   7. The faculty should evaluate at least annually the availability of resources for the program, the contribution of each institution participating in the program, the financial and administrative support of the program, the volume and variety of patients available to the program for educational purposes, the performance of members of the faculty, and the quality of supervision of residents.

8. To provide the greatest depth of knowledge in a variety of subjects, it is highly desirable that the faculty possess special knowledge in several different urological domains such as pediatric urology; female urology; renal transplantation; renal vascular disease; oncology; infertility; impotence, and endocrinology; stone disease; and urodynamics.

C. Other Program Personnel
   Programs must be provided with the additional professional, technical, and clerical personnel needed to support the administration and educational conduct of the program.

D. Directors at Participating Institutions
   1. There must be a qualified urologist appointed by and responsible to the program director in each geographically separate institution. This urologist must be responsible for the education of the residents and must supervise the educational activities of the urology faculty in that institution.
   2. These appointments should be for a 1-year period and should be renewable to ensure continuity of leadership.
   3. The urology director at each participating institution must have the majority of his or her clinical responsibilities based at that institution.

IV. Facilities and Resources
   There must be adequate space and equipment for the educational program, including meeting rooms; classrooms with audiovisual and other educational aids; office space for staff; pertinent library materials; and diagnostic, therapeutic, and research facilities.
   A. Within each institution, bed space sufficient for the needs of the urology service must be provided.
   B. Technologically current diagnostic and treatment facilities providing cystoscopy, imaging with biopsy, imaging with percutaneous access to the kidney, ultrasound with biopsy, endourology, laser, and urodynamics equipment must be present. The use of video imaging for educational purposes is desirable.
   C. An extracorporeal shock wave lithotripsy facility must be available for resident education in the treatment of urinary calculi.
   D. Residents must have access to outpatient facilities, clinic, and office space for preoperative evaluation and postoperative follow-up for cases for which the resident has responsibility.
   E. A medical records department that facilitates both quality patient care and education must be available. Clinical records must be maintained to ensure easy and prompt access at all times.
   F. Residents must be provided with adequate office, sleeping, lounge, and food facilities during assigned duty hours. Adequate clerical support services also must be provided.
   G. Institutions should provide adequate resources for research, such as statistical consultation and computer services. Research laboratories, while not mandatory for accreditation, should be available.
   H. There must be access to an on-site library or to a collection of appropriate texts and journals in each institution that participates in a residency program. On-site libraries and/or collections of texts and journals must be readily available during nights and weekends. Library services should include the electronic retrieval of information from medical databases.

V. The Educational Program

A. Program Design
   1. The program director and faculty must prepare and implement written educational goals for the program.
2. The program design and/or structure must be approved by the RRC as a part of the regular review process.

B. Conferences
1. A comprehensive, organized course of study must be developed to include educational conferences that are well-defined, documented, and regularly scheduled. The conferences must include a combined morbidity and mortality conference for all participating hospitals, urological imaging, urological pathology, journal review, and other subjects having educational value in the basic and clinical domains of urology. The domains of urology are andrology, infertility, impotence, sexuality; calculus disease, endourology, extracorporeal shock wave lithotripsy; female urology; infectious disease; neurourology; obstructive disease; oncology; pediatric urology; psychological disorders; renovascular disease; surgery of the adrenal; renal transplantation; trauma; and urodynamics.

2. A list of the conferences must be maintained and available for review at the time of the site visit. The list should include the names of those attending, the subjects discussed, and the principal speaker.

3. Conferences should be well attended by both residents and faculty, and such attendance must be documented.

4. A faculty member should supervise each conference to ensure that a worthwhile educational experience is provided.

C. Clinical Component
1. A sufficient number and variety of adult and pediatric patients with urologic disease must be available for resident education. Resident experience with medical and surgical patients must extend beyond common urological problems to include all of the urology domains and areas pertinent to urology as a medical discipline.

2. Generally equivalent and adequate distribution of operative procedures among the residents must be demonstrated. Significantly unequal experience in volume and/or complexity of operative procedures among the residents demonstrates noncompliance with these requirements.

3. All patients on the urology service must be reviewed by the faculty on regular teaching rounds with the residents according to a predetermined schedule.

D. Graded Responsibility
1. The program must provide the residents with experience in direct and progressively responsible patient management as they advance through the program. The educational program must culminate in sufficiently independent responsibility for clinical decision making to ensure that the graduating resident has developed sound clinical judgment and possesses the ability to carry out appropriate management plans.

2. The level of resident responsibility should be increased progressively with each year of education. This includes responsibility in such areas as patient care, leadership, teaching, organization, and administration. Appropriately qualified senior residents may supervise or act as consultants to junior residents.

3. The resident should have responsibility under supervision for the total care of the patient, including initial evaluation, establishment of diagnosis, selection of appropriate therapy, implementation of therapy, and management of complications. The resident must participate in the continuity of patient care through preoperative and postoperative clinics and inpatient contact.

4. When residents participate in preoperative and postoperative care in a clinic or private office setting, the program director must ensure that the resident functions with an appropriate degree of responsibility under adequate supervision.

E. Supervision
1. The program director must ensure, direct, and document proper supervision of residents at all times. A supervising urologist must be responsible for each patient. The supervising urologist should see the patient, discuss the case with the resident, and write or countersign notes.

2. Residents must be provided with rapid, reliable systems for communicating with supervising residents and faculty. Supervising physicians or supervising residents with appropriate experience for the severity and complexity of the patient's condition must be available at all times on site. The responsibility or independence given to residents in patient care should depend on each resident's knowledge, manual skill, experience, the complexity of the patient's illness, and the risk of the operation.

F. Duty Hours
1. Physicians must have a keen sense of personal responsibility for continuing patient care and must recognize that their obligation to patients is not automatically discharged at any given hour of the day or any particular day of the week. Duty hours and nights and weekend call for residents must reflect the concept of responsibility for patients and provide for adequate patient care. However, residents must not be required regularly to perform excessively difficult or prolonged duties. It is the responsibility of the program director to ensure assignment of reasonable in hospital duty hours.

2. Residents at all levels should, on average, have the opportunity to spend at least 1 full day out of 7 free of scheduled hospital duties and should be on call in the hospital no more than every third night, except in the maintenance of continuity of care.

3. There should be adequate opportunity to rest and to sleep when on call for 24 hours or more. On-call rooms arranged to permit adequate rest and privacy must be available for each resident on night duty in the hospital.

4. There should be adequate backup support if the volume of patient care required jeopardizes the quality of patient care during or following assigned periods of duty.

5. Residency is a full-time responsibility. Activities outside the educational program must not interfere with the resident's performance in the educational process as defined in the agreement between the institution and the resident.

G. Scholarly activity
The faculty and residents should be involved in activities that keep them abreast of current developments in medicine and that enable them to explore new directions in the science of urology. Because research also offers an important opportunity for the application of the basic sciences to clinical problems, it is an essential part of the preparation of the resident for a lifetime of self-education after the completion of the formal residency program.

1. Faculty scholarly activities
The responsibility for establishing and maintaining an environment of inquiry and scholarship rests with the faculty. While not all members of the faculty must be investigators, the faculty as a whole must demonstrate broad involvement in scholarly activity. This activity should include
   a. participation of the faculty in clinical discussions, rounds, and conferences in a manner that promotes a spirit of inquiry and scholarship. Scholarship implies an in-depth understanding of basic mechanisms of normal and abnormal states and the application of current knowledge to practice.
   b. participation in journal clubs and research conferences.
   c. participation in regional or national professional and scientific societies, particularly through presentations at the organizations' meetings and publication in their journals.
participation in research, particularly in projects that are funded following peer review or result in publication or presentations at regional and national scientific meetings.

2. Resident scholarly activities

a. The residents must be provided with research exposure sufficient to result in an understanding of the basic principles of study design, performance, analysis, and reporting, including statistics and epidemiology. The research exposure may be clinical or basic in nature and should reflect careful advice and planning with the faculty.

b. The residents should be exposed to developments outside their own program by resident attendance at regional or national meetings and other educational conferences or by visits to the program from recognized authorities from other institutions. A listing of these activities should be made available at the time of review.

H. Related Disciplines

Because clinical problems often involve multidisciplinary care, consultative support from other disciplines must be available. The disciplines of internal medicine, surgery, pediatrics, obstetrics and gynecology, pathology, and radiology should be available to facilitate an appropriate educational environment.

I. Appointment of Subspecialty Residents

1. The appointment of subspecialty residents for special education must not dilute or detract from the educational opportunities of regular appointed urology residents.

2. Any program with subspecialty residents must submit a clear statement of the areas of education, clinical responsibilities, and duration of the educational program. This statement must be supplied to the RRC at the time of the site visit. A log detailing the operative experience of the subspecialty resident must be submitted with the urology residents' logs at the time of the site visit.

3. If subspecialty residents detract from the education of the urology residents, the accreditation status of the program may be affected adversely.

VI. Evaluation

A. Resident Evaluation

1. The program should develop mechanisms for residents to demonstrate the acquisition of fundamental knowledge, attitudes, and skills necessary for current urologic practice. Each program must develop and use specific performance measures such as inservice examinations. At the conclusion of the educational program, residents should be qualified to provide competent care.

2. Written evaluations of resident performance are required at least semiannually and must be reviewed formally and communicated in a timely manner to the resident. Subsequent analysis of these evaluations should guide the program director and faculty in judging the strengths and weaknesses of individual residents.

3. Residents must be advanced to positions of higher responsibility based on evidence of their satisfactory progressive scholarship and professional growth.

4. A permanent record of evaluation for each resident must be maintained and must be accessible to the resident and other authorized personnel.

5. Each resident must be provided with a written final evaluation. This evaluation must include a review of the resident's performance during the final period of education and should verify that the resident has demonstrated the ability to practice competently and independently. This final evaluation should be part of the resident's permanent record maintained by the institution.

B. Faculty Evaluation

The teaching ability, commitment, clinical knowledge, and scholarly activities of faculty require review and confidential evaluation at least annually. A summary of the review must be communicated directly to each faculty member by the program director. Confidential resident evaluation must be a part of this review.

C. Program Evaluation

1. The educational effectiveness of the program must be evaluated in a systematic manner. In particular, the quality of the curriculum and the extent to which educational goals have been met by residents must be assessed. Written confidential evaluations by residents should be utilized in this process.

2. Programs must conduct and document evidence of periodic evaluations of the entire program at all participating institutions, to include

a. evidence of satisfactory attainment of educational goals,

b. attention to the needs of the residents, especially regarding the balance between educational and service components of the program,

c. adequate performance of teaching responsibilities by the faculty,

d. performance of residents on examinations such as the inservice examination and the American Board of Urology Qualifying (Part I) and Certifying (Part II) Examinations.

3. One measure of the quality of a program is the performance of its graduates on the examinations given by the American Board of Urology. The RRC may consider this information as part of the overall evaluation of the program.

VII. Board Certification

Residents who plan to seek certification by the American Board of Urology should communicate with the executive secretary of the board to be certain of the requirements for acceptance as a candidate for certification.

ACGME: June 1996 Effective: July 1997

Program Requirements for Residency Education in Pediatric Urology (Urology)

I. Scope of Training

Specialized training in pediatric urology should cover all aspects of congenital anomalies, childhood-acquired urologic problems such as tumors and trauma, and overlapping problems of adolescence. The subspecialty training in pediatric urology must provide an experience of sufficient level for the trainee to acquire advanced skills in the management of congenital anomalies and pediatric urologic problems.

II. Duration of Training

To be accredited, pediatric urology programs must contain 1 continuous clinical year taken subsequent to the completion of an accredited residency in urology.
III. Institutional Requirements

A. A residency training program in pediatric urology can be provided only in conjunction with an Accreditation Council for Graduate Medical Education-accredited urology residency. The institution sponsoring the pediatric urology program must have sufficient volume and variety of pediatric urology experience to meet the needs of the trainee without compromising the quality of resident training in general urology. The pediatric urology program must be centered at a children's hospital or a medical center with major pediatric medical and surgical subspecialties. The sponsoring institution of the pediatric urology program may seek a complementary affiliation with other institutions that offer significant educational opportunities to the residency program.

B. To be considered for accreditation, the institution should have a minimum of 500 major pediatric urology surgical procedures per year and more than 2000 pediatric urological outpatient visits per year.

C. Diagnostic facilities should include state-of-the-art radiologic, ultrasonographic, and urodynamic equipment suitable for the care of patients.

D. Program Research and Scholarly Activity

Graduate medical education must take place in an environment of inquiry and scholarship, in which residents participate in the development of new knowledge, learn to evaluate research findings, and develop habits of inquiry as a continuing professional responsibility.

1. Scholarly Activity

   The responsibility for establishing and maintaining an environment of inquiry and scholarship rests with the faculty. While not all members of a faculty must be investigators, the staff as a whole must demonstrate broad involvement in scholarly activity. This activity should include:

   a. Active participation of the faculty in clinical discussions, rounds, and conferences in a manner that promotes a spirit of inquiry and scholarship. Scholarship implies an in-depth understanding of basic mechanisms of normal and abnormal states and the application of current knowledge to practice.

   b. Participation in journal clubs and research conferences.

   c. Active participation in regional or national professional and scientific societies, particularly through presentations at the organizations' meetings and publication in their journals.

   d. Participation in research, particularly in projects that are funded following peer review and/or result in publication or presentations at regional and national scientific meetings.

   e. Offering of guidance and technical support (e.g., research design, statistical analysis) for residents involved in research.

   f. Provision of support for resident participation in scholarly activities.

2. Library

   a. Residents must have ready access to a major medical library, either at the institution where the residents are located or through arrangement with convenient nearby institutions.

   b. Library services should include the electronic retrieval of information from medical databases.

   c. There must be access to an on-site library or to a collection of appropriate texts and journals in each institution participating in a residency program. On-site libraries and/or collections of texts and journals must be readily available during nights and weekends.

IV. Educational Program

The director and faculty of a program must prepare and comply with written educational goals for the program.

A. Program Design

All educational components of the program should be related to program goals.

1. The program design and/or structure must be approved by the Residency Review Committee (RRC) as part of the regular review process.

2. Participation by any institution providing more than 2 months of education in the program must be approved by the RRC.

B. Program Course of Study

The educational program must provide clinical experience to develop clinical competence in pediatric urology. The clinical component of the program must provide the following areas:

1. Experience in surgical aspects of pediatric urology must be documented in an accurate, comprehensive, operative log maintained by the resident and reviewed by the program director each quarter of the year.

2. Experience in outpatient management of pediatric urologic disease, with graded responsibility for patient care, must be documented and similarly maintained.

3. Familiarity with all state-of-the-art modalities of imaging.

5. Management of patients with urologic tumors.

6. Management of patients with urologic trauma.

7. Experience with the multidisciplinary management of nephrologic disease.

8. Exposure to the neonatal units and intensive care units for all pediatric ages.

9. Participation in a multidisciplinary setting of myelomeningocele and other neuropathic bladder entities.

10. Experience with the multidisciplinary management of patients with problems relating to sexual development and medical aspects of intersex states.

C. Pediatric Urology Resident Duty Hours

The same resident duty hours and supervision requirements apply to pediatric urology residents as provided in the Program Requirements for Residency Education in Urology.

V. Faculty

The program director and faculty are responsible for the general administration of the program, including those activities related to the recruitment, instruction, supervision, counseling, evaluation, and advancement of residents and the maintenance of records related to program accreditation.

A. Program Director

There must be a single program director responsible for the program. The program director should be based at the institution where the education occurs and must be dedicated to and actively engaged in pediatric urology education.

1. Qualifications of the Program Director

   a. Requisite and documented clinical, educational, and administrative abilities and experience in all aspects of pediatric urology.

   b. Licensure to practice medicine in the state where the institution that sponsors the program is located. (Certain federal programs are exempted).
c. Certification by the American Board of Urology or suitable equivalent qualifications and qualifications and experience in the practice of pediatric urology.
d. Appointment in good standing to the medical staff of an institution participating in the program.

2. Responsibilities of the Program Director
a. Preparation of a written statement outlining the educational goals of the program with respect to knowledge, skills, and other attributes of residents at each level of training and for each major rotation or other program assignment. This statement must be distributed to residents and faculty members. It should be readily available for review.
b. Selection of residents for appointment to the program in accordance with institutional and departmental policies and procedures.
c. Selection and supervision of the faculty and other program personnel at each institution participating in the program.
d. The supervision of residents through explicit written descriptions of supervisory lines of responsibility for the care of patients. Such guidelines must be communicated to all members of the program staff. Residents must be provided with prompt, reliable systems for communication and interaction with supervisory physicians.
e. Regular evaluation of residents' knowledge, skills, and overall performance, including the development of professional attitudes consistent with being a physician.
f. Implementation of fair procedures, as established by the sponsoring institution, regarding academic discipline and resident complaints or grievances.
g. Monitoring resident stress, including mental or emotional conditions inhibiting performance or learning and drug- or alcohol-related dysfunction. Program directors and faculty should be sensitive to the need for timely provision of confidential counseling and psychological support services to residents. Educational situations that consistently produce undesirable stress on residents must be evaluated and modified.
h. Preparation of an accurate statistical and narrative description of the program as requested by the RRC.

B. Faculty
1. There must be a sufficient number of faculty with documented qualifications to instruct and supervise adequately all pediatric urology residents in the program. Members of the faculty must be able to devote sufficient time to meet their supervisory and teaching responsibilities.
2. All members of the faculty must demonstrate a strong interest in the education of residents, sound clinical and teaching abilities, support of the goals and objectives of the program, a commitment to their own continuing medical education, and participation in scholarly activities.
3. A member of the faculty of each participating institution must be designated to assume responsibility for the day-to-day activities of the program at that institution, with overall coordination by the program director.
4. The faculty must be organized and have regular documented meetings to review program goals and objectives as well as program effectiveness in achieving them. At least one resident representative should participate in these reviews.
5. The faculty should periodically evaluate the utilization of the resources available to the program, the contribution of each institution participating in the program, the financial and administrative support of the program, the volume and variety of patients available to the program for educational purposes, the performance of members of the faculty, and the quality of supervision of residents.

C. Other Program Personnel
Programs must be provided with additional professional, technical, and clerical personnel needed to support the administration and educational conduct of the program.

VI. Evaluation
The pediatric urology program must have ongoing assessment of the following components of the educational program: resident performance, faculty performance, patient care, and program objectives.

A. Pediatric Urology Resident Evaluation
The program director, with participation of members of the faculty, shall:
1. At least semiannually evaluate the knowledge, skills, and professional growth of the residents, using appropriate criteria and procedures.
2. Communicate each evaluation to the resident in a timely manner.
3. Advise residents to positions of higher responsibility only on the basis of evidence of their satisfactory progressive scholarship and professional growth.
4. Maintain a permanent record of evaluation for each resident and have it accessible to the resident and other authorized personnel.
5. Provide a written final evaluation for each resident who completes the program. The evaluation must include a review of the resident's performance during the final period of training and should verify that the resident has demonstrated sufficient professional ability to practice competently and independently. This final evaluation should be part of the resident's permanent record maintained by the institution.

B. Program and Faculty Evaluation
The educational effectiveness of the program and faculty must be evaluated in a systematic manner. In particular, the quality of the curriculum and the extent to which the educational goals have been met by residents must be assessed. Confidential, written evaluations by residents should be utilized in this process.

VII. Board Certification
Individuals should communicate with the secretary of the American Board of Urology as to the status of requirements for certification.

ACGME: February 1990 Effective: July 1995
Program Requirements for the Transitional Year

I. Purpose of a Transitional Year

The transitional year must be designed to fulfill the educational needs of medical school graduates who:

A. Have chosen a career specialty for which the respective program in graduate medical education has, as a prerequisite, 1 year of fundamental clinical education, which may also contain certain specific experiences for development of desired skills; or
B. Have not yet made a career choice or specialty selection and desire a broad-based year to assist them in making that decision; or
C. Are planning to serve in organizations such as the public health service or on active duty in the military as general medical officers or primary flight/undersea medicine physicians prior to completing a program in graduate medical education; or
D. Have at least 1 year of fundamental clinical education prior to entering a career path that does not require broad clinical skill, such as administrative medicine or nonclinical research.

The objective of the transitional year is to provide a well-balanced program of graduate medical education in multiple clinical disciplines designed to facilitate the choice of and/or preparation for a specific specialty. The transitional year is not meant to be a complete graduate education program in preparation for the practice of medicine.

The sponsoring institution and the transitional year program must demonstrate substantial compliance with both the Institutional Requirements of the Essentials of Accredited Residencies and the Program Requirements that follow.

II. Administration

A. Sponsorship

1. The transitional year program must be offered by an institution and its affiliate(s) conducting two or more Accreditation Council for Graduate Medical Education (ACGME)-accredited residency programs, which must participate in the education of transitional year residents. One of these accredited residency programs must be identified as the sponsoring program. Other disciplines may serve as participants in the transitional year.

2. Each of the accredited sponsors must exist in the parent institution and its affiliate(s) offering the transitional year. The sponsors and participating disciplines must represent a component of the transitional year program.

3. Programs that do not regularly provide educational experiences for the transitional year residents should not be designated as participating disciplines.

4. One of the accredited sponsors must provide experiences for the transitional year residents to develop fundamental clinical skills. Those disciplines considered to provide these experiences are family practice, internal medicine, obstetrics/gynecology, pediatrics, and general surgery.

5. The sponsoring programs and participating disciplines must provide written goals and objectives for the areas of knowledge and skills to be developed by the transitional year resident and demonstrate a commitment to meeting those goals and objectives through the provision of quality teaching and allocation of adequate educational resources. These goals and objectives must be distributed to the residents and be readily available for review.

B. Program Director

1. There must be a single program director responsible for the program. The process by which the program director of the transitional year program is appointed must be consistent with the policies for the appointment of other program directors in the sponsoring institution.

2. The program director's tenure should be of sufficient duration to assure continuity of the educational program. The program director should be appointed for a minimum of 3 years.

3. The program director must be a physician with demonstrated and documented clinical, educational, and administrative abilities and experience in graduate medical education. The qualifications of the program director must include:

   a. The ability to devote the time required for program development, implementation, administration, and supervision
   b. Certification by a specialty board or equivalent qualifications
   c. Licensure to practice medicine in the state where the institution that sponsors the program is located. (Certain federal programs are exempt.)
   d. Appointment in good standing to the medical staff of an institution participating in the program.

4. The program director must coordinate the educational experiences within the separate categorical programs and participating disciplines. Sufficient authority must be delegated to the program director by the sponsoring institution to facilitate effective organization and management.

5. The responsibilities of the program director must include the following:

   a. To select the residents for appointment to the program in accordance with institutional policies and procedures.
   b. To select and supervise the teaching staff and other program personnel at each institution participating in the program.
   c. To arrange and implement educational programs in fundamental clinical skills.
   d. To counsel transitional year residents in the development of a curriculum appropriate to their individual learning needs and career goals.
   e. To apply to the transitional year residents those institutional policies that apply to all other residents in the institution.
   f. To develop and implement systems for periodic evaluation of (1) the quality of the educational experience and program performance, (2) resident performance, (3) resident assessment of the program's educational components including the faculty, and (4) faculty performance.
   g. To advance residents to positions of higher responsibility only on the basis of evidence of their satisfactory progressive scholarship and professional growth.
   h. To maintain records of (1) all residents appointed to the transitional year program; (2) the transitional year objectives, curriculum content offered by the program; and the curriculum undertaken by each resident; (3) the performance evaluations; (4) the residents' subsequent training or other professional activities until they enter a categorical program or determine a career path. Tracking of residents must be done for at least 1 year and need not exceed 5 consecutive years.
   i. To implement fair procedures, as established by the sponsoring institution, regarding academic discipline and resident complaints or grievances.
   j. To monitor resident stress, including mental or emotional conditions inhibiting performance or learning and drug- or alcohol-related dysfunction. Program directors and teaching staff should be sensitive to the need for timely provision of confidential counseling and psychological support services to residents. Training situations that consistently produce undesirable stress on residents must be evaluated and modified.
   k. To prepare statistical, narrative, and progress reports, as requested by the Transitional Year Review Committee.
Program Requirements for the Transitional Year

1. To prepare for and participate in Transitional Year Review Committee surveys and to participate in Residency Review Committee surveys of the sponsoring programs.

2. To inform the Transitional Year Review Committee of the appointment of a new program director when such changes occur.

C. Institutional Coordination Committee

1. An institutional coordination committee must be appointed and have major responsibility for conducting and monitoring the activities of the transitional year program. It should be convened by the parent institution at least four times a year. This committee should be composed of but not limited to the transitional year program director, the program directors (or designees) of disciplines regularly included in the curriculum, and the chief executive officer(s) (or designee[s] in hospital administration) of the parent institution.

2. The responsibilities of the committee include the following:
   a. To recommend to the governing body of the sponsoring institution policies that establish the educational content of the transitional year and the allocation of resources for the effective conduct of the program.
   b. To ensure that the quality of medical care provided by transitional year residents is equivalent to that expected of first-year residents in other ACGME-accredited programs within the institution.
   c. To monitor the impact of the transitional year program on the categorical residents' programs to ensure that there is no compromise of the educational resources. This includes monitoring the adequacy of the number of patients, variety of illnesses, educational materials, teaching/attending physicians, and financial support.
   d. To review at least twice a year the transitional year residents' performance evaluations and their assessment of the components of the transitional year, to include the faculty.
   e. To ensure within acceptable standards of medical care that the educational opportunities provided transitional year residents are equivalent to those provided first-year residents in the categorical programs in which the transitional year residents participate.
   f. To ensure that the quality of education provided by the nonaccredited components of the program is reasonably comparable to that provided to the first-year residents in accredited programs.
   g. To approve the curriculum of each transitional year resident, which has been planned with the transitional year program director in accordance with the individual needs of the residents and the Program Requirements of the Transitional Year.
   h. To ensure that the transitional year program undergoes a periodic internal review in accordance with the general institutional requirements.
   i. To maintain records documenting the committee's activities for each of the above requirements and to have copies of these records available for transmission to the Transitional Year Review Committee.

III. Faculty

Qualifications/Responsibilities

1. The faculty of the transitional year program must be the same persons or have qualifications equivalent to those of the faculty of the participating categorical programs.

2. There must be a sufficient number of teaching staff with documented qualifications to instruct and supervise adequately all the residents in the program. Members of the teaching staff must be able to devote sufficient time to meet their supervisory and teaching responsibilities.

3. All members of the teaching staff must demonstrate a strong interest in the education of residents, sound clinical and teaching abilities, support of the goals and objectives of the program, a commitment to their own continuing medical education, and participation in scholarly activities.

4. A member of the teaching staff of each participating institution must be designated to assume responsibility for the day-to-day activities of the rotation at that institution, with overall coordination by the program director.

5. There must be active participation of the teaching staff in clinical discussions, rounds, and conferences in a manner that promotes a spirit of inquiry and scholarship. Scholarship implies an in-depth understanding of basic mechanisms of normal and abnormal states and the application of current knowledge to practice.

6. The faculty providing educational experiences in the disciplines not accredited by ACGME must have credentials within their respective specialties similar in professional status to the other transitional year faculty.

7. The teaching and supervision of transitional year residents must be the same as that provided residents in categorical programs.

IV. Curriculum

A. Duration and Content

1. The duration of the transitional year program must be 1 year (12 calendar months).

2. At least 6 months of each resident's curriculum must be provided by disciplines offering fundamental clinical skills as defined above.

3. Other rotations should be a minimum of 1 month or 4 weeks in duration to ensure a reasonable continuity of education and patient care.

4. The curriculum should include emphasis not only on clinical problems but also on discussion of moral, ethical, legal, social, and economic issues.

B. Skill Development

1. During the rotations in disciplines offering fundamental clinical skills, the transitional year residents should develop the skills necessary to obtain a medical history; perform a complete physical examination; define a patient's problems; develop a rational plan for diagnosis; and implement therapy based on the etiology, pathogenesis, and clinical manifestations of various diseases.

2. Educational experiences must ensure development not only of cognitive and procedural/technical skills, but also of humane qualities that enhance interactions between the physician, the patients, and the patients' families.

C. Electives

The transitional year residents should have no fewer than 2 months of electives. Elective rotations should be determined by the needs of the individual resident and/or the requirements of the future residency program chosen.

D. Emergency Medicine

1. The transitional year residents must have a 1-month rotation in emergency medicine under the supervision of qualified teaching staff within the sponsoring or an affiliated institution.

2. The transitional year residents should have experience in the diagnosis and management of all types of patients treated in an institution's emergency department.

E. Ambulatory Care

1. The transitional year residents should have at least 1 month of experience in ambulatory care other than that acquired in the
emergency department. This experience may consist of a 1-
month block of time or be divided into lesser periods of time on
different services to approximate 1 month.
2. Outpatient experience must be obtained within the ambulatory
programs of the sponsoring or affiliated institutions.

F. Conferences/Rounds
All disciplines participating in the transitional year program must
involve the transitional year residents in their departmental pro-
grams, such as seminars, conferences, and grand rounds.

G. Service vs Educational Objectives
The transitional year program must be designed to meet the educa-
tional needs of the residents. Service obligations of the sponsoring
institutions must be secondary to the transitional year educational
objectives.

H. Number of Residents
1. Program applications will be reviewed for assurance that there is
an appropriate balance between the number of transitional year
residents in training and the educational resources available to
them.
2. Any proposed change in the number of transitional year residents
must receive prior approval by the Transitional Year Review Com-
mittee. Programs that fail consistently to fill the designated num-
er of approved positions may be asked to reduce the number
offered.

I. Support Facilities/Departments
1. Pathology, radiology, and nuclear medicine facilities must exist in
the parent and affiliated institutions. These entities must be di-
rected by qualified physicians who are committed to medical edu-
cation and to providing competent instruction to the transitional
year residents when patients require these diagnostic and/or
therapeutic modalities.
2. During working and on-call hours, the transitional year residents
must be provided with adequate sleeping, lounge, and food facili-
ties. There should be adequate backup so that patient care is not
jeopardized during or following assigned periods of duty. Support
services must be such that the transitional year residents do not
spend an inordinate amount of time in nonelective activities that
can be discharged properly by other personnel. Ancillary
support services, facilities, and personnel must contribute to the
transitional year program in accordance with the Institutional
Requirements of the Essentials of Accredited Residencies.
3. Transitional year residents must be provided with rapid, reliable
systems for communicating with supervising residents and
attenders.
4. Residents must have ready access to a major medical library,
either at the institution where the residents are located or
through arrangement with convenient nearby institutions. Lib-
rary services should include the electronic retrieval of informa-
tion from medical databases. There must be access to an on-site
library or to a collection of appropriate texts and journals in each
institution participating in a residency program. On-site libraries
and/or collections of texts and journals must be readily available
during nights and weekends.

V. Resident Supervision and Working Environment

A. Supervision
1. The transitional year program director and the faculty of the disci-
plines participating in the transitional year must ensure, direct,
and document proper supervision of the residents in the program
at all times.
2. At least 6 months of each transitional year resident's rotations
must be on clinical services where he or she works directly with
more senior residents in ACGME-accredited programs. On serv-
cices where senior residents are not present, there must be effective
supervision by faculty and evaluation systems in place.
3. Attending physicians or senior residents with experience appropri-
ate for the severity and complexity of a patient's condition must
be available at all times on site.
4. The responsibility or independence given to the transitional year
residents by the supervising physician for the care of patients
should depend on the residents' knowledge, manual skill, experi-
ence, and the complexity of the patients' illnesses and the risk of
any procedures that residents perform.

B. Hours
1. Graduate training requires a commitment to continuity of patient
care. This continuity of care takes precedence without regard to
the time of day, day of the week, number of hours already
worked, or on-call schedules.
2. The transitional year program director and the faculty of the disci-
plines participating in the transitional year must establish an envi-
ronment that is optimal both for resident education and for
patient care, while ensuring that undue stress and fatigue among
residents are avoided. It is the responsibility of the transitional
year program director and faculty to ensure that in-hospital duty
hours shall correspond to the program requirements of the catego-
rical programs to which the transitional year resident is as-
signed so that residents are not required to perform excessively
difficult or prolonged duties regularly.
3. A distinction must be made between on-call time in the hospital
and on-call availability at home. Vis-a-vis actual hours worked.
The ratio of hours worked to on-call time may vary with each rota-
tion, and therefore prescribes a mandated pattern of established
hours.

VI. Assessment

Performance Evaluations
1. The transitional year program director must receive a perfor-
man ce evaluation of each transitional year resident by the par-
ticipating discipline or each resident's completion of a rotation
in that discipline. These evaluations must include an assessment
of the resident's knowledge, skills, and professional growth using
appropriate criteria and procedures.
2. At least twice a year, the transitional year residents must be appr
ised individually by the program director of their evaluations.
These evaluations must be communicated to the resident in a
timely manner.
3. The program director must provide a written final evaluation for
each resident who completes the program. The evaluation must
include a review of the resident's performance during the final
period of training and should verify that the resident has demon-
strated sufficient professional ability to advance into a categori-
cal program.
4. The transitional year residents must provide written evaluations
of the adequacy, quality, and appropriateness of each component
of their educational program, including an evaluation of the fac-
tulty members.
5. The program director must maintain a permanent record of eval-
uations, as noted in this section, for each resident and have it ac-
cessible to the resident and other authorized personnel. These
records must be made available for inspection during the process
of accreditation of the program.
VII. Completion of Training

A. Institutional Certificates
Institutional certificates to be awarded at the conclusion of training in the transitional year program must clearly indicate that the experience was that of a Transitional Year.

B. Continuation of Residency Training
If more than 20% of the transitional year residents, when averaged over 5 years, enter clinical practice without further training, such will be considered as evidence that a program is ineffective in achieving its essential objectives and may be cause for an adverse accreditation action.

ACGME: June 1991  Effective July 1995
Section III
Accredited Graduate Medical Education Programs

Introduction
This section of the Directory contains a list of graduate medical education (GME) programs accredited by the Accreditation Council for Graduate Medical Education (ACGME).
Programs are listed by specialty under the state and city of the sponsoring institution (refer to sample, below). Listed under the program title is the institution that sponsors the residency program, followed by the primary clinical site (if one has been identified) and the major participating institution(s). A primary clinical site is listed when the residency education takes place in a city different from the one in which the sponsoring institution is located. Major participating institutions are those that provide a major portion of required education. Hospitals and other institutions that provide rotations of less than one-sixth of the program length or less than a total of 6 months are not listed in the Directory.
Listings contain the program director’s name, address, telephone and fax numbers, and e-mail address (where available). Additional information on each program includes the ACGME-accredited length of the program, the program size (i.e., the total number of filled and unfilled positions for 1997-1998 as reported by the program director), and the number of graduate year one (G1) positions, if any. (Note: The published program length reflects the length approved by the Residency Review Committee. The program may require additional years.) The program identification number appears at the bottom of each listing; the first three digits of this number indicate the specialty/subspecialty code (see “Specialties/Subspecialties with ACGME Program Requirements,” p 333) and the next two the state code.

Sample Listing
Title of the Program
Sponsor: Sponsoring institution of the program
Primary Clin. Site: The program’s primary clinical site
Major Participating Institution(s): The program’s major participating institution(s)
Program Director:
Name
Program Co-Director Name
Address
City/State/Zip Code
Telephone Number, Fax Number
E-mail Address
Program ID: 000-0000-000

Most programs start in June or July, but several begin in January or at other times. (Note: For a list of these programs, consult Graduate Medical Education Programs Offering Multiple Start Dates, 1997-1998.) For this or other information about a particular program, candidates can also contact program directors or refer to AMA FREDIA Online (Fellowship and Residency Electronic Interactive Database Access), an Internet database available through the AMA home page (http://www.ama-assn.org).
Much of the data listed on the following pages is collected by the AMA through its Annual Survey of Graduate Medical Education Programs. Programs that did not respond to the 1996 AMA survey are identified by the statement, 1996 AMA GME survey not received. Program size and G1 positions for such programs are not provided, and the listing may have inaccurate or outdated information. Programs interested in providing updated information should contact the AMA at 312 464-4639.

Graduates of medical schools not accredited by the Liaison Committee on Medical Education should carefully read Section I before applying to a program.

Graduate Medical Education Directory 1997-1998
Preventive Medicine Programs
The preventive medicine programs listed in Section III include programs that offer areas of specialization in aerospace medicine, occupational medicine, public health, and general preventive medicine. Refer to the identifying text with each program to determine the area of specialization.

Transitional Year Programs
Transitional year programs are available for physicians seeking broad clinical experience before entering GME in their chosen field or for physicians who have not yet decided on a medical specialty.

Combined Specialty Programs
Combined specialty programs (listed in Appendix A) have been approved by each respective specialty board; resident physicians completing these programs are accepted for board certification. Neither the ACGME nor the Residency Review Committees accredit combined programs; they accredit each specialty program separately. Information in the combined program list was provided by specialty boards and through the AMA Annual Survey of Graduate Medical Education Programs. Applicants to combined specialty programs are encouraged to review requirements for admission to the certification process of each board in Appendix B of this directory.

Restricted-entry GME Programs

US Armed Services Graduate Medical Education Programs
In most cases, only persons enrolled in the US Armed Services are eligible for appointment to residency positions at US Army, Navy, and Air Force hospitals and teaching institutions. These programs are identified in Section III with the text, US Armed Services Program. For further information, consult Section I, “Graduate Medical Education Information.”

Centers for Disease Control and Prevention GME Programs
GME programs at the Centers for Disease Control and Prevention (CDC) are usually open only to CDC physicians.

Programs on Probation
The Directory may include programs that are on probation. For information on a program’s current accreditation status, contact the ACGME, 515 N State St/Sie 2600, Chicago, IL 60610; 312 464-4920; 312 464-4098 Fax.

Accredited: 2 Year(s) Program Size: 6
Program ID: 200-35-21-046

Manhasset
North Shore University Hospital/NYU School of Medicine Program
Sponsor: North Shore University Hospital
Program Director:
Donald Margulies, MD
North Shore Univ Hospital
300 Community Dr
Manhasset, NY 11030
Tel: 516 662-4000  Fax: 516 662-1098
Accredited: 2 Year(s) Program Size: 2
Program ID: 200-35-21-102

New Hyde Park
Albert Einstein College of Medicine at Long Island Jewish Medical Center Program
Sponsor: Long Island Jewish Medical Center
Program Director:
Christopher J Palestro, MD
Long Island Jewish Med Ctr
279-05 76th Ave
New Hyde Park, NY 11042
Tel: 718 470-7081  Fax: 718 470-0247
Accredited: 2 Year(s) Program Size: 5
Program ID: 200-35-11-049

New York
Memorial Sloan-Kettering Cancer Center Program
Sponsor: Memorial Sloan-Kettering Cancer Center
Program Director:
Steven M Larson, MD
Memorial Sloan-Kettering Cancer Ctr
Nuclear Medicine Service
1275 York Ave
New York, NY 10021
Tel: 212 639-7373  Fax: 212 717-3263
E-mail: Larson@mskcc.org
Accredited: 2 Year(s) Program Size: 3
Program ID: 200-35-11-060

Mount Sinai School of Medicine Program
Sponsor: Mount Sinai School of Medicine
Major Participating Institution(s):
Mount Sinai Medical Center
Veterans Affairs Medical Center (Bronx)
Program Director:
Josef Machac, MD
The Mount Sinai Med Ctr
One Gustave L Levy Pl
Box 1141
New York, NY 10029-6574
Tel: 212 241-7888  Fax: 212 831-3861

Accredited: 2 Year(s) Program Size: 1
Program ID: 200-35-11-084
## Accredited Programs in Nuclear Medicine

### Northport

**Veterans Affairs Medical Center (Northport) Program**
- **Sponsor:** Department of Veterans Affairs Medical Center Northport
- **Major Participating Institution(s):** South Nassau Communities Hospital
- University Hospital-SUNY at Stony Brook

  **Program Director:** Mohan N. Antal, MD
  **Program Address:** 79 Middleville Rd (625)
  **Operation:** 11768-2290
  **Phone:** 516-281-4400
  **Fax:** 516-281-4400
  **E-mail:** mohanan@northport.vh.gov
  **Accredited Length:** 2 Year(s)  **Program Size:** 3
  **Program ID:** 200-35-21-056

### Rochester

**University of Rochester Program**
- **Sponsor:** Strong Memorial Hospital of the University of Rochester

  **Program Director:** Robert D. Karcher, MD
  **Program Address:** 601 Elmwood Ave
  **Operation:** Rochester, NY 14628-2848
  **Phone:** 716-273-1122
  **Fax:** 716-273-1031
  **E-mail:** Rad@RADROCHESTER.EDU
  **Accredited Length:** 2 Year(s)  **Program Size:** 4
  **Program ID:** 200-36-11-057

### North Carolina

**Chapel Hill**

**University of North Carolina Hospitals Program**
- **Sponsor:** University of North Carolina Hospitals

  **Program Director:** William H. McCarty, MD
  **Program Address:** CB 7510/Old Clinic Bldg
  **Operation:** Chapel Hill, NC 27599-7610
  **Phone:** 919-667-4384
  **Fax:** 919-667-5034
  **Accredited Length:** 2 Year(s)  **Program Size:** 2
  **Program ID:** 200-36-21-114

### Durham

**Duke University Program**
- **Sponsor:** Duke University Medical Center

  **Program Director:** E. Edward Coleman, MD
  **Program Address:** Duke Univ Med Ctr Sect of Nuclear Med
  **Operation:** Durham, NC 27710
  **Phone:** 919-684-7244
  **Fax:** 919-684-7135
  **E-mail:** Coleman@mc.duke.edu
  **Accredited Length:** 2 Year(s)  **Program Size:** 4
  **Program ID:** 200-36-21-060

### Winston-Salem

**Bowman Gray School of Medicine Program**
- **Sponsor:** North Carolina Baptist Hospital

  **Program Director:** Robert J. Cowan, MD
  **Program Address:** Med Ctr Bldg
  **Operation:** Winston-Salem, NC 27157-1088
  **Phone:** 336-716-6173
  **Fax:** 336-716-6198
  **Accredited Length:** 2 Year(s)  **Program Size:** 2
  **Program ID:** 200-36-11-041

### Ohio

**Cincinnati**

**Christ Hospital Program**
- **Sponsor:** Christ Hospital

  **Program Director:** Farhan (Paul) S Ramsingh, MD
  **Program Address:** 2139 Auburn Ave
  **Operation:** Cincinnati, OH 45219
  **Phone:** 513-389-1146
  **Fax:** 513-389-1414
  **Accredited Length:** 2 Year(s)  **Program Size:** 4
  **Program ID:** 200-38-21-115

**University of Cincinnati Hospital Group Program**
- **Sponsor:** University of Cincinnati Hospital Major Participating Institution(s):

  1. Children’s Hospital Medical Center
  2. Jewish Hospital of Cincinnati

  **Program Director:** Edward B Silberstein, MD
  **Program Address:** University Hospital FO Box 675577
  **Operation:** Cincinnati, OH 45267-0577
  **Phone:** 513-388-9002
  **Fax:** 513-558-7690
  **E-mail:** esilberstein@uc.edu
  **Accredited Length:** 2 Year(s)  **Program Size:** 9
  **Program ID:** 200-38-21-062

### Oklahoma

**Oklahoma City**

**University of Oklahoma Health Sciences Center Program**
- **Sponsor:** University of Oklahoma College of Medicine-Oklahoma City

  **Program Director:** E. William Allen, MD
  **Program Address:** PO Box 20001
  **Operation:** Oklahoma City, OK 73109
  **Phone:** 405-271-5141
  **Fax:** 405-271-3533
  **E-mail:** eallen@ucox.ouhsc.edu
  **Accredited Length:** 2 Year(s)  **Program Size:** 1
  **Program ID:** 200-39-21-064

### Oregon

**Portland**

**Oregon Health Sciences University Program**
- **Sponsor:** Oregon Health Sciences University

  **Program Director:** Jeffrey S. Stevens, MD
  **Program Address:** Oregon Health Sciences University
  **Operation:** Portland, OR 97201-0038
  **Phone:** 503-494-4648
  **Fax:** 503-271-7883
  **E-mail:** stevens@ohsu.edu
  **Accredited Length:** 2 Year(s)  **Program Size:** 4
  **Program ID:** 200-40-21-065

### Pennsylvania

**Philadelphia**

**Allegheny University Hospitals Program**
- **Sponsor:** Allegheny University Hospitals

  **Program Director:** Simin Dadparvar, MD
  **Program Address:** Philadelphia, PA 19107-2700
  **Phone:** 215-767-7678
  **Fax:** 215-548-5296
  **Accredited Length:** 2 Year(s)  **Program Size:** 2
  **Program ID:** 200-41-11-066

**Temple University Program**
- **Sponsor:** Temple University Hospitals

  **Program Director:** Alan H. Maurer, MD
  **Program Address:** Temple University Hospitals
  **Operation:** Philadelphia, PA 19140
  **Phone:** 215-707-5200
  **Fax:** 215-707-5200
  **Accredited Length:** 2 Year(s)  **Program Size:** 3
  **Program ID:** 200-41-11-088

**Thomas Jefferson University Program**
- **Sponsor:** Thomas Jefferson University Hospitals

  **Program Director:** Charles M. Intenso, MD
  **Program Address:** Thomas Jefferson University Hospitals
  **Operation:** Philadelphia, PA 19107
  **Phone:** 215-865-8200
  **Fax:** 215-923-0268
  **Accredited Length:** 2 Year(s)  **Program Size:** 2
  **Program ID:** 200-41-21-100

**University of Pennsylvania Program**
- **Sponsor:** Hospital of the University of Pennsylvania

  **Program Director:** Asafo Ali, MD
  **Program Address:** Dept of Nuclear Medicine
  **Operation:** Philadelphia, PA 19104
  **Phone:** 215-662-3569
  **Fax:** 215-662-5430
  **Accredited Length:** 2 Year(s)  **Program Size:** 2
  **Program ID:** 200-41-21-067
Pittsburgh
University Health Center of Pittsburgh Program
Sponsor: University Health Center of Pittsburgh
Major Participating Institution(s):
Pittsburgh Presbyterian University Hospital/UPMC
Program Director:
Maureen Brown, MD
U of Pittsburgh Med Ctr
Dept of Radiology
260 Lothrop St
Pittsburgh, PA 15213-2582
Tel: 412-647-3512 Fax: 412-647-2099
Accredited Length: 2 Year(s) Program Size: 0
Program ID: 200-41-21-104

Tennessee
Knoxville
University of Tennessee Medical Center at Knoxville Program
Sponsor: University of Tennessee Graduate School of Medicine
Major Participating Institution(s):
University of Tennessee Memorial Hospital
Program Director:
Karl F Rubner, MD
The Univ of Tennessee
Grad Sch of Med
1924 Alcoa Hwy
Knoxville, TN 37920-6999
Tel: 423-544-9961
Accredited Length: 2 Year(s) Program Size: 3
Program ID: 200-47-21-109

Galveston
University of Texas Medical Branch Hospitals Program
Sponsor: University of Texas Medical Branch Hospitals
Program Director:
Javier Villanueva-Meyer, MD
Univ of Texas Med Branch Hospitals
Section of Nuclear Medicine
301 University Blvd
Galveston, TX 77555-0703
Tel: 409 772-4916 Fax: 409 772-2860
E-mail: javier.villanueva@utmb.edu
Accredited Length: 2 Year(s) Program Size: 1
Program ID: 200-48-11-074

Puerto Rico
San Juan
University of Puerto Rico Program
Sponsor: University of Puerto Rico School of Medicine
Major Participating Institution(s):
University Medical Center (San Juan)
Program Director:
Frieda Sital De Fustin, MD
Univ of Puerto Rico/Med Sciences Campus
P.O. Box 5007
San Juan, PR 00916
Tel: 787-767-0388 Fax: 787-767-0382
Accredited Length: 2 Year(s) Program Size: 2
Program ID: 200-42-21-069

Nashville
Vanderbilt University Program
Sponsor: Vanderbilt University Medical Center
Major Participating Institution(s):
Veterans Affairs Medical Center (Nashville)
Program Director:
Dominique Lefevre, MD
Veterans Med
Radiology, Nuclear Medicine
R-1138 Med Ctr North
Nashville, TN 37232-2675
Tel: 615-222-6376 Fax: 615-222-3764
Accredited Length: 2 Year(s) Program Size: 4
Program ID: 200-47-21-072

Houston
Baylor College of Medicine Program
Sponsor: Baylor College of Medicine
Major Participating Institution(s):
Harris County Hospital District-Ben Taub General Hospital
St Luke's Episcopal Hospital
Texas Children's Hospital
Veterans Affairs Medical Center (Houston)
Program Director:
Warren H. Moore, MD
Baylor Coll of Med
Graduate Medical Education 183A
One Baylor Plaza
Houston, TX 77030
Tel: 713-791-3126 Fax: 713-791-3263
Accredited Length: 2 Year(s) Program Size: 4
Program ID: 200-48-21-074

South Carolina
Charleston
Medical University of South Carolina Program
Sponsor: Medical University of South Carolina College of Medicine
Major Participating Institution(s):
MUSC Medical Center
Ralph H Johnson Dept of Veterans Affairs Med Center
Program Director:
Kenneth M Spicer, MD PhD
Med Univ of South Carolina
171 Ashley Ave
Charleston, SC 29425

Accredited Length: 2 Year(s) Program Size: 4
Program ID: 200-56-12-061

Medical College of Wisconsin Program
Sponsor: Medical College of Wisconsin Affiliated Hospitals Inc
Major Participating Institution(s): Clement J Zablocki Veterans Affairs Medical Center Froedtert Memorial Lutheran Hospital
Program Director: Arthur Z Krasnow, MD
Milwaukee Cty Med Complex/Div of Nuclear Med
8700 W Wisconsin Ave
Box 164
Milwaukee, WI 53226
Tel: 414 777-3774 Fax: 414 771-3460
Accredited Length: 2 Year(s) Program Size: 2
Program ID: 200-56-21-080

Nuclear Radiology (Radiology-Diagnostic)

Arizona

Tucson

University of Arizona Program
Sponsor: University of Arizona College of Medicine
Major Participating Institution(s): University Medical Center
Program Director: James M Wollfenden, MD
Univ of Arizona Health Sciences Ctr
Div of Nuclear Medicine
1501 N Campbell Ave
Tucson, AZ 85724
Tel: 520 626-7709 Fax: 520 626-2412
Accredited Length: 1 Year(s) Program Size: 1
Program ID: 425-03-21-011

Connecticut

New Haven

Yale-New Haven Medical Center Program
Sponsor: Yale-New Haven Hospital
Program Director: Holley M Day, MD
333 Cedar St
PO Box 208202
New Haven, CT 06520-2042
Tel: 203 785-4576 Fax: 203 787-2160
Accredited Length: 1 Year(s) Program Size: 3
Program ID: 425-04-11-002

Florida

Gainesville

University of Florida Program
Sponsor: University of Florida College of Medicine
Major Participating Institution(s): Shands Hospital at the University of Florida Veterans Affairs Medical Center (Gainesville)
Program Director: Ronald G Quasing, MD
Box 3-174 HUMC
Gainesville, FL 32610
Tel: 352 395-0281 Fax: 352 395-0209

Program ID: 425-11-21-068
Georgia

Atlanta

Emory University Program

Sponsor: Emory University School of Medicine
Major Participating Institution(s): Emory University Hospital Grady Memorial Hospital
Program Director: Naomi P Alarabi, MD
1364 Clifton Rd NE
Atlanta, GA 30322
Tel: 404 727-4852 Fax: 404 727-3468
Accredited Length: 1 Year(s) Program Size: 6
Program ID: 425-12-21-056

Illinois

Chicago

McGaw Medical Center of Northwestern University Program

Sponsor: Northwestern University Medical School
Major Participating Institution(s): Northwestern Memorial Hospital
Program Director: William G Spiegel, MD
Northwestern Memorial Hospital
Dept of Nuclear Medicine
250 E Superior
Chicago, IL 60611
Tel: 312 926-9104 Fax: 312 926-9448
Accredited Length: 1 Year(s) Program Size: 3
Program ID: 425-16-21-062

Rush-Presbyterian-St Luke’s Medical Center Program

Sponsor: Rush-Presbyterian-St Luke’s Medical Center
Program Director: Ernest W Fordham, MD
Rush-Presbyterian-St Luke’s Med Ctr
1653 W Congress Pkwy
Radiology-Fellowship Program
Chicago, IL 60612
Tel: 312 542-5781
E-mail: efordham@rad.rpirmc.edu
Accredited Length: 1 Year(s) Program Size: 1
Program ID: 425-16-21-049

University of Illinois College of Medicine at Chicago/Michael Reese Hospital Program

Sponsor: University of Illinois College of Medicine at Chicago
Major Participating Institution(s): Michael Reese Hospital and Medical Center
Program Director: Carlos Bolerman, MD
Columbia Michael Reese Hospital and Med Ctr
Div of Nuclear Medicine
3029 S Ellis
Chicago, IL 60616
Tel: 312 791-4567 Fax: 312 791-3560
Accredited Length: 1 Year(s) Program Size: 0
Program ID: 425-16-12-008

Iowa

Iowa City

University of Iowa Hospitals and Clinics Program

Sponsor: University of Iowa Hospitals and Clinics
Major Participating Institution(s): Veterans Affairs Medical Center (Iowa City)
Program Director: Peter T Kirchner, MD
Yuka Sato, MD
Univ of Iowa Hospitals & Clinics
Dept of Radiology
200 Hawkins Dr
Iowa City, IA 52242
Tel: 319 356-2385 Fax: 319 356-2220
Accredited Length: 1 Year(s) Program Size: 3
Program ID: 425-18-21-069

Kansas

Kansas City

University of Kansas Medical Center Program

Sponsor: University of Kansas School of Medicine
Major Participating Institution(s): University of Kansas Medical Center
Program Director: Kirkman G Baxter, MD
Univ of Kansas Med Ctr
Div of Nuclear Medicine
3901 Rainbow Blvd
Kansas City, KS 66160-7234
Tel: 913 588-6010 Fax: 913 588-7809

## Accredited Programs in Pediatric Cardiology (Pediatrics)

### Stanford

**Stanford University Program**  
Sponsor: Stanford University Hospital  
Program Director: Daniel Bernstein, MD  
750 Welch Rd Ste 305  
Palo Alto, CA 94304  
Tel: 415 723-7013  
Fax: 415 725-0943  
E-mail: dan.bernstein@stanford.edu  
Accredited Length: 3 Year(s)  
Program Size: 3  
Program ID: 325-05-21-062

### Colorado

**Denver**  
**University of Colorado Program**  
Sponsor: University of Colorado Health Sciences Center  
Major Participating Institution(s):  
Children’s Hospital  
Program Director: Mark M Bouscous, MD  
Children’s Hospital  
1066 E 14th Ave  
Box B 100  
Denver, CO 80218-1088  
Tel: 303 931-8354  
Fax: 303 839-2700  
E-mail: chapman.lee@dcm.uchsc.edu  
Accredited Length: 3 Year(s)  
Program Size: 5  
Program ID: 325-07-21-064

### Connecticut

**New Haven**  
**Yale-New Haven Medical Center Program**  
Sponsor: Yale-New Haven Hospital  
Program Director: Charles S Kleinman, MD  
Dept of Pediatrics  
333 Cedar St/PO Box 209954  
New Haven, CT 06520-9954  
Tel: 203 785-6022  
Fax: 203 777-2796  
E-mail: Charles_Kleinman@yale.edu  
Accredited Length: 3 Year(s)  
Program Size: 5  
Program ID: 325-09-11-096

### District of Columbia

**Washington**  
**George Washington University Program**  
Sponsor: Children’s National Medical Center  
Program Director: Gerard R Martin, MD  
Children’s National Med Ctr/Cardiology Dep  
111 Michigan Ave NW  
Washington, DC 20010  
Tel: 202 864-2002  
Fax: 202 864-5700  
E-mail: gm@gwmed gwu.edu  
Accredited Length: 3 Year(s)  
Program Size: 1  
Program ID: 325-18-21-007

### Florida

**Gainesville**  
**University of Florida Program**  
Sponsor: University of Florida College of Medicine  
Major Participating Institution(s):  
Shands Hospital at the University of Florida  
Program Director: JF Fricker, MD  
Professor and Chief  
Division of Pediatric Cardiology  
PO Box 100195  
Gainesville, FL 32610-0195
