral examination.

The written examination is offered in the fall of each year, and oral examinations are held twice a year (spring and fall).

Examination fees are due upon assignment to an examination administration.

**Certification**
All candidates who successfully complete both the written and the oral certification examinations shall be known as diplomats of the American Board of Emergency Medicine. Diplomates receive an appropriate certificate, which shall remain the property of the American Board of Emergency Medicine. Certification is for a period of 10 years.

Any certificate issued by the Board shall be subject to revocation at any time, should the Board determine, in its sole judgment, that a candidate who has received a certificate was in some respect not properly qualified to receive or retain it.

**Recertification**
ABEM Diplomates will have three options for achieving recertification: passing either the written or the oral certification examination, or the written recertification examination. Passing any one of these examinations will earn the diplomat an additional 10-year certificate.

**American Board of Family Practice**
Edward T Bope, MD, President, Columbus, Ohio
William G Bernhardt, MD, Vice President, Midwest City, Oklahoma
Michael D Hagen, MD, Treasurer, Lexington, Kentucky
James F Shetlar, MD, Exec Comm Member at Large, Frankenmuth, Michigan
Donald T Erwin, MD, New Orleans, Louisiana
Lonnie Fuller, Sr, MD, Atlanta, Georgia
Mary Kane Goldstein, MD, Stanford, California
John R Hayes, MD, Indianapolis, Indiana
Warren A Heffron, MD, Albuquerque, New Mexico
Donald M Keith, MD, Seattle, Washington
James C Martin, MD, San Antonio, Texas
Kenneth L Noller, MD, Worcester, Massachusetts
Jack Pickelman, MD, Maywood, Illinois
Thomas L W Roe, MD, Los Angeles, California
Joseph W Tollison, MD, Augusta, Georgia
Paul R Young, MD, Executive Director, Lexington, Kentucky
Robert F Avant, MD, Deputy Executive Director, Lexington, Kentucky

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Family Practice to ascertain whether the information below is current.)

**ABFP Official Definition of Family Practice**
“Family practice is the medical specialty which is concerned with the total health care of the individual and the family. It is the specialty in breadth which integrates the biological, clinical, and behavioral sciences. The scope of family practice is not limited by age, sex, organ system, or disease entity.”

**Board Eligibility**
The ABFP does not recognize or use the term “Board-eligible,” and does not issue statements concerning “Board eligibility.” The Board informs an applicant of admission to an examination to be given on a specified date after a formal application has been reviewed and approved.

**Certification Process**
The American Board of Family Practice (ABFP) administers the certification and recertification examinations in various centers throughout the United States annually, on the second Friday in July.
The ABFP certification and recertification examinations are written tests of cognitive knowledge and problem-solving abilities relevant to family practice. Appropriate subject areas of the following disciplines are included: internal medicine, pediatrics, surgery, obstetrics, gynecology, psychiatry, and behavioral sciences, community medicine, and geriatrics. Elements of the examination include but are not limited to diagnosis, management, and prevention of disease.

Requirements for Certification

A. General

1. All candidates for the ABFP certification examination must have satisfactorily completed 3 years of training (a full 36 calendar months with 12 months in each of the G-1, G-2, and G-3 years) in a family practice residency program accredited by the Accreditation Council for Graduate Medical Education (ACGME) subsequent to receipt of the MD or DO degree from an accredited institution and, when applicable, a Fifth Pathway year, or receipt of a standard certificate from the Educational Commission for Foreign Medical Graduates, or compliance with other ACGME requirements for entry into graduate medical training in the United States. If a physician does not meet the eligibility requirements of the ACGME for entry into resident training, his/her training will not be recognized by the Board.

   Candidates who obtained their MD degree from medical schools in the United States or Canada must have attended a school accredited by the Liaison Committee on Medical Education or the Committee for Accreditation of Canadian Medical Schools. Candidates who obtained a DO degree must have graduated from a college of osteopathic medicine accredited by the American Osteopathic Association (AOA).

   The Board prefers all 3 years of training to be in the same ACGME-accredited family practice program; however, other training may be considered as equivalent (e.g., flexible/transitional year, AOA osteopathic internship). In these cases, and for physicians who have had international training, each individual's training will be evaluated by the Board. Internationally trained physicians must meet all of the requirements of the Residency Qualifying Examination and obtain a passing score to receive any credit toward certification for prior training. The ABFP requires a residency program to submit prospective requests for advanced placement of residents. Program directors are responsible for notifying the Board prior to the entry of the transferring resident. If a program director fails to comply, the Board will determine the amount of transfer credit at the time of its discovery of the transfer. Consequently, the resident may receive less credit toward certification than anticipated and may be required to extend the duration of training.

   The last 2 years of family practice residency training must be completed in the same accredited program. Transfers after the beginning of the G-3 year are approved only in extraordinary circumstances.

   Verification of satisfactory completion of residency training must be stated in writing by the program director. All applicants for the certification examination are subject to the approval of the Board, and the final decision regarding any application rests solely with the ABFP.

2. All candidates’ education and training experiences are subject to review and approval by the ABFP. Any variance from the above must have prior written approval of the Board. No credit may be given for any previous training as equivalent to family practice training without the written approval of the Board.

3. Candidates must complete all requirements of the Board no later than June 30 of the year of the examination. Complete documentation from the program director that the resident has or is expected to have satisfactorily completed the residency must be received by the Board by June 30. Applications, supplied to the residents directly through the program director, are made available only to residents expected to complete the required training by June 30 of the current year. Residents who complete their training at an earlier date must write to the Board for an application.

4. All candidates must hold a currently valid, full, and unrestricted license to practice medicine in the United States or Canada. Furthermore, every license to practice medicine held by the candidate in any state or territory of the United States or province of Canada must be currently valid, full, and unrestricted, whether or not the candidate in effect practices in such state, territory, or province. Candidates shall be required to maintain a full and unrestricted medical license in the United States or Canada even if they are out of the country for extended periods of time. Involuntary loss of a license will result in the simultaneous loss of diplomate status and/or the ability to make application for certification, recertification, or other examinations offered by the Board.

   Any candidate whose license to practice medicine has been revoked, suspended, or restricted in any state or territory of the United States or province of Canada shall be ineligible for certification until such time as the encumbered license is reinstated in full. Should a license be revoked, suspended, or restricted following the submission of an application for certification but prior to the notification of examination results, the application and certification will be simultaneously invalidated. It is the responsibility of the candidate to inform the Board immediately upon a change in licensure status. If the candidate fails to notify the Board of any suspension, revocation, restriction or probation within 60 days after the effective date, the physician shall be ineligible to seek certification for up to 1 year following the reinstatement of full and unrestricted licensure. A restricted medical license is any adverse action by a state licensing agency that encumbers the ability of a physician to diagnose, manage, and/or treat patients. Questions about licensure should be presented to the Board in writing.

5. No candidate will be allowed to take the examination until all fees are paid and all of the above requirements have been satisfactorily met.

B. Osteopathic Physicians

Osteopathic physicians who have graduated from an AOA-approved school of osteopathic medicine in the United States may qualify for certification if they meet all the same requirements as specified for allopathic medical school graduates. They may apply to ACGME-accredited family practice programs for entry into the first year (G-1). Osteopathic physicians who have documented satisfactory completion of an AOA-approved internship (G-1) year may receive credit for that portion of the G-1 year that meets the ABFP guidelines for advanced-level entry or interprogram transfers.

   All candidates (MD or DO) must satisfactorily complete at least 36 calendar months of accredited graduate medical education. Only the G-1 year may be fulfilled by an AOA-approved internship year. The training beyond the G-1 year must be in continuity in an ACGME-accredited family practice residency program.

C. Canadian Applicants

Canadian applicants may qualify for examination via either of the following routes:

1. Physicians who have satisfactorily met the requirements of the College of Family Physicians of Canada (CFPC) by completion of 2 years of training in a program accredited by the CFPC must
have a third year of accredited family practice residency. This third year of training must be satisfactorily completed in an ACGME-accredited family practice program or, if taken in Canada, must be approved by the CFPC and must have the prior approval of the ABFP. Only those programs that bring the third-year experience into compliance with the ACGME Special Requirements for Residency Training in Family Practice will be considered as being equivalent to a third year in a ACGME-accredited family practice training program. The request must be accompanied by documentation of satisfactory performance of the first 2 years of training (including a description of the curriculum) signed by the program director.

2. Physicians who have been certified by examination by the CFPC of Canada (certificates), and who
   a. have established legal residence in the United States for not less than the immediate past 2 years at the time of application; and
   b. since residing in the US have accumulated a minimum of 50 hours per year of continuing medical education approved by the ABFP Board of Family Practice; and
   c. are actively engaged professionally full-time and exclusively in family practice (practice and/or teaching, administration) may be permitted to apply for examination for certification by the ABFP.

Recertification Process

The ABFP confers diplomate status for the specified period of time noted on the certificate. The certificate is dated for a 7-year period. In order to maintain diplomate status, the diplomate must be recertified before the certificate expires. Although the certificate is dated for 7 years, the Board routinely administers the recertification process on a 5-year cycle. This allows a "reserve" year for those diplomates who for some reason are unable to participate in the sixth year, or in cases where the diplomate fails to receive a satisfactory score in the sixth year. Should a diplomate not be recertified by the end of the seventh year, the certificate will expire and the physician will lose diplomate status. However, the physician may reapply for the recertification process, but must meet all criteria in effect at that time.

For diplomates who participate in the recertification process during the sixth year and pass, the new certificate of 7 years' duration is dated from the time of that examination.

Diplomates will be given advance notice of any changes in the recertification requirements.

Requirements for Recertification

A. Submission of a formal application.
B. Documentation of 300 hours of approved continuing medical education.
C. Submission of statement of acknowledgment and compliance with Board policy regarding medical licensure.
D. Satisfactory completion of the office record review portion of the recertification process.
E. Satisfactory performance on the written test of cognitive knowledge.

Reexamination

Candidates who fail the examination may apply for admission to the next annual examination. There is no limit to the number of times a qualified candidate may take the examination when it is offered. Provided the qualifications are met with each reaplication. In addition to valid and unrestricted licensure status, 20 hours per year of continuing medical education since the last application are required for reexamination. Full fees are charged for each examination.

Certificate of Added Qualifications

A. Geriatric Medicine

The ABFP and the American Board of Internal Medicine in a joint venture are offering a Certificate of Added Qualifications (CAQ) in Geriatric Medicine. This "added certificate" is designed to recognize the excellence among those diplomates who provide care to the elderly. The Geriatric Examination will be given biennially in even-numbered years.

Family physicians must be certified by the ABFP at the time of the examination, hold a valid and unrestricted license to practice medicine in the United States or Canada, have 2 years of accredited geriatric fellowship training sponsored by an ACGME-accredited family practice or internal medicine residency program, and achieve a satisfactory score on a one-day examination. The geriatric fellowship training must be subsequent to the family practice residency training, and no part of the family practice residency will be permitted as credit toward the 2-year geriatric fellowship requirement. The fellowship training must be completed by June 30 of the year of the examination.

B. Sports Medicine

The American Board of Family Practice in a joint venture with the American Board of Emergency Medicine, the American Board of Internal Medicine, and the American Board of Pediatrics offers a Certificate of Added Qualifications (CAQ) in Sports Medicine. This examination is offered biennially in odd-numbered years.

Family physicians must be certified by the American Board of Family Practice at the time of examination, hold a valid and unrestricted license to practice medicine in the United States or Canada, and achieve a satisfactory score on a one-half day examination for which they have qualified through one of the following plans:

Plan I (fellowship pathway): candidates must have completed a minimum of 1 year in a sports medicine fellowship program associated with an ACGME-accredited residency in emergency medicine, family practice, internal medicine, or pediatrics.

Plan II (practice pathway): candidates must have 5 years of practice experience consisting of at least 20% professional time devoted to sports medicine defined as one or more of the following: (1) field supervision of athletes; (2) emergency assessment and care of acutely injured athletes; (3) diagnosis, treatment, management, and disposition of common sports injuries and illness; (4) management of medical problems in the athlete; (5) rehabilitation of ill and injured athletes; and, (6) exercise as treatment. In addition, candidates must show evidence of participating in 30 hours of sports medicine-related AMA Category I (or its equivalent) continuing medical education during the past 5 years.

C. Recognition of Successful Candidates

Successful candidates on the Geriatric or Sports Medicine CAQ examination will be awarded an ABFP certificate of added qualifications. The certificate will be valid for 10 years. Reassessment will be required for renewal of certification.

Loss or expiration of primary certification in family practice will automatically result in simultaneous loss of any and all certificates of added qualifications. In cases where a CAQ is lost due to loss of the primary certificate and later the primary certificate is reinstated, the CAQ will be reinstated for the remaining period of time, if any, as stated on the CAQ certificate.

*Plan II will be available only through the 1999 examination. After 1999, a 1-year sports medicine fellowship will be required for eligibility.
Revocation

A. General

Each certificate issued by the Board of Directors of the ABFP shall be subject to revocation in any of the following circumstances:

1. The issuance of such certificate or its receipt by the person so certified shall have been contrary to, or in violation of, any provision of the Articles of Incorporation of the ABFP, Inc.; or of the Bylaws of the ABFP.

2. The person so certified shall not have been eligible to receive such certificate, irrespective of whether the facts constituting such ineligibility were known to, or could have been ascertained by, the directors of the corporation or its representatives.

3. The person so certified shall have made a misstatement of fact in the application for such certificate or in any other statement or representation to the corporation or its representatives.

4. The person so certified shall at any time have neglected to maintain the degree of competency in the field of family practice as established by the Board.

B. Licensure Status

A diplomate of the ABFP shall be required to hold a currently valid, full, and unrestricted license to practice medicine in the United States or Canada. Furthermore, every license to practice medicine held by a diplomate in any state or territory of the United States or province of Canada must be currently valid, full, and unrestricted, whether or not the diplomate in effect practices in such state. Diplomates shall be required to retain a full and unrestricted medical license in the United States or Canada even if they are out of the country for extended periods of time. Failure to retain a license will result in loss of diplomate status and the ability to make application for certification, recertification, or other examinations offered by the Board.

In the event a diplomate's license to practice in any state or territory of the United States or province of Canada is revoked, restricted, or suspended, the diplomate's status with the ABFP is to be simultaneously rescinded at the time of the licensure revocation, restriction, or suspension. The physician must advise ABFP within 60 days and cease immediately identifying himself/herself in any way directly or indirectly as a diplomate of the ABFP.

If the physician fails to notify the ABFP of any revocation, restriction, or suspension within 60 days after the effective date, he/she shall be ineligible to seek reinstatement of diplomate status for up to 1 year following the reinstatement of full and unrestricted licensure. A restricted medical license is any adverse action by a state licensing agency that prevents the ability of a physician to diagnose, manage, and/or treat patients. Questions about licensure should be presented to the Board in writing.

If and when the physician's revoked or suspended license is reinstated in full (with no restrictions) and official written documentation of reinstatement is provided, the ABFP will honor the remainder of the current certificate and the diplomate will not be required to be reexamined. If the current certificate has expired prior to the reinstatement of the license, the physician may make application for the next annual examination. Successful compliance with all application requirements in effect at that time will be expected.

C. Authority

The ABFP Board of Directors shall have sole power and authority to determine whether the evidence or information before it is sufficient to constitute grounds for revocation of any certificate issued by this corporation. The Board of Directors may, however, at its discretion, require any person so certified to appear before the Board of Directors, upon not less than 30 days written notice by registered mail, and to show cause, at the time and place specified in such notice, why the certificate should not be revoked. The failure of any person so notified to appear as required in such notice shall, at the discretion of the Board of Directors, constitute cause for revocation of the certificate. The decision of the Board of Directors in all such matters shall be final.

Applications and Additional Information

Applications and additional information may be obtained by writing to:

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Internal Medicine to ascertain whether the information below is current.)

Preface

The Board's decision about a candidate's eligibility for certification is determined by the policies and procedures described in this document. This edition of policies and procedures supersedes all previous publications.

The Board reserves the right to make changes in its fees, examinations, policies, and procedures at any time without advance notice. The Board also reserves the right, under extraordinary circumstances, to waive certain of its requirements. Admission to the Board's examinations will be determined under policies in force at the time of application. This document is not to be construed as
a contract between a candidate and the American Board of Internal Medicine.

Introduction
The American Board of Internal Medicine (ABIM) was established in 1938 and is a private, nonprofit corporation that is not a part of or affiliated with any other organization. Its members serve rotating terms with new members annually elected by the Board. The Board receives no public funds and has no licensing function.

The mission of the ABIM is to enhance the quality of health care available to the American public by maintaining high standards for certifying individual internists who possess the knowledge, skills, and attitudes essential for the provision of excellent care.

Certification by the ABIM recognizes excellence in the discipline of internal medicine and its subspecialties. Certification by the Board is not a requirement to practice internal medicine or a subspecialty, nor does the Board confer privilege to practice. The Board does not intend either to interfere with or to restrict the professional activities of a licensed physician because the physician is not certified.

The Board administers the certification and recertification processes by (1) establishing training requirements for Board candidates; (2) assessing the credentials of candidates; (3) obtaining substantiation by appropriate authorities of the clinical competence and professional standing of candidates; and (4) developing and conducting examinations for certification and recertification.

The duration of the validity of all certificates issued by the Board in 1990 (1987 for critical care medicine and 1988 for geriatric medicine) and thereafter is 10 years, and the dates of validity will be noted on the certificates. Certificates issued before 1990 will continue to be valid indefinitely. Diplomates with certificates that are valid indefinitely will be offered the same opportunity to recertify as those who hold time-limited certificates.

In 1995, the Board will offer its comprehensive recertification program, which will include an at-home, open-book, self-evaluation process; local evaluation of credentials; and a proctored final examination. Information about the Board's recertification program is available upon request.

Training Requirements for Certification in Internal Medicine
Physicians who are awarded a certificate in the specialty of internal medicine must have completed the required predoctoral medical education, met the postdoctoral training requirements, demonstrated clinical competence in the care of patients, and passed the Certification Examination in Internal Medicine.

Postdoctoral Medical Education
Candidates from medical schools in the United States or Canada must have attended a school accredited at the date of graduation by the Liaison Committee on Medical Education (LCME) or the Committee for Accreditation of Canadian Medical Schools. Candidates from osteopathic medical schools must have graduated from a college of osteopathic medicine accredited by the American Osteopathic Association.

Graduates of international medical schools are required to submit one of the following:
1. A permanent (valid indefinitely) certificate from the Educational Commission for Foreign Medical Graduates; or
2. Comparable credentials from the Medical Council of Canada; or
3. Documentation of training for those candidates who entered postdoctoral medical training in the United States via the Fifth Pathway, as proposed by the AMA.

Postdoctoral Training Requirements
To be admitted to an examination, physicians must have completed 3 years of accredited training before July 1 of the year of examination. No internship or residency training taken before the date of completion of requirements for the MD or DO degree will be credited toward the Board's training requirements.

The 3 years of required training must satisfy all four of the following conditions:
1. The director of the accredited internal medicine training program must have had responsibility for the educational process during all of the 36 months of training. The program director may assign up to 6 months of training in specialties other than internal medicine.
2. The 36 months of training must have included a minimum of 24 months of meaningful patient responsibility. Of the 24 months of meaningful patient responsibility, at least 20 must occur in the following settings: (a) inpatient services in which disorders of general internal medicine are managed; (b) inpatient services in which disorders of one or more subspecialties of internal medicine are managed; (c) emergency medicine, general medical, or subspecialty ambulatory settings; and (d) dermatology or neurology services. Four months of meaningful patient responsibility may be taken outside the above areas with the approval of the internal medicine program director.
3. The training must be completed in an internal medicine program accredited by the Accreditation Council for Graduate Medical Education (ACGME) or training completed in Canada and accredited either by the Royal College of Physicians and Surgeons of Canada or by the Professional Corporation of Physicians of Quebec.
4. The level of responsibility for patient care must increase in each year of training.

Training Taken in Accredited Programs Other Than Categorical Internal Medicine
For residents transferring to the first or second year of internal medicine programs from other ACGME-accredited residencies, the internal medicine program director may grant up to 12 months credit to qualified individuals according to the following guidelines:
1. Month for month credit for internal medicine rotations that occur in an institution that has an ACGME-approved internal medicine program, and/or
2. Month for month credit for rotations on other specialties, not to exceed 6 months per specialty and 6 months in total.

The program director must inform the Board within 1 year of transfer of the amount of credit to be granted.

Alternate Training Pathways
Clinical Investigator Pathway
The Board has established a pathway for investigators highly trained both in clinical sciences and clinical or biomedical research. This pathway leads to certification in internal medicine with 4 years of training. A clinical investigator can achieve certification in internal medicine and a subspecialty with 6 years of training (7 years for cardiovascular disease and for dual certification in hematology and medical oncology). The clinical training and research may be taken in any sequence.

Candidates must complete 2 years of accredited residency training in internal medicine with at least 20 months of meaningful patient responsibility and an appropriately balanced curriculum. Candidates must demonstrate superior overall clinical competence in both years of internal medicine training. Candidates seeking certification in a subspecialty must meet the clinical training requirements for that subspecialty examination.
During research training, candidates are strongly encouraged to maintain a continuity clinic appropriate for their stage of clinical training (general internal medicine during residency training and subspecialty clinic during fellowship training).

Candidates must complete 2 years of full-time research (3 years if the candidate plans to pursue subspecialty certification) during which at least 80% of the candidate's professional time and effort is dedicated to investigative activities. The candidate's arrangements for research must be prospectively approved by the Board prior to the completion of internal medicine clinical training. Credit will be granted for research undertaken prior to the award of the MD degree or outside the United States or Canada only in rare instances.

The Certification Examination in Internal Medicine may be taken in the fall of the PGY-4, so long as 2 years of accredited residency training in internal medicine precede admission to the examination. Candidates who are not in an accredited fellowship must provide documentation that they are in research training during PGY-4.

A subspecialty examination may be taken in the fall of PGY-6 (PGY-7 for cardiovascular disease and for dual certification in hematology and medical oncology). Candidates for a subspecialty examination must provide documentation in PGY-6 that they are in full-time research training, or in a full-time faculty position with substantial (ie, 50% professional time and effort) research involvement. Candidates who are no longer in a research program in the fall of PGY-6 will not be admitted routinely to a subspecialty examination. The credentials of such candidates must be reviewed by the Board to determine admissibility to the examination.

A proposal supporting the candidate for admission through the Clinical Investigator Pathway should be sent to the ABIM as early as possible and must be received no later than March 1 of the R-2 year. It must include:
1. A letter of recommendation and description of training from the residency program director, including documentation of a superior rating of clinical competence.
2. A letter of support from the sponsor of the research training describing the proposed program and documenting that it will be of the required duration.
3. A letter of support from the subspecialty program director, if the research training is to occur during fellowship training.

Combined Training Leading to Certification by Two Boards
Guidelines for combined residency training have been developed with the American Board of Emergency Medicine, American Board of Pediatrics, American Board of Physical Medicine and Rehabilitation, American Board of Preventive Medicine, and the American Board of Psychiatry and Neurology. A list of programs offering approved training is available from the Board.

Candidates for Special Consideration
Beginning with the administration of the 1997 examination, the Board will only review proposals on behalf of the candidates with nonstandard training who meet the following criteria:
1. At least 2 years of full-time formal training in internal medicine in accredited programs in the United States or Canada that have occurred after 3 or more years of verified foreign training in internal medicine; or after 3 or more years of accredited training in another specialty in the United States or Canada, or
2. Full-time internal medicine faculty members in an LCME-accredited US medical school or an accredited Canadian medical school who have completed 3 or more years of training in internal medicine abroad; hold an appointment at the level of Associate Professor or higher; and have completed 8 years of experience after formal training as a full-time clinician-educator or a clinical investigator in internal medicine with an appointment on a medical school faculty.

Candidates must be proposed by the chairman of a department of internal medicine of an accredited medical school or the program director of an accredited internal medicine residency. Guidelines for proposing candidates for special consideration should be obtained prior to submitting a proposal.

No other exceptions to the Board's standard training requirements will be considered. Pre-1997 special candidate guidelines are available from the Board upon request.

Substantiation of Clinical Competence

Components of Clinical Competence

The Board requires substantiation that the candidate is competent in the following: clinical judgment, medical knowledge, clinical skills (medical interviewing, physical examination, and procedural skills), humanistic qualities, professionalism, and provision of medical care.

The diagnostic and therapeutic procedures listed below are required for certification. Although the Board does not prescribe an absolute number of times a procedure must be done to ensure competence, as indicated in parentheses, it has developed guidelines for the minimum number of directly supervised, successfully performed procedures below which the confirmation of proficiency is not credible: abdominal paracentesis (3), arterial puncture for blood gas analysis (5), arthrocentesis of the knee joint (3), central venous line placement (5), lumbar puncture (5), nasogastric intubation (3), thoracentesis (5), and critical life-saving procedures (this requirement can be met by documentation of successful training in advanced cardiac life support).

Annual Evaluation of Residents

The Board requires program directors to annually complete evaluation forms assessing the clinical competence of residents. In the R-1 and R-2 years the Board has determined that in order to receive credit for a year of training, a resident must demonstrate satisfactory
1. Humanistic qualities
2. Moral and ethical behavior
3. Overall clinical competence

Residents rated as superior or satisfactory will receive credit for the year of training. Residents rated as unsatisfactory in their R-1 or R-2 year will receive no credit. Residents rated marginal in the R-1 year will receive credit for that year of training. Residents receiving marginal ratings in both R-1 and R-2 years must take an additional year of training.

In the R-3 year, in addition to the above, all residents must be judged to be satisfactory in each of the components of competence defined by the Board.

In general, the Board believes that additional training is required to correct deficiencies in clinical competence. One additional year of accredited training (including satisfactory completion and performance) is required for each unsatisfactory year. It is the resident's responsibility to arrange for this training. If this additional training is taken in a different program, the Board requires that the resident request that a written evaluation of past performance be transmitted from the previous training program to the new training program director. In addition, the Board will provide to the accepting program director performance ratings from the previous program and a summary of the number of months of credit toward the 36-month training requirement.

Individuals demonstrating deficiencies solely in the areas of humanistic qualities or moral and ethical behavior may, at the discretion of the Board, be required to complete additional training and/or a specified period of close observation. The Board will pro-
vide copies of the evaluation forms to residents upon written request. The responsibility for the evaluation of a resident rests with the training program, not with the Board. The Board is not in a position to reexamine the facts and circumstances of a resident's training and evaluation. As required by the ACGME in its Essentials of Accredited Residencies in Graduate Medical Education, trainees must be provided due process at the educational institution. In the event that a resident disagrees with the rating given, the resident must seek and complete that institution's due process procedure.

Professional Standing of Practitioners

Every 4 years following formal evaluation, the Board requires verification that candidates applying for examination are currently recognized as internal medicine specialists in good standing. Verification is sought from the chief of medical service at the institution where the candidate's principal staff appointment is held. Any challenge to good standing must be resolved locally to the Board's satisfaction before admission to the examination. For example, substance abuse, convictions for felonies related to medical practice, or substantial disciplinary action by a hospital staff may lead to deferred admission or rejection from examination.

Licensure

Candidates with a restricted, suspended, or revoked license in any jurisdiction at the time of application or examination will not be admitted to the examination or certified. Restrictions include but are not limited to conditions, contingencies, probation, or stipulated agreements. A valid, unrestricted, and unchallenged license to practice medicine in a state, territory, commonwealth, possession, or province of the United States or Canada will be required of all candidates who will have been out of formal training 1 or more years as of July 1 of the year of examination.

Certification and Recertification Examinations in Internal Medicine

The certification examination is administered annually in centers throughout the United States, Puerto Rico, and Canada. It is given in four parts on two consecutive days.

More detailed information about the examination is furnished with the Board's application material.

Areas of Certification and Recertification Offered in the Subspecialties and Added Qualifications of Internal Medicine

The Board offers certification in the following subspecialties and added qualifications.

Subspecialties
Cardiovascular Disease
Endocrinology, Diabetes, and Metabolism
Gastroenterology
Hematology
Infectious Disease
Medical Oncology
Nephrology
Pulmonary Disease
Rheumatology

Added Qualifications
Adolescent Medicine
Clinical Cardiac Electrophysiology
Clinical and Laboratory Immunology
Critical Care Medicine
Geriatric Medicine
Sports Medicine

Training Requirements for Certification in a Subspecialty

Physicians who are awarded a certificate in a subspecialty or area of added qualifications of internal medicine must be previously certified in internal medicine by the American Board of Internal Medicine. In addition, they must have completed the Board's training requirements, demonstrated clinical competence in the care of patients, and passed the certification examination in the subspecialty.

Subspecialty training initiated July 1, 1989, and thereafter must be accredited by the ACGME, The Royal College of Physicians and Surgeons of Canada, or the Professional Corporation of Physicians of Quebec. Subspecialty training completed prior to July 1, 1989, must have been completed in a program associated with an accredited residency in internal medicine in the United States or Canada.

Fellowship training taken before the date of completion of the requirements for the MD or DO degree, and training as a chief medical resident, cannot be credited toward the requirements for subspecialty certification. Practice experience and attendance at postgraduate courses cannot be credited.

Educational experience in a subspecialty during a full-time junior faculty appointment in an approved medical school in the United States or Canada may be applicable toward the requirements. Such clinical experience must be approved by the appropriate program director and must be reviewed prospectively by the Board.

To be admitted to an examination, candidates must have completed the required subspecialty training before July 1 of the year of examination.

Specific Training Requirements for the Subspecialty Examinations

Cardiovascular disease—3 years of accredited training, of which an aggregate of 24 months is clinical training, in the diagnosis and management of a broad spectrum of cardiovascular diseases.

Endocrinology, diabetes, and metabolism; gastroenterology, hematology; infectious disease; medical oncology; nephrology; pulmonary disease; and rheumatology—3 years of accredited training, of which an aggregate of 12 months is clinical training, in the diagnosis and management of a broad spectrum of medical diseases. Additionally, the hematology and medical oncology examinations each require a minimum of 24 months of experience in an ambulatory care setting and a minimum of ½ day per week spent in a continuity outpatient clinic in the longitudinal care of patients.

Combined Training Leading to Dual Certification

Hematology and Medical Oncology

Dual certification in hematology and medical oncology requires 3 years of full-time combined fellowship training. The 3 years of combined training must include a minimum of 18 months of prospectively designed full-time clinical training with patient care responsibility. This full-time clinical training must include a minimum of 12 months of training in the diagnosis and management of a broad spectrum of neoplastic diseases including hematological malignancies and the equivalent of a minimum of 6 months of training in the diagnosis and management of a broad spectrum of nonneoplastic hematological disorders. These experiences need not be in sequential months of block time. During the entire 3 years the candidate must attend at least one outpatient clinic for a minimum of 1/2 day per week and have the responsibility for providing continuous care to a defined cohort of patients being managed for neoplastic disorders and others with specific hematological disorders.

The combined training must be taken in programs in the same institution, or in an acceptably coherent program, accredited both in
hematology and medical oncology by the ACCP, The Royal College of Physicians and Surgeons of Canada, or the Professional Corporation of Physicians of Quebec. Examples of acceptable combined programs are
1. A single program with one program director.
2. A joint program sponsored by the same institution with two different program directors and a coordinated curriculum.
3. A coherent program involving more than one institution in the same city where there is a coordinated curriculum.

Candidates desiring certification in both hematology and medical oncology with only 3 years of combined training are required to notify the Board in writing of their intent before completion of their first year of combined training. This letter of intent must be co-signed by the training program director(s). Candidates must complete all 3 years of required combined training before being admitted to an examination in either subspecialty.

Candidates who elect to undertake an examination in one subspecialty following only 2 years of fellowship training will be required to complete 4 years of accredited training for dual certification. They must meet the 2-year training requirement for the second subspecialty independent of the training that permitted admission to the initial subspecialty examination.

By full-time clinical training the Board means that at least 80% of the trainee’s professional time and effort during a working week is dedicated to clinical (patient care or educational) activities. These may include providing primary care to subspecialty patients; supervision of subspecialty patients on the general medical service or on designated subspecialty inpatient units; subspecialty consultations and consultation rounds; subspecialty ambulatory care; general medicine ambulatory care; scheduled clinical conferences; performance of procedures on patients; review of imaging, pathological, and other diagnostic material; other direct patient care; attending national scientific meetings and reading clinical literature. Clinical activities may include research necessitating extended patient contact and care.

These policies pertain to trainees who entered subspecialty training in hematology and/or medical oncology on or after June 1, 1990.

Rheumatology and Allergy and Immunology

Dual certification in rheumatology and allergy and immunology requires a minimum of 3 years of full-time training. Of the total 3 years, at least 12 months must be full-time clinical rheumatology training supervised by the director of an accredited rheumatology training program.

Weekly attendance for 18 consecutive months in an ambulatory care program supervised by rheumatology faculty must be included in the 3-year combined program; this 18-month period must offer true continuity of patient care within ambulatory clinics.

At least 18 months must be devoted to full-time allergy and immunology training supervised by the training program director of an accredited training program in allergy and immunology.

Plans for combined training should be approved in writing by both the rheumatology and the allergy and immunology training program directors and by the ABIM Subspecialty Board on Rheumatology and ABAI before training begins. Admission to either examination requires: certification in internal medicine; satisfactory clinical competence; and completion of the entire 3-year combined program.

Candidates who seek dual certification for other subspecialty combinations should write to the Board for information.

Added Qualifications

The Board offers certification of added qualifications to diplomates with additional training in adolescent medicine, clinical cardiac electrophysiology, clinical and laboratory immunology, critical care medicine, geriatric medicine, and sports medicine. Specific details regarding the training/experience requirements for each of the added qualifications examinations are available on written request from the Board Office with the exception of clinical and laboratory immunology. For information and application forms for the clinical and laboratory immunology examination please contact American Board of Allergy and Immunology 3624 Market St Philadelphia, PA 19104-2675

Candidates for Special Consideration

Guidelines for proposing candidates for special consideration for subspecialty and added qualifications examinations are available upon request.

Substantiation of Clinical Competence

Components of Clinical Competence

The Board requires substantiation that the candidate is competent in the following: clinical judgment, medical knowledge, clinical skills (medical interviewing, physical examination, and procedural skills), humanistic qualities, professionalism, provision of medical care, and continuing scholarship as a subspecialist-consultant. Verification will be sought by the Board from both the director of the subspecialty training program and the director of the associated residency in internal medicine. Trainees must receive a satisfactory rating of overall clinical competence, humanistic qualities, and moral and ethical behavior in each of the required years of subspecialty training.

In addition, during the final year of required training they must receive satisfactory ratings in each of the components of competence, including proficiency in performing the requisite procedures listed below:

- Cardiovascular disease: advanced cardiac life support (ACLS), including cardiopulmonary resuscitation and defibrillation, echocardiography; arterial catheter insertion; and right-heart catheterization, including insertion and management of pacemakers, catheters, and defibrillators.

- Critical care medicine: airway maintenance intubation, including fiberoptic bronchoscopy; ventilator management, including experience with various modes; insertion and management of chest tubes, ACLS, placement of arterial, central venous, and pulmonary artery balloon flotation catheters; and calibration and operation of hemodynamic recording systems.

- Endocrinology, diabetes, and metabolism: thyroid aspiration biopsy.

- Gastroenterology: proctoscopy and/or flexible sigmoidoscopy; diagnostic upper gastrointestinal endoscopy; colonoscopy, including biopsy and polypectomy; esophageal dilation; therapeutic upper and lower gastrointestinal endoscopy; and liver biopsy.

- Hematology: bone marrow aspiration and biopsy, including preparation, staining, examination, and interpretation of blood smears, bone marrow aspirates, and touch preparations of bone marrow biopsy material; measurement of complete blood count, including platelet- and white cell differential, using automated or manual techniques with appropriate quality control; administration of chemotherapy agents and biological products through all therapeutic routes; management and care of indwelling venous access catheters; therapeutic phlebotomy; and therapeutic thoracentesis and paracentesis.

- Infectious disease: microscopic evaluation of diagnostic specimens for the diagnosis of infectious diseases including preparation,
staining, and interpretation; management, maintenance, and removal of indwelling venous access catheters; and administration of antimicrobial and biologic products via all routes.

Medical oncology: bone marrow aspiration and biopsy; administration of chemotherapeutic agents and biological products through all therapeutic routes; and management and care of indwelling venous access catheters.

Nephrology: placement of temporary vascular access for hemodialysis and related procedures; acute and chronic hemodialysis; peritoneal dialysis; continuous arteriovenous hemofiltration; and percutaneous biopsy of both autologous and transplanted kidneys.

Pulmonary disease: endotracheal intubation; fiberoptic bronchoscopy and accompanying procedures; ventilator management; thoracentesis and percutaneous pleural biopsy; arterial puncture; placement of arterial and pulmonary artery balloon flotation catheters; calibration and operation of hemodynamic recording systems; supervision of the technical aspects of pulmonary function testing; progressive exercise testing; and insertion and management of chest tubes.

Rheumatology: diagnostic aspiration of and analysis by light and polarized light microscopy of synovial fluid from diarthrodial joints, bursae, and tenosynovial structures; and therapeutic injection of diarthrodial joints, bursae, tenosynovial structures, and entheses.

The Board believes that additional training is required to correct deficiencies in clinical competence. Trainees rated as unsatisfactory in any component of clinical competence during the final year of required training or in humanitarian qualities, moral and ethical behavior, and/or overall clinical competence during any year of fellowship training will be informed by the Board that the year will not be credited toward the requirements for certification. One additional year of accredited training (including satisfactory completion and performance) is required for each unsatisfactory year. It is the fellow's responsibility to arrange for this training. If this additional training is taken in a different program, the Board requires that the fellow request that a written evaluation of past performance be transmitted from the previous training program to the new training program director. In addition, the Board will provide performance ratings from the unsatisfactory year and a summary of the total credits accumulated toward the training requirements to the new program director.

Individuals demonstrating deficiencies solely in the areas of humanitarian qualities or moral and ethical behavior may, at the discretion of the Board, be required to complete additional training and/or a specified period of close observation. The Board will provide copies of the evaluation forms to trainees upon written request.

The responsibility for the evaluation of a trainee rests with the training program, not with the Board. The Board is not in a position to reexamine the factual circumstances of a fellow's training and evaluation. As required by the Accreditation Council for Graduate Medical Education in its Essentials of Accredited Residencies in Graduate Medical Education, trainees must be provided due process at the educational institution. In the event that a trainee disagrees with the rating given, the trainee must seek and complete that institution's due process procedure.

Professional Standing of Practitioners

Every 4 years following formal evaluation, the Board requires verification that candidates applying for examination are currently recognized as subspecialists in good standing in the appropriate subspecialty. Verification is sought from the chief of medical service at the institution where the candidate's principal staff appointment is held. Any challenge to good standing must be resolved locally to the Board's satisfaction before admission to the examination. For example, substance abuse, convictions for felonies related to medical practice, or substantial disciplinary action by a hospital staff may lead to deferred admission or rejection from examination.

Licensure

Candidates with a restricted, suspended, or revoked license in any jurisdiction at the time of application or examination will not be admitted to examination or certified. Restrictions include, but are not limited to, conditions, contingencies, probation, and stipulated agreements. A valid, unrestricted, and unchallenged license to practice medicine in a state, territory, commonwealth, possession, or province of the United States or Canada will be required of all candidates who will have been out of formal training 1 or more years as of July 1 of the year of examination.

The Certification and Recertification Examinations in the Subspecialties and Added Qualifications of Internal Medicine

The subspecialty examinations are offered on an alternate-year schedule. The examinations are administered in centers in the United States, Puerto Rico, and Canada. All of the examinations with the exception of cardiovascular disease are 1 day in length; cardiovascular disease is 1 1/2 days.

More detailed information about the examinations is furnished with the Board's application material.

Special Policies

Board-Eligible Status

Consistent with establishment of time-limited certification, the Board restricts the duration of eligibility for certification. Board eligibility is defined as the status conferred by ABIM at the time a candidate receives notice of admission to an examination. It indicates that the candidate has completed the required training, demonstrated satisfactory clinical competence, and that other credentialing requirements have been met.

Candidates for certification in internal medicine are Board-eligible for four examinations, or 4 period of 6 years, whichever limit is reached first. Candidates who were admitted to an examination before 1989 are considered Board-eligible for four more examinations or until 1995, whichever comes first.

Candidates for certification in a subspecialty or area of added qualifications are Board-eligible for three examinations or a period of 6 years, whichever limit is reached first. Candidates who were admitted to a subspecialty or added qualifications examination before 1989 are considered Board-eligible for three more examinations or until 1995 (for examinations administered in odd-numbered years) or 1996 (for examinations in even-numbered years), whichever comes first.

Should adverse information about a candidate come to the attention of the Board, the Board-eligible status may be revoked.

Beginning in 1985, candidates who have taken at least one certification examination may renew their Board-eligible status at any time during their period of eligibility. Candidates may apply for either the certification examination (up to four examinations for internal medicine or three examinations for a subspecialty or area of added qualifications) or a qualifying examination. The following requirements must be met to reestablish the Board-eligible status: possession of a valid and unrestricted license; verification of satisfactory clinical competence; completion within the preceding 2 years of 100 hours of acceptable Category 1 continuing medical education courses accredited by the Accreditation Council on Continuing Medical Education; and success on an ABIM Qualifying Examination.

Candidates reestablish their Board-eligible status for four examinations in internal medicine (three examinations in a subspecialty
or area of added qualifications) or 6 years from the date of successfully completing the Qualifying Examination.

**Disclosure of Information**

The Board provides information to program directors each year regarding both the certification status of individuals who trained in their program and took the examination, and the program’s overall candidate performance. This information is helpful to the program in evaluating its educational effectiveness. The Board also provides program pass rate information to the Residency Review Committee for Internal Medicine. In addition, at its discretion, the Board may release examination results, examination scores and other pertinent information concerning candidates to those whom it deems have a legitimate need for such information.

**Disabled Candidates**

The Board recognizes that some candidates may be unable to fulfill the requirement for proficiency in performing procedures because of disability. For such individuals, the procedural skills requirement may be waived. Program directors are urged to write to the Board for approval before the individual enters training.

The Board is also committed to offering its examinations in a place and manner that is accessible to individuals with disabilities and, when necessary, alternative accessible arrangements under comparable conditions to those provided for sound disabled individuals are offered to disabled individuals. Candidates who need accommodation during the examination for a disability should provide a written request to the Board at the time of application for examination. Details and related documentation must be received no later than 3 months prior to the date of examination.

**Substance Abuse**

If a history of substance abuse exists, the candidate must provide documentation that he or she can safely and effectively perform the duties and responsibilities of a certified internist/subspecialist. To that end, evidence of successful completion of a treatment program and/or a documented period of abstinence is required.

**Leave of Absence**

Up to 1 month of credit may be granted in any 1 year for vacation time, illnesses, or delayed starts. In addition, up to 6 weeks’ credit can be granted for pregnancy, adoption, and subsequent newborn care.

**Reduced-Schedule Training**

In general, part-time training, even though continuous, is not acceptable. Interrupted full-time training, however, is acceptable, provided that no period of full-time training is shorter than 1 month. In any 12-month period, at least 6 months must be spent in training. The Board encourages trainees to maintain patient care responsibilities in a continuity clinic during the nontraining components of the year. Individuals planning such training should seek the guidance of the Board before acting on their plans.

**Revocation of Certificates**

The Board may at its discretion revoke a certificate if (1) the diplomate was not qualified to receive the certificate at the time it was issued, even if the certificate was issued as a result of a mistake on the part of the Board; (2) the diplomate made any material misstatement of fact or omission of fact (a) to the Board in connection with application or otherwise or (b) to any third party concerning the diplomate’s certification or eligibility status; or (3) the diplomate’s license to practice medicine has been revoked in any jurisdiction.

**Late Applications**

Awareness of and meeting registration deadlines are the candidate’s responsibility. There is a nonrefundable penalty fee of $300 for any application postmarked between November 2, 1994, and January 1, 1995, for sports medicine; December 2, 1994, and February 1, 1995, for internal medicine; and April 2, 1995, and July 1, 1995, for cardiovascular disease; critical care medicine; endocrinology, diabetes, and metabolism; gastroenterology; and medical oncology.

**Examination Schedule**

Certification Examination in

**Internal Medicine**

Date: August 22–23, 1995
Registration Period: September 1, 1994, to December 1, 1994
Fee (US): $770
Cancellation Deadline: July 1, 1995
Sports Medicine
Date: April 7, 1995
Registration Period: July 1, 1994, to November 1, 1994
Fee (US): $890
Cancellation Deadline: March 1, 1995

Cardiovascular Disease
Date: November 9–10, 1995
Registration Period: January 1, 1995, to April 1, 1995
Fee (US): $890
Cancellation Deadline: October 1, 1995

Critical Care Medicine
Date: November 9, 1995
Registration Period: January 1, 1995, to April 1, 1995
Fee (US): $890
Cancellation Deadline: October 1, 1995

Endocrinology, Diabetes, and Metabolism
Date: November 9, 1995
Registration Period: January 1, 1995, to April 1, 1995
Fee (US): $890
Cancellation Deadline: October 1, 1995

Gastroenterology
Date: November 9, 1995
Registration Period: January 1, 1995, to April 1, 1995
Fee (US): $890
Cancellation Deadline: October 1, 1995

Medical Oncology
Date: November 9, 1995
Registration Period: January 1, 1995, to April 1, 1995
Fee (US): $890
Cancellation Deadline: October 1, 1995

Geriatric Medicine
Date: April 16, 1996
Registration Period: July 1, 1996, to November 1, 1996
Fee (US): Not determined
Cancellation Deadline: February 18, 1996

Clinical Cardiac Electrophysiology
Date: November 20, 1996
Registration Period: January 1, 1996, to April 1, 1996
Fee (US): Not determined
Cancellation Deadline: October 1, 1996

Hematology
Date: November 20, 1996
Registration Period: January 1, 1996, to April 1, 1996
Fee (US): Not determined
Cancellation Deadline: October 1, 1996

Infectious Disease
Date: November 20, 1996
Registration Period: January 1, 1996, to April 1, 1996
Fee (US): Not determined
Cancellation Deadline: October 1, 1996

Nephrology
Date: November 20, 1996
Registration Period: January 1, 1996, to April 1, 1996
Fee (US): Not determined
Cancellation Deadline: October 1, 1996

Pulmonary Disease
Date: November 20, 1996
Registration Period: January 1, 1996, to April 1, 1996
Fee (US): Not determined
Cancellation Deadline: October 1, 1996

Rheumatology
Date: November 20, 1996
Registration Period: January 1, 1996, to April 1, 1996
Fee (US): Not determined
Cancellation Deadline: October 1, 1996

Please see previous pages for penalty fee for late applications.

Sharon B. Robinson, MS, Executive Secretary
American Board of Medical Genetics
9650 Rockville Pike
Bethesda, MD 20814

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Medical Genetics to ascertain whether the information below is current.)

General Information
The American Board of Medical Genetics, Inc (ABMG), incorporated in 1980 under the sponsorship of the American Society of Human Genetics, Inc, prepares and administers examinations to certify individuals who provide services in medical genetics and provides accreditation of medical genetics training programs. The certification program consists of a general (core) examination, taken by all examinees, and specialty examinations in the following areas: (1) Clinical Genetics, (2) PhD Medical Genetics, (3) Clinical Cytogenetics, (4) Clinical Biochemical Genetics, and (5) Clinical Molecular Genetics.

First-Time Applicants
Eligibility for the examination will require successful completion of an ABMG or ACGME (clinical genetics only) accredited training program. All graduates of an accredited training program will be considered eligible to sit for the certification examinations, provided they submit supporting credentials that are listed for each specialty area.

The ABMG may grant eligibility to qualified individuals trained in other countries who complete their logbook under the auspices of an ABMG or ACGME-accredited training program. These special circumstances should be evaluated early in the candidate's work in the US. The ABMG, therefore, reserves the right to grant eligibility to such candidates. Candidates should submit a formal application...
and Information Supplement form. The ABMG reserves the right to declare a candidate ineligible if training, background, or references are deemed inadequate.

All applicants must sit for the core (general) examination and at least one specialty examination.

 Applicants for Reexamination

Reexaminees are those individuals who failed the examination for the first time. Applicants who sat for the first time in 1993 and failed to achieve certification can retake the examinations for the next cycle. Applicants who sit for the first time in 1996 and fail to achieve certification may retake the following cycle but must retake all examinations. Applicants cannot carry over a passed examination to the next cycle.

Reexaminees should: (1) submit a completed application form (information already on file need not be resubmitted, i.e., diploma, certificate of training), and (2) pay for the examination(s) to be retaken.

If certification has not been achieved within two consecutive examination cycles, it is necessary to begin again as a new applicant. For example, an examinee who sat for the first time in 1990 and for the second time in 1993 and failed to achieve certification must submit supporting credentials as if he/she were a new applicant. All information must be resubmitted (including proof of completing an ABMG-accredited training program, new logbook, letters of reference, etc.).

 Applicants for Certification in an Additional Specialty

Those who have been previously certified in a specialty and desire to take another specialty examination must submit new credentials including evidence of additional specialty training specific to the area for which certification is desired and include a new case log. Applicants must sit and pass the general examination and the new specialty examination in order to be certified in the new area.

Fees

A. Application Fee
   $450 for one specialty
   $500 for two specialties
   $550 for three specialties
   $600 for four specialties

   This is non-refundable and must accompany your application.

B. General Examination: $490

C. Specialty Examinations: (Each person must take at least one specialty examination.) Reexaminees must submit the examination fee with the application.

   Clinical Genetics  $500
   PhD Medical Genetics $500
   Clinical Cytogenetics $500
   Clinical Biochemical Genetics $500
   Clinical Molecular Genetics $500

   First-time applicants, or applicants applying for certification in a new specialty, will be required to submit the appropriate examination fees once their application has been approved.

   If an approved applicant withdraws from the examination, examination fees will be refunded at the applicant’s request if he or she notifies the Administrative Office. However, $100 of the examination fee will be retained to cover administrative costs. A candidate who fails to appear for examination will forfeit all examination fees.

Deadline for Applications

Applications must be postmarked no later than December 31, 1995. Applications postmarked after this date will not be accepted. All information (including logbooks) must be received at this time. Applicants whose training does not end until June 30, 1996, must submit their entire application by December 31, 1995. Applicants in training must submit 100 cases by December 31, 1995, and the remainder by March 31, 1996. Applicants who have completed training must submit everything by December 31, 1995.

When an Application Is Received

Upon receipt of the completed application and appropriate filing fee, all credentials will be evaluated. At its discretion, the ABMG will approve applications for the examination; each candidate will be notified in writing. Once an application has been approved, the individual will be considered eligible to sit for the examination and will be granted “Active Candidate Status.” Accepted candidates will be asked at this time to remit fees for each examination for which they are eligible to sit. Final eligibility cannot be determined and admission to the examination cannot be ensured until all supporting documents and fees have been received in the ABMG Administrative Office. If the applicant’s background is found to be deficient, the ABMG will require additional training and/or clinical experience before allowing the applicant to sit for the examination.

Applicants who will be completing training by June 30, 1996, may apply at this time for the 1996 examination (see individual specialty entry for further instructions).

Admission of Candidates to the Examinations

When all fees and supporting documents have been received and the candidate has been determined eligible, the individual will be notified of the assigned examination center. An admission card will be prepared and mailed to the candidate approximately 3 weeks before the examination. Candidates will not be admitted to any examination without an admission card.

Specific Requirements for Eligibility Listed by Specialty

The ABMG limits eligibility for certification opportunities to those who can demonstrate to the satisfaction of the ABMG that the specific criteria for certification have been met. Those practitioners working in the field of genetics who, despite academic or clinical backgrounds, do not meet specific criteria will not be permitted to sit for any examination.

To be eligible for certification by the ABMG, an individual must meet the criteria in the area of desired certification and provide the supporting documentation required. Certification is offered in these areas: clinical genetics, PhD medical genetics, clinical biochemical genetics, clinical cytogenetics, and clinical molecular genetics.

A. Clinical Geneticist: an individual who holds an MD or DO degree and can demonstrate competence to provide comprehensive diagnostic, management, and counseling services. Competence in this area implies that the individual

   1. Has diagnostic and therapeutic skills in a wide range of genetic disorders;
   2. Has an appreciation of heterogeneity, variability, and natural history of genetic disorders;
   3. Is able to elicit and interpret individual and family histories;
   4. Is able to integrate clinical and genetic information and appreciate the limitations, interpretation, and significance of specialized laboratory and clinical procedures;
   5. Has expertise in genetic and mathematic principles to perform risk assessment;
6. Has the skills in interviewing and counseling techniques required to elicit from the patient or family the information necessary to reach an appropriate conclusion; anticipate areas of difficulty and conflict; help families and individuals recognize and cope with their emotional and psychological needs; recognize those situations requiring psychiatric referral; and transmit pertinent information effectively, i.e., in a way that is meaningful to the individual or family; and
7. Has knowledge of available health care resources for appropriate referral.

First-time applicants seeking certification as clinical geneticists must submit the following items in support of the application:
1. One acknowledgement card
2. Notarized application
3. Notarized identification form with a recent photograph
4. Copy of doctoral diploma
5. Verification of satisfactory completion of at least 2 years in an accredited clinical residency program in any medical specialty—certificate of completion
6. Verification of satisfactory completion of at least 2 years in an ABMG-accredited clinical genetics training program. Applicants who will be completing their training by June 30, 1996, may apply at this time and supply current training information. The ABMG will contact the program director at the conclusion of the training period for verification of successful completion of training
7. Three letters of recommendation from ABMG-certified diplomates; one must be from your program director
8. A logbook of 150 cases for which the applicant had professional responsibility during the clinical genetics training period. The cases should provide evidence of a well-rounded experience in clinical genetics with a diversity of genetic disorders and counseling issues. No more than 50% of the cases may be in any one category. If your training does not end until June 30, 1996, the applicant must submit 100 cases at the time of application and the remainder by March 15, 1996, and
9. Documentation of license to practice medicine in the state where training took place

Applicants for reexamination within one cycle must submit the following:
1. Completed application form including a photo identification form, and
2. The appropriate examination fee(s)

B. PhD medical geneticist: An individual with a PhD degree who may work in association with a medical specialist, be affiliated with a clinical genetics program, serve as a consultant to medical and dental specialists, and/or serve in a supervisory capacity in a clinical genetics program. Competence in this area implies that the individual
1. Is able to elicit and interpret individual and family histories
2. Has an appreciation of the heterogeneity, variability, and natural history of the medical disorders in question
3. Is able to integrate clinical and genetic information in order to appreciate the limitations, interpretation, and significance of specialized laboratory and clinical procedures
4. Has expertise in genetic and mathematical principles to perform complex risk assessments, to interpret pedigree analysis (both segregation and linkage), and to understand the principles of genetic etiology;
5. Has the skills in interviewing and counseling techniques required to
   a. elicit from the patient or family the information necessary to reach an appropriate conclusion
   b. anticipate areas of difficulty and conflict
   c. help families and individuals recognize and cope with their emotional and psychological needs
   d. recognize those situations requiring psychiatric referral, and
   e. transmit pertinent information effectively, i.e., in a way that is meaningful to the individual or family

First-time applicants seeking certification as PhD medical geneticists must submit the following items in support of the application:
1. One acknowledgement card
2. Notarized application
3. Notarized identification form with a recent photograph
4. Copy of doctoral diploma in genetics, human genetics, or a related field
5. Verification of satisfactory completion of at least 2 years in a postgraduate ABMG-accredited medical genetics training program. Applicants who will be completing their training by June 30, 1996, may apply at this time and supply current training information. The ABMG will contact the program director at the conclusion of the training period for verification of successful completion of training
6. Three letters of recommendation from ABMG-certified diplomates are required; one of these letters must be from your program director, and
7. A logbook of 150 recent patients for whom genetic services were provided, with indication of the extent of the applicant's involvement. This log must be from an ABMG-accredited fellowship training program. The cases should provide evidence for a well-rounded experience in genetics with a diversity of genetic disorders and counseling issues. No more than 50% of the cases may be in any one disease. If your training does not end until June 30, 1996, the applicant must submit 100 cases at the time of application and the remainder by March 15, 1996.

Applicants for reexamination within one cycle must submit the following:
1. Completed application form including a photo identification form, and
2. The appropriate examination fee(s)

C. Clinical cytogeneticist: An individual with a doctoral degree (MD, PhD, DDS, etc.) who can demonstrate competence in providing cytogenetic laboratory diagnostic and clinical interpretive services. Competence in this area implies that the individual
1. Has diagnostic and interpretive skills in a wide range of cytogenetic problems
2. Has an appreciation of the heterogeneity, variability, and natural history of cytogenetic disorders
3. Is able to supervise the performance of cytogenetic laboratory studies for a wide range of applications with knowledge of their biological and statistical variability, and
4. Is able to appropriately communicate cytogenetic laboratory results in the capacity of consultant to other clinicians or directly to patients in concert with other appropriate clinicians or genetic counselors

First-time applicants seeking certification as clinical cytogeneticians must submit the following items in support of the application:
1. One acknowledgement card
2. Notarized application
3. Notarized identification form with a recent photograph
4. Copy of doctoral diploma in a relevant discipline
5. Verification of at least 2 years of postdoctoral experience in an ABMG-accredited cytogenetics training program
6. Three letters of recommendation from ABMG-certified diplomats; one must be from the director of the laboratory indicating that the applicant has had ongoing assessment during the training period and has had sufficient experience in specific techniques, management of cases, and as a consultant, to take the certification examination.

7. A logbook of 150 recent clinical cytogenetic cases indicating professional interaction with family, physicians, clinical geneticists, or PhD medical geneticists. (These cases should illustrate exposure to a wide variety of laboratory samples and include the reason why the study was performed and the karyotype report.) Cases should illustrate a wide variety of disorders and should provide evidence for a well-rounded experience in genetics with a diversity of exposure to cytogenetically based disorders and counseling issues. No more than 50% of the cases may be in any one issue type category. If your training does not end until June 30, 1996, the applicant must submit 100 cases at the time of application and the remainder by March 15, 1996.

8. Complete the Clinical Cytogenetics Competency List. This list must be signed by the laboratory director. Applicants for reexamination within one cycle must submit the following:
   1. Completed application form including a photo identification form
   2. List any additional relevant laboratory tests the applicant is competent to perform and interpret, and
   3. The appropriate examination fee(s)

D. Clinical biochemical geneticist: an individual with a doctoral degree (MD, PhD, DDS, etc) who is competent to perform and interpret biochemical analyses relevant to the diagnosis and management of human genetic diseases, and who can act as a consultant regarding laboratory diagnosis of a broad range of inherited disorders. Competence in this field implies that the individual:
   1. Can supervise the operations of a clinical biochemical genetics diagnostic laboratory
   2. Has a broad knowledge of
      a. basic biochemistry and biology
      b. the application of biochemical techniques to the diagnosis and management of genetic diseases, and
      c. the etiology, pathogenesis, clinical manifestations, and management of human inherited biochemical disorders, and
   3. Is able to appropriately communicate biochemical laboratory results in the capacity of consultant to other clinicians or directly to patients in concert with other appropriate clinicians or genetic counselors. First-time applicants seeking certification as clinical biochemical geneticists must submit the following in support of the application
      1. One acknowledgment card
      2. Notarized application
      3. Notarized identification form with a recent photograph
      4. Copy of doctoral diploma in a relevant discipline
      5. Verification of at least 2 years of postdoctoral training experience in an ABMG-accredited clinical biochemical genetics training program handling clinical material with a broad range of cases and techniques
      6. Three letters of recommendation from ABMG-certified diplomats; one must be from the director of the laboratory indicating that the applicant has had ongoing assessment during the training period and has had sufficient experience in specific techniques, management of cases, and as a consultant, to take the certification examination

7. A logbook of 150 recent clinical biochemical cases that demonstrate a broad range of genetic and laboratory disorders. These cases should also indicate contact with family, physicians, clinical geneticists, and/or PhD medical geneticists. Cases should illustrate a wide variety of disorders and should provide evidence for a well-rounded experience in clinical biochemical genetics with a diversity of genetic disorders, laboratory techniques and counseling issues. No more than 50% of the cases may be in any one category. If your training does not end until June 30, 1996, the applicant must submit 100 cases at the time of application and the remainder by March 15, 1996.

8. Complete the Clinical Biochemical Genetics Analyte and Method Competency list. This list must be signed by the laboratory director. Applicants for reexamination within one cycle must submit the following:
   1. Completed application form including a photo identification form
   2. Any additional laboratory tests the applicant is competent to perform, and
   3. The appropriate examination fee(s)

E. Clinical molecular geneticist: an individual with a doctoral degree (MD, PhD, DDS, etc) who is competent to perform and interpret molecular analyses relevant to the diagnosis and management of human genetic diseases, competent to direct or assist in the supervision and management of a molecular genetics diagnostic laboratory, and who can act as a consultant regarding laboratory diagnosis of a broad range of inherited disorders.

   Competence in this field implies that the individual:
   1. Can perform a variety of diagnostic assays
   2. Can supervise and direct the operations of a clinical molecular genetics diagnostic laboratory
   3. Has a broad knowledge of
      a. basic molecular biology and genetics
      b. the application of recombinant DNA techniques and linkage analysis to the diagnosis of genetic diseases, and
      c. the etiology, pathogenesis, clinical manifestations, and management of human genetic disorders, and
   4. Is able to appropriately interpret and communicate molecular diagnostic laboratory results in the capacity of consultant to other clinicians or directly to patients in concert with other clinicians or genetic counselors. First-time applicants seeking certification as clinical molecular geneticists must submit the following in support of the application
      1. One acknowledgment card
      2. Notarized application
      3. Notarized identification form with a recent photograph
      4. Copy of doctoral diploma in a relevant discipline
      5. Verification of satisfactory completion of at least 2 years in an ABMG-accredited molecular genetics training program. At least half of the training period should be spent in laboratory benchwork in molecular genetics and molecular diagnostics, handling clinical material with a broad range of cases and techniques
      6. Three letters of recommendation from ABMG-certified diplomats; one must be from the program director
      7. A logbook of 150 clinical molecular cases (a case is defined as a proband or a family study). The logbook should provide evidence for a diverse experience in molecular diagnosis with a variety of genetic disorders; use of different but appropriate techniques; and interpretation of results and contact with the referring physician counseling the patient. No more than 25% of the cases may be in any one disease category. If your
training does not end until June 30, 1996, the applicant must submit 100 cases at the time of application and the remainder by March 15, 1996, and
8. Complete the Clinical Molecular Genetics Competency List. This list must be signed by the laboratory director.
   Applicants for reexamination within one cycle must submit the following
   1. Completed application form including a photo identification form
   2. Any additional laboratory tests the applicant is competent to perform, and
   3. The appropriate examination fee(s)

Certificates
Candidates who pass the general examination and at least one specialty examination will become diplomates of the ABMG. This information becomes public information and diplomates will be listed in the Official American Board of Medical Specialties. Any certificate issued by the ABMG shall be subject to revocation at any time should the ABMG determine, in its sole judgment, that a candidate who has received a certificate was in some respect not properly qualified to receive or retain it.

Time-Limited Certification
Beginning in 1993, all certificates will be time-limited for a period of 15 years.

Applicants With Special Disabilities
The ABMG offers examinations in a place and manner accessible to persons with disabilities, or offers alternative accessible arrangements for such individuals. Candidates who need special accommodations during the examination for a physical disability should provide written details to the ABMG at the time of application for examination or soon after the disability takes place.

American Board of Neurological Surgery
Edward S Connolly, MD, Chairman, New Orleans, Louisiana
John A Jane, MD, Vice-Chairman, Charlottesville, Virginia
Edward R Laws, Jr, MD, Senior Director, Charlottesville, Virginia
Howard M Eisenberg, MD, Secretary-Treasurer, Baltimore, Maryland
Stewart B Dunsker, MD, Cincinnati, Ohio
Eugene S Flamm, MD, Philadelphia, Pennsylvania
Robert L Grubb, Jr, MD, St Louis, Missouri
M Peter Heilbrun, MD, Salt Lake City, Utah
Burton M Onozato, MD, Rochester, Minnesota
Donald O Quest, MD, New York, New York
Edward L Seljeskog, MD, Minneapolis, Minnesota
John C Van Gilder, MD, Iowa, Iowa
Robert H Wilkins, MD, Durham, North Carolina
Fremont P Wirth, MD, Savannah, Georgia
Mary Louise Sanderson, Administrator, Houston, Texas

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Neurological Surgery to ascertain whether the information below is current.)

Diplomates
A list of diplomates and bylaws of the American Board of Neurological Surgery appear in the Official American Board of Medical Specialties Directory of Board Certified Medical Specialists, which can be obtained from Marquis Who's Who, Inc (121 Chanlon Rd, New Providence, NJ 07974). In addition, a list of new diplomates is published in the Journal of Neurosurgery shortly after each examination.

Information regarding training programs acceptable for certification can be found in the Graduate Medical Education Directory. This directory can be purchased from the American Medical Association (515 N State St, Chicago, IL 60610).

Qualifications
The American Board of Neurological Surgery evaluates all qualified applicants for their proficiency in neurosurgery.

The minimum educational requirements of the Board should not be interpreted as restricting programs to these standards. If necessary, neurosurgical program directors may retain residents in their programs beyond the required 5 years of residency training in order to ensure satisfactory competence in neurosurgery.

It is the responsibility of the candidate to seek information concerning current requirements for certification by the American Board of Neurological Surgery. Even though directors of approved neurosurgical residency programs are well informed regarding requirements for certification, placement in an approved program does not guarantee adequate training for certification. The candidate must make sure he/she receives such training.

Training Prior to Neurosurgery Residency
1. Graduation from a medical school that is acceptable to the Board.
2. Currently valid license to practice medicine in the state, province, or country of residence.
3. Twelve months devoted to acquiring adequate knowledge of fundamental clinical skills. This is known as postgraduate year one (PGY-1), general surgery year one, or internship, recommended for completion prior to beginning neurosurgical training, but must be completed prior to beginning the third year of that training. This may be achieved by a. one year of training in an approved general surgery program in the United States or Canada, or b. one year of training in an accredited neurosurgical residency program to include not less than 6 months in surgical disciplines other than neurosurgery; the remaining 6 months should include training in fundamental clinical skills considered appropriate by the program director, but may not include more than 6 weeks of neurosurgery; or c. holding a certificate from the American Board of Surgery or a fellowship (in surgery, not neurosurgery) of the Royal College of Surgeons of England, Edinburgh, Canada, Ireland, Australia, or Glasgow.

Neurological Surgery Training Requirements
For residents beginning the neurological portion of their training on or after July 1, 1979
1. Completion of 5 years of training following PGY-1. Neurosurgery training must occur in residency programs accredited by the RRC for Neurosurgery or its Canadian equivalent.
2. The 60 months of training must include at least 36 months of clinical neurosurgery in accredited programs; 12 months of this period must be served as a senior resident.
3. The training in clinical neurosurgery must be progressive and not obtained during repeated short intervals in a number of institutions. At least 24 months of training in clinical neurosurgery must be obtained in one institution.
4. At least 3 months must be devoted to training in clinical neurology. Six months is recommended. This training may be undertaken during PGY-1.
5. The unobligated 21 months may be devoted to neuropathology, neuroradiology, basic neurosciences, research, or other disciplines related to neurological surgery.

6. Exchange of residents between approved neurosurgical training centers in the United States and Canada may be arranged by the respective training program directors with the consent of the Board. In such instances, the Secretary of the Board must be notified of the rotation before the exchange begins. Such an exchange should in no way compromise any other training requirement. Training in any institution other than in the parent institution and its affiliated hospitals will not be considered as counting toward the requirements unless specified in advance by the program director and approved by the Board.

7. The program director must notify the Board of the appointment of each new neurosurgical resident and whether they are entering the program with intent to obtain certification and, if so, whether the director has informed the trainee of the requirements necessary to obtain such certification.

8. Residents in training after June 30, 1983, are required to record, in a fashion determined by the Board, their operative procedures.

9. Prior to acceptance for the certification process, the Board requires a statement from the candidate's program director to the effect that the candidate has met the minimum time requirements, has performed in training in a satisfactory manner and, in the judgment of the program director, is well prepared to enter into the independent practice of neurosurgery.

**Exceptional Modifying Circumstances**

Upon recommendation of the program director and ratification by the Board, credit may be given for previous training if a candidate:

1. Before entering an approved neurosurgical training program, has had substantially more than the prerequisite training in general surgery, medical neurology, or the basic neurological sciences; such credit must be approved by the Board.

2. Transfers from one approved neurosurgical training program to another approved program
   a. with the consent of the directors of both programs, or
   b. without the consent of one of the program directors, but with the approval of the Board.

In the above cases, the director of the program from which the candidate transfers must indicate in writing to the new program director the credit for training, both in time and category, which he/she is prepared to certify that the candidate has successfully completed. A copy of such statement must be submitted to the Secretary of the Board. The new program director may or may not honor such credit, depending upon appraisal of the resident's professional and educational progress in the new program. A statement of how much training credit will be accepted must also be submitted to the Secretary of the Board.

Requests for training away from a parent institution or for transfer from one program to another should be submitted in writing to the Board prospectively, not retroactively.

Training by preceptorship is not considered as fulfilling certification requirements. No credit is given for time spent in such training.

Credit for elective training in foreign or other nonapproved centers may be granted by the Board on an individual basis when this training is carried out as an integral part of the training program and with the advice and approval of the candidate's program director. The Board must be informed of such a rotation prior to its occurrence.

The above provisions in no way alter the basic minimum requirement of 60 months of residency training in neurosurgery, including a minimum of 3 months of training in clinical neurology and 36 months of clinical neurosurgery in accredited institutions, 12 months of which must be as senior resident and 24 months in one institution.

**Primary Examination**

Each applicant for the Board's oral examination must first pass for credit the primary examination, which is a written exam prepared by the Board with the assistance of a professional testing organization. The examination includes information on neuroanatomy, neurobiology, neurochemistry, neurology, neuropathology, neuropharmacology, neurophysiology, neuroradiology, neurosurgery, fundamental clinical skills, and material from other relevant disciplines deemed suitable and important by the Board.

The primary examination is given in March each year at training programs throughout the United States and Canada.

Residents in accredited training programs may take it for self-assessment or credit at the discretion of their program directors and diplomas may take the examination as often as desired for either credit toward certification or self-assessment. It is open for all neurosurgeons who have successfully completed training at accredited programs.

An application must be filed to take the primary examination. The deadline for receipt of this application by the Board is the first of January. The form must be accompanied by the fee set by the Board. This fee will be refunded only if the candidate informs the secretary's office that he/she is not going to sit for the examination prior to the deadline date for receipt of applications.

Examinees are required to sign a pledge that states that they agree to be bound by the Board's ruling regarding credentials irrespective of scores on the examination. By signing the pledge, candidates also grant permission to the American Board of Neurological Surgery and its testing organization to release the results, either for credit or self-assessment, to the examinee's program director.

Candidates should keep in mind that they must be scheduled for oral examination by the Board within 5 years of passing the primary examination for credit or completing a formal training program, whichever occurs later. Compliance with this regulation requires early submission of applications for oral examination and certification after training. If a candidate cannot be scheduled within the 5-year limit due to late submission of an application, he/she must once again pass the primary examination for credit before being scheduled for oral examination within the succeeding 3-year period. Candidates should also keep in mind that usually 18 months are required between submission of an application and oral examination.

**Practice Requirements**

After beginning practice, the candidate shall furnish to the Board the names of three physicians (two neurosurgeons, including one ABNS diplomate) who are knowledgeable about the quality of the candidate's practice. The Board will request reference letters from these physicians and other physicians in the community. It is the prerogative of the Board to send representatives to review the candidate's practice.

In addition, the candidate will submit the names and addresses of either the medical director or chief of staff at each hospital where the candidate has privileges. Letters will be requested to advise the Board of the candidate's status regarding admitting and operating privileges in each hospital where he/she practices. Prior to oral examination, each candidate must be in possession of hospital staff privileges in all hospitals in which he/she cares for patients. Such privileges must be unrestricted in respect to the hospital's requirements for a neurosurgeon.

The candidates must also forward to the Board a typewritten, chronological list of all inpatients for whom he/she has been the responsible physician or surgeon for a current 12 consecutive month
period. No minimum volume of operative procedures is required. The total experience must be tabulated by the candidate in a format defined by the Board. The case material must be accompanied by a summary form signed by the chief of staff, chief of service, president of the medical staff, or hospital administrator of the hospitals where the candidate practices indicating the essential accuracy of the data. These data must be approved by the Board prior to scheduling for oral examination.

Candidates are responsible for retaining duplicate copies of these records.

Certification of Those Training in Canadian Programs

Those satisfactorily completing approved Canadian training programs and holding a fellowship in neurosurgery from the Royal College of Surgeons (Canada) are eligible for certification through the same route as candidates training in the United States, outlined above.

Applications

Applications for oral examination and certification are automatically sent to residents in June of their last year of training. Additional applications and practice data forms are available from the Board’s Office. The application and accompanying information should be filled out and returned to the Board as soon as possible after beginning practice so that inquiries may be made from references and others in the community, the individual’s training program faculty, and hospitals where the candidate practices.

A pledge is part of the application for oral examination. By signing the application, the applicant agrees to abide by all the terms and conditions of this pledge.

Upon receipt of an application, the Board takes such steps as deemed appropriate to verify the statements of facts made in the application. Inquiries are made from references and others familiar with the candidate to obtain information relevant to the requirements for examination.

The Board makes the final decision regarding a candidate’s eligibility for oral examination and potential certification after considering all available information pertaining to the entire process of certification.

Application fees, once received, will not be refunded.

Oral Examination

The oral examination, a clinical problem-solving and patient-management exam, is given twice a year. Candidates are given case histories and, where appropriate, x-rays, scans, and other visual aids to augment the presentation and development of cases. The candidate must be able to explain verbally how he/she would proceed in evaluating and/or managing the case, and planning and performing the proposed operation or operations, if indicated. One hour is devoted to neurological surgery—intracranial disease; one hour to neurological surgery—spinal and peripheral nerve disease; and one hour to a mixture. Neurosurgical neurology is included in all sections. Each of the three hours is conducted in an interview setting with two examiners.

A candidate who passes the oral examination will be forwarded the Board’s certificate, once it has been suitably engrossed and signed by the officers of the Board.

Reexamination Rules

A candidate falling the oral examination once may request reexamination within 3 years. A minimum of 1 year must elapse before taking the examination for the second time. The examination fee must be paid.

A candidate who has failed the oral examination on two or more occasions must pass the primary examination for credit again before becoming eligible to retake the oral exam. Two letters of reference certifying the nature and quality of the candidate’s practice must be submitted to the Board, as well as hospital privilege letters and a year of new practice data. In addition, the candidate must pay the oral examination fee. Under these circumstances, candidates must take the oral exam within 3 years of repassing the primary examination. Should the candidate not apply for or fail to appear for oral examination within the three-year period, the candidate must repass the primary examination before being eligible for oral exam once again.

Payment of Fees

Fees for filing an application and for oral examination will be determined by the Board. They reflect costs that the Board incurs through obligations associated with the certification process. The application fee will not be returned even though the application for examination is denied.

Revocation of Certification

Pursuant to the rules and regulations established by the American Board of Neurological Surgery, the Board has the authority to revoke any certificate issued by it for various reasons, including the person to whom the certificate was issued is convicted of a felony, or his/her license to practice medicine has been lost or encumbered. Should revocation be disputed, there is a hearing mechanism for such an action.

American Board of Nuclear Medicine

James W Fletcher, MD, Chairman, St Louis, Missouri
Peter T Kirchner, MD, Vice Chairman, Iowa City, Iowa
James M Woolfenden, MD, Secretary, Tucson, Arizona
Robert A Kraft, MD, Treasurer, Burlingame, California
Philip O Alderson, MD, New York, New York
R Edward Coleman, MD, Durham, North Carolina
James J Conway, MD, Chicago, Illinois
Stanley J Goldsmith, MD, New York, New York
Edward R Powser, MD, Detroit, Michigan
Henry D Royal, MD, St Louis, Missouri
Heinrich R Schelbert, MD, Los Angeles, California
Richard L Wahl, MD, Ann Arbor, Michigan
Joseph F Ross, MD, President, Los Angeles, California
William H Blahd, Vice President, Los Angeles, California

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Nuclear Medicine to ascertain whether the information below is current.)

Requirements for Certification

General Requirements for Each Candidate

Assurance that the applicant represents himself/herself to be a specialist in nuclear medicine.

General Professional Education

Graduation from a medical school approved by the Liaison Committee on Medical Education or from a school of osteopathy. If the applicant is a graduate of a medical school outside the United States or Canada, he/she must hold a currently valid ECFMG certificate issued by the Educational Commission for Foreign Medical Graduates.
Preparatory Postdoctoral Training
Training required for admission to the certifying examination in nuclear medicine shall comprise 1 or more years of preparatory postdoctoral training and 2 or more years of residency training in nuclear medicine.

Preparatory postdoctoral training shall consist of 1 or more years of residency training in programs satisfactory to the American Board of Nuclear Medicine (ABNM). Such programs shall provide broad experience in clinical medicine in which the primary emphasis is on the patient and his clinical problems. Preparatory training may be in any specialty in a residency program in the United States approved by the Accreditation Council for Graduate Medical Education (ACGME), or programs in Canada approved by the Royal College of Physicians and Surgeons of Canada (RCPSC), or the Professional Corporation of Physicians of Quebec (RCPQ).

One year of preparatory postdoctoral training must precede training in nuclear medicine.

Each nuclear medicine residency training program director must ensure that for each resident entering his or her program the preparatory postdoctoral training has been in a United States program approved by the ACGME, or in a Canadian program approved by the RCPSC or the PCPQ.

Special Postdoctoral Training in Nuclear Medicine
1. After completion of the preparatory postdoctoral training programs, there shall be satisfactory completion of a 2-year formal residency training program in nuclear medicine in a nuclear medicine residency training program recognized and approved by the Residency Review Committee for Nuclear Medicine and the ACGME or a Canadian program approved by the RCPSC or the PCPQ as competent to provide a satisfactory training in nuclear medicine.

2. The 2-year formal residency training program in nuclear medicine must include:
   a. A minimum of 18 months of training in clinical nuclear medicine, which will include, but not be limited to, radiopharmaceutical imaging in vitro and in vivo measurements, nuclear imaging, positron emission tomography, nuclear magnetic resonance imaging, therapy with unsealed radionuclides, medical management of individuals exposed to ionizing radiation, the safe management and disposal of radioactive substances, and the direction of radiation safety programs.
   b. Six months of training in allied sciences, which must include medical nuclear physics, radiation biology, radiation protection, instrumentation, radiopharmaceutical chemistry, statistics, and computer sciences; and may also include pathology, physiology, and other basic sciences associated with nuclear medicine. The time spent in training in allied science may be spaced throughout the period of training in nuclear medicine and in a manner that does not exceed 6 complete months of training.
   c. For candidates who have completed residency training programs in clinical disciplines closely related to nuclear medicine in residency programs approved by the ACGME, the RCPSC, or the PCPQ, credit may be given for some of that training. Candidates desiring credit toward the nuclear medicine requirement should write to the Board requesting such credit.
   d. The Board considers demonstration of clinical competence in the management of the nuclear medicine patient of paramount importance in its qualification of the applicant to take the certifying examination. The Board designates the directors of nuclear medicine residency programs and their supporting evaluation committees as the authorities who most appropriately can provide to the Board the necessary documentation of competence in clinical nuclear medicine, and requires that all program directors certify to the Board that each applicant from their programs is competent in clinical nuclear medicine. These reports will be reviewed by the Board before accepting an applicant to take the certifying examination.

If a residency program director's evaluation indicates a candidate's competence in clinical nuclear medicine is unsatisfactory, the applicant will not be admitted to the examination unless the Board finds that the applicant's overall performance meets its standards. An applicant not admitted to an examination on the basis of these findings may appeal in writing to the Board for a special evaluation of competence in clinical nuclear medicine within 45 days of receipt of notification. The appeal should state that a request is made for review of the decision not to admit to the examination and why the candidate considers the decision to be in error. Applicants whose clinical competence is judged satisfactory in this evaluation will be admitted to the next examination for which they apply. Candidates judged not satisfactory in this evaluation are advised to spend an additional year training before applying again for special evaluation of competence.

Applicants submitting false credentials are subject to disqualification from examination or revocation of certification.

Patient Care Responsibility
Candidates for certification in nuclear medicine will have the equivalent of at least 2 years' training in which the primary emphasis is on the patient and his clinical problems. This minimum period may be spaced throughout the entire postdoctoral training but should be of sufficient duration for the trainee to become knowledgeable in the aspects of clinical medicine relevant to nuclear medicine, including patient care.

Canadian Training
Physicians who satisfactorily complete training in Canadian nuclear medicine programs approved by the RCPSC or the PCPQ are eligible for admission to the ABNM certifying examinations.

Completion of Training
All preliminary and nuclear medicine residency training must be completed prior to September 1 of the year the candidate takes the certifying examination.

Approved Residency Training Programs
Residency training programs in nuclear medicine accredited by the ACGME may be found in the Graduate Medical Education Directory published annually by the American Medical Association, or may be obtained by contacting: Secretary, Residency Review Committee for Nuclear Medicine, ACGME, 515 N State St / Ste 2000, Chicago, IL 60610.

Examination
An objective type examination is administered in a morning and an afternoon session. The examination evaluates the candidate's knowledge and competence in the management of patients in the area of clinical nuclear medicine, including, but not limited to, radionuclide imaging, in vitro and in vivo measurements, nuclear imaging, the principles of nuclear magnetic resonance imaging, therapy with unsealed radionuclides, the medical effects of exposure to ionizing radiation, the medical management of persons exposed to ionizing radiation, radiation safety, and the safe management and disposal of radioactive substances. Also included is an evaluation of the candidate's knowledge in the related sciences of medical nuclear physics, radiation biology, radiation protection, instrumenta-
tion, radiopharmaceutical chemistry, computer sciences, and statistics; it may also include pathology, physiology, and other basic sciences associated with nuclear medicine.

Applications
Applicants who wish to be examined by the Board must complete, sign and file with the Board Office an application on the official form together with the supporting data required by the application. The applicant must enclose a check to cover the examination fee and a self-addressed postcard, which will be returned to the applicant when all application materials have been received by the ABNM. It is the responsibility of the applicant to make certain that the required evaluation forms have been completed by his/her program director, and sent to and received by the ABNM.

As soon as determination is made concerning admission or non-admission to the examination, the candidate will be notified by mail, and if admitted, assignment of the candidate number and notification of the examination site will be given. Before the final action on applications, officers, members, and employees of the Board are not authorized to estimate the eligibility of applicants. Applicants are requested not to discuss or write for opinions regarding the status of their application. The Board decides on eligibility to take the examination only by approving or disapproving individual applications, and accordingly has no "Board-eligible" category.

Inquiries concerning the applicability of previous training and experience should be sent with complete documentation of all education and training to the Board Office. A copy of the Board’s response to these inquiries should be forwarded with any subsequent examination application.

Release of Information
Candidates will receive the results of their examinations (pass/fail letter) approximately 4 months after the examination.

A list of diplomates of the ABNM will be found in the Official American Board of Medical Specialties Directory of Board Certified Medical Specialists, published by the American Board of Medical Specialties and Marquis Who’s Who.

Upon request and with the approval of the Board Chairman, the Board releases information on diplomates to federal and state licensing bodies and to educational and professional organizations for specific, limited, and appropriate professional use. An authorization for release of this information is a part of the examination application form.

Policy on Reexamination
Applicants who fail the examination are eligible for reexamination. An examination fee must accompany each completed application for reexamination. If an applicant is disqualified from the examination by reason of dishonesty in the application or in taking the examination and his/her examination is invalidated by the Board, reexamination shall be at the Board’s discretion.

Recertification
The ABNM offers its diplomates voluntary recertification based upon fulfillment of certain requirements including passing an objective cognitive examination. The ABNM will not rescind initial certification granted prior to 1992. Beginning in 1992 certification will be valid for a period of 10 years and may be revalidated by recertification.

Journals Publishing Information on Application and Examination Schedules
Annals of Internal Medicine (Medical News Section)

Changes in Policies and Procedures
The Board reserves the right to make changes in its fees, policies, and procedures at any time, and cannot assume responsibility for giving advance notice thereof. The provisions of this publication are not to be construed as a contract between any candidate and the ABNM.

Fees
The examination fee must accompany the application. If the applicant is rejected by the Board or withdraws prior to August 1, the application processing fee will be retained by the Board. If the applicant withdraws after August 1, the entire examination fee will be retained by the Board.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Obstetrics and Gynecology for the most current information.)
Certification Requirements

Obstetrics and Gynecology to ascertain whether the information below is current.

Types of Board Status

Residency Graduate
An individual for certification is registered with the Board when, upon application, the Board rules that he/she has fulfilled the requirements to take the written examination (see "Requirements" for the written examination).

Active Candidate
1. An individual may achieve active candidate status by passing the written examination.
2. To maintain active candidate status, the candidate must not have exceeded the limitations to admissibility for the oral examination (see "Limitations").
3. Active candidate status that has expired may be regained by repeating and passing the Board's examination.

Diplomate
1. An individual becomes a diplomate of the Board when he/she has fulfilled all requirements, has satisfactorily completed the written and the oral examinations, and has been awarded the Board's certifying diploma.
2. Certificates have limited duration of validity. Certificates will bear a limiting date of 10 years, after which they are no longer valid. Each diplomate must be evaluated again to receive a new certificate.

Certification Process
Certification as a specialist in obstetrics and gynecology is the end of a process lasting many years. The required minimum duration of graduate education is 4 years.

During the final year of graduate training, it is necessary to initiate certain measures. Because most graduate training programs begin on July 1 and end on June 30, the following summary of the certification process is based on these dates. However, applicants who complete residency training at unusual times will have an extended time in the certification process.

Between September 1 and November 30 of the final year of residency, the candidate should request and complete the application for the written examination. If he/she is ruled admissible to take the examination, he/she will do so in June of the final year of residency.

If he/she passes the written examination, the candidate enters a 2-year period of practice in the specialty. The candidate is required to provide a list of patients under his/her care for a 12-month period beginning on July 1 of his/her second year of practice. Between January 1 and February 28 of his/her second year of practice, the candidate should request and complete the application for the oral examination.

The candidate may enter a 2-year Board-approved postresidency fellowship. Upon completion, this candidate will then enter a 1-year period of practice in the specialty. This candidate is required to provide a list of patients under his/her care during this year of practice (January 1 to December 31). Between January 1 and April 30 of this year of practice, the candidate should request and complete the application for the oral examination.

The candidate's list of patients must be mailed to the Board office between January 1 and February 1, following the completion of the 12-month period of patient care. If ruled admissible, the candidate thus takes the oral examination in March or April.

Important Dates in the Certification Process

A. Final Year of Residency
   July 1—Commence
   September 1 to November 30—Apply for written examination
   June—Take written examination

B. Practice
   1. First year of practice
      No Board activities necessary
   2. Second year of practice
      July 1 to June 30—Patient list
      January 1 to February 28—Apply for oral examination
   3. Third year of practice
      August 15—Deadline for submission of patient list
      November—Take oral examination

C. Fellowship in Subspecialty
   1. First year (fellowship)
      No Board activities
   2. Second year (fellowship)
      No basic Board activities
      (September 1 to November 30—Apply for subspecialty written examination)
   3. Third year—First year of practice
      January 1 to February 28—Apply for the oral examination
      January 1 to December 31—Patient list
   4. Fourth year—Second year of practice
      February 1—Deadline for submission of patient list
      March or April—Take oral examination

Responsibility of a Candidate
It is the responsibility of the candidate to seek information concerning the current requirements for certification as an obstetrician and gynecologist. The Board does not assume responsibility for notifying a candidate of changing requirements or the impending loss of his/her admissibility to an examination.

Written Examination
The written examination is a 3½-hour examination consisting of questions of the objective (multiple choice) type. Questions will be chosen from each of the following areas of knowledge
1. Anatomy, embryology, and genetics
2. Physiology
3. Endocrinology, fertility, and infertility
4. Gynecology
5. Obstetrics
6. Medicine, surgery, and psychosomatic problems
7. Pathology
8. Oecology

The candidate will be expected to demonstrate skills necessary to apply basic knowledge to the management of clinical problems. These skills include
1. Obtaining needed information
2. Interpretation and use of data obtained
3. Selecting, instituting, and implementing care
4. Management of complications
5. Following and continuing care

The areas of information and skills examined for are further outlined in Educational Objectives for Resident Education in Obstetrics and Gynecology published by the Council on Resident Education in Obstetrics and Gynecology.

Requirements
1. Degree of doctor of medicine, or an equivalent degree, and unrestricted license (an educational or institutional license will suf-
American Board of Obstetrics and Gynecology

The requirement of unrestricted license must have been met prior to the time that the application is submitted. An educational or institutional license is not satisfactory. Candidates with a DO degree must have graduated from a school of osteopathy accredited by the American Osteopathic Association.

2. The candidate will be required to have completed or be near completion (see Application) of no less than 4 years in clinical programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) or the Council of the Royal College of Physicians and Surgeons of Canada. This must include at least 26 months of obstetrics and gynecology, including the usual time as chief (senior) resident in the program. Completion of a year of "PG 1" plus a 3-year residency program, or a 4-year residency program will fulfill this requirement, but if the program consists of more than 4 years, the entire program must be completed.

Time spent in an osteopathic hospital or in any program not accredited by the ACGME will not fulfill this requirement.

3. A statement signed by the program director certifying that the candidate has
   A. followed satisfactorily the course of instruction designed for this program
   B. taken leaves of absence and vacation not exceeding 6 weeks in any year
   C. completed and submitted to the program director a satisfactory resident experience log
   D. achieved the appropriate knowledge, ability, and judgment in order to provide competent clinical care in obstetrics and gynecology, as documented by ongoing evaluation during the entire resident program, and
   E. demonstrated the necessary technical skills to competently perform
   1. major abdominal and vaginal surgical procedures upon the female pelvis and related structures
   2. spontaneous and operative obstetric deliveries
   3. surgical exploration of the abdomen
   4. endoscopic procedures in the pelvis of proven value
   5. diagnostic evaluation including electronic monitoring, ultrasound, colposcopy, and amniocentesis
   6. diagnosis and treatment of complications of the above, and
   7. demonstrated good moral and ethical character.

Application for Examination in 1995

A candidate who has completed an accredited residency program and a candidate scheduled to complete an accredited residency program on or before August 31, 1996, may apply on or before November 30, 1994, to write the examination on June 26, 1995.

The requirement of unrestricted license must have been met prior to the time that the application is submitted. An educational or institutional license is not satisfactory.

The form on which to apply to write the examination on June 26, 1995, may be obtained by writing to the Board office after September 1, 1994. Each applicant must meet the requirements effective in the year he/she requests admission to the examination. As a part of the application form, endorsement, and verification of the resident's experience, competence, satisfactory performance, and confirmation of the scheduled date for completion of the candidate's residency are requested of the director of the obstetric and gynecologic residency program.

The Board will make the final decision concerning the applicant's admission to the examination after considering all circumstances affecting his/her situation.

A candidate's application to write the examination on June 26, 1995, completed in all details, together with payment of the application fee of $200, must be received in the Board office postmarked on or before November 30, 1994. A copy of the candidate's current license registration also is required.

The requirement of unrestricted license must have been met prior to the time that the application is submitted. An educational or institutional license is not satisfactory.

When the candidate is ruled admissible to the examination he/she will be notified in April (1) that the $300 examination fee is payable and (2) the date the fee must be paid (see "Fees"), if the candidate is to be scheduled to write the examination in June.

If a candidate is found to be involved in litigation or investigation regarding ethical or moral issues, he/she will not be scheduled for examination and the application will be reexamined. Typically, the Credentials Committee will defer such a decision for 1 year to gain further information.

Falsification of data (including case lists) or evidence of other egregious ethical, moral, or professional misbehavior may result in a deferral of consideration of a candidate's application for at least 3 years, and the candidate must meet all eligibility requirements in effect at the end of the deferred period.

When the Credentials Committee rules an applicant not admissible to the written examination, a new application and fee may be submitted at a later date, but the candidate must then have fulfilled the requirements effective in the year of the new application.

Admission to the Written Examination

The candidate ruled admissible to the examination will be sent an authorization for admission form, which must be presented to the proctor at the time and place of examination. When a candidate is scheduled to complete his/her residency program after submission of the application (but before September of that year), verification of the currently satisfactory manner in which the candidate is completing his/her residency must be confirmed by the signature of the director of the residency program on the authorization for admission form, dated within the month the candidate is scheduled to write the examination.

Results of the Examination

The results of the examination written in late June will usually be reported to each candidate in approximately 9 weeks.

A passing grade on the written examination does not establish a candidate's admissibility to the oral examination for certification. (See "Oral Examination and Requirements.")

Requests for Reexamination

A candidate previously scheduled to write the examination who fails to do so, as well as the candidate who writes but fails to pass a previous examination, must write the Board office after September 1, 1994, to request reapplication materials for the 1995 examination. It is necessary for each applicant to meet the requirements effective in the year he/she requests admission to the examination.

The reapplicant must have submitted completed reapplication materials, a copy of current license registration and the reapplication fee of $200, prior to the November 30, 1994, deadline.

The application fee and examination fee (see "Fees") must be paid each year a candidate is to be scheduled to write the examination.

Oral Examination

All correspondence, applications and information directed to the Board must be in English.

All fees must be paid in United States currency.
The oral examination is designed to evaluate the candidate’s knowledge and skills in solving clinical problems in obstetrics and gynecology, and to evaluate actual behavior in independent practice. It is emphasized that candidates will be examined in all areas of obstetrics and gynecology. More than half of the examination will consist of questions concerning patient management problems. The candidate’s list of patients will be used freely by the examiners for this purpose, but additional basic clinical problems will be included. The remainder of the examination will include recall of basic knowledge in obstetrics and gynecology and interpretation of gross and microscopic pathology, X-ray films, sonograms, and related material from photographic slides.

Microscopes and slide projectors will be used. The knowledge and skills required for the oral examination are the same as those listed in regard to the written examination.

Recording devices will not be permitted during the oral examination.

Candidates will be expected to demonstrate that they have acquired the capability to perform, independently, major gynecologic operations, spontaneous and operative obstetric deliveries, to manage the complications thereof, and to perform the essential diagnostic procedures required of a consultant in obstetrics and gynecology.

Candidates will be expected to demonstrate a level of competence that allows them to serve as consultants to physicians who are not obstetrician-gynecologists in their community.

The report of the examining team will be reviewed by the Board of Directors and each candidate is passed or failed by vote of the Board.

You can expect the examination to be completed within a half day.

At the completion of the oral examination, if a candidate believes his examination has not been conducted in a fair and unbiased manner, the candidate may report within the hour to the Board office staff and ask for a second examination. The request must be made written within a 1 hour. If the appeal is granted:

1. A second examination will be provided at the next regularly scheduled annual oral examination at no additional charge.
2. The repeat examination will be conducted by an entirely different team of examiners, no one of whom shall have previously participated in an examination of the candidate.
3. Neither the questions nor the candidate’s answers on the first examination will be known to or taken into account by the second group of examiners, and
4. The decision of the examiners conducting the second examination shall determine the results of the candidate’s oral examination.

**Requirements**

1. Passing grade on the written examination.
2. Good moral and ethical character.
3. Unrestricted license to practice medicine in one of the States or territories of the United States or a province of Canada, since at least February 28, 1944.
4. Actively engaged in (private or nonprivate) unsupervised practice.
   a. Independent unsupervised patient care limited to obstetrics and gynecology
      1. for at least the time from February 18, 1994, through June 30, 1994 (time spent in a critical care fellowship does not meet this requirement), or
      2. for at least the time from July 1, 1994, through June 30, 1995, for candidates who have successfully completed a Board-approved fellowship (this includes critical care fellowship only if taken in continuity with a Board-approved specialty fellowship).
   b. Unrestricted hospital privileges to practice as an obstetrician-gynecologist since at least July 1, 1994. Such privileges must be granted in each of the hospitals in which the candidate has been responsible for patient care during this time. If the candidate is under investigation or on probation, the examination will be deferred until the investigation is completed, the probation is lifted, and full and unrestricted privileges are granted.
5. Submission of typewritten lists (two copies) on or before August 15 preceding the examination, of all patients dismissed from care in all hospitals during the 12 months ending June 30 prior to the scheduled examination, and a list of 40 patients from office practice.

   The candidate is personally responsible for the proper preparation, accuracy, and completeness of the case lists, which will reflect the unsupervised practice (private or nonprivate) activity following residency and fellowship.

6. On the day of the examination, the candidate will be expected to sign the following statement: "There have been no restrictions in my hospital privileges since the date of my application. Candidates who are unable to sign this statement will not be admitted to the examination until and unless they present evidence that full and unrestricted privileges have been restored.

7. Practice that consists of ambulatory care exclusively will not be considered adequate to fulfill these requirements.

   Additional requirements for candidates practicing in a country other than the United States or Canada.

8. Submission with the application of a letter(s) from a senior responsible officer in the hospital(s) where the candidate practices, verifying the candidate’s responsibility for independent, unsupervised care of obstetric and gynecologic patients.

**Limitations**

Duration of active candidate status is limited. Candidates must pass the oral examination within 6 years following passing the written examination and may take the oral examination only three times. If they fail the oral examination three times, or fail to pass the oral examination within 6 years, they become ineligible to repeat the examination at that time. They must repeat and pass the written examination to become admissible to the oral examination again.

**Determination of Qualifications**

The Board will require, by confidential inquiry, documented evidence concerning a candidate’s professional reputation, moral and ethical character, and in-hospital practice privileges from administrative officials of organizations and institutions to whom the candidate and his/her conduct of practice is known.

Time as a “resident” or “house officer” in excess of that necessary to fulfill the requirements to take the written examination, or time in a “student” or a teaching or research appointment that does not involve appointment to the staff of an approved hospital with unrestricted privileges to practice as an obstetrician and gynecologist, will not be acceptable evidence of a degree of responsibility for patient care that is acceptable fulfillment of the required “independent practice.”

Each candidate will be required to furnish the Board with certain prescribed information concerning his/her performance in practice (maternal mortality rate, perinatal mortality rate, cesarean section rate, etc.).

If a candidate is found to be involved in litigation or investigation regarding ethical or moral issues, he/she will not be scheduled for examination and the application will be reexamined. Typically, the Credentials Committee will defer such a decision for 1 year to gain further information.
Falsification of data (including case lists) or evidence of other egregious ethical, moral, or professional misbehavior may result in deferment of consideration of a candidate's application for at least 3 years and the candidate must meet all requirements in effect at the end of the deferred period.

Patient lists (a) not providing the information requested; (b) not prepared in accordance with the format requested; or (c) that do not have sufficient numbers of patients, or do not include sufficient breadth and depth of clinical problems, may disqualify the candidate for admission to the oral examination.

Application for Examination in 1995

Application to take the oral examination in November 1995 must be made on the "application for the 1995 examination" form. The application, complete in all details, with payment of the application fee of $350, must be received in the Board office during January or February 1995. The deadline for receipt of applications in the Board office is a postmark of February 28, 1995. Requests for the appropriate form must be made in writing.

The Board will make the final decision concerning the applicant's admission to the oral examination after considering all circumstances affecting his/her situation.

A candidate ruled admissible to the oral examination in November 1995 will be so notified on or before July 15, 1995. He/she must then submit, on or before August 15, 1995:

1. Duplicate, typewritten, and verified lists of all patients dismissed from his/her care in all hospitals during the 12 months preceding June 30, 1995, and a list of 40 patients from his/her office practice.

   The candidate's lists of patients will be used as a basis for questions during the oral examination and will not be returned to the candidate, and

2. Payment of the examination fee by personal check or money order of $450 (in US funds).

Patient Lists for the Oral Examination

Each candidate for the oral examination must prepare the following patient lists for review by his/her examiners at the time of examination. The candidate's list of patients will be freely used as a basis for questions that will be patient-management oriented. Questions will be developed that test the ability of the candidate to

1. Develop a diagnosis. This includes the necessary clinical, laboratory, and diagnostic procedures
2. Select and apply proper treatment under elective and emergency conditions
3. Manage complications. This includes prevention, recognition and treatment, and
4. Plan and direct follow-up and continuing care

Carelessly prepared or incomplete case lists may contribute to failure to pass the oral examination.

The candidate should bring a duplicate patient list to the oral examination for personal reference. Do not include any information on this duplicate list that did not appear on the case lists sent to the Board office.

The case lists must have sufficient numbers and sufficient breadth and depth of clinical difficulty. They must include 40 office practice patients and a minimum of 50 patients with significant problems. The clinical problems will vary according to the nature of the candidates' practices. However, the problems must be of sufficient variety and severity to permit the evaluation of a candidate's ability to function as a consultant. Ordinarily, these lists will include patients having obstetric management and a variety of major abdominal and vaginal surgical procedures. Candidates who have successfully completed a Board-approved fellowship, and who are active candidates for certification of special qualification, may submit cases in a single specialty within obstetrics and gynecology, if they represent the breadth and depth of that specialty.

The candidate's list must include 40 office practice patients and all hospitalized patients discharged or transferred from the candidate's care during the 12 months ending June 30 of the current year, and must be mailed to the Board office on or before August 15 preceding the November examinations.

The patients listed must be only those for whom the candidate has had personal responsibility for professional management and care. Recording such professional responsibility implies that the candidate has personally controlled the medical and/or surgical management of each patient listed. In the case of partnership or group practice, the patients listed should be only those managed by the candidate.

A patient list should be accurately typed across unbound sheets of white paper 8 1/2 x 11 inches in size. Separate lists are required for each hospital. The headings must conform in all details and provide the information indicated by the format of the forms enclosed with the oral application. Two copies of the complete list must be submitted.

Standard nomenclature should be used. Abbreviations are not acceptable. Only English language will be acceptable.

The duplicate lists of patients will not be returned to the candidate after the examination. The candidate should bring a duplicate list to the examination.

1. Office Practice Patients

A list of 40 patients from the candidate's office practice should be prepared in the format accompanying the application. List separately patients who have presented with any of the following problems. List no more than four patients from any one category. Do not include any patients who appear on the hospital lists.

Genetic problems
Amenorrhea
Infertility
Abnormal uterine bleeding
Developmental problems
Sexual dysfunction
Contraception complications
Hirsutism
Abnormal cervical-vaginal cytology
Pelvic pain
Vaginal discharge/pruritus
Breast problems
Medical complication of pregnancy
Premenstrual tension
Office surgery
Sexually transmitted disease
Asymptomatic pelvic mass
Pelvic relaxation problems
Urinary tract infection
Psychosomatic problems
Menopause

List separately each patient and include the problem (one of the listed categories), diagnostic procedures, treatment, results, and number of office visits during the 12-month period. Group patients together under each separate category.

2. Gynecology

A list of all gynecologic patients hospitalized, ambulatory, or short-stay surgery, should be prepared in the format accompanying the application and listed in order as follows

a. Major operative procedures
b. Minor operative procedures
c. Nonsurgical admissions

The preoperative diagnosis should appear for all major and minor surgical procedures. The size of ovarian cysts must be recorded. For nonsurgical conditions, the admission diagnosis should be recorded. The treatment recorded should include all surgical procedures, as well as primary nonsurgical therapy. Surgical diagnosis refers to the pathology diagnosis. For hysterectomy specimens, the uterine weight in grams must be recorded. In cases without tissue for histologic diagnosis, the final clinical diagnosis should be listed.

Days in hospital on this listing of patients, as well as on all other lists, is the arithmetic difference between date of discharge and date of admission.

The total number of uncomplicated, induced abortions of 12 or less weeks' duration should be reported simply as a total number. Induced abortions of more than 12 weeks' (menstrual age) duration should be listed separately, indicating the duration of pregnancy and the technique employed.

Also list separately, as individual patients, all with complications following induced abortions, either observed or reported to you, regardless of the duration of the pregnancy when abortion was induced.

3. Obstetrics

A list of obstetric patients should be prepared in the format accompanying the application. List separately each patient with a complication or abnormality, as well as medical and surgical intervention during pregnancy, labor, delivery, and the puerperium. In addition, a total of the number of normal, uncomplicated obstetric patients, managed during the same 12-month period, should appear at the end of the obstetric list.

Interpretation of “normal obstetric patients” for this listing implies that:

a. Pregnancy, labor, delivery, and the puerperium were uncomplicated, labor began spontaneously between the 37th and 42nd week of gestation
b. The membranes ruptured or were ruptured after labor began
c. Presentation was vertex, position was occiput anterior or transverse, labor was less than 24 hours in duration
d. Delivery was spontaneous or by outlet forceps, with or without episiotomy, from an anterior position
e. The infant was not asphyxiated (Apger 6 or more), of normal size, and healthy, and
f. The placental stage was normal and blood loss was not excessive

Deliveries not fulfilling these criteria must be listed individually. Include gestational age at admission.

4. Cover Sheets

Each list of patients, gynecologic and obstetric from each hospital, should be verified as illustrated by the form accompanying the application. Note that the record librarian or other hospital official must attest that (a) the patients listed were cared for by the candidate, and (b) that all of the hospitalized patients dismissed from the candidate's care have been separately listed or reported in the totals reported for the period indicated.

5. Summary Sheet

Using the form provided for this purpose, prepare a summary of all cases for all hospitals combined.

Admission to the Oral Examination

If the examination fee has been paid and the two copies of patients have been submitted by August 15, 1994, the candidate will receive an authorization for admission form and a reservation card for the hotel at least 1 month prior to the examination, indicating the day, time, and place to report for the examination. Please keep us informed of your current mailing address.

Ruling Not Admissible

A candidate not admitted to an oral examination may subsequently reapply, but must then submit a new application, pay the application fee, and meet the requirements applicable at the time he/she reapplies.

If the candidate was disqualified because the case lists were judged insufficient for a fair examination, the new case lists will be added to those already submitted. Thus the requirement of sufficient numbers, breadth, and depth in the case list makes time in practice the variable and experience the constant.

Reexaminations

A candidate who is disqualified or who fails to pass the oral examination must reapply in order to take the examination another year by submission of a new application during January or February, with payment of the reapplication fee of $350.

A candidate reapplying for examination will again be asked to provide verification of his/her responsibilities for patient care and will again be notified, early in July, in regard to his/her admissibility to the next examination.

A candidate accepted for reexamination must submit, on or before August 15 prior to examination, new case lists of patients for the 12 months prior to June 30 prior to the oral examination.

The examination fee of $450 is due each time a candidate receives notice that he/she can be scheduled to take the oral examination. Each reexamination will be conducted by examiners who have no knowledge of the fact or circumstances of a candidate's previous failure.

Postponement of Oral Examination

A candidate failing to take an oral examination for which he/she had been scheduled must submit a new application during January or February of the following year, when his/her admissibility to the next examination will be determined on the basis of the candidate's professional activities as reported during the current year. Payment of the $350 reapplication fee must accompany each reapplication.

If notified of his/her admissibility to the next oral examination, he/she must again submit, before August 15, a listing of all patients dismissed from his/her care in all hospitals during the 12 months ending June 30 prior to the oral examination, and a list of 40 patients from office practice.

Fees

Since the fees have been computed to cover the costs of examination and administrative expense, they will not be refunded or credited. All fees must be paid in United States currency. The candidate's canceled check is to be considered the receipt.

A. Written Examination

The application fee of $200 must be enclosed with each application, reapplication, or request to write the examination. The candidate will usually be notified early in April that his/her application or request has been approved, at which time the $300 examination fee will be due. If payment of the examination fee has not been received in the Board office postmarked on or before May 1, the candidate will not be scheduled to write the examination in June.

No application fees will be either credited against a future application or refunded.

Examination fees may be refunded, provided candidates inform the Board office in writing of their inability to write the examination prior to June 1.

B. Oral Examination

The application fee of $350 must be enclosed with each application to take the oral examination. A candidate notified in mid-July of
his/her admittance to the oral examination in November is re-
quired to pay the $450 examination fee before he/she will be sched-
uled to take the oral examination. If the examination fee has not
been received in the Board office postmarked on or before August
15, the candidate will not be scheduled to take the examination the
following November.

No application fees will be either credited against a future applic-
ation or refunded.

Examination fees may be refunded provided candidates inform
the Board office of their inability to write the examina-
tion prior to September 30.

Listings of Certified Diplomates
Each year the Board office notifies the American College of Obstetri-
cians and Gynecologists of the names and addresses of the
diplomates certified in that year. A list of the names of the most re-
cently certified diplomates is sent to the American Medical Asso-
ciation and to the American Board of Medical Specialties with
the request that they be included in the next issues of (1) the Direc-
tory of Physicians in the United States and (2) in the Directory of
Certified Obstetrician-Gynecologists.

A candidate's name will be included in the lists to be published
only if the candidate has authorized inclusion of his/her name in
the specific listings by signing accordingly on the Authorization for
Admission form at the time of his/her oral examination.

After this effort to ensure initial listings of the newly certified
diplomate, the Board assumes no responsibility for a diplomate's
listing in subsequent issues of any directory.

Revocation of Diploma or Certificate
Each candidate, when making application, signs an agreement re-
garding disqualification or revocation of his/her diploma, certifi-
cate, or other evidence of qualification for cause. Revocation may
occur whenever

1. The physician shall not in fact have been eligible to receive the di-
ploma or certificate, irrespective of whether the facts constitut-
ing such ineligible were known to or could have been
ascertained by this Board, its members, directors, examiners, off-
cers, or agents at or before the time of issuance of such diploma
or certificate.

2. Any rule governing examination for a diploma or certificate shall
have been violated by the physician, but the fact of such violation
shall not have been ascertained until after the issuance of his di-
ploma or certificate.

3. The physician shall have violated the moral or ethical standards of
the practice of medicine then accepted by organized medicine
in the locality in which he/she shall be practicing and, without
limitation of the foregoing, the forfeiture, revocation, or suspen-
sion of his/her license to practice medicine, or the expulsion
from, or suspension from, the rights and privileges of member-
ship in a local, regional, or national organization of his/her profes-
sional peers shall be evidence of a violation of such standards of
the ethical practice of medicine.

4. The physician shall fail to comply with the rules and regulations of
this Board.

5. The issuance of, or receipt by, him/her of such diploma, certifi-
cate, or other evidence of qualification shall have been contrary
to or in violation of the Certificate of Incorporation or the Bylaws
of this Board.

6. The Board adheres to The Ethical Considerations in the Practice
of Obstetrics and Gynecology currently published by the Ameri-
can College of Obstetricians and Gynecologists.

Upon revocation of any diploma or certificate by this Board as
aforesaid, the holder shall return his/her diploma or certificate and
other evidence of qualification to the executive director of the
Board and his/her name shall be removed from the list of certified
specialists.

American Board of
Ophthalmology

John T Flynn, MD, Chairman, Miami, Florida
B Thomas Hutchinson, MD, Vice-Chairman, Boston, Massachusetts
William A Spencer, MD, Executive Director, San Francisco,
California
Douglas R Anderson, MD, Miami, Florida
George R Beauchamp, MD, Dallas, Texas
William E Benson, MD, Philadelphia, Pennsylvania
John G Clarkson, MD, Miami, Florida
John L Keltner, MD, Davis, California
Alias E Kolker, MD, St Louis, Missouri
Malcolm N Luxenberg, MD, Augusta, Georgia
Denis M O'Day, MD, Nashville, Tennessee
Dennis M Robertson, MD, Rochester, Minnesota
Morton E Smith, MD, St Louis, Missouri
Ronald E Smith, MD, Los Angeles, California
Robert L Stammer, MD, San Francisco, California
H Stanley Thompson, MD, Iowa City, Iowa
Fred M Wilson II, MD, Indianapolis, Indiana

(These criteria and conditions are subject to change without no-
tice. All applicants are advised to contact the American Board of
Ophthalmology to ascertain whether the information below is cur-
rent.)

Preface

Around the turn of the century the question of adequate training and
testing of the qualifications of specialists was raised by a num-
ber of leaders in American ophthalmology. These discussions culmi-
nated in 1914 with the formation of a joint committee of the
American Academy of Ophthalmology and Otolaryngology, the
American Ophthalmological Society, and the Section on Ophthal-
mology of the American Medical Association to consider ophth-
almic education. The report of this committee in 1915 led to the estab-
lishment of the American Board for Ophthalmic Examinations May
8, 1916. Following the annual Academy meeting in Memphis, the
Board examined eleven candidates December 13 and 14, 1916, at
the University of Tennessee Medical School. The Board was incor-
porated May 3, 1917. The name was changed from the American Board
for Ophthalmic Examinations to the American Board of Ophthal-
omology in 1883. This was the first American Specialty Board to be estab-
lished, with the American Board of Otolaryngology following in 1824
and the American Board of Obstetrics and Gynecology in 1930.

The directors of the American Board of Ophthalmology are cho-
en for a 4-year term. One additional 4-year term is permitted. The
individuals include clinicians and academicians with specific oph-
thalmologic skills and a broad geographic distribution. The found-
ing organizations, the American Academy of Ophthalmology, the
American Ophthalmological Society and the American Medical Asso-
ciation continue to serve as members of the corporation in an
advisory capacity. The directors of the American Board of Ophthal-
omology are listed in The Official ABMS Directory of Board Certi-
fied Medical Specialists, published by Marquis Who's Who. This is
the authorized publication of the 24 recognized specialty Boards
that certify physicians in medical and surgical specialties.

Up to January 1, 1994, the Board had conducted 183 examina-
tions and issued its certificate to 19,208 ophthalmologists.
Goal of Certification Process

The intent of the certification process of the American Board of Ophthalmology is to provide assurance to the public and to the medical profession that a certified physician has successfully completed an accredited course of education in ophthalmology and an evaluation including an examination. The evaluation is designed to assess the knowledge, experience and skills requisite to the delivery of high standards of quality patient care in ophthalmology.

It has never been the purpose of the Board to define the requirements for membership to hospital staffs or to gain special recognition or privileges for its diplomates in the practice of ophthalmology. Neither is its purpose to state who may or may not practice ophthalmology or to define the scope of ophthalmic practice. The Board does not seek to obtain special privileges for its diplomates over other qualified physicians. The certificate of the Board does not confer any academic degree, legal qualifications, privilege, or license to practice ophthalmology.

Governing Rules and Regulations

The Board’s rules and regulations, which are subject to change from time to time without notice, contain specific provisions concerning eligibility for the examinations administered by the Board; an admission appeals process, which is available under certain circumstances; the application process; the examination process; a definition of the circumstances under which an applicant will be required to reapply for an existing application, or submit a new application, or request or change of an examination; lists of occurrences that could lead the Board to revoke a certificate previously issued by it; to a Diplomate or to place the diplomat on probation; and other matters relating to the Board’s examination and certification processes. Many, but not all, of these provisions are summarized or described in this publication. In the event of any inconsistency between the Board’s rules and regulations and this publication, or any omission from this publication of any provision of the rules and regulations, the rules and regulations shall govern. Copies of the rules and regulations are available upon request from the Board’s executive office.

Requirements

Many physicians write to the Board outlining their training and asking for an estimate of their qualifications and whether further training is required. The Board’s requirements, as published herewith, provide this information and any potential applicant should be able to determine his/her status after studying these requirements. Individual offices or directors of the Board cannot and will not make such determinations. All evaluations of an applicant’s status will be made by the Committee on Admissions in accordance with the Rules and Regulations of the Board, after submission of an application for examination and payment of the registration fee, which must accompany the application. Personal interviews with officers and directors of the Board should not be requested at any time.

It is the responsibility of the candidate to seek information concerning the current requirements for certification as an ophthalmologist. The Board does not assume responsibility for notifying a candidate of changing requirements or the impending loss of his/her eligibility to take an examination.

Educational

All applicants must have graduated from a medical school or from a school of osteopathy.

All applicants entering ophthalmology training programs must have taken a postgraduate clinical year (PG-1) in a program in the United States accredited by the Accreditation Council for Graduate Medical Education (ACGME) or in Canada accredited by the Royal College of Physicians and Surgeons of Canada (RCPSC). The PG-1 year must comprise training in which the resident has primary responsibility for patient care in fields such as internal medicine, neurology, pediatrics, surgery, family practice, or emergency medicine. As a minimum, six months of this year must consist of a broad experience in direct patient care.

In addition to a PG-1 year, all applicants must have satisfactorily completed an entire formal graduated residency training program in ophthalmology of at least 36 months’ duration (PG-4 or better) in either the United States accredited by the ACGME, or in Canada approved by the Royal College of Physicians and Surgeons of Canada. No other training, including any form of fellowship, is acceptable.

The applicant’s chair is required to verify satisfactory completion of an entire formal graduated ophthalmology residency training program of at least 36 months’ duration. When a resident’s graduate education and clinical experience have been gained in more than one residency program, each chairman will be required to complete a satisfactory completion form. Less than 6 months’ service in an accredited program is not acceptable as a part of the required training in ophthalmology. The chairman’s verification form(s) cannot be submitted to the Board until the applicant has completed the entire residency training program.

If a program is disapproved or withdrawn during the course of a resident’s training, he/she must complete the remaining required number of months of training in another accredited program.

Only those applicants who have completed their entire ophthalmology training program, PGY-4 or beyond, by August 1 are eligible to apply for the Written Qualifying Examination given in April of the following year.

Licensure

Graduates of United States and Canadian Medical Schools

A person shall be eligible to apply for and to take any examination administered by the Board only if, as of the date of application and at all times thereafter through and including the date of administration of each examination of the Board taken by the person, the person has a valid and unrestricted license to practice medicine in the place or places in which the person’s practice of medicine is regularly conducted in the United States, or any of its territories, or Canada and in each other place in which the person practices or has practiced medicine and has an unexpired license. Information concerning the Board’s rules and regulations with respect to definition of an invalid or restricted license is available upon request from the Board’s executive office.

Other Medical Graduates

An applicant may have graduated from a medical school of a country other than the United States or Canada. Graduates of foreign medical schools must have a valid and unrestricted license to practice medicine (as defined above and in the Rules and Regulations of the Board), they are also required to have a certificate from the Educational Commission for Foreign Medical Graduates (ECFMG).

Applicant Disclosure Obligations

At the time a person submits an application to the Board and at all times thereafter, the person shall have a continuing obligation to disclose promptly to the Board the existence or occurrence of any circumstances causing the person to fail to satisfy the foregoing condition of eligibility to apply for and take any examination administered by the Board. A person submitting an application to the Board shall inform the Board on or in a written submission accompanying the person’s application in a written submission to the Board before taking any examination administered by the Board, as the case may be, if the person’s license to practice medicine in the United States, any of its territories, or Canada has previously been surrendered or not renewed upon its expiration or if the person’s practice of medicine or license to practice medicine in the United
Applications

An applicant who wishes to be examined by the Board shall complete, sign and file with the executive director an application on the official form then in use by the Board. The application shall be considered complete only when all supporting data required by the application, including the chairman's verification form, are also filed with the executive director. Applications can be obtained from the chairman of accredited residency programs or from the Office of the Board. If an applicant wishes to be considered for a Written Qualifying Examination to be conducted in a particular year, his or her application and all supporting data, including supporting data furnished directly by others with respect to the applicant, must be postmarked between March 1 and August 1 except for the chairman's verification form, which must be postmarked on or before October 1 of the calendar year immediately preceding the calendar year in which the Written Qualifying Examination is to be conducted. By paying a late fee the deadline for postmarking the completed application may be extended from August 1 to September 1. No other exceptions to, or extensions of, these requirements will be made for any reason. The dates of future examinations will be announced in Ophthalmology and the Journal of the American Medical Association.

An applicant who does not receive notification from the Board office by January 15 of the acceptance or rejection of his or her application must contact the Board office in writing to inquire about the status of the application. Failure to contact the Board office in writing by February 15 will result in such applicant's removal from the examination roster.

If a completed application and all required supporting data are not timely postmarked the application will not be valid, and the application fee shall be returned. It is best not to mail application materials just before the postmark deadline because packets are sometimes postmarked a day or two after mailing. If there is a discrepancy between a metered postmark and an official US Postal Service postmark, the latter will be considered official.

The application shall be accompanied by a check payable to the Board for the application fee. No application will be considered to be complete until the fee and all required supporting data, including a copy of your current registration to practice medicine and two recent photographs for identification at the Written Qualifying Examination and the Oral Examination, have been received by the executive director.

The application form contains a pledge that explains the prohibitions regarding improper conduct before, during and after examinations. Candidates must certify that the information they provide in their applications is true and accurate. If (1) any misrepresentation is discovered in the application, in any other information submitted to the Board or in the identity of a person applying to take or taking the examinations; (2) any financial or other benefit is offered by a candidate to any director, officer, employee, proctor, or other agent or representative of the Board in order to obtain a right, privilege or benefit not usually granted by the Board to similarly situated candidates; or (3) any irregular behavior during the examination, such as copying answers, sharing information, using notes, or otherwise giving or receiving aid, is discovered by observation, statistical analysis of answer sheets, or otherwise, the candidate in question shall be given written notice of the charges and an opportunity to respond in accordance with the procedures set forth in the Rules and Regulations of the Board. If the Board determines that a violation has occurred, the Board may permanently bar the person(s) involved in the violation from all future examinations, invalidate the results of prior examinations taken by the person(s), withhold or revoke the certificate of the person(s), or take other appropriate action. If sanctions are imposed pursuant to the Rules and Regulations of the Board, the Board may notify legitimately interested third parties of its action.

When the Board determines that irregular behavior has occurred during an examination, the Board will make every effort to withhold the scores of only those candidates directly implicated in the irregularity. Nevertheless, in some instances the evidence of irregularity, though sufficiently strong to cast doubt on the validity of scores, may not enable the Board to identify the specific candidates involved in the irregularity. In such circumstances, the Board may withhold the scores of candidates not directly implicated in the irregularity and, if necessary, may require those candidates to take an additional examination at a later date to ensure the validity of all scores.

The examination booklets used in the Written Qualifying Examination and the illustrative materials and questions asked in the Oral Examination are copyrighted as the sole property of the Board and must not be removed by the candidate from the test area or reproduced in any way. Any reproduction, in whole or in part, of the Written Examination test booklet or Oral Examination materials and questions is a federal offense and also may subject the applicant to the sanctions listed above. No notes, textbooks, other reference materials, scratch paper or recording devices may be taken into either the Written or the Oral Examinations.

Disabilities

The American Board of Ophthalmology is committed to complying fully with its responsibilities under Section 309 of the Americans with Disabilities Act to any qualified candidate for Board certification who establishes to the reasonable satisfaction of the Board the existence, the specific nature, and the extent of the candidate's disability within the meaning of the Act.

The Board intends to offer its certification examinations in places and in a manner that are accessible to such disabled candidates. The Board intends to select and administer its examinations so as to ensure that when one of its examinations is administered to a candidate with a disability that impairs sensory, manual, or speaking skills, the examination results accurately reflect the candidate's aptitude or achievement level and other factors that the examination is designed and intended to measure, rather than reflecting the candidate's impaired sensory, manual, or speaking skills, except where those skills are among the factors that the examination is designed and intended to measure.

A candidate for Board certification who believes that he or she is disabled within the meaning of Section 309 of the Americans with Disabilities Act and who requests a modification in the form of the certification examination administered by the Board in the manner of its administration to the candidate shall specify on, or in a supplement submitted with, the candidate's timely filed application form to the Board the existence, the specific nature, and the extent of his or her disability and the specific modification requested. The candidate also shall submit with the application, in addition to all materials and information required to be submitted with the application, independent documentary evidence that establishes to the reasonable satisfaction of the Board the existence, the specific nature, and the extent of the candidate's disability and why the modification requested by the candidate is required by the candidate's disability.
Fees
Review of application and registration for Written Qualifying Examination, $815, payable with application.
Review of late application and registration (after August 1 to September 1 postmark), $1,005.
Repeat registration fee, $690.
Late repeat registration fee, (after August 1st to September 1 postmark), $720.

Oral Examination
Due to time constraints, there is no late filing period for oral candidates.
Registration fee, $655, payable on successful completion of the Written Qualifying Examination.
Repeat entire oral examination, $655.
Repeat one subject, $295.
Repeat two subjects, $450.

Cancellations
To cover administrative expenses an additional charge equal to 50% of the original application and registration fee (or repeat registration fee) for that particular Written Qualifying Examination or Oral Examination will be imposed on any applicant who cancels or fails to keep an examination assignment, regardless of the reason. This fee is due at the time of cancellation.
Fees for accepted candidates for the Written Qualifying Examination and the Oral Examination are not refundable.
The fees for examinations shall be established annually by the Board of Directors on the basis of the actual and anticipated costs of the Board in the examination of applicants and the administration of its business. The Directors of the Board serve without compensation except for reimbursement of expenses.

Time Limit
New Applicants
An applicant must successfully complete the Written Qualifying Examination and the entire Oral Examination by December 31 of the sixth year following completion of accredited training in ophthalmology. An applicant who has not become certified within such period and who does not currently have an approved active or inactive application on file with the Board shall have until January 23, 1999, to submit a completed application and to complete certification. Candidates failing to achieve certification within the required time must submit evidence of satisfactory completion of one or more additional years of clinical experience in ophthalmology supervised and sponsored by an ACGME-accredited residency training program before he/she can resubmit an application to the American Board of Ophthalmology.

Active/Inactive Applicants
All individuals who currently have an approved active application and all who have an approved inactive application on file with the American Board of Ophthalmology will be given 6 years from January 23, 1983, to complete certification. If not certified, the candidate must submit evidence of satisfactory completion of one or more additional years of clinical experience in ophthalmology supervised and sponsored by an ACGME-accredited residency training program and reapply under the rules in effect at the time the reapplication is filed.

Written Qualifying Examination
In order to qualify for an Oral Examination, each applicant must pass a Written Qualifying Examination. The Written Qualifying Examination consists of 250 multiple-choice questions. The purpose of the Written Qualifying Examination is to evaluate the breadth and depth of the basic science and clinical knowledge of candidates who have satisfactorily completed an accredited program of education in ophthalmology. Candidates who successfully complete the Written Qualifying Examination will be further evaluated in an Oral Examination.
The following describes aspects of the candidate's ability that are tested
1. Recall of information
2. Understanding and application of basic knowledge
3. Relation of pathogenesis to disease process
4. Evaluation of clinical data
5. Utilization of diagnostic and therapeutic procedures
6. Anticipation and recognition of complications
7. Ethics of ophthalmic practice

Topics covered include:
1. Optics, refraction and contact lenses
2. Retina, vitreous, and uvea
3. Neuro-ophthalmology
4. Pediatric ophthalmology
5. External disease and cornea
6. Glaucoma, cataract and anterior segment
7. Plastic surgery and orbital diseases
8. Ophthalmic pathology

The examination has also been described in the Board's booklet entitled "Written Qualifying Examination."
The Written Qualifying Examination is given simultaneously in designated cities in the United States in April of each year.

Oral Examination
Upon successful completion of the Written Qualifying Examination applicants will be sent specific instructions for registration for the Oral Examination. A check payable to the Board for the amount then in effect for the Oral Examination must accompany the completed registration form and be forwarded to the Board Office within the appropriate time frame.

Oral Examination Schedule
It has been the custom of the Board to hold two oral examinations a year with candidates who have passed the April Written Qualifying Examination assigned either to a group taking the Oral Examinations in the fall of that year or to a group taking the Oral Examinations in the spring of the following year. Candidates who pass the April 1994 Written will be assigned to either the fall of 1994 oral or the spring of 1995 oral. The Board reserves the right to limit the number of candidates admitted to any scheduled examination and to designate the candidates to be examined.

Oral Examination Subjects
The Oral Examination will be divided into the subjects listed and described in the following paragraphs. All subjects are given by appointment within a half day period utilizing a panel system. Information about the examination procedures and scheduling is sent to all candidates after they have been registered for the Oral Examinations.
1. Optics, refraction and visual physiology
2. Pediatric ophthalmology and strabismus
3. Neuro-ophthalmology and orbit
4. External eye and adnexa
5. Anterior segment of the eye
6. Posterior segment of the eye

In each of the oral examinations emphasis will be placed upon the following
Data Acquisition
Recognition by the candidate of depicted abnormalities and diseases that affect the eye, ocular adnexa, and the visual pathways.

Diagnosis
The ability of the candidate to synthesize clinical, laboratory, and histopathologic data in order to arrive at a correct diagnosis and differential diagnosis.

Treatment
Candidates will be expected to provide a reasonable and appropriate plan for medical and/or surgical management of patients with the conditions depicted or described.

These examinations will include developmental, dystrophic, degenerative, inflammatory, infectious, toxic, traumatic, neoplastic, and vascular diseases affecting the eye and its surrounding structures.

1. Optics, Refraction and Visual Physiology
Candidates should be familiar with the basic principles of physical and geometrical optics and the operation of standard optical instruments. They should understand the essentials of visual physiology including visual acuity, light and dark adaptation, accommodation, and color vision. They should know the various forms of ametropia, principles and techniques of refraction, principles of lens design, and methods of correction of ametropia including spectacles, contact lenses, intraocular lenses, and keratorefractive surgery. Candidates should be familiar with the methods for prescribing protective lenses, absorptive lenses, and aids for low vision.

2. Pediatric Ophthalmology and Strabismus
Candidates should be familiar with diseases affecting the eye of infants and children and associated systemic abnormalities. Candidates should understand the anatomy, pathology, and physiology of the neuromuscular mechanisms subserving ocular motility and binocular vision. Candidates should be familiar with the methods of examination for detection and assessment of sensory and ocular motor disorders. They should also know the clinical features, differential diagnosis, natural course, and management of the various types of comitant and noncomitant deviations. They should be familiar with the principles and complications of surgery on the extraocular muscles.

3. Neuro-ophthalmology and Orbit
Candidates should know the anatomy of the orbit and the neuroanatomy of the afferent and efferent visual systems. They should understand the principles and techniques of various diagnostic procedures, including visual field testing, visually evoked responses, ultrasonography, conventional X-ray imaging, CT scanning, and magnetic resonance imaging. Candidates should be familiar with the clinical features, pathology, differential diagnosis, and management of disorders of the orbit, visual pathways, oculomotor system, and pupillomotor pathways, including the indications for, principles of, and complications of orbital surgery.

4. External Eye and Adnexa
Candidates should know the anatomy, embryology, and physiology of the structures comprising the lacrimal system, lids, cornea, conjunctiva, and anterior sclera. They should demonstrate knowledge of the pathologic substrate, differential diagnosis, and medical therapy as well as indications for, principles of, and complications of surgical procedures utilized to alleviate abnormalities and diseases affecting these tissues.

5. Anterior Segment of the Eye
This examination concerns the anatomy, embryology, physiology, and pathology of abnormalities and diseases of the cornea, anterior chamber angle, iris, ciliary body, and lens. Candidates will be expected to discuss conditions affecting these structures and those to be considered in their differential diagnosis. They should also be able to describe and provide indications for medical and surgical therapy directed toward alleviating or curing these conditions.

6. Posterior Segment of the Eye
This examination concerns the anatomy, embryology, physiology, and pathology of abnormalities and diseases of the vitreous, retina, choroid, and posterior sclera. Candidates will be expected to discuss conditions affecting these structures and those to be considered in their differential diagnosis. They should also be able to describe and provide indications for medical and surgical therapy directed toward alleviating or curing these conditions.

Reactivation
Written Qualifying Examination
An applicant shall be required to reactivate his/her application for approval, and submit an additional application fee under the following circumstances, which relate to the Written Qualifying Examination:
1. if a candidate fails to take the Written Qualifying Examination within 24 months after notice has been sent to him/her that his/her application has been accepted;
2. if a candidate does not repeat the Written Qualifying Examination within 24 months after failing;
3. if a candidate receives two consecutive failures on a Written Qualifying Examination on the same application.

Oral Examination
An applicant who fails one or two subjects in an Oral Examination will be required to repeat these subjects. An applicant who fails three or more subjects will be required to repeat all subjects of the Oral Examination. An applicant who fails three or more subjects on the first repeat examination will be required to pass another Written Qualifying Examination before being permitted to repeat the Oral Examination. Additional information on grading is specified in the "Rules for Grading," which are sent to all applicants at the time of their Oral Examination registration.

An applicant shall be required to reactivate his/her application for approval, submit an additional application fee, and pass another Written Qualifying Examination before being admitted to the Oral Examination under the following circumstances:
1. if a candidate does not take the Oral Examination within 24 months after notice has been sent to the applicant that he/she has passed the Written Qualifying Examination;
2. if a candidate who is eligible to do so fails to repeat the Oral Examination within 24 months after failing all or part of such examination;
3. if the candidate does not pass all subjects covered therein in three or fewer partial or complete examinations.

Reactivation Procedure
In order to reactivate an application the following criteria must be met by the postmarked August 1 registration deadline:
1. file a new application;
2. submit current fee;
3. copy of a current valid and unrestricted license to practice medicine in the United States, its territories, or in a Province of Canada (see "Licensure").
4. A letter of endorsement from two certified ophthalmologists in the community.

Those reactivating their applications who have not been certified by December 31 of the sixth year following completion of accredited training in ophthalmology and those who hold an active or inactive application and have not completed certification within 6 years of the January 23, 1983, date must, in addition to the above criteria, submit evidence of satisfactory completion of one or more additional years of clinical experience in ophthalmology supervised and sponsored by an ACGME-accredited residency training program and reapply under the rules in effect at the time the reaplication is filed.

Inactive Applications

When an application has not been reactivated it is considered by the Board to have lapsed. Inquiries to the Board by outside agencies about the certification status of a physician with an inactive application will be answered by stating that said physician is not certified, and is not scheduled for an examination.

Results of Examinations

Within a reasonable time after completion of the Written and/or Oral Examinations, the applicant shall be notified by the executive director as to the results thereof. The decision of the Board as to these results shall be final and conclusive. Grades are not subject to appeal. Because such is the case, individual directors of the Board or Associate Examiners should not be contacted about specific examination results. To preserve confidentiality, results of an examination will not be given over the telephone or by fax.

Certification

An applicant who successfully passes both the Written Qualifying and Oral Examinations within the required time limitations hereinafter set forth, as determined by the Board in its sole discretion, shall be entitled to receive a certificate without further consideration of his/her qualifications by the Board. Physicians who have received the certificate are diplomates of the Board.

Duration of Certification

Certificates issued by the Board after July 1, 1992, will be valid for a period of 10 years. Thereafter, a diplomate will be required to satisfactorily complete a designated renewal program every 10 years in order to extend the validity of his/her certificate. Certificates issued prior to July 1, 1992, are valid during the diplomate's lifetime.

Certificate Renewal by the American Board of Ophthalmology

Part I: Background

When certification by specialty Boards was first introduced, the purpose was to identify members of the profession who had sufficient education and knowledge that they should be equipped to practice the specialty with acceptable competence.

In modern times, the move toward periodic recredentialing is analogous. It is meant to identify members of the profession who have continued their education, keeping current in information and skills, so that they are still equipped to practice competently.

Guiding Principles

1. Primary purpose. The primary purpose of the certificate renewal process is to promote optimum delivery of competent care by certified members of the ophthalmic profession. The process is intended to set a goal that will guide all members of the profession as they strive to keep up to date in knowledge and skills, and to practice competently. A less important function is to identify any who are severely wanting in professional capabilities or behavior and provide incentive and opportunity to improve. The Board is not to be viewed as responsible for discovering, correcting, and disciplining all who are unacceptable practitioners. Licensing Boards, professional societies, quality assurance committees of medical care facilities, and the legal system share in this responsibility.

The process is primarily to act as an incentive to all in the profession to do the best they can. It is thus not a competition in which an arbitrary percentage at the bottom of the scale are unrenewed. The goal is that all who are willing and able will achieve renewal. It is assumed that all who once established a rightful place in the profession by virtue of certification should be able to achieve the certificate renewal standard comfortably by simply maintaining the qualities needed to continue in the profession. The exceptions are those who have become infirm and are therefore unable to maintain certain required qualities, and those who are simply unwilling to participate in the process of continued growth in the professional capabilities that they once demonstrated. Opportunity for remediation rather than exclusion from renewal certification is the mechanism for elevating the few who have slipped below the standard of their peers. Nonrenewal is the action designed to remove the rare individual who is uncorrectably wanting.

2. Flexibility by practice. The process is intended to take into account that individual practitioners may have developed differently in the types of patients they serve, diagnostic problems that present to them, and the therapeutic methods required by the population they serve. The process therefore will contain flexible requirements that can be modified to suit the nature of individual practices.

3. Flexibility by individual preference. Alternate pathways or components will also be provided to permit selection according to individual preference. For example, individual practitioners may have different means for maintaining their knowledge, or may have preference with regard to how they might like to have their continued abilities evaluated.

4. Sequential process. It is desirable that the process of maintaining intellectual and professional qualities be a continual process. It may therefore be appropriate, as well as most acceptable, that certificate renewal be achieved by an ongoing process. The educational and the assessment requirements of the plan would be capable of being satisfied over a period of time with completed items accumulated until the requirement is satisfied, with opportunity to repeat and strive for improvement in any element that is not accomplished satisfactorily at first.

5. Time for remediation. Standards need to be sufficiently high that they are meaningful, and thus sometimes might not be met on first attempt. For elements that are judged unsatisfactory, timely opportunities need to be provided for satisfactory performance. This approach is intended to make the process both palatable (no element of last minute, one time "pass" or "fail") and effective in its purpose (bring all up to a certain high standard, through additional work as necessary). The result should be a higher level for the profession as a whole than might have occurred without time-limited certificates and the renewal process. This is in fact the primary purpose.

6. Assess certain ingredients of competence, not competence itself. Competence is difficult to define, much less evaluate, and judgments may differ concerning an acceptable manner of delivering care. It is not intended to establish an arbitrary standard of what might or might not be judged adequate competence as an ophthalmic specialist, or to decide between various outlooks on different manners of ethically conducting a practice. It is intended...
only to set standards with reference to certain ingredients that are necessary for competence.

Thus the process will expect continued update of relevant knowledge and require participation in educational experience. It will expect that the educational experience has been assimilated and document the assimilation by testing. It will expect the updated knowledge to be applied in practice. As is feasible, it may also assess whether the practice reflects a caring attitude toward patients and ethical behavior appropriate to a profession, or at least ascertain a commitment to these goals.

In the end it is not possible to ensure that every certified individual is fully competent. The process of renewal therefore simply seeks to encourage competence and to document that the certified practitioner has exhibited some of the verifiable essential ingredients of competence. Certificate renewal does not necessarily mean that a diplomate has all the ingredients or that he or she is indeed fully competent.

We hope that the process developed from these guiding principles will not be feared by the diplomates who face a time of renewal, but will be embraced by all members of the profession as a means to dedicate themselves to the goal of maintaining the highest standards of patient care for a lifetime.

Part II: Requirements

Certificates issued by the American Board of Ophthalmology in 1992 and thereafter will be time-limited, expiring in ten years, and are subject to renewal. Although the first certificate renewal will not be required until the year 2002, the ABO has planned the renewal process.

Eligibility

1. The individual must hold a time-limited certificate issued by the American Board of Ophthalmology in 1992 or thereafter. Certificate renewal can be achieved before or after the expiration date of the time-limited certificate. Renewal will be for ten years from the date of completing the requirements or ten years from the expiration of the previous certificate, whichever is later. (An identical or similar process to reaffirm the certification of those with lifetime certificates issued before 1992 will be made available only if the holder is required by law to be recertified and the law provides that its recertification requirement is satisfied by such reaffirmation of certification by a specialty Board.)

2. The applicant must pay an annual assessment to the ABO each year after the time-limited certificate is issued, with a delinquency fee for each annual assessment not paid on time. These annual assessments are applied toward the renewal fee due at the time of certificate renewal.

3. The applicant must hold a valid, unrestricted license to practice medicine in the United States or Canada in every jurisdiction in which the applicant practices medicine, in keeping with the American Board of Ophthalmology requirements for certification. This valid, unrestricted licensure requirement applies to the time at which knowledge assessment and review of practice requirements are conducted and also to the date on which certificate renewal is issued. Loss of valid, unrestricted license after certification or certificate renewal may result in loss of certification.

4. During the renewal process, the applicant must sign a statement affirming commitment to practice in an ethical manner.

Educational Requirements

Although exposure to an educational experience does not ensure assimilation or utilization of knowledge, a high standard of ophthalmic care cannot be rendered without an ongoing educational experience that is relevant to the individual’s practice. Therefore it is required that the candidate have an average of 90 hours per year of Accreditation Council for Continuing Medical Education (ACGME)-approved Continuing Medical Education (CME) credits since the date of time-limited certification. At least 60% of the hours must be met from among category I CME activity, and the remaining 40% may be met by programs composed of category II or category I credits. (These requirements are subject to change based on revisions of ACGME classifications.) A listing of the educational experience will be required. The educational experience should be of a type and content appropriate for the practice of the applicant. It should include educational programs in general ophthalmology, in any subspecialty interest of the applicant, in general medicine, and in ethics and humanism. At least 50% of the 500 hours of required CME must be obtained in the last 5 years of the 10-year certificate renewal process.

Knowledge Assessment

As an encouragement to utilize continuing education resources of quality, as an encouragement for self-study, and as a verification of the effectiveness of these educational endeavors, an evaluation of knowledge is required. This requirement can be satisfied by any one of four methods:

1. Certificate Renewal Written Examination: The examination is directed toward clinically relevant new information disseminated in clinical journals and educational media during the preceding decade. The examination will consist of several parts: a general examination required of all candidates choosing this pathway and a spectrum of modules dealing with different categories of disease from which the candidate will select a specified number most relevant to his or her practice. The general and modular tests will each be offered annually. They will be multiple choice questions in an "open book" test mailed to the candidate, to be returned within a specified time. The candidate can take some or all of the required subtests in any year during the 5 years prior to the date of certificate renewal. The general and modular tests may be taken annually as often as may be needed, until the required general examination and the required number of modular tests are passed.

2. Certificate Renewal Oral Examination: This will consist of Patient Management Problems (PMP), some dealing with common general ophthalmic topics and others selected to coincide with the nature of the candidate’s practice. Emphasis will be on management of patients, including utilization of advances in medical knowledge within the preceding decade.

3. Combined Chart Stimulated Recall (CSR) and PMP Examination: From patient charts submitted by the candidate, cases will be selected to be the basis of an oral examination reviewing the diagnosis and management of these patients, including the reasoning behind the diagnosis and differential diagnosis as well as alternative treatments. The examination will be supplemented by simulated Patient Management Problems relating to general ophthalmic topics and chosen according to the nature of the individual’s practice. The combined CSR/PMP examination thus resembles the pure PMP examination except that actual cases of the candidate substitute for some of the hypothetical cases that constitute the pure PMP examination.

4. The Oral Examination currently being used for candidates undergoing initial certification.

To satisfy this requirement, the applicant must satisfactorily pass any one of these four examination methods during the 5 years preceding the date of certificate renewal. If a candidate fails in any one of the four pathways, the examination may be repeated as often as required, or a different option may be selected.
Review of Practice
Practice review can be satisfied by one of two methods:
1. The Chart Stimulated Recall (CSR) Examination of knowledge will simultaneously satisfy the requirement for review of practice.
2. Those not taking the CSR oral examination will be asked to complete scan sheets from representative office records with regard to such questions as whether the exact visual disability (symptom) of a cataract patient is recorded, whether ophthalmoscopy was performed postoperatively, et cetera. This information will be used not only to judge the individual applicant but importantly also to document the frequency of certain practice habits within the profession generally. This survey will form the basis for discussion and education within the profession.

The ABO may make office site visits to a limited number of candidates to verify the validity of the CSR examination and scan sheets method.

Identification of Practice-Type
No sooner than 5 years before the date of certificate renewal, just preceding the time when the applicant undertakes to complete the knowledge assessment and review of practice requirements, the candidate will complete an application form that includes identification of categories of patients that are seen in the applicant’s practice commonly, are seen only occasionally, or are seen rarely (if ever). This information will help the applicant select modules to attempt in the Written Certificate Renewal Examination or help the ABO select PMP modules for an oral examination relevant to the practice of the individual. Additionally, the applicant will submit representative patient records (with patient identification masked for confidentiality) from which will be selected cases for the CSR examination or review by scan sheets. Certain categories of clinical problems are thus excluded from assessment by virtue of being seen infrequently by the individual candidate. However, the renewal certificate will not indicate a limitation of the scope of certification by virtue of the fact that certain disease categories were excluded. Neither will the certificate indicate subspecialty by virtue of a limited type of practice. The renewal certificate for all successful applicants will be identical, and the characterization of practice in the application is only for the purpose of guiding the mechanism for certificate renewal.

Synopsis of Certificate Renewal
Along with eligibility requirements, completion of requirements in each of four areas
1. Licensure: A candidate must possess and maintain a valid and unrestricted license to participate in the renewal process. During periods of discontinuity of unrestricted licensure, no participation in knowledge assessment or practice review is permitted or credited.
2. Continuing Medical Education (CME): An average of 50 ACCME approved credit hours per year relevant to the diplomate’s practice is required: Minimum of 60% in Category I. Minimum of 50% of the 500 hours achieved in the 5 years prior to the renewal date.
3. Knowledge Assessment: Any one of the following four methods satisfies this requirement: certificate renewal written examination (“take home”); certificate renewal patient management problem (PMP) oral examination; certificate renewal chart stimulated recall (CSR) oral examination combined with an abbreviated PMP examination; certification oral examination.
4. Practice Assessment: One of the following required: Office record scan review; chart stimulated review oral examination.
   Licensure + CME + one of these 4 alternatives:
   Certificate renewal written exam + office record scan/or
   Certificate renewal PMP oral exam + office record scan/or

Certificate renewal CSR oral exam (includes PMP)/(or)
Certifying oral exam + office record scan
All diplomates holding a time-limited certificate will be required to pay an annual nonrefundable assessment of $100 to the American Board of Ophthalmology. These annual assessments are applied toward the renewal fee due at the time of certificate renewal and will be used to offset the cost of developing and administering time-limited certification. A 10% per annum penalty will be assessed on unpaid fees.

Disciplinary Sanctions
The Board shall have the authority to impose disciplinary sanctions upon a candidate or a diplomate for any of the following reasons:
1. Violation of Rules and Regulations of the Board relating to the Written Qualifying and Oral Examinations and applications to take the examinations.
2. Issuance of a certificate contrary to or in violation of the Rules and Regulations of the Board.
3. Ineligibility of the person to whom the certificate was issued to receive the certificate.
4. Substantial misstatement or omission of a material fact to the Board in an application or in any other information submitted to the Board.
5. Presenting or distributing, or aiding or assisting another person(s) to present or distribute, a forged document or other written instrument purporting to have been issued by or under the authority of the Board to evidence that a candidate, diplomate, or any other person(s) is currently or was previously certified by the Board, when that is not the case, or claiming orally or in writing, or assisting another person(s) to claim, that a candidate, diplomate, or any other person(s) is currently or was previously certified by the Board, when that is not the case.
6. Revocation of the license to practice of a person to whom a certificate was issued.

Statements of Eligibility
The Board does not issue statements of “eligibility” for its examinations. The only information the Board will divulge is whether a physician or is not certified or is or is not scheduled for an examination.

American Board of Medical Specialties
The American Board of Medical Specialties (ABMS) was established in 1933 to serve in an advisory capacity to the American Specialty Boards and to cooperate with organizations that seek its advice concerning the certification of medical specialists. The American Board of Ophthalmology is officially recognized by the ABMS, and contributes an annual fee of $2,000 in addition to a per-capita fee for each diplomate certified, to the American Board of Medical Specialties as do all other medical specialty boards, in support of the activities of ABMS.

The American Board of Ophthalmology provides an annual listing of new diplomates for inclusion in the Official ABMS Directory of Board Certified Medical Specialists and in the Official ABMS Directory of Board Certified Ophthalmologists. Both are published by Marquis Who's Who. Each diplomate will be contacted directly for biographical information and to update information every year.

Associate Examiners
All associate examiners are informed by the Board that they shall not promote, or permit others to promote, his or her participation in commercial or educational activities under circumstances that exploit, or might be perceived to exploit, his or her familiarity with
examinations administered by the American Board of Ophthalmology or otherwise compromise the integrity of those examinations.

American Board of Orthopaedic Surgery

James H Herndon, MD, President, Pittsburgh, Pennsylvania
John A Murray, MD, President-Elect, Houston, Texas
Gordon B McFarland, Jr, MD, Secretary, New Orleans, Louisiana
Robert E Leach, MD, Treasurer, Boston, Massachusetts

Directors
Joseph A Buckwalter, MD, Iowa City, Iowa
Richard I Burton, MD, Rochester, New York
G Paul DeRosa, MD, Indianapolis, Indiana
Harold M Dick, MD, New York, New York
David Drez, Jr, MD, Lake Charles, Louisiana
Neil E Green, MD, Nashville, Tennessee
Dan M Spengler, MD, Nashville, Tennessee
James H Van Oost, MD, Corvallis, Oregon

Senior Directors
Michael W Chapman, MD, Sacramento, California
Harold K Dunn, MD, Salt Lake City, Utah
Robert B Greer III, MD, Hershey, Pennsylvania
George E Omer, Jr, MD, Albuquerque, New Mexico
James R Urbaniak, MD, Durham, North Carolina
Frank C Wilson, MD, Chapel Hill, North Carolina
Donald B Kettelkamp, MD, Executive Director, Chapel Hill, North Carolina

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Orthopaedic Surgery to ascertain whether the information below is current.)

I. Introduction

A. Definition
Orthopaedic surgery is the medical specialty that includes the preservation, investigation, and restoration of the form and function of the extremities, spine, and associated structures by medical, surgical, and physical methods.

B. Purpose
The American Board of Orthopaedic Surgery, Inc., was founded in 1934 as an avowed, voluntary, nonprofit, autonomous organization. It exists to serve the best interest of the public and of the medical profession by establishing educational standards for orthopaedic residents and by evaluating the initial and continuing qualifications and competence of orthopaedic surgeons. For this purpose, the Board reviews the credentials and practices of voluntary candidates and issues certificates as appropriate. It defines minimum educational requirements in the specialty, stimulates graduate medical education and continuing medical education, and aids in the evaluation of educational facilities and programs.

The Board does not confer any rights on its diplomates, nor does it purport to direct licensed physicians in any way in the conduct of their professional duties or lives. It neither intends nor the purpose of the Board to define requirements for membership in any organization or for staff privileges at any hospital.

C. Directors
The directors of the American Board of Orthopaedic Surgery are elected from diplomates of the Board who are nominated by the American Orthopaedic Association, the American Medical Association, and the American Academy of Orthopaedic Surgeons. They serve without salary.

D. Organization
Directors of the Board elect a president, president-elect, secretary, and treasurer annually. An executive director, who is a diplomate, serves as an ex-officio director of the Board. The president appoints directors to serve on standing committees on credentials, examinations, finance, graduate education, and research. Other committees may be formed as deemed necessary. The Board holds regularly scheduled meetings yearly.

E. Directory
A current directory of certified orthopaedic surgeons is maintained and published by the Board. The names of diplomates also appear in the Official ABMS Directory of Board Certified Medical Specialists.

II. General Statement of Educational Goal for Orthopaedic Surgery
The goal of orthopaedic education is to prepare orthopaedic residents to be competent and ethical practitioners of orthopaedic surgery. In fulfillment of this goal, applicants for certification must have received through orthopaedic residency

A. Education in the entire field of orthopaedic surgery, including inpatient and outpatient diagnosis and care as well as operative and nonoperative management and rehabilitation.

B. The opportunity to develop, through experience, the necessary cognitive, technical, interpersonal, teaching, and research skills.

C. The opportunity to create new knowledge and to become skilled in the critical evaluation of information.

D. Education in the recognition and management of basic medical and surgical problems.

E. An evaluation of ethical performance.

III. Minimum Educational Requirements for Board Certification
The Board has established the following minimum educational requirements for certification. These requirements should not be interpreted as restricting programs to minimum standards. Throughout these rules, the term "accredited" denotes accredited by the Accreditation Council for Graduate Medical Education (ACGME).

A. Exception to Requirements
These educational requirements shall apply to all residents who began their first year of accredited orthopaedic surgery residency on or after January 1, 1985, with the following exception:

1. Residents in programs providing only 3 years of orthopaedic education may receive credit for 2 years of accredited nonorthopaedic clinical education if they entered the orthopaedic program before January 1, 1989.

2. This exception is available only to residents enrolled in a 3-year orthopaedic program that has specifically requested the Board to make their residents eligible for this exception and has presented the Board with a plan for implementing a 4-year program. The deadline for receiving such a plan was December 31, 1985.

3. Residents entering orthopaedic residency programs structured for 4 or 5 years may receive credit for 1 but not 2 years of accredited nonorthopaedic clinical education.

B. Time Requirements
1. Five years (60 months) of accredited postdoctoral residency are required.
Certification Requirements

2. Four of these years (48 months) must be served in a program whose curriculum is determined by the director of an accredited orthopaedic surgery residency.
   a. Three of these years (36 months) must be served in an accredited orthopaedic surgery residency program.
   b. One year (12 months) may be served in an accredited graduate medical educational program whose educational content is determined by the director of an accredited orthopaedic surgery residency program.
3. Each program may develop individual sick and vacation times for the resident in accordance with overall institutional policy. However, one year of credit must include at least 46 weeks in full-time orthopaedic education. Vacation or leave time may not be accumulated to reduce the 5-year requirement.
4. Program directors may retain a resident for as long as needed beyond the minimum required time to ensure the necessary degree of competence in orthopaedic surgery. According to the current Special Requirements of the Residency Review Committee for Orthopaedic Surgery, the committee must be notified of such retention. This information must also be provided to the Board on the Record of Residency Assignment form.

C. Content Requirements

1. General Requirements
   A minimum of 9 months during the first year of graduate medical education must be broadly based in clinical services other than orthopaedics. This requirement may be fulfilled by a year of accredited residency in any broadly based program involving patient care.

2. Orthopaedic Requirements
   a. Minimum distribution. Orthopaedic education must be broadly representative of the entire field of orthopaedic surgery. The minimum distribution of educational experience must include:
      1. Twelve months of adult orthopaedics
      2. Twelve months of fractures/trauma
      3. Six months of children's orthopaedics
      4. Six months of basic science and/or clinical specialties
   b. Scope. Orthopaedic education must provide experience with all of the following:
      1. Children's orthopaedics. The educational experience in children's orthopaedics must be obtained in an accredited position in the specific residency program in which the resident is enrolled or in a children's hospital in an assigned accredited residency position.
      2. Anatomic areas. All aspects of diagnosis and care of disorders affecting the bones, joints, and soft tissues of the upper and lower extremities, including the hand and foot; the entire spine, specifically including intervertebral discs; and the bony pelvis.
      3. Acute and chronic care. Diagnosis and care, both operative and nonoperative, of acute trauma (including athletic injuries), infectious disease, neurovascular impairment, and chronic orthopaedic problems including reconstructive surgery, neuromuscular disease, metabolic bone disease, benign and malignant tumors, and rehabilitation.
      4. Related clinical subjects. Musculoskeletal imaging procedures, use and interpretation of clinical laboratory tests, prosthetics, orthotics, physical modalities and exercises, and neurological and rheumatological disorders.
      5. Research. Exposure to clinical and/or laboratory research.
      6. Basic science. Instruction in anatomy, biochemistry, biomaterials, biomechanics, microbiology, pathology, pharmacology, physiology, and other basic sciences related to orthopaedic surgery. The resident must have the opportunity to apply these basic sciences to all phases of orthopaedic surgery.
c. Options. Twelve months of the four required years under the direction of the orthopaedic surgery residency program director may be spent on services consisting partially or entirely of:
   1. Additional experience in general adult or children's orthopaedic or fractures/trauma
   2. An orthopaedic clinical specialty
   3. Orthopaedics-related research
   4. Experience in an accredited graduate medical educational program whose educational content is preapproved by the director of the orthopaedic surgery residency program

D. Accreditation Requirements

1. The educational experience in orthopaedic surgery obtained in the United States must be in an approved position in programs accredited by the Residency Review Committee for Orthopaedic Surgery and by the Accreditation Council for Graduate Medical Education.
   All other clinical education obtained in the United States must be in programs accredited by the Accreditation Council for Graduate Medical Education and the appropriate Residency Review Committee. The Directory of Graduate Medical Education Programs Accredited by the Accreditation Council for Graduate Medical Education, published annually by the American Medical Association, 515 N State St, Chicago, IL 60610, lists accredited rotations of 6 months or longer.
2. During the 5 years of accredited residency, a total period of no more than 6 months may be served in unaccredited institutions.
3. Credit for time spent in residency education will be granted only for the period during which the residency program is accredited, and only for time served in an approved position within an accredited program.
4. If an orthopaedic residency program has its accreditation withdrawn by the Residency Review Committee for Orthopaedic Surgery and the Accreditation Council for Graduate Medical Education, no educational credit will be granted past the effective date of withdrawal of accreditation.
5. Educational credit may be granted for clinical experience in the United States military and/or public health services if the experience is accepted by the director of the orthopaedic surgery residency program that the applicant enters. Up to 1 month of credit may be granted for 2 months of clinical experience, not to exceed 12 months of credit. Credit earned in this manner is subject to approval by the Board's Credentials Committee. This approval should be sought prior to entry into the program.
6. Educational experience obtained in Canada must be on services approved by the Royal College of Physicians and Surgeons of Canada and must extend over a minimum of 5 years. The content requirements outlined in III.C must be met.
7. The Board does not grant credit for foreign educational experience, other than as permitted in III.D.2 and III.D.6.
8. The term "fellow" is not synonymous with the term "resident" for the purpose of obtaining Board credit for educational experience. A resident is an individual enrolled in an approved position in an accredited educational program.

E. Achievement Requirements

1. The director of the program providing general graduate medical education must certify the satisfactory completion of that segment of education.
2. In orthopaedic surgery residency programs, the program director must certify the satisfactory completion of each rotation for which credit is awarded. (See III.G.)
3. The program director responsible for the final year of the resident's education must certify that the resident has achieved a satisfactory level of competence and is qualified for the certifying process.

4. The certification referred to in 2 and 3 above must be made on the appropriate Record of Residency Assignments form and must be countersigned by the resident.

5. Medical practice activity outside of residency duties must not be allowed to interfere with the educational experience. Residents may not engage in such activities without the specific prior approval of the program director. Approval must be based on the judgment that rotations are being completed without compromise and that the circumstances of the resident warrant such activity.

F. Continuity Requirements

The resident should have progressively increasing patient care responsibility. A part-time or pleceenage approach to residency requirements is discouraged. The final 24 months of orthopaedic residency education must be obtained in a single orthopaedic residency program unless prior approval of the Credentials Committee is obtained.

G. Documentation Requirements

1. For orthopaedic education obtained in the United States, the program director must provide the Board with yearly documentation during the residency. Each June, directors will receive two computer diskettes containing Record of Residency Assignment forms on which the required information will be recorded. The appropriate forms are to be printed after the data have been entered, then signed by the program director and the resident. The printed, signed forms and the diskettes are to be returned to the Board office within 30 days of the end of the academic year.

2. The Record of Residency Assignment forms are to be completed for each resident as follows:
   a. Form 1 will be submitted the year the resident enters the program.
   b. Form 1-A must be provided for residents receiving educational credit in a nonorthopaedic ACGME accredited program and for nonorthopaedic education received within the ACGME accredited orthopaedic residency.
   c. Form 2-A must be completed yearly for each resident in the orthopaedic program. It must indicate the content and time spent on rotations, information on any unaccredited rotations, and whether credit was granted for a full year.
   d. Form 3 is the final evaluation form.

3. The computer diskettes and printed, signed forms are due in the Board office within 30 days of completion of the academic year. Part 1 examination results for candidates who take the examination in the same year they complete their residencies will not be mailed either to the candidates or to the program directors until the diskettes and forms have been received by the Board office.

4. When a resident leaves a program prematurely, the program director must notify the Board office in writing within 30 days. The letter must record the reasons for leaving and confirm credit granted for rotations during the academic year in which the resident left. At the end of the academic year, Form 2-A and Form 3 must be completed.

5. Before a resident enters a new program, the new program director must obtain copies of the resident's Record of Residency Assignments forms from the Board office and review them thoroughly in order to develop an appropriate individual program that will meet the minimum educational requirements and include progressively increasing responsibility.

IV. Requirements for Taking the Certifying Examination

The certifying examination is divided into two parts. Part I is a written examination that may be taken at any time after the completion of the educational requirements. Part II is an oral examination that may be taken after passing Part I, completion of the practice requirement, evaluation of the applicant's practice, and admission to the examination. A candidate must pass both parts of the certifying examination to be certified.

After taking and passing the written examination, candidates have 5 years to pass the oral examination. Candidates who do not pass the oral examination within those 5 years must retake and repass the written examination before applying to take the oral examination. Time spent in fellowship education after passing Part I will not count as a part of the 5-year time limit.

An applicant seeking certification by the American Board of Orthopaedic Surgery must satisfy the educational requirements that were in effect when he or she first enrolled in an accredited orthopaedic residency. For all other requirements, an applicant must meet the specifications in effect at the time of application.

A. Educational Requirements

1. An applicant must satisfactorily complete and document the minimum educational requirements in effect when he or she first enrolled in an accredited orthopaedic residency.

2. Upon successful completion of 54 months of the 60 months of required education and upon the recommendation of the program director, a candidate may apply to take Part I of the examination.

3. In order to be admitted to the examination, the candidate must complete the full 60 months of required education.

4. An applicant who has received orthopaedic surgery residency education in Canada must have fulfilled the requirements of the American Board of Orthopaedic Surgery and must have passed the qualifying examination in orthopaedic surgery of the Royal College of Physicians and Surgeons of Canada before applying for either part of the Board's certifying examination.

B. License Requirement

Applicants who are in practice at the time they apply for Part I and all applicants for Part II must either possess a full and unrestricted license to practice medicine in the United States or Canada or be engaged in full-time practice in the United States federal government, for which licensure is not required. An applicant will be rendered ineligible for any part of the certifying examination by limitation, suspension, or termination of any right associated with the practice of medicine in any state, province, or country due to a violation of a medical practice act or other statute or governmental regulation; to disciplinary action by any medical licensing authority; or by voluntary surrender while under investigation.

C. Practice Requirement

1. The applicant must be continuously and actively engaged in the practice of orthopaedic surgery other than as a resident or fellow (or equivalent) for at least 22 full months immediately prior to the Part II examination. An applicant who interrupts the 22 months of practice with a fellowship can count the months of practice that preceded the fellowship as part of the 22-month requirement.

2. The applicant must be in one practice location for a minimum of 12 consecutive months during the required 22-month period. A change in location, type of hospital practice, or practice association may result in deferral. The practice must be located in the United States or its territories, Canada, or a United States service installation.
3. The practice must include hospital admitting and surgical privileges in effect at the time of application for the examination and at the time of examination.

4. The applicant must demonstrate professional competence and adherence to acceptable ethical and professional standards. The practice must allow independent decision-making in matters of patient care.

5. A reduction, restriction, suspension, termination, or resignation at the request of a hospital of all or any portion of an applicant's surgical staff privileges, or pending action to do so, will normally result in a deferral until such action is finally resolved and the applicant's practice has stabilized sufficiently for it to be evaluated.

6. An applicant in the United States uniformed services may satisfy the practice requirement if assigned as an orthopaedic surgeon for at least 22 full months prior to the date of the Part II examination. The applicant must submit a letter from his or her immediate supervisor evaluating his or her capability in the practice of orthopaedic surgery, as well as any other documentation the Credentials Committee may require to demonstrate professional competence and adherence to acceptable ethical and professional standards.

D. Evaluation of Applicant

1. Individuals who do not engage in traditional orthopaedic surgery cannot be adequately evaluated for the Part II examination and will not be certified.

2. Qualifications for taking the Part II examination will be determined by the Credentials Committee after review of the application, letters of recommendation, and other relevant information.

3. It is the responsibility of the applicant to provide the information on which the Credentials Committee bases its evaluation of the qualifications of the applicant. This responsibility extends to information that the Credentials Committee requests from other persons. If the Credentials Committee does not receive requested information from the applicant, a program director, a reference, a hospital representative, or another source by February 1, the Board will notify the applicant and defer the decision on admission to the examination until the information is received.

4. Representatives of the Board may visit the site of an applicant's practice if the Credentials Committee believes that this is necessary for adequate evaluation of the applicant's work.

V. Impaired Physicians

A. Chemical Dependency

Applicants who have a history of chemical dependency will not be admitted to either Part I or Part II of the certifying examination unless they present evidence from the appropriate agencies, hospitals, and physicians demonstrating to the Board that they both (1) have satisfactorily completed the program of treatment prescribed for their condition and (2) have been drug-free for a period sufficient to indicate recovery (normally, at least 3 years). This documentation must accompany the completed application form. The maintenance of any such applicant's certification may be conditional upon periodic drug testing. In addition, any such applicants for Part II of the examination may be site-visited at their practices by representatives of the Board as described in IV.D.4.

B. Mental and Physical Impairment

Applicants who have a mental or physical impairment that could affect their ability to practice orthopaedic surgery will not be admitted to either Part I or Part II of the certifying examination unless they present medical evidence from the appropriate physicians, treatment centers, and hospitals demonstrating to the Board that the impairment does not compromise their ability to render safe and effective care to their patients. This documentation must accompany the completed application form. In addition, any such applicants for Part II of the examination may be site-visited at their practices by representatives of the Board as described in IV.D.4.

VI. Procedure for Application for Part I and Part II of the Certifying Examination

A. Application Dates and Requests

1. The dates, locations, and application deadlines for Part I and Part II of the certifying examination are announced in the Journal of Bone and Joint Surgery. Examination dates may be changed at the discretion of the Board. Confirmation of published examination dates can be obtained from the Board's office.

2. All applications must be requested in writing.

B. Application Deadlines

1. Part I. A completed application on an original form provided by the Board for Part I must be postmarked by registered mail on or before March 1 of the year of the examination. The application must be accompanied by a nonrefundable examination fee of $750.

2. Part II. A completed application on an original form provided by the Board for Part II must be postmarked by registered mail on or before October 1 of the year preceding the examination. The application must be accompanied by a nonrefundable application and credentialing fee of $575.

3. Late or incomplete applications. Applications postmarked after the deadlines for Part I or Part II of the certifying examination and applications received incomplete will be returned to the applicant together with the fee check.

a. If a Part I applicant wishes to resubmit the Part I application by registered mail postmarked on or before March 31, the nonrefundable examination fee of $750 and a nonrefundable late fee of $250 must be enclosed.

b. If a Part II applicant wishes to resubmit the Part II application by registered mail postmarked on or before November 30, the nonrefundable application and credentialing fee of $575 and a nonrefundable late fee of $250 must be enclosed.

4. No applications will be accepted after the final deadlines.

C. Notifying the Board of Application Changes

1. It is the responsibility of all applicants to notify the Board office of any change of address, practice association, or hospital affiliation.

2. If a Part II applicant changes practice location or practice association or acquires new hospital staff affiliations, new references will be solicited by the Board.

3. An applicant is also required to notify the Board of the denial of any request for hospital privileges; of any action to restrict, suspend, or terminate all or any portion of surgical staff privileges, or any request by a hospital to resign all or any portion of surgical staff privileges; and of any action by a governmental agency that would result in the restriction, suspension, or probation of the applicant's license or any right associated with the practice of medicine.

D. Notifying the Applicant of Examination Admission

1. For Part I, the applicant will receive examination information, an assigned examination number, and an admission card not later than 30 days prior to the examination date.

2. For Part II, the decision of the Credentials Committee is mailed to the applicant not later than 60 days prior to the examination date.

E. Fees

1. For Part I, the nonrefundable examination fee of $750 must be submitted with the application form.
2. For Part II:
   a. The nonrefundable application and credentialing fee of $875 must be submitted with the application form.
   b. The candidate must also submit an examination fee of $750 on or before the April date specified in the letter of notification of admission to the examination. This fee will be forfeited if the candidate fails to appear for the examination or cancels after being scheduled.
3. There will be a $50 charge levied for any application or examination fee that is returned not paid by the Board’s bank.
4. The fees paid to the American Board of Orthopaedic Surgery, Inc., are not tax deductible as charitable contributions, but may be deductible under some other provision of the Internal Revenue Service code.

**F. Practice-Based Oral Requirements**

The Part II examination includes a standardized portion and a practice-based portion. The purpose of the practice-based portion is to evaluate a candidate's own practice as broadly as possible. This exercise will be conducted much as rounds or conferences are during residency, with the candidate presenting his or her cases and responding to the examiner’s questions and comments.

1. **Case selection process.** The Board will select 15 cases from the applicant’s 6-month case list(s) from which the applicant will then select ten cases to bring to the examination for detailed presentation.

   The case selection process involves the following steps. Applicants are urged to attend to details and follow procedures carefully and exactly in order to ensure admission to the examination.

   a. **Case collection.** The applicant is to collect all operative cases, including same-day surgery, for which he or she was the responsible operating surgeon for 6 consecutive months beginning July 1 of the year before the Part II examination. If time is taken off during those 6 months, the starting point for the collection period must be backed up by the amount of time missed. For example, case collection for an applicant who took a 2-week vacation in August would begin mid-June.

   All cases must be collected from each hospital or surgery center at which the applicant has operated during the 6-month period.

   b. **Case lists.** Once all cases have been collected, a separate list must be prepared for each hospital or surgery center using forms provided by the Board. Use only these forms. All information must be typed.

   1. Cases are to be grouped according to the ten general categories listed in F.I.c. and recorded chronologically within each category. A separate, complete list containing a minimum of ten pages, one for each category, must be prepared for each hospital or surgery center.

   2. For each case, information provided must include patient name or initials, unit or hospital number, sex, age, diagnosis, treatment, or surgical procedure, length of follow-up, and outcome, including complications.

   3. The first pages of each category for each case list must be certified by the hospital administrator or director of medical records. This means a total of ten certifications for each location. If no cases are reported for a category, indicate “No cases in this category” on the category sheet, complete the certifications, and include the sheet with the case list.

4. Again, it is imperative that all cases be listed, each under the single most appropriate category, and that each case list contain at least one page for each category.

**c. Case categories.** Regardless of how specialized or general an individual’s practice may be, it should be possible for all applicants to use these general categories to group their surgical cases

1. **Incision.** Includes such procedures as arthroscopy with exploration, soft tissue biopsy, superficial abscess drainage, removal of calcific deposits, etc.
2. **Excision.** Includes such procedures as synovectomy, meniscectomy, sequestrectomy, excision of tumors of bone and soft tissue, etc.
3. **Introduction or Removal.** Foreign body removal, injections of steroids, antibiotics, etc.
4. **Repair, Revision or Reconstruction.** Includes arthroplasty, osteotomy, tenodesis, capsular arthroplasty, repair of nonunion with or without bone graft, etc.
5. **Fracture and/or dislocation.** Includes open reduction and/or internal fixation of fractures and dislocations, closed reductions of fractures and dislocations, etc.
6. **Manipulation of a knee or shoulder, etc., under anesthesia.**
7. **Arthrodesis.** All techniques.
8. **Amputation.** Any level.
9. **Miscellaneous.** Any surgical procedure that does not fit into any of the categories listed.
10. **Complications.** Systemic complications occurring in perioperative period up to six weeks post-op, such as pulmonary embolus, cardiac abnormalities, abdominal problems such as ileus, stress ulcer, cerebrovascular accident, and urinary difficulties. Local complications, such as wound infection, failure of fixation, dislocation of a total joint arthroplasty, skin slough, compartment syndrome, neurologic and/or vascular impairment, etc., related to a surgical procedure.
11. **Common categorization questions**

   1. **If a case listed in one of the first nine categories incurs a complication, indicate that the case also appears in the complications category by making a notation in the “Length of Follow-up and Outcome” column. Then list the complication in the tenth category.**

   2. Arthroscopic procedures that do not fit into categories one through eight should be listed in category nine.

e. **Submission and selection of cases**

   1. The applicant must send the original and one copy of his or her complete case lists to the Board by certified mail on or before January 31 of the year of the examination. Remember that these must be on the forms provided by the Board and that each list must contain a minimum of ten pages, one for each category.

   Before mailing, the applicant should make an additional copy of all lists for his or her files. Copies must also be brought to the exam. (See 2.a.2. below.)

   2. The Board will select 15 cases, a list of which will be sent to the applicant. The applicant will then choose any ten of these 15 cases to present in detail at the examination.

2. **Examination materials.** Once the candidate has received the Board’s list of 15 cases, he or she must gather all of the following to bring to the examination

   a. **Lists**

      1. Three copies of the list of 15 cases selected by the Board.

      2. Three copies of the complete six-month case lists, one for each hospital or surgery center. All of the ten cases selected by the candidate for presentation should be circled in red or highlighted wherever they appear on the case lists.
b. Documentation for the ten cases selected by the candidate for presentation, including  
1. Images. The pertinent preoperative, intra- or immediate postoperative, and most recent follow-up x-rays for each case selected by the candidate for presentation. Before the examination begins, x-rays should be arranged in order of presentation and clearly marked in terms of date pre- and postoperative. Pertinent images in CT and MRI panels must also be marked.  
2. Notes. Copies of admission and discharge notes, operative notes, office notes, and any other patient chart material that will aid in case presentation.  
3. Vide prints or photographic prints for arthroscopy cases selected, showing the initial lesion(s) and the lesion(s) after treatment.  
4. For any selected case that is a complication, copies of consultations and x-rays pertinent to the complication and its treatment.

C. Because the examination is to be anonymous, the candidate should obliterate his or her name wherever it appears on any material brought to the examination, including the 6-month case list(s) and the Board’s list of 15 selected cases.

3. Although the examiners will concentrate on cases brought for presentation, they may ask questions pertaining to a candidate’s case list or practice. The candidate should not be concerned if all material brought to the examination is not covered. Discussion may focus on one area, or candidate and examiners may become involved in a few cases in such detail that time will not allow presentation of all patients. The candidate will not be penalized for this during the grading.

4. Applicants who have questions about materials and procedure for the practice-based oral portion of the Part II examination should call or write the Board office well before the exam. Failure to comply with the steps outlined may invalidate an examination.

VII. Falsified Information and Irregular Behavior

A. If it is determined that an applicant has falsified information on the application form or failed to provide material information, the applicant will not be considered for either part of the examination not already passed and must wait 3 years before being allowed to file a new application. The applicant will not be considered for admission to either part of the examination during this 3-year period.

B. Examination applicants should understand that the following may be sufficient cause to bar them from future examinations, to terminate participation in the examination, to invalidate the results of an examination, to withhold or revoke scores or certificates, or to take other appropriate action:

1. The giving or receiving of aid in the examination, as evidenced either by observation or by statistical analysis of incorrect answers of one or more participants in the examination.

2. The unauthorized possession, reproduction, or disclosure of any materials, including, but not limited to, examination questions or answers, before, during, or after the examination.

3. The offering of any benefit to any agent of the Board in return for any right, privilege, or benefit that is not usually granted by the Board to other similarly situated candidates or persons.

C. The following are examples of behavior considered to be irregular and cause for invalidation of the examination or imposition of a penalty:

1. Referring to books, notes, or other devices at any time during the examination. This prohibited material includes written information or information transferred by electronic, acoustical, or other means.

2. Any transfer of information or signals between candidates during the test. This prohibition includes any transfer of information between the candidate and any other person at any time during the testing period, including bathroom breaks.

3. Any appearance of looking at the answer sheet or the examination booklet of another candidate during the examination.

4. Allowing another candidate to view one’s answer sheet or examination booklet or otherwise assisting another candidate in the examination.

5. Taking any examination material outside the examination room. All examination materials are the property of the Board and must be left in the room at the end of the examination.

D. Applicants should also understand that the Board may or may not require a candidate to retake one or more portions of the examination if presented with sufficient evidence that the security of the examination has been compromised, notwithstanding the absence of any evidence of a candidate’s personal involvement in such activities.

VIII. Credentials Decisions

A. Determining Admission to Examinations

1. The Credentials Committee meets at least once each year to consider applications for the examinations. At this meeting, a decision about each applicant will be made either to approve admission to the next examination, to deny admission, or to defer decision pending further evaluation.

2. A decision approving admission to an examination applies only until the next available examination and does not carry over from one examination until the next. A new application is required for each examination.

B. Deferral of Admission Decision

A decision on an applicant’s admission to either Part I or Part II of the examination may be deferred if information is insufficient for the Credentials Committee to make a judgment.

Typically, the committee will defer such a decision for 1 year to gain further information. If information is still insufficient, the decision will be deferred for a second year to enable representatives of the Board to conduct a site visit as described in IV.D. A deferral of not more than 2 consecutive years is not viewed by the Board as an adverse action; thus, no appeal from a decision of the Credentials Committee is permitted unless an applicant has been denied admission or has been deferred for more than 2 consecutive years.

C. Appeal of Admission Decision

An applicant denied admission to the examination will be informed of the basis for such action and may request a hearing by an appeals committee of the American Board of Orthopaedic Surgery. (See XII.)

IX. Certification and Recertification by the American Board of Orthopaedic Surgery

A. Awarding Certificates

The American Board of Orthopaedic Surgery awards a certificate to a candidate who specializes in orthopaedic surgery, has met the educational requirements of the Board, has demonstrated competence in orthopaedic surgery and adherence to ethical and professional standards, and has passed both parts of the certifying examination. Certificates awarded after 1985 are valid for 10 years. This portion of the Board’s responsibility is discharged by issuance of a certificate to an individual found qualified as of the date of certification.

B. Certificate Revocation

A certificate may be revoked prior to its expiration date because of intentional and substantial misrepresentation to the Board of the
applicant's education and other requirements for admission to either part of the examination. Early revocation may also occur because of limitation, suspension, or termination of the right to practice medicine in any state, province, or country due to a violation of a medical practice act, statute, or governmental regulation; disciplinary action by any medical licensing authority; or voluntary surrender while under investigation. Before a certificate is revoked, the diplomat will be informed of the basis of such action and will be afforded a hearing according to procedures formulated by the American Board of Orthopaedic Surgery.

C. Certificate Reinstatement
Should the circumstances that justified revocation or surrender of the diplomat's certificate be corrected, the Board may reinstate the certificate after appropriate review of the individual's qualifications and performance, using the same standard applied to other applicants for certification.

D. Recertification Process
Diplomates are encouraged to renew their credentials periodically through the Board's recertification process. Information about recertification options can be obtained from the Board office.

X. Unsuccessful Candidates
Unsuccessful Part I candidates may repeat the examination by submitting a new application form for the examination and again being found admissible. (See VI.B.1.)

Unsuccessful Part II candidates may repeat the examination by submitting a new application form for the examination and again being found admissible. (See VI.B.2 and VIII.) Candidates who do not pass Part II within 5 years after passing Part I must retake and repass Part I before applying to take Part II, except as noted in IV.

XI. Program Accreditation
Institutions offering orthopaedic education must meet the General and Special Requirements of the Accreditation Council for Graduate Medical Education and the Residency Review Committee for Orthopaedic Surgery as stated in the Directory of Graduate Medical Education Programs Accredited by the Accreditation Council for Graduate Medical Education. (See III.D.)

A. Residency Review Committee for Orthopaedic Surgery
Program accreditation is issued by the Residency Review Committee for Orthopaedic Surgery, an autonomous committee composed of three representatives from each of the three sponsoring organizations: the American Board of Orthopaedic Surgery, the Council on Medical Education of the American Medical Association, and the American Academy of Orthopaedic Surgeons. In evaluating orthopaedic residency programs, the Residency Review Committee considers the number of residents, training period, program organization, educational experience, and institutional responsibility. The committee meets twice yearly.

B. Changes in Accreditation
Programs seeking changes in accredited positions or institutional affiliations can obtain information and application forms from the secretary of the Residency Review Committee for Orthopaedic Surgery at the Accreditation Council for Graduate Medical Education, 515 N State St, Chicago, IL 60610.

Completed forms are to be returned to the secretary at the above address.

C. Program Surveys
Programs applying for accreditation or changes in accreditation will be surveyed at the earliest feasible date by a specialist site visitor or by a field representative for the Accreditation Council for Graduate Medical Education. A report of the survey is submitted to the Residency Review Committee for Orthopaedic Surgery for evaluation and official action. The Residency Review Committee makes a determination regarding the accreditation of the program under authority delegated by the Accreditation Council for Graduate Medical Education, and it notifies the program director and the hospital.

D. Number of Residents
The total number of residents assigned to any orthopaedic residency program and the number at each level of education must have prior approval by the Residency Review Committee for Orthopaedic Surgery.

XII. Appeals Procedure
A. An individual who has received an unfavorable ruling from a committee of the Board may appeal such determination by mailing a notice of appeal to the office of the American Board of Orthopaedic Surgery within 60 days of the date such ruling was mailed to him or her. Exception: The decisions by the Examinations Committee that a candidate has failed either part of the certifying examination may be appealed only in the manner and to the extent provided in paragraphs G and H below.

B. Upon receipt of a notice of appeal, the concerned Board committee shall consider any information submitted therewith by the individual in support of his or her appeal and make such further investigation as it deems appropriate. If the committee then decides in a manner favorable to the individual, it shall so notify the individual. If the committee does not so determine, it shall notify the individual and the president of the American Board of Orthopaedic Surgery.

C. The individual shall then have the right to an appeal hearing to decide whether the determination of the concerned Board committee shall be confirmed, modified, or overruled in accordance with the hearing process described in this appeals procedure.

1. The president of the American Board of Orthopaedic Surgery shall appoint an ad hoc appeals committee consisting of three directors of the Board who did not participate in making the determination being appealed, one of whom shall be designated by the president as chairman of the appeals committee.

2. In event that the subject matter of the appeal involves complex issues of fact or issues not solely dependent upon medical, surgical, or professional standards, the president of the American Board of Orthopaedic Surgery, at his or her sole discretion, may appoint a hearing officer to conduct the appeal hearing and to submit a full written report and a recommended decision to the ad hoc appeals committee. The hearing officer appointed at the discretion of the president shall be an impartial physician, lawyer, or other professional.

3. The chairman of the appeals committee shall convene a hearing before the appeals committee or the hearing officer, if one is appointed, within a reasonable time after their respective appointments, but not less than 60 days after the appointment of the appeals committee and the hearing officer, whichever is later.

D. Prior to the hearing
1. The concerned Board committee shall provide the executive director with such written information concerning its decision as it deems appropriate; a list of witnesses, if any, whom it expects to call to testify; copies of any written material that it considered in making the determination appealed (but only if it intends to present such material at the hearing); and a list of information and documents that the individual is required to produce at the hearing. This material, together with written notice stating the time and place of the hearing, shall be sent to the individual by the executive director not less than 30 days prior to the hearing. Not less than 7 days prior to the
hearing, the concerned Board committee shall provide the executive director and the individual with copies of any written reports, affidavits, or statements of experts that the concerned Board committee intends to present at the hearing.

2. Not less than 7 days prior to the hearing, the individual shall provide the executive director and the concerned Board committee with such written information concerning his or her position as he or she deems appropriate; a list of witnesses, if any, whom he or she expects to call to testify; and copies of any written reports, affidavits or statements of experts that he or she intends to present at the hearing.

3. The executive director shall submit the written material referred to in this section D to the members of the appeals committee of the hearing officer, if one has been appointed, prior to the hearing. Copies of this material must also be submitted to the individual and to the concerned Board committee no later than the time when submitted to the appeals committee or the hearing officer.

E. The hearing, whether conducted before the appeals committee or a hearing officer, shall be a hearing de novo. The concerned Board committee and the individual shall have the right to present all relevant information and evidence in support of their respective positions, and neither the concerned Board committee nor the individual shall be limited to the information and evidence considered by the concerned Board committee in making its original determination or its reconsideration of the original decision.

1. The concerned Board committee shall have the burden of proving at the hearing that the determination being appealed should be confirmed. The standard of proof to be applied by the appeals committee and the hearing officer in deciding whether the information and evidence presented at the hearing is sufficient to warrant confirmation of the determination being appealed is by the preponderance or greater weight of the evidence.

2. At the hearing, the concerned Board committee and its legal or other representatives shall present such relevant information and evidence as it deems appropriate to support its previously made determination. However, the committee shall not have the right to present any information or evidence not previously provided as required in D.2. The committee may call, examine, and cross-examine witnesses.

3. The individual shall have the right to be represented at the hearing by legal counsel or any person of his or her choice. He or she may present such relevant information and evidence as he or she deems appropriate in support of his or her position. However, the individual shall not have the right to present any information or evidence not previously provided as required in D.2. The failure of the individual to produce information or documents requested by the concerned Board committee as required in D.2 shall be grounds for upholding and confirming the determinations of the concerned Board committee. The individual may call, examine, and cross-examine witnesses.

4. The individual and the concerned Board committee may submit written statements at the close of the hearing. A written record of the hearing shall be made available to the individual at one-half the cost of its preparation.

F. After the conclusion of the hearing:

1. If the hearing has been conducted before a hearing officer, the hearing officer shall prepare a written report based upon the information and evidence presented, including the findings of fact determined by the hearing officer and a recommended decision as to whether the determination being appealed should be confirmed, modified, or overruled. The hearing officer shall submit the written report of the appeals committee and send copies to the individual and the concerned Board committee. The individual and/or the concerned Board committee may file objections to the report and recommendations of the hearing officer with the appeals committee within 10 days after receipt of the report. The opposing party shall then have 10 days to file its response to such objections with the appeals committee.

2. The appeals committee shall make its decisions following the hearing. If the hearing has been conducted before a hearing officer, the appeals committee will first receive the written report and recommendations of the hearing officer and the objections and responses filed thereto by the parties. If a majority of the members of the appeals committee determine, on the basis of the information and evidence presented, including, when applicable, the report and recommendations of the hearing officer, that the determination of the concerned Board committee should be confirmed or modified, the appeals committee shall so declare. If a majority determines that the concerned Board committee's determination should be overruled, the appeals committee shall so declare. The appeals committee shall inform the individual and the concerned Board committee of its decision in writing within a reasonable time following the hearing, explaining the basis for its judgment. The decision of the appeals committee shall be final and binding.

G. A candidate who believes that the Part II examination was administered in an unfair or inaccurate manner or that one or more of his or her oral examiners was acquainted with him or her or was not impartial may immediately, upon completion of the examination, request that he or she be reexamined. The request shall be made to the chairman of the Oral Examinations Committee and reviewed by the president and the secretary. If, after discussing the matter with the candidate and making such other investigations as they may deem appropriate, a majority of the president, the secretary, and the chairman of the Oral Examinations Committee determine that reasonable grounds exist for the candidate's request, he or she shall be immediately reexamined by another panel of oral examiners. In such event, the first oral examination will be disregarded and only the candidate's performance on the reexamination shall be considered in determining his or her score on the examination.

H. A candidate who fails the Part I examination may request in writing that his or her examination be rescored by hand to verify the accuracy of the results as reported to him or her. Such a request is to be made within 60 days of his or her being notified of the results of the examination. The request must be accompanied by a check for $10 payable to the American Board of Orthopaedic Surgery to cover the cost of hand scoring. There shall be no further appeal of a failure on the Part I examination.

American Board of Otolaryngology
M Eugene Tardy, Jr, MD, President, Chicago, Illinois
Eugene N Myers, MD, Vice President/President Elect, Pittsburgh, Pennsylvania
D Thane Boddy, MD, Treasurer, Ponte Vedra Beach, Florida
Byron J Bailey, MD, Immediate Past President, Galveston, Texas
Warren Y Adkins, MD, Charleston, South Carolina
Roger L Crumley, MD, Irvine, California
Charles W Cummings, MD, Baltimore, Maryland
Transfers
A resident wishing to transfer from one residency program to another must notify the ABO in writing, and explain the circumstances of the proposed transfer.

Letters from the current and prospective directors of training must also be submitted. The letter from the current program director must verify the exact amount of training successfully completed in the program. The letter from the prospective program director must verify that sufficient residency positions, accredited by the Residency Review Committee for Otolaryngology of the Accreditation Council for Graduate Medical Education (ACGME), exist in the program to provide the transferring resident with the training necessary to meet the requirements of this Board for certification.

General Requirements
There is no required time interval between completion of the residency program and making application for examination. However, all residency training must be successfully completed before the date of the examination in any given year.

The applicant must possess high moral, ethical, and professional qualifications as determined by, and in the sole discretion of, the Board.

The applicant must be a graduate of an approved school of medicine or osteopathy.

The applicant must submit verification of a valid, unrestricted license to practice medicine.

Training Requirements
Training programs in otolaryngology-head and neck surgery in the United States are evaluated by the Residency Review Committee for Otolaryngology, which consists of representatives from the American Medical Association, the American College of Surgeons, and the ABO, and are accredited by the ACGME. Information concerning approved educational programs is contained in the Graduate Medical Education Directory published by the American Medical Association.

All training specified below must be successfully completed in ACGME-approved programs, or in programs in Canada accredited by the Royal College of Physicians and Surgeons of Canada.

The applicant whose residency training began July 1, 1981, or thereafter must have satisfactorily completed a minimum of 5 years of residency training as follows:

1. At least 1 year of general surgical training. It is preferred that the general surgical residency be taken prior to otolaryngologic training, but it may not be taken following otolaryngologic training.

2. At least 3 years of residency training in otolaryngology-head and neck surgery. This training must involve increasing responsibility each year and must include a final year of senior experience. This final year must be spent within the accredited program in which the previous year of training was spent, unless prior approval is obtained from the Board.

3. An additional year of residency training, which may be in otolaryngology, general surgery or other residencies or internships. If this year of training is not in otolaryngology, it must be taken prior to the final year of otolaryngology residency.

All residency training must be completed in a manner acceptable to the head of that residency program.

The applicant whose residency training begins July 1, 1997, or thereafter will be required to complete 1 year of general surgical training and 4 years of otolaryngologic training, for a total of 5 years of residency training.

Beginning in 1997, the ABO will examine only the number of residents graduates from a program in any given year that is the RRC (ACGME) approved number of graduates for that year.
Foreign Training
An applicant who completed otolaryngologic training in the United Kingdom or the Republic of Ireland in a program accredited by the Specialist Advisory Committee, and who has received a certificate of accreditation in otolaryngology from the Joint Committee on Higher Surgical Training in the United Kingdom and the Republic of Ireland may be considered for examination.

An applicant who completed otolaryngologic training under the New Zealand program after January 1, 1984, and passed the examination leading to Fellowship in the Royal Australasian College of Surgeons or who completed training under the Australian program after January 1, 1986, and has passed the examination leading to Fellowship in the Royal Australasian College of Surgeons may be considered for examination.

Application for Examination
Application materials for the written examination in any given year become available January 2 and must be completed and returned by May 1 of that year. The application consists of the following:

1. Application, signed by the program director and another ABO diplomate. A current photograph, signed on the front, must be attached to the application. A duplicate photograph, also signed on the front, must be attached to a signature card provided with the application.

2. Verification of medical degree (official transcript or letter from Dean).

3. Verification of otolaryngology residency form, signed by the program director, attesting to satisfactory completion of the training program.

4. Verification of surgery residency form, signed by the chief of surgery, attesting to satisfactory completion of the training program.

5. Verification of additional residency form, signed by the appropriate program director, attesting to satisfactory completion of the training program or internship.

6. Credentials questionnaire, regarding practice privileges, licensure actions, etc.

7. Candidate authorization, for release of information from the Federation of State Medical Boards.

8. Verification of all licenses to practice medicine, showing nonrestricted status and date of expiration.

   Individuals who have completed residency training but who will enter a fellowship program utilizing an institutional license must submit a statement from the program director as evidence of this fact.

   Individuals who have completed residency training but who will go on to practice medicine in a foreign country not requiring licensure must make a written request to be accepted for the examination without medical license. Such requests should be submitted with the application.

9. Operative experience report (dissected and printed), which lists procedures assisted in and performed by the applicant during otolaryngology residency.

Additional information may be requested by the Board from the following: local medical society, Board certified otolaryngologists from the geographical area in which the applicant practices, the director of the applicant's training program, hospital chiefs of staff, and/or other individuals and entities who may have knowledge of the applicant's moral and ethical standing, qualifications, or abilities.

Applications are approved by the Credentials Committee in June, and applicants are then notified if they have been approved for examination. The Board reserves the right to reject any application. Applications are valid for one written exam and three oral exams. At the conclusion of this period, or upon failure of the written exam, the application expires, and individuals are required to submit new forms.

Leaves of Absence
Leaves of absence and vacation may be granted to residents at the discretion of the program director in accordance with local rules. The total of such leaves and vacation may not exceed 6 weeks in any one year. If a longer leave of absence is granted in any year, the required period of graduate medical education may be extended accordingly.

Applicants With Special Disabilities
The ABO offers examinations in a place and manner accessible to persons with disabilities or offers alternative accessible arrangements for such individuals. Requests for such accommodations should be submitted with the application prior to May 1 of any given year.

Fees
General Information
- 1. Fees are not refundable, nor can they be "held over" to a subsequent exam.
- 2. All fees must be paid in US funds. Applicants residing outside the United States must submit payment by International Money Order.
- 3. Fees must be paid in full by the stated deadlines. Applications without payment will not be processed.
- 4. A fee of $200 will be charged for any application or portion thereof postmarked between May 1 and May 15. Applications are not accepted after May 15.
- 5. A fee of $25 will be charged for any check returned by the bank for insufficient funds.
- 6. Fees are subject to change at the discretion of the board.

New Applicants
1. The examination fee is $1,600. First-time applicants must submit $800 with the application by May 1. The additional $800 is due by July 15.

2. Individuals who become candidates for the oral examination (by achieving the qualifying score on the written examination) take their first oral examination at no additional cost.

3. Candidates are given three consecutive opportunities to take the oral examination. A fee of $900 will be charged for the second and/or third oral examination.

Reapplicants
1. If an individual fails the written examination, or if a passing score is not achieved after three oral exams, the individual must reapply to take the written exam and $1,600 must accompany the reapplication form.

2. Individuals who again become oral candidates follow the same procedure and pay the same fees as outlined in paragraph 3 of the new applicants section above.

Board Eligibility and Status Inquiries
The ABO does not recognize or use the term "Board-eligible." The Board states whether an individual is certified, is not certified, or is in the process of being examined (i.e., between written and oral examinations).

Purpose of Examination
The purpose of the examination is to determine the candidate's knowledge, skill, and understanding in the following categories:

1. Morphology, physiology, pharmacology, pathology, microbiology, biochemistry, genetics, and immunology relevant to the head and
neck; the respiratory and upper alimentary systems; the communication sciences, including knowledge of audiology and speech-language pathology; the chemical senses and allergy, endocrinology, and neurology as they relate to the head and neck.

2. Diagnosis and diagnostic methods including audiolologic and vestibular assessments, electrophysiologic techniques, and other related laboratory procedures for diseases and disorders of the ears, the respiratory and upper alimentary systems, and the head and neck.

3. Therapeutic and diagnostic radiology, including the interpretation of medical imaging techniques relevant to the head, neck, and thorax, including the temporal bone, skull, nose, paranasal sinuses, salivary and thyroid glands, larynx, neck, lungs, and esophagus.

4. Diagnostic evaluation and management of congenital anomalies, allergy, trauma, and other diseases in the regions and systems mentioned above.

5. The cognitive management, including operative intervention with its preparative and postoperative care, of congenital, inflammatory, endocrine, neoplastic, degenerative, and traumatic states, including
   a. Temporal bone surgery
   b. Paranasal sinus and nasal surgery
   c. Skull base surgery
   d. Maxillofacial surgery including the orbits, jaws, and facial skeleton
   e. Esthetic, plastic and reconstructive surgery of the face, head, and neck
   f. Surgery of the thyroid, parathyroid, pituitary, and salivary glands
   g. Head and neck reconstructive surgery relating to the restoration of form and function in congenital anomalies and head and neck trauma, and associated with ablative operations
   h. Endoscopy, both diagnostic and therapeutic
   i. Surgery of the lymphatic tissues of the head and neck

6. The habilitation and rehabilitation techniques and procedures pertaining to respiration, deglutition, chemoreception, balance, speech, and hearing.

7. The current literature, especially pertaining to the areas listed above.

In order to assist otolaryngology program directors in evaluating their programs, the Board reports each applicant's examination results to the director of the program in which the applicant completed his/her senior resident year.

**Examination Procedure**

The Board vigorously enforces the highest standards of honesty and integrity in its examination process. Accordingly, the following are considered a breach of ABO policy and are forbidden, and may be sufficient cause for the ABO to terminate an applicant's participation in the examination, to invalidate the results of the examination, to withhold an applicant's score or certificate, to bar an applicant permanently from all future examinations, to revoke a certificate, or to take other appropriate action:

1. Pseudonymization of the application or the submission of any falsified documents to the ABO
2. The giving or receiving of aid in the examination, including, but not limited to, copying answers from another candidate or permitting one's answers to be copied, as evidenced by observation at the time of the examination or by statistical analysis afterward
3. The offer of any financial or other benefit to any director, officer, employee, proctor, or other agent or representative of the ABO in return for any right, privilege, or benefit that is not usually granted by the ABO to other similarly situated candidates or persons
4. The unauthorized possession, reproduction, recording, discussion or disclosure of any material, including but not limited to, written or oral examination questions or answers before, during, or after the examination.

Proctors are required to report any suspected irregularity during an examination. A candidate may be moved to a more isolated area, or his or her participation in the examination may be terminated. Additionally, the ABO's educational consultants may undertake statistical studies of a candidate's answers compared with the answers of other participants in the examination to provide evidence that would support or fail to support a suspected irregularity. If, in the opinion of the ABO, there exists a probability that an irregularity occurred, the ABO will afford the suspected individual(s) procedural due process in order to assure fairness in the determination as to whether an irregularity has occurred.

The ABO will not report scores or grant certification on the basis of scores that it has determined to be invalid, and reserves the right to take whatever legal action is indicated with regard to violation of ABO copyright or examination violations.

**Certification, Rejection and Revocation (from the Bylaws, Article VI)**

The Board shall issue an appropriate certificate of qualification in otolaryngology (or in a subdivision thereof) to those who show themselves worthy of such certification according to the requirements of training, experience, and demonstrated competence as stated in the current ABO Booklet of Information.

No certificate shall be issued, and any certificate issued by the Board shall be subject to revocation at any time by the board, if it shall determine that the person involved:

1. Did not possess the required qualifications and requirements for examination, whether or not such deficiency was known to the Board or any director thereof, or could have been ascertained by the Board prior to examination or at the time of the issuance of a certificate as the case may be.
2. Made a material misstatement or withheld information in his/her application or any other representation to the Board or any Committee thereof, whether intentional or unintentional.
3. Has been convicted by a court of competent jurisdiction of any felony or misdemeanor involving moral turpitude, and in the opinion of the board, having a material relationship to the practice of medicine.
4. Had a license to practice medicine revoked, or shall have been disciplined or censured by any court or other body having proper jurisdiction and authority because of any act or omission arising from the practice of medicine.

If the Board determines to withhold or revoke any certificate for any reason, the person affected thereby shall be given written notice of the reasons therefor. Such actions by the Board shall be regarded as final unless such person requests a review of such action within 30 days after notice thereof has been mailed by the board.
A. Primary Certification

In addition to accredited pathology training, all applicants for primary certification must meet the credential training/experience requirement of 1 full year of clinical training, clinical experience, or clinically related research (see Section IV, The Credentialing Year).

1. Training. The candidate must satisfactorily complete pathology training in a program accredited by the ACGME as outlined.
   a. Combined Anatomic and Clinical Pathology (APCP) Certification
      Four full years of full-time, approved training in an accredited APCP-4 program that includes at least 18 months of formal (structured) training in anatomic pathology and 18 months of formal (structured) training in clinical pathology, and either an additional 12 months of full-time, continued formal (structured) training in anatomic pathology or 12 months of full-time approved flexible training in a specialty facet of pathology as part of the defined 4 year accredited APCP training program.
   b. Anatomic Pathology (AP) Certification
      1. Three full years of full-time, approved training in anatomic pathology in an accredited APCP-4 or AP-3 program that includes at least 24 months of formal (structured) training in anatomic pathology, and either an additional 12 months of full-time, continued formal (structured) training in anatomic pathology or 12 months of full-time approved flexible training in a specialty facet of pathology as part of the defined accredited training program.
      2. Primary certification in clinical pathology and 2 full years of full-time, approved training in anatomic pathology in an accredited APCP-4 or AP-3 program, with at least 18 months being formal (structured) training in anatomic pathology. Six months may be full-time approved training in a specialty facet of pathology as part of the defined accredited training program.
   c. Clinical Pathology (CP) Certification
      1. Three full years of full-time, approved training in clinical pathology in an accredited APCP-4 or CP-3 program that includes at least 24 months of formal (structured) training in clinical pathology, and either an additional 12 months of full-time, continued formal (structured) training in clinical pathology or 12 months of full-time approved flexible training in a specialty facet of pathology as part of the defined accredited training program.
      2. Primary certification in anatomic pathology and 2 full years of full-time, approved training in clinical pathology in an accredited APCP-4 or CP-3 program, with at least 18 months being formal (structured) training in clinical pathology. Six months may be full-time approved training in a specialty facet of pathology as part of the defined accredited training program.

2. Experience. Only under special circumstances will experience credit be given toward the pathology training requirements for primary certification. Two months of full-time practice experience in pathology acceptable to the ABP is equivalent to 1 month of accredited pathology training. The substitution of experience credit for a portion of accredited pathology training requires the assessment and approval of the director of the pathology training program to ensure that such will permit the continuation of an adequate broad experience of good quality in anatomic and/or clinical pathology.

Under exceptional circumstances, credit for extensive full-time pathology practice experience in a country other than the United States or Canada may be granted toward the requirements for primary certification, provided that the candidate has...
had a total of 8 years of full-time practice experience in pathology acceptable to the ABP, with at least 4 years having been in the United States or Canada. For AP qualification, the experience must have been in the actual practice of AP; for CP, in the actual practice of CP; and for combined AP/CP, 4 years in AP and 4 years in CP.

3. Advanced Pathology Training Credit Mechanisms. Under special circumstances, advanced credit will be given by the mechanisms described. The acceptance of advanced credits as substitutes for accredited pathology training toward primary certification is not automatic and is evaluated on an individual basis. Credit is given only for activities that have occurred in either the United States or Canada. The total combined period of advanced pathology training credit allowed for paragraphs a, b, and c in this section will not exceed 1 year (12 months) and can only be applied to the flexible year of required pathology training necessary for certification in AP/CP, AP, or CP.

To avoid any misunderstanding, potential applicants should communicate with the office of the ABP early in the training period to ascertain if credit may be acceptable.

The training program director will be asked to assess the proposal and to provide a recommendation as to the amount of credit that the director believes the candidate should receive.

The Board will notify the director of the pathology training program of such potential credit. Prior to admission to the certifying examination, the director of the final year of training must certify that the candidate is fully qualified to sit for the examination.

a. Student fellowship training during medical school. Credit toward the training requirements for primary certification may be granted for medical student fellowship training or research taken after successful completion of the medical school course in pathology. Provided the candidate did not receive credit for research toward graduation from medical school that the training was full-time and is validated by the director of the student fellowship program, and that it is approved as an acceptable experience by the director of the accredited pathology training program in which the candidate is registered. The training or research must take place in a department of pathology that has an accredited training program. No credit is given for elective or for courses that are part of the medical school curriculum.

b. Candidates holding a PhD degree in a specialty discipline of pathology or a basic science related to pathology may under certain circumstances obtain pathology training credit regardless of whether it was received before or after the medical degree. The evaluation and approval of the amount of training credit will depend on an assessment by the ABP regarding the relevance of the subject to anatomic or clinical pathology.

c. Research with a direct application to the practice of anatomic or clinical pathology, and not leading to an advanced degree, may be considered for credit not to exceed 1 year (12 months) in combination with other advanced credits. The research must be full-time. No credit is given for research employment as a technician or technologist. The ABP encourages research and believes that all candidates should carry on investigation, teaching, and the publication of scientific papers during primary training.

4. Post Pathology Course Fellowship—criteria for acceptance. Under certain circumstances, candidates may receive advanced pathology training credit toward the primary certification requirements for post pathology course fellowship training in pathology. Such credit is NOT given toward the requirements for special or added qualification certification. The credit is assessed on an individual basis. Granted credit will be assigned to the flexible year of required primary training. Credit will not be given toward the required 18 months of formal (structured) anatomic pathology training or the required 18 months of formal (structured) clinical pathology training necessary to qualify for combined anatomic and clinical pathology certification.

Advanced credit toward single certification in anatomic pathology or single certification in clinical pathology will be given toward the flexible year of required pathology training and not toward the 24 months of required formal (structured) training. The guidelines for acceptable post pathology course fellowship training for credit are:

a. Fellow must have fully and satisfactorily completed the sophomore year of medical school.

b. Fellow must not receive credit for fellowship activities toward the requirements for graduation from medical school.

c. Training must be full-time in a department of pathology that has a fully accredited pathology training program.

d. Training must be under the direction of the director of the pathology training program or the chairman of the department of pathology.

e. A description of proposed activities, responsibilities, and assignments for anatomic pathology, clinical pathology, and research must be available and on file prior to beginning of fellowship. If a formal institutional program exists, a copy should be filed with the ABP.

f. A validation and evaluation report must be submitted on completion of the fellowship by the program director or chairman of the department of pathology if the fellow wishes credit toward certification requirements.

5. Additional Training or Experience. A candidate for primary certification who has completed the required pathology training 5 years or more prior to the date of submission of an application for examination must have either 1 year of additional training in pathology in a program accredited for such training by the ACGME or 2 full years of additional practice experience in pathology in the United States or Canada in a situation acceptable to the Board. This additional requirement must be met during the 5-year period immediately preceding the date of submission of an application.

B. Special Qualification Certification

All candidates applying for special qualification certification must hold a primary certificate from the ABP or, where permissible, from another primary medical specialty Board of the American Board of Medical Specialties (ABMS).

Credit is not given for pathology training taken outside the United States and Canada. Also, credit is not given for training in areas of special qualification that were part of the training program leading to the requirements necessary to qualify to sit for the primary examination in AP and/or CP.

No advanced credit will be given toward the requirements for special qualification certification by the mechanisms described in Section III A 3, Advanced Pathology Training Credit Mechanisms.

1. Blood Banking/Transfusion Medicine (BB/TM)

a. Applicants who hold a certificate in anatomic and clinical pathology, clinical pathology only, or a primary certificate plus a special qualification certificate in hematology from another primary medical specialty Board of ABMS

1. One full year of additional training in blood banking/transfusion medicine in a program accredited for such training by the ACGME or approved for such training by the ABP or

2. Two additional years of full-time experience or its equivalence in blood banking/transfusion medicine under circumstances acceptable to the ABP.
b. Applicants, other than those described in 1a, who hold a primary certificate from a primary medical specialty Board of ABMS: 2 years of full-time training in blood banking/transfusion medicine in a program accredited for such training by the ACGME.

c. Applicants seeking combined certification in clinical pathology and blood banking/transfusion medicine (CP/BB/PM): see Section III D, Combined Primary and Subspecialty Certification.

2. Chemical Pathology (Chem P)
a. Applicants who hold a certificate in anatomic and clinical pathology or clinical pathology only:
   1. One full year of additional training in chemical pathology in a program accredited for such training by the ACGME or approved for such training by the ABP or
   2. Two additional years of full-time experience or its equivalence in chemical pathology under circumstances acceptable to the ABP.

b. Applicants, other than those described in 2a, who hold a primary certificate from a primary medical specialty Board of ABMS: 2 years of full-time training in chemical pathology in a program accredited for such training by the ACGME.

c. Applicants seeking combined certification in clinical pathology and chemical pathology (CP/Chem P), see Section III D, Combined Primary and Subspecialty Certification.

3. Dermatopathology (DP)
Certificate in dermatopathology is a joint and equal function of the ABP and the American Board of Dermatology (ABD). Such function relates to qualifications of candidates, standards of examinations, and the form of the certificate.

All candidates applying for examination must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in either the United States or Canada.

a. Prerequisites
   The ABP and the ABD will admit candidates to examination for certificates of special qualification in dermatopathology who are otherwise qualified and who have met one of the following requirements:
   1. Applicants who are diplomats of the ABP and the ABD.
   2. Applicants already holding a primary certificate from the ABP (anatomic pathology, or combined anatomic and clinical pathology) or the ABD and the addition of at least 1 year of training in dermatopathology in a program accredited for such training by the ACGME. This additional training must be taken after the candidate has met the full training requirements for certification in pathology or dermatology.

b. Training
   Training programs in dermatopathology are a joint and equal function of the departments of pathology and dermatology. The pathologist applicant must spend one-half of the required training in clinical dermatology.

Committee for Dermatopathology
Ronald J Barr, MD, Orange, California
Merle W Delmer, MD, San Antonio, Texas
Mark A Everett, MD, Oklahoma City, Oklahoma
Loren E Golitz, MD, Denver, Colorado
Dwight K Oxley, MD, Wichita, Kansas
Kay Herrin Woodruff, MD, San Pablo, California

Candidates may obtain an application as follows
Pathologists
William H Hartman, MD
Executive Vice President
American Board of Pathology
PO Box 25915
Tampa, FL 33622-5915

4. Forensic Pathology (FP)
a. Applicants who hold a certificate in anatomic and clinical pathology, anatomic pathology only, or in special instances, clinical pathology only:
   1. One full year of additional supervised training in forensic pathology for such training by the ACGME or approved for such training by the ABP or
   2. Two additional years of full-time experience in forensic pathology or its equivalence in a situation comparable to that of a program accredited for such training by the ACGME.

b. Applicants seeking combined certification in anatomic pathology and forensic pathology (AP/FP), see Section III D, Combined Primary and Subspecialty Certification.

5. Hematology (HEM)
a. Applicants who hold a certificate in anatomic and clinical pathology, clinical pathology only, or a primary certificate plus a special qualification certificate in hematology from another primary medical specialty Board of ABMS:
   1. One full year of additional supervised training in hematology (pathology) in a program accredited for such training by the ACGME or approved for such training by the ABP or
   2. Two additional years of full-time experience or its equivalence in clinical laboratory hematology under circumstances acceptable to the ABP.

b. Applicants, other than those described in 5a, who hold a primary certificate from a primary medical specialty Board of ABMS: 2 years of full-time training in hematology (pathology) in a program accredited for such training by the ACGME.

c. Applicants seeking combined certification in clinical or anatomic pathology and hematology (CP/HEM, AP/HEM): see Section III D, Combined Primary and Subspecialty Certification.

6. Immunopathology (IP)
a. Applicants who hold a certificate in anatomic and clinical pathology
   1. One full year of additional supervised training in immunopathology in a program accredited for such training by the ACGME or approved for such training by the ABP or
   2. Two additional years of full-time experience in immunopathology or its equivalence under circumstances acceptable to the ABP.

b. Applicants who hold a certificate in anatomic pathology only or clinical pathology only:
   1. Two full years of additional supervised training in immunopathology in a program accredited for such training by the ACGME or approved for such training by the ABP or
   2. Four additional years of full-time experience in immunopathology or its equivalence under circumstances acceptable to the ABP.

c. Applicants who hold a certificate in anatomic pathology only or clinical pathology only plus a certificate of Special Qualification in blood banking/transfusion medicine, hematology, medical microbiology, or chemical pathology
   1. One full year of additional supervised training in immunopathology in a program accredited for such training by the ACGME or approved for such training by the ABP or
2. Two additional years of full-time experience in immunopathology or its equivalent under circumstances acceptable to the ABP.

d. Applicants seeking combined certification in anatomic pathology or clinical pathology and immunopathology (AP/PP, CP/IP), see Section III D, Combined Primary and Subspecialty Certification.

7. Medical Microbiology (MMB)

a. Applicants who hold a certificate in anatomic and clinical pathology, clinical pathology only, or a primary certificate plus a special qualification certificate in infectious disease from another primary medical specialty Board of ABMS

1. One full year of additional training in medical microbiology in a program accredited for such training by the ACGME or approved for such training by the ABP or

2. Two additional years of full-time experience or its equivalent in clinical laboratory medical microbiology under circumstances acceptable to the ABP.

b. Applicants, other than those described in 7a, who hold a primary certificate from a primary medical specialty Board of ABMS: 2 full years of full-time training in medical microbiology in a program accredited for such training by the ACGME.

c. Applicants seeking combined certification in clinical pathology and medical microbiology (CP/MMB); see Section III D, Combined Primary and Subspecialty Certification.

8. Neuropathology (NP)

a. Applicants who hold a certificate in anatomic and clinical pathology, or anatomic pathology only: 2 full years of additional supervised training in neuropathology in a program accredited for such training by the ACGME or approved for such training by the ABP.

b. Applicants who hold a certificate in clinical pathology or a primary certificate from another primary medical specialty Board of ABMS

1. One full year of approved training in anatomic pathology in a program accredited for such training by the ACGME or approved for such training by the ABP, plus

2. Two full years of additional supervised training in neuropathology in a program accredited for such training by the ACGME or approved for such training by the ABP.

c. Applicants seeking combined certification in anatomic pathology and neuropathology (AP/NP), see Section III D, Combined Primary and Subspecialty Certification.

9. Pediatric Pathology (PP)

a. Applicants who hold a certificate in anatomic and clinical pathology or anatomic pathology only from the ABP or anatomic pathology or general pathology from The Royal College of Physicians and Surgeons of Canada

1. Two full years of additional supervised training in pediatric pathology in a program accredited for such training by the ACGME or approved for such training by the ABP or

2. Four additional years of full-time practice experience in pediatric pathology or its equivalent in a situation offering experience opportunities comparable to those of an accredited or approved training program in pediatric pathology and acceptable to the ABP.

b. The pediatric pathology training or experience should occur after the completion of the full training requirements necessary to qualify for certification in AP/CP or AP.

C. Added Qualification Certification

All candidates applying for added qualification certification must hold a primary certificate from the ABP.

Credit is not given for training or experience occurring outside the United States and Canada. Also, credit is not given for training in an area of added qualification that was part of the training program leading to the requirements necessary to qualify to sit for the primary examination in AP or AP/CP.

No advanced credit will be given toward the requirements for added qualification certification by the mechanisms described in Section III A 3, Advanced Pathology Training Credit Mechanisms.

1. Cytology, Cytology (CP)

a. Applicants who hold a certificate in anatomic pathology or combined anatomic and clinical pathology

1. One full year of full-time supervised training in cytopathology in a program accredited for such training by the ACGME or approved for such training by the ABP, or

2. Two years of full-time experience in cytopathology or its equivalent under circumstances acceptable to the ABP.

b. Applicants seeking combined certification in anatomic pathology and cytopathology (AP/CYP), see Section III D, Combined Primary and Subspecialty Certification.

D. Combined Primary and Subspecialty Certification

Under certain circumstances, special qualification or added qualification training may be arranged in conjunction with the primary training requirements, permitting a candidate to qualify for a combined certificate. All applicants for combined certification must also meet the additional credentialing/experience requirement of 1 year of clinical training, clinical experience, or clinically related research. (See Section IV, Credentialing Year.)

Advanced credit will not be given toward the requirements for combined certification (invoking primary training and special or added qualification training) by the mechanisms described in Section III A 3, Advanced Pathology Training Credit Mechanisms.

- The acceptable combinations of certification and the required training are

1. Anatomic pathology and forensic pathology (AP/FP)—2 full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and 1 full year of approved training in forensic pathology in a program accredited for such training by the ACGME and 1 additional year of approved training in anatomic pathology or in one of the specialty areas of pathology such as neuropathology, toxicology, or chemical pathology.

2. Anatomic pathology and neuropathology (AP/NP)—two full years of approved training in anatomic pathology and 2 full years of approved training in neuropathology in a program accredited for such training by the ACGME with adequate experience in diagnostic neuropathology.

3. Anatomic pathology and hematology (AP/HEM)—2 full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and 2 full years of approved training in hematology in a program accredited for such training by the ACGME with adequate training or experience in the clinical pathology aspects of hematology.

4. Anatomic pathology and immunopathology (AP/IP)—2 full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and 2 full years of approved training in immunopathology in a program accredited for such training by the ACGME.

5. Clinical pathology (CP) plus special qualification—3 full years of approved training in clinical pathology in a program accredited for such training by the ACGME plus 1 full year of approved special qualification training in blood banking/ transfusion medicine, chemical pathology, hematology, or medical microbiology in a program accredited for such training by the ACGME as defined in Section III B, Special Qualification Certification, or 2 full years of approved training in clinical pathology plus 2 full years of approved special qualification training in blood banking/ transfusion medicine, chemical pathology, hematology,
immunopathology, or medical microbiology in a program accredited for such training by the ACGME as defined in Section III B, Special Qualification Certification.

6. Anatomic pathology and cytopathology (AP/CYP)—3 full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and 1 full year of approved training in cytopathology in a program accredited for such training by the ACGME or approved for such training by the ABP.

IV. Credentialing Year

The requirement of 1 full year of clinical training, experience, or clinically related research is in addition to the required pathology training in an accredited program. It must be taken after having obtained the medical degree.

The ABP considers the most appropriate and, for applicants, the most beneficial approach to meeting this requirement to be 1 full year of full-time, approved clinical training in the United States or Canada (Pathway A). The Board recognizes that such is not always possible and thus offers alternate pathways to meeting the requirement.

The requirement can be met by

A. One full year of full-time, approved graduate medical education in a transitional year training program; or in a clinical area of medicine such as internal medicine, surgery, obstetrics and gynecology, pediatrics, emergency medicine, or family practice, or

B. One full year of full-time research in pathology or in another clinical discipline, provided that the research was done in the United States or Canada and has clearly defined clinical implications. The guidelines for acceptance of research activity are

1. Research activity must have taken place after the candidate has obtained a recognized medical degree.
2. The candidate must have a clearly defined investigator role in the research program.
3. The research must involve patients directly, or materials obtained from patients, or techniques that can be applied directly to the diagnosis of human disease or to the understanding of the basic mechanisms of disease.
4. Prospective approval of a research program for credentialing credit must be given in writing by the director of the pathology training program.
5. Credit for research activity prior to entering a pathology training program must be approved by the director of the pathology training program and the ABP. Such research must have occurred in an institution in the United States or Canada, or

C. One year of training in one of the recognized specialty fields of pathology that includes clinical correlation and patient contact (this year cannot be used to meet the requirements for both the credentialing year and special or added qualification certification), or

D. The satisfactory completion of 1 full year of a combination of clinical training, clinical experience, clinical research, or subspecialty pathology training in addition to the required pathology training necessary to qualify for certification in anatomic and clinical pathology anatomic pathology, or clinical pathology. The training director is responsible for defining and justifying this year of clinical activity to the ABP. In meeting the credentialing year requirement by combinations of pathways A, B, and C, the ABP recommends that the period of activity be at least 4 months in duration wherever possible.

Under certain circumstances, credit toward the credentialing year may be given for a pathology experience if the applicant holds a primary certificate in pathology issued by the independent national certifying body in a country other than the United States or Canada and provided that the certification was by national examination following 4 full years of approved training in pathology.

Clinical Training Outside the United States and Canada

Under certain circumstances, clinical training taken in countries other than the United States and Canada may be acceptable toward meeting the ABP credentialing year, provided that the following criteria are fully met and validated:

1. The clinical training was taken after obtaining a medical degree acceptable to the ABP.
2. Satisfactory completion of 1 full year of full-time training in clinical medicine in a multidisciplinary training program (internship) or in a training program in internal medicine, pediatric medicine, general surgery, or obstetrics and gynecology.
3. Proof from the training institution that the program in question has been inspected and approved for graduate medical education.
4. Indication from the director of the clinical training program that the candidate was registered in the program, completed the training satisfactorily, and was the physician of record in the diagnosis and treatment of patients throughout the full 12 months.
5. Recommendation from the pathology program director in regard to the person's request.

The acceptability of clinical training toward meeting the ABP requirements is assessed on an individual basis, and it is imperative that an opinion be obtained from the ABP well in advance of the submission of an application for certification. The amount of advanced credit for clinical training outside the United States and Canada toward the ABP requirements for certification cannot exceed a total of 12 months.

It is the responsibility of the person seeking credit to ensure that all validating items for these criteria are submitted to the ABP for consideration. No assessment of possible credit will be given until all validating and reference information has been received

Application for Examination

Requests for application forms must be made in writing to the office of the ABP. Completed original forms should be returned with the required credentials and the application-examination fee. An application cannot be given consideration unless it is accompanied by the application-examination fee.

Fees

The application-examination fee schedule for 1995 is as follows

- Anatomic pathology only $1,000
- Clinical pathology only $1,000
- Anatomic pathology portion of combined AP/CY $1,000
- Clinical pathology portion of combined AP/CY $1,000
- Combined anatomic and clinical pathology $1,200
- Special qualification $1,200
- Added qualification $1,200
- Anatomic or clinical pathology combined with special qualification or added qualification (both parts taken at one sitting) $1,400

The application-examination fee includes a nonrefundable processing fee of $100. If the different divisions of the AP/CY and the combined primary and special or added qualification examinations are taken at separate sittings, there is a separate examination fee for each sitting. If the candidate fails in the examination, admission to a repeat examination is permitted, but any reexamination must occur within the 3-year period of qualification described under Qualification Period for Examination. The applicant must pay the examination fee according to the current fee schedule before another examination will be given. If, after having applied for a specific examination, the candidate requests a transfer in writing to a
future examination prior to the final filing date, there is a transfer fee of $100.

In the event of the candidate’s illness at the time of the examination, validated by the candidate’s attending physician, a major portion of the application-examination fee will be either transferred to the next examination or refunded.

Vacation, Maternity, and Other Leave
Each institution sponsoring a pathology training program may develop individual sick, vacation, and other leave policies for the resident. However, one year of approved training credit toward ABP certification requirements must be 52 weeks in duration and must include at least 48 weeks of full-time pathology training. Furthermore, unused vacation and other leave time may not be accumulated to reduce the overall duration of training.

Irregular Behavior
In the interest of protecting the integrity of the ABP and its certification examinations, the following irregular behaviors may be sufficient to bar a person from future examinations, to terminate one’s participation in the examination, to invalidate the results of one’s examination, to cause the withholding or revocation of one’s score or certificate, or to merit other appropriate action by the Board.
1. The giving or receiving of aid in the examination as evidenced by either observation or by statistical analysis of candidates’ answers.
2. The unauthorized possession, reproduction, or disclosure of any ABP examination-related materials, including, but not limited to, examination questions or answers, before, during, or after the examination; and/or
3. The offering of any benefit to any agent of the Board in return for any right, privilege, or benefit that is not usually granted by the Board to other similarly situated candidates or persons.

In addition, the Board may withhold a candidate’s scores and require that the candidate retake one or more portions of the examination presented with sufficient evidence that the security of the examination has been compromised, notwithstanding the absence of any evidence of the candidate’s personal involvement in such activities.

Chemical Dependency
Applications for certification from persons who have had a history of chemical dependency as reported to the Board will not be accepted unless the applicant submits documented evidence acceptable to the Board that the disease is known to be under control for 5 years from the time of its most recent occurrence.

Candidates who have been declared qualified to sit for the certifying examination and who have a current problem of chemical dependency as reported to the Board will not be admitted to examination. Denial of admission to examination may result in the loss of opportunities for examination and, ultimately, in the decision to declare the candidate’s application void for failure to complete the requirements for certification within the qualification time period allotted to every candidate.

Qualification Period for Examination
The ABP does not recognize or use the term “Board-eligible” and does not issue statements concerning “Board eligibility.” An applicant is declared qualified for examination only after a formal application has been received and approved by the Credentials Committee.

The ABP will permit a candidate who has qualified for examination on the basis of approved training and/or experience to sit for the examination during a period not to exceed 3 years after being declared qualified to take the examination. When this period has expired, additional periods of qualification for examination will be permitted upon submission of documented evidence that the candidate has obtained further training or experience subsequent to the termination of the period of qualification. This must be in the form of an additional year of approved training in an accredited program or 2 years of experience acceptable to the ABP. The additional training or experience must be in the area of pathology in which the candidate was unsuccessful.

At any time after declaring a candidate qualified for examination, the Credentials Committee, at its discretion, may withdraw such qualification or, as a condition, may require satisfaction by the candidate of specified conditions. In the exercise of its discretion under this regulation, the Credentials Committee shall be entitled to act without reason assigned.

If it is determined that an applicant has falsified information in the application form, the applicant will not be approved for the certifying examination and must wait a period of 3 years before being permitted to file a new application. The applicant will not be considered qualified to sit for the certifying examination during the 3-year interim.

Examination Dates and Sites
Examinations are held at the discretion of the Board. The tentative schedules for forthcoming examinations are:

Anatomic and Clinical Pathology Examinations
May 15, 16, 17, 1995—Indianapolis, Indiana
November 6, 7, 8, 1995—Dallas, Texas
May 21, 22, 23, 1996—Chicago, Illinois

Examinations for Special and Added Qualification
The examinations for special qualification in clinical pathology, medical microbiology, and immunopathology will be given every 2 years. Examinations will be given in 1995 and every other year thereafter.

May 18, 1995—Indianapolis, Indiana
FIP, HEM, IP, NP, PP, CYP
After July 1, 1995 (dates to be determined)
BB/MTM, Chem P, MMB

Dermatopathology Examination
The dermatopathology examination is scheduled separately at a time and place mutually agreed upon by the ABP and the ABD.

The examination in dermatopathology will be given every 2 years. An examination will be given in 1995 and every other year thereafter.

October 20, 1995—Chicago, Illinois

Final Filing and Cutoff Dates
The final filing dates for receipt of applications or registrations are as follows:
February 1 for spring examinations
April 1 for summer examinations
August 1 for fall examinations
June 1 for dermatopathology examinations

If the candidate cancels an appearance for the examination after these dates or does not appear for the examination, the entire application-examination fee is forfeited.

Issuance of Certificate
Upon satisfactorily passing the appropriate examination(s), a candidate will be issued a certificate by the ABP in those fields of pathology for which the ABP accepted the credentials. Thus, a candidate who is qualified for the combined examination in anatomic and
Clinical pathology, having fulfilled the minimum pathology requirement of 48 months and the credentialing clinical requirement of 12 months will receive a certificate only after both parts (anatomic and clinical pathology) of the examination have been passed.

Candidates qualified for examination in anatomic or clinical pathology, and a specialty area of pathology, and claiming qualification on the basis of the required training in each area will receive a certificate only after each of the examinations has been passed.

A candidate who has fulfilled all the prerequisites, including the minimal requirement of 36 months of approved training in anatomic pathology only or clinical pathology only, plus the 12 credential months of activity, will receive a certificate after passing the examination in anatomic pathology or in clinical pathology.

If a candidate's certificate is lost or destroyed, the ABP will issue a duplicate certificate upon written request and justification, together with the necessary engraving and handling charge of $50.

Revocation of Certificate

In its discretion, the ABP may revoke a certificate for due cause, including, but not limited to, the following causes:

1. The candidate did not possess the required qualifications and requirements for examination, whether or not such deficiency was known to the ABP or any committee thereof prior to examination or at the time of the issuance of the certificate, as the case may be.

2. The candidate made a material misstatement or withheld information in his or her application or in any other representation to the ABP or any committee thereof, whether intentional or unintentional.

3. The candidate engaged in irregular behavior in connection with an examination of the ABP (as described under "Irregular Behavior"), whether or not such practices had an effect on the performance of the candidate on an examination.

4. The candidate was convicted by a court of competent jurisdiction of any felony or misdemeanor involving moral turpitude and, in the opinion of the ABP, having a material relationship to the practice of medicine, or

5. There has been a limitation or termination of any right of the candidate associated with the practice of medicine in any state, province, or country, including the imposition of any requirement of surveillance, supervision, or review by reason of violation of a medical practice act or other statute or governmental regulation, disciplinary action by any medical licensing authority, entry into a consent order, or voluntary surrender of license.

Revocation of certificates shall be governed by procedures set forth in the ABP Bylaws as amended from time to time.

Update of ABP Certificate

The ABP will permit diplomates of the Board to retake the examination in the area of pathology in which they are already certified for the purpose of updating their certificate(s). The examination fee and the passing requirements are the same as for initial candidates. Successful candidates will be issued new, currently dated certificates.

Limitation of SO/AO Certificates

As a condition of admission to an examination for special or added qualification in pathology, an individual holding two or more certificates of special competence, special qualification, and/or added qualification shall surrender a sufficient number of certificates to reduce their number to one. In the event that the individual fails the examination and the period of Board qualification terminates, the surrendered certificate(s) shall be restored. This action does not include certificates of Special Competence (Qualification) in Radios isotopic Pathology or in Dermatopathology.

Candidates With Disabilities

1. Policy. The ABP supports the intent of the Americans with Disabilities Act. The Board will endeavor to provide qualified Board candidates who have documented disabilities the necessary auxiliary aids and services that do not fundamentally alter the measurement of the skills or knowledge the Board examination is intended to test or result in an undue burden.

2. Documentation of Disability. Board candidates requesting an accommodation due to a disability must provide documentation of the disability. Such documentation should include a specific diagnosis of the disability and include medical records or other documentation of the diagnosis of the disability by an appropriate medical professional. The ABP reserves the right to verify the disability and to request additional documentation as necessary. All required documentation acceptable to the Board must be received in the Board Office no later than the application deadline.

3. Type of Accommodation. Board candidates requesting an accommodation must identify the type of accommodation requested. The Board, however, will determine the type of accommodation to be made for a candidate with a verified disability. Accommodations that fundamentally alter the measurement of skills or knowledge that the examination is intended to test will not be offered.

4. Application Deadline. Candidates requesting accommodations are urged to contact the Board as far in advance of the examination as possible. Requests for accommodation and documentation of disability must be received no later than the application deadline.

Appeals Procedure

An individual who has received an unfavorable ruling regarding qualification to take the examination may initiate an appeal of such determination by making a written request for reconsideration to the ABP office within 90 days of the date such ruling was mailed. A candidate who fails a certifying examination may request that the examination be rescord to verify the accuracy of the results as reported. Such request must be made in writing within 90 days of the date of mailing of the results of the examination to the candidate and must be accompanied by the fee of $50 per certifying examination or part thereof. There shall be no further appeal from failure of an examination.

American Board of Pediatrics

Robert K Kelch, MD, Chairman, Iowa City, Iowa
Catherine DeAngelis, MD, Chairman-Elect, Baltimore, Maryland
Herbert T Abelson, MD, Secretary-Treasurer, Seattle, Washington
James A Stockman III, MD, President, Chapel Hill, North Carolina
Thomas K Oliver, Jr, MD, Senior Vice-President, Chapel Hill, North Carolina
William F Balistreri, MD, Cincinnati, Ohio
Thomas P Boat, MD, Cincinnati, Ohio
M Douglas Jones, Jr, MD, Denver, Colorado
William L Long, MD, Durham, North Carolina
Sarah S Long, MD, Philadelphia, Pennsylvania
Julia A McMillan, MD, Baltimore, Maryland
Warren W Quilliam II, MD, Coral Gables, Florida
Thomas L W Roe, MD, Eugene, Oregon
Sara Rosenbaum, JR, Washington, District of Columbia
Jon B Tingelstad, MD, Greenville, North Carolina
Walter W Tunnessen, Jr, MD, Philadelphia, Pennsylvania
Grace S Wolff, MD, Miami, Florida

(These criteria are subject to change. All applicants are advised to consult the American Board of Pediatrics [ABP] to ascertain any changes that may have been made, especially before undertaking any variations in the training program.)

Requirements for Admission to Examination
An applicant for examination for certification must meet the following general requirements

1. The applicant must be a graduate of an accredited medical school in the United States or Canada or of a foreign medical school that is listed by the World Health Organization (WHO).

2. For a new applicant, a valid (current), unrestricted license to practice medicine in one of the states, districts or territories of the United States or a province of Canada is a requirement for admission to the examination, but it may be submitted separately from the initial application.

For an applicant who is reregistering, a copy of the license must be on file in the ABP office before reregistration material is sent unless a waiver of the requirement has been granted.

If an applicant has any action pending regarding the right to have an unrestricted license to practice medicine, admission to the examination may be denied.

3. The applicant must complete 3 years of pediatric training in programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) on the advice of the Residency Review Committee for Pediatrics (RCPSC) or in programs in Canada accredited by the Royal College of Physicians and Surgeons of Canada (RCPSC).

4. The ABP will require program directors to verify satisfactory completion of training and to evaluate the acceptability of the applicant as a practitioner of pediatrics.

5. The ABP reserves the right to withhold permission to take its examinations and/or certification in the event of circumstances demonstrating that an applicant is not capable of performing the role of physician and advocate for infants, children, and adolescents. In such instances, the applicant will be notified; the applicant may appeal the decision to the Credentials Committee of the ABP.

Graduation From Medical School
The applicant must be a graduate of a medical school that has been accredited by the Liaison Committee on Medical Education (LCME) in the United States, by the RCPSC, in Canada or by the American Osteopathic Association (AOA).

An applicant who is a graduate of a medical school that has not been accredited by the LCME, RCPSC or AOA, but is listed by WHO, may apply for examination if he/she has a standard certificate either from the Educational Commission for Foreign Medical Graduates (ECFMG) or the Medical Council of Canada.

The graduate of a foreign medical school must submit a photocopy of the medical school diploma showing the medical degree and the date it was awarded. A certificate showing that the applicant has passed a final examination is not acceptable.

Training Requirements
An applicant must complete 3 years of postgraduate pediatric training in programs accredited by the RCPSC or in Canada, by the RCPSC. The training curriculum must be compatible with the Special Requirements for program accreditation, which are published annually in the Graduate Medical Education Directory. During this period of training, the applicant is expected to assume progressive responsibility for the care of patients. Credit will not be given for training completed before the medical degree is awarded. A year of supervisory experience must be an integral part of the total 3-year program; this year must include 6 months of direct supervisory responsibility in general pediatrics.

The ABP recognizes four levels of pediatric training (PL-1 through PL-4) and defines these levels as follows:

PL-1: The first postgraduate year in general comprehensive pediatric training in an accredited program.

PL-2: The second postgraduate year in general comprehensive pediatric training in an accredited program following PL-1, but with increased responsibility for patient care and for the supervision of junior house staff and medical students.

PL-3: The third postgraduate year in general comprehensive pediatric training in an accredited program, but with increasing responsibility for patient care and supervision of junior house staff and medical students.

PL-4: The fourth postgraduate year in general pediatric training in an accredited program when the applicant is designated as a chief resident.

Special Alternative Pathway
The ABP recognizes that occasionally there will be an exceptional candidate who should be given special consideration to begin subspecialty training after the completion of the PL-2 year of general comprehensive pediatrics. Before the start of the PL-2 year, the department chairman or program director must petition that a resident be considered for the Special Alternative Pathway (SAP), indicating that the candidate has superior overall competence.

There must also be a letter from the subspecialty program director outlining the clinical and research training. In addition, such candidates will be required to take a screening examination. The application material and the score on the screening examination will be reviewed by the Credentials Committee. An applicant who is approved for the SAP may not take the certifying examination until all training (no less than 5 years) is completed.

Training programs: The ABP approves applicants for admission to its certifying process. The ABP does not accredit training programs. Information regarding accreditation should be addressed to Executive Secretary, Residency Review Committee for Pediatrics, 515 N State St, Chicago, IL 60610.

Credit for training in accredited programs other than pediatrics: A physician transferring to pediatric residency training from another accredited residency, eg, family practice, internal medicine, transitional year, must correspond with the ABP to determine whether partial credit may be awarded for this training. Requests for credit must be submitted either by the candidate or the pediatric residency program director before the candidate enters pediatric residency training.

Credit for pediatric training in nonaccredited programs: The ABP has established requirements for a physician who has had at least 3 years of pediatric training in programs not accredited by the RCPSC in foreign training or in accredited osteopathic programs in the United States. The interested physician or the department chairman/program director must write to the ABP before

---

1. Throughout the document the term candidate will be synonymous with applicant.
2. Hereafter, accreditation will refer to accreditation by the RCPSC.
Special Programs

Medicine/Pediatrics (Med/Ped) Program
A special agreement exists with the American Board of Internal Medicine (ABIM) whereby an applicant may fulfill the training requirements of both the ABP and ABIM by completing 2 years of accredited training in general comprehensive pediatrics and 2 years of accredited training in general comprehensive internal medicine. The 4 years should be completed in the same combined training program. Exceptions must be approved by both the ABP and ABIM. Continuity clinics in each specialty must be provided throughout the 4 years. Guidelines for combined training have been approved by both the ABP and ABIM and are available by writing either office. A list of institutions offering combined programs is published in the Graduate Medical Education Directory. An applicant may not take the certifying examination of the ABP until all training has been completed.

Pediatrics/Neurology Program
A special agreement exists with the American Board of Psychiatry and Neurology (ABPN) whereby an applicant who completes at least 2 years of accredited training in general comprehensive pediatrics and the neurology training necessary to meet the requirements for certification in neurology with special competence in Child Neurology fulfills the training requirements of both the ABP and the ABPN. An applicant may not take the certifying examination of the ABP until all training has been completed.

Pediatrics/Physical Medicine and Rehabilitation Program
A special agreement exists with the American Board of Physical Medicine and Rehabilitation (ABPMPR) whereby a physician interested in pediatric rehabilitation can qualify for admission to the certifying examinations of both the ABP and ABPMPR. The residency training can be completed in 5 years in programs accredited by the RRCs of ABP and ABPMPR. Proposed programs must be submitted to the ABP and ABPMPR for approval before a candidate can be accepted into the joint training program. All training should be completed at one academic institution; any deviation must be approved prospectively by both the ABP and ABPMPR. Interested applicants may obtain details from either office. An applicant may not take the certifying examination of the ABP until all training has been completed.

Pediatrics/Emergency Medicine Program
A special agreement exists with the American Board of Emergency Medicine (ABEM) whereby an applicant may fulfill the training requirements of both the ABP and ABEM by completing joint training in 6 years. All 5 years should be completed in the same combined training program. Exceptions must be approved by both the ABP and ABEM. Training programs must be approved prospectively by both the ABP and ABEM. Guidelines for combined training have been approved by both the ABP and ABEM and are available by writing to either office. They were published in Annals of Emergency Medicine, 1991;20:98-100. An applicant may not take the certifying examination of the ABP until all training has been completed.

Pediatrics/Psychiatry/Child and Adolescent Psychiatry Program
The ABP, the American Board of Psychiatry and Neurology (ABPN), and the Committee on Certification in Child and Adolescent Psychiatry have formed a committee to accredit programs that will satisfy the training requirements for certification in all three areas. Training includes 24 months of general comprehensive pediatrics, 18 months of child and adolescent psychiatry and 18 months of adult psychiatry. Physicians pursuing training in these programs may take the certifying examination of the ABP in the fall of the fifth year of training, provided that all pediatric training (except continuity clinics) is completed by the date of the examination. Credit for training via this route may be obtained only by training in one of these programs. Further information concerning these combined training programs may be obtained by contacting the ABPN, 500 Lake Cook Rd/St 335, Deerfield, IL 60015.

Graduate school courses: It is a fundamental concept of the ABP that a residency training program should provide for properly organized progressive responsibility for the care of children. The ABP believes that this can be accomplished through continuity of clinical experience under the supervision of attending physicians who are responsible for the care of these children. The substitution of a formal graduate or postgraduate school course that does not carry the essential ingredient of responsibility for patient care is inconsistent with this principle. Accordingly, the ABP will not accept such courses in fulfillment of its training requirements.

Military service: Military assignments will not be accepted in lieu of a year of required training unless served as a resident in a military hospital that is accredited by the RRC.

Special situations: The ABP recognizes that situations may arise that are not explained by the preceding information. A physician may have worked in a pediatric field for many years yet be deficient in the formal training requirements for examination, or a physician may have completed specialized training not explained in the above requirements. In such cases, the individual should present his/her credentials to the ABP, who may ask the Credentials Committee to review them and to decide whether permission should be given to enter the certification process.

Statement of eligibility: If a candidate applies to take the certifying examination and the credentials are approved, the candidate will be considered to be board eligible. The ABP will verify that a physician is certified, not certified or eligible to take the certifying examination. The credentials of an applicant who does not meet the licensure requirement will be disapproved, and he/she will not be board eligible. The application by an applicant that he/she has completed the required training (and, therefore, is board eligible) without review and approval by the ABP is not acceptable.

Tracking, Evaluation, and Verification of Training by Directors of Pediatric Training Programs
The ABP regards the evaluation of trainee competency as a continuum that begins during training and concludes with the certifying examination following formal training. The ABP believes that the program director(s) and faculty play significant roles in the certification process and are the key to a responsible system of determining which applicants should be admitted to the certifying examination. The program director is able to provide a meaningful overview of the resident's professional competence, especially in skills such as clinical judgment, moral and ethical behavior, professional attitudes and behavior, procedural skills, and humanistic qualities.

The ABP resident tracking and evaluation program is part of the certifying process of the ABP. The program director is required to indicate annually whether each resident's performance is satisfactory, marginal, or unsatisfactory. If a resident's performance is unsatisfactory, the resident will not receive credit for that period of training. A marginal evaluation indicates a need for remediation. If a resident receives a marginal rating for 2 consecutive years of training (eg, PL-1 and PL-2), he or she will not receive credit for the second marginal year and will have to repeat that entire year of training. If a resident receives a marginal rating for one year (eg, PL-1) and receives a satisfactory rating for the following year (eg, PL-2), then both the marginal year and the satisfactory year will be considered
to be satisfactory. The resident who receives a marginal rating in the final year of training (eg, PL-3) will be reviewed by the ABP Credentials Committee before being allowed to take the certifying examination in general pediatrics.

The tracking system also identifies residents who transfer from one program to another or to a new specialty and ensures that the new program director recognizes those residents who need remediation.

The ABP requires the program director to verify completion of training and to sign either Statement A or Statement B on the Verification of Clinical Competence Form. Statement A is as follows: "I certify that the above-named applicant has demonstrated the necessary attitudes, knowledge, clinical judgment, technical skills, and interpersonal skills and is judged to be fully prepared for independent responsibility as a general pediatrician; to my knowledge he/she has moral and ethical integrity. The applicant is recommended for examination."

In recommending an applicant for the certifying examination, a program director should keep in mind the definition of a qualified applicant as determined by the ABP:

An applicant shall demonstrate the following abilities as they pertain to infants, children and adolescents:
1. Assessment of the clinical issues and formulation of a management plan for any medical or health maintenance problem
2. Execution of the management plan with the patient and family, without further medical consultation, for all common problems of disease and health maintenance and for all medically life-threatening situations
3. Consultation, when appropriate, with physicians and other professionals regarding common problems and life-threatening situations, and
4. Arrangement for help for the patient and knowledge of what to anticipate from the consultant, being prepared personally to guide further management with assistance, when appropriate, for unusual problems requiring subspecialty, surgical, or other specialized skills.

Each applicant must have verification of training and verification of clinical competence on file in the ABP office to be admitted to the certifying examination. It is the applicant's responsibility to be sure the program director submits all the required documents by the appropriate deadline.

When an applicant has not attained the appropriate knowledge and skills, the program director should sign Statement B on the Verification of Clinical Competence Form. By signing this statement, the program director is recommending that the applicant not be admitted to the certifying examination.

If an applicant's training is not verified and/or he/she is not recommended for admission to the certifying examination, the applicant will be required to complete an additional period of training in general comprehensive pediatrics in an accredited program in the United States or Canada before reapplying to the ABP. The director of the program where the additional training occurred must complete a separate Verification of Clinical Competence Form. Alternatively, the applicant may appeal to the Credentials Committee. The Credentials Committee will gather additional information about the applicant and decide if permission to take the examination should be given. For an appeal, the applicant will be asked to submit copies of certificates of satisfactory completion of training. If the applicant has been denied such certificates, then admission will be refused on the basis of incomplete training. However, possession of such certificates will not automatically admit the person to the ABP's certification process. Most training certificates attest to the achievement of a minimal level of competence or the fulfillment of an employment contract. Therefore, the program director's statement on the Verification of Clinical Competence Form will take precedence over the certificate from the hospital. The ABP must have the program director's assurance that an applicant meets the standards expected of a certified pediatrician. Program directors are urged not to issue certificates of successful completion of training when the resident is deemed not to have met those standards.

The duration of training is 36 months. Absences in excess of 3 months, eg, vacation, sick leave, maternity leave, must be made up unless the program director believes that an absence of more than 6 months is justified, in which case a letter of explanation must be sent for review by the Credentials Committee.

The program director is required to provide further information about the applicant. The program director is asked to evaluate the applicant on a nine-point scale in the following areas: gathering data by history, by physical examination, and by laboratory studies; assessing data and arriving at a diagnosis; managing problems and maintaining health; interpersonal relationships with patients and families; interpersonal relationships with other members of the health team; and work habits and personal qualities.

The program director is asked to rate the applicant's overall clinical competency by indicating which of the following phrases best describes the applicant's ability to care for children in the United States or Canada. In these phrases, the word "manage" is defined as identifying the nature of the problem, determining methods of resolving or alleviating the problem, and carrying out management plans, including the appropriate and timely use of consultants.

1. Unable to manage many pediatric problems including the most routine ones
2. Able to manage only the most routine problems of pediatrics
3. Able to manage the common problems of pediatrics adequately
4. Able to manage most pediatric problems in an effective way
5. Able to manage almost any pediatric problem in a highly effective manner

If the program director signs Statement A but gives a rating of 3 or less in any single area or a rating of 4 or less for overall clinical competency, the Credentials Committee requires that the program director submit documentation with the completed Verification of Clinical Competence Form. If the Credentials Committee agrees with the program director, the applicant must complete an additional period of training in general comprehensive pediatrics in an accredited program either in the United States or Canada before reapplying to the ABP. The director of the program where the additional training occurred must complete a separate Verification of Clinical Competence Form. Alternatively, the applicant may appeal to the Credentials Committee.

Program directors are encouraged to have all residents in their programs take the In-training Examination (ITE). The results of the ITE can provide valuable information for both the resident and the program.

To be compliant with the general requirements for program accreditation established by the ACGME, the program director and the faculty must develop evaluation procedures for assessment of physician performance. Examples are medical record audits, rating scales for assessment of work habits, observational checklists for

*Numbered text reflects an ABP nine-point rating scale, for program director use, indicating the applicant's overall clinical competency.
assessment of technical skills, oral examinations, and consumer questionnaires.

**Disability Policy**
An applicant who wishes to request special accommodations due to a disability should notify the ABP office at the time the application is submitted. The applicant will be sent the ABP policy on disabilities. The deadline for notifying the ABP is May 31, 1995 (postmarked).

**Policy Regarding Chemical Use and Dependency**
An applicant who has a history of chemical dependency, as reported to the ABP, and who submits documentation acceptable to the ABP that the disease is known to be under control for at least 2 years may apply to take a certifying examination provided he/she meets the admission requirements. This policy also pertains to individuals who wish to participate in recertification programs. A candidate may appeal to the Credentials Committee for waiver of the 2-year policy.

An applicant who has a history of chemical dependency as reported to the ABP, who cannot submit documentation acceptable to the ABP that the disease is under control will not be allowed to take the certifying examination or to participate in recertification programs.

**Certifying Examination**
Application material for admission to the certifying examination of the ABP may be obtained by contacting the ABP office. PL-3 residents will be sent an application in early December 1994; residents should contact the ABP office if the application is not received by December 20.

The certifying examination is given once a year in the fall in a number of locations throughout the United States. The examination is a 2-day examination. There are two sessions, each of 3 hours' duration, each day with a lunch break between sessions. The dates of the 1995 certifying examination are October 10–11. Applicants for the certifying examination must complete their training by the date of the examination.

The ABP does not sponsor or maintain records about any courses that claim to be review courses in preparation for its certifying examinations.

The content of the examination for certification is appropriate for the practice of general comprehensive pediatrics. Emphasis is placed on practical aspects; however, good practice is founded on sound scientific knowledge, and the candidate should be prepared to demonstrate an understanding of basic science.

The examination consists of multiple-choice questions. Examples of the types of questions to be used are mailed to registered candidates before the administration of each examination. Some questions on the examination are included for experimental purposes only. These questions will not contribute to the score.

The validity of the performance of candidates on the certifying examination of the ABP is secured by every means available. The ABP office should be contacted in the event of irregular behavior such as giving or obtaining unauthorized information or aid before, during, or after the examination or offering financial or other benefit to a proctor, employee, or agent of the ABP.

Each candidate's examination score will be reported to his/her general pediatric program director. Periodically, the ABP conducts research utilizing data it has compiled, in which case, the candidate's anonymity is guaranteed.

For failing candidates who are concerned that their answer sheets were not scored correctly, hand scoring is available for a fee of $60. However, candidates are not encouraged to request this service since neither mechanical nor computer errors have ever been found. Requests should be made in writing accompanied by check or money order. Hand scoring is available for 11 months following the date of the examination.

Beginning in 1990, a new candidate must achieve certification within 7 years of initial application. Candidates who were admitted to the certification process in 1986–1989 have 10 years to complete the certification process. A candidate who was admitted to the certification process before 1986 and is considered to have active status will have until December 31, 1996, to complete the certification process. A candidate who has not been certified within the time limit will be considered to be inactive and no longer will be board eligible. To regain active (and eligibility) status, a candidate must reaply and pass a reentry examination before being readmitted to the certification program.

For new applicants, the regular registration period begins December 1 and extends through February 28. An application postmarked by February 28, 1995, must be accompanied by the application fee of $1,135 (unless the partial payment plan is being used). Late registration for new applicants begins March 1 and extends through April 29, 1995. An additional nonrefundable late fee of $225 will be required for an application postmarked between March 1 and April 29. New applications that are postmarked after April 29, 1995, will not be accepted.

Regular reregistration begins February 15 and extends through April 29, 1995. Reregistration material postmarked by April 29 must be accompanied by the re-registration fee of $1,035. Late reregistration will begin May 1 and extend through May 31, 1995. An additional nonrefundable late fee of $225 will be required for all reregistration material postmarked between May 1 and May 31, 1995. Reregistration material that is postmarked after May 31, 1995, will not be accepted.

Many deadlines set by the ABP are postmark deadlines. If there is a discrepancy between a meted postmark and an official US Postal Service postmark, the latter will be considered official.

Acknowledgment of receipt of the application will be sent promptly. The ABP office should be contacted if acknowledgment of receipt is not received within 30 days of submission of the application. Applications received by the deadlines will be processed and evaluated, and the ABP will request directors of general pediatric training programs to verify successful completion of training. Applicants who meet the training requirements of the ABP and who are recommended by their program director(s) will be accepted and registered for the certifying examination. An applicant who does not receive notification of the acceptance or rejection of his/her application by August 10 should contact the ABP office to inquire about the status of the application.

**Fees**
The cost of certification includes the following fees, payable only in United States dollars:

- **Fees for New Candidates**
  - Processing and Evaluation: $325
  - Examination: $810
  - Total New Candidate Fees: $1,135

- **Fees for Reregistrants**
  - Processing and Evaluation: $225
  - Examination: $810
  - Total Reregistrant Fees: $1,035

For individuals not using US banks, the fee must be paid in US dollars using one of the following vehicles: (1) money order, (2) cashier's check or (3) certified check. To be accepted for payment, these vehicles must be payable through a US bank.
The ABP offers a program of partial payment of the examination fees for new applicants. The details are provided with the application material.

Applicants should retain their acknowledgment letters and canceled checks as proof of payment. No other receipts will be issued.

If an applicant is not approved to take the ABP certifying examination, the $810 examination fee will be refunded. The processing and evaluation fee is not refundable, nor is the late fee. If the applicant wishes to pursue certification in the future, he/she will be required to complete a new application and submit the full fee again.

After the ABP has accepted an application, the applicant is expected to take the next certifying examination offered. However, an applicant may withdraw by submitting a written notice postmarked no later than August 15, 1995. The applicant will be issued a refund of the examination fee ($810). An applicant whose withdrawal letter is postmarked after August 15 or who does not appear for the examination will forfeit all fees paid and will be required to submit a reapplication fee before being admitted to a future examination. Reregistration material will be sent to approved applicants during the reevaluation period for the next examination.

Certification by the ABP

The ABP awards certificates to those individuals who have met the eligibility requirements, have passed the examination, and have met the following license requirements:

The applicant must have a valid, unrestricted license to practice medicine in one of the states, districts, or territories of the United States or a province of Canada or unrestricted privileges to practice medicine in the United States armed forces. A copy of the valid license must be received by October 6, 1995.

Foreign nationals practising abroad may be exempted from this policy upon presentation of proof of licensure equivalency in the country in which they reside. This proof must be received by October 6, 1995.

The license requirement will be waived if, during the academic year 1995-1996, the applicant is in pediatric subspecialty training, nonpediatric specialty training, or is serving as a chief resident (PL-4) in a state, province, or district in which the medical licensing board does not require an unrestricted license. In order to obtain a waiver, the program director must submit written confirmation of the applicant's training to the ABP by October 6, 1995.

An applicant who takes the certifying examination, but who does not meet the October 6, 1995, deadline for licensure, will have the examination invalidated and he/she will be disqualified, will be board eligible and will not receive a refund of the examination fee.

The names of certified pediatricians, but not their scores, will be sent to appropriate organizations, directories, and journals. The certificate will reflect the candidate's degree at the time of graduation from medical school, eg, MD, MB, BS, or DO. Degrees awarded either before or after graduation from medical school will not be included on the certificate.

Recertification in Pediatrics

In November 1985, the ABP established a policy of time-limited certification. This policy became effective for those individuals certified in general pediatrics and in the subspecialties of pediatrics after May 2, 1988. The Program for Renewal of Certification in Pediatrics (PRCP) is the process by which the ABP recertifies the diplomates in general pediatrics. Diplomates who wish to be issued a new certificate after the 7-year period must successfully complete PRCP for renewal of certification in pediatrics.

Diplomates certified before May 1, 1988, will not be affected by the policy of time-limited certification; however, those who choose to achieve certification renewal on a voluntary basis may do so by completing PRCP; their certification will not be affected if they are not successful in completing PRCP.

Revocation of Certificates

All certificates issued by the ABP are subject to the provisions of the articles of incorporation and the bylaws of the ABP. Each certificate is subject to possible revocation in the event that

1. The issuance of such certificate or its receipt by the physician so certified shall have been contrary to or in violation of any of the provisions of the ABP's articles of incorporation or bylaws, or
2. The physician so certified shall not have been eligible to receive such certificate, irrespective of whether the facts constituting him/her so ineligible were known to any or all of the members of the ABP at the time of the issuance of such certificate, or
3. The physician so certified shall have made any misstatement of fact in his/her application for such certificate or in any other statement or representation to the ABP, its members, representatives, or agents, or
4. The physician so certified shall have been convicted by a court of competent jurisdiction of a felony or of any misdemeanor involving, in the opinion of the Board of Directors, moral turpitude in connection with his/her practice of medicine, or
5. The physician so certified shall have had one or more of his/her licenses to practice medicine revoked or shall have been placed on probation by any court or other body having proper jurisdiction and authority or if the physician surrendered his/her license to avoid disciplinary action, or
6. The physician so certified has repeatedly made statements contrary to sound medical science and practice, raising fundamental questions about his/her competency. If the ABP obtains probable cause to believe that a certificate should be revoked for any of the reasons set forth above, it may institute proceedings for revocation thereof by mailing written notice to the holder of such certificate that a hearing will be held to determine whether the certificate should be revoked. The steps to be taken are outlined in the Rules of Appellate Procedure of the ABP, which may be obtained by writing to the ABP office.

Reinstatement of Certificates

When a certificate issued by the ABP has been revoked, the certificate may be restored once the physician has submitted a request for reinstatement and the Credentials Committee's recommendation for reinstatement is approved by the Board of Directors.

Other Certification

The ABP, in conjunction with the ABIM and its Conjoint Board, the American Board of Allergy and Immunology (ABAI), offers a Certificate of Added Qualifications in clinical and laboratory immunology. Further information may be obtained by contacting the ABAI, University City Science Center, 3624 Market St, Philadelphia, PA 19104.

A Certificate of Added Qualifications in sports medicine is offered by the American Board of Family Practice (ABFP), the ABEM, the ABIM, and the ABP. Further information may be obtained by contacting the ABP.

A Certificate of Added Qualifications in medical toxicology is offered by the ABEM, the ABP, and the American Board of Preventive Medicine. Further information may be obtained by contacting the ABP.

Certification in the Pediatric Subspecialties

The ABP issues a Certificate of Special Qualifications in the following subspecialties: adolescent medicine, pediatric cardiology, pediatric critical care medicine, pediatric emergency medicine,
pediatric endocrinology, pediatric gastroenterology, pediatric hematology-oncology, pediatric infectious diseases, neonatal-perinatal medicine, pediatric nephrology, pediatric pulmonology, and pediatric rheumatology.

Carol A Wallace, MD, Seattle, Washington
Peter B Dent, MD, Medical Editor, Hamilton, Ontario, Canada
James T Cassidy, MD, Consultant, Columbia, Missouri

**General Criteria for Certification in Pediatric Subspecialties**
In addition to the training requirements, which are specific to each of the pediatric subspecialties, the following are required of candidates seeking certification in the pediatric subspecialties of adolescent medicine, cardiology, critical care medicine, emergency medicine, endocrinology, gastroenterology, hematology-oncology, infectious diseases, neonatal-perinatal medicine, nephrology, pulmonology, and rheumatology. Each candidate must be familiar with specific subspecialty training requirements, as well as the policies.
stated in the current booklet of information, including 3 years of general pediatric training at the PL-1, 2, and 3 levels.

I. General Eligibility Criteria

A. Certification by the ABP

An applicant must take and pass the certifying examination in general pediatrics before being permitted to take a pediatric subspecialty certifying examination. However, the application for the subspecialty certifying examination may be submitted before taking the subspecialty certifying examination in general pediatrics.

B. Licensure

An applicant must have a valid, unrestricted license to practice medicine in any of the states, districts, or territories of the United States, or provinces of Canada, or have unrestricted privileges to practice medicine in the US Armed Forces. A copy of the unrestricted license must accompany the application material. A written request for waiver of this requirement will be considered on a case-by-case basis.

C. Verification of Training

An applicant will be asked to list the program(s) where subspecialty residency training occurred as well as the name(s) of the program director(s). The ABP will send a Verification of Competence Form to the program director(s) for completion. The role of the program director in the certification process is to verify completion of training and to sign the following statement on the Verification of Competence Form:

"I certify that the above named applicant has demonstrated the necessary attitudes, knowledge, clinical judgment, research abilities, technical skills, and interpersonal skills and is judged to be fully prepared for independent responsibility as a pediatric subspecialist; to my knowledge, he/she has moral and ethical integrity. The applicant is recommended for examination."

An applicant must have Verification and/or Evaluation Form(s) on file at the ABP in order to be admitted to the pediatric subspecialty examination. If an applicant's training is not verified and/or he/she is not recommended for admission, the applicant will be required to complete an additional period of subspecialty residency training before reapplying. Alternatively, the applicant may appeal to the Credentials Committee of the Subboard. The Credentials Committee will gather additional information about the applicant and decide if permission should be given to take the examination. For an appeal, the applicant will be asked to submit copies of certificates of satisfactory completion of training. If the applicant has been denied such a certificate, then admission will be refused on the basis of incomplete training. However, possession of such a certificate will not automatically admit the person to the certification process. Most training certificates attest to the achievement of a minimal level of competence or the fulfillment of an employment contract. Therefore, the program director's statement on the Verification of Competence Form will take precedence over the certificate from the institution. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual general pediatric residency years (PL-1, 2, 3).

An applicant seeking certification in more than one subspecialty on the basis of practice and/or training, may not apply the same period toward fulfillment of the requirements of another pediatric subspecialty.

D. Principles Regarding the Assessment of Meaningful Accomplishment in Research

Each candidate must meet these principles:

1. Research experience is an essential part of the training of subspecialists.

2. The RRC and RCPSC accreditation process must include the evaluation of opportunities for research experience. The Subboards should avoid duplicating RRC functions.

3. A requirement for admission to the certifying subspecialty examination must be evidence of productive research participation.

4. The program director must rate the overall research competence on the Verification of Competence Form. In addition, the program director must provide evidence of meaningful accomplishment in research as defined in paragraph 5 of these Principles.

5. Evidence of meaningful accomplishment in research must be submitted.

a. A list of acceptable evidence should allow the majority of applicants to be approved without putting the Subboard in the position of judging the quality of research efforts.

b. Acceptable evidence could include one of the following:

1) First author of a research paper accepted for publication in a peer-reviewed journal deemed acceptable by the Subboard.

2) Submission of a research grant proposal that has been approved by an extramural organization with a critical review process.

3) A postgraduate degree in a field of science relevant to the subspecialty.

4) A thesis accepted as partial fulfillment of the requirements for a postgraduate degree in a field of science relevant to the subspecialty.

5) A research progress report (signed by both the applicant and preceptor) no more than five pages in length to include (a) a statement of hypothesis, (b) delineation of methodology, (c) results and analysis, and (d) significance of the research. This report could be acceptable in the following situations: where the data were lost; where the research could not be completed because of the nature of the work; or where a research paper had been submitted, but notice of acceptance for publication had not been received. A copy of the manuscript must accompany the progress report. This report will be reviewed by the Credentials Committee.

c. Any other evidence acceptable to the Subboard must be approved by the ABP before it can be included as evidence of productive research and participation.

6. The program director is responsible for notifying all residents of the research requirements necessary for certification upon entry to the subspecialty training program.

7. Subspecialty certifying examinations will include questions on research design, analysis, and interpretation.

8. The research should be performed in a laboratory that best suits the candidate's interests. For example, the ABP is strongly supportive of the Pediatric Scientist Development Program, initiated by Association of Medical School Pediatric Department Chairmen (AMSPDC).

II. Special Requirements for Training Programs

Special Requirements for Training Programs in Pediatric Cardiology, Pediatric Critical Care Medicine, Pediatric Endocrinology, Pediatric Gastroenterology, Pediatric Hematology-Oncology, Neonatal-Perinatal Medicine, Pediatric Nephrology, and Pediatric Pulmonology have been approved by the ACGME or by the RCPSC.

Special Requirements for Training Programs in Pediatric Adolescent Medicine, Pediatric Emergency Medicine, Pediatric Infectious Diseases, and Pediatric Rheumatology have not yet been approved.
by the ACGME. Copies of the Special Requirements and lists of accredited programs are available from the office of the Residency Review Committee for Pediatrics, 515 N State St, Chicago, IL 60610, or the Office of Training and Evaluation, the Royal College of Physicians and Surgeons of Canada, 74 Stanley, Ottawa, Ontario, K1M 1P4. The Special Requirements are published in the Graduate Medical Education Directory or in the RCPSC booklets of general information.

III. Subspecialty "Fast Tracking"

A subspecialty resident who is believed to have demonstrated meaningful accomplishment in research, either before or during residency, may have a part of the training waived. Examples might include a PhD degree or being first author of a research paper in a peer-reviewed journal. The subspecialty program director may ask the Subboard to waive the research requirement's and to reduce the time of subspecialty training by as much as 1 year. This petition must be made either before the beginning of training or during the first year of training. A candidate for this pathway must have completed 3 core years of pediatrics in an accredited program in the United States or Canada, and would not have the option of the Special Alternative Pathway. Furthermore, a subspecialty resident who receives a waiver by the Subboard must complete at least 2 years of training in the subspecialty with at least 1 year of broad-based clinical training.

IV. Certifying Examination

The examination consists of multiple-choice questions. Examples of the types of questions to be used are mailed to registered candidates before the administration of each examination. Some questions on the examination are included for experimental purposes only. These questions will not contribute to the score.

The examination result will be reported by name and score to the pediatric department chairman and subspecialty program director where training occurred.

The validity of the performance of candidates on the subspecialty certifying examination is secured by every means available. The ABP should be contacted in the event of irregular behavior such as giving or obtaining unauthorized information or aid before, during, or after the examination, or offering financial or other benefit to a proctor, employee, or agent of the ABP.

The ABP does not sponsor or maintain records on any courses that claim to be review courses in preparation for the subspecialty certifying examination.

A physician who has a disability and who wishes to be granted special consideration will be required to submit documentation of the disability before appearing for the certifying examination. The applicant should notify the ABP of special considerations that were desired at the time the initial application was submitted.

Except for certifying examinations given in the spring, an applicant for a subspecialty certifying examination must complete training by the date of the examination. A written request for waiver of this policy will be considered on a case-by-case basis.

Information concerning the dates of the subspecialty examinations is widely distributed in journals, sent to program directors, and is contained in the Booklet of Information, which is available on request from the ABP.

Application material for admission to a subspecialty certifying examination of the ABP may be obtained by contacting the ABP at 919-929-0461, or by writing to the American Board of Pediatrics, 111 Silvercrest, Box 208, Chapel Hill, NC 27514-1651. Application forms are available only during the registration period for a particular examination.

As part of the application, the applicant must sign a statement attesting to the fact that he/she has never been convicted of a felony nor is under indictment for a felony at the present time.

1. Has never been convicted of a felony nor is under indictment for a felony at the present time.
2. Has never had a license to practice medicine denied, revoked, suspended, or restricted in the United States or any other country.
3. Has no action pending against him/her before any state licensing board at this time.
4. Has never been chemically dependent.
5. Has not been the subject of any disciplinary action, proceeding, or investigation by any medical society within the last 5 years.
6. Has not been the subject of any investigation or disciplinary proceeding in any hospital, practice group, or medical institution with which he/she has been associated, nor has he/she resigned from any such organization while the subject of a complaint or proceeding within the last 5 years.

Each applicant is considered individually and must be acceptable to the Subboard. Each Subboard recognizes that situations may arise that are not explained by the preceding information. Questions concerning eligibility will be considered by the Credentials Committee of the Subboard.

After the Subboard has approved an application, the candidate becomes board eligible and is expected to take the next examination offered. A candidate who withdraws from the examination after the approval letter/site assignment cards are prepared will forfeit a portion of the fees paid. A candidate who withdraws after the date set for postponement will forfeit all fees paid. To register for a future examination, payment of the reregistration fee will be required.

A candidate who fails an examination will be admitted to the next examination pending application and payment of the reregistration fee.

V. Certification

Beginning in 1980, new applicants must achieve certification within 7 years. A candidate who has an active status as of December 31, 1985, will have until December 31, 1995, to complete the certification process. A candidate who was admitted to the certification process in 1986 to 1989 will have 10 years to complete the process. A candidate who has not been certified within the time limit is no longer board eligible and must pass a reentry examination to regain eligibility status.

A Certificate of Special Qualifications, valid for 7 years, is awarded by the ABP to a candidate who has met the requirements and has passed the certifying subspecialty examination. A program for renewal of subspecialty certification (PRCP-S) has been developed by the ABP. The candidate will be sent registration material in a timely manner.

The names of these certified are sent to the American Board of Medical Specialties (ABMS) for publication in the Directory of Certified Pediatricians and to various pediatric journals. Scores are not sent to ABMS or to the journals.

VI. Policy Regarding Chemical Use and Dependency (Including Drugs and Alcohol)

An applicant who has a history of chemical dependency as reported to the ABP and who submits documentation acceptable to the ABP that the disease is known to be under control for 2 years, may apply for and take a certifying examination provided he/she meets the admission requirements. This policy also pertains to individuals who wish to participate in the PRCP-S.

An applicant who has a history of chemical dependency, as reported to the ABP and who cannot submit documentation acceptable to the ABP that the disease is under control will not be allowed to take a certifying examination or to participate in PRCP-S.
Eligibility Criteria for Certification in Adolescent Medicine

The ABP has established a procedure for certification in adolescent medicine. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

I. Admission Requirements

For admission to the examination, an applicant must have completed one of the following to qualify:

A. Training

A subspecialty resident (hereafter, resident or trainee) entering adolescent medicine training before January 1, 1995, may apply for admission on the basis of completion of 2 years of subspecialty residency training in adolescent medicine.

Three years of full-time, broad-based subspecialty residency training in adolescent medicine is required of a resident entering training on or after January 1, 1995. The period of training must be at least 33 months for those entering training on or after January 1, 1995. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation shall be sent by the director for review by the Credentials Committee.

For a resident beginning adolescent medicine training on or after January 1, 1995, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the “Principles Regarding the Assessment of Meaningful Accomplishment in Research”; and he/she must pass the subspecialty certifying examination. Verification of meaningful accomplishment in research will not be required for individuals who began training before January 1, 1995.

A resident beginning part-time training after January 1, 1995, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those adolescent medicine training programs that are accredited by the ACGME (hereafter, the RRC) or Internal Medicine or by the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enters in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

For an individual using the adolescent medicine residency training route (A), a Verification of Competence Form(s) will be required from the director(s) of the resident’s adolescent medicine training program(s).

B. Practice Experience

Five years of broad-based practice experience in adolescent medicine is required. A minimum of 50% of full-time professional activity (and a minimum of 20 hours a week) must have been spent in the practice of adolescent medicine to receive credit. It is assumed that night and weekend time would be distributed in the same manner as regular time. These 5 years should be of such type and quality that they substitute for the clinical exposure one might have encountered during subspecialty residency training. All adolescent medicine experience must be accrued before December 31, 1998. No foreign adolescent medicine experience will be accepted by the Credentials Committee in fulfillment of the requirements.

For an individual utilizing the adolescent medicine practice experience route (B), an Evaluation Form(s) will be required from the adolescent medicine program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing adolescent medicine.

C. Combined Partial Training and Practice

Subspecialty residency training/adolescent medicine practice experience to equal 5 years as outlined in either of the methods below.

1. A resident completing less than 12 months of subspecialty residency training in adolescent medicine may receive practice credit on a month-for-month basis. For example, a 9-month subspecialty residency would be credited for 9 months of experience; this, added to 4 years and 3 months of adolescent medicine experience would total 60 months or 5 years. These 5 years must be accrued before December 31, 1998.

2. A resident completing 12 to 23 months of subspecialty residency training in adolescent medicine may receive credit on a two-for-one basis. For example, an 18-month subspecialty residency would be credited for 36 months of experience; this added to 24 months of adolescent medicine experience would total 60 months or 5 years. These 5 years must be accrued before December 31, 1998. No credit for partial training will be given for a subspecialty resident who begins training on or after January 1, 1995.

For an individual utilizing the combination subspecialty residency training/adolescent medicine practice experience route (C), a Verification Form(s) will be required from the director(s) of the applicant’s adolescent medicine training program(s) and an Evaluation Form(s) will be required from the adolescent medicine program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing adolescent medicine.

The completed Verification and Evaluation Forms should be sent directly to the ABP.

II. Dual Subcertification in Adolescent Medicine (Internal Medicine and Pediatrics)

Two years of training in adolescent medicine are required for individuals who have completed joint training in internal medicine/pediatric (med/ped) programs and who are dually certified. Graduates from med/ped programs can choose the training track offered by either Board. Candidates who apply to the ABP must meet the requirements of clinical competence and meaningful accomplishment in research.

III. Accredited Training

At the present time, the RRC has not begun the process of accrediting training programs in adolescent medicine. A resident entering subspecialty training in adolescent medicine before completion of the accreditation process by the RRC is advised to enter those programs in which the director or senior faculty of the program is certified in adolescent medicine or possesses equivalent credentials.

It should be noted that these criteria are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.
Eligibility Criteria for Certification in Pediatric Cardiology

The ABP has established a procedure for certification in pediatric cardiology. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

I. Admission Requirements

A subspecialty resident (hereafter, resident or trainee) entering pediatric cardiology training before January 1, 1988, may apply for admission on the basis of completion of two years of subspecialty residency training in pediatric cardiology.

Three years of full-time, broad-based subspecialty residency training in pediatric cardiology is required of a resident entering training on or after January 1, 1988, in a program accredited by the ACGME (hereafter, the RRC) or the RCPSC. The period of training must be at least 36 months for those entering training on or after January 1, 1988. Extended absences, whether for vacation, maternity leave, illness, etc. must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a resident who began pediatric cardiology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training, as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A resident beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric cardiology training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada, unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

II. Dual Subcertification in Cardiology (Internal Medicine and Pediatrics)

There is no change in the usual training requirements in pediatric cardiology for graduates of combined Medicine/Pediatrics programs.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

Eligibility Criteria for Certification in Pediatric Critical Care Medicine

The ABP has established a procedure for certification in pediatric critical care medicine. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

I. Admission Requirements

For admission to the examination, an applicant must have completed one of the following to qualify:

A. A subspecialty resident (hereafter, resident or trainee) entering pediatric critical care medicine training before January 1, 1988, may apply for admission on the basis of completion of 2 years of subspecialty residency training in pediatric critical care medicine.

Three years of full-time, broad-based subspecialty residency training in pediatric critical care medicine is required of a resident entering training on or after January 1, 1988, in a program accredited by the ACGME (hereafter, the RRC) or the RCPSC. The period of training must be at least 33 months for those entering training on or after January 1, 1988. Extended absences, whether for vacation, maternity leave, illness, etc. must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a resident who began pediatric critical care medicine training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A resident beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric critical care programs that are operated in association with comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

B. A resident who is certified by the ABP in pediatric cardiology, neonatal-perinatal medicine, pediatric pulmonology, or anesthesiology (by the American Board of Anesthesiology) may be admitted to the examination with 2 years of subspecialty residency training in pediatric critical care medicine in a program under the supervision of a director who is certified in pediatric critical care medicine or, lacking such certification, possesses equivalent credentials. A resident entering a program after January 1, 1992, must have his/her training in a program accredited by the RRC or RCPSC in order to be eligible to take the certifying examination in pediatric critical care medicine. A resident who entered training in pediatric critical care medicine before January 1, 1988, will need only 1 year of training. At least 1 year must be in broad-based clinical training.

II. Dual Subcertification in Critical Care Medicine (Internal Medicine and Pediatrics)

The Subboard of Pediatric Critical Care Medicine has established the following requirements for individuals who are graduates of combined training programs in general internal medicine and general pediatrics.
1. The applicant must have at least 1 year of broad-based clinical pediatric critical care medicine training.

2. The applicant must have a minimum of 1 year of research training related to pediatric critical care medicine. The setting for the research training should be one that is most suitable for the applicant's interest.

3. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a Verification of Competence Form must be completed by the program director(s) in pediatrics and internal medicine stating satisfactory completion of the required training, as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual general pediatric residency years (PL 1, 2, 3).

4. An applicant interested in certification in critical care medicine in internal medicine should contact the ABIM.

5. The total length of training leading to dual subspecialization must be at least 4 years in duration.

6. An applicant may not take the subspecialty certifying examination of the ABP until all training has been completed. It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

Eligibility Criteria for Certification in Pediatric Emergency Medicine

The ABP and the American Board of Emergency Medicine (ABEM) have established, through the Credentials Committee of the joint Subboard of Pediatric Emergency Medicine, a procedure for certification in Pediatric Emergency Medicine. To be eligible for this subspecialty examination, a physician must be certified in either pediatrics by the ABP or in emergency medicine by the ABEM. In addition to the specific admission requirements listed below, there are general eligibility criteria for all ABP subspecialties that must be fulfilled to be eligible for certification. These are available upon request to the ABP. The ABEM also has general requirements that must be fulfilled and are available from the ABEM office.

I. Admission Requirements

For admission to the examination, an applicant must have completed one of the following to qualify:

A. Training

A subspecialty resident (hereafter, resident or trainee) entering pediatric emergency medicine training before January 1, 1995, may apply for admission on the basis of completion of 2 years of subspecialty residency training in pediatric emergency medicine. The program and the training must conform to the Special Requirements for Training Programs of the Subboard of Pediatric Emergency Medicine.

1. Requirements for candidates applying to the ABP for certification

Three years of broad-based residency training in pediatric emergency medicine is required of a resident entering training on or after January 1, 1985. The period of training must be at least 33 months for those entering training on or after January 1, 1995. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a resident beginning pediatric emergency medicine training on or after January 1, 1995, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training, as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination. Verification of meaningful accomplishment in research will not be required for individuals who began training before January 1, 1995.

A resident beginning training after January 1, 1995, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

2. Requirements for candidates applying to the ABEM for certification

The present requirement of 2 years of full-time, broad-based residency training in pediatric emergency medicine will continue for a resident entering training on or after January 1, 1995. The following must be accomplished to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training; he/she must pass the subspecialty certifying examination. A resident beginning training after January 1, 1995, may complete the required training on a part-time basis not to exceed 4 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric emergency medicine training programs that are operated in association with general comprehensive pediatric residency programs accredited by the ACGME (hereafter, the RRC) or by the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada, unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP or the ABEM.

No credit will be given for subspecialty training during the core residency.

An applicant may not apply for the same training period toward fulfillment of requirements of two different certifying sub-boards.

B. Dual Certification

A candidate who is certified by ABP and ABEM may apply via this pathway. A candidate who has completed training to meet the certification requirements of ABP and ABEM before January 1, 1999, may apply via this pathway.

C. Pediatric Emergency Medicine Practice

A candidate who has had broad-based and clearly focused experience in pediatric emergency medicine may apply via the practice pathway. The applicant must fulfill all of the following

1. Professional activities spent in the practice of pediatric emergency medicine for a period of 60 months, and totaling a minimum of 6,000 hours, clearly focused on the care of patients in the pediatric age group (31 years of age) in the emergency department. (ED). A clear professional and clinical commitment to the practice of pediatric emergency medicine must be demonstrated.

2. Of the 6,000 hours, 2,800 hours must have been accrued in a 24-month (maximum) consecutive period of time to demonstrate a clear professional focus and intensity exclusively in the practice of pediatric emergency medicine.

1016 Graduate Medical Education Directory
3. A minimum of 4,000 of the 6,000 hours must have been spent in the clinical practice of pediatric emergency medicine. If the candidate practices in a general ED, only time spent exclusively in pediatric care can be used for credit.

4. The remaining 2,000 hours may be spent in either clinical care or a mixture of related nonclinical activities clearly focused on pediatric emergency medicine including administration, teaching, prehospital care, quality assurance or quality improvement, research, or other academic activities.

5. Practice time shall have occurred in a hospital-based ED, with the following characteristics:
   a. The ED must provide a patient mix of minor-major medical and traumatic conditions.
   b. The ED must be a formal component of the Emergency Medical Services system for pediatric patients.
   c. The ED must provide triage and initial stabilization of all presenting conditions.
   d. The ED must provide 24-hour-a-day full-time physician coverage.
   e. The ED should have a minimum of 15,000 nonscheduled pediatric patient visits per year.

6. The physician must be physically present in the ED, and available and responsible for clinical patient care. Hours spent in an “on call” arrangement are not acceptable.

7. Practice time must have occurred in the United States, or its territories, or in Canada. Military practice time must have occurred in accredited US military hospitals. Practices occurring outside these locations will not be accepted. Specifically, practice time at a freestanding emergency facility will not be accepted for fulfillment of the eligibility requirements.

8. For nonclinical practice pathway credit, the candidate may count nonclinical time devoted to pediatric emergency medicine. Specific documentation of the actual nature of the nonclinical time will be required.

9. Applicants seeking certification in more than one subspecialty, on the basis of practice alone, may not apply the same practice period toward fulfillment of the requirements of two different certifying subboards.

10. Practice time need not be continuous. However, all practice time shall have occurred in the 7-year interval before application for certification and before July 1, 1996.

D. Subspecialty Residency Training Plus Practice

A combination of training and practice experience may be utilized to fulfill eligibility requirements. The combination must equal 60 months and 6,000 hours. Credit for partial training will be given as follows:

1. An applicant who has completed 1 to 11 months of subspecialty residency training in pediatric emergency medicine will receive practice credit on a month-to-month basis. Each month of subspecialty training in pediatric emergency medicine credited toward practice will be counted as 100 hours toward the 6,000 hours minimal requirement.

2. An applicant who has completed 12 to 23 months of subspecialty residency training in pediatric emergency medicine will receive practice credit on a 2-for-1 basis. Each month of subspecialty training in pediatric emergency medicine credited toward practice will be counted as 200 hours toward the 6,000 hours minimal requirement.

3. No credit for partial training will be given for training beginning on or after January 1, 1995.

4. The 60 months of combination training and practice credit must be accrued during a 7-year interval before application for certification and before July 1, 1996.

II. Verification of Training and Practice

1. For a candidate utilizing the subspecialty residency training route, a Verification of Competence Form(s) from the director(s) of the applicant's pediatric emergency medicine training program(s) is required.

2. For a candidate utilizing the dual certification pathway, the certificate number and year of certification for each board must be provided.

3. For a candidate utilizing the practice pathway, an Evaluation Form will be required from either the pediatric emergency medicine program director, the pediatric department chairman or the chief of pediatrics, or the emergency department chairman or chief of emergency medicine in the hospital where the practice experience occurred.

4. For a candidate utilizing the subspecialty training plus practice pathway, both a Verification of Competence Form(s) from the pediatric emergency medicine program and an Evaluation Form(s) will be required.

Certification shall be time-limited for the length of years that the primary board currently grants certification, 7 years for ABP and 10 years for ABEM.

III. Description of the Institution/Emergency Department, and Procedures Experience

1. The individual(s) responsible for completion of the Verification of Competence Form(s) or the Evaluation Form(s) must provide a description of the institution and the ED.

2. The applicant must complete a "Procedures for Pediatric Emergency Medicine" form with the application.

IV. Accredited Training

At the present time, the BRC has not begun the process of accrediting training programs in pediatric emergency medicine. A resident entering subspecialty training in pediatric emergency medicine before completion of the accreditation process by the BRC is advised to enter those programs in which the director or senior faculty of the program is certified in pediatric emergency medicine by the ABP and/or ABEM or possesses equivalent credentials.

Eligibility Criteria for Certification in Pediatric Endocrinology

The ABP has established a procedure for certification in pediatric endocrinology. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

I. Admission Requirements

A subspecialty resident (hereafter, resident or trainee) who entered pediatric endocrinology before January 1, 1987, may apply for admission on the basis of completion of 2 years of subspecialty residency training in pediatric endocrinology.

Three years of full-time, broad-based subspecialty residency training in pediatric endocrinology is required of a resident entering training on or after January 1, 1988, in a program accredited by the ACGME (hereafter, the BRC) or the RCPSC. The period of training must be at least 36 months for those entering training on or after January 1, 1988. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a resident who began pediatric endocrinology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating...
satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the “Principles Regarding the Assessment of Meaningful Accomplishment in Research”; and he/she must pass the subspecialty certifying examination.

A resident beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric endocrinology training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPS are acceptable. All subspecialty training must be completed in the United States or Canada, unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

II. Dual Subcertification in Endocrinology (Internal Medicine and Pediatrics)
The Subboard of Pediatric Endocrinology has established the following requirements for individuals who are graduates of combined training programs in general internal medicine and general pediatrics.
1. The applicant must have at least 1 year of broad-based clinical pediatric endocrinology training.
2. The applicant must have a minimum of 1 year of research training related to pediatric endocrinology. The setting for the research training should be one that is most suitable for the applicant's interest.
3. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a Verification of Competence Form must be completed by the program director(s) in pediatrics and internal medicine stating satisfactory completion of the required training, as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the “Principles Regarding the Assessment of Meaningful Accomplishment in Research”; and he/she must pass the subspecialty certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual general pediatric residency years (PL 1, 2, 3).
4. An applicant interested in certification in endocrinology in internal medicine should contact the ABIM.
5. The total length of training leading to dual subspecialty must be at least 4 years in duration.
6. An applicant may not take the certifying examination of the ABP until all training has been completed.

Eligibility Criteria for Certification in Pediatric Gastroenterology
The ABP has established a procedure for certification in pediatric gastroenterology. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

I. Admission Requirements
For admission to the examination, an applicant must have completed one of the following to qualify:

A. Training
A subspecialty resident (hereafter, resident or trainee) who entered pediatric gastroenterology training before January 1, 1990, may apply for admission on the basis of completion of 2 years of subspecialty residency training in pediatric gastroenterology.

Three years of full-time, broad-based subspecialty residency training in pediatric gastroenterology is required of a resident entering training on or after January 1, 1990. The period of training must be at least 33 months for those entering training on or after January 1, 1990. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a resident who began pediatric gastroenterology training on or after January 1, 1990, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the “Principles Regarding the Assessment of Meaningful Accomplishment in Research”; and he/she must pass the subspecialty certifying examination.

A resident beginning part-time training after January 1, 1990, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric gastroenterology training programs that are operated in association with general comprehensive pediatric residency programs accredited by the ACOGME (hereafter, the RRC) or by the RCPS are acceptable. All subspecialty training must be completed in the United States or Canada, unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

For an individual using the pediatric gastroenterology residency training route (A), Verification of Competence Form(s) will be required from the director(s) of the resident's pediatric gastroenterology training program(s).

B. Practice Experience
Five years of broad-based practice experience in pediatric gastroenterology is required. Broad-based pediatric gastroenterology is defined as encompassing the majority of the clinical components, which are a modification of the guidelines for subspecialty training in gastroenterology published in 1986 by the Committee on Training and Education of the American Gastroenterological Association (Winship DH, Grand RJ, Gray G, et al: Guidelines for subspecialty training in gastroenterology. Gastroenterology 1980; 79:955–967). This modification was published in Gastroenterology 1987;90:492–493 (Mott KJ, et al). A minimum of 50% of full-time professional activity must be spent in the practice of pediatric gastroenterology to receive credit. It is assumed that that and weekend time would be distributed in the same manner as regular time. These 5 years should be of such type and quality that they substitute for the clinical exposure one might have encountered during subspecialty residency training. All pediatric gastroenterology experience must be accrued before December 31, 1994. No foreign pediatric gastroenterology experience will be accepted by the Credentials Committee in fulfillment of the requirements.

For an individual utilizing the pediatric gastroenterology practice experience route (B), Evaluation Form(s) will be required from the
pediatric gastroenterology program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now, or has been, practicing pediatric gastroenterology.

C. Combined Partial Training and Practice

Subspecialty residency training/pediatric gastroenterology practice experience equal to 5 years as outlined in either of the methods below

1. A resident completing less than 12 months of subspecialty residency training in pediatric gastroenterology may receive practice credit on a month-for-month basis. For example, a 9-month subspecialty residency would be credited for 9 months of experience; this, added to 4 years and 3 months of pediatric gastroenterology experience would total 60 months or 5 years. These 5 years must be accrued before December 31, 1994.

2. A resident completing 12 to 23 months of subspecialty residency training in pediatric gastroenterology may receive credit on a two-for-one basis. For example, an 18-month subspecialty residency would be credited for 36 months of experience; this, added to 24 months of pediatric gastroenterology experience would total 60 months or 5 years. These 5 years must be accrued before December 31, 1994. No credit for partial training will be given for a subspecialty resident who began training on or after January 1, 1990.

For an individual utilizing the combination subspecialty residency training/pediatric gastroenterology practice experience route (C), a Verification Form(s) will be required from the director(s) of the applicant's pediatric gastroenterology training program(s) and an Evaluation Form(s) will be required from the pediatric gastroenterology program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing pediatric gastroenterology.

The completed Verification and Evaluation Forms should be sent directly to the ABP.

II. Dual Subcertification in Gastroenterology

(Internal Medicine and Pediatrics)

The Subboard of Pediatric Gastroenterology has established the following requirements for individuals who are graduates of combined training programs in general internal medicine and general pediatrics.

1. The applicant must have at least 1 year of broad-based clinical pediatric gastroenterology training.

2. The applicant must have a minimum of 1 year of research training related to pediatric gastroenterology. The setting for the research training should be one that is most suitable for the applicant's interest.

3. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a Verification of Competence Form must be completed by the program director(s) in pediatrics and internal medicine stating satisfactory completion of the required training, as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual general pediatric residency years (Pl 1, 2, 3).

4. An applicant interested in certification in gastroenterology in internal medicine should contact the ABIM.

5. The total length of training leading to dual subspecialization must be at least 4 years in duration.

6. An applicant may not take the subspecialty certifying examination of the ABP until all training has been completed.

III. Accredited Training

The RRC has begun the process of accrediting training programs in pediatric gastroenterology. A resident entering subspecialty training in pediatric gastroenterology before completion of the accreditation process by the RRC is advised to enter those programs in which the director or senior faculty of the program is certified in pediatric gastroenterology or possesses equivalent credentials.

Eligibility Criteria for Certification in Pediatric Hematology-Oncology

The ABP has established a procedure for certification in pediatric hematology-oncology. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

I. Admission Requirements

A subspecialty resident (hereafter, resident or trainee) who entered pediatric hematology-oncology training before January 1, 1986, may apply for admission on the basis of completion of 2 years of subspecialty residency training in pediatric hematology-oncology.

Three years of full-time, broad-based subspecialty residency training in pediatric hematology-oncology is required of a resident entering training on or after January 1, 1986, in a program accredited by the ACGME (hereafter, the RRC) or the RCPSC. The period of training must be at least 33 months for those entering training on or after January 1, 1986. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a resident who began pediatric hematology-oncology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A resident beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted. Only those pediatric hematology-oncology training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada, unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

II. Dual Subcertification in Hematology-Oncology

(Internal Medicine and Pediatrics)

There is no change in the usual training requirements in pediatric hematology-oncology for graduates of combined Medicine/Pediatrics programs.
Eligibility Criteria for Certification in Pediatric Infectious Diseases

The ABP has established a procedure for certification in pediatric infectious diseases. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

I. Admission Requirements

For admission to the examination, an applicant must have completed one of the following to qualify

A. Training

A subspecialty resident (hereafter, resident or trainee) entering pediatric infectious diseases training before January 1, 1986, may apply for admission on the basis of completion of 2 years of subspecialty residency training in pediatric infectious diseases.

Three years of full-time, broad-based subspecialty residency training in pediatric infectious diseases is required of a resident entering training on or after January 1, 1995. Of the period of training must be at least 39 months for those entering training on or after January 1, 1995. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a resident beginning pediatric infectious diseases training on or after January 1, 1995, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination. Verification of meaningful accomplishment in research will not be required for individuals who began training before January 1, 1995.

A resident beginning part-time training after January 1, 1996, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric infectious diseases training programs that are operated in association with general comprehensive pediatric residency programs accredited by the ACGME (hereafter, the RRC) or by the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada, unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

For an individual using the pediatric infectious diseases residency training route (A), Verification of Competence Form(s) will be required from the director(s) of the resident’s pediatric infectious diseases training program(s).

B. Practice Experience

Five years of broad-based practice experience in pediatric infectious diseases is required. A minimum of 50 percent of full-time professional activity must have been spent in the practice of pediatric infectious diseases to receive credit. It is assumed that night and weekend time would be distributed in the same manner as regular time. These 5 years should be of such type and quality that they substitute for the clinical exposure one might have encountered during subspecialty residency training. All pediatric infectious diseases experience must be accrued by December 31, 1998. No foreign pediatric infectious diseases experience will be accepted by the Credentials Committee in fulfillment of the requirements.

For an individual utilizing the pediatric infectious diseases practice experience route (B), Evaluation Form(s) will be required from the pediatric infectious diseases program director (if there is a subspecialty training program), or the pediatric department chairman, or the chief of pediatrics in the hospital(s) where the applicant is now, or has been, practicing pediatric infectious diseases.

C. Combined Partial Training and Practice

Subspecialty residency training/pediatric infectious diseases practice experience to equal 5 years as outlined in either of the methods below

1. A resident completing less than 12 months of subspecialty residency training in pediatric infectious diseases may receive practice credit on a month-for-month basis. For example, a 9-month subspecialty residency would be credited for 9 months of experience; this, added to 4 years and 3 months of pediatric infectious diseases experience would total 60 months or 5 years. These 5 months must be accrued before December 31, 1998.

2. A resident completing 12 to 23 months of subspecialty residency training in pediatric infectious diseases may receive credit on a two-for-one basis. For example, an 18-month subspecialty residency would be credited for 36 months of experience; this, added to 24 months of pediatric infectious diseases experience would total 60 months or 5 years. These 5 months must be accrued before December 31, 1998. No credit for partial training will be given for a subspecialty resident who begins training on or after January 1, 1995.

For an individual utilizing the combination subspecialty residency training/pediatric infectious diseases practice experience route (C), a Verification Form(s) will be required from the director(s) of the applicant’s pediatric infectious diseases training program(s) and an Evaluation Form(s) will be required from the pediatric infectious diseases program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing pediatric infectious diseases.

The completed Verification and Evaluation Forms should be sent directly to the ABP.

II. Dual Subcertification in Infectious Diseases

Internal Medicine and Pediatrics

The Subboard of Pediatric Infectious Diseases has established the following requirements for individuals who are graduates of combined training programs in general internal medicine and general pediatrics.

1. The applicant must have at least 1 year of broad-based clinical pediatric infectious diseases training.

2. The applicant must have a minimum of 1 year of research training related to pediatric infectious diseases. The setting for the research training should be one that is most suitable for the applicant’s interest.

3. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a Verification of Competence Form must be completed by the program director(s) in pediatrics and internal medicine stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination. No credit toward subspecialty qualification will be
allowed for elective time spent in subspecialty areas during the usual general pediatric residency years (Pl, 1, 2, 3).

4. An applicant interested in certification in infectious diseases in internal medicine should contact the ABIM.

5. The total length of training leading to dual subspecialty must be at least 4 years in duration.

6. An applicant may not take the subspecialty certifying examination of the ABP until all training has been completed.

The same requirements are necessary for a resident who begins pediatric infectious diseases training before January 1, 1986, except for the following: (a) meaningful accomplishment in research is not required; or (b) the total length of training leading to dual certification must be at least 3 years in duration.

III. Accredited Training

At the present time, the RRC has not begun the process of accrediting training programs in pediatric infectious diseases. A resident entering subspecialty training in pediatric infectious diseases before completion of the accreditation process by the RRC is advised to enter those programs in which the director or senior faculty of the program is certified in pediatric infectious diseases by the ABP or possesses equivalent credentials.

Eligibility Criteria for Certification in Medical Toxicology

The American Board of Pediatrics (ABP) in collaboration with the American Board of Emergency Medicine and Preventive Medicine will offer a certification of added qualification in Medical Toxicology. This document provides the requirements of the ABP.

A. Certification by the American Board of Pediatrics (ABP)

An applicant must take and pass the certifying examination in general pediatrics before being permitted to take a pediatric subspecialty certifying examination. However, the application for the subspecialty certifying examination may be submitted before taking the certifying examination in general pediatrics.

B. Licensure

An applicant must have a valid, unrestricted license to practice medicine in any of the states, districts or territories of the United States or provinces of Canada or have unrestricted privileges to practice medicine in the US Armed Forces. A copy of the unrestricted license must accompany the application material.

C. Pathways

For admission to the certification examination in medical toxicology, the diplomate must have completed one of four eligibility pathways. The pathways are: (A) Medical Toxicology Training; (B) Diplomate of American Board of Medical Toxicology (ABMT); (C) Medical Toxicology Practice; (D) Medical Toxicology Training Plus Practice.

1. Medical Toxicology Subspecialty Training Pathway

A diplomat must complete an acceptable subspecialty residency in medical toxicology of 24 months duration. The training program should be sponsored by and be based within a reasonable geographical proximity of an accredited residency program in emergency medicine, pediatrics, preventive medicine, or any combination of these programs. An institution is discouraged from sponsoring more than one accredited medical toxicology program.

The diplomat must satisfactorily complete the subspecialty training by the date of the examination.

Applicants seeking certification in more than one subspecialty on the basis of training may not apply the same training period toward fulfillment of requirements of more than one subspecialty or subspecialty.

The ABP will request verification of subspecialty training directly from the program director.

2. Diplomate of ABMT Pathway

ABMT diplomates who are also diplomates of an ABMS board may apply.

On June 30, 1999, the ABMT pathway will expire. To apply under the ABMT pathway an applicant must have fulfilled the requirements of this pathway by that date.

3. Medical Toxicology Practice Pathway

The practice pathway is available to physicians who, through study and focused practice experience, have developed qualifications in medical toxicology. The criteria for this category consist of all of the following:

a. During a minimum of 60 months, which must have occurred during the most recent 7 years prior to the date the application is submitted, the applicant must show a demonstrated commitment to teaching, scholarly activities, research, or administration and patient care in the specialty of medical toxicology, and (b) must accumulate a minimum of 2,500 hours of direct patient care activities.

Direct patient care activities include primary or consultative care, exposure evaluation, screening and preventive services, and epidemiologic and health investigations. Telephone consultations are not considered a direct patient care activity.

b. Documented affiliation and activity with a poison center certified by the American Association of Poison Control Centers or the Canadian Association of Poison Control Centers, or its equivalent.

Applicants seeking certification in more than one subspecialty may not apply the same practice hours toward fulfillment of the requirements of more than one certifying specialty or subspecialty.

On June 30, 1999, the practice pathway will expire. To apply under the practice pathway an applicant must have fulfilled the requirements of the practice pathway by that date.

For each medical toxicology activity submitted to fulfill the eligibility criteria, a verification form must be completed. The verification forms are included with the application material, and it is the applicant's responsibility to provide the form to the appropriate individual for completion and return to the ABP office.

4. Medical Toxicology Training Plus Practice Pathway

A combination of training and practice experience may be utilized to fulfill the eligibility requirements of the practice pathway of application. This pathway will be utilized by physicians who have completed less than 2 years in a medical toxicology training program, and/or have preceptorship training in medical toxicology and who have maintained a medical toxicology practice as outlined in Pathway C, above.

Practice credit may be granted for partially completed subspecialty training or preceptorship training. The combination for training credit and medical toxicology practice must equal the requirements of the practice category of application (see Section C, items 1 and 2).

An applicant who has completed 1-11 months of subspecialty training in medical toxicology will receive practice credit toward the 60-month requirement on a month-for-month basis. An applicant who has completed 12-23 months of acceptable subspecialty training...
training in medical toxicology will receive practice credit toward the 60-month requirement on a two-for-one basis for each month of training completed.

Preceptorship training will be reviewed for possible practice credit toward the 60-month requirement on a month-for-month basis, up to a maximum of 24 months’ credit.

Patient care hours accumulated during the subspecialty training and/or preceptorship will be reviewed for credit on an hour-for-hour basis toward fulfilling the minimum 2,500-hour direct patient care requirement.

On June 30, 1998, the medical toxicology training plus practice pathway will expire. To apply under this pathway, an applicant must have fulfilled the requirements of the practice pathway by that date.

Eligibility Criteria for Certification in Neonatal-Perinatal Medicine

The ABP has established a procedure for certification in neonatal-perinatal medicine. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

Admission Requirements

A subspecialty resident (hereafter, resident or trainee) who entered neonatal-perinatal medicine training before January 1, 1989, may apply for admission on the basis of completion of 2 years of subspecialty residency training in neonatal-perinatal medicine. Only those programs that are a part of an institution that offers residency or fellowship training in obstetrics and gynecology, and include experience in fetal-maternal-perinatal medicine will be considered.

Three years of full-time, broad-based subspecialty residency training in neonatal-perinatal medicine is required of a resident entering training on or after January 1, 1989, in a program accredited by the ACGME (hereafter, the RRC) or the RCPSC. The period of training must be at least 33 months for those entering training on or after January 1, 1989. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a resident who began neonatal-perinatal medicine training on or after January 1, 1989, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competency Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the “Principles Regarding the Assessment of Meaningful Accomplishment in Research”; and he/she must pass the subspecialty certifying examination.

A resident beginning part-time training after January 1, 1989, may complete the required training on a part-time basis not to exceed 5 years. No continuous absence of more than 1 year will be permitted.

Eligibility Criteria for Certification in Pediatric Nephrology

The ABP has established a procedure for certification in pediatric nephrology. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

I. Admission Requirements

A subspecialty resident (hereafter, resident or trainee) who entered pediatric nephrology training before January 1, 1987, may apply for admission on the basis of completion of 2 years of subspecialty residency training in pediatric nephrology.

Three years of full-time, broad-based subspecialty residency training in pediatric nephrology is required of a resident entering training on or after January 1, 1987, in a program accredited by the ACGME (hereafter, the RRC) or the RCPSC. The period of training must be at least 33 months for those entering training on or after January 1, 1987. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a resident who began pediatric nephrology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competency Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the “Principles Regarding the Assessment of Meaningful Accomplishment in Research”; and he/she must pass the subspecialty certifying examination.

A resident beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 5 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric nephrology training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

II. Dual Subcertification in Nephrology (internal Medicine and Pediatrics)

The Subboard of Pediatric Nephrology has established the following requirements for individuals who are graduates of combined training programs in general internal medicine and general pediatrics.

1. The applicant must have at least 1 year of broad-based clinical pediatric nephrology training.
2. The applicant must have a minimum of 1 year of research training related to pediatric nephrology. The setting for the research training should be one that is most suitable for the applicant’s interest.
3. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a Verification of Competency Form must be completed by the program director(s) in pediatrics and internal medicine stating satisfactory completion of the required training, as well as verification of clinical competence and meaningful accomplishment in re-
search; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual general pediatric residency years (PL 1, 2, 3).
4. An applicant interested in certification in nephrology in internal medicine should contact the ABIM.
5. The total length of training leading to dual subspecialization must be at least 4 years in duration.
6. An applicant may not take the certifying examination of the ABP until all training has been completed.

Eligibility Criteria for Certification in Pediatric Pulmonology
The ABP has established a procedure for certification in pediatric pulmonology. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

I. Admission Requirements
For admission to the examination, an applicant must have completed one of the following to qualify:
A. A subspecialty resident (hereafter, resident or trainee) who entered pediatric pulmonology training before January 1, 1986, may apply for admission on the basis of completion of 2 years of subspecialty residency training in pediatric pulmonology.
B. Three years of full-time, broad-based subspecialty residency training in pediatric pulmonology is required of a resident entering on or after January 1, 1986, in a program accredited by the ACGME (hereafter, the RRC) or the RCPSC. The period of training must be at least 33 months for those entering training on or after January 1, 1986. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a resident who began pediatric pulmonology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.
A resident beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric pulmonology training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.
B. A resident who is certified by the ABP in pediatric critical care medicine in 1994 or thereafter may be admitted to the examination with 2 years of accredited subspecialty training in pediatric pulmonology. At least 1 year must be in broad-based clinical training.

II. Dual Subcertification in Pulmonology (Internal Medicine and Pediatrics)
The Subboard of Pediatric Pulmonology has established the following requirements for individuals who are graduates of combined training programs in general internal medicine and general pediatrics.
1. The applicant must have at least 1 year of broad-based clinical pediatric pulmonology training.
2. The applicant must have a minimum of 1 year of research training related to pediatric pulmonology. The setting for the research training should be one that is most suitable for the applicant's interest.
3. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a Verification of Competence Form must be completed by the program director(s) in pediatrics and internal medicine stating satisfactory completion of the required training, as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual general pediatric residency years (PL 1, 2, 3).
4. An applicant interested in certification in pulmonology in internal medicine should contact the ABIM.
5. The total length of training leading to dual subspecialization must be at least 4 years in duration.
6. An applicant may not take the certifying examination of the ABP until all training has been completed.

III. Subcertification in Pediatric Pulmonology and Allergy/Immunology
The intent of this route is to outline a mechanism whereby residents already certified in pediatrics may qualify for subcertification in both pediatric pulmonology and allergy/immunology in a shorter total period of time than that presently required (3 years' pediatric pulmonology plus 2 years' allergy/immunology). This can be accomplished by successfully completing research training relating to the requirements of both the Subboard of Pediatric Pulmonology and the Conjoint Board of Allergy/Immunology.

The total training program would require no less than 4 years (48 months) with at least 1 year spent in clinical pulmonology training and 1 year in clinical training for allergy/immunology. The minimal research requirement is 12 months in an environment and project relevant to both pulmonology and allergy/immunology. The fourth year would be spent in training acceptable to the Subboard of Pediatric Pulmonology and may be in clinical training or relevant additional research training.
1. Training in pediatric pulmonology may precede or follow training in allergy/immunology.
2. The candidate must train in pediatric pulmonology and allergy/immunology programs accredited by the RRC; the two programs do not necessarily have to be at the same institution. The research project selected by the trainee must be discussed with and approved by both training program directors.
3. The trainee must supply written details of any research project for which he/she plans to seek joint approval of both the Subboard of Pediatric Pulmonology and the Conjoint Board of Allergy/Immunology before or early in the course of his/her first year in a subspecialty program. The Subboard and Conjoint Board, in turn, will provide a preliminary written opinion to the trainee concern-
ing the acceptability of the research project. This early approval
is no guarantee of acceptance of the final research product.
4. The trainee is required to satisfy the General and Special Require-
ments for the Subboard and Joint Board as listed in the
Graduate Medical Education Directory. Final admission to
either certification examination is granted by the Credentials
Committees after completion of training, fulfillment of the re-
search competence requirements, and review of all application
materials submitted by the candidate.

Eligibility Criteria for Certification in
Pediatric Rheumatology

The ABP has established a procedure for certification in pediatric
rheumatology. In addition to the specific admission requirements
listed below, there are general eligibility criteria that must be ful-
filled to be eligible for certification. A copy of the general eligibility
criteria is available upon request to the ABP.

1. Admission Requirements

For admission to the examination, an applicant must have com-
pleted one of the following to qualify

A. Training

A subspecialty resident (hereafter, resident or trainee) who entered
pediatric rheumatology training before January 1, 1992, may apply
for admission on the basis of completion of 2 years of subspecialty
residency training in pediatric rheumatology.

Three years of full-time, broad-based subspecialty residency train-
ing in pediatric rheumatology is required of a resident entering
training on or after January 1, 1992. The period of training must be
at least 36 months for those entering training on or after January 1,
1992. Extended absences, whether for vacation, maternity leave, ill-
ness, etc., must be made up. If the program director believes that an
extended absence of more than 3 months is justified, a letter of ex-
planation should be sent by the director for review by the Creden-
tials Committee.

For a resident who began pediatric rheumatology training on or
after January 1, 1992, the following must be accomplished in order
to become certified in the subspecialty: a Verification of Compete-
tence Form must be completed by the program director(s) stating
satisfactory completion of the required training as well as verifica-
tion of clinical competence and meaningful accomplishment in re-
search; the resident must meet the criteria as stated in the
“Principles Regarding the Assessment of Meaningful Accomplish-
ment in Research”; and he/she must pass the subspecialty certify-
ing examination.

A resident beginning part-time training after January 1, 1992,
may complete the required training on a part-time basis not to ex-
cede 6 years. No continuous absence of more than 1 year will be
permitted.

Only those pediatric rheumatology training programs that are op-
erated in association with general comprehensive pediatric resi-
dency programs accredited by the ACGME (hereafter, the BRC) or
by the RCPSC are acceptable. All subspecialty training must be com-
pleted in the United States or Canada, unless the Credentials Com-
mitee of the Subboard has given approval for foreign subspecialty
training to an applicant before he/she enrolls in such a program. An
applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core
residency.

For an individual using the pediatric rheumatology residency
training route (A), Verification of Competence Form(s) will be re-
quired from the director(s) of the resident's pediatric rheumatology
training program(s).

B. Practice Experience

Five years of broad-based practice experience in pediatric rheu-
matology is required. A minimum of 50 percent of full-time pro-
fessional activity must be spent in the practice of pediatric
rheumatology to receive credit. It is assumed that night and week-
end time would be distributed in the same manner as regular time.
These 5 years should be of such type and quality that they substi-
tute for the clinical exposure one might have encountered during
subspecialty residency training. All pediatric rheumatology experi-
ence must be accrued before December 31, 1996. No foreign pedi-
ratic rheumatology experience will be accepted by the Credentials
Committee in fulfillment of the requirements.

For an individual utilizing the pediatric rheumatology practice ex-
perience route (B), an Evaluation Form(s) will be required from
the pediatric rheumatology program director (if there is a subspe-
cialty training program) or the pediatric department chairman or
the chief of pediatrics in the hospital(s) where the applicant is now
or has been practicing pediatric rheumatology.

C. Combined Partial Training and Practice

Subspecialty residency training/pediatric rheumatology practice ex-
perience to equal 5 years as outlined in either of the methods below

1. A resident completing less than 12 months of subspecialty resi-
dency training in pediatric rheumatology may receive practice
credit on a month-for-month basis. For example, a 9-month sub-
specialty residency would be credited for 9 months of experience;
this, added to 4 years and 3 months of pediatric rheumatology ex-
perience would total 60 months or 5 years. These 5 years must be
accrued before December 31, 1996.

2. A resident completing 12 to 23 months of subspecialty residency
training in pediatric rheumatology may receive credit on a two-
for-one basis. For example, an 18-month subspecialty residency
would be credited for 36 months of experience; this, added to 24
months of pediatric rheumatology experience would total 60
months or 5 years. These 5 years must be accrued before December
31, 1996. No credit for partial training will be given for a sub-
specialty resident who began training on or after January 1, 1992.

For an individual utilizing the combination subspecialty resi-
dency training/pediatric rheumatology practice experience route
(C), a Verification Form(s) will be required from the director(s) of
the applicant’s pediatric rheumatology training program(s) and an
Evaluation Form(s) will be required from the pediatric rheumatol-
yogy program director (if there is a subspecialty training program)
or the pediatric department chairman or the chief of pediatrics in
the hospital(s) where the applicant is now or has been practicing pedi-
ratic rheumatology.

The completed Verification and Evaluation Forms should be sent
directly to the ABP.

II. Dual Subcertification in Rheumatology
(Internal Medicine and Pediatrics)

The Subboard of Pediatric Rheumatology has established the fol-
lowing requirements for individuals who are graduates of combined
training programs in general internal medicine and general
pediatrics.

1. The applicant must have at least 1 year of broad-based clinical pe-
diatric rheumatology training.

2. The applicant must have a minimum of 1 year of research training
related to pediatric rheumatology. The setting for the research
training should be one that is most suitable for the applicant's in-
terest.

3. In order to become certified in the subspecialty, the following
must be accomplished by a subspecialty resident: a Verification
of Competence Form must be completed by the program direc-
tor(s) in pediatrics and internal medicine stating satisfactory
completion of the required training, as well as verification of
Clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the “Principles Regarding the Assessment of Meaningful Accomplishment in Research” and he/she must pass the subspecialty certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual general pediatric residency years (PL 1, 2, 3).

4. An applicant interested in certification in rheumatology in internal medicine should contact the ABIM.

5. The total length of training leading to dual subspecialization must be at least 4 years in duration.

6. An applicant may not take the subspecialty certifying examination of the ABP until all training has been completed.

III. Accredited Training

At the present time, the RRC has not begun the process of accrediting training programs in pediatric rheumatology. A resident entering subspecialty training in pediatric rheumatology before completion of the accreditation process by the RRC is advised to enter those programs in which the director or senior faculty of the program is certified in pediatric rheumatology or possesses equivalent credentials.

Eligibility Criteria for Certification in Sports Medicine

The American Board of Pediatrics (ABP) in collaboration with the American Boards of Family Practice, Internal Medicine, and Emergency Medicine will offer a certificate of added qualification in Sports Medicine. This document provides the requirements of the ABP.

Admission Requirements

A. Certification by the American Board of Pediatrics (ABP)

An applicant must take and pass the certifying examination in general pediatrics before being permitted to take a pediatric subspecialty certifying examination. However, the application for the subspecialty certifying examination may be submitted before taking the certifying examination in general pediatrics.

B. Licensure

An applicant must have a valid, unrestricted license to practice medicine in any of the states, districts, or territories of the United States or provinces of Canada or have unrestricted privileges to practice medicine in the US Armed Forces. A copy of the unrestricted license must accompany the application material.

C. Training or Practice Experience

For admission to the examination, an applicant must have completed one of the following to qualify:

1. Training
   An applicant must have completed a minimum of 1 year in a sports medicine training program that is associated with an accredited residency program in Family Practice, Emergency Medicine, Internal Medicine, or Pediatrics.

   A Verification of Competence Form must be completed by the program director stating satisfactory completion of the required training as well as verification of clinical competence. The ABP will send this form to the program director for completion.

2. Practice Experience

   Five years of practice experience in sports medicine is required. This experience must consist of at least 20% of total professional time devoted to sports medicine. The activities that qualify a candidate are one or more of the following:

   a. Field supervision of athletes
   b. Emergency assessment and care of acutely injured athletes
   c. Diagnosis, treatment, management, and disposition of common sports injuries and illnesses
   d. Management of medical problems in the athlete
   e. Rehabilitation of the ill or injured athlete
   f. Exercise as treatment

   Partial training in sports medicine, ie, less than 12 months, will be credited on a month-by-month basis as practice experience.

   An Evaluation Form must be completed by an individual to verify that at least 20% of professional time is devoted to sports medicine in one or more of the six activities cited above. The form must be completed by a physician who is knowledgeable about the candidate’s practice, such as the chief of sports medicine, the chief of pediatric department, or the medical director of a hospital where the applicant has admitting privileges. A partner or practice associate is not acceptable.

   Practice experience accrued before 1987 will not be considered. All sports medicine experience must be accrued by June 30, 1999.

   The deadline for an applicant choosing the practice experience route will be the 1999 examination.

   The RRC currently reviews and accredits pediatric subspecialty programs in all the certified subspecialties except adolescent medicine, pediatric emergency medicine, pediatric infectious diseases, and pediatric rheumatology. When the Special Requirements for Training Programs in these latter subspecialties have been approved, the RRC will accredit training programs in these fields. A list of accredited programs is published in the Graduate Medical Education Directory.

1995 Subspecialty Certifying Examinations

Certifying examinations in the following pediatric subspecialties will be given on the following dates:

April 7
Sports Medicine

August 8
Pediatric Endocrinology
Pediatric Gastroenterology
Pediatric Nephrology

November 14
Neonatal-Perinatal Medicine

Contact the ABP for further information regarding these examinations.

Certification in Allergy and Immunology

Certification in allergy and immunology is offered by the ABAI, a Conjoint Board of the ABP and the ABIM. For details, contact the ABAI, University City Science Center, 3624 Market St, Philadelphia, PA 19104.

---

6. A candidate who has a primary certificate from one of the other three Boards should contact that Board office for its eligibility criteria.

7. Further description of these activities will be included in the application material.
American Board of Physical Medicine and Rehabilitation

Joel A DeLisa, MD, Chairman, Newark, New Jersey
Robert P Christopher, MD, Vice Chairman, Memphis, Tennessee
Murray B Brandstater, MD, Loma Linda, California
Gerald Fensenthal, MD, Baltimore, Maryland
Bruce M Gans, MD, Detroit, Michigan
Margaret C Hammond, MD, Seattle, Washington
Phala A Helm, MD, Dallas, Texas
Joseph C Honet, MD, Detroit, Michigan
PA. Patrick Maloney, MD, North Little Rock, Arkansas
Malcolm C McPhee, MD, Scottsdale, Arizona
James R Swenson, MD, Salt Lake City, Utah
Nicolas E Walsh, MD, San Antonio, Texas
Joachim L Opitz, MD, Executive Director/Secretary, Rochester, Minnesota

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Physical Medicine and Rehabilitation to ascertain whether the information below is current.)

General Requirements for Certification

A. Graduates of Educational Institutions in the United States or Canada

1. Graduation from a medical school approved by the Liaison Committee on Medical Education, or graduation from a Canadian medical school approved by the Canadian Medical Association, or graduation from an osteopathic medical school approved by the American Osteopathic Association.

2. Possession of a valid and unrestricted license to practice medicine or osteopathy in one or more of the 50 United States or Puerto Rico or licensure in Canada. Evidence of licensure or an acceptable equivalent must be submitted with application for certification examinations.

3. Satisfactory completion of the requirements of the Board for graduate education and experience in physical medicine and rehabilitation as set forth below.

4. Satisfactory compliance with rules and regulations of the Board pertaining to the completion and filing of the application for examination and the payment of required fees.

B. Graduates of Educational Institutions Not in the United States and Canada

1. Possession of a valid certificate from the Educational Commission for Foreign Medical Graduates (ECFMG) and, optionally, a certificate from the Federation Licensing Examination (PLEX) or the Fifth Pathway. International medical graduates (both aliens and US citizens) will be expected to complete the ECFMG examination format; Foreign Medical Graduate Examination in Medical Science (FMGEMS), including basic and clinical examinations; and, when indicated, English proficiency, or National Board of Medical Examiners Parts I, II, or the United States Medical Licensing Exam I, II. This is required by the Accreditation Council on Graduate Medical Education (ACGME) before a resident can enter accredited graduate medical education programs in the United States.

2. Possession of a valid and unrestricted license to practice medicine or osteopathy in one or more of the 50 United States or Puerto Rico or licensure in Canada. Evidence of licensure must be submitted with application for certification examinations.

3. Satisfactory completion of the Board's requirements for graduate education and experience in physical medicine and rehabilitation as set forth below.

4. Satisfactory compliance with rules and regulations of the Board pertaining to the completion and filing of the application for examination and the payment of required fees.

Residency Training Requirements

Applicants for the certifying examinations must have satisfactorily completed 48 months of training in a physical medicine and rehabilitation residency approved by the ACGME on recommendation of the Residency Review Committee for Physical Medicine and Rehabilitation. The program must include 36 months of training in physical medicine and rehabilitation. Twelve of the 48 months of training should consist of a coordinated program of experience in fundamental clinical skills, which includes at least 6 months in family practice, internal medicine, pediatrics, general surgery, or a combination of these. The other 6 months of the year of experience may include no less than 1 month in any of the following specific categories: cardiology, radiology, neurology, urology, rheumatology, nephrology, vascular medicine, pediatrics, pulmonary medicine, neurosurgery, orthopedic surgery, family practice, general surgery, general internal medicine, emergency medicine, psychiatry, oncology, critical care medicine, and anesthesiology. Training in the fundamental skills should be accomplished during the first half of the residency training program.

The program director and the credentials committee of the Board, at the beginning of the residency, will make the decision regarding the acceptability for credit for the 12 months of ACGME, Royal College of Physicians and Surgeons of Canada (RCPSG), or AOA credited training in fundamental clinical skills as described above.

This format is mandatory for all residents who enter training in 1985 or subsequently. In some instances, 36 months of physical medicine and rehabilitation residency may be acceptable on recommendation of the program director, with 1 year of credit being granted on the basis of prior residency training (see below under Credit for Other Specialty Training).

The training programs require that a significant amount of each resident's time be scheduled to provide for progressively increasing responsibilities in the direct clinical care of in- and outpatients. At least one-third, and not more than two-thirds, of a resident's experiences should be devoted to clinical care and management of rehabilitation of hospitalized patients. The resident may spend up to 6 months in pertinent supervised clinical or basic research.

Adequate training to achieve basic qualifications in electromyography and electrodiagnosis is essential. This includes achieving the ability to perform and interpret electromyographic and other electrodiagnostic evaluations such as nerve conduction studies and somatosensory evoked potentials. Experience with inpatient and outpatient pediatric rehabilitation is required.

Opportunities to achieve understanding of special aspects of rehabilitation in patients in pediatric and geriatric age groups should be included. Comprehensive management of spinal cord-injured patients is fundamental. Also, achieving abilities to evaluate, predict outcome in, and manage rehabilitation of patients with brain lesions is part of the basic residency. A wide variety of patients with musculoskeletal and neuromuscular problems, both acute and chronic, should be encountered. Principles involved in cardiac reha-
bilitation and sports medicine should be included. Psychosocial aspects of patients with disabilities require in-depth understanding.

Credit for Other Specialty Training
Physicians who have had 1 year or more of residency training (up to and including certification) in a residency approved by the ACGME, by the RCPSC, or by the AOA in related relevant specialties including internal medicine, neurology, orthopedics, pediatrics, family practice, and surgery may receive up to 12 months of nonphysical medicine and rehabilitation training credit on recommendation of the program director and at the discretion of the Board. However, completion of 36 months of the physical medicine and rehabilitation training requirement in an ACGME-approved residency is mandatory.

No credit will be given toward shortening the basic required 4-year program for non-ACGME-approved residencies, fellowships, internships; for Fifth Pathway in a United States AMA-designated training institution; or for hospital house physician experience. No credit will be allowed for fellowships prior to or during residency training.

A resident entering or beginning the required 4-year program in physical medicine and rehabilitation with previous approved graduate training or educational experience may qualify for an institutional appointment at the second-year level. However, such an appointment may not be interpreted to mean that the resident is in the second year of a physical medicine and rehabilitation residency. All of the required training and experience as stated above must have been taken in the United States or Canada.

Requirements for Admissibility to Part I of the Board Examination
To be admissible to Part I of the Board examination, candidates are required to complete satisfactorily at least 48 months of postgraduate residency training, of which at least 36 months are spent in supervised education and clinical practice in physical medicine and rehabilitation and 12 months in internal medicine or an acceptable alternative in an accredited training program. In line with the guidelines of the Board for clinical investigator training, 60 months of integrated physical medicine and rehabilitation and research training qualifies for admissibility to Part I of the certifying examination.

Satisfactory completion of educational and training requirements in force at the beginning of the resident's training in an accredited program will be considered acceptable for application for admissibility to the certifying examination. Residents in approved physical medicine and rehabilitation training programs in Canada, on satisfactory completion of all the requirements for certification in that country, may apply for admissibility to Part I of the American Board of Physical Medicine and Rehabilitation's (ABPM&R) certifying examination.

Final admissibility is contingent upon receipt of the final-year evaluation by the program director by May 1 in the examination year.

If a resident is placed on probationary status during the final year of his or her residency program, this status must be rescinded by the program director before May 1 for the resident to be admissible.

Requirements for Admissibility to Part II of the Board Examination
At least a full year of clinical practice, fellowship, research, or a combination of these following completion of residency training is required. The clinical practice should provide evidence of professional, ethical, and humanitarian standards attested to by two certi-

fied psychiatrists in the local or regional area. In rare instances in which a psychiatrist is not geographically available, two licensed physicians may support the candidate's application for Part II.

Alternatively, a candidate may take Part I and II together if all residency training and the practice time requirements are completed. However, the candidate fails Part I, Part II will not count or be recognized in any way.

An optional fifth year in a physical medicine and rehabilitation residency, which includes at least 6 months of advanced clinical practice of physical medicine and rehabilitation with essentially full patient responsibility, and also includes teaching experience, plus opportunities for time in research or relevant clinical or basic science electives, may qualify such resident for admissibility to Part II of the certifying examinations upon the recommendation of the training program director. An optional fifth year may be valuable for those anticipating a full- or part-time academic career.

Dual Specialty Certification
For those desiring to pursue integrated training and dual specialty certification, currently the Board will participate with the American Boards of Pediatrics, Internal Medicine, and Psychiatry and Neurology, provided there is completion of 36 months of accredited training in general comprehensive physical medicine and rehabilitation. The proposed program agreed to by the respective training program directors should be submitted by the program directors to both Boards for approval. Admissibility to Part I of the ABPM&R certification examinations may be sought during the last year of training.

A full year of clinical practice, fellowship, research, or a combination of those activities is required for admissibility to the Part II certifying examination in physical medicine and rehabilitation (PM&R). Preferably those activities would relate to the practice of PM&R and the other specialty.

Guidelines for residency training program directors interested in considering developing such a program are available through the ABPM&R office.

A. Special Agreement Between the American Board of Pediatrics and the American Board of Physical Medicine and Rehabilitation
There exists a special agreement between the American Board of Pediatrics (ABP) and the ABPM&R whereby a physician interested in pediatric rehabilitation can qualify for admission to the certifying examinations of both Boards. The individual residency curriculum must be submitted prospectively by the program directors to both Boards, at the latest at the end of the R-3 year, and may be designed to be completed in approximately 60 months. The nonphysical medicine and rehabilitation 12-month segment of the 4-year PM&R residency will be credited on the basis of satisfactory completion of the regular first year of pediatric residency.

The ABP requires a minimum of 36 months of general comprehensive pediatric training, with 6 months' credit for pediatric rehabilitation within the physical medicine and rehabilitation training. The ABPM&R requires a minimum of 36 months' accredited physical medicine and rehabilitation residency, with 6 months' credit for related rotations during the pediatric training. Six months of full-time equivalent (FTE) of pediatric rehabilitation is required. Twenty-four months of the 36 months' PM&R training must be in adult PM&R.

It is recommended that all training be completed at one academic institution, but any deviation will require prospective approval by both Boards. When two separate institutions are involved, there should be evidence of adequate coordination to provide an appropriate educational experience. Vacation is shared pro rata be-
B. Special Agreement Between the American Board of Internal Medicine and the American Board of Physical Medicine and Rehabilitation

There exists a special agreement between the American Board of Internal Medicine (ABIM) and the ABPM&R whereby a prospective resident interested in dual specialty certification in internal medicine and in physical medicine and rehabilitation can qualify to apply for admission to the certifying examinations of each Board by satisfactory completion of a preplanned combined, integrated program, which could be designed to be completed in a minimum of 60 months.

The non-physical medicine and rehabilitation 12-month segment of the 48 months of physical medicine and rehabilitation residency concerned with basic fundamental clinical skills will be credited on the basis of satisfactory completion of the regular first year of internal medicine residency. In addition, the ABPM&R requires a minimum of 36 months of accredited PM&R residency, with 6 months' credit for internal medicine rotations in such areas as rheumatology, endocrinology, cardiovascular, or pulmonary subspecialties of internal medicine.

During the 30 months in physical medicine and rehabilitation, the resident must satisfactorily complete 24 months of hospital and outpatient clinical management of patients receiving physical medicine and rehabilitation services. Physical medicine and rehabilitation training includes basic and advanced knowledge of musculoskeletal and neuromuscular anatomy and physiology as related to kinesiology, exercise, and functional activities as well as to immobilization and inactivity. Applications and prescription of therapeutic exercise, orthotics, prosthetics, and assistive and supportive devices for ambulation and mobility are essential. The following segments of training in physical medicine and rehabilitation are also required: experience with inpatient or outpatient pediatric rehabilitation, adequate training to achieve basic qualifications in electromyography and electrodiagnosis, and opportunities to achieve understanding of special aspects of rehabilitation of patients in geriatric age groups.

The ABPM&R requirement for 12 months of clinical practice, fellowship, research, or a combination of these activities for admissibility to Part II of its Board examination can be met by documented evidence that at least 50% of the time is devoted to physical medicine and rehabilitation.

The 3-year internal medicine residency requirements are in part met by ABIM, recognizing 6 months' credit for physical medicine and rehabilitation residency training involving physical medicine and rehabilitation management of patients with internal medicine-related problems such as occurring in those with various rheumatologic, cardiovascular, pulmonary, stroke, and oncologic conditions. It is recommended that all training be completed at one academic institution; however, any deviation will require prospective approval by both Boards. Before the end of the R-2 level of training in either specialty, each Board would prospectively approve detailed curricular plans for a given trainee submitted by the two program directors. When two separate institutions are involved, there should be evidence of adequate coordination to provide an appropriate educational experience. Vacation is shared pro rata between the training time spent in internal medicine and in physical medicine and rehabilitation.

C. Special Agreement Between the American Board of Psychiatry and Neurology and the American Board of Physical Medicine and Rehabilitation

The American Board of Psychiatry and Neurology (ABPN) and the ABPM&R have approved the proposal that residents interested in dual certification in neurology and in physical medicine and rehabilitation can qualify to apply for admission to the certifying examinations of each Board by satisfactory completion of an integrated program planned and approved by both Boards prior to the end of the R-3 year, designed to be completed in a minimum of 72 months.

For purposes of this double-Boarding, both specialty Boards will require a 12-month basic clinical skills segment in internal medicine.

The ABPM&R requires a minimum of 36 months of accredited PM&R residency, and ABPN requires 36 months of accredited neurology residency. In order to decrease the total training time by 1 year, to a total of 72 months, 12 months of training in areas that satisfy the special requirements in neurology and physical medicine and rehabilitation would include 6 months of training in PM&R acceptable to the program director in neurology and 6 months of training in neurology that would be acceptable to the program director in PM&R.

It is recommended that all training be completed at one academic institution, or if two institutions are involved, adequate coordination should provide an appropriate educational experience that meets the requirements and approval of both Board. Before the end of the R-3 year of training in either specialty, each Board must approve the training plan for a given trainee submitted by the two program directors. Vacation is shared pro rata between the two training programs.

Application

The application form that must be submitted by an applicant for the examination leading to certification can be obtained only by writing to the executive director of the Board. The completed application shall contain a record of the candidate's undergraduate and postgraduate training and a copy of the medical degree diploma or certificate; a copy of the current medical license to practice in the 50 United States, Puerto Rico, or Canada, the program director's statement that the candidate has or is anticipated to have satisfactorily completed an approved graduate program; records of other graduate study, hospital staff appointments or teaching positions, and length of time in a practice limited to physical medicine and rehabilitation, medical papers published, and any other information the applicant deems relevant to the determination of the admissibility for examination.

In addition, the applicant must submit with the application the names of three psychiatrists or other physicians to whom the Board may write for professional and character references. At the option of the applicant, he or she may include the names of any additional physicians. The applicant should submit to the program director a form requesting the rating of the professional ability of the applicant. The program director should promptly return the completed form to the Board Office. No decision regarding admissibility to the examination will be made until the physicians from whom references are requested have replied.

All information submitted to the Board by the physician from whom a reference has been requested shall remain confidential and will not be disclosed to the candidate without the permission of the said physician. Strict confidentiality of references submitted is required to ensure that the Board receives complete and accurate evaluations of all applicants.
An applicant who plans to take Part I only must submit a fee of $700, $200 of which is a processing fee and nonrefundable. The fees must accompany the application.

Applicants applying for Part II must describe in a letter the professional time spent during his or her 1 year of clinical practice, fellowship, research, or a combination of these, and send an examination fee of $600. The applicant should also submit statements from two physicians, preferably Board-certified physiatrists, verifying the applicant's year in clinical practice, fellowship, research, or a combination of these according to acceptable professional, ethical, and humanistic standards. Possession of a valid and unrestricted license to practice medicine or osteopathy in one or more of the 50 United States or Puerto Rico or licensure in Canada, or an acceptable equivalent will be required. Evidence of licensure must be submitted with application for certification examinations.

Applicants who plan to take both Parts I and II, initially the same year, must send with the application the fee of $1,300. Two hundred dollars ($200), as heretofore mentioned, is a processing fee and nonrefundable. Physicians who have failed Part I or Part II (or both) can apply for admisssibility for reexamination during any subsequent examination period. Fees for reexamination are $500 for Part I or $600 for Part II, or, if both Parts I and II are taken the same year, the fee is $1,100.

The completed application form or letter of application, as applicable, and appropriate fee must be submitted by November 15 of the year before the scheduled examination. A penalty fee of $200 will be required before consideration of applications postmarked after November 15 and before December 15. Once a candidate is declared admissible, fees are forfeited if the candidate withdraws for any reason or does not appear for the examination.

The applicant must be scheduled to complete the graduate education or clinical practice requirements on or before August 31 following the scheduled examination date for which he/she has applied in order to have the application considered for the examination of that year. Except as hereafter provided, no fees paid hereunder will be refunded. Only in the event that an applicant withdraws his/her application prior to the meeting of the Board to act thereon, or in the event that an applicant is declared not admissible to the examination, will the Board return to the applicant the refundable portion of the fee. Currently there is no limit to the number of times a physician may apply for repeat examinations.

The Board is a nonprofit organization, and the fees of the candidates are used solely for defraying the actual expenses of the Board. The Directors of the Board serve without remuneration. The Board reserves the right to change the fees when necessary.

**Designation of Admissibility**

"Board admissible" is a term used by the Board to define the status of the candidate who has been accepted by the Board to take the examination for which the candidate has applied; designation of "Board admissible" does not continue beyond the date such examination is given, regardless of results. The Board does not accept any use of the term "Board-eligible" in lieu of documented admissibility.

A. For those applicants who have not previously applied, or who have previously applied and withdrawn their application, or who have previously applied and have been declared not admissible, the procedures required for applicants toward becoming admissible to Board examinations are as follows:
1. Timely filing of the completed application form and educational credentials with the Executive Director of the Board by the applicant.
2. Payment of the fee for the examination by the applicant.
3. Submittal of requested references.
4. Receipt of the program directors' and other requested references.
5. Reception of a letter of confirmation from the executive director of the Board to the candidate verifying that the applicant has fulfilled all requirements, and by Board action, has been declared admissible.

B. For applicants who are reapplying for Part I, having failed Part I, or who are applying for Part II, having successfully completed Part I, or who are reapplying for Part II, having failed Part II, but who have successfully passed Part I, the procedures required for applicants toward being designated admissible are as follows:
1. Submittal of a letter of application for the examination by the applicant to the executive director of the Board or, if required, the resubmittal of an application form. The letter should contain a statement describing the required clinical practice, fellowship, research, or a combination of these.
2. Payment of the examination fee by the applicant.
3. Receipt of two letters of verification of 1 year of clinical practice, fellowship, research, or a combination of these, preferably from Board-certified physiatrists.
4. Reception of a letter of confirmation from the Executive Director of the Board to the candidate verifying that the applicant has fulfilled all requirements, and by Board action, has been declared admissible.

C. Following the establishment of Board admissibility, the candidate will be notified of the time and place for the examination.

A candidate who fails Part I or Part II or both parts of the examination may reapply for admissibility for reexamination. This must be done before November 15 of the year before the scheduled examination. Currently there is no limit to the number of times a physician may apply for repeat examinations.

**Absence From Training**
The Board stipulates that a resident should not be absent from the residency training for more than 6 weeks (30 working days) yearly. Any leave time or absence beyond 6 weeks would need to be made up by arrangement with the program director. "Leave time" includes sick leave, vacation, maternity leave, leave for locum tenens, clinical trips, or work in another institution that is not an ACGME-accredited residency. Leave time or vacation may not be accumulated to reduce the overall duration of training. Institutional policies regarding absences will be respected.

**Forfeiture of Fees**

Once an applicant has been declared admissible and is a candidate, the fees will be forfeited if the candidate withdraws for any reason or does not appear for the examination.

**Examinations**

As part of the requirements for certification by the ABPM&R, candidates must demonstrate satisfactory performance in an examination conducted by the Board covering the field of physical medicine and rehabilitation.

The examination for certification is given in two parts. Part I is written, Part II is oral.

Part I (written) may be taken after the satisfactory completion of the specialized graduate education required by the Board outlined above.

Part II (oral) may be taken only after 1 year of clinical practice, fellowship, research, or a combination of these following residency training.

In the event a candidate taking both Part I and Part II in the same year fails Part I of the examination, results of Part II shall not be considered or disclosed.
Both the written and oral examinations will cover certain aspects of the basic sciences as well as clinical PM&R. Those basic sciences will include:

2. Physics: electricity, mechanics, biophysics of physical agents, and kinetic and functional systems.
3. Physiology: physiology of nerve, muscle, and bone; physiologic effects of the various physical agents used in physical medicine and rehabilitation; cardiopulmonary; cardiovascular; and genitourinary physiology; and physiology of exercise and of inactivity.
4. Pathology: histopathology of muscles, nerves, bones, joints, soft tissues, and central nervous system.
5. Other fundamental sciences: the applicant may be examined concerning his/her knowledge of other subjects related to PM&R, including related pharmacology, as well as methods of assessing psychosocial and vocational needs of patients.

The clinical aspects will include:

1. Diseases and conditions of all ages that come within the field of PM&R. These include various rheumatic diseases; neuromuscular diseases; cerebral and spinal cord injuries and diseases (e.g. cerebrovascular accidents, postoperative conditions of the brain and spinal cord, cerebral palsy, multiple sclerosis, etc.); and musculoskeletal diseases, including the large group of traumatic and orthopedic conditions.
2. The clinical use of such physical agents or methods as heat, water, electricity, ultraviolet radiation, massage, exercise, and rehabilitation techniques.
3. Diagnostic procedures including electromyography and electrodiagnosis.
4. A knowledge of the roles of other health professionals within or associated with the field of PM&R, such as the physical therapist, occupational therapist, recreational therapist, clinical psychologist, speech pathologist, medical social worker, and vocational counselor; and the ability to coordinate the services of such professionals.
5. An understanding of the basic principles of physical medicine and rehabilitation, and the ability to prescribe, manage, and supervise specific treatment to be executed by other health professionals.

Method of Examination

Part I and Part II of the board examination are given once each year, usually in May, at such times and places as the Board designates.

Part I is a written examination. This examination is divided into morning and afternoon periods of approximately 3 hours each. The questions are designed to test the candidate’s knowledge of basic sciences and clinical management as related to PM&R, and will be in the form of objective testing.

Part II is an oral examination. The oral examinations are given by the Directors of the Board with the assistance of selected guest examiners. Each candidate will have three 40-minute oral examinations with three separate examiners.

Candidates will be expected to present in a concise, orderly fashion evidence of their proficiency in the management of various clinical conditions that come within the field of PM&R. During the oral examination, questions will be asked about diagnostic procedures, therapeutic procedures, and patient management. The candidate should demonstrate familiarity with the literature of basic and clinical research, as well as recent significant literature pertinent to PM&R. Conciseness and clarity of statement is expected. Evidence of the professional maturity of the candidate in clinical procedures and of factual knowledge will be sought.

Unethical and Irregular Behavior

Candidates who apply to take the written and oral examinations must certify that the information they provide in their applications is true and accurate. If (1) any misrepresentation is discovered in the candidate’s application, in any other information submitted to the Board, or in the identity of a person applying to take or taking the examination; (2) any financial or other benefit is offered by a candidate to any director, officer, employee, proctor, or other agent or representative of the Board in order to obtain a right, privilege, or benefit not usually granted by the Board to similarly situated candidates; (3) any irregular behavior during the examination such as copying answers, sharing information, using notes, or otherwise giving or receiving aid is discovered by observation, statistical analysis of answer sheets, or otherwise; or (4) any portion of the candidate’s absence from the designated examination room for whatever reason and any duration is excused or is otherwise impermissible, the candidate in question shall be given written notice of the charges and an opportunity to respond in accordance with the appeals procedures set forth in the rules and regulations of the Board. If yes are imposed pursuant to the rules and regulations of the Board, the Board may notify the person(s) directly involved in the irregularity.

Method of Examination

Part I and Part II of the board examination are given once each year, usually in May, at such times and places as the Board designates.

Part I is a written examination. This examination is divided into morning and afternoon periods of approximately 3 hours each. The questions are designed to test the candidate’s knowledge of basic sciences and clinical management as related to PM&R, and will be in the form of objective testing.

Part II is an oral examination. The oral examinations are given by the Directors of the Board with the assistance of selected guest examiners. Each candidate will have three 40-minute oral examinations with three separate examiners.

Candidates will be expected to present in a concise, orderly fashion evidence of their proficiency in the management of various clinical conditions that come within the field of PM&R. During the oral examination, questions will be asked about diagnostic procedures, therapeutic procedures, and patient management. The candidate should demonstrate familiarity with the literature of basic and clinical research, as well as recent significant literature pertinent to PM&R. Conciseness and clarity of statement is expected. Evidence of the professional maturity of the candidate in clinical procedures and of factual knowledge will be sought.

Unethical and Irregular Behavior

Candidates who apply to take the written and oral examinations must certify that the information they provide in their applications is true and accurate. If (1) any misrepresentation is discovered in the candidate’s application, in any other information submitted to the Board, or in the identity of a person applying to take or taking the examination; (2) any financial or other benefit is offered by a candidate to any director, officer, employee, proctor, or other agent or representative of the Board in order to obtain a right, privilege, or benefit not usually granted by the Board to similarly situated candidates; (3) any irregular behavior during the examination such as copying answers, sharing information, using notes, or otherwise giving or receiving aid is discovered by observation, statistical analysis of answer sheets, or otherwise; or (4) any portion of the candidate’s absence from the designated examination room for whatever reason and any duration is excused or is otherwise impermissible, the candidate in question shall be given written notice of the charges and an opportunity to respond in accordance with the appeals procedures set forth in the rules and regulations of the Board. If yes are imposed pursuant to the rules and regulations of the Board, the Board may notify the person(s) directly involved in the irregularity.

Method of Examination

Part I and Part II of the board examination are given once each year, usually in May, at such times and places as the Board designates.

Part I is a written examination. This examination is divided into morning and afternoon periods of approximately 3 hours each. The questions are designed to test the candidate’s knowledge of basic sciences and clinical management as related to PM&R, and will be in the form of objective testing.

Conciseness and clarity of statement is expected. Evidence of the professional maturity of the candidate in clinical procedures and of factual knowledge will be sought.
Certification Requirements

The American Board of Physical Medicine and Rehabilitation

granted physicians in the practice of physical medicine and rehabilitation in any hospital or clinic are the prerogatives of that hospital or clinic, not of this Board.

The names of consenting diplomates of the Board appear in the Official American Board of Medical Specialties (ABMS) Directory of Board Certified Medical Specialists published by Marquis Who’s Who.

Recertification

Guiding Principles of Recertification

The achievement of the original certification of physical medicine and rehabilitation demonstrates that the individual has met the requirements of the ABPM&R.

The guiding principle of the recertification program of the ABPM&R is to foster the continuing development of excellence in patient care and all aspects of the practice of physical medicine and rehabilitation by its diplomates.

Goals of Recertification

The ABPM&R through its recertification program seeks to encourage, stimulate and support its diplomates in a program of self-directed, life-long learning through the pursuit of continuing medical education.

The recertification process will permit diplomates to demonstrate that they continue to meet the requirements of the ABPM&R.

Recertification will also provide continuing assurance to patients and families served, funding agencies and the public in general of the continuing up-to-date knowledge of physical medicine and rehabilitation diplomates.

Participants in the Recertification Process

Recertification is therefore offered on a voluntary basis to

1. All diplomates holding time-limited certificates issued by the ABPM&R; and

2. All diplomates holding non-time-limited certificates issued by the ABPM&R.

Diplomates with time-limited certificates may renew every 10 years through the process of recertification. By formal application to the ABPM&R and having satisfied the general requirements listed below, diplomates with time-limited certificates may take the recertification examination beginning 3 years prior to the expiration of their time-limited certification. To complete the recertification process diplomates holding time-limited certificates must then satisfy the special requirements described below and achieve a passing grade in the recertification examination of the ABPM&R.

Four years prior to the expiration of their time-limited certification, diplomates will be reminded by the ABPM&R again of the steps involved in the recertification process.

Diplomates holding non-time-limited certificates may apply for the recertification examination starting in 1999 by formal application to the ABPM&R and by having satisfied the general and special requirements. However, once holding a time-limited certificate in addition to a non-time-limited certificate (which will remain valid indefinitely) diplomates must follow the application process of diplomates holding time-limited certification.

Requirements for Recertification

A. General Requirements for Admissibility to the Recertification Examination

Applicants for recertification must meet the following general requirements:

1. Possession of a valid and unrestricted license to practice medicine in the United States, or territory of the United States or Canada.

2. Possession of a time-limited or a non-time-limited certificate from the ABPM&R.

3. Diplomates with time-limited certificates are automatically registered for the recertification process. The registration will be validated upon receipt of the annual maintenance fee starting with year 2 following the receipt of the time-limited certificate.

4. Diplomates with time-limited certificates will be notified regarding the option to participate in the recertification process. Upon written request the diplomates with non-time-limited certificates will be registered in the recertification process. This registration will be validated upon receipt of the annual maintenance fee 1 year following registration.

5. Completion of the ABPM&R application for recertification.

B. Special Requirements for Admissibility to the Recertification Examination

1. Completion of a total of 500 hours of continuing medical education credits during the 10-year recertification period (50 credits per year) is required. At least 300 hours of credits earned in the 10-year period must be AMA Category 1. The AMA Physicians’ Recognition Award will be accepted toward fulfillment of this requirement.

In order to satisfy the CME requirement, participants will be required to report their progress toward completing recertification CME requirements to the Board annually from the date of issuance of the time-limited certificate on a form to be supplied.

2. All candidates must successfully complete the evaluative component of the recertification program (ie, they must attain a passing grade in a practice-oriented, nonproctored, open-book, take-home examination).

Application

An application form to take the recertification examination may be obtained (as of 1999) by sending a written request to the office of the ABPM&R.

There is no limit on the number of times diplomates may attempt to complete the recertification process.

Examination

The examination will be offered for the first time in the year 2000 and annually thereafter.

The written examination for recertification will be clinically focused and offered in the form of a nonproctored, open-book, take-home examination. The examination will be prepared by the ABPM&R and will represent the broad range of professional activities encompassing the specialty. The profile of the examination will consist of test items relating to general psychiatry and test items relating to special emphasis areas of psychiatric practice from which the diplomate will select emphasis areas that most closely match their practice profiles. Overall, 50% of the examination will relate to general psychiatry and 50% will relate to more specialized areas of psychiatric practice.

Certificates

Diplomates with time-limited certificates successfully completing the recertification process will receive a new 10-year time-limited certificate with a starting date 10 years from the date of initial certification or the most recent recertification.

Diplomates with non-time-limited certificates receive a new additional time-limited certificate and receive a notation about this additional certification in The Official ABMS Directory of Medical Specialists published by the American Board of Medical Specialties (ABMS) in conjunction with Marquis Who's Who. In the case that their time-limited certification lapses their non-time-limited notation will continue to be listed.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Plastic Surgery, Inc, to ascertain whether the information below is correct.)

Introduction

The American Board of Plastic Surgery, Inc, which was organized in June 1937 by representatives of various groups interested in this type of surgery, received recognition as a subsidiary of the American Board of Surgery in May 1938. The American Board of Plastic Surgery, Inc, was given the status of a major specialty board in May 1941 by action of the Advisory Board for Medical Specialties as approved by the Council on Medical Education of the American Medical Association, which has designated certain specialty fields as being suitable to be represented by specialty boards.

The Board is organized under the laws of the state of Illinois for charitable, scientific, and educational purposes. No part of its net earnings shall inure to the benefit of any private member, director, officer, or other individual, nor shall the board ever declare or make to any such persons any dividend or other distribution. Nothing herein, however, shall prevent the payment of reasonable compensation for services rendered or the reimbursement of reasonable expenses incurred in connection with the Board's affairs.

Plastic surgeons certified by the Board are listed in the Official ABMS Directory of Board Certified Medical Specialists, published by Marquis Who's Who, in cooperation with the American Board of Medical Specialties (ABMS).

Description of Plastic Surgery

Plastic surgery deals with the repair, reconstruction, or replacement of physical defects of form or function involving the skin, musculoskeletal system, cranio-maxillofacial structures, hand, extremities, breast and trunk, and external genitalia. It uses aesthetic surgical principles not only to improve undesirable qualities of normal structures but in all reconstructive procedures as well.

Special knowledge and skill in the design and surgery of grafts, flaps, free tissue transfer, and replantation is necessary. Competence in the management of complex wounds, the use of implantable materials, and in tumor surgery is required. Plastic surgery has been prominent in the development of innovative techniques such as microvascular and cranio-maxillofacial surgery, liposuction, and tissue transfer. The foundation of surgical anatomy, physiology, pathology, and other basic sciences is fundamental to this specialty.

Competency in plastic surgery implies a special combination of basic knowledge, surgical judgment, technical expertise, ethics, and interpersonal skills in order to achieve satisfactory patient relationships and problem resolution.

Sponsoring Organizations

The American Board of Plastic Surgery, Inc, consists of 19 directors who manage the affairs of the organization. Eighteen directors are elected by the Board from names submitted by the following sponsoring organizations:

Association of Academic Chairmen of Plastic Surgery
American Association for Hand Surgery
American Association of Plastic Surgeons
American College of Surgeons
American Society for Aesthetic Plastic Surgery, Inc
American Society for Surgery of the Hand
American Society of Maxillofacial Surgeons
American Society of Plastic and Reconstructive Surgeons, Inc
American Surgical Association
Canadian Society of Plastic Surgeons
Council of Regional Societies of Plastic and Reconstructive Surgery
Plastic Surgery Research Council
Society of Head and Neck Surgeons

Once elected to the Board, that person's obligation will be primarily to the Board and not to the sponsoring organization.

In addition, one director is elected by the Board from names submitted by the American Board of Surgery.

These 19 individuals are the directors of the Board. Surgeons who fulfill the requirements of the Board and who are granted certification by the Board are known as diplomates of the American Board of Plastic Surgery, Inc.

Purpose

The essential purposes of the Board are to:

1. Establish requirements for the qualifications of applicants who request a certificate of their ability in the field of plastic surgery in its broadest sense.
2. Conduct examinations of approved candidates who seek certification by the Board.
3. Issue certificates to those who meet the Board's requirements and pass the respective examinations.
4. Do and engage in any and all lawful activities that may be incidental or reasonably related to any of the foregoing purposes.

The Board is not an educational institution, and certificates issued by the Board are not to be considered degrees. The certificate does not confer on any person legal qualifications, privileges, or license to practice medicine or the specialty of plastic surgery. Standards of certification are clearly distinct from those of licensure; possession of a Board certificate does not indicate total qualification for practice privileges, nor does it imply exclusion of others not so certified. The Board does not purport in any way to interfere with or limit the professional activities of any licensed physician nor does it desire to interfere with practitioners of medicine and any of their regular or legitimate activities.

It is not the intent nor has it been the function of the Board to define requirements for membership on the staff of hospitals, or to define who shall or shall not perform plastic surgical operations. The Board is not a primary source of censure or primary review of ethical problems.
Policies

It is the Board's prerogative to determine the professional, ethical, moral, physical, and mental fitness of any candidate for its certificate.

The Board will consider opinions expressed concerning an individual's credentials only if they are in writing and signed.

It is the policy of the Board to maintain its autonomy and independence from political and economical considerations that might affect plastic surgery.

The Board recognizes the role of legitimate advertising in the changing medical scene, but it does not approve of advertising that arouses unrealistic expectations, that is false or misleading, that minimizes the magnitude and possible risks of surgery, or that solicits patients for operations that they might not otherwise consider. Such advertising is improper and inconsistent with the high standards of professional and ethical behavior implied by certification by the American Board of Plastic Surgery, Inc.

General Requirements

The following requirements for admissibility are in agreement with those promulgated by the ABMS.

1. The Board will accept only those persons whose major professional activity is limited to the field of plastic surgery.

2. Moral and ethical fitness must be satisfactory to the Board and in conformity with the Code of Ethics of the American Society of Plastic and Reconstructive Surgeons, Inc. Practices that do not conform therewith may result in rejection of an application or in deferral of examination until such matters have been resolved satisfactorily.

The Board may deny a candidate the privilege of sitting for an examination, or may refuse issuance of a certificate, if it is found by additional disclosures or a recent change in status that the candidate no longer meets the general or professional requirements.

Professional Requirements

The Board considers the requirements detailed in Prerequisite Training and Requisite Training to be minimal. Candidates are encouraged to take advantage of broadening experiences in other fields.

The Board reserves the right to:

1. Request lists of operations performed solely by the candidate for one or more years.

2. Request special and extra examinations: written, oral, or practical.

3. Request any specific data concerning the candidate that may be deemed necessary before making a final decision for certification.

4. Consider evidence that a candidate's practice after completion of training is not in accord with generally accepted medical or ethical standards, which may result in rejection of the application or deferral of the examination until such time as the matter has been satisfactorily resolved.

Prerequisite Training

A minimum of 5 years of training is required in order to fulfill the prerequisite and requisite requirements.

Undergraduate Medical or Osteopathic Education

Before beginning prerequisite training, candidates must have graduated from an accredited school of medicine in the United States, Puerto Rico, or Canada that grants a Medical Degree, or from an osteopathic school accredited by the American Osteopathic Association. Graduates of medical schools located outside the United States, Puerto Rico, and Canada must pass a medical science examination administered by the Educational Commission for Foreign Medical Graduates (ECFMG) and obtain ECFMG certification for admission to accredited post-graduate training programs in the United States (FMGEMS and the United States Medical Licensing Examination [USMLE]) are currently administered for this purpose. Or 2. Obtain a passing performance on either the 1-day ECFMG medical examination or the 2-day Visa Qualifying Examination (VQE). Or 3. Have completed a Fifth Pathway program in an accredited school of medicine in the United States or Canada.

Official Evaluation of Prerequisite Training

Official evaluation of prerequisite training by the Board is required prior to the initiation of residency training in plastic surgery. This simple preliminary step will prevent later disappointment. It is the responsibility of all prospective trainees in plastic surgery to secure this evaluation. Each prospective trainee must obtain a Request for Evaluation of Training Form from the Board Office prior to completion of his or her prerequisite training. Along with the completed Request for Evaluation of Training Form, prospective candidates are required to submit a copy of their medical school diploma.

Directors of accredited residency training programs in plastic surgery must require all prospective trainees to have an official evaluation and approval of their prerequisite training by the Board before they begin training.

Approval for residency training in plastic surgery will be provided to those individuals who clearly meet the Board's stated requirements. Further information for detailed credential review will be obtained on all other individuals where training was in other than accredited programs. Official evaluations will be made by the Committee on Credentials and Requirements. Individual officers or members of the Board cannot and will not make such estimates or rulings. It should be emphasized that the answers to many questions require a decision by one or more of the members of the Board. This applies particularly to evaluation of training and questions of admissibility. Decisions are referred to the entire Board at the next scheduled Board meeting. The process of reaching a final decision may require several months, since the full Board meets only twice annually. March 1 and September 1 are the last post-marked dates for submission of written special requests and documentation for consideration by the Committee on Credentials and Requirements.

The Board will issue neither a letter verifying prerequisite training nor an Application for Examination and Certification Form until the Request for Evaluation of Training Form has been received and approved.

Graduate Education in Surgery

The current prerequisite graduate education in surgery is summarized below:

For United States or Canadian Doctors of Medicine or Osteopathy

A candidate with a Medical or Osteopathic Degree granted in the United States or Canada must have completed one of the following:

1. A minimum of 3 years of clinical training with progressive responsibility in the same program in general surgery. Rotating internships will not be accepted in lieu of a clinical year in general surgery. This program must be approved by the Residency Review Committee for Surgery and accredited in the United States by the Accreditation Council for Graduate Medical Education (ACGME) or in Canada by the Royal College of Physicians and Surgeons for full training. The minimum of 3 years of clinical training with progressive responsibility in the same program in general surgery must be completed before the candidate enters a plastic surgery residency. The satisfactory completion of a minimum of 3 years of clinical training with progressive responsibility
in the same program must be verified in writing by the general surgery program director; or
2. An accredited residency training program in neurological surgery, orthopaedic surgery, otolaryngology, or urology. Prospective candidates may initiate residency training in plastic surgery following satisfactory completion of the entire course of training in the United States or Canada, as prescribed for certification by the American Board of Neurological Surgery, the American Board of Orthopaedic Surgery, the American Board of Otolaryngology, or the American Board of Urology. They must meet and comply with the most current requirements in these specialties. Satisfactory completion of training must be verified in writing by the training program director and evidence of current admissibility to the respective specialty board's examination process in the United States is required.

For United States Candidates With a Combined DMD or DDS/MD Degree
Satisfactory completion of a residency program in Oral and Maxillofacial Surgery approved by the American Dental Association (ADA) is an alternate pathway for prerequisite training prior to plastic surgery residency. The satisfactory completion of this training must be verified in writing by the oral and maxillofacial surgery program director. This program must include the integration of a medical school component resulting in a Doctor of Medicine (MD) degree. This combined training must also include a minimum of 24 months of progressive responsibility on surgical rotations under the direction of the general surgery program director after receipt of the MD degree. The general surgery program director must verify in writing the completion of 24 months of general surgery training, the level of responsibility held, inclusive dates, and specific content of rotation. Rotations in general surgery during medical school, prior to the MD degree, will not be considered as fulfilling any part of the 24-month minimum requirement. If the general surgery component is completed at an institution other than the sponsoring institution of the oral and maxillofacial surgery residency, then this training must be completed consecutively with all 24 months spent in the same general surgery program.

For Doctors of Medicine With Medical Degrees Granted Outside the United States or Canada
Satisfactory completion of an accredited residency training program in general surgery, neurological surgery, orthopaedic surgery, otolaryngology, or urology is required. Prospective candidates may initiate residency training in plastic surgery following satisfactory completion of the entire course of training in the United States or Canada, as prescribed for certification by the American Board of Neurological Surgery, the American Board of Orthopaedic Surgery, the American Board of Otolaryngology, the American Board of Surgery, or the American Board of Urology. They must meet and comply with the most current requirements in these specialties. Satisfactory completion of training must be verified in writing by the training program director, and evidence of current admissibility to the respective specialty board's examination process in the United States is required.

Verification of Prerequisite Training
To assure written verification from the program director under whom the candidate completed prerequisite training, the Board Office will provide the program director with a Verification Form for completion and return. It is the candidate's responsibility to (1) advise the program director that the Board will be soliciting a Verification Form and (2) determine that it has been completed and returned.

Requisite Training
Graduate Education in Plastic Surgery
Training in plastic surgery for not less than 3 years is required, and the final year must be at the senior level. Prospective candidates entering a plastic surgery residency accredited for 3 years of training must complete the entire 3 years, with 1 year of senior responsibility.

Candidates beginning plastic surgery residency on or after July 1, 1995, will be required to complete both years of a 2-year program in the same institution or the last 2 years of a 3-year program in the same institution. In either instance, the final year must be at the senior level.

Training in plastic surgery must be obtained in either the United States or Canada. The Board recognizes training in those programs in the United States that have been reviewed by the Residency Review Committee for Plastic Surgery and accredited by the Accreditation Council for Graduate Medical Education or those programs in Canada approved by the Royal College of Physicians and Surgeons of Canada.

Content of Training
Candidates must hold positions of increasing responsibility for the care of patients during these years of training. For this reason, major operative experience and senior responsibility are essential to surgical education and training.

An important factor in the development of a surgeon is an opportunity to grow, under guidance and supervision, by progressive and succeeding stages to eventually assume complete responsibility for the surgical care of the patient.

It is imperative that residents hold positions of increasing responsibility when they obtain training in more than one institution, and 1 full year of experience must be at the senior level. The normal training year for the program must be completed. No credit is granted for part of a year of training.

The Board considers a residency in plastic surgery to be a full-time endeavor and looks with disfavor upon any other arrangement. The minimum acceptable training year is 48 weeks. Should absence exceed 4 weeks per annum for any reason, the circumstances and possible make-up time of this irregular training arrangement must be approved by the Residency Review Committee for Plastic Surgery, and documentation of this approval must be provided to the Board by the program director.

Training in plastic surgery must cover the entire spectrum of plastic surgery. It should include experience in both the functional and aesthetic (cosmetic) management of congenital and acquired defects of the head and neck, trunk, and extremities. Sufficient material of a diversified nature should be available to prepare the trainee to pass the examination(s) of the Board after the prescribed period of training. If the available material on a service is inadequate, the program director may correct the deficiency by establishing an affiliation with one or more surgeons on other services within that hospital or by regular rotation of residents on other approved affiliated services in order that a broad experience might be obtained. The trainee should be provided an opportunity to operate independently on suitable cases under more remote supervision.

This period of specialized training should emphasize the relationships of basic science—anatomy, pathology, physiology, biochemistry, and microbiology—to surgical principles fundamental to all branches of surgery and especially to plastic surgery. In addition, the training program must provide in-depth exposure to the following subjects: the care of emergencies, shock, wound healing, blood replacement, fluid and electrolyte balance, pharmacology, anesthesiology, and chemotherapy.
Accredited Residency Programs

Information concerning accredited training programs may be found in the Graduate Medical Education Directory published by the American Medical Association (AMA) under the aegis of the ACGME. Copies of this directory are available at many medical schools and libraries, or candidates may order the directory directly from the AMA by calling toll free 1 800 621-8335, or by writing to: Order Department OP416796, American Medical Association, PO Box 109090, Chicago, IL 60610-9090.

The Board does not inspect or approve residencies. The Residency Review Committee for Plastic Surgery (RRC) Inspects and makes recommendations for or against approval of a residency training program in plastic surgery only after the director of the residency has filed an application for approval with the Secretary of the Residency Review Committee for Plastic Surgery (515 N State St, Chicago, IL 60610; 312 464-5404). The RRC consists of nine members, three representatives from each of the following: The American Board of Plastic Surgery, Inc, the American College of Surgeons, and the American Medical Association.

Neither the Board nor its individual members can be responsible for the placement of applicants for training. The Board does not maintain a list of available openings in programs. Prospective candidates seeking accredited training in plastic surgery should correspond directly with the directors of those training programs in which they are interested.

Most plastic surgery residencies participate in a special Plastic Surgery Matching Program. (For information, contact Plastic Surgery Matching Program, PO Box 7999, San Francisco, CA 94120; 415 923-3977.)

Nonapproved Residencies

No other residencies in either the United States or Canada or other countries are acceptable in lieu of those specified above. This in no way implies that quality training cannot be acquired elsewhere, but the Board has no method of evaluating the quality of such programs and must be consistent in its requirements.

The Board grants no credit for training, residency, and/or experience in disciplines other than those named.

Applying for Examination and Certification

The prime purpose of the Board is to pass judgment on the education, training, and knowledge of broadly competent and responsible plastic surgeons. Certification by the Board indicates qualification of a specialist at a superior level of excellence. The quality of training of surgeons, as shown by their successful completion of the Board examinations, will be reflected in their ability to achieve good results in practice.

The Board will issue no letters attesting to admissibility for its examinations to any person, institution, or organization until this formal application, along with the required supporting documents, has been received and approved.

Application Process

In order to be admitted to the examination process leading to Board certification, prospective candidates should write to the Board Office requesting application materials during the last 2 months of their residency. An Application for Examination and Certification Form will be provided. This should be completed and submitted to the Board Office immediately following the completion of a candidate’s residency training in plastic surgery. Prospective candidates who do not contact the Board Office within 2 years after completion of their residency in plastic surgery will not be considered for admission to the examinations leading to Board certification.

Deadline for Submission of Application Material

Applications for admission to the upcoming Qualifying Examination to be given in the spring of the following year must be postmarked on or before December 15 to avoid a late penalty fee.

Licensure

All candidates must have a currently valid registered full and unrestricted license to practice medicine in a state, territory, or possession of the United States or in a Canadian province, and must continue to be licensed throughout the certification process. A temporary limited license such as an educational, institutional, or house permit is not acceptable. A photocopy of an active registration certificate bearing a date that will be valid at the time of examination(s) must be submitted by the candidate.

Commissioned officers of the medical service of the armed forces of the United States or Canada on active duty need not present evidence of current registration of licensure, but must provide appropriate information regarding their status.

Letters of Recommendation

If a candidate has completed training in more than one program in plastic surgery, the program director of the first year of training must verify to the Board in writing the satisfactory completion of that year of training. Additionally, the Board may require favorable evaluations and verification from other surgeons.

Required Signatures

Plastic surgery residents who completed their training prior to June 30, 1991, will be sent an Application for Examination and Certification Form that must be completed accurately and signed by them. It must also be signed twice by their program director, once acknowledging the completion of their residency in plastic surgery and once recommending them for admission to the examination process.

Residency Graduation Form

For plastic surgery residents completing their residency on June 30, 1991, and thereafter, a Residency Graduation Form will be provided by the Board to the program director for completion at the end of the candidate’s residency training in plastic surgery. A single form will be sent for each candidate and will require signatures in two places. The first signature, by the program director, will attest that the individual has completed a residency training program in plastic surgery accredited by the Residency Review Committee for Plastic Surgery under the program director’s direction and that the accredited number of years included a year of senior responsibility. The second signature will signify that the program director recommends the individual for admission to the examination process of the Board.

If the program director elects not to sign either statement, the director is required to provide a full written explanation of the reason the required signature(s) is not provided. The individual’s application cannot be processed nor will the individual be admitted to the examination process of the Board without both required signatures.

The Board has asked each program director to complete a Residency Graduation Form within 30 days of completion, by the trainee, of the prescribed duration of the program.

The program director must record any deficiencies that were responsible for the lack of signature(s) and discuss these with the individual. This written communication must be given to the individual and a copy must be forwarded to the Board Office. If further educational training or experience is completed, the program director should request, within 30 days, that another Residency Graduation Form be sent for the required signature(s). If the individual is still felt to be deficient and not recommended for admission to the examination process of the Board, the program director
again must communicate the cause for the lack of signature(s) to the Board Office.

Failure on the part of the program director to complete the Residency Graduation Form within the stipulated framework will be considered an abrogation of the responsibility of the program director and the Residency Review Committee for Plastic Surgery shall be so notified.

Notification of Admissibility

A candidate whose Application for Examination and Certification Form is approved will be notified in writing. An Information Form and Identification Form will be sent with this notification. They are to be completed and returned to the Board Office within 30 days of notification. Failure to complete and return these forms will prevent the candidate from receiving further information pertaining to the Qualifying Examination.

If it appears that the stated requirements have not been met, further details may be requested. This information will be reviewed by the Committee on Credentials and Requirements. The Committee meets twice yearly (spring and fall) and decisions are not rendered at any other time.

Until the application has been received and approved, the Board will not inform any person, institution, or organization that a candidate is admissible to the examination process.

Admissibility to the Examination Process

Each qualified candidate shall be entitled to take an examination(s) as required by the Board. All candidates must comply with the current requirements in effect for the year in which the examination is taken regardless of the time the original application was approved. It is the responsibility of candidates to seek information concerning the current requirements for certification by the Board. The Board does not assume responsibility for notifying candidates of changing requirements or the impending loss of admissibility to take an examination. A new Booklet of Information is published yearly in July.

All candidates taking an examination of the American Board of Plastic Surgery, Inc., must complete the entire examination.

Certification by any other specialty Board does not exempt candidates from any part of the examination process.

Admissibility to the Qualifying (Written) Examination

Candidates admissible to the examination process may take the Qualifying Examination in the spring of the year following successful completion of residency in plastic surgery, provided the Application for Examination and Certification Form is approved.

Candidates approved for admission to the Qualifying Examination prior to July 1, 1991, will be offered seven consecutive opportunities to appear for the Qualifying Examination. Candidates may take the Qualifying Examination five times during this 7-year period. Candidates who have not passed the Qualifying Examination during this period will no longer be candidates for examination.

Candidates approved for admission to the Qualifying Examination, July 1, 1991, and thereafter, will be offered five consecutive opportunities to appear for the Qualifying Examination. Candidates may take the Qualifying Examination three times during this 5-year period. Candidates who have not passed the Qualifying Examination during this period will no longer be candidates for examination.

In either situation, the satisfactory completion of an additional year of training is required before a candidate can be considered for readmission to the Qualifying Examination. This additional year of training can be taken in a formal residency or a suitable plastic surgery preceptorship. This additional year of training must be approved in advance by the Committee on Credentials and Requirements of the Board. Evidence of satisfactory completion of this year of training is required before further consideration for examination will be made.

If the Board approves the candidate's request for readmission to the Qualifying Examination, two more consecutive opportunities to appear for the Qualifying Examination will be offered. Once approval is received, the candidate must sit for examination at the first available opportunity. Candidates who do not successfully pass the Qualifying Examination within these two consecutive opportunities will be required to repeat an entire plastic surgery residency to again be admissible to the examination process.

Note: Please see "Practice Requirement," under Admissibility to the Certifying (Oral) Examination for admissibility to that examination.

Admissibility to the Certifying (Oral) Examination

Practice Requirement

1. Candidates approved for admission to the examination process prior to July 1, 1986, do not have a practice requirement.

2. Candidates approved for admission to the examination process between July 1, 1986, and July 1, 1988, must have been in the independent practice of plastic surgery for at least 2 years.

3. Candidates approved for admission to the examination process after July 1, 1988, must have been in the independent practice of plastic surgery in the same locale for at least 2 years. These years need not be consecutive.

4. The 12-month case list must come from cases done in the independent practice of plastic surgery beginning January 1 and ending December 31 of the year preceding the year in which the Certifying Examination is to be taken.

5. A fellowship is not considered independent practice.

For candidates approved for admission to the examination process prior to July 1, 1991, the last admisibility date for the Certifying Examination shall be December 31 of the seventh year after passing the Qualifying Examination and completion of the 2-year independent practice of plastic surgery. For candidates approved for admission to the examination process July 1, 1991, and thereafter, the last admisibility date for the Certifying Examination shall be December 31 of the fifth year after passing the Qualifying Examination and completion of the 2-year independent practice of plastic surgery.

For admission to the Certifying Examination, candidates must be actively engaged primarily in the practice of plastic surgery and hold active operating privileges in a hospital approved by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO) or its Canadian equivalent.

Prior to becoming admissible to the Certifying Examination, candidates must have passed the Qualifying Examination and have fulfilled the 2-year independent practice requirement as it applies to them.

Candidates approved for admission to the examination process prior to July 1, 1991, will be offered seven consecutive opportunities to appear for the Certifying Examination. Candidates may take the Certifying Examination five times during this 7-year period. Candidates who have not passed the Certifying Examination during this period will no longer be candidates for examination.

Candidates approved for admission to the examination process, July 1, 1991, and thereafter, will be offered 5 consecutive opportunities to appear for the Certifying Examination. Candidates may take the Certifying Examination three times during this 5-year period. Candidates who have not passed the Certifying Examination during this period will no longer be candidates for examination.

In either situation, the satisfactory completion of an additional year of training is required before candidates can be considered for readmission to the Certifying Examination. This additional year of training can be taken in a formal residency or a suitable plastic sur-
gery preceptorship. This additional year of training must be approved in advance by the Committee on Credentials and Requirements of the Board. Evidence of satisfactory completion of this year of training is required before further consideration for examination will be made.

If the Board approves the candidate's request for readmission to the Certifying Examination, two more consecutive opportunities to appear for the Certifying Examination will be offered. Once approval is received, the candidate must sit for examination at the first available opportunity. Candidates who do not successfully pass the Certifying Examination within these two consecutive opportunities will be required to repeat an entire plastic surgery residency to again be admissible to the examination process.

Fee Schedule

Registration ($400 US Currency)
The registration fee must be submitted with the application and is not refundable.

Qualifying (Written) Examination ($800 US Currency)
The fee for the Qualifying Examination must be submitted when the reply card requesting examination is returned to the Board Office. The fee for the Qualifying Examination must accompany the card only if a candidate wishes to be scheduled for the examination.

Certifying (Oral) Examination ($1,200 US Currency)
Beginning in 1994, a $500 (nonrefundable) fee must be enclosed with the 12-month case list to provide for review of the case list and selection of ten cases for preparation as Case Reports. The balance of the examination fee ($700) must be submitted with the reply card requesting a reserved examination slot.

Fees must be submitted in United States currency only. Foreign currencies, including Canadian, are unacceptable.

A charge of $50 will be made whenever a check in payment of a fee is returned for nonpayment.

Fees are subject to change by the Board. The fee schedule applicable to current examinations will apply regardless of when a candidate is approved for admission to the examination process.

The Board is a nonprofit organization, and the fees of candidates are used solely for defraying the actual expenses of the Board. The directors of the Board serve without remuneration. Because of the limited number of plastic surgeons certified by this Board, it may be necessary for the Board to request a voluntary annual contribution from its diplomats.

Repeat Examination Fee
Fees for repeat examinations are the same as for the current original examinations.

Refunds
For the Qualifying Examination, a refund of the examination fee (less a processing charge of $200) will be granted, provided the candidate submits a written request for withdrawal postmarked at least 30 calendar days prior to the date of the examination. For the Certifying Examination, a refund of the examination fee (less a processing charge of $300) will be granted, provided the candidate submits a written request for withdrawal postmarked at least 30 calendar days prior to the date of the examination.

Candidates who notify the Board Office in writing postmarked less than 30 calendar days prior to the examination date of their intent to withdraw, or who fail to appear for examination, will forfeit the entire fee. The Board may waive this rule if the circumstances warrant.

Qualifying (Written) Examination
The Qualifying Examination will be conducted in the spring each year or at any other time deemed suitable by the Board. The examination will be given on the date specified and at the time specified. No exceptions will be made, and special examinations will be given only under unusual circumstances (see Examination of Candidates with Disabilities under Special Situations).

Announcement Information
Candidates who are admissible to the Qualifying Examination will be sent annually, throughout the period of admissibility, an Announcement Letter, Booklet of Information, reply card, and a hotel reservation card, approximately 3 months before the date of the examination, to be given in the spring of that year. When the reply card is received, candidates must signify their intent to take the examination by completing and returning the reply card and examination fee immediately to the Board Office.

Both sides of the reply card must be completed, otherwise candidates will not be scheduled for examination if their hospital appointments are not recorded.

Candidates are responsible for their own travel, hotel accommodations, and expenses. A hotel reservation card will be included with the reply card. Candidates may use this if they wish to stay in the hotel at which the examination is to be given.

Admission to Examination
If the returned reply card and examination fee for the Qualifying Examination are not postmarked on or before March 1, a late penalty fee of $200 will apply.

Reply cards and examination fees postmarked March 2 up to and including March 15 will be considered only on a space available basis and the late penalty fee of $200 must accompany these items. Reply cards and examination fees postmarked after March 15 will not be accepted for admission to the spring Qualifying Examination.

(The names of candidates who are late returning the reply cards and examination fees will be kept on file. If openings develop by the withdrawal of other candidates, the late candidates may be admitted in the order of the receipt of the reply cards. No candidate will be admitted less than 4 weeks preceding the examination.)

Once candidates have been scheduled for the Qualifying Examination, they will be sent an admission card 5 to 6 weeks before the date of the examination. Candidates must present their admission card when they register for the examination at both the morning and afternoon sessions. On this card will be printed the candidate's name; candidate number; the date, time, and location of the examination; the specific room in which candidates are to take the examination; and the "result mailing date." Candidates must use their candidate number throughout the examination. Late arrival may result in denial of admission to the examination.

Advise the Board Office immediately by telephone (215 587-9822) if the admission card is lost prior to the examination.

Withdrawal From Examination
Candidates wishing to withdraw from the examination must send written notification postmarked at least 30 calendar days before the date of the examination. The examination fee will be refunded less a processing charge of $200. Candidates who withdraw from the examination after this date or who fail to appear for the examination will forfeit the entire fee. The Board may waive this rule if the circumstances warrant.

Registration and Administration of the Examination
All candidates must take the entire examination on the same day and at the same time.

Candidates must register for the morning and afternoon sessions at the date, time, and location specified on their admission card. If
for any reason candidates are delayed or cannot arrive on time, he or she must notify the proctor or the Board Office. If a candidate is unable to attend the examination, he or she must notify the Board Office either by letter or by telephone prior to the time of registration for the morning session. Anyone who is more than 30 minutes late will not be admitted to the examination.

The Board Office will provide each candidate with lead pencils for use during the examination. No other writing implements may be used.

Candidates are not permitted to bring any notes, textbooks, or other reference materials into the examination. Scratch paper is not permitted, but space for notes and calculations is provided in the examination booklet.

Examination booklets are copyrighted and are the sole property of the American Board of Plastic Surgery, Inc. They must not be removed from the test area or reproduced. Reproduction of copyrighted material is a federal offense.

Change of Address

If a candidate's address, as it appears on the admission card, is incorrect or will change before the "Result Mailing Date," please enter the corrected or new address on the back of the admission card in the space provided before turning it in to a proctor at the end of the afternoon session. Admission cards will be collected from all candidates at the conclusion of the examination.

Examination Schedule

The Qualifying Examination will consist of a morning session and an afternoon session. The sessions are not separate examinations, but are graded together as one examination and will not be separately administered.

The morning session is 3 hours and 15 minutes in duration and the afternoon session is 3 hours in duration, and both sessions will consist of multiple choice questions of two types (one best answer or multiple true-false). In general, each test item consists of a question, a case history, or a situation followed by a list of possible answers. Instructions for completion of each type are given in the Examination Booklet that candidates will receive at the examination. Included in each Examination Booklet is an Answer Sheet upon which candidates must record their answers by filling in the appropriate circle (in pencil).

Content of the Examination

The subjects covered in the examination are listed below, and both sessions will cover the entire field of plastic surgery, with no differentiation in content between the morning and afternoon sessions.

1. Basic techniques, wound healing, microsurgery, transplantation.
2. Burns, sepsis, metabolism, trauma, resuscitation, nutrition, endocrinology, shock, hematology.
3. Pre- and postoperative care, anesthesia, cardiorespiratory care, complications, clinical pharmacology.
4. Tumors of the head and neck, skin, and breast; including treatment by radiation therapy, immunotherapy, chemotherapy, and surgery.
5. Trunk, lower extremity, musculoskeletal system, pressure ulcers, rehabilitation.
6. Hand, peripheral nerves, rehabilitation.
7. Maxillofacial and craniofacial surgery and microsurgery.
8. Congenital anomalies, genetics, teratology, facial deformity, speech pathology, gynecology, and genitourinary problems.
9. Aesthetic (cosmetic) surgery, psychiatry, and legal medicine.
10. Basic knowledge of pathology (eg, the biologic behavior of neoplasms, inflammation, and repair).

The questions for the examination cover subjects considered to be of fundamental importance to competent performance in the field of plastic surgery. Every effort is made to avoid "trick" questions, ambiguity, and questions involving irrelevant facts. All questions are analyzed by psychometric techniques to ensure their quality.

Candidates will pass or fail on the strength of their performance on the entire Qualifying Examination.

Results

Letters of notification of the results of the Qualifying Examination will be mailed on the date indicated on the admission card. The time period between administration of the examination and notification is necessary to allow for extensive analysis and to ensure that individual results are reliable and accurate.

Results of the examination will be divulged to no one until after the Board letter has had time to reach candidates. If a week has elapsed after the "Result Mailing Date" and candidates still have not received the letter from the Board, they may then call for information. Information will be given to no one but a candidate personally. The Board staff will verify a candidate's identity prior to releasing results to them.

Pass

If a candidate passes the Qualifying Examination, he or she will be informed of this fact.

Only those candidates who have submitted a 12-month case list completion acceptable to the Board, along with the $500 non-refundable fee, will be sent an Announcement Letter, Booklet of Information, reply card, and a hotel reservation card approximately 3 months in advance of the date and place of the next Certifying Examination. Note, however, that the Board requires that candidates for certification be in the independent practice of plastic surgery for at least 2 years before they may take the Certifying Examination, only if their application was approved after July 1, 1986. Candidates beginning the independent practice of plastic surgery on July 1, 1989, and thereafter, must have completed at least 2 years of practice, in the same locale, before they may take the Certifying Examination.

The 2 years of practice need not be consecutive but the candidate must be in practice during the 12-month period required for compilation of the case list. Currently, that period ends on December 31 of the year preceding the Certifying Examination.

Fail

If a candidate fails the Qualifying Examination, he or she will be informed of this fact.

In case of failure, the candidate must repeat the entire Qualifying Examination.

Each candidate will receive a single final grade for the entire examination. To complete the Qualifying Examination successfully, candidates must achieve a passing grade for the entire examination.

The score on the examination will be determined by the total number of alternatives answered correctly. Therefore, candidates are encouraged to answer all items. Candidates will receive an individual computer-generated letter concerning their performance on the examination.

The Board will obtain from an appropriate contractor a report, which will be sent to candidates' plastic surgery residency training directors and to the Residency Review Committee for Plastic Surgery, concerning the performance of the candidates on the Qualifying and Certifying Examinations.

Hand Scoring

Hand scoring of the Qualifying Examination will be performed upon written request. To request hand scoring, candidates must write to the Board Office within 30 days from notification of the results. Candidates will be responsible for an extra charge for hand scoring of
the examination. This charge will be determined by the Secretary-
Treasurer of the Board.

Certifying (Oral) Examination

The Certifying Examination will be conducted each fall or at such
other time as deemed suitable by the Board. The examination will
be given on the dates and at the times specified. No exceptions will
be made.

Candidates will be deemed admissible to the Certifying Examina-
tion only if they
1. Have passed the Qualifying Examination
2. Have fulfilled the 2-year independent practice of plastic surgery
   as it applies to them
3. Have submitted a 12-month case list compilation acceptable to
   the Board (see Instructions for Data Compilation and Submis-
   sion of Data), and
4. Are actively engaged primarily in the practice of plastic surgery
   and hold active operating privileges in a hospital approved by the
   Joint Commission on Accreditation of Healthcare Organizations
   (JCAHO) or its Canadian equivalent.

Instructions/Information Pertaining to the November
10–12, 1994 Certifying (Oral) Examination

Announcement Information

Candidates who are deemed admissible to the Certifying Examina-
tion will be sent annually, throughout their period of admissibility,
an Announcement Letter, Booklet of Information, reply card, and a
hotel reservation card, approximately 3 months before the date of
the examination to be given in the fall of that year. When the reply
card is received, candidates must signify their intent to take the ex-
amination by completing and returning the reply card and examina-
tion fee immediately to the Board Office.

Both sides of the reply card must be completed, otherwise candi-
dates will not be scheduled for examination if their hospital ap-
pointments are not recorded.

Candidates are responsible for their own travel, hotel accommoda-
tions, and expenses. A hotel reservation card is included with the
reply card. Candidates may use this card if they wish to stay in the
hotel at which the examination is to be given.

Admission to Examination

If the returned reply card and balance of the examination fee
($700) for the Certifying Examination are not postmarked on or be-
fore September 1, a late penalty fee of $300 will apply.

Reply cards and balance of the examination fee ($700) post-
marked September 2 up to and including September 15 will be con-
sidered only on a space available basis and the late penalty fee of
$300 must accompany these items. Reply cards and balance of the
examination fee ($700) postmarked after September 15 will not be
accepted for admission to the fall Certifying Examination.

(The names of candidates who are late returning the reply cards
and balance of the examination fee [$700] will be kept on file. If
openings develop by the withdrawal of other candidates, the late
candidates may be admitted in the order of the receipt of reply
cards. No candidate will be admitted less than 4 weeks preceding
the examination.)

Once candidates have been scheduled for the Certifying Examina-
tion, they will be sent an admission card 5 to 6 weeks before the
date of the examination. On this card will be printed the candida-
tee's name and address, the assigned candidate number, the date
and time to report, the location of the examination, the specific
room in which candidates are to assemble, and the "Result Mailing
Date."

At the same time, the Board Office will also mail candidates ten
folders for the binding of the Board selected case reports and labels
in a separate large envelope. It is imperative that candidates place
the assigned candidate number, which appears on the admission
card, on the label affixed to the cover of each one of the case re-
ports, along with the other required information. See Requirements
for Case Reports.

Advise the Board Office immediately by telephone (215 587-
9322) if the admission card is lost prior to the examination.

Withdrawal From Examination

Candidates wishing to withdraw from the examination must send
written notification postmarked at least 30 calendar days before the
date of the examination. The examination fee will be refunded less
a processing charge of $300. Candidates who withdraw from the ex-
amination after this date or who fail to appear for the examination
will forfeit the entire examination fee. The Board may waive this
rule if the circumstances so warrant.

Requirements for Case Reports

The following materials, collated in this order, must be present in
each of the case reports submitted.

1. A brief narrative summary of the preoperative, operative, and post-
operative course of the patient. Include a final separate para-
graph entitled "outcome" and indicate here the outcome of the
treatment and the final condition of the patient. This paragraph
will appear at the bottom of the same page as the narrative
summary.

2. Pre- and postoperative photographs; approximately 3½x5-inch
black-and-white or color prints glued on 8½x11-inch white bond
paper. Intraoperative photographs are strongly recommended.
Diagrams or simple drawings may be substituted for intraopera-
tive photographs. Descriptive legends and dates of the photos
must be placed adjacent to each photo. Transparencies will not
be accepted.

3. Photocopies of the original operative reports.
4. Photocopies of the original anesthetic records.
5. Photocopies of pertinent laboratory data.
6. Photocopies of the pathologist's report.
7. Photocopies of pertinent x-rays or scans. (Actual x-rays are unac-
ceptable.) Each x-ray or scan should be dated in a manner that is
easily visible.

8. Photocopies of the original progress notes including the patient's
history and physical examination, and all postoperative and post-
discharge progress notes, both in the hospital and from the office
records, including the initial consultation. If legibility is a prob-
lem, include a typewritten copy also.

9. Photocopies of the actual bill(s) submitted to the patient. The ac-
tual dollar amount of the fee should be deleted.

In the event that more than one procedure is performed on
the patient during the 12-month case list period include all pro-
ducts and hospitalization that fall within the 12 months. You are
not required to document procedures that fall prior to or after
the 12-month period. However, if these procedures increase un-
derstanding of the case they may be included at the candidate's
discretion. Documentation for procedures falling outside the 12-
month period does not have to be complete—the candidate may
be selective here.

Note: If the records are not in English, an accurate and complete
English translation must accompany them.

Presentation of Case Reports

Candidates will be asked to assemble 10 Board selected case re-
ports in the folders provided by the Board and to bring these case
reports to the fall Certifying Examination.
During the examination candidates must be prepared to defend the choice of operation and to present alternate treatment plans considered. The Board, at its discretion, may request certification of case reports by the hospital(s) where candidates performed the operation(s).

Hospital and office records must clearly identify the candidate as the attending physician and surgeon. However, the candidate need not necessarily be the admitting physician, so long as he or she is clearly the attending plastic surgeon. Cases done by a resident under the candidate's supervision may be chosen by the Board and will be considered in the same way as cases done personally.

Each report must be typed or reproduced on standard, letter-sized white paper (8½ x 11-inch) with the candidate's full name and assigned candidate number, the number of the case, the hospital (or other identifying) number, the principal diagnosis, and the primary operation listed on the title page. Bind the cases singly in the folders supplied by the Board. Do not place any pages or photographs in acetate (sheet protectors). Photos must be glued to white bond paper.

Group all operative notes, anesthesia records, photographs, etc., together in chronologic order such that all operative notes will appear in one location in the book, all photographs in one location, etc.

In the circumstances of excessively long hospitalizations resulting in progress note sections of such thickness that they cannot be bound in one case folder, this section may be debrided of nonpertinent notes and then bound separately, brought to the examination, but retained by the candidate and not turned in with the Case Reports. A notation of this necessity should appear at the beginning of the progress note section. Thus the candidate will produce this extra material only upon request of their examiners.

Candidates must provide a list of all 10 cases. The list must be typed on a single sheet of white bond paper and bound at the beginning of the first case in its folder. Identify the list, with your full name and assigned candidate number. For each case, include the following information:

1. Category
   a. Congenital
   b. Hand
   c. Maxillofacial trauma
   d. Breast
   e. Aesthetic
   f. Burns
   g. Lower extremity, perineum, trunk
   h. Head and neck
   i. Microsurgery
   j. Skin
   k. Other
2. Patient's hospital (or other) identifying number
3. Primary diagnosis
4. Procedure(s) done by the candidate

The Board regards the Case Reports submitted as important evidence of the candidate's basic ability to carry out plastic surgical procedures and to organize and present information in a succinct and complete fashion.

Improper or disorganized preparation of this material will be sufficient cause to disqualify a candidate for continued examination.

Disqualification on Case Reports

If a candidate is disqualified for continuation in the examination process because the case reports are judged unacceptable (for whatever reason) it will not be recorded as a failure, but is counted as one of the opportunities to appear. However, because the Board has incurred expenses to provide a candidate with an examination, the examination fee less the processing charge of $300 will be refunded.

Examination Schedule

The oral examination for candidates will occupy 1 full day. Late arrival may result in denial of admission to the examination. The Board Office will assign the day (second or third day) on which candidates will be examined. This assignment is by random computer selection. The Board regrets that half of the candidates (those selected for examination on the third day) will have an empty day (the second day). However, it is still necessary that all candidates turn in cases on the first day in order for examiners to have a full day for review of the cases.

First Day

8:00 am–9:00 am
All candidates register and hand deliver case reports to the room designated on the admission card.

11:30 am–12:30 pm
Orientation Conference for candidates for discussion of Oral Examination format. Attendance is mandatory.

1:00 pm–7:00 pm
Candidates should be available in their hotel rooms (or reachable by telephone) during this time frame in case the Board wishes to contact them regarding the examination on their cases.

Second Day

7:00 am
Candidates assemble for instructions

7:45 am–12:30 pm
Oral Examinations—Case Reports

1:45 pm–6:30 pm
Oral Examinations—Theory and Practice

6:15 pm–7:15 pm
Voluntary debriefing session

Third Day

7:00 am
Candidates assemble for instructions

7:45 am–12:30 pm
Oral Examinations—Case Reports

1:45 pm–5:30 pm
Oral Examinations—Theory and Practice

6:15 pm–7:15 pm
Voluntary debriefing session

Note: The times of the above Examination Schedule are subject to change and will be finally announced on the morning of the examination.

Instructions and Procedures

Candidates will receive specific instructions concerning the examination at the assembly on the morning of the day of examination. Candidates will also be given a schedule showing the time and the location of each examination session. Failure to appear on time for any session of examination will lead to a grade of fail on that section. Candidates should be outside the examination room 5 minutes before the assigned time. It is not necessary for candidates to announce their presence. If, however, a candidate has not been invited into the examination room by the examiners by 10 minutes after the scheduled time, the candidate should notify the temporary Board Office immediately.

The Board has made every effort to assign candidates to examiners whose knowledge of the candidate's background would not bias their evaluation of performance. If candidates find that an exam-
iner to whom they have been assigned played a role in their training, is a close friend or relative, is a close professional associate, or has examined them previously, they must inform the Board Staff immediately. However, unless conflicts are identified in advance of the actual examination, the conduct and grades of that session cannot be contested on the basis of prior contact or knowledge.

**Description of the Examination**

Each examination session is designed to evaluate the candidates' breadth and depth of knowledge, their ability to apply it in the solution of a wide range of clinical problems, and matters related to ethics. Each session is structured so that the examiners are given a schema to be followed. This approach assures uniformity and prevents duplication. Each of the examiners on each team is expected to pose problems and questions to candidates.

All examiners are members of the American Board of Plastic Surgery, Inc., are actively in the practice and/or teaching of plastic surgery, and have been certified by the Board for more than 5 years. They are respected members of the profession and known for their surgical knowledge, expertise, and scientific contributions. They have been instructed in the technique and purposes of the examination process. Each team includes a senior examiner and a guest examiner.

The Certifying Examination is given on one day and consists of two parts.

1. A 1-hour oral examination on 10 major cases (see Case Reports) selected by the Board and indicative of the candidate's work in the field of plastic surgery.
2. A 45-minute oral examination on the theory and practice of plastic surgery on material prepared by the Board.

Each candidate will be examined by two teams of examiners. Grades will be given by all four examiners and all four grades combined will determine the passing or failing status of each candidate.

The Board is determined that the examination shall be as comprehensive and objective as practical. Its intention is that every candidate be provided an equal opportunity to become Board certified. The same standard is applied to each candidate insofar as is possible.

**Change of Address**

If a candidate's address, as it appears on the admission card, is incorrect or will change before the "Result Mailing Date," please enter the corrected or new address on the back of the admission card in the space provided. Candidates should deliver the admission card to the temporary Board Office at the examination center before 11:00 am on the day scheduled to appear for the Certifying Examination indicating the corrected or new address.

**Debriefing Session**

On the evenings of the second and third days, there will be voluntary debriefing sessions for candidates taking the examination that day. The Board encourages candidates to attend for the purpose of evaluating the examination just completed.

**Results**

Every candidate will be evaluated by each member of his or her examining teams, and performance may be discussed in detail by the entire Board. The final decision regarding certification will be rendered by the entire Board at its meeting following the completion of the fall Certifying Examination. Do not call the Board Office for information. Do not call your Examiners.

Letters of notification of the results of the Certifying Examination will be mailed on the date indicated on the admission card. Regardless of the reason, results of the examination will be divulged to no one until the Board has had time to reach candidates. If a week has elapsed after the "Result Mailing Date" and candidates have not received the letter from the Board, they may then call for information. Information will be given to no one but a candidate personally. The Board Staff will verify a candidate's identity prior to releasing results to him or her.

**Examination Performance**

Candidates desiring information concerning performance after they have received the letter of notification may correspond, within 30 days of notification, by writing to the Chairman of the Certifying Examination Committee at the Board Office. Candidates will be responsible for an extra charge for information concerning their performance. This charge will be determined by the Secretary-Treasurer of the Board.

**Future Case List Compilation**

Candidates for the 1995 Certifying Examination will be required to provide the Board with a compilation of operative cases and hospitalized patients for a 12-month period beginning January 1, 1994, and ending December 31, 1994. The method of compilation of the case list will use a computerized program available on an IBM compatible floppy disk (3½ or 5¼-inch). The computerized mechanism provides a standardized list that will facilitate review. Candidates with IBM compatible office equipment or those desiring to rent such services will find the menu driven program easy to complete. The printed list will be in chronological order for each institution (hospital, office-based surgery, etc) and include: patient's name, hospital (or other) identifying number, age, sex, date of operation, diagnosis, procedure performed (if any), CPT codes plus modifiers (identical to those used for billing on that case), and outcome including complications. The floppy disk for compiling this list will be provided upon written request to the Board Office. Disk requests for the 1995 Certifying Examination will be honored up to and including December 31, 1994. Absolutely no disk requests will be honored after this date.

Preparation of the case list using the IBM program can be selected from menu options and will follow simple instructions sent with each disk by the Board Office upon written request. To print in the desired format requires a "laser capable" printer or a vertically oriented printout for review purposes can be obtained from a simple dot-matrix printer. Because this system is menu driven, it should prove simple to use by offices with IBM compatible equipment. Offices not having IBM compatible equipment may choose to have their raw list transferred to this form by renting stenographic service. After generation of the case lists and preparation of the additional material the disk will be returned to the Board Office with an original and a copy of the Candidate Case Summary Sheet (obtainable via computer disk) and completed case lists (affidavits for each institution are automatically printed out on the last page of each institution's case list).

**Instructions for Data Compilation**

A helpful suggestion is to begin compiling your list on a weekly or monthly basis, and to not wait until January to start compilation on the IBM compatible disk.

1. It is essential that complete information be provided under diagnosis and procedure. Provide an accurate description of the diagnosis and the operative procedure as taken from the operative note. Do not use ICD-9 and CPT codes in place of the description of the diagnosis and procedure. If the case was nonoperative, include a diagnosis taken from the discharge summary. Include ALL CPT codes plus modifiers (identical to those used for billing on that case) applicable for each case in the section for CPT
codes. (Military, Kaiser Permanente, Shriners Burns Hospitals and candidates practicing in Canada are exempt from using CPT codes.) Everyone else must record the CPT codes used for insurance billing purposes as well as all cases that were not billed to insurance (eg, aesthetic/cosmetic).

2. Do not list assistant cases, namely cases billed by the candidate as an assistant surgeon. This exclusion does not cover cases performed by a resident and attended by the candidate, or cases billed as co-surgeon; such cases should be included on the case list.

3. It is essential that information be provided under "outcome." A short statement with respect to the outcome of each case will help guide the Board. Not all cases "heal without problems." Examples would include "necrosis of tip of flap" or "normal sensation returned, but index finger stiff after tendon repair." Outcome recording using the computer program will be provided by Number Selection—only numbers 3, 4, and 5 require written explanation.

4. The list must be keyed for multiple operative procedures on the same patient. This keying is automatic for the computer program, but be certain that hospital (or other) identifying numbers and names are consistent for a patient with multiple procedures.

5. All operative procedures must be included whether inpatient, ambulatory outpatient, or office-based surgery. All patients hospitalized by the candidate as the admitting physician must also be included, even if the patient was managed nonoperatively. Operative surgery performed in the office (notes) that does not require a dictated note does not need to be included, but the Board would suggest that the candidate err in the direction of inclusion rather than exclusion of cases from the list. Inpatient consultations on other services that did not culminate in an operation, performed by the candidate, need not be included.

6. All admitted emergency room patients and all outpatient emergency room cases that required an operative note must be included.

7. The completed list(s) must be signed by the medical record librarian of each institution (hospital, ambulatory surgery center, etc) and be properly notarized as a complete list of the respective candidate's operative experience. Operations performed by the candidate in the office must also be listed and signed by the appropriate office personnel who can attest to completeness.

8. Two Candidate Case Summary Sheets (an original and a copy) must be submitted. This form will facilitate the review process of the Board. This form and this will be directly generated from the IBM program by menu selection.

9. Two copies (the original and a copy) of the complete compiled list of cases of the 12-month experience of January 1, 1994, to December 12, 1994, including the signed and notarized affidavits, two Candidate Summary Sheets, and a check for $500 (nonrefundable) made payable to the American Board of Plastic Surgery, Inc (in United States funds), must be postmarked on or before February 1, 1995, in order for a candidate to be considered for admission to the fall 1995 Certifying Examination.

Submission of Data

1. Print your 12-month case list.

2. The affidavits must be signed by the medical record librarian of each institution and notarized (see 7 under Instructions for Data Compilation).

3. Make a copy of the entire case list including the signed and notarized affidavits.

4. Place the original 12-month case list, including the signed and notarized affidavits for each institution, in a separate compilation: also make a separate compilation for each of the copies. Staple each institution's case list together.

5. Hold aside original and copy of the printed sheet that includes the six-digit candidate number, name, address, telephone number, and candidate affidavit.

6. Take the stapled case list including the signed and notarized affidavits for the first institution (case list starts with page 1) and staple the "Candidate Affidavit" to the top of this section only. Follow the same process for the copy of the first institution.

7. Place all of your stapled original 12-month case lists including the signed and notarized affidavits together; place the computer generated Candidate Case Summary Sheet on top; attach all of this together using a binder clip or rubber band. Follow the same process for your stapled copies of the 12-month case lists including the signed and notarized affidavits using a copy of the computer generated Candidate Case Summary Sheet. Do not place this material in binders or notebooks.

8. You are now ready to mail your completed case list information, the completed IBM disk, and $500 (nonrefundable) fee to the Board Office. Make check payable to the American Board of Plastic Surgery, Inc (must be in United States funds).

In order to ensure delivery of your materials, we suggest that you send your materials by a carrier providing assurance of delivery and receipt. Most overnight carriers can furnish this information within 30 minutes of delivery. We strongly discourage you from leaving the Board Office to check on receipt of materials since inquiry calls of this nature greatly hamper the Board Staff in processing the enormous volume of materials received at this time.

Reminder

Candidates who do not provide the required items in the manner outlined will not be considered for admission to the fall 1995 Certifying Examination. The items submitted will be returned to the candidate. Unequivocally no exceptions can be made regarding incomplete lists.

The absolute postmarked deadline for two sets of the computer generated 12-month case list including the signed and notarized affidavits, and Candidate Case Summary Sheets is February 1, 1995. A $500 (nonrefundable) fee must be enclosed to provide for review of the case list and selection of ten cases for preparation as Case Reports. The IBM compatible floppy disk must be included with the printed materials. No lists or other material will be accepted after this postmarked date.

It is the responsibility of each candidate to keep copies of all materials submitted to the Board. The Board will not make copies of missing information for candidates. Make sure that all materials have been proofread and properly collated. Check to be certain that all pages have been numbered in sequence, this will appear in the upper right hand corner of each page.

Photographic Documentation

Particular emphasis should be placed on the necessity of photographic documentation. Preoperative and postoperative photographs are mandatory on all cases and intraoperative photographs may aid in further illustration of the clinical problem.

The Board advises candidates who have not acquired the habit of routine photographic documentation of all patients to do so at their earliest convenience. Any cases from this 1-year period may be selected. Therefore all cases during this year must have photo documentation, including all hand cases (ie, carpal tunnel cases, etc).

Board Review/Selection Process

The Board will review the Candidate Case Summary Sheet and Candidate's Case List to determine if the candidate's operative list reflects a mature enough experience in the representative areas of the field of plastic surgery to permit examination of the candidate.
for certification as an expert in the specialty. In the event that the case list offered is not adequate to allow selection of cases, the candidate will be deemed ineligible for the fall Certifying Examination. The candidate will be allowed to submit another list of cases for the following year. The presentation of a list by a candidate for case list selection that is found inadequate will constitute one of the opportunities to appear for the Certifying Examination. It will not, however, count as an unsatisfactory performance. Written notification regarding case lists inadequate to allow for Board selection of Case Reports will be sent by July 15, 1995, or sooner, if possible. In the meantime, do not contact the Board Office prior to that date with respect to the list.

The Board will select ten cases from the candidate compiled 12-month case list and request each candidate to prepare Case Reports. The Board-selected Case Reports will be prepared in the same format and with similar requirements as in past years: pre-and postoperative photographs, operative reports, pathology reports, X-rays where pertinent, and postoperative office progress notes, a copy of the actual bill submitted for services to the patient. The actual dollar amount of the fee should be deleted.

The list of Board-selected cases for preparation as Case Reports will be sent to candidates by July 15, 1995, along with an Announcement Letter, Booklet of Information, reply card and a hotel reservation card for the November 9-11 (Thursday - Saturday), 1995, Certifying Examination. Do not contact the Board Office prior to that date with respect to the list.

Please be advised that the format for the fall 1996 Certifying Examination will be similar in nature and will require a 12-month case list (January 1, 1995, to December 31, 1995).

Special Situations

Appeals Policy
The Board has established a policy relative to resolution of questions or disagreements regarding its decisions on admissibility to examination, the form, contents, administration or results of the Qualifying Examination, the administration of the Certifying Examination, and the revocation of certificates. If an individual has a concern in any of these areas, it should be expressed in writing to the Board Office, and a copy of the Appeals Policy will be sent to that individual.

Examination of Candidates with Disabilities
The American Board of Plastic Surgery, Inc, complies with the Americans with Disabilities Act by making a reasonable effort to provide candidates who have proven disabilities with modifications of its examination process that are appropriate for such disabilities. No modification will be made that alters the measurement of the skills or knowledge that the examination process is intended to test. Any disability that a candidate believes requires such a modification in the Board's examination process must be identified and documented by the candidate within 60 days after the candidate is notified of admissibility to the examination process or within 60 days after the candidate learns of such disability, whichever is later.

Examination Irregularities
The validity of scores on the Board's examinations is protected by every means available. The Board will not report a score that it has determined to be invalid (i.e., that does not represent a reasonable assessment of the candidate's knowledge or competence sampled by the examination). The performance of all candidates is monitored and may be analyzed for the purposes of detecting invalid scores.

The Qualifying Examination will be supervised by proctors to ensure that the examination is properly conducted. If evidence by observation or analysis suggests that a candidate's scores may be invalid because of irregular behavior, the Board will withhold those scores pending further investigation and the affected candidate will be notified.

Examples of irregularities affecting the validity of scores would include, but not be limited to, the following: (1) using notes; (2) sharing information or discussing the examination in progress; (3) copying answers from another candidate; (4) permitting one's answers to be copied; (5) or unauthorized possession, reproduction, or disclosure of examination questions or other specific information regarding the content of the examination, before, during, or after the examination.

In such circumstances, upon analysis of all available information, the Board will make a determination as to the validity of the scores in question. If the Board determines that the scores are invalid, it will not release them, and notification of that determination may be made to legitimately interested third parties.

Candidates or other persons who are directly implicated in an irregularity are subject to additional sanctions. For example, the Board may bar the persons permanently from all future examinations, terminate a candidate's participation in an ongoing examination, invalidate the results of the candidate's examination, and withhold or revoke a certificate or take other appropriate action. Candidates or other persons subject to additional sanctions will be provided with a written notice of the charges and an opportunity to respond to such charges in accordance with the reconsideration and appeal procedure established by the Board.

Substance Abuse or Chemical Dependency
Applicants with a history of abuse of a controlled substance or chemical dependency will not be admitted to any examination unless they present evidence satisfactory to the Board that they have successfully completed the program of treatment prescribed for their condition, and the Board is satisfied that they are currently free of such substance abuse or chemical dependency.

Certification
After candidates have met the requirements for admissibility and passed the examinations of the Board, certificates attesting to their qualifications in plastic surgery will be issued by the Board. A surgeon who is granted certification by the Board is known as a diplomate of the Board.

It shall be the prerogative of the Board to determine the fitness, professionally and ethically, of any candidate for a certificate; and the Board, for cause, may defer or deny certification to any candidate.

Certificates
Certificates issued by the Board shall be in such form as the directors may from time to time determine. They shall be signed by the Chairman, the Vice-Chairman, and the Secretary-Treasurer of the Board and shall have placed upon them the official seal of the Board.

Beginning in 1995, certificates issued by the Board will be dated and will be valid for 10 years. Revalidation will be accomplished by the Board's recertification process.

Certificates of the Board shall state that the holder has met the requirements of the Board and is certified by the Board as a medical specialist in plastic surgery and is entitled to be known as a "diplomate of the American Board of Plastic Surgery, Inc." The names of all diplomates will be submitted to the American Board of Medical Specialties for publication in its directory unless they notify the Board in advance that they do not wish to be listed.
Revocation

Any certificate issued by the Board shall be subject to revocation at any time that the Board determines that an individual was not properly qualified to receive it.

Each certificate issued by the Board shall be subject to revocation if the physician so certified has made any misstatement of material fact, or has failed to make any statement of material fact, in his or her application for such certificate or in any other statement or representation to the Board or its representatives, or has otherwise acquired the certificate by deception. Upon revocation the certificate shall be returned to the Board.

The Board shall have the jurisdiction and right to determine whether or not the information placed before it is sufficient to constitute grounds for the revocation of any certificate. The individual will be provided with a copy of the appeals policy of the Board, and this policy will be observed in pursuing resolution of the problem.

Foreign Certificates

Persons holding the foreign certificate issued prior to June 30, 1973, by the Board must relinquish their certificates to the Board in the event that they return to the United States for the purpose of practicing plastic surgery. Such individuals may apply for examination and certification in the manner described herein.

Inquiries as to Status

The Board considers a candidate’s record not to be in the public domain. When an inquiry is received by the Board regarding an individual’s status with the Board, a general, but factual, statement is provided that indicates that person’s location within the process of certification. The Board provides this information only to individuals, organizations, and institutions with a reasonably valid “need to know” for professional reasons.

The Board does not use or recognize the terms “Board-eligible” or “Board-qualified” and does not condone the use of those terms by candidates or any other persons or organizations.

The directors may adopt such further rules and regulations governing requirements, examinations, and issuance and revocation of certification as they may from time to time determine.

Examination Dates

Certifying Examination

November 10–11–12, 1994 (Thursday–Saturday)
Chicago, Illinois

Qualifying Examination

April 7, 1995 (Friday)
Philadelphia, Pennsylvania, and San Francisco, California

Important Dates

Application Process

January 15
Absolute cutoff for receipt of all application material for admission to the spring Qualifying Examination. A late penalty fee of $200 must accompany these postmarked December 16 up to and including January 15.

Any application material postmarked after January 15 will not be accepted for admission to the spring Qualifying Examination.

April 30
Potential candidates for examination and certification (senior/chief residents) are advised to write to the Board Office requesting an Application for Examination and Certification form during the last 2 months of their residency, but no later than June 30. Application material will not be sent to prospective candidates after December 15.

December 15
Last date Board Office will send out application material for admission to the spring Qualifying Examination.

Last postmarked date for application material for admission to the spring Qualifying Examination before a late penalty fee of $200 will apply.

Qualifying (Written) Examination

March 1
Last postmarked date for reply cards and examination fees for the spring Qualifying Examination, before a late penalty fee of $200 will apply. Reply cards and examination fees postmarked after this date (March 1) will be considered only on a space available basis and the late penalty fee will apply.

March 2–15
Reply cards and examination fees postmarked March 2 up to and including March 15 will be considered only on a space available basis and the late penalty fee of $200 must accompany these items.

Any reply cards and examination fees postmarked after March 15 will not be accepted for admission to the spring Qualifying Examination.

Certifying (Oral) Examination

February 1
The 12-month case list for prospective candidates for the upcoming Certifying Examination must be postmarked on or before this date to be considered for admission to the fall Certifying Examination. A nonrefundable fee of $500 must be enclosed to provide for review of the case list and selection of 10 cases for preparation as Case Reports.

July 15
The list of Board-selected cases for preparation as case reports will be mailed to candidates for the fall Certifying Examination.

September 1
Last postmarked date for reply cards and balance of examination fee ($700) for the Certifying Examination, before a late penalty fee of $300 will apply. Reply cards and examination fee balance ($700) postmarked after this date (September 1) will be considered only on a space available basis and the late penalty fee will apply.

September 2–15
Reply cards and examination fee balance ($700) postmarked September 2 up to and including September 15 will be considered only on a space available basis and the late penalty fee of $300 must accompany these items.

Any reply cards and examination fee balance ($700) postmarked after September 15 will not be accepted for admission to the fall Certifying Examination.

December 31
Last date disk requests will be honored for compilation of the 12-month case list (January 1–December 31).

Special Consideration

March 1
Last postmarked date for submission of written special requests and documentation for consideration by the Committee on Credentials and Requirements at the spring meeting.

September 1
Last postmarked date for submission of written special requests and documentation for consideration by the Committee on Credentials and Requirements at the fall meeting.

Note: Fees must be submitted in United States currency only. Foreign currencies, including Canadian, are unacceptable.
If there is a discrepancy between a metered postmark and an official United States postal service postmark, the latter will be considered official.

American Board of Preventive Medicine

George K Anderson, MD, MPH, Chair, San Antonio, Texas
Michael A Berry, MD, MS, Vice Chair for Aerospace Medicine, Houston, Texas
David C Deubner, MD, MPH, Vice Chair for Occupational Medicine, Toledo, Ohio
Hugh H Tilson, MD, DrPH, Vice Chair for Public Health and General Preventive Medicine, Research Triangle Park, North Carolina
Joseph M Cannella, MD, MS, Secretary Treasurer, Princeton, New Jersey
Anita S Curran, MD, MPH, New Brunswick, New Jersey
Alan M Ducatman, MD, Morgantown, West Virginia
William R Elsee, MD, MPH, Atlanta, Georgia
Ruth Ann Etzel, MD, PhD, Atlanta, Georgia
Mark Bernarr Johnson, MD, MPH, Lakewood, Colorado
Dorothy S Lane, MD, MPH, Stony Brook, New York
Royce Moser, Jr, MD, MPH, Salt Lake City, Utah
Alfred K Neumann, MD, MPH, Los Angeles, California
Judith Rubin, MD, MPH, Baltimore, Maryland
James M Vanderploeg, MD, MPH, Houston, Texas
Alice R Ring, MD, MPH, Executive Director, Schiller Park, Illinois
Constance R Hyland, Administrator, Schiller Park, Illinois

These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Preventive Medicine to ascertain whether the information below is current.

Requirements for Admission to Examinations

Each applicant for a certificate in aerospace medicine, occupational medicine, or public health and general preventive medicine is required to meet certain requirements to be admitted to the certifying examination. Such requirements are determined by the Board.

Approval for admission to the examination can only be established after the review of a complete application by the full Board at one of its semiannual meetings. No individual member of the Board is authorized to give an opinion on the admissibility of candidates.

For the information of applicants, such requirements are summarized below.

General Requirements

1. Graduation from a medical school in the United States or Canada that at the time of the applicant's graduation was accredited by the Liaison Committee on Medical Education, a school of osteopathic medicine approved by the American Osteopathic Association, or from a medical school located outside the United States and Canada that is deemed satisfactory to the Board.

2. An unrestricted and currently valid license to practice medicine in a state, territory, commonwealth, or possession of the United States or in a province of Canada.

3. A year of supervised postgraduate clinical training provided as part of an accredited residency or internship program and comprising experience involving direct patient care.

4. Successful completion of a course of graduate academic study and award of a Master of Public Health or equivalent degree, the course content of which shall include biostatistics, epidemiology, health services management and administration, and environmental health. If the institution itself does not have or award the Master of Public Health degree or equivalent, the Board will consider individual exceptions.

5. Residency of not less than 1 year that shall have provided supervised experience in the practice of the field of preventive medicine in which certification is sought. The year shall include planned instruction, observation, and active participation in a comprehensive organized program accredited by the Accreditation Council for Graduate Medical Education (ACGME) (practicum year).

6. A period of not less than 1 year of full-time special training or research in, or teaching or practice of, the field of preventive medicine in which certification is being sought (practice year).

7. The applicant must have been engaged in essentially full-time training for, or practice of, aerospace medicine, occupational medicine, or public health and general preventive medicine for at least 2 of the 5 years preceding application for certification.

Special Requirements in Aerospace Medicine

1. A period of not less than 1 year of supervised training and instruction in the field of aerospace medicine is required. (See No. 5 under General Requirements above.)

2. A period of not less than 1 year of full-time special training or research in, or teaching or practice of, aerospace medicine. (See No. 6 under General Requirements above.)

3. The applicant must have been engaged in training for, or the practice of, aerospace medicine for at least 2 of the 5 years preceding application for certification. (See No. 7 under General Requirements above.)

Special Requirements in Occupational Medicine

1. A period of not less than 1 year of supervised training and instruction in the field of occupational medicine is required. (See No. 5 under General Requirements above.)

2. A period of not less than 1 year of full-time special training or research in, or teaching or practice of, occupational medicine. (See No. 6 under General Requirements above.)

3. The applicant must have been engaged in training for, or the practice of, occupational medicine for at least 2 of the 5 years preceding application for certification. (See No. 7 under General Requirements above.)

Special Requirements in Public Health and General Preventive Medicine

1. A period of not less than 1 year of supervised training and instruction in the field of public health and general preventive medicine is required. (See No. 5 under General Requirements above.)

2. A period of not less than 1 year of full-time special training or research in, or teaching or practice of, public health and general preventive medicine. (See No. 6 under General Requirements above.)

3. The applicant must have been engaged in training for, or the practice of, public health and general preventive medicine for at least 2 of the 5 years preceding application for certification. (See No. 7 under General Requirements above.)

Equivalencies for Accredited Training

Persons graduating from a school of medicine or school of osteopathic medicine prior to January 1, 1984, who have not formally completed all of the components previously described may be considered for admission to the examination if their training and experience are judged by the Board to provide suitable equivalency for that formal training.

Persons graduating after January 1, 1984, will be admissible to the examination only after completing accredited training in pre-
ventive medicine. No equivalency pathways will be considered for such graduates.

The Board will consider granting equivalency credit toward satisfying training requirements for such factors as
1. Teaching or completion of graduate course work in the four core areas of epidemiology, biostatistics, health services management, and administration, and environmental health; and
2. Periods of full-time practice, research, or teaching in the field of preventive medicine in which certification is sought. A total of 8 years of full-time practice is required if no other specialty certification is held, but may be reduced to 6 years if certification is held in another specialty recognized by the American Board of Medical Specialties (ABMS). For those with an MPH or equivalent degree but no practicum year, a period of 4 years of full-time practice is required in the field of preventive medicine for which certification is being sought, a period that can be reduced to 3 years if other ABMS specialty certification is held.

Each applicant is considered individually by the Board in accordance with the existing guidelines. Applications must be received by June 1 of each year. Requirements must be completed by August 1 of the year in which the applicant wishes to sit for the examination.

The Board will accept enrollment in one of the short courses or “mini-residencies” as evidence of training in the four core areas of biostatistics, epidemiology, health services management and administration, and environmental health only if it was successfully completed before January 1, 1982. Such training, however, is not residency training and is applicable only in equivalency pathways.

Application
Individuals seeking to apply for admission to the examination should write to the executive director of the Board for application forms.

Examination
The examination is a 1-day written examination given in the late fall of each year. It is a multiple-choice examination, with the morning portion covering the core knowledge of preventive medicine and the afternoon portion covering aerospace medicine, occupational medicine, or public health and general preventive medicine.

Applicants requiring special examination accommodations due to a disability should contact the Board Office for assistance at least 1 month prior to the examination.

The examination results, which do not include individual identifiers, are reviewed by the full Board during its January meeting. Final determination of candidates' certification status is made at that time.

Reapplication and Reexamination
An applicant approved for admission to the examination who fails to take the examination within 3 years of the date he or she is notified of approval to sit for the examination is required to file a new application and pay a new application fee.

Applicants not approved for admission to the examination may request reconsideration of their applications on the basis of new or additional information within 2 years of the filing date of the original application, without payment of an additional application fee.

Candidates not passing the examination may, upon timely application and payment of appropriate fee, be admitted to reexamination within 3 years of the initial approval.

A candidate who has failed to pass the examination on two occasions may be required to have additional training, in accordance with recommendations from the full Board, before being admitted to further examination.

Candidates not passing the examination three times must submit a new application and fee to reestablish admissibility.

Certification
Upon satisfactory completion of the examination, a certificate will be issued stating that the applicant has been found to possess special knowledge in the specified field of preventive medicine. The certificate will be signed by officers of the Board and will have the Board's seal affixed. Each certificate remains the property of the Board, but the person to whom it is issued is entitled to its possession unless it is revoked.

Any certificate issued by the Board may be revoked if evidence, satisfactory to the Board, is presented that the applicant was not eligible to receive it at the time of issuance; or that any pertinent fact had been misstated, misrepresented, or concealed; or that license to practice medicine has been suspended or revoked. Note: The issuance of a certificate to a person does not constitute membership on the Board.

Multiple Certification
An individual may apply sequentially for admission to examination in more than one field of preventive medicine. The applicant must fulfill the individual requirements of each field in which application is made, cannot “double count” the same year for practicum or practice periods, and may not apply in more than one area in a given year.

Notice of Certification
Certification decisions are made only by action of the full Board, in one of its semiannual meetings, held in August and January.

Candidates who have taken the examination may expect to be notified of results within 3 months after taking the examination.

Fees
The members of the Board serve without compensation. Fees are based on the actual expenses incurred in review of applications; examination development, administration, and scoring; and office administration.

A $200 application fee is required if the applicant holds an MPH or equivalent degree and has completed an ACGME-accredited residency in the field of preventive medicine in which certification is sought.

A $350 application fee is required if the applicant is applying through the equivalency pathway.

Application fees are nonrefundable.

The examination fee of $1,000 is due 45 days prior to the examination.

Listing of Individuals Certified
A list, current to the date of publication, of persons to whom certificates have been issued by the Board may be found in The Official ABMS Directory of Board Certified Medical Specialists.

Reporting of Changes of Address
Once certified, physicians should notify the following offices of any changes of address
1. The American Board of Preventive Medicine, Inc.
2. The Records and Circulation Department, American Medical Association, 515 N State St, Chicago, IL 60610, the office that maintains a master file of all physicians in the United States.
Important Dates

June 1: Deadline for completed application forms, application fees, and reapplication requests to be received in the Board Office for the November examination.

August 1: Deadline for completion of requirements to sit for the November examination.

August: Meeting of the Board to determine admissibility of applicants to November examination. Letters of notification of admissibility for November examination are mailed to candidates after the August Board meeting. Notification cannot be given by telephone.

October: Deadline for examination fee to be received in the Board Office for approved candidates who wish to sit for the November examination. Date varies from year to year, and is stated in letter of admissibility.

November: Annual 1-day written examination in Chicago, Illinois. Date will vary from year to year and is stated in letter of admissibility.

January: Meeting of the Board to determine the pass/nonpass score for the previous November examination.

February: Results of November certifying examination sent by letter to candidates after the Board meeting. Notification cannot be given by telephone.

American Board of Psychiatry and Neurology

James H Shore, MD, President, Denver, Colorado
Ludwig Gutmann, MD, Vice-President, Morgantown, West Virginia
Lenore C Terr, MD, Secretary, San Francisco, California
Kenneth Z Altshuler, MD, Treasurer, Dallas, Texas
Mark L Dyken, Jr, MD, Member-at-Large, Indianapolis, Indiana
William T McKinney, MD, Chicago, Illinois
Sheldon J Miller, MD, Chicago, Illinois
John E Schwalger, MD, New Haven, Connecticn
Peter M Silberfarb, MD, Hanover, New Hampshire
Peter E Tanguay, MD, Los Angeles, California
Jose Biller, MD, Indianapolis, Indiana
Rosalie Burns, MD, Philadelphia, Pennsylvania
Darryl C De Vivo, MD, New York, New York
Marvin A Fishman, MD, Houston, Texas
Michael P McQuillen, MD, Charlottesville, Virginia
Burton A Sandok, MD, Rochester, Minnesota
Stephen C Scheibel, MD, Executive Vice President, Deerfield, Illinois

(Please note that this is not an official document of the American Board of Psychiatry and Neurology, Inc. The Board cannot accept responsibility for errors made in the printing of this material. Please contact the Board's Executive Office for official policies and procedures of the Board.)

Throughout this section, the American Board of Psychiatry and Neurology may be referred to as the “Board” or the “ABPN.” References to “residency” refer to entry at the PGY-2 level unless stated otherwise. “Accredited or approved programs” refers to programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) or the Royal College of Physicians and Surgeons of Canada.

General Information Pertaining to All Candidates

History

The American Board of Psychiatry and Neurology, Inc (ABPN), is a nonprofit corporation that was founded in 1934 following conferences of committees appointed by the American Psychiatric Association, the American Neurological Association, and the then Section on Nervous and Mental Diseases of the American Medical Association. This action was taken as a method of identifying the qualified specialists in psychiatry and neurology.

Composition of the Board

The Board consists of 16 members. Membership on the Board is distributed among the Board's nominating organizations as follows: five psychiatrists from the American Psychiatric Association, three neurologists from the American Medical Association, four neurologists from the American Neurological Association, and four neurologists from the American Academy of Neurology. Each of these organizations proposes nominees to represent it on the Board, but the Board itself selects its members. The Board is independently incorporated.

Elections to fill the places of members whose terms have expired take place annually. Neurology and psychiatry are always equally represented on the Board. The Board holds meetings several times each year for the purpose of examining candidates and transacting business.

Mission Statement

The goal of the ABPN is to enhance the quality of psychiatric and neurologic care through the voluntary certification process and thereby serve the public interest.

Methods for achieving that goal include, but are not limited to, efforts to:
1. Describe, in terms of knowledge and skills, a physician with special expertise in evaluation, diagnosis, and treatment of patients with psychiatric or neurologic disorders, or who require psychiatric or neurologic assessment.
2. Set the standards for knowledge and skills required for certification.
3. Construct and administer examinations designed to evaluate those skills and knowledge.
4. Monitor, evaluate, and improve the standards and procedures of the certification process.
5. Participate in the appropriate Residency Review Committees of the ACGME to set standards for the quality and scope of residency training programs to ensure that their graduates will obtain necessary training credit toward certification.
6. Issue certificates and other forms of recognition to successful candidates.
7. Make available lists of diplomates who have fulfilled the requirements for certification.
8. Inform the public, other professions, and other medical organizations of the purposes, activities and responsibilities of the corporation, and
9. Participate in the activities of the American Board of Medical Specialties (ABMS) and its member boards.

Rules and Regulations

In carrying out its specified functions, the Board has formulated rules and regulations to guide its activities and to indicate to applicants and other interested persons its policies regarding training requirements, examinations, fees, etc. These rules and regulations are amended from time to time. The statements contained in this brochure are the most recent amendments and represent the current policy of the Board.

The Board shall have authority to issue from time to time, and thereafter to amend, rules and regulations relating to the issuance and revocation of certificates as to qualification in the practice of psychiatry or neurology, or both, or their recognized subspecialties.
Certificates

The Board currently issues eight types of certificates: (1) psychiatry, (2) neurology, (3) neurology with special qualification in child neurology, (4) child and adolescent psychiatry, (5) added qualifications in geriatric psychiatry, (6) added qualifications in clinical neuropsychology, (7) added qualifications in addiction psychiatry, and (8) added qualifications in forensic psychiatry. An applicant may be certified in more than one area. The applicant shall receive a separate certificate for each area in which he or she qualifies.

Each certificate shall be in such form and for such period of time as may be specified by the Board.

Recertification

Effective October 1, 1994, all individuals achieving Board certification by the ABPN in psychiatry, neurology, neurology with special qualification in child neurology, and child and adolescent psychiatry will be issued 10-year, time-limited certificates. All certificates for Added Qualifications are valid for 10 years from the date issued.

Revocation of Certificates

The Board shall have authority to revoke any certificate issued by it or to place a certificate holder on probation for a fixed or indefinite time if

1. The certificate was issued contrary to or in violation of the Bylaws or any rule or regulation of the Board.
2. The person to whom the certificate was issued made any material misstatement or omission of fact to the Board in his/her application or otherwise.

Certification shall continue in force only so long as the holder has an unlimited license to practice medicine.

Unethical Behavior of Candidates

Since the Board believes that the ethics of candidates for certification are of concern, it has adopted the following rules:

1. The falsification of credentials will be cause for the Board’s refusal to admit a candidate to examination for at least 4 years.
2. The Board will consider legal action against anyone who forges an ABPN certificate, copies ABPN examinations or otherwise uses them in conflict with copyright laws, or in any other way violates the legal prerogatives of the Board. Such activities will also be cause for the Board’s refusal to admit a candidate to examination for at least 4 years.
3. Scores on the Part I examination may be invalidated for reasons of irregular behavior that indicates cheating. Statistical analyses may be used to confirm such behavior. If the examination score is invalidated, the candidate may submit a written appeal within 30 days of notice on invalidation. An appeal fee of $25 must accompany the written appeal. The Committee to Review Appeals will review the materials and recommend action to the Board. The Board will review the materials and make a decision that, in all cases, will be final and binding on the Board and on the candidate. All correspondence or other materials should be sent to the Board office. If the examination score is invalidated because of irregular behavior, the Board will not consider the candidate for examination for a period of at least 4 years. A repeat application and Part I examination fee will be required.
4. Irregular behavior that indicates cheating on the Part II examination may be considered sufficient reason to invalidate the candidate’s score. In that event, the Board will not consider the candidate’s repeat application for Part II for a period of at least 4 years. Another Part II examination fee will be required.
5. “Irregular behavior that indicates cheating” shall include, but not be limited to, the following conduct: (a) copying of answers from another candidate’s examination; (b) knowingly permitting another candidate to copy one’s answers on an examination; (c) unauthorized possession, reproduction, or disclosure of materials, including examination questions or answers, before, during, or after the examination; (d) use of audio equipment to record any part of the Part II examination; (e) offering any financial or other benefit to any director, officer, employee, proctor, diplomate, or other agent or representative of the Board in return for any right, privilege, or benefit that is not granted by the Board to other similarly situated candidates or persons.

The Board’s action may be sent to legitimately interested third parties, including the American Medical Association, state medical societies, and appropriate specialty societies.

A proposal to impose upon a candidate one of the penalties identified in paragraphs 1, 2, 4, and 6 hereof shall constitute a “negative determination” subject to the “Appeal Procedure for Negative Determinations Regarding Applications” or the “Appeal Procedure for Negative Determinations Regarding Part II Examinations.”

Upon the expiration of the 4-year period cited in paragraphs 1, 2, 3, and 4 hereof, the candidate may send to the Board a written request for lifting of the ban, together with a written explanation of the reasons for lifting of the ban that will then be reviewed by the Board for a final decision. The decision will be final and binding on the Board and on the candidate. All correspondence or other materials should be sent to the Board office.

Board Eligibility

The ABPN, in accordance with the policy of the ABMS, does not recognize or use the term “board-eligible,” and does not issue statements concerning “board eligibility.” The Board informs an applicant of admittance to examination only when the applicant has an active, approved application on file in the Board office.

Examiners and Committee Members

Any individual who participates in any review course that is publicized as being a Board review course, or in any course that could be construed as a Board review course, or who has edited or provided written or audiovisual materials for publications identified as preparation for Board examinations, should not participate as an examiner in any Part II examinations, child and adolescent psychiatry examinations, or as a member of a Board Committee for at least 12 months subsequent to the course of publication of any written or audiovisual materials.

Application/Training Requirements

Application

Deadline for receipt of completed applications in the Board office for the October 17, 1995, Part I examination is February 1, 1995. All licensing and training requirements must be met by June 30, 1995.

A physician who wishes to be examined by the Board shall complete, sign, and file with the executive vice president an application on the current official application form. The application must include the required application and Part I examination fees and supporting data. Supporting data consist of:

1. Documentation of all residency training by a copy of certificates of training including exact dates, or a letter of verification of training from the training director(s) including exact dates of training. If the resident is still in training, a letter from the training director documenting that the resident is in the final year of training and that training will be completed by June 30, 1995, must be submitted. Immediately after the resident has completed training, a letter verifying successful completion of training must be submitted by the training director. Documentation of successful completion of training completed by June 30, 1995, must be in the Board office no later than July 15, 1995.
2. Documentation of PGY-1 by a letter of verification from the training director describing the exact length and content of rotations completed during PGY-1. If the PGY-1 was a full year of internal medicine, pediatrics, or family practice, a photocopy of the certificate of completion including the exact dates may be submitted in lieu of the letter from the training director.

3. A photocopy of current unlimited license renewal registration showing the expiration date. If the resident has a temporary license at the time the application is submitted, a photocopy of the current unlimited license must be submitted no later than July 15, 1995.

4. Four autographed photographs. Heavy cardboard-backed photos or peel-apart photos will not be accepted. Photos should be passport-size and may be either black-and-white or color photos.

The "Information for Applicants" booklet and the application are reviewed each year and may be obtained from the Board office. Only current applications will be accepted. Photocopies of applications will not be accepted.

Applications submitted without fees will not be accepted. Fees received without applications will be returned.

Part I application and examination fees are neither refundable nor transferable.

Part I sites are assigned based on the order in which applications are received and approved in the Board office. If a site is filled to capacity, the second choice will be assigned. If the second choice site is filled to capacity, the third choice will be assigned, etc.

An acknowledgment postcard accompanies each application. That card, when stamped, self-addressed, and enclosed with the application, will be returned to the candidate as acknowledgment that the application has been received by the Board office.

Once the card is returned to the candidate, it may take up to 16 weeks for the candidate to receive information regarding the status of the application. Applications are reviewed in order of receipt.

An applicant who does not receive notification from the Board office by August 1, 1995, of the acceptance or rejection of his/her application should contact the Board office.

Applicants With Disabilities

The Board recognizes that physicians with disabilities may wish to take the Board's examinations and will attempt to make accommodations for applicants with verified disabilities. The Board supports the intent of the "Americans with Disabilities Act (ADA)."

You are reminded, however, that "auxiliary aids and services" can only be offered if the examined does not fundamentally alter the measurement of skills or knowledge the examination is intended to test (Americans with Disabilities Act, Public Law 101-334 §309 (b)(3)). Applicants must advise the Board in writing if they are requesting any accommodations from the Board due to a disability no later than the deadline for submitting their application for the Part I examination. The applicant may be asked to submit appropriate documentation of the disability and a description of previous accommodations provided during other examinations. If the Board deems it necessary, an independent medical assessment may be requested at the expense of the applicant.

The Board office has TDD (Telecommunications Device for the Deaf) capability. Using it, hearing impaired persons can communicate with the Board as easily as dialing 708 374-4223 and typing in a message.

General Requirements

The applicant must establish that:

1. He/she has an unlimited license to practice medicine in a state, commonwealth, territory, or possession of the United States, or a province of Canada. All applicants are required to submit copies of licenses with current registrations and expiration date with their Part I applications.

2. He/she has satisfactorily completed the Board's specialized training requirements in psychiatry, neurology, neurology with special qualification in child neurology, or any of its subspecialties.

References to "residency" refer to entry at the PGY-2 level unless stated otherwise. Residency training must be in the specialty in which the applicant seeks certification. No residency training credit can be given for time spent in a residency program in another specialty. Training programs approved by the Residency Review Committees and accredited by the ACGME can be found in the current issue of the Graduate Medical Education Directory published by the American Medical Association. This directory includes the Essentials of Accredited Residencies in Graduate Medical Education.

Training may be completed on a part-time basis, provided that it is no less than half-time, and credit will not be given for less than one-year blocks of training except under special circumstances, which must be approved by the ABPN Credentials Committee.

Training programs may develop individual leave or vacation time for residents in accordance with the overall institutional policy. Leave or vacation time may not be utilized to reduce the total amount of required residency training or to make up deficiencies in training.

To ensure continuity of training, the Board requires that 2 of the 3 years of residency training be spent in a single program. On occasion, the Board will consider alternate patterns of training that have not included the required 2 years spent in a single program, provided that the total residency permitted the applicant to assume progressive levels of responsibility and that a comprehensive curriculum was covered. In such cases, it is the responsibility of the applicant to provide detailed documentation from the respective training directors outlining training content, duties, and responsibilities. Each case will be considered on an individual basis.

Appeal Procedure for Negative Determinations Regarding Applications

The rejection of credentials for admission to an examination is considered a "negative determination." An applicant who has submitted a formal application and receives a negative determination regarding his/her application, may appeal by complying with the following procedures:

Within 30 days after date of notice of a negative determination, the applicant may, by writing, indicate his/her request for a formal appeal of his/her application rejection. The following materials must accompany this request: appeal fee of $350 and any additional written information tending to rebut the negative determination. All correspondence and other materials should be sent to the Board office.

For psychiatry applicants, the Committee on Credentials for Psychiatry will review the materials and recommend action to the Psychiatry Council consisting of all current psychiatry directors. The Psychiatry Council will review the materials and make a decision that, in all events, will be final and binding on the Council, on the Board, and on the applicant.

For neurology and neurology with special qualification in child neurology applicants, the Committee on Credentials for Neurology will review the materials and recommend action to the Neurology Council consisting of all current neurology directors. The Neurology Council will review the materials and make a decision that, in all events, will be final and binding on the Council, on the Board, and on the applicant.
Certification in Psychiatry

An applicant who seeks admission to examination for certification in psychiatry must have satisfactorily completed an approved PGY-1 and 3 full years of postgraduate, specialized residency training in a psychiatry program accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada.

1. Training Requirements for Physicians who entered Residency Training Programs on or after July 1, 1977, and before July 1, 1986.

   Two patterns of training are acceptable:
   A. Three Years Training Following a First Postgraduate Year:
      Prior to entering an approved 3-year training program in psychiatry, a physician must have completed 1 year of approved training after receiving the degree of Doctor of Medicine or Doctor of Osteopathy that included a minimum of 4 months of internal medicine, pediatrics, or family practice. Or
   B. Four-Year Training Programs:
      A 4-year program in psychiatry would be acceptable with the provision that no less than 4 months during one of the years (preferably the first year) be spent in an approved program providing supervised, direct responsibility for the general medical care of children and/or adults.

2. Training Requirements for Physicians who entered Residency Training Programs on or after July 1, 1986, and before July 1, 1997.

   Two patterns of training are acceptable:
   A. A broad-based clinical year of accredited training in the United States or Canada in internal medicine, family practice, or pediatrics; or an ACGME-approved Transitional Year Program that included a minimum of 4 months of primary care; or an ACGME-approved residency in a clinical specialty requiring comprehensive and continuous patient care plus 3 full years of postgraduate, specialized residency training in a psychiatry program accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada (RCPSC). Or
   B. Four-Year Training Program:
      Four years of training in an ACGME-approved program in psychiatry would be acceptable with the provision that no less than 4 months during one of the years of training be spent in an approved program providing supervised, direct responsibility for the general medical care of children and/or adults.

   Effective July 1, 1988, all osteopathic physicians entering a PGY-2 in psychiatry must have successfully completed an approved PGY-1 as described above.

   Effective January 1, 1994, all physicians who trained in Canada must have completed an approved PGY-1 as described above plus 4 years of postgraduate, specialized residency training in a psychiatry program accredited by the RCPSC.

   Training requirements for physicians entering residency training in psychiatry on or after July 1, 1997:

   As an applicant seeking admission to the examination for certification in psychiatry and entering residency training on or after July 1, 1997, must complete the following training in ACGME-approved programs. Two patterns of training are acceptable
   1. A broad-based clinical year of ACGME-approved training in the United States in internal, family practice, or pediatrics; or an ACGME-approved transitional year program including a minimum of 4 months of primary care; or an ACGME-approved residency in a clinical specialty requiring comprehensive and continuous patient care plus 3 full years of postgraduate, specialized residency training in a psychiatry program accredited by the ACGME. Or
   2. Four years of training in an ACGME-approved program in psychiatry would be acceptable with the provision that no less than 4 months during one of the years of training was spent in an approved program providing supervised, direct responsibility for the general medical care of children and/or adults.

Training Credit From the United Kingdom

The following criteria apply to all applicants for psychiatry who began their psychiatric residency training on or after July 1, 1976. Applicants who have completed residency training in the United Kingdom prior to July 1, 1976, must meet the criteria outlined in the section "Applicants with Non-US, Non-Canadian, or Non-UK Training."

For each year of psychiatric residency training completed in an approved hospital program in the United Kingdom, 1 year of training credit will be given toward eligibility for examination by the Board in psychiatry.

The hospital program must be among those approved by the Visiting Inspecting Specialty Committee in Psychiatry of the Royal College of Psychiatrists.

In order to obtain credit for 2 or 3 years of approved training in the United Kingdom, at least 2 years of the training must be spent at the same training center in psychiatry.

The applicant will be responsible for sending the details of his/her training to the Board office, along with verification of this training from the approved hospital or hospitals in the United Kingdom.

The applicant's program director must certify that the applicant was engaged in full-time residency training.

As of July 1, 1985, all applicants for admission to examination who are requesting credit for training done in the United Kingdom must have an approved year of primary care training in the United States or Canada. The exception is restricted to those applicants who hold the Member of the Royal College of Psychiatrists (MRCPsych) certificate and completed training in its entirety in the United Kingdom. If training in its entirety (intensive residency training) was not completed in the United Kingdom, the applicant must complete an additional year of approved primary care training in the United States or Canada.

All physicians entering residency training in psychiatry on or after July 1, 1997, must complete the training as described above. (Training requirements for physicians entering residency training in psychiatry on or after July 1, 1997). No credit will be granted for training completed in programs that are not accredited by the Accreditation Council for Graduate Medical Education.

Applicants With Non-US, Non-Canadian, or Non-UK Training

The following criteria pertain to all applicants whose residency training was undertaken at a center located outside the United States, Canada, or the United Kingdom (with the exception of applicants who completed residency training in the United Kingdom prior to July 1, 1976).

The candidate must possess an unlimited license to practice medicine in a state, commonwealth, territory, or possession of the United States or a province of Canada.

The candidate must successfully complete a comparable national certification examination in the country in which the physician is seeking admission to examination. The candidate must have achieved such certification within the past 7 years. If certification was achieved earlier, then the candidate must have had 1 year of clinical practice in a setting in which his/her professional work has been observed by at least two ABPN diplomates in that specialty and documented by two letters of sponsorship from such diplomates.

The only certifications recognized by the Board for psychiatry are:

1. MRCPsych (Member of the Royal College of Psychiatrists)
2. FRANZCP (Fellow of the Royal Australian and New Zealand College of Psychiatrists)
3. FF Psych (SA) of the South African Medical and Dental Council (Fellowship of the Faculty of Psychiatry of the College of Medicine of South Africa)
4. Israel's Specialty Certification of the Scientific Council of the Israel Medical Association

All applicants with Non-US, Non-Canadian, or Non-UK training who do not meet the above criteria must complete training as listed under "Certification in Psychiatry."

As of July 1, 1985, all applicants for admission to examination must have an approved year of primary care training in the United States or Canada. The exception is restricted to those applicants who hold a certificate and training in its entirety (internship and residency training) in one of the above-mentioned countries. If training in its entirety was not completed in the country issuing the certificate, the applicant must complete an additional year of approved primary care training in the United States or Canada.

All physicians entering residency training in psychiatry on or after July 1, 1997, must complete the training as described above. (Training requirements for physicians entering residency training in psychiatry on or after July 1, 1997.) No credit will be granted for training completed in programs that are not accredited by the Accreditation Council for Graduate Medical Education.

**Certification in Neurology**

An applicant who seeks admission to examination for certification in neurology must have satisfactorily completed an approved PGY-1 (see below for specifications) and 3 full years of postgraduate, specialized residency training in a neurology program accredited by the ACGME or the RCPSC.

**1. Training Requirements for Physicians who entered Residency Training on or after July 1, 1987, and before July 1, 1991.**

(For neurology training requirements pertinent to physicians who entered residency training prior to July 1, 1987, see Appendix A.)

Two patterns of training are acceptable:

A. Three years of training following a first postgraduate year:

Prior to entering an approved 3-year residency training program in neurology a physician must have completed 1 year of approved graduate training after receiving the degree of Doctor of Medicine or Doctor of Osteopathy as follows:

Physicians entering neurology residency training as of July 1, 1987, and before July 1, 1981, may enter neurology residency training programs only after an initial first year of graduate training in accredited programs in the United States or Canada in internal medicine or an ACGME-approved Transitional Program that includes at least 6-month experience in internal medicine.

B. Four-Year Training Program:

Four years of training in a neurology program approved by the ACGME for 4 years of training is acceptable.

Two patterns of training are acceptable:

A. A full year of training in internal medicine, or as an acceptable alternative, a full year in which a minimum of 8 months of training must be in internal medicine, the details of which must be documented by the internal medicine training director. The composition of these 8 months cannot include rotations in neurology or emergency medicine. To ensure that these 8 months constitute a high-quality experience, they should be obtained with an emphasis on progressive responsibility for the resident.

In addition, all physicians will be required to complete three full years of postgraduate, specialized residency training in a neurology program accredited by the ACGME or the RCPSC. Or

B. Four-Year Training Program:

Four years of training in a neurology residency program approved by the ACGME for 4 years of training is acceptable.

3. Training Requirements for Physicians Entering Residency Training as of July 1, 1994, and before July 1, 1997.

Two patterns of training are acceptable:

A. A full year of training in Internal Medicine, or as an acceptable alternative, a full year in which a minimum of 6 months of training must be in internal medicine, the details of which must be documented by the internal medicine training director. The composition of these 6 months cannot include rotations in neurology or emergency medicine. To ensure that these 6 months constitute a high-quality experience, they should be obtained with an emphasis on progressive responsibility for the resident.

At least 2 months of the additional 6 months must be spent in pediatrics and/or emergency medicine. No more than 2 months of the remaining 4 months may be spent in neurology.

In addition, all physicians will be required to complete three full years of postgraduate, specialized residency training in a neurology program accredited by the ACGME or the RCPSC. Or

B. Four-Year Training Program:

Four years of training in a neurology program approved by the ACGME for 4 years of training is acceptable.

Effective July 1, 1988, all osteopathic physicians entering a PGY-3 in neurology must have successfully completed an approved PGY-1 as described above.

Physicians who trained in accredited programs in Canada must have successfully completed an approved PGY-1 as described above plus 4 years of postgraduate, specialized residency training in a neurology program accredited by the Royal College of Physicians and surgeons of Canada. (These requirements apply to those who began training in neurology in Canada on or after July 1, 1994.)

4. Training Requirements for Physicians Entering Residency Training in Neurology on or after July 1, 1997.

Two patterns of training are acceptable:

A. A full year of training in internal medicine in an ACGME-approved program, or as an acceptable alternative, a full year in which a minimum of 6 months of training must be in internal medicine, the details of which must be documented by the internal medicine training director. The composition of these 6 months cannot include rotations in neurology, pediatrics, or emergency medicine. To ensure that these 6 months constitute a high-quality experience, they should emphasize progressive responsibility for the resident. At least 2 of the additional 6 months must be spent in internal medicine, pediatrics, or emergency medicine. No more than 2 of the remaining 4 months may be spent in neurology. In addition, all physicians will be required to complete 3 full years of postgraduate, specialized residency training in a neurology program accredited by the ACGME. Or

B. Four years of training in a neurology program approved by the ACGME for 4 years of training is acceptable.

5. Applicants with Non-US or Non-Canadian Training

The following criteria pertain to all applicants whose residency training was undertaken at a center located outside the United States or Canada. The candidate must possess an unlimited li-
cense to practice medicine in a state, commonwealth, or terri-
tory of the United States or province of Canada.

As of July 1, 1985, the only residency training that will be con-
sidered is training completed in programs approved by the
ACGME in the United States or by the RCPSC.

In lieu of a PGY-1 in an accredited program in the United
States or Canada, the following certificates in internal medicine
will be accepted:
A. MRCP(UK)—United Kingdom's Member of the Royal College
   of Physicians
B. MRACP—Australia and New Zealand's Member of the Royal
   Australasian College of Physicians
C. FCP(SA)—South Africa's Fellow of the College of Physicians
D. MRCP(I)—Ireland's Member of the Royal College of Physicians

The candidate must have achieved certification within the
past 7 years. If certification was achieved earlier, then the can-
didate must have had 1 year of clinical practice in a setting in
which his/her professional work has been observed by at least
two ABPN diplomates in that specialty and documented by two
letters of sponsorship from such diplomates.

For neurology training requirements pertinent to non-US or
non-Canadian trained physicians who entered residency training
prior to July 1, 1985, see Appendix A.

All physicians entering residency training in neurology on or
after July 1, 1997, must complete the training as described above.
(Training requirements for physicians entering residency train-
ing in neurology on or after July 1, 1997.) No credit will be
granted for training completed in programs that are not accred-
ted by the ACGME.

Certification in Neurology With Special
Qualifications in Child Neurology

Proper preparation for the practice of child neurology requires that
the practitioner be a qualified neurologist who has had additional
training in pediatrics and child neurology. To qualify for this cer-
cificate, a different type of preparation and certifying examination
are required. The same diploma will be used, the only difference being
that instead of certifying qualification in "neurology," it certifies
qualification in "neurology with special qualification in child
neurology."

An applicant seeking admission to examination for certification
in neurology with special qualification in child neurology must have
completed the following training in ACGME-approved programs or
programs approved by the RCPSC. All training must be completed
after receiving the degree of Doctor of Medicine or Doctor of
Osteopathy.

1. Three patterns of training are acceptable for 2 of the 5 years of
   training:
   A. The usual pathway is 2 years of training in general pediatrics.
   This is the only pathway that allows the applicant admission
   for examination by both the American Board of Pediatrics
   and the ABPN. Or
   B. Effective for individuals entering training as of July 1, 1992, 1
      year of training in general pediatrics and 1 year of research in
      the basic neurosciences. The basic neurosciences pathway was
      created as an alternative track for residents who are planning
      a research career in academic child neurology. The year of ba-
sic neurosciences would provide training in a research disci-
pline related to child neurology and is intended to increase
the trainee's knowledge base and competitiveness for federal
and non-federal grant support. The trainee must make at least
an 80% time commitment to basic neurosciences during this
year of training. For the purpose of this training track, basic
neurosciences is defined as laboratory research related to the

   cellular or molecular basis of neurologic diseases. Examples of
   relevant basic disciplines include molecular neurogenetics,
   neurochemistry, neuropathology, neurophysiology,
   neuroanatomy, neuroimmunology, developmental neurobi-
   ology, biophysics, and cell biology. This track of training must be
   approved by the Board prior to completion of the 5 years of
   training. Or

2. Effective for individuals entering residency training as of July 1, 1991, 1
   year of training in general pediatrics and 1 year of training in internal
   medicine. An acceptable alternative to the 1 year of internal
   medicine is a full year in which a minimum of 8
   months of training must be in internal medicine, the details of
   which must be documented by the internal medicine training director. The composition of these 8 months cannot include rota-
tions in neurology or emergency medicine.

   Effective for individuals entering training as of July 1, 1994, an
   acceptable alternative to the 1 year of internal medicine is a
   full year in which a minimum of 8 months of training must
   be in internal medicine, the details of which must be docu-
   mented by the internal medicine training director. The compo-
sition of these 6 months cannot include rotations in neurology
   or emergency medicine. To ensure that these 6 months consti-
tute a high-quality experience, they should be obtained with
an emphasis on progressive responsibility for the resident.

   At least 2 months of the additional 6 months must be spent
in internal medicine, pediatrics and/or emergency medicine.
No more than 2 months of the remaining 4 months may be
spent in neurology.

   In lieu of this year of internal medicine the following certifi-
cates will be accepted:
   1. MRCP(UK)—United Kingdom's Member of the Royal College
      of Physicians
   2. MRACP—Australia and New Zealand's Member of the Royal
      Australasian College of Physicians
   3. FCP(SA)—South Africa's Fellow of the Royal College of
      Physicians
   4. MRCP(I)—Ireland's Member of the Royal College of
      Physicians

3. Training Requirements for Physicians Entering Residency Train-
ing in Child Neurology on or after July 1, 1998.

   An applicant seeking admission to examination for certifica-
tion in neurology with special qualifications in child neurology
must complete the following training in ACGME-approved pro-
grams. All training must be completed after receiving the degree
of Doctor of Medicine or Doctor of Osteopathy.

   Three patterns of training are acceptable for 2 of the 5 years of
training:
   A. The usual pathway is 2 years of training in general pediatrics in
an ACGME-approved program. This is the only pathway that al-
lows the applicant admission for examination by both the
American Board of Pediatrics and the ABPN. Or
B. One year of training in general pediatrics in an ACGME-approved program and 1 year of research in the basic neurosciences. The basic neurosciences pathway was created as an alternative track for residents who are planning a research career in academic child neurology. The year of basic neurosciences would provide training in a research discipline related to child neurology and is intended to increase the trainee's knowledge base and competitiveness for federal and non-federal grant support. The trainee must make at least an 80% time commitment to basic neurosciences during this year of training. For the purpose of this training track, basic neurosciences is defined as laboratory research related to the cellular or molecular basis of neurologic diseases. Examples of relevant basic disciplines include molecular neurogenetics, neurochemistry, neuropharmacology, neurophysiology, neuroanatomy, neuroimmunology, developmental neurobiology, biophysics, and cell biology. This track of training must be approved by the Board prior to completion of the 5 years of training. Or

C. One year of training in general pediatrics in an ACGME-approved program and 1 year of training in internal medicine in an ACGME-approved program. An acceptable alternative to the 1 year of internal medicine is a full year of ACGME-approved training which includes a minimum of 6 months of internal medicine, the details of which must be documented by the internal medicine training director. The composition of these 6 months cannot include rotations in neurology, pediatrics, or emergency medicine. To ensure that these 6 months constitute a high-quality experience, they should be obtained with an emphasis on progressive responsibility for the resident.

At least 2 of the additional 8 months must be spent in internal medicine, pediatrics, or emergency medicine. No more than 2 months of the remaining 4 months may be spent in neurology.

In addition, all physicians will be required to complete 3 full years of postgraduate, specialized residency training in a child neurology program accredited by the ACGME.

All physicians entering residency training in neurology with special qualifications in child neurology on or after July 1, 1988, must complete the training as described above (Training requirements for physicians entering residency training in child neurology on or after July 1, 1988). No credit will be granted for training completed in programs that are not accredited by the ACGME.

**Examinations**

The Board does not endorse or recommend any texts or other teaching aids identified as “Board preparation” material. Furthermore, the Board does not have any affiliation with or responsibility for programs identifying themselves as “Board Review Courses.”

Though the purpose of the examination is to test the qualifications of the candidate in psychiatry or neurology, or both, it must not be forgotten that both these medical disciplines constitute part of the broad field of general medicine. The Board requires proficiency in neurology or the part of those it certifies in psychiatry and vice versa, but examines the candidate in accordance with the certificate he/she seeks.

The Board uses DSM-III-R as its primary authority in psychiatric diagnostic nomenclature. In 1985 both DSM-III-R and DSM-IV nomenclature will be acceptable.

Each candidate must pass both Part I and Part II of the examination given by the Board. Each examination shall cover such subjects as the Board may determine.

The Board may conduct examinations at such times and places as it deems appropriate. The Board reserves the right to limit the number of candidates admitted to any scheduled examination. The administration and grading of all examinations shall be the sole discretion of the Board. After completion of such examinations, the candidate will be notified in writing by the executive vice president as to the results.

The Board is not liable for candidate travel and/or other related expenses incurred as a result of an examination cancellation.

**Part I Examination**

**A. Part I Examination Procedures**

The Part I examination is given once a year, on a regional basis throughout the United States and Canada, as well as in selected sites outside the continental limits of the United States. Applicants will be expected to indicate, in order of preference, their choice of four examination sites. Every effort is made to accommodate candidates in the locale of their choice.

Request for transfer to another site must be made in writing at least 90 days prior to the Part I examination. Changes will be made subject to space availability.

An applicant will be advised in writing by the Board of acceptance for examination.

One month prior to the examination candidates will receive an admission notice specifying their examination site and time to report for examination.

All applicants are required to sit for the Part I examination for which they have applied. Applicants who fail to do so will be required to request and submit a new application, supporting documentation, and the application and Part I examination fees.

A candidate who passes Part I shall, upon request, submit to the Executive Vice President a check payable to the Board to cover the fee for Part II. The Part II examination is given three to four times a year at selected locations in the United States. Candidates who pass Part I will automatically be assigned to a Part II examination with a specific date and location. The limited space available and the complicated logistics involved in administering the Part II examination make it extremely difficult for the Board to allow candidates to select either the site or the date for the Part II examination. Candidates assigned to the Part II examination are expected to be present as scheduled. All candidates will be scheduled for Part II within 1 year following notification of successful completion of Part I.

A candidate who fails the initial Part I examination may, upon payment of the Part I reexamination fee, repeat the examination the following year. Reexaminees who do not sit for reexamination as scheduled will be required to request and submit a new application, all supporting documentation, and the application and Part I examination fees. Two failures necessitate reapplication (request for a new application, all supporting documentation, and the application and Part I examination fees).

Effective March 1987, a passing grade on the Part I examination dated March 1987, or thereafter, will be valid for a period of 5 years, or three attempts to complete the Part II examination successfully, whichever comes first.

**B. Part I Examination Content—Psychiatry**

Successful completion of the Part I written examination in psychiatry and neurology is required of candidates seeking certification in psychiatry.

The psychiatric portion of the examination will include questions on the following areas in psychiatry: normal and abnormal growth and development through the life cycle, biological and psychosocial dimensions of psychiatry, and clinical psychiatry (phenomenology, diagnosis, and treatment).
The neurologic portion of the examination will include questions on the following areas in neurology: neuroanatomy, neuropathology, neuropharmacology and clinical diagnostic procedures (including questions on cerebrospinal fluid, neuro-ophthalmology, electroencephalography, and neuroimaging), and therapy and clinical neurology (management of patients with neurologic disorders).

C. Part I Examination Content—Neurology
Successful completion of the Part I written examination in psychiatry and neurology is required of candidates seeking certification in neurology or neurology with special qualification in child neurology.

The neurologic portion of the examination will include questions on the following areas in adult and child neurology: neuroanatomy, neuropathology, neurochemistry, neurophysiology, basic and clinical neuropharmacology, neuroimmunology/neurovirology, genetics, neuroendocrinology, neuroimaging, neuro-ophthalmology, neurootology, and cerebrospinal fluid.

The psychiatric portion of the examination will include questions on the following areas in psychiatry: developmental and other disorders of childhood, psychopathology and diagnostic criteria, the doctor-patient relationship, behavioral and personality changes associated with structural alterations, alcoholism and substance abuse, altered states of consciousness, memory disorders and cortical dysfunction, psychiatric problems associated with medical disease, diagnostic procedures, psychopharmacology, and nonpharmacologic therapeutic modalities.

D. Appeal Procedure for Negative Determinations Regarding Part I Examinations
A failing grade on the Part I examination is considered a "negative determination." A candidate who receives a negative determination may appeal by complying with the following procedures:

Within 30 days after date of notice of a negative determination, the unsuccessful candidate may, by writing, indicate his/her request to have his/her examination hand scored. The appeal fee of $225 must accompany the request. The candidate will be informed of the results of the hand scoring in writing, which, in all events, will be final and binding on the Board and on the candidate. All correspondence and other materials should be sent to the Board office.

Part II
A. Part II Examination Procedures
All successful Part I candidates will receive a notice of assignment to a Part II examination, together with a request to submit the required examination fee. Scheduling for the Part II examination will be made on a regional basis as much as possible. Candidates who fail to take Part II as scheduled by the Board will be required to reapply for the Part II examination.

The limited space available and the complicated logistics involved in administering the Part II examination make it extremely difficult for the Board to allow candidates to select either the site or the date for examination. It is the candidate's privilege to decline the assigned examination, but there is no guarantee that another date or location will be available within the year's examination cycle.

Candidates who do not pay the Part II examination fee for their scheduled examination by the deadline specified will be removed from the roster of candidates for that examination. Such candidates will be required to request and submit a Part II application in order to be scheduled for a future Part II examination. Examination fees will be requested at the appropriate time.

Candidates who pay their Part II examination fee but fail to appear at their scheduled Part II examination will forfeit the fee. Such candidates will be required to request and submit a Part II application in order to be scheduled for a future Part II examination. Examination fees will be requested at the appropriate time.

One month prior to the date of the assigned Part II examination, a candidate will receive informational materials and an admission notice specifying the date, time, and place to report for registration. Candidates are requested to report for registration only at the date and time indicated on the admission notice. Registration schedules are arranged to accommodate candidates in accordance with their examination schedules.

1. Policy for Retaking the Part II Examination
A passing grade on the Part II examination dated March 1987, or thereafter, will be valid for a period of 6 years or three attempts to complete the Part II examination successfully, whichever comes first.

Psychiatric candidates must pass both sections of the Part II examination. A candidate who fails one or both sections of the examination must repeat both sections at each subsequently scheduled examination until he/she passes both sections at the same examination.

Neurology candidates must pass all three (two adult and one child) sections of the Part II examination. A candidate must repeat the section or sections he/she failed at each subsequently scheduled examination until he/she passes all the sections.

Child neurology candidates must pass all three (two child and one adult) sections of the Part II examination. A candidate must repeat the section or sections he/she failed at each subsequently scheduled examination until he/she passes all the sections.

Candidates who are unsuccessful in the Part II examination during the allotted time period will be required to request and submit a new Part I application, documentation, and the application and Part I examination fees.

2. Procedures for Retaking the Part II Examination
Candidates who have failed the Part II examination are automatically assigned to another Part II examination and are required to be present as scheduled. Candidates who fail to take the reexamination at the time specified are required to request and submit a Part II application. When possible, candidates submitting the Part II application will be scheduled for examination within 1 year from the date the Part II application is received in the Board office. Due to space limitations in the Part II examinations a wait longer than 1 year may become necessary. Candidates will be scheduled for examination based on space availability and order of receipt of application. A request for the examination fee will be made at that time. The examination fee should not be sent with the application.

Candidates who have submitted a Part II application may choose to decline two invitations to Part II examinations. If the third invitation is declined, the candidate will be required to request and submit a new Part II application and will be placed at the end of the waiting list once the application is received in the Board office.

Candidates should be aware of the expiration date of their passing the Part I examination and the number of times they have taken the Part II examination.

3. Rules of Forfeiture of Part II Examination Fee
A candidate who is unable to attend the Part II examination to which he or she has been admitted and who fails to notify the Executive Vice President in writing at least 90 days before the date of such examination shall forfeit the examination fee.

B. Part II Examination Content
Part II, an oral examination, will include the examination of patients under the supervision of one or more examiners. The manner of examining patients, and the reasoning and deductions therefrom, will constitute an important part of the examination. Knowledge of basic science principles, special diagnostic procedures, and manage-
Certification Requirements

American Board of Psychiatry and Neurology

ment recommendations and risks are also essential parts of the examination, which is focused upon evaluation of clinical skills.

Candidates are expected to discuss their findings with their examiners. Questions frequently cover such areas as diagnosis, differential diagnosis, treatment, prognosis, and management. Reference to the basic sciences of psychiatry and neurology may be made.

Psychiatry candidates will take two examinations:

One 1-hour examination in clinical psychiatry (patient)

One 1-hour examination in clinical psychiatry (audiovisual)

In the patient section, the psychiatry candidate will be given approximately 30 minutes to examine a patient under the supervision of one or more examiners. Following the examination of the patient, the candidate will be examined by one or more examiners. This section will stress physician-patient interaction, conduct of the clinical examination, capacity to elicit clinical data, formulation, differential diagnosis and prognosis, therapeutic management, and knowledge of therapies. Additional questions may be addressed to the basic science of psychiatry.

The audiovisual section will consist of a videotaped psychiatric examination approximately 20 minutes in length, which the candidate will observe. Candidates will then be individually examined by one or more examiners with particular reference to the content of the tape. This discussion may also include other clinical topics.

Neurology candidates will take three examinations:

One 1-hour examination in clinical neurology (patient)

One 1-hour examination in clinical neurology (without patient)

One 1-hour examination in clinical child neurology (without patient)

Child neurology candidates will take three examinations:

One 1-hour examination in clinical child neurology (patient)

One 1-hour examination in clinical child neurology (without patient)

One 1-hour examination in clinical neurology (without patient)

In the neurology and child neurology patient sections, the candidate will be given approximately 30 minutes to examine the patient under the supervision of one or more examiners. During the conduct of the examination, the candidate’s ability to obtain an adequate history and perform a neurologic examination will be observed. Following the examination of the patient, the discussion with the examiner, which will be approximately 30 minutes in length, will focus on the evaluation of the findings and discussion of the diagnosis, treatment, and management. This discussion may not be limited to the patient examined and may also include other clinical topics. The examiners may also ask additional questions concerning the basic science of neurology.

Multiple written vignettes of patient encounters will be utilized as a basis for discussion of diagnosis and treatment in those sections in which there is no patient present.

Since candidates in child neurology are to be certified in "Neurology with Special Qualification in Child Neurology," it is agreed that those candidates will be expected to pass a 1-hour oral examination in clinical neurology (without patient), which is set at the same level of difficulty established for neurology candidates. The pass/fail standards for that hour in clinical neurology (without patient) will be the same whether the candidate is seeking certification in neurology or in neurology with special qualification in child neurology.

C. Feedback to Unsuccessful Candidates on the Part II Examination

A failing grade on a Part II examination is considered a "negative determination." Within 30 days after date of notice of a negative determination, the unsuccessful candidate may, by writing, indicate his/her request for feedback. The fee for providing feedback is $100 and must accompany the written request. After such request, the candidate will be provided information concerning his/her performance in the form of a checklist of categories passed and not passed. All correspondence or other materials should be sent to the Board office.

D. Appeal Procedure for Negative Determinations Regarding Part II Examinations

A failing grade on a Part II examination is considered a "negative determination." A candidate who receives a negative determination may appeal by complying with the following procedures.

Within 55 days after date of notice of a negative determination, the unsuccessful candidate may, by writing, indicate his/her request for a formal appeal of the examination results. The following materials must accompany this request: appeal fee, which is equal to the candidate’s reexamination fee, and written information tending to rebut the negative determination. All correspondence and other materials should be sent to the Board office.

For psychiatry candidates the Committee to Review Appeals for Psychiatry will review the materials and recommend action to the Psychiatry Council consisting of all current psychiatry directors. The Psychiatry Council will review the material and make a decision that, in all events, will be final and binding on the Council, on the Board, and on the candidate.

For neurology or neurology with special qualification in child neurology candidates, the Committee to Review Appeals for Neurology will review the materials and recommend action to the Neurology Council consisting of all current neurology directors. The Neurology Council will review the materials and make a decision that, in all events, will be final and binding on the Council, on the Board, and on the candidate.

Subspecialization

A. Committee on Certification in Child and Adolescent Psychiatry

In February 1959, the ABPN, in concurrence with the ABMS, established a Committee on Certification in Child Psychiatry. This was done to establish officially the field of child psychiatry as a definite area of subspecialization in psychiatry and to provide a means of identifying the properly trained and experienced child psychiatrist as distinguished from those who claim proficiency in this field without adequate background and qualifications. In November 1987, the name of the Committee was changed to the Committee on Certification in Child and Adolescent Psychiatry.

The actual mechanics of certification of qualified candidates and the establishment of basic policies have been delegated by the Board to the Committee, which operates under the supervision of and in accordance with the policies of the Board. The Committee presently consists of six members certified in child and adolescent psychiatry by the ABPN and one member certified by the American Board of Pediatrics.

The Committee holds meetings each year for the purpose of examining candidates and transacting business.

Each applicant for certification in child and adolescent psychiatry must be certified by the Board in the specialty of psychiatry prior to applying for examination in child and adolescent psychiatry. Training must be completed by the application deadline. The general policies regarding training, application, and examination in child and adolescent psychiatry are contained in the pamphlet "Information for Applicants for Certification in Child and Adolescent Psychiatry," which is available from the Board office.

Please note that applicants may submit application for examination in psychiatry after successful completion of the PGT-1, 2 years of residency training in psychiatry, and 1 year of residency training in child and adolescent psychiatry.
B. Committee on Certification for Added Qualifications in Geriatric Psychiatry

In November 1989, the ABPN, in concurrence with the ABMS, established a Committee on Certification for Added Qualifications in Geriatric Psychiatry. This was done to establish officially the field of geriatric psychiatry as a definite area of subspecialization in psychiatry and to provide a means of identifying the properly trained and experienced geriatric psychiatrist.

The actual mechanics of certification of qualified candidates have been delegated by the Board to the Committee, which operates under the supervision of and in accordance with the policies of the Board.

Each applicant for certification in geriatric psychiatry must be certified by the Board in the specialty of psychiatry prior to applying for examination for added qualifications in geriatric psychiatry. The general policies regarding training, application, and examination in geriatric psychiatry are contained in the pamphlet "Information for Applicants for Certification of Added Qualifications," which is available from the Board office.

C. Committee on Certification for Added Qualifications in Clinical Neurophysiology

In October 1990, the ABPN, in concurrence with the ABMS, established a Committee on Certification for Added Qualifications in Clinical Neurophysiology. This was done to establish officially the field of clinical neurophysiology as a definite area of subspecialization in neurology and psychiatry and to provide a means of identifying the properly trained and experienced clinical neurophysiologist.

The actual mechanics of certification of qualified candidates have been delegated by the Board to the Committee, which operates under the supervision of and in accordance with the policies of the Board.

Each applicant for certification in clinical neurophysiology must be certified by the Board in the specialty of neurology, neurology with special qualification in child neurology, or psychiatry prior to applying for examination for added qualifications in clinical neurophysiology. The general policies regarding training, application, and examination in clinical neurophysiology are contained in the pamphlet "Information for Applicants for Certification of Added Qualifications," which is available from the Board office.

D. Committee on Certification for Added Qualifications in Addiction Psychiatry

In October 1981, the ABPN, in concurrence with the ABMS, established a Committee on Certification for Added Qualifications in Addiction Psychiatry. This was done to establish officially the field of addiction psychiatry as a definite area of subspecialization in psychiatry and to provide a means of identifying the properly trained and experienced addiction psychiatrist.

The actual mechanics of certification of qualified candidates have been delegated by the Board to the Committee, which operates under the supervision of and in accordance with the policies of the Board.

Each applicant for certification in addiction psychiatry must be certified by the Board in the specialty of psychiatry prior to applying for examination for Added Qualifications in Addiction Psychiatry. The general policies regarding training, application, and examination in addiction psychiatry are contained in the pamphlet "Information for Applicants for Certification of Added Qualifications," which is available from the Board office.

E. Committee on Certification for Added Qualifications in Forensic Psychiatry

In November 1992, the ABPN, in concurrence with the ABMS, established a Committee on Certification for Added Qualifications in Forensic Psychiatry. This was done to establish officially the field of forensic psychiatry as a definite area of subspecialization in psychiatry and to provide a means of identifying the properly trained and experienced forensic psychiatrist.

The actual mechanics of certification of qualified candidates have been delegated by the Board to the Committee, which operates under the supervision of and in accordance with the policies of the Board.

Each applicant for certification in forensic psychiatry must be certified by the Board in the specialty of psychiatry prior to applying for examination for added qualifications in forensic psychiatry. The general policies regarding training, application, and examination in forensic psychiatry are contained in the pamphlet "Information for Applicants for Certification of Added Qualifications," which is available from the Board office.

Special Programs

A. Supplementary Certification

A candidate who has been certified in psychiatry, neurology, or neurology with special qualification in child neurology may apply for supplementary certification in another primary specialty upon submission of a new Part I application and Part I examination fee. The candidate will be scheduled for the next available Part I examination in the supplementary subject. The credentials for such other certificate must be acceptable to the Board.

More than one application may be on file simultaneously. It is the responsibility of the applicant to contact the Board office to avoid possible conflicts in examination scheduling.

1. Dual Certification in Psychiatry and Neurology

Applicants seeking certification both in psychiatry and neurology who began residency training prior to January 1, 1988, must have completed the following 5 years of ACGME-approved postgraduate training

a. A PGY-1 that meets requirements for either psychiatry or neurology;

b. Two years of approved residency in psychiatry in a single training program; and

c. Two years of approved residency in neurology in a single training program.

Applicants seeking certification both in psychiatry and neurology who began residency training as of January 1, 1988, must have completed the following ACGME-approved postgraduate training

a. A PGY-1 that meets the requirements for entry into a neurology program;

b. Either (1) 6 full years of postgraduate residency training in approved programs in the United States or Canada, including 3 full years in psychiatry and 3 full years in neurology; or (2) at the discretion and approval of both training directors and in accordance with Residency Review Committee requirements, the candidates may complete 5 full years of postgraduate training in approved programs in the United States or Canada, including 2 full years of residency training in psychiatry in a single program, 2 full years of residency training in neurology in a single program, and a full year that is jointly sponsored and coordinated by the psychiatry and neurology training directors to allow the resident to successfully complete all of the essentials for an approved residency program in psychiatry and an approved residency program in neurology.

The 5 years of residency training are usually taken at one approved institution but may be taken at no more than two approved institutions. An application for examination may be submitted after completion of an approved PGY-1, 2 full years of approved residency training in one specialty, and the full year of approved, jointly sponsored residency training.
2. Dual Certification in Neurology and Neurology with Special Qualification in Child Neurology
Applicants who have achieved certification in neurology and who wish to be certified in neurology with special qualification in child neurology will need to obtain the following additional training:
(a) A minimum of 12 months of general pediatric training completed in a program accredited by the ACGME or by the RCPSC; and
(b) Twelve months of training in clinical child neurology completed in a program accredited by the ACGME or by the RCPSC.
A maximum of 3 months of child neurology training obtained during a neurology residency may be applied toward the required 12 months of child neurology training only if the 3 months was accomplished in an ACGME-approved child neurology program or a child neurology program accredited by the RCPSC. The Neurology program director must document that this training was accomplished in an ACGME-approved child neurology program or a child neurology program accredited by the RCPSC.
Candidates will be required to request and submit a new completed Part 7 application and a $595 processing fee. Such candidates will not be required to retake the Part 1 examination in neurology. The Part II examination fee will be requested after the application has been approved. Two 1-hour examinations in child neurology will be taken during the Part II examination.

3. Dual Certification in Child and Adolescent Psychiatry and in Neurology with Special Qualification in Child Neurology
An applicant who wishes to obtain certificates both in child and adolescent psychiatry and in neurology with special qualification in child neurology must meet the following requirements:
(a) Certification by the Board in the specialty of general psychiatry prior to applying for examination in child and adolescent psychiatry (a minimum of 2 years of approved residency training in general psychiatry is required), and
(b) Completion of the requirements for certification in neurology with special qualification in child neurology.

B. Triple-Board Requirements
The ABP, the ABPN, and the Committee on Certification in Child and Adolescent Psychiatry of the ABPN have developed a committee that is overseeing training via a different format in six programs. This is a 5-year curriculum with 24 months of pediatrics, 18 months of adult psychiatry, and 6 months of child and adolescent psychiatry. Completion of the program will satisfy the training requirements for certification in all three areas. Physicians pursuing training in one of these six programs may not apply for examination until all training has been completed. The six approved programs are: Albert Einstein College of Medicine, Brown University, Mount Sinai School of Medicine, Tufts University School of Medicine, the University of Kentucky, and the University of Utah. For further information please contact the ABPN.

C. Combined Training Leading to Certification by Two Boards
The approved combined training programs are listed in the Graduate Medical Education Directory or a listing may be obtained by writing the ABPN. The Board currently has the following programs:

1. Dual Certification in Psychiatry/Internal Medicine
The ABPN and the ABIM have approved programs for combined psychiatry/internal medicine residency training.

2. Dual Certification in Neurology/Internal Medicine
The ABPN and the ABIM have approved programs for combined neurology/internal medicine residency training.

3. Dual Certification in Neurology/Physical Medicine and Rehabilitation
The ABPN and the American Board of Physical Medicine and Rehabilitation have approved programs for combined neurology/physical medicine and rehabilitation residency training.

Appendix A
Satisfaction of the following training requirements for residency is mandatory for physicians entering training programs on or after July 1, 1977, and before July 1, 1987, for neurology.
Two patterns of training are acceptable
A. Three-Year Training Following a First Postgraduate Year. Prior to entering an approved 3-year training program in Neurology a physician must have completed 1 year of approved training after receiving the degree of Doctor of Medicine or Doctor of Osteopathy. This year of clinical experience should emphasize internal medicine, pediatrics, or family practice. The following programs would be acceptable
The Categorical First Year, Categorical First Year, and the Flexible First Year are in accord with those defined by the Department of Graduate Medical Education. American Medical Association. These were in effect from 1977 through 1981. Effective July 1982, ACGME-approved first postgraduate year training programs include only Categorical First Year, Categorical First Year, and Transitional Programs.
1. Categorical First Year: These are first-year programs planned, sponsored, and conducted by a single, approved residency program as part of that residency. The context of such a first year will be limited to the specialty field of the sponsoring residency program.
   The Categorical First Year (beginning after 1977 and before 1986 for neurology candidates) must be completed in internal medicine, family practice, pediatrics, surgery, or obstetrics and gynecology.
2. Categorical First Year: The asterisk designates a first-year program that was planned, sponsored, and supervised by a single, approved residency program as part of that residency's program of graduate medical education, the content of which was not limited to the single specialty of the sponsoring residency program but may have included experience in two or more specialty fields.
   The Categorical First Year in neurology must have included at least 4 months with direct patient care responsibility in internal medicine, family practice, pediatrics, or psychiatry.
3. Flexible First Year: The first year will be sponsored by two or more approved residencies and will be jointly planned and supervised by the residencies that sponsor it. The content of a flexible first year must include 4 months of internal medicine, but the remainder of the year may be designed in accordance with the purposes of the two or more sponsoring residency programs, and the interests and needs of the students.
4. Transitional Programs: Transitional programs are provided for physicians who desire in their first or later graduate year an experience in several specialties prior to embarking on further training in a single specialty. The criteria for a Transitional Year are outlined in the Graduate Medical Education Directory, published by the American Medical Association.

B. Four-Year Training Programs:
A neurology residency program approved by the ACGME for 4 years of training would be acceptable.
2. Applicants with Non-US, Non-Canadian Training.

The following criteria pertain to all applicants whose residency training was undertaken at a center located outside the United States or Canada prior to July 1, 1985. The applicant must possess an unlimited license to practice medicine in a state, commonwealth, or territory of the United States, or province of Canada.

A. Applicants from the United Kingdom

For each year of residency training completed in an approved hospital program in neurology in the United Kingdom, 1 year of training credit will be given toward eligibility for examination by the Board in neurology. The hospital program must be among those approved by the Visiting Inspection Specialty Committee in Neurology of the Royal College of Physicians.

In order to obtain credit for 2 or 3 years of approved training in the United Kingdom, at least 2 years of the training must be spent at the same training center in neurology.

The applicant will be responsible for sending the details of his or her training to the Board office, along with verification of this training from the approved hospital or hospitals in the United Kingdom. The applicant's program director must certify that the applicant was engaged in full-time residency training. Credit for approved residency training in the United Kingdom will be given only for training begun on or after July 1, 1976. Applicants who have completed residency training in the United Kingdom prior to July 1, 1976, must meet the criteria outlined in the section Applicants with Non-US, Non-Canadian, or Non-UK Training, listed below.

B. Applicants with Non-US, Non-Canadian, or Non-UK Training

The following criteria pertain to all applicants whose residency training was undertaken at a center located outside the United States, Canada, or the United Kingdom (with the exception of applicants who completed residency training in the United Kingdom prior to July 1, 1976).

1. The candidate must have had full-time specialty training in a manner equivalent in length of time and content to that required for US training.

2. The candidate must successfully complete a comparable national certification examination in the country of training in the specialty in which the physician is seeking admission to examination, and

3. The candidate must have achieved certification within the past 7 years. If certification was achieved earlier, then the candidate must have had 1 year of clinical practice in a setting in which his or her professional work has been observed by at least two ABPN diplomates in that specialty and documented by two letters of sponsorship from such diplomates.

The only certifications recognized by the Board as clearly equivalent are

1. MRCP (Member of the Royal College of Physicians)
2. MRACP (Member of the Royal Australian College of Physicians)
3. Certification by the RCPSC

American Board of Radiology

M Paul Capp, MD, Executive Director, Tucson, Arizona
Kenneth L Krabbenhoft, MD, Associate Executive Director, Pleasant Ridge, Michigan
Robert E Campbell, MD, Assistant Executive Director for Diagnostic Radiology, Philadelphia, Pennsylvania

Lawrence W Davis, MD, Assistant Executive Director for Radiation Oncology, Atlanta, Georgia
C Douglas Maynard, MD, President, Winston-Salem, North Carolina
Lester J Peters, MD, Vice President, Houston, Texas
William J Casarella, MD, Secretary-Treasurer, Atlanta, Georgia
David G Bragg, MD, Salt Lake City, Utah
Edward L Chasey, PhD, Chapel Hill, North Carolina
Gerald D Dodd, MD, Houston, Texas
Sarah S Donaldson, MD, Stanford, California
Milton Elkin, MD, Bronx, New York
Thomas S Harle, MD, Houston, Texas
David H Hussey, MD, Iowa City, Iowa
George E Leopold, MD, San Diego, California
Rodney B Millon, MD, Gainesville, Florida
Carlos A Perez, MD, St Louis, Missouri
Andrew K Poznanski, MD, Chicago, Illinois
Helen C Redman, MD, Dallas, Texas
Lee F Rogers, MD, Chicago, Illinois
Joseph F Sackett, MD, Madison, Wisconsin
Isaac Sanders, MD, Los Angeles, California
Melwyn H Schreiber, MD, Galveston, Texas
James E Youker, MD, Milwaukee, Wisconsin

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Radiology to ascertain whether the information below is current.)

Certificates

A certificate will be issued to each candidate who has finished a prescribed and approved period of training and study and has passed a written and oral examination demonstrating an adequate level of knowledge and ability in diagnostic radiology and/or diagnostic radiology with special competence in nuclear radiology, or radiation oncology in accordance with the definitions as stated in the Bylaws and Rules and Regulations of the American Board of Radiology (ABBR).

A certificate granted by the Board does not of itself confer, nor purport to confer, any degree or legal qualifications, privileges, or license to practice radiology.

Definitions

1. Diagnostic radiology is that branch of radiology that deals with the utilization of all modalities of radiant energy in medical diagnosis and therapeutic procedures utilizing radiologic guidance. This includes, but is not restricted to, imaging techniques and methodologies utilizing radiations emitted by x-ray tubes, radionuclides, ultrasonographic devices, and radio-frequency electromagnetic radiation emitted by atoms.

2. Nuclear radiology is that branch of radiology that involves the analysis and imaging of radionuclides and radionuclide substances for diagnostic imaging and related in vivo techniques.

3. Radiation oncology is that branch of radiology that deals with the therapeutic applications of radiant energy and its modifiers, and the study and management of cancer and other diseases.

Certificates of Added Qualifications

A certificate will be issued to each diplomate certified in either radiology or diagnostic radiology who has finished a prescribed and approved period of training and study, and has passed an oral examination demonstrating an adequate level of knowledge and ability in the area of expertise for which he or she has applied in accordance with the definitions stated in the Bylaws and Rules and Regulations of the American Board of Radiology.
Certification Requirements

Definitions
1. Pediatric radiology is the branch of radiology dealing with children.
2. Vascular and interventional radiology is the branch of radiology involved with the diagnosis and treatment of diseases using percutaneous methods guided by various radiologic imaging modalities.

Qualifications of Applicants for Certification by the American Board of Radiology
Each applicant for admission to an examination for a certificate to be issued by the ABR in diagnostic radiology, diagnostic radiology with special competence in nuclear radiology, and/or radiation oncology shall be required to present evidence satisfactory to the Board that the applicant has met the following standards
1. General Qualifications: That the applicant is a specialist in diagnostic radiology, diagnostic radiology with special competence in nuclear radiology, and/or radiation oncology as outlined in Article II, Section 2, of the Rules and Regulations, and is recognized by his/her peers to have high moral and ethical standards in his/her profession.
2. General Professional Education: Graduation from a medical school accredited at the date of graduation by the Liaison Committee on Medical Education of the American Medical Association, or the Royal College of Physicians and Surgeons of Canada, or from a College of Osteopathic Medicine approved by the American Osteopathic Association. If the applicant is a graduate of a medical school outside the United States or Canada, the applicant must be screened with approval by an agency approved by the Board of Trustees.
3. Special Training: This period of special training shall be as the Board of Trustees, by resolution or motion, shall determine from time to time. Effective for candidates beginning their training July 1, 1981, and thereafter, the Board of Trustees shall require a written statement from the program director, attesting that the applicant will have satisfactorily completed the prescribed special training at the time of the written examination and is prepared to take that examination.
4. In special instances these requirements may be modified by majority vote of the entire Board of Trustees, or by the executive committee acting in its stead.
5. If the program director fails to indicate in writing that the applicant is adequately trained and prepared for the examination, documentation of the reason(s) must be submitted along with evidence that the candidate has been appropriately apprised of his/her deficiencies. The executive committee of the Board will notify the applicant in writing that an appeals mechanism exists, as outlined in paragraphs 6 and 7 below.
6. In utilizing the appeals mechanism, the applicant must provide the executive committee of the Board with the written statement describing the reasons that he/she believes will support his/her appeal. The executive committee may ask the program director to submit a written response to the applicant’s appeal.
7. The executive committee must reach a final decision with the least possible delay in order that the applicant who wins his/her appeal does not lose the opportunity to be accepted for the examination for which he/she has applied.

Diagnostic Radiology
Candidates beginning their training in diagnostic radiology after June 30, 1984, will be required to have 4 years of approved postgraduate training in a department approved to train in diagnostic radiology by the Residency Review Committee for Radiology representing the ABR, the American College of Radiology, and the Council on Medical Education of the American Medical Association and accredited by the Accreditation Council for Graduate Medical Education (ACGME), exclusive of an internship or clinical year (if the latter is required by the program director). A minimum of 6 months, but not more than 12 months, must be spent in nuclear radiology in the 4-year program. Candidates may spend no more than 8 months in rotations outside the parent institutions.

Residents must have basic cardiac life support certification; advanced cardiac life support certification is encouraged. It is not the intent of the ABR for programs to use any of the 4 years for traditional fellowship training.

Effective for residents beginning their training July 1, 1991:
In a 4-year approved residency program, not more than 12 months shall be spent in a single discipline (research is considered a discipline).

The designation of “fellowship” is reserved for training beyond the 4-year residency.

In a 4-year program, the resident is expected to remain in that program for all 4 years. If a transfer to another program is necessary or desired, that transfer must have the agreement of both program directors and the prospective notification to, and approval of, the ABR.
Candidates will be considered for the written examination when they have completed 36 of the required 48 months of approved training, or if they will complete this amount by September 30 of the year in which the examination is given.
A maximum of 3 months may be spent in radiation oncology (therapeutic radiology).

Candidates beginning their graduate medical education after January 1, 1997, will be required to have 5 years of approved training with a minimum of 4 years in diagnostic radiology. The other year must be accredited clinical training in internal medicine, pediatrics, surgery or surgical specialties, obstetrics and gynecology, neurology, family practice, emergency medicine, or any combination of these. This clinical year will usually be the first postgraduate year. No more than a total of 3 months may be spent in radiology and/or pathology. All clinical training must be in an ACGME, American Osteopathic Association, or equivalent approved program.

Diagnostic Radiology With Special Competence in Nuclear Radiology
The ABR will give a special examination leading to a certificate in diagnostic radiology with special competence in nuclear radiology to those diplomates in radiology, roentgenology, diagnostic radiology, or diagnostic radiology who have fulfilled the requirement of 1 full year of formal training in nuclear radiology in an approved department of diagnostic radiology, nuclear medicine, or diagnostic radiology with special competence in nuclear radiology. This examination will consist of three examiners. The categories to be covered are: (1) bone, bone marrow, genitourinary tract, tumor, and absence localization; (2) central nervous system, endocrinology, gastrointestinal tract, hepatobiliary tract, and spleen; and (3) cardiovascular systems.
Candidates applying for certification in diagnostic radiology with special competence in nuclear radiology in 1991 must first be certified in diagnostic radiology. They must have a minimum of 12 months of approved training in nuclear radiology. No credit will be given for any training obtained during the 4 years of diagnostic radiology residency after July 1, 1994.

Radiation Oncology
Candidates beginning their training in radiation oncology after June 30, 1976, and who have not had an approved internship, will be required to have 4 years of approved postgraduate training.
Three of these years must be spent in a department approved to train in radiation oncology by the Residency Review Committee for Radiology representing the ABR, the American College of Radiology, and the American Medical Association Council on Medical Education and accredited by the ACGME. The other (PG-1) year may be spent in one of the following programs: internal medicine, surgery, pediatrics, family practice, obstetrics and gynecology, flexible, transitional, or categorical radiation oncology. No credit will be allowed for a foreign internship.

The 3-year residency training period must include training in pathology and training in the therapeutic aspects of nuclear medicine. Credit may not exceed 3 months for time spent in either subject. A maximum of 3 months' training in diagnostic radiology will be allowed.

Candidates in this category will be eligible for the written examination when they have completed the required 48 months of approved training, or if they will complete this amount by September 30 of the year in which the examination is given.

Effective in 1995, successful candidates will be issued a 10-year time-limited certificate in radiation oncology.

**Application and Fee**

Application for examination must be made in exact duplicate (two original copies on prescribed forms that may be obtained from the secretary). No photocopy or any other kind of copy will be accepted. The data summary form enclosed with the application is an integral part that must be completed. These forms shall be forwarded with the required data, three unmounted photographs autographed on the front, and the current application fee (US currency) by the deadline established for filing. A certified check or money order is required to be made payable to the American Board of Radiology, Inc. Applications for the written examination to be given in any year will not be accepted prior to July 1 of the preceding year and must be filed no later than the deadline of September 30 of the preceding year. The application fee will cover both the written and the oral examinations, provided the candidate is successful on his/her first attempt in both the written and oral examinations.

Incomplete applications will not be accepted. The postmark affixed to the last item received to complete the application must be on or before the deadline date.

All applications must be typed or neatly printed (in ink).

In the event of withdrawal of an application, only a portion of the fee can be refunded.

Beginning July 1, 1981:

A candidate will have three consecutive opportunities to pass the written examination, beginning with the written examination for which he/she is first declared admissible. If a candidate fails to accomplish this, he/she must submit a new application and the fee in effect at that time. Failure to accept an appointment, cancellation of an appointment, or failure to appear for a scheduled written examination will be regarded as one of the three opportunities.

A candidate who fails the written examination after three attempts must submit a new application together with the fee in effect at that time.

A candidate who has passed the written examination will have three consecutive opportunities to appear for and pass the oral examination, beginning with the oral examination for which he/she is first declared admissible. If a candidate fails to accomplish this, he/she must submit a new application and the fee in effect at that time and reinitiate the examination process, including the written examination. Failure to accept an appointment, cancellation of an appointment, or failure to appear for a scheduled oral examination will be regarded as one of the three opportunities.

A candidate who finds it necessary for any reason to cancel after acceptance of an appointment for either the written or oral examination shall be required to submit an additional fee. This amount represents administrative costs to the Board. A candidate who fails to appear for an examination without notifying the office of the ABR at least 20 days prior to the first date of the examination will be charged the full application fee in existence at the time of payment. (Under certain circumstances, the ABR, entirely at its discretion, may excuse such a candidate from this penalty; provided the reason for such absence is substantiated in writing.)

**Objectives of the Written Examination**

In 1965 it became apparent to the Board of Trustees of the ABR that the then-current oral examination could not cover the entire burgeoning field of radiology without the addition of more segments and, in turn, more examiners. This would not only impose a further burden on candidates but also on the Board itself. It was decided, therefore, to search for other methods of examination. At that time, it was agreed to adopt a written examination to be given annually as a prerequisite for the oral examination. The content of the examination will include the basic sciences of anatomy, pathology, physiology, and pharmacology as these subjects relate to clinical practice. Also to be included are radiological techniques, radiological physics, and radiation biology.

The content of the examination in radiation oncology will include the basic sciences of physics, radiation biology, and clinical oncology as well as anatomy, pathology, physiology, and chemotherapy as these subjects relate to the clinical practice of radiation oncology.

A pool of multiple-choice questions was developed, and the first examination was given in 1969 to all candidates seeking certification in diagnostic radiology and in radiation oncology.

**Content of Written Examination in Each Field**

Each examination consists of between 320 and 375 multiple-choice questions, to be administered over a period of approximately 8 hours. About one half of the questions are distributed on the afternoon of one day, and the other half distributed on the morning of the following day.

New written examinations are formulated each year in all categories of radiology, and the content of the examinations is carefully evaluated in order to keep pace with new information and developments. Even the number of questions in each category may be changed as necessity dictates from year to year.

Beginning in 1987, a candidate who passes the diagnostic portion but fails physics must repeat the physics portion and pass before admission to the oral examination.

Beginning in 1989, a candidate who takes the written examination in diagnostic radiology and fails the diagnostic portion but passes physics must repeat the diagnostic portion but will not be required to repeat physics.

Beginning in 1986, a candidate who takes the written examination in radiation oncology and passes the clinical portion but fails either physics or radiation biology must repeat only the portion which he/she failed. Those candidates who fail the physics and the radiation biology portions of the examination or the clinical oncology portion of the examination must repeat the entire examination.

Candidates in diagnostic radiology may expect to be asked questions on magnetic resonance imaging in the written and oral examinations.

**Oral Examination**

Oral examinations are given at a time designated by the Board of Trustees. At the present time, the oral examinations are conducted yearly in May and/or June.
Admissibility to the oral examination is determined by the executive committee. Experience has shown that to delay taking the oral examination does not benefit the candidate. No recording device of any kind may be brought to the examination.

**Content of Oral Examination for Diagnostic Radiology**

The categories to be covered are: bones and joints, chest, gastrointestinal tract, genitourinary tract, neuroradiology, cardiovascular radiology, nuclear radiology, ultrasonography, pediatric radiology, and breast radiology. Questions may be asked on interventional techniques and magnetic resonance imaging.

**Content of Oral Examination for Radiation Oncology**

Effective in 1993, candidates applying for examination in radiation oncology will be examined for a period of 30 minutes each by eight examiners. The subject matter of this examination concerns the clinical management of malignant disease and is usually presented according to the anatomical site of the primary tumor. The anatomical sites are divided into the following eight categories: gastrointestinal malignancies, gynecologic malignancies, genitourinary malignancies, diseases of the reticuloendothelial system, head, neck, and skin; breast; central nervous system and pediatric malignancies; and lung and mediastinum, soft tissue, and bone.

Brachytherapy techniques and the effect of radiation on normal tissue may be included in all categories.

**Reexaminations**

**Failures**

A candidate who fails or conditions the oral examination in diagnostic radiology or in radiation oncology may be scheduled for reexamination. The reexamination fee in effect at that time must be submitted by certified check or money order.

Candidates in diagnostic radiology who have conditioned one, two, or three categories in the oral examination will be reexamined by two examiners in each conditioned category. Candidates in radiation oncology who have conditioned one or two categories in the oral examination will be reexamined by two examiners in each conditioned category. Candidates must pass the reexamination by both examiners in each category to remove the condition.

Effective July 1, 1981, a candidate who has failed the oral examination three times must start the examination procedure from the beginning with the submission of a new application, pay the fee in effect at that time and retake the entire written examination.

**Status of a Physician**

The Board will reply to an inquiry concerning the status of a physician with one of the following statements:

1. The physician is Board certified.
2. The physician is in the examination process.
3. The physician is neither certified nor in the examination process.

Note: No official status of "Board qualified" or "Board eligible" is recognized by the Board.

**Final Action of the Board**

The final action of the Board is based on the applicant's professional record, training, and attainment in the field of diagnostic radiology, diagnostic radiology with special competence in nuclear radiology, or in radiation oncology, as well as on the results of his examination. This Board has been organized to assist qualified radiologists to become recognized in their communities as men and women competent to practice diagnostic radiology, diagnostic radiology with special competence in nuclear radiology, or radiation oncology.

**Revocation of Certificates**

Certificates issued by this Board are subject to the provisions of Articles of Incorporation and the Bylaws. According to Article IX, Section 4, of the Bylaws, any certificate issued by the Board of Trustees shall be subject to revocation in the event that:

1. The issuance of such certificate, or its receipt by the individual so certified, shall have been contrary to, or in violation of, any provision of the Certificate of Incorporation of this, the American Board of Radiology, or of these Bylaws or rules and regulations adopted by the Board of Trustees; or
2. The individual so certified shall not have been eligible in fact to receive such certificate; or
3. The individual so certified shall have made any misstatement of fact in the application, or in any other communication, to the corporation or its representatives; or
4. The individual so certified shall have been convicted by a court of competent jurisdiction of a felony or of any misdemeanor involving, in the opinion of the Board of Trustees, moral turpitude; or
5. The license to practice medicine of the individual so certified shall be revoked.

Before any such certificate shall be revoked, a notice shall be sent by registered or certified mail to the last known address of the holder of such certificate, as it appears on the records of this corporation, setting forth the act, omission, or conduct alleged or complained of, and giving the holder of such certificate a reasonable opportunity to answer in writing thereto. Such certificate holder shall have not less than 30 days in which to reply thereto. The Board of Trustees may, at its discretion, make such further investigation as it deems necessary and proper.

The Board of Trustees of this corporation shall have the sole power, jurisdiction, and right to determine and decide whether the evidence or information before it is sufficient to constitute one of the grounds for revocation of any certificate issued by this corporation, and the decision of such Board of Trustees in the premise shall be final.

(The material which follows is revised annually. All applicants are advised to consult the American Board of Surgery to obtain current information.)

Specialty of Surgery (General Surgery) Defined
The Board interprets the term "general surgery" in a comprehensive but specific manner, as a discipline having a central core of knowledge embracing anatomy, physiology, chemistry, immunology, nutrition, pathology, wound healing, shock and resuscitation, intensive care, and neoplasia, which are common to all surgical specialties.

The general surgeon is one who has specialized knowledge and skill relating to the diagnosis and the preoperative, operative, and postoperative management in the following areas of primary responsibility:
1. Alimentary tract
2. Abdomen and its contents
3. Breast, skin and soft tissue
4. Head and neck, including trauma; vascular, endocrine, congenital and oncologic disorders, particularly tumors of the skin, salivary glands, thyroid, parathyroid, and the oral cavity
5. Vascular system, excluding the intracranial vessels, the heart, and those vessels intrinsic and immediately adjacent thereto
6. Endocrine system
7. Surgical oncology, including coordinated multimodality management of the cancer patient by screening, surveillance, surgical adjuvant therapy, rehabilitation, and follow-up
8. Comprehensive management of trauma, including musculoskeletal, hand, and head injuries; the responsibility for all phases of care of the injured patient is an essential component of general surgery
9. Complete care of critically ill patients with underlying surgical conditions, in the emergency room, intensive care unit, and trauma/burn units

Additionally, the general surgeon is expected to have significant preoperative, operative, and postoperative experience in pediatric, plastic, general thoracic, and transplant surgery. Also, the surgeon must have understanding of the management of the more common problems in cardiac, genitourinary, neurologic, orthopedic, and urologic surgery, and of the administration of anesthetists.

The general surgeon must be capable of employing endoscopic techniques, particularly proctosigmoidoscoppy and operative cholecystectomy, and must have experience with a variety of other endoscopic techniques such as laryngoscopy, bronchoscopy, esophagogastroduodenoscopy, colonoscopy, and laparoscopy. The general surgeon should have opportunity to gain knowledge and experience of evolving technological methods, eg, laser applications and endoscopic operations.

Meaning of Certification
The Board considers certification to be based upon a process that includes the educational and evaluation phases and an examination phase. It holds that undergraduate and graduate education are of the utmost importance and requires the program director's endorsement, testifying that the applicant has had an appropriate educational experience and has attained a sufficiently high level of knowledge, judgment, and skills to be prepared for designation by the Board's certificate as a specialist in surgery, upon successful completion of the examinations, and to enter into independent practice of the specialty.

Graduate Education in Surgery
I. General Information
The purpose of graduate education in surgery is to provide the opportunity to acquire a broad understanding of human biology as it relates to disorders of a surgical nature and the technical knowledge and skills appropriate to be applied by a specialist in surgery. This goal can best be attained by means of a progressively graded curriculum of study and clinical experience under guidance and supervision of senior surgeons, which provides progression through succeeding stages of responsibility for patient care up to the final one of complete management. Major operative experience and senior/chief responsibility at the final stage of the program are essential components of surgical education. The Board will not accept into the process of certification anyone who has not had such an experience in the specialty of surgery, as previously defined, regardless of the number of years spent in educational programs.

The graduate educational requirements set forth on these pages are considered to be the minimal requirements of the Board and should not be interpreted to be restrictive in nature. The Board recognizes that the time required for the total educational process should be sufficient to provide adequate clinical experience for the development of sound surgical judgment and adequate technical skill. These requirements do not preclude additional desirable educational experience, and program directors are encouraged to retain residents in a program as long as is required to achieve the necessary level of qualifications.

The integration of basic sciences with clinical experience is considered to be superior to formal courses in such subjects. Accordingly, while recognizing the value of formal courses in the study of surgery and the basic sciences at approved graduate schools of medicine, the Board will not accept such courses in lieu of any part of the required clinical years of surgical education.

The Board may at its discretion require that a member of the Board or a designated diplomate observe and report upon the clinical performance of an applicant before establishing admittance to examination or awarding certification.

While a program may develop its own vacation, illness, and other leave policies for the resident, 1 year of approved residency toward the Board's requirements must be 52 weeks in duration and must include at least 48 weeks of full-time surgical experience. Furthermore, unused vacation and other leave time may not be accumulated to reduce the overall duration of residency expected by the Board.

All phases of the graduate educational process must be completed in a manner satisfactory to the Board.
II. Acceptable Programs

The residency programs in surgery in the United States that are reviewed and approved by the Residency Review Committee for surgery and the Accreditation Council for Graduate Medical Education (ACGME) are acceptable to the Board as an adequate educational experience.

In Canada, those university residency programs in surgery that are accredited by the Royal College of Physicians and Surgeons offer acceptable educational experience. Applicants from such programs must meet the Board’s specific requirements and cannot receive credit for postgraduate surgical education in countries other than the United States or Canada.

Except as mentioned above, participation in postgraduate surgical education programs in countries other than the United States is not creditable toward the Board’s educational requirements unless under the specific conditions set forth in the section Credit for Foreign Graduate Education.

Listings of accredited programs in the United States may be found in the Graduate Medical Education Directory, published annually by the American Medical Association under the aegis of the ACGME.

Requirements for Certification in Surgery

I. General

A. Must have demonstrated to the satisfaction of the authorities of one’s graduate educational program in surgery, to one’s peers, and to the Board, that one has attained the level of qualifications in surgery required by the Board.

B. Must have a moral and ethical standing satisfactory to the Board and in conformity with the Standards on Principles of the American College of Surgeons and its interpretations.

C. Must be actively engaged in the practice of surgery as indicated by holding admitting privileges to a surgical service in an accredited hospital, or be currently engaged in pursuing additional graduate education in a component of surgery or one of the other recognized surgical specialties.

D. Must have a currently registered and unrestricted license to practice medicine granted by a state, or other United States jurisdiction, or by a Canadian province. The license must be valid no later than 6 months following completion of the residency in surgery. A temporary limited license, such as an educational, institutional, or house staff permit, is not acceptable to the Board.

II. Educational

A. Undergraduate Medical Education

1. Must have graduated from an accredited school of allopathic or osteopathic medicine in the United States or Canada.

2. Graduates of schools of medicine from countries other than the United States and Canada must present evidence of final certification by the Educational Commission for Foreign Medical Graduates (ECFMG).

B. Graduate Education in Surgery

1. Must have satisfactorily completed a minimum of 5 years of progressive education, following graduation from medical school, in a program in surgery accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada.

2. Must have completed all phases of graduate education in surgery in a program in surgery accredited by the ACGME. Experience obtained in accredited programs in other recognized specialties, although containing some exposure to surgery, is not acceptable. A flexible or transitional first year is not creditable toward the Board’s requirements as a PGY-1 unless it is accomplished in an institution having an accredited program in surgery and at least 6 months of the year is spent in surgical disciplines.

3. Must have, in a program accredited for a minimum of 5 years, at least 4 years of clinical surgical experience with progressively increasing levels of responsibility. There must be no less than 36 months devoted to the primary components of surgery (general surgery) as previously defined. The entire chief resident experience must be devoted to the primary components of the specialty of surgery. No more than 4 months of the chief residency may be devoted to any one of the primary components of surgery. During junior years, a total of 6 months may be assigned to nonsurgical disciplines such as medicine, gastroenterology, or pediatrics. Training in surgical pathology and endoscopy is considered to be surgical, but obstetrics and ophthalmology are not. No more than a total of 12 months during junior years may be allocated in any one surgical specialty other than general surgery. One year of the minimal five may be spent in laboratory research.

4. Must have 12 months in the capacity of chief resident in general surgery. The Board considers the terms chief resident and senior resident to be synonymous and to mean the 12 months in the program in which the resident assumes the ultimate clinical responsibilities for patient care under the supervision of the teaching staff. The majority of the 12 months of chief residency must be served in the final year. However, to take advantage of a unique educational opportunity in a program during a resident’s final year, a portion of the chief residency may be served in the next to the last year, provided it is no earlier than the fourth clinical year and has been approved by the Residency Review Committee for Surgery followed by notification to the Board. The chief residency must be spent only in the parent or an integrated institution unless rotation to an affiliated institution has been approved by the Residency Review Committee for Surgery.

5. The Board expects a residency year to include no less than 48 weeks of full-time surgical training.

6. All phases of the graduate educational process must be in accordance with the Special Requirements for Residency Training in General Surgery as promulgated by the ACGME and approved by the Residency Review Committee for Surgery.

7. The Board believes that for optimal surgical education the resident should spend at least the final 2 residency years in the same program.

III. Operative Experience

Applicants for examination must meet the criteria established by the RRC, ie, a minimum of 500 procedures in the chief/senior year. This must include operative experience in each of the areas of primary responsibility included in the definition of surgery (general surgery) set forth previously.

Each applicant must submit a tabulation of the operative procedures performed as surgeon and those performed as first assistant or teaching assistant. The Board provides an operative experience form for this purpose when application material is obtained by the applicant. The resident’s record form, available to program directors for residents’ use through the Residency Review Committee for Surgery, may be submitted in lieu of the Board’s operative experience form.

In tabulating cases toward Board requirements, credit may be claimed “as surgeon” when the resident has actively participated in the patient’s care; has made or confirmed the diagnosis; has participated in selection of the appropriate operative procedure; has either performed or been responsibly involved in performing the critical portions of the operative procedure; and has been a responsible participant in both pre- and postoperative care.
Credit may be claimed as a “teaching assistant” only when the resident has actually been at the table, scrubbed, and has guided a more junior resident through at least the critical parts of an operation. All this must be accomplished under the supervision of the responsible member of the senior staff.

An individual cannot claim credit as both “surgeon” and as “teaching assistant.”

Applicants must also list the number of patients with multiple organ trauma and with critical surgical problems for whom they had primary management responsibility but operation was not required. Failure to submit a complete and properly authenticated list of operative procedures will constitute an incomplete application.

Applicants are advised to keep a copy of the lists of operative work they submit for their records, as the Board cannot furnish copies.

IV. Special Information for Program Directors

A. Program directors are cautioned that appointment of residents at advanced levels without being certain that their previous training is in accordance with the Board’s requirements may result in the affected residents not being accepted by the Board upon completion of the program. In any case in which there is question, program directors should make inquiry of the Board prior to taking action.

B. According to the Special Requirements for Residency Training in General Surgery promulgated by the ACGME, special approval of the Residency Review Committee for Surgery must be obtained (1) if a chief resident is assigned to an institution other than the parent one or an “integrated” one; (2) if rotations to any one approved “affiliate” exceed 6 months; (3) if more than 1 year of the total program is spent away from the parent and integrated institutions; or (4) if more than 6 months’ total is spent in any assignment outside the parent, the integrated, or approved affiliated institutions. The Board concurs in this and deviations from these stipulations will be considered unacceptable training.

C. Since the Residency Review Committee does not act upon the adequacy of postgraduate surgical education outside the United States, program directors must request the Board’s approval, in advance, if they wish periods of training abroad to be creditable toward the Board’s requirements. The Board will rule on individual requests.

Credit for Military Service

Credit will not be granted toward the minimum requirements of the Board for service in the armed forces, the Public Health Service, the National Institutes of Health, or other governmental agencies unless the service was as a duly appointed resident in an accredited program in surgery.

Credit for Foreign Graduate Education

Acceptance for examination and certification by the American Board of Surgery is based upon satisfactory completion of the stated requirements in accredited residency programs in surgery in the United States. Regardless of an individual’s professional attainments here or abroad, no credit will be granted directly to an applicant for surgical education in a foreign country. The Board will consider granting partial credit only upon the request of the program director of an accredited program who has observed the applicant as a junior resident for 9 to 12 months and wishes to advance the applicant to a higher level in that program. The credit granted will not be valid until the applicant has successfully completed that program. If the applicant moves to another program, the credit is not transferable and must again be requested by the new program director.

Applicants from accredited Canadian programs must have completed all of the requirements in the Canadian program or in combination with an accredited United States program. No credit for postgraduate surgical education outside the United States and Canada will be granted to those applicants seeking certification who completed a Canadian program. Applicants from Canadian programs must complete the Board’s stipulated requirements.

Requirements Governing Admissibility to Examinations for Certification in Surgery

1. An applicant is admissible to the examinations only when all of the preliminary and graduate educational requirements of the Board, currently in force at the time of receipt of the formal application, have been satisfactorily fulfilled; the operative experience has been reviewed and deemed acceptable; the general credentials are in order; the program director has certified to the Board in writing that the applicant has attained the required clinical skills; and the formal Application has been reviewed and approved. The applicant then must successfully complete the Qualifying Examination before becoming a candidate for certification and admissible to the Certifying Examination.

2. Applicants will be offered five opportunities for taking the Qualifying Examination within the 5-year period following approval of the formal Application, at centers designated by the Board in accord with their last recorded address. Applicants who do not take the Qualifying Examination within 2 years following approval of the application will no longer have any status with the Board and will not be considered for readmission to examination.

3. If Applicants are not successful in completing the Qualifying Examination within the stated admisibility period, the satisfactory completion of an additional year of residency in general surgery will be required in order to be considered for readmission to the Qualifying Examination under the same conditions as listed above. This must be in a general surgery program accredited by the ACGME and at an advanced level (not necessarily the senior/chief resident). The Board’s approval of the proposed experience must be secured in advance.

4. The Certifying Examination will be offered to those who have passed the Qualifying Examination and have thus become “candidates for certification,” at the earliest time consistent with the Board’s geographical examination schedule.

Candidates will be offered three, and only three, opportunities to appear for examination during the 5 academic years after completion of the Qualifying Examination. The admisibility expiration date shall be established as June 30 of the fifth calendar year after passing the Qualifying Examination. An opportunity offered that is refused or not taken will be counted as one of the three available.

After three opportunities (ie, failure at Certifying Examinations and/or opportunities refused including failure to appear for a scheduled examination), a candidate will no longer be admissible to examination, regardless of the original expiration date for admisibility. Satisfactory completion of at least 1 year of residency in general surgery at an advanced level in an accredited program, with a favorable endorsement to the Board from the program director, will be required before further consideration by the Board. This year must be approved in advance by the Board.

If the Board approves the candidate’s application for readmission to the Certifying Examination upon completion of the specified additional year of residency in general surgery, the candidate will then be offered three further opportunities within the ensuing 5 years. If not successful within that time, the candidate cannot again be considered until completion of a minimum
of 3 years of residency in general surgery, including a chief year, in an accredited program and favorable endorsement to the Board by the program director. The candidate must then reapply as a "new applicant." This necessitates submission of a reapplication for admission to examination and all supporting documents, payment of the established fees, and successful completion again of the Qualifying Examination before advancing to the status of "candidate for certification."

4. Those who, 10 years after approval of their original application or reapplication, have not become certified and who are not actively pursuing completion of the appropriate above-stated requirements applicable in each case will have their files destroyed. If they wish to reapply later they will be considered "new applicants" and must fulfill the requirements then in place.

5. The Board, on the basis of its judgment, may deny or grant an "applicant" or "candidate for certification" the privilege of examination whenever the facts in the case are deemed by the Board to so warrant. The Board does not use or sanction the terms "Board-eligible" or "Board-qualified." The standing of an individual with the Board varies according to the current status of credentials and will be so reported.

Special Certification

The Board has been authorized by the American Board of Medical Specialties to award certification of special or added qualifications in certain disciplines related to the overall specialty of surgery to those diplomates of this Board who meet the defined requirements. These disciplines include general vascular surgery, pediatric surgery, surgery of the hand, and surgical critical care.

The Board considers all of the above disciplines to be an integral part of the specialty of surgery and expects that all surgeons certified in surgery by this Board will be qualified to practice in these areas if they so desire and demonstrate the capability, even though they may not have obtained additional certification. The certificates of special or added qualifications are designed to recognize those diplomates who have acquired, through advanced education, experience, and other activities, qualifications in these disciplines beyond those expected of the well-trained general surgeon.

Those seeking the American Board of Surgery's certification of special or added qualifications must have a currently valid certificate in surgery issued by the Board; must have completed the required additional education in the discipline beyond that required for general certification; must have operative experience and/or patient care data acceptable to the Board; and must show evidence of dedication to the discipline by the means specified by the Board and receive favorable peer review by recognized diplomates in the particular discipline. Finally, successful completion of the prescribed examinations is required.

Those who are interested in obtaining information regarding certification in general vascular surgery, pediatric surgery, surgery of the hand, or surgical critical care may obtain it from the Board upon request.

Examinations Offered by the Board

The Board offers examinations leading to certification in surgery, general vascular surgery, pediatric surgery, surgery of the hand, and surgical critical care; also, in-training examinations in general surgery and in pediatric surgery.

The examinations for certification are offered to individuals, but the in-training examinations are offered to program directors for their use as an educational assessment of the individual resident's grasp of surgical fundamentals.

The Board notifies candidates for general and special certification of their performance on examinations. The Board also reports examinee performance to the director of the program in which the candidate completed the final year of residency. All reports pertaining to in-training examinations are provided only to program directors.

All examinations are developed by directors of the American Board of Surgery with contributions by invited examination consultants.

II. Examinations for Certification of Special or Added Qualifications

Examinations are held six times a year within the continental United States. Candidates for certification will receive an announcement of the examination to which they may be assigned, based on their geographic location, approximately 3 months prior to the examination session, with a reply card that must be returned at once if a candidate wishes to be included in that examination. Failure to return or late return of a card will result in that examination being counted as one of the three opportunities to be offered. If the Board cannot accommodate a candidate at that particular examination, it will not be counted as an opportunity. A candidate assigned to an examination will be sent an admission card indicating the specific time and place to report for examination.

The examinations are conducted by members of the American Board of Surgery and selected associate examiners who are diplomates of the Board and usually from the local geographic area.

The examinations consist of three oral sessions conducted by teams of two examiners each, directed toward determining the candidate's understanding of clinical entities, level of surgical judgment, and problem-solving ability. During all sessions, the ability to apply knowledge of anatomy, physiology, pathology, biochemistry, and bacteriology to clinical problems is also evaluated.
IIII. In-Training Examination
The Board offers annually to directors of accredited residency programs in surgery and in pediatric surgery written in-training examinations that are designed to measure the general level of knowledge attained by residents regarding the fundamentals of the basic sciences and management of clinical problems related to surgery and to pediatric surgery. The in-training examination in surgery is constructed to evaluate the knowledge of the resident who has completed 2 years of graduate education in surgery but, at the program director's discretion, may be administered to anyone. It is also designed to meet the first milestone required by the "Essentials" for residencies in general surgery. Directors of accredited programs in pediatric surgery should find the pediatric surgery in-training examination useful in the evaluation of all residents in their programs.

The Board will normally furnish pertinent information to the directors of all accredited programs in surgery and in pediatric surgery several months in advance of each year's examination and ascertain the number of test booklets desired. The examinations, administered by the participating program directors, take place each winter.

Program directors should take note of the fact that the Board does not contact each institution in which residents are located, but depends upon the director of the program to order an adequate number of test booklets for all residents in the total program, which includes not only the parent institution but also all those included under the program designation in the Graduate Medical Education Directory.

It is important to note that the in-training examinations are not offered to individuals, but only to program directors.

The in-training examinations are not required by the Board as part of the certification process.

The in-training examinations are prepared by the Board as a convenience to program directors, to be used as an assessment of residents' progress and not as a pool of questions for study or other purposes. Duplication and improper use of the examination materials defeats the purpose of the examinations and will not be tolerated by the Board. The examinations are protected under the copyright laws.

Application for Examination for Certification in Surgery
In the early spring, the Board will mail a booklet of information and a preliminary examination form to all residents who, according to the Board's records, will be expected to complete their residency that summer in surgery programs accredited by the ACGME. This form must be completed precisely and be received in the Board Office no later than May 1. Applicants should not submit documents, testimonials, letters of recommendation, case reports, or other information unless requested to do so by the Board.

If, after review of the information submitted on the preliminary examination form, it is determined by the Board that applicants have met, or will meet, the educational requirements for admission to examination in the past or current year, a formal application for admission to examination will be sent to the applicant.

The application for admission to examination must be completed and returned to be received in the Board Office by no later than July 15. An application is not considered to be complete unless the form is accompanied by all required documents, including a copy of the applicant's current registration of a valid and unrestricted state medical license, an identification form with a photograph attached, a completed American Board of Surgery operative experience list or a copy of the resident's record, and a check for $200.

If the completed application is received between July 15 and August 15, a late fee will be charged. No applications will be accepted after August 15.

Applicants who complete the educational requirements after September 30 will not be considered for admission to the Qualifying Examination in that year; but must wait until the following year.

The acceptability of an applicant does not depend solely upon the completion of an approved program of education, but also upon information available to the Board regarding professional maturity, surgical judgment, technical capabilities, and ethical standing.

Applicants who have submitted an application for examination form will be notified regarding admittance to examination.

Fees
Registration (prior to July 15)—US $200
(payable with application form and nonrefundable)
Registration (late—July 15 to August 15)—US $450
(payable with application form and nonrefundable)
Qualifying Examination—US $400
(payable with reply card)
Certifying Examination—US $600
(payable with reply card)
Fees for reexamination are the same as shown above for each examination.

Each fee for examination or reexamination includes a US $200 processing charge that is not refunded if an individual withdraws after being scheduled for an examination.

To withdraw, one must notify the Board Office at least 15 business days before a scheduled examination. Failure to appear for examination, or withdrawal without giving at least 15 business days' notice, will result in forfeiture of the entire fee for examination.

Fees are subject to change as directed by the Board.

The Board is a nonprofit organization. The directors of the Board, except those on the executive staff, serve without remuneration.

Issuance of Certificates
A candidate who has met all requirements and has successfully completed the examinations of the American Board of Surgery in one or another of the areas of certification will then be issued a certificate by this Board, signed by its officers, attesting to qualifications in that area.

The Board issues certificates in surgery, general vascular surgery, pediatric surgery, surgery of the hand, and surgical critical care. Those certified in surgery prior to December 31, 1975, were issued a certificate with no indication of time-limited validity. All certificates issued on or after January 1, 1976, bear a limiting date of 10 years, after which they are no longer valid.

Those whose certificates have expired and who have not achieved recertification will no longer be listed in the directory as diplomates in the discipline concerned.

Recertification
The American Board of Surgery offers recertification in surgery to its diplomates and in all the disciplines in which it offers certification of special or added qualifications. The Board considers recertification to be voluntary and the same connotation as is the original certification.

The purpose of recertification is to demonstrate to the profession and the public, through periodic evaluations, that the surgical specialist has maintained continuing qualifications on a currently acceptable level in the diplomate's chosen area of practice. The American Board of Surgery believes that such periodic evaluation of
ts diplomates is in their own interest as well as in the public interest.

A Diplomate can initiate the recertification process when certification has been held at least 7 years. Pamphlets outlining requirements for recertification in the various disciplines may be obtained from the Board upon request. To facilitate receiving the Board's mailings pertaining to the recertification process, it is important for all diplomates to notify the Board promptly whenever their addresses change.

Recertification in Special Disciplines

Recertification in special disciplines is offered to diplomates holding certificates in general vascular surgery, pediatric surgery, surgery of the hand, and surgical critical care.

Details concerning requirements for recertification in the disciplines mentioned above are similar to those for recertification in surgery, and pertinent pamphlets may be obtained from the Board upon request.

Inquiry as to Status

The Board considers an individual's record not to be in the public domain. When a written inquiry is received by the Board regarding an individual's status, a general but factual statement is provided that indicates the person's location within the examination process.

Special Situations

Irregularities

The furnishing of false information to the Board or examination irregularities may result in the rejection of an application, the barring of an applicant from examination, the denial or revocation of a certificate, or other appropriate sanctions, as set forth more fully in the application for admission to examination and the instructions to examinees.

Substance Abuse

Applicants with a history of substance abuse will not be admitted to any examination unless they present evidence satisfactory to the Board that they have successfully completed the program of treatment prescribed for their condition. Further, the Board must be satisfied that they are currently free of substance abuse.

Disabilities

The American Board of Thoracic Surgery complies with the Americans with Disabilities Act by making a reasonable effort to provide Board applicants who have documented disabilities with modifications in its examination process that are appropriate for such disabilities but that do not alter the measurement of the skills or knowledge that the examination process is intended to test. Any disability that an applicant believes requires such a modification in the Board's examination must be identified and documented by the applicant within 60 days after the applicant is notified of admisibility to examination or within 60 days after the applicant learns of such disability, whichever is later.

Reconsideration and Appeals

The Board has adopted a policy with regard to reconsideration and appeals of decisions adverse to applicants regarding their individual credentials and admisibility to the examinations and questions regarding the form, administration, and results of examinations. A copy of that policy is available from the Board office to anyone considering a request for reconsideration or an appeal. A request for reconsideration, which is the first step, must be made in writing to the Board office within 90 days of receipt of notice from the Board of the action in question.

Revocation of Certificate

Any certificate issued by the American Board of Surgery, Inc, shall be subject to revocation at any time that the directors shall determine, in their sole judgment, that a candidate who has received the certificate was in some respect not properly qualified to receive it.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Thoracic Surgery to ascertain whether the information below is current.)

General Requirements

Certification by the American Board of Thoracic Surgery may be achieved by fulfilling the following requirements:

1. Certification by the American Board of Surgery (for information, the applicant should see the current Booklet of Information available from the American Board of Surgery, 1617 John F Kennedy Blvd, Philadelphia, PA 19103);

2. Completion of a thoracic surgical residency, approved by the Residency Review Committee for Thoracic Surgery (RRC) that provides adequate education and operative experience in cardiovascular and general thoracic surgery;

3. An ethical standing in the profession and a moral status in the community that are acceptable to the Board;

Residency Requirements

Candidates must have fulfilled all of the residency requirements of the Board in force at the time their applications are received.
Candidates for certification must complete a minimum of 24 months of residency training in thoracic and cardiovascular surgery in a program approved by the Residency Review Committee for Thoracic Surgery. This must include 12 months of senior responsibility, which should be continuous. The director of the thoracic training program is required to approve the application form by signature, certifying that the candidate has satisfactorily completed the residency in thoracic surgery, of which the last 12 months consisted of senior responsibility.

Education and adequate operative experience in both general thoracic surgery and cardiovascular surgery are essential parts of any approved thoracic surgery residency program, irrespective of the area of thoracic surgery in which a candidate may choose to practice.

Operative Case Criteria

Effective for Candidates Applying in 1996

The operative experience requirement of the American Board of Thoracic Surgery has two parts. One has to do with the intensity or volume of cases, and the other has to do with the distribution of cases (index cases).

1. Surgical Volume (Intensity)

   The Board's operative experience requirements include an annual average of 125 major operations performed by each resident for each year that the program is approved by the Residency Review Committee for Thoracic Surgery. In a 2-year program, this requirement is met if a resident performs a total of 250 major cases over the course of his or her residency; in a 3-year program, the resident must perform 375 major cases.

   This guideline on intensity of cases conforms with the Special Requirements in Thoracic Surgery as published by the Accreditation Council for Graduate Medical Education and the Residency Review Committee for Thoracic Surgery.

   The application of any candidate whose supervised operative experience fails to meet the requirement of an annual average of 125 major operations with a minimal number of 100 in any one year will be referred to the Credentials Committee for review.

2. Index Cases (Distribution)

   The applications of candidates whose operative experience does not include the required number of index cases as listed below will be sent to the Credentials Committee for review. The number of index cases required to meet the minimal acceptable standards in the various areas are:

   - Lungs, pleura, chest wall—50
   - Pneumonectomy, lobectomy, segmentectomy—30
   - Other—20
   - Esophagus, mediastinum, diaphragm—15
   - Esophageal operations—8
   - Other—7
   - Congenital heart—20
   - Acquired valvar heart—20
   - Myocardial revascularization—35
   - Pacemaker implantations—10
   - Bronchoscopy and esophagogastroscopy—25

   Endoscopic procedures may be counted for credit whether they are performed as independent procedures or immediately preceding a thoracic operation.

   Major vascular operations outside the thorax should be listed.

   The Board recognizes that supervised operative experience in a well-organized teaching setting that is approved by the Residency Review Committee for Thoracic Surgery protects the patient, who, in most instances, is the personal and identifiable responsibility of a faculty surgeon. This supervised experience optimally prepares the candidate to begin the independent practice of cardiothoracic surgery after the completion of residency.

   The Credentials Committee has been authorized by the Board to reject a candidate if his or her operative experience during the thoracic surgery residency is considered to be inadequate. The candidate, the program director, and the Residency Review Committee for Thoracic Surgery will be notified if such action is taken.

   Even though emphasis on one or another facet of thoracic surgery (pulmonary, cardiovascular, esophageal, thoracic trauma, etc.) may have characterized a candidate's residency experience, the candidate is nevertheless held accountable for knowledge concerning all phases of the field, including extracorporeal perfusion (physiological concepts, techniques, and complications), cardiac devices, management of dysrhythmias, and thoracic oncology. In addition, a candidate should have had responsibility for the care of pediatric general thoracic surgical patients and be competent in video-assisted thoracoscopic surgery. The candidate should also have an in-depth knowledge of the management of acutely ill patients in the intensive care unit. This requires an understanding of cardiorespiratory physiology, respirators, blood gases, metabolic alterations, cardiac output, hyperalimentation, and many other areas. By virtue of his or her residency in thoracic surgery, the candidate is expected to be fully qualified in the surgical care of critically ill patients.

Operative Experience Credit

Credit will be allowed for supervised operative experience in a well-organized teaching setting only when the following criteria are met:

1. The resident participated in the diagnosis, preoperative planning, surgical indications, and selection of the appropriate operation;
2. The resident performed under appropriate supervision in a well-organized teaching setting approved by the Residency Review Committee for Thoracic Surgery those technical manipulations that constituted the essential parts of the procedure itself;
3. The resident was substantially involved in postoperative care.

Supervision and active participation by the thoracic surgery faculty are required in preoperative, intraoperative, and postoperative care.

The Board also emphasizes that first-assisting at operations is an important part of resident experience, particularly in complex or relatively uncommon cases, such as certain kinds of congenital heart operations to correct congenital heart defects or disorders of the esophagus.

Applications

Before applying for examination, prospective candidates should consider whether they are able to meet the minimum requirements of the Board, which includes certification by the American Board of Surgery. They should then submit a letter to the office of the Secretary of the Board, outlining briefly their thoracic surgery residency experience and requesting an application.

An application will be sent to candidates who have completed residency programs that have been approved by the Residency Review Committee for Thoracic Surgery. Each applicant should consult with his or her program director regarding the correct way to complete the operative case list forms.

The American Board of Thoracic Surgery takes particular note of the problems facing those with a disability and is ready to alter its examination procedures in such a way that individuals who are competent to practice thoracic surgery have the opportunity to take the Board's examination under circumstances that accommodate the individual's disability. Individuals requiring special consideration because of a disability should notify the Board at least 60 days before the August 1 deadline for submitting an application.
Candidates are notified of their eligibility for examination when their applications have been approved.

Examinations

It is the policy of the American Board of Thoracic Surgery to consider a candidate for examination only after he or she has completed a thoracic surgery residency program approved by the Residency Review Committee for Thoracic Surgery (RRC).

Separate written and oral examinations are held annually at times and places determined by the Board. Information regarding the dates and places of the examinations is published in the Examination and Licensure column of the Journal of the American Medical Association, the Journal of Thoracic and Cardiovascular Surgery, and the Annals of Thoracic Surgery.

Part I—Written Examination

The examination consists of a written examination designed primarily to assess cognitive skills.

Part II—Oral Examination

Successful completion of the Part I (written) examination is a requirement for admission to the Part II (oral) examination. The oral examination is designed to test the candidate's knowledge, judgment, and ability to correlate information in the management of clinical problems in general thoracic and cardiovascular surgery.

Examination Sequence

Candidates should apply for the examination within 5 years of the satisfactory completion of their thoracic surgery residency. Those applying after 5 years will need an additional year of training in a program approved in advance by the American Board of Thoracic Surgery before they will be eligible to apply for examination.

After a candidate is declared eligible for the written examination (Part I), he or she must pass Part I within 4 years. The candidate who successfully completes Part I of the examination then must pass Part II within the succeeding 4 years.

Candidates who fail an examination (Part I or Part II) are eligible to repeat the examination the following year.

Candidates who fail either Part I or Part II of the examination three times, or do not pass either part of the examination within the allotted time period of 4 years, will be required to complete an additional thoracic surgical educational program that must be approved in advance by the Board before they will be permitted to retake the examination. Candidates who complete the required additional training must file an addendum to their application, have their eligibility for examination reviewed by the Credentials Committee, and pay a new registration fee. They will be given two more opportunities to take the examination (Part I or Part II) within the succeeding 2 years.

Candidates who fail either Part I or Part II a fifth time will be required to complete another approved thoracic surgery residency before they will be eligible to reapply for examination by the Board.

Fees

Registration fee (not refundable)—$360
Part I examination fee—$850
Part I reexamination fee—$850
Part II examination fee—$800
Part II reexamination fee—$900

Candidates who do not appear for their scheduled examination (Part I or Part II) or who cancel less than 6 weeks prior to either examination may forfeit their examination fee.

The Board is a nonprofit corporation, and the fees from candidates are used solely to defray actual expenses incurred in conducting examinations and carrying out the business of the Board. The directors of the Board serve without remuneration.

Appeals

Individuals who receive an unfavorable ruling from a committee of the Board may appeal such determination by mailing a notice of appeal to the office of the American Board of Thoracic Surgery within 30 days of the date such ruling was mailed. A copy of the appeals procedures will be mailed to the candidate.

The only appeal permitted from failing the written examination is a request for a hand rescore to verify the accuracy of the score as reported. This request must be made within 30 days of the time the examination results are received by the candidate.

The only appeal with respect to the oral examination is the opportunity to request immediate reexamination following the completion of the oral examination. A candidate who believes that any of his or her examiners have been unfair or biased during a portion of the oral examination may request reexamination by another examiner. The grade on reexamination will be the final grade for that portion of the examination.

Chemical Dependency

Qualified applicants who have a history of chemical dependency that has been reported to the Board and who submit documentation suitable to the Board that their dependency has been under control for a period of at least 2 years will be admitted to the examination process.

For candidates who are already in the examination process and develop a chemical dependency as reported to the Board, the process will be suspended until the candidate can provide documentation suitable to the Board that the condition has been under control for a period of 2 years. At that time, the candidate will be readmitted to the examination process. The requirement to be accepted for examination within 5 years of completion of an approved thoracic surgery residency will not be waived.

Certification

After a candidate has met the requirements for eligibility and passed the examination, a certificate attesting to the candidate's qualifications in thoracic surgery will be issued by the Board. The certificate is valid for 10 years.

Recertification

Applicants who are certified in thoracic surgery are issued certificates that are valid for 10 years from the date of certification, after which the certificates will no longer be valid. Certificates can be renewed before expiration by fulfilling the requirements for recertification specified by the American Board of Thoracic Surgery at that time. A recertification booklet is available upon request.

Denial or Revocation of Certificate

No certificate shall be issued or a certificate may be revoked by the Board if it determines that:
1. The candidate for certification or diplomate did not possess the required qualifications and requirements for examination, whether such deficiency was known to the Board or any Committee thereof before examination or at the time of issuance of the certificate as the case may be;
2. The candidate for certification or diplomate withheld information in his or her application or made a material misstatement or any other misrepresentation to the Board or any Committee thereof, whether intentional or unintentional;
3. The candidate for certification or diplomate was convicted by a court of competent jurisdiction of any felony or misdemeanor involving moral turpitude and, in the opinion of the Board, having a material relationship to the practice of medicine;
4. The candidate for certification or diplomate had his or her license to practice medicine revoked or was disciplined or censured by any court or other body having proper jurisdiction and authority because of any act or omission arising from the practice of medicine; or
5. The candidate for certification or diplomate had a history of chemical dependency or developed such during the certification process and failed to report same to the Board.

Bingham Farms, MI 48025
810-646-9720

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Urology to ascertain whether the information they have is current.)

Purpose
The objective of the American Board of Urology, Inc, hereinafter sometimes referred to as "the Board," is to identify for the public's knowledge those physicians who have satisfied the Board's criteria for certification and recertification in the specialty of urology. Certification by the Board does not guarantee competence in practice, but does indicate that the physician has completed certain basic training requirements and has demonstrated at the time of examination a fund of knowledge and competence in the care of those patients whose cases were reviewed by the Board, as described elsewhere in this publication.

Functions of the Board
The Board arranges and conducts examinations testing the qualifications of voluntary candidates, and grants and issues certificates to accepted candidates duly licensed to practice medicine. The Board holds the power to revoke such a certificate.

The Board endeavors to serve the public, hospitals, medical schools, medical societies, and practitioners of medicine by preparing lists of urologists whom it has certified. Lists of diplomates of this Board are published in the Directory of the American Medical Association (signified in biographical data by symbol "86") and the ABMS Compendium of Certified Medical Specialists.

The Board is not responsible for opinions expressed concerning an individual's credentials for the examinations or status in the accreditation process unless they are expressed in writing and signed by the president or executive secretary of the Board.

Associations of the Board
The nominating societies of this Board and sponsors of its activities are: the American Urological Association, the American Association of Genito-Urinary Surgeons, the American Association of Clinical Urologists, the Society of University Urologists, the American College of Surgeons, and the Urology Section of the American Academy of Pediatrics.

The American Board of Urology and the various other specialty boards are members of the American Board of Medical Specialties, which includes as associate members the Association of American Medical Colleges, the American Hospital Association, the Federation of State Medical Boards of the USA, the National Board of Medical Examiners, and the Council of Medical Specialty Societies.

The American Board of Medical Specialties, in conjunction with the Residency Review Committee for Urology and the Accreditation Council for Graduate Medical Education (ACGME), has established academic standards for specialization that the American Board of Urology, Inc, has adopted. Such standards are found in the Graduate Medical Education Directory published by the American Medical Association.

Training programs in urology are reviewed by the Residency Review Committee for Urology, which consists of representatives from the American Board of Urology, Inc, the Council on Medical Education of the American Medical Association, and the American College of Surgeons. Upon recommendation by the Residency Review Committee, the Accreditation Council for Graduate Medical Education (ACGME) determines the accreditation status of each program.

A list of approved residencies for training in urology may be found in Graduate Medical Education Directory published by the American Medical Association.

Limitations of Functions of the Board
Application for certification is entirely voluntary. Only one certificate for each qualified individual is issued by the Board.

The Board makes no attempt to control the practice of urology by license or legal regulation, and in no way interferes with or limits the professional activities of any duly licensed physician.

Requirements
An applicant may initiate application for certification by the American Board of Urology during the final year of his or her residency training or at some point thereafter. For details of the certification process see "Certification Process." Every applicant, however, must meet certain basic requirements as follows:

A. Prerequisites
1. Except as noted below, the applicant must be a graduate of a medical school approved by the Liaison Committee on Medical Education or a school of osteopathy approved by the Bureau of Professional Education of the American Osteopathic Association, and have completed an ACGME-accredited urology residency program as designated in the AMA Graduate Medical Education Directory, Section II, "The Essentials of Accredited Residencies in Graduate Medical Education."

A minimum of 5 years of postgraduate education is required of which 12 months must be spent in general surgery and 36 months must be spent in clinical urology in an ACGME-accredited program. Of the remaining 12 months, a minimum of 6 months must be spent in general surgery, urology, or other clinical disciplines relevant to urology. Irrespective of the training formal provided, the final 12 months of training must be spent as a senior/chief resident in urology with appropriate clinical responsibility under supervision in institutions that are an approved part of the program.
Any resident who intends to transfer to another urology residency program during the urologic portion of the training must obtain the approval of the Board prior to the change. The resident must petition the Board in advance for said approval. The Board also requires the written acknowledgment and approval of both program directors.

In regards to leaves of absence for parental leave, illness, injury, disability, and substance abuse during residency training, no more than 4 months of clinical training during residency can be omitted. At least 32 months of clinical training in a 3-year program or 44 months of clinical training in a 4-year program must be completed in order to enter the certification process of the Board; credit for absences of greater length must be justified by the program director and approved by the Board. Please contact the Board office if you have any questions on this matter.

To be admissible to the certification process of the Board, the resident must complete the requirements for his/her specific program in effect at the time of acceptance in the program, as established by the Residency Review Committee for Urology or the Accreditation Committee of the Royal College of Physicians and Surgeons of Canada.

2. To meet the requirements for admissibility to the certification process of the Board, a Canadian-trained urologist must have graduated from a United States or Canadian medical school approved by the Liaison Committee for Medical Education (LCME) and have completed the previously described pre-urology and urology requirements with the final year as chief resident, in programs approved by the Accreditation Council for Graduate Medical Education (ACGME) or the Accreditation Committee of the Royal College of Physicians and Surgeons of Canada. Upon successful completion of this training, the candidate may sit for the Qualifying (Part I) Examination of the American Board of Urology.

To be admissible to the Certifying (Part II) Examination, the Canadian-trained candidate must be certified by the Royal College of Physicians and Surgeons of Canada.

3. Foreign medical graduates from schools outside the United States providing an equivalent medical background, who have completed an approved urology residency in the United States, may also qualify for examination by the American Board of Urology, but pre-urology training taken outside the United States may be approved for no more than 1 year of the 2-year prerequisite non-urology training. All such candidates must have a valid ECFMG certificate and at least one year of surgical training in an accredited general surgery training program in the United States or Canada.

4. In addition to the training requirements noted above, applicants seeking certification by the American Board of Urology must also have a valid medical license that is not subject to any restrictions, conditions, or limitations, and must demonstrate competence in clinical practice. The Board will obtain evidence of this through a review of logs of cases performed by the applicant and by direct communication with the applicant’s peers.

5. Applicants who have a history of chemical dependency will not be admitted to the Qualifying (Part I) or Certifying (Part II) Examination unless they present evidence to the Board that they have satisfactorily completed the program of treatment prescribed for their condition. In addition, any such applicants for the Certifying (Part II) Examination may have a site visit of their practices by a representative of the Board as described in C.1.

6. Deviations from the requirements described above may be permitted at the discretion of the Board when the Board is satisfied that the deviation provides equivalent or superior education or training. Any such deviations must be approved by the board before the applicant enters the urological portion of training. A $300 administrative fee is assessed for Board review of non-ACGME-approved training. Notarized documentation of all such training must accompany the request. The Board office deadlines for receipt of agenda materials for the next Credentials Committee meeting are January 1 and June 1 of the current year.

B. Application

1. A special application form provided by the Executive Secretary shall be completed by the applicant and returned to the Board office by registered, certified, or express mail with return receipt requested. Application must be in the Board office by November 1 in order to permit the applicant to be admitted for the Qualifying Examination (Part I) the following May or June. Applications and documentation material postmarked before, but not received in the Board office by, November 1 will incur a late fee of $300. No applications will be accepted after December 1. No application will be considered by the Credentials Committee or the Board unless it is submitted by the deadline set forth and is complete and includes all supporting documentation described in this part. The Executive Secretary will determine if an application is complete.

2. The application must be accompanied by a notarized copy of a graduation certificate from a medical school approved by the Liaison Committee on Medical Education or from a school of osteopathy approved by the Bureau of Professional Education of the American Osteopathic Association and by specific verification (such as a notarized certificate or an original letter from that program’s director) of successful completion of the pre-urology postgraduate training requirement in a program approved by ACGME. Pre-urology must be documented separately and may not be included in the description of the urology program.

Graduates of medical schools not approved by the Liaison Committee on Medical Education, the Bureau of Professional Education of the American Osteopathic Association, or the Accreditation Committee of the Royal College of Physicians and Surgeons of Canada must furnish a notarized copy of a valid ECFMG Certificate (or Fifth Pathway certificate).

3. A portion of the examination fee shall be paid at the time the application is submitted as specified under Fees.

4. For each applicant, the director of the program where the applicant finished residency must complete an evaluation form supplied by the Board. This evaluation must be received in the Board office by March 1 preceding the Qualifying Examination (Part I) given the following May or June. An application from a senior resident must also be accompanied by a letter from the Program Director confirming that the applicant is expected to have completed successfully 1 year of training in the capacity of senior or chief resident during the calendar year in which the Qualifying Examination (Part I) is to be taken. The applicant is responsible for ensuring that these supporting documents are received in the Board Office at the indicated time.

5. Applicants for certification must be approved by the Credentials Committee and the Board. Additional information may be requested by the Executive Secretary. No duty or obligation to assist any applicant in completing the application is implied.

6. As a condition of application to the Qualifying (Part I) Examination, applicants and candidates sign a waiver allowing the Board to release examination results achieved in the Qualifying Examination to their residency program and to the Residency Review Committee for Urology.

7. If you require special aids or assistance due to a physical or mental disability during the Board examinations, please indicate this on the application. You will be expected to submit appropriate
documentation substantiating your disability. The Board reserves the right to verify your disability.

C. Fees
1. The current examination fee may be changed without notice. This fee reimburses the Board for expenses incurred in preparing and processing the applications and examinations of the candidates. No fees are refundable. Unused fees will be credited for the next available examination only, and if they are not utilized as the first available opportunity, credit will be disallowed.

2. Payment of $825 must accompany the initial application for the Qualifying (Part I) Examination except in the case of senior residents, who shall pay $575 as the fee for the initial application. Senior residents only may delay the fee payment until January 5. An additional fee of $825 must accompany application for the Certifying (Part II) Examination. An applicant or candidate secures no vested right to certification as a result of paying an examination fee.

3. Cancellation fees are as follows:
   $500 failure to appear
   $300 unexcused absence
   $200 excused absence (in cases of personal or family illness/death).

4. Only one excused absence is permitted at the discretion of the Board, which extends the period of eligibility for 1 year for that examination. The excused absence fee of $200 will be assessed and no reinstatement fee will be applied. Following an excused absence, only unexcused absences may be granted; there will be no further extensions of eligibility and the unexcused absence and reinstatement fees will be assessed. Applications will be considered inactive if two successive examination appointments are canceled by the applicant. If the candidate does not already exceed the 5-year time limit for the exam, he or she may regain active status by paying a reinstatement fee of $600 plus an additional $900 for an unexcused absence or $500 for a nonappearance.

5. A $300 late fee will be assessed for any application and/or documentation and/or fees not received in the Board Office by the prescribed deadlines. Express mail is recommended. A $100 fee will be assessed for all returned checks.

6. The fee for the Preliminary Examination is $400.

7. The application fee for recertification, as described in “Board Eligible Status,” is $900.

8. The fee for a site visit by a Board representative is $2,000 plus expenses.

Certification Process
Applicants approved by the Board to enter the certification process must complete both a written Qualifying Examination (Part I) and, after passing this examination, a subsequent Certifying Examination (Part II). Assessment of clinical competence through review of practice logs and peer review will also be carried out prior to admission to the Certifying Examination (Part II). Applicants who have not applied to take the Qualifying (Part I) Examination within 5 years of the completion of their urological residency will be required to pass a written Preliminary Examination before being permitted to enter the certification process. The Preliminary Examination is given each November during the annual In-Service Examination. Contact the Board Office before August 15 for information.

Applicants who have not passed the Qualifying (Part I) Examination within 5 years of the first scheduled Qualifying (Part I) Examination will be required to pass a written Preliminary Examination before being allowed to apply again (see paragraph above).

Certification must be achieved within 5 years of the first scheduled Qualifying (Part I) Examination after entering the certification process.

A. Qualifying Examination (Part I)
The Qualifying Examination is a written examination given in May or June of each year simultaneously at several different occasions. An applicant failing the Qualifying Examination (Part I) must repeat it the next year unless the absence is excused by the Board Office (see Fees). Failure to retake the examination at the first available opportunity will result in administrative withdrawal of the application.

An applicant must pass the Qualifying (Part I) Examination within 5 years of entering the certification process. Failure to do so will require successful completion of a written Preliminary Examination in order to reenter the certification process at the Qualifying (Part I) Examination level.

The Qualifying Examination is designed to assess knowledge of the entire field of urology and allied subjects.

This includes andrology (including infertility), calculous disease (including endourology and shock-wave lithotripsy), congenital anomalies, pediatric urology, female urology, infectious diseases, neurourology and urodynamics, obstructive diseases, psychological disorders, renovascular hypertension and renal transplantation, sexuality and impotence, adrenal diseases and endocrinology, trauma, and urologic oncology.

B. Certifying Examination (Part II)
Candidates for the Certifying Examination (Part II) must have met all training requirements and have passed the Qualifying Examination (Part I). The Certifying Examination includes assessment of clinical competence through review of practice logs and peer review and three practical examinations (an oral examination and written examinations in urologic imaging and pathology). In addition, the candidate must have engaged in a minimum of 18 months of urologic practice with primary patient responsibility in one community, an academic institution, or in the Armed Forces. Six months credit toward this 18-month practice period may be awarded an individual in a fellowship relevant to urology of 1 year or longer.

Application for admission to the Certifying Examination (Part II) is made by completing the Supplemental Application form available from the Board office. This application must be returned by registered, certified, or express mail with return receipt requested, and be received in the Board office by July 1 prior to the Certifying Examination of the following year. In addition, a minimum 1-year log of all major and minor cases performed as the primary surgeon, prepared in accordance with the form provided by the American Board of Urology and verified in writing by the administrator of every facility where the candidate practices, must be received in the Board office by November 15 prior to the Certifying Examination the following year. Express mail is recommended.

Applicants will be assessed $300 for logs received between November 16 and December 1. No surgical logs will be accepted after December 1.

The oral examination, urologic imaging examination, and pathology examination are all regarded as separate examinations. In the event of failure of any one of the three, only the failed examination need be repeated. The candidate must successfully complete all three parts of the Certifying Examination (Part II) within five years of the first scheduled Qualifying (Part I) Examination after entering the certification process or it will be necessary to pass a written Preliminary Examination and reenter the certification process at the Qualifying (Part I) Examination level. Extensions are granted by the Board because of extenuating or special circumstances (eg,
involvement in a fellowship of 1 or more years’ duration, subject to Board approval, and deferral for an inadequate surgical log).

C. Steps in the Certifying Examination

1. Assessment of Clinical Competence

Urology is the specialty that deals with the medical and surgical disorders of the genitourinary tract including the adrenal gland. Candidates must demonstrate knowledge, competence, and surgical experience in the broad domains of urology such as infertility, impotence, calculus disease, endourology, extra corporeal shock wave lithotripsy, neurourology, urodynamics, urologic imaging, uropathology, female urology, pediatric urology, infectious disease, obstructive disease, psychologic disorders, renovascular disease, transplantation, genitourinary sexuality, trauma, and oncology.

Candidates for the Certifying Examination (Part II) must be in the full-time practice of urology and must be licensed to practice medicine in the area of current practice activity. As evidence of competency, the candidate must submit a log of cases performed as primary surgeon during the most recent 22 to 18 months in the area of current practice as described earlier in this section.

In the case of military or public health physicians subject to unexpected changes of assignment, the Board may accept cases from the previous assignment. Photostatic copies of patient records from the patient care facility and/or office record of any one or more of the above cases may be requested by the Board. The candidate shall be responsible for obtaining patient consent for the disclosure of patient records to the Board, or for ensuring that the patient records disclosed to the Board do not contain any patient-identifying information. The candidate is expected to furnish such records within one month of the request.

Surgical log review is an important component of the certification process. While there is no minimum number of cases established for an acceptable log, a surgical experience well below the norm for the peer group may be a cause for the Trustees to delay the certification process until there is a sufficient experience to adequately assess a candidate’s practice pattern and management.

The Board will review the surgical logs of urologic subspecialists in the context of the expected subspecialty experience. The 5-year period of admissibility for completing certification will be extended by 1 year for candidates whose certification is delayed because of an inadequate surgical log.

To further ascertain and document the candidate’s qualifications for certification, the American Board of Urology will solicit information and comments from appropriate individuals, such as fellow practitioners, or from organizations, such as medical societies, licensing agencies, etc. The Board will be authorized by the candidate and will be held harmless to conduct investigations of professional ethics, reputation, and practice patterns. Under no circumstances will the source of peer review letters be revealed to any person other than members of the American Board of Urology.

Upon receipt of the practice logs and peer review information, the credentials of the candidate will be reviewed by the Credentials Committee of the Board. Evidence of ethical, moral, and professional behavior and an appropriate pattern of urologic practice including experience with an adequate volume and variety of clinical material will be sought. Areas of inadequacy may be a cause for deferment or discontinuation of the certifying process until these areas are clarified or corrected. Actions of the Board to achieve clarification may include:

a. Inquiry into practice irregularities by the Credentials Committee of the Board.
b. Request for certified copies of candidate’s health care facility and/or office records for review.
c. A site visit to the candidate’s community at the candidate’s expense.

d. Other appropriate measures that may be deemed necessary to assess apparent deviations from standard urologic practice.

The candidate will not be permitted to continue the certification process until the Board has satisfied itself of the appropriateness of the candidate’s practice pattern and professional behavior. The Board may elect to defer continuation of the certification process pending investigation and resolution of any inadequacies or deviations. It may deny certification when serious practice deviations or unethical conduct are involved. These include, but are not limited to, cheating on or improper or disruptive conduct during any examination conducted by the Board, the solicitation or distribution of examination materials, and misrepresentation of an applicant’s or candidate’s status in the certification process.

2. Oral Examination

These examinations are given annually in January or February at a single site. The pathology and urologic imaging examinations are written and are based on projected photographic slide material. The oral examination is an interactive process between the candidate and candidate during which an assessment is made of ability to diagnose and manage urologic problems. Since the candidate has passed the Qualifying Examination (Part I), the examiner presumes in the oral examination that the candidate has a satisfactory degree of cognitive knowledge of urology. Therefore, the oral examination will concentrate upon the following:

a. Problem Solving Ability. Evaluation is made of the candidate’s ability to collect pertinent information systematically, integrate it, assess the problem, and propose an appropriate solution.
b. Response to a Change in a Clinical Situation. The candidate’s ability to manage changing clinical conditions is evaluated through the flexible interaction between the examiner and the candidate.

c. Professional Behavior in the Role of a Urologist. The candidate’s attitude, interaction with the examiner, and expression of patient management concerns contribute to the assessment of professional behavior.

Unforeseeable Events

Certain unforeseeable events such as a natural disaster, war, government regulations, strikes, civil disorders, curtailment of transportation, and the like may make it inadvisable, illegal, or impossible for the Board to administer an examination to a candidate at the scheduled date, time, and location. In any such circumstance, the Board is not responsible for any expense the candidate may have incurred to be present for the examination or may incur for any future or substitute examination.

Final Action of the Board

Final action regarding each applicant is the sole prerogative of the Board and is based upon the applicant’s training, professional record, performance in clinical practice, and the results of the examinations given by the Board.

Regardless of the sequence by which the various steps of certification may have been accomplished, the process itself is not considered complete until the Board’s final action. At any point in the process, the Board may delay or even deny certification upon consideration of information that appears to the Board to justify such action.

The activities described under “Requirements” and “Certification Process” of this publication proceed from the certificate of incorporation and bylaws that state the nature of the business.
objects, and purposes proposed to be transacted and carried out by this corporation.

**Appeals Procedure**
The Board has established an appeals process for candidates denied certification, or for Diplomates with time-limited certificates denied recertification. An appeal must be initiated by a candidate or diplomate within 30 days after the mailing by the Board of the adverse decision. The candidate or diplomate must provide written notice requesting a hearing to appeal the Board’s decision, and cite the specific reasons given by the Board that are alleged to be erroneous. A copy of the appeals process may be obtained from the Board office upon written request by the affected party.

**Board Eligible Status**
The American Board of Urology does not use nor recognize the term “Board-eligible” in reference to its applicants or candidates. A candidate is not certified (i.e., does not become a diplomate) until all components of the certification process are successfully completed. Applicants who sit for the Qualifying (Part I) Examination become “active candidates” in the certification process and remain so for the 5 years of admissibility allowed to complete that process.

**Recertification**
Certificates issued by the American Board of Urology on or after January 1, 1985, expire on the anniversary of the date of issue and are valid for 10 years only. A physician who fails to be recertified by the expiration date is no longer a diplomate of the Board. It is recommended, therefore, that diplomates possessing a time-limited certificate make plans to obtain recertification beginning up to 3 years before the expiration date of their current certificate.

The office of the American Board of Urology will notify Diplomates holding a time-limited certificate 3 years prior to its expiration. At that time a handbook entitled “Information for Applicants for Recertification” will be provided that details the recertification process. This handbook is also available on request from the Board office.

**Revocation of Certificate**
Certificates issued by this Board are the property of the Board, and are issued pursuant to the rules and regulations of the Board. Each certificate is issued to an individual physician who, by signature, agrees to revocation of the certificate in the event that

1. The issuance of such certificate or its receipt by the physician so certified shall have been contrary to, or in violation of, any provision of the Certificate of Incorporation, Bylaws or rules and regulations of the Board in force at the time of issuance; or
2. The physician or party certified shall not have been eligible to receive such certificate, irrespective of whether the facts constituting ineligibility were known to, or could have been ascertained by, the Directors of the Board at the time of issuance of such certificate; or
3. The physician or party so certified shall have made a material misstatement of fact in application for such certificate or in any other statement or representation to the Board or its representatives; or
4. The physician so certified shall at any time have neglected to maintain the degree of competency in the practice of the specialty of urology as set up by the Board, and shall refuse to submit to reexamination by the Board; or
5. The physician so certified has been found by the Board to be guilty of unethulical practices or immoral conduct or of conduct leading to revocation of license. These objective standards include conduct that violates state medical laws, rules and regulations of local and state Medical Boards, and relevant AMA guidelines, and conduct leading to revocation of license to practice medicine in any state, regardless of continuing licensure in any other state.

The Board of Trustees of this corporation shall have the sole power, jurisdiction, and right to determine and decide whether the evidence and information before it is sufficient to constitute one of the grounds for revocation of any certificate issued by this Board.

When the Board is made aware of facts possibly constituting grounds for revocation, the Board will give the physician written notification identifying the specific facts that have come to its attention. The Board may require any physician so certified to appear before the Board of Trustees or before any one or more of them, or before an individual designated by the Board upon not less than 20 days’ written notice, and to show cause at that time and place specified in the notice why the certificate may not be revoked on any one of the grounds specified in such notice. The diplomate may bring to this hearing persons or documents in defense of any actions.

The failure of any physician so notified to appear as required in such notice, without due excuse deemed sufficient to the Board of Trustees, shall constitute ipso facto cause for revocation of the certificate. The decisions of the Board of Trustees relating to all matters under “Recertification” shall be final and binding.

The diplomate will be required to attest that he/she has read and understands the above provisions regarding the grounds for revocation of certificate issued and the procedures to be followed in determining whether or not a certificate should be revoked and to agree to hold the Board, its officers and agents harmless from any damage, claim, or complaint by reason of any action taken in good faith and consistent with such procedures.

**Trademark and Seal**
The trademark and seal of the American Board of Urology are registered. Any unauthorized use of the trademark and seal is prohibited without express permission of the Board.

**Examination Dates for 1994–1995**

**Qualifying (Part I) Examination**
June 2, 1994
June 1, 1995

**Certifying (Part II) Examination**
February 16–18, 1995
February 22–24, 1996 (Tentative)

**Change of Address**
Notifying the Board office of a change of address is the responsibility of the candidate for certification.
Appendix C

Medical Licensure Requirements

Information in Appendix C was provided by the American Medical Association (AMA) Department of Data Base Products in cooperation with the Office of Physician Credentials and Qualifications. Tables 1, 2, 3, 4, 5, and 6 summarize the licensure policies of state boards. It is strongly recommended that candidates contact the specific state board for the most current information on licensure requirements in that state. The name and address of each state board and the corresponding officers are listed in Table 7.

All tables are reprinted from *US Medical Licensure Statistics and Current Licensure Requirements*, 1995 edition, published by the AMA. Additional information can be obtained from the following resources.

Policies for Initial Medical Licensure for Graduates of US Medical Schools

All states require a written examination for initial licensure. Certification by the National Board of Medical Examiners (NBME) can be used as an avenue to licensure in the United States for those certified as diplomates prior to implementation of the United States Medical Licensing Examination (USMLE) and for examinees taking a combination of NBME and/or USMLE examinations who have passed at least one part or step prior to December 31, 1994. The last regular administration of Part I of the NBME examination occurred in 1991, Part II in April 1992, and Part III in May 1994. The NBME certificate will no longer be issued following certification of these examinees.

Policies of state medical boards for initial medical licensure for graduates of US medical schools appear in Table 1. All licensing jurisdictions except Oklahoma, Texas, and the Virgin Islands will endorse certificates from the NBME earned prior to the USMLE under certain circumstances. The Oklahoma and Texas licensing boards will endorse NBME certificates and state licenses based on the NBME certificate for reciprocal endorsement candidates only. Oklahoma and Texas will not endorse the NBME certificate held by a candidate who has never been licensed. The reciprocal endorsement candidate must pass the Federation of State Medical Boards' Special Purpose Examination (SPLEX) in Texas or be American Specialty Board-certified or recertified. Those graduates who are not licensed by endorsement of the NBME certificate must have passed the Federation Licensing Examination (FLEX) prior to January 1994 or pass the USMLE, which is currently used by all states as the medical licensing examination. Most licensing authorities state that there is no limit to the length of time for which they endorse the NBME certificate.

Although some state medical boards allow physicians to take USMLE Step 3 with little or no graduate medical education, all of the boards require graduate training before issuing a license, usually one year. However, Connecticut, Guam, Maine, Michigan, New Hampshire, Pennsylvania, South Dakota, and Washington require two years. Illinois requires two years of graduate medical education.
for persons entering training programs after January 1, 1888, and Delaware and Nevada require three years.

Licensing boards require applicants to provide detailed personal information on an application form, plus letters of reference and other evidence of good moral character. They also require payment of a licensing fee. They may require photographs, fingerprints, or other means of identification.

**Policies for Licensure of Graduates of Non-US Medical Schools**

Most of the state medical boards will accept graduate training in Canada as equivalent to training undertaken in the United States. Forty-one states will issue a medical license to a graduate of a Canadian medical school who holds a license in one of the provinces of Canada. Thirty-four licensing boards, under certain specified conditions, endorse a Licentiate of the Medical Council of Canada certificate held by an international medical graduate.

In the most recent survey conducted by the AMA Department of Data Base Products, 45 states indicated that international medical graduates who hold a Fifth Pathway certificate, but do not hold a standard Education Commission for Foreign Medical Graduates (ECFMG) certificate, can be admitted to the licensing examination. Fifth Pathway Certificate holders must pass Steps 1 and 2 of the USMLE prior to entering ACGME-accredited graduate medical education programs.

Non-US educated candidates for licensure are permitted by 7 state boards to take the USMLE before they have had graduate medical education in a US or Canadian hospital. Although a passing score on the USMLE (which is used by the ECFMG for certification purposes) or the ECFMG certificate is required for licensure by most state medical boards, 18 boards now require both. Candidates are not awarded a license until they have undertaken 1 or more years of training in the United States and have met other specific requirements of the individual boards, e.g., an ECFMG certificate, personal interview, fees, etc. International medical schools must be state-approved in 26 US states or territories, including Alabama, Arizona, Arkansas, California, Colorado, Connecticut, District of Columbia, Georgia, Guam, Idaho, Indiana, Kentucky, Maryland, Minnesota, Mississippi, Missouri, Montana, Nevada, North Dakota, Oklahoma, Oregon, Puerto Rico, Rhode Island, South Dakota, Tennessee, and Wyoming.

**Current Board Standards for the Administration of the US Medical Licensure Examination**

In 1990, the Federation of State Medical Boards (FSMB) and the NBME established the USMLE, a single examination for assessment of US and international medical school students or graduates seeking initial licensure by US licensing jurisdictions. The USMLE replaced the two-examination sequences used in the medical licensing process, FLEX and the certifying examination of the NBME, as well as the Foreign Medical Graduate Examination in the Medical Sciences (FMGEMS), formerly used by the ECFMG for certification purposes.

The USMLE is a single-examination program with three steps. Each step is complementary to the others; no step can stand alone in the assessment of readiness for medical licensure. Each USMLE step is composed of multiple-choice questions, requires 2 days of testing, and is administered semiannually.

The USMLE Step 1 assesses whether an examinee understands and can apply key concepts of basic biomedical sciences, with an emphasis on principles and mechanisms of health, disease, and modes of therapy. Step 2 assesses whether an examinee possesses the medical knowledge and understanding of clinical science considered essential for the provision of patient care under supervision, including emphasis on health promotion and disease prevention. Step 3 assesses whether an examinee possesses the medical knowledge and understanding of biomedical and clinical science considered essential for the unsupervised practice of medicine.

Steps 1 and 2 are administered to students and graduates of US and Canadian medical schools at test centers established by the NBME, and application materials are usually available at these medical schools. Steps 1 and 2 are administered by the ECFMG to students and graduates of foreign medical schools; application materials are available only through the ECFMG. Step 3 is the responsibility of the individual medical licensing jurisdictions.

Step 3 application materials for physicians who have successfully completed Steps 1 and 2 are available from medical licensing authorities.

Students who enrolled in US medical schools beginning in the fall of 1990 and international medical graduates who applied for ECFMG examinations beginning in 1993 will have access to only the USMLE for purposes of licensure. The first Step 1 administration occurred in June 1992, and the first Step 2 occurred in September 1992. The first Step 3 occurred in June 1994. Because some medical students and physicians have already successfully completed some part of the NBME or the FLEX examination sequences before the implementation of USMLE, it is expected that certain combinations of the examination may be considered by medical licensing authorities as comparable to existing examinations. The USMLE program recommends that such combinations be accepted for medical licensure only if completed prior to the year 2000. Most medical licensing authorities require completion of Steps 1, 2, and 3 within a 7-year period. This 7-year period begins when the medical student or graduate first passes Step 1 or Step 2. Licensing authorities also set a limit on the number of attempts allowed to pass each step and have established an eligibility requirement for Step 3 the completion, or near completion, of at least 1 postgraduate training year. Information on specific examination requirements within each licensing jurisdiction, as well as the fee for the USMLE examination Step 3, are listed in Tables 4 and 5.

**Clerkship Regulations**

For purposes of this publication, clerkships are defined as clinical education provided to medical students. Table 6 lists the 24 states that evaluate the quality of clinical clerkships in connection with an application for licensure. In most cases, state medical boards report that clerkships must be in hospitals affiliated with Liaison Committee on Medical Education-accredited medical schools or ACGME-accredited residency programs. Fourteen states require additional and/or more specific bases of evaluation.

Sixteen state medical boards have state regulations for clerkships provided in their states to students of foreign medical schools. Of these, three state medical boards report that such clerkships are forbidden, and 11 states permit training only in hospitals with accredited residency programs.

**Restricted Licenses and Educational Permits**

Fifty-two boards issue educational permits, limited and temporary licenses, or other certificates for the restricted practice of medicine. The terms for the issuance of such certificates vary. Certificates may be issued for hospital training of those eligible for licensure; supervised employment in state or private hospitals; and full-time practice until the next regular session of the licensing board. Permits must generally be renewed once a year with a stipulated maximum number of renewals allowed (usually 5 years).

Amendments to the Immigration and Nationality Act made through Public Law 94-484 and the Health Professions Educational Assistance Act of 1976 establish requirements for the admission of
foreign national physicians to the United States, whether for permanent residence or for participation in graduate medical education programs. The amendments require that foreign national graduates of non-US medical schools pass an examination determined by the Secretary of Health and Human Services to be the equivalent to Parts I and II of the NBME examination. The amendments also require that foreign national medical graduates demonstrate competence in oral and written English.

The Secretary of Health and Human Services has determined that Steps 1 and 2 of the USMLE, which is prepared by the NBME and administered by the ECFMG, is the equivalent of Parts I and II of the NBME examination for purposes of the amendments to the Immigration and Nationality Act. This examination is given at examination centers abroad and in the United States. Applications for the examination and questions should be addressed to the Educational Commission for Foreign Medical Graduates, 3624 Market St, Philadelphia, PA 19104, USA.

Graduates of non-US medical schools who are citizens of the United States and lawful permanent residents of the United States also must pass the USMLE in order to be provided with the ECFMG certificate.

1 No information provided.
2 SPEX Examination.
3 Oral examination is required.
4 Prior to January 1, 1984, candidate must be board-certified or will be required to take USMLE Step 3 or SPEX.
5 Persons entering GME programs prior to January 1, 1988, need 1 year; from January 1, 1988 on, 2 years are required.
6 One additional year of GME is required if applicant failed an exam any part of an exam 3 or more times and did not pass prior to 10/1/92. The training must occur after the last failure.

7 For applications received on or after January 1, 1992.
8 SPEX required unless specialty board certified.
9 Must be enrolled in a GME program.
10 One year is required, if physician had no US training prior to July 1, 1987.
11 Canadian accepted only if graduated from a Canadian school.

*All State Boards of Medical Examiners consider Canadian citizens who have graduated from an accredited Canadian medical school on the same basis for licensure as graduates of accredited US medical schools.

<sup>1</sup> Applicant must have received LMCC in or after May 1970. If examination was taken prior to May 1970, applicant must be board-certified or must successfully complete USMLE Step 3 or the SPPE examination.

<sup>2</sup> Must be endorsed by provincial licensing board.

<sup>3</sup> LMCC will be considered only in conjunction with a valid Canadian provincial license.

<sup>4</sup> One year formal GME required, or its equivalent.

<sup>5</sup> Applicant must have received LMCC in or after May 1970. (After December 31, 1969 (WA); January 1, 1978 (W1).)

This summary should be verified by direct communication with the corresponding officer of the licensing board in the state in which the physician is interested. In all states licenses based on the endorsement/acceptance of a physician's credentials are granted to those physicians meeting all state requirements—at the discretion of the licensing board.

* Both a passing score on the ECFMG exam and the ECFMG Certificate are required.

1 Oral examination is required.
2 No information provided.
3 Must include 4 months of general medicine.
4 Oral examination may be required.
5 ECFMG certificate is required if applicant is not a graduate of a foreign medical school certified by the Florida Board of Medicine and none have been approved yet. Graduates of certified foreign medical schools where the language of instruction is other than English must demonstrate competency in English.
6 Varies by specialty. Canadian training not accepted.
7 One year residency required for physicians entering residency prior to January 1, 1998. January 1, 1998 or after 2 years is required.
8 Near completion of 2 years.
9 Only in conjunction with a valid Canadian provincial license and provided all other licensure requirements are met.
10 May be counted as 1 year of required GME.
11 GME taken outside the US or Canada may be found qualifying under certain circumstances.
12 One year if graduated prior to 7/1/92 from an International Medical School approved by the Board.
13 a) If an applicant has not completed 3 years of GME but has met all other licensing requirements and has successfully completed 1 year of GME in the US or Canada in a program approved by the Board, and if the Board finds that the applicant has other professional experience and training that is substantially equivalent to the second and third years of GME, the applicant may be deemed eligible for licensure. b) Three years of GME in the United Kingdom is considered to be equivalent to 1 year of GME in the US or Canada. The Board requires American Board Certification or successful passage of SPEX in order to be considered for one of these two exceptions.
14 Training to the second-year level.
15 If passed in or after May 1970 (PA); January 1, 1976 (WI), it passed before January 1, 1978 (TN). If passed after December 31, 1969 (WA).
16 Must be enrolled in a GME program.
17 One year is required, if physician had US GME prior to July 1, 1987.
18 American Specialty Board Certification required within 10 years.
19 Just United States.

X indicates yes.

1. Step 2 fees include exam costs and exam processing fees.
2. Plus $175 application fee. Oral exam is $400 (ALL); plus $50 application fee (AK); plus $50 fee to fund Physician Rehabilitation Program (MI); plus $325 nonrefundable application fee (NJ).
3. No information provided.
4. If less than 10 years since passing a written examination for licensure in another state, $550 for endorsement requiring SPEX exam.
5. A late penalty fee of $350 is charged if renewal is not submitted by February 1 of each year. License automatically expires May 1, if renewal and late penalty fee are not submitted.
6. Nonresidents $600. Penalty fee of $100 is charged if renewal is not submitted by July 31 in the year of renewal.
7. Federation of State Medical Boards administers examination.
8. Undetermined at this time.
9. $140 active; $55 inactive (MT); $150 inactive (NV); $270 biennial inactive or out-of-state (OR); $50 inactive (NV).
11. U.S./Canadian is $20; IMG is $80.
12. Plus $25 if initial applicant.

* NL indicates no limit.

¹ No information provided.
² There are, however, requirements for remedial training after 2 failed attempts.
³ Near completion of 2 years.
⁴ Varies by specialty. Canadian training not accepted.
⁵ An applicant who has passed the ECFMG exam before 7/1/84 shall have satisfactorily completed 3 years of GME in a program approved by the Board in a board-approved hospital or institution.
⁶ An applicant who fails to achieve a passing score on USMLE Step 3 within 5 years from the first time he or she sat for USMLE Step 3 shall not be eligible to again sit for USMLE Step 3 until the applicant has completed 1 year of postgraduate clinical training in a program approved by the Board in a board-approved hospital or institution.
⁷ After 5 attempts, candidate must demonstrate additional education, training or experience acceptable to the Board, before being permitted to repeat the examination (NJ); after 3 attempts, further training is required (OK).
⁸ Must repeat the entire sequence if not passed within 7 years.
⁹ Must be enrolled in a GME program.

Appendix D

Graduate Medical Education Programs Offering Shared Residency Positions

In a shared residency, two resident physicians share one position, usually alternating months on clinical rotations with time off to devote to family, research, or other interests. To obtain a shared residency position through the National Residency Matching Program (NRMP), two applicants who have enrolled separately in the NRMP must indicate their interest in sharing a single position. Further information on shared residency positions can be obtained from individual program directors or from the NRMP; 2450 N St NW/Ste 201, Washington, DC 20037-1141, 202 828-0566.

Additional information on programs included in this list can be found in Section III, Appendix A, and in the AMA-FREIDA (Fellowship and Residency Electronic Database Access system), available from the American Medical Association at the following address: AMA Order Department, PO Box 109060, Chicago, IL 60610 (800 621-9385).
