### Accredited Programs in Radiology-Diagnostic

#### Cambridge
- **Mount Auburn Hospital Program**
  - **Sponsor:** Mount Auburn Hospital
  - **Program Director:** Michael J. Shorteleeve, MD
  - **Address:** 320 Mount Auburn St. Cambridge, MA 02238
  - **Phone:** 617 499-5070
  - **Fax:** 617 499-5138
  - **Email:** mja@rul.gmc@mahlohp.org
  - **Accredited Length:** 4 Years
  - **Program Size:** 8
  - **Program ID:** 420-24-11-087

#### Springfield
- **Baystate Medical Center Program**
  - **Sponsor:** Baystate Medical Center
  - **Program Director:** Thomas R. Parker, MD
  - **Department:** 790 Chestnut St Springfield, MA 01199
  - **Phone:** 413 794-3521
  - **Fax:** 413 794-5888
  - **Email:** linda.fratino@bhs.org
  - **Accredited Length:** 4 Years
  - **Program Size:** 12
  - **Program ID:** 420-24-12-088

#### Worcester
- **St Vincent Hospital Program**
  - **Sponsor:** St Vincent Hospital
  - **Program Director:** Murray L. Jamieson, MD
  - **Address:** 25 Winthrop St
  - **Phone:** 508 798-0100
  - **Fax:** 508 798-1236
  - **Accredited Length:** 4 Years
  - **Program Size:** 8
  - **Program ID:** 420-24-12-089

#### University of Massachusetts Program
- **Sponsor:** University of Massachusetts Medical School
  - **Program Director:** Cynthia R. O'Fallon, MD
  - **Address:** 55 Lake Ave. North
  - **Phone:** 508 643-8500
  - **Fax:** 508 643-8500
  - **Email:** rad.radiology@umassmed.edu
  - **Accredited Length:** 4 Years
  - **Program Size:** 15
  - **Subspecialties:** NRI, RNR
  - **Program ID:** 420-24-21-090

#### Dearborn
- **Oakwood Hospital Program**
  - **Sponsor:** Oakwood Hospital
  - **Program Director:** Sharon B. Helmer, MD
  - **Address:** Oakwood Healthcare System
  - **Phone:** 313 567-7900
  - **Fax:** 313 430-2807
  - **Email:** kranerw@oakwood.org
  - **Accredited Length:** 4 Years
  - **Program Size:** 20
  - **Program ID:** 420-24-12-092

#### Grand Rapids
- **Grand Rapids Area Medical Education Consortium/ Michigan State University Program**
  - **Sponsor:** Grand Rapids Area Medical Education Consortium
  - **Address:** Spectrum Health-Downtown Campus
  - **Phone:** 616 735-6200
  - **Fax:** 616 735-6237
  - **Email:** kerenk@grandmc.edu
  - **Accredited Length:** 4 Years
  - **Program Size:** 15
  - **Program ID:** 420-24-12-099

#### Pontiac
- **St Joseph Mercy-Oakland Program**
  - **Sponsor:** St Joseph Mercy-Oakland
  - **Program Director:** Hugh H. King, MD
  - **Address:** 900 Woodward Ave
  - **Phone:** 248 858-3967
  - **Fax:** 248 858-3906
  - **Email:** e-mail: rksen@mercyhealth.com
  - **Accredited Length:** 4 Years
  - **Program Size:** 16
  - **Program ID:** 420-24-12-101

#### Royal Oak
- **William Beaumont Hospital Program**
  - **Sponsor:** William Beaumont Hospital
  - **Program Director:** Duane Mezwa, MD
  - **Address:** 3900 W 13 Mile Road
  - **Phone:** 248 551-3650
  - **Fax:** 248 551-6520
  - **Subspecialties:** RNR
  - **Program ID:** 420-24-12-102

#### Southfield
- **Providence Hospital and Medical Centers Program**
  - **Sponsor:** Providence Hospital and Medical Centers
  - **Program Director:** David L. Isher, MD
  - **Address:** 10001 W Nine Mile Rd
  - **Phone:** 248 434-3501
  - **Fax:** 248 434-3506
  - **Accredited Length:** 4 Years
  - **Program Size:** 15
  - **Program ID:** 420-24-12-103

---

**Michigan**

#### Ann Arbor
- **University of Michigan Program**
  - **Sponsor:** University of Michigan Hospitals 
  - **Veterans Affairs Medical Center (Ann Arbor)**
  - **Program Director:** Richard H. Cohen, MD

Section IV

New and Withdrawn Programs

New Programs

The following programs were accredited by the Accreditation Council for Graduate Medical Education since the publication of the 1999-2000 Directory. Additional information on these programs is included in Section III under the applicable specialty listing.

Addiction Psychiatry (Psychiatry)

University of Louisville Program
Louisville, KY
Program ID: 481-20-21-036

Massachusetts General Hospital Program
Boston, MA
Program ID: 481-34-31-037

Wayne State University Program
Detroit, MI
Program ID: 481-55-21-038

UMDNJ-Robert Johnson Program
Piscataway, NJ
Program ID: 481-33-31-041

University Hospitals of Cleveland/Case Western Reserve University Program
Cleveland, OH
Program ID: 481-30-21-039

Adolescent Medicine (Pediatrics)

University of California (San Francisco) Program
San Francisco, CA
Program ID: 351-06-11-005

Stanford University Program
Stanford, CA
Program ID: 351-05-31-021

George Washington University Program
Washington, DC
Program ID: 351-10-21-020

University of Minnesota Program
Minneapolis, MN
Program ID: 351-28-21-022

Mount Sinai School of Medicine Program
New York, NY
Program ID: 351-35-11-012

University of Texas at Houston Program
Houston, TX
Program ID: 351-48-21-003

Baylor College of Medicine Program
Houston, TX
Program ID: 351-48-21-016

Blood Banking/Transfusion Medicine (Pathology)

University of Michigan Program
Ann Arbor, MI
Program ID: 365-25-31-077

Cardiovascular Disease (Internal Medicine)

Mayo Graduate School of Medicine (Scottsdale) Program
Scottsdale, AZ
Program ID: 11-08-21-261
Clinical Cardiac
Electrophysiology (Internal Medicine)
University of Alabama Medical Center Program
Birmingham, AL
Program ID: 154-01-21-001

Clinical Neurophysiology (Neurology)
Emory University Program
Atlanta, GA
Program ID: 187-12-21-080
New York Medical College at St. Vincent's Hospital and Medical Center of New York Program
New York, NY
Program ID: 187-35-31-013
University of Oklahoma Health Sciences Center Program
Oklahoma City, OK
Program ID: 187-39-21-000
University of Wisconsin Program
Madison, WI
Program ID: 187-56-21-091

Colon and Rectal Surgery
University of Louisville Program
Louisville, KY
Program ID: 609-20-12-048

Cytopathology (Pathology)
Hennepin County Medical Center Program
Minneapolis, MN
Program ID: 307-26-31-087
Oregon Health Sciences University Program
Portland, OR
Program ID: 307-49-21-083
Texas A&M College of Medicine-Scott and White Program
Temple, TX
Program ID: 307-48-21-086

Dermatology
Mayo Graduate School of Medicine (Scottsdale) Program
Scottsdale, AZ
Program ID: 698-09-21-127
Mayo Graduate School of Medicine (Jacksonville) Program
Jacksonville, FL
Program ID: 686-11-31-125

Dermatopathology (Dermatology and Pathology)
Texas Tech University Program
Lubbock, TX
Program ID: 180-48-21-066

Emergency Medicine
Mayo Graduate School of Medicine (Rochester) Program
Rochester, MN
Program ID: 118-26-21-160

Medical College of Virginia/Virginia Commonwealth University Program
Richmond, VA
Program ID: 110-31-21-160

Family Practice
University of California (Davis) Rural Program
Yuba City, CA
Program ID: 129-05-21-065
Kuakini Medical Center Program
Honolulu, HI
Program ID: 120-14-21-064
McGaw Medical Center of Northwestern University (Evanston) Program
Evanston, IL
Program ID: 120-18-21-064
University of Kentucky Medical Center Rural Program
Corbin, KY
Program ID: 120-29-21-063
University of Oklahoma Health Sciences Center (Lawton) Program
Lawton, OK
Program ID: 120-39-21-069
Darnall Army Community Hospital Program
Fort Hood, TX
Program ID: 120-48-21-067

Forensic Psychiatry (Psychiatry)
University of Alabama Medical Center Program
Birmingham, AL
Program ID: 406-01-21-005
University of California-Davis Program
Sacramento, CA
Program ID: 406-05-31-026
National Capital Consortium Program
Washington, DC
Program ID: 406-19-21-006
Wayne State University Program
Detroit, MI
Program ID: 406-25-12-029
Dartmouth-Hitchcock Medical Center Program
Concord, NH
Program ID: 406-32-21-031
New York Medical College at St. Vincent's Hospital and Medical Center Program
New York, NY
Program ID: 406-35-31-027
University of Virginia Program
Staunton, VA
Program ID: 406-51-31-032

Geriatric Medicine (Family Practice)
St Vincent Hospital and Health Care Center Program
Indianapolis, IN
Program ID: 125-17-31-036

Geriatric Psychiatry (Psychiatry)
Rush-Presbyterian-St Luke's Medical Center Program
Chicago, IL
Program ID: 407-16-13-056

University of Illinois College of Medicine at Chicago Program

Roanoke, VA
Program ID: 407-51-12-065
Medical College of Virginia/Virginia Commonwealth University Program
Richmond, VA
Program ID: 407-51-21-061
Eastern Virginia Medical School Program
Norfolk, VA
Program ID: 407-51-31-053

Hematology and Oncology (Internal Medicine)
University of Arkansas for Medical Sciences Program
Little Rock, AR
Program ID: 150-04-21-129
Albert Einstein College of Medicine Program
Bronx, NY
Program ID: 150-35-21-127
Thomas Jefferson University Program
Philadelphia, PA
Program ID: 150-41-21-130
Brown University Program
Providence, RI
Program ID: 150-43-31-128

Infectious Disease (Internal Medicine)
Brown University Program
Providence, RI
Program ID: 146-43-31-197

Interventional Cardiology (Internal Medicine)
University of Southern California Program
Los Angeles, CA
Program ID: 152-05-12-003
Stanford University Program
Stanford, CA
Program ID: 152-05-13-004

UCLA Medical Center Program
Los Angeles, CA
Program ID: 152-05-21-004

Southern California Kaiser Permanente Medical Care (Los Angeles) Program
Los Angeles, CA
Program ID: 152-05-31-002

George Washington University Program
Washington, DC
Program ID: 152-09-21-006
Georgetown University Program
Washington, DC
Program ID: 152-10-31-007

University of Miami-Jackson Memorial Medical Center Program
Miami, FL
Program ID: 152-11-21-008
McGaw Medical Center of Northwestern University Program
Chicago, IL
Program ID: 152-16-21-011

University of Chicago Program
Chicago, IL
Program ID: 152-16-21-014

Loyola University Program
Maywood, IL
Program ID: 152-16-23-013

Rush Presbyterian-St Luke's Medical Center Program
Chicago, IL
Program ID: 152-16-31-072

University of Kentucky Medical Center Program
Lexington, KY
Program ID: 152-20-16-016

University of Maryland Program
Baltimore, MD
Program ID: 152-23-12-023

Johns Hopkins University Program
Baltimore, MD
Program ID: 152-23-21-022

Boston University Medical Center Program
Boston, MA
Program ID: 152-24-12-025

Beth Israel Deaconess (East Campus) Program

  - Rochester, NY
  - Program ID: 042-35-21-027

- **SUNY at Buffalo Graduate Medical-Dental Education Consortium Program**
  - Buffalo, NY
  - Program ID: 042-35-21-035

### New Programs

- **New York Presbyterian Hospital (Columbia Campus) Program**
  - New York, NY
  - Program ID: 042-35-31-014

- **University of North Carolina Hospitals Program**
  - Chapel Hill, NC
  - Program ID: 042-36-31-040

- **Cleveland Clinic Foundation**
  - Cleveland, OH
  - Program ID: 042-38-31-043

- **Ohio State University Program**
  - Columbus, OH
  - Program ID: 042-38-31-016

- **St Christopher's Hospital for Children Program**
  - Philadelphia, PA
  - Program ID: 042-41-21-002

- **University of Pennsylvania Program**
  - Philadelphia, PA
  - Program ID: 042-41-31-044

- **Vanderbilt University Program**
  - Nashville, TN
  - Program ID: 042-47-21-021

- **University of Texas Medical Branch Hospitals (Corpus Christi) Program**
  - Corpus Christi, TX
  - Program ID: 042-48-21-009

- **University of Texas Medical Branch Hospitals Program**
  - Galveston, TX
  - Program ID: 042-48-31-004

- **University of Texas Southwestern Medical School Program**
  - Dallas, TX
  - Program ID: 042-48-31-007

- **University of Washington Program**
  - Seattle, WA
  - Program ID: 042-54-21-008

- **Medical College of Wisconsin Program**
  - Milwaukee, WI
  - Program ID: 042-56-21-039

### Pediatric Critical Care Medicine (Pediatrics)

- **New York Presbyterian Hospital (Columbia Campus) Program**
  - New York, NY
  - Program ID: 323-35-31-075

### Pediatric Emergency Medicine (Emergency Medicine)

- **Loma Linda University Program**
  - Loma Linda, CA
  - Program ID: 114-05-21-002

- **University of Florida Health Science Center/Jacksonville Program**
  - Jacksonville, FL
  - Program ID: 114-11-21-004

- **UMDNJ-Robert Wood Johnson Medical School (Camden) Program**
  - Camden, NJ
  - Program ID: 114-38-21-005

- **University of Rochester Program**
  - Rochester, NY
  - Program ID: 114-35-21-001

- **Pediatric Emergency Medicine (Pediatrics)**

- **University of Alabama Medical Center Program**
  - Birmingham, AL
  - Program ID: 324-01-21-041

- **University of Colorado Program**
  - Denver, CO
  - Program ID: 324-07-21-004

- **George Washington University Program**
  - Washington, DC
  - Program ID: 324-10-21-005

- **Emory University Program**
  - Atlanta, GA
  - Program ID: 324-12-21-007

- **McGaw Medical Center of Northwestern University Program**
  - Chicago, IL
  - Program ID: 324-16-21-006

- **University of Louisville Program**
  - Louisville, KY
  - Program ID: 324-20-31-009

- **Johns Hopkins University Program**
  - Baltimore, MD
  - Program ID: 334-23-21-010

- **Children's Hospital/Boston Medical Center Program**
  - Boston, MA
  - Program ID: 324-24-21-011

- **Children's Hospital/Boston Medical Center Program A**
  - Boston, MA
  - Program ID: 324-24-31-012

- **Wayne State University/Detroit Medical Center Program**
  - Detroit, MI
  - Program ID: 324-25-21-013

- **University of Minnesota Program**
  - Minneapolis, MN
  - Program ID: 324-26-11-015

- **St Louis University School of Medicine Program**
  - St Louis, MO
  - Program ID: 324-28-11-018

- **Washington University/B-JH/SLCH Consortium Program**
  - St Louis, MO
  - Program ID: 324-38-21-016

- **University of Missouri at Kansas City Program**
  - Kansas City, MO
  - Program ID: 324-28-31-017

- **SUNY at Buffalo Graduate Medical-Dental Education Consortium Program**
  - Buffalo, NY
  - Program ID: 324-36-12-021

- **Albert Einstein College of Medicine Program**
  - Bronx, NY
  - Program ID: 324-35-21-019

- **Albert Einstein College of Medicine Program A**
  - Bronx, NY
  - Program ID: 324-35-31-020

- **New York Presbyterian Hospital (Columbia Campus) Program**
  - New York, NY
  - Program ID: 324-35-31-023
New Programs

New York University Medical Center Program
New York, NY
Program ID: 324-35-51-023

Children’s Hospital/Ohio State University Program
Columbus, OH
Program ID: 324-35-11-029

Children’s Hospital Medical Center of Akron/NEOUCOM Program
Akron, OH
Program ID: 324-46-21-027

Children’s Hospital Medical Center/University of Cincinnati College of Medicine Program
Cincinnati, OH
Program ID: 324-35-31-028

Thomas Jefferson University/duPont Hospital for Children Program
Wilmington, DE
Program ID: 324-41-11-032

Children’s Hospital of Philadelphia Program
Philadelphia, PA
Program ID: 324-41-21-030

Brown University Program
Providence, RI
Program ID: 324-43-21-033

University of Pennsylvania Program
Philadelphia, PA
Program ID: 324-47-21-042

University of Texas Southwestern Medical School Program
Dallas, TX
Program ID: 324-48-21-034

Baylor College of Medicine Program
Houston, TX
Program ID: 324-48-31-035

Eastern Virginia Medical School Program
Norfolk, VA
Program ID: 324-51-11-007

Fairfax Hospital Program
Fairfax, VA
Program ID: 324-51-21-036

University of Washington Program
Seattle, WA
Program ID: 324-64-21-038

Medical College of Wisconsin Program
Milwaukee, WI
Program ID: 324-66-21-039

Pediatric Endocrinology (Pediatrics)
Louisiana State University Program
New Orleans, LA
Program ID: 338-21-51-071

Pediatric Gastroenterology (Pediatrics)
Emory University Program
Atlanta, GA
Program ID: 338-12-31-057

Pediatric Hematology/Oncology (Pediatrics)
Georgetown University Program
Washington, DC
Program ID: 327-10-21-075

Pediatric Infectious Diseases (Pediatrics)
University of Miami-Jackson Memorial Medical Center Program
Miami, FL
Program ID: 335-11-31-064

New York University Program
New York, NY
Program ID: 335-35-21-065

SUNY at Stony Brook Program
Stony Brook, NY
Program ID: 335-35-31-063

Pediatric Rheumatology (Pediatrics)
University of Michigan Program
Ann Arbor, MI
Program ID: 331-25-21-022

Thomas Jefferson University/duPont Hospital for Children Program
Wilmington, DE
Program ID: 331-41-21-023

Pediatric Sports Medicine (Pediatrics)
Jersey Shore Medical Center Program
Neptune, NJ
Program ID: 333-33-21-001

Children’s Hospital Medical Center of Akron/NEOUCOM Program
Akron, OH
Program ID: 333-38-12-003

University of Texas Health Science Center at San Antonio Program
San Antonio, TX
Program ID: 333-48-21-002

Pediatric Urology (Urology)
Children’s Memorial Hospital Program
Chicago, IL
Program ID: 485-16-12-018

Albert Einstein College of Medicine at Long Island Jewish Medical Center Program
New Hyde Park, NY
Program ID: 485-35-21-016

Physical Medicine and Rehabilitation
Johns Hopkins University Program
Baltimore, MD
Program ID: 486-23-21-105

Plastic Surgery
Harvard Medical School Program
Boston, MA
Program ID: 360-24-21-106

Psychiatry
St John’s Episcopal Hospital-South Shore Program
Far Rockaway, NY
Program ID: 490-35-21-300

Pulmonary Disease and Critical Care Medicine (Internal Medicine)
Creighton University Program
Omaha, NE
Program ID: 160-38-21-103

Brown University Program
Providence, RI
Program ID: 168-48-21-124

Radiology-Diagnostic
Mayo Graduate School of Medicine (Jacksonville) Program
Jacksonville, FL
Program ID: 420-11-21-250

Albert Einstein College of Medicine (Jacobi) Program
Bronx, NY
Program ID: 420-36-21-251

Spinal Cord Injury Medicine (Physical Medicine and Rehabilitation)
Loyola University Program
Maywood, IL
Program ID: 345-16-21-100

Washington University/B-JH/SLCH Consortium Program
St Louis, MO
Program ID: 345-28-21-011

University of Texas at Houston Program
Houston, TX
Program ID: 345-46-21-009

University of Texas Southwestern Medical School Program
Dallas, TX
Program ID: 345-48-21-012

Sports Medicine (Family Practice)
Family Practice Residency of Idaho Program
Boise, ID
Program ID: 127-16-21-067

University of Kentucky Medical Center Program
Lexington, KY
Program ID: 127-26-21-050

Texas Tech University (Lubbock) Program
Lubbock, TX
Program ID: 127-48-21-053

Surgery-General
Grand Rapids Area Medical Education Consortium/Michigan State University Program
Grand Rapids, MI
Program ID: 440-25-21-410

Surgical Critical Care (General Surgery)
University of California (San Francisco) Program
San Francisco, CA
Program ID: 443-06-21-075
Withdrawn Programs

The accreditation of the following programs was withdrawn or voluntarily withdrawn since the publication of the 1999-2000 Directory. These programs are not listed in this year's edition.

Addiction Psychiatry (Psychiatry)
Tulane University Program
New Orleans, LA
Program ID: 401-21-1-027

Adult Reconstructive Orthopaedics (Orthopaedic Surgery)
University of Texas Health Science Center at San Antonio Program
San Antonio, TX
Program ID: 201-26-21-007

Allergy and Immunology
Children's National Medical Center Program
Washington, DC
Program ID: 020-16-11-039

Mayo Graduate School of Medicine (Rochester) Program A
Rochester, MN
Program ID: 020-25-11-018

Mayo Graduate School of Medicine (Rochester) Program B
Rochester, MN
Program ID: 020-26-21-057

Anesthesiology
Albert Einstein College of Medicine at Beth Israel Medical Center Program
New York, NY
Program ID: 044-35-11-096

Meridia Huron Hospital Program
Cleveland, OH
Program ID: 040-35-12-122

Blood Banking/Transfusion Medicine (Pathology)
Long Beach Memorial Medical Center/American Red Cross Blood and Tissue Services Program
Long Beach, CA
Program ID: 305-25-21-014

Loyola University Program
Maywood, IL
Program ID: 305-16-21-075

Cardiovascular Disease (Internal Medicine)
St Mary's Hospital and Medical Center Program
San Francisco, CA
Program ID: 141-05-22-233

Bronx-Lebanon Hospital Center Program
Bronx, NY
Program ID: 141-35-11-125

Hadam Hospital Center Program
New York, NY
Program ID: 141-35-11-206

Mount Sinai School of Medicine (Cabrini) Program
New York, NY
Program ID: 141-35-31-114

Madigan Army Medical Center Program
Tacoma, WA
Program ID: 141-54-21-252

Child and Adolescent Psychiatry (Psychiatry)
Boston University Medical Center Program
Boston, MA
Program ID: 405-24-21-055

West Virginia University (Charleston Division) Program
Charleston, WV
Program ID: 405-55-21-170

Child Neurology (Neurology)
Yale-New Haven Medical Center Program
New Haven, CT
Program ID: 185-08-21-077

University of Mississippi Medical Center Program
Jackson, MS
Program ID: 185-27-21-081

University of New Mexico Program
Albuquerque, NM
Program ID: 185-34-21-083

University of Rochester Program
Rochester, NY
Program ID: 185-35-21-013

University of Oklahoma Health Sciences Center Program
Oklahoma City, OK
Program ID: 185-39-21-086

Clinical Neurophysiology (Neurology)
Medical College of Wisconsin Program
Milwaukee, WI
Program ID: 185-58-21-087

Critical Care Medicine (Anesthesiology)
UMDNJ-Robert Wood Johnson Medical School (Camden) Program
Camden, NJ
Program ID: 045-33-21-041

Albany Medical Center Program
Albany, NY
Program ID: 045-35-21-044

Critical Care Medicine (Internal Medicine)
Brown University Program
Providence, RI
Program ID: 142-43-11-082

University of Virginia Program
Charlottesville, VA
Program ID: 142-51-21-107
Cytopathology (Pathology)
National Capital Consortium Program
Bethesda, MD
Program ID: 307-10-21-033
Georgetown University Program
Washington, DC
Program ID: 307-10-21-073

Dermatopathology
(Dermatology and Pathology)
University of Oklahoma Health Sciences Center Program
Oklahoma City, OK
Program ID: 100-39-21-010

Emergency Medicine
University of Oklahoma Health Sciences Center Program
Oklahoma City, OK
Program ID: 110-39-12-041

Endocrinology, Diabetes, and Metabolism (Internal Medicine)
University of Florida Health Science Center/Jacksonville Program
Jacksonville, FL
Program ID: 14J-31-21-024

Maine Medical Center Program
Scarborough, ME
Program ID: 14J-32-21-155

Family Practice
University of Florida/North Broward Hospital District Program
Fort Lauderdale, FL
Program ID: 120-11-11-049

University of Kansas Medical Center (Hays) Rural Program
Kansas City, KS
Program ID: 120-19-21-054

Prince George’s Hospital Center Program
Clinton, MD
Program ID: 120-23-21-107

St Joseph Mercy Hospital Program
Ann Arbor, MI
Program ID: 120-25-21-042

East Carolina University Rural Program
Greenville, NC
Program ID: 120-35-21-533

Forensic Pathology (Pathology)
University of Arkansas for Medical Sciences Program
Little Rock, AR
Program ID: 310-04-21-070

State of Utah Office of the Medical Examiner Program
Salt Lake City, UT
Program ID: 310-49-21-074

Gastroenterology (Internal Medicine)
St Elizabeth’s Medical Center of Boston Program
Boston, MA
Program ID: 144-24-21-005

Michigan State University Program
East Lansing, MI
Program ID: 144-25-21-078

Mount Sinai School of Medicine (Elmhurst) Program
Elmhurst, NY
Program ID: 144J-35-11-110

Interfaith Medical Center Program
Brooklyn, NY
Program ID: 144J-35-21-186

Mount Sinai School of Medicine (Cabrini) Program
New York, NY
Program ID: 144J-35-31-598

East Carolina University Program
Greenville, NC
Program ID: 144J-36-21-219

Shadyside Hospital/UPMC Program
Pittsburgh, PA
Program ID: 144J-41-22-635

Hand Surgery (Orthopaedic Surgery)
Maricopa Medical Center Program
Phoenix, AZ
Program ID: 283-03-21-044

Hand Surgery (Plastic Surgery)
Wayne State University/Detroit Medical Center Program
Detroit, MI
Program ID: 385-25-21-029

Hematology (Internal Medicine)
University of Arkansas for Medical Sciences Program
Little Rock, AR
Program ID: 145-04-21-096

Albert Einstein College of Medicine Program
Bronx, NY
Program ID: 145J-35-21-989

Thomas Jefferson University Program
Philadelphia, PA
Program ID: 245-41-21-031

Hematology and Oncology (Internal Medicine)
Maimonides Medical Center Program
Brooklyn, NY
Program ID: 155-35-31-042

Mount Sinai School of Medicine (Cabrini) Program
New York, NY
Program ID: 155-35-32-048

Immunopathology (Pathology)
University of Iowa Hospitals and Clinics Program
Iowa City, IA
Program ID: 813-15-21-005

University of North Carolina Hospitals Program
Chapel Hill, NC
Program ID: 813J-35-21-015

Infectious Disease (Internal Medicine)
University of California (San Francisco)/Mount Zion Program
San Francisco, CA
Program ID: 146-05-31-143

SUNY at Stony Brook (East Meadow) Program
East Meadow, NY
Program ID: 146J-35-21-093

Internal Medicine
Spectrum Health-East Campus/St Mary’s Health Services Program
Grand Rapids, MI
Program ID: 140J-25-21-197

Highland Hospital of Rochester Program
Rochester, NY
Program ID: 140J-35-11-310

Case Western Reserve University (Mount Sinai) Program
Cleveland, OH
Program ID: 140J-38-21-337

Wright State University Program
Dayton, OH
Program ID: 140J-38-21-344

Presbyterian Medical Center of the University of Pennsylvania Health System Program
Philadelphia, PA
Program ID: 140J-41-11-377

Ramon Et Betances Hospital-Mayaguez Medical Center Program
Mayaguez, PR
Program ID: 142-62-12-394

Brown University (Miriam) Program
Providence, RI
Program ID: 140J-48-11-399

LDS Hospital Program
Salt Lake City, UT
Program ID: 140J-09-11-426

Ohio Valley Medical Center Program
Wheeling, WV
Program ID: 140J-55-11-441

Medical Genetics
University of Alabama Medical Center Program
Birmingham, AL
Program ID: 136-01-21-014

Medical Microbiology (Pathology)
University of North Carolina Hospitals Program
Chapel Hill, NC
Program ID: 314-30-21-005
Neonatal-Perinatal Medicine (Pediatrics)
Los Angeles County-Harbor-UCLA Medical Center Program
Torrance, CA
Program Id: 329-05-21-101

Neurological Surgery
MCP Hahnemann University Program
Philadelphia, PA
Program Id: 194-41-11-117

Neuropathology (Pathology)
Loyola University Program
Maywood, IL
Program Id: 315-16-21-014

Neuroradiology (Radiology-Diagnostic)
West Virginia University Program
Morgantown, WV
Program Id: 423-05-21-094

Nuclear Medicine
University of Arizona Program
Tucson, AZ
Program Id: 204-03-21-008

University of Kansas Medical Center Program
Kansas City, KS
Program Id: 208-19-11-031

Aurora Health Care Program
Milwaukee, WI
Program Id: 200-56-12-081

Nuclear Radiology (Radiology-Diagnostic)
University of Kansas Medical Center Program
Kansas City, KS
Program Id: 425-19-11-115

William Beaumont Hospital Program
Royal Oak, MI
Program Id: 425-25-21-018

New York Methodist Hospital Program
Brooklyn, NY
Program Id: 425-35-21-047

Obstetrics and Gynecology
HealthPartners Institute for Medical Education Program
St Paul, MN
Program Id: 220-26-21-314

Albert Einstein College of Medicine Program
Bronx, NY
Program Id: 220-35-21-322

Oncology (Internal Medicine)
University of Arkansas for Medical Sciences Program
Little Rock, AR
Program Id: 194-07-21-027

Albert Einstein College of Medicine Program
Bronx, NY
Program Id: 147-35-21-091

Thomas Jefferson University Program
Philadelphia, PA
Program Id: 147-41-21-029

Ophthalmology
Wayne State University/Detroit Medical Center (Sinai Hospital) Program
Detroit, MI
Program Id: 240-25-21-074

Manhattan Eye, Ear and Throat Hospital Program
New York, NY
Program Id: 248-35-21-168

Orthopaedic Sports Medicine (Orthopaedic Surgery)
Hughston Sports Medicine Foundation Program
Columbus, GA
Program Id: 288-12-21-046

New York University Medical Center Program
New York, NY
Program Id: 288-35-21-005

Hospital for Joint Diseases Orthopaedic Institute Program
New York, NY
Program Id: 288-35-21-056

Orthopaedic Surgery
Bronx-Lebanon Hospital Center Program
Bronx, NY
Program Id: 280-55-11-151

New York University Medical Center Program
New York, NY
Program Id: 280-55-21-051

St Luke's Medical Center Program
Cleveland, OH
Program Id: 280-58-11-153

Orthopaedic Surgery of the Spine (Orthopaedic Surgery)
Medical College of Wisconsin Program
Milwaukee, WI
Program Id: 287-06-21-018

Orthopaedic Trauma (Orthopaedic Surgery)
Baylor College of Medicine Program
Houston, TX
Program Id: 265-48-21-004

Otolaryngology
Manhattan Eye, Ear and Throat Hospital Program
New York, NY
Program Id: 250-35-21-088

Pathology-Anatomic and Clinical
Kaiser Permanente Medical Group (Northern California) San Francisco Program
San Francisco, CA
Program Id: 400-05-12-124

Monmouth Medical Center Program
Long Branch, NJ
Program Id: 300-23-11-207

Brooklyn Hospital Center Program
Brooklyn, NY
Program Id: 300-35-11-232

Harlem Hospital Center Program
New York, NY
Program Id: 304-35-11-251

Bronx-Lebanon Hospital Center Program
Bronx, NY
Program Id: 800-35-12-233

St Vincent Hospital and Medical Center Program
Portland, OR
Program Id: 300-40-12-301

Naval Medical Center (Portsmouth) Program
Portsmouth, VA
Program Id: 300-51-21-013

Pediatric Cardiology (Pediatrics)
University of Minnesota Program
Minneapolis, MN
Program Id: 325-26-21-024

Pediatric Critical Care Medicine (Pediatrics)
Cleveland Clinic Foundation Program
Cleveland, OH
Program Id: 323-38-11-052

Pediatric Endocrinology (Pediatrics)
University of South Florida Program
St Petersburg, FL
Program Id: 326-14-21-046

Loyola University Program
Maywood, IL
Program Id: 326-14-21-058

Maimonides Medical Center Program
Brooklyn, NY
Program Id: 826-35-11-044

Pediatric Gastroenterology (Pediatrics)
University of Arkansas for Medical Sciences Program
Little Rock, AR
Program Id: 332-04-21-002

University of California (Irvine) Program
Long Beach, CA
Program Id: 332-05-31-054

Pediatric Nephrology (Pediatrics)
Cleveland Clinic Foundation Program
Cleveland, OH
Program Id: 326-35-31-040

University Health Center of Pittsburgh Program
Pittsburgh, PA
Program Id: 828-41-21-086

Pediatric Orthopaedics (Orthopaedic Surgery)
George Washington University Program
Washington, DC
Program Id: 265-10-21-001
Withdrawn Programs

Shriners Hospitals for Children (Springfield) Program
Springfield, MA
Program ID: 265-24-34001

SUNY at Buffalo Graduate Medical-Dental Education Consortium Program
Buffalo, NY
Program ID: 265-35-21-023

Medical College of Wisconsin Program
Milwaukee, WI
Program ID: 265-58-21-638

Pediatric Pulmonology (Pediatrics)
University of Utah Program
Salt Lake City, UT
Program ID: 300-49-21-682

Pediatric Rheumatology (Pediatrics)
University of Kansas Medical Center Program
Kansas City, KS
Program ID: 331-19-21-606

Pediatrics
Albert Einstein College of Medicine at Beth Israel Medical Center Program
New York, NY
Program ID: 320-35-11-145

Physical Medicine and Rehabilitation
Wayne State University/Detroit Medical Center (Sinai Hospital) Program
Detroit, MI
Program ID: 340-25-31-026

Plastic Surgery
Brigham and Women’s Hospital/Children’s Hospital Program
Boston, MA
Program ID: 360-34-21-540

Beth Israel Deaconess Medical Center (West Campus) Program
Boston, MA
Program ID: 360-34-21-124

University of Mississippi Medical Center Program
Jackson, MS
Program ID: 360-27-21-126

St Luke’s-Roosevelt Hospital Center Program
New York, NY
Program ID: 360-35-21-068

Preventive Medicine (Gen Prev Med, Occupational Med, Aerospace Med, & Pub Hlth)
Illinois Department of Public Health Program
Springfield, IL
Program ID: 380-16-88-099

Carney Hospital Program
Boston, MA
Program ID: 380-24-21-043

Psychiatry
Dwight David Eisenhower Army Medical Center Program
Fort Gordon, GA
Program ID: 400-12-15-004

Alton Ochsner Medical Foundation Program
New Orleans, LA
Program ID: 400-21-12-077

Louisiana State University Program
New Orleans, LA
Program ID: 400-21-21-076

Pulmonary Disease (Internal Medicine)
Creighton University Program
Omaha, NE
Program ID: 149-30-21-154

SUNY at Stony Brook (East Meadow) Program
East Meadow, NY
Program ID: 149-35-21-989

Radiation Oncology
UMDNJ-Robert Wood Johnson Medical School (Camden) Program
Camden, NJ
Program ID: 430-33-21-114

Case Western Reserve University Program
Cleveland, OH
Program ID: 430-38-11-977

Radiology-Diagnostic
Indiana University School of Medicine (Methodist) Program
Indianapolis, IN
Program ID: 420-17-12-067

Mount Sinai Medical Center of Cleveland Program
Cleveland, OH
Program ID: 420-38-11-155

Sports Medicine (Family Practice)
Mercy Health System Program
Janesville, WI
Program ID: 287-56-21-016

Surgery-General
Indiana University School of Medicine (Methodist) Program
Indianapolis, IN
Program ID: 440-27-11-194

Spectrum Health-East Campus/St Mary’s Health Services Program
Grand Rapids, MI
Program ID: 440-25-11-152

Section V
Graduate Medical Education Teaching Institutions

Section V lists hospitals and organizations that sponsor graduate medical education (GME) programs or participate in GME. Sponsoring institutions assume final responsibility for a GME program. Most GME programs are sponsored by specific clinical departments within a hospital, another health care institution such as a medical school, or an educational consortium. Major participating institutions include hospitals or other sites recognized by at least one residency review committee as providing a major portion of required GME. Hospitals and other institutions that provide rotations of less than one-sixth of the program length or less than a total of 6 months are not listed in the Directory.

All institutions that sponsor GME programs or participate in GME are listed in alphabetical order by state and city. Each listing includes the institution name, address, and identification code. Also provided are codes of medical schools affiliated with each institution (where applicable) and abbreviations for the specialty and subspecialty programs affiliated with each institution. A key for specialty and subspecialty abbreviation codes is provided inside the front cover of this Directory.

Candidates seeking a residency should refer to the list of programs in Section III. Applications for a residency position should be addressed to the program director rather than to an institution.

Relationships Between Hospitals and Medical Schools (Medical School Affiliation)
Hospitals that sponsor an accredited program are not required to have a formal relationship with a medical school. Where such a relationship exists, the affiliation is identified by the dean of the medical school as M (major), G (graduate only), or L (limited). The medical school associated with the code number in this listing is identified in Appendix D.

Major affiliation (M) signifies that an institution is an important part of the teaching program of the medical school and is a major unit in the clinical clerkship program. Major teaching institutions provide clerkship experience in two or more of the major specialties: internal medicine, surgery, pediatrics, and obstetrics-gynecology. An institution responsible for most of the teaching in a single specialty, such as psychiatry or pediatrics, may also be considered a major affiliation. In a major teaching institution, medical students serve clinical clerkships regularly on inpatient services, under the direct supervision of medical school faculty. A major teaching institution may or may not be used for medical school residencies.

Graduate affiliation (G) indicates that the institution is affiliated with the medical school only for its graduate programs and that one or more of the following arrangements is in effect:
1. House staff of the GME programs are selected by officials of a medical school department or by a joint committee of the institution teaching staff and medical school faculty.
2. Medical school faculty (other than the institution’s attending staff) are regularly scheduled to participate in the teaching programs of the institution. No graduate affiliation is indicated if medical school faculty participation at the institution is limited to an occasional lecture or consultation visit, or if the institution’s residents attend medical school teaching conferences only as visitors.
3. A contractual arrangement (with or without financial commitment) specifies the medical school participation in the organization and supervision of the GME program in the institution.
4. There is some degree of exchange of residents between this institution and the principal teaching institution of the medical school.

Limited affiliation (L) signifies that the institution is affiliated with the medical school’s teaching program only for brief and/or unique rotations of students or residents.

Appendix A

Combined Specialty Programs

Combined specialty programs have been approved by each respective specialty board; residents physicians completing these programs are eligible for board certification. Neither the Accreditation Council for Graduate Medical Education (ACGME) nor the Residency Review Committees accredit combined programs; they accredit each specialty program separately. Requests for information about the guidelines for these programs should be directed to the specialty boards at the addresses listed in Appendix B. Applicants to combined specialty programs are encouraged to review requirements for admission to the certification process of each board in Appendix B of this Directory.

Diagnostic Radiology/Nuclear Medicine/
Nuclear Radiology
The American Board of Radiology (ABR) and the American Board of Nuclear Medicine (ABNM) offer dual certification for candidates who have satisfactorily completed a combined total of 6 years of suitable accredited training in programs approved by both boards and successfully passed the certifying examination of both boards.

To be eligible for dual certification, a resident must obtain residency training in diagnostic radiology and nuclear medicine that must include a) a preparatory clinical year in an ACGME-accredited program and b) 4 years of education in an ACGME-accredited diagnostic radiology program that includes 6 months of nuclear medicine training, followed by c) 1 year of education in a combined nuclear medicine and nuclear radiology program. Certifying examinations of each board cannot be taken until all required years of training in both specialties are satisfactorily completed.

Internal Medicine/Emergency Medicine
The American Board of Internal Medicine and the American Board of Emergency Medicine offer dual certification for candidates who have completed at least 2 1/2 years of suitable accredited training in each specialty. A combined residency consists of 5 years of balanced education in the two disciplines. It is strongly recommended that the participating residencies be in the same academic health center.

To be eligible for dual certification, the resident must satisfactorily complete 60 months of combined education, which must be verified by the directors of both programs. The certifying examinations cannot be taken until all 5 years are completed.

Internal Medicine/Emergency Medicine/
Critical Care Medicine
The American Board of Internal Medicine and the American Board of Emergency Medicine offer triple certification for candidates who complete a 6-year (72-month) integrated, coherent program of combined training in internal medicine, emergency medicine, and critical care medicine, approved by both boards.

Upon successful completion and verification of the first 5 years of this program, candidates may apply to take the certification examinations in internal medicine and emergency medicine. To meet eligibility for certification in critical care medicine, the candidate must: 1) have satisfactorily completed the 6-year combined program; 2) be certified by the American Board of Internal Medicine; and 3) have met the certification requirements of the American Board of Emergency Medicine.

Internal Medicine/Family Practice
The American Board of Internal Medicine and the American Board of Family Practice offer dual certification for candidates who have satisfactorily completed 4 years of combined training in programs approved by both boards.
To be eligible for dual certification, combined residency training in internal medicine and family practice must include at least 48 months of balanced education in the two disciplines and be verified by the training director(s) of the program. The written certifying examinations cannot be taken until all required years in both specialties are completed.

**Internal Medicine/Neurology**

The American Board of Internal Medicine and the American Board of Psychiatry and Neurology offer dual certification for candidates who have completed 5 years of combined training suitable to both boards. A combined residency in internal medicine and neurology must include at least 5 years of coherent education integral to residencies in the two disciplines. It is strongly recommended that the participating residencies be in the same institution.

To meet eligibility for dual certification, the resident must satisfactorily complete 60 months of training, which must be verified by the directors of both programs. The written certifying examinations cannot be taken until all required years in both specialties are satisfactorily completed.

**Internal Medicine/Nuclear Medicine**

The American Board of Internal Medicine and the American Board of Nuclear Medicine offer a training pathway for candidates who have completed 4 years of combined accredited training in internal medicine and nuclear medicine leading to admissibility to certification in both specialties. To meet eligibility for dual certification, the resident must satisfactorily complete 48 months of combined training that is verified by the directors of both training programs. It is strongly recommended that combined training occur in the same institution. Residents will be eligible for admission to the written certifying examination in internal medicine after successfully completing the R-3 year of training and for the nuclear medicine examination after the R-4 year.

**Internal Medicine/Pediatrics**

The American Board of Internal Medicine and the American Board of Pediatrics offer dual certification in internal medicine and pediatrics. A combined residency must include at least 2 years in each specialty, for a total of 4 years of coherent training integral to residencies in the two disciplines. The participating residencies should be in the same academic health center. Continuity clinics in each specialty should be provided throughout the 4 years.

To meet eligibility requirements for dual certification, the resident must satisfactorily complete 48 months of combined education, and clinical competence in both specialties must be verified by the directors of both programs. The certifying examinations cannot be taken until all required years in both specialties are satisfactorily completed.

**Internal Medicine/Physical Medicine and Rehabilitation**

The American Board of Internal Medicine and the American Board of Physical Medicine and Rehabilitation offer dual certification for candidates who have completed at least 24 years of suitable accredited training in each specialty. A combined residency must include at least 5 years of coherent training integral to residencies in the two disciplines. It is strongly recommended that the participating residencies be in the same institution.

To meet eligibility requirements for dual certification, the resident must satisfactorily complete 60 months of combined education, which must be verified by the directors of both programs. The written certifying examinations cannot be taken until required training in a specialty has been satisfactorily completed. The certifying examination in internal medicine cannot be taken prior to the fall of the fifth year in the combined program.

**Internal Medicine/Preventive Medicine**

The American Board of Internal Medicine (ABIM) and the American Board of Preventive Medicine (ABPM) offer dual certification for candidates who have completed a minimum of 4 years of accredited training in combined internal medicine/preventive medicine programs that meet the *Guidelines for Combined Internal Medicine - Preventive Medicine Residency Training Programs* approved by ABPM and ABIM. In addition to satisfactory completion of the combined training programs, applicants for the ABPM certifying examination must have completed the required year of preventive medicine practice to qualify.

**Internal Medicine/Psychiatry**

The American Board of Internal Medicine and the American Board of Psychiatry and Neurology offer dual certification in internal medicine and psychiatry. A combined residency must include at least 5 years of coherent education integral to residencies in the two disciplines. Participating residencies must be in the same institution.

To meet eligibility requirements for dual certification, the resident must satisfactorily complete 60 months of combined education, which must be verified by the directors of both programs. The written certifying examinations cannot be taken until all required years in both specialties are satisfactorily completed.

**Neurology/Physical Medicine and Rehabilitation**

The American Board of Psychiatry and Neurology and the American Board of Physical Medicine and Rehabilitation offer dual certification in neurology and physical medicine and rehabilitation. A combined residency must include 5 years of combined education. This combined training must follow a year in a residency program that meets the requirements for neurology and should be completed in the same institution. All required years in both specialties must be satisfactorily completed prior to admission to the certifying examination of each board.

**Neurology/Diagnostic Radiology/Neuroradiology**

The American Board of Psychiatry and Neurology and the American Board of Radiology offer certification in neurology, diagnostic radiology, and neuroradiology. The combined residency must include at least 7 years of coherent training integral to all three residencies. It is recommended that the participating residencies be in the same academic health center.

To meet eligibility requirements for triple certification, the resident must satisfactorily complete 84 months of combined training, which must be verified by the directors of each program. Lacking verification of acceptable clinical competence in the combined program, the resident must satisfactorily complete the standard length of residency training and all other requirements before each certifying examination may be taken. Applicants may not take the certifying examination until all required years of training have been completed. In order to be eligible for the neuroradiology exam, a resident must have completed certification in both diagnostic radiology and neurology.

**Pediatrics/Emergency Medicine**

The American Board of Pediatrics and the American Board of Emergency Medicine offer dual certification for candidates who fulfill the requirements of both boards by completing joint training in 5 years. All 5 years should be completed in the same combined program; exceptions must be approved in advance by both boards.
Applicants may not take the certifying examinations until all required years in both specialties have been completed.

**Pediatrics/Medical Genetics**
The American Board of Pediatrics and the American Board of Medical Genetics offer dual certification for candidates who fulfill the requirements of both boards by completing joint training in 5 years. All 5 years should be completed in the same combined program; exceptions must be approved in advance by both boards. Applicants may not take the certifying examinations until all required years in both specialties have been completed.

**Pediatrics/Physical Medicine and Rehabilitation**
The American Board of Pediatrics and the American Board of Physical Medicine and Rehabilitation permit applicants interested in pediatric rehabilitation to qualify for admission to the certifying examinations of both boards by completing a 5-year combined program. All 5 years should be completed at one academic institution; exceptions must be approved in advance by both boards. Applicants may not take the certifying examinations until all required years in both specialties have been completed.

**Pediatrics/Psychiatry/Child and Adolescent Psychiatry**
The American Board of Pediatrics, the American Board of Psychiatry and Neurology, and the Committee on Certification in Child and Adolescent Psychiatry have developed a committee that is overseeing training via a different format. This is a 5-year curriculum with 24 months of pediatrics, 18 months of adult psychiatry, and 18 months of child and adolescent psychiatry. Completion of the program will satisfy the training requirement for certification in all three areas. Applicants pursuing training in these programs may not take the certifying examinations until all training has been completed. Credit for training via this route may be obtained only by training in one of these programs.

**Psychiatry/Family Practice**
The American Board of Family Practice and the American Board of Psychiatry and Neurology offer dual certification in family practice and psychiatry. A combined residency in family practice and psychiatry must include at least 6 years of coherent training integral to residencies in the two disciplines. It is required that the combined training be under the aegis of the same academic institution.

To meet eligibility for dual certification, the resident must satisfactorily complete 60 months of combined training, which must be verified by the directors of both programs. The certifying examinations may not be taken until all required years of training in both specialties are satisfactorily completed.

**Psychiatry/Neurology**
The American Board of Psychiatry and Neurology has established guidelines for combined training in psychiatry and neurology. A combined residency must include one postgraduate year (PGY1) of training that is acceptable to neurology plus a minimum of 5 years of combined residency training. The 5 years of residency training are usually taken at one approved institution but may be taken at no more than two approved institutions.

Appendix B

Medical Specialty Board Certification Requirements

Twenty-four medical specialty boards have been approved by the American Board of Medical Specialties (ABMS) and the American Medical Association (AMA) Council on Medical Education through the Liaison Committee for Specialty Boards (LCSB). Applications for recognition as a specialty board are submitted to the LCSB and reviewed for compliance with the requirements and criteria published in the Essentials for Approval of New Examining Boards in Medical Specialties approved by both the ABMS and the AMA. If an applicant is approved for recognition as a specialty board by the LCSB, the application must then be approved by the membership of the ABMS and the AMA Council on Medical Education. The Essentials may be obtained from the office of the Executive Vice President of the ABMS, 1007 Church St/Stre 404, Evanston, IL 60201-5913, or from the Council on Medical Education, AMA, 515 N State St, Chicago, IL 60610.

The primary objective of medical specialty boards is the improvement of the quality of medical education and medical care. The primary functions of each of the medical specialty boards are to evaluate candidates in a medical specialty field who voluntarily appear for examination and to certify as diplomates those candidates who are qualified. To accomplish these functions, medical specialty boards determine whether candidates have received adequate preparation in accordance with established educational standards; provide comprehensive examinations designed to assess knowledge, skills, and experience required to provide quality patient care in that specialty; and certify those candidates who have satisfied the requirements.

In collaboration with the other organizations and agencies concerned, the approved medical specialty boards assist in improving the quality of medical education by elevating the standards of graduate medical education and approving facilities for specialty training.

The actual accreditation review for the approval of residency programs in each specialty is conducted by a Residency Review Committee on which the respective specialty board has equal representation with the AMA Council on Medical Education and, in some cases, with a related specialty society.

Medical specialty board certification is an additional process to receiving a medical degree, completing residency training, and receiving a license to practice medicine.

Certification requirements of each member board of ABMS are included on subsequent pages. Inquiries regarding specialty board certification requirements should be directed to the specialty board executive offices listed in Table 1. The member boards of ABMS publish materials containing statements on the requirements for certification, which are also reprinted in each edition of the Official American Board of Medical Specialties Directory of Board Certified Medical Specialists. This publication contains certification and biographical information on each specialist who has been certified by a member board of ABMS. The Directory is available from Marquis Who’s Who, 121 Chanlon Rd, New Providence, NJ 07974.

(The Board reserves the right to make changes in its policies and procedures at any time and cannot assume responsibility for giving advance notice thereof. All applicants are advised to contact the American Board of Allergy and Immunology [ABAI] to determine whether the following information remains current.)

Organization and Purpose
The ABAI was established in 1971 as a nonprofit organization and is one of 24 member boards of the American Board of Medical Specialties (ABMS). The ABAI is a Conjoint Board of the American Board of Internal Medicine (ABIM) and the American Board of Pediatrics (ABP) and is sponsored jointly by the American Academy of Allergy, Asthma and Immunology (AAAAI), the American Academy of Pediatrics (AAP) - Section on Allergy and Immunology, the American College of Allergy, Asthma and Immunology (ACAAI), the American Medical Association (AMA) - Section Council of Allergy and Immunology, and the Clinical Immunology Society (CIS).

ABAI's major purposes are to:
1. establish qualifications and examine physician candidates for certification as specialists in allergy/immunology,
2. serve the public and the health care community by providing the names of physicians certified as allergists/immunologists,
3. improve the quality of health,
4. establish and improve standards for the teaching and practice of allergy/immunology, and
5. establish standards for training programs in allergy/immunology working with the Residency Review Committee for Allergy and Immunology of the Accreditation Council for Graduate Medical Education (ACGME).

Significance of Certification
A certified specialist in allergy and immunology is a physician who previously has passed the certification examination of the ABIM and or the ABP with additional certification by the ABAI, a Conjoint Board of the ABIM and the ABP. Diplomates of the ABAI have detailed knowledge of the underlying pathophysiology and the diagnosis, treatment, and prevention of allergic and autoimmune diseases such as allergic rhinitis, allergic asthma, urticaria, anaphylaxis, hypersensitivity pneumonitis, atopic and contact dermatitis, and allergic gastrointestinal disorders, as well as comparable clinical problems without an apparent allergic etiology or component such as vasomotor rhinitis, nonallergic asthma, and idiopathic and/or hereditary forms of urticaria and/or angioedema. Diplomates also have expertise in the management of pulmonary complications of certain of these diseases.

Diplomates of the ABAI also possess advanced understanding of immunochemistry, immunobiology, and pharmacology and experience in the application of this knowledge to the diagnosis, management, and therapy of immunologic diseases. This includes inborn or acquired defects of host resistance, autoimmune diseases, bone marrow and solid organ transplantation, gene replacement therapy, adverse drug reactions, and related conditions. Diplomates have demonstrated to the satisfaction of their peers that they possess the general qualifications specified and are ethical and humanitarian practitioners of medicine.

Certification
The ABAI serves candidates who have embarked on a graduate program of study with the express purpose of excelling in the practice of the subspecialty of allergy/immunology. The ABAI is responsible for the establishment and maintenance of the standards of knowledge required for certification. The ABAI anticipates that during a post-medical school training program, the candidates will acquire adequate knowledge in basic science, as applied to this discipline. In outlining its requirements, the ABAI assists the candidate to select superior educational programs that will develop his/her competency in allergy/immunology. The ABAI believes that all allergists/immunologists should have a fundamental knowledge of the biological science basic to this discipline. The responsibility of acquiring the knowledge rests with the candidate. Such knowledge is essential to the continued professional progress of any qualified allergist/immunologist.

The candidate must demonstrate competency to the ABAI in order to justify certification in this discipline. Each candidate for certification must satisfy the general and professional qualifications listed below.

Content for Certification
The examination covers all content areas listed in the current Program Requirements for Residency Education in Allergy and Immunology and the Content Outline determined by the Board of Directors, which is distributed with the application, and the following:

Candidates for certification must be familiar with the fundamental elements of the immune system, such as the types of immune cells and the anatomical organs that constitute the immune system, the circulation patterns of immune cells, the biologic roles of products of the immune system, and the abnormal conditions of the immune system that constitute immunopathology. Moreover, the candidate will be expected to be proficient in understanding the molecular basis of allergic and other immune reactions, including interaction between immune cells, cell membrane signal
transduction pathways, gene expression, cytokine release, receptor
targeting, cellular differentiation, and cell death. Proficiency must
be demonstrated in the diagnosis and treatment of allergic and
other immunologic diseases.

Because the ABAI is a joint board representing pediatric and
adult medicine, the candidate must master the spectrum of allergic
and immunologic diseases as it presents in children and adults. In
addition to a familiarity with allergic diseases, including allergic
rhinitis, asthma, atopic dermatitis, and urticaria, the candidate
must be knowledgeable in autoimmune conditions. Equally impor-
tant are competence in diseases of immune dysfunction, the knowl-
edge of human pathology that results from an absence of immunity,
either whole or partial, congenital or acquired. Thus, an under-
standing of the primary immunodeficiency states is required, in-
cluding congenital disorders, absence of specific complement com-
ponents, lack of specific neutrophil function, absence of specific
adhesive cellular glycoproteins, and dysfunctional states of the
immune system produced by external agents.

It is important for the candidate to demonstrate proficiency in
the proper selection of appropriate clinical and laboratory tests,
which aid the formulation of a clinical diagnosis based upon first
obtaining a detailed medical history and performing a complete
physical examination. The candidate must understand the scientific
basis of the following list (noninvasive) of tests:

- serum immunoglobulin determination;
- functional antibody measurement;
- complement component and functional assays;
- lymphocyte subset analysis using monoclonal antibodies and flow
cytometry;
- lymphocyte proliferation assays with mitogen and antigens; and
- neutrophil and monocyte chemotaxis, phagocytosis, and killing
assessment.

In addition, competence must be demonstrated with the use of
molecular diagnostic techniques involving the binding of ligands to
nucleic acid or polypeptide sequences. The importance of DNA rep-
ication technology must be understood. The molecular basis for im-
mediate hypersensitivity skin testing must be understood in the
context of the detailed molecular events occurring in the tissue
mast cell and blood basophil, particularly the release of preformed
mediators, and in the generation of newly formed mediators. Simi-
larly, skin testing for T cell competence with recall antigens must
be understood in relation to antigen presentation, cytokine secre-
tion and interaction, and lymphocyte subset activation and func-
tion. Candidates must also have familiarity with the misuse of stan-
dard tests and with controversial tests in allergy and immunology.
The candidate must understand the principles and analytic meth-
ods employed in experimental clinical studies for determining the
diagnostic utility of specific tests and in evaluating the safety, toxic-
ity, efficacy, and outcomes of treatments and drugs for allergic
and immunologic disease. Candidates must be familiar with the prin-
ciples and methods employed in epidemiologic studies.

A corollary of the competence of the candidate in understanding
the pathophysiology, clinical presentation, and immunologic testing
of allergic and other immunologic diseases is the knowledge of ap-
propriate treatment options. For example, the common aspect of all
types of asthma is the presence of airway inflammation. Definitive
management of asthma demands that therapies be utilized that in-
clude interruption of the inflammatory response. Thus, candidates
for certification must understand use of drugs that decrease airway
inflammation in asthma. Based upon the molecular knowledge of
the allergic response, the candidate must appreciate the impor-
tance of allergen avoidance and medical treatment of allergic rhini-
tis before initiation of the more intense treatment of
immunotherapy. In the latter therapy, the candidates must
demonstrate competence in allergen selection and administration
in successful treatment regimens. Therapy for immunologic dis-
eases must be understood, such as (noninvasive): intravenous im-
mune globulin for antibody deficiency, treatment of immunodefi-
ciency with biologic response modifiers, HLA-identical and
HLA-haploidentical (T cell-depleted) bone marrow transplants for
 cellular immunodeficiencies, and gene replacement therapy cur-
cently used for the immunodeficiency associated with adenosine
desaminase deficiency as well as theoretical principles/potential
approaches in other congenital immune disorders.

Requirements for Certification

The candidate qualifies for examination by:
1. holding current certification by the ABIM and/or ABP;
2. presenting evidence acceptable to the Board of Directors of at
least 2 years of full-time residency/fellowship in allergy/immu-
nology programs accredited by the ACGME or other acceptable
training in allergy/immunology programs. These programs are
listed in the Graduate Medical Education Directory published
by the American Medical Association;
3. documentation and evaluations from the training program direc-
tor substantiating clinical competence and 2 full-time years of al-
lergy/immunology training. Areas to be reviewed include clinical
judgment; medical knowledge; clinical skills of history taking,
physical examination, and procedural skills; humanistic quali-
 ties, attitudes, and professional behavior; medical care (utilizing
laboratory tests and diagnostic procedures); commitment to
 scholarship; and work habits. Procedural skills to be assessed in-
clude immediate hypersensitivity skin testing, delayed hypersen-
sitivity skin testing, specific allergen immunotherapy, drug de-
sensitization, pulmonary function testing, and intravenous
immunoglobulin therapy.

The training program director must also provide written evi-
dence of the candidate's clinical experience and readiness to sit for
the examination. In compliance with the ACGME Program
Requirements for Residency Education in Allergy and Immunol-
ogy, a semianual record must be maintained with copies to the
ABAI for tracking purposes. The Evaluation Form together with
the Description of Ratings Scale may be obtained from the ABAI.
If a trainee has received two consecutive evaluations with overall
unsatisfactory ratings, the training program director must pro-
vide the trainee and the ABAI with a written plan for
remediation of the trainee's deficiencies. After 6 months, the
training program director must provide the ABAI and the trainee
with a report of the success or failure of the remediation pro-
gram, as well as any additional plans for corrective action;
4. documentation from the chief of medicine or pediatrics, ABAI
diplomates in the geographical area, chiefs of community hospita-
 lars, or officers of state or regional societies to verify the medical,
ethical, and moral standing and clinical competence of the can-
didate as a specialist in allergy/immunology; and
5. evidence of a valid (current), unrestricted license to practice
medicine in a state, territory, possession, or province of the
United States or Canada or providing a written explanation of ex-
tenuating circumstances. Candidates with a restricted, sus-
pended, or revoked license at the time of application or examina-
tion will not be admitted to the examination or certified.

Conjoint Committees—The nature of a Conjoint Board requires
involvement of the sponsoring primary boards in critical areas of
decision making. The ABAI has formed two advisory committees
with representation from the ABAI, ABIM, and ABP. The Conjoint
Credentials Committee reviews the credentials of candidates for
the certification examination to the Board for its determination.
The Conjoint Standards Committee recommends the passing grade
for the certification examination to the Board for its determination.
Pathways for Dual Certification
Formal special pathways exist for individuals wishing to qualify for dual certification in either allergy/immunology and pediatric pulmonology or adult rheumatology. Additional information regarding special pathways is available upon request to the ABAI.

Recertification
Since 1977, the ABAI has offered its diplomates a recertification process every other year so that the effectiveness of each diplomate's own efforts in continuing education would be evaluated.

Beginning with 1989, new ABAI diplomates receive certificates valid for 10 years. Time-unlimited certificates were issued prior to October 1, 1988. However, all diplomates, especially those involved in training programs, are strongly encouraged to recertify as often as possible, but at a minimum of every 10 years. Maintaining a current certificate is an expression of professional accountability. Presently, 1,250 ABAI diplomates hold time-limited certificates; renewal may be achieved in the interim. ABAI recommends recertification for diplomates holding time-unlimited certificates.

The recertification process is composed of the home study examination (available August 1 with completion by November 30) and the proctored modular examination administered the following summer. Recertification candidates will be required to attain an 80% correct score on the home study examination to gain entry to the proctored modular examination. If such an absolute score is not attained, the diplomate will be required to pass a subsequent remedial examination and attain an 80% correct score. Should performance not meet this standard, the candidates will not be permitted entry to the proctored modular examination, and a partial refund will be provided.

Upon gaining entry to the proctored modular examination, the recertification candidate will be required to complete a 50-item recent advances module (emphasizing new knowledge in the specialty) and complete one of two 150-item modules (preference as declared upon registration) in either allergy or immunology. The modular format has been designed to ensure that the recertification process is relevant to the diplomate's professional activities—either in the clinical and/or a laboratory or research setting. The ABAI anticipates that most diplomates seeking recertification will be successful. Recertification candidates will be required to attain an absolute minimum score to ultimately gain recertification in allergy and immunology. Standards are established to justify public confidence.

Content for Recertification
The content of the home study examination covers the broad area of allergy and immunology listed previously under "Content for Certification" and will provide diplomates a learning experience in the following areas of clinical science: immediate hypersensitivity, immunological disorders, pharmacology and therapeutics, specific diagnostic modalities, and allergens and antigens. Attention will also be given to the following areas of basic science: immune mechanisms, cells involved in immune responses, specific immune mechanisms, and laboratory tests.

The proctored examination reflects the current ABAI Content Outline, which is distributed upon successful performance on the home study examination. The recent advances module contains items covering the broad field of allergy and immunology. The allergy module contains basic and clinical items covering immediate hypersensitivity disorders. The immunology module contains items covering both basic and clinical immunology.

Requirements for Recertification
The diplomate qualifies for examination:
1. by having previously been certified by the ABAI (recertification in internal medicine or pediatrics is encouraged of ABAI diplomates); and
2. by presenting documentation from physicians in the ABAI diplomate's community that he/she currently practices the specialty of allergy and immunology; and
3. by presenting evidence of a valid (current), unrestricted license to practice medicine in a state, territory, possession, or province of the United States or Canada or by providing a written explanation of extenuating circumstances. Diplomates with a restricted, suspended, or revoked license at the time of application or examination will not be admitted to the examination or recertified.

Clinical and Laboratory Immunology (CLI)
In 1983 the ABMS approved Certification of Special Qualification in Diagnostic Laboratory Immunology (DLI) for Diplomates of the ABAI, ABIM, and ACP. Such recognition was awarded in 1986, 1988, and 1990 following successful examination performance to specialists with significant experience (at least 4 years) in comprehensive DLI or at least 1-year's training in DLI who were involved in the teaching, research, or practice settings in which the diagnostic immunology laboratory is of central importance, and were recognized by their peers as competent by way of their significant contributions to DLI.

In 1991 ABMS approved the change to a Certificate of Added Qualification in Clinical and Laboratory Immunology (CLI) for those specialists with 1 year of formal training following subspecialty certification in an immunologically based subspecialty in order to recognize the clinical interpretative skills inherent with such training. The first CLI examination was administered in 1994.

Content for Clinical and Laboratory Immunology (CLI)
With the goal of certifying candidates in the broader sense of clinical skills and laboratory expertise in clinical immunology, the ABAI recommends that CLI candidates be prepared to demonstrate competency by examination in the theory and practice of the following (noninclusive) clinical areas:
1. allergic diseases;
2. primary and secondary immunodeficiency diseases;
3. autoimmune diseases;
4. immunologic aspects of bone marrow and organ transplantation;
5. immune aspects of gene replacement therapy;
6. immunologic aspects of organ-specific inflammatory conditions; and
7. immune aspects of malignancy and cancer.

Although these clinical areas of competence are expected of the traditional candidate in allergy/immunology, the candidate for CLI will be expected to master these concepts to a far greater degree. Moreover, because upon certification the CLI candidate should be competent to supervise an immunology laboratory, evidence of competence will be required in the following (noninclusive) areas:
1. quantitation of immunoglobulins;
2. measurement of specific antibodies;
3. functional and quantitative complement tests;
4. assays of lymphocyte, monocyte, neutrophil, and basophil function and quantitation;
5. autoantibody measurement;
6. rapid tests for infectious diseases;
7. DNA amplification and binding tests;
8. genetic testing;
9. histocompatibility testing;
10. prenatal diagnosis;
11. quality control testing;
12. data management and statistical analysis; and
13. regulatory agency interactions.

The examination reflects the current ACGME Program Requirements for Residency Education in CLI and the Content Outline determined by the Joint Testing Committee of the ABAI, ABIM, and ABP, which is distributed with the application.

Requirements for Clinical and Laboratory Immunology (CLI)
The 1999 examination will be administered to those ABAI, ABIM, and ABP diplomates following a 2-year allergy/immunology training program or immunologically related subspecialty training, eg, rheumatology, infectious diseases, etc, with subspecialty certification, and a third year of CLI training. Competence must be verified by the program director responsible for the third year of training. Candidates whose applications were previously accepted and whose training meets the Program Requirements for Residency Education in CLI may also file an application.

Physicians qualified for examination are expected to be involved with applying laboratory methods to problems in human diseases involving changes in immune responses and will be able to perform, develop, interpret, and evaluate the clinical relevance of special laboratory procedures related to immunologically based diseases.

Examination Methodology

Announcements
The proctored certification and recertification examinations are administered simultaneously in several US locations in alternate years. The times and places are determined by the ABAI and announced in the appropriate specialty journals.

Applications
The act of filing an application is the candidate's responsibility. Application forms are available from the ABAI. They must be accompanied by two recently signed photographs and the necessary fees. Completed applications must be received on or before the close of registration (postmark applicable).

Board Review Courses
The ABAI does not sponsor or maintain any records on any courses that claim to be review courses in preparation for its examinations nor does it offer or endorse any specific publications or courses to prepare for its examinations.

Cancellations
Candidates who are accepted for examination, but fail to appear or who withdraw after the deadline for cancellation, will have their examination fee placed into an escrow account for the next examination. For each subsequent examination, candidates will be required to pay the current registration and examination fees.

Certificates
Candidates/diplomates who pass the examinations will be certified or recertified in the specialty of allergy/immunology or CLI as of the date of the examination and receive a 10-year time limited certificate, subject to revocation by the ABAI for cause. This information becomes public information and will be listed in the Official ABMS Directory of Board Certified Specialists.

Description
The written, proctored examinations vary in length, certification being two 4-hour sessions, recertification being one 4-hour session, and CLI being two 3-hour sessions. The multiple-choice questions are objective and designed to test the individual's knowledge through recall, interpretation, and problem solving. Each examination may contain previously used questions and new questions.

Candidates with Disabilities
Individuals who may need accommodation during the examination must provide written details to the ABAI at the time of application for examination in order to receive information about ABAI's disability policy and approval.

Fees
The fees are set forth in the instruction sheet included with the application. Candidates whose applications are rejected will receive a refund of the examination fee; however, the ABAI will retain the registration fee to cover the processing and evaluation costs. A nonrefundable late fee will apply to those applications received after the close of registration and prior to the cancellation deadline.

Irregular Behavior
All Board examinations are supervised by proctors, who are required to report any irregular behavior, which includes, but is not limited to, giving or obtaining unauthorized information or aid before, during, or after the examination as evidenced by observation or subsequent statistical analysis of answer sheets. Offering financial or other benefit to a proctor, employee, or agent of the ABAI is forbidden.

Rescoring
On written request and payment of a nominal fee, candidates may obtain rescoring within 3 months of receiving results. Answer sheets will be destroyed 12 months after administration of the examination.

Results
Individuals will be informed of the results of the examinations within 3 months of administration. The validity of the individual's performance on the examination is secured by every means available.

Special Policies

Verification of Board Status
Based on ABMS recommended policy, the ABAI does not issue statements of or implying "Board Eligibility" for any reason. Medical specialty certification is a process of advancement through several individual steps including examination. Having completed one step, such as the minimal educational requirements, should not imply that a candidate is now qualified for some special qualification that is more or less equivalent to certification. For written verification of the status of an allergist/immunologist, ABAI charges a nominal fee per name.

Revocation of Certificate
Certificates issued by the ABAI shall be subject to revocation under specific circumstances, including but not limited to a state medical license revocation or revocation of certification by either the ABIM or ABP.

Absences During Residency
Absences in excess of a total of 2 months over the 2-year allergy/immunology training program, whether for vacation, sick leave, maternity leave, etc, should be made up. If the training program director believes that an absence of more than 2 months is justified, a letter of explanation should be sent by the director for review by the Conjoint Credentials Committee.

Changes in Policies and Procedures
The ABAI reserves the right to make changes in its Policies and Procedures and fees at any time, and cannot assume responsibility for giving advance notice thereof. The provisions of this publication
are not to be construed as a contract between any candidate and the ABA.

**Examination Schedule**

**Certification**
- Date: August 13, 2001
- Registration period: November 1, 2000 - January 31, 2001
- Fee: $2,000
- Cancellation Date: July 15, 2001

**Recertification**
- Home Study Examination: available August 1, 2000
- Proctored Modular Examination: August 13, 2001
- Registration period: January 1 - June 30, 2000
- Fee: $2,000
- Cancellation date: July 15, 2001

**Clinical and Laboratory Immunology**
- Date: August 13, 2001
- Registration Period: November 1, 2000 - January 31, 2001
- Fee: $2,000
- Cancellation Date: July 15, 2001

Raleigh, NC 27607-7506
919-881-2570
919-881-2575 Fax
www.abanes.org

Francis M James III, MD, President, Winston-Salem, North Carolina
Mary Jane Matjasik, MD, Secretary, Baltimore, Maryland
David H Chestnut, MD, Birmingham, Alabama
Bruce F Cullen, MD, Seattle, Washington
Glen P Gravlee, MD, Columbus, Ohio
Orin F Guitry, MD, New Orleans, Louisiana
Steven C Hall, MD, Chicago, Illinois
Patricia A Kapur, MD, Los Angeles, California
Raymond C Roy, PhD, MD, Charlottesville, Virginia
Stephen J Thomas, MD, New York, New York
Kenneth J Tuman, MD, Chicago, Illinois
Mark A Warner, MD, Rochester, Minnesota
Francis P Hughes, Ph.D, Executive Vice President

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Anesthesiology (ABA) to ascertain whether the information below is current.)

**Introduction**

The chair of the anesthesiology department is the director of the residency program. Although the department chair may delegate responsibility for administering the program, the ABA corresponds officially about training matters only with the department chair.

The department chair must ensure that each resident's training fulfills all criteria for entering the ABA examination system. However, it is crucial that the resident know the requirements described in the Booklet of Information since the resident ultimately bears responsibility for compliance with the requirements and bears the consequences if one or more aspects of training prove unacceptable. This is especially important when requests are made for special training sequences or sites or for exemptions. If, after speaking with the department chair, there is any question about the acceptability of any portion of training, the resident should write the secretary of the ABA directly at the ABA office.

Applicants and candidates for ABA examinations have the ultimate responsibility to know and comply with the Board's policies, procedures, requirements, and deadlines regarding admission to and opportunities for examination.

**Primary Certification in Anesthesiology Certification Requirements**

At the time of certification by the ABA, the candidate shall be capable of performing independently the entire scope of anesthesiology practice and must:

A. Hold a permanent, unconditional, unrestricted, and unexpired license to practice medicine or osteopathy in one state or jurisdiction of the United States or province of Canada.

B. Have fulfilled all the requirements of the continuum of education in anesthesiology.

C. Have on file with the ABA a Certificate of Clinical Competence with an overall satisfactory rating covering the final 6-month period of clinical anesthesia training in each anesthesiology residency program.
D. Have satisfied all examination requirements of the Board.
E. Have a moral, ethical, and professional standing satisfactory to the ABA.
ABA certificates in anesthesiology issued on or after January 1, 2000, are valid for 10 years after the candidate passes the examination for certification. It is left to the holder of the certificate when to apply to the ABA for recertification in anesthesiology.
A person certified by the ABA has demonstrated a diplomate or publication of the American Board of Medical Specialties (ABMS) and the American Society of Anesthesiologists.

Continuum of Education in Anesthesiology
The continuum of education in anesthesiology consists of 4 years of training subsequent to the date that the medical or osteopathic degree has been conferred. The continuum consists of a clinical base year (CBY) and 36 months approved training in anesthesiology (CA-1, CA-2, and CA-3 years).
A. Acceptable clinical base experiences include training in internal or emergency medicine, pediatrics, surgery or any of the surgical specialties, obstetrics and gynecology, neurology, family practice, critical care medicine, or any combination of these as approved for the individual resident by the director of his or her training program in anesthesiology. The clinical base year must include at least 10 months of clinical rotations, during which the resident has responsibility for the diagnosis and treatment of patients with a variety of medical and surgical problems, of which at most 1 month may involve the administration of anesthesia. At most 2 months of the Clinical Base year may involve training in specialties that do not meet the aforementioned criteria.
During the clinical base year the physician must be enrolled and training as a resident in a transitional year or specialty training program in the United States or its territories that is accredited by the Accreditation Council for Graduate Medical Education (ACGME) or approved by the American Osteopathic Association or outside the United States and its territories in institutions affiliated with medical schools approved by the Liaison Committee on Medical Education (LCME).
Clinical base training must be completed satisfactorily before clinical rotations in fulfillment of the CA-3 year are begun.
B. The 3-year clinical anesthesia curriculum (CA-1 through CA-3) consists of experience in basic anesthesia training, subspecialty anesthesia training, and advanced anesthesia training. It is a graded curriculum of increasing difficulty and learning that is progressively more challenging of the resident's intellect and technical skills.
1. Experience in basic anesthesia training is intended to emphasize basic and fundamental aspects of the management of anesthesia. It is recommended that at least 12 months of the CA-1 and CA-2 years be spent in basic anesthesia training, with a majority of this time occurring during the CA-1 year.
2. Subspecialty anesthesia training is required to emphasize the theoretical background, subject material, and practice of subspecialties of anesthesiology. These subspecialties include obstetric anesthesia, pediatric anesthesia, cardiothoracic anesthesia, neuroanesthesia, anesthesia for outpatient surgery, recovery room care, regional anesthesia, and pain management. It is recommended that these experiences be subspecialty rotations and occupy 7 to 12 months of the CA-1 and CA-2 years. The sequencing of these rotations in the CA-1 and CA-2 years is left to the discretion of the program director.
In addition to the above requirements for subspecialty experiences, 2 months of training in critical care medicine are required during clinical anesthesiology years. An acceptable critical-care rotation should include active participation in patient care, active involvement by anesthesia faculty experienced in the practice and teaching of critical care, and an appropriate population of critically ill patients. Experience in short-term postanesthesia units, intermediate step-down units, or emergency rooms does not fulfill this requirement.
3. Experience in advanced anesthesia training constitutes the CA-3 year. The CA-3 year is a distinctly different experience from the CA-1 and CA-2 years, requiring progressively more complex training experiences and increased independence and responsibility for the resident. Residents must complete the Clinical Base and CA-1 and CA-2 years of training before they begin clinical rotations in fulfillment of the CA-3 year requirement. The program director, in collaboration with the resident, will design the resident's CA-3 year of training. They will select one of two tracks designated as the advanced clinical track and the clinical scientist track. Regardless of the track selected, resident assignments in the CA-3 year should include the more difficult or complex anesthetic procedures and care of the most seriously ill patients.
Residents in the advanced clinical track are required to complete a minimum of 6 months of advanced anesthesia training. They may spend the remaining 6 months in advanced anesthesia training or in one to three selected subspecialty rotations. Residents may train in one anesthesia subspecialty for at most 6 months during the CA-3 year and no more than 12 months during the CA-1 through CA-3 years.
The clinical scientist track consists of clinical training in combination with research experience. Residents must be enrolled in an ACGME-accredited anesthesiology program and remain active in the educational component of the program while pursuing research. There are two options for fulfilling the requirements of this track.
Option A of the clinical scientist track may be fulfilled by completing 6 months of clinical or laboratory research experience during 48 months of training, which must include 12 months of clinical base and a minimum of 30 months of clinical anesthesia.
Option B of the clinical scientist track, intended for residents who plan careers as academic investigators, may be fulfilled by completing 18 months of clinical or laboratory research at any time during 60 months of training, which must include 12 months of clinical base and a minimum of 30 months of clinical anesthesia. They are eligible for entrance into the ABA examination system after they have completed their clinical base requirement, 30 months of clinical anesthesiology satisfactorily, and a minimum of 6 months of research experience.
Regardless of which clinical scientist option is chosen, a resident who elects this track must have a satisfactory Clinical Competence Committee report for the 6 months of clinical anesthesia training immediately preceding any research period.
The anesthesiology program director may request 6 months of credit toward the research component of Option B for a resident with a PhD degree in a discipline relevant to anesthesiology. Documents supporting this request should include documentation of the PhD degree, a description of the current research, and a copy of the resident's curriculum vitae. Approval is at the discretion of the Credentials Committee and must be obtained prior to the start of the last 12 months of residency training. Credit will be granted only upon completion of all other requirements of Option B of the clinical scientist track.
C. Credit toward the CA-1 through CA-3 year requirements is granted by the ABA for clinical anesthesia training that satisfies all of the following conditions:

1. The CA-1 through CA-3 years of training are spent as a resident enrolled with the ABA for no more than two AGME-accredited residency programs in the United States or its territories.

2. The period of clinical anesthesia training as an enrolled resident of any single program is at least 6 months of uninterrupted training.

3. The clinical anesthesia training in any one program ends with receipt of a satisfactory Certificate of Clinical Competence. When the final period of training in any program is not satisfactory, the ABA grants credit for clinical anesthesia training in that program only to the date of the most recent satisfactory certificate received for the resident from that program.

To receive credit from the ABA for a period of clinical anesthesia that is not satisfactory, the resident must immediately complete an additional 6 months of uninterrupted clinical anesthesia training in the same program with receipt of a satisfactory Certificate of Clinical Competence.

The ABA has changed its policy regarding credit for clinical anesthesia training. The new policy applies to all clinical anesthesia training that occurs on or after July 1, 2000.

Effective July 1, 2000:

To receive credit from the ABA for a period of clinical anesthesia training that is not satisfactory, the resident must immediately complete an additional 6 months of uninterrupted clinical anesthesia training in the same program with receipt of a satisfactory Certificate of Clinical Competence. If the resident receives consecutive Certificates of Clinical Competence that are not satisfactory, additional training is required. The ABA will grant at most 12 months of credit when the resident receives a satisfactory Certificate of Clinical Competence immediately following receipt of consecutive Certificates that are not satisfactory.

4. No more than 6 months during the first 2 clinical anesthesia years and a maximum of 12 months during the 3 years of clinical anesthesia training are spent outside the parent programs in affiliated or nonaffiliated institutions. The Credentials Committee of the ABA must prospectively approve clinical anesthesia training in nonaffiliated programs. The prospective request for approval must include a chronological description of the rotations, information about the supervision of the resident, and assurances that the resident will be in compliance with the limits on training outside the parent program. Further, the resident must remain enrolled in the parent program while training at an affiliated or nonaffiliated institution, and the parent program must report the training on the Clinical Competence Committee report filed for the period involved.

D. Prospective approval is required for exceptions to policies regarding the training planned for residents. The Credentials Committee of the ABA considers requests for prospective approval on an individual basis. The ABA office must receive the request from the department chair on behalf of a resident at least 2 months before the resident begins the training in question. It is the responsibility of the department chair and the resident to assure that the request is received in a timely manner.

Principal Objectives

The examination system for the ABA's primary certificate has two distinct parts, the written examination and the oral examination. Each is designed to assess different qualities of a Board-certified anesthesiologist.

A Board-certified anesthesiologist is a physician who provides medical management and consultation during the perioperative period in pain management and in critical care medicine. A diplomate of the Board must possess knowledge, judgment, adaptability, clinical skills, technical facility, and personal characteristics sufficient to carry out the entire scope of anesthesiology practice. An ABA diplomate must logically organize and effectively present rational diagnoses and appropriate treatment protocols to peers, patients, their families, and others involved in the medical community. A diplomate of the Board can serve as an expert in matters related to anesthesiology, deliberate with others, and provide advice and defend opinions in all aspects of the specialty of anesthesiology. A Board-certified anesthesiologist is able to function as the leader of the anesthesiology care team.

Because of the nature of anesthesiology, the ABA diplomate must be able to manage emergent life-threatening situations in an independent and timely fashion. The ability to independently acquire and process information in a timely manner is central to assure individual responsibility for all aspects of anesthesiology care. Adequate physical and sensory faculties, such as eyesight, hearing, speech, and coordinated function of the extremities, are essential to the independent performance of the Board-certified anesthesiologist. Freedom from the influence of or dependency on chemical substances that impair cognitive, physical, sensory, or motor function also is an essential characteristic of the Board-certified anesthesiologist.

The written examination is designed to assess the candidate's knowledge of basic and clinical sciences as applied to anesthesiology.

It is necessary for candidates to pass the written examination to qualify for the oral examination. Candidates must wait at least 6 months after passing the written examination to be eligible to appear for the oral examination.

The oral examination is designed to assess the candidate's ability to manage patients presented in clinical scenarios, with particular emphasis on the scientific and clinical rationale that supports the management.

Irregular Behavior

The Board acts to maintain the integrity of its examination and certification process and to ensure the equitable and objective administration of its examinations to all candidates. Information about behavior the Board considers a violation of the integrity of its examination and certification process is sent to all candidates scheduled for examination. Statistical analyses may be conducted to verify observations and reports of suspected irregularities in the conduct of an examination. The examination of a candidate whose conduct, in the Board's judgment, violates or attempts to violate the integrity of its examination and certification process will be invalidated and no results will be reported. Furthermore, the candidate will be subject to punitive action as determined by the Board. In that event the candidate would be informed of the reasons for the Board's actions and could request an opportunity to present information deemed relevant to the issue and to petition the Board to reconsider its decision.

Nonstandard Examination Administration

The ABA supports the intent of the Americans with Disabilities Act (ADA) and has a process for considering requests that its assessment programs be modified to accommodate an individual with a disability. Anyone having questions about the process should write or call the executive vice president of the Board at the ABA office.
Unforeseeable Events
In the event of a natural disaster, war, government regulations, strikes, civil disorders, curtailment of transportation facilities, or other unforeseeable events make it either unlawful, illegal, or impossible for the ABA to administer an examination to a candidate at the appointed date, time, and location, or to conclude a candidate's examination, the ABA is not responsible for any personal expense the candidate may have incurred to be present for the examination or for any such expense the candidate may incur for any substitute examination.

Application Form
Application for admission to the examination system of the ABA must be made to the Secretary on a form prescribed by the Board. Photocopies or facsimiles of the application form are not acceptable.

The proper application form and other information may be obtained by writing to the Secretary, American Board of Anesthesiology, 4101 Lake Boone Trail, Suite 510, Raleigh, NC 27607-7506. An applicant must request an application form by writing to the Board. Telephone requests are not acceptable.

Filing and Documentation Deadlines
The ABA must receive the completed application and the appropriate fee on or before January 10 of the year in which the written examination is to be administered. The January 10 deadline for receipt of completed applications is absolute, and no application will be accepted after that date for any reason.

The ABA must receive all documentation it requires to make a determination about an applicant's qualifications for admission to examination no later than March 10 of the year in which the written examination is to be administered. This includes but is not limited to references and evidence of medical licensure or of having qualified for such licensure. An application will not be accepted if the required documentation is not received by that date. It ultimately is the responsibility of every applicant to ensure that the ABA receives all required documentation in a timely manner.

Applicant Declaration and Consent
The application form includes the following declaration, which the applicant must sign:

I hereby make application to The American Board of Anesthesiology, Inc., for the issuance to me of a Certificate, and for examination relative thereto, all in accordance with and subject to all its rules and regulations, and the fee requested. I agree to disqualification from examination or from the issuance of a Certificate or to forfeiture and redelivery of such Certificate in the event that any of the statements hereinafter made by me are false or in the event that any of the rules governing such examinations are violated by me or in the event that I did not comply with or shall violate any of the provisions of the Certificate of Incorporation or By-Laws of The American Board of Anesthesiology, Inc., or both, as then constituted. I understand that the American Board of Anesthesiology, Inc., may report my status in the examination system, including the result of any written or oral examination, to the Director of the program in which I completed my training in clinical anesthesiology either routinely or upon the request of such program director, use any score in psychometric analyses to confirm observations and reports of suspected irregularities in the conduct of an examination, and respond to any inquiry about my status in its examination system in accordance with its policy as then constituted. I authorize any and all repositories to grant access to or to produce copies for The American Board of Anesthesiology, Inc., of all documents and records containing information and data pertaining to my practice of the medical specialty of anesthesiology and its subdisciplines. I understand that such information and data will be used exclusively for current and longitudinal studies to assess the certification processes of The American Board of Anesthesiology, Inc. More particularly, such information as it pertains to me shall be held in confidence and shall be reported or released only as a part of the aggregate of such information gathered and studied without specific reference to myself or any other individuals. Such information and data will not be in any way whatsoever upon the decision of The American Board of Anesthesiology, Inc., whether or not to grant me a certificate. I agree to hold The American Board of Anesthesiology, Inc., its members, examiners, officers, and agents, free from any damage or complaint by reason of any action they, or any of them, take in connection with this application, such examinations, the grade or grades given with respect to any examination, the failure of said Board or Corporation to issue to me such certification, the gathering and collecting of information and data about my practice of anesthesiology, or the use of such information or data in studies of the certification processes of The American Board of Anesthesiology, Inc., as described above.

The application form also includes the following consent, which the applicant must sign:

I, the undersigned, in connection with my application for certification by The American Board of Anesthesiology, Inc., hereby authorize The American Board of Anesthesiology, Inc., now and in the future, to request, procure and review any information regarding my medical practice, professional standing and character, including any information related to any disciplinary action related to the practice of medicine by any state licensing agency or any institution in which I have practiced medicine and any information related to abuse of alcohol or illegal use of drugs and any treatment or rehabilitation related thereto.

I hereby authorize The American Board of Anesthesiology, Inc., now and in the future, to request and procure such information from any individual or institution, each of which shall be absolutely immune from civil liability arising from any act, communication, report, recommendation or disclosure of any such information even where the information involved would otherwise be deemed privileged so long as any such act, communication, report, recommendation or disclosure is performed or made in good faith and without malice.

Entrance Requirements
At the time of application to enter the examination system of the ABA, the applicant shall be capable of performing independently the entire scope of anesthesiology practice and must:
A. Have graduated from a college of medicine in a state or jurisdiction of the United States or in Canada that was accredited by the date of graduation by the LCME, the Committee on Accreditation of Canadian Medical Schools, or the American Osteopathic Association. Graduates of medical schools outside the jurisdiction of the United States and Canada must have one of the following: a permanent (valid indefinitely) certificate from the Educational Commission for Foreign Medical Graduates, comparable credentials from the Medical Council of Canada, or documentation of training for those who entered postdoctoral medical training in the United States via the Fifth Pathway as proposed by the American Medical Association.
B. Provide evidence satisfactory to the Board of having been awarded a medical or osteopathic degree acceptable to the Board.

C. Provide evidence acceptable to the Board of having satisfied the licensure requirement for certification. The applicant must inform the ABA of any conditions or restrictions in force on any active medical license he or she holds. When there is a restriction or condition in force on any of the applicant's medical licenses, the Credentials Committee of the ABA will determine whether the applicant shall be admitted to the ABA examination system.

Residents in training may submit evidence with their application of having qualified on examinations that provide eligibility for medical licensure (eg, United States Medical Licensing Examination Steps 1, 2, and 3). Residents who do so must have evidence of permanent, unconditional, unrestricted, and currently unexpired medical licensure on file in the ABA office by November 39 of the year in which the written examination for which they applied is administered.

D. Have on file in the Board office evidence of having satisfactorily fulfilled all requirements of the continuum of education in anesthesiology before the date of examination and after receiving a medical or osteopathic degree acceptable to the ABA. Such evidence must include a satisfactory Certificate of Clinical Competence covering the final 6 months of clinical anesthesia training in each residency program. A grace period will be permitted so that applicants completing this requirement by August 31 may apply for the immediately preceding July written examination.

E. Have on file with the Board evaluations of various aspects of his or her current practice of anesthesiology as solicited by the Board in determining the applicant's qualifications for admission to the examination system. The ABA may request such evaluations from the residency program director or others familiar with the applicant's current practice of anesthesiology. The Clinical Competence Committee report from the department and the evaluation of the program director and others will be used as the basis for assessing admission qualifications.

F. If residency training was completed more than 12 years before the date of application or if a second or subsequent application has been declared void, the applicant must submit proof of having reestablished his or her qualifications for admission to the examination system. Acceptable proof consists of documentation of having qualified on an entry examination designated by the Board. The Board has designated the examination administered annually by the Joint Council on In-Training Examinations as the entry examination. Information about the entry examination and a registration form may be obtained by writing the Joint Council c/o the American Society of Anesthesiologists.

Alternatively, the applicant may complete 12 consecutive months of additional clinical training in anesthesia as a CA-3 year resident in one ACGME-accredited program with receipt of a satisfactory Certificate of Clinical Competence covering the final 6 months. The applicant must qualify on the entry examination or satisfactorily complete the year of additional training after the date the ABA declared her or his most recent application void. The applicant must complete the requalifying examination before applying to the ABA. If the applicant will complete the year of additional training by August 31, he or she may apply to the ABA for the immediately preceding July written examination. The applicant must apply to the ABA within 3 years of having reestablished her or his qualifications for admission to examination.

The ABA will not validate or report the results to applicants who sit for the written examination and do not fulfill those conditions by the deadline.

The Board shall determine that entry into the examination system is merited when a judgment of adequate levels of scholarship and clinical competence can be made from the information submitted. After approval of all of their credentials, the ABA will notify applicants that they are accepted as candidates for certification.

The Board, acting as a committee of the whole, reserves the right not to accept an application for any reason deemed appropriate. The applicant has the right to seek review of such decision.

The Board reserves the right to correct clerical errors affecting its decisions.

Certificate of Clinical Competence

The Board requires every residency training program to file, on forms provided by the Board, an Evaluation of Clinical Competence in January and July on behalf of each resident who has spent any portion of the prior 6 months in clinical anesthesia training in or under the sponsorship of the residency program and its affiliates. The program director (Department chair) must not chair the Clinical Competence Committee.

Entry into the examination system is contingent upon the applicant having a Certificate of Clinical Competence on file with the Board attesting to satisfactory clinical competence during the final period of clinical anesthesia training in or under the sponsorship of each program. The Board, therefore, will deny entry into the examination system until this requirement is fulfilled.

Absence From Training

The total of any and all absences during clinical anesthesia training may not exceed the equivalent of 20 working days per year. Attendance at scientific meetings, not to exceed 5 working days per year, shall be considered a part of the training program. Duration of absence during the clinical base year may conform to the policy of the institution and department in which that portion of the training is served. Absences in excess of those specified will require lengthening of the total training time to the extent of the additional absence.

A lengthy interruption in training may have a deleterious effect on the resident's knowledge or clinical competence. Therefore, when there is an absence for a period in excess of 6 months, the Credentials Committee of the ABA shall determine the number of months of training the resident will have to complete subsequent to resumption of the residency program to satisfy the training required for admission to the ABA examination system.

Entrance Into the System

The examination system for the ABA's primary certificate has two distinct parts, the written examination and the oral examination. Each is designed to assess different qualities of a Board-certified anesthesiologist.

The written examination is designed to assess the candidate's knowledge of basic and clinical sciences as applied to anesthesiology. Written examinations are held annually in locations throughout the United States and Canada on a Saturday in July. A passing grade, as determined by the Board, is required.

It is necessary for candidates to pass the written examination to qualify for the oral examination. Candidates must wait at least 6 months after passing the written examination to be eligible to appear for the oral examination.

The oral examination is designed to assess the candidate's ability to manage patients presented in clinical scenarios with particular emphasis on the scientific and clinical rationale that supports the management. The ABA conducts oral examinations in the spring.
The Board reserves the right to limit the number of candidates to be admitted to any examination. Places in the oral examination schedule are assigned randomly when more candidates request the examination than can be accommodated. Candidates who are not given an examination appointment, whether or not they accepted the examination opportunity, are required to appear at the next examination for which they are eligible.

**Fees**

The application fee for primary certification in anesthesiology is $1,700. It must accompany the application.

For completed applications received between January 11 and November 20 of the previous year, the application fee is $1,600—a reduction of $100 for early filing.

The application fee includes a nonrefundable fee for administrative services. It is $200 for applications for primary certification that arrive after November 20 and $100 for those received on or before that date. In the event an application is not accepted, or the application is accepted and subsequently withdrawn by the candidate, the fee for administrative services will be retained and the balance of the application fee will be refunded. No fee will be remitted if the candidate's notice of withdrawal from the examination system is received in the Board office after the deadline by which candidates must notify the Board of their choice of test center for the first written examination for which they are eligible.

The reexamination fee is $400 for the anesthesia written examination and $1,100 for the oral examination. The reexamination fee will be charged to candidates whether they have failed a previous examination, canceled a scheduled appointment for examination, or failed to appear for any examination for which they were properly scheduled. A charge of $50 will be made whenever a check is returned for nonpayment.

The ABA is a nonprofit organization. The fees for application and examination are computed on a basis of cost of maintaining the functions of the Board. The Board reserves the right to change the fees when necessary.

**Reapplication**

The ABA declares void the application of a candidate who does not satisfy the examination requirements in the prescribed number of opportunities or time for whatever reason. The physician may reapply by submitting a new application. Such application shall be subject to the fees, rules, privileges, and requirements that apply at the time of reapplication. The applicant who meets existing requirements will be readmitted into the examination system.

The reapplicant for primary certification who has had a second or subsequent application declared void for any cause, or has completed anesthesia residency training more than 12 years before the date of reapplication, must reestablish his or her qualifications for admission to the examination system before filing another application. In all instances, the candidate must pass both the written and oral examinations under the new application.

**Status of Individuals**

The ABA reserves to itself exclusively the right to define and confer "Board eligible" status whenever such status refers to an individual's relationship to the ABA examination and certification system. The ABA shall confer Board eligible status only on physicians who have a current accepted application in its examination system. Thus, physicians are Board eligible only when they are eligible to appear for an ABA examination. Board eligible status is not conferred indefinitely.
Inquiries about the current status of individuals should be addressed to the ABA office, which will respond with one of the following statements:

- The physician is certified by the American Board of Anesthesiology.
- The physician is Board eligible in anesthesiology.
- The decision whether the physician is Board eligible in anesthesiology is pending a determination that the applicant has met all requirements for admission to the ABA examination system.
- The physician is neither certified by the American Board of Anesthesiology nor Board eligible.

The fee for written confirmation of an individual’s status is $10.

Alcoholism and Substance Abuse

The Americans with Disabilities Act (ADA) protects individuals with a history of alcohol or substance abuse who are not currently abusing alcohol or using drugs illegally. The ABA supports the intent of the ADA.

The ABA will admit qualified applicants and candidates with a history of alcohol abuse to its examination system and to examination if, in response to its inquiries, the ABA receives acceptable documentation that they do not currently pose a direct threat to the health and safety of others.

The ABA will admit qualified applicants and candidates with a history of illegal use of drugs to its examination system and to examination if, in response to its inquiries, the ABA receives acceptable documentation that they are not currently engaged in the illegal use of drugs.

After a candidate with a history of alcohol abuse or illegal use of drugs satisfies the examination requirements for certification, the ABA will determine whether it should defer awarding its certification to the candidate for a period of time to avoid certifying a candidate who poses a direct threat to the health and safety of others. If the ABA determines that deferral of the candidate's certification is appropriate because the candidate does currently pose a threat to the health and safety of others, the ABA will assess the specific circumstances of the candidate’s history of alcohol abuse or illegal use of drugs to determine when the candidate should write the Board to request issuance of its certification.

Revocation of Certificate

A certificate is issued by the Board with the understanding that it remains the property of the Board during the life of the diploma. Any certificate issued by the Board shall be subject to revocation in the event that:

A. The issuance of such certificate or its receipt by the person so certified shall have been contrary to or in violation of any provision of the Certificate of Incorporation of this Board or its By-Laws; or
B. The person certified shall not have been eligible to receive such certificate whether or not the facts making him or her ineligible were known to or could have been ascertained by the Board or any of the directors at the time of issuance of such certificate; or
C. The person certified shall have made any misstatement of fact in his or her application for such certificate or in any other statement or representation to the Board or its representatives; or
D. The person certified shall fail to maintain moral, ethical, or professional behavior satisfactory to the Board.

The Board shall be the sole judge of whether the evidence or information before it is sufficient to require or permit revocation of any certificate issued by the Board, and the decision of the Board shall be final. The individual has the right to seek review of such decision.

Certification by Other Organizations

The ABA will make no statement about the comparability of the ABA certificate and another organization’s certificate. The ABA will not accept certification by another entity as meeting the requirements for entrance into the ABA examination system for specialty or subspecialty certification or recertification.

Records Retention

The ABA retains documents pertaining to an individual’s residency training, application for certification, examination opportunities, and examination results for the sole purpose of determining that its requirements for admission to examination and for certification are fulfilled.

In the absence of an application for certification, documents pertaining to the ABA entrance requirements are retained for 7 years from the date of the most recent correspondence to or from the ABA regarding the requirements. Documents pertaining to an unsuccessful application are retained until the individual submits another application to the ABA or the aforementioned 7-year period expires whichever occurs first. Documentation corroborating the results of a candidate’s examination is retained until 1 year after the date of the most recent correspondence to or from the ABA regarding the results. Documentation corroborating the candidate’s fulfillment of the ABA certification requirements is retained until 1 year after the date of the most recent correspondence to or from the ABA regarding the candidate’s certification by the ABA. The ABA sees to the secure destruction of the documents in its file for an individual when the period specified for retention of the documents has expired.

The ABA retains indefinitely an electronic record for residents who trained in an ACGME-accredited anesthesiology program. This record includes entries that identify the training program, the dates of training, and the overall evaluation of the resident.

The ABA retains indefinitely microfiche and electronic records for candidates issued its certification. These records include documents and entries attesting that each certification requirement was met.

Review Process

The only actions of the ABA that are subject to review are a decision not to accept an application, a decision not to grant a request for an examination under nonstandard testing conditions, and a decision to revoke a certificate issued by the ABA.

The individual must give the ABA written notification of the intent to seek review within thirty (30) days of receiving notification of the Board's decision. The notice shall be addressed to the ABA secretary at the Board office and shall set forth the grounds on which the request for review is based. If the individual does not give the ABA written notification of the intent to seek review within the time and in the manner prescribed, the individual shall be considered to have accepted the decision of the Board and the decision shall become final.

Upon receipt of notice of the intent to seek review within the time and in the manner prescribed, the ABA will send the individual information about the ABA review process.

Subspecialty Certification in Critical Care Medicine

A. Definition of Critical Care Medicine

The discipline of critical care medicine has evolved over the last few decades in parallel with the development of techniques and technology for acute and long-term life support of patients with multiple organ system derangement. Because the problems encountered in the critically ill patient encompass aspects of many
different specialties, critical care medicine is a multidisciplinary endeavor that crosses traditional department and specialty lines. The critical care medicine physician is a specialist whose knowledge is of necessity broad, involving all aspects of management of the critically ill patient, and whose primary base of operation is the intensive care unit (ICU). This physician has completed training in a primary specialty and has received additional training in critical care medicine aspects of many disciplines. This background enables the physician to work in concert with the various specialists on the patient care team in the ICU; to utilize recognized techniques for vital support; to teach other physicians, nurses, and health professionals the practice of intensive care; and to foster research.

B. Certification Requirements
At the time of subspecialty certification in critical care medicine by the ABA, each candidate shall be capable of performing independently the entire scope of anesthesiology critical care medicine practice and must:

• Be a diplomate of the ABA.
• Fulfill the licensure requirement for certification.
• Have fulfilled the requirement of the continuum of education in critical care medicine as defined by the ABA.
• Have satisfied the critical care medicine examination requirement of the ABA.

ABA subspecialty certificates in critical care medicine issued on or after January 1, 2000, are valid for 10 years after the year the candidate passes the examination for certification. It is left to the holder of the certificate when to apply to the ABA for examination and recertification in the subspecialty.

C. Continuum of Education in Critical Care Medicine
The continuum of education in critical care medicine consists of 12 months of full-time training in critical care medicine. The training must be in an anesthesiology critical care medicine program in the United States or its territories accredited by the ACGME. The training must follow completion of the continuum of education in anesthesiology (ie, clinical base and CA-1 through CA-3 years) unless the Credentials Committee of the ABA prospectively approves a different training sequence for the resident.

Training in critical care medicine must not be interrupted by frequent or prolonged periods of absence. When there is an absence for a period in excess of 2 months, the Credentials Committee of the ABA shall determine the number of months of training the resident will have to complete subsequent to resumption of the residency program to satisfy the training required for admission to the ABA subspecialty examination system.

D. Entrance Requirements
At the time of application to enter the critical care medicine examination system of the ABA, the applicant shall be capable of performing independently the entire scope of anesthesiology critical care medicine practice and must:

• Be certified by the ABA.
• Submit proof of having fulfilled the licensure requirement for certification. The applicant must inform the ABA of any conditions or restrictions in force on any active medical license he or she holds. When there is a restriction or condition in force on any of the applicant's medical licenses, the Credentials Committee of the ABA will determine whether the applicant shall be admitted to the ABA examination system.
• Have on file in the ABA office documentation of having fulfilled the requirement of the continuum of education in critical care medicine.

The ABA will solicit evaluations of various aspects of the applicant's current practice of anesthesiology critical care medicine as part of its assessment of the applicant's qualifications for admission to its critical care medicine examination system. The Board shall determine that entry into its critical care medicine examination system is merited when a judgment of clinical competence can be made from the information submitted.

The ABA will notify an applicant who is accepted as a candidate for its critical care medicine examination after approval of all credentials. The Board, acting as a committee of the whole, reserves the right not to accept an application for any reason deemed appropriate. The applicant has the right to seek review of such decision. The Board reserves the right to correct clerical errors affecting its decisions.

E. Application Procedure
1. The proper application form and other information may be obtained by writing to the secretary of the ABA at 4101 Lake Boone Trail, Suite 510, Raleigh, NC 27607-7506. An applicant must request an application form by writing to the Board. Telephone requests are not acceptable.

Applicant for admission to the examination system of the ABA must be made to the secretary on a form prescribed by the Board. Photocopies or facsimiles of the application form are not acceptable.

2. The application form includes the identical statements of declaration and consent included in the application for primary certification. The applicant for examination in critical care medicine shall be required to sign each statement.

F. Filing and Documentation Deadlines
The ABA must receive the completed application and the appropriate fee on or before March 1 of the examination year. Applications received after the deadline will not be accepted.

The ABA must receive all documentation it requires to make a determination about an applicant's qualifications for admission to the examination no later than May 1 of the examination year. This includes but is not limited to references, evidence of medical licensure, and verification that the training requirement is met. An application will not be accepted if the required documentation is not received by that date. It ultimately is the responsibility of every applicant to assure that the ABA receives all required documentation in a timely manner.

G. Fees
The application fee for admission to the critical care medicine examination system is $1,000. It must accompany the application.

The application fee includes a nonrefundable fee for administrative services of $250. The reexamination fee for the critical care medicine examination is $750.

A charge of $50 will be made whenever a check is returned for nonpayment.

H. Examination System
The written examination in critical care medicine is designed to test for the presence of knowledge that is considered essential for the ABA diplomate to function as a practitioner of critical care medicine. The examination analyzes the cognitive and deductive skills as well as the clinical judgment of the candidates.

The critical care medicine examination will be administered annually beginning in 2001. The ABA will mail notice to all eligible candidates announcing the location(s) and date of the critical care medicine examination approximately 4 months prior to the date of its scheduled administration.

Every candidate has three opportunities to satisfy the critical care medicine examination requirement. At its discretion, the ABA
may excuse a candidate from at most one examination without forfeit of the opportunity. The ABA will declare an application void when the candidate does not pass the examination on the third opportunity. Physicians whose application has been declared void may reapply to the ABA.

I. Status of Individual
Inquiries about the current status of physicians relative to the ABA critical care medicine certification system should be addressed to the ABA office. The ABA will affirm the status of physicians who are certified in critical care medicine by the ABA. For others, the response to the inquiry will be in keeping with the ABA policy.

J. Reapplication
The ABA declares void the application of a candidate who has failed to satisfy the examination requirement in the prescribed number of opportunities or time for any reason. The physician may reapply by submitting a new application. Such application shall be subject to the fees, rules, privileges, and requirements that apply at the time of reapplication. The applicant who is judged to meet existing requirements will be readmitted into the examination system.

Every reapplicant who qualified previously by temporary criteria is required to have completed satisfactorily the 1-year continuum of education in critical care medicine before reapplying for the subspecialty certificate.

Subspecialty Certification in Pain Management

A. Definition of Pain Management
Pain management is the medical discipline concerned with the diagnosis and treatment of the entire range of painful disorders. Because of the vast scope of the field, pain management is a multidisciplinary subspecialty. The expertise of several disciplines is brought together in an effort to provide the maximum benefit to each patient. Although the care of patients is heavily influenced by the primary specialty of physicians who subspecialize in pain management, each member of the pain treatment team understands the anatomical and physiological basis of pain perception, the psychological factors that modify the pain experience, and the basic principles of pain management.

B. Certification Requirements
At the time of subspecialty certification in pain management by the ABA, each candidate shall be capable of performing independently the entire scope of anesthesiology pain management practice and must:

- Be a diplomate of the ABA.
- Fulfill the licensure requirement for certification.
- Have fulfilled the requirement of the continuum of education in pain management as defined by the ABA.
- Have satisfied the pain management examination requirement of the ABA.

The ABA subspecialty certificate in pain management is valid for a period of 10 years after the year the candidate passes the examination for certification. It is left to the holder of the certificate when to reapply to the ABA for examination and recertification in the subspecialty.

C. Continuum of Education in Pain Management
The continuum of education in pain management consists of 12 months of full-time training in acute, chronic, and oncology pain management. The training must be in an anesthesiology pain management program in the United States or its territories accredited by the ACGME. The training must follow completion of the continuum of education in anesthesiology (ie, clinical base and CA-1 through CA-3 years), unless the Credentials Committee of the ABA prospectively approves a different training sequence for the resident.

Training in pain management must not be interrupted by frequent or prolonged periods of absence. When there is an absence for a period in excess of 2 months, the Credentials Committee of the ABA shall determine the number of months of training the resident will have to complete subsequent to resumption of the residency program to satisfy the training required for admission to the ABA subspecialty examination system.

D. Entrance Requirements
At the time of application to enter the pain management examination system of the ABA, the applicant shall be capable of performing independently the entire scope of anesthesiology pain management practice and must:

- Be certified by the ABA.
- Submit proof of having fulfilled the licensure requirement for certification. The applicant must inform the ABA of any conditions or restrictions in force on any active medical license he or she holds. When there is a restriction or condition in force on any of the applicant's medical licenses, the Credentials Committee of the ABA will determine whether the applicant shall be admitted to the ABA examination system.
- Have on file in the Board office documentation of having fulfilled the requirement of the continuum of education in pain management.

The ABA will solicit evaluations of various aspects of the applicant's current practice of anesthesiology pain management as part of its assessment of the applicant's qualifications for admission to its pain management examination system. The Board shall determine that entry into its pain management examination system is merited when a judgment of clinical competence can be made from the information submitted.

The ABA will notify an applicant who is accepted as a candidate for its pain management examination after approval of all credentials. The Board, acting as a committee of the whole, reserves the right not to accept an application for any reason deemed appropriate. The applicant has the right to seek review of such decision. The Board reserves the right to correct clerical errors affecting its decisions.

E. Application Procedure
1. The proper application form and other information may be obtained by writing to the secretary of the ABA at 4101 Lake Boone Trail, Suite 610, Raleigh, NC 27607-7506. An applicant must request an application form by writing to the Board. Telephone requests are not acceptable.

   Application for admission to the examination system of the ABA must be made to the secretary on a form prescribed by the Board. Photocopies or facsimiles of the application form are not acceptable.

2. The application form includes the identical statements of declaration and consent included in the application for primary certification. The applicant for examination in pain management shall be required to sign each statement.

F. Filing and Documentation Deadlines
The ABA must receive the completed application and the appropriate fee for the pain management examination on or before March 1 of the examination year. Applications received after the deadline will not be accepted.

The ABA must receive all documentation it requires to make a determination about an applicant's qualifications for admission to the examination no later than March 1 of the examination year. This includes but is not limited to references, evidence of medical
licensure, and verification that the training requirement is met. An application will not be accepted if the required documentation is not received by that date. **It is the responsibility of every applicant to ensure that the ABA receives all required documentation in a timely manner.**

### G. Fees

The application fee for admission to the pain management examination system is $1,000. The fee must accompany the application. The application fee includes a nonrefundable fee for administrative services of $250. The reexamination fee for the pain management examination is $750.

A charge of $50 will be made whenever a check is returned for nonpayment.

### H. Examination System

The written examination in pain management is designed to test for the presence of knowledge that is considered essential for the ABA diplomate to function as a practitioner of pain management. The examination analyzes the cognitive and deductive skills as well as the clinical judgment of the candidates.

The **ABA will administer the pain management examination annually beginning in 2000**. The ABA will mail notice to all eligible candidates announcing the location(s) and date of the pain management examination approximately 4 months prior to the date of its scheduled administration.

Every candidate has three opportunities to satisfy the pain management examination requirement. At its discretion, the ABA may excuse a candidate from at most one examination without forfeiture of the opportunity. The ABA will declare an application void when the candidate does not pass the examination on the third opportunity. Physicians whose application has been declared void may reapply to the ABA.

### I. Status of Individuals

Inquiries about the current status of physicians relative to the ABA pain management certification system should be addressed to the ABA office. The ABA will affirm the status of physicians who are certified in pain management by the ABA. For others, the response to the inquiry will be in keeping with ABA policy.

### J. Reapplication

The ABA declares void the application of a candidate who has failed to satisfy the examination requirement in the prescribed number of opportunities or time for whatever reason. The physician may reapply by submitting a new application. Such application shall be subject to the fees, rules, privileges, and requirements that apply at the time of reapplication. The applicant who is judged to meet existing requirements will be readmitted into the examination system.

Every reapplicant who qualified previously by temporary criteria is required to have completed satisfactorily the 1-year continuum of education in pain management before reapplying for the subspecialty certificate.

### Program for Recertification

#### A. Background

Initiatives at federal, state, and local levels convinced the ABA that some of its diplomates would need or desire a mechanism to demonstrate their continuing qualifications. In May 1989, the ABA announced its intent to develop a program for continued demonstration of qualifications (CDQ), which would afford its diplomates the opportunity to voluntarily demonstrate current knowledge and quality of practice.

The ABA approved a policy of time-limited certification in 1994-1995. All certificates issued by the ABA on or after January 1, 2000, will expire 10 years after the year the candidate passed the certification examination. The ABA took this step to reassure the public that the diplomate continues to demonstrate the attributes of a Board-certified anesthesiologist.

The ABMS approved the ABA recertification proposal in March 1996. Subsequently, the ABA changed the name of the CDQ program to recertification.

The ABA recertification program includes a commitment to continued education in anesthesiology, assessment of the quality of practice in the local environment, and evaluation of knowledge. Diplomates who hold a certificate that is not time-limited may voluntarily elect to apply to the ABA for recertification. The ABA will not alter the status of their certification if they do not recertify.

#### B. Requirements

The recertification program includes two major components: an evaluation of the quality of current practice conducted at the local level and a secure written examination.

To be admissible to the recertification examination of the ABA, the applicant shall be capable of performing independently the entire scope of anesthesiology practice and must:

- Be a physician to whom the ABA previously awarded certification.
- Submit evidence that he or she holds a permanent, unconditional, unrestrained, and unexpired license to practice medicine in the state or jurisdiction of the United States or the province of Canada where the principal hospital or facility in which he or she practices anesthesiology is located. The applicant must inform the ABA of any conditions or restrictions in force on any active medical license he or she holds. When there is a restriction or condition in force on any of the applicant's medical licenses, the Credentials Committee of the ABA will determine whether the applicant shall be admitted to the recertification examination.
- Have on file in the ABA office documentation solicited by the ABA from the hospital/facility chief of staff, or his or her equivalent, attesting to the applicant's current privileges where a substantial portion of the applicant's practice takes place. If the applicant's practice is entirely office-based, three letters of reference solicited by the ABA from referring physicians should be on file.

The ABA shall issue a recertification certificate to the applicant who is accepted for and satisfies the recertification examination requirement established by the ABA.

#### C. The Application Procedure

Physicians previously certified by the ABA may apply for admission to the recertification program at whatever interval they prefer following certification by the ABA.

The proper application form and other information may be obtained by writing to the secretary of the ABA at 4101 Lake Boone Trail, Suite 510, Raleigh, NC 27607-7506. An applicant must request an application form by writing to the Board. Telephone requests are not acceptable.

Application for admission to the ABA recertification program must be made to the secretary on a form prescribed by the Board. Photocopies or facsimiles of the application form are not acceptable.

The application form includes the identical statements of declaration and consent included in the application for primary certification. The recertification applicant shall be required to sign each statement.
D. Filing and Documentation Deadlines
The ABA must receive the completed application and the appropriate fee for the recertification examination on or before November 15 of the year prior to the examination year. Applications received after the deadline will not be accepted.

The ABA must receive all the documentation it requires to make a determination about an applicant's qualifications for admission to the examination no later than January 15 of the examination year. This includes but is not limited to evidence of medical licensure and verification of current credentialing/hospital privileges. An application will not be accepted if the required documentation is not received by that date. It ultimately is the responsibility of every applicant to ensure that the ABA receives all required documentation in a timely manner.

E. Fees
The application fee for admission to the recertification program is $700. The fee must accompany the application.

The application fee includes a nonrefundable fee for administrative services of $200.

A charge of $50 will be made whenever a check is returned for nonpayment.

F. The Examination System
The ABA shall determine that admission to the recertification examination is warranted when a judgment of clinical competence can be made from the information submitted by and on behalf of the applicant.

The ABA will notify an applicant who is accepted as a candidate for its recertification examination after approval of all credentials. The Board, acting as a committee of the whole, reserves the right not to accept an application for any reason deemed appropriate. The applicant has the right to seek review of such decision. The Board reserves the right to correct clerical errors affecting its decisions.

The recertification examination is designed to assess current knowledge of the breadth of anesthesia practice. The examination presents clinically relevant items that apply to all types of anesthesia practice.

The recertification examination is administered once each year. The ABA will mail notice to all eligible candidates announcing the location(s) and date of the recertification examination approximately 4 months prior to the date of its scheduled administration.

Every candidate has three opportunities to satisfy the recertification examination. At its discretion, the ABA may excuse a candidate from at most one recertification examination without forfeiture of the opportunity. The ABA will declare an application void when the candidate does not pass the examination on the third opportunity. Physicians whose application has been declared void may reapply to the ABA.

G. Status of Individuals
Inquiries about the current status of physicians relative to the ABA voluntary program for recertification should be addressed to the ABA office. For physicians certified by the ABA who subsequently complete the recertification program, the ABA will affirm their diplomate status and the year of their recertification. For others, the response to the inquiry will be in keeping with ABA policy.

H. Reapplication
Physicians who previously completed the ABA recertification program, and those who did not, may apply for recertification at whatever interval they prefer. To reapply, the physician must submit a new application. Such application shall be subject to the fees, rules, privileges, and requirements that apply at the time of reapplication.

The applicant who is judged to meet existing requirements will be accepted into the program for recertification.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Colon and Rectal Surgery [ABCRS] to ascertain whether the information below is current.)

Qualifications of Candidates

All candidates shall comply with the following regulations:

General Requirements
1. A candidate shall appear personally before the Board and shall submit to the required examinations.
2. A candidate shall limit the majority of his/her practice to colon and rectal surgery.
3. A candidate may be required to deliver to the Board sufficient case reports to demonstrate proficiency in colon and rectal surgery.
4. A bibliography of papers and books published by the candidate shall be submitted to the Board upon its request.
5. The moral and ethical fitness of a candidate must be satisfactory to the Board and in conformity with the Statements on Principles of the American College of Surgeons and the Principles of Medical Ethics of the American Medical Association. Practices not conforming therewith may result in rejection of an application or in deferral of examination until such matters have been resolved satisfactorily.

Professional Qualifications
1. A candidate must have completed an accredited residency program in colon and rectal surgery following successful completion of general surgical training in an ACGME-accredited residency program.
2. All candidates must have a currently valid registered, full, and unrestricted license to practice medicine in a state, territory, or possession of the United States or in a Canadian province and must continue to be licensed throughout the certification process.
3. A candidate must successfully complete the Qualifying Examination of the American Board of Surgery before being admitted to the ABCRS Written Examination (Part I).
4. A candidate must achieve certification by the American Board of Surgery before being admitted to the ABCRS Oral Examination (Part II).

Application for Examination

Each candidate for examination must complete and submit an Application for Examination, which may be obtained from the secretary of the Board. Applications must be submitted before July 15 of each year.

The application must be accompanied by two unmounted, recent photographs of the applicant and the required application fee.

Within 2 weeks after conclusion of the training program, the applicant must submit to the secretary of the Board a prescribed form, listing all operative procedures performed during the training period. This form is available from the secretary of the Board and must be countersigned by the program director.

The acceptability of a candidate for examination depends not only upon completion of the requirements listed under “Qualifications for Candidates” but also upon information available to the Board regarding the candidate’s professional maturity, surgical judgment, and technical competence.

Examinations

To achieve certification by the ABCRS, a candidate must pass a Written Examination (Part I) and an Oral Examination (Part II). The Written Examination is offered in the spring of the year, and a candidate is required to pass this examination before being permitted to take the Oral Examination, which is given in the fall of the year.

Examinations are conducted at times and places determined by the Board, and this information may be obtained from the Board office. It is also published in Diseases of the Colon and Rectum and in the Journal of the American Medical Association. Examinations will be held in one designated city in the United States.

Part I—Written Examination

The Written Examination is an assessment of a candidate’s knowledge of the theory and practice of colon and rectal surgery, with separate examinations in pathology and radiology. The written portion of the examination is a 4-hour test of multiple-choice questions covering the spectrum of colon and rectal surgery and the body of basic science pertinent to it. The pathology and radiology portions of the examination are each 1 hour in length and consist of questions and slide presentations.

Part II—Oral Examination

The Oral Examination is conducted by members of the Board or its designated examiners. Its objective is to evaluate the candidate’s clinical experience, problem-solving ability, and surgical judgment and to ascertain the candidate’s knowledge of current literature on colon and rectal diseases and surgery. Each candidate will undergo at least three 30-minute oral examinations by three-member examining teams.

Examination Results

The Board makes every effort to be as prompt as possible in notifying candidates of their examination results, and letters of notification may be expected within 4 to 6 weeks following the examination.

Reexaminations

A candidate who has failed either the written or oral part of the examination may be reexamined after 1 year has elapsed.

A candidate who fails to pass either the written or oral portion of the examination may repeat that part of the examination twice, thus offering the candidate three opportunities to pass each part of the examination.

A candidate who fails to pass either the written or oral portion of the examination three times may not repeat the examination.
without satisfactory completion of an approved colon and rectal surgery residency program and submission of a new application for examination.

Status of Applicant
The Board does not use or sanction the terms “Board eligible” or “Board qualified.” The status of an applicant with the Board is determined by and varies with the current status of his/her credentials.

A candidate must apply to the Board’s certification process within 5 years after completion of approved colon and rectal surgery training.

The entire certification process with the Board must be successfully completed within 7 years following approval of the formal application. In addition, a candidate whose application for examination has been approved but who does not take the examination within 3 years must submit a new application.

In exceptional or unusual circumstances, the Board may, at its discretion, waive one or more of the limitations specified under “Status of Applicant.”

Fees
Application fee: A nonrefundable fee of $300 shall accompany the application.

Written Examination fee (Part I): A fee of $400 is due and payable when the candidate is notified of approval to take the Written Examination.

Oral Examination fee (Part II): A fee of $500 is due and payable when the candidate is notified of approval to take the Oral Examination.

Reexamination fee: Fees for reexamination are the same as shown above for each examination.

Withdrawal from examination: A candidate who withdraws must notify the Board office at least 10 business days before a scheduled examination. A candidate who fails to appear for examination or who withdraws without giving at least 10 days’ notice as defined above will forfeit $100 of the designated examination fee and will have to resubmit the forfeited amount before being admitted to the next scheduled examination.

Late applications: Recognizing that a situation may arise that prevents an applicant from meeting the July 15 deadline, the Board has a provision for late applications. Late applications are those that are postmarked from July 16 through August 15 each year. There is a nonrefundable late application fee of $100, bringing the total processing fee for a late application to $400. No applications postmarked after August 15 will be accepted.

Fees are subject to change as directed by the Board.

Reconsideration and Appeals
The Board has adopted a policy with regard to reconsideration and appeals of decisions adverse to applicants. A request for reconsideration, which is the first step, must be made in writing and received by the Board office within 30 days of the date of notice from the Board of the action in question. A copy of the Reconsideration and Appeals Policy may be obtained from the Board office upon request.

Certification
A candidate who has met all the requirements and successfully completed the examinations of the ABCRS will be issued a certificate attesting to his/her qualifications in colon and rectal surgery. The certificate shall be signed by the president or vice president and the secretary and shall bear the corporate seal of the Board.

The certificate granted by the Board does not confer privilege or license to practice colon and rectal surgery but is evidence that a physician’s qualifications for specialty practice are recognized by his/her peers. It is not intended to define the requirements for membership on hospital staffs, to gain special recognition or privileges for its diplomats, to define the scope of specialty practice, or to state who may or may not engage in the practice of the specialty.

Unless the candidate specifies otherwise, the Board forwards the names of candidates who have achieved certification to the American Board of Medical Specialties (ABMS) for publication in the Official ABMS Directory of Board Certified Medical Specialists, published jointly by the ABMS and Marquis Who’s Who.

Time-Limited Certification
Beginning with those candidates who passed the certifying examination in 1990 and thereafter, the ABCRS will issue time-limited certificates. Certificates will be valid for 10 years from the date of certification, after which the certificates will no longer be valid. (Note: Time-limited certification will not affect diplomates holding certificates issued prior to 1990.)

Recertification
The ABCRS offers recertification in the specialty. Certificates can be renewed prior to expiration by fulfilling the requirements for recertification specified by the Board. The recertification examination is offered annually, on a voluntary basis, to all certified colon and rectal surgeons who apply and meet the Board’s requirements. A recertification information booklet, which outlines the requirements and procedures, is available by writing to the Board office.

Revocation of Certificates
The filing of an application for examination, participating in examination, and accepting a certificate are voluntary acts. Therefore, the Board assumes no responsibility for any effect that certification or failure to obtain certification may have on the private or professional activities of candidates.

When an application is submitted, candidates are required to sign an agreement, a portion of which reads as follows: “I agree to disqualification from examination or from the issuance of a certificate, and I agree to the forfeiture and redelivery of such certificate in the event that any of the statements herein made by me at this time or at any time in the past or future in regard to my application for a certificate are false or in the event that any of the rules and regulations of the Board governing such examinations and certificates are violated by me.”

Certificates that have been issued are subject to the provisions of the Articles of Incorporation and the Constitution and Bylaws of the American Board of Colon and Rectal Surgery, Inc, and may be revoked for violation of any of these provisions.

Examination of Candidates With Disabilities
The ABCRS supports the intent of the Americans with Disabilities Act. The Board will make a reasonable effort to provide Board applicants who have documented disabilities with modifications in its examination process that are appropriate for such disabilities but that do not alter the measurement of the skills or knowledge that the examination process is intended to test.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Dermatology [ABD] to ascertain whether the information below is current.)

Requirements for Eligibility to Take the Examination
Each applicant must satisfy the following requirements before he/she is eligible to take the certifying examination of the Board.

General Qualifications
1. The candidate must have graduated from a medical school in the United States accredited by the Liaison Committee for Medical Education (LCME), an accredited medical school in Canada, or an accredited osteopathic school in the United States; if a graduate of a foreign medical school, the candidate must possess the standard certificate of the Educational Commission for Foreign Medical Graduates (ECFMG). If, however, the foreign medical school graduate is in training in an accredited program in Canada, the Board will recognize the certificate of the Medical Council of Canada.
2. The candidate must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in either the United States or Canada.

Residency Training Requirements
1. Candidates for certification by the ABD are required to have a total of 4 years of postgraduate training, as described below in Sections (a) and (b).
   a. The first year must consist of clinical training in one of the following types of broad-based programs in the United States accredited by the Accreditation Council for Graduate Medical Education (ACGME) or a similar program in Canada accredited by the Royal College of Physicians and Surgeons of Canada (RCPSC): transitional year (formerly called flexible first postgraduate year) or a first-year residency in internal medi-
   b. Three years of full-time training as a resident in a dermatology residency training program in the United States accredited by the ACGME or 3 years of full-time training as a resident in a dermatology residency training program in Canada accredited by the RCPSC. Accreditation of dermatology training programs in the United States is the responsibility of the Residency Review Committee (RRC) for Dermatology acting with authority delegated to it by the ACGME (accredited dermatology residency training programs and clinical programs for first postgraduate year credit are listed in this directory).
   At least 75% of the resident's time throughout each year of dermatology residency training must be related to the direct care of dermatologic outpatients and inpatients; this includes clinical conferences directly related to patient care, consultations, and inpatient rounds.
   Dermatopathology, microbiology, and other basic science lectures, seminars, and conferences are essential components of the resident's training (see the Program Requirements for Residency Education in Dermatology).
   The Board also emphasizes the importance of basic and clinical investigation in the educational experience of trainees. Accordingly, all residents should participate in basic and/or clinical research during their training.
   For those candidates whose career plans involve a primary commitment to investigative or academic dermatology, a special training track, which must assure adequate clinical education and experience in accordance with the general requirements described above, may also be acceptable. The first year (PGY2) of this track must be at least 75% clinical in character. Investigative or academic experience can be integrated with the required additional clinical training during the second (PGY3) and/or third (PGY4) year(s). Requests for approval of this special track must be submitted prospectively, at least 4 months prior to the beginning of such training. This will be on or before March 1 of the PGY2 year for a special track beginning on July 1 of the PGY3 year, or later if special track training is to begin later. Requests earlier than February 1 of the PGY2 year will not be considered because the program director must have had an opportunity to judge the clinical potential of the trainee. The request for consideration of this investigative/academic track must include details of the scheduled program and time commitments during the entire training period of these candidates. It is incumbent upon program directors to select candidates for this special training track whose skills and learning capabilities permit the acquisition of clinical competence as well as the execution of their investigative or academic responsibilities. Moreover, the program director must monitor the training of these residents throughout their residency and must validate their clinical experience at the completion of their residencies.
   2. A preliminary registration form must be filed by the candidate and signed by his/her training director shortly after the resident begins residency training in dermatology (i.e., by August 1 or within 30 days of the start of training).
   3. It is mandatory that the training director submit a yearly report form for each resident to the Board office by August 1 after completion of the first and second year of training and by May 15 for residents who will complete their third year of training on June 30. In order for a candidate to take the certifying examination, the training director must certify that each year of training was completed in a satisfactory manner.

1120

Graduate Medical Education Directory 2000-2001
4. Training must be completed within 5 years after the beginning of dermatology residency, except when military service or other compelling circumstances intervene.

5. It is the responsibility of the residency program director to determine if a resident has satisfactorily completed the required 3 years of dermatology training and is therefore eligible to sit for the certifying examination of the ABD.

Guidelines for Determining Adequacy of Clinical Training

The following guidelines are designed to assist program directors in their determination of the adequacy of the clinical training of residents and to assure satisfaction of the eligibility requirements for certification by the ABD. Of special concern are those residents on the special investigative/academic track or those residents whose training experience differs from the standard 36 months of full-time clinical training, as approved for each program by the RRC of the ACGME:

a. In general, high priority should be given to completing 36 continuous months of full-time dermatology training. For most residents, this will consist of full-time clinical training; for residents with a primary commitment to investigative or academic dermatology, this may be a special training track, as defined previously.

b. Any departure from (a), as required, for example, for a medical leave of absence, should be documented and fully justified in the resident evaluation forms filed annually with the Board by the training program director.

c. An absence exceeding 6 weeks in any 1 academic year or a total of 14 weeks over 3 years, including vacation, should be approved only under truly exceptional circumstances. In addition, any resident approved to sit for the certifying examination despite such an absence should have completed each year of training in an above-average or excellent manner.

d. Any resident who will have been absent more than 6 weeks in 1 year or 14 weeks over 3 years and whose performance has not been uniformly above average or excellent throughout residency training should be required to complete an additional period of training at least equal in length to the total period of absence in excess of routinely provided vacation time. If the program director anticipates that this additional training will be completed in a satisfactory manner before September 1, the director may approve the resident to sit for the certifying examination in that year, just as if training had been completed by July 1.

Registration for the Examination of the Board

Candidates who have completed the training requirements as outlined above are eligible to apply for examination by the Board. Candidates should request an Application for Certification Form from the office of the executive director of the Board. However, for those candidates who are completing their residency training, application forms will be sent to the program directors for distribution to each candidate. The completed application must be filed with the Board office before May 1 of the year in which the candidate plans to take the examination. Physicians who complete their residency training in dermatology by July 1 of a given year are eligible to apply to take the examination in the fall of that year. Under the special conditions described previously ("Guidelines for Determining Adequacy of Training"), candidates completing additional (make-up) training before September 1 may also be eligible to take the fall certifying examination. It is emphasized that it is the candidate's responsibility to send a completed application form to the Board if he/she plans to take the certifying examination of the Board. A candidate is not considered an "active" candidate until his/her application has been received and approved by the Board. This approval includes a review of the application and annual evaluation reports from the candidate's training director. After the application is approved, the candidate is required to take the examination within 3 years. Candidates who do not exercise the examination privilege within 3 years of the date they are declared eligible will be required to file a new application and have their eligibility for examination reviewed by the Requirements Committee. If the reapplication is approved by the Board, the candidate is again eligible to take the examination for another 3-year period. The Board does not use the term "Board eligible" in correspondence with directors of hospitals or others who send inquiries to the Board office. On written request by a candidate and payment of a fee, the Board will send to the candidate a letter stating his/her status with the Board at any given time.

Board Examination

The certifying examination in dermatology, which is administered over a period of 2 days, includes the following:

1. Comprehensive Multiple-Choice Examination in Dermatology (Part I): This is a 3-hour comprehensive examination, and was formerly referred to as the Written Examination. It tests the candidate's knowledge of the basic science and clinical aspects of dermatology, including all the related disciplines. Among the topics included in this part of the examination are clinical dermatology, pediatric dermatology, preventive dermatology, entomology, epidemiology, dermatomic, cutaneous disease, immunology, dermatology surgery, cutaneous oncology, sexually transmitted diseases, internal medicine as it pertains to dermatology, medical ethics, photobiology, and cutaneous microbiology, as well as anatomy, physiology, biochemistry, molecular biology, radiation physics, radiation therapy, physical therapy, pharmacology, genetics, and electron microscopy as related to dermatology. Considerable emphasis is placed on comprehensive knowledge of the literature.

2. Examination in Clinical and Laboratory Dermatology (Part II): Projected Kodachrome slides are utilized in this part of the examination. Candidates must answer multiple-choice-type questions about the projected pictorial material, which is drawn from all areas of clinical and laboratory dermatology. Examples of the types of slides used include photographs of patients; diagrams and illustrative drawings and pictures of dermatologic surgical procedures, including Mohs micrographic surgery, hair transplantation, dermabrasion, sclerotherapy, liposuction, chemical peels and tissue augmentation, histopathologic sections, fungal cultures, culture mounts, bacterial cultures, Tzanck preparations, skin scrapings and smears, roentgenograms, histochromatography, and fluorescent photomicrographs, electron micrographs, darkfield micrographs and drawings or photographs of organisms, including viruses, rickettsiae, bacteria, and parasites that affect the skin.

3. Examination in Dermatopathology (Part IIIB): In this section, candidates are questioned on histopathologic slides that they examine microscopically, utilizing personal or rented microscopes. This section of the examination encompasses the entire spectrum of dermatopathology.

For the purposes of scoring, the Examination in Clinical and Laboratory Dermatology is combined with the Examination in Dermatopathology, and candidates must pass this combined examination as well as the Comprehensive Multiple Choice Examination in Dermatology in order to be certified. If a candidate fails either the combined Examination in Clinical and Laboratory Dermatology/Examination in Dermatopathology or the Comprehensive Multiple Choice Examination in Dermatology and not the other, only the failed component must be repeated.
The examination is given annually in the fall over a 2-day period and lasts a total of approximately 10 hours. In 2000, it will be held on October 29 and 30 at the Holiday Inn O'Hare in Rosemont, Illinois, which is in the O'Hare International Airport area of Chicago.

Reexamination
With their initial examination application, candidates have a 3-year period during which they may take the examination or any necessary reexamination on either a failed part (see above) or both parts of the examination. For a reexamination, they must notify the Board office by May 1 of the year they plan to retake the examination. If a candidate has not passed or does not take the examination during this 3-year period, he/she must reapply and complete the necessary forms, after which he/she will have another 3-year period of eligibility during which to take the examination or reexamination. For further information concerning this as well as the appropriate fees required, the Board office should be contacted.

Candidates With Disabilities
The ABD supports the intent of the Americans with Disabilities Act (ADA) and, therefore, will provide or allow the use of necessary auxiliary aids, services, or testing conditions that do not fundamentally alter the measurement of the skills or knowledge the Board assessment program is intended to test. In order to implement this policy, notification of the need for special testing circumstances must be given to the ABD by a candidate for certification at the time that he/she submits the application for any of the Board's certifying examinations. This deadline is necessary in order to allow the Board to request the necessary documentation, to review the records, and to verify the disability, if necessary. In addition, since this policy also applies to the In-Training Examination, which is under the jurisdiction of the ABD, appropriate advance notification of the need for special testing circumstances must be provided when the application for the In-Training Examination is submitted by the department.

Upon receipt of such request, the ABD will initiate the appropriate procedural steps, but it should be understood that all special arrangements must be made and agreed upon in advance; special arrangements cannot be made at the time the examination is given. Therefore, early notification of the need for special testing circumstances is encouraged.

Chemical Dependency or Substance Abuse
A candidate with a chemical dependency or substance abuse problem will not be permitted to take the examination unless he/she can submit evidence, which must be verifiable, that the disorder is being treated and is under control. Individuals with such problems or a history thereof must provide the necessary documentation at the time of application to take the examination. A confirmatory letter from a licensed physician within 1 month of the examination stating that the disorder no longer exists or is currently controlled is also necessary.

Certification
After meeting the above requirements and passing the examination, the candidate will be awarded a certificate that acknowledges that he/she has completed the required course of graduate study and clinical training, has met other specific standards and qualifications, and has passed the examination conducted by the Board. The candidate is then referred to as a diplomate of the American Board of Dermatology, Inc. The names of diplomates of the Board appear in The Official ABMS Directory of Board Certified Medical Specialists, published by Marquis Who's Who in cooperation with the American Board of Medical Specialties (ABMS).

Each certificate is subject to revocation in the event that (a) the physician so certified shall not have been eligible to receive such certificate, whether or not the facts concerning his/her ineligibility were known or could have been ascertained by the directors of the Board at the time of the issuance of the certificate; (b) the physician so certified shall have made any material misrepresentation or omission in the application for such certificate or in any other statement to the Board or its representatives; (c) the physician so certified shall have been convicted by a court of competent jurisdiction, or pleads nolo contendere to said crime, which in the judgment of the Board is related to or arises out of the practice of medicine.

Appeals Procedure
The ABD recognizes a candidate's right of appeal following an adverse action at any stage of the certification process. Within the residency program, trainees must be accorded due process in compliance with provisions established by the parent institution and as stipulated in the Essentials of Accredited Residencies in Graduate Medical Education (July 1, 1982) of the ACGME.

Candidates whom the Board has declared ineligible to sit for the certifying examination on the basis of qualifications may appeal such decisions by written request within 90 days of the date of notification of the Board's ruling. A candidate failing a certifying examination may request in writing that his/her examination be re-scored by hand to verify the accuracy of the results as reported. Such requests must be received in the Board office within 30 days of the date of mailing of the examination results to the candidates. A check in the amount of $55 payable to the American Board of Dermatology must accompany this written request. There shall be no further appeal from failure of an examination.

Recertification
The Board began issuing time-limited certificates, valid for 10 years, in 1991, and its process of voluntary recertification was approved by the ABMS in 1994. The first recertification examination, which is a clinically focused, take-home, open-book examination tailored to the candidate's practice profile, was administered in 1999 and will be administered biennially thereafter. There is no limit on the number of times diplomates may undertake the recertification process. If the candidate does not successfully complete the recertification process prior to expiration of his/her time-limited certificate, he/she may participate in the recertification process but with the requirement that the process is successfully completed and the new time-limited certificate is issued. If the candidate successfully completes the recertification process before expiration of his/her certificate, eg, in year 8 or 9 of the 10 years, the new certificate will be issued for 10 years commencing on the expiration date of the prior certificate. Although candidates with time-limited certificates may take a recertification examination any year in which it is offered, for formal (official) completion of the recertification process, they must take either of the two recertification examinations that immediately precede the expiration of their time-limited certificate.

Diplomates with lifetime certification may elect to pursue voluntary recertification in any given year after the process has been implemented. Any questions or correspondence relating to the recertification process should be directed to the executive director of the ABD.

Deadline for receipt of applications is March 1. Requests for applications should be directed to the office of the ABD. Applications may also be downloaded from the Board's Web site (http://www.abderm.org). Examinations mailed to approved candidates on June 1. Candidates have 6 weeks to complete the
examination and return the answer sheets. Notification of performance, ie, score, on the examination, along with a booklet containing the correct answers for each question, a critique or justification statement for each answer, and the pertinent references, will be mailed to the candidates approximately 6 to 8 weeks later.

It is to be noted that at this time a recertification process has not been approved for subspecialty certification processes in Dermatopathology or Clinical and Laboratory Dermatological Immunology.

Fees for Examination and Reexamination

The directors of the Board serve without compensation. Fees are based on the actual expenses incurred in administration of the Board office and related activities and on the costs of development and administration of the Board examinations.

All fees are payable when the application for an examination is submitted and are applied to the first examination of that type given after approval of the application. Except as indicated below, or because of verifiable extenuating circumstances, there will be no refunds of any of these fees. Contact the Board office for the current fee schedule.

All checks are to be made payable to The American Board of Dermatology, Inc.

When a candidate's application for the certifying examination in Dermatopathology or a subspecialty certification examination is disapproved, the Board retains an administrative fee of $100 and will refund the balance to the candidate.

If a candidate withdraws within 10 days of the examination or fails to appear for the examination and does not provide verifiable evidence of extenuating circumstances that prevented him or her from appearing for the examination, the Board will retain the entire examination fee. On reapplying, such candidates will be required to again submit the examination fee in effect at the time of the application.

Candidates who fail the certifying examination in Dermatopathology retain the right to apply to retake the examination in subsequent years. For further information concerning Board policy in effect and for the applicable examination fee, candidates are advised to write or call the Board office (313-874-1088). Candidates who do not take the certifying examination at the first opportunity after completion of their training are also advised to contact the Board office for clarification of Board policy and the examination fee if they intend to apply to take the certifying examination in any given year.

Publication

The ABD publishes a booklet of information, which may be obtained from the Board office.

All correspondence should be sent to

Harry J Hurley, MD
Executive Director
The American Board of Dermatology, Inc
Henry Ford Hospital
1 Ford Place
Detroit, MI 48202-3450

Dermatopathology Subspecialty Certification

Subspecialty certification in Dermatopathology is a joint and equal function of the ABD and the American Board of Pathology (ABP). Such function will relate to qualifications of candidates, standards of examination, and the form of the certificate.

All candidates applying to sit for this certifying examination must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in either the United States or Canada.

All candidates for this certification must satisfy the following requirements:

Prerequisites

1. Primary certification by both the ABD and the ABP (anatomic pathology or anatomic and clinical pathology).
2. Primary certification by either the ABD or the ABP (anatomic pathology or anatomic and clinical pathology) and the satisfactory completion of 1 year of training in dermatopathology in a program accredited for such training (see below) by the ACGME. This additional training must be taken after the candidate has met the full training requirements for certification in dermatology or pathology. The dermatologist applicant must spend one-half of the required training time in pathology. The pathologist applicant must spend one-half of the required training time in clinical dermatology.

Training

Accredited institutional training programs in dermatopathology are an equal and joint function of the departments of dermatology and pathology of that institution. Training programs in dermatopathology are reviewed and accredited by the Residency Review Subcommittee for Dermatopathology, which includes three members from the RRC for Dermatology and three members from the RRC for Pathology. Upon recommendation by this subcommittee, training programs in dermatopathology are accredited by a joint action of the RRCs for Dermatology and Pathology acting with authority delegated by the ACGME. Information concerning accredited dermatopathology training programs may be found in this Directory.

Examination: Deadline for Application and Date of Examination

Candidates who have satisfied the above requirements are eligible to apply to the Board to take the examination for subspecialty certification in Dermatopathology, which is a comprehensive assessment of the candidates' knowledge of dermatopathology, including the related basic sciences, and laboratory and clinical areas pertaining to this discipline.

Candidates planning to take the subspecialty certification examination should request an application from the office of the executive director of the ABD. The deadline for receipt of applications is July 1 of the year in which the candidate plans to take the examination. The date of the next examination has not been determined at this time.

Clinical and Laboratory Dermatological Immunology (CLDI) Subspecialty Certification

Prerequisites

The requirements for subspecialty certification in CLDI are as follows:

1. A currently valid, full, and unrestricted license to practice medicine in either the United States or Canada.
2. Primary certification by the ABD and the satisfactory completion of at least 1 year of training in an accredited fellowship in CLDI. This additional training must be taken after the candidate has met the full training requirements for certification in dermatology.

Training

Information concerning accredited training programs in CLDI is available from the office of the ABD. As stated above, a minimum of 1 year of full-time training in a CLDI training program is required of all candidates. A preliminary registration form must be filed with the Board by each trainee.
Examination: Deadline for Application and Date of Examination
Candidates who have satisfied the above requirements are eligible to apply to the Board to take the subspecialty certification examination in CLDI. The deadline for receipt of applications to take the examination for subspecialty certification in CLDI is April 1 of the year in which the examination is given. The date of the next examination has not been determined at this time.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Emergency Medicine [ABEM] to ascertain whether the information below is current.)

Requirements for Certification in Emergency Medicine

An applicant must satisfy all credential requirements at the time the application is submitted. Requirements fulfilled after the date of application will not be considered.

The applicant must have graduated from medical school.

1. Graduates of approved schools of osteopathic medicine in the United States are considered when they have satisfactorily met the credential requirements as outlined.

2. An applicant graduating from a medical school other than one in the United States, its territories, or Canada must provide the Board with a verified and translated diploma.

Throughout the certification process, applicants and candidates practicing medicine in the United States, its territories, or Canada must hold a current, valid, unrestricted, and unqualified license to practice medicine in the jurisdiction(s) in which they practice. A physician who is not currently practicing medicine or is practicing medicine outside the United States, its territories, or Canada must hold a current, valid, unrestricted, and unqualified license to practice medicine in at least one jurisdiction in the United States, its territories, or Canada.

The applicant must have successfully completed a total of 36 months of postmedical school training, under the control of an
accredited emergency medicine residency program. Emergency medicine programs must be accredited by the Accreditation Council for Graduate Medical Education (ACGME) or the Royal College of Physicians and Surgeons of Canada for Canadian programs.

If the emergency medicine residency training program is structured so that it exceeds the length of training specified above, the resident must successfully complete the requirements of his/her residency program to apply under the emergency medicine residency category of application.

(Note: For residents who began their emergency medicine training prior to July 1, 1987, the candidate must have successfully completed a total of 36 months of postmedical school training, at least 24 months of which were under the control of an accredited emergency medicine residency program at the PGY2 level and above.)

The applicant must submit evidence of 50 hours of continuing medical education in emergency medicine annually, acceptable to the Board, starting 1 year from the date of graduation from the emergency medicine residency program and continuing until the date of application. If a resident applies to the Board within 1 year of graduation, no continuing medical education is required.

**Combined Training Programs**
A special agreement exists between the ABEM and the American Board of Pediatrics whereby an applicant may fulfill the training requirements of both Boards by completing joint training in 5 years. Training programs must be approved prospectively by both Boards. Guidelines for combined training have been approved by both Boards and are available by writing either Board office. Applicants may not appear for the certifying examination until all training has been satisfactorily completed.

A special agreement exists between the ABEM and the American Board of Internal Medicine whereby an applicant may fulfill the training requirements of both Boards by completing joint training in 5 years. Training programs must be approved prospectively by both Boards. Guidelines for combined training have been approved by both Boards and are available by writing to either Board office. Applicants may not appear for the certifying examination until all training has been satisfactorily completed.

**Applications**
Applications are distributed in the spring of each year (mid-April) and are available from the Board office. Applications are accepted from April 15 through July 31 of each year. A mailing list is maintained throughout the year for requests received during times when applications are not available.

A nonrefundable processing fee must accompany the application at the time it is submitted.

Applicants wishing to be considered for examination must submit a fully completed application form to the Board. The Board will not be responsible for any opinion expressed concerning the individual's credentials for the examination unless it is in writing and over the signature of the president or secretary of the Board.

**Examination Information**
The certification examination in emergency medicine is composed of two parts, a written examination and an oral examination.

The written certification examination is a 5.5-hour comprehensive examination that is administered once a year. It includes approximately 335 single-best-answer, multiple-choice test items. Approximately 10% to 15% of the items have a pictorial stimulus.

The oral certification examination is administered twice a year. It includes five simulated patient encounters, each involving one patient, and two simulated situation encounters, each involving more than one patient.

A candidate must successfully complete the fall written examination to be scheduled for either the spring or fall oral examination the following year.

Examination fees are due upon assignment to an examination administration.

**Certification**
All candidates who successfully complete both the written and the oral certification examinations shall be known as diplomates of the ABEM. Diplomates receive an appropriate certificate, which shall remain the property of ABEM. Certification is for a period of 10 years.

Any certificate issued by the Board shall be subject to revocation at any time, should the Board determine, in its sole judgment, that a candidate who has received a certificate was in some respect not properly qualified to receive or retain it.

**Recertification**
To achieve recertification, successful completion of one of the following three examinations is required: the written or oral certification examination or the written recertification examination. In order to maintain diplomate status without lapse, diplomates must successfully complete an examination prior to the expiration of their certificate. If a diplomate does not take a recertification examination within 3 years of the expiration of the certificate, the certification examination (both the written and the oral portions) must be successfully completed to regain diplomate status. Recertification is for a period of 10 years.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Family Practice [ABFP] to ascertain whether the information below is current.)

ABFP Official Definition of Family Practice

“Family practice is the medical specialty which is concerned with the total health care of the individual and the family. It is the specialty in breadth which integrates the biological, clinical, and behavioral sciences. The scope of family practice is not limited by age, sex, organ system, or disease entity.”

Board Eligibility

The ABFP does not recognize or use the term “Board eligible” and does not issue statements concerning “Board eligibility.” The Board informs an applicant of admissibility to an examination to be given on a specified date after a formal application has been reviewed and approved.

Certification Process

The ABFP administers the certification and recertification examinations in various centers throughout the United States annually, on the second Friday in July.

The ABFP certification and recertification examinations are written tests of cognitive knowledge and problem-solving abilities relevant to family practice. Appropriate subject areas of the following disciplines are included: internal medicine, pediatrics, surgery, obstetrics, gynecology, psychiatry and behavioral sciences, community medicine, and geriatrics. Elements of the examination include but are not limited to diagnosis, management, and prevention of disease.

General Requirements for Certification

All candidates for the ABFP certification examination must have satisfactorily completed 3 years of training (a full 36 calendar months with 12 months in each of the 3 years) in a family practice residency program accredited by the Accreditation Council for Graduate Medical Education (ACGME) subsequent to receipt of the MD or DO degree from an accredited institution and, when applicable, a Fifth Pathway year, or receipt of a standard certificate from the Educational Commission for Foreign Medical Graduates, or compliance with other ACGME requirements for entry into graduate medical training in the United States. If a physician does not meet the eligibility requirements of the ACGME for entry into resident training, his/her training will not be recognized by the Board.

Candidates who obtained their MD degree from medical schools in the United States or Canada must have attended a school accredited by the Liaison Committee on Medical Education or the Committee for Accreditation of Canadian Medical Schools. Candidates who obtained a DO degree must have graduated from a college of osteopathic medicine accredited by the American Osteopathic Association (AOA).

The Board prefers all 3 years of postgraduate training to be in the same ACGME-accredited family practice program; however, other training may be considered as equivalent (e.g., flexible/transitional year, AOA osteopathic internship). In these cases, and for physicians who have had international training, each individual's training will be evaluated by the Board. The ABFP requires residency programs to submit prospective requests for advanced placement of residents. Program directors are responsible for notifying the Board prior to the entry of the transferring resident. If a program director fails to comply, the Board will determine the amount of transfer credit at the time of its discovery of the transfer. Consequently, the resident may receive less credit toward certification than anticipated and may be required to extend the duration of training.

The last 2 years of family practice residency training must be completed in the same accredited program. Transfers after the beginning of the 3rd year are approved only in extraordinary circumstances.

Verification of satisfactory completion of residency training must be stated in writing by the program director. All applicants for the certification examination are subject to the approval of the Board, and the final decision regarding any application rests solely with the ABFP.

All candidates' education and training experiences are subject to review and approval by the ABFP. Any variance from the above must have prior written approval of the Board. No credit may be given for any previous training as equivalent to family practice training without the written approval of the Board.

Candidates must complete all requirements of the Board no later than June 30 of the year of the examination. Complete documentation from the program director that the resident has or is expected to have satisfactorily completed the residency must be received by the Board by June 30. Applications, supplied to the residents directly through the program director, are made available only to residents expected to complete the training by June 30 of the current year. Residents who complete their training at an interim date must write to the Board for an application.

All candidates must hold a currently valid, full, and unrestricted license to practice medicine in the United States or Canada. Furthermore, every license to practice medicine held by the candidate in any state or territory of the United States or province of Canada must be currently valid, full, and unrestricted, whether or not the candidate in effect practices in such state, territory, or province.
Candidates shall be required to maintain a full and unrestricted medical license in the United States or Canada even if they are out of the country for extended periods of time.

Any candidate whose license to practice medicine has been revoked, suspended, or restricted in any state or territory of the United States or province of Canada shall be ineligible for certification until such time as the encumbered license is reinstated in full. Should a license be revoked, suspended, or restricted following the submission of an application for certification but prior to the notification of examination results, the application and certification will be simultaneously invalidated.

It is the responsibility of the candidate to inform the Board immediately upon a change in licensure status. If the candidate fails to notify the Board of any suspension, revocation, restriction, or probation within 60 days after the effective date, the candidate shall be ineligible to seek certification for up to 1 year following the reinstatement of full and unrestricted licensure. A restricted medical license is any adverse action by a state licensing agency that encumbers the ability of a physician to diagnose, manage, and/or treat patients. An action by a state licensing agency that is taken against a canceled or inactive license is not considered a violation of ABFP policy. An action by a state licensing agency that limits the practice of medicine to the specialty of family medicine may not necessarily be considered a violation of ABFP policy. However, any action by a state licensing agency that restricts a physician from prescribing medications to the physician’s immediate family is considered a violation of ABFP policy and will be enforced accordingly. In cases where a physician has changed residence deliberately to avoid prosecution, loss of license, or disciplinary action by a state licensing agency, the Board reserves the right to revoke or suspend the physician’s certificate of qualification and/or prohibit application for certification.

An opportunity for certification will be denied to any physician otherwise eligible who has been involved in the fraudulent misrepresentation of certification by the ABFP. Eligibility to make application for certification will be denied to the offending party for a period not to exceed 6 years from the date of discovery of the offense. In the event the individual appeals or otherwise challenges the declaration of ineligibility, the 6-year period shall be tolled until the action of the Board is determined to be final and enforceable. Questions about licensure should be presented to the Board in writing.

No candidate will be allowed to take the examination until all fees are paid and all of the above requirements have been satisfactorily met.

Candidates who apply for the Certification Examination within 3 years of completion of an ACGME-accredited family practice residency are not required to document any continuing medical education (CME). Candidates who apply after the 3-year period must provide documentation of 50 hours of CME each subsequent year. Residents completing training on or before June 30 receive an application through their residency program. Physicians completing training after June 30 must request an application directly from the Board.

Osteopathic Physicians

Physicians who have graduated from an AOA-approved school of osteopathic medicine in the United States may qualify for certification if they meet all the same requirements as specified for allopathic medical school graduates. They may apply to ACGME-accredited family practice programs for entry into the first year (GYI). Osteopathic physicians who have documented satisfactory completion of an AOA-approved internship (GYI) year may receive credit for the portion of the GYI year that meets the ABFP guidelines for advanced-level entry or interprogram transfers.

All candidates (MD or DO) must satisfactorily complete at least 36 calendar months of accredited graduate medical education. Only the GYI year may be fulfilled by an AOA-approved internship year. Training beyond the GYI year must be in continuity in an ACGME-accredited family practice residency program.

Reciprocity Agreements

The ABFP has developed reciprocity agreements with the College of Family Physicians of Canada (CFPC), the Royal College of General Practitioners of Great Britain, the Royal New Zealand College of General Practitioners, and the Royal Australian College of General Practitioners. Diplomates of the ABFP may be eligible to seek certification by these colleges, and members in good standing of these colleges who meet all of the other requirements of the ABFP and reside in the United States may be eligible to take the certification examination. Eligibility to sit for the ABFP certification examination through reciprocity is available only to physicians who have satisfactorily completed formal training in family practice accredited by a nationally recognized accrediting organization within the country in which they are certified.

Canadian Applicants

1. Physicians who have satisfactorily completed 2 years of training in a family practice residency program accredited by the CFPC may apply for certification by the ABFP upon the successful completion of a third year of accredited family practice residency. The third year of training must be satisfactorily completed in an ACGME-accredited family practice program or, if taken in Canada, must be approved by the CFPC. The third year must have prior approval of the ABFP and bring the total residency experience into compliance with the ACGME Program Requirements for Residency Education in Family Practice. The request must be accompanied by documentation of satisfactory performance of the first 2 years of training (including a description of the curriculum) signed by the program director.

2. Physicians who have passed the CFPC Certification Examination in Family Medicine and who (a) are members in good standing of the CFPC, (b) have completed family practice training accredited by the CFPC, (c) have been residents of the United States for at least 6 months, (d) hold a valid and unrestricted license to practice medicine in the United States, and, (e) are actively involved in family practice in the United States may apply to sit for the ABFP certification examination.

Registrars of the Royal College of General Practitioners of Great Britain

Physicians who have been certified by the Royal College of General Practitioners by examination may be permitted to apply for certification by the ABFP if they (1) are members in good standing of the Royal College of General Practitioners, (2) possess a certificate of prescribed/equivalent experience issued by the Joint Committee on Postgraduate Training for General Practice, (3) reside in the United States, (4) hold a valid and unrestricted license to practice medicine in the United States, and (5) are actively involved in family practice in the United States.

Members of the Royal New Zealand College of General Practitioners

Physicians who are members of the Royal New Zealand College of General Practitioners may be permitted to apply for examination for certification by the ABFP if they (1) are members in good standing of the Royal New Zealand College of General Practitioners, (2) have completed the General Practice Training Programme (GPTP), (3) reside in the United States, (4) hold a valid and unrestricted
license to practice medicine in the United States, and (6) are actively involved in family practice in the United States.

**Follows of the Royal Australian College of General Practitioners**

Physicians who are fellows of the Royal Australian College of General Practitioners may be permitted to apply for examination for certification by the ABFP if they (1) are members in good standing of the Royal Australian College of General Practitioners, (2) have completed the GFTP, (3) reside in the United States, (4) hold a valid and unrestricted license to practice medicine in the United States, and (5) are actively involved in family practice in the United States.

**Recertification Process**

The ABFP confers diplomat status for the specified period of time noted on the certificate, which is dated for a 7-year period. In order to maintain diplomate status, the diplomate must be recertified before the certificate expires. Although the certificate is dated for 7 years, the Board routinely administers the recertification process on a 6-year cycle. This allows a “reserve” year for those diplomates who for some reason are unable to participate in the sixth year or in cases where the diplomate fails to receive a satisfactory score in the sixth year.

Should a diplomate not be recertified by the end of the seventh year, the certificate will expire and the physician will lose diplomate status. However, the physician may reapply for the recertification process, but he/she must meet all criteria in effect at that time.

For diplomates who participate in the recertification process during the sixth year and pass, the new certificate of 7 years’ duration is dated from the time of that examination.

**Requirements for Recertification**

A. Submission of a formal application.
B. Documentation of 300 hours of approvable continuing medical education.
C. Submission of statement of acknowledgment and compliance with Board policy regarding medical licensure.
D. Satisfactory completion of the office record review portion of the recertification process.
E. Satisfactory performance on the written test of cognitive knowledge.

Diplomates will be given advance notice of any changes in the recertification requirements.

**Reexamination**

Candidates who fail the examination may apply for admission to the next annual examination. There is no limit to the number of times a qualified candidate may take the examination when it is offered, provided the qualifications are met with each reapplication. In addition to valid and unrestricted licensure status, 50 hours per year of CME since the last application are required for reexamination. Full fees are charged for each examination.

**Certificates of Added Qualifications**

**Geriatric Medicine**

The ABFP and the American Board of Internal Medicine in a joint venture offer a Certificate of Added Qualifications (CAQ) in Geriatric Medicine. The “added certificate” is designed to recognize excellence among those diplomates who provide care to the elderly. The Geriatric Medicine Examinations are given annually. Announcements will be made in the *Journal of the American Board of Family Practice* concerning exact dates and the application process.

**Certification Requirements**

1. Family physicians must be certified by the ABFP and must be diplomates in good standing at the time of the examination.
2. The diplomate must hold a currently valid, full, and unrestricted license to practice medicine in the United States or Canada.
3. Diplomates may qualify by satisfactory completion of an ACGME-accredited fellowship training program in geriatric medicine.
4. Diplomates must achieve a satisfactory score on a 1-day written examination.

**Recertification Requirements**

The recertification process for the geriatric medicine certificate is completed over a 2-year period and may begin in the eighth year of the 10-year certificate and includes the following requirements.

1. Current primary certification in family practice at the time of the examination.
2. Completion of a geriatric medicine recertification preapplication form and submission of a self-evaluation fee.
3. Successful completion of three Self-Evaluation Process (SEP) modules. The SEP modules are at-home, open book examinations of 60 questions each. All candidates must successfully complete three modules to be eligible to sit for the examination. The SEP modules will be scored and incorrect answers will be identified. No references to the literature will be given with the score report. Should a candidate be unsuccessful on any of the SEP modules, the candidate will be required to repeat the particular module until successful.
4. Completion of a formal geriatric medicine examination application form and submission of an examination fee.
5. Verification that all licenses held in the United States and Canada are currently valid, full, and unrestricted.
6. Successful completion of a half-day written examination.

**Sports Medicine**

The ABFP offers certification in sports medicine. The CAQ in Sports Medicine is offered biennially in odd-numbered years in conjunction with the American Board of Emergency Medicine, the American Board of Internal Medicine, and the American Board of Pediatrics.

**Certification Requirements**

1. Family physicians must be certified by the ABFP and must be diplomates in good standing at the time of the examination.
2. The diplomate must hold a currently valid, full, and unrestricted license to practice medicine in the United States or Canada.
3. Family physicians must have satisfactorily completed, or will have completed by June 30 of the examination year, a minimum of 1 year in an ACGME-accredited sports medicine fellowship program associated with an ACGME-accredited residency in emergency medicine, family practice, internal medicine, or pediatrics.
4. Diplomates must achieve a satisfactory score on a half-day written examination.

**Recognition of Successful Candidates**

Successful CAQ candidates will be awarded the ABFP Certificate of Added Qualifications. The certificate will be valid for 10 years at which time recertification is required for renewal of the certificate. Loss of expiration of primary certification in family practice will automatically result in the simultaneous loss of the CAQ. In cases where the CAQ is lost due to loss of the primary certificate, and later the primary certificate is reinstated, the CAQ will be reinstated for the remaining period of time, if any, as stated on the CAQ certificate.
Revocation

General

Each certificate issued by the Board of Directors of the ABFP shall be subject to revocation in any of the following circumstances:

1. The issuance of such certificate or its receipt by the person so certified shall have been contrary to, or in violation of, any provision of the Articles of Incorporation of the ABFP, Inc. or of the Bylaws of the ABFP.

2. The person so certified shall not have been eligible to receive such certificate, irrespective of whether the facts constituting such ineligibility were known to, or could have been ascertained by the directors of the corporation or its representatives.

3. The person so certified shall have made a misstatement of fact in the application for such certificate or in any other statement or representation to the corporation or its representatives.

4. The person so certified shall at any time have neglected to maintain the degree of competency in the field of family practice as established by the Board.

5. The person so certified has fraudulently altered, copied, or changed a certificate of the ABFP, or has fraudulently presented, or allowed to be presented on behalf of the individual, an altered, copied, or changed certificate of the Board. In such cases, the Board reserves the right to revoke, suspend, and/or prohibit subsequent certification of the offending party for a period not to exceed 5 years from the date of discovery of the offense. In the event the individual appeals or otherwise challenges the suspension, the 5-year period shall be tolled until the action of the Board is determined to be final and enforceable.

Licensure Status

A diplomate of the ABFP shall be required to hold a currently valid, full, and unrestricted license to practice medicine in the United States or Canada. Furthermore, every license to practice medicine held by a diplomate in any state or territory of the United States or province of Canada must be currently valid, full, and unrestricted, whether or not the diplomate in effect practices in such state, territory, or province. Diplomates shall be required to retain a full and unrestricted medical license in the United States or Canada even if they are out of the country for extended periods of time. Failure to retain a license will result in loss of diplomate status and will result in loss of the ability to make application for certification, recertification, or other examinations offered by the Board.

In the event a diplomate's license to practice in any state or territory of the United States or province of Canada is revoked, restricted, or suspended, the diplomate's certificate is simultaneously rescinded at the time of the license revocation, restriction, or suspension. The physician must advise the ABFP within 60 days and cease immediately identifying himself/herself in any way directly or indirectly as a diplomate of the ABFP. If the physician fails to notify the ABFP of any revocation, restriction, or suspension within 60 days after the effective date, he/she shall be ineligible to seek reinstatement of diplomate status for up to 1 year following the reinstatement of full and unrestricted licensure.

A restricted medical license is any adverse action by a state licensing agency that encumbers the ability of a physician to diagnose, manage, and/or treat patients. An action by a state licensing agency that is taken against a canceled or inactive license is not considered a violation of ABFP policy. An action by a state licensing agency that limits the practice of medicine to the specialty of family medicine may not necessarily be considered a violation of ABFP policy. However, any action by a state licensing agency that restricts a physician from prescribing medications to the physician's immediate family is considered a violation of ABFP policy and will be enforced accordingly. In cases where a physician has changed the physician's residence deliberately to avoid prosecution, loss of license, or disciplinary action by a state licensing agency, the Board reserves the right to revoke or suspend diplomate status and/or prohibit application for certification. Questions about licensure should be presented to the Board in writing.

If and when the physician's revoked, restricted, or suspended license is reinstated in full (with no restrictions) and official written documentation of reinstatement is provided, the ABFP will honor the remainder of the current certificate and the diplomate will not be required to be reexamined. If the current certificate has expired prior to the reinstatement of the license, the physician may make application for the next annual examination. Successful compliance with all application requirements in effect at that time will be expected.

Authority

The Board of Directors of the ABFP shall have sole power and authority to determine whether or not the evidence or information before it is sufficient to constitute grounds for revocation of any certificate issued by this Corporation. The Board of Directors may, however, at its discretion, require any person so certified to appear before the Board of Directors, upon not less than 30 days' written notice by registered mail, and to show cause, at the time and place specified in such notice, why the certificate should not be revoked. The failure of any person so notified to appear as required in such notice shall, at the discretion of the Board of Directors, constitute cause for revocation of the certificate. The decision of the Board of Directors in all such matters shall be final.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Internal Medicine [ABIM] to ascertain whether the information below is current.)

Preface
The Board's decision about a candidate's eligibility for certification is determined by the policies and procedures described in this document. This edition of policies and procedures supersedes all previous publications.

The Board reserves the right to make changes in its fees, examinations, policies, and procedures at any time without advance notice.

Admission to the Board's examinations will be determined under policies in force at the time of application.

Introduction
The ABIM was established in 1936 and is a private, nonprofit corporation. Its members are elected by the Board of Directors and serve 2-year terms. The Board receives no public funds and has no licensing authority or function.

The mission of the ABIM is to enhance the quality of health care available to the American public by continuously improving the process and maintaining high standards for certifying internists and subspecialists who possess the knowledge, skills, and attitudes essential for the provision of excellent care.

The Board's core values are assuring the public of the highest quality patient care; professionalism and excellence in the practice of medicine; science-based medicine and intellectual rigor as exemplified by the specialty of internal medicine; leadership in evaluation and standard setting; and maintaining autonomy to preserve these values.

Certification by the ABIM recognizes excellence in the discipline of internal medicine, its subspecialties, and areas of added qualifications. Certification by the Board is not a requirement to practice internal medicine, and the Board does not confer privilege to practice. The ABIM does not intend either to interfere with or to restrict the professional activities of a licensed physician based on certification status.

The ABIM administers the certification and recertification processes by (1) establishing training requirements, (2) assessing the credentials of candidates, (3) obtaining substantiation by appropriate authorities of the clinical competence and professional standing of candidates, and (4) developing and conducting examinations for certification and recertification.

The duration of the validity of all certificates issued by the Board in 1990 (1987 for critical care medicine and 1988 for geriatric medicine) and thereafter is 10 years, and the dates of validity are noted on the certificates. Certificates issued before these dates will continue to be valid indefinitely. Information about the Board's recertification program is available on request.

Training Requirements for Certification in Internal Medicine
Physicians who are awarded a certificate in internal medicine must have completed the required predoctoral medical education, met the postdoctoral training requirements, demonstrated clinical competence in the care of patients, and passed the certification examination in internal medicine.

Predoctoral Medical Education
Candidates from medical schools in the United States or Canada must have attended a school accredited at the date of graduation by the Liaison Committee on Medical Education (LCME), the Committee for Accreditation of Canadian Medical Schools, or the American Osteopathic Association. Graduates of international medical schools are required to submit either a permanent (valid indefinitely) certificate from the Educational Commission for Foreign Medical Graduates or comparable credentials from the Medical Council of Canada.

Postdoctoral Graduate Medical Education (GME)
To be admitted to a certification examination in internal medicine physicians must have completed, by August 31 of the year of examination, 36 months of graduate medical education accredited by the Accreditation Council for Graduate Medical Education (ACGME), the Royal College of Physicians and Surgeons of Canada (RCPSC), or the Professional Corporation of Physicians of Quebec. Residency training or research experience occurring before the completion of the requirements for the MD or DO degree cannot be credited toward the Board's requirements.

The 36 months of required training must include (1) a minimum of 12 months of internal medicine rotations at the R-1 level and (2) a minimum of 24 months of training in an accredited internal medicine program, 12 months at the R-2 level and 12 months at the R-3 level.
Content of Training
The 36 months of full-time medical residency education must include the following:

- At least 30 months of training in general internal medicine, subspecialty internal medicine, critical care medicine, geriatric medicine, and emergency medicine. Up to 4 months of the 30 months may include training in primary care areas (eg, neurology, dermatology, office gynecology, or orthopedics);
- Up to 3 months of other electives approved by the internal medicine program director; and
- Up to 6 months of leave for vacation time, parental leave, or illness. Vacation or other leave cannot be forfeited to reduce training requirements.

In addition, the following requirements for direct patient responsibility must be met:

- At least 24 months of the 36 months of residency education must occur in settings where the resident personally provides, or supervises junior residents who provide, direct care to patients in either inpatient or ambulatory settings.
- A minimum of 6 months of the direct patient responsibility on internal medicine rotations must occur during the R-1 year.

Clinical Competence Requirements
The Board requires substantiation that candidates for certification in internal medicine are competent in the following: clinical judgment, medical knowledge, clinical skills (medical interviewing, physical examination, and procedural skills), humanistic qualities, professionalism, and provision of medical care.

Through its tracking process, the Board requires program directors to complete clinical competence evaluations each spring for internal medicine residents. Lack of documentation of clinical competence may result in the exclusion of a candidate from examination.

All residents must receive a satisfactory rating of overall clinical competence, humanistic qualities, and moral and ethical behavior in each year of training.

- Internal medicine residents rated as marginal in overall clinical competence in either their PGY1 or PGY2 will receive credit for that year of training.
- If a resident receives marginal ratings in overall clinical competence in both PGY1 and PGY2, an additional year of accredited internal medicine GME will be required.
- For each year rated unsatisfactory in overall clinical competence, an additional year of accredited internal medicine GME (including satisfactory completion and performance) is required.
- Residents with deficiencies in any year of training solely in humanistic qualities or moral and ethical behavior may, at the discretion of the Board, be required to complete additional training and/or a specified period of observation.
- During the final year of required training, an unsatisfactory rating in any of the components of clinical competence requires an additional year of accredited training. It is the resident's responsibility to arrange for any additional training required.

Procedures Required for Internal Medicine
At the conclusion of training, each resident must be judged by the program director to be proficient in the procedures listed below. Although the Board does not prescribe an absolute number of times a procedure must be done to ensure competence, it has developed guidelines (indicated in parentheses) for the minimum number of directly supervised, successfully performed procedures: confirmation of proficiency is not credited with fewer than: abdominal paracentesis (9), arterial puncture for blood gas analysis (6), arthrocentesis of the knee joint (3), central venous line placement (5), lumbar puncture (5), nasogastric intubation (3), thoracentesis (5), critical life-saving procedures (this requirement can be met by documentation of successful training in advanced cardiac life support), breast examinations (6), rectal examinations (6), pelvic examinations and pap smear including wet mount (5).

Credit in Lieu of Standard Training
Training Completed Prior to Entering Internal Medicine Residency
No credit may be granted to substitute for 24 months of accredited R-2 and R-3 internal medicine training.

Upon the receipt of a proposal from the director of an accredited internal medicine residency program, the Board may grant credit for some or all of the R-1 training requirement for training taken prior to entering R-2 internal medicine training as described below.

1. Month-for-month credit for R-1 training may be granted for satisfactory completion of internal medicine rotations taken during an accredited non-internal medicine residency program if:
   a. the internal medicine training occurred under the direction of a program director of an accredited internal medicine program; and
   b. the training occurred in an institution accredited for training internal medicine residents; and
   c. the rotations were identical to the rotations of the residents enrolled in the accredited internal medicine residency program.

2. In addition to month-for-month credit for internal medicine rotations:
   a. up to 6 months credit may be granted for satisfactory completion of 12 months of an accredited family practice or pediatrics program; or
   b. up to 3 months credit may be granted for satisfactory completion of 12 months of an accredited residency program other than family practice or pediatrics.

3. Up to 12 months credit may be granted for 3 or more years of US- or Canadian-accredited training in another clinical specialty and certification by an ABMS member Board in that specialty.

4. Twelve months credit may be granted for 3 or more years of verified internal medicine training abroad.

Training Completed Abroad by Current Full-time US or Canadian Faculty
Full time internal medicine faculty members in a LCME-accredited medical school or an accredited Canadian medical school may qualify for admission to the certification examination in internal medicine if they:

1. Are proposed by the chair or program director of an accredited internal medicine residency;
2. Have completed 3 or more years of verified internal medicine training abroad;
3. Hold an appointment at the level of associate professor or higher at the time of proposal; and
4. Have completed 8 years as a clinician-educator or a clinical investigator in internal medicine with a full-time appointment on a medical school faculty.

Training in Combined Programs
Training guidelines and requirements for credit toward the ABIM certification examination in internal medicine are available on request in the following combined programs:

- Emergency medicine/internal medicine
- Emergency medicine/internal medicine/critical care medicine
- Family practice/internal medicine
- Internal medicine/neurology
- Internal medicine/nuclear medicine
Subspecialties and Added Qualifications

General Requirements
In addition to the primary certificate in internal medicine, the Board offers subspecialty certificates and certificates of added qualifications. Subspecialty certificates are offered in cardiovascular disease; endocrinology, diabetes, and metabolism; gastroenterology; hematology; infectious disease; medical oncology; nephrology; pulmonary disease; and rheumatology.

The certificates of added qualifications recognize special expertise in areas that have a fundamental practice-oriented relationship to an underlying discipline, and are offered currently in adolescent medicine, clinical cardiology electrophysiology, critical care medicine, clinical and laboratory immunology, geriatric medicine, interventional cardiology, and sports medicine.

Physicians who are awarded a certificate in a subspecialty or an area of added qualifications must have been previously certified in internal medicine by the ABIM, completed the requisite training, demonstrated clinical competence in the care of patients, and passed the subspecialty or added qualifications examination.

Information regarding each of the added qualifications examinations is available from the Board upon request.

For information and application forms for the clinical and laboratory immunology examination, please contact the American Board of Allergy and Immunology, 510 Walnut St, Ste 1701, Philadelphia, PA 19106-3899.

Subspeciality training must be accredited by the ACGME, the RCPSC, or the Professional Corporation of Physicians of Quebec. No credit will be granted toward certification in a subspecialty or area of added qualifications for training completed outside of an accredited US or Canadian program.

Fellowship training taken before the date of completion of the requirements for the MD or DO degree, and training as a chief medical resident, do not count toward the requirements for subspecialty certification. In addition, practice experience and attendance at postgraduate courses cannot be credited.

To be admitted to an examination, candidates must have completed the required training in the subspecialty or area of added qualifications by October 31 of the year of examination. This extended deadline is intended to accommodate candidates whose internal medicine and/or fellowship training is off-cycle for any reason.

Candidates for certification in the subspecialties must meet the Board's requirements for the total duration of training as well as minimum clinical training. Clinical training requirements may be met by aggregating clinical training that occurs throughout the entire fellowship training period; clinical training need not be completed in successive months. Educational rotations completed during training may not be double counted to satisfy both internal medicine and subspecialty training requirements.

Training and Procedures Required
The total months of training required, including specific clinical months, and requisite procedures for each subspecialty and area of added qualifications are listed below:

**Adolescent Medicine (12 months)**
No required procedures.

**Cardiovascular Disease (36 months/24 clinical months)**
Advanced cardiac life support (ACLS), including cardiovascular; electrocardiography, including ambulatory monitoring and exercise testing; echocardiography; arterial catheter insertion; and right-heart catheterization, including insertion and management of temporary pacemakers.

*(Note: Two years of accredited cardiology training completed before July 1990 may be acceptable through the year 2000. Contact the Board for details.)*

**Clinical Cardiac Electrophysiology (12 clinical months)**
Electrophysiologic studies including mapping, both with a catheter and intraoperatively; surgical and other ablative procedures; and implantation of pacemakers, cardioverters, and defibrillators (a minimum of 100 intracardiac procedures in at least 50 patients, of whom at least 25% had supraventricular tachycardia).

**Critical Care Medicine (24 months/12 clinical months)**
Maintenance of open airway; oral/nasal intubation; ventilator management, including experience with various modes; insertion and management of chest tubes; ACLS; placement of arterial, central venous, and pulmonary artery balloon flotation catheters; and calibration and operation of hemodynamic recording systems.

**Endocrinology, Diabetes, and Metabolism (24 months/12 clinical months)**
Thyroid aspiration biopsy.

**Gastroenterology (36 months/18 clinical months)**
Proctoscopy and/or flexible sigmoidoscopy; diagnostic upper gastrointestinal endoscopy; colonoscopy, including biopsy and polypectomy; esophageal dilation; therapeutic upper and lower gastrointestinal endoscopy; and liver biopsy.

*(Two years of accredited gastroenterology training are required for candidates who initiated fellowship training prior to June 1998.)*

**Geriatric Medicine (12 clinical months)**
No required procedures.

**Hematology (24 months/12 clinical months)**
Minimum of one half day per week in continuity outpatient clinic; bone marrow aspiration and biopsy, including preparation, staining, examination, and interpretation of blood smears, bone marrow aspirates, and touch preparations of bone marrow biopsies; measurement of complete blood count, including platelets and white cell differential, using automated or manual techniques with appropriate quality control; administration of chemotherapeutic agents and biological products through all therapeutic routes; and management and care of indwelling venous access catheters.

**Infectious Disease (24 months/12 clinical months)**
Microscopic evaluation of diagnostic specimens, including preparation, staining, and interpretation; management, maintenance, and removal of indwelling venous access catheters; and administration of antimicrobial and biologic products via all routes.

**Interventional Cardiology (12 clinical months)**
A minimum of 250 therapeutic interventional cardiac procedures during 12 months of acceptable interventional cardiology fellowship training.

**Medical Oncology (24 months/12 clinical months)**
Minimum of one half day per week in continuity outpatient clinic; bone marrow aspiration and biopsy; administration of chemotherapeutic agents and biological products through all
therapeutic routes; and management and care of indwelling venous access catheters.

**Nephrology (24 months/12 clinical months)**
Placement of temporary vascular access for hemodialysis and related procedures; acute and chronic hemodialysis; peritoneal dialysis (excluding placement of temporary peritoneal catheters); continuous renal replacement therapy (CRRT); and percutaneous biopsy of both autologous and transplanted kidneys.

**Pulmonary Disease (24 months/12 clinical months)**
Oral/nasal intubation; fiberoptic bronchoscopy and accompanying procedures; ventilator management; thoracotomy and percutaneous pleural biopsy; arterial puncture; placement of arterial and pulmonary artery balloon flotation catheters; calibration and operation of hemodynamic recording systems; supervision of the technical aspects of pulmonary function testing; progressive exercise testing; and insertion and management of chest tubes.

**Rheumatology (24 months/12 clinical months)**
Diagnostic aspiration of and analysis by light and polarized light microscopy of synovial fluid from diarthrodial joints, bursae, and tenosynovial structures: therapeutic injection of diarthrodial joints, bursae, tenosynovial structures, and entheses.

**Sports Medicine (12 months)**
No required procedures.

**Clinical Competence Requirements**
The Board requires substantiation that candidates for certification in the subspecialties are competent in the following: clinical judgment, medical knowledge, clinical skills (medical interviewing, physical examination, and procedural skills), humanistic qualities, professionalism, provision of medical care, and continuing scholarship.

Through its tracking process, the Board requires verification of the subspecialty fellow's clinical competence from both the director of the subspecialty training program and the chair of the department of medicine.

All fellows must receive a satisfactory rating of overall clinical competence, humanistic qualities, and moral and ethical behavior in each of the required years of training.
- Fellows with an unsatisfactory rating in overall clinical competence during any year of training will be required to satisfactorily complete an additional year of accredited fellowship training.
- Fellows with an unsatisfactory rating solely in humanistic qualities or moral and ethical behavior for any year of training may, at the discretion of the Board, be required to complete additional training and/or a specified period of observation.
- For the final year of required training, fellows with an unsatisfactory rating in any area of clinical competence, including required procedures, must obtain an additional year of accredited training. It is the fellow's responsibility to arrange for this training.

**Dual Certification Requirements**

**Hematology and Medical Oncology**
Dual certification in hematology and medical oncology requires 3 years of full-time combined accredited training which must include:
(a) a minimum of 12 months of full-time clinical training with patient care responsibility, (b) a minimum of 12 months in the diagnosis and management of a broad spectrum of neoplastic diseases, including hematological malignancies, and (c) a minimum of 6 months of training in the diagnosis and management of a broad spectrum of non-neoplastic hematological disorders.

Full-time clinical training is defined as at least 80% of the fellow's professional time during a working week dedicated to clinical (patient care or educational) activities. During the entire 3 years the fellow must attend at least one outpatient clinic for a minimum of 1 half-day per week and have the responsibility for providing continuous care to a defined cohort of patients being managed for neoplastic and hematological disorders.

The ABIM recommends that the 3 years of combined training be taken in programs in the same institution accredited both in hematology and medical oncology by the ACGME, the RCPSC, or the Professional Corporation of Physicians of Quebec. If circumstances dictate that this training be taken in two different programs, 24 continuous months must be in one institution, and both institutions must be accredited in hematology and medical oncology.

Candidates must complete all 3 years of required combined training before being admitted to an examination in either subspecialty. Those who elect to undertake an examination in one subspecialty following only 2 years of fellowship training will be required to complete 4 years of accredited training for dual certification. Candidates who have completed all 3 years of required combined training may take the hematology and medical oncology examinations in the same year or in different years.

**Pulmonary Disease and Critical Care Medicine**
Candidates seeking dual certification in pulmonary disease and critical care medicine must complete a minimum of 3 years of accredited combined training, 18 months of which must be clinical training. Since critical care medicine is an added qualification to the subspecialty of pulmonary disease, certification in pulmonary disease must be achieved before the candidate is eligible to apply for admission to the critical care medicine examination.

**Rheumatology and Allergy and Immunology**
Dual certification in rheumatology and allergy and immunology requires a minimum of 3 years of full-time training, which must include (a) at least 12 months full-time clinical rheumatology supervised by the director of an accredited rheumatology training program, (b) weekly attendance for 18 consecutive months in an ambulatory care program supervised by a rheumatology faculty, which must include continuity of patient care within ambulatory clinics, and (c) at least 18 months of full-time allergy and immunology training supervised by the training program director of an accredited program in allergy and immunology.

Plans for combined training should be approved in writing by both the rheumatology and the allergy and immunology training program directors and by the ABIM Subspecialty Board on Rheumatology and the American Board of Allergy and Immunology before training begins. Admission to either examination requires (1) certification in internal medicine, (2) satisfactory clinical competence, and (3) completion of the entire 3-year combined program.

Candidates seeking dual certification for other subspecialty combinations should write to the Board for information.

Guidelines for proposing candidates for special consideration for admission to the subspecialty and added qualifications examinations are available upon request.

**Research Pathway**
The research pathway is intended for trainees who anticipate academic careers as investigators in basic science or clinical research. Although prospective planning of this pathway by trainees and program directors is necessary, prospective approval by the Board is no longer a requirement. Program directors must document the clinical and research experience through the Board's tracking program.
At least 36 months of research training at 80% commitment is required. The Board defines research as scholarly activities intended to develop new scientific knowledge. The research experience of trainees should be mentored and reviewed; training should include completion of work leading to a graduate degree (if not already acquired) or its equivalent. The last year of research training may be undertaken in a full-time faculty position if the level of commitment to mentored research is maintained at 80%.

During internal medicine research training, 20% of each year must be spent in clinical experiences including a half-day per week in a continuity clinic. During subspecialty research training, at least 1 half-day per week must be spent in an ambulatory clinic. Ratings of satisfactory clinical performance must be maintained annually for each trainee in the ABIM Research Pathway.

Requirements for the ABIM Research Pathway are summarized below.

**Special Training Policies**

**Disclosure of Performance Information**

For trainees planning to change programs, the Board expects the candidate to request that a written evaluation of past performance be sent from the previous program to the new program. Upon request of the new program director, the Board will provide (when available) a summary of the previous performance ratings and the total credits accumulated toward the Board's training requirements. In addition, at the trainee's request, the Board will provide the new program director with comments or other information obtained from previous training programs.

**Due Process for Evaluations**

The responsibility for the evaluation of a trainee rests with the program, not with the Board. The Board is not in a position to reexamine the facts and circumstances of an individual's performance. As required by the ACGME in its *Essentials of Accredited Residencies in Graduate Medical Education*, the educational institution must provide appropriate due process for its decisions regarding trainees' performance.

**Leave of Absence**

Trainees may take up to 1 month per year of training for vacation time, parental or family leave, or illness (including pregnancy-related disabilities). Training must be extended to make up any absence exceeding 1 month per year. Vacation leave is essential and must not be forfeited to compensate for extended illness, late starts, parental leave, or other purposes.

**Reduced-Schedule Training**

Interrupted full-time training is acceptable, provided that no period of full-time training is shorter than 1 month. In any 12-month period, at least 6 months must be spent in training. Patient care responsibilities should be maintained in a continuity clinic during the non-training component of the year. Board approval must be obtained before initiating an interrupted training plan. Part-time training, whether or not continuous, is not acceptable.

**Other Policies**

**Board Eligibility**

The Board does not use, define, or recognize the term Board eligible. Admissibility to certifying examinations is not affected by prior examination attempts, nor is it time-limited. Candidates will be admissible to certifying examinations provided they meet all the requirements of the Board as set forth in its *Policies and Procedures* brochure and on ABIM's home page (http://www.abim.org).

The Board will routinely report by mail, fax, or online (http://www.abim.org) whether candidates are certified (including dates) or not certified. If a diplomate was previously certified, this fact and dates of former certification will be noted. If certification is suspended or revoked, this also will be reported.

On a candidate's written request to the Board, the following information will also be reported: (1) that an application is currently in process and/or (2) the year the candidate was last admitted to examination.

**Professional Standing of Practitioners**

Every 4 years following formal training, the Board requires verification that candidates applying for certification are recognized as specialists or subspecialists in good standing. Verification is sought from the chief of medical service at the institution where the candidate's principal staff appointment is held. Any challenge to good standing, including charges made by a licensing board, must be resolved locally to the Board's satisfaction before admission to the examination. For example, substance abuse, convictions for felonies related to medical practice, or substantial disciplinary action by the institution may lead to deferred admission or rejection.

**Disclosure of Information**

The Board provides information to program directors each year regarding both the certification status of individuals who trained in their programs and took the examination and the program's overall performance. This information is helpful to the program in evaluating its educational effectiveness. The Board also provides internal medicine program pass rate information to the Residency Review Committee for Internal Medicine, Association of American Medical Colleges, American Medical Association, and online (http://www.abim.org). In addition, at its discretion, the Board may release examination results, examination scores, and other pertinent candidate information to those whom it deems have a legitimate need for such information.

**Licensure**

All candidates must possess a valid, unrestricted, and unchallenged license to practice medicine in a jurisdiction of the United States or Canada. Candidates with a restricted, suspended, or revoked
license in any jurisdiction will not be admitted to the examination or certified. Restrictions include but are not limited to conditions, contingencies, probation, and stipulated agreements.

**Disabled Candidates**

The Board recognizes that some candidates may have physical limitations that make them unable to fulfill the requirement for proficiency in performing procedures. For such individuals, the procedural skills requirement may be waived. Program directors should write to the Board for approval before the individual enters training.

The Board is committed to offering suitable accommodations for all candidates, including individuals with disabilities. When necessary, alternative arrangements under comparable conditions to those provided for nondisabled individuals are offered to disabled individuals. Candidates who need accommodation for a disability during an examination must provide a written request to the Board at the time of application for examination. The Board will then inform the candidate of the documentation needed, which must be received by the Board no later than 4 months prior to the date of examination.

**Substance Abuse**

If a history of substance abuse exists, candidates must provide documentation that they can safely and effectively perform the duties and responsibilities of an ABIM diplomate. Evidence of successful completion of a treatment program and/or a documented period of abstinence (usually at least 1 year) is required. The Board treats such information as confidential.

**Revocation of Certificates**

The Board may at its discretion revoke certification if the diplomate was not qualified to receive the certificate at the time it was issued, even if the certificate was issued as a result of a mistake on the part of the Board. It may revoke or suspend the certificate if (1) the diplomate made any material misstatement of fact or omission of fact to the Board in connection with application or otherwise, or to any third party concerning the diplomate's certification status; or (2) the diplomate's license to practice medicine has been revoked in any jurisdiction.

**Irregular Behavior on Examinations**

The Board's examinations are copyrighted and administered in secured testing centers by proctors who are responsible for maintaining the integrity and security of the certification process. Proctors are required to report to the Board any irregular or improper behavior by a candidate, such as giving or obtaining information or aid, looking at the test materials of others, removing an examination from the test center, taking notes, failing to comply with time limits or instructions, or talking or other disruptive behavior. Irregular or improper behavior that is observed, that is made apparent by statistical analysis, or that is shown by other means will be considered a violation of the certification process and will constitute grounds for invalidation of a candidate's examination. Other sanctions, which may be invoked at the Board's discretion, include excluding a candidate from future examinations and informing program director(s), licensing bodies, or law enforcement agencies.

**Late Applications**

Awareness of and meeting registration deadlines are the candidate's responsibility. There is a nonrefundable penalty fee of $300 for any application postmarked between December 2, 1999, and February 1, 2000, for the August internal medicine examination; and between April 2, 2000, and June 1, 2000, for the November subspecialty and added qualifications certification examinations.

**Reexamination**

Candidates who are unsuccessful on any certification examination may apply for reexamination. There is no restriction on the number of opportunities for reexamination. Once admitted to an examination, candidates will be considered to have fulfilled the training requirements for future examinations in that discipline.

All candidates for reexamination must meet the requirements for licensure status and professional standing.

**Board Publications**

The following Board publications are available upon request. These are not designed to aid in preparation for examinations.

- ABIM Policies and Procedures for Certification
- ABIM Recertification Program
- Guide to Evaluation of Residents in Internal Medicine
- Guidelines and Forms for Using the Mini-Clinical Evaluation Exercise (CEX)
- Residents: Evaluating Your Clinical Competence
- Attending Physicians: Your Role in Evaluating Residents
- Resource Document for Subspecialty Program Directors: Clinical Competence Guidelines and Other Information
- Guidelines and Criteria for the ABIM General and Subspecialty Internal Medicine Research Pathway
- ACP-ASIM/ABIM Access to Healthcare: Educational Portfolios—What is the Profession's Responsibility?
- Care Competencies in Women's Health: What Internists Need to Know at a Glance
- Project Professionalism
- Caring for the Dying: Identification and Promotion of Physician Competency—Educational Resources and Personal Narratives
- Promoting Medical Interviewing Skills in Internal Medicine
- Guide to Awareness and Evaluation of Humanistic Qualities
- Certification in Added Qualifications of
  - Adolescent Medicine
  - Clinical Cardiac Electrophysiology
  - Critical Care Medicine
  - Geriatric Medicine
  - Interventional Cardiology
  - Sports Medicine

(These criteria and conditions apply to the 1999 examination cycle and are subject to change without notice. The American Board of Medical Genetics (ABMG) offers exams every 3 years; the next examination cycle will be June 1999. All applicants are advised to contact the Board to ascertain whether the information below is current.)

General Information

The American Board of Medical Genetics, Inc., incorporated in 1980 under the sponsorship of the American Society of Human Genetics, Inc., prepares and administers examinations to certify individuals who provide services in medical genetics and provides accreditation of medical genetics training programs. The certification program consists of a general (core) examination, taken by all examinees, and specialty examinations in the following areas: (1) clinical genetics, (2) PhD medical genetics, (3) clinical biochemical genetics, (4) clinical cytogenetics, and (5) clinical molecular genetics.

General Candidacy Requirements

Active Candidate Status

Once the application has been approved, the applicant is considered an active candidate for ABMG certification. The term “Board eligible” is not used to describe this status. If a candidate fails to achieve certification for any reason (including withdrawing from the examination process), the individual loses his/her active candidate status. Such individuals may reapply for active candidate status, as described below.

First-time Applicants

Candidacy for the 1999 examination requires successful completion of an Accreditation Council for Graduate Medical Education (ACGME)-accredited or ABMG-accredited medical genetics training program by June 30, 1999. All graduates of an accredited training program are considered for active candidate status for the certification examinations provided they submit acceptable supporting credentials. It is strongly recommended that the application be submitted to ABMG within 5 years of completion of the training program. Changes in the field are incorporated into examinations and applicants may be held responsible for revisions in certification requirements.

The ABMG limits active candidacy to individuals who demonstrate to its satisfaction that specific criteria for certification have been met. Those practitioners working in genetics who, despite academic or clinical backgrounds, do not meet specific criteria described herein will not be permitted to sit for any examination.

If an applicant’s background is found to be deficient, the ABMG may require additional training and/or clinical experience before allowing the applicant to sit for the examination. The ABMG also reserves the right to declare a candidate ineligible if training, background, or references are deemed inadequate or otherwise unacceptable.

Individuals who have received equivalent training in other countries and who complete their logbooks under the auspices of ABMG-accredited training programs may also be granted candidacy to sit for the examinations. Individuals are strongly encouraged to seek evaluation of the equivalency of their foreign training prior to starting their training in the United States. Such candidates must submit an Information Supplement form with their formal application. The ABMG reserves the right to grant or deny such candidacy.

Applicants for Reexamination

Reexaminees are those individuals who failed the examination for the first time in 1998. Reexaminees must retake all examinations for specialties in which they desire certification, as well as the general examination. They cannot carry over a passed examination to the next cycle. Refer to the “Requirements for Reexaminees Within One Cycle” for specific application requirements.

Applicants Who Fail to Achieve Certification Within 5 Years of Application

Applicants are required to pass the certification examination within two successive examination cycles or within 5 years of application, whichever comes first. Failure to achieve certification in two cycles, including, but not limited to, failing both cycles of the examination or withdrawing from one cycle and failing the other, require the applicant to begin again as a “New Applicant.” Failure to achieve certification during this period is taken as evidence of inadequate knowledge or training in medical genetics and an indication of the need for additional training. To qualify for candidacy to retest the Board examinations, the applicant must complete the equivalent of 1 year of additional training in an ABMG- or ACGME-accredited medical genetics program, and generate a logbook of 160 new cases seen under the auspices of that program. The additional training must be approved by the director of the training program and documented to the ABMG at the onset of training. The applicant should contact the ABMG Administrative Office to clarify additional training requirements.

Applicants for Certification in an Additional Specialty

Doctoral diplomats previously certified in one (or more) ABMG specialty who desire to take another specialty examination must submit new credentials, including evidence of 1 additional year of full-time training in the additional specialty at an ABMG-accredited training program, and include a new logbook of recent cases completed at the ABMG-accredited training program during that period of training. Applicants must pass both the general examination and the additional specialty examination to be certified in the additional area.

General Instructions

Deadline for Applications

Complete applications must be postmarked no later than December 31, 1998. Applications postmarked between January 1 and January 31, 1999, must be accompanied by a $250 late fee. Applications postmarked February 1, 1999, or later will be returned to the
applicant without review. Incomplete applications will not be reviewed. All information, including logbooks and letters of endorsement, must be submitted before the deadline.

Applicants who have completed training must submit a completed logbook by December 31, 1998. Applicants whose training ends between January 1, 1998, and June 30, 1999, are permitted to submit logbooks with at least 100 cases per specialty by December 31, 1998, and must submit the remainder of their cases by March 15, 1999. No late fee will be assessed if the remaining cases are submitted by stated deadlines.

It is recommended that candidates send their applications via US Postal Service certified mail, with a return receipt of delivery. It is the applicant's responsibility to assure delivery of the application on time.

Receipt of Application
Upon receipt of completed application and appropriate application review fees, credentials are evaluated by the ABMG and, at its discretion, are approved or disapproved. Once an application is approved, the applicant achieves "active candidate" status. The term "ABMG eligible" is not to be used to describe this status. At this point, the individual is advised of the deadline to remit examination fees.

When all fees have been received from the active candidate, he or she is assigned to an examination center and notified of the site. An admission card is mailed to the candidate approximately 3 weeks before the examination. No candidate will be admitted to any examination without an admission card. It is the candidate's responsibility to notify ABMG of any change of address or if an admission card is not received.

Fees
All applicants must register for the general examination and at least one specialty examination. Fees must be paid in US currency by check or money order. The candidate's canceled check is considered the receipt.

Application Review Fee
One specialty $450
Two specialties $500
Three specialties $550
Four specialties $600
This fee is nonrefundable and must accompany the application.

Examination Fees
General Examination $406
Specialties
Clinical genetics $500
PhD medical genetics $500
Clinical cytotogenetics $500
Clinical biochemical genetics $500
Clinical molecular genetics $500

Late Fees
A late fee of $250 must accompany any application postmarked between January 1, 1996, and January 1, 1999. Applications postmarked after January 1, 1999, will be returned without review.

Fee Payment Schedule
First Time Applicants: Submit application review fee with your application; examination fees will be requested once your application has been approved.
Reexaminees: Submit examination fees with your application. The application fee is not required.

Request to Withdraw
If an approved applicant withdraws from the examination, examination fees may be refunded at the applicant's request. It is the applicant's responsibility to notify the ABMG Administrative Office in writing no less than 3 weeks prior to the examination date. A fee of $100 is retained to cover administrative costs. Fees are not refunded to examinees who withdraw within 3 weeks of the examination date. A candidate who fails to appear for an examination will forfeit all examination fees.
Active candidate status is not maintained after examination results are released. Such applicants may reapply for "active candidate status." Applicants are required to achieve certification within two successive examination cycles or within 6 years of achieving active candidate status, whichever comes first. Credentials carry an applicant for two cycles. Withdrawing from an examination cycle is counted as failure to achieve certification during that cycle.

Applicants With Special Disabilities
The ABMG supports the intent of the Americans with Disabilities Act (ADA) and will attempt to make reasonable accommodation for applicants with disabilities. The ABMG offers examinations in a place and manner accessible to persons with disabilities or offers alternative accessible arrangements for such individuals. Auxiliary aids and services will be offered only if they do not fundamentally alter the measurement of skills or knowledge the examination is intended to test.
Applicants with a physical or mental disability who need special accommodation during the examinations are requested to check the appropriate box on the application form and to request an "Application for Special Accommodation" from the ABMG Administrative Office. This form should be completed and submitted with the application.
It circumstances arise that cause the applicant to request accommodation after completion of the application, the applicant should notify the ABMG Administrative Office immediately.

Certificates
Candidates who pass the general examination and at least one specialty examination will become diplomates of the ABMG. This information becomes public information and is listed in the official ABMS Directory of Board Certified Medical Specialists. Any certificate issued by the ABMG shall be subject to revocation at any time should the ABMG determine, in its sole judgment, that a candidate who has received a certificate was in some respect not properly qualified to receive or retain it.

Time-limited Certification
As of the 1995 certification examination, all certificates are time-limited for a period of 10 years from the date of the examination.

Final Decisions by the American Board of Medical Genetics
Final decisions regarding candidacy (active candidate status) for certifying examinations and certification of applicants will be made by the Board of Directors of the ABMG. Appeals of ABMG decisions may be made in writing to the ABMG Review Committee at the ABMG Administrative Office address. Failure to pass a certifying examination is not appealable. Write to the Administrative Office to obtain a copy of the "Appeal Process for Adverse Decisions Affecting Certification."
Canadian College of Medical Genetics (CCMG) and ABMG Reciprocity

Beginning with the 1996 cycle of certifying examinations, trainees completing CCMG-accredited postdoctoral training programs are eligible to apply for admission to ABMG examinations, and trainees completing ABMG-accredited postdoctoral training programs are eligible to apply for admission to CCMG examinations; the ABMG and CCMG now recognize each other’s training as provided by accredited programs. Candidates from such accredited training programs may seek admission to the certifying examinations of either country or of both countries. Candidates from accredited programs in the United States and Canada who seek certification in the country other than that of their training are required to meet all of the credentialing requirements and pay all of the applicable fees to the certifying body.

Canadian-trained candidates for the ABMG certifying examinations must submit logbooks, laboratory method competency lists, and other required documents signed by their program directors. Letters of recommendation may be submitted by CCMG- or ABMG-certified colleagues, one of whom must be the program director of their training. In addition, Canadian-trained candidates must submit an “Information Supplement Form” for special consideration.

Individuals who hold certificates from the ABMG or CCMG in one of the recognized specialties may apply to the certifying body of the other country for admission to the certifying examination for that specialty. A valid certificate, however, serves only as evidence of appropriate prior training. Candidates must meet all of the credentialing requirements of the certifying body to which they apply. ABMG applicants must pass both the general examination and at least one specialty examination in order to be certified.

Requirements

A. Requirements for First-time Applicants, Those Requesting an Additional Specialty, and Those Who Have Failed to Achieve Certification Within 6 Years of Application

1. Applicants must submit a notarized application indicating intent to sit the certification examination.

2. Applicants for the Clinical Genetics specialty must have a US- or Canadian-earned, or the equivalent of an earned, MD or DO degree. Applicants for the PhD medical genetics specialty must have a US- or Canadian-earned, or the equivalent of an earned, PhD in genetics, human genetics, or a related field. Applicants for the laboratory specialty examinations must have a US- or Canadian-earned, or the equivalent of an earned, MD, DO, or PhD. All applicants are required to submit an official transcript of the MD, DO, or PhD program, indicating date of graduation.

3. Applicants must submit a current curriculum vitae and bibliography.

4. Applicants for PhD medical genetics or laboratory specialties are required to complete at least 2 years in an ABMG-accredited training program. Clinical genetics applicants are required to complete 2 years in an ACGME-accredited clinical genetics residency and submit verification of satisfactory completion of at least 2 years in an ACGME-accredited residency training program in any clinical specialty. The program director must certify that the candidate has had ongoing assessment during training, has satisfactorily completed the requirements of the program, has the clinical skills necessary for the specialty (or specialties) of interest, and that for each laboratory specialty the applicant has had at least 1 full year of clinical laboratory bench experience as a fellow or resident in the training program. The program director may also write one of the letters of endorsement.

Applicants completing their training between January 1, 1999, and June 30, 1999, may apply for the 1999 examinations and supply current training information. The ABMG will contact the program director at the conclusion of the training period for verification of successful completion of training.

Some applicants will not complete their fellowship before sitting for the examination (eg, they will have finished only 2 or 3 years of a longer fellowship). If this is the case, a letter from the program director must clearly explain how the fellow has met all of the requirements for candidacy in the specialties for which he/she is applying.

5. Applicants are required to submit at least three letters of endorsement from ABMG-certified diplomates who are familiar with the applicant's medical genetics experience. Diplomates in the letters, must attest to the applicant's character, honesty, and integrity and support the application for candidacy. One or more letters must be from ABMG-certified program faculty who were directly responsible for training in each specialty (or specialties) for which the applicant is seeking candidacy.

The letters of endorsement, and any letter from the program director, must be sealed and signed by the author over the seal and submitted with the application.

6. All applicants are required to submit a logbook of 150 clinical cases per specialty. See the "Instructions for Completion of Logbook of Medical Genetics Experience" for further instructions.

7. Laboratory specialty applicants are required to submit a competency list for each laboratory specialty in which certification is requested. This list is to be signed by the program director and by the ABMG laboratory specialist in charge of that part of the training program (ie, the person specified in the program's application for accreditation).

8. Clinical genetics specialty applicants are required to submit verification of satisfactory completion of at least 2 years in an ACGME-accredited clinical residency program in another medical specialty or 4 years in an ACGME-accredited clinical genetics residency program.

9. Clinical genetics specialty applicants must be able to practice medicine at the time they will sit the examination. Clinical genetics applicants are required to submit a copy of their current unrestricted and valid medical license.

10. Applicants are required to submit an acknowledgment card along with the application. If applying for more than one specialty, only one card is necessary.

11. First-time applicants must submit an application fee along with their application.

B. Requirements for Reexaminees Within One Cycle

1. Applicants must submit a notarized application indicating intent to sit the certification examination.

2. Applicants must submit an official transcript of a US- or Canadian-earned, or the equivalent of an earned MD, DO, or PhD training program, indicating date of graduation.

3. Applicants must submit a current curriculum vitae and bibliography.

4. Laboratory specialty applicants are required to submit a competency list for each laboratory specialty in which certification is requested. This list is to be signed by the program director and by the ABMG laboratory specialist in charge of that part of the training program (ie, the person specified in the program's application for accreditation).

5. Applicants are required to submit an acknowledgment card along with the application. If applying for more than one specialty, only one card is necessary.

6. Reexaminees are required to submit the appropriate examination fee with the application.
Description of Specialties in Medical Genetics

To be an active candidate for certification by the ABMG, an individual must meet the criteria in the area of desired certification and provide the required supporting documentation. Certification is offered in clinical genetics, PhD medical genetics, clinical cytogenetics, clinical biochemical genetics, and clinical molecular genetics.

Clinical Geneticist

A clinical geneticist is an individual who holds a US- or Canadian-earned, or the equivalent of an earned, MD or DO degree, has had 2 years in an ACGME-accredited residency program in another medical specialty, 3 years in an ACGME-accredited residency in clinical genetics (or 4 years in an accredited clinical genetics residency program), a valid medical license, and demonstrates competence to provide comprehensive genetic diagnostic, management, therapeutic, and counseling services.

These requirements imply that the individual possesses

- broad knowledge in human and medical genetics, including an understanding of heterogeneity, variability, and natural history of genetic disorders;
- diagnostic and therapeutic skills in a wide range of genetic disorders;
- the ability to elicit and interpret individual and family histories;
- the ability to integrate clinical and genetic information and understand the uses, limitations, interpretation, and significance of specialized laboratory and clinical procedures;
- expertise in genetic and mathematical principles to perform risk assessment;
- skills in interviewing and counseling techniques required to (1) elicit from the patient or family the information necessary to reach an appropriate conclusion; (2) anticipate areas of difficulty and conflict; (3) help families and individuals recognize and cope with their emotional and psychological needs; (4) recognize situations requiring psychiatric referral; and (5) transmit pertinent information in a comprehensible way to the individual or family; and
- knowledge of available health care resources (community, regional, and national) required for appropriate referral or support.

PhD Medical Geneticist

A PhD medical geneticist is an individual with a US- or Canadian-earned, or the equivalent of an earned, PhD degree in genetics, human genetics, or a related field, who demonstrates competence to provide comprehensive genetic diagnostic, management, and counseling services, as well as expertise in complex risk assessment and in the integration of clinical and genetic information.

These requirements imply that the individual possesses

- broad knowledge in human and medical genetics, including an understanding of heterogeneity, variability, and natural history of genetic disorders;
- the ability to elicit and interpret individual and family histories;
- the ability to integrate clinical and genetic information and understand the uses, limitations, interpretation, and significance of specialized laboratory and clinical procedures;
- expertise in genetic and mathematical principles to perform complex risk assessments, paternity and forensic computations, interpret pedigree analysis (both segregation and linkage), and understand the principles of medical genetics;
- skills in interviewing and counseling techniques required to (1) elicit from the patient or family the information necessary to reach an appropriate conclusion, (2) anticipate areas of difficulty and conflict, (3) help families and individuals recognize and cope with their emotional and psychological needs, (4) recognize situations requiring psychiatric referral, and (5) transmit pertinent information in a comprehensible way to the individual or family; and
- knowledge of available health care resources (community, regional, and national) required for appropriate referral or support.

Clinical Biochemical Geneticist

A clinical biochemical geneticist is an individual with a US- or Canadian-earned, or the equivalent of an earned, doctoral degree (MD, DO, PhD) who can correctly perform and interpret biochemical analyses relevant to the diagnosis and management of human genetic diseases and who acts as a consultant regarding laboratory diagnosis of a broad range of biochemical genetic disorders.

These requirements imply that the individual possesses

- the ability to supervise and direct the operations of a clinical biochemical genetics diagnostic laboratory, including technical expertise and knowledge in quality control and quality assessment procedures;
- broad knowledge of (1) basic biochemistry and genetics, (2) the application of biochemical techniques to the diagnosis and management of genetic diseases, and (3) the etiology, pathogenesis, clinical manifestations, and management of human inherited biochemical disorders;
- an understanding of the heterogeneity, variability, and natural history of biochemical genetic disorders;
- diagnostic and interpretive skills in a wide range of biochemical genetic problems; and
- the ability to communicate biochemical laboratory results in the capacity of consultant to medical genetics professionals and other clinicians, and directly to patients in concert with other professional staff.

Clinical Cytogeneticist

A clinical cytogeneticist is an individual with a US- or Canadian-earned, or the equivalent of an earned, doctoral degree (MD, DO, PhD) who can correctly perform and interpret cytogenetic analyses relevant to the diagnosis and management of human genetic diseases, and who acts as a consultant regarding laboratory diagnosis for a broad range of cytogenetic disorders, including inherited and acquired conditions.

These requirements imply that the individual possesses

- the ability to supervise and direct the operations of a clinical cytogenetic diagnostic laboratory and has technical expertise and knowledge in quality control and quality assessment procedures;
- broad knowledge in human cytogenetics, including prenatal and postnatal cytogenetic diagnosis, infertility and pregnancy loss, cancer, and leukemia;
- an understanding of the heterogeneity, variability, and natural history of cytogenetic disorders;
- diagnostic and interpretive skills in a wide range of cytogenetic problems; and
- the ability to communicate cytogenetic laboratory results in the capacity of consultant to medical genetics professionals and other clinicians and directly to patients in concert with other professional staff.

Clinical Molecular Geneticist

A clinical molecular geneticist is an individual with a US- or Canadian-earned, or the equivalent of an earned, doctoral degree (MD, DO, PhD) who can correctly perform and interpret molecular analyses relevant to the diagnosis and management of human genetic diseases and who can act as a consultant regarding laboratory diagnosis of a broad range of molecular genetic disorders.
These requirements imply that the individual possesses

- the ability to supervise and direct the operations of a clinical molecular genetics diagnostic laboratory and has technical experience and knowledge in quality control and quality assessment procedures;
- the ability to perform a variety of molecular diagnostic assays;
- an understanding of the heterogeneity, variability, and natural history of molecular genetic disorders;
- a broad knowledge of (1) basic molecular biology and genetics; (2) the application of recombinant DNA techniques and linkage analysis to the diagnosis of genetic diseases; and (3) the etiology, pathogenesis, clinical manifestations, and management of human genetic disorders;
- diagnostic and interpretive skills in a wide range of clinical molecular genetics problems; and
- the ability to communicate molecular diagnostic laboratory results in the capacity of a consultant to medical genetics professionals and other clinicians and directly to patients in concert with other professional staff.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Neurological Surgery to ascertain whether the information below is current.)

Diplomates

A list of diplomates and the bylaws of the American Board of Neurological Surgery (ABNS) appear in the Official American Board of Medical Specialties Directory of Board Certified Medical Specialties, which can be obtained from Marquis Who's Who, Inc. (131 82d St, New Providence, NJ 07974). In addition, a list of new diplomates is published in the Journal of Neurosurgery shortly after each examination.

Information regarding training programs acceptable for certification can be found in the Graduate Medical Education Directory. This directory can be purchased from the American Medical Association (515 N State St, Chicago, IL 60610).

Qualifications

The ABNS evaluates all qualified applicants for their proficiency in neurosurgery.

The minimum educational requirements of the Board should not be interpreted as restricting programs to these standards. If necessary, neurosurgical program directors may retain residents in their programs beyond the required 5 years of residency training in order to ensure satisfactory competence in neurosurgery.

It is the responsibility of the candidate to seek information concerning current requirements for certification by the ABNS. Even though directors of approved neurosurgical residency programs are well informed regarding requirements for certification, placement in an approved program does not guarantee adequate training for certification. The candidate must make sure he/she receives such training.

Training Prior to Neurosurgery Residency

1. Graduation from a medical school that is acceptable to the Board.
2. Currently valid license to practice medicine in the state, province, or country of residence.

3. Twelve months devoted to acquiring adequate knowledge of fundamental clinical skills. This is known as postgraduate year one (PGY1), general surgery year one, or internship; it is recommended for completion prior to beginning neurological training but must be completed prior to beginning the third year of that training. This may be achieved by 1 year of training in an Accreditation Council for Graduate Medical Education (ACGME)-accredited general surgery program in the United States or, for applicants entering training programs prior to July 16, 1997, a Canadian equivalent. It may also be acquired during the course of training in an ACGME-accredited neurological residency program in the US or, for applicants entering training programs prior to July 16, 1997, a Canadian equivalent. Such training must include not less than 6 months in surgical disciplines other than neurosurgery. The remaining 6 months should include clinical skills considered appropriate by the program director but may not include more than 6 weeks of neurosurgery; this portion, however, may include up to 3 months of neurology.

Neurological Surgery Training Requirements

For residents beginning the neurosurgery portion of their training on or after July 1, 1979:

1. Completion of a minimum of 5 years of training in neurological sciences following PGY1. Neurosurgery training must occur in residency programs accredited by the Residency Review Committee for Neurosurgery with progressive responsibility. For applicants entering training prior to July 16, 1997, training programs must be accredited by the Canadian equivalent of the RRC.

2. The 60 months of training must include at least 36 months of core clinical neurosurgery culminating in 15 months served as a senior or chief resident with major or primary responsibility for patient management and administrative responsibilities, all as deemed appropriate and designated by the program director.

3. The training in clinical neurosurgery must be progressive and not obtained during repeated short intervals in a number of institutions. At least 24 months of training in clinical neurosurgery must be obtained in one institution.

4. At least 3 months must be devoted to training in clinical neurology as a full-time assigned resident in an accredited neurology training program. Six months is recommended. Up to 3 months of this training may be undertaken during PGY1.

5. The unobligated 21 months must be devoted to aspects of the basic or clinical neurological sciences which, at the discretion of the program director, may include neurology, neurosurgery, neuropathology, neuroradiology, research, and/or other disciplines related to the nervous system. Trainees are expected to acquire basic knowledge and skills in each of these disciplines.

6. Elective training by residents outside of their parent neurological residency program does not count toward fulfilling training requirements unless specifically arranged by the trainee's program directors and approved by the Board in advance. In such instances, the secretary of the Board must be notified in writing of the prospective rotation. Such training may in no way compromise the 36 months of core neurosurgery.

7. Residents are required to record and supply to the Board, in a fashion determined by the Board, their operative procedures.

8. The program director must notify the Board of the appointment of each new neurological resident and whether he/she is entering the program with intent to obtain certification. If so, the director must inform the trainee of the requirements necessary to obtain such certification.

9. Prior to acceptance for the certification process, the Board requires a statement from the candidate's program director to the effect that the candidate has met the minimum time requirements, has performed in training in a satisfactory manner, and, in the judgment of the program director, is well prepared to enter into the independent practice of neurosurgery.

Exceptional Modifying Circumstances

Upon recommendation of the program director, the Board may at its own discretion consider and give retroactive credit to a trainee for previous training if a resident

1. before entering an approved neurosurgical training program, has had substantially more than the prerequisite training in general surgery, medical neurology, or the basic neurological sciences.

Such credit must be approved by the Board

2. transfers from one accredited neurosurgical training program to another accredited program

a. with the consent of the directors of both programs, or

b. without the consent of one of the program directors, but with the approval of the Board.

In both cases, the director of the program from which the candidate transfers must indicate in writing to the new program director the credit for training, in respect to time and category, that he/she is prepared to certify that the trainee successfully completed. A copy of such statement must be submitted to the Board. The new program director may or may not honor such credit, depending upon appraisal of the resident's professional and educational progress in the new program; a statement of how much training credit will be accepted must also be submitted to the Board.

Training by preceptorship is not considered as fulfilling certification requirements. No credit is given for time spent in such training.

Credit for elective training in foreign or other nonapproved centers may be granted by the Board on an individual basis when this training is carried out as an integral part of the residency program with the advice and approval of the trainee's program director.

Requests for training away from a parent institution or for transfer from one program to another should be submitted in writing to the Board prospectively, not retroactively.

The above provisions in no way alter the basic minimum requirement of 60 months of residency training in neurosurgery, including a minimum of 3 months of training in clinical neurology and 36 months of clinical neurosurgery in accredited institutions, 12 months of which must be as senior resident and 24 months in one institution.

Primary Examination

Each applicant for the Board's oral examination must first pass for credit the Primary Examination, which is a written examination prepared by the Board with the assistance of a professional testing organization. The examination includes information on neuroanatomy, neurobiology, neurology, neuropathology, neuropharmacology, neurophysiology, neuroimaging, neurosurgery, fundamental clinical skills, critical care, and material from other relevant disciplines deemed suitable and important by the Board.

The Primary Examination is given in March each year at neurosurgery training programs throughout the United States and Canada. Residents in ACGME-accredited training programs may take it for self-assessment or credit toward certification at the discretion of their program directors. It is also open for all neurosurgeons who have successfully completed training at accredited programs; they may take it as often as desired for self-assessment or credit. An application must be filed to take the Primary Examination. The deadline for receipt of this application by the Board is the first of January. The form must be accompanied by the fee set by the Board.
This fee will be refunded only if requested from the Board prior to the deadline date for receipt of applications. Examinees are required to sign a pledge that states that they agree to be bound by the Board’s ruling regarding credentials, irrespective of scores on the examination. By signing the pledge, candidates also grant permission to the ABNS and its testing organization to release the results, either for credit or self-assessment, to the examinee’s program director. In addition, they pledge not to reproduce or copy the examination in any form in part or in whole.

Practice Requirements
After beginning practice, the candidate shall furnish to the Board the names of three physicians in the community (two neurosurgeons, including one ABNS diplomate) who are knowledgeable about the quality of the candidate’s practice. The Board will request reference letters from these physicians and other physicians in the candidate’s community. It is also the prerogative of the Board to send representatives to review the candidate’s practice.

In addition, the candidate shall submit the names and addresses of all hospitals where the candidate has or has had privileges. Letters will be requested to advise the Board of the candidate’s status regarding admitting and operating privileges in each hospital. At the time of credentialing, each candidate must be in possession of hospital staff privileges in all hospitals in which he/she cares for patients. Such privileges must be unrestricted in respect to the hospital’s requirements for a neurosurgeon.

The candidate must also forward to the Board a typewritten, chronological list of all inpatients for whom he/she has been the responsible physician or surgeon for at least 12 current, consecutive months. The total experience must be tabulated by the candidate in a format defined by the Board. The case material must be signed by the chief of staff, chief of service, president of the medical staff, or hospital administrator of each hospital where the candidate practices in verification of the essential accuracy of the data. These data must be approved by the Board prior to scheduling for oral examination. Candidates are responsible for retaining duplicate copies of these records.

A candidate must be scheduled for oral examination by the Board within 5 years of completing an accredited training program. Compliance with this regulation requires early submission of applications for oral examination and certification after training. If a candidate is not scheduled within the 5-year limit, he/she must once again pass the Primary Examination for credit. The candidate will then have 3 years to become certified. Candidates should keep in mind that at least 12 months are required between submission of a completed application and oral examination.

Certification of Those Training in Canadian Programs
Those who began neurological residency training in approved Canadian programs before July 16, 1997, and who satisfactorily complete such training and hold a fellowship in neurosurgery from the Royal College of Physicians and Surgeons of Canada are eligible for certification through the same route as candidates training in the United States, as outlined above.

Applications
Applications for oral examination and certification are automatically sent to residents in July after their last year of training. Additional applications and practice data information are available from the Board’s office. The entire application and practice data should be filled out and returned to the Board soon after beginning practice.

A pledge is part of the application for oral examination; by signing the application, the candidate agrees to abide by all the Bylaws and Rules and Regulations of the Board.

Upon receipt of an application, the Board takes such steps as deemed appropriate to verify the statements of facts made in the application. For instance, inquiries are made from references and others familiar with the candidate to obtain information relevant to the requirements for examination.

The Board makes the final decision regarding a candidate’s eligibility for oral examination and potential certification after considering all available information pertaining to the entire process of certification.

Application fees, once received, will not be refunded.

Oral Examination
The oral examination, a clinical problem-solving and patient-management examination, is given twice a year. Candidates are given case histories and, where appropriate, x-rays, scans, and other visual aids to augment the presentation and development of cases. The candidate must be able to explain verbally how he/she would proceed in evaluating and managing a case, and in planning and performing any proposed operation or operations, if indicated. One hour is devoted to neurological surgery-intracranial diseases; 1 hour to neurological surgery-spinal and peripheral nerve diseases; and 1 hour to a mixture. Neurosurgical neurology is included in all sections. Each of the 3 hours is conducted in an interview setting with two examiners.

A candidate who passes the oral examination is thereby certified and will be forwarded the Board’s certificate, once it has been suitably engrossed and signed by the officers of the Board.

Reexamination Rules
A candidate failing the oral examination once may request reexamination within 3 years. A minimum of 1 year must elapse before taking the examination for the second time. The examination fee must be paid.

A candidate who has failed the oral examination on two or more occasions must pass the Primary Examination for credit again before becoming eligible to retake the oral examination. Two letters of reference from neurosurgeons certifying the nature and quality of the candidate’s practice must be submitted to the Board, as well as hospital privilege letters and a year of current practice data. In addition, the candidate must pay the oral examination fee. Candidates must take the oral examination within 3 years of repassing the Primary Examination under these circumstances. Should the candidate not apply for or fail to appear for oral examination within the 3-year period, the candidate must repass the primary examination before being eligible for the oral examination once again.

Payment of Fees
Fees for filing an application and for oral examination will be determined by the Board. They reflect costs that the Board incurs through obligations associated with the certification process. The application fee will not be returned even when the application for examination is denied.

Revocation of Certification
Pursuant to the Rules and Regulations established by the ABNS, the Board has the authority to revoke any certificate issued by it for various reasons, including: the person to whom the certificate was issued is convicted of a felony, or his/her license to practice medicine has been lost or encumbered, or false information was given on the application for oral examination. Should revocation be disputed, there is a hearing mechanism for such an action.
American Board of Nuclear Medicine

900 Veteran Ave
Los Angeles, CA 90024-1786
310 825-6787

Alan H Maurer, MD, Philadelphia, Pennsylvania
Martin P Sandler, MB ChB, Nashville, Tennessee
Edward B Silberstein, MD, Cincinnati, Ohio
Andrew T Taylor, MD, Atlanta, Georgia
S Ted Treves, MD, Boston, Massachusetts

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Nuclear Medicine [ABNM] to ascertain whether the information below is current.)

General Requirements for Each Candidate

Assurance that the applicant represents himself/herself to be a specialist in nuclear medicine.

General Professional Education

Graduation from a medical school approved by the Liaison Committee on Medical Education or from a school of osteopathy. If the applicant is a graduate of a medical school outside the United States or Canada, he/she must hold a currently valid ECFMG certificate issued by the Educational Commission for Foreign Medical Graduates, 3624 Market St, Philadelphia, PA 19104-2685; 215 386-5900.

Preparatory Postdoctoral Training

Training required for admission to the certifying examination in nuclear medicine shall comprise 1 or more years of preparatory postdoctoral training and 2 or more years of residency training in nuclear medicine.

Preparatory postdoctoral training shall consist of 1 or more years of residency training in programs satisfactory to the ABNM. Such programs shall provide broad experience in clinical medicine in which the primary emphasis is on the patient and his/her clinical problems. Preparatory training may be in any specialty except pathology in a residency program in the United States approved by the Accreditation Council for Graduate Medical Education (ACGME) or in programs in Canada approved by the Royal College of Physicians and Surgeons of Canada (RCPSC) or the Professional Corporation of Physicians of Quebec (PCPQ). Preparatory postdoctoral training must precede the training in nuclear medicine.

Each nuclear medicine residency training program director must ensure that for each resident entering his or her program the preparatory postdoctoral training has been in a United States program approved by the ACGME or in a Canadian program approved by the RCPSC or the PCPQ.

Special Postdoctoral Training in Nuclear Medicine

1. After completion of the preparatory postdoctoral training programs, there shall be satisfactory completion of a 2-year formal residency training program in nuclear medicine in a nuclear medicine residency training program recognized and approved by the Residency Review Committee (RRC) for Nuclear Medicine of the ACGME or in a Canadian program approved by the RCPSC or the PCPQ as competent to provide a satisfactory training in nuclear medicine.

2. The 2-year formal residency training program in nuclear medicine must include the following:

a. Training in clinical nuclear medicine that will include, but not be limited to, performance and interpretation of in vivo imaging studies of body organs and systems using radiopharmaceuticals; training and experience in the application of nonimaging procedures, including radioimmunoassay and receptor assay technology; radiopharmaceutical absorption, dilution, excretion, and organ function studies; and therapeutic uses of unsealed radio-pharmaceuticals, including patient selection, dosimetry, and dose administration in the treatment of cancer, hemolologic and metabolic disorders. In vivo studies will include use of external detectors and scintillation cameras, including single-photon tomography and positron emission tomography; cardiovascular nuclear medicine procedures; including exercise and pharmacologic stress testing, as well as management of cardiac emergencies related to such testing; and correlation of nuclear medicine procedures with other imaging modalities such as computed tomography, ultrasonography, nuclear magnetic resonance imaging, and angiography.

b. Training in basic and allied sciences that will include medical nuclear physics; instrumentation; radiopharmaceutical chemistry, including reactor, cyclotron, and generator production of radionuclides; computer sciences; statistics; radiation biology; and radiation safety, including safe management and disposal of radioactive substances. Training in allied sciences may include pathology, physiology, and other basic sciences associated with nuclear medicine. The time spent in training in allied sciences may be spaced throughout the period of training in nuclear medicine and in a manner that does not exceed 6 months of training.

c. For applicants who have completed residency training programs in clinical disciplines closely related to nuclear medicine in residency programs approved by the ACGME, the RCPSC, or the PCPQ, credit may be given for some of that training. Applicants desiring credit toward the nuclear medicine requirement should write to the Board requesting such credit.

d. Applicants who have completed an accredited program in diagnostic radiology, which includes 6 months of nuclear medicine training, 3 months of correlative imaging, and 3 months of basic science, may apply to take the examination upon completion of a further 12 months of nuclear medicine training in an accredited nuclear medicine program. All training must be accredited by the ACGME, RCPSC, or PCPQ.

Applicants who have completed an accredited program in internal medicine/cardiology, which includes 6 or more months of nuclear cardiology, 6 or more months of invasive cardiology, and 12 months of noninvasive cardiology (with an emphasis on nuclear cardiology), may apply to take the examination upon completion of a further 12 months of nuclear medicine training (with an emphasis on noncardiac aspects of nuclear medicine) in an accredited nuclear medicine program. All training must be in programs accredited by the ACGME, RCPSC, or PCPQ.
Credit for training taken in diagnostic radiology and cardiology must be reviewed and approved by the Board. Applicants requesting credit for such training must provide details of the training to the Board.

3. Evaluation of clinical training in nuclear medicine: The Board considers demonstration of clinical competence in the management of the nuclear medicine patient of paramount importance in its qualification of the applicant to take the certifying examination. The Board designates the directors of nuclear medicine residency programs and their supporting evaluation committees as the authorities who most appropriately can provide to the Board the necessary documentation of competence in clinical nuclear medicine and also requires that all program directors certify to the Board that each applicant from their programs is competent in clinical nuclear medicine. These reports will be reviewed by the Board before accepting an applicant to take the certifying examination.

If a residency program director's evaluation indicates that an applicant's competence in clinical nuclear medicine is unsatisfactory, the applicant will not be admitted to the examination unless the Board finds that the applicant's overall performance meets its standards. An applicant not admitted to an examination on the basis of these findings may appeal in writing to the Board for a special evaluation of competence in clinical nuclear medicine within 45 days of receipt of notification. The appeal should state that a request is made for review of the decision not to admit to the examination and why the applicant considers the decision to be in error. Applicants whose clinical competence is judged satisfactory in this evaluation will be admitted to the next examination for which they apply. Applicants judged not satisfactory in this evaluation are advised to spend an additional year training before applying again for special evaluation of competence.

Applicants submitting false credentials are subject to disqualification from examination or revocation of certification.

Patient Care Responsibility
Applicants for certification in nuclear medicine will have 1 or more years of training in which the primary emphasis is on the patient and his/her clinical problems.

Canadian Training
Physicians who satisfactorily complete training in Canadian nuclear medicine programs approved by the RCPSO or the PCFQ are eligible for admission to the ABNM certifying examinations.

Completion of Training
All preliminary and nuclear medicine residency training must be completed prior to September 1 of the year the candidate takes the certifying examination.

Licensure Requirement
A valid, unrestricted license to practice medicine in a state, territory, or province of the United States or Canada will be required of all applicants for the certifying or recertifying examinations. If a candidate is licensed in more than one such jurisdiction, each license must be valid and unrestricted. A photocopy of every license held by the candidate must be submitted to the Board.

Approved Residency Training Programs
Residency training programs in nuclear medicine accredited by the ACGME may be found in the Graduate Medical Education Directory, published annually by the American Medical Association and the ACGME, or may be obtained by contacting the Secretary.

Residency Review Committee for Nuclear Medicine, ACGME, 515 N State St/Ste 2000, Chicago, IL 60610.

Admissibility to Examination
An applicant is admissible to the examination only when all of the preliminary and graduate educational requirements of the Board currently in force at the time of receipt of the formal application have been satisfactorily fulfilled and deemed acceptable.

Examination
An objective type examination is administered in a morning and an afternoon session. The examination evaluates the candidate's knowledge and competence in the management of patients in the area of clinical nuclear medicine, including, but not limited to, principles of radioisotope/radioisotope, in vitro and in vivo measurements, nuclear imaging, therapy with sealed radionuclides, the medical effects of exposure to ionizing radiation, and the medical management and disposal of radioactive substances. Also included is an evaluation of the candidate's knowledge in the related sciences of medical nuclear physics, radiation biology, radiation protection, instrumentation, radiopharmaceutical chemistry, computer sciences, and statistics; it may also include pathology, physiology, and other basic sciences associated with nuclear medicine.

Applications
Applicants who wish to be examined by the Board must complete, sign, and file with the Board office an application on the official form together with the supporting data required by the application. It is the responsibility of the applicant to make certain that the required evaluation forms have been completed by his/her program director and sent to and received by the ABNM.

As soon as determination is made concerning admission or nonadmission to the examination, the applicant will be notified by mail, and, if admitted, assignment of the candidate number and notification of the examination site will be given. Applications must be complete with all required documentation by August 1.

Before the final action on applications, officers, members, and employees of the Board are not authorized to estimate the eligibility of applicants. Applicants are requested not to discuss or write for opinions regarding the status of their applications. The Board decides on eligibility to take the examination only by approving or disapproving individual applications and accordingly has no "Board-eligible" category.

Inquiries concerning the applicability of previous training and experience should be sent with complete documentation of all education and training to the Board office. A copy of the Board's response to these inquiries should be forwarded with any subsequent examination application.

Release of Information
Candidates will receive the results of their examinations (pass/fail letter) approximately 2 months after the examination. A list of diplomates of the ABNM will be found in the Official American Board of Medical Specialties Directory of Board Certified Medical Specialists, published by the American Board of Medical Specialties and Marquis Who's Who.

Upon request, and with the approval of the Board chairman, the Board releases information on diplomates to federal and state licensing bodies and to educational and professional organizations for specific, limited, and appropriate professional use. An authorization for release of this information is a part of the examination application form.
Policy on Reexamination
Candidates who fail the examination are eligible for reexamination. An examination fee must accompany each completed application for reexamination. If a candidate is disqualified from the examination by reason of dishonesty in the application or in taking the examination and his/her examination is invalided by the Board, reexamination shall be at the Board's discretion.

Recertification
The ABNM offers its diplomates voluntary recertification based upon fulfillment of certain requirements, including passing an objective cognitive examination. The ABNM will not rescind initial certification granted prior to 1992. Beginning in 1992 certification will be valid for a period of 10 years and may be revalidated by recertification.

Changes in Policies and Procedures
The Board reserves the right to make changes in its fees, policies, and procedures at any time and cannot assume responsibility for giving advance notice thereof. The provisions of this publication are not to be construed as a contract between any candidate and the ABNM.

Fees
The examination fee must accompany the application. If the applicant is rejected by the Board or withdraws prior to August 1, the application processing fee will be retained by the Board. If the applicant withdraws after August 1, the entire examination fee will be retained by the Board.

Obstetrics and Gynecology to ascertain whether the information below is current.

Types of Board Status

Residency Graduate
An individual is registered with the Board when, upon application, the Board rules that he/she has fulfilled the requirements to take the written examination (see “Requirements” for the written examination).

Active Candidate
1. An individual achieves active candidate status by passing the written examination.
2. To maintain active candidate status, the candidate must fulfill all requirements for admission to the oral examination and must not have exceeded the limitations to admissibility for the oral examination (see “Limitations”).
3. Active candidate status that has expired may be regained by repeating and passing the Board’s written examination.

Diplomate
1. An individual becomes a diplomate of the Board when the written and the oral examinations have been satisfactorily completed and the Board’s certifying diploma has been awarded.
2. Certificates have limited duration of validity. Certificates will bear a limiting date of 10 years, after which they are no longer valid. Each diplomate must be evaluated again to receive a new certificate.

Expired Certificate
1. An individual has failed to complete successfully a certificate renewal examination prior to the expiration date printed on their time-limited certifying diploma.
2. Individuals in this category are not diplomates of the American Board of Obstetrics and Gynecology.

Certification Process
Certification as a specialist in obstetrics and gynecology is the end of a process lasting many years. The required minimum duration of graduate education is 4 years.

Written Examination
During the final year of graduate training, it is necessary to initiate certain measures. Candidates due to complete their graduate training program prior to September 30 should, between September 1 and November 30 of the final year of residency, request and complete the application for the written examination. If ruled admissible to take the examination, the candidate will do so in June of the final year of residency.

For candidates who will complete their residency training after September 30, application for the written examination must be delayed until the following year. If ruled admissible to take the examination, the candidate will do so in June of the following year.

Oral Examination
To be ruled admissible to take the oral examination, candidates are required to provide a list of patients under their care for a 12-month period beginning on July 1 of the second year of practice after the written examination is passed. After November 1 of this second year of practice and before the following February 28, candidates should request and complete the application (November 1-February 28).

The candidate’s list of patients must be mailed to the Board office between July 1 and August 1, following the completion of the 12-month period of patient care. The case lists should not be mailed until the candidate is notified of approval to submit their case list. If ruled admissible, the candidate thus takes the subspecialty oral examination in November.

Important Dates in the Certification Process

A. Final Year of Residency
July 1—Completion
September 1 to November 30—Apply for written examination
June—Take written examination

B. Practice
1. First year of practice
   No Board activities necessary
2. Second year of practice
   July 1 to June 30—Patient list
   November 1 to February 28—Apply for oral examination
3. Third year of practice
   August 15—Deadline for submission of patient list
   November—Take oral examination

C. Fellowship in Subspecialty
1. First year (fellowship)
   No Board activities
2. Second year (fellowship)
   No basic Board activities
3. Third year (fellowship)
   No general Board activities
   September 1 to November 30—Apply for subspecialty written examination
4. Third year—First year of practice
   January 1 to February 28—Apply for the oral examination
   January 1 to December 31—Patient list
5. Fourth year—Second year of practice
   January 1—Deadline for submission of thesis
   February 1—Deadline for submission of patient list
   March or April—Take oral examination

Responsibility of a Candidate
It is the responsibility of the candidate to seek information concerning the current requirements for certification as an obstetrician and gynecologist. The Board does not assume responsibility for notifying a candidate of changing requirements or the impending loss of a candidate’s admissibility to an examination.

Duration of Certificate Validity
Certificates have a limited valid duration of 10 years, after which they are no longer valid. Each diplomate must undergo a Board-approved method of certificate renewal in order to receive a new certificate.

Maintenance of Certification
Maintenance of certification is available through a certificate renewal process. A voluntary recertification evaluation process is also available for diplomates certified by this Board. Participation for some may be voluntary, but beginning in 1986, 10-year time-limited certificates were issued by the Board. Thus, for maintenance of certification, diplomates certified in or after 1986 must renew their certification at least every 10 years.

Certificate renewal or voluntary recertification may be achieved in one of three different ways. These methods are:
1. a cognitive 3½-hour written examination; or
2. a 1½-hour oral examination; or
3. Annual Board Certification (ABC), a continuous certificate renewal, achieved by reviews of assigned scientific and/or clinical publications.

More specific information can be obtained about these methods of certificate renewal/voluntary recertification by writing Ms Marsha Markham, Maintenance of Certification Coordinator, at the Board address.

**Fees**

The application fee for the written or the oral examination is due with the application. Additionally, an examination fee is due prior to either the written or oral examination. The fees for the Annual Board Certification (ABC), a form of continuous certification, will be $180 per year for general obstetrics and gynecology and $230 per year for subspecialists (includes general and subspecialty items).

An application form and application fee are required for each cycle of the written or the oral examination and are not refundable.

**Written Examination**

The written examination is a 3-hour 20-minute examination consisting of questions of the objective (multiple-choice) type. Questions will be chosen from each of the following areas of knowledge:

1. Basic science
2. Endocrinology, fertility
3. Primary/preventive medicine
4. Clinical gynecology
5. Clinical obstetrics
6. Medical, surgical, and psychiatric diseases in the nonpregnant woman and medical, surgical, and psychiatric diseases in pregnancy and complications of pregnancy
7. Oncology and pathology

The candidate will be expected to demonstrate skills necessary to apply basic knowledge to the management of clinical problems. These skills include:

1. Obtaining needed information
2. Interpretation and use of data obtained
3. Selecting, instituting, and implementing care
4. Management of complications
5. Following and continuing care

The areas of information and skills examined are further outlined in *Educational Objectives for Resident Education in Obstetrics and Gynecology*, published by the Council on Resident Education in Obstetrics and Gynecology.

**Requirements**

1. Degree of doctor of medicine, or an equivalent degree, and unrestricted license (an educational or institutional license will suffice) to practice medicine in all states or territories of the United States or a province of Canada in which the candidate holds a license.

   The requirement of unrestricted license in all states in which the candidate holds a medical license must have been met prior to the time that the application is submitted. An educational or institutional license is satisfactory.

   Candidates with a DO degree must have graduated from a school of osteopathy accredited by the American Osteopathic Association.

2. The candidate will be required to have completed or be near completion (see “Application for Examination in 1999”) of no less than 4 years in clinical programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) or no less than 5 years in clinical obstetrical or gynecological programs accredited by the Council of the Royal College of Physicians and Surgeons of Canada. This must include at least 36 months of obstetrics and gynecology, including the usual time as chief (senior) resident in the program. Completion of a year as an intern (GYI), plus a 3-year residency program or a 4-year residency program, will fulfill this requirement. A year spent in an ACGME-accredited transitional year program (GYI) sponsored or cosponsored by an ACGME-accredited obstetrics and gynecology program will meet the requirement for a GYI year. Presently, there are at least 36 such transitional year programs cosponsored by obstetrics and gynecology departments. If the program consists of more than 4 years, the entire program must be completed.

   Time spent in an osteopathic hospital or in any program not accredited by the ACGME will not fulfill this requirement.

3. A statement signed by the program director certifying that the candidate has

   A. followed satisfactorily the course of instruction designed for this program;
   B. taken leaves of absence and vacation not exceeding 8 weeks in any of the first 3 years, 6 weeks in the final year, or 20 weeks total for the overall 4-year period;
   C. completed and submitted to the program director a satisfactory resident experience log;
   D. achieved the appropriate knowledge, ability, and judgment in order to provide competent clinical care in obstetrics and gynecology, as documented by ongoing evaluation during the entire resident program; and
   E. demonstrated the necessary technical skills to competently perform

   1. major abdominal and vaginal surgical procedures on the female pelvis and related structures;
   2. spontaneous and operative obstetric deliveries;
   3. surgical exploration of the abdomen;
   4. endoscopic procedures of proven value in the pelvis;
   5. diagnostic evaluation, including electronic monitoring, ultrasound, colposcopy, and amniocentesis;
   6. diagnosis and treatment of complications of the above; and
   7. demonstrated good moral and ethical character.

**Application for Examination in 2000**

A candidate who has completed an accredited residency program and a candidate scheduled to complete an accredited residency program on or before September 30, 2000, should have applied on or before November 15, 1999, to write the examination on June 26, 2000.

The form on which to apply for the examination on June 26, 2000, should have been obtained by writing to the Board office on September 1, 1999. Each applicant must meet the requirements effective in the year of requested admission to the examination. As a part of the application form, endorsement and verification of the resident’s experience, competence, satisfactory performance, and confirmation of the scheduled date for completion of the candidate’s residency are required to be affirmed by the current director of the obstetric and gynecologic residency program.

The Board will make the final decision concerning the applicant’s admission to the examination after considering all circumstances affecting the application. A candidate’s application to write the examination on June 26, 2000, completed in all details, together with payment of the application fee, must have been received in the Board office before November 30, 1999. Application fees must accompany the application. Application fees sent prior to the mailing of an application are subject to late charges. A copy of the candidate’s current license registration also is required.

Late fees will be applied to applicants who have not submitted all required materials by November 30, 1999.
The candidate ruled admissible to the examination will be notified by April 14:
1. that the examination is scheduled to be written in June;
2. that the examination fee is payable and the date the fee must be paid; and
3. that two 2x2-inch photographs should accompany the examination fee.

If a candidate has not been contacted by the board by May 1, 2000, concerning admissibility for the June 28, 2000, written examination, it is the candidate’s responsibility to contact the Board office in writing or by fax no later than May 10, 2000, in order to ascertain why they have not received notification. It also is the candidate’s responsibility to inform the Board of a change of address in writing in order to receive notifications in a timely manner.

If a candidate is found to be involved in litigation or investigation regarding ethical or moral issues, the application will be reviewed. Typically, the Credentials Committee will defer a decision for entry to the examination to gain further information.

Falsification of data (including case lists) or evidence of other egregious ethical, moral, or professional misbehavior may result in a deferral of a candidate’s application for at least 3 years. The candidate must meet all eligibility requirements in effect at the end of the deferred period.

When the Credentials Committee rules an applicant not admissible to the written examination, a new application and fee must be submitted for the next examination. The candidate must fulfill the requirements in effect the year of the new application.

Admission to the Written Examination
The candidate ruled admissible to the examination will be sent an “Authorization for Admission” form, which must be presented to the proctor at the time and place of examination. When a candidate is scheduled to complete residency, after submission of the application (but before October of that year), verification that the candidate is completing residency in a satisfactory manner must be reaffirmed by the signature of the director of the residency program on the Authorization for Admission form, dated within the month the candidate is scheduled to write the examination.

Results of the Examination
The results of the written examination will be reported confidentially to each candidate within 9 weeks from the date of the examination.

A passing grade on the written examination does not ensure a candidate’s admissibility to the oral examination for certification, nor does it allow the use of the term “Board eligible.” The term “Board eligible” is not approved by the Board for any individual seeking Board certification or for those who have only completed residency training. An individual who has completed residency training, but not yet passed the written examination, should be referred to as a “residency graduate.” An individual who has passed the written examination should be referred to as an “active candidate.”

Requests for Reexamination
A candidate previously scheduled to write the examination who does not do so, as well as the candidate who writes but does not pass the examination, must write the Board office after September 1 to request reapplication materials for the next examination. It is necessary for each applicant to meet the requirements in effect the year of the requested admission to the examination. The reapplicant must have submitted completed reapplication materials, a copy of current license registration, and the reapplication fee prior to the November 30 deadline. There is no limit to the number of times a candidate may take a written examination.

The application and examination fees (see “Fees”) must be paid each year a candidate is to be scheduled to write an examination.

Written Examination Fees
Fees have been computed to cover the costs of examination and administrative expenses. They will not, therefore, be refunded or credited. All fees must be paid in United States currency. The candidate’s canceled check is to be considered the receipt.

The application fee must be enclosed with each application or reapplication to write the examination. The candidate will be notified by April 14 of the approval of the application or reapplication, at which time the examination fee will be due. If payment of the examination fee has not been received in the Board office on or before May 12, the candidate will not be scheduled to write the examination in June.

No application fees will be credited against a future application or refunded.

Examination fees may be refunded, provided candidates inform the Board office in writing of their inability to write the examination prior to May 12.

Dates, Deadlines, Fees, and Late Fees for Written Examination

September 1—November 15, 1999
Candidate must request in writing an application form
November 30, 1999
Application and examination fee of $550 must be received in the Board office
December 1, 1999—January 31, 2000
Application, examination fee ($550), and late fee ($250) must be received in the Board office
February 1, 2000—March 31, 2000
Application, examination fee ($550), and late fee ($600) must be received in the Board office
March 31, 2000
No applications accepted after this date
April 14, 2000—May 12, 2000
Candidates notified to submit two 2x2 photographs and examination fee ($500)
May 12, 2000
No examination fees accepted after this date
June 28, 2000
Written examination at various sites

Oral Examination
All correspondence, applications, and information directed to the Board must be in English.

All fees must be paid in United States currency.

The oral examination is designed to evaluate the candidate’s knowledge and ability to solve clinical problems in obstetrics and gynecology. It is emphasized that candidates will be examined in all areas of obstetrics and gynecology, to evaluate actual behavior in independent practice. More than half the examination will consist of questions concerning patient management problems. The candidate’s list of patients will be used by the examiners for this purpose. In addition, other clinical problems will be included in the examination. The remainder of the examination will include basic knowledge in obstetrics and gynecology and interpretation of sonograms and karyotypes of various conditions.

Slide projectors will be used. The knowledge required for passing the oral examination is the same as those categories listed in regard to the written examination.

Recording devices will not be permitted during the oral examination.

Candidates will be expected to demonstrate that they have acquired the capability to perform independently, major gynecologic
operations and spontaneous and operative obstetric deliveries, to manage the complications thereof, and to perform the essential diagnostic procedures required of a consultant in obstetrics and gynecology.

Candidates will be expected to demonstrate a level of competence that allows them to serve as consultants to physicians who are non-obstetrician-gynecologists in their community.

The report of the examining team will be reviewed by the Board of Directors, and each candidate is passed or failed by vote of the Board.

The examination will be completed within one-half day. At the completion of the oral examination, if a candidate believes the examination has not been conducted in a fair and unprejudiced manner, a second examination may be requested. The request must be made within 1 hour. To do so, a candidate may go to a hotel phone and request to be connected to the offices of the Board within the hotel. If the request is granted
a. a second examination will be provided at the next regularly scheduled annual oral examination at no additional charge;
b. the repeat examination will be conducted by an entirely different team of examiners, no one of whom shall have previously participated in an examination of the candidate or know that this examination is being conducted as an appeal examination;
c. neither the questions nor the candidate's answers on the first examination will be known to or taken into account by the second group of examiners; and
d. the decision of the examiners conducting the second examination will determine the results of the candidate's oral examination.

Requirements

1. Passing grade on the written examination prior to making application for the oral examination.
2. Good moral and ethical character.
3. Unrestricted license to practice medicine in any state or territory (United States or a province of Canada) in which the candidate has held a medical license since at least February 28, 1999. An educational or institutional license does not meet this requirement.
4. A written explanation must be provided with the application of the circumstances involved if a candidate has ever had his/her medical license restricted or revoked in any territory, province, or state in the United States or Canada. A written explanation also must be provided with the application of the circumstances involved if a candidate has ever had his/her hospital practice terminated or restricted because of personal physical or mental impairments, excessive operative complications, or disciplinary reasons.
5. Actively engaged in unsupervised practice, defined as:
   a. Independent, continuous, unsupervised patient care in obstetrics and gynecology
      1. for at least the time from February 28, 1999, through June 30, 2000 (time spent in a critical care fellowship does not meet this requirement); or
      2. for at least the time from July 1, 1999, through June 30, 2000, for candidates who have successfully completed a Board-approved fellowship (this includes critical care fellowship only if taken in continuity with a Board-approved subspecialty fellowship).
   b. Unrestricted hospital privileges to practice as an obstetrician-gynecologist since at least February 28, 1999. Such privileges must be granted in each of the hospitals in which the candidate has been responsible for patient care during this time. If the candidate is under investigation or on probation, the examination will be deferred until the investigation is completed, the probation is lifted, and full and unrestricted privileges are granted.
6. Submission of typewritten lists (three copies) and summary sheets (seven copies), on or before August 1 preceding an examination, of all patients admitted from care in all hospitals during the 12 months ending June 30 prior to the scheduled examination, and a list of 40 patients from office practice, unless a 24-month patient list is submitted.

The candidate is personally responsible for the proper preparation, accuracy, and completeness of the case lists, which will reflect the unsupervised practice (private or nonprivate) activity following residency and fellowship.

7. On the day of the examination, the candidate will be expected to sign the following statement: "There have been no restrictions in my hospital privileges or restrictions placed on any license I have to practice medicine in any state or country since the date of my application." Candidates who are unable to sign this statement will not be admitted to the examination until and unless they present evidence that full and unrestricted privileges have been restored.

8. Practice that consists of ambulatory care exclusively will not be considered adequate to fulfill these requirements.

9. Candidates practicing in a country other than the United States or Canada must submit, with the application, a letter(s) from a senior responsible officer in the hospital(s) where the candidate practices, verifying the candidate's responsibility for independent, unsupervised care of obstetric and gynecologic patients.

Limitations

Duration of active candidate status is limited. Candidates must pass the oral examination within 6 years of passing the written examination and may take the oral examination only three times. Time spent in Board-approved fellowship training is excluded from this 6-year limitation. If a candidate fails the oral examination three times, or fails to pass the oral examination within 6 years, the candidate becomes ineligible to repeat the examination at that time. The candidate must repeat and pass the written examination to become admissible to the oral examination again. There is no limit to the number of times the written examination and the 6-year cycle to pass the oral examination can be repeated.

Determination of Qualifications

The Board will require, by confidential inquiry, documented evidence concerning a candidate's professional reputation, moral and ethical character, and in-hospital practice privileges from administrative officers of organizations and institutions to whom the candidate and his/her conduct of practice is known.

Time spent as a resident in excess of that necessary to fulfill the requirements to take the written examination is not acceptable. Time spent in a teaching or research appointment that does not involve appointment to the staff of an approved hospital with unrestricted privileges to practice as an obstetrician and gynecologist will not be considered evidence of responsibility for patient care, that is, acceptable to fulfill the requirement of "independent practice." Each candidate will be required to furnish the Board with certain prescribed information concerning performance in practice (maternal mortality rate, perinatal mortality rate, cesarean delivery rate, etc.).

If a candidate is involved in litigation or investigation regarding ethical or moral issues, the individual will not be scheduled for examination and the application will be reexamined. The Credentials Committee usually will defer such a decision for 1 year to gain further information.

Falsification of data (including case lists) or evidence of other egregious ethical, moral, or professional misbehavior may result in
deferral of a candidate’s application for at least 3 years. The candidate must meet all requirements in effect at the end of the deferred period. The completeness and accuracy of submitted case lists are subject to audit by the American Board of Obstetrics and Gynecology. Permission to conduct on-site audits will be required of each candidate prior to final approval to take the oral examination.

Patient lists (a) not providing the information required; (b) not prepared in accordance with the format requested; (c) not having sufficient numbers of patients; or (d) not including sufficient breadth and depth of clinical problems may disqualify the candidate for admission to the oral examination.

Application for Examination in 2000
Application to take the oral examination on November and December 2000, must be obtained by writing to the Board office after November 1, 1999. The application, complete in all details, with payment of the application fee, a copy of a current medical license, and two 2x2-inch passport-sized photographs, with the candidate’s signature across the front, must be received in the Board office on or before February 29, 2000.

The application fee must accompany the oral examination application. Application fees sent prior to the mailing of an application are subject to a late charge. The deadline for receipt of applications in the board office is February 19, 2000.

Late fees will apply for late or incomplete applications.

Admission to the Oral Examination
The Board will make the final decision concerning the applicant’s admission to the oral examination after considering all circumstances affecting the individual situation.

A candidate ruled admissible to the oral examination in November or December 2000, will be so notified in July 2000. On or before August 1, 2000, the candidate must submit

(a) triplicate, typewritten, and verified lists of all patients dismissed from the candidate’s care in all hospitals during the 12 months preceding June 30, 2000, and a list of 40 patients from the candidate’s office practice. Seven copies of the summary sheet also must be submitted. The candidate’s lists of patients will be used as a basis for questions during the oral examination and will not be returned to the candidate.

(b) payment of the examination fee and late fee, if applicable, by personal check or money order in US funds.

(If, but only if, the list of all patients dismissed from the candidate’s care during this 12-month period does not achieve the minimum 50 hospitalized and/or short-stay patients as defined in this document, an additional list of all patients dismissed from the candidate’s care during the year immediately prior to the 12-month period preceding June 30, 2000, may also be submitted. This will require the preparation and submission of two separate 1-year patient case lists in triplicate, each with a separate summary sheet, plus seven copies of a combined summary sheet that includes the cases from both yearly case lists. The minimum requirement of 50 patients as defined elsewhere in this document will still apply.)

Patient Lists for the Oral Examination
Each candidate for the oral examination must prepare the following patient lists for review by the examiners at the time of examination.

The candidate’s list of patients will be freely used as a basis for questions that will be patient-management oriented. Questions will be developed that test the ability of the candidate to

1. develop a diagnosis, including the necessary clinical, laboratory, and diagnostic procedures;
2. select and apply proper treatment under elective and emergency conditions;
3. prevent, recognize, and manage complications; and
4. plan and direct follow-up and continuing care.

Carelessly prepared or incomplete case lists may contribute to failure to pass the oral examination.

The candidate should bring a copy of his/her patient list to the oral examination for personal reference. Information should not be included on this duplicate list that did not appear on the case lists sent to the Board office.

All candidates must have an office and a hospital practice. Thus, case lists must consist of office practice plus hospitalized and day (short-stay) surgery patients in obstetrics and gynecology, or obstetrics alone, or gynecology alone. If a candidate practices both obstetrics and gynecology, case lists must be submitted in (1) office practice, (2) obstetrics, and (3) gynecology. Case lists limited to office practice and obstetrics or gynecology can be submitted only by those individuals who limit their practice to either gynecology or obstetrics. It is to the candidate’s advantage to submit case lists containing obstetrical, gynecological, and office practice patients. If a candidate submits a case list limited to office practice and obstetrics or gynecology, the examiners will necessarily have to present hypothetical cases to the candidate in the area without cases. The candidate will be examined in all three areas. The case lists must have sufficient numbers and sufficient breadth and depth of clinical experience. All day surgery and hospitalized patients must be reported. The case list must include 40 office practice patients and a minimum of 50 hospitalized and/or ambulatory, gynecological, or obstetrical patients with significant problems. If, but only if, a minimum of 50 such patients cannot be obtained during the 12-month period from July 1, 1998, through June 30, 2000, the candidate may submit a complete 24-month case list dating from July 1, 1998, through June 30, 2000. This will require the preparation and submission of two separate 1-year patient case lists, in triplicate, each with a separate summary sheet, plus seven copies of a combined summary sheet that includes the cases from both yearly case lists. The minimum requirement of 50 patients will still apply. The clinical problems will vary according to the nature of the candidates’ practices. The problems must be of sufficient variety and severity, however, to permit the evaluation of a candidate’s ability to function as a consultant.

If, but only if, a minimum of 50 such patients cannot be obtained during the 24-month period from July 1, 1998, through June 30, 2000, a candidate may select patients from their senior residency experience case log (see above) to be added to the case list from July 1, 1998, through June 30, 2000. Cases should be chosen from the senior residency experience case log that will meet the requirement of 50 cases of sufficient breadth and depth of clinical experience in obstetrics and/or gynecology.

For candidates who have successfully completed a Board-approved fellowship and who are active candidates for certification in one of these subspecialties, case lists may be submitted in a single subspecialty within obstetrics and gynecology. If a qualified candidate chooses to submit a case list limited (i.e., a "limited case list") to a single subspecialty, the limited case list must include a minimum of 50 cases of hospitalized or ambulatory surgical patients in that subspecialty, but all day surgery and hospitalized patients must be reported. Moreover, the 50 cases must represent the breadth and depth of that subspecialty. For a limited case list, a mixture of subspecialty and normal gynecological or obstetrical cases will not meet this 50-case requirement. A list of office patients must be submitted (see below). The candidate will be examined in all three areas. For example, if the candidate has only a gynecologic oncology case list, the candidate will be presented hypothetical cases in obstetrics, office practice, and general gynecology, as well as selected cases from their own case list.

Graduate Medical Education Directory 2000-2001
The patients listed must be only those for whom the candidate has had personal responsibility for professional management and care. Recording such professional responsibility implies that the candidate has personally controlled the medical and/or surgical management of each patient listed. In the case of a partnership or group practice, the patients listed should be only those managed by the candidate.

The case list must be received in the Board office on or before August 1 preceding the November examinations, but only after receipt of approval.

**Procedure**

A patient list should be accurately typed across unbound sheets of white paper 8 1/2 by 11 inches. Type size must be at least 12 point. The headings must conform in all details and provide the information indicated by the format of the forms enclosed with the oral application. Three copies of the complete list must be submitted, as well as seven copies of the summary sheet.

Standard nomenclature should be used. Only approved abbreviations supplied with the instructions for completion of the patient forms are acceptable. Only English language will be acceptable.

The triplicate lists of patients will not be returned to the candidate after the examination. The candidate should bring a copy of the case list supplied to the Board to the examination.

**1. Office Practice Patients**

A list of 40 patients from the candidate's office practice should be prepared using the format accompanying the application. List separately patients who have presented with any of the following problems. List no more than four patients from any one category. Do not include any patients who appear on the hospital lists.

- Preventive care and health maintenance
- Obesity
- Sexual dysfunction
- Contraceptive complications
- Psychosomatic problems
- Genetic problems
- Primary or secondary amenorrhea
- Infertility
- Endometriosis
- Menopausal problems
- Office surgery
- Abnormal uterine bleeding
- Abnormal cervical cytology
- Pelvic pain
- Vaginal discharge
- Vulvar skin disease
- Breast diseases
- Urinary incontinence/pelvic relaxation
- Urinary tract infections
- Sexually transmitted diseases
- Medical complications of pregnancy
- Preconceptual counseling
- Immunizations
- Pediatric gynecology
- Rape
- Spousal abuse
- Dysmenorrhea
- Premenstrual syndrome
- Benign pelvic masses
- Abnormal vaginal ultrasonography
- Abnormal fetal growth
- Substance abuse

List separately each patient and include the problem (one of the listed categories), diagnostic procedures, treatment, results, and number of office visits during the 12-month period. Group patients together under each separate category.

**2. Gynecology**

A list of all gynecologic patients should be prepared in the format accompanying the application and listed in order as follows:

I. Hospitalized patients
   a. Major operative procedures
   b. Minor operative procedures
   c. Nonsurgical admissions
   d. Total number of ultrasound and Doppler examinations performed upon hospitalized gynecological patients

II. Ambulatory or short-stay surgery

   The preoperative diagnosis should appear for all major and minor surgical procedures. The size of ovarian cysts and neoplasms must be recorded. For nonsurgical conditions, the admission diagnosis should be recorded. The treatment recorded should include all surgical procedures, as well as primary nonsurgical therapy. Surgical diagnosis refers to the pathology diagnosis. For hysterectomy specimens, the uterine weight in grams must be recorded. In cases without tissue for histologic diagnosis, the final clinical diagnosis should be listed.

   Days in hospital on this listing of patients, as well as on all other lists, is the arithmetic difference between date of discharge and date of admission.

**3. Obstetrics**

A list of obstetric patients should be prepared in the format accompanying the application. List separately each patient with a complication or abnormality, as well as medical and surgical intervention during pregnancy, labor, delivery, and the puerperium. In addition, a total of the number of normal, uncomplicated obstetric patients managed during the same 12-month period (or 24-month period, if a 2-year case list is submitted), should appear at the end of the obstetric list.

Interpretation of "normal obstetric patients" for this listing implies that:

a. pregnancy, labor, delivery, and the puerperium were uncomplicated and labor began spontaneously between the 37th and 42nd weeks of gestation;

b. membranes ruptured or were ruptured after labor began;

c. presentation was vertex, position was occiput anterior or transverse, and labor was less than 24 hours in duration;

d. delivery was spontaneous or by outlet forceps, with or without episiotomy, from an anterior position;

e. infant had a 5-minute Apgar score of 7 or more, weighed between 2,500 and 4,500 gm, and was healthy; and

f. placental delivery was uncomplicated and blood loss was less than 500 mL.

Deliveries not fulfilling these criteria must be listed individually. Include gestational age at admission.

**4. Cover Sheets**

Each list of patients, (a) gynecological (hospitalized and ambulatory) and (b) obstetrical, from each hospital, should be verified on the form accompanying the application. On this form, the record librarian or other similar hospital official must submit a statement attesting that (1) the patients listed were cared for by the candidate and (2) that all of the hospitalized patients dismissed from the candidate's care have been separately listed or reported in the totals reported for the period indicated. If the candidate is submitting a 2-year case list, separate attestations must be obtained for each year.
5. Summary Sheet

Using the form provided for this purpose, prepare a summary of all cases for all hospitals combined. If a 2-year case list is submitted, this will require the preparation and submission of a summary sheet for each year, as well as seven copies of a combined summary sheet for both years.

Final Approval and Notification of Admission to the Oral Examination

If the examination fee has been paid and the three copies of lists of patients have been submitted by August 1, 2000, and are approved by the Board, the candidate will receive an Authorization for Admission form and a reservation card for the hotel at least 1 month prior to the examination, indicating the day, time, and place to report for the examination. Please keep the Board informed of current mailing address.

Ruling Not Admissible

A candidate not admitted to an oral examination may reapply by submitting a new application, paying the application fee, and meeting the requirements applicable at the time of reaplication.

If the candidate was disqualified because the case lists were judged insufficient for a comprehensive examination, the new case lists should be added to those previously submitted. Thus, the requirement of sufficient numbers, breadth, and depth in the case lists makes time in practice the variable and experience the constant.

Reexaminations

A candidate who is disqualified or fails to pass the oral examination must reapply by submitting a new application, paying the reaplication fee, and meeting the requirements applicable at the time of reaplication.

A candidate reaplying for examination will be asked to provide verification of responsibilities for patient care and will be notified in July of admissibility to the next examination.

A candidate accepted for reexamination must submit, on or before the August 1 prior to the examination, a new case list for the 12 months (or 24-month period, if a 2-year case list is submitted) preceding the June 30 prior to the oral examination.

The examination fee is due each time a candidate receives notification of admissibility to take the oral examination. Each reexamination will be conducted by examiners who have no knowledge of the fact or circumstances of a candidate's previous failure.

Postponement of Oral Examination

A candidate failing to take a scheduled oral examination must submit a new application during January or February of the following year. Admissibility to the next examination will be determined on the basis of the candidate's professional activities as reported during the current year. Payment of the reaplication fee must accompany each reaplication.

If notified of admissibility to the next oral examination, the candidate must again submit, before August 1, a listing of all patients dismissed from the candidate's care in all hospitals during the 12 months (or 24-month period, if a 2-year case list is submitted) ending June 30 prior to the oral examination and a list of 40 patients from office practice.

Oral Examination Fees

Fees have been computed to cover the costs of examination and administrative expenses. They will not be refunded or credited. All fees must be paid in United States currency. The candidate's canceled check is to be considered the receipt.

The application fee must be enclosed with each application to take the oral examination. A candidate notified in July of admissibility to the oral examination in November is required to pay the examination fee before being scheduled to take the oral examination. If the examination fee and case list have not been received in the Board office on or before August 1, or if these items, including the late fee, have not been received in the Board office on or before August 31, the candidate will not be scheduled to take the examination in November.

No application fees will be credited against a future application or refunded.

Examination fees may be refunded, provided candidates inform the Board office in writing prior to September 22 of their inability to write the examination.

Oral Examination Dates

November 1, 1999

Request application
Deadline for receipt—February 28, 2000
November 1, 1999-February 28, 2000
Application, current medical license, two 2x2 photographs, plus application fee
Deadline for receipt—February 28, 2000
Fee—$600
February 28-April 28, 2000
Application, current medical license, two 2x2 photographs, application fee plus late fee ($250)
Deadline for receipt—April 28, 2000
Fee—$850 ($600 plus $250)
April 28-June 16, 2000
Application, current medical license, two 2x2 photographs, application fee plus late fee ($600)
Deadline for receipt—June 16, 2000
Fee—$1,200 ($600 plus $600)
June 16
No applications accepted after this date
July 2000
Candidates notified to submit properly formatted case lists and examination fee
Deadline for receipt—August 1, 2000
Fee—$700
August 2-31, 2000
Candidates notified by the Board in July to submit their properly formatted case lists and examination fee must include a late fee ($250)
Deadline for receipt—August 31, 2000
Fee—$950 ($700 plus $250)
August 31, 2000
No case lists or examination fees accepted after this date
November and December 2000
Oral Examination, Westin Galleria Hotel, 13340 Dallas Parkway, Dallas, TX 75240

Listings of Certified Diplomates

Each year the Board office notifies the American College of Obstetricians and Gynecologists of the names and addresses of the diplomates certified in that year. A list of the names of the most recently certified diplomates is also sent to the American Medical Association and to the American Board of Medical Specialties with the request that they be included in the next issues of (1) the Directory of Physicians in the United States and (2) the Official ABMS Directory of Board Certified Obstetrician-Gynecologists.

After this effort to ensure initial listings of the newly certified diplomates, the Board assumes no responsibility for a diplomate's listing in subsequent issues of any directory.
Revocation of Diploma or Certificate
Each candidate, when making application, signs an agreement regarding disqualification or revocation of the candidate's diploma, certificate, or other evidence of qualification for cause. Revocation may occur whenever
a. The physician shall not in fact have been eligible to receive the diploma or certificate, irrespective of whether or not the facts constituting such ineligibility were known to or could have been ascertained by this Board, its members, directors, examiners, officers, or agents at or before the time of issuance of such diploma or certificate.
b. Any rule governing examination for a diploma or certificate shall have been violated by the physician but the fact of such violation shall not have been ascertained until after the issuance of his/her diploma or certificate.
c. The physician shall have violated the moral or ethical standards of the practice of medicine then accepted by organized medicine in the locality where the diplomate is practicing and, without limitation of the foregoing, the forfeiture, revocation, or suspension of the diplomate's license to practice medicine, or the expulsion from, or suspension from, the rights and privileges of membership in a local, regional, or national organization of professional peers shall be evidence of a violation of such standards of the ethical practice of medicine.
d. The physician shall fail to comply with the rules and regulations of this Board.
e. The issuance or receipt of such diploma, certificate, or other evidence of qualification shall have been contrary to or in violation of the Certificate of Incorporation or the Bylaws of this Board.
f. The physician shall have violated any of The Ethical Considerations in the Practice of Obstetrics and Gynecology currently published by the American College of Obstetricians and Gynecologists and adhered to by the Board.
Upon revocation of any diploma or certificate by this Board as aforesaid, the holder shall return the diploma or certificate and other evidence of qualification to the executive director of the Board, and the holder's name shall be removed from the list of certified specialists.

Governing Rules and Regulations
The Board's Rules and Regulations, which are subject to change from time to time without notice, contain specific provisions concerning eligibility for the examinations administered by the Board; an admission appeals process, which is available under certain circumstances; the application process; the examination processes (initial and renewal); a description of the circumstances under which candidates will be required to reactivate an existing application, or submit a new application, or repeat an examination; a list of occurrences that could lead the Board to revoke a certificate previously issued by it to a diplomate or to place the diplomate on probation; and other matters relating to the Board's examination and certification/recertification processes. Many, but not all, of these provisions are summarized or described in this publication. In the event of any inconsistency between the Board's Rules and Regulations and this publication, or any omission from this publication of any provision of the Rules and Regulations, the Rules and Regulations shall govern. Copies of the Rules and Regulations are available upon request from the Board's executive office.

Certification Requirements
Many physicians write to the Board outlining their training and asking for an estimate of their qualifications and whether further training is required. The Board's requirements, as published herewith, provide this information, and any potential candidate should be able to determine his/her status after studying these requirements. Individual officers or directors of the Board cannot and will not make such determinations. All evaluations of an applicant's status will be made by the Committee on Admissions in accordance with the rules and regulations of the Board, after submission of an application for examination and payment of the registration fee, which must accompany the application. Personal interviews with officers and directors of the Board should not be requested at any time.
It is the responsibility of the candidate to seek information concerning the current requirements for certification as an
ophthalmologist. The Board does not assume responsibility for notifying a candidate of changing requirements or the impending loss of his/her eligibility to take an examination.

**Educational**

All applicants must have graduated from a medical school or from a school of osteopathy.

All applicants, both graduates of medical schools and schools of osteopathy, entering ophthalmology training programs must have completed a postgraduate clinical year (PG-1) in a program in the United States accredited by the Accreditation Council for Graduate Medical Education (ACGME) or a program in Canada approved by the appropriate accrediting body in Canada. The PG-1 year must be composed of training in which the resident has primary responsibility for patient care in fields such as internal medicine, neurology, pediatrics, surgery, family practice, or emergency medicine. As a minimum, 6 months of this year must consist of a broad experience in direct patient care. It is a requirement of the Board that the program chairman ascertain that an individual has completed an accredited PG-1 year in the United States or in Canada prior to the start of the ophthalmology residency.

In addition to a PG-1 year, all applicants must have satisfactorily completed an entire formal graduated residency training program in ophthalmology of at least 36 months duration (PG-4 or better) in either the United States accredited by the ACGME, or in Canada accredited by the Royal College of Physicians and Surgeons of Canada (RCPSC). No other training, including any form of fellowship, is acceptable.

The applicant's chairman is required to verify satisfactory completion of an entire formal graduated ophthalmology residency training program of at least 36 months duration. When a resident's graduate education and clinical experience have been gained in more than one residency program, each chairman will be required to complete a satisfactory completion form. Less than 6 months service in an accredited program is not acceptable as a part of the required training in ophthalmology. The chairman's verification form(s) cannot be submitted to the Board until the applicant has completed the entire residency training program.

If a program is discontinued or withdrawn during the course of a resident's training, he/she must complete the remaining required number of months of training in another accredited program.

Only those applicants who have completed their PGY-1 and entire ophthalmology training program, PGY-4 or beyond, by August 1 are eligible to apply for the Written Qualifying Examination given in the Spring of the following year.

**Licensure**

**Graduates of United States and Canadian Medical Schools**

A person shall be eligible to apply for and to take any examination administered by the Board only if, as of the date of application and at all times thereafter through and including the date of administration of each examination of the Board taken by the person, the person has a valid and unrestricted license to practice medicine in the United States, its territories, or a Canadian province in which the person's practice of medicine is regularly conducted and in each other place in which the person practices or has practiced medicine and has an unexpired license. Individuals in the military will meet the valid and unrestricted licensing condition if they are on full time active duty as a physician at a military installation in any branch of the US Armed Services and submit a valid and unrestricted military medical license. Accompanying this military license must be a signed document from the individual’s commanding officer stating that he/she solely provides medical care and treatment on the military installation to members of the US Armed Services and their dependents. Information concerning the Board's Rules and Regulations with respect to definitions of an invalid or restricted license is available upon request from the Board's executive office.

**Other Medical Graduates**

An applicant may have graduated from a medical school of a country other than the United States or Canada. Graduates of international medical schools must have a valid and unrestricted license to practice medicine (as defined above and in the Rules and Regulations of the Board); they are also required to have a certificate from the Educational Commission for Foreign Medical Graduates (ECFMG).

**Applicant Disclosure Obligations**

At the time a person submits an application to the Board and at all times thereafter, the person shall have a continuing obligation to disclose promptly to the Board the existence or occurrence of any circumstances causing the person to fail to satisfy the foregoing condition of eligibility to apply for and take any examination administered by the Board. A person submitting an application to the Board shall inform the Board on, or in a written submission accompanying, the person's application or in a written submission to the Board before taking any examination administered by the Board, as the case may be, if the person's license to practice medicine in the United States, its territories, or a Canadian province has previously been surrendered or not renewed upon its expiration or if the person's practice of medicine or license to practice medicine in the United States, its territories, or a Canadian province has previously been revoked, restricted, conditioned, suspended, limited, qualified, or subject to the terms of probation.

**Applications**

An applicant who wishes to be examined by the Board shall complete, sign, and file with the executive director an application on the official form then in use by the Board. The application shall be considered complete only when all supporting data required by the application, including the chairman's verification form, are also filed with the executive director. Applications can be obtained from the chairman of accredited residency programs or from the office of the Board.

**Written Examination Deadline**

If an applicant wishes to be considered for a Written Qualifying Examination to be conducted in a particular year, his/her application and all supporting data, including supporting data furnished directly by others with respect to the applicant, must be postmarked between March 1 and August 1, except for the chairman's verification form, which must be postmarked on or before October 1 of the calendar year immediately preceding the calendar year in which the Written Qualifying Examination is to be conducted. By paying a late fee (see “Fees for Examinations”), the deadline for postmarking the completed application may be extended from August 1 to September 1. No other exceptions to, or extensions of, these requirements will be made for any reason. The dates of future examinations can be found on the Internet at http://www.abop.org.

An applicant who does not receive notification from the Board office by January 15 of the acceptance or rejection of his/her application must contact the Board office in writing to inquire about the status of the application. Failure to contact the Board office in writing by February 15 will result in such applicant's removal from the examination roster.

If a completed application and all required supporting data are not timely postmarked the application will not be valid, and the application fee shall be returned. It is best not to mail application materials just before the postmark deadline because packages are sometimes postmarked a day or two after mailing. Caution: if there is a
discrepancy between a metered postmark and an official US Postal Service postmark, the latter will be considered official.

The application shall be accompanied by a check payable to the Board for the application fee. No application will be considered to be complete until the fee and all required supporting data, including a copy of your current registration to practice medicine and two recent photographs for identification at the Written Qualifying Examination and the Oral Examination, have been received by the executive director.

The application form contains a pledge that explains the prohibitions regarding improper conduct before, during and after examinations. Candidates must certify that the information they provide in their applications is true and accurate. If (1) any misrepresentation is discovered in the application, in any other information submitted to the Board or in the identity of a person applying to take or taking the examinations, (2) any financial or other benefit is offered by a candidate to any director, officer, employee, proctor, or other agent or representative of the Board in order to obtain a right, privilege, or benefit not usually granted by the Board to similarly situated candidates, or (3) any irregular behavior during the examination, such as copying answers, sharing information, using notes, or otherwise giving or receiving aid is discovered by observation, statistical analysis of answer sheets, or otherwise, the candidate in question shall be given written notice of the charges and an opportunity to respond in accordance with the procedures set forth in the rules and regulations of the Board. If the Board determines that a violation has occurred, the Board may permanently bar the person(s) involved in the violation from all future examinations, invalidate the results of prior examinations taken by the person(s), withhold or revoke the certificate of the person(s), or take other appropriate action. If sanctions are imposed pursuant to the rules and regulations of the Board, the Board may notify legitimately interested third parties of its action.

When the Board determines that irregular behavior has occurred during an examination, the Board will make every effort to withhold the scores of only those candidates directly implicated in the irregularity. Nevertheless, in some instances the evidence of irregularity, though sufficiently strong to cast doubt on the validity of scores, may not enable the Board to identify the specific candidates involved in the irregularity. In such circumstances, the Board may withhold the scores of candidates not directly implicated in the irregularity and, if necessary, may require those candidates to take an additional examination at a later date to ensure the validity of all scores.

The examination booklets used in the Written Qualifying Examination and the illustrative materials and questions asked in the Oral Examination are copyrighted as the sole property of the Board and must not be removed by the candidate from the test area or reproduced in any way. Any reproduction, in whole or in part, of the Written test booklet or Oral Examination materials and questions is a federal offense and also may subject the candidate to the sanctions listed above. No notes, textbooks, other reference materials, scratch paper, or recording devices may be taken into either the Written or the Oral Examinations.

Disabilities

The American Board of Ophthalmology complies with the Americans with Disabilities Act (ADA) to mitigate the effects of the disability on the testing activity. To accommodate individuals with disabilities the Board will make reasonable modifications to its examinations that do not fundamentally alter the requirements of the examination or the measurement of the skills or knowledge the Board examinations are intended to test.

A candidate for Board certification who believes that he or she is disabled within the meaning of the Americans with Disabilities Act, and who requests an examination under nonstandard conditions, shall specify on (or in a supplement submitted with) the application form the existence, the specific nature, and the extent of the disability and the specific modification requested. The candidate shall also submit either with the timely filed application, or no later than 30 days after the deadline for applying for a particular examination, all independent documentary evidence substantiating the individual's disabilities.

Documentation includes, but is not limited to
1. Name, address, telephone number and qualifications of each expert who provides a report documenting the individual's disabilities.
2. Dates and locations of all assessments performed and included in the documentation.
3. Copies of evaluation reports with scores or ratings for each standard instrument or assessment method used. The Board requires that this documentation be no more than 3 years old.
4. A full description of any nonstandard instruments and assessment methods used to determine the disabilities and diagnoses.
5. Any diagnoses of the individual's disabilities using standard nomenclature; i.e., International Classification of Diseases (ICD); American Psychiatric Association Diagnostic and Statistical Manual (DSM).
6. A description of the individual's functional limitations due to any disabilities.
7. Reports of any past accommodations on examinations the individual received because of the disabilities.

The ABO will verify the documentation of the disability and reserves the right to have the individual independently evaluated at its own expense.

Fees for Examinations

Written Qualifying Examination
- Review of application and registration, $1,035, payable with application
- Review of late application and registration (after August 1 to September 1 postmark), $1,520
- Repeat registration fee, $750
- Late repeat registration fee, (after August 1 to September 1 postmark), $815

Oral Examination
Due to time constraints, there is no late filing period for oral candidates
- Registration fee, $1,035, payable on successful completion of the Written Qualifying Examination
- Repeat entire examination, $1,035
- Repeat one subject, $555
- Repeat two subjects, $540

Fees for accepted candidates for the Written Qualifying Examination and the Oral Examination are not refundable.

The fees for examinations shall be established annually by the Board of Directors on the basis of the actual and anticipated costs of the Board in the examination of candidates and the administration of its business. The Directors of the Board serve without compensation except for reimbursement of expenses.

Cancellations
A charge equal to 50% of the original application and registration fee (or repeat registration fee) for that particular Written Qualifying Examination or Oral Examination will be imposed on any
candidate who cancels or fails to keep an examination assignment, regardless of the reason. This fee is due at the time of cancellation.

**Time Limit**

On January 23, 1983, the American Board of Ophthalmology instituted a 6-year time limit in which to complete the certification process. This affects the following four groups of individuals:

1. **New Applicants (less than 6 years post-residency)**
   New Applicants who completed their residency programs within the last 6 years must successfully complete the Written Qualifying Examination and the entire Oral Examination by December 31 of the sixth year following completion of accredited training in ophthalmology.

2. **New Applicants (more than 6 years post-residency)**
   New Applicants who completed their residency programs prior to 1983 but have never applied to the Board will be required to enter the system by way of the Reentry process and will have one 6-year period in which to successfully complete the certification process. (See "Reentry Process," below.)

3. **Active Candidates**
   Active candidates who had an approved active application on file with the American Board of Ophthalmology when this 6-year rule was instituted on January 23, 1983, must successfully complete the Written Qualifying Examination and the entire Oral Examination within 6 years or by December 31, 1989.

4. **Inactive Candidates**
   Inactive candidates who had an approved inactive application on file with the American Board of Ophthalmology when this 6-year rule was instituted on January 23, 1983, must successfully complete the Written Qualifying Examination and the entire Oral Examination within 6 years or by December 31, 1989.

**Reentry Process**

Candidates failing to achieve certification within the initial 6-year period may reenter the process for one additional 6-year period by completing a reentry process. If a candidate completes the reentry process but does not attain certification within the second 6-year period, the individual will not be given another opportunity to reenter the process until he/she has satisfactorily completed an additional accredited residency program.

The requirements for reentry into the examination process are as follows:

1. A waiting period that encompasses at least one Written Qualifying Examination date is required after completion of the 6-year period.
2. All reentry applicants must file a timely application with the Board. The filing period is the same as the initial application process (March 1 to August 1) of the year preceding the Written Qualifying Examination.
3. An individual must provide a copy of a valid and unrestricted license to practice medicine as described under "Licensure.
4. An individual must attain 100 category 1 CME credits, accredited by the Accreditation Council for Continuing Medical Education (ACCME), during a 1-year period prior to reentry.

**Written Qualifying Examination**

In order to qualify for an Oral Examination, each candidate must pass a Written Qualifying Examination. The Written Qualifying Examination consists of 250 multiple-choice questions. The purpose of the Written Qualifying Examination is to evaluate the breadth and depth of the basic science and clinical knowledge of candidates who have satisfactorily completed an accredited program of education in ophthalmology. Candidates who successfully complete the Written Qualifying Examination will be further evaluated in an Oral Examination.

**Aspects of the candidate's ability that are tested include:**

1. recall of information;
2. understanding and application of basic knowledge;
3. relation of pathogenesis to disease process;
4. evaluation of clinical data;
5. utilization of diagnostic and therapeutic procedures;
6. anticipation and recognition of complications;
7. ethics of ophthalmic practice.

**Topics covered include:**

1. optics, visual physiology, and correction of refractive errors;
2. retina, vitreous, and aquea;
3. neuro-ophthalmology;
4. pediatric ophthalmology;
5. external disease and cornea;
6. glaucoma, cataract, and anterior segment;
7. plastic surgery and orbital diseases;
8. ophthalmic pathology.

The Written Qualifying Examination is given simultaneously in designated cities in the United States in the spring of each year.

**Oral Examination**

Upon successful completion of the Written Qualifying Examination, candidates will be sent specific instructions for registration for the Oral Examination. A check payable to the Board for the amount then in effect for the Oral Examination must accompany the completed registration form and be forwarded to the Board office within the appropriate time frame.

**Oral Examination Schedule**

It has been the custom of the Board to hold two oral examinations a year with candidates who have passed the spring Written Qualifying Examination. These candidates are assigned either to a group taking the Oral Examinations in the fall of that year or to a group taking the Oral Examinations in the Spring of the following year. Candidates who pass the April 2000 Written will be assigned to either the fall 2000 oral or the spring 2001 oral. The Board reserves the right to limit the number of candidates admitted to any scheduled examination and to designate the candidates to be examined.

**Oral Examination Subjects**

The Oral Examination will be divided into the subjects listed and described in the following paragraphs. All subjects are given by appointment within a half-day period utilizing a panel system. Information about the examination procedures and scheduling is sent to all candidates after they have been registered for the Oral Examinations.

1. optics, visual physiology and correction of refractive errors
2. pediatric ophthalmology and strabismus
3. neuro-ophthalmology and orbit
4. external eye and adnexa
5. anterior segment of the eye
6. posterior segment of the eye

In each of the oral examinations emphasis will be placed upon the following:

**1. Data Acquisition**

Recognition by the candidate of depict abnormalities and diseases that affect the eye, ocular adnexa, and the visual pathways. Candidates will be asked for historical information and examination data that might be obtained on a patient with a particular condition depicted or described.
II. Diagnosis
The ability of candidates to synthesize historical and physical evaluation information, along with the appropriate laboratory data, to arrive at correct diagnoses and differential diagnoses.

III. Treatment
Candidates will be expected to provide a reasonable and appropriate plan for medical and/or surgical management of patients with the conditions depicted or described and be able to discuss the prognosis and/or therapeutic complications for the particular condition.

These examinations will include developmental, dystrophic, degenerative, inflammatory, infectious, toxic, traumatic, neoplastic, and vascular diseases affecting the eye and its surrounding structures.

1. Optics, Visual Physiology, and Correction of Refractive Errors
Candidates should be familiar with the basic principles of physical and geometrical optics and the operation of standard optical instruments. They should understand the essentials of visual physiology, including visual acuity, light and dark adaptation, accommodation, and color vision. They should know the various forms of ametropia, principles and techniques of refraction, principles of lens design, and methods of correction of ametropia, including spectacles, contact lenses, intraocular lenses, and keratorefractive surgery. Candidates should be familiar with the methods for prescribing protective lenses, absorptive lenses, and aids for low vision.

2. Pediatric Ophthalmology and Strabismus
Candidates should be familiar with diseases affecting the eyes of infants and children and associated systemic abnormalities. Candidates should understand the anatomy, pathology, and physiology of the neuromuscular mechanisms subserving ocular motility and binocular vision. Candidates should be familiar with the methods of examination for detection and assessment of sensory and ocular motor disorders. They should also know the clinical features, differential diagnosis, natural course, and management of the various types of comitant and noncomitant deviations. They should be familiar with the principles and complications of surgery upon the extraocular muscles.

3. Neuro-Ophthalmology and Orbit
Candidates should know the anatomy of the orbit and the neuro-anatomy of the afferent and efferent visual systems. They should understand the principles and techniques of various diagnostic procedures and be able to interpret visual field testing, visually evoked responses, ultrasonography, conventional X-ray imaging, CT scanning, and magnetic resonance imaging. Candidates should be familiar with the clinical features, pathology, differential diagnosis, and management of disorders of the orbit, visual pathways, oculomotor system, and pupillomotor pathways, including the indications for, principles of, and complications of orbital surgery.

4. External Eye and Adnexa
Candidates should understand the anatomy, embryology, physiology, and pathology of the structures composing the lacrimal system, lids, cornea, conjunctiva, and sclera. They will be expected to discuss conditions affecting these structures and provide an appropriate differential diagnosis. Candidates should also be able to describe and discuss medical and surgical treatment for diseases and abnormalities involving these tissues, including indications for and complications of surgery.

5. Anterior Segment of the Eye
This examination concerns the anatomy, embryology, physiology, and pathology of abnormalities and diseases of the cornea, anterior chamber angle, iris, ciliary body, and lens.

Candidates will be expected to discuss conditions affecting these structures and those to be considered in their differential diagnosis. They should also be able to describe and provide indications for medical and surgical therapy directed toward alleviating or curing these conditions.

6. Posterior Segment of the Eye
This examination concerns the anatomy, embryology, physiology, and pathology of abnormalities and diseases of the vitreous, retina, choroid, and posterior sclera.

Candidates will be expected to discuss conditions affecting these structures and those to be considered in their differential diagnosis. They should also be able to describe and provide indications for medical and surgical therapy directed toward alleviating or curing these conditions.

Reactivation

Written Qualifying Examination
An applicant shall be required to reactivate his/her application for approval and submit an additional application fee under the following circumstances, which relate to the Written Qualifying Examination:
1. If a candidate fails to take the Written Qualifying Examination within 24 months after notice has been sent to him/her that his/her application has been accepted
2. If a candidate does not repeat the Written Qualifying Examination within 24 months after failing
3. If a candidate receives two consecutive failures on a Written Qualifying Examination on the same application.

Oral Examination
Beginning with the administration of the November 1997 oral examination the grading process was changed to an overall pass/fail grade. The Board continues to require that each candidate is examined in six separate subsections of the oral examination. A percent correct is calculated for each subject, and these six scores are averaged to arrive at a total score. Failure to achieve the necessary overall passing score requires that an individual repeat the entire six subjects of the oral examination. Additional information on grading is specified in the "Rules for Grading," which are sent to all candidates at the time of their Oral Examination registration. (See "Governing Rules and Regulations.")

A candidate shall be required to reactivate his/her application for approval, submit an additional application fee, and pass another Written Qualifying Examination before being admitted to the Oral Examination under the following circumstances:
1. If a candidate does not take the Oral Examination within 24 months after notice has been sent to the candidate that he/she has passed the Written Qualifying Examination
2. If a candidate who is eligible to do so fails to repeat the Oral Examination within 24 months after failing such examination
3. If the candidate does not pass the entire examination in three attempts.

Reactivation Procedure
In order to reactivate an application the following actions must be completed by the postmarked August 1 registration deadline:
1. File a new application
2. Remit the current fee
3. Submit a copy of a current valid and unrestricted license to practice medicine in the United States, its territories, or in a province of Canada (see "Licensure")
4. Provide letters of endorsement from two ABO-certified ophthalmologists in the community in which the applicant practices
Inactive Applications
When an application has not been reactivated it is considered by the Board to have lapsed. Inquiries to the Board by outside agencies about the certification status of a physician with an inactive application will be answered by stating that said physician is not certified.

Cancellation of Examination
If the ABO is unable to administer or complete the administration of a Written or Oral Examination at the scheduled date, time, and location due to circumstances beyond the Board’s control, the examination may be cancelled at the sole discretion of the Board, and if the examination is cancelled, the Board is not responsible for any expense an affected candidate may have incurred in connection with the cancelled examination or for any expense the candidate may incur in connection with any substitute examination.

Results of Examinations
Within a reasonable time after completion of the Written and/or Oral Examinations, the candidate shall be notified by the executive director as to the results thereof. The decision of the Board as to these results shall be final and conclusive. Grades are not subject to appeal. Because such is the case, individual directors of the Board or associate examiners should not be contacted about specific examination results. To preserve confidentiality, results of an examination will not be given over the telephone, facsimile, or computer.

Certification
A candidate who successfully passes both the Written Qualifying and Oral Examinations within the required time limitations hereinafore set forth, as determined by the Board in its sole discretion, shall be entitled to receive a certificate without further consideration of his/her qualifications by the Board. Physicians who have received the certificate are diplomates of the Board.

Duration of Certification
Certificates issued by the Board after July 1, 1992, are valid for a period of 10 years. Thereafter, a diplomate will be required to satisfactorily complete a designated renewal program every 10 years in order to extend the validity of his/her certificate. Certificates issued prior to July 1, 1992, are valid during the diplomate’s lifetime.

Disciplinary Sanctions
The Board shall have the authority to impose disciplinary sanctions upon a candidate or a diplomate for any of the following reasons:
1. Violation of rules and regulations of the Board relating to the Written Qualifying, Oral, and Recertification Examinations and applications to take the examinations
2. Substantial misstatement or omission of a material fact to the Board in an application or in any other information submitted to the Board
3. Presenting or distributing, or aiding or assisting another person(s) to present or distribute, a forged document or other written instrument purporting to have been issued by or under the authority of the Board to evidence that a candidate, diplomate, or any other person(s) is currently or was previously certified by the Board, when that is not the case, or claiming orally or in writing, or assisting another person(s) to claim, that a candidate, diplomate, or any other person(s) is currently or was previously certified by the Board, when that is not the case
4. Revocation of license(s) to practice of a person to whom a certificate was issued
5. Issuance of a certificate contrary to or in violation of the rules and regulations of the Board
6. Ineligibility of the person to whom the certificate was issued to receive the certificate

Statements of Eligibility
The Board does not issue statements of "eligibility" for its examinations. The only information the Board will divulge is whether a physician is or is not certified.

The ABO charges a $25 fee for each formal verification of a physician’s certification.

American Board of Medical Specialties
The American Board of Medical Specialties (ABMS) was established in 1933 to serve in an advisory capacity to the American specialty boards and to cooperate with organizations that seek its advice concerning the certification of medical specialists. The ABO is officially recognized by the ABMS and contributes an annual fee of $2,000 in addition to a per capita fee for each new diplomate certified, as do all other medical specialty boards, to the ABMS in support of the activities of the ABMS.

The ABO provides an annual listing of new diplomates for inclusion in the Official ABMS Directory of Board Certified Medical Specialists, published by Marquis Who’s Who. Each diplomate will be contacted directly for biographical information and to update information every year.

Recertification—Background
Periodic certificate renewal is meant to assure that members of the profession continue their education, keep current in information and skills, and practice in a contemporary manner. Thus the process expects continued update of relevant knowledge and requires participation in educational experience. It expects that the educational experience has been assimilated and documented the assimilation by testing. It expects the updated knowledge to be applied in practice. As is feasible, it may also assess whether the practice reflects a caring attitude toward patients and ethical behavior appropriate to a profession, or at least ascertain a commitment to these goals. The result should be a higher level for the profession as a whole than might have occurred without time-limited certificates and the recertification process.

Guiding Principles
1. Primary purpose. The primary purpose of the ABO’s recertification process is to promote optimum delivery of competent care by Board-certified members of the ophthalmic profession; to assure that diplomates are current in information and skills and practice in a contemporary manner through satisfactory completion of continuing medical education requirements, Knowledge Assessment Examinations, and a Practice Assessment; and to renew certificates of those who meet the Board’s requirements and satisfactorily complete its examinations.

The intent of the process is to set goals that will guide all members of the profession as they strive to keep up-to-date in knowledge and skills, and to practice competently. Another function is to identify any who are severely wanting in professional capabilities or behavior and provide incentive and opportunity to improve. The Board is not to be viewed as responsible for discovering, correcting, and disciplining all who are unacceptable practitioners. Licensing boards, professional societies, quality assurance committees of medical care facilities, and the legal system share in this responsibility.

The process is primarily to act as an incentive to all in the profession. The intent is that all who are willing and able will achieve certificate renewal. The exceptions are those who have become infirm and are therefore unable to maintain certain re-
quired qualities, and those who are unwilling to participate in the process of continued growth in the professional capabilities that they once demonstrated. Opportunity for remediation rather than exclusion from renewal certification is the mechanism for elevating those who have slipped below the standard of their peers. Nonrenewal is the action designed to remove the individual who is incorrectly wanting.

2. Flexibility by practice. The process is designed to acknowledge that individual practitioners may have developed differently in the types of patients they serve, diagnostic problems that present to them, and therapeutic methods required by the population they serve. The process therefore contains flexible requirements that to some degree can be modified to suit the nature of individual practices.

3. Flexibility by individual preference. Alternate pathways or components are provided to permit some selection according to individual preference. For example, individuals may have a preference with regard to how they might like to have their continued abilities evaluated.

4. Sequential process. It is desirable that the process of maintaining intellectual and professional qualities be a continual process. The educational and the assessment requirements can be satisfied over a period of time with completed items accumulated until the requirement is satisfied, with opportunity to repeat and strive for improvement in any element that is not accomplished satisfactorily at first.

5. Time for remediation. Standards need to be sufficiently high that they are meaningful and thus sometimes might not be met on first attempt. For elements that are judged unsatisfactory, timely opportunities need to be provided for satisfactory performance.

Requirements

A certificate issued on or after July 1, 1992, will expire 10 years after the date of its issuance. During that period, the diplomate must satisfactorily complete the recertification process in order to obtain certificate renewal, which shall be similarly time-limited in its validity. All evaluations of a candidate's status will be made by the Committee on Admissions in accordance with the rules and regulations of the Board, after submission of an application for examination and payment of the renewal fee, which must accompany the application. Personal interviews with officers and directors of the Board should not be requested at any time.

Additionally, it is the responsibility of the candidate to seek information concerning the current requirements for certificate renewal. The Board does not assume responsibility for notifying a candidate of changing requirements or the impending loss of his/her eligibility to take an examination. The first certificate renewal will be required in 2002, therefore, the following ABO recertification process will be available beginning in 1999.

Eligibility

Certification. The individual must hold a time-limited certificate issued by the ABO in 1992 or thereafter. Requirements for recertification can be achieved before or after the expiration date of the time-limited certificate. Renewal is for 10 years from the date of completion of the requirements or 10 years from the expiration of the previous certificate, whichever is later.

Requests for recertification from ophthalmologists who hold lifetime certificates issued before 1992 are considered on a case-by-case basis. The duration of recertification and the examination process is identical to that offered to holders of time-limited certificates. Lifetime certificate holders who pass the recertification process are entitled to retain their lifetime certificates. Lifetime certificate holders who fail to pass the recertification process are entitled to retain their lifetime certificates.

Licensure. The ABO's general requirement regarding licensure states that as of the date of application and at all times throughout the recertification process the applicant must hold a valid and unrestricted license(s) to practice medicine in the United States, its territories or Canadian province in which the applicant's practice of medicine is regularly conducted. The applicant's license(s) to practice medicine is not and ceases to be "valid and unrestricted" if the applicant's license to practice medicine, or the conduct of the applicant's practice of medicine, is in any manner and to any extent whatsoever revoked, conditioned, suspended, limited, qualified, subjected to the terms of probation, or restricted by, or surrendered by the applicant, during the pendency of or in order to terminate any investigation or proceeding regarding the applicant's licensure or practice of medicine before a court, department, board, or administrative agency. Individuals in the military will meet the valid and unrestricted licensing condition if they are on full-time active duty as a physician at a military installation in any branch of the US Armed Services and submit a valid and unrestricted military medical license. Accompanying this military license must be a signed document from the individual's commanding officer stating that he/she solely provides medical care and treatment on the military installation to members of the US Armed Services and their dependents. A copy of a current valid and unrestricted registration to practice medicine in the United States, its territories, or a Canadian province where the individual regularly practices medicine and the current effective date(s) of the medical license(s) must accompany the application.

Agreement for Recertification. During the recertification process, the candidate must sign a statement affirming commitment to practice in an ethical manner. This can be found on the application's "Agreement for Recertification."

Application Information

An applicant who wishes to be recertified by the Board shall complete, sign, and file with the executive director an application on the official form then in use by the Board. All applications shall be accompanied by a check payable to the Board for the application fee then in effect. No application will be considered to be complete until the fee and all required supporting data have been received by the executive director. Applications can be obtained from the Board office.

Application Deadlines. The application filing period runs from January through June 1 each year. Since the Knowledge and Practice Assessment components for the recertification process can be accomplished within 2 years (this includes time for remediation, if necessary), all eligible certificate renewal holders will be notified 3 years prior to expiration of their certificates that they may make application. Ultimately, it is the diplomate's responsibility to obtain an application. If a completed application and all required supporting data are not timely postmarked the application will not be valid, and the application fee shall be returned. However, by paying a late fee the deadline for postmarking the completed application may be extended from June 1 to July 1. No other exceptions to, or extensions of, these requirements will be made for any reason. It is best not to mail application materials just before the postmark deadline because packets are sometimes postmarked a day or two after mailing. Caution: If there is a discrepancy between a metered postmark and an official US Postal Service postmark, the latter will be considered official.

The dates of future examinations can be found on the Internet at http://www.abop.org.

An applicant who does not receive notification from the Board office by December 15 of the acceptance or rejection of his/her...
application must contact the Board office in writing to inquire about the status of the application. Failure to contact the Board office in writing by January 15 in such a case will result in a 1-year delay in considering a diplomat's application.

**Fees for Recertification Process**

- Knowledge Assessment Examination and Practice Assessment
  - Review of application and registration, $1,000, payable with application
  - Review of late application and registration (after June 1 to July 1 postmark), $1,300
  - Knowledge Assessment Repeat Registration fee, $500
  - Practice Assessment Repeat Registration fee, $500

Fees for accepted candidates for the recertification process are not refundable. The fees for examinations are established annually by the Board of Directors on the basis of the actual and anticipated costs of the Board in the examination of candidates and the administration of its business. The directors of the Board serve without compensation except for reimbursement of expenses.

**Cancellations**

A charge equal to 50% of the original application and registration fee (or repeat registration fee) for a Knowledge Assessment Examination or a Practice Assessment component of the recertification process will be imposed on any candidate who cancels or fails to keep an examination assignment, regardless of the reason. This fee is due at the time of cancellation.

**Time Frame**

Time-limited certificate holders must successfully complete the recertification process prior to the expiration date listed on their original certificate. Diplomates who fail to renew their time-limited certificate prior to the expiration date listed on their certificate will lose their Board-certified status until the recertification process is successfully completed. The recertification process is designed to be completed in 3 years, to include the initial application filing year, followed by 2 years to complete a Knowledge Assessment Examination and the Practice Assessment. (This allows time for recertification, if necessary.) Thus, all approved applications are valid for 3 years. A diplomate may take the Knowledge Assessment Examinations annually, and a diplomate may take the Practice Assessment twice a year in January and July. Please note, a diplomate may change the Knowledge Assessment Examination pathway he/she chooses annually. If a diplomate fails either the Knowledge Assessment Examination or the Practice Assessment, he/she is subject to a re-registration fee for each. If a diplomate fails to become recertified during the 3 years his/her application is valid, that diplomate must reapply and any Knowledge Assessment Examination or Practice Assessment successfully completed during that time will become null and void.

**Recertification Process**

**Educational Requirements**

Although exposure to an educational experience does not assure assimilation or utilization of knowledge, a high standard of ophthalmic care can better be rendered with an ongoing educational experience that is relevant to the individual's practice. A diplomate must obtain 300 Category 1 Continuing Medical Education (CME) credits from an Accreditation Council for Continuing Medical Education (ACCME)-accredited institution since the date of time-limited certification. At least 250 of the required CME credits must be obtained within 5 years prior to certificate renewal. It is recommended that a diplomate obtain at least 30 CME hours per year. At least 80% of the Category 1 CME credits must be relevant to the practice of Ophthalmology; three CME credits must be in ethics and/or humanitarianism; and the remainder of the CME credit hours can be in general medicine. A CME tracking form will be enclosed with recertification applications in order for a diplomate to itemize and submit the following information: name, sponsor, location, and dates of the CME courses completed. While a list of CME credits to date is required for application, it is not necessary to complete CME requirements at the time application is made. CME credits will be counted up until the date of successful completion of the recertification process. It will not be necessary to submit original certificates of CME attendance to the Board, but the Board does reserve the right to request this documentation as proof of CME completion.

**Knowledge Assessment**

As an encouragement to utilize continuing education resources of quality, as an encouragement for self study, and as a verification of the effectiveness of these educational endeavors, an evaluation of knowledge is required. This requirement can be satisfied by any one of the three methods listed below:

1. **Certificate Renewal Examination, Written:** The examination concentrates on, but is not limited to, clinically relevant and new information disseminated in clinical journals and educational media during the preceding decade. The examination consists of two parts: a general examination required of all candidates and a spectrum of modules dealing with different categories of disease from which the candidate selects one. This annually administered general and modular test is an "open book," multiple choice question test mailed to candidates to be taken during the 2-month time period of February 1 through March 31. The candidate must take and pass both the general and modular components Certificate Renewal Examination, Written (CREW). CREW may be taken annually as often as needed, until passed. If a candidate wishes to be considered for the CREW to be conducted in a particular year, his/her application and all supporting data must be approved and the registration form for this pathway must be postmarked on or before October 1 to be eligible for the following year's CREW Examination.

2. **The Oral Examination** currently used for candidates undergoing initial certification. This examination is offered annually in the spring with a registration deadline of December 1 of the year immediately preceding the spring Oral Examination.

3. **Certificate Renewal Oral Examination:** This pathway consists of Patient Management Problems (PMPs) dealing with common general ophthalmological topics. Candidates are allowed some latitude in selection of subjects to emphasize their areas of interest. This examination is offered annually in the spring with a registration deadline of December 1 of the year immediately preceding the spring Certificate Renewal Oral Examination.

To satisfy this knowledge assessment requirement, the candidate must satisfactorily pass any one of these three examination methods before achieving certificate renewal. If a candidate fails in any one of the three examinations, the examination may be repeated as often as required, or a different option may be selected.

**Practice Assessment**

All candidates are asked to complete scan sheets from representative office patient records so that the Board can determine the practice pattern of each candidate. The Board reserves the right to make site visits to the office of candidates to verify the validity of the scan sheet method of reviewing office practice.

The application form surveys the categories of patients that are seen in the applicant's practice commonly, occasionally, or rarely (if ever). This information helps in the selection of patient types for office record review. In registering for Office Record Review, each candidate selects three diagnoses-related categories from an

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Orthopaedic Surgery [ABOS] to ascertain whether the information below is current.)

I. Introduction

A. Definition
Orthopaedic surgery is the medical specialty that includes the preservation, investigation, and restoration of the form and function of the extremities, spine, and associated structures by medical, surgical, and physical methods.

B. Purpose
The ABOS was founded in 1934 as a private, voluntary, nonprofit, autonomous organization. It exists to serve the best interest of the public and of the medical profession by establishing educational standards for orthopaedic residents and by evaluating the initial and continuing qualifications and competence of orthopaedic surgeons. For this purpose, the Board reviews the credentials and practices of voluntary candidates and issues certificates as appropriate. It defines minimum educational requirements in the specialty, stimulates graduate medical education and continuing medical education, and aids in the evaluation of educational facilities and programs.

The Board does not confer any rights on its diplomats, nor does it purport to direct licensed physicians in any way in the conduct of their professional duties or lives. It is neither the intent nor the purpose of the Board to define requirements for membership in any organization or for staff privileges at any hospital.

Available list of categories. Five representative patient records from each category are to be selected for use in the Office Record Review process. The initial and most recent visit page of each patient record selected are to be copied (with patient identification masked for confidentiality) and submitted to the Board office. Corresponding scan sheets are then sent to the candidate in order to assess the patient's proper history, diagnosis, treatment, and management. The candidate will have 1 month to complete and return all Office Record Review scan sheets. In 1999, the Office Record Review process will be offered during the month of July, and beginning in 2000, the Office Record Review process will be offered twice yearly during the months of January and July.

If a candidate wishes to be considered for the January Office Record Review, a registration form with all supporting data must be received in the Board office postmarked on or before November 1 of the calendar year immediately preceding the January Review. Likewise, if a candidate wishes to be considered for the July Office Record Review, a registration form with all supporting data must be received in the Board office postmarked on or before May 1 immediately preceding the July Review.

The renewal certificate for all successful candidates is identical, and the characterization of practice in the application is only for the purpose of guiding the mechanism for certificate renewal.

Synopsis of Certificate Renewal

Along with eligibility requirements, completion of requirements in each of four areas:

1. Licensure The ABO's general requirement regarding licensure states that as of the date of application and at all times throughout the recertification process the applicant must hold a valid and unrestricted license(s) to practice medicine in the United States, its territories, or a Canadian province in which the applicant's practice of medicine is regularly conducted.

2. Continuing Medical Education (CME): A diplomate must obtain 300 Category 1 ACCME-approved credit hours. It is recommended that a diplomate obtain at least 30 CME hours per year. At least 150 of all CME credits must be obtained within 5 years prior to certificate renewal. At least 80% of the Category 1 CME credits must be relevant to the practice of orthopaedics, three CME credits must be in ethics and/or humanitarianism, and the remainder of the CME credit hours can be in general medicine.

3. Knowledge Assessment: Any one of the following three methods satisfies this requirement: Certificate renewal examination, written (take home); certificate renewal oral examination (patient management problem format emphasizing the areas of interest applicable to the candidate's practice); certification oral examination.

4. Practice Assessment: An office record review is required.

Associates

All associates, whether examiners or members of special committees, are informed by the Board that they shall not promote, or permit others to promote, his/her participation in commercial or educational activities (domestic or foreign) under circumstances that exploit, or might be perceived to exploit, his/her familiarity with examinations administered by the ABO or otherwise compromise the integrity of those examinations.
C. Directors
The directors of the ABOS are elected from diplomates of the Board who are nominated by the American Orthopaedic Association, the American Medical Association, and the American Academy of Orthopaedic Surgeons. They serve without salary.

D. Organization
Directors of the Board elect a president, president-elect, secretary, and treasurer annually. An executive director, who is a diplomate, serves as an ex officio director of the Board. The president appoints directors to serve on standing committees on credentials, examinations, finance, graduate education, and research. Other committees may be formed as deemed necessary. The Board holds regularly scheduled meetings yearly.

E. Directory
A current directory of certified orthopaedic surgeons is maintained and published by the Board. The names of diplomates also appear in the Official ABMS Directory of Board Certified Medical Specialists.

II. General Statement of Educational Goal for Orthopaedic Surgery
The goal of orthopaedic education is to prepare orthopaedic residents to be competent and ethical practitioners of orthopaedic surgery. In fulfillment of this goal, applicants for certification must have received through orthopaedic residency:
A. education in the entire field of orthopaedic surgery, including inpatient and outpatient diagnosis and care as well as operative and nonoperative management and rehabilitation;
B. the opportunity to develop, through experience, the necessary cognitive, technical, interpersonal, teaching, and research skills;
C. the opportunity to create new knowledge and to become skilled in the critical evaluation of information;
D. education in the recognition and management of basic medical and surgical problems;
E. an evaluation of ethical performance.

III. Minimum Educational Requirements for Board Certification
The Board has established the following minimum educational requirements for certification. These requirements should not be interpreted as restricting programs to minimum standards.
Throughout these rules, the term "accredited" denotes approval by the Accreditation Council for Graduate Medical Education (ACGME).

A. Time Requirements
1. Five years (60 months) of accredited postdoctoral residency are required.
2. Prior to July 1, 2000, 4 of these years (48 months) must be served in a program whose curriculum is determined by the director of an accredited orthopaedic surgery residency:
   a. Three of these years (36 months) must be served in an accredited orthopaedic surgery residency program.
   b. One year (12 months) may be served in an accredited graduate medical program whose educational content is determined by the director of an accredited orthopaedic surgery residency program.

   Beginning on July 1, 2000, 1 year (12 months) must be served in an accredited graduate medical education program whose curriculum fulfills the content requirements for the graduate year 1 (GY1) (see B.1, below) and is determined or approved by the director of an accredited orthopaedic surgery residency program.

An additional 4 years (48 months) must be served in an accredited orthopaedic surgery residency program. An additional 4 years (48 months) must be served in an accredited orthopaedic surgery residency program whose curriculum is determined by the director of the accredited orthopaedic surgery residency.

3. Each program may provide individual sick and vacation times for the resident in accordance with overall institutional policy. However, 1 year of credit must include at least 46 weeks of full-time orthopaedic education. Vacation or leave time may not be accumulated to reduce the 5-year requirement.
4. Program directors may retain a resident for as long as needed beyond the minimum required time to ensure the necessary degree of competence in orthopaedic surgery. According to the current Program Requirements for Residency Education in Orthopaedic Surgery, the committee must be notified of such retention. This information must also be provided to the Board on the Record of Residency Assignment form.

B. Content Requirements
1. Requirements for GY1
   Prior to July 1, 2000, a minimum of 9 months during the GY1 must be based in clinical services other than orthopaedics. This requirement may be fulfilled by a year of accredited residency in any broad-based program involving patient care.

   Beginning on July 1, 2000, the residency program director should be responsible for the design, implementation, and oversight of the GY1. The GY1 must include:
   a. a minimum of 6 months of structured education in surgery to include multisystem trauma, plastic surgery/burn care, intensive care, and vascular surgery;
   b. a minimum of 1 month of structured education in at least three of the following—emergency medicine, medical/cardiac intensive care, internal medicine, neurology, neurological surgery, rheumatology, anesthesiology, musculoskeletal imaging, and rehabilitation;
   c. a maximum of 3 months of orthopaedic surgery.

2. Orthopaedic requirements beyond the GY1
   a. Minimum distribution. Orthopaedic education must be broadly representative of the entire field of orthopaedic surgery. The minimum distribution of educational experience must include:
      1. 12 months of adult orthopedics;
      2. 12 months of fractures/trauma;
      3. 6 months of children's orthopaedics;
      4. 6 months of basic science and/or clinical specialties.

      Experience may be received in two or more subject areas concurrently. Concurrent or integrated programs must allocate time by proportion of experience.
   b. Scope. Orthopaedic education must provide experience with all of the following:
      1. Children's orthopaedics. The educational experience in children's orthopaedics must be obtained either in an accredited position in the specific residency program in which the resident is enrolled or in a children's hospital in an assigned accredited residency position.
      2. Anatomic areas. All aspects of diagnosis and care of disorders affecting the bones, joints, and soft tissues of the upper and lower extremities, including the hand and foot; the entire spine, including intervertebral discs; and the bony pelvis.
      3. Acute and chronic care. Diagnosis and care, both operative and nonoperative, of acute trauma (including athletic injuries), infectious disease, neurovascular impairment, and chronic orthopaedic problems including reconstructive surgery, neuromuscular disease, metabolic bone disease, benign and malignant tumors, and rehabilitation.
4. Related clinical subjects. Musculoskeletal imaging procedures, use and interpretation of clinical laboratory tests, prosthetics, orthotics, physical modalities and exercises, and neurological and rheumatological disorders.
5. Research. Exposure to clinical and/or laboratory research.
6. Basic science. Instruction in anatomy, biochemistry, biomaterials, biomechanics, microbiology, pathology, pharmacology, physiology, and other basic sciences related to orthopaedic surgery. The resident must have the opportunity to apply these basic sciences to all phases of orthopaedic surgery.

c. Options. Twelve months of the 4 required years under the direction of the orthopaedic surgery residency program director may be spent on services consisting partially or entirely of:
   1. additional experience in general adult or children's orthopaedics or fractures/trauma;
   2. an orthopaedic clinical specialty;
   3. orthopaedics-related research;
   4. experience in an accredited graduate medical education program whose educational content is preapproved by the director of the orthopaedic surgery residency program.

C. Accreditation Requirements
1. The educational experience in orthopaedic surgery obtained in the United States must be in an approved position in programs accredited by the RRC for Orthopaedic Surgery and by the ACGME.
   All other clinical education obtained in the United States must be in programs accredited by the ACGME and the appropriate RRC. The Graduate Medical Education Directory, published annually by the American Medical Association, 515 N State St, Chicago, IL 60610, lists accredited rotations of at least 6 months length.
2. During the 5 years of accredited residency, a total period of at least 6 months must be served in unaccredited institutions.
3. Credit for time spent in residency education will be granted only for the period during which the residency program is accredited, and only for time served in an approved position within an accredited program.
4. If an orthopaedic residency program has its accreditation withdrawn by the RRC for Orthopaedic Surgery and the ACGME, no educational credit will be granted past the effective date of withdrawal of accreditation.
5. Educational credit may be granted for clinical experience in the US military and/or public health services if the experience is accepted by the director of the orthopaedic surgery residency program that the applicant enters. Up to 1 month of credit may be granted for every 2 months of clinical experience, not to exceed 12 months of credit. Credit earned in this manner is subject to approval by the Board's Credentials Committee. This approval should be sought prior to entry into the program.
6. Educational experience obtained in Canada must be on services approved by the Royal College of Physicians and Surgeons of Canada (RCPSC) and must extend over a minimum of 5 years. The content requirements outlined in III.B must be met.
7. The Board does not grant credits for foreign educational experience, other than as permitted in 2 and 6, above.
8. The term "fellow" is not synonymous with the term "resident" for the purpose of obtaining Board credit for educational experience. A resident is an individual enrolled in an approved position in an accredited educational program.

D. Achievement Requirements
1. The director of the program providing general graduate medical education must certify the satisfactory completion of that segment of education.
2. In orthopaedic surgery residency programs, the program director must certify the satisfactory completion of each rotation for which credit is awarded. (See III.B, below.)
3. The program director responsible for the final year of the resident's education must certify that the resident has achieved a satisfactory level of competence and is qualified for the certifying process.
4. The certification referred to in 2 and 3, above, must be made on the appropriate Record of Residency Assignment form.
5. Medical practice activity outside of residency duties must not be allowed to interfere with the educational experience. Residents may not engage in such activities without the specific prior approval of the program director. Approval must be based on the judgment that rotations are being completed without compromising the circumstances of the resident warrant such activity.

E. Continuity Requirements
The resident should have progressively increasing patient care responsibility. A part-time or piecemeal approach to residency requirements is discouraged. The final 24 months of orthopaedic residency education must be obtained in a single orthopaedic residency program unless prior approval of the Credentials Committee is obtained.

F. Documentation Requirements
1. For orthopaedic education obtained in the United States, the program director must provide the Board with yearly documentation during the residency. Each May, directors will receive a Record of Residency Assignment forms on which the required information will be recorded. The appropriate forms are to be signed by the program director and the resident. The original, signed forms are to be returned to the Board office within 30 days of the end of the academic year (August 1).
2. The Record of Residency Assignment forms are to be completed for each resident as follows:
   a. Form 1 will be submitted the year the resident enters the program.
   b. Form 1-A must be provided for residents receiving educational credit in a nonorthopaedic ACGME-accredited program and for nonorthopaedic education received within the ACGME-accredited orthopaedic residency.
   c. Form 2-A must be completed yearly for each resident in the orthopaedic program. It must indicate the content and time spent on rotations, information on any unaccredited rotations, and whether or not credit was granted for a full year.
   d. Form 3 is the final evaluation form.
3. The original, signed forms are due in the Board office within 30 days of completion of the academic year. Part 1 examination results for candidates who take the examination in the same year they complete their residencies will not be mailed either to the candidates or to the program directors until the forms have been received in the Board office.
4. When a resident leaves a program prematurely, the program director must notify the Board office in writing within 30 days. The letter must record the reasons for leaving and confirm credit granted for rotations during the academic year in which the resident left. At the end of the academic year, Form 2-A and Form 3 must be completed.
5. Before a resident enters a new program, the new program director must obtain copies of the resident's Record of Residency Assignment forms from the Board office and review them thoroughly in order to develop an appropriate individual program that will meet the minimum educational requirements and include progressively increasing responsibility.
IV. Requirements for Taking the Certifying Examinations

The certifying examination is divided into two parts. Part I is a written examination, which may be taken at any time after the completion of the educational requirements. Part II is an oral examination, which may be taken after passing Part I, completion of the 22-month practice requirement, evaluation of the applicant's practice, and admission to the examination. A candidate must pass both parts of the certifying examination to be certified.

After taking and passing the written examination, candidates have 5 years to take or retake the oral examination. Candidates who do not pass the oral examination within those 5 years must retake and repass the written examination before applying to take the oral examination. Time spent in fellowship education following Part I will not count as part of the 5-year time limit.

An applicant seeking certification by the ABOS must satisfy the educational requirements that were in effect when he/she first enrolled in an accredited orthopaedic residency. For all other requirements, an applicant must meet the specifications in effect at the time of application.

A. Educational Requirements

1. An applicant must satisfactorily complete and document the minimum educational requirements in effect when he/she first enrolled in an accredited orthopaedic residency.
2. Upon successful completion of 64 of the 60 months of required education and on the recommendation of the program director, a candidate may apply to take Part I of the examination.
3. In order to be admitted to the examination, the candidate must complete the full 60 months of required education.
4. An applicant who has received orthopaedic surgery residency education in Canada must have fulfilled the requirements of the ABOS and must have passed the qualifying examination in orthopaedic surgery of the RCPSG before applying for either part of the Board's certifying examination.

B. License Requirement

Applicants who are in practice at the time they apply for Part I and all applicants for Part II must either possess a full and unrestricted license to practice medicine in the United States or Canada or be engaged in full-time practice in the US federal government, for which licensure is not required. An applicant will be rendered ineligible for any part of the certifying examination by limitation, suspension, or termination of any right associated with the practice of medicine in any state, province, or country due to a violation of a medical practice act or other statute or governmental regulation; to disciplinary action by any medical licensing authority; by entry into a consent order; or by voluntary surrender while under investigation, or suspension of license.

C. Board Eligible Status

Effective July 1, 1986, the Board will recognize those candidates who have successfully completed Part I and are awaiting to take Part II as being "Board eligible." The limit of Board eligibility is the 5-year candidate to take or retake the oral examination (Part II) after passing Part I. Candidates who do not pass the oral examination (Part II) within those 5 years will lose their Board-eligible status (See "IV. Requirements for Taking the Certifying Examinations," above.)

D. Practice Requirements

1. The applicant must be continuously and actively engaged in the practice of operative orthopaedic surgery other than as a resident or fellow (or equivalent) for at least 22 full months immediately prior to the Part II examination. An applicant must have started practice on or before September 1, 1997, in order to qualify for the 1998 Part II Examination. An applicant who interrupts the 22 months of practice with a fellowship can count the months of practice that preceded the fellowship as part of the 22-month requirement.
2. The applicant must be in one practice location for a minimum of 12 consecutive months during the required 22-month period. A change in location, type of hospital practice, or practice association may result in deferral. The practice must be located in the United States or its territories, Canada, or a US service installation.
3. The practice must include hospital admitting and surgical privileges (temporary privileges acceptable) in effect at the time of application and at the time of examination. The practice must allow independent decision making in matters of patient care.
4. The applicant must demonstrate professional competence and adherence to acceptable ethical and professional standards. It is the responsibility of the applicant to provide documentation that he/she is an ethical and competent practitioner.
5. A reduction, restriction, suspension, termination, or resignation at the request of a hospital of all or any portion of an applicant's surgical staff privileges, or pending action to do so, will normally result in a deferral until such action is finally resolved and the applicant's practice has stabilized sufficiently for it to be evaluated.
6. An applicant in the US uniformed services may satisfy the practice requirement if assigned as an orthopaedic surgeon for at least 22 full months prior to the date of the Part II examination, meaning that the applicant must have started practice on or before September 1, 1997. The applicant must submit a letter from his/her immediate supervisor evaluating his/her capability in the practice of orthopaedic surgery, as well as any other documentation the Credentials Committee may require to demonstrate professional competence and adherence to acceptable ethical and professional standards.
7. Evaluation of Applicant
   a. Individuals who do not engage in active orthopaedic surgery cannot be adequately evaluated for the Part II examination and will not be certified.
   b. Qualifications for taking the Part II examination will be determined by the Credentials Committee after review of the application, letters of recommendation, and other relevant information.
   c. It is the responsibility of the applicant to provide the information on which the Credentials Committee bases its evaluation of the qualifications of the applicant. This responsibility extends to information that the Credentials Committee requests from other persons. If the Credentials Committee does not receive requested information from the applicant, a program director, a reference, a hospital representative, or another source, the Board will notify the applicant and defer the decision on admission to the examination until the information has been received. The applicant may be required to authorize release of peer review information to the Board.
   d. Representatives of the Board may visit the site of an applicant's practice if the Credentials Committee believes that this is necessary for adequate evaluation of the applicant's work.

V. Impaired Physicians

A. Chemical Dependency

Applicants for either part of the certifying examination who, within 3 years of their application, have been diagnosed as chemically dependent and/or have been treated for drug or other substance abuse will be required, as part of their demonstration that they
meet the practice requirements in I.V.D., to present evidence from the appropriate agencies, hospitals, and physicians demonstrating to the satisfaction of the Board that they have both (1) satisfactorily completed the program of treatment prescribed for their condition, and (2) been free of chemical dependency for a period sufficient to establish that they are not currently using illegal drugs and/or that the use of illegal drugs or other substance abuse is not an ongoing problem. This documentation must accompany the completed application form. The maintenance of any such applicant's certification may be conditional upon periodic drug testing.

B. Mental and Physical Condition
Applicants for either part of the certifying examination who have a mental or physical condition that could affect their ability to practice orthopaedic surgery will be required, as part of their demonstration that they meet the practice requirements in I.V.D., to present medical evidence from the appropriate physicians, treatment centers, and hospitals demonstrating to the Board that the impairment does not compromise their ability to render safe and effective care to their patients. This documentation must accompany the completed application form.

VI. Procedure for Application for Part I and Part II of the Certifying Examinations

A. Application Dates and Requests
1. The dates, locations, and application deadlines for Part I and Part II of the certifying examination are announced in the Journal of Bone and Joint Surgery. They are also listed on the Board's website: www.abos.org. Examination dates may be changed at the discretion of the Board. Confirmation of published examination dates can be obtained from the Board's office.
2. All applications must be requested in writing.

B. Application Deadlines
1. Part I: A completed application on an original form provided by the Board for Part I must be postmarked by registered mail on or before March 1 of the year of the examination. The application must be accompanied by a nonrefundable examination fee of $770.
2. Part II: A completed application on an original form provided by the Board for Part II must be postmarked by registered mail on or before October 31 of the year preceding the examination. The application must be accompanied by a nonrefundable application and credentialing fee of $700.
3. Late or incomplete applications. Applications postmarked after the deadlines for Part I or Part II of the certifying examination and applications received incomplete will be returned to the applicant together with the fee check.
   a. If a Part I applicant wishes to resubmit the Part I application by registered mail postmarked on or before March 1, the nonrefundable examination fee of $770 and a nonrefundable late fee of $50 must be enclosed.
   b. If a Part II applicant wishes to resubmit the Part II application by registered mail postmarked on or before November 30, the nonrefundable application and credentialing fee of $700 and a nonrefundable late fee of $50 must be enclosed.
   c. No applications will be accepted after the late deadlines.

C. Notifying the Board of Application Changes
1. It is the responsibility of all applicants to notify the Board office of any change of address, practice association, or hospital affiliation.
2. If a Part II applicant changes practice location or practice association or acquires new hospital staff affiliations, new references will be solicited by the Board.
3. An applicant is also required to notify the Board of the denial of any request for hospital privileges; of any action to restrict, suspend, or terminate all or any portion of surgical staff privileges; of any request by a hospital to resign all or any portion of surgical staff privileges; and of any action by a governmental agency that would result in the restriction, suspension, or probation of the applicant's license or any right associated with the practice of medicine.

D. Notifying the Applicant of Examination Admission
1. For Part I, the applicant will receive examination information, an assigned examination number, and an admission card not later than 30 days prior to the examination date.
2. For Part II, the decision of the Credentials Committee is mailed to the applicant not later than 60 days prior to the examination date.

E. Fees
1. For Part I, the nonrefundable examination fee of $770 must be submitted with the application form.
2. For Part II:
   a. The nonrefundable application and credentialing fee of $700 must be submitted with the application form.
   b. The candidate must also submit an examination fee of $770 on or before the date specified in the letter of notification of admission to the examination. This fee will be forfeited if the candidate fails to appear for the examination or cancels after being scheduled.
3. There will be a $50 charge levied for any application or examination fee check that is returned not paid by the Board's bank.
4. The fees paid to the ABOS are not tax deductible as a charitable contribution, but may be deductible under some other provision of the Internal Revenue Service code.

F. Practice-Based Oral Examination
The Part II examination is practice based. The purpose of the practice-based examination is to evaluate a candidate's own practice as broadly as possible. This exercise will be conducted much as rounds or conferences are during residency, with the candidate presenting his/her cases and responding to the examiner's questions and comments. Applicants are urged to attend to details and follow procedures carefully and exactly to ensure admission to the examination.
1. Case collection: Each applicant will receive case collection software diskettes with their application. This is the program that the applicant must use to enter his/her 6-month case list information. The applicant is to collect all operative cases, including same-day surgery, for which he/she was the responsible operating surgeon for 6 consecutive months beginning July 1 of the year before the Part II examination. If time is taken off during those 6 months, the starting point for the collection period must be backed up by the amount of time missed. For example, case collection for an applicant who took a 2-week vacation in August would begin in mid June.

All cases must be collected from each hospital or surgery center at which the applicant has operated during the 6-month period. If the applicant did no cases during the case collection
period, this fact must be verified by a letter from the hospital and/or surgery center. The letter(s) must be sent to the Board office along with the case lists.

Case lists: Once all cases have been entered into the case collection program, the applicant will print out his/her complete case list(s) by hospital. No changes can be made to the case list(s) after this is done. Each complete hospital list must then be certified by the director of medical records. The director of medical records signature must then be notarized. When the applicant has each hospital list certified and notarized, he/she must then save the complete case list to a 3.5-inch diskette.

2. Case submission: By January 31 of the year of the Part II examination, the applicant must submit to the Board:

a. The complete printed case list(s) for the required 6-month period. Each hospital list must be stapled separately and have the required signatures and notarization. Before mailing, the applicant should make a copy of the complete case list(s), as the copies the applicant must bring to the examination must be of these printed and certified lists.

b. A 3.5-inch diskette containing his/her complete case list. The case list information on the printed lists and on the diskette must be identical.

c. For each hospital or surgery center where no cases were performed, a letter stating that no cases were performed there during the 6-month period.

This information must be sent to the Board office by registered mail or courier of your choice (ie, Federal Express, Express Mail, certified mail, etc) to ABOS, Part II Exam, 400 Silver Cedar Ct, Chapel Hill, NC 27514. Case lists must be postmarked by January 31 of the year of the examination. The Board office will not verify receipt of case lists.

3. Case Selection: The Board will select 12 cases from the applicant's 6-month case list(s). The list of 12 cases selected by the Board will be sent to the candidate in mid-May. From the list of 12, the applicant will then select ten cases to bring to the examination for detailed presentation.

4. Examination Materials/Preparation: Once the candidate has received the list of the 12 cases selected by the Board, he/she must gather all of the following to bring to the examination:

a. Three copies of the list of 12 selected cases.

b. Three copies of the applicant's complete case list that was submitted to the Board in January.

c. Images (including x-rays) for the 10 cases selected by the candidate— the pertinent pre-, intra-, or immediate post-operative and most recent follow-up x-rays for each case selected by the candidate for presentation. Before the examination begins, x-rays should be arranged in order of presentation and clearly marked in terms of date, pre- and postoperative. Pertinent images in CT and MRI panels must also be marked.

d. Two copies of notes for the 10 cases selected by the applicant—this includes admission and discharge notes, operative notes, office notes, and any other patient chart material that will aid in case presentation.

e. Video prints or photographic prints for arthroscopy cases selected that show the initial lesion(s) and the lesion(s) after treatment.

f. For cases with complications, images (including x-rays) pertinent to the complication and its treatment and two copies of any consultative report(s).

Please note: Because the examination is to be anonymous, the candidate should obliterate his/her name wherever it appears on any material brought to the examination, including the 6-month case list(s) and the Board's list of 12 selected cases.

Although the examiners will concentrate on cases brought for presentation, they may also ask questions pertaining to a candidate's case lists or practice. The candidate should not be concerned if all material brought to the examination is not covered. Discussion may focus on one area, or candidate and examiners may become involved in a few cases in such detail that time will not allow presentation of all patients. The candidate will not be penalized for this during the grading.

Applicants who have questions about materials and procedures for the practice-based oral Part II examination should call or write the Board office well before the examination. Failure to comply with the steps outlined may invalidate an examination.

VII. Falsified Information and Irregular Behavior

A. If it is determined that an applicant has falsified information on the application form or failed to provide material information, the applicant will not be considered for either part of the examination. The application form must be completed by January 31 of the year of the examination.

B. Examination applicants should understand that the following information may be sufficient cause to bar them from future examinations, terminate participation in the examination, invalidate the results of an examination, withhold or revoke scores or certificates, or take other appropriate action:

1. The giving or receiving of aid in the examination, as evidenced by observation or by statistical analysis of answers of one or more participants in the examination.

2. The unauthorized possession, reproduction, or disclosure of any materials, including, but not limited to, examination questions or answers, before, during, or after the examination.

3. The offering of any benefit to any agent of the Board in return for any right, privilege, or benefit that is not usually granted by the Board to other similarly situated candidates or persons.

4. The engaging in irregular behavior in connection with the administration of the examination.

C. The following are examples of behavior considered to be irregular and that may be cause for invalidation of the examination or imposition of a penalty:

1. Referring to books, notes, or other devices at any time during the examination. This prohibited material includes written information or information transferred by electronic, acoustical, or other means.

2. Any transfer of information or signals between candidates during the test. This prohibition includes any transfer of information between the candidate and any other person at any time during the testing period, including bathroom breaks.

3. Any appearance of looking at the answer sheet or the examination notebook of another candidate during the examination.

4. Allowing another candidate to view one's answer sheet or examination notebook or otherwise assisting another candidate in the examination.

5. Taking any examination material outside the examination room. All examination materials are the property of the Board and must be left in the room at the end of the examination.

D. Applicants should also understand that the Board may or may not require a candidate to retake one or more portions of the examination if presented with sufficient evidence that the security of the examination has been compromised, notwithstanding the absence of any evidence of a candidate's personal involvement in such activities.
VIII. Credentials Decisions

A. Determining Admission to Examinations
1. The Credentials Committee meets at least once each year to consider applications for the examinations. At this meeting, a decision about each applicant will be made either to approve admission to the next examination, to deny admission, or to defer decision pending further evaluation.
2. A decision approving admission to an examination applies only until the next available examination and does not carry over from one examination until the next. A new application is required for each examination.

B. Deferral of Admission Decision
A decision on an applicant’s admission to either Part I or Part II of the examination may be deferred if information received by the Credentials Committee is insufficient for the Committee to make a judgment and/or warrants further investigation. Typically, the committee will defer such a decision for 1 year to gain further information. If information is still insufficient, the decision will be deferred for a second year to enable representatives of the Board to conduct a site visit as described in V.E.4. A deferral of not more than 2 consecutive years is not viewed by the Board as an adverse action; thus, no appeal of a decision of the Credentials Committee is permitted unless an applicant has been denied admission or has been deferred for more than 2 consecutive years.

C. Appeal of Admission Decision
An applicant denied admission to the examination or deferred for more than 2 years will be informed of the basis for such action and may request a hearing by an appeals committee of the ABOS. (See XII, below.)

IX. Certificates and Certificate Renewal

A. Awarding Certificates
The ABOS awards a certificate to a candidate who specializes in orthopaedic surgery, has met the educational requirements of the Board, has demonstrated competence in orthopaedic surgery and adherence to ethical and professional standards, and has passed both parts of the certifying examination. Certificates awarded after 1986 are valid for 10 years. This portion of the Board’s responsibility is discharged by issuance of a certificate to an individual found qualified as of the date of certification.

B. Certificate Revocation
At its discretion, the Board may revoke a certificate for due causes, including, but not limited to the following:
1. The diplomate did not possess the required qualifications and requirements for examination, whether or not such deficiency was known to the Board or any committee thereof prior to examination or at the time of issuance of the certificate, as the case may be.
2. The diplomate made an intentional and material misrepresentation or withheld information in the application to either part of the examination or in any other representation to the Board or any committee thereof.
3. The diplomate made a misrepresentation to the Board or any third party as to his/her status as a diplomate of the Board or his/her receipt of or eligibility for certification by the Board.
4. The diplomate engaged in irregular behavior in connection with an examination of the Board (as described in VII.C), whether or not such practice had an effect on the performance of the candidate on an examination.
5. The diplomate was convicted by a court of competent jurisdiction of a felony or misdemeanor involving moral turpitude and, in the opinion of the Board, having a material relationship to the practice of medicine.
6. There has been a limitation, suspension, or termination of any right of the diplomate associated with the practice of medicine in any state, province, or country, including the imposition of any requirement of surveillance, supervision, or review due to a violation of a medical practice act, or other statute or governmental regulation, disciplinary action by any medical licensing authority, entry into a consent order, or voluntary surrender of license.
A diplomate may appeal the revocation of his/her certificates pursuant to the procedures set forth in Section XII.

C. Certificate Reinstatement
Should the circumstances that justified revocation or surrender of the diplomate’s certificate be corrected, the Board may reinstate the certificate after appropriate review of the individual’s qualifications and performance, using the same standard applied to other applicants for certification.

D. Certificate Renewal
Diplomates are encouraged to renew their credentials periodically through the Board’s recertification process. Information about recertification options can be obtained from the Board office.

X. Unsuccessful Candidates
Unsuccessful Part I candidates may repeat the examination by submitting a new application form for the examination and again being found admissible. (See VI.B.1.)
Unsuccessful Part II candidates may repeat the examination by submitting a new application form for the examination and again being found admissible. (See VI.B.2 and VIII.) Candidates who do not pass Part II within 5 years (as measured in Section IV) of passing Part I must retake and repass Part I before applying to take Part II.

XI. Program Accreditation
Institutions offering orthopaedic education must meet the Institutional and Program Requirements of the ACGME and the RRC for Orthopaedic Surgery as stated in the Graduate Medical Education Directory. (See III.C.)

A. RRC for Orthopaedic Surgery
Program accreditation is issued by the RRC for Orthopaedic Surgery, an autonomous committee composed of three representatives from each of the three sponsoring organizations: the ABOS, the Council on Medical Education of the American Medical Association, and the American Academy of Orthopaedic Surgeons. In evaluating orthopaedic residency programs, the RRC considers the number of residents, training period, program organization, educational experience, and institutional responsibility. The committee meets twice yearly.

B. Changes in Accreditation
Programs seeking changes in accredited positions or institutional affiliations can obtain information and application forms from the secretary of the RRC for Orthopaedic Surgery at the ACGME, 515 N State St, Chicago, IL 60610. Completed forms are to be returned to the secretary at the above address.

C. Program Surveys
Programs applying for accreditation or changes in accreditation will be surveyed at the earliest feasible date by a specialist site visitor or by a field representative for the ACGME. A report of the survey is submitted to the RRC for Orthopaedic Surgery for evaluation and official action. The RRC makes a determination regarding the accreditation of the program under authority delegated by the
ACGME, and it notifies the program director and the sponsoring institutions.

D. Number of Residents

The total number of residents assigned to any orthopaedic residency program and the number at each level of education must have prior approval by the RRC for Orthopaedic Surgery.

XII. Appeals Procedure

A. An individual who has received an unfavorable ruling from a committee of the Board may appeal such determination by mailing a notice of appeal to the office of the ABOS within 60 days of the date such ruling was mailed to him or her. Exception: The decision by the Examinations Committee that a candidate has failed either part of the certifying examination may be appealed only in the manner and to the extent provided in G and H, below.

B. Upon receipt of a notice of appeal, the concerned Board committee shall consider any information submitted therewith by the individual in support of his/her appeal and make such further investigation as deemed appropriate. If the committee then decides in a manner favorable to the individual, it shall so notify the individual. If the committee does not so determine, it shall notify the individual and the president of the ABOS.

C. The individual shall then have the right to an appeals hearing to decide whether the determination of the concerned Board committee shall be confirmed, modified, or overruled in accordance with the hearing process described in this appeals procedure.

1. The president of the ABOS shall appoint an ad hoc appeals committee consisting of three directors of the Board who did not participate in making the determination being appealed, one of whom shall be designated by the president as chairman of the appeals committee.

2. In the event that the subject matter of the appeal involves complex issues of fact or issues not solely dependent upon medical, surgical, or professional standards, the president of the ABOS, at his/her sole discretion, may appoint a hearing officer to conduct the appeals hearing and to submit a full written report and a recommended decision to the ad hoc appeals committee. The hearing officer appointed at the discretion of the president shall be an impartial, physician, lawyer, or other professional.

3. The chairman of the appeals committee shall convene a hearing before the appeals committee or the hearing officer, if one is appointed, within a reasonable time after their respective appointments, but not less than 60 days after the appointment of the appeals committee and the hearing officer, whichever is later.

D. Prior to the hearing

1. The concerned Board committee shall provide the executive director with such written information concerning its decision as it deems appropriate; a list of witnesses, if any, whom it expects to call to testify; copies of any written material that it considered in making the determination appealed (but only if it intends to present such material at the hearing); and a list of information and documents the individual is required to produce at the hearing. This material, together with written notice stating the time and place of the hearing, shall be sent to the individual by the executive director not less than 30 days prior to the hearing. Not less than 7 days prior to the hearing, the concerned Board committee shall provide the executive director and the individual with copies of any written reports, affidavits, or statements of experts that the concerned Board committee intends to present at the hearing.

2. Not less than 7 days prior to the hearing, the individual shall provide the executive director and the concerned Board committee with such written information concerning his/her position as he/she deems appropriate; a list of witnesses, if any, whom he/she expects to call to testify; and copies of any written reports, affidavits, or statements of experts that he/she intends to present at the hearing.

3. The executive director shall submit the written material referred to in this section D to the members of the appeals committee or to the hearing officer, if one has been appointed, prior to the hearing. Copies of this material must also be submitted to the individual and to the concerned Board committee no later than the time when submitted to the appeals committee or the hearing officer.

E. The hearing, whether conducted before the appeals committee or a hearing officer, shall be a hearing de novo. The concerned Board committee and the individual shall have the right to present all relevant information and evidence in support of their respective positions, and neither the concerned Board committee nor the individual shall be limited to the information and evidence considered by the concerned Board committee in making its original determination or its reconsideration of the original decision.

1. The concerned Board committee shall have the burden of proving at the hearing that the determination being appealed should be confirmed. The standard of proof to be applied by the appeals committee and the hearing officer in deciding whether the information and evidence presented at the hearing is sufficient to warrant confirmation of the determination being appealed is by the preponderance or greater weight of the evidence.

2. At the hearing, the concerned Board committee and its legal or other representatives shall present such relevant information and evidence as it deems appropriate to support its previously made determination. However, the committee shall not have the right to present any information or evidence not previously provided as required in D.1. The committee may call, examine, and cross-examine witnesses.

3. The individual shall have the right to be represented at the hearing by legal counsel or any person of his/her choice. He/she may present such relevant information and evidence as he/she deems appropriate in support of his/her position. However, the individual shall not have the right to present any information or evidence if not previously provided as required in D.2. The failure of the individual to produce information or documents requested by the concerned Board committee as required in D.2 shall be grounds for upholding and confirming the determinations of the concerned Board committee. The individual may call, examine, and cross-examine witnesses.

4. The individual and the concerned Board committee may submit written statements at the close of the hearing. A written record of the hearing shall be made available to the individual at one half the cost of its preparation.

F. After the conclusion of the hearing

1. If the hearing has been conducted before a hearing officer, the hearing officer shall prepare a written report based on the information and evidence presented, including the findings of fact determined by the hearing officer and a recommended decision as to whether the determination being appealed should be confirmed, modified, or overruled. The hearing officer shall submit the written report to the appeals committee and send copies to the individual and the concerned Board committee. The individual and/or the concerned Board committee may file objections to the report and recommendations of the hearing officer with the appeals committee within 10 days after receipt of the report. The opposing party shall then have 10 days...
to file its response to such objections with the appeals committee.

2. The appeals committee shall make its decisions following the hearing. If the hearing has been conducted before a hearing officer, the appeals committee will first receive the written report and recommendations of the hearing officer and the objections and responses filed thereto by the parties. If a majority of the members of the appeals committee determine, on the basis of the information and evidence presented, including, when applicable, the report and recommendations of the hearing officer, that the determination of the concerned Board committee should be confirmed or modified, the appeals committee shall so declare. If a majority determines that the concerned Board committee's determination should be overruled, the appeals committee shall so declare. The appeals committee shall inform the individual and the concerned Board committee of its decision in writing within a reasonable time following the hearing, explaining the basis for its judgment. The decision of the appeals committee shall be final and binding.

G. A candidate who believes that the Part II examination was administered in an unfair or inaccurate manner or that one or more of his/her oral examiners was acquainted with him or her or was not impartial may immediately, upon completion of the examination, request that he/she be reexamined. The request shall be made to the chairman of the Oral Examinations Committee and reviewed by the president and the secretary. If, after discussing the matter with the candidate and making such other investigation as they may deem appropriate, a majority of the president, the secretary, and the chairman of the Oral Examinations Committee determine that reasonable grounds exist for the candidate's request, he/she shall be immediately reexamined by another panel of oral examiners. In such event, the first oral examination will be disregarded and only the candidate's performance on the reexamination shall be considered in determining his/her score on the examination.

H. A candidate who fails the Part I examination may request in writing that his/her examination be rescored by hand to verify the accuracy of the results as reported to him or her. Such a request is to be made within 60 days of his/her being notified of the results of the examination. The request must be accompanied by a check for $100 payable to the ABOS to cover the cost of hand scoring. There shall be no further appeal of a failure on the Part I examination.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Otolaryngology [ABOTO] to ascertain whether the information below is correct.)

Important Dates

September 20, 1998 Operative Experience Report diskettes issued to new residents or returned to returning residents
March 27, 1999 Otolaryngology Training Examination
April 10, 1999 Applications for 1999 Written Examination become available
April 17-18, 1999 Oral Examinations for qualifying candidates from 1998 Written Exam
July 10, 1999 Applications due. To avoid late fees, the envelope must be postmarked July 10 or before, and all required items must be enclosed with the application, including the $2,000 fee
Operative Experience Report diskettes & print-outs due from all residents and new applicants

July 11-20, 1999 Resident Registry forms due from Program Directors
Applications postmarked between these dates (inclusive) accepted with $200 late fee
July 20, 1999  Applications postmarked after this date not accepted
August 5, 1999  Applicants notified of acceptance for examination
October 4, 1999  Written examination

Board Eligibility and Status Inquiries
The ABOto does not recognize or use the term "Board eligible." The Board states whether an individual is certified, is not certified, or is in the process of being examined (ie, between written and oral examinations).

Examination
The ABOto certification process consists of two phases: a written qualifying examination and an oral certifying examination.

All candidates must take a written examination, which is offered in the fall of each year. Candidates who do not achieve the qualifying score fail the exam and are not eligible to take the oral examination. They may retake the written exam in a subsequent year.

Candidates who meet or exceed the qualifying score must then successfully complete an oral examination, which is offered in the spring of each year, in order to become certified. Qualified candidates are given three consecutive opportunities to take the oral exam. If a passing score is not achieved after three exam cycles, the candidate must reapply to take the written exam and must again achieve a qualifying score in order to be permitted to retake the oral exam.

Written and oral examination scores are not combined. An individual must successfully complete both the written and the oral exam in order to be certified. A certificate is granted by the ABOto to a candidate who has met all the requirements and has satisfactorily passed its exams.

Requests for an appeal regarding a certification decision must be received within 30 days of receipt of exam results. A copy of the Appeals Policy is available upon request.

Prerequisite Requirements
1. Resident Registry
All residents must be registered with the ABOto during the first year of otolaryngology training in order to subsequently apply to take the certification examination.

A New Resident Form must be filed for each new resident by the program director by July 10 of the first year of otolaryngology-head and neck surgery training. The form must be signed by both the program director and the resident.

New residents then receive instructions on the procedure and deadline for submitting an official medical school transcript and verification of previous training.

The program director subsequently submits a Resident Evaluation Form for each returning resident by July 10 of each year. It must be noted whether the previous year was successfully completed, and the form must be signed by both the program director and the resident.

Resident Evaluation Forms become part of the individual's ABOto file, and are a prerequisite for application for the certification examination.

Credit may not be granted by the ABOto for any year of training for which an Evaluation Form is not received.

2. Operative Experience Report (OER)
All residents maintain a log of their surgical procedures on a computer diskette during otolaryngology-head and neck surgery training.

A disk is prepared at the ABOto office for each new resident, and disks are sent to the resident's program director for distribution in early September.

Throughout the year, each resident maintains a record of his or her surgical procedures on the computer disk.

All residents return their disks to the ABOto by July 10 of each year. A printout, signed by the resident and the program director, is also submitted by July 10.

Residents who complete a full year of research between years of otolaryngology training and who perform no surgical cases during that year need not submit a disk for that year. However, a letter must be submitted by July 10 explaining this.

Data from the disk is transferred to a master database for review by the Credentials Committee. Disks are then returned to residents in early September.

A fee of $25 is charged for lost disks. A fee of $200 is charged for disks and/or printouts not received by the July 10 deadline.

Completion and return of OER data annually is a prerequisite for application for the certification examination.

Credit may not be granted by the ABOto for any year of training for which OER data is not recorded.

3. Transfers
A resident wishing to transfer from one residency program to another must notify the ABOto in writing at least 6 weeks prior to the date of transfer and must explain the circumstances of the proposed transfer.

Letters from the current and prospective directors of training must also be submitted:

- The letter from the current program director must verify the exact amount of training successfully completed in the program.
- The letter from the prospective program director must verify that sufficient residency positions, accredited by the Residency Review Committee for Otolaryngology of the Accreditation Council for Graduate Medical Education (ACGME), exist in the program to provide the transferring resident with the training necessary to meet the requirements of the ABOto for certification.

Leaves of Absence
Leaves of absence and vacation may be granted to residents at the discretion of the program director in accordance with local rules. The total of such leaves and vacation may not exceed 6 weeks in any 1 year. If a longer leave of absence is granted in any year, the required period of graduate medical education may be extended accordingly.

Training Requirements
Training programs in otolaryngology-head and neck surgery in the United States are evaluated by the Residency Review Committee for Otolaryngology, which consists of representatives from the American Medical Association, the American College of Surgeons, and the ABOto, and are accredited by the ACGME. Information concerning approved educational programs can be found in the Graduate Medical Education Directory, published by the American Medical Association.

Currently, all training specified below must be completed in programs accredited by the ACGME or in programs in Canada accredited by the Royal College of Physicians and Surgeons of Canada. However, individuals who enter otolaryngology-head and neck surgery training July 1, 2000, or thereafter must complete all training specified below in ACGME-approved programs.

The applicant whose residency training began July 1, 1997, or thereafter must have satisfactorily completed a minimum of 5 years of residency training as follows:
1. At least 1 year of general surgical training. It is preferred that the general surgical residency be taken prior to otolaryngologic training, but it may not be taken after otolaryngologic training.
2. At least 4 years of residency training in otolaryngology-head and neck surgery. This training must involve increasing responsibility each year and must include a final year of senior experience. This final year must be spent within the accredited program in which the previous year of training was spent, unless prior approval is obtained from the ABOto.

All residency training must be completed in a manner acceptable to the head of that residency program.

Foreign Training

An applicant who enters otolaryngologic training in the United Kingdom or the Republic of Ireland prior to July 1, 2000, in a program accredited by the Specialized Advisory Committee, and who receives a certificate of accreditation in otolaryngology from the Joint Committee on Higher Surgical Training in the United Kingdom and the Republic of Ireland, may be considered for examination.

An applicant who enters otolaryngologic training under the New Zealand program after January 1, 1984, but before July 1, 1990, and who passes the examination leading to Fellowship in the Royal Australasian College of Surgeons may be considered for examination.

An applicant who enters otolaryngologic training under the Australian program after January 1, 1986, but before July 1, 2000, and who passes the examination leading to Fellowship in the Royal Australasian College of Surgeons may be considered for examination.

Application for Examination

There is no required time interval between completion of the residency program and making application for examination. However, all residency training must be successfully completed before the date of the examination in any given year.

Application materials for the written examination in any given year become available April 10 and must be completed and returned (postmarked) by July 10 of that year. The application consists of the following:

1. Resident Registry Evaluations, submitted annually by the program director.
2. Official medical school transcript, submitted during the first year of otolaryngology training. The applicant must be a graduate of an approved school of medicine or osteopathy.
3. Verification of surgery training and additional residencies, if applicable, submitted during the first year of otolaryngology training.
4. Application Form, signed by the program director and another ABoto diplomat.
5. Verification of Otolaryngology Residency Form, signed by the program director, attesting to satisfactory completion of the training program.
6. Verification of all licenses to practice medicine, showing unrestricted status and date of expiration. All applicants must submit evidence of medical licensure, with the exception of the following:
   a. Individuals who have completed residency training but who will enter a fellowship program utilizing an institutional license must submit a statement from the program director as evidence of this fact.
   b. Individuals who have completed residency training but who will go on to practice medicine in a foreign country not requiring licensure must make a written request to be accepted for the examination without medical license. Such requests must be submitted with the application.
7. Operative Experience Report (diskette and printout), which lists procedures assisted in and performed by the applicant during otolaryngology residency.
8. The applicant must possess high moral, ethical, and professional qualifications as determined by, and in the sole discretion of, the Board. Additional information may be requested by the Board from the following: local medical society, Board-certified otolaryngologists from the geographical area in which the applicant practices, the director of the applicant's training program, hospital chiefs of staff, and/or other individuals and entities who may have knowledge of the applicant's moral and ethical standing, qualifications, or abilities.

Applications are approved by the Credentials Committee in August, and applicants are then notified if they have been approved for examination. The Board reserves the right to reject any application.

Applications are valid for one written exam and three oral exams. At the conclusion of this period, or upon failure of the written exam, the application expires, and individuals are required to submit new forms.

Applicants With Special Disabilities

The ABoto fully supports the intent of the Americans with Disabilities Act (ADA). Upon request, it will make reasonable accommodations in its examination procedures for candidates with documented disabilities. An applicant who believes that he or she is disabled within the meaning of the ADA law should request detailed information concerning ABoto's policy regarding accommodation so that his or her special needs can be met in a timely manner. Documentation of the disability must accompany the application.

Fees

1. General Information
   a. Fees are not refundable, nor can they be "held over" to a subsequent exam.
   b. All fees must be paid in US funds. Applicants residing outside the United States must submit payment by International Money Order.
   c. Fees must be paid in full by the stated deadlines. Applications without payment will not be processed.
   d. A fee of $200 will be charged for any application or portion thereof postmarked between July 11 and July 20 (inclusive). Applications postmarked after July 20 are not accepted.
   e. A fee of $25 will be charged for any check returned by the bank for insufficient funds.
   f. Fees are subject to change at the discretion of the Board.

2. New Applicants
   a. The examination fee of $2,000 is due with the application by July 10.
   b. Individuals who become candidates for the oral examination (by achieving the qualifying score on the written exam) take their first oral examination at no additional cost.
   c. Candidates are given three consecutive opportunities to take the oral examination. A fee of $1,200 will be charged for the second and/or third oral exam.

3. Reapplicants
   a. If an individual fails the written examination, or if a passing score is not achieved after three oral exams, the individual must
reapply to take the written exam, and $2,000 must accompany the reapplication form.
b. Individuals who again become oral candidates follow the same procedure and pay the same fees as outlined in paragraph 2b and 
c. of the “New Applicants” section above.

**Purpose of Examination**

The purpose of the examination is to determine the candidate’s knowledge, skill, and understanding in the following categories:

1. Morphology, physiology, pharmacology, pathology, microbiology, biochemistry, genetics, and immunology relevant to the head and neck; the respiratory and upper alimentary systems; the communication sciences, including knowledge of audiology and speech-language pathology; the chemical senses; and allergy, endocrinology, and neurology as they relate to the head and neck

2. Diagnosis and diagnostic methods including audiologic and vestibular assessments, electrophysiologic techniques, and other related laboratory procedures for diseases and disorders of the ears, the respiratory and upper alimentary systems, and the head and neck

3. Therapeutic and diagnostic radiology, including the interpretation of medical imaging techniques relevant to the head, neck, and thorax, including the temporal bone, skull, nose, paranasal sinuses, salivary and thyroid glands, larynx, neck, lungs, and esophagus

4. Diagnostic evaluation and management of congenital anomalies, allergy, trauma, and other diseases in the regions and systems mentioned above

5. The cognitive management, including operative intervention with its preoperative and postoperative care, of congenital, inflammatory, endocrine, neoplastic, degenerative, and traumatic states, including:
   a. temporal bone surgery
   b. paranasal sinus and nasal surgery
   c. skull-base surgery
   d. maxillofacial surgery including the orbits, jaws, and facial skeleton
   e. aesthetic, plastic, and reconstructive surgery of the face, head, and neck
   f. surgery of the thyroid, parathyroid, pituitary, and salivary glands
   g. head and neck reconstructive surgery relating to the restoration of form and function in congenital anomalies and head and neck trauma, and associated with ablative operations
   h. endoscopy, both diagnostic and therapeutic
   i. surgery of the lymphatic tissues of the head and neck

6. The habilitation and rehabilitation techniques and procedures pertaining to respiration, deglutition, chemoreception, balance, speech, and hearing

7. The current literature, especially pertaining to the areas listed above

8. Research methodology

   In order to assist otolaryngology program directors in evaluating their programs, the Board reports each applicant’s examination results to the director of the program in which the applicant completed his/her senior resident year.

**Examination Procedure**

The Board vigorously enforces the highest standards of honesty and integrity in its examination process. Accordingly, the following are considered a breach of ABoto policy and are forbidden, and may be sufficient cause for the ABoto to terminate an applicant’s participation in the examination, to invalidate the results of the examination, to withhold an applicant’s score or certificate, to bar an applicant permanently from all future examinations, to revoke a certificate, or to take other appropriate action:

1. Falsification of the application or the submission of any falsified documents to the ABoto

2. The giving or receiving of aid in the examination, including, but not limited to, copying answers from another candidate or permitting one’s answers to be copied, as evidenced by observation at the time of the examination or by statistical analysis afterward

3. The offer of any financial or other benefit to any director, officer, employee, proctor, or other agent or representative of the ABoto in return for any right, privilege, or benefit that is not usually granted by the ABoto to other similarly situated candidates or persons

4. The unauthorized possession, reproduction, recording, discussion, or disclosure of any material, including, but not limited to, written or oral examination questions or answers before, during, or after the examination

Proctors are required to report any suspected irregularity during an examination. A candidate may be moved to a more isolated area, or his/her participation in the examination may be terminated. Additionally, the ABoto may undertake statistical studies of a candidate's answers compared with the answers of other participants in the examination to provide evidence that would support or fail to support a suspected irregularity. If, in the opinion of the ABoto, there exists a probability that an irregularity occurred, the ABoto will afford the requested individual(s) procedural due process in order to assure fairness in the determination as to whether an irregularity occurred.

The ABoto will not report scores or grant certification on the basis of scores that it determines to be invalid and reserves the right to take whatever legal action is indicated with regard to violation of ABoto copyright or examination violations.

**Certification, Rejection, and Revocation (from The Bylaws, Article VI)**

The Board shall issue an appropriate certificate of qualification in otolaryngology (or in a subdivision thereof) to those who show themselves worthy of such certification according to the requirements of training, experience, and demonstrated competence as stated in the current ABoto Booklet of Information.

No certificate shall be issued, and any certificate issued by the Board shall be subject to revocation at any time by the Board, if it shall determine that the person involved:

1. did not possess the required qualifications and requirements for examination, whether or not such deficiency was known to the Board or any director thereof, or could have been ascertained by the Board prior to examination or at the time of the issuance of a certificate, as the case may be.

2. made a material misstatement or withheld information in his/her application or any other representation to the Board or any committee thereof, whether intentional or unintentional.

3. has been convicted by a court of competent jurisdiction of any felony or misdemeanor involving moral turpitude and, in the opinion of the Board, having a material relationship to the practice of medicine.

4. has a license to practice medicine revoked, or shall have been disciplined or censured by any court or other body having proper jurisdiction and authority because of any act or omission arising from the practice of medicine.

If the Board determines to withhold or revoke any certificate for any reason, the person affected thereby shall be given written notice of the reasons therefor. Such actions by the Board shall be regarded as final unless such person requests a review of such action within 30 days after notice thereof has been mailed by the Board.

(These criteria and conditions are subject to change without notice. Please contact the American Board of Pathology [ABP] for current requirements.)

Qualification Requirements for Examination

All applications for certification are evaluated by the Credentials Committee of the ABP. The evaluation process includes the consideration of the following four requirements:

I. Professional Education

II. Medical Licensure

III. Pathology Training Requirements

IV. The Credentialing Year

I. Professional Education

A candidate must have graduated from a medical school in the United States or Canada accredited by the Liaison Committee on Medical Education, graduated from an osteopathic college of medicine accredited by the Bureau of Professional Education of the American Osteopathic Association, or graduated from a medical school outside the United States or Canada acceptable to the ABP.

A graduate of a medical school outside the United States or Canada must submit with the application a notarized copy of the medical school diploma, along with an English translation, showing the medical degree and the date that it was awarded. A certificate showing that the applicant has passed a final examination is not acceptable.

II. Medical Licensure

The candidate must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy issued by one of the licensing agencies of the United States or Canada.

III. Pathology Training Requirements

To acknowledge the diverse activities in the practice of pathology and to accommodate the interests of individuals wanting to enter the field, the ABP offers primary certification through one of the following three routes: combined anatomic pathology and clinical pathology, anatomic pathology only, and clinical pathology only. A variety of specialty certificates is offered. Under certain circumstances, primary certification in anatomic pathology or clinical pathology can be combined with one of the subspecialty certifications.

Only pathology training taken in the United States or, in certain circumstances, in Canada is acceptable toward meeting the ABP requirements. The training must be in programs that have been inspected and accredited by the Accreditation Council for Graduate Medical Education (ACGME) or the Royal College of Physicians and Surgeons of Canada (RCPSC) or specifically approved by the ABP.

A. Primary Certification

In addition to accredited pathology training, all applicants for primary certification must meet the 1-full-year credentialing requirement as defined under Section IV, "The Credentialing Year."

1. Training. The candidate must satisfactorily complete pathology training in a program accredited by the ACGME or the RCPSC as follows:

a. Combined Anatomic Pathology and Clinical Pathology (AP/CP) Certification

Four full years of full-time, approved training in an accredited APCCP-4 program that includes at least 18 months of structured training in anatomic pathology and 18 months of structured training in clinical pathology, and either an additional 12 months of full-time, continued structured training in anatomic pathology and/or clinical pathology or 12 months of full-time, approved flexible training in a specific area of pathology as part of the defined 4-year accredited AP/CP training program.

c. Clinical Pathology (CP) Certification

1. Three full years of full-time, approved training in clinical pathology in an accredited APCCP-4 program that includes at least 24 months of structured training in clinical pathology, and either an additional 12 months of full-time, continued structured training in clinical pathology or 12 months of full-time, approved flexible training in a specific area of pathology as part of the defined accredited training program.

2. Advanced Pathology Training Credit Mechanisms. Under special circumstances, advanced credit may be given by the mechanisms described hereafter. Advance credit is any medically relevant, postbaccalaureate, 12-month experience that is not approved by the ACGME for training in pathology and is relevant to the education of pathologists as determined by the ABP and can be applied to satisfy the flexible year in pathology. The acceptance of advanced credits as substitutes for accredited pathology training toward primary certification is not automatic.
and is evaluated on an individual basis. Advanced credit is given only for activities that have occurred in either the United States or Canada. The total combined period of advanced pathology training credit allowed for in paragraphs a and b in this section (III.A.2) will not exceed 12 months and can be applied only to the flexible year of required pathology training necessary for certification in APCP, AP, or CP. Advanced credit cannot be applied to combined primary and subspecialty certification requirements.

To avoid any misunderstanding, potential applicants should communicate with the ABP early in the training period to ascertain whether credit may be acceptable. The pathology training program director will be asked to assess the proposal and to provide a recommendation as to the amount of credit that the director believes the candidate should receive. The recommendation should be made only after the pathology training program director has observed the performance of the applicant.

The ABP will notify the director of the pathology training program of such potential credit. Prior to the candidate's admission to the certifying examination, the director of the final year of training must certify that the candidate is fully qualified to sit for the examination.

a. Candidates holding a PhD degree in a special discipline of pathology or a basic science related to pathology may, under certain circumstances, obtain pathology training credit. The evaluation and granting of the amount of training credit will depend on an assessment by the ABP regarding relevance of the field of study to anatomic pathology or clinical pathology.

b. Research with a direct application to the practice of anatomic pathology or clinical pathology and not leading to an advanced degree may be considered for credit not to exceed 12 months in combination with other advanced credits. The research must be full time, and the applicant must be able to demonstrate active participation in the generation of the hypothesis and development of the protocol. No credit is given for research employment as a technician or technologist. The ABP encourages research and believes that candidates should carry on investigation, teaching, and the publication of scientific papers during primary training.

3 Postpathology course Fellowship and Student Fellowship Training During Medical School—Criteria for Acceptance. Under certain circumstances, candidates may receive advanced pathology training credit toward the primary certification requirements for postpathology-course fellowship training or research in pathology. Such credit is not given toward the requirements for subspecialty certification. The credit is assessed on an individual basis. Granted credit will be assigned only to the flexible year of required primary training. Credit will not be given toward the required 18 months of structured anatomic pathology training or the required 18 months of structured clinical pathology training necessary to qualify for combined anatomic pathology and clinical pathology certification. If the ABP has approved the fellowship program and has been informed of the candidate's successful completion, an application for advanced credit is not necessary.

Advanced credit toward single certification in anatomic pathology or single certification in clinical pathology will be given toward only the flexible year of required pathology training and not toward the 24 months of required structured training.

The guidelines for acceptable postpathology-course fellowship training for credit are:

a. The fellow must have fully and satisfactorily completed the medical school year in which the pathology course is given.

b. The fellow must not receive credit for fellowship activities toward the requirements for graduation from medical school.

c. Training must be full-time in a department of pathology that has a fully accredited pathology training program.

d. Training must be validated by the director of the student fellowship program and be approved as an acceptable experience by the director of the accredited pathology training program in which the candidate is registered.

e. No credit is given for electives or for courses that are part of the medical school curriculum.

f. Training must be under the direction of the director of the pathology training program or the chair of the department of pathology.

g. A description of proposed activities, responsibilities, and assignments for anatomic pathology, clinical pathology, and research must be available and on file prior to the beginning of the fellowship. If a formal institutional program exists, a copy should be filed with the ABP.

h. A validation and evaluation report must be submitted on completion of the fellowship by the pathology training program director or chair of the department of pathology if the fellow is seeking credit toward certification requirements.

4. Interval of Training. A candidate for primary certification who completed the required pathology training 5 years or more prior to the date of submission of an application for certification must have 1 year of additional training in pathology in a program accredited for such training by the ACGME or the RCPSC. This additional requirement must be met during the 3-year period immediately preceding the date of submission of an application.

B. Subspecialty Certification

All candidates applying for subspecialty certification must hold a primary certificate from the ABP or, where indicated, from another member medical specialty board of the American Board of Medical Specialties (ABMS).

Credit is not given for pathology training taken outside of the United States, nor is credit given for training in a subspecialty area that was part of the training program for the primary examination in AP and/or CP.

No advanced credit will be given toward the requirements for subspecialty certification by the mechanisms described in Section III.A.2, "Advanced Pathology Training Credit Mechanism."

1. Blood Banking/Transfusion Medicine (BB/TM)

a. For applicants who hold a certificate in anatomic pathology and clinical pathology, clinical pathology only, or a primary certificate plus a subspecialty certificate in hematology from another member medical specialty board of the ABMS: 1 full year of additional training in blood banking/transfusion medicine in a program accredited for such training by the ACGME.

b. For diplomates of the American Board of Anesthesiology: 1 full year of additional training in blood banking/transfusion medicine in a program accredited for such training by the ACGME.

c. For applicants, other than those described in 1.a or 1.b, who hold a primary certificate from a member medical specialty board of the ABMS: 2 full years of full-time training in blood banking/transfusion medicine in a program accredited for such training by the ACGME.

d. For applicants seeking combined certification in clinical pathology and blood banking/transfusion medicine, see Section III.C, "Combined Primary and Subspecialty Certification."

2. Chemical Pathology (Chem P)

a. For applicants who hold a certificate in anatomic pathology and clinical pathology or clinical pathology only: 1 full year of additional training in chemical pathology in a program accredited for such training by the ACGME.
b. For applicants, other than those described in 2.a, who hold a primary certificate from a member medical specialty board of the ABMS: 2 full years of full-time training in chemical pathology in a program accredited for such training by the ACGME.

c. For applicants seeking combined certification in clinical pathology and chemical pathology, see Section III.C, “Combined Primary and Subspecialty Certification.”

3. Cytopathology (CYP)
   a. For applicants who hold a certificate in anatomic pathology or combined anatomic and clinical pathology: 1 full year of full-time supervised training in cytopathology in a program accredited for such training by the ACGME.
   b. For applicants seeking combined certification in anatomic pathology and cytopathology, see Section III.C, “Combined Primary and Subspecialty Certification.”

4. Dermatopathology (DP)
   Certification in dermatopathology is a joint and equal function of the ABP and the American Board of Dermatology (ABD). Such function relates to qualifications of candidates, standards of examinations, and the form of the certificate.
   All candidates applying for examination must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in the United States or Canada.
   a. Prerequisites
      The ABP and the ABD will admit candidates to examination for subspecialty certificates in dermatopathology who are otherwise qualified and who
      1. are diplomates of the ABP and the ABD;
      2. hold a primary certificate from the ABP (anatomic pathology or combined anatomic pathology and clinical pathology) or the ABD and have completed at least 1 year of training in dermatopathology in a program accredited for such training by the ACGME. This additional training must be taken after the candidate has met the full training requirements for certification in pathology or dermatology.
   b. Training
      Training programs in dermatopathology are a joint and equal function of the departments of pathology and dermatology. The pathologist applicant must spend half of the required training time in clinical dermatology.

Committee for Dermatopathology
David B Troxel, MD, Chair (ABP)
Ronald P Rapini, MD, Vice Chair (ABD)
Evan R Parmer, MD (ABD)
Juan Rosai, MD (ABP)
Clifford R White, Jr, MD (ABD)
Kay Herrin Woodruff, MD (ABP)
Candidates may obtain an application as follows:
Pathologists
William H Hartmann, MD
Executive Vice President
American Board of Pathology
PO Box 25915
Tampa, FL 33622-5015

Dermatologists
Harry J Hurley, MD
Executive Director
American Board of Dermatology
Henry Ford Hospital
1 Ford Place
Detroit, MI 48202-3450

5. Forensic Pathology (FP)
   a. For applicants who hold a certificate in anatomic pathology and clinical pathology or anatomic pathology only: 1 full year of additional supervised training in forensic pathology in a program accredited for such training by the ACGME.
   b. For applicants seeking combined certification in anatomic pathology and forensic pathology, see Section III.C, “Combined Primary and Subspecialty Certification.”

6. Hematology (HEM)
   a. For applicants who hold a certificate in anatomic pathology and clinical pathology, anatomic pathology only, clinical pathology only, or a primary certificate plus a subspecialty certificate in hematology from another member medical specialty board of the ABMS: 1 full year of additional supervised training in hematology (pathology) in a program accredited for such training by the ACGME.
   b. For applicants, other than those described in 6.a, who hold a primary certificate from a member medical specialty board of the ABMS: 2 full years of full-time training in hematology (pathology) in a program accredited for such training by the ACGME.
   c. For applicants seeking combined certification in clinical pathology or anatomic pathology and hematology, see Section III.C, “Combined Primary and Subspecialty Certification.”

7. Medical Microbiology (MMB)
   a. For applicants who hold a certificate in anatomic pathology and clinical pathology, anatomic pathology only, clinical pathology only, or a primary certificate plus a subspecialty certificate in infectious disease from another member medical specialty board of the ABMS: 1 full year of additional training in medical microbiology in a program accredited for such training by the ACGME.
   b. For applicants, other than those described in 7.a, who hold a primary certificate from a member medical specialty board of the ABMS: 2 full years of full-time training in medical microbiology in a program accredited for such training by the ACGME.
   c. For applicants seeking combined certification in clinical pathology and medical microbiology, see Section III.C, “Combined Primary and Subspecialty Certification.”

8. Neuropathology (NP)
   a. For applicants who hold a certificate in anatomic pathology and clinical pathology or anatomic pathology only: 2 full years of additional supervised training in neuropathology in a program accredited for such training by the ACGME, or
   b. For applicants who hold a certificate in clinical pathology or a primary certificate from another member medical specialty board of the ABMS:
      1. One full year of approved training in anatomic pathology in a program accredited for such training by the ACGME and
      2. Two full years of additional supervised training in neuropathology in a program accredited for such training by the ACGME.
   c. For applicants seeking combined certification in anatomic pathology and neuropathology, see Section III.C, “Combined Primary and Subspecialty Certification.”

9. Pediatric Pathology (PP)
   a. For applicants who hold a certificate in anatomic pathology and clinical pathology or anatomic pathology only from the ABP or anatomic pathology or general pathology from the RCPSC: 1 full year of additional supervised training in pediatric pathology in a program accredited for such training by the ACGME.
   b. The pediatric pathology training or experience should occur after the completion of the full training requirements necessary to qualify for certification in AP/CP or AP.
C. Combined Primary and Subspecialty Certification

Under certain circumstances, subspecialty training may be arranged in conjunction with the primary training requirements, permitting a candidate to qualify for a combined certificate. All applicants for combined certification must also meet the additional credentialing year requirement. (See Section IV, “The Credentialing Year.”)

Advanced credit will not be given toward the requirements for combined certification (involving primary training and subspecialty training) by the mechanisms described in Section III.A.2, “Advanced Pathology Training Credit Mechanisms.”

The acceptable combinations of certification and required training are:

1. Anatomic Pathology and Cytology—3 full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and 1 full year of approved training in cytology in a program accredited for such training by the ACGME.

2. Anatomic Pathology and Forensic Pathology—2 full years of approved training in anatomic pathology in a program accredited for such training by the ACGME, 1 full year of approved training in forensic pathology in a program accredited for such training by the ACGME, and 1 additional year of approved training in anatomic pathology or in a specific area of pathology such as neuropathology, toxicology, or chemical pathology.

3. Anatomic Pathology and Hematology—2 full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and 2 full years of approved training in hematology in a program accredited for such training by the ACGME.

4. Anatomic Pathology and Medical Microbiology—2 full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and 2 full years of approved training in medical microbiology in a program accredited for such training by the ACGME.

5. Anatomic Pathology and Neuropathology—2 full years of approved training in anatomic pathology and 2 full years of approved training in neuropathology in a program accredited for such training by the ACGME with adequate experience in diagnostic neuropathology.

6. Clinical Pathology and Subspecialty Certification—3 full years of approved training in clinical pathology in a program accredited for such training by the ACGME and 1 full year of approved subspecialty training in blood banking/transfusion medicine, chemical pathology, hematology, or medical microbiology in a program accredited for such training by the ACGME, as defined in Section III.B, “Subspecialty Certification,” or 2 full years of approved training in clinical pathology and 2 full years of approved subspecialty training in blood banking/transfusion medicine, chemical pathology, hematology, or medical microbiology in a program accredited for such training by the ACGME, as defined in Section III.B, “Subspecialty Certification.”

IV. The Credentialing Year

The 12-month credentialing year requirement is in addition to the required pathology training and can be satisfied only after the candidate has obtained the medical degree.

The ABP considers the most appropriate and, for applicants, the most beneficial approach to meeting this requirement to be 1 full year of full-time, approved clinical training in the United States or Canada (Pathway A). The ABP recognizes that such is not always possible and therefore offers alternative pathways to meeting the requirement.

The requirement can be met by:

A. One full year of full-time, approved graduate medical education in a transitional year training program or in a clinical area of medicine such as internal medicine, surgery, obstetrics and gynecology, pediatrics, emergency medicine, or family practice, or

B. One full year of full-time research in pathology or in another clinical discipline, provided that the research was done in the United States or Canada and has clearly defined clinical implications.

The guidelines for acceptance of research activity are:

1. The research activity must have taken place after the candidate has obtained a recognized medical degree.

2. The candidate must have had a clearly defined investigator role in the research program.

3. The research must have directly involved patients, or materials obtained from patients, or techniques that can be applied directly to the diagnosis of human disease or to the understanding of the basic mechanisms of disease.

4. Credit for research activity completed prior to entering a pathology training program must be approved by the director of the pathology training program and the ABP. Such research must have occurred in an institution in the United States or Canada;

C. One year of training in one of the recognized subspecialty fields of pathology that includes clinical correlation and patient contact. (This year cannot be used to meet the requirements for both the credentialing year and subspecialty certification.)

D. The satisfactory completion of 1 full year of a combination of clinical training, clinical research, or subspecialty pathology training in addition to the required pathology training necessary to qualify for certification in anatomic pathology and clinical pathology, anatomic pathology, or clinical pathology. The pathology training program director is responsible for defining and justifying the year to the ABP. The ABP recommends that for applicants meeting the credentialing year requirement by combinations of pathways A, B, and C (shown above), the periods of activity be at least 4 months in duration wherever possible.

Under certain circumstances, credit toward the credentialing year may be given for pathology experience if the applicant holds a primary certificate in pathology issued by the independent national certifying body in a country other than the United States or Canada, provided that the certification was by national examination following 4 full years of approved training in pathology.

E. Under certain circumstances, clinical training taken outside the United States and Canada may be acceptable toward meeting the ABP credentialing year requirement of clinical training, provided that the following criteria are fully met and validated:

1. Clinical training taken after the candidate obtained a medical degree acceptable to the ABP

2. Satisfactory completion of 1 full year of full-time training in clinical medicine in a multidisciplinary training program (internship) or in a training program in internal medicine, pediatric medicine, general surgery, or obstetrics and gynecology

3. Documentation from the training institution that the program in question has been inspected and approved for graduate medical education

4. Indication from the director of the clinical training program that the candidate was registered in the program, completed the training satisfactorily, and was the physician of record in the diagnosis and treatment of patients throughout the full 12 months

5. Recommendation from the pathology training program director in regard to the person’s request

The acceptability of clinical training toward meeting the ABP requirements is assessed on an individual basis, and it is imperative that an opinion be obtained from the ABP well in advance of
the submission of an application for certification. The amount of advanced credit for clinical training outside the United States and Canada toward the ABP requirements for certification cannot exceed a total of 12 months.

It is the responsibility of the person seeking credit to ensure that all validating items for these criteria are submitted to the ABP for consideration. No assessment of possible credit will be given until all validating and reference information has been received.

**Application for Examination**

Requests for application forms must be made in writing to the ABP. Completed original application forms should be returned with the required credentials and the application-examination fee. An application cannot be given consideration unless it is accompanied by the application-examination fee.

**Reporting of Results**

Coinciding with the accreditation visit from the ACGME, each pathology training program director and the RRC will receive a report of the cumulative examination performance of graduates of that training program.

**Fees**

The application-examination fee schedule for 2000 is as follows:

- Anatomic pathology only $1,000
- Clinical pathology only $1,000
- Anatomic pathology portion of combined AP/CP $1,000
- Clinical pathology portion of combined AP/CP $1,000
- Combined anatomic pathology and clinical pathology $1,200
- Subspecialty $1,200
- Anatomic pathology or clinical pathology combined with subspecialty $1,400

(For this fee to apply, the primary and the subspecialty examinations should be taken in sequence as offered, AP or CP examination first and the subspecialty examination the next time offered and only if the application is for the combined examination.)

The application-examination fee includes a nonrefundable processing fee of $100. If the different divisions of the AP/CP and the combined primary and subspecialty examinations are taken at separate sitting, there is a separate examination fee for each sitting. If the candidate fails in the examination, admission to a repeat examination is permitted, but any reexamination must occur within the period of qualification described under “Qualification Period for Examination.” The applicant must pay the examination fee according to the current fee schedule before another examination can be taken. If, after having applied for a specific examination, the candidate requests, in writing, a transfer to a future examination prior to the final filing date, there is a transfer fee of $100.

In the event of the candidate’s illness at the time of the examination, validated by the candidate’s attending physician, a major portion of the application-examination fee will be either transferred to the next examination or refunded. It is the candidate's responsibility to notify the ABP of any change that may affect a scheduled examination.

**Vacation, Maternity, and Other Leave**

Each institution sponsoring a pathology training program should develop individual sick, vacation, and other leave policies for the resident. However, 1 year of approved training credit toward ABP certification requirements must be 52 weeks in duration and must include at least 48 weeks of full-time pathology training.

Furthermore, unused vacation and other leave time may not be accumulated to reduce the overall duration of training.

**Irregular Behavior**

In the interest of protecting the integrity of the ABP and its certification examinations, the following irregular behaviors may be sufficient to bar a person from future examinations, terminate participation in an examination, invalidate the results of a candidate’s examination, cause the withholding or revocation of scores or certificates, or merit other appropriate action by the ABP:

1. The giving or receiving of aid in the examination as evidenced either by observation or by statistical analysis of candidates’ answers

2. The unauthorized possession, reproduction, or disclosure of any ABP examination-related materials, including, but not limited to, examination questions or answers, before, during, or after the examination

3. The offering of any benefit to any agent of the ABP in return for any right, privilege, or benefit that is not usually granted by the ABP to other similarly situated candidates or persons

4. Possession of notes, books, or any other examination aid in the vicinity of the examination room

In addition, the ABP may withhold a candidate’s scores and require that the candidate retake one or more portions of the examination if presented with sufficient evidence that the security of the examination has been compromised, notwithstanding the absence of any evidence of the candidate's personal involvement in such activities.

**Chemical Dependency**

Applications for certification from individuals with a history of chemical dependency as reported to the ABP will not be accepted unless the applicant submits documentation acceptable to the ABP that the applicant

1. has satisfactorily completed the program of treatment prescribed for the applicant's condition and

2. has been drug-free for a period sufficient to indicate recovery, which, in most cases, would be at least 3 years.

Candidates who have been declared qualified to sit for a certifying examination and who have a current problem of chemical dependency as reported to the ABP will not be admitted to the examination. Denial of admission to examination may result in the loss of examination opportunities and, ultimately, in the decision to declare the candidate’s application void for failure to complete the requirements for certification within the qualification time period allotted to every candidate.

**Qualification Period for Examination**

The ABP does not recognize or use the term “board eligible” and does not issue statements concerning “board eligibility.” An applicant is declared qualified for examination only after an application has been received and approved by the Credentials Committee.

The ABP will permit a candidate who has qualified for a primary examination on the basis of approved training to sit for the examination during a period not to exceed 6 years after being declared qualified to take the examination. A candidate who has qualified for a subspecialty examination will be permitted to sit for the examination for a period not to exceed 3 years. For candidates who have been unsuccessful in the subspecialty examinations given biennially, the period of qualification will be extended to include three administrations of the subspecialty examination. When this period has expired and the candidate has been unsuccessful, additional periods of qualification for examination will be permitted on submission of documentation that the candidate has obtained further
training or experience subsequent to the beginning of the period of qualification.

At any time after declaring a candidate qualified for examination, the Credentials Committee, at its discretion, may withdraw such qualification or, as a condition, may require satisfaction by the candidate of specified conditions. In the exercise of its discretion under this regulation, the Credentials Committee shall be entitled to act without reason assigned.

If it is determined that an applicant has falsified information in the application form, the applicant will not be approved for the certifying examination and must wait a period of 3 years before being permitted to file a new application. The applicant will not be considered qualified to sit for the certifying examination during the 3-year interim.

Unsuccessful Candidates

Once the initial period of qualification has terminated, candidates who have been unsuccessful in any of the certification examinations may apply for one additional period of qualification based on satisfactory experience in the field of pathology in question. A one-time extension will be granted on the submission of appropriate and acceptable documentation of 2 years of full-time experience in the discipline of requested certification, or candidates may apply for one additional period of qualification based on satisfactory completion of 1 additional year of training in an ACGME-accredited training program in the discipline of the application.

Candidates who continue to be unsuccessful in the certification examination may apply for an additional period of qualification, which may be granted only to those who submit evidence of satisfactory completion of 1 additional year of training in an ACGME-accredited training program in the discipline of the application.

Examination Dates

Examinations are held at the discretion of the ABP. The tentative schedules for forthcoming examinations are:

Anatomic Pathology and Clinical Pathology Examinations

All examinations are administered via the computer system in the ABP Examination Center in Tampa, Florida. Beginning in 2000, the primary certification examinations will be given in one cycle per year.

The 2000 examinations will begin on Monday, June 5, 2000, and will continue on a Monday, Tuesday, Wednesday weekly cycle until all qualified candidates have been examined.

Subspecialty Examinations

The subspecialty examinations in chemical pathology, medical microbiology, neuropathology, and pediatric pathology are given every 2 years.

CYP—July 13, 2000
BB/TM—July 27, 2000
HEM—August 31, 2000
FP—September 28, 2000
DP—November 10, 2000

Final Filing and Cutoff Dates

The final filing dates for receipt of applications or registrations are as follows:

• January 15 for primary examinations for all candidates
• April 1 for subspecialty examinations
• July 1 for dermatopathology examinations

If the candidate cancel an appearance for the examination after these dates or does not appear for the examination, the entire application-examination fee is forfeited.

Issuance of Certificate

On satisfactorily passing the appropriate examination(s), a candidate will be issued a certificate by the ABP in those fields of pathology for which the ABP accepted the credentials. Thus, a candidate who is qualified for the combined examination in anatomic pathology and clinical pathology, having fulfilled the minimum pathology requirement of 48 months and the credentialing year requirement of 12 months, will receive a certificate only after both parts (anatomic pathology and clinical pathology) of the examination have been passed.

Candidates qualified for examination in anatomic pathology or clinical pathology and a subspecialty area of pathology on the basis of the required training in each area will receive a certificate only after each of the examinations has been passed.

A candidate who has fulfilled all the prerequisites, including the minimum requirement of 36 months of approved training in anatomic pathology only or clinical pathology only, and the credentialing year activity will receive a certificate after passing the examination in anatomic pathology or clinical pathology.

Candidates qualified for combined AP/CP who pass only the AP portion or the CP portion of the examination may request an application for consideration of awarding a single certificate. Consideration will be given only to candidates who meet the requirements for the single certificate. For additional information on the awarding of single certificates, please contact the ABP.

If a candidate’s certificate is lost or destroyed, the ABP will issue a duplicate certificate on written request and justification, together with an engraving and handling charge of $50.

Revocation of Certificate

At its discretion, the ABP may revoke a certificate for due cause, including, but not limited to:

a. The diplomate did not possess the required qualifications and requirements for examination, whether or not such deficiency was known to the ABP or any committee thereof prior to examination or at the time of the issuance of the certificate, as the case may be.

b. The diplomate made a material misstatement or withheld information in the application or in any other representation to the ABP or any committee thereof, whether intentional or unintentional.

c. The diplomate engaged in irregular behavior in connection with an examination of the ABP (as described under "Irregular Behavior"), whether or not such practice had an effect on the performance of the candidate on an examination.

d. The diplomate was convicted by a court of competent jurisdiction of a felony or misdemeanor involving moral turpitude and, in the opinion of the ABP, having a material relationship to the practice of medicine.

e. There has been a limitation or termination of any right of the diplomate associated with the practice of medicine in any state, province, or country, including the imposition of any requirement of surveillance, supervision, or review by reason of violation of a medical practice act or other statute or governmental regulation, disciplinary action by any medical licensing authority, entry into a consent order, or voluntary surrender of license.

Revocation of certificates will be governed by procedures set forth in the ABP bylaws as amended from time to time.

Update of the ABP Certificate

The ABP will permit its diplomates to retake the examination in the area of pathology in which they are already certified for the purpose of updating their certificate(s). The application-examination fee and the passing requirements are the same as for initial candidates.
Successful candidates will be issued new, currently dated certificates.

Recertification

To enable diplomates to demonstrate continued competence in the practice of pathology, the ABP offers a voluntary process of recertification. For additional information on the recertification process, please request the ABP booklet on recertification.

Limitation of Subspecialty Certificates

As a condition of admission to an examination for subspecialty certification, an individual holding two or more subspecialty certificates (formerly special competence, special qualification, and/or added qualification) must surrender a sufficient number of certificates to reduce their number to one. If the individual fails the examination and the period of board qualification terminates, the surrendered certificate(s) will be restored. This action does not include subspecialty certificates (special qualification or special competence) in radioisotopic pathology or in dermatopathology.

Candidates with Disabilities

1. Policy. The ABP supports the intent of the Americans with Disabilities Act. The ABP will endeavor to provide qualified candidates who have documented disabilities the necessary auxiliary aids and services that do not fundamentally alter the measurement of the skills or knowledge the examination is intended to test or result in an undue burden.

2. Documentation of Disability. Candidates requesting accommodation due to a disability must provide documentation of the disability. Such documentation should include a specific diagnosis of the disability and include medical records or other documentation of the diagnosis of the disability by an appropriate medical professional. The ABP reserves the right to verify the disability and to request additional documentation as necessary. All required documentation acceptable to the ABP must be received no later than the application deadline.

3. Type of Accommodation. Candidates requesting accommodation must identify the type of accommodation requested. The ABP, however, will determine the type of accommodation to be made for a candidate with a verified disability. Accommodations that fundamentally alter the measurement of skills or knowledge the examination is intended to test will not be offered.

4. Application Deadline. Candidates requesting accommodations are urged to contact the ABP as far in advance of the examination as possible. Requests for accommodation and documentation of disability must be received no later than the application deadline.

Appeals Procedure

An individual who has received an unfavorable ruling regarding qualification to take an examination may initiate an appeal of such determination by making a written request for reconsideration to the ABP within 90 days of the date of the ruling.

A candidate who fails a certifying examination may request that the examination be rescored. The request must be made in writing within 90 days of the date the examination results were reported and must be accompanied by a fee of $50. There will be no further appeal from failure of an examination. There will be no discrimination in future dealings with the ABP against anyone who has requested an appeal.

Ann R Stark, MD, Boston, MA
Modena E H Wilson, MD, Baltimore, Maryland

(These criteria are subject to change. All applicants are advised to consult the American Board of Pediatrics (ABP) to ascertain whether any changes have been made, especially before undertaking any variations in the training program.)

Examination for Admission Requirements

An applicant for examination for certification (Note: Throughout the document the term "candidate" will be synonymous with applicant) must meet the following general requirements:

- The applicant must be a graduate of an accredited medical school in the United States or Canada or of a foreign medical school that is listed by the World Health Organization (WHO).

- A valid (current), unrestricted license to practice medicine in one of the states, districts, or territories of the United States or a province of Canada is a requirement for admission to the examination, but it may be submitted separately from the initial application. A candidate who is reregistering for the examination must submit the license with the reregistration material. If an applicant has any action pending regarding the right to have an unrestricted license to practice medicine, admission to the examination may be denied.

- The applicant must complete 3 years of pediatric training in programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) on the advice of the Residency Review Committee (RRC) for Pediatrics (Note Hereafter, accreditation will refer to accreditation by the RRC) or in programs in Canada accredited by the Royal College of Physicians and Surgeons of Canada (RCPSC).

- The ABP requires program directors to verify satisfactory completion of training and to evaluate the acceptability of the applicant as a practitioner of pediatrics.

Graduation from Medical School

The applicant must be a graduate of a medical school that has been accredited by the Liaison Committee on Medical Education (LCME) in the United States, the RCPSC in Canada, or the
American Osteopathic Association (AOA) in the United States. An applicant who is a graduate of a medical school outside the United States or Canada that cannot be accredited by the LCME, RCPSC, or AOA but is listed by WHO may apply for the examination if he or she has a standard certificate from either the Educational Commission for Foreign Medical Graduates (ECFMG) or the Medical Council of Canada.

The graduate of a foreign medical school must submit a photocopy of the medical school diploma showing the medical degree and the date it was awarded. A certificate showing that the applicant has passed a final examination is not acceptable.

**License Requirement**

The applicant must have a valid (current), unrestricted license to practice medicine in one of the states, districts, or territories of the United States or a province of Canada or unrestricted privileges to practice medicine in the US Armed Forces. A copy of the valid license must be received by October 1, 2000. Rerestricts must submit the license with the reregistration material.

Foreign nationals practicing abroad may be exempted from this policy upon presentation of proof of licensure equivalency in the country in which they reside. This proof must be received by October 1, 2000. Candidates who practice or plan to practice abroad must submit a letter, in addition to the licensure equivalency, stating that they will not practice in the United States or Canada.

The license requirement may be waived if, during the academic year 2000-2001, the applicant is in pediatric subspecialty training, nonpediatric specialty training, or serving as a chief resident (PL-4) in a state, province, or district in which the medical licensing board does not require an unrestricted license. In order to obtain a waiver, the program director of that training must submit written confirmation of the applicant's training to the ABP by October 1, 2000.

An applicant who takes the certifying examination but who does not meet the October 1, 1999, deadline for licensure will have the examination invalidated, will be disapproved, and will not receive a refund of the examination fee.

**Training Requirements**

An applicant must complete 3 years of postgraduate pediatric training in programs accredited by the RRC or, in Canada, by the RCPSC. (Note: The training requirements for individuals who graduated from medical school before July 1, 1978, are different from these requirements. Such applicants should contact the ABP for details.)

The training curriculum must be compatible with the Program Requirements for Residency Education in Pediatrics, which are published annually in the Graduate Medical Education Directory. During this period of training, the applicant is expected to assume progressively more clinical responsibility for the care of patients. Credit will not be given for training completed before the medical degree is awarded.

A year of supervised experience must be an integral part of the total 3-year program; this year must include 6 months of direct supervisory responsibility in general pediatrics (5 months for those beginning training after February 1, 1997).

The ABP recognizes four levels of pediatric training (PL-1 through PL-4) and defines these levels as follows:

- **PL-1**: The first postgraduate year in general comprehensive pediatrics in an accredited program.
- **PL-2**: The second postgraduate year in general comprehensive pediatric training in an accredited program following PL-1 but with increased responsibility for patient care and for the supervision of junior house staff and medical students.
- **PL-3**: The third postgraduate year in general comprehensive pediatric training in an accredited program but with increasing responsibility for patient care and supervision of junior house staff and medical students.
- **PL-4**: The fourth postgraduate year in general pediatric training in an accredited program when the applicant is designated as a chief resident.

**Credit for Training in Accredited Programs Other Than Pediatrics**

A physician transferring to pediatric residency training from another accredited residency, eg, family practice, internal medicine, transitional year, must correspond with the ABP to determine whether partial credit may be awarded for this training. Requests for credit must be submitted either by the candidate or the pediatric residency program director before the candidate enters pediatric residency training.

**Credit for Pediatric Training in Nonaccredited Programs**

The ABP has established requirements for a physician who has had at least 3 years of general comprehensive pediatric training in programs not accredited by the RRC or RCPSC (ie, international training or training in accredited osteopathic programs in the United States) and who wishes to apply for training credit. The interested physician, department chair, or program director must write to the ABP before training begins to be sure that the physician meets the requirements.

**Special Alternative Pathway**

The ABP recognizes that occasionally there will be an exceptional candidate who should be given special consideration to begin pediatric subspecialty training after the completion of the PL-2 year of general comprehensive pediatrics. Before the start of the PL-2 year, the department chair or program director must petition that a resident be considered for the Special Alternative Pathway (SAP), indicating that the candidate has superior overall competence. The subspecialty program director must also provide a letter outlining the clinical and research training proposed, including special requirements to be met during the PL-2 and PL-3 years. In addition, such candidates will be required to take a screening examination. The application material and the score on the screening examination will be reviewed by the Credentials Committee. An applicant who is approved for the SAP may not take the certifying examination until all training (no less than 5 years) is completed. Guidelines for the SAP are available from the ABP. Residents who wish to enter another specialty are not eligible for the SAP.

**Special Programs**

**Medicine/Pediatrics Program**

A special agreement exists with the American Board of Internal Medicine (ABIM) whereby an applicant may fulfill the training requirements of both the ABP and ABIM by completing 2 years of accredited training in general comprehensive pediatrics and 2 years of accredited training in general comprehensive internal medicine in an integrated approved program. The 4 years should be completed in the same combined training program; any deviation must be approved prospectively by both the ABP and the ABIM. Continuity clinics in each specialty must be provided throughout the 4 years. Guidelines for combined training have been approved by both the ABP and ABIM and are available by contacting either board. A list of institutions offering combined programs is published in the Graduate Medical Education Directory. An applicant may not take the certifying examination of the ABP until all 4 years of training have been completed.
Pediatrics/Emergency Medicine Program
A special agreement exists with the American Board of Emergency Medicine (ABEM) whereby an applicant may fulfill the training requirements of both the ABP and the ABEM by completing joint training in 5 years. All 5 years should be completed in the same combined training program; any deviation must be approved prospectively by both the ABP and the ABEM. Training programs must also be approved prospectively by both the ABP and the ABEM. Guidelines for combined training have been approved by both the ABP and the ABEM and are available by contacting either board. An applicant may not take the certifying examination of the ABP until all training has been completed.

Pediatrics/Medical Genetics Program
A special agreement exists with the American Board of Medical Genetics (ABMG) whereby an applicant may fulfill the training requirements of both the ABP and ABMG by completing joint training in 5 years. All 5 years should be completed in the same combined training program; any deviation must be approved prospectively by both the ABP and ABMG. Training programs must also be approved prospectively by both the ABP and ABMG. Guidelines for combined training have been approved by both the ABP and ABMG and are available by contacting either board. An applicant may not take the certifying examination of the ABP until all training in both programs has been completed.

Pediatrics/Neurology Program
A special agreement exists with the American Board of Psychiatry and Neurology (ABPN) whereby an applicant who completes at least 2 years of accredited training in general comprehensive pediatrics and the neurology training necessary to meet the requirements for certification in neurology with special qualifications in child neurology fulfills the training requirements of both the ABP and the ABPN. An applicant may not take the certifying examination of the ABP until all training has been completed.

Pediatrics/Physical Medicine and Rehabilitation Program
A special agreement exists with the American Board of Physical Medicine and Rehabilitation (ABPMR) whereby a physician interested in pediatric rehabilitation can qualify for admission to the certifying examinations of both the ABP and ABPMR. The residency training can be completed in 5 years in programs accredited by the RRCs of the ABP and the ABPMR. Proposed programs must be submitted to the ABP and ABPMR for approval before a candidate can be accepted into the joint training program. All training should be completed at an accredited institution; any deviation must be approved prospectively by both the ABP and the ABPMR. Guidelines for combined training have been approved by both the ABP and the ABPMR and are available by contacting either board. An applicant may not take the certifying examination of the ABP until all training has been completed.

Pediatrics/Psychiatry/Child and Adolescent Psychiatry Program
A special agreement exists with the American Board of Psychiatry and Neurology (ABPN), whereby an applicant may fulfill the training requirements for certification in pediatrics, psychiatry, and special qualifications in child and adolescent psychiatry by completing joint training in 5 years. Training includes 24 months of general comprehensive pediatrics, 18 months of child and adolescent psychiatry, and 18 months of adult psychiatry. Physicians pursuing training in these programs may take the certifying examination of the ABP in the fall of the fifth year of training, provided that all pediatric training (except continuity clinics) is completed by the date of the examination. Credit for training via this route may be obtained only by training in one of the approved programs. Guidelines for combined training have been approved by the ABP and ABPN. Further information concerning these combined training programs may be obtained by contacting the ABP, 500 Lake Cook Rd, Suite 300, Deerfield, IL 60015, 847-945-7900.

Training Programs
The ABP approves applicants for admission to its certifying process. The ABP does not accredit training programs. Information regarding accreditation should be addressed to Executive Secretary, Residency Review Committee for Pediatrics, 515 N State St, Chicago, IL 60610, 312-464-4047. Program Requirements for Residency Education in Pediatrics may be found in the Graduate Medical Education Directory or on the Accreditation Council for Graduate Medical Education Web site (http://www.acgme.org).

Nonaccredited Training Experience
A fundamental concept of the ABP is that a residency training program should provide for properly organized, progressive responsibility for the care of children. The ABP believes that this can be accomplished through continuity of clinical experience under the supervision of attending physicians who are responsible for the care of these children.

To that end, no more than a total of 3 months of the required 3 years of residency training may be taken outside an accredited pediatrics residency program. Experiences outside of the accredited residency might include electives abroad or with the Indian Health Service, research electives, or graduate degree course work. These experiences must be approved by the program director, must have goals and objectives for training, and must provide an evaluation of the resident's performance.

Military Service
Military service, unless as a resident in a military hospital that is accredited by the RRC, cannot be substituted for training requirements.

Special Situations
The ABP recognizes that situations may arise that are not explained by the preceding information. The physician should contact the ABP for further information.

Tracking and Evaluation
The ABP regards the evaluation of trainee competency as a continuum that begins during training and concludes with the certifying examination following formal training. The ABP believes that the program director(s) and faculty play significant roles in the certification process and are the keys to a responsible system of determining which applicants should be admitted to the certifying examination. The program director is able to provide a meaningful overview of the resident's professional competence, especially in skills such as clinical judgment, moral and ethical behavior, professional attitudes and behavior, procedural skills, and humanistic qualities.

The ABP resident tracking and evaluation program is part of the certifying process of the ABP. The program director is required to indicate annually whether each resident's performance is satisfactory, marginal, or unsatisfactory. If a resident's performance is unsatisfactory, the resident will not receive credit for that period of training. A marginal evaluation indicates a need for remediation. If a resident receives a marginal rating for 2 consecutive years of training (eg, PL-1 and PL-2), he/she will not receive credit for the second marginal year and will have to repeat that entire year of training. If a resident receives a marginal rating for 1 year (eg, PL-1) and receives a satisfactory rating for the following year (eg,
PL-2), then credit for both the marginal year and the satisfactory year will be given. The resident who receives a marginal rating in the final year of training (eg, PL-3) will be reviewed by the ABP Credentials Committee before being allowed to take the certifying examination in general pediatrics.

The tracking system also identifies residents who transfer from one program to another or to a new specialty and assures that the new program director recognizes those residents who need remediation.

Verification of Training by Directors of Pediatric Training Programs

Program directors will be sent Verification of Clinical Competence (VOCC) forms for residents in their last year of training. (Note: The form will be sent to the program directors of pediatrics/psychiatry/child and adolescent psychiatry programs for residents who apply in their fourth year of training.) The ABP requires the program director to verify completion of training and to sign either Statement A or Statement B on the VOCC form. Statement A is as follows: "I certify that the above-named applicant has demonstrated the necessary attitudes, knowledge, clinical judgment, technical skills, and interpersonal skills and is judged to be fully prepared for independent responsibility as a general pediatrician; that my knowledge he or she has moral and ethical integrity. The applicant is recommended for examination."

In recommending an applicant for the certifying examination, a program director should keep in mind the definition of a qualified applicant as determined by the ABP:

An applicant shall demonstrate the following abilities as they pertain to infants, children, and adolescents:
1. Assessment of the clinical issues and formulation of a management plan for any medical or health maintenance problem
2. Execution of the management plan with the patient and family, without further medical consultation, for all common problems of disease and health maintenance and for all medically life-threatening situations
3. Consultation, when appropriate, with physicians and other professionals regarding common problems and life-threatening situations
4. Arrangement for help for the patient and knowledge of what to anticipate from the consultant, being prepared personally to guide further management with assistance, when appropriate, for unusual problems requiring subspecialty, surgical, or other specialized skills.

Each applicant must have verification of training and verification of clinical competence on file in the ABP office to be admitted to the certifying examination. The applicant is responsible for ensuring that the program director submits all the required documents by the appropriate deadline.

When an applicant has not attained the appropriate knowledge and skills, the program director should sign Statement B on the VOCC form. By signing this statement, the program director is recommending that the applicant not be admitted to the certifying examination.

If an applicant's training is not verified and/or he or she is not recommended for admission to the certifying examination, the applicant will be required to complete an additional period of training in general pediatrics in an accredited program in the United States or Canada before resubmitting the ABP. The director of the program where the additional training occurred must complete a separate VOCC Form. Alternatively, the applicant may appeal to the Credentials Committee of the ABP.

The Credentials Committee will gather additional information about the applicant and decide if permission to take the examination should be given. If the applicant appeals the decision, he/she must submit information that would contradict the training program's assessment. Possession of certificates of satisfactory completion of training will not automatically admit the person to the ABP's certification process. Most training certificates attest to the achievement of a minimal level of competence or to the fulfillment of an employment contract. Therefore, the program director's statement on the VOCC form will take precedence over the certificate from the hospital. The ABP must have the program director's assurance that an applicant meets the standards expected of a certified pediatrician. Program directors are urged not to issue certificates of successful completion of training when the resident is deemed not to have met those standards:

The duration of training is 30 months. Absences from training in excess of 3 months in the 36 months of training (eg, vacation, sick leave, maternity leave) must be made up.

The program director is required to provide further information about the physician. The program director is asked to evaluate the physician on a nine-point scale in the following areas: gathering data by history, by physical examination, and by laboratory studies; assessing data and arriving at a diagnosis; managing problems and maintaining health; interpersonal relationships with patients and families; interpersonal relationships with other members of the health team; and work habits and personal qualities.

The program director is asked to rate the physician's overall clinical competency by indicating which of the following phrases best describes the physician's ability to care for children in the United States or Canada. In these phrases, the word "manage" is defined as identifying the nature of the problem, determining methods of resolving or alleviating the problem, and carrying out management plans, including the appropriate and timely use of consultants.

1. Unable to manage many pediatric problems, including the most routine ones
2. Unable to manage only the most routine problems of pediatrics
3. Able to manage the common problems of pediatrics adequately
4. Able to manage most pediatric problems in an effective way
5. Able to manage almost any pediatric problem in a highly effective manner

If the program director signs Statement A but gives a rating of 3 or less in any single area of evaluation or a rating of 4 or less for over all clinical competency, the Credentials Committee will ask the program director to submit supporting documentation with the completed VOCC form. If the Credentials Committee concludes that the low ratings are substantiated, the applicant must complete an additional period of training in general pediatrics in an accredited program either in the United States or Canada before resubmitting to the ABP. The director of the program where the additional training occurred must complete a separate VOCC Form. Alternatively, the applicant may appeal to the Credentials Committee.

Program directors are encouraged to have all residents in their programs take the In-Training Examination (ITE). The results of the ITE can provide valuable information for both the resident and the program.

To be compliant with the Program Requirements for Residency Education in Pediatrics established by the ACGME, the program director and the faculty must develop evaluation procedures for assessment of physician performance. Examples are medical record audits, rating scales for assessment of work habits, observational
checklists for assessment of technical skills, oral examinations, and consumer questionnaires.

Certifying Examinations
Applicants for certifying examinations must complete all training by the first day of the month of the examination. A written request for waiver of this policy will be considered on a case-by-case basis.

After an application has been accepted, the candidate is expected to take the next examination offered. A candidate who withdraws from the examination by the published withdrawal deadline will be issued a refund of the examination fee. A candidate who withdraws after the published withdrawal deadline will forfeit all fees paid. To register for a future examination, payment of the reregistration fee will be required.

The names of certified pediatricians, but not their scores, will be sent to appropriate organizations, directories, and journals. The certificate will reflect the candidate's medical degree awarded at the time of graduation from medical school (eg, MD, MB, BS, or DO). Degrees awarded either before or after graduation from medical school will not be included on the certificate.

The ABP does not sponsor or maintain records about any courses that claim to be review courses in preparation for its certifying examinations, nor does the ABP track continuing medical education credits.

The validity of the performance of candidates on the certifying examination of the ABP is secured by every means available. The ABP should be contacted in the event of irregular behavior such as giving or obtaining unauthorized information or aid before, during, or after the examination or offering financial or other benefit to a proctor, employee, or agent of the ABP.

The ABP reserves the right to withhold permission for applicants to take its examinations and/or certification in the event of circumstances demonstrating that an applicant is not capable of performing the role of physician and advocate for infants, children, and adolescents. In such instances, the applicant will be notified; the applicant may appeal the decision to the Credentials Committee of the ABP.

For failing candidates who are concerned that their answer sheets were not scored correctly, hand scoring is available for a fee of $60. However, candidates are not encouraged to request this service since neither mechanical nor computer errors have ever been found. Requests should be made in writing accompanied by check or money order. Hand scoring is available for 11 months following the date of the examination.

General Pediatrics Certifying Examination
The certifying examination is given once a year in the fall in a number of locations throughout the United States. The dates of examinations and other information may be found on the ABP web site.

The examination lasts 2 days. Each day there are two sessions, each of 3 hours' duration, with a luncheon break between sessions. The 2000 certifying examination will be administered October 23-24, 2000. Applicants for the certifying examination must complete all their training by the first day of the month of the examination.

The content of the examination for certification is appropriate for the practice of general comprehensive pediatrics. Emphasis is placed on practical aspects; however, good practice is founded on sound scientific knowledge, and the candidate should be prepared to demonstrate an understanding of basic science.

The examination consists of multiple-choice questions. Examples of the types of questions to be used are mailed to registered candidates before the administration of the examination. Some questions are included in the examination for experimental purposes only. These questions will not contribute to the score.

Each candidate's examination score will be reported to his or her general pediatrics program director. Periodically, the ABP conducts research utilizing data it has compiled; the candidate's anonymity is guaranteed in all such cases.

Application, Registration, and Fees
Application material for admission to the certifying examination of the ABP may be obtained by contacting the ABP. Residents in their last year of training are sent an application through their residency programs in early December 1999; residents should contact the ABP office if the application is not received by December 20. It is the applicant's responsibility to be aware of and to meet registration deadlines. (Note: Residents in pediatrics/psychiatry/child and adolescent psychiatry programs will be sent the material in December of the fourth year of training.)

For new applicants, the regular registration period began December 1, 1999, and ended on February 29, 2000. An application postmarked by February 29 must be accompanied by the application fee of $1,185. Late registration for new applicants begins March 1 and extends through April 30, 2000. It is the applicant's responsibility to be aware of and to meet registration deadlines.

A nonrefundable penalty fee of $225 is required for an application postmarked March 1 through April 28; thus, the late registration fee is $1,410. New applications that are postmarked after April 29, 2000, will not be accepted.

Regular reregistration begins February 15 and extends through April 29, 2000. Reregistration material postmarked by April 29 must be accompanied by the reregistration fee of $1,085. Late reregistration begins May 1 and extends through May 31, 2000.

A nonrefundable penalty fee of $225 is required for all reregistration material postmarked May 1 through May 31, 2000; thus, the late registration fee is $1,310. Reregistration material that is postmarked after May 31, 2000, will not be accepted. A copy of a valid (current), unrestricted license to practice medicine must be included in this material.

Many deadlines set by the ABP are postmark deadlines. If there is a discrepancy between a metered postmark and an official US Postal Service postmark, the latter will be considered official.

Acknowledgment of receipt of the application will be sent promptly. The ABP should be contacted if acknowledgment of receipt is not received within 30 days of submission of the application. Applications received by the deadlines will be processed and evaluated, and the ABP will request directors of general pediatrics training programs to verify successful completion of training.

Applicants who meet the training requirements of the ABP and who are recommended by their program director(s) will be accepted and registered for the certifying examination.

An applicant who does not receive notification of the acceptance or rejection of his or her application by August 10 should contact the ABP to inquire about the status of the application.

The cost of certification includes the following fees, payable only in United States (US) dollars:

<table>
<thead>
<tr>
<th>Fees for New Applicants</th>
</tr>
</thead>
<tbody>
<tr>
<td>Processing and Evaluation</td>
</tr>
<tr>
<td>Examination</td>
</tr>
<tr>
<td>Total New Candidate Fees</td>
</tr>
<tr>
<td>Late Registration Fee (nonrefundable)</td>

</tbody>
</table>

<table>
<thead>
<tr>
<th>Fees for Reregistrants</th>
</tr>
</thead>
<tbody>
<tr>
<td>Processing and Evaluation</td>
</tr>
<tr>
<td>Examination</td>
</tr>
</tbody>
</table>
Total Reregistrant Fees $1,085
Late Registration Fee (nonrefundable) $225
Late Registration $1,310

Applicants can pay the total application fee by credit card, using either Visa or MasterCard, or by check.

For applicants not using US banks, the fee must be paid in US dollars using one of the following vehicles: (1) money order, (2) cashier’s check, or (3) certified check. To be accepted for payment, these vehicles must be payable through a US bank. The ABP cannot accept electronic transfer of funds from any organization, eg, US military, Western Union.

Applicants should retain their acknowledgment letters, canceled checks, or credit card statements as proof of payment. No other receipts will be issued.

If an applicant is not accepted to take the ABP certifying examination, the examination fee will be refunded. Neither the processing and evaluation fee nor the penalty fee are refundable. If the applicant wishes to pursue certification in the future, he or she will be required to complete a new application and submit the full fee again.

After the ABP has accepted an application, the applicant is expected to take the next certifying examination offered. However, an applicant may withdraw by submitting a written notice postmarked no later than August 15, 2000. The applicant will be issued a refund of the examination fee ($850). An applicant whose withdrawal letter is postmarked after August 15 or who does not appear for the examination will forfeit all fees paid and will be required to submit a reregistration fee before being admitted to a future examination. Reregistration material for the next year’s examination will be sent to the last address on file for the applicants who have previously been accepted to take the examination.

Certification in the Pediatric Subspecialties

Subspecialty Certificates

The ABP issues a Certificate of Special Qualifications in the following subspecialties: adolescent medicine, pediatric cardiology, pediatric critical care medicine, pediatric emergency medicine, pediatric endocrinology, pediatric gastroenterology, pediatric hematologic-oncology, pediatric infectious diseases, neonatal-perinatal medicine, pediatric nephrology, pediatric pulmonology, and pediatric rheumatology.

The ABP, in conjunction with the ABIM and their Conjoint Board, the American Board of Allergy and Immunology (ABAI), offers a Certificate of Added Qualifications in clinical and laboratory immunology. Further information may be obtained by contacting the ABAI, 510 Walnut St, Ste 1701, Philadelphia, PA 19106-3619.

A Certificate of Added Qualifications in sports medicine is offered by the American Board of Family Practice (ABFP), the ABEM, the ABIM, and the ABP. Further information may be obtained by contacting the ABP.

A Certificate of Added Qualifications in medical toxicology is offered by the ABEM, the ABP, and the American Board of Preventive Medicine. Further information may be obtained by contacting the ABP.

Examination Admission Requirements

The applicant must be currently certified in pediatrics by the ABP. Applicants whose time-limited certification will expire before the examination must attain recertification at least 4 months before the examination date.

For candidates who began subspecialty training after January 1, 1995, 3 years of training is required. (The training requirements for candidates who began subspecialty training before January 1, 1995, may differ. Such individuals should contact the ABP for further information.) The program director(s) will be required to verify completion of training and sign a statement indicating whether the candidate is recommended to take the certifying examination. In addition, the program director(s) must verify clinical competence and meaningful accomplishment in research by completing the Verification of Competence Form.

The applicant must have a valid (current), unrestricted license to practice medicine in one of the states, districts, or territories of the United States or a province of Canada or unrestricted privileges to practice medicine in the US Armed Forces. A copy of the license may be submitted separately from the initial application, but it must be submitted by the deadline stated in the application packet. A candidate who is reregistering for the examination must submit the license with the reregistration material.

If an applicant has any action pending regarding the right to have an unrestricted license to practice medicine, admission to the examination may be denied. An applicant who is practicing the subspecialty abroad must provide proof of licensure equivalency in the country in which he or she resides. This information must be submitted by the deadline stated in the application packet. Candidates who practice or plan to practice abroad must submit a letter, in addition to the licensure equivalency, stating that they will not practice in the United States or Canada.

A subspecialty fellow who is believed to have demonstrated meaningful accomplishment in research, either before or during residency, may have a part of the training requirement waived. Evidence of such accomplishment might include a PhD degree or sustained research achievement culminating in the first-authored publication of a research paper in a peer-reviewed journal. The subspecialty program director may ask the Subboard to waive the research requirements and to reduce the time of subspecialty training by as much as 1 year. This petition must be made either before the beginning of training or during the first year of training. A candidate for this pathway must have completed 3 core years of general pediatrics in an accredited program in the United States or Canada and would not have the option of the Special Alternative Pathway. Furthermore, a subspecialty fellow who receives a waiver from the Subboard must complete at least 2 years of training in the subspecialty with at least 1 year of broad-based clinical training. The training period requirement may be shortened for a candidate with extensive clinical experience by as much as 1 year by approval of the Credentials Committee. The candidate must meet the research requirements.

No credit toward subspecialty qualification will be granted for elective time spent in the subspecialty during the years of general pediatric training.

The RRC currently reviews and accredits pediatric subspecialty programs in all the certified subspecialties.

A list of accredited programs is published in the Graduate Medical Education Directory or may be found at http://www.aacme.org.

General Criteria for Certification in the Pediatric Subspecialties

In addition to the training requirements, which are specific to each of the pediatric subspecialties, the following are required of candidates seeking certification in the pediatric subspecialties of adolescent medicine, cardiology, critical care medicine, emergency medicine, endocrinology, gastroenterology, hematology-oncology, infectious diseases, neonatal-perinatal medicine, nephrology, pulmonology, and rheumatology. Each candidate must be familiar with specific subspecialty training requirements as well as the policies stated in the current Booklet of Information.
A. Certification by the American Board of Pediatrics (ABP)

An applicant be currently certified in general pediatrics to be eligible to apply for a pediatric subspecialty certifying examination.

B. Licensure

An applicant must have a valid (current), unrestricted license to practice medicine in any of the states, districts, or territories of the United States or provinces of Canada in which he/she practices or have unrestricted privileges to practice medicine in the United States Armed Forces. A copy of the unrestricted license must accompany the application material. An applicant who is practicing the subspecialty abroad may be exempted from this policy upon presentation of proof of licensure equivalency in the country in which he or she resides. Candidates who practice or plan to practice abroad must submit a letter, in addition to the licensure equivalency, stating that they will not practice in the United States or Canada.

C. Verification of Training

An applicant will be asked to list the program(s) where fellowship training occurred as well as the name(s) of the program director(s). The ABP will send a Verification of Competence Form to the program director(s) for completion. (Note: For new subspecialties, alternatives to the usual training requirements, such as practice experience, will be acceptable for a limited period as criteria for admission to the examination. Candidates should refer to the specific subspecialty eligibility criteria for details.) The role of the program director in the certification process is to verify completion of training and to sign the following statement on the Verification of Competence Form:

"I certify that the above-named applicant has demonstrated the necessary attitudes, knowledge, clinical judgment, research abilities, technical skills, and interpersonal skills and is judged to be fully prepared for independent responsibility as a pediatric subspecialist; to my knowledge, he/she has moral and ethical integrity. The applicant is recommended for examination."

An applicant must have the Verification Form(s) on file at the ABP in order to be admitted to the pediatric subspecialty examination. If an applicant's training is not verified and/or he/she is not recommended for admission, the applicant will be required to complete additional subspecialty fellowship training before reapplying. Alternatively, the applicant may appeal to the Credentials Committee of the Subboard. The Credentials Committee will gather additional information about the applicant and decide if permission to take the examination should be given. For an appeal, the applicant will be asked to submit copies of certificates of satisfactory completion of training. If the applicant has been denied such a certificate, then admission will be refused on the basis of incomplete training. A certificate of completion of training, as a basis for appeal, will be superseded by the program director's statement on the Verification of Competence Form because the certificate usually attests to the fulfillment of an employment contract or to the achievement of a minimal level of competence.

An applicant must satisfactorily complete all subspecialty training by the first day of the month of the examination.

No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the general pediatrics residency years (PL-1, 2, 3) or as a chief resident (PL-4).

An applicant seeking certification in another pediatric subspecialty or a non-ABP specialty (e.g., allergy/immunology) on the basis of practice and/or training may not apply the same period of time toward fulfillment of these requirements.

D. Principles Regarding the Assessment of Meaningful Accomplishment in Research

1. Research experience is an essential part of the training of subspecialists. The general requirements for research in pediatric subspecialties approved by the ACGME for program accreditation must be met as evidence of research experience. These are as follows: "Within the institution, the subspecialty trainee must be exposed to, and take part in, research projects that are conducive to a questioning attitude, to protocol development, and to critical analysis of new therapies and of medical literature. Research experience should begin in the first year and continue for the entire period of training in order to allow adequate time for the development of research skills and to bring a project to completion. The trainees must help design, conduct, evaluate, and prepare for publication a clinical or laboratory research project in the subspecialty area. They should also be required to conduct research seminars and prepare a written report of their research activities. Instruction in related basic sciences and associated disciplines, such as research design, biostatistics, and epidemiology, must be offered through courses, workshops, and seminars."

2. Additional evidence of meaningful accomplishment in research must be submitted, including one or more of the following:
   a. First author of a hypothesis-driven research paper accepted for publication in a peer-reviewed journal deemed acceptable by the Subboard. A reprint of the paper, or a copy of the letter of acceptance by the journal and a copy of the manuscript, must be submitted.
   b. A PhD degree in a field of science.
   c. A thesis accepted as partial fulfillment of the requirements for a postgraduate degree in a field relevant to the subspecialty. The thesis or a research progress report as described in 2(f) must be submitted for review.
   d. First author of a hypothesis-driven research paper that has been submitted but not yet accepted for publication in a peer-reviewed journal deemed acceptable by the Subboard. A letter confirming the submission must be included as well as a copy of the submitted manuscript.
   e. Submission of a research grant proposal that has been approved by an extramural organization with a critical review process acceptable to the Subboard. A copy of the grant proposal and approval letter must be included. A grant proposal will no longer meet the research requirement for fellows entering subspecialty training on or after January 1, 1998.
   f. A research progress report (signed by both the applicant and mentor) of no more than five pages that must include (a) a statement of hypothesis, (b) delineation of methodology, (c) results and analysis, and (d) significance of the research. An explanation must be provided by the program director/mentor if a research paper has not been submitted for publication within 3 years of completion of fellowship training.

3. The program director is responsible for notifying all residents of the research requirements necessary for certification upon entry to the subspecialty training program. Furthermore, in the description of the candidate's research performance on the Verification of Competence Form, the program director must provide a detailed description of the experiences on which the acceptable evidence of meaningful research is based.

4. Research should be performed in a laboratory that best suits the candidate's interests. For example, the ABP is strongly supportive of the Pediatric Scientist Development Program that has been initiated by the Association of Medical School Pediatric Department Chairs.
Program Requirements for Residency Education in the Subspecialties of Pediatrics

Program Requirements for Residency Education in adolescent medicine, pediatric cardiology, pediatric critical care medicine, pediatric emergency medicine, pediatric endocrinology, pediatric gastroenterology, pediatric hematologic-oncology, pediatric infectious diseases, medical toxicology, neonatal-perinatal medicine, pediatric nephrology, pediatric pulmonology, pediatric rheumatology, and sports medicine have been approved by the ACGME or by the RCPSC. Copies of the Program Requirements and lists of accredited programs are available from the Office of the Residency Review Committee for Pediatrics, 5/5 N State St, Chicago, IL 60610, via the ACGME Web site at http://www.acgme.org, or the Office of Training and Evaluation, the Royal College of Physicians and Surgeons of Canada, 74 Stanley, Ottawa, Ontario, K1M 1P4. This information is published in the *Graduate Medical Education Directory* or in the RCPSC booklets of general information.

Training Leading to Dual Pediatric Subspecialty Certification

If an individual is certified in one subspecialty, he/she can become eligible to take another subspecialty examination after 2 years of additional training, of which at least 1 year must be broad-based clinical training.

An individual may petition the Credentials Committees of two pediatric subspecialties with a proposal for a 4-year integrated training program that would meet the eligibility requirements for certification in both subspecialties. This petition must be approved before subspecialty training begins or early in the first year of subspecialty training. Guidelines for dual subspecialty training may be obtained from the ABP or can be found on the ABP Web site at http://www.abp.org.

Subspecialty “Fast-Tracking”

A subspecialty fellow who is believed to have demonstrated meaningful accomplishment in research, either before or during residency, may have a part of the training requirement waived. Evidence of such accomplishment might include a PhD degree or sustained research achievement culminating in the first-authored publication of a research paper in a peer-reviewed journal. The subspecialty program director may ask the Subboard to waive the research requirements and to reduce the time of subspecialty training by as much as 1 year. This petition must be made either before the beginning of training or during the first year of training. A candidate for this pathway must have completed 5 core years of pediatrics in an accredited program in the United States or Canada and would not have the option of the SAP. Furthermore, a subspecialty fellow who receives a waiver by the Subboard must complete at least 2 years of training in the subspecialty with at least 1 year of broad-based clinical training. The training period requirement may be shortened for a candidate with extensive clinical experience by as much as 1 year by approval of the Credentials Committee. The candidate must meet the research requirements. It should be noted that these criteria and conditions are subject to change without notice. All applicants should be familiar with the current Booklet of Information. Applicants are advised to contact the ABP to ascertain whether the information they have is current.

Eligibility Criteria for Certification in Adolescent Medicine

The ABP has established a procedure for certification in adolescent medicine. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

Admission Requirements

To qualify for admission to the examination, an applicant must have completed one of the following:

A. Training

Physicians who enter training in adolescent medicine on or after July 1, 2000, are required to complete their training in a program accredited for training in adolescent medicine by the RRC for Pediatrics in the United States or the RCPSC in Canada.

A subspecialty fellow entering adolescent medicine training before January 1, 1995, may apply for admission on the basis of completion of 2 years of subspecialty fellowship training in adolescent medicine.

Three years of full-time, broad-based fellowship training in adolescent medicine is required for fellows entering training on or after January 1, 1995. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc., must be made up. If the program director believes that combined absences/leave that exceed 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow beginning adolescent medicine training on or after January 1, 1995, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the “Principles Regarding the Assessment of Meaningful Accomplishment in Research”; and he/she must pass the subspecialty certifying examination. Verification of meaningful accomplishment in research will not be required for individuals who began training before January 1, 1995.

A fellow beginning part-time training after January 1, 1995, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted. Only those adolescent medicine training programs that are operated in association with general comprehensive residency programs in pediatrics or internal medicine accredited by the ACGME or by the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

For an individual using the adolescent medicine fellowship training route (A), a Verification of Competence Form(s) will be required from the director(s) of the fellow's adolescent medicine training program(s).

B. Practice Experience

Five years of broad-based practice experience in adolescent medicine is required. A minimum of 50% of full-time, focused professional activity (and a minimum of 20 hours a week) must have been spent in the practice of adolescent medicine to receive credit. It is assumed that night and weekend time would be distributed in the same manner as regular time. These 5 years should be of such type and quality that they substitute for the clinical exposure one might have encountered during subspecialty fellowship training. All adolescent medicine experience must be accrued before December 31, 1998. No foreign adolescent medicine experience will be accepted by the Credentials Committee in fulfillment of the requirements.

For an individual utilizing the adolescent medicine practice experience route (B), an evaluation form(s) will be required from the adolescent medicine program director (if there is a subspecialty training program) or the pediatric department chair or the chief of
pediatrics in the hospital(s) where the applicant is now or has been practicing adolescent medicine.

C. Partial Subspecialty Training and Practice
A combination of subspecialty fellowship training and practice experience equal to 5 years as outlined below may be utilized.

1. A fellow completing less than 12 months of fellowship training in adolescent medicine may receive practice credit on a month-for-month basis. For example, a 9-month subspecialty fellowship would be credited for 9 months of experience; this, added to 4 years and 3 months of adolescent medicine experience, would total 60 months or 5 years. These 5 years must be accrued before December 31, 1988.

2. A fellow completing 12 to 23 months of subspecialty fellowship training in adolescent medicine may receive credit on a two-for-one basis. For example, an 18-month subspecialty fellowship would be credited for 36 months of experience; this, added to 24 months of adolescent medicine experience, would total 60 months or 5 years. These 5 years must be accrued before December 31, 1988. No credit for partial training will be given for fellowship training that began on or after January 1, 1985.

For an individual utilizing the combination of training and practice experience route (C), a verification form(s) will be required from the director(s) of the applicant’s adolescent medicine training program(s), and an evaluation form(s) will be required from the adolescent medicine program director (if there is a subspecialty training program) or the pediatric department chair or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing adolescent medicine.

The completed verification and evaluation form(s) should be sent directly to the ABP.

Accredited Training
The RRC has begun the process of accrediting training programs in adolescent medicine. A fellow entering subspecialty training in adolescent medicine before completion of the accreditation process by the RRC is advised to enter those programs in which the director or senior faculty of the program is certified in adolescent medicine or possesses equivalent credentials.

It should be noted that these criteria are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

Eligibility Criteria for Certification in Pediatric Cardiology
The ABP has established a procedure for certification in pediatric cardiology. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

Admission Requirements
Physicians who entered training in pediatric cardiology on or after January 1, 1965, are required to complete their training in a program accredited for training in pediatric cardiology by the RRC for Pediatrics in the United States or the RCPS in Canada.

A subspecialty fellow who entered pediatric cardiology training before January 1, 1988, may apply for admission on the basis of completion of 2 years of subspecialty fellowship training in pediatric cardiology.

Three years of full-time, broad-based subspecialty fellowship training in pediatric cardiology is required for fellows entering training on or after January 1, 1988. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc., must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric cardiology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 5 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric cardiology training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

Dual Subcertification in Cardiology (Internal Medicine and Pediatrics)
There is no change in the usual training requirements in pediatric cardiology for graduates of combined medicine/pediatrics programs.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

Eligibility Criteria for Certification in Pediatric Critical Care Medicine
The ABP has established a procedure for certification in pediatric critical care medicine. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

Admission Requirements
Physicians who entered training in pediatric critical care medicine on or after January 1, 1992, are required to complete their training in a program accredited for training in pediatric critical care medicine by the RRC for Pediatrics in the United States or the RCPS in Canada.

A subspecialty fellow who entered pediatric critical care medicine training before January 1, 1988, may apply for admission on the basis of completion of 2 years of subspecialty fellowship training in pediatric critical care medicine. A subspecialty fellow who is certified in anesthesiology by the American Board of Anesthesiology may apply for admission on the basis of completion of 2 years of subspecialty fellowship training in pediatric critical care medicine.

Three years of full-time, broad-based subspecialty fellowship training in pediatric critical care medicine is required for fellows entering training on or after January 1, 1988. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc., must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.
For a fellow who began pediatric critical care medicine training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research" and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric critical care medicine training programs that are accredited by the ACGME or the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

Dual Subcertification in Critical Care Medicine (Internal Medicine and Pediatrics)

Individuals who are graduates of combined training programs in internal medicine and general pediatrics should contact both boards regarding dual subspecialty opportunities. It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

Eligibility Criteria for Certification in Pediatric Emergency Medicine

The ABP and the ABEM have established a procedure for certification in pediatric emergency medicine. To be eligible for this subspecialty examination, a physician must be certified in either pediatrics by the ABP or emergency medicine by the ABEM. In addition to the specific admission requirements listed below, there are general eligibility criteria for all ABP subspecialties that must be fulfilled to be eligible for certification. (A copy is available upon request to the ABP). The ABEM also has general requirements that must be fulfilled and are available from the ABEM.

Admission Requirements

To qualify for admission to the examination, an applicant must have completed one of the following:

A. Training

A subspecialty fellow entering pediatric emergency medicine training before January 1, 1995, may apply for admission on the basis of completion of 2 years of subspecialty fellowship training in pediatric emergency medicine. The program and the training must conform to the Program Requirements for Residency Education in Pediatric Emergency Medicine.

1. Requirements for candidates applying to the ABP for certification are as follows:
   - Three years of broad-based fellowship training in pediatric emergency medicine is required for fellows entering training on or after January 1, 1995. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc., must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.
   - Physicians who enter training in pediatric emergency medicine on or after July 1, 2001, are required to complete their training in a program accredited for training in pediatric emergency medicine by the RRC for Pediatrics or the RRC for Emergency Medicine in the United States.
   - For a fellow beginning pediatric emergency medicine training on or after January 1, 1995, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination. Verification of meaningful accomplishment in research will not be required for individuals who began training before January 1, 1995.
   - A fellow beginning training after January 1, 1995, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.
   - 2. Candidates whose primary certificate is in emergency medicine should contact the ABEM for certification requirements.

   Only those pediatric emergency medicine training programs that are accredited by the ACGME or the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP or the ABEM.

   No credit will be given for subspecialty training during the core residency.

B. Dual Certification

A candidate is certified by the ABP and the ABEM may apply via this pathway. A candidate who has completed training to meet the certification requirements of the ABP and the ABEM before January 1, 1999, may apply via this pathway.

Verification of Training

1. For a candidate utilizing the subspecialty fellowship training route, a Verification of Competence Form(s) from the director(s) of the applicant’s pediatric emergency medicine training program(s) is required.

2. For a candidate utilizing the dual certification pathway, the certificate number and year of certification for each board must be provided.

Certification shall be time-limited for the number of years that the primary board currently grants certification (7 years for ABP and 10 years for ABEM).

Description of the Institution/Emergency Department

The individual(s) responsible for the completion of the Verification of Competence Form(s) or the evaluation form(s) must provide a description of the institution and the ED.

Accredited Training

The ABEM has begun the process of accrediting training programs in pediatric emergency medicine. An individual entering fellowship in pediatric emergency medicine before completion of the accreditation process by the RRC is advised to enter those programs in which the director or senior faculty of the program is certified in pediatric medicine.
emergency medicine by the ABP and/or ABEM or possesses equivalent credentials.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP and the ABEM to ascertain whether the information they have is current.

Eligibility Criteria for Certification in Pediatric Endocrinology

The ABP has established a procedure for certification in pediatric endocrinology. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

Admission Requirements

Physicians who entered training in pediatric endocrinology on or after January 1, 1987, are required to complete their training in a program accredited for training in pediatric endocrinology by the RRC for Pediatrics in the United States or the RCPSC in Canada.

A subspecialty fellow who entered pediatric endocrinology before January 1, 1988, may apply for admission on the basis of completion of 2 years of subspecialty fellowship training in pediatric endocrinology.

Three years of full-time, broad-based fellowship training in pediatric endocrinology is required for fellows entering training on or after January 1, 1988. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc., must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric endocrinology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric endocrinology training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrols in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

Dual Subcertification in Endocrinology (Internal Medicine and Pediatrics)

Individuals who are graduates of combined training programs in internal medicine and general pediatrics should contact both boards regarding dual subcertification opportunities.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

Eligibility Criteria for Certification in Pediatric Gastroenterology

The ABP has established a procedure for certification in pediatric gastroenterology. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

Admission Requirements

Physicians who entered training in pediatric gastroenterology on or after January 1, 1996, are required to complete their training in a program accredited for training in pediatric gastroenterology by the RRC for Pediatrics in the United States or the RCPSC in Canada.

A subspecialty fellow who entered pediatric gastroenterology training before January 1, 1990, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric gastroenterology.

Three years of full-time, broad-based fellowship training in pediatric gastroenterology is required for fellows entering training on or after January 1, 1990. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc., must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric gastroenterology training on or after January 1, 1990, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1990, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric gastroenterology training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrols in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

Dual Subcertification in Gastroenterology (Internal Medicine and Pediatrics)

Individuals who are graduates of combined training programs in internal medicine and general pediatrics should contact both boards regarding dual subcertification opportunities.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

Eligibility Criteria for Certification in Pediatric Hematology-Oncology

The ABP has established a procedure for certification in pediatric hematology-oncology. In addition to the specific admission requirements listed below, there are general eligibility criteria that must
be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

**Admission Requirements**

Physicians who entered training in pediatric hematology-oncology on or after January 1, 1987, are required to complete their training in a program accredited for training in pediatric hematology-oncology by the RRC for Pediatrics in the United States or the RCPS in Canada.

A subspecialty fellow who entered pediatric hematology-oncology training before January 1, 1986, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric hematology-oncology.

Three years of full-time, broad-based fellowship training in pediatric hematology-oncology is required for fellows entering training on or after January 1, 1986. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc., must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric hematology-oncology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: A Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 5 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric hematology-oncology training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPS are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

**Duties/Subcertification in Hematology-Oncology (Internal Medicine and Pediatrics)**

There is no change in the usual training requirements in pediatric hematology-oncology for graduates of combined medicine/pediatrics programs.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

**Eligibility Criteria for Certification in Pediatric Infectious Diseases**

The ABP has established a procedure for certification in pediatric infectious diseases. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

**Admission Requirements**

To qualify for admission to the examination, an applicant must have completed one of the following:

**A. Training**

Physicians who enter training in pediatric infectious diseases on or after January 1, 2000, are required to complete their training in a program accredited for training in pediatric infectious diseases by the RRC for Pediatrics in the United States or the RCPS in Canada.

A subspecialty fellow entering pediatric infectious diseases training before January 1, 1996, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric infectious diseases.

Three years of full-time, broad-based fellowship training in pediatric infectious diseases is required for fellows entering training on or after January 1, 1986. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc., must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow beginning pediatric infectious diseases training on or after January 1, 1986, the following must be accomplished in order to become certified in the subspecialty: A Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination. Verification of meaningful accomplishment in research will not be required for individuals who began training before January 1, 1996.

A fellow beginning part-time training after January 1, 1996, may complete the required training on a part-time basis not to exceed 5 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric infectious diseases training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPS are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

For an individual using the pediatric infectious diseases fellowship training route (A), a Verification of Competence Form(s) will be required from the director(s) of the fellow's pediatric infectious diseases training program(s).

**B. Practice Experience**

Five years of broad-based practice experience in pediatric infectious diseases is required. A minimum of 50% of full-time professional activity must have been spent in the practice of pediatric infectious diseases to receive credit. It is assumed that night and weekend time would be distributed in the same manner as regular time. These 5 years should be of such type and quality that they substitute for the clinical exposure one might have encountered during subspecialty fellowship training. All pediatric infectious diseases experience must be accrued by December 31, 1998. No foreign pediatric infectious diseases experience will be accepted by the Credentials Committee in fulfillment of the requirements.

For an individual utilizing the pediatric infectious diseases practice experience route (B), an Evaluation Form(s) will be required from the pediatric infectious diseases program director (if there is a subspecialty training program) or the pediatric department chair.
or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing pediatric infectious diseases.

C. Partial Subspecialty Training and Practice
A combination of training and practice in pediatric infectious diseases equal to 5 years as outlined below may be utilized:

1. A fellow completing less than 12 months of fellowship training in pediatric infectious diseases may receive practice credit on a month-for-month basis. For example, a 9-month fellowship would be credited for 9 months of experience; this, added to 4 years and 3 months of pediatric infectious diseases experience, would total 60 months or 5 years. These 5 years must be accrued before December 31, 1998.

2. A fellow completing 12 to 23 months of fellowship training in pediatric infectious diseases may receive credit on a two-for-one basis. For example, an 18-month fellowship would be credited for 36 months of experience; this, added to 24 months of pediatric infectious diseases experience, would total 60 months or 5 years. These 5 years must be accrued before December 31, 1998. No credit for partial training will be given to a subspecialty fellow who begins training on or after January 1, 1995.

For an individual utilizing the combination subspecialty fellowship training and practice experience route (C), a Verification Form(s) will be required from the director(s) of the applicant's pediatric infectious diseases training program(s), and an Evaluation Form(s) will be required from the pediatric infectious diseases program director (if there is a subspecialty training program) or the pediatric department chair or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing pediatric infectious diseases.

The completed Verification and Evaluation Form(s) should be sent directly to the ABP.

Dual Subcertification in Infectious Diseases (Internal Medicine and Pediatrics)
Individuals who are graduates of combined training programs in internal medicine and general pediatrics should contact both boards regarding dual subspecialty opportunities.

It should be noted that these criteria are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

Eligibility Criteria for Certification in Medical Toxicology
The ABP in collaboration with the American Boards of Emergency Medicine and Preventive Medicine offers a certificate of added qualifications in medical toxicology. This document provides the requirements of the ABP. (Note: A candidate who has a primary certificate from one of the other two boards should contact that board office for its eligibility criteria.)

Admission Requirements
A. Certification by the ABP
An applicant must take and pass the certifying examination in general pediatrics and must maintain a valid (current) certificate before being permitted to take a pediatric subspecialty certifying examination.

B. Licensure
An applicant must have a valid (current), unrestricted license to practice medicine in any of the states, districts, or territories of the United States or provinces of Canada in which he/she practices or have unrestricted privileges to practice medicine in the US armed forces. A copy of the unrestricted license must accompany the application material.

C. Pathways
For admission to the certification examination in medical toxicology, the applicant must have completed one of four eligibility pathways. The pathways are:
1) medical toxicology training;
2) diplomate of American Board of Medical Toxicology (ABMT);
3) medical toxicology practice; or 4) medical toxicology training plus practice.

1. Medical Toxicology Subspecialty Training Pathway
An applicant must complete a fellowship in medical toxicology of 24 months' duration. The training program should be sponsored by and be based within reasonable geographical proximity to an accredited residency program in emergency medicine, pediatrics, preventive medicine, or any combination of these programs. An institution is discouraged from sponsoring more than one accredited medical toxicology program.

Physicians who enter training in medical toxicology on or after July 1, 2000, are required to complete their training in a program accredited for training in medical toxicology by the RBC for Emergency Medicine or Preventive Medicine.

Physicians who enter training in medical toxicology before July 1, 2000, must satisfy all requirements of the Medical Toxicology Subspecialty Training Pathway.

The applicant must satisfactorily complete the subspecialty training by the first day of the month of the examination.

Applicants seeking certification in more than one subspecialty on the basis of training may not apply the same training period toward fulfillment of requirements of more than one specialty or subspecialty.

The ABP will request verification of subspecialty training directly from the program director.

2. Diplomate of ABMT Pathway
ABMT diplomates who are also diplomates of an ABMS board may apply.

On June 30, 1999, the ABMT pathway expired. To apply under the ABMT pathway an applicant must have fulfilled the requirements of this pathway by that date.

3. Medical Toxicology Practice Pathway
The practice pathway is available to physicians who, through study and focused practice experience, have developed qualifications in medical toxicology. The criteria for this category consist of the following:

a. During a minimum of 60 months, which must have occurred during the most recent 7 years prior to the date the application is submitted, the applicant (a) must show a demonstrated commitment to teaching, scholarly activities, research, or administration and patient care in the specialty of medical toxicology and (b) must accumulate a minimum of 2,500 hours of direct patient care activities.

Direct patient care activities include primary or consultative care, exposure evaluation, screening and preventive services, and epidemiologic and health investigations. Telephone consultations are not considered a direct patient care activity.

b. Documented affiliation and activity with a poison control center certified by the American Association of Poison Control Centers (AAPCC) or the Canadian Association of Poison Control Centers (CAPCC) or their equivalent.

Applicants seeking certification in more than one specialty or subspecialty may not apply the same practice hours toward fulfillment of the requirements of more than one certifying specialty or subspecialty.

On June 30, 1999, the practice pathway expired. To apply under the practice pathway an applicant must have fulfilled the requirements of the practice pathway by that date.

For each medical toxicology activity submitted to fulfill the eligibility criteria, a verification form must be completed. The verification forms are included with the application material, and it
is the applicant's responsibility to provide the form to the appropriate individual for completion and return it to the ABP.

4. Partial Medicology Training Plus Practice Pathways
A combination of partial training and practice experience may be utilized to fulfill the eligibility requirements. This pathway will be utilized by physicians who have completed less than 2 years in a medical education program and/or have preceptorship training in medical toxicology and who have maintained a medical toxicology practice as outlined in Pathway 3 above.

Practice credit may be granted for partially completed subspecialty training or preceptorship training. The combination for training credit and medical toxicology practice must equal the requirements of the practice category of application (see Section C, Items 1 and 2).

An applicant who has completed 1 to 11 months of subspecialty training in medical toxicology will receive practice credit toward the 60-month requirement on a month-for-month basis. An applicant who has completed 12 to 23 months of acceptable subspecialty training in medical toxicology will receive practice credit toward the 60-month requirement on a two-for-one basis for each month of training completed.

Preceptorship training will be reviewed for possible practice credit toward the 60-month requirement on a month-for-month basis, up to a maximum of 24 months credit.

Patient care hours accumulated during the subspecialty training and/or preceptorship will be reviewed for credit on an hour-for-hour basis toward fulfilling the minimum 2,800-hour direct patient care requirement.

On June 30, 1989, the medical Toxicology training plus practice pathways expired. To apply under this pathway, an applicant must have fulfilled the requirements of the practice pathway by that date.

It should be noted that these criteria are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

Eligibility Criteria for Certification in Neonatal-Perinatal Medicine
The ABP has established a procedure for certification in neonatal-perinatal medicine. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

Admission Requirements
Physicians who entered training in neonatal-perinatal medicine or after January 1, 1988, are required to complete their training in a program accredited for training in neonatal-perinatal medicine by the RRC for Pediatrics in the United States or the RCPSC in Canada. Only those programs that are a part of an institution that offers residency or fellowship training in obstetrics and gynecology and include experience in fetal-maternal-perinatal medicine will be considered.

A subspecialty fellow who entered neonatal-perinatal medicine training before January 1, 1989, may apply for admission on the basis of completion of 2 years of fellowship training in neonatal-perinatal medicine.

Three years of full-time, broad-based fellowship training in neonatal-perinatal medicine is required for fellows entering training on or after January 1, 1989. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc., must be made up. If the program director believes that combined absences/leave that exceed 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began neonatal-perinatal medicine training on or after January 1, 1989, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1989, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those neonatal-perinatal medicine training programs that are accredited in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

Eligibility Criteria for Certification in Pediatric Nephrology
The ABP has established a procedure for certification in pediatric nephrology. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

Admission Requirements
Physicians who entered training in pediatric nephrology on or after January 1, 1987, are required to complete their training in a program accredited for training in pediatric nephrology by the RRC for Pediatrics in the United States or the RCPSC in Canada.

A subspecialty fellow who entered pediatric nephrology training before January 1, 1987, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric nephrology.

Three years of full-time, broad-based fellowship training in pediatric nephrology is required for fellows entering training on or after January 1, 1987. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc., must be made up. If the program director believes that combined absences/leave that exceed 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric nephrology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.
A fellow beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted. Only those pediatric nephrology training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or the RCPSG are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP. No credit will be given for subspecialty training during the core residency.

Dual Subcertification in Pulmonology (Internal Medicine and Pediatrics)
Individuals who are graduates of combined training programs in internal medicine and general pediatrics should contact both boards regarding dual subspecialty opportunities. It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

Eligibility Criteria for Certification in Pediatric Pulmonology
The ABP has established a procedure for certification in pediatric pulmonology. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

Admission Requirements
Physicians who entered training in pediatric pulmonology on or after January 1, 1982, are required to complete their training in a program accredited for training in pediatric pulmonology by the RRC for Pediatrics in the United States or the RCPSG in Canada.

A subspecialty fellow who entered pediatric pulmonology training before January 1, 1986, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric pulmonology. Three years of full-time, broad-based fellowship training in pediatric pulmonology is required for fellows entering training on or after January 1, 1986. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc., must be made up. If the program director believes that combined absences/leave that exceed 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric pulmonology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: A Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric pulmonology training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSG are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP. No credit will be given for subspecialty training during the core residency.

Dual Subcertification in Pulmonology (Internal Medicine and Pediatrics)
Individuals who are graduates of combined training programs in internal medicine and general pediatrics should contact both boards regarding dual subspecialty opportunities.

Subcertification in Pediatric Pulmonology and Allergy/Immunology
The intent of this route is to outline a mechanism whereby residents already certified in pediatrics may qualify for subspecialty training in both pediatric pulmonology and allergy/immunology in a shorter period of time than that presently required (3 years pediatric pulmonology plus 2 years allergy/immunology). This can be accomplished by successfully completing research training related to the requirements of both the Subboard of Pediatric Pulmonology and the Joint Board of Allergy/Immunology.

The total training program would require no less than 4 years (48 months) with at least 1 year spent in clinical pulmonology training and 1 year in clinical training for allergy/immunology. The minimum research requirement is 12 months in an environment and project relevant to both pulmonology and allergy/immunology. The fourth year would be spent in training acceptable to the Subboard of Pediatric Pulmonology and may be in clinical training or relevant additional research training.

1. Training in pediatric pulmonology may precede or follow training in allergy/immunology.
2. The candidate must train in pediatric pulmonology and allergy/immunology programs accredited by the RRC; the two programs do not necessarily have to be at the same institution. The research project selected by the trainee must be discussed with and approved by both training program directors.
3. The trainee must supply written details of any research project for which he/she plans to seek joint approval of both the Subboard of Pediatric Pulmonology and the Joint Board of Allergy/Immunology before or early in the course of his/her first year in a subspecialty program. The Subboard and Joint Board, in turn, will provide a preliminary written opinion to the trainee concerning the acceptability of the research project. This early approval is no guarantee of acceptance of the final research product.
4. The trainee is required to satisfy both the General Eligibility Requirements for Certification in Pediatric Subspecialties and the eligibility criteria specific to the Subboard and Joint Board as listed in the Graduate Medical Education Directory. Final admission to either certification examination is granted by the Credentials Committee after completion of training, fulfillment of the research competence requirements, and review of all application materials submitted by the candidate. It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

Eligibility Criteria for Certification in Pediatric Rheumatology
The ABP has established a procedure for certification in pediatric rheumatology. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be
fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

**Admission Requirements**

To qualify for admission to the examination, an applicant must have completed one of the following:

**A. Training**

Physicians who enter training in pediatric rheumatology on or after January 1, 1992, are required to complete their training in a program accredited for training in pediatric rheumatology by the RRC for Pediatrics in the United States or the RCSEP in Canada.

A subspecialty fellow who entered pediatric rheumatology training before January 1, 1992, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric rheumatology.

Three years of full-time, broad-based fellowship training in pediatric rheumatology is required for fellows entering training on or after January 1, 1992. Combined absence/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc., must be made up. If the program director believes that combined absence/leave that exceed 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric rheumatology training on or after January 1, 1992, the following must be accomplished in order to become certified in the subspecialty: A Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1992, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

For an individual using the pediatric rheumatology fellowship training route (A), a Verification of Competence Form(s) will be required from the director(s) of the fellow’s pediatric rheumatology training program(s).

**B. Practice Experience**

Five years of broad-based practice experience in pediatric rheumatology is required. A minimum of 50% of full-time professional activity must be spent in the practice of pediatric rheumatology to receive credit. It is assumed that night and weekend time would be distributed in the same manner as regular time. These 5 years should be of such type and quality that they constitute for the clinical exposure one might have encountered during subspecialty residency training. All pediatric rheumatology experience must be accrued before December 31, 1996. No foreign pediatric rheumatology experience will be accepted by the Credentials Committee in fulfillment of the requirements.

For an individual utilizing the pediatric rheumatology practice experience route (B), an evaluation form(s) will be required from the pediatric rheumatology program director (if there is a subspecialty training program) or the pediatric department chair or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing pediatric rheumatology.

**C. Partial Subspecialty Training and Practice**

A combination of partial subspecialty fellowship training and practice experience in pediatric rheumatology equal to 6 years as outlined below may be utilized:

1. A fellow completing less than 12 months of fellowship training in pediatric rheumatology may receive practice credit on a month-for-month basis. For example, a 9-month fellowship would be credited for 9 months of experience; this, added to 4 years and 3 months of pediatric rheumatology experience, would total 60 months or 5 years. These 5 years must be accrued before December 31, 1996.

2. A fellow completing 12 to 25 months of fellowship training in pediatric rheumatology may receive credit on a two-for-one basis.

   For example, an 18-month fellowship would be credited for 36 months of experience; this, added to 24 months of pediatric rheumatology experience, would total 60 months or 5 years. These 5 years must be accrued before December 31, 1996. No credit for partial training will be given for a subspecialty fellow who began training on or after January 1, 1992.

For an individual utilizing the combination partial subspecialty fellowship training and practice experience route (C), a Verification Form(s) will be required from the director(s) of the applicant’s pediatric rheumatology training program(s), and an Evaluation Form(s) will be required from the pediatric rheumatology program director (if there is a subspecialty training program) or the pediatric department chair or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing pediatric rheumatology.

The completed verification and evaluation form(s) should be sent directly to the ABP.

**Dual Subcertification in Rheumatology (Internal Medicine and Pediatrics)**

Individuals who are graduates of combined training programs in internal medicine and general pediatrics should contact both boards regarding dual subspecialty opportunities.

**Subcertification in Pediatric Rheumatology and Allergy/Immunology**

A candidate who is certified in pediatrics may qualify for subspecialty in both pediatric rheumatology and allergy/immunology in a shorter total period of training than that presently required (3 years of pediatric rheumatology plus 2 years of allergy/immunology). This compression of training by 1 year can be accomplished by successfully completing research training relating to the requirements of both the Subboard of Pediatric Rheumatology and the Joint Board of Allergy/Immunology.

The total training program would require no less than 4 years (48 months) with at least 1 year spent in clinical rheumatology training and 1 year in clinical training for allergy/immunology. The clinical rheumatology training should also include at least 2 years of at least one half-day/week of an outpatient rheumatology experience plus 1 month/year of inpatient rheumatology service to assure longitudinal exposure to rheumatologic problems in children. The minimum research requirement is 24 months in an environment and project relevant to both rheumatology and allergy/immunology, particularly immunologically related research.

1. Although training in clinical pediatric rheumatology may precede or follow training in allergy/immunology, such training should occur at least in the second year of this combined fellowship. An integrated training program may be developed that must be prospectively approved by both boards.
2. The candidate must train in pediatric rheumatology and allergy/immunology programs accredited by the RRC. The two programs should preferably be in the same institution, but programs in the same city may be acceptable.

3. The research project selected by the trainee must be discussed with and approved by both training program directors. The trainee must supply written details of any research project for which he/she plans to seek joint approval of both the Subboard of Pediatric Rheumatology and the Conjoint Board of Allergy/Immunology before or early in the course of his/her first year in a subspecialty program. The Subboard and Conjoint Board, in turn, will provide a preliminary written opinion to the trainee concerning the acceptability of the research project. This early approval is no guarantee of the acceptance of the final research product.

4. The trainee is required to satisfy both the General Eligibility Requirements for Certification in Pediatric Subspecialties and the eligibility criteria specific to the Subboard and Conjoint Board as listed in the Graduate Medical Education Directory. Final admission to either certification examination is granted by the Credentials Committees after completion of training, fulfillment of the research competence requirements, and review of all application materials submitted by the candidate.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

Eligibility Criteria for Certification in Sports Medicine

The ABP in collaboration with the American Boards of Family Practice, Internal Medicine, and Emergency Medicine offers a certificate of added qualifications in sports medicine. This document provides the requirements of the ABP. (Note: A candidate who has a primary certificate from one of the other three boards should contact that board office for its eligibility criteria.)

Admission Requirements

A. Certification by the American Board of Pediatrics (ABP)

An applicant must take and pass the certifying examination in general pediatrics and maintain a valid (current) certificate before being permitted to take a pediatric subspecialty certifying examination.

B. Licensure

An applicant must have a valid (current), unrestricted license to practice medicine in any of the states, districts, or territories of the United States or provinces of Canada in which he/she practices or have unrestricted privileges to practice medicine in the US armed forces. A copy of the unrestricted license must accompany the application material.

C. Training or Practice Experience

To qualify for admission to the examination, an applicant must have completed one of the following:

1. Training

An applicant must have completed a minimum of 1 year in a sports medicine training program that is associated with an accredited residency program in family practice, emergency medicine, internal medicine, or pediatrics.

Physicians who enter training in sports medicine on or after January 1, 2001, are required to complete their training in a program accredited by the RRC for Family Practice, Emergency Medicine, Internal Medicine, or Pediatrics.

The applicant must satisfactorily complete the subspecialty training by the first day of the month of the examination.

A Verification of Competence Form must be completed by the program director stating satisfactory completion of the required training as well as verification of clinical competence. The ABP will send this form to the program director for completion.

2. Practice Experience

Five years of practice experience in sports medicine is required. This experience must consist of at least 20% of total professional time devoted to sports medicine. The activities that qualify a candidate are one or more of the following:

a. Field supervision of athletes
b. Emergency assessment and care of acutely injured athletes
c. Diagnosis, treatment, management, and disposition of common sports injuries and illnesses
d. Management of medical problems in the athlete
e. Rehabilitation of the ill or injured athlete
f. Exercise as treatment

Partial training in sports medicine (ie, less than 12 months) will be credited on a month-by-month basis as practice experience.

An evaluation form must be completed by an individual to verify that at least 20% of professional time is devoted to sports medicine in one or more of the six activities cited above. The form must be completed by a physician who is knowledgeable about the applicant's practice, such as the pediatric department chair, the chief of pediatrics, chief of staff, or the medical director of a hospital where the applicant has admitting privileges. A partner or practice associate is not acceptable.

Practice experience accrued before 1987 will not be considered. All sports medicine experience must be accrued by June 30, 1998.

It should be noted that these criteria are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

2000 Subspecialty Certifying Examinations

Each subspecialty certifying examination is administered every 2 years. Dates of the examinations and other information may be found on the ABP web site. Application material for admission to a subspecialty examination may be obtained by contacting the ABP. Application forms are available only during the registration period for that examination.

The examinations last one-half day with a time limit of 4½ hours and consist of multiple-choice questions. Examples of the types of questions to be used are mailed to registered candidates before the administration of each examination. Some questions are included in the examination for experimental purposes only. These questions will not contribute to the score. A content outline is available on the ABP web site.

Each candidate's examination score will be reported to the subspecialty program director where training occurred. The names of those certified are sent to the ABMS for publication in the Directory of Certified Pediatricians and to various pediatric journals. Periodically, the ABP conducts research utilizing data it has compiled; the candidate's anonymity is guaranteed in all such cases.

Pediatric subspecialty examinations will be administered on August 7, 2000, in cardiology, critical care medicine, and pulmonology, and on November 13, 2000, in emergency medicine, hematology- oncology, and rheumatology. The certifying examination in medical toxicology will be administered in November 2000. It is the applicant's responsibility to be aware of and to meet registration deadlines.

The fees (in US dollars) for all subspecialty examinations are:

Fees for New Subspecialty Applicants

<table>
<thead>
<tr>

Fees for Subspecialty Reregistrants

- Processing and evaluation: $275
- Examination: $1,005
- Regular Registration: $1,280
- Late registration fee: $225
- Late registration: $1,505

A nonrefundable penalty fee of $225 is required for late registration.

Applicants can pay the total application fee by credit card, using either Visa or MasterCard, or by check.

For applicants not using US banks, the fee must be paid in US dollars using one of the following vehicles: (1) money order, (2) cashier's check or (3) certified check. To be accepted for payment, these vehicles must be payable through a US bank.

The ABP cannot accept electronic transfer of funds from any organization, eg, US military, Western Union.

Registration Dates for Subspecialty Examinations

For subspecialty examinations given on August 7, 2000:

**New applicants**
- Regular: October 1—November 30, 1999
- Late: December 1—December 31, 1999

**Reregistrants**
- Regular: December 15, 1998—February 16, 2000
- Late: February 17—March 16, 2000

For subspecialty examinations given on November 13, 2000:

**New applicants**
- Regular: February 1—March 31, 2000
- Late: April 1—May 1, 2000

**Reregistrants**
- Regular: March 15, 1999—May 15, 2000
- Late: May 16—June 15, 2000

Applications will not be accepted after the appropriate postmarked date.

Re-certification

**General Pediatric Recertification**

In November 1985, the ABP established a policy of time-limited certification. This policy became effective for those individuals certified in general pediatrics and in the pediatric subspecialties after May 1, 1988. Initial certificates will expire after 7 years.

The Program for Renewal of Certification in Pediatrics (PRCP) is the process by which the ABP re-certifies diplomates in general pediatrics. Diplomates who wish to be issued a new certificate after the 7-year period must successfully complete the PRCP for renewal of certification in pediatrics.

Diplomates certified before May 1, 1988, will not be affected by the policy of time-limited certification; however, those who choose to achieve certification renewal on a voluntary basis may do so by completing the PRCPS. Their certification will not be affected if they are not successful in completing the PRCPS.

**Subspecialty Recertification**

The Program for Renewal of Certification in Pediatric Subspecialties (PRCP-S) is the process by which the ABP re-certifies diplomates in the pediatric subspecialties. Diplomates who wish to be issued a new Certificate of Special Qualifications or Added Qualifications in a subspecialty of pediatrics after the 7-year period must successfully complete the PRCPS.

A diplomate who holds a Certificate of Special Qualifications does not have to be re-certified in general pediatrics in order to recertify in the subspecialty. However, a subspecialist who has been certified or re-certified within the previous 7 years in the subspecialty may become re-certified in general pediatrics by successfully completing a modified version of PRCP called PRCP-Ms.

Since Certificates of Added Qualifications are based upon a continuing working knowledge of the broad discipline of general comprehensive pediatrics, candidates will be required to hold a permanent or unexpired time-limited certificate in general pediatrics to be re-certified in an ABP subspecialty in which a Certificate of Added Qualifications (eg, sports medicine) has been given.

Diplomates certified in a pediatric subspecialty before May 2, 1988, except for pediatric pulmonology (1986) and pediatric critical care medicine (1987), will not be affected by the policy of time-limited certification; however, those who choose to achieve certification renewal on a voluntary basis may do so by completing the PRCP-S. Their certification will not be affected if they are not successful in completing the PRCP-S.

**Policies**

**Board Status**

The ABP has decided to follow the longstanding recommendations of the ABMS to its member boards not to use the term "Board eligible" because of continuing confusion about the term.

If an inquiry is made to the Board regarding the status of an individual, the response will be only whether the individual has been certified or not. Upon receipt of a signed release form, provided by the Board, information will be released regarding whether an individual's application to take a general or subspecialty certifying examination was accepted and when.

The allegation by an applicant that he or she has completed the required training and, therefore, is board eligible, without review and approval by the ABP, is not acceptable.

**Time Limit to Certification**

Candidates who have met the training requirements and whose applications to take the certifying examinations have been accepted by the ABP have unlimited time to become certified, subject to their continued compliance with Board policies and requirements, which are subject to change.

**Special Testing Accommodations**

An applicant who wishes to request special accommodations to take a certifying examination due to a disability is urged to notify the Board in writing of the request for accommodations as early as possible during the application period. The applicant will be sent the ABP policy on disabilities. The deadline for notifying the ABP is the registration deadline (postmarked).

**Maintenance of an Active License**

A diplomate's certificate will remain valid and effective only so long as the diplomate maintains an active license to practice medicine from the state in which the diplomate practices or lives. This requirement will be waived only under the following two circumstances:

- Fellowship: This requirement will be waived only during the pending of fellowship, for fellows for whom the licensure requirement was waived at the time of certification.
- Practice abroad: This requirement will be waived for diplomates who are practicing abroad, but only during the actual period when they are practicing abroad.

**Revocation of Certificates**

All certificates issued by the ABP are subject to the provisions of the articles of incorporation and the bylaws of the ABP. Each certificate is subject to possible revocation in the event that
1. the issuance of such certificate or its receipt by the physician so certified shall have been contrary to or in violation of any of the provisions of the ABP’s articles of incorporation or bylaws; or
2. the physician so certified shall not have been eligible to receive such certificate, irrespective of whether the facts constituting him or her so ineligible were known to any or all of the members of the ABP at the time of the issuance of such certificate; or
3. the physician so certified shall have made any misstatement of fact in his/her application for such certificate or in any other statement or representation to the ABP, its members, representatives, or agents.

If the ABP obtains probable cause to believe that a certificate should be revoked for any of the reasons set forth above, it may institute proceedings for revocation thereof by mailing written notice to the holder of such certificate that a hearing will be held to determine whether the certificate should be revoked. The steps to be taken are outlined in the Rules of Appellate Procedure of the ABP, which may be obtained by writing to the ABP.

Reinstatement of Certificates
When a certificate issued by the ABP has been revoked, the certificate may be restored once the physician has submitted a request for reinstatement and the Credentials Committee’s recommendation for reinstatement is approved by the Board of Directors.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Physical Medicine and Rehabilitation [ABPMR] to ascertain whether the information below is current.)

General Requirements
A. Requirements for graduates of educational institutions in the United States or Canada
1. Prior to entry in a residency training program: Graduation from a US or Canadian medical school approved by the Liaison Committee on Medical Education (LCME) or graduation from an osteopathic medical school approved by the American Osteopathic Association (AOA);  
2. Possession of a current, valid, unrestricted license to practice medicine or osteopathy in a US licensing jurisdiction or Puerto Rico or licensure in Canada. Evidence of licensure or an acceptable equivalent will be required prior to issuance of the certificate;
3. Satisfactory completion of the requirements of the Board for graduate education and experience in physical medicine and rehabilitation (PM&R) as set forth below. A resident is expected to complete training in PM&R in a single accredited program, except when significant extenuating circumstances make a change advisable; and
4. Satisfactory compliance with rules and regulations of the Board pertaining to the completion and filing of the application for examination and payment of required fees.
B. Requirements for graduates of educational institutions outside the United States or Canada
1. Possession of a valid certificate from the Educational Council for Foreign Medical Graduates (ECFMG) prior to entry into a PM&R residency training program;
2. Possession of a current, valid, unrestricted license to practice medicine or osteopathy in a US licensing jurisdiction or Puerto Rico or licensure in Canada will be required prior to issuance of the certificate;
3. Satisfactory completion of the Board’s requirements for graduate education and experience in PM&R as set forth below. A resident is expected to complete training in a single accred-
itio program except when significant extenuating circum-
stances make a change advisable; and
4. Satisfactory compliance with rules and regulations of the
Board pertaining to the completion and filing of the application
for examination and the payment of required fees.

**Residency Training Requirements**

Applicants for the certification examinations must have satisfac-
torily completed 48 months (4 years) of training in a PM&R residency
approved by the ACGME or the Royal College of Physicians and Sur-
gon's of Canada (RCPSC). The 48 months of training must be com-
mpleted after the completion of medical school.

Twelve of the 48 months must consist of a coordinated program
of experience in fundamental clinical skills such as an accredited
transitional year or include 6 months or more in accredited training
in family practice, internal medicine, pediatrics, or surgery or any
combination of these patient care experiences. The remaining
months of this year may include any combination of accredited spe-
cialties or subspecialties.

Accredited training in any of the specialties or subspecialties
must be for a period of at least 4 weeks. No more than 8 weeks may
be in nondirect patient care experiences. Training in fundamental
clinical skills must be completed within the first 2 years of the
4-year training program.

The program director and the Credentials Committee of the
Board, at the beginning of the residency, will make the decision regard-
ing the acceptability for credit of the 12 months of training in
fundamental clinical skills approved by the ACGME, the RCPSC, or
the AOA.

The program must include 36 months in PM&R in a training pro-
gram accredited by the ACGME or the RCPSC. This format is manda-
tory for all residents who entered training in 1985 or subse-
quently. A resident is expected to complete training in a single
accredited program except when significant extenuating circum-
stances make a change advisable. In the event of a transfer, the res-
ident is expected to complete all the PM&R program requirements
as outlined by the Residency Review Committee (RRC).

All required training and experience as stated above must be
taken in the United States, Puerto Rico, or Canada.

The training program must include a significant amount of time
spent in primary responsibility for the direct patient care manage-
ment of hospitalized patients on the PM&R service. Residents must
devote at least one-third of their residency experience to the care of
these hospitalized PM&R patients. They must spend at least one
third of the training in the care of outpatients, including a significant
experience in the care of musculoskeletal problems.

During PM&R training, the resident must develop comprehensive
basic and clinical knowledge, skills, experience, and measurable
competencies in areas such as
- history and physical examination pertinent to PM&R;
- assessment of neurological, musculoskeletal, and cardiovascu-
lar-pulmonary systems;
- determining impairment and disability;
- data gathering and interpreting of psychosocial and vocational
  factors;
- achievement of basic qualifications in the performance and in-
  terpretation of electrodiagnostic evaluations;
- psychiatric therapeutic and diagnostic injection techniques;
- prescriptions for orthotics, prosthetics, wheelchair and ambula-
tory devices, special beds, and other assistive devices;
- prescriptions with specific details appropriate to the patient for
  therapeutic modalities and therapeutic exercises;
- understanding of coordinated psychologic and vocational inter-
  ventions and tests;
- familiarity with the safety, maintenance, and actual use of medi-
  cal equipment common to the various therapy areas and labora-
  tories;
- formal experience in evaluation and application of cardiac and
  pulmonary rehabilitation as related to physiatric responsibilities;
  inpatient and outpatient pediatric rehabilitation;
- collaboration with other medical professionals and members of
  the allied health team, including management techniques consist-
  ent with the resident's team leadership role and the treatment
  program management role of the physiatrist;
- geriatric rehabilitation;
- sports medicine rehabilitation; and
- injury, illness, and disability prevention.

Also, the resident must achieve the ability to accept progressive
responsibility in diagnosing, assessing, and managing the condi-
tions commonly encountered by the physiatrist in the rehabilitative
management of conditions as follows:
- acute musculoskeletal pain syndromes;
- chronic pain management;
- congenital or acquired neuropathies, peripheral neuropathies, and
  motor neuron and motor system diseases;
- rehabilitative care of traumatic brain injury;
- hereditary, developmental, and acquired cranial nerve disorders;
- rehabilitative care of spinal cord trauma and diseases;
- rehabilitative care of patients with amputations for both congen-
  ital and acquired conditions in patients of all ages;
- sexual dysfunction common to the physically impaired;
- postfracture care and rehabilitation of postoperative joint
  arthroplasty;
- pulmonary, cardiac, oncologic, and other common medical condi-
  tions seen in persons with physical disabilities;
- geriatric diseases, impairments, and functional limitations;
- rheumatologic disorders treated by the physiatrist;
- medical conditions or complications commonly seen and man-
  aged in the physiatric patient;
- medical conditioning, reconditioning, and fitness; and
- soft tissue disorders.

The program requirements section on PM&R in the current
Graduate Medical Education Directory provides additional details
of PM&R residencies. This book, published annually by the Ameri-
Can Medical Association (AMA), cites specific programming by the
individual residency and its institutional base.

**Credit for Other Specialty Training**

Physicians who have had 1 or more years of training (up to and in-
cluding certification) in a program approved by the ACGME, the
RCPS, or the AOA in related relevant specialties may receive up to
a maximum of 12 months of non-PM&R training credit on recom-
modation of the program director and at the discretion of the
Board.

These relevant specialties include internal medicine, neurology,
orthopedics, pediatrics, family practice, and surgery. Completion of
36 months of training in an ACGME-approved PM&R residency is
mandatory.

The non-PM&R training credit will be considered for approval by
the Board only upon recommendation of the residency training pro-
gram director. Alternatively, upon the recommendation of the pro-
gram director, the Board may accept a noncoordinated ACGME-ap-
proved "transitional" year or an ACGME-approved year of training.
This alternative training may be in family practice, internal medi-
cine, pediatrics, neurology, orthopedics, or surgery.

No credit will be given toward shortening the basic required
4-year program for non-ACGME-approved residencies, fellowships,
It is recommended that all training be completed at one academic institution; any deviation will require prospective approval by both Boards. When two separate institutions are involved, there should be evidence of adequate coordination to provide an appropriate educational experience.

Combined Training in Internal Medicine and PM&R
A special agreement exists between the American Board of Internal Medicine (ABIM) and the ABPMR whereby a prospective resident interested in dual specialty certification in internal medicine and in PM&R can qualify to apply for admission to the certification examination of each Board. Admissibility is determined by satisfactory completion of a preplanned, combined, and integrated program that could be designed to be completed in a minimum of 60 months. Before the end of the R-2 level of training in either specialty, the ABPMR prospectively requires approval of a detailed curricular plan for a given resident signed by both program directors.

The non-PM&R 12-month segment of the 48 months of PM&R residency concerned with basic fundamental clinical skills will be credited on the basis of satisfactory completion of the regular first year of internal medicine residency. In addition, the ABPMR requires a minimum of 36 months of accredited PM&R residency with 6 months' credit for internal medicine rotations in such areas as rheumatology, endocrinology, cardiovascular, or pulmonary subspecialties of internal medicine.

During the 30 months in PM&R, the resident must satisfactorily complete 24 months of hospital and outpatient clinical management of patients receiving PM&R services. Physical medicine and rehabilitation training includes basic and advanced knowledge of musculoskeletal and neuromuscular anatomy and physiology as related to kinesiology, exercise, and functional activities as well as immobilization and inactivity. Applications and prescription of therapeutic exercise, orthotics, prosthetics, and assistive and supportive devices for ambulation and mobility are essential.

The following segments of training in PM&R are also required:
- experience with inpatient or outpatient pediatric rehabilitation
- adequate training to achieve basic qualifications in electromyography and electrodiagnosis
- opportunities to achieve understanding of special aspects of rehabilitation of patients in geriatric age groups

The 5-year internal medicine residency requirements are met in part by the ABIM recognizing 6 months' credit for PM&R residency training involving PM&R management of patients with problems related to internal medicine. Such problems include those occurring in patients with rheumatologic, cardiovascular, pulmonary, stroke, and oncologic conditions.

It is recommended that all training be completed at one academic institution. If two separate institutions are involved, there should be evidence of adequate coordination to provide an appropriate educational experience. Any deviation requires prospective approval by both Boards. After the program is approved, the resident's registration form is submitted. Vacations are shared pro rata between the two training programs.

Combined Training in Neurology and PM&R
The American Board of Psychiatry and Neurology (ABPN) and the ABPMR have approved the proposal that residents interested in dual certification in neurology and in PM&R can qualify to apply for admission to the certification examinations of each Board. This is accomplished by satisfactory completion of an integrated program planned and approved by both Boards prior to the end of the R-2 year, designed to be completed in a minimum of 72 months.

For purposes of this dual certification, both specialty Boards require a 12-month basic clinical skills segment in internal medicine.
The ABPMR requires a minimum of 36 months of accredited PM&R residency, and the ABPN requires 36 months of accredited neurology residency.

In order to decrease the total training time to 72 months (a reduction of 1 year), 12 months of training in areas that satisfy the special requirements in neurology and in PM&R must consist of 6 months of training in PM&R acceptable to the program director in neurology, and 6 months of training in neurology acceptable to the program director in PM&R.

It is recommended that all training be completed at one academic institution. If two institutions are involved, adequate coordination should provide an appropriate educational experience that meets the requirements and approval of each Board. Before the end of the R-2 year of training in either specialty, both program directors sign and submit a training plan for a given resident to the ABPMR for approval. After the program is approved, the resident's registration form is submitted. Vacation is shared pro rata between the two training programs.

Clinical Investigator Pathway

The ABPMR provides an opportunity for interested residents to participate in a Clinical Investigator Pathway (CIP) during their training. The ABPMR's criteria for certification as a Clinical Investigator requires that a resident complete a 5-year residency program that integrates training in PM&R and clinical research.

The purpose of the CIP is to increase the quality and capacity of physiatric research nationally by enabling a select group of clinically and research-minded residents to become well-trained in physiatric practice and research. The CIP is intended for PM&R residents in PM&R programs that have a strong emphasis on physiatric research.

The first year of the 5-year CIP is devoted to fundamental clinical skills required in general medicine. The following 4 years of residency training combine clinical and investigative training. Within any 4-year PM&R residency program, 5 months are allowed for research. The additional fifth year in the CIP allows for more in-depth research to occur with a total of 18 months of research.

In addition to these required 18 months of research training, 6 more months of combined experience in clinical and research areas may be included. However, there should be enough overlap between clinical training and clinical research that sufficient time is available to achieve competence in both areas.

Interested candidates should contact their residency program director for additional information.

Examination Admissibility Requirements

Part I

To be admissible to Part I of the Board certification examination, candidates are required to satisfactorily complete at least 48 months of postgraduate residency training, of which at least 36 months should be spent in supervised education and clinical practice in PM&R as part of an ACGME-accredited training program.

Satisfactory completion of the educational and training requirements in force at the beginning of the resident's training in an accredited program will be considered acceptable for application for admissibility to the certification examinations.

Final admissibility is contingent upon receipt of the final-year evaluation by the program director, due May 1 in the examination year. If a resident is placed on probationary status during the final year of the residency program, this status must be rescinded by the program director before May 1 for the resident to be admissible.

In order to have the application considered for examination, the applicant must be scheduled to complete the graduate medical education requirements on or before August 31 following the scheduled examination date for which he or she has applied.

Residents in approved PM&R programs in Canada, upon satisfactory completion of all the requirements for certification in that country, may apply for admissibility to Part I of the certification examination.

Part II

At least 1 full-time or equivalent year of PM&R clinical practice, PM&R-related fellowship, PM&R-related research, or a combination of these activities is required after satisfactory completion of an accredited PM&R residency training program.

The clinical practice must provide evidence of acceptable professional, ethical, and humanitarian conduct attestable to by two Board-certified physiatrists in the candidate's local or regional area. In rare instances in which a physiatrist is not geographically available, two licensed physicians in the area may support the candidate's application for Part II.

Alternatively, a candidate may take Part I and II in the same year if all residency training and practice time requirements have been completed. However, if the candidate does not pass Part I, the results of Part II will not count or be recognized in any way.

Also required is the candidate's possession of a current, valid, unrestricted license to practice medicine or osteopathy in a US licensing jurisdiction or Puerto Rico or licensure in Canada. Evidence of this license or an acceptable equivalent must be submitted with the application for certification examinations.

In order to have the application considered for examination, the applicant must be scheduled to complete the clinical practice requirements on or before August 31 following the scheduled examination date for which he or she has applied.

Application Requirements and Fees

Application Documentation - Part I

The application form for Part I that must be submitted by an applicant for the examination leading to certification can be obtained only by writing to the Board. The completed application must contain

- a copy of the medical degree diploma or certificate,
- the program director's statement that the applicant has or is anticipated to have satisfactorily completed an approved graduate program, and
- the names of three or more physiatrists or other physicians to whom the Board can write for professional and character references.

The applicant must submit a form, received from the Board, to the residency training program director; this form requests the rating of the professional ability of the applicant. The program director should promptly return the completed form to the Board office.

No decision regarding an applicant's admissibility to the examinations will be made until the physicians from whom references are requested have replied. All information submitted to the Board by a physician from whom a reference has been requested will remain confidential and will not be disclosed to the applicant without the permission of the said physician. Strict confidentiality of references submitted is required to ensure that the Board will receive complete and accurate evaluations of all applicants.

Application Documentation - Part II

An applicants applying for Part II must write a letter to the Board describing the professional time spent during his or her 1 full-time or equivalent year of PM&R clinical practice, PM&R-related fellowship, PM&R-related research, or combination of these.
The applicant must also submit statements from two physicians (from the applicant’s local or regional area), preferably Board-certified physiatrists, verifying the applicant’s 1 year in clinical practice, fellowship, research, or combination of these according to acceptable professional, ethical, and humanitarian standards. Acceptable verification statements and/or references will be from individuals unrelated to the candidate, whether family member, spouse, or significant other.

Applicants are required to submit a notarized copy of their current, valid, unrestricted license to practice medicine or osteopathy in a US licensing jurisdiction or Puerto Rico or licensure in Canada, or evidence of possession of an acceptable equivalent.

Accommodations for Persons with Disabilities
The ABPMR supports the Americans with Disabilities Act (ADA) and makes reasonable accommodations in examination procedures for individuals with documented disabilities. Applicants with disabilities may request modifications in the administration of the examination. The Board will grant such requests unless the modifications would place undue burden on the ABPMR or would fundamentally alter the measurement of the knowledge or skills the examination is intended to test.

Applicants considering the need for modifications are urged to obtain from the Board a copy of Procedures for Requesting Accommodations under the ADA. This publication outlines the documentation required of applicants with disabilities who request examination modifications.

All required documentation must be submitted to the Board office by January 1 of the year of the scheduled examination. Applicants anticipating the need for accommodations should contact the Board office well in advance of January 1 to allow sufficient time to submit any required documentation by the January 1 deadline.

Fees
All fees must accompany the application for examination.

Part I
An applicant who plans to take Part I only must submit a fee of $860. Of this amount, $200 covers an initial processing fee and an application processing fee and is not refundable. (See “Site Fee” below.)

Part I Reapplication
An applicant who reappears to take Part I only must submit a fee of $610. This amount includes a $100 nonrefundable reapplication processing fee. (See “Site Fee” below.)

Part II
An applicant who plans to take Part II only must submit a fee of $960 along with the required documentation for Part II application. Of this amount, $100 is an application processing fee and is not refundable.

Part II Reapplication
An applicant who reappears to take Part II only must submit a fee of $610. This amount includes a $100 nonrefundable reapplication processing fee.

Parts I and II
An applicant who plans to take both Part I and Part II initially in the same year must submit a fee of $1800 with the application. Of this amount, $300 covers an initial processing fee and an application processing fee and is not refundable.

Part I Reapplication and II
An applicant reappearing to take Part I and applying to take Part II for the first time must submit a fee of $1700. This amount includes a $100 nonrefundable reapplication processing fee for Part I and a $100 nonrefundable application processing fee for Part II.

Part I Reapplication and Part II Reapplication
An applicant reappearing to take both Parts I and II the same year must submit a $1700 fee. This amount includes a $100 nonrefundable reapplication processing fee for each Part I and Part II.

Site Fee
There is an additional $100 charge for those candidates selecting either Dallas, Texas, or Philadelphia, Pennsylvania, as an optional Part I examination site.

Late Fee
An additional $200 is required after the November 15 deadline.

Reapplication
Physicians who have failed Part I or Part II can apply for admissibility for reexamination during any subsequent examination period. The same requirements will be in effect for reapplication as for initial admissibility.

An additional fee of $750 for Part I, or $950 for Part II, if both Parts I and II are retested in the same year, the fee is $1700. A $100 nonrefundable processing fee, which is required for each Part I or Part II application for reexamination, is included in these fees. Currently, there is no limit to the number of times a physician may apply for repeat examinations.

Deadline
The appropriate fees and the completed application materials for admissibility must be postmarked and mailed by November 15 of the year before the scheduled examination. This applies to:

• Part I only;
• Part II only;
• Parts I and II of the examination in the same year;
• Reapplications.

An additional $200 penalty fee will be required for consideration of applications postmarked after November 15 and before December 15. The postmark applied by the US Postal Service is the date of mailing and takes precedence over postmarks applied by in-house mailing equipment.

Refunds and Forfeiture of Fees
Except as hereafter provided, no fees paid will be refunded. The Board will return the refundable portion of the fee only in the event that

• an applicant withdraws the application prior to the meeting of the Board to act thereon, or
• an applicant is declared not admissible to the examination.

Once an applicant has been declared admissible and is a candidate, the fees will be forfeited if the candidate withdraws for any reason or does not appear for the scheduled examination for which he or she applied.

The ABPMR does not assume responsibility for notifying an applicant of the impending loss of admissibility due to an incomplete application or incomplete qualifications.

The Board is a nonprofit organization, and the candidates’ fees are used solely for defraying the actual expenses of the Board. The directors of the Board serve without remuneration. The Board reserves the right to change the fees when necessary.
Examination Policies and Procedures

Designation of Admissibility

"Board admissible" is a term used by the Board to define the status of an applicant who has been accepted by the Board as a candidate to take the examination for which he or she has applied. Designation of "Board admissible" does not continue beyond the date of such an examination, regardless of results. The Board does not accept any use of the term "Board eligible" in lieu of documented admissibility.

A. For applicants who have not previously applied, or who have previously applied and have withdrawn their application, or who have previously applied and have been declared not admissible

The procedures required for these applicants toward becoming admissible to Board examination are as follows:
1. Timely filing of the completed application form, license, and educational credentials
2. Payment of the fees for the examination (see earlier fee structure)
3. Submittal of requested references
4. Confirmation from the Board office verifying Board action regarding the applicant's admissibility status

B. For applicants who are reapplying for Part I, having failed Part I, or having applied for but not having taken Part I of the examination

The procedures required for these applicants toward becoming admissible to Board examination are as follows:
1. Submission of a letter from the applicant to the Board requesting admissibility for reexamination
2. Payment of the fees for the examination (see earlier fee structure)
3. Confirmation from the Board office verifying Board action regarding the applicant's admissibility status

C. For applicants who are applying for Part II, having successfully completed Part I, or who are reapplying for Part II, having failed Part II but having successfully completed Part I

The procedures required for these applicants toward being designated as admissible to Board examination are as follows:
1. Submittal by the applicant to the Board of a letter of application for the examination or, if required, the resubmittal of an application form. The letter should contain a statement describing the required PM&R clinical practice, PM&R-related fellowship, PM&R-related research, or a combination of these.
2. Payment of the fees for the examination (see earlier fee structure)
3. Provision by applicant to the Board of a notarized copy of the current, valid, unrestricted license;
4. Timely filing of completed forms from two physicians (preferably Board-certified physiatrists) verifying 1 year of clinical practice, fellowship, research, or a combination of these.
5. Board office verification of Board action regarding the applicant's admissibility status.

Following the establishment of Board admissibility, the candidate will be notified of the time and place for the examination.

Note: Due to the large volume of documentation that the Board office will be receiving and processing on or before November 15, we ask that applicants do not call to verify receipt of their mailing. Applicants should check with their training director to see if documentation was sent to the Board office. An applicant who does not receive any notification from the Board regarding his/her application by December 15 should then contact the Board office.

Statement of Nondiscrimination

The ABPMR does not discriminate among applicants on the basis of age, sex, race, religion, national origin, disability, or marital status.

The Examination

As part of the requirements for certification by the ABPMR, candidates must demonstrate satisfactory performance in an examination conducted by the Board covering the field of PM&R. The examination for certification is given in two parts, written (Part I) and oral (Part II).

Part I and Part II of the Board examination are given once each year, usually in May at such times and places as the Board designates. While Part I of the examination is administered the same day and time at Dallas, Texas, and Philadelphia, Pennsylvania, in addition to Rochester, Minnesota, Part II is administered only at the Rochester test site.

Candidates should not bring cellular phones, pagers, laptop computers, recording devices, books, or study materials into the examination room.

Part I

The written examination is divided into morning and afternoon periods of approximately 4 hours each. The questions are designed to test the candidate's knowledge of basic sciences and clinical management as related to PM&R and will be in the form of objective testing.

If a candidate believes the scoring of his or her written examination is inaccurate, a request may be made to have the examination scored manually. The request must be filed in writing to the Board office within 30 days of notification of test results with an explanation of reasons for concern and with payment of a $100 fee for the manual rescroring.

Part II

The oral examinations are given by the directors of the Board, with the assistance of selected guest examiners. The candidate is examined by three examiners, each of whom conducts a 40-minute segment of the total 120-minute examination. Two 5-minute breaks divide the three portions of the oral examination.

Candidates will be expected to present in a concise, orderly fashion evidence of their proficiency in the management of various clinical conditions that core within the field of PM&R. During the oral examination, the examiner will ask questions about diagnostic procedures, therapeutic procedures, and patient management.

The candidate should be prepared to demonstrate familiarity with the literature of basic and clinical research, as well as recent significant literature pertinent to PM&R. Clarity of statements are expected. Evidence of the professional maturity of the candidate in clinical procedures and of factual knowledge will be sought.

In the event a candidate taking both Parts I and II examinations in the same year fails Part I of the examination, the results of Part II will not count or be recognized in any way. Both Parts I and II would need to be retaken for certification.

In addition to clinical PM&R, both the written and the oral portions of the examination will cover certain aspects of the basic sciences. The basic science components of the examinations may include:

- Anatomy: kinesiology and functional anatomy, biomechanics, neuroanatomy, and musculoskeletal anatomy
- Physics: electricity, mechanics, and biophysics of physical agents
- Physiology: physiology and pathophysiology of nerve, muscle, and bone, and of the cardiovascular, pulmonary, genitourinary, and central nervous systems; effects of physical and pharmacological agents used in PM&R; exercise and inactivity
- Pathology: pathology of muscles, nerves, bones, joints, soft tissues, and of the central nervous system
- Other fundamental clinical sciences: use of clinical knowledge, skills, experience, and competencies as listed under "Residency Training Requirements" above
The Certificate

Upon approval of the application and the candidate’s successful completion of the examinations, the Board will grant a certificate to the effect that the candidate has met the requirements of the Board. The recipient of a certificate will be known as a diplomate, or a certificant, of the American Board of Physical Medicine and Rehabilitation.

The Board began issuing 10-year, time-limited diplomate certificates in 1989. The expiration date for these certificates is June 30 of the given year. Recertification procedures and requirements are described briefly in a following section and in depth in a separate Booklet of Information available upon request from the Board office. Certificates issued prior to 1993 have no time-limited stipulations; holders of these pre-1993 certificates have no Board-based requirements for recertification.

Residents entering a training program are hereby informed and must be aware that time-limited certification for PM&R began in 1993 for all diplomates certified thereafter.

A certificate granted by this Board does not of itself confer or purport to confer any degree or legal qualifications, privileges, or license to practice PM&R. The Board does not limit or interfere with the professional activity of any duly licensed physician who is not certified by this Board. Privileges granted physicians in the practice of PM&R in any hospital or clinic are the prerogatives of that hospital or clinic, not of this Board.

The names of certifying diplomates of the Board appear in The Official ABPM&R Directory of Board Certified Medical Specialists published by Marquis Who’s Who, of New Providence, Rhode Island.

Special Policies And Procedures

Unethical and Irregular Behavior

Candidates who apply to take an examination must certify that the information they provide in their applications is true and accurate. Examples of unethical or irregular behavior include, but are not limited to, situations where:

1. any misrepresentation is discovered in the candidate’s application, in any other information submitted to the Board, or in the identity of a person applying to take or sitting for the examination;

2. any financial or other benefit is offered by a candidate to any director, officer, employee, proctor, or other agent or representative of the Board in order to obtain a right, privilege, or benefit not usually granted by the Board to similarly situated candidates;

3. any irregular behavior during the examination such as copying answers, sharing information, using notes, or otherwise giving or receiving aid is discovered by observation, statistical analysis, or answer sheets (score sheets), or otherwise; or

4. the chief proctor of the written examination or the oral examiner deems any portion of the candidate’s absence from the designated examination room for whatever reason and any duration as unexcused or otherwise impermissible.

The candidate in question shall be given written notice of the charges and an opportunity to respond in accordance with the appeals procedures set forth in the rules and regulations of the Board. If the Board determines that a violation has occurred, the Board may permanently bar the person(s) involved in the violation from all future examinations, invalidate the results of or refuse to score prior examinations taken by the person(s), withhold or revoke the certificate(s) of the person(s), and/or take other appropriate action. If sanctions are imposed pursuant to the rules and regulations of the Board, the Board may notify legitimately interested third parties of its action.

If the Board determines that irregular behavior has occurred during an examination, the Board will make every effort to withhold the scores of only those candidates directly implicated in the irregularity. In some instances, the evidence of irregularity, though sufficiently strong enough to cast doubt on the validity of scores, may not enable the Board to identify the specific candidates involved in the irregularity. In such circumstances, the Board may withhold the scores of candidates not directly implicated in the irregularity and, if necessary, may require those candidates to take an additional examination at a later date to ensure the validity of all scores. The examination booklets are copyrighted as the sole property of the Board and must not be removed by the candidate from the test area or reproduced in any way. Any reproduction of the test booklet, in whole or in part, is a federal offense and also may subject the candidate to the sanctions listed above. No notes, textbooks, other reference materials, scratch paper, or electronic devices may be taken into either the written or oral certification examination.

Misrepresentation

Misrepresentation or alleged misrepresentation of a person as a diplomate of the American Board of Physical Medicine and Rehabilitation or as having obtained a status of eligibility to take the certification examination will be investigated and acted upon by the ABPM&R. The Board will seek verifiable evidence of such misrepresentation from the individual in question and other sources. Once sufficient evidence for reasonable verification of such misrepresentation has been obtained, the Board will notify the individual and each related licensing agency of the evidence it has been able to obtain.

Such misrepresentation may include, but is not limited to, inclusion of an uncertified physician’s name in a listing of other certified physicians, whether in newspapers, telephone yellow pages, or other means of soliciting patients, with the inference that all so listed are certified in PM&R.

Substance Abuse

If a history of substance abuse exists, candidates must provide documentation that they can safely and effectively perform the duties and responsibilities of a Board diplomat. The Board treats this information as confidential. Such documentation may consist of:

1. evidence of a successful completion of a supervised treatment program,

2. evidence of a documented period of abstinence, or

3. evidence of current participation in a supervised rehabilitation program, combined with evidence that the candidate is no longer engaged in the abuse of drugs and/or alcohol.

Appeals

The Board has adopted appeal procedures and an appellate review process. The procedures are available to individuals who disagree with the Board’s decisions regarding applications for certification and admissibility to examinations, requests for accommodations due to disabilities, written examination, the oral examination process and procedures, the oral examination results, and other matters.

A copy of the appeal procedures and appellate review process is available upon request from the Board office. Failure to comply with the appeal procedures, including the requirement that appeals be instituted within 30 days after notice was given of the decision or action to be appealed, results in a waiver of appeal rights.

Revocation of Certification

Any certificate issued by the Board remains the property of the Board. Any certificate issued by the Board shall be subject to revocation at any time if the Board determines, in its sole judgment,
that the diplomate holding the certificate was in some respect not properly qualified to receive or retain it.

Revisions for Revocation

The Board may at its discretion revoke a certificate for the cause, including, but not limited to, the following:

1. The diplomate made any material misstatement or omission to the Board.

2. The diplomate did not possess the necessary qualifications and requirements to receive the certificate at the time it was issued, or not given on the list of candidates.

3. The diplomate engaged in irregular behavior in connection with an examination of the ABPMR, whether or not such practice had an effect on the performance of the candidate on that examination. Examples of irregular behavior may include, but are not limited to, copying answers from or knowingly giving answers to another individual, using notes during an examination, attempting to copy or distribute examination questions, or failing to return an examination booklet in the prescribed manner to the ABPMR or its representatives.

4. The diplomate misrepresented his or her status with regard to board certification, including any misstatement of fact about being board certified in any specialty or subspecialty.

5. The diplomate engaged in conduct that violated the moral or ethical standards of medical practice accepted by organized medicine in the locality where the diplomate is practicing, resulting in a revocation, suspension, qualification, or other limitation of his or her license to practice medicine, or the expulsion, suspension, disqualification or other limitation from membership in a local, regional, national, or other organization of his or her professional peers.

6. The diplomate's license to practice medicine has been revoked, suspended, qualified, or limited in any jurisdiction.

The holder of the revoked certificate will be given written notice of the reasons for its revocation. The notice will be sent by registered or certified mail to the last address that the holder has provided to the Board. Revocation will be considered final upon mailing of the notice.

Upon revocation of certification, the holder shall return the ABPMR certificate and other evidence of certification to the executive director of the Board and his or her name shall be removed from the list of certified physicians.

Individuals may appeal by complying with the appeal procedure. Failure to make a timely appeal will result in a loss of appeal rights. (Contact the Board office for the ABPMR appeal procedure.)

Certificate Reinstatement

Should the circumstances that justified revocation of the certificate be corrected, the Board, at its discretion, reinstate the certificate after appropriate review of the individual's licensure and performance, using the same standards and requirements applied to the applicant for certification.
available from the ABPMR office. Applications for this exam will be available from the Board office in January, with a due date of February 15. The fellowship or practice requirement must be completed by August 31 of the year in which an applicant will take the examination.

**Certificate of Subspecialization in Pediatric Rehabilitation Medicine (PRM)**

The authority to grant subspecialty certification in Pediatric Rehabilitation Medicine (PRM) was granted to the ABPMR by the ABMS in March 1999. The application and information on the examination process for subspecialization in PRM will be made available to all ABPMR Diplomates.

The **Subspeciality Certification in Pediatric Rehabilitation Medicine Booklet of Information** that summarizes the training and/or practice requirements and the application process, including deadlines and fees, is in the process of being developed. Interested individuals are encouraged to contact the Board office to have their names placed on a mailing list.

These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Plastic Surgery, Inc (ABPS), to ascertain whether the information below is correct.

**Introduction**

The ABPS, which was organized in June 1937 by representatives of various groups interested in this type of surgery, received recognition as a subsidiary of the American Board of Surgery (ABS) in May
The ABPS was given the status of a major specialty board in May 1941 by action of the Advisory Board for Medical Specialties as approved by the Council on Medical Education of the American Medical Association (AMA), which has designated certain specialty fields as being suitable to be represented by specialty boards.

The Board is organized under the laws of the State of Illinois for charitable, scientific, and educational purposes. No part of its net earnings shall inure to the benefit of any private member, director, officer, or other individual, nor shall the Board ever declare or make any such persons any dividend or other distribution. Nothing herein, however, shall prevent the payment of reasonable compensation for services rendered or the reimbursement of reasonable expenses incurred in connection with the Board's affairs.

Plastic surgeons certified by the Board are listed in the Official ABMS Directory of Board Certified Medical Specialists, published by Marquis Who's Who in cooperation with the American Board of Medical Specialties (ABMS).

Mission Statement
The mission of the ABPS is to promote safe, ethical, efficacious plastic surgery to the public by maintaining high standards for the examination and certification of plastic surgeons as specialists and subspecialists.

Description of Plastic Surgery
Plastic surgery deals with the repair, reconstruction, or replacement of physical defects of form or function involving the skin, musculoskeletal system, cranio-maxillofacial structures, hands, extremities, breast and trunk, and external genitalia. It uses aesthetic surgical principles not only to improve undesirable qualities of normal structures but also in all reconstructive procedures as well. Special knowledge and skill in the design and surgery of grafts, flaps, free tissue transfer, and reimplantation is necessary. Competence in the management of complex wounds, in the use of implantable materials, and in tumor surgery is required. Plastic surgery has been prominent in the development of innovative techniques such as microvascular and cranio-maxillofacial surgery, liposuction, and tissue transfer. The foundation of surgical anatomy, physiology, pathology, and other basic sciences is fundamental to this specialty.

Competency in plastic surgery implies a special combination of basic knowledge, surgical judgment, technical expertise, ethics, and interpersonal skills in order to achieve satisfactory patient relationships and problem resolution.

Sponsoring Organizations
The ABPS consists of 20 directors who manage the affairs of the organization. Nineteen directors are elected by the Board from names submitted by the following sponsoring organizations:
- The American Society of Maxillofacial Surgeons
- The American Society of Plastic and Reconstructive Surgeons
- The American Society of Plastic Surgeons
- The American Society of Reconstructive Microsurgery
- The American Society of Aesthetic Plastic Surgery
- The American Society of Surgery of the Hand
- The American Society of Cleft-Palate Craniofacial Association
- The American Society for the Peripheral Nerve
- The American Association of Ambulatory Surgical Facilities, Inc.
- The American Association for Accreditation of Ambulatory Surgical Facilities, Inc.
- The American Association of Plastic Surgeons
- The American Association of Plastic Surgeons
- The American Burn Association
- The American Head and Neck Society
- The American Society for Plastic Surgeons
- The American Society for Surgery of the Hand

Purposes
The essential purposes of the Board are
1. to establish requirements for the qualifications of applicants who wish to be certified as plastic surgeons in the broadest sense;
2. to conduct examinations of approved candidates who seek certification by the Board;
3. to issue certificates to those who meet the Board's requirements and pass the respective examinations;
4. to do and engage in any and all lawful activities that may be incidental or reasonably related to any of the foregoing purposes.

The Board is not an educational institution, and certificates issued by the Board are not to be considered degrees. The certificate does not confer on any person legal qualifications, privileges, or license to practice medicine or the specialty of plastic surgery.

Standards of certification are clearly distinct from those of licensure; possession of a Board certificate does not indicate total qualification for practice privileges, nor does it imply exclusion of others not so certified. The Board does not purport in any way to interfere with or limit the professional activities of any licensed physician, nor does it desire to interfere with practitioners of medicine or any of their regular or legitimate activities.

It is not the intent nor has it been the function of the Board to define requirements for membership on the staff of hospitals or to define who shall or shall not perform plastic surgical operations. The Board is not a primary source of censure or primary review of ethical problems.

Policies
It is the Board's prerogative to determine the professional, ethical, moral, and mental fitness of any candidate for its certificate.

The Board will consider opinions expressed concerning an individual's credentials only if they are in writing and signed. It is the policy of the Board to maintain its autonomy and independence from political and economical considerations that might affect plastic surgery.

The Board recognizes the role of legitimate advertising in the changing medical scene, but it does not approve of advertising that arouses unrealistic expectations, is false or misleading, minimizes the magnitude and possible risks of surgery, or solicits patients for operations that they might not otherwise consider.

Such advertising is improper and inconsistent with the high standards of professional and ethical behavior implied by certification by the ABPS. The Board takes statements regarding Board status seriously and may penalize persons misstating their status.
General Requirements
The following requirements for admissibility are in agreement with those promulgated by the ABMS:
1. The Board will accept only those persons whose major professional activity is limited to the field of plastic surgery.
2. The person must maintain an ethical standing in the profession and moral status in the community acceptable to the ABPS in conformity with the Code of Ethics of the ASBPRS. Moral and ethical practices that do not conform with the ASBPRS Code of Ethics may result in rejection of an application or in deferral of examination until such matters have been resolved satisfactorily.

The Board may deny a candidate the privilege of sitting for an examination, or may refuse issuance of a certificate, if it is found by additional disclosures or a recent charge in status that the candidate no longer meets the general or professional requirements.

Professional Requirements
The Board considers the requirements detailed in the sections on prerequisite training and training requirements to be minimal. Candidates are encouraged to take advantage of broadening experiences in other fields.

The Board reserves the right to
1. request lists of operations performed solely by the candidate for 1 or more years;
2. request special and extra examinations: written, oral, or practical;
3. request any specific data concerning the candidate that may be deemed necessary before making a final decision for certification;
4. consider evidence that a candidate's practice after completion of training is not in accord with generally accepted medical or ethical standards, which may result in rejection of the application or deferral of the examination until such time as the matter has been satisfactorily resolved.

Undergraduate Medical or Osteopathic Education
Before prerequisite training, candidates must have graduated from a medical school in a state or jurisdiction of the United States that is accredited at the date of graduation by the Liaison Committee for Medical Education (LCME), a Canadian medical school accredited by the Committee on Accreditation of Canadian Medical Schools (CACMS), or a US osteopathic school accredited by the American Osteopathic Association (AOA).

Graduates of medical schools located outside the jurisdiction of the United States and Canada must possess a currently valid standard certificate from the Educational Commission for Foreign Medical Graduates (ECFMG) or have completed a Fifth Pathway program in an accredited school of medicine in the United States.

Official Evaluation of Prerequisite Training
Official evaluation of prerequisite training by the Board is required prior to the initiation of residency training in plastic surgery for residents in independent programs and after the first year of residency for those in integrated plastic surgery programs. This simple preliminary step will prevent later disappointment. It is the responsibility of all residents in plastic surgery to obtain this evaluation. The Request for Evaluation of Training Forms are mailed upon request throughout the year. There is no deadline for submission of material to the Board Office. Each prospective candidate must obtain a Request for Evaluation of Training Form from the Board office prior to completion of prerequisite training. The completed Request for Evaluation of Training Form, a $150 nonrefundable processing fee (made payable to The American Board of Plastic Surgery, Inc, in US Funds), and a copy of the prospective candidate's medical school diploma is required upon submission.

A Confirmation Letter will be sent directly to the resident upon review and approval of the prerequisite training. The Plastic Surgery Matching Program does require the Board's Confirmation Letter for the Match Application. Prospective candidates should be aware of the Match Application deadline, usually in the fall. Please allow 6 weeks for the processing of the Request for Evaluation of Training Forms and mailing of the Confirmation Letter from the Board office.

Directors of accredited residency training programs in plastic surgery must require all prospective trainees to have an official evaluation and approval of their prerequisite training by the Board before they begin plastic surgery training.

Approval for residency training in plastic surgery will be provided to those individuals who clearly meet the Board's established training requirements. Further information for detailed credential review will be obtained on all other individuals where training was in other than accredited programs.

Official evaluations will be made by the Credentials and Requirements Committee. Individual officers or members of the Board cannot and will not make such estimates or rulings. It should be emphasized that the answers to many questions require a decision by one or more of the committees of the Board. This applies particularly to evaluation of training and questions of admissibility. Decisions are referred to the entire Board at the next scheduled Board meeting.

The process of reaching a final decision may require several months, since the full Board meets only twice annually. March 1 and September 1 are the deadline dates for receipt of written submission of special requests, documentation, and required fee for consideration by the Credentials and Requirements Committee.

The Board will issue neither a letter verifying prerequisite training nor an Application for Examination and Certification Form until the Request for Evaluation of Training Form has been received and approved.

Training Requirements
There are two major pathways toward obtaining acceptable graduate level training in plastic surgery: the independent model and the integrated model.

In an independent model, the candidate must complete both (1) prerequisite training and (2) requisite training (plastic surgery). In an integrated model, no such distinction exists.

Residents may transfer, prior to the last 2 years, from an independent type of program to another independent program and from an integrated type of program to another integrated program, but they may not exchange accredited years of training between the two different models without specific prior approval by the Residency Review Committee for Plastic Surgery.

The minimum acceptable residency year, for both prerequisite and requisite training, must include at least 48 weeks of full-time experience.

Independent Model
This consists of at least 3 years of general surgery residency training followed by 2 or 3 years of plastic surgery residency training.

Prerequisite Training
For United States or Canadian doctors of medicine or osteopathy with their medical degree or osteopathic degree granted in the United States or Canada, and international medical graduates, one of the following pathways must be taken:
1. A minimum of 3 years of clinical training in general surgery with progressive responsibility in the same program is required.
Rotating internships will not be accepted in lieu of a clinical year in general surgery. Broad surgical training experience is required. A total of 36 months of general surgery should be distributed as follows:

A minimum of 18 months in the primary and secondary components of general surgery. These include components 1 through 13 below:

1. General surgery
2. Alimentary tract surgery
3. Abdominal surgery
4. Breast surgery
5. Head and neck surgery
6. Vascular surgery
7. Endocrine surgery
8. Surgical oncology
9. Trauma
10. Critical care
11. Pediatric surgery
12. Cardiothoracic surgery
13. Transplant

No more than a total of 12 months in the other areas of prerequisite surgical training such as:

1. Gynecology
2. Neurologic surgery
3. Ophthalmology
4. Orthopedic surgery
5. Otolaryngology
6. Urology
7. Anesthesia
8. Burns

During this 12-month period, no more than 3 months may be spent on a single rotation. No more than 6 months on the combination of plastic surgery and hand surgery rotations may be assigned during the 3-year period of progressive responsibility as listed above in areas 1 through 8.

This program must be approved by the Residency Review Committee (RRC) for Surgery and accredited in the United States by the Accreditation Council for Graduate Medical Education (ACGME) or in Canada by the Royal College of Physicians and Surgeons (RCPSC) for full training. The minimum of 3 years of clinical training with progressive responsibility in the same program in general surgery must be completed before the candidate enters a plastic surgery residency. The satisfactory completion of this requirement must be verified in writing by the general surgery program director (see "Verification of Prerequisite Training," below). Or 2.

An accredited residency training program in neurological surgery, orthopedic surgery, otolaryngology, or urology. Prospective candidates may initiate residency training in plastic surgery following satisfactory completion of the entire course of training in the United States or Canada, as prescribed for certification by the American Board of Neurological Surgery, the American Board of Orthopaedic Surgery, the American Board of Otolaryngology, or the American Board of Urology. They must meet and comply with the most current requirements in these specialties. Satisfactory completion of training must be verified in writing by the training program director (see "Verification of Prerequisite Training," below) and evidence of current admissibility to the respective specialty board's examination process in the United States is required.

For prospective candidates with an MD degree obtained in the United States or Canada combined with a DMD or DDS degree

Satisfactory completion of a residency program in oral and maxillofacial surgery approved by the American Dental Association (ADA) is an alternate pathway for prerequisite training prior to plastic surgery residency. The satisfactory completion of this training must be verified in writing by the oral and maxillofacial surgery program director. This program must include the integration of a medical school component resulting in a doctor of medicine (MD) degree.

This combined training must also include a minimum of 24 months of progressive responsibility on surgical rotations under the direction of the general surgery program director after receipt of the MD degree. The general surgery program director must verify in writing the completion of 24 months of general surgery training, the level of responsibility held, inclusive dates, and specific content of rotation. Rotations in general surgery during medical school, prior to the MD degree, will not be considered as fulfilling any part of the 24-month minimum requirement. If the general surgery component is completed at an institution other than the sponsoring institution of the oral and maxillofacial surgery residency, then this training must be completed consecutively, with all 24 months spent in the same general surgery program that has been reviewed by the RRC for Surgery and is accredited by the ACGME in the United States.

Verification of Prerequisite Training

To ensure written verification from the program director under whom the candidate completed prerequisite training, the Board office will mail a verification form for completion and return by the program director. It is the candidate's responsibility to determine that the form has been completed and returned to the Board office.

Requisite Training

Graduate Education in Plastic Surgery

Two years of plastic surgery training is required, and the final year must be at the senior level. Residents entering a plastic surgery residency accredited for 3 years of training must complete the entire 3 years, including 1 year of senior responsibility.

Prospective Candidates are required to complete both years of a 2-year program in the same institution or the last 2 years of a 3-year program in the same institution. In either instance, the final year must be at the senior level.

Training in plastic surgery must be obtained in either the United States or Canada. The Board recognizes training in those programs in the United States that have been approved by the Residency Review Committee (RRC) for Plastic Surgery and accredited by the ACGME or those programs approved by the RCPSC.

Content of Training

Candidates must hold positions of increasing responsibility for the care of patients during these years of training. For this reason, major operative experience and senior responsibility are essential to surgical education and training.

An important factor in the development of a surgeon is an opportunity to grow, under guidance and supervision, by progressive and succeeding stages to eventually assume complete responsibility for the surgical care of the patient.

It is imperative that a resident hold positions of increasing responsibility when obtaining training in more than one institution, and 1 full year of experience must be at the senior level. The normal training year for the program must be completed. No credit is granted for part of a year of training.

The Board considers a residency in plastic surgery to be a full-time endeavor and looks with disfavor upon any other arrangement. The minimum acceptable training year is 48 weeks. Should absence exceed 4 weeks per annum for any reason, the circumstances and possible makeup time of this irregular training arrangement must be approved by the RRC for Plastic Surgery, and documentation of this approval must be provided to the Board by the program director.
Training in plastic surgery must cover the entire spectrum of plastic surgery. It should include experience in both the functional and aesthetic (cosmetic) management of congenital and acquired defects of the head and neck, trunk, and extremities. Sufficient material of a diversified nature should be available to prepare the trainee to pass the examination(s) of the Board after the prescribed period of training.

This period of specialized training should emphasize the relationship of basic science— anatomy, pathology, physiology, biochemistry, and microbiology—to surgical principles fundamental to all branches of surgery and especially to plastic surgery. In addition, the training program must provide in-depth exposure to the following subjects: the care of emergencies, shock, wound healing, blood replacement, fluid and electrolyte balance, pharmacology, anesthesi- ology, and chemotherapy.

Accredited Residency Programs
Information concerning accredited training programs for the independent model may be found in the *Graduate Medical Education Directory* (the “Green Book”) published by the American Medical Association (AMA) under the aegis of the ACGME. Copies of this directory are available at any medical schools and libraries, or candidates may order the directory directly from the AMA by calling toll-free 800 621-8336, or by writing to the American Medical Association, PO Box 7046, Dover, DE 19903-7046; www.ama-assn.org.

The Board does not inspect or approve residencies. The RRC for Plastic Surgery inspects and makes recommendations for or against approval of a residency training program in plastic surgery only after the director of the residency has filed an application for approval by the Residency Review Committee (RRC) for Plastic Surgery. For information contact the office of Doris A Stoll, PhD, 515 N State St, Chicago, Illinois 60610; 312 464-5505; www.acgme.org.

The RRC consists of nine members, three representatives from each of the following: the ABPS, the ACS, and the AMA.

Neither the Board nor its individual members can be responsible for the placement of applicants for training. The Board does not maintain a list of available openings in programs. Prospective candidates seeking accredited training in plastic surgery should correspond directly with the directors of those training programs in which they are interested.

Most plastic surgery residencies participate in a special Plastic Surgery Matching Program. For information, contact Plastic Surgery Matching Program, PO Box 7684, San Francisco, California 94120-7684; 415 447-0360; www.sfmatch.org.

Nonapproved Residencies
No other residencies in the United States, Canada, or other countries are acceptable in lieu of those specified above. This in no way implies that quality training cannot be acquired elsewhere, but the Board has no method of evaluating the quality of such programs and must be consistent in its requirements. The Board grants no credit for training, residency, and/or experience in disciplines other than those named.

Integrated Model
United States Program
Candidates must have a medical or osteopathic degree granted in the United States or Canada by an institution accredited by the LCME or the AOA.

Graduates of allopathic medical schools in the United States or its territories not accredited by the Liaison Committee for Medical Education (LCME) who have successfully completed the licensure requirements in a US jurisdiction are deemed to have appropriate undergraduate medical credentials.

Graduates of schools of medicine from countries other than the US or Canada must present evidence of final certification by the Education Commission for Foreign Medical Graduates (ECFMG). Information on this certification can be obtained by writing to ECFMG, 3624 Market St/4th Fl, Philadelphia, PA 19104-2488; 215 386-5600; www.ecfmg.org.

Accreditation by the ACGME is required for all years of the training program.

Training of no less than 5 years of clinical residency under the authority and direction of the plastic surgery program director is required. No less than 24 months of this program must be concentrated plastic surgery training, and the final 12 months must entail senior clinical plastic surgery responsibility. The last 2 years of training must be completed in the same program.

Canadian Combined Program
This requirement will pertain to all those applying for admission to the ABPS examination program beginning in the year 2006, but candidates may begin such a course of training before then if they so desire.

The third year of training in the Canadian 5-year combined program must consist of varied rotations of a general surgery nature demonstrating progressive responsibility at a third-year level. This program must be approved by the RCPSGC for full training.

Rotations may include the alimentary tract; the abdomen and its contents; the breast, skin, and soft tissue; the head and neck, including trauma, vascular, endocrine, congenital, and oncologic disorders, particularly tumors of the skin, salivary glands, thyroid, parathyroid, and oral cavity; the vascular system, excluding the intracranial vessels, the heart, and those vessels intrinsic and immediately adjacent thereto; the endocrine system; surgical oncology, including coordinated multimodality management of the cancer patient by screening surveillance, surgical adjunctive therapy, rehabilitation, and follow-up; comprehensive management of trauma, including musculoskeletal, hand, and head injuries (responsibility for all phases of care of the injured patient is an essential component of general surgery); and complete care of critically ill patients with underlying surgical conditions in the emergency room, intensive care unit, and trauma/burn units. No more than 6 months of this training may be spent on any single subspecialty surgical service, such as a burn unit, during the 3 years.

A Request for Evaluation of Training Form must be completed and returned by the candidate to the Board office along with a $150 nonrefundable processing fee in US funds (made payable to The American Board of Plastic Surgery, Inc).

A Verification Form must be completed and signed by both the director of postgraduate education for the university's department of surgery and the director of the university's training program in plastic surgery. After completion of plastic surgery training, the director of postgraduate surgical education and the plastic surgery program director will be required to complete and sign the last page of the Application for Examination and Certification Form.

Applying for Examination and Certification
The prime purpose of the Board is to evaluate the education, training, and knowledge of broadly competent and responsible plastic surgeons. The Board can not issue letters attesting to admissibility to the examination process to any person, institution, or organization until this formal application, along with the required supporting documents, have been received and approved.

The Application Process
In order to be admitted to the examination process leading to Board certification, prospective candidates should write to the Board office requesting application materials no later than
December 30 of the final year of their plastic surgery residency by one of the following methods:
- sending in the post card requests provided by the Board to each plastic surgery program director
- writing to the Board Office requesting Application Materials
- submitting a Web site application request at

A resident post card may be obtained from the residency program director, who will receive these post cards in December. Upon this written request, an Application for Examination and Certification Form will be provided and should be completed and submitted to the Board office by the deadline indicated in the application cover letter.

Prospective candidates must submit a completed Application for Examination and Certification Form to the Board office within 2 years after completion of their residency in plastic surgery in order to be considered for admission to the examinations leading to Board certification. Prospective candidates with disabilities requesting special accommodations for the examination process must do so in writing and provide documentation of the disability when submitting the Application for Examination and Certification Form (refer to “Examination of Candidates with Disabilities”).

Deadline for Submission of Application Material
Applications for admission to the written examination must be received in the Board office by the deadlines listed in the Booklet of Information.

Licensure
All candidates must have a currently valid, registered, full, and unrestricted license to practice medicine in a state, territory, or possession of the United States or in a Canadian province, and they must continue to be licensed throughout the certification process. A temporary limited license, such as an educational, institutional, or house permit, is not acceptable. A photocopy of an active registration certificate bearing a date that will be valid at the time of examination (s) must be submitted by the candidate.

Commissioned officers of the medical service of the armed forces of the United States or Canada on active duty need not present evidence of current registration of licensure but must provide appropriate information regarding their status.

Restrictions to Medical Licensure
The following sanctions by any and all state medical licensing boards where the candidate holds a license are considered a restricted license and will delay a candidate's admisibility to the Written or Oral Examination:
1. Limitation on practice or parts of practice
2. Probation
3. Probation with monitoring
4. Probation with supervision
5. Suspension

Other sanctions to a candidate's medical license such as revocation, fines, community service, or a stayed suspension must be reported to the Board and will be considered by the Ethics Committee before a candidate is admissible to the Written or Oral Examination.

Hospital Privileges
Candidates must have active operating privileges in a hospital throughout the certification process.

Letters of Recommendation
If a candidate has completed training in more than one program in plastic surgery, the program director of the first year of training must verify to the Board, in writing, the satisfactory completion of that year of training. Additionally, the Board may require favorable evaluations and verification from other surgeons.

Residency Graduation Form (US Programs)
A Residency Graduation Form will be mailed by the Board office directly to the plastic surgery program director for completion at the end of the resident's training in plastic surgery. A single form will be sent for each resident and will require signatures in two places. The first signature, by the program director, will attest that the resident has completed a residency training program in plastic surgery accredited by the RRC for Plastic Surgery or by the RCPSC under his/her direction and that the accredited number of years included a year of senior responsibility. The second signature will signify that the program director recommends the resident for admission to the examination process of the Board.

The Board requires each program director to complete a Residency Graduation Form for each graduating resident by July 15 of the year of residency completion.

If the program director elects not to sign either statement, the director is required to provide a full written explanation of the reason the required signature(s) is not provided. The individual's application cannot be processed, nor will the individual be admitted to the examination process of the Board, without both required signatures.

The program director must record any deficiencies that were responsible for the lack of signature(s) and discuss these with the individual. This written communication must be given to the individual and a copy must be forwarded to the Board office. If further educational training or experience is completed, the program director should request, within 30 days, that another Residency Graduation Form be sent for the required signature(s). If the individual is still felt to be deficient and not recommended for admission to the examination process of the Board, the program director again must communicate the cause for the lack of signature(s) to the Board office.

Failure on the part of the program director to complete the Residency Graduation Form within the stipulated framework will be considered an abrogation of the responsibility of the program director, and the RRC for Plastic Surgery shall be so notified.

Required Signatures (Canadian Programs)
Plastic surgery residents who complete their training in Canada will be sent an Application for Examination and Certification Form that must be completed accurately and signed by them. It must also be completed and signed by each director of postgraduate surgical education and the plastic surgery program director responsible for the resident's senior year. The signature of the director of postgraduate surgical education will signify that the resident has fulfilled all of the prerequisite and requisite graduate medical education requirements prescribed by the ABPS to the best of his/her knowledge. The two signatures by the plastic surgery program director will (1) attest that the resident has completed a plastic surgery residency accredited by the RCPSC and has included a senior year of responsibility under his/her direction; and (2) recommend the resident for admission to the examination process of the ABPS.

Notification of Admissibility
A candidate whose Application for Examination and Certification Form is approved will be notified in writing. An Information Form and Identification Form will be sent with this notification. They are to be completed and returned to the Board office within 30 days of notification. Failure to complete and return these forms will prevent the candidate from receiving further information pertaining to the Written Examination.

If it appears that the stated requirements have not been met, further details may be requested. This information will be reviewed by the Credentials and Requirements Committee. The committee
meets twice yearly (spring and fall), and decisions are not rendered at any other time.

Until the application has been received and approved, the Board will not inform any person, institution, or organization that a candidate is admissible to the examination process.

**Admissibility to the Examination Process**

Each approved candidate shall be entitled to take an examination(s) as required by the Board.

All candidates must comply with the current regulations in effect for the year in which the examination is taken, regardless of the time the original application was approved. It is the responsibility of candidates to seek information concerning the current requirements for certification by the Board. The Board does not assume responsibility for notifying candidates of changing requirements or the impending loss of admissibility to take an examination. A new *Booklet of Information* is published annually in July. The Board does not assume responsibility for notifying candidates of changing requirements or the impending loss of admissibility to take an examination.

The Board recommends that prospective candidates contact the Board annually to obtain a *Booklet of Information* for the current requirements and deadline dates. A request form is available on the ABPS Web site.

All candidates taking an examination of the ABPS must complete the entire examination.

Certification by any other specialty Board does not exempt candidates from any part of the examination process.

**Written Examination**

The Written Examination will be conducted in the fall each year or at any other time deemed suitable by the Board. The examination will be given on the dates specified and at the time specified. No exceptions will be made, and special examinations will be given only under unusual circumstances (see “Examination of Candidates with Disabilities” under “Special Situations”).

**Admissibility to the Written Examination**

Candidates admissible to the examination process may take the Written Examination in the spring of the year following successful completion of residency in plastic surgery, provided the Application for Examination and Certification Form is approved.

Candidates approved for admission to the Written Examination on or after July 1, 1991, will be offered five consecutive opportunities to appear for the Written Examination. Candidates may take the Written Examination three times during this 5-year period. Candidates who have not passed the Written Examination during this period will no longer be candidates for examination.

The satisfactory completion of an additional year of didactic training is required before a candidate can be considered for admission to the Written Examination. This additional year of training can be taken in a formal residency or a suitable plastic surgery preceptorship. This additional year of training must be approved in advance by the Credentials and Requirements Committee of the Board. Evidence of satisfactory completion of this year of training is required before further consideration for examination will be made.

If the Board approves the candidate's request for admittance to the Written Examination, two more consecutive opportunities to appear for the Written Examination will be offered. Once approval is received, the candidate must sit for examination at the first available opportunity. Candidates who do not successfully pass the Written Examination within these two consecutive opportunities will be required to repeat an entire plastic surgery residency to again be admissible to the examination process.

**Announcement Information**

Candidates who are admissible to the Written Examination will be sent annually, throughout their period of admissibility, an Announcement Packet including an Announcement Letter, *Booklet of Information*, reply card (green), and a hotel reservation card. Candidates may use the hotel reservation card if they wish to stay in the hotel at which the examination is to be given. When the reply card (green) is received, candidates must signify their intent to take the examination by completing and returning the reply card and examination fee immediately to the Board office.

Both sides of the reply card (green) must be completed. Otherwise, candidates will not be scheduled for examination. Hospital or academic appointments must be recorded on the reply card (green).

Candidates are responsible for their own travel, hotel accommodations, and expenses.

**Admission to Examination**

If the returned Reply Card (green) and examination fee for the Written Examination are not received by the date indicated in the Announcement Letter, the candidate may not be accepted for admission to that Written Examination.

**Reply Card and Examination Fee Deadline**

An Announcement Mailing will be sent in January 2000 for candidates approved for the examination process on or before December 31, 1999. The Reply Card (green) deadline for the Written Examination is the close of the business day on March 1, 2000. The examination fee of $1,000 and a photocopy of the medical license must accompany the Reply Card (green) in order to be scheduled for the Written Examination. A late penalty fee of $500 must accompany the Reply Card and examination fee if received by the Board office from March 2, 2000, up to and including the close of the business day on March 15, 2000. Reply cards, examination fees, and a photocopy of the medical license received March 2 up to March 15 will be considered only on a space available basis.

An Announcement Mailing and Approval Letter will be sent in July 2000 for candidates approved for the process after December 31, 1999. The Reply Card deadline for the Written Examination is the close of the business day on August 3, 2000. The examination fee of $1,000 and a photocopy of a valid and unrestricted license must accompany the Reply Card in order to be scheduled for the Written Examination. The August 3, 2000, deadline for candidates completing residency on June 30, 2000, is absolute. No late Reply Cards will be accepted.

Reply Cards, examination fees, and photocopies of valid unrestricted licenses received in the Board office after the close of the business day on March 15 or August 3, as noted above, will not be accepted for admission to the September 6, 2000, Written Examination.

**Admission Cards**

After being scheduled for the Written Examination, candidates will be mailed an Admission Card (white) approximately 3 to 4 weeks before the Examination date. The Admission Card lists the date and location of the examination, and the specific rooms to which candidates are to report as well as the candidate's name, current address, candidate number, and the "Result Mailing Date." Candidates must use their candidate number, which is printed on the card, throughout the examination. The Admission Card must be presented at Registration.

Advise the Board Office immediately by telephone if the Admission Card (white) is lost prior to the examination.
Withdrawal from Examination
Candidates wishing to withdraw from the examination must send written notification postmarked at least 30 calendar days before the date of the examination. Candidates will be refunded $300, the examination fee, less a processing charge of $700. Candidates who withdraw from the examination after this date or who fail to appear for the examination will forfeit the entire fee. The Board may waive this rule if the circumstances warrant.

Registration and Administration of the Examination
All candidates must take the entire examination on the same day and at the same time.
Candidates must register for the examination on the date, time, and location specified on their admission cards (white). If for any reason candidates are delayed or cannot arrive on time, they must notify the proctor or the Board office. If candidates are unable to attend the examination, they must notify the Board office either by letter or by telephone prior to the time of registration for the morning session. Any candidate who is more than 30 minutes late will not be admitted to the examination.
The Board office will provide each candidate with lead pencils for use during the examination. No other writing implements may be used.
Candidates are not permitted to bring any notes, textbooks, or other reference materials into the examination. Scratch paper is permitted, but space for notes and calculations is provided in the Question Book.
Question Books are prepared by and at the direction of the ABPS, are the sole and exclusive property of the ABPS, and said books are protected under the copyright laws of the United States and other countries. The Question Books may only be used for such purposes as are designated from time to time by the ABPS, and other than such designated purposes, all other rights are reserved by the ABPS.
Copying, by any means, of all or any part of such Question Books or removal from the examination room or unauthorized use in any way whatsoever of said Question Books are strictly prohibited.

Change of Address
If a candidate’s address, as it appears on the admission card (white), is incorrect or will change before the “Result Mailing Date,” please enter the corrected or new address on the back of the admission card (white) in the space provided before turning it in to a proctor at the end of the afternoon session. Admission cards (white) will be collected from all candidates at the conclusion of the examination.

Examination Schedule
The Written Examination will consist of one 5-hour session. The examination consists of two types of questions, multiple choice (one best answer) and true/false (multiple answers).

In general, each test item consists of a question, a case history, or a situation followed by a list of possible answers. Instructions for completion of each type are given in the Question Book that candidates will receive at the examination. Included in each Question Book is an Answer Sheet upon which candidates must record their answers by filling in the appropriate circles (in pencil).

Content of the Examination
The subjects covered in the examination are listed below, and both sessions will cover the entire field of plastic surgery, with no differentiation in content between the morning and afternoon sessions:
1. Basic techniques, wound healing, microsurgery, transplantation
2. Burns, sepsis, metabolism, trauma, resuscitation, nutrition, endocrinology, shock, hematology
3. Pre- and postoperative care, anesthesia, cardiorespiratory care, complications, clinical pharmacology
4. Tumors of the head and neck, skin, and breast, including treatment by radiation therapy, immunotherapy, chemotherapy, and surgery
5. Trunk, lower extremity, musculoskeletal system, pressure ulcers, rehabilitation
6. Hand, peripheral nerves, rehabilitation
7. Maxillofacial and craniofacial surgery and microsurgery
8. Congenital anomalies, genetics, teratology, facial deformity, speech pathology, gynecology, and genitourinary problems
9. Aesthetic (cosmetic) surgery, psychiatry, and legal medicine
10. Basic knowledge of pathology (eg, the biologic behavior of neoplasms, inflammation, and repair)
11. Gross and functional anatomy, embryology

The questions for the examination cover subjects considered to be of fundamental importance to competent performance in the field of plastic surgery. Every effort is made to avoid “trick” questions, ambiguity, and questions involving irrelevant facts. All questions are analyzed by psychometric techniques to ensure their quality.
Candidates will pass or fail on the strength of their performance on the entire Written Examination.

Results
Letters of notification of the results (pass or fail) of the Written Examination will be mailed on the date indicated on the admission card (white). The time period between administration of the examination and notification is necessary to allow for extensive analysis and to ensure that individual results are reliable and accurate.
Results of the examination will be divulged to no one until after the Board result letter has had time to reach candidates. If a week has elapsed after the “Result Mailing Date” and candidates still have not received the letter from the Board, they may then call for information. Information will be given to no one but a candidate personally. The Board staff will verify candidates’ identity prior to releasing results to them.
Each candidate will receive a single final grade (pass or fail) for the entire examination. To complete the Written Examination successfully, candidates must achieve a passing grade for the entire examination.
The score (pass or fail) on the examination will be determined by the total number of alternatives answered correctly. Therefore, candidates are encouraged to answer all items.
Pass
If a candidate passes the Written Examination, he/she will be informed of this fact.
Fail
If a candidate fails the Written Examination, he/she will be informed of this fact.
In case of failure, the candidate must repeat the entire Written Examination.
Hand Scoring ($200)
Hand scoring of the Written Examination will be performed upon written request. To request hand scoring, candidates must write to the Board office within 30 days from notification of the results. Candidates will be responsible for an extra charge for hand scoring of the examination. This charge will be determined by the secretary-treasurer of the Board. Currently, that fee is $200.
The Written Examination is scored and analyzed by a data processing organization that has extensive experience in the field of medical examinations. The optical scanning process is very accurate. The Board has found no discrepancies between hand scoring results and the original reported scores.
Cancellation of Examination
Should the ABPS, in its sole discretion, cancel the Written Examination, or as a result of events beyond its control be unable to administer the Written Examination at the appointed date, time, and location, or should ABPS fail to conclude a candidate's Written Examination, the ABPS is not responsible for any expenses the candidate may have incurred in connection with the cancelled Written Examination, nor for any expenses the candidate may incur for any substitute Written Examination.

Oral Examination
Candidates who are admissible to the Oral Examination will be sent annually, throughout their period of admissibility, an Information Letter including the program disks and instructions for case list compilation.

Prior to becoming admissible to the Oral Examination, candidates must have completed the Written Examination. Candidates admitted to the examination process before July 1, 1997, must have fulfilled the 2-year independent practice requirement.

Admissibility to the September 2000 Oral Examination
Only those candidates who submit a 7-month case list collected during the period beginning July 1, 1999, through January 31, 2000, along with the $600 nonrefundable fee, will be sent an Announcement Packet for the September 2000 Oral Examination.

Candidates approved for admission to the examination process before July 1, 1991, will be offered five opportunities in 27 calendar years to appear for the Oral Examination. Candidates who do not pass the Oral Examination during this period will no longer be candidates for examination.

Candidates approved for admission to the examination process, on or after July 1, 1991, will be offered three opportunities in 5 calendar years to appear for the Oral Examination. Candidates who do not pass the Oral Examination during this period will no longer be candidates for examination.

The satisfactory completion of an additional year of full-time clinical training is required before candidates can be considered for readmission to the Oral Examination. This additional year of training can be taken in a formal residency or a suitable plastic surgery preceptorship. This additional year of training must be approved in advance by the Credentials and Requirements Committee of the Board. Evidence of satisfactory completion of this year of training is required before further consideration for examination will be made.

If the Board approves the candidate's request for readmission to the Oral Examination, two additional consecutive opportunities to appear for the Oral Examination will be offered. Once approval is received, the candidate must sit for the examination at the first available opportunity. Candidates who do not successfully pass the Oral Examination within these two consecutive opportunities will be required to repeat an entire plastic surgery residency to again be admitted to the examination process.

Practice Requirement
1. Candidates approved for admission to the examination process before July 1, 1986, and after July 1, 1997, do not have a practice requirement.
2. Candidates approved for admission to the examination process between July 1, 1986, and June 30, 1997, must have been in the independent practice of plastic surgery for at least 2 years. The 2 years of practice need not be consecutive.
3. A fellowship is not considered independent practice.
4. Candidates must be actively engaged primarily in the practice of plastic surgery.
5. Candidates must hold medical staff privileges in plastic surgery in a United States, Canadian, or foreign hospital throughout the case collection process. Candidates must provide written verification of these privileges.

Case List Compilation
Candidates for the September 2000 Oral Examination are required to provide the Board with a compilation of operative cases and hospitalized patients during all or part of the 7-month period beginning July 1, 1999, and ending January 31, 2000. Case Lists are due in the Board office before the close of the business day on March 1, 2000.

An Information Packet including the program disk and program instructions for compiling the 7-month case list will be sent to candidates. Disks will be available for the September 2000 Oral Examination up to and including January 31, 2000. No disk requests will be honored after this date.

The Case List compilation method is a Board-provided computerized program available on an IBM-, Mac-, or Power Mac-compatible 3 1/2-inch disk. The computerized program provides a standardized Case List that facilitates the Board's review. Candidates with IBM-, Mac-, or Power Mac-compatible office equipment or those desiring to rent such services will find the menu driven program easy to complete.

The printed case list will be in chronological order for each institution (hospital, office-based surgery, etc.) and include: patient's initials, hospital (or other) identifying number, age in months and days, sex, date of operation, case classification, diagnosis, procedure(s) performed (if any), CPT codes plus modifiers (identical to those used for billing on that case), and outcome including complications.

Using the Board-provided program, the Case List may be prepared, selected and printed from the menu options. A "landscape compatible" (horizontal) laser printer is required to print in the correct format. A vertically oriented printout (for presubmission review) may be obtained from a simple dot-matrix printer. Offices not having IBM-, Mac-, or Power Mac-compatible equipment may choose to have their raw data transferred to this form by renting stenographic service. After generation of the Case Lists and preparation of the additional material, the disks must be returned to the Board office with the original and a copy of the Candidate Case Summary Sheet (obtainable via the Board program) and completed Case Lists (affidavits for each institution are automatically printed out on the last page of each institution's Case List).

Instructions for Data Compilation
The Board recommends that candidates begin compiling the Case List on a weekly or monthly basis, rather than waiting until the last month of the compilation period to begin Case List compilation on the disk program. The "missing data report" on the reports menu will assist in reviewing entered data—including CPT codes. A trial printing well in advance of the deadline will also help in troubleshooting problems.

1. Providing complete diagnosis and procedure information is essential. From the operative notes, give an accurate written description of the diagnosis and the operative procedure(s). Do not use ICD-9 and CPT codes in place of the written description of the diagnosis and procedure(s). The case was nonoperative, include a discharge summary diagnosis. Include all CPT codes plus modifiers used for insurance billing purposes, as well as all cases that were not billed to insurance (eg, aesthetic/cosmetic cases). CPT cases starting with 96 (office visits, consultations, etc) must also be included. To provide an equitable examination for all candidates, no candidate will be exempt from CPT coding. Unlike previous years, candidates practicing in managed care relationships or military, Veterans Administration, Kaiser Permanente, or Shriner's Hospitals and candidates practicing in...
Canada and foreign countries must include CPT codes for all cases.

2. Do not list assistant cases, namely cases billed by the candidate as an assistant surgeon. This exclusion does not cover cases done by a resident and attended by the candidate, or cases billed as co-surgeon; such cases should be included on the case list.

Do not list voluntary surgical activity in developing countries. Cases performed during such service may not be included in compilation of case list materials for the Oral Examination because of the lack of continuum of care.

3. Providing "outcome" information is essential. A short statement with respect to the outcome of each case will help guide the Board. Not all cases "heal without complications." Examples include "necrosis of tip of flap" or "normal sensation returned, but index finger stiff after tendon repair." The computer program allows outcome recording by number selection—only numbers 3, 4, and 5 require written explanation.

4. The list must include multiple operative procedures performed on the same patient. This inclusion allows automatic cross-referencing by the computer program. However, hospital number (or other) identifying numbers and patient initials (do not use full names) must be consistent for the patient with multiple procedures (e.g., if a patient is listed at more than one institution, the same identifying number must be used to identify the patient).

5. All operative procedures must be included, whether inpatient, outpatient, or office-based surgery. All patients hospitalized by the candidate as the admitting physician must also be included, even if the patient is managed nonoperatively. Office-based surgery that does not require a dictated note (e.g., neu) does not need to be included. However, the Board suggests that the candidate err in the direction of inclusion of cases rather than exclusion. Do not include inpatient consultations on other services that did not culminate in a surgical procedure.

6. All emergency room patients who required an operative note must be included.

7. The completed lists must be signed by the medical record librarian/administrator of each institution (hospital, ambulatory surgery center, etc.) and properly notarized as a complete list of the candidate’s operative experience. Operations done by the candidate in the office must also be listed and notarized by the appropriate office personnel who can attest to the completeness. The institution’s affidavit sheet prints out in sequence as the last page of each institution’s Case List.

8. Two Candidate Case Summary Sheets (original and copy) must be submitted. This form facilitates the Board’s review. The computer program generates the form directly by menu selection.

Preparation for Submission of Data

1. Print your 7-month Case List, using landscape format. Carefully proofread for accuracy. Handwritten information is not accepted. Note: If “case data missing” prints at the top of the pages, corrections must be made and the Case List reprinted before submission. The Missing Data Report will help identify cases requiring correction.

2. Obtain notarized affidavits from the medical record librarian/administrator of each institution (see “Instructions for Data Compilation,” #8 above).

3. Make a copy of the entire case list only after you have proofread the accuracy of the list including the notarized affidavits. The Candidate Affidavit should be the first page and the Candidate Summary (statistics) sheet the last page. Candidates often use this list later for application to the American College of Surgeons. An additional copy should be retained for your own records.

4. Staple the “Candidate Affidavit Sheet” to the top of the first institution’s section of your case list. Follow the same procedure for the copy. The Candidate Affidavit Sheet prints as the last page of the All Cases Report. It should accurately note the total number of pages in the Case List, e.g., “these are all the cases from pages 1 to 151.”

5. Place the original 7-month Case List, including the signed and notarized affidavits for each institution, in numerical order with the pages for each institution stapled together. An exact copy, in numerical order and stapled by institution, must be included. The end of each institution’s Case List is noted by the respective Candidate’s Institution Affidavit Sheet, which includes the six-digit candidate number, name, address, telephone number(s), and notarized affidavit signed by the candidate.

6. Place the stapled original 7-month Case List together, including the signed and notarized affidavits. Place the Candidate Case Summary Sheet (statistics) on the bottom. Bind the entire 7-month Case List using a binder clip or a rubber band. Follow the same procedure for your stapled copy. Do not place this material in binders or notebooks.

Submitting Material to the Board Office

The deadline for submission of case list materials for the September 2000 Examination is the close of the business day on March 1, 2000.

Candidates are required to submit the following items to the Board office:

- One original and one copy of Candidate Affidavit Sheet (the first page of each).
- One original and one copy of the Case List, including the signed and notarized affidavits for each institution.
- One original and one copy of the Candidate Case Summary Sheet (statistics sheet) (the last page of each).
- Original Board program disks.
- Most recent backup disks containing all database backup files.

Please label the disk with your name and Board six-digit candidate number. Examine contents of the disk for all required information. We recommend that you retain at least one copy of the disk information in the event there is damage to your submitted disk during shipping.

- Check in the amount of $500 (nonrefundable, US currency only) made payable to The American Board of Plastic Surgery, Inc. This fee provides for review of the Case List and selection of cases for preparation for Case Reports.

Submit to the Board Office in Philadelphia. Make sure you have proofread the accuracy of the list including the notarized affidavits. Place the original 7-month Case List, including the signed and notarized affidavits for each institution, in a separate numerical compilation. Make a separate numerical compilation for each of the copies. The end of each institution’s Case List is noted by the respective Candidate Affidavit Sheet, which includes the six-digit candidate number, name, address, telephone number(s), and notarized affidavit signed by the candidate. Staple each institution’s Case List together.

Take the stapled Case List for the first institution (case list starts with page 1) and staple the “Candidate Affidavit Sheet” to the top of this section only. Follow the same procedure for the copy. Place all stapled original 7-month Case Lists together, including the signed and notarized affidavits. Place the Candidate Case Summary Sheet on the bottom. Bind the entire 7-month Case List using a binder clip or a rubber band. Follow the same procedure for your stapled copies of the 7-month Case List. Do not place this material in binders or notebooks.

The Board strongly recommends candidates send materials by a guaranteed delivery carrier, thus providing assurance and receipt of
delivery. Use of a guaranteed delivery carrier, which often can verify receipt of delivery within 30 minutes, minimizes the need to call the Board office concerning your materials and allows the Board staff to process the large volume of received material.

**Reminder**
Candidates who do not provide the required items in the manner outlined will not be considered for admission to the Oral Examination.

Incorrectly submitted items will be returned to the candidate. No exceptions will be made regarding late, incomplete, incorrect, or missing data from the Case Lists.

No lists or other material will be accepted after the March 1, 2000, deadline dates.

It is the candidate's responsibility to ensure that all materials have been proofread, placed in numerical order, and properly collated. Check that the backup disk has all of the required database files (.dbf) with no personal files inadvertently saved to the disk.

**Photographic Documentation**
Particular emphasis should be placed on the necessity of photographic documentation. Preoperative and postoperative photographs are mandatory for all cases selected for case reports, and intraoperative photographs may aid in further illustration of the clinical problem. The candidate must provide a signed notarized affidavit attesting that all submitted photographs are the original and unaltered documentation of the patient cases presented for the Oral Examination. Digital photographs are accepted.

The Board advises candidates who have not acquired the habit of routine photographic documentation of all patients to do so immediately. Any cases from the collection period may be selected and must have photographic documentation, including all hand cases (i.e., carpal tunnel cases, etc.). Transparencies are not acceptable.

It is the candidate's responsibility to maintain patient confidentiality. For all cases, the candidate must obtain a signed consent/release form for use of illustrations, photographs, or imaging records for examination, testing, credentialing, and/or certification purposes by The American Board of Plastic Surgery, Inc. Suggested wording for the consent would be:

"I hereby grant permission for the use of any record, illustration, photograph, or other imaging record created in my case, for use in examination, testing, credentialing, and/or certifying purposes by The American Board of Plastic Surgery, Inc."

**Board Review and Selection Process**
The Board reviews the Candidate's 7-month Case List and the Candidate Case Summary Sheet to determine if the candidate's operative list reflects sufficient diversity, complexity, and volume to demonstrate adequate maturity of practice of plastic surgery to permit examination of the candidate for certification as an expert in the specialty. In the event that the case list submitted is not adequate to allow selection of cases, the candidate will be deemed ineligible for the 2000 Oral Examination. This will constitute one of the five calendar year opportunities to appear for the Oral Examination, but will not count as an unsatisfactory performance (i.e., one of the three opportunities to sit for the Oral Examination).

The candidate may submit another case list the following year for the duration of his/her period of admissibility. Candidates are notified in writing regarding Case Lists that the Board has found to be inadequate to allow for selection of Case Reports. This decision is final and not subject to appeal.

The Board selects cases from the candidate's Case List and requests the candidate to prepare Case Reports for these selected cases. The selected Case Reports will be prepared in the same format and with similar requirements as in past years.

For the September 7, 8, 9, 2000, Oral Examination:
The Announcement Packet will be mailed to candidates by June 5, 2000. It includes the list of Board-selected cases for preparation as Case Reports, a Booklet of Information, Reply Card (green), and a hotel reservation card. Candidates are asked not to contact the Board office prior to that date with respect to the submitted case list.

**Instructions and Information Pertaining to the September 7, 8, 9, 2000, Oral Examination**
The Oral Examination will be conducted each fall or at such other time as deemed suitable by the Board. The examination will be given on the dates and at the times specified. No exceptions will be made.

**Announcement and Information and Admission to the Oral Examination**
Those candidates admissible to the Oral Examination will receive an Announcement Packet approximately 3 months in advance of the date of the examination. It includes a Booklet of Information, Reply Card (green), a hotel reservation card, and the list of cases for preparation as Case Reports.

When the Reply Card (green) is received, candidates must signify their intent to take the examination by completing both sides and returning the Reply Card (green) and balance of the examination fee of $1,000, with a photocopy of a valid unrestricted medical license and verification of medical staff privileges achieved in plastic surgery during the case collection period from the primary hospital, to the Board office by the deadline date indicated in the Announcement Letter and on the Reply Card.

Candidates must complete both sides of the Reply Card (green) including all hospital or academic appointments. Otherwise, candidates will not be scheduled for examination.

Candidates are responsible for their own travel, hotel accommodations, and expenses.

**Admission to Examination**
The returned Reply Card (green) and balance of the examination fee of $1,000, a photocopy of the medical license and verification of medical staff privileges from the primary institution must be received in the Board office by the close of the business day on July 5, 2000, to be scheduled for the Oral Examination.

Reply cards (green), Examination fees ($1,000), and state medical licenses and verification of staff privileges received from July 6 to July 8, 2000 (September Oral Examination) will require a late penalty fee of $700.

Reply cards (green), Examination fees ($1,000), and state medical licenses and verification of staff privileges received in the Board office after the close of the business day on July 8, 2000, will not be accepted for admission to the Oral Examination.

Once scheduled for the Oral Examination, the candidate receives preparation materials for the Case Reports. These materials include five folders for the examination, tab indices, a Photographic Affidavit Sheet, and labels for assembling and binding the selected Case Reports. It is essential that candidates place the candidate number, which appears on the Admission Card (white), on each label to be affixed to the cover of each case report, along with the other required information.

Once scheduled for the Oral Examination, the candidate also receives a candidate Admission Card (white). The Admission Card lists the candidate's name, current address, candidate number, date and location of the examination, and the specific room to which candidates are to report.

Advise the Board office immediately by telephone if the Admission Card (white) is lost prior to the examination.
Candidates must provide a Selected Case List Summary Sheet. Type each summary page on white bond paper. If necessary, copy multiple pages as a double-sided list on white bond paper. Bind the summary sheet(s) before Tab 1, at the beginning of the folder for Case Report #1. The list must be identified with the candidate name and candidate number.

- **Photographic Affidavit Sheet**
  Affidavit Sheet must be signed and properly notarized, attesting that all photographs are the original and unaltered documentation of the patient cases presented for the Oral Examination.
  Place the Photographic Affidavit immediately behind the Selected Case List Summary Sheet prior to the first Tab in Case Report #1.

- **Title Page**
  Each report must be typed or reproduced on standard, letter-sized white paper (8½-inch x 11-inch) with the candidate’s full name, candidate number, the selected case number (i.e., #1, 2, 3, 4, 5) not the assigned number in the case list, the hospital or other identifying number, the principal diagnosis, and the primary operation listed on the title page. Categorize cases exactly as was done on the 7-month case list compilation.
  For each case, include the following title page information in front of the first Tab:
  July 1, 1999, through January 31, 2000, for the September 2000 Examination.

**Board Case Number**

**CATEGORy**  ANATOMY
Aesthetic  Head and Neck
Burn  Breast
Cancer  Hand
Congenital  Upper Extremity
Skin  Trunk
Trauma  Lower Extremity
Other  Genitalia

Patient’s hospital (or other) identifying number
Primary diagnosis
Procedure(s) done by the candidate

**Tabs**

- **Narrative Summary (First Tab)**
  A brief (one-page) narrative summary of the preoperative, operative, and postoperative course of the patient is required. Include a final separate paragraph entitled “outcome.” Indicate here the outcome of the treatment and the final condition of the patient.

- **Photographs**
  Pre- and postoperative photographs, approximately 4-inch x 6-inch color or black-and-white prints glued on 8½-inch x 11-inch white bond paper are preferred. The Board strongly recommends intraoperative photographs when they provide clarifying information. Digital photographs are accepted. Note the Photographic Affidavit Sheet (placed behind the Selected Case List Summary Sheet) applies to all submitted photographs. It must be signed and properly notarized attesting that all photographs are original and unaltered documentation of patient cases presented for Oral Examination. Diagrams or simple drawings may be substituted for intraoperative photographs. Descriptive legends and dates of the photographs must be placed adjacent to or below each photograph.

- **Operative Report**
  This should include photocopies of originals for all operative reports for procedure performed by the candidate on this specific patient during the 7-month period. Operative reports of minor procedures performed by the candidate in the office during the 7-month collection period should also be included. You may include copies of the operative reports of procedures performed outside the 7-month collection period or those that were performed by another surgeon.
if they clarify the patient’s course. Group all operative notes together in chronological order.

- Anesthetic Report

Photocopies of the original anesthetic records are required. This should include all anesthetic records for procedures performed by the candidate during the 7-month collection period. You may include copies of the anesthetic reports of procedures performed outside the 7-month collection period or those that were performed by another surgeon if they clarify the patient’s course. Group all anesthetic records in chronological order.

- Laboratory

Photocopies of pertinent laboratory data are required. Group the data together in chronological order. Candidates are encouraged to use their judgment when including this material.

- Pathology

Photocopies of any pertinent pathology reports are required. Group all pathology reports together in chronological order.

- Radiology

Photographs of pertinent x-rays or scans are required. (Actual x-rays are unacceptable.) Date each x-ray or scan in a manner that is easily visible. Photocopies of corresponding reports from the radiologist for each x-ray should be included in this section. Compile this material in chronological order, with reports placed adjacent to the corresponding reproduction of the radiograph.

- Progress Notes—Hospital Progress Records and Office/Clinic Notes

Photocopies of the original progress notes including the patient’s history and physical examination, discharge summaries, and all postoperative and post-discharge progress notes, both in the hospital and from the office/clinic records, including the initial consultation. If legibility is a problem, also include a typewritten copy. Copies of physician orders, vital signs, and nursing notes are not necessary and may be included only if they are needed to clarify the patient’s course. Organize all notes in chronological order. Separate Hospital notes and Office/Clinic progress notes with divider sheet provided by the Board.

When excessively long hospitalizations resulted in progress note sections of such thickness that they cannot be bound in one case folder, this section may be debrided of nonpertinent notes, bound separately, and brought to the examination. The candidate retains the notes and does not turn them in with the Case Reports. A notation regarding the debriding must appear at the beginning of the progress note section. The candidate will produce this extra material only upon the examiners’ request.

- Billing—including CPT Codes

Each case must include a copy of a bill with the dollar amount omitted.

All CPT codes as listed on the Case List must be reported.

Each bill must be notarized by the individual responsible for generation of the bill. This could be a billing company representative, hospital billing clerk, or a candidate’s office manager. The signature should attest that the bill represents a copy of the actual bill sent or that the bill was not submitted to a patient or third party payer.

If coding was not generated for a procedure, the affidavit should attest that no coding or billing was required. However, the CPT codes as listed on the Case List should be noted.

These bills include, but are not limited to:
1. Health Insurance Claim Forms (HICF)
2. Electronically generated bills
3. Bills to patients not submitted to third party payors
4. Cosmetic procedures where no bill was sent
5. Procedures performed gratis or for charity
6. A computer-generated replacement for a missing bill

To facilitate review by examiners, procedures or CPT code descriptor must be included on the billing statement even though it may not be a part of the original bill.

CPT codes for Veterans Administration patients and services performed gratis, such as those on an individual in their office, should be coded exactly as any other case.

- Other (Tenth Tab)

Any additional material such as procedures performed on the patient before or after the case collection period may be added here. Do not include debrided material from long hospitalizations here.

Disqualification on Case Reports

If a candidate is disqualified for continuation in the examination process because the case reports are judged unacceptable (for whatever reason) it will not be recorded as a failure but is counted as one of the five opportunities to appear for the Oral Examination. However, because the Board has incurred expenses to provide a candidate with an examination, a refund of $300, the examination fee less the processing charge of $700, will be provided to the candidate.

Presentation of Case Reports

During the 40-minute examination, candidates must be prepared to defend the choice of operation and to present alternate treatment plans considered. Hospital and office records must clearly identify the candidate as the attending physician and surgeon. However, the candidate need not necessarily be the admitting physician, so long as he/she is clearly the attending plastic surgeon. Cases done by a resident under the candidate’s supervision may be chosen by the Board and will be considered in the same way as cases done personally.

The Board regards the Case Reports submitted as important evidence of the candidate’s basic ability to carry out plastic surgical procedures and to organize and present information in a succinct and complete fashion. Improper or disorganized preparation of this material will be sufficient cause to disqualify a candidate for continued examination.

Examination Schedule

The Oral Examination will occupy 2½ days. A detailed schedule is included in the Announcement Letter. Candidates are required to be present for each day of the examination at the times listed in the Announcement Letter. Late arrival may result in denial of admission to the examination.

Instructions and Procedures

Candidates will receive specific instructions concerning the examination at the Registration and Orientation Sessions on each morning of the examination. On each examination day, candidates will also be given a schedule showing the time and the room location for the Case Report Session and the two Theory and Practice Sessions of the examination. Failure to appear on time for any session of the examination will lead to a failing grade on that section. Candidates should be outside the examination room 5 minutes before the scheduled time. It is not necessary for candidates to announce their presence. If, however, a candidate has not been invited into the examination room by the examiners by 10 minutes after the scheduled time, candidates should notify the temporary Board office immediately.

The Board has made every effort to assign candidates to examiners whose knowledge of the candidate’s background would not bias their evaluation of performance. If a candidate finds that an examiner to whom he/she has been assigned played a role in the candidate’s training, is a close friend or relative, is a close professional associate, or has examined the candidate previously, the temporary Board office must be notified immediately. However, unless
conflicts are identified in advance of the actual examination, the conduct and grades of that session cannot be contested based on prior contact or knowledge.

Description of the Examination
Each examination session is designed to evaluate the candidate's breadth and depth of knowledge, the ability to apply it in the solution of a wide range of clinical problems, and matters related to ethics. Each session is structured so that the examiners are given a schema to be followed. This approach assures uniformity and prevents duplication. Each of the examiners on each team is expected to pose problems and questions to candidates.

The examination consists of one Case Report Session and two Theory and Practice Sessions.

Oral Examination Examiners
All examiners are diplomates of the ABPS, are active in the practice and/or teaching of plastic surgery, and have been certified by the Board for no less than 5 years. They are respected members of the profession and are known for their surgical knowledge, expertise, and scientific contributions. They have been instructed in the technique and purposes of the examination process. Each team includes a Senior Examiner and a Guest Examiner.

The Case Report and Theory Practice Sessions are considered as one total examination. Candidates will pass or fail on the strength of their combined performance on all portions of the Oral Examination.

At the conclusion of each examination session, candidates may be offered an opportunity to add to earlier answers, modify them, or simply comment on the examination process.

Three teams of two examiners will examine each candidate. All six examiners will give grades and all six grades combined will determine the passing or failing status of each candidate.

The Board is determined that the examination shall be as comprehensive and objective as practical. The intention is that every candidate be provided an equal opportunity to become Board certified. The same standard is applied to each candidate insofar as is possible.

Change of Address
If a candidate's address, as it appears on the Admission Card (white), is incorrect, the corrected or new address must be indicated on the back of the Admission Card (white) in the space provided. This card is required when receiving the Result Letter on the last day of the Oral Examination.

Debriefing Session
On the evening of the last examination day, there will be a voluntary debriefing session, which the Board encourages candidates to attend for the purpose of evaluating the examination.

Distribution of Result Letters to Candidates
Result letters will be distributed after the conclusion of the last session on the third day of the examination. Candidates are required to present the Admission Card (white) or photo identification to the proctors in order to receive their Result Letter. Candidates not present for distribution of the Result Letters will have their letter mailed from the Board office the week following the Examination.

Examination Performance Critique ($200)
Candidates receiving a failing grade who desire information concerning performance on their Oral Examination may request a critique by writing to the Board office. Requests must be received within 30 days of the date on the result letter. Candidates will be responsible for a charge of $200 for information concerning their performance.

Cancellation of Examination
Should the ABPS, in its sole discretion, cancel the Oral Examination, or as a result of events beyond its control be unable to administer the Oral Examination at the appointed date, time, and location, or should ABPS fail to conclude a candidate's Oral Examination, the ABPS is not responsible for any expense the candidate may have incurred in connection with the cancelled Oral Examination, nor for any expense the candidate may incur for any substitute Oral Examination.

Fee Schedule
Processing
The processing fee of $150 must be submitted with the Request for Evaluation of Training Form and is nonrefundable.

Registration
The registration fee of $500 must be submitted with the Application for Examination and Certification Form and is nonrefundable.

Written Examination
The Written Examination fee of $1,000 is a separate fee in addition to the Registration Fee of $500 submitted with the Application for Examination and Certification Form. This Examination fee of $500 must be submitted when the Reply Card (green) requesting examination is returned to the Board office. The fee for the Written Examination must accompany the Reply Card in order for the candidate to be scheduled for the examination.

Written Examination and Registration Late Penalty Fees
Written Examination
$500
Oral Examination
$1,500 (Total)

Case List Review Fee
$500
The Review Fee of $500 must be enclosed with the case list to provide for review and selection of cases for preparation as Case Reports. This fee is nonrefundable.

Oral Examination Fee
$1,000
The balance of the examination fee of $1,000 must be submitted with the Reply Card (green) in order to be scheduled for the examination.

Written and Oral Examination Withdrawal Fee
$700
A withdrawal fee of $700 will be deducted from the Written or Oral Examination Fee for candidates who provide written notice of withdrawal at least 30 days before the date of the examination. Candidates who withdraw from the examination less than 30 days before the date of the examination will forfeit the entire examination fee.

Credentialing Fee
$150
A Credentialing Fee of $150 must be submitted with requests for special consideration by the Board for the Credentials and Requirements Committee.

Certificate Fee
$100
A new Certificate fee of $100 must be submitted to the Board with all requests for each additional certificate by Diplomates.

Verification of Status Fee
$25
A Verification Fee of $25 is required from all institutions and/or organizations who submit more than three requests within 1 month for written verification on the status of individuals. The $25 fee applies to each additional request over and above three in 1 month.

Checks Returned for Insufficient Funds
$50
A charge of $50 is applicable whenever a check received in payment of a fee is returned to the Board office from the bank for
nonpayment due to insufficient funds. This charge must be included with the original fee when a new check is resubmitted to the Board.

Fees must be submitted in United States currency only. Foreign currencies, including Canadian, are unacceptable.

Fees are subject to change by the Board. The fee schedule applicable to current examinations will apply regardless of when a candidate is approved for admission to the examination process.

The Board is a nonprofit organization, and the fees of candidates are used solely for defraying the actual expenses of the Board. The directors of the Board serve without remuneration. Because of the limited number of plastic surgeons certified by this Board, it may be necessary for the Board to request a voluntary annual contribution from its diplomates.

**Repeat Examination Fee**

Fees for repeat examinations are the same as for the current original examinations.

**Refunds**

For the Written Examination, a refund of the examination fee (less a processing charge of $700) will be granted provided the candidate submits a written request for withdrawal received in the Board office at least 30 calendar days prior to the date of the examination.

For the Oral Examination, a refund of the examination fee (less a processing charge of $700) will be granted provided the candidate submits a written request for withdrawal received in the Board office at least 30 calendar days prior to the date of the examination.

For either the Written or Oral Examination, candidates who notify the Board office in writing less than 30 calendar days prior to the examination date of their intent to withdraw, or who fail to appear for examination, will forfeit the entire examination fee. The Board may waive this rule only if the circumstances warrant.

**Special Situations**

**Appeals Policy**

The Board has established a policy relative to resolution of questions or disagreements regarding its decisions on admissibility to examination; the form, content, administration, or results of the Written Examination; the administration of the Oral Examination; and the revocation of certificates. If an individual has a concern in any of these areas, it should be expressed in writing to the Board office, and a copy of the Appeals Policy will be sent to that individual.

**Examination of Candidates with Disabilities**

The ABPS has established a policy regarding examination of candidates with disabilities. If a candidate is requesting accommodation based on a disability, the request should be expressed in writing to the Board office when submitting the application for Examination and Certification Form. A copy of the policy regarding Examination of Candidates with Disabilities will be sent to that candidate. The ABPS complies with the Americans with Disabilities Act (ADA) and will provide reasonable accommodations to candidates with proven disabilities.

All materials submitted to document a disability must be received in the Board office in a timely fashion but no later than the deadline for all other documents required for admission to the examination for which accommodation is sought.

**Examination Irregularities**

The validity of scores on the Board's examinations is protected by every means available. The Board will not report a score which it has determined to be invalid, i.e., which does not represent a reasonable assessment of the candidate's knowledge or competence sampled by the examination. The performance of all candidates is monitored and may be analyzed for the purposes of detecting invalid scores.

The Written Examination is supervised by proctors to ensure that the examination is properly conducted. If evidence by observation or analysis suggests that a candidate's scores may be invalid because of irregular behavior, the Board will withhold those scores pending further investigation and the affected candidate will be notified.

Examples of irregularities affecting the validity of scores would include (but not be limited to) the following: 1) using notes; 2) sharing information or discussing the examination in progress; 3) copying answers from another candidate; 4) permitting one's answers to be copied; or 5) unauthorized possession, reproduction, or disclosure of examination questions or other specific information regarding the content of the examination, before, during, or after the examination.

In such circumstances, upon analysis of all available information, the Board will make a determination as to the validity of the scores in question. If the Board determines that the scores are invalid, it will not release them, and notification of that determination may be made to legitimately interested third parties.

Candidates or other persons who are directly implicated in an irregularity are subject to additional sanctions. For example, the Board may bar such persons permanently from all future examinations, terminate a candidate's participation in an ongoing examination, invalidate the results of the candidate's examination, and withhold or revoke a certificate or take other appropriate action. Candidates or other persons subject to such sanctions will be provided with a written notice of the charges and an opportunity to respond to such charges in accordance with the reconsideration and appeal procedure established by the Board.

**Substance Abuse or Chemical Dependency**

Candidates with a history of abuse of a controlled substance or chemical dependency will not be admitted to any examination unless they present evidence satisfactory to the Board that they have successfully completed the program of treatment prescribed for their condition and the Board is satisfied that they are currently free of such substance abuse or chemical dependency.

**Certification**

After candidates have met the requirements for admissibility and have passed the examinations, the Board will issue certificates attesting to their qualifications in plastic surgery. A surgeon granted certification by the Board is known as a diplomat of the Board.

It shall be the prerogative of the Board to determine the fitness, professionally and ethically, of any candidate for a certificate, and the Board, for cause, may defer or deny certification to any candidate.

**Certificates**

Certificates issued by the Board shall be in such form as the Directors may from time to time determine. Certificates are signed by the chair, vice-chair, and secretary-treasurer of the Board and shall have placed upon them the official seal of the Board.

Certificates of the Board shall state that the holder has met the requirements of the Board and is certified by the Board as a medical specialist in plastic surgery and is entitled to be known as a "Diplomate of the American Board of Plastic Surgery, Inc." The names of all diplomates will be submitted to the American Board of Medical Specialties (ABMS) for publication in its directory. Diplomates should notify the Board in advance if they do not wish to be listed.

Additional certificates are available upon written request. A fee of $100 for each certificate ordered should be included with the
request. The diplomate’s name should be listed, as it should appear on the certificate.

Recertification Examination
The Recertification Examination will be first offered on April 19, 2002. Effective 1986, certificates issued by the Board are dated and will be valid for 10 years. Revalidation will be accomplished by the Board’s recertification process. Certificates issued prior to 1986 are valid indefinitely. A diplomate may take the recertification examination 3 years prior to the diplomate’s original expiration date. The date of recertification will be 10 years from the date of the diplomate’s original expiration date.

The Recertification Examination is planned as a computer-based test (CBT) examination consisting of 200 multiple-choice questions in a half-day format. The diplomate will have the choice of a general examination of 200 questions or a subspecialty module consisting of 50 general plastic surgery questions and 150 questions in one of the following categories: 1) aesthetic and breast, 2) craniofacial-maxillofacial, or 3) hand surgery. Recertification in CAQSH will be accepted in lieu of the Recertification Examination once the Recertification Application Material is approved.

Diplomates certified before 1985 are encouraged to voluntarily sit for the Recertification Examination. A diplomate’s lifetime certification status will not be altered by the results of the Recertification Examination. Successful completion of recertification will be reported as such with the 10-year expiration data for recertification as an addition to the original certification, which continues to be valid indefinitely.

Revocation
Any certificate issued by the Board shall be subject to revocation at any time that the Board determines that a diplomate was not properly qualified to receive it.

Each certificate issued by the Board shall be subject to revocation if the diplomate so certified has made any misstatement of material fact, or has failed to make any statement of material fact, in his or her application for such certificate or in any other statement or representation to the Board or its representatives, or has otherwise acquired the certificate by deception. Upon revocation, the certificate shall be returned to the Board.

The Board shall have the jurisdiction and right to determine whether or not the information placed before it is sufficient to constitute grounds for the revocation of any certificate. The diplomate will be provided with a copy of the appeals policy of the Board, and this policy will be observed in pursuing resolution of the problem.

Certification of Added Qualifications in Surgery of the Hand (CAQSH) and CAQSH Recertification
The Board offers an examination for Certification and Recertification of Added Qualifications in Surgery of the Hand (CAQSH). The examination is described in a separate CAQSH Booklet of Information that may be obtained from the Board office upon request.

There is no requirement nor necessity for a diplomate of the American Board of Plastic Surgery, Inc. to hold a Certificate of Added Qualifications in Surgery of the Hand in order to be considered qualified to include hand surgery within the practice of plastic surgery. Under no circumstances should a diplomate be considered not qualified to practice within an area of a subspecialty solely because of lack of subspecialty certification.

Foreign Certificates
A physician holding a foreign certificate issued by the Board between 1960 and 1979 must relinquish the certificate to the Board in the event that the individual returns to the United States for the purpose of practicing plastic surgery. A foreign certificate is not valid in the United States. Such individuals may apply for examination and certification in the manner described herein.

Inquiries as to Status
The Board does not consider a candidate’s record to be in the public domain. When an inquiry is received by the Board regarding a candidate’s status with the Board, a general, but factual, statement is provided which indicates that candidate’s status within the process of certification. The Board provides this information only to individuals, organizations, and institutions with a reasonably valid “need to know” for professional reasons. Only written requests for verification of a candidate’s status during the process of certification are accepted.

A charge of $25 will apply to all institutions and/or organizations that submit more than three requests within 1 month, for written information on the status of individuals. The $25 fee will apply to each additional request received over and above the allocated number of three requests per month.

A candidate who has fulfilled the established prerequisite and requisite training requirements and has submitted an Application for Examination and Certification Form that has been approved and who is currently admissible to the examination process of the ABPS may use the term “Board admissible,” but only for such length of time as such candidate is still admissible.

The Directors may adopt such further rules and regulations governing requirements, examinations, and issuance and revocation of certification as they may from time to time determine.

Requirements for Admission to Examinations

Each applicant for a certificate in aerospace medicine, occupational
medicine, or public health and general preventive medicine must meet certain requirements to be admitted to the certifying ex-
amination. Such requirements are determined by the American
Board of Preventive Medicine (ABPM).

Approval for admission to the examination can only be es-

tablished after the review of a complete application by the full Board.
No individual member of the Board is authorized to give an opinion
on the admissibility of candidates, nor does the Board do prelimi-
nary credential reviews.

For the information of applicants, such requirements are summa-

rized below. An applicant worksheet is available from the ABPM
website at http://www.abprevmed.org for use in comparing the
ABPM requirements to an applicant’s training and experience.

General Requirements

1. Medical School: Graduation from a medical school in the United
States which at the time of the applicant’s graduation was ac-
credited by the Liaison Committee on Medical Education, a
school of osteopathic medicine approved by the American Oste-
opathic Association, an accredited medical school in Canada, or a
medical school located outside the United States and Canada
that is deemed satisfactory to the Board.

2. Current License(s): Unrestricted and currently valid license(s)
to practice medicine in the District of Columbia or a state, territ-
ory, commonwealth, or possession of the United States or in a
province of Canada. No license may be restricted, revoked, or
suspended or currently under such notice.

3. Clinical Year: A year of supervised postgraduate clinical training
provided as part of a graduate medical education program ac-
credited by the Accreditation Council for Graduate Medical Edu-
cation (ACGME). Clinical training accredited by the Royal Col-
lege of Physicians and Surgeons of Canada or the College of
Family Physicians of Canada is also acceptable. The training
must include at least 6 months of direct patient care comprising
ambulatory and inpatient experience.

4. Academic Year: Successful completion of a course of graduate ac-
ademic study and award of a Master of Public Health or equiva-
lent masters degree, the course content of which shall include
biostatistics, epidemiology, health services management and ad-
ministration, and environmental health.

5. Practicum Year: Residency practicum of not less than 1 year that
is accredited by the ACGME in the specialty area for which cer-
tification is being sought and that shall have provided supervised
experience in the practice of that specialty area of preventive
medicine and planned instruction, observation, and active partici-
patation in a comprehensive organized program.

6. Current Practice: The applicant must have been engaged in es-

tentially full-time training for, or practice in, the specialty area
for which certification is being sought for at least 1 of the 3 years
preceding application for certification.

Special Requirements in Aerospace Medicine

1. A period of not less than 1 year of supervised training and in-
struction, accredited by the ACGME in the specialty area of aero-
space medicine, is required. (See 5 under “General Require-
ments,” above.)

2. The applicant must have been engaged in training for, or the
practice of, aerospace medicine for at least 1 of the 3 years
preceding application for certification. (See 6 under “General Re-
quirements,” above.)

Special Requirements in Occupational Medicine

1. A period of not less than 1 year of supervised training and in-
struction, accredited by the ACGME in the specialty area of occu-
pational medicine, is required. (See 5 under “General Require-
ments,” above.)

2. The applicant must have been engaged in training for, or the
practice of, occupational medicine for at least 1 of the 3 years
preceding application for certification. (See 6 under “General Re-
quirements,” above.)

Special Requirements in Public Health and General Preventive Medicine

1. A period of not less than 1 year of supervised training and in-
struction, accredited by the ACGME in the specialty area of pub-
lic health and/or general preventive medicine, is required. (See 5
under “General Requirements,” above.)

2. The applicant must have been engaged in training for, or the
practice of, public health and general preventive medicine for at
least 1 of the 3 years preceding application for certification. (See
6 under “General Requirements,” above.)

Alternative Pathway to Certification

Persons graduating from a school of medicine or school of oste-
opathic medicine prior to January 1, 1984, who have not formally
completed all of the components previously described, may be con-
sidered for admission to the examination if their training and ex-
perience are judged by the Board to provide a suitable alternative to
formal training.

The Board will consider granting credit toward satisfying training
requirements for such factors as:
1. Teaching or completion of three-credit hour, postgraduate-level academic course work in each of the four core areas: epidemiology, biostatistics, health services management and administration, and environmental health; and

2. Periods of full-time practice, research, or teaching in the specialty area of preventive medicine in which certification is sought. A total of 8 years of full-time practice is required if no other specialty certification is held, but may be reduced to 6 years if certification is held in another specialty recognized by the American Board of Medical Specialties (ABMS). For those with an MPH or equivalent masters degree but no practicum year, a period of 4 years of full-time practice is required in the specialty area of preventive medicine for which certification is being sought, a period that can be reduced to 3 years if other ABMS specialty certification is held.

Each applicant is considered individually by the Board in accordance with the existing guidelines. An applicant worksheet is available from the ABPM web site at http://www.abpmed.org for use in comparing the ABPM requirements to an applicant's training and experience. Practice time needed for the alternative pathway to certification is summarized on this worksheet. Applications must be received by June 1 of each year. Requirements must be completed by August 1 of the year in which the applicant wishes to sit for the examination.

Persons graduating from a school of medicine or school of osteopathic medicine after January 1, 1984, will be admissible to the examination only after completing ACGME-accredited residency training in preventive medicine. This alternative pathway to certification is not available for such graduates.

Special Pathway for ABPM Diplomates

Diplomates of ABPM who have graduated from medical school after January 1, 1984, may request consideration through a special pathway. In order to qualify for this special pathway, applicants must have completed an ACGME-accredited residency in a specialty area of preventive medicine, been certified in that specialty area, be applying for certification by ABPM in an additional preventive medicine specialty area, and have sufficient practice time to meet the requirements. A total of 2 years of essentially full-time practice is required in the specialty area for which the additional certification is sought. In addition, the applicant must have been engaged in essentially full-time training for, or practice in, the specialty area for which the second certification is being sought for at least 1 of the last 3 years.

Subspecialties

Medical Toxicology

Every 2 years the ABPM offers subspecialty certification in medical toxicology to ABPM diplomates who meet the appropriate requirements for medical toxicology. Applications for the examination offered November 4, 2000, will be available from the Board office on February 1, 2000, and will be accepted with postmark dates through May 1, 2000.

Undersea and Hyperbaric Medicine

ABPM offers subspecialty certification in undersea and hyperbaric medicine in late fall each year to physicians who hold current certification by one of the ABMS member boards and meet the appropriate requirements in undersea and hyperbaric medicine.

Internet Web Site

http://www.abpmed.org

The ABPM has a web site on the internet that includes the latest version of the application and other publications. Please refer to this site for current information about the ABPM.

Application

Individuals seeking to apply for admission to the examination should write to the executive director of the Board for application forms, or the application may be downloaded from the ABPM web site on the internet (see above).

Examination

The examination is a 1-day written examination given in the late fall of each year. It is a multiple-choice examination, with the morning portion covering the core knowledge of preventive medicine and the afternoon portion covering aerospace medicine, occupational medicine, or public health and general preventive medicine.

Applicants requiring special examination accommodations due to a disability should contact the Board office for assistance at least 1 month prior to the examination.

Reapplication and Reexamination

An applicant approved for admission to the examination who does not take the examination, or who fails to pass the examination within the 3-year approval period, is required to file a new application and pay a new application fee.

Applicants not approved for admission to the examination may request reconsideration of their applications on the basis of new or additional information within 2 years of the filing date of the original application, with payment of the re-review fee.

Candidates not passing the examination may, upon timely registration and payment of appropriate fee, be admitted to reexamination during their approval period.

A candidate who has failed the examination on two or more occasions may be required to have additional training, in accordance with recommendations from the full Board, before being admitted to further examination.

Multiple Certification

An individual may apply sequentially for admission to examination in more than one specialty area of preventive medicine. Applicants may not apply in more than one specialty area in a given year. An applicant must fulfill the individual requirements of each specialty area in which application is made and cannot double-count the same periods for practice time.

Certification

Upon satisfactory completion of the examination, a certificate will be issued stating that the applicant has been found to possess special knowledge in the specified specialty area of preventive medicine. The certificate will be signed by officers of the Board and will have the seal of the Board affixed. Each certificate remains the property of the Board, but the person to whom it is issued is entitled to its possession unless it is revoked.

Any certificate issued by the Board may be revoked if evidence, satisfactory to the Board, is presented that the applicant was not eligible to receive it at the time of issuance, or that any pertinent fact had been misstated, misrepresented, or concealed; or that any license to practice medicine has been suspended or revoked. Note: The issuance of a certificate to a person does not constitute membership on the Board.

Time-Limited Certificates

Note: By action of the Board in August 1994, ABPM now issues 10-year, time-limited certificates. The first time-limited certificates
were issued in 1998 to candidates who passed the certifying examination given in November 1997.

**Notice of Certification**

The examination results, without individual identifiers, are reviewed by the full Board during its January meeting. Final determination of candidates' certification status is made at that time.

Candidates who have taken the examination may expect to be notified of results by mail within 3 months after taking the examination.

**Fees**

The members of the Board serve without compensation. Fees are based on the actual expenses incurred in reviewing applications; examination development, administration, and scoring; and office administration.

A nonrefundable application fee of $300* is required if the applicant holds an MPH or equivalent masters degree and has completed an ACGME-accredited residency in the specialty area of preventive medicine in which certification is sought.

A nonrefundable application fee of $550* is required if the applicant is applying through the alternative pathway to certification.

A nonrefundable application fee of $450* is required if the applicant is applying through the special pathway for ABPM diplomats.

A nonrefundable re-review fee of $100* is required to reactivate an application within 2 years of the original review.

The examination fee of $1,250* is due 45 days prior to the examination. The examination fee is nonrefundable within 45 days of the examination.

**Fees for the Subspecialty of Medical Toxicology**

The total amount due with the application is $1,400,* which includes a nonrefundable application fee of $300* and the examination fee of $1,100.* The examination fee will be refunded to those applicants not approved to sit for examination.

**Fees for the Subspecialty of Undersea and Hyperbaric Medicine**

A nonrefundable application fee of $300* is required if the applicant is applying through the fellowship pathway.

A nonrefundable application fee of $450* is required if the applicant is applying through the practice pathway.

The examination fee of $1,100* is due 45 days prior to the examination. The examination fee is nonrefundable within 45 days of the examination.

* Note: All fees are reviewed annually and are subject to change at the direction of the Board.

Please contact the Board office for the current fee schedule.

**Listing of Individuals Certified**

A list, current to the date of publication, of persons to whom certificates have been issued by the Board may be found in The Official ABMS Directory of Board Certified Medical Specialists.

**Reporting of Changes of Address**

Once certified, physicians should notify the following offices in writing of any changes of address:

1. The American Board of Preventive Medicine, Inc
2. The Physician Biographic Records Department, American Medical Association, 515 North State Street, Chicago, IL 60610, the office that maintains a master file of all physicians in the US
3. Marquis Who's Who, 121 Chanlon Road, New Providence, NJ 07974, publisher of The Official ABMS Directory of Board Certified Medical Specialists

---

**Important Dates**

- April 15: Deadline for receipt of action plans from candidates failing examinations on two or more occasions.
- June 1: Deadline for completed application forms, application fees, and reapplication requests to be received in the Board office for the November examination.
- July 15: Deadline for receipt of additional information not included with the June 1 application. Deadline for receipt of re-review requests and fees.
- August 1: Deadline for completion of requirements to sit for the November examination.
- August: Meeting of the Board to determine admissibility of applicants to November examination. Letters of notification of admissibility for November examination are mailed to candidates after the August Board meeting. Notification is not given by telephone.
- September/October: Deadline for examination fee 45 days prior to the examination. Date varies from year to year and is stated in the letter of admissibility.
- January: Meeting of the Board to determine the pass/non-pass score for the previous November examination.
- February: Results of November certifying examination are mailed to candidates after the January Board meeting. Notification is not given by telephone.

Throughout this section, the American Board of Psychiatry and Neurology may be referred to as the "Board" or as "ABPN."

The information in the ABPN section is effective for the November 8, 2000, Part I examination only. Contact the Board office for the most current information.

Deadlines for the November 8, 2000, Part I Exam

Part I Application
Part I Application Fee
Part I Late Application
Completion of residency training
Written confirmation of completion of residency training
Part I Reexamination Fee

(Fee Schedule Effective February 2000)

Part I Application Fee $425
Part I Examination Fee $475
Part I Late Application Fee (in addition to the above) $200
Part I Reexamination Fee $475
Part I Reexamination Late Application Fee (in addition to the above) $75
Part II Examination Fee $1,050

Psychiatry Part II Reexamination Fee $1,050
Neurology/Child Neurology Part II Reexamination Fee:
One section $725
Two or three sections $1,950
Application/Licensure Appeal Fee $425
Part I Appeal Fee $300
Part II Feedback Fee $100
Part II Appeal Fee Sane as reexamination fee (see above)
Duplicate certificate fee $50
Returned check charge $50

All fees must be submitted in US currency. The ABPN reserves the right to revise fee schedules.

I. General Information

A. Certificates

The Board currently issues the following nine types of certificates:
1. Psychiatry
2. Neurology
3. Neurology with special qualification in child neurology
4. Child and adolescent psychiatry
5. Geriatric psychiatry
6. Clinical neuropsychology
7. Addiction psychiatry
8. Forensic psychiatry
9. Pain management

In addition, the Board will begin issuing certificates in neurodevelopmental disabilities in the future.

An applicant may be certified in more than one area and will receive a separate certificate for each area in which he or she qualifies. Each certificate shall be in such form and for such period of time as may be specified by the Board.

B. Recertification

As of October 1, 1994, all individuals achieving Board certification by the American Board of Psychiatry and Neurology, Inc., are issued 10-year, time-limited certificates. Certificates issued in the subspecialties of geriatric psychiatry, clinical neuropsychology, addiction psychiatry, and forensic psychiatry, including those issued prior to October 1, 1994, are 10-year, time-limited certificates.

C. Revocation of Certificates

The Board has the authority to revoke any certificate issued by it or to place a certificate holder on probation for a fixed or indefinite period of time if (1) the certificate was issued contrary to, or in violation of, the bylaws or any rule or regulation of the Board, or (2) the person to whom the certificate was issued made any material misstatement or omission of fact to the Board in his or her application or otherwise.

Certification shall continue in force only so long as the holder has an unlimited license to practice medicine in a state, commonwealth, territory, or possession of the United States or province of Canada. A full and unrestricted medical license must be maintained even if the physician is out of the country for extended periods of time. Restrictions include but are not limited to conditions, contingencies, probation, and stipulated agreements. It is the responsibility of the candidate/diplomate to inform the Board immediately upon a change in licensure status.

D. Irregular Behavior Including Unethical Behavior of Candidates

The Board believes that the ethics of candidates for certification are of concern. The following rules apply:
1. Falsification of credentials will be cause for the Board's refusal to admit a candidate to examination for up to 5 years.
2. The Board will consider legal action against anyone who forges an ABPN certificate, copies ABPN examinations or otherwise uses them in conflict with copyright laws, or in any other way violates the legal prerogatives of the Board. Such activities will also be cause for the Board's refusal to admit a candidate to examination for up to 5 years.

3. Scores on written examinations may be invalidated for reasons of irregular behavior. Statistical analyses may be used to confirm suspected cheating. If an examination score is invalidated, the candidate may submit a written appeal within 30 days of notice of invalidation. An appeal fee of $300 must accompany the written appeal. The Committee to Review Appeals will review the materials and make a recommendation to the Board. The Board will review the materials and make a decision that, in all cases, will be final and binding on the Board and on the candidate. All correspondence or other materials should be sent to the Board office. If an examination score is invalidated because of irregular behavior, the Board will not consider the candidate for examination for a period of up to 5 years, depending on the irregular behavior. A repeat application and examination fee will be required.

4. Irregular behavior on the oral examinations may be considered sufficient reason to invalidate a candidate's score. If the examination score is invalidated, the candidate may submit a written appeal within 30 days of notice of invalidation. An appeal fee of $300 must accompany the written appeal. The Committee on Irregular Behavior will review the materials and make a recommendation to the Board. The Board will review the materials and make a decision that, in all cases, will be final and binding on the Board and on the candidate. All correspondence or other materials should be sent to the Board office. If an examination score is invalidated because of irregular behavior, the Board will not consider the candidate for examination for a period of up to 5 years, depending on the irregular behavior. A repeat application and examination fee will be required.

5. "Irregular behavior" shall include, but not be limited to, the following conduct: (a) copying answers from another candidate's examination; (b) knowingly permitting another candidate to copy one's answers on an examination; (c) unauthorized possession, reproduction, or disclosure (via oral, written, or electronic media) of examination materials or content, at any time; (d) use of audio equipment to record any part of an oral examination; (e) offering any financial or other benefit to any director, officer, employee, proctor, diplomat, or other agent or representative of the Board in return for any right, privilege, or benefit that is not granted by the Board to other similarly situated candidates or persons; (f) not complying with proctors' or examiners' instructions; (g) disregarding time limits; and (h) any other form of disruptive behavior, including repeated or excessive verbal complaints.

6. Notification of the Board's action may be sent to legitimately interested third parties, including the American Medical Association, state medical societies, medical licensing boards, and appropriate specialty societies.

E. Board Eligibility

The ABPN, in accordance with the policy of the American Board of Medical Specialties (ABMS), does not recognize or use the term "Board eligible" and does not issue statements concerning "Board eligibility." The Board informs an applicant of admisissibility to examination only when the applicant has an active, approved application on file in the Board office.

F. Conflict of interest

In order to maintain the confidence of the public and the medical profession in the integrity of the Board, it is important for those doing its work to avoid certain activities that could provide the opportunity for an actual conflict of interest or the appearance thereof. A conflict of interest is defined as an instance wherein a competing outside activity or holding could influence or appear to influence the Board's activities in the area of policy development, evaluation of training programs, or examination development. Examples of such competing outside interests are compensated direct employment, paid advisory or consultant positions, significant personal investments, or other affiliations as an officer and/or director in a pharmaceutical or medical supply company.

As an alternative to regulating investment or employment, the Board has chosen to manage matters related to the appearance of a conflict of interest by encouraging disclosure of significant financial interests or relationships and abstention from participation in decision making related to a matter that could give rise to a conflict of interest (due to a material financial interest or relationship).

Annually, Board members, subcommittee committee members, test committee members, written examination proctors, the Executive Vice President, and staff members of the Board are required to complete a form disclosing the following general information:

1. License restrictions to practice medicine
2. Participation in board review courses or publication of materials in any media format, including the Internet, regarding board review in psychiatry or neurology
3. Significant financial holdings in any pharmaceutical or medical supply company
4. An affiliation in the capacity as trustee, officer, director, or other major capacity in any pharmaceutical or medical supply company
5. Any other affiliations that would present a potential or apparent conflict of interest or conflict

Any individual who participates in any review course that is published as being a Board review course, or in any course that could be construed as a Board review course, or who has edited or provided written or audiovisual materials for publications identified as preparation for Board examinations, or who copies, reprints, or discloses (via oral, written, or electronic media) examination materials or content should not participate as an examiner in any oral examination, as a proctor in any written examination, or as a member of any Board committee, for at least 12 months subsequent to the courses or publication of any written or audiovisual materials.

II. Requirements for Admission to Examination

A. General Requirements for All Applicants

In order to qualify to sit for examination, an applicant must:

1. Be a graduate of an accredited medical school in the United States or Canada or of an international medical school listed by the World Health Organization.
2. Have an unlimited license to practice medicine in a state, commonwealth, territory, or possession of the United States or province of Canada. Applicants are required to submit a copy of their unlimited licenses with their Part I applications. Any candidate submitting a temporary (education or training) license at the time of application for Part I will be required to submit a copy of his/her current unlimited license, as described above, no later than December 31 of the year in which the candidate passed the Part I examination.

Candidates in possession of restricted, suspended, or revoked licenses in any state will not be scheduled for examination. Restrictions include but are not limited to conditions, contingencies, probation, and stipulated agreements.
3. Have satisfactorily completed the Board's specialized training requirements in psychiatry, neurology, neurology with special qualification in child neurology, or any of its subspecialties. Training requirements for the primary specialties are explained in the sections that follow.

4. Submit a completed official application form including all required attachments and the appropriate application and examination fees by the specified deadline. (See the beginning of the ABPN section for the fee schedule and application deadlines. See Section III for a complete description of the application process.)

B. General Training Requirements

References to "residency" refer to entry at the graduate year 2 level unless otherwise stated. Residency training must be in the specialty in which the applicant seeks certification, except for residents who are in an approved combined training program. (See Section VLD for more information about combined training programs.)

Training programs approved by the Residency Review Committees and accredited by the Accreditation Council for Graduate Medical Education (ACGME) can be found in the current edition of the Graduate Medical Education Directory published by the American Medical Association. This directory includes the Program Requirements of Accredited Residencies in Graduate Medical Education. Training may be completed on a part-time basis, provided that it is no less than half-time, and credit will not be given for less than 1-year blocks of training. Training programs may develop individual leave or vacation time for residents in accordance with the overall institutional policy. Leave or vacation time may not be utilized to reduce the total amount of required residency training or to make up deficiencies in training.

C. Training in More Than One Residency Program

To ensure continuity of training, the Board requires that 2 of the 3 years of residency training, excluding the GY1, be spent in a single program. The ABPN Credentials committee will consider exceptions to this rule only under extraordinary circumstances. It is expected that the program directors and the resident meet and discuss the details of a proposed program to be followed up by a joint letter advising the Board of the proposed change. The letters should outline the resident's training content, duties, and responsibilities. Each case will be considered on an individual basis.

If the Credentials Committee approves the request, the Board will notify the program directors. A copy of this letter should be given to the resident to submit with his/her Part I application. Residents in M.D.-Ph.D. programs are not eligible for the Part I route.

When training is completed in more than one program, the training director of the first program should send to the training director of the second program a letter detailing the training satisfactorily completed and areas of training that are deficient. After reviewing this documentation, the training director of the second program should inform the resident whether or not the second program will be able to provide the resident with the experience necessary to remove the deficits.

D. Psychiatry: Specific Training Requirements

Unless otherwise specified (see sections on Canadian and other internation training below), all training must be completed in programs accredited by the ACGME.

An applicant seeking admission to examination for certification in psychiatry must have satisfactorily completed an ACGME-accredited GY1 (see below) and 3 full years of postgraduate, specialized residency training in a psychiatry program accredited by the ACGME. See the sections below for information regarding Canadian and other international training requirements. Different requirements apply for applicants who began training in psychiatry prior to 1986. These candidates should call the Board office if they have any questions.

The following two patterns of training are acceptable:

1. Three-year psychiatry residency program
   A broad-based clinical year of ACGME-accredited training in internal medicine, family practice, or pediatrics; or an ACGME-accredited transitional year program that included a minimum of 4 months of primary care; or an ACGME-accredited residency in a clinical specialty requiring comprehensive and continuous patient care.

   and

   Three full years of postgraduate, specialized residency training in a psychiatry program accredited by the ACGME.

2. Four-year psychiatry residency program
   Four years of training in an ACGME-accredited program in psychiatry is acceptable. A psychiatry first postgraduate year must include at least 4 months in internal medicine, family practice, and/or pediatrics. This training must be in a clinical setting that provides comprehensive and continuous patient care. No more than 1 month of this requirement may be fulfilled by an emergency medicine rotation, as long as the experience predominately involves medical evaluation and treatment, rather than surgical procedures. Neurology rotations may not be used to fulfill this 4-month requirement.

Canadian training programs

Applicants who enter a Canadian residency program on or after July 1, 2001, must complete their training in an program accredited by the ACGME. Applicants entering Canadian residency training before July 1, 2001, may be granted training credit if their residency training was completed in a Canadian program accredited by the Royal College of Physicians and Surgeons of Canada (RCPSC). Applicants entering Canadian residency training before July 1, 1986, should contact the Board office for program requirements.

Effective January 1, 1994, physicians who trained in accredited programs in Canada must have completed an approved GY1 as described in Section II.C.1 plus 4 years of postgraduate, specialized residency training in a psychiatry program accredited by the RCPSC.

Other international training

Physicians entering psychiatry residency training on or after July 1, 1997, will not be granted credit for international training. Physicians entering psychiatry residency training prior to July 1, 1997, may be granted credit for international training only if they:

1. Achieve a national certificate accepted by the ABPN by the year 2006. The only certificates accepted by the ABPN are MRCPSych, FRANZCP, FF Psych (SA), and Israel’s Specialty Certification of the Scientific Council of the Israel Medical Association. A physician’s training was not completed in its entirety (internship and residency training) in the country issuing the certificate, the physician must complete an additional year of approved primary care training in the United States.

and

2. Initiate the ABPN certification process by the year 2007.

Physicians who entered residency training in the United Kingdom prior to July 1, 1988, should contact the Board office for training credit information.

E. Neurology: Specific Training Requirements

Unless otherwise specified (see sections on Canadian and other international training below), all training must be completed in programs accredited by the ACGME.
An applicant seeking admission to examination for certification in neurology must have satisfactorily completed an ACGME-accredited GY1 (see below) and 3 full years of postgraduate, specialized residency training in a neurology program accredited by the ACGME. See the sections below for information regarding Canadian and other international training requirements. Different requirements apply for applicants who began training in neurology prior to 1991. These candidates should call the Board office if they have any questions.

Two patterns of training are acceptable.

1. **Three-year neurology residency program**
   A full year of ACGME-accredited training in internal medicine, or as an acceptable alternative, a full year in an ACGME-accredited program in which a minimum of 6 months of training must be in internal medicine, the details of which must be documented by the training director. The composition of these 6 months cannot include rotations in neurology or emergency medicine. To ensure that these 6 months constitute a high quality experience, they should emphasize progressive responsibility for the resident. At least 2 of the additional 6 months must be spent in internal medicine, pediatrics, and/or emergency medicine. No more than 2 of the remaining 4 months may be spent in neurology.

   and

   Three full years of postgraduate, specialized residency training in a neurology program accredited by the ACGME.

   or

2. **Four-year neurology residency training**
   Four years of training in a neurology residency program accredited by the ACGME.

**Canadian training programs**

Applicants who enter a Canadian residency program on or after July 1, 2001, must complete their training in a program accredited by the ACGME. Applicants entering Canadian residency training before July 1, 2001, may be granted training credit if their residency training was completed in a Canadian program accredited by the RCPS(C). Effective January 1, 1994, physicians who trained in accredited programs in Canada must have successfully completed an approved GY1 as described in section II.D.1 plus 4 years of postgraduate, specialized residency training in a neurology program accredited by the RCPS(C).

**Other international training**

Physicians entering neurology residency training on or after July 1, 1997, will not be granted credit for international training. Physicians entering neurology residency training prior to July 1, 1997, may be granted GY1 credit for training completed in an international program only if they:

1. Achieve a national certificate accepted by the ABPN in internal medicine by the year 2005. The only internal medicine certificates accepted by the ABPN are MRCP(UK), MRACP, FCP, and MRCP(UK).

   and

2. Initiate the ABPN certification process by the year 2007.

**F. Neurology With Special Qualification in Child Neurology:**

Specific Training Requirements

Proper preparation for the practice of child neurology requires that the practitioner be a qualified neurologist who has had additional training in pediatrics and child neurology. To qualify for this certificate a different type of preparation and certifying examination are required. The same diploma will be used, the only difference being that instead of certifying qualification in "neurology" it certifies qualification in "neurology with special qualification in child neurology."

Unless otherwise specified (see sections on Canadian and Other international training, below), all training must be completed in programs accredited by the ACGME. Different requirements apply for applicants who began training in child neurology prior to 1991. These candidates should call the Board office if they have any questions.

Three patterns of training are acceptable for 2 of the 5 years of training.

1. **General pediatrics**
   The usual pathway is 2 years of training in general pediatrics in an ACGME-accredited program. This is the only pathway that allows the applicant admission for examination by both the American Board of Pediatrics and the American Board of Psychiatry and Neurology.

   or

2. **General pediatrics/basic neurosciences research**
   One year of training in general pediatrics in an ACGME-accredited program and 1 year of research in the basic neurosciences. The basic neurosciences pathway was created as an alternative track for residents who are planning a research career in academic child neurology. The year of basic neurosciences must provide training in a research discipline related to child neurology and is intended to increase the trainee's knowledge base and competitiveness for federal and nonfederal grant support. The trainee must make at least an 80% time commitment to basic neurosciences during this year of training.

   For the purpose of this training track, basic neurosciences is defined as laboratory research related to the cellular or molecular basis of neurologic diseases. Examples of relevant basic disciplines include molecular neurogenetics, neurochemistry, neuropathology, neuropathology, neuroanatomy, neuroimmunology, developmental neurobiology, biophysics, and cell biology.

   This track of training must be approved by the Board prior to completion of the 5 years of training. The resident is encouraged to have this track of training approved prior to submitting his/her application for examination. Letters from the mentor (and child neurology program director, if a different individual) must be submitted describing the research and explaining how the year of neuroscience relates to child neurology and to the trainee's academic career.

   or

3. **General pediatrics/internal medicine**
   One year of training in general pediatrics and 1 year of training in internal medicine in ACGME-accredited programs. An acceptable alternative to the 1 year of internal medicine is a full year of ACGME-accredited training that includes a minimum of 6 months of internal medicine, the details of which must be documented by the training director. The composition of these 6 months cannot include rotations in neurology, pediatrics, or emergency medicine. To ensure that these 6 months constitute a high quality experience, they should emphasize progressive responsibility for the resident. At least 2 of the additional 6 months must be spent in internal medicine, pediatrics, and/or emergency medicine. No more than 2 of the remaining 4 months may be spent in neurology.

   and

   In addition, all candidates will be required to complete 3 full years of postgraduate, specialized residency training in a child neurology program accredited by the ACGME.

**Canadian training programs**

Applicants who entered a Canadian residency program on or after July 1, 2002, must complete their training in a program accredited by the ACGME. Applicants entering Canadian residency training in...
before July 1, 2002, may be granted training credit if their residency training was completed in a Canadian program accredited by the RCPSG.

Other international training
Physicians entering child neurology residency training on or after July 1, 1998, will not be granted credit for international training. Physicians entering child neurology residency training prior to July 1, 1998, may be granted up to 2 years of general pediatrics and/or 1 year of internal medicine credit for training completed in an international program only if they:
1. Achieve a national certificate accepted by the ABPN in pediatrics and/or internal medicine by the year 2005. The only certificates accepted by the ABPN for pediatrics and/or internal medicine are MRCP(UK), MRACP, PCP(SA), and MRCP(UK).
2. Initiate the ABPN certification process by the year 2007.

III. Application for Certification

A. General Information
A physician who wishes to be examined by the Board shall complete, sign, and file with the Executive Vice President an application on the current official application form. The information for Applicants for certification or for Certification are reviewed each year and may be obtained from the Board office. Only applications submitted on the current official application form will be accepted. Photocopies or faxed copies of applications will not be accepted.

An acknowledgment postcard accompanies each application. This card, when stamped, self-addressed, and enclosed with the application, will be returned to the applicant as acknowledgment that the application has been received by the Board office. Once the card is returned to the applicant, it may take up to 16 weeks for the applicant to receive further information regarding the status of the application. Applications are reviewed in order of receipt. An applicant who does not receive any notification from the Board regarding his/her application by August 1, 2000, should contact the Board office.

B. Deadlines and Fees
Deadline for receipt of completed applications in the Board office for the November 8, 2000, Part I examination is February 1, 2000. There is a nonrefundable late fee of $250 for applications received in the Board office between February 1, 2000, and March 1, 2000. Applications received after March 1, 2000, will be returned. A complete list of fees appears at the beginning of the ABPN section of this Directory.

Applications submitted without the appropriate fees will not be accepted. Fees received without applications will be returned. Part 1 application and examination fees are neither refundable nor transferable.

C. Completing the Application and Supporting Documentation
Indicate the specialty in which you are seeking certification.
Social Security Number
Provide your social security number.
Candidate Name
If your name differs from that indicated on your supporting documentation, you must include certified documentation (marriage license, name change determination, etc.) of the change. If your name changes at any time subsequent to the application, certified documentation of the name change must be submitted to the Board office.

Mailing Address
This is an address at which the Board can contact you; therefore, do not use a temporary address. Candidates are responsible for keeping the Board informed about any change of address.

Office and Home Telephone and Fax Numbers
Provide your primary office phone number, home telephone number, and fax number.

1. Date of birth
Provide your birth date.

2. Medical education
Include the complete name of each medical school attended, along with accurate and complete attendance and graduation dates. Be certain to include the degree obtained (MD or DO).

3. Licensure
All questions regarding licensure must be answered. Do not leave any blanks.

In addition, enclose with the application a copy of either your unlimited medical license or the current renewal registration card for your unlimited license, whichever shows the license expiration date. If you have a temporary (education or training) license at the time of application, you must submit a copy of your current unlimited license in a state, commonwealth, territory, or possession of the United States or province of Canada in order to take the Part II examination. Candidates who do not submit copies of their licenses by December 31 of the year in which they pass the Part I examination will not be scheduled for the Part II examination. If you have a temporary (education or training) license, please indicate this on the application form.

A candidate in possession of a restricted, suspended, or revoked license will not be accepted for any examination. Restrictions include but are not limited to conditions, contingencies, probation, and stipulated agreements.

4. Have you ever applied to this Board before?
Indicate the name under which you applied.

5. Do you currently have another application on file with this Board?
A candidate may not have more than one application for certification in the same specialty or subspecialty on file with the Board office at any one time.

6. Applicants with disabilities
Please refer to Section VII.

7. First postgraduate year (First 2 years [GY1 and GY2] for child neurology)
Enclose with the application a letter of verification from the training director describing the exact length and content of rotations completed during GY1. All documentation must include exact dates (month/day/year) of training.

Psychiatry candidates only:
If the GY1 was a full year of internal medicine, pediatrics, or family practice, a photocopy of the certificate of completion, including the exact dates, may be submitted in lieu of the letter from the training director.

Neurology candidates only:
If the GY1 was a full year of internal medicine, a photocopy of the certificate of completion, including the exact dates, may be submitted in lieu of the letter from the training director.

Neurology with special qualification in child neurology candidates only:
If either of the first 2 years was a full year of internal medicine or pediatrics, a photocopy of the certificate(s) of completion, including the exact dates, may be submitted in lieu of the letter from the training director.
Reapplicants only:
If you are reapplying for examination and were previously accepted for examination, you do not need to include the GY1 and residency training documentation with this reapplication.

8. Residency training
List all residency training in chronological order, including exact dates (month/day/year).
In addition, enclose with the application a copy of certificate(s) of training including exact dates, or a letter of verification of training from the training director(s), including exact dates of training. If training was completed in child and adolescent psychiatry, the training director of the child and adolescent psychiatry program must document the child and adolescent psychiatry training.
If you are still in training, a letter from the training director must be submitted with the application documenting that you are in the final year of training and that training will be completed by June 30, 2000. This letter must include the date on which you started training. Immediately after you have completed training, the training director must submit to the Board a letter verifying successful completion of training or a copy of the certificate of training. All documentation must include exact dates of training.
In order to qualify to sit for the November 8, 2000, Part I examination, candidates must have fulfilled all training requirements by June 30, 2000. If documentation of successful completion of training is not received in the Board office by July 15, 2000, the candidate will be removed from the Part I roster.
Due to the large volume of documentation that the Board office will be receiving on or before July 15, we ask that applicants not call to verify that the Board received documentation from their residency program. Applicants should check with their training director to see if documentation was sent to the Board office.
Reapplicants only:
If you are reapplying for examination and were previously accepted for examination, you do not need to include the GY1 and residency training documentation with this reapplication.

Application Statement
Read, sign, and date the application statement. Applications with altered or unsigned application statements will not be accepted and will be returned.

9. Examination Site
From the list provided, select your top four preferences for examination site.
Part I sites are assigned based on the order in which applications are received and approved in the Board office. If a site is filled to capacity, the second choice will be assigned. If the second choice site is filled to capacity, the third choice will be assigned, etc.

10. Other Diplomate Information (if any)
List any other Board certifications.

D. Appeal Procedure for Negative Determinations Regarding Applications or Licensure
The rejection of credentials for admission to an examination is considered a "negative determination." An applicant who has submitted a formal application and receives a negative determination regarding his/her application may appeal by complying with the following procedures:
Within 30 days after notice of a negative determination, the applicant may indicate, in writing, his/her request for a formal appeal of his/her application rejection. An appeal fee of $350 and any additional written information or a written request for a formal appeal must accompany this request. All correspondence and other materials should be sent to the Board office.
For psychiatry applicants, the Committee on Credentials for Psychiatry will review the materials and recommend action to the Psychiatry Council, which consists of all current psychiatry directors. The Psychiatry Council will review the materials and make a decision that, in all events, will be final and binding on the Council, on the Board, and on the applicant.
For neurology and neurology with special qualification in child neurology applicants, the Committee on Credentials for Neurology will review the materials and recommend action to the Neurology Council, which consists of all current neurology directors. The Neurology Council will review the materials and make a decision that, in all events, will be final and binding on the Council, on the Board, and on the applicant.
Any applicant who does not satisfy the Board's licensure requirement may submit a letter of appeal to the Board office. The appeal materials will be sent to the respective Credentials Committee, which will review the materials and make a recommendation to the respective Council. The Council will review the materials and make a decision which, in all events, will be final and binding on the Council, on the Board, and on the applicant.

IV. Examinations
A. General Information Pertaining to All Examinations
The Board does not endorse or recommend any texts or other teaching aids identified as "Board preparation" material. Furthermore, the Board does not have any affiliation with or responsibility for programs identifying themselves as "Board Review Courses." Although the purpose of the examination is to test the qualifications of the candidate in psychiatry, neurology, or both, it must not be forgotten that these medical disciplines constitute part of the broad field of general medicine. The Board requires proficiency in neurology on the part of those it certifies in psychiatry and vice versa, but examines the candidate in accordance with the certificate he or she seeks.
The Board may conduct examinations at each time and places as it deems appropriate. The Board reserves the right to limit the number of candidates admitted to any scheduled examination. The administration and grading of all examinations shall be at the sole discretion of the Board. The examination is a 6-hour examination, and the candidate is not required to attend the Board examination during the allotted time period.
To become Board certified, each candidate must pass both Part I and Part II of the examination given by the Board. If the candidate does not pass both parts of the examination, the candidate must retake the Part I examination only. The candidate must also take the Part II examination, whichever comes first. Candidates who are unsuccessful in the Part II examination during the allotted time period will be required to retake the Part I examination.
Each examination shall cover such subjects as the Board may determine. The Board may designate one or more examination sites.
The Board will send the names of all those achieving certification on or before the date designated by the Board. The Board will notify the applicant who has achieved certification on or before the date designated by the Board.
The Board is not liable for candidate travel and/or other related expenses incurred as a result of an examination cancellation.
General questions about requirements and logistics of ABPN examinations may be asked of the ABPN staff by telephone or on site. Verbal complaints to staff, directors, proctors, or examiners that continue after explanation of ABPN policy may rise to the level of harassment, in which case they will constitute irregular behavior (see Section I.D). At no time should a candidate discuss the administration or the grading of an examination with the examiners.
Candidates are required to bring government-issued photo identification to the examination. They will be asked to present this ID at registration. Government-issued photo identification includes...
military IDs, passports, valid driver's licenses, and state IDs. If the name on the admission slip is different from the name that appears on the photo ID, certified documentation verifying a name change must also be presented.

Candidates may not bring food, drink, cellular phones, pagers, books, or study materials into the examination.

B. Part I Examination Procedures
Successful completion of the Part I written examination is required of candidates seeking certification in psychiatry, neurology, or neurology with special qualification in child neurology. In order to successfully complete the Part I examination, a candidate must pass both parts of the two-part written examination at the same examination administration.

1. Scheduling
The Part I examination is given once a year on a regional basis throughout the United States and Canada, as well as in selected sites outside North America. The Board will advise an applicant, in writing, of acceptance for examination.

Applicants will be expected to indicate, in order of preference, their choice of four examination sites. Every effort is made to accommodate candidates in the locale of their choice. Request for transfer to another site must be made in writing at least 30 days prior to the Part I examination. Changes will be made subject to space availability. One month prior to the examination candidates will receive an admission notice specifying their examination site and time to report for examination.

All applicants are required to sit for the Part I examination for which they have applied. Applicants who fail to do so will be required to submit a new application, copy of unlimited license, and the application and Part I examination fees. Candidates who are unable to sit for their scheduled Part I examination owing to an emergency should contact the Board office in writing no later than 30 days after the date of the examination.

2. Reexamination
A candidate who fails the initial Part I examination may, upon payment of the Part I reexamination fee, repeat the examination the following year. There is no limit on the number of times an applicant may apply to take the Part I examination. Two negative determinations necessitate reapplication (new application, copy of unlimited license, and payment of application and Part I examination fees). Reexaminees who do not sit for reexamination as scheduled will also be required to submit a new application, copy of unlimited license, and payment of the application and Part I examination fees. Candidates applying for reexamination do not need to include another copy of their GY1 and residency documentation.

C. Psychiatry Part I Examination Content
The psychiatric portion of the examination will include questions in the following areas:

- Development and the life cycle
- Neuroethical and psychosocial aspects of psychopathology
- Diagnostic procedures
- Psychiatric disorders and comorbid disorders
- Pharmacological and nonpharmacological treatments
- Special topics in psychiatry (suicide, dangerousness, ethics, mental health delivery systems, history of psychiatry, and community consultation liaison, emergency, and forensic psychiatry)

The neurologic portion of the examination will include questions in the following areas:

- Incidence/risk of neurological disorders
- Diagnostic procedures (history, neurological examination, neurochemistry, neuroelectrophysiology, neuroradiology, neuropsychological testing)
- Clinical evaluation and management of neurological disorders

D. Neurology/Neurology with Special Qualification in Child Neurology Part I Examination Content
The neurologic portion of the examination will include questions in the following areas of adult and child neurology:

- Neuroanatomy
- Neurophysiology
- Neurochemistry
- Neuropathology
- Neuropsychology
- Neuropharmacology
- Neuroimmunology/neuroimmunology
- Genetics
- Neuroendocrinology
- Neuroimaging
- Neuro-ophthalmology
- Neuro-otology
- Cerebrospinal fluid

The psychiatric portion of the examination will include questions in the following areas:

- Development and disorders of childhood
- Psychopathology and diagnostic criteria
- The doctor-patient relationship
- Behavioral and personality changes associated with structural changes
- Alcoholism and other substance abuse
- Altered states of consciousness
- Memory disorders and cortical changes with dysfunction
- Psychiatric problems associated with medical disease
- Diagnostic procedures
- Psychopharmacology and nonpharmacologic therapeutic modalities

E. Appeal Procedure for Negative Determinations Regarding Part I Examinations
A failing grade on the Part I examination is considered a "negative determination." A candidate who receives a negative determination may appeal by complying with the procedures detailed below. Within 30 days after date of notice of a negative determination, the unsuccessful candidate may initiate, in writing, his/her request to have his/her examination hand scored. The appeal fee of $90 must accompany the request. The candidate will be informed of the results of the hand scoring in writing that, in all events, will be final and binding on the Board and on the candidate. All correspondence and other materials should be sent to the Board office.

F. Part II Examination Procedures

1. Assignment and Scheduling
All successful Part I candidates will receive a notice of assignment to a Part II examination (Part II billing statement), together with a request to submit the required examination fee. Candidates will be asked to sign a statement that they possess a current, unlimited license to practice medicine in a state, commonwealth, territory, or possession of the United States or province of Canada. Candidates who submitted a temporary (education or training) license at the time of application to Part I will be required to submit a copy of their unlimited licenses by December 31 of the year in which they passed the Part I examination. Candidates who do not submit copies of their license by this deadline will not be scheduled for the Part II examination.
Any candidate in possession of a restricted, suspended, or revoked license will not be scheduled for the Part II examination. Restrictions include but are not limited to conditions, contingencies, probation, and stipulated agreements.

Scheduling for the Part II examination will be made on a regional basis as often as possible. The limited space available and the complicated logistics involved in administering the Part II examination make it extremely difficult for the Board to allow candidates to select either the site or the date for examination. Candidates who do not attend the Part II examination for which they are initially scheduled must submit a Part II application to be put on a waiting list for future examinations (see Section IV.E.2).

Candidates who have submitted a Part II application will be scheduled for examination within 1 year from the date the Part II application is received in the Board office whenever possible. Due to space limitations a wait longer than 1 year may be necessary. Candidates will be scheduled for examination based on space availability and order of receipt of application.

Candidates who have submitted a Part II application may choose to decline two invitations to Part II examinations. If the third invitation is declined, the candidate will be required to submit a new Part II application and will be placed at the end of the waiting list once the application is received in the Board office. Although it is the candidate's privilege to decline the invitation, there is no guarantee that another date or location will be available within the year's examination cycle.

One month prior to the date of the assigned Part II examination, a candidate will receive informational materials and an admission notice specifying the date, time, and place to report for registration. Candidates are requested to report for registration only on the day and at the time indicated on the admission notice. Registration schedules are arranged to accommodate candidates in accordance with their examination schedules.

2. Fees and Applications

Candidates who do not pay the Part II examination fee for their scheduled examination by the deadline specified will be removed from the roster of candidates for that examination. Such candidates will be required to request and submit a Part II application in order to be scheduled for a future Part II examination. The examination fee should not be sent with the application. The Board will request the examination fee when the new assignment is made.

A candidate who is unable to attend the Part II examination to which he/she has been admitted and who fails to notify the Executive Vice President in writing at least 60 days before the date of such examination shall forfeit the examination fee. Such candidates will be required to request and submit a Part II application in order to be scheduled for a future Part II examination and must again pay the required Part II examination fee when a new assignment is made.

3. Recexamination and No-Show Policy

A passing grade on the Part I examination will be valid for a period of 6 years or three opportunities to complete the Part II examination successfully, whichever comes first. Beginning with the April 2000 Part II examination, an excused absence counts as an opportunity to take the Part II examination.

Candidates who are unsuccessful in the Part II examination during the allotted time period will be required to retake the Part I examination. These candidates must request and submit a new Part I application and the application and Part I examination fees.

Psychiatry candidates must pass both sections of the Part II examination. A candidate who fails one or both sections of the examination must repeat both sections at each subsequently scheduled examination until he/she passes both sections at the same examination.

Neurology candidates must pass all three (two adult and one child) sections of the Part II examination. A candidate must repeat the section or sections he/she failed at each subsequently scheduled examination until he/she passes all the sections.

Child Neurology candidates must pass all three (two child and one adult) sections of the Part II examination. A candidate must repeat the section or sections he/she failed at each subsequently scheduled examination until he/she passes all the sections.

All candidates taking the Part II examination are required to be examined in all sections for which they are scheduled. Beginning with the April 2000 Part II examination, if a candidate does not appear for a section of his/her examination, the examination results for sections taken will be invalidated, no fees will be refunded, and it will count as an opportunity to take the Part II examination.

Exceptions: Candidates who are unable to sit for all sections of their scheduled Part II examination due to a medical or other emergency may submit documentation of the emergency to the Board office, in writing, no later than 30 days after the date of the examination. The Board will then evaluate the documentation and determine whether the absence is "excusable." For candidates in psychiatry: If the Board classifies the absence as excusable, the examination results for completed sections will be invalidated, but the fees will be transferred or refunded. The examination will not count as an opportunity to take the Part II examination.

For candidates in neurology or in neurology with special qualification in child neurology: If the Board classifies the absence as excusable, the results for the section(s) that were completed will remain, and the grade for the section(s) not completed will be recorded as "incomplete." No fees will be refunded, and the examination will not count as an opportunity to take the Part II examination.

Candidates who fail the Part II examination are automatically assigned to another Part II examination and are required to be present as scheduled. Candidates who fail to take the recexamination at the time specified, as well as candidates who do not pay their recexamination fee by the specified deadline, are required to request and submit a Part II application.

4. Grade letters and certificates

Candidates will receive written notification as to whether they passed or failed approximately 30 days after the Part II examination. Successful candidates will receive their certificates within 90 days of receiving their grade letters. It is the candidate's responsibility to notify the Board office, in writing, if he or she does not receive the certificate within the time frame specified in the grade letter. If a candidate does not do so, he/she will have to request a duplicate certificate and pay a $50 processing fee.

5. Duplicate certificates

Requests for duplicates of ABPN certificates must include your name, address, phone number, birthdate, signature, and indication of how you want your name printed on the certificate. You must include with your request copies of (1) your current unlimited medical license stating the expiration date and (2) for security purposes, government-issued photo identification, such as a driver's license or passport. Also include a check in the amount of $50 for each duplicate certificate ordered, payable to the American Board of Psychiatry and Neurology, Inc. Certificates are printed approximately five times per year. Depending on when a duplicate certificate is requested, it may be 2 to 4 months until the diplomate receives the duplicate certificate.
C. Part II Examination Format

Part II, an oral examination, will include the examination of patients under the supervision of one or more examiners. The manner of examining patients and the reasoning and deductions therefrom will constitute an important part of the examination. Knowledge of basic science principles, special diagnostic procedures, management recommendations, and assessment of risk are also essential parts of the examination, which focuses on evaluation of clinical skills.

Candidates are expected to discuss their findings with their examiners. Questions frequently cover such areas as diagnosis, differential diagnosis, evaluation, treatment, prognosis, and management. Reference to the basic sciences of psychiatry and neurology may be made.

Note taking is permitted during oral examinations provided that only blank paper is used. All notes must be left in the examination room at the conclusion of the examination. Notes will not be used in the assignment of grades and will be destroyed. Failure to adhere to this policy will constitute irregular behavior (see section I.D).

1. Psychiatry

Psychiatry candidates will take two examinations:
- One 1-hour examination in clinical psychiatry (patient)
- One 1-hour examination in clinical psychiatry (audiovisual)

In the patient section, the psychiatry candidate will be given approximately 30 minutes to examine a patient under the supervision of one or more examiners. Following the examination of the patient, the discussion with the examiner(s), which will be approximately 30 minutes in length, will focus on physician-patient interaction, conduct of the clinical examination, capacity to elicit clinical data, formulation, differential diagnosis and prognosis, therapeutic management, and knowledge of therapies. Additional questions may be addressed to the basic science of psychiatry.

The audiovisual section will consist of a videotaped psychiatric examination of approximately 25 minutes, which the candidate will observe. Candidates will then be individually examined by one or more examiners with particular reference to the content of the tape. This discussion may also include other clinical topics.

2. Neurology and Child Neurology

Neurology candidates will take three examinations:
- One 1-hour examination in clinical neurology (patient)
- One 1-hour examination in clinical neurology (Vignette)
- One 1-hour examination in clinical child neurology (Vignette)

Child Neurology candidates will take three examinations:
- One 1-hour examination in clinical child neurology (patient)
- One 1-hour examination in clinical child neurology (Vignette)
- One 1-hour examination in clinical neurology (Vignette)

In the neurology and child neurology patient sections, the candidate will be given approximately 30 minutes to examine the patient under the supervision of one or more examiners. During the patient examination, the candidate’s ability to obtain an adequate history and perform a neurologic examination will be observed. Following the examination of the patient, the discussion with the examiner(s), which will be approximately 30 minutes, will focus on the evaluation of the findings and discussion of the diagnosis, treatment, and management. This discussion may not be limited to the patient examined and may also include other clinical topics. The examiners may also ask additional questions concerning the basic science of neurology.

Multiple written vignettes of patient encounters will be utilized as a basis for discussion of diagnosis and treatment in those sections in which there is no patient present.

Since candidates in child neurology are to be certified in "neurology with special qualification in child neurology," it is agreed that those candidates will be expected to pass a 1-hour oral examination in clinical neurology (vignette) that is set at the same level of difficulty established for neurology candidates. The pass/fail standards for that hour in clinical neurology (vignette) will be the same whether the candidate is seeking certification in neurology or in neurology with special qualification in child neurology.

H. Feedback and Appeal Procedures for Negative Determinations Regarding Part II Examinations

A failing grade on a Part II examination is considered a "negative determination." Within 30 days after date of notice of a negative determination, the unsuccessful candidate may indicate, in writing, his/her request for feedback. The fee for providing feedback is $100 and must accompany the written request. After such request, the candidate will be provided a checklist concerning his/her performance on sections not passed. All correspondence or other materials should be sent to the Board office.

A candidate who receives a negative determination may appeal by complying with the procedures detailed below.

Within 60 days after date of notice of a negative determination, the unsuccessful candidate may indicate, in writing, his/her request for a formal appeal of the examination results. An appeal fee equal to the candidate’s reexamination fee and written information tending to rebut the negative determination must accompany this request. All correspondence and other materials should be sent to the Board office.

For psychiatry candidates the Committee to Review Appeals for Psychiatry will review the materials and recommend action to the Psychiatry Council, which consists of all current psychiatry directors. The Psychiatry Council will review the materials and make a decision that, in all cases, will be final and binding on the Council, on the Board, and on the candidate.

For neurology and neurology with special qualification in child neurology candidates, the Committee to Review Appeals for Neurology will review the materials and recommend action to the Neurology Council, which consists of all current neurology directors. The Neurology Council will review the materials and make a decision that, in all events, will be final and binding on the Council, on the Board, and on the candidate.

V. Subspecialization

For complete information about subspecialty certification, please contact the Board office to request the current editions of the following ABPN publications:

- Information for Applicants for Certification in Child and Adolescent Psychiatry
- Information for Applicants for Certification in the Subspecialties of Geriatric Psychiatry, Clinical Neurophysiology, Addiction Psychiatry, and Forensic Psychiatry
- Information for Applicants for Certification in the Interdisciplinary Subspecialty of Pain Management

VI. Special Programs

A. Supplementary Certification

A candidate who has been certified in psychiatry, neurology, or neurology with special qualification in child neurology may apply for supplementary certification in another primary specialty upon submission of a new Part I application and Part I examination fee. The candidate will be scheduled for the first available Part I examination in the supplementary specialty. The credentials for such other certificate must be acceptable to the Board.

A candidate may have more than one application or file with the Board at any one time if the applications are for certification in different specialties or subspecialties. It is the responsibility of the
applicant to contact the Board office to avoid possible conflicts in examination scheduling.

1. Dual certification in psychiatry and neurology

Unless otherwise specified (see section on Canadian training programs below), all training must be completed in programs accredited by the ACGME.

Applicants seeking certification both in psychiatry and neurology who began residency training prior to January 1, 1988, must have completed 8 years of the following ACGME-accredited postgraduate training:

a. A GY1 that meets requirements for either psychiatry or neurology (see sections II.C and II.D)

b. Two years of ACGME-accredited residency training in psychiatry in a single training program

c. Two years of ACGME-accredited residency training in neurology in a single training program

Applicants seeking certification both in psychiatry and neurology who began residency training on or after January 1, 1988, must have completed one of the following training tracks:

1. An ABPN-approved combined psychiatry/neurology training program (recommended)

A GY1 that meets the requirements for entry into a neurology program (see section II.D).

and

Five years of residency training in an ABPN-approved combined psychiatry/neurology training program.

or

2. Individual psychiatry and neurology programs

A GY1 that meets the requirements for entry into a neurology program (see section II.D)

and

Six full years of postgraduate residency training in ACGME-accredited programs, including 3 full years in psychiatry and 3 full years in neurology.

or

3. Non-ABPN-approved combined training programs

A GY1 that meets the requirements for entry into a neurology program (see section II.D)

and

At the discretion and approval of both training directors, and in accordance with Residency Review Committee requirements, applicants may complete 5 full years of postgraduate training in ACGME-accredited programs including 2 full years of residency training in psychiatry in a single program, 2 full years of residency training in neurology in a single program, and a full year that is jointly sponsored and coordinated by the psychiatry and neurology training directors to allow the resident to successfully complete all the essentials for an approved residency program in psychiatry and an approved residency program in neurology.

The 5 years of residency training are usually taken at one institution but may be taken at no more than two institutions. An application for examination may be submitted after completion of the GY1, the 2 full years of residency training in one specialty, and the full year of jointly sponsored residency training.

For residents entering residency training on or after July 1, 1998: Program directors must contact the Board office for a copy of the combined psychiatry/neurology guidelines and must submit to the Board for review, no later than the beginning of the GY3, a proposal for a resident to train in psychiatry and neurology that conforms to these guidelines.

Canadian training programs

Applicants who entered a Canadian residency program on or after July 1, 2001, must complete their training in a program accredited by the RCPS. Applicants entering Canadian residency before July 1, 2001, may be granted training credit if their residency training was completed in a Canadian program accredited by the ACGME.

Training requirements include:

a. A minimum of 12 months of approved training in general pediatrics

and

b. A minimum of 12 months of approved training in clinical child neurology

A maximum of 3 months of child neurology training obtained during a neurology residency may be applied toward the required 12 months of child neurology training only if the 3 months took place in an ACGME-accredited child neurology program, which must be documented by the neurology program director.

Candidates will be required to request and submit a new completed Part I application and the application fee. Such candidates will not be required to retake the Part I examination in neurology. The Part II examination fee will be requested after the application has been approved. Two 1-hour examinations in child neurology will be taken during the Part II examination.

Canadian training programs

Applicants who entered a Canadian residency program on or after July 1, 2002, will not be granted training credit. Applicants entering Canadian residency before July 1, 2002, may be granted training credit if their residency training was completed in a Canadian program accredited by the RCPS.

3. Dual certification in child and adolescent psychiatry and in neurology with special qualification in child neurology

An applicant who wishes to obtain certificates both in child and adolescent psychiatry and in neurology with special qualification in child neurology must meet the following requirements:

a. Certification by the Board in the specialty of general psychiatry prior to applying for examination in child and adolescent psychiatry (a minimum of 2 years of approved residency training in general psychiatry is required)

b. Completion of the requirements for certification in child and adolescent psychiatry;

and

c. Completion of the requirements for certification in neurology with special qualification in child neurology.

B. Joint Training in Pediatrics/Psychiatry/Child and Adolescent Psychiatry

The American Board of Pediatrics, the ABPN, and the Committee on Certification in Child and Adolescent Psychiatry of the ABPN have approved programs for combined pediatrics/psychiatry/child and adolescent psychiatry residency training. This training consists of 24 months of pediatrics, 18 months of adult psychiatry, and 18 months of child and adolescent psychiatry. Completion of the program will satisfy the training requirements for certification in all three areas. Physicians pursuing training in these programs may not apply for examination until all training has been completed.
C. Joint Training in Neurology/Radiology/Neuroradiology
The American Board of Radiology and the ABPN have approved programs for combined training in neurology/radiology/neuroradiology. Completion of the program will satisfy the training requirements for certification in all three areas. In order to be certified in neuroradiology, a resident must have completed certification in both diagnostic radiology and neurology.

D. Combined Training Leading to Certification by Two Boards
Approved combined/joint training programs are listed in the Graduate Medical Education Directory. A list of programs approved since the last edition of the Graduate Medical Education Directory may be obtained by writing to the ABPN or by calling the ABPN faxback service at 847 945-7800 x229. The Board currently has the following programs:

1. Dual certification in psychiatry/family practice
The American Board of Family Practice and the ABPN have approved guidelines for combined psychiatry/family practice residency training. In order to satisfy training requirements in psychiatry, a resident who resides from the combined psychiatry/family practice training program must complete 36 months of residency training, of which 30 months of training must be completed in psychiatry. In addition, the program requirements for psychiatry as defined in the Graduate Medical Education Directory must be satisfied.

2. Dual certification in psychiatry/internal medicine
The American Board of Internal Medicine and the ABPN have approved programs for combined psychiatry/internal medicine residency. In order to satisfy training requirements in psychiatry, a resident who resides from the combined psychiatry/internal medicine training program must complete 36 months of residency training, of which 30 months of training must be completed in psychiatry. In addition, the program requirements for psychiatry as defined in the Graduate Medical Education Directory must be satisfied.

3. Dual certification in neurology/internal medicine
The American Board of Internal Medicine and the ABPN have approved programs for combined neurology/internal medicine residency training. In order to satisfy training requirements in neurology, a resident who resides from the combined neurology/internal medicine training program must complete 36 months of residency training, of which 30 months of training must be completed in neurology. In addition, the program requirements for neurology as defined in the Graduate Medical Education Directory must be satisfied.

4. Dual certification in neurology/physical medicine and rehabilitation
The American Board of Physical Medicine and Rehabilitation and the ABPN have approved programs for combined neurology/physical medicine and rehabilitation residency training. In order to satisfy training requirements in neurology, a resident who resides from the combined training program must complete 36 months of residency training, of which 30 months of training must be completed in neurology. In addition, the program requirements for neurology as defined in the Graduate Medical Education Directory must be satisfied.

VII. Applicants with Disabilities and Qualifications for Testing Accommodations
A. General Information
The Board recognizes that physicians with disabilities may wish to take the certifying examinations and will attempt to make accommodations for applicants with verified disabilities. The Board supports the intent of the Americans with Disabilities Act (ADA). You are reminded, however, that "auxiliary aids (and services) can only be offered if they do not fundamentally alter the measurement of skills or knowledge the examination is intended to test" (Americans with Disabilities Act, Public Law 101-336 ($300 lb11)). To this extent, the Board will provide reasonable accommodations during testing to provide equal opportunity for persons with disabilities. The documentation requesting reasonable accommodations must identify a disability and provide a rationale for specified modifications to standard testing procedures.

Applicants who request accommodations because of a disability must advise the Board in writing no later than the deadline for submitting applications for examination. All documentation and other evidence substantiating the disability must be submitted to the Board no later than 30 days after the deadline for filing an application for examination. Required documentation includes completion of the Application for Testing Accommodations and appropriate checklists at the end of this section. If the Board deems it necessary, an independent assessment may be requested at the expense of the Board.

Documentation and other evidence substantiating the disability includes, but is not limited to, each of the following:

- A report diagnosing the applicant's disability written by a professional appropriately qualified for evaluating the disability. The report must be printed on the certified examiner's letterhead, with the examiner's credentials, address, and telephone number given in the letterhead or title. The report must include the candidate's name, date of birth, and date of testing, and it must be signed by the examiner.

- A history of the disability, including previous settings in which accommodations have been granted. Having had prior accommodations granted does not necessarily influence the decision of the Board to grant or deny a current request for accommodation. If there is no history of prior accommodations, the examiner must explain why current circumstances necessitate accommodations.

- Diagnostic information about the specified disability using standard nomenclature from sources such as the International Classification of Diseases and the American Psychiatric Association Diagnostic and Statistical Manual of Mental Disorders.

- Specific recommended accommodations, with a rationale for why each accommodation is needed. A description of any functional limitations associated with the disability is important to the Board's evaluation of the request.

B. Review of Documentation
A letter detailing the specific accommodations requested because of a disability must be submitted for each examination and/or reexamination. Documentation should be marked "ADA Materials" and mailed to the attention of the executive vice president at the Board office.

Each report is reviewed carefully before accommodations are provided. If the Board does not find appropriate and sufficient evidence to grant accommodations, the applicant will be informed that the request has been denied.

Any applicant whose request for accommodations because of a disability is denied may submit a letter of appeal. All requests for appeal should be submitted to the Board office within 30 days of the original notice of denial and must be accompanied by the required $400 appeal fee as well as any further information that rebuts the Board's original decision. The Disabilities Accommodations Committee will then review the materials and make a decision that will be final and binding for the Committee, the Board, and the applicant.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Radiology [ABR] to ascertain whether the information below is current.)

Certificates

A certificate will be issued to each candidate who has finished a prescribed and approved period of training and study and has passed written and oral examinations demonstrating an adequate level of knowledge and ability in diagnostic radiology or radiation oncology in accordance with the definitions as stated in the Bylaws and Rules and Regulations of the ABR.

A certificate granted by the Board does not of itself confer, nor purport to confer, any degree or legal qualifications, privileges, or license to practice radiology.

Definitions

1. Diagnostic radiology is that branch of radiology that deals with the utilization of all modalities of radiant energy in medical diagnosis and therapeutic procedures utilizing radiologic guidance. This includes, but is not restricted to, imaging techniques and methodologies utilizing radiations emitted by x-ray tubes, radionuclides, ultrasonographic devices, and radiofrequency electromagnetic radiation emitted by atoms.

2. Radiation oncology is that branch of radiology that deals with the therapeutic applications of radiant energy and its modifiers and the study and management of cancer and other diseases.

Diagnostic Radiology Training Requirements

Candidates beginning their graduate medical education after January 1, 1997, will be required to have 5 years of approved training with a minimum of 4 years in diagnostic radiology. These 4 years must be spent in a department approved for training in diagnostic radiology by the Residency Review Committee (RRC) for Diagnostic Radiology of the Accreditation Council for Graduate Medical Education (ACGME), or by the Royal College of Physicians and Surgeons of Canada (RCPSC). A minimum of 6 months, but not more than 12 months, must be spent in nuclear medicine radiology in the 4-year program. Candidates may spend no more than 8 months in rotations outside the parent institutions.

The other year must be accredited clinical training in internal medicine, pediatrics, surgery or surgical specialties, obstetrics and gynecology, neurology, family practice, emergency medicine, or any combination of these. This clinical year will usually be the first postgraduate year. No more than a total of 3 months may be spent in radiology, radiation oncology, and/or pathology. All clinical training must be in an ACGME, American Osteopathic Association (AOA), or equivalent approved program.

Residents must have basic cardiac life support certification; advanced cardiac life support certification is encouraged.

It is not the intent of the ABR for programs to use any of the 4 years for traditional fellowship training. The designation of "fellowship" is reserved for training beyond the 4-year residency.

In a 4-year approved residency program, not more than 12 months may be spent in a single discipline (research is considered a discipline).

In a 4-year program, the resident is expected to remain in that program for all 4 years. If a transfer to another program is necessary or desired, that transfer must have the agreement of both program directors and the prospective notification to the ABR.

Candidates will be considered for the physics portion of the written examination only when they have completed 12 months of diagnostic radiology training. After 24 months of diagnostic radiology training and having passed the physics examination, the candidate will be allowed to sit for the clinical examination. If the candidate has not already passed the physics examination, he/she may take both the clinical and physics examinations together.

A candidate who has passed the written examination and will complete 60 months of approved training by September 30 in the year in which the exam is given will be considered for the oral examination. Admissibility to the oral examination is determined by the executive committee.

First-time applicants completing 5 years of training by the year 2001 will be issued a lifetime certificate in diagnostic radiology upon successful completion of the oral examination.

Residents completing 5 years of training by the year 2002 will be issued a 10-year-limited certificate in diagnostic radiology upon successful completion of the oral examination.

Radiation Oncology

Candidates beginning their graduate medical education after December 1995 will be required to have 5 years of approved training with a minimum of 4 years in radiation oncology. These 4 years must be spent in a department approved to train in radiation oncology by the RRC for Radiation Oncology for the ACGME, or by the RCPSC. The 4-year residency training period must include 36 months of clinical radiation oncology with exposure to pathology and medical oncology. A maximum of 3 months' training in diagnostic radiology
will be allowed. Candidates may spend no more than 8 months in rotations outside the parent institution.

The other year, which must precede the radiation oncology training, must be AGME, AOA, or RCPSC-accredited clinical training in internal medicine, surgery or surgical specialties, pediatrics, family practice, obstetrics and gynecology, transitional, or categorical radiation oncology, or any combination of these. Specialties other than those listed, including pathology, do not satisfy the PG1 requirement of the ABR.

Candidates will be admissible to the written examination only after they have completed 4 years of approved training or if they will complete this amount of training by September 30 of the year in which the examination is given. This must include a PGY1 clinical year of training in the United States or Canada. Requests for credit for this training in other countries must be submitted to the executive committee.

Residents must have current basic cardiac life support certification. Advanced cardiac life support certification is encouraged.

The resident is expected to remain in a training program for its duration. If a transfer to another program is necessary or desired, that transfer must have the agreement of both program directors and the prospective notification of the ABR.

A candidate who has passed the written examination and will complete 60 months of approved training by September 30 in the year in which the exam is given will be considered for the oral examination. Admissibility to the oral examination is determined by the executive committee.

Effective in 1996, successful candidates will be issued a 10-year, time-limited certificate in radiation oncology.

Certificate of Added Qualifications (CAQs) and Certificate of Special Competence

A 10-year limited certificate will be issued to each diplomate certified in either radiology or diagnostic radiology who has finished a prescribed and approved period of training and study and has passed an oral examination demonstrating an adequate level of knowledge and ability in the area of expertise for which he/she has applied in accordance with the definitions stated in the Bylaws and Rules and Regulations of the ABR.

Definitions

1. Neuroradiology is that branch of radiology dealing with (1) the brain and its coverings, (2) the skull base and ENT, and (3) the spine.

2. Pediatric radiology is the branch of radiology dealing with children.

3. Vascular and interventional radiology is the branch of radiology dealing with the diagnosis and treatment of diseases using percutaneous methods guided by various radiologic imaging modalities.

4. Nuclear radiology is the branch of radiology that involves the use of radionuclides and radiolabeled substances for diagnostic imaging and related in vivo techniques.

Certificates of Added Qualifications in Neuroradiology, Pediatric Radiology, and Vascular/Interventional Radiology

For the years 1995-1999, there are two ways of meeting the requirements:

1. Have a minimum of 1 year full-time training (fellowship) following the completion of residency training and must have completed at least 1 year of practice or additional training (one third of that time) in the subspecialty. Fellowship training must be documented by letter from the program director. Practice experience must be verified by letter from the chief of service or department chair;

2. Have completed at least 5 years of active recent practice experience with a minimum of one third time (based on a 46-hour work week, 16 hours per week) devoted exclusively to all aspects of the subspecialty. This encompasses actual participation and interpretation of examinations and procedures as well as time devoted to consultation with referring physician, attendance at related conferences, and pre- and post-procedure visits with patients. This experience must be attested to by the chief of service. This 5 years of practice experience will be acceptable only for the first 5 years of examination (1995-1999).

A summary of experience data must be submitted with the neuroradiology and vascular and interventional applications.

Candidates finishing their fellowship in 1999 will not be required to have received their training in an accredited fellowship program. After 1999, candidates are required to have successfully completed 1 year of fellowship training after residency in a program approved for such training and accredited by the AGME and 1 year of practice or additional approved training.

Diagnostic Radiology with Special Competence in Nuclear Radiology

Candidates will be required to have a minimum of 1 year of full-time training in nuclear radiology in a department approved for training in nuclear radiology by the RRC for diagnostic radiology or nuclear medicine by the RRC for Nuclear Medicine and accredited by the AGME. Credit will not be given for any training obtained during the 4 years of diagnostic radiology residency.

Qualifications of Applicants for Certification by the ABR

Each applicant for admission to an examination for a certificate to be issued by the ABR in diagnostic radiology or radiation oncology shall be required to present evidence satisfactory to the Board that the applicant has met the following standards:

1. General Qualifications: The applicant is a specialist in diagnostic radiology or radiation oncology as outlined in Article II, Section 2, of the Rules and Regulations and is recognized by his/her peers to have high moral and ethical standards in his/her profession.

2. General Professional Education: Graduation from a medical school accredited at the date of graduation by the Liaison Committee on Medical Education of the American Medical Association, the RCPSC, or from a college of osteopathic medicine approved by the AOA. If the applicant is a graduate of a medical school outside the United States or Canada, the applicant must be screened with approval by an agency acceptable to the Board of Trustees.

3. Special Training: The period of special training shall be as the Board of Trustees, by resolution or motion, shall determine from time to time. The Board of Trustees requires a written statement from the applicant's current program director, attesting that the applicant will have satisfactorily completed the required special training in radiology or radiation oncology by the appointed time and is prepared to take that examination.

4. In special instances these requirements may be modified by majority vote of the entire Board of Trustees or by the executive committee acting in its stead.

5. If the program director fails to indicate in writing that the applicant will have the required special training, documentation of the reason(s) must be submitted along with evidence that the candidate has been appropriately apprised of his/her deficiencies. The executive committee of the Board will notify the applicant in writing that an appeals mechanism exists as outlined in paragraphs 6 and 7 below.
6. In utilizing the appeals mechanism, the applicant must provide the executive committee of the Board with a written statement supporting the appeal. The executive committee may ask the program director to submit a written response to the applicant’s appeal.

7. The executive committee must reach a final decision without delay in determining the candidate’s admissibility to the examination.

Application and Fee
Application for examination must be made in exact duplicate (two original copies on prescribed forms that may be obtained from the ABR office). No photocopy or any other kind of copy will be accepted. These forms should be submitted with photographs, autographed on the front, and the current application fee (US currency) by the deadline established for filing. Applications for the written examination to be given in any year will not be accepted prior to July 1 of the preceding year and must be filed no later than the deadline of September 30 of the preceding year. There is a nonrefundable penalty fee for any application postmarked between October 1 and October 31. No application will be accepted after October 31.

Incomplete applications will not be accepted. The postmark affixed to the last item received to complete the application must be on or before the deadline date.

In the event of withdrawal of an application, only a portion of the fee can be refunded.

A candidate will have three consecutive opportunities to appear for and pass the written examination, beginning with the written examination for which he/she is first declared admissible. If a candidate fails to accomplish this, he/she must submit a new application and fee in effect at that time. Failure to accept an appointment, cancellation of an appointment, or failure to appear for a scheduled written examination will be regarded as one of the three opportunities.

A candidate who has passed the written examination will have three consecutive opportunities to appear for and pass the oral examination, beginning with the oral examination for which he/she is first declared admissible. If a candidate fails to accomplish this, he/she must submit a new application and the fee in effect at that time and reinitiate the examination process, including the written examination. Failure to accept an appointment, cancellation of an appointment, or failure to appear for a scheduled oral examination will be regarded as one of the three opportunities.

A candidate who finds it necessary for any reason to cancel after acceptance of an appointment for either the written or oral examination shall be required to submit an additional fee. This amount represents administrative costs to the Board. A candidate who fails to appear for an examination without notifying the office of the ABR at least 20 days prior to the first date of the examination will be charged the full application fee in existence at the time of payment. (Under certain circumstances, the ABR, entirely at its discretion, may excuse such a candidate from this penalty, provided the reason for such absence is substantiated in writing.)

Objectives of the Written Examination
In 1966 it became apparent to the Board of Trustees of the ABR that the then current oral examination could not cover the entire burgeoning field of radiology without the addition of more segments and, in turn, more examiners. This would impose a further burden not only on candidates but also on the Board itself. It was decided, therefore, to search for other methods of examination. At that time, it was agreed to adopt a written examination to be given annually as a prerequisite for the oral examination. The content of the examination was to include the basic sciences of anatomy, pathology, physiology, and pharmacology as these subjects relate to clinical practice. Also to be included were radiologic techniques, radiologic physics, and radiation biology.

Thus, the content of the examination in radiation oncology now includes the basic sciences of physics, radiation biology, and clinical oncology, as well as anatomy, pathology, physiology, and chemotherapy as these subjects relate to the clinical practice of radiation oncology.

A pool of multiple-choice questions was developed, and the first examination was given in 1989 to all candidates seeking certification in diagnostic radiology or radiation oncology.

Content of Written Examination in Each Field
Each examination consists of approximately 450 multiple-choice questions to be administered over a period of approximately 8 hours. About one half of the questions are distributed on the afternoon of one day, and the other half distributed on the morning of the following day.

New written examinations are formulated each year in all categories of radiology, and the content of the examinations is carefully evaluated in order to keep pace with new information and developments. The number of questions in each category may be changed as necessity dictates from year to year.

Beginning in 1984, a candidate who takes the written examination in diagnostic radiology and fails the diagnostic portion but passes physics must repeat the diagnostic portion but will not be required to repeat physics.

Beginning in 1988, a candidate who takes the written examination in radiation oncology and passes two of the three portions, either clinical, physics, or radiation biology, must repeat only the portion that he/she failed. Those candidates who fail the physics and the radiation biology portions of the examination or the clinical oncology portion of the examination must repeat the entire examination.

Beginning in 1987, a candidate who passes the diagnostic portion but fails physics must repeat and pass the physics portion before admission to the oral examination.

Candidates in diagnostic radiology may expect to be asked questions on magnetic resonance imaging in the written and oral examinations.

Oral Examination
Oral examinations are given at a time designated by the Board of Trustees. At the present time, the oral examinations are conducted yearly in May or June.

Admissibility to the oral examination is determined by the executive committee. Experience has shown that to delay taking the oral examination does not benefit the candidate.

No recording device of any kind may be brought to the examination.

A certificate will not be issued until verification has been received from the program director that all requirements have been fulfilled in the training program.

Content of Oral Examination for Diagnostic Radiology
Candidates applying for examination in diagnostic radiology will be examined for a period of 25 minutes each by ten examiners. The categories to be covered are musculoskeletal, cardiopulmonary, gastrointestinal tract, genitourinary tract, neuroradiology, vascular and interventional radiology, nuclear radiology, ultrasound, pediatric radiology, and breast radiology.
Content of Oral Examination for Radiation Oncology
Candidates applying for examination in radiation oncology will be examined for a period of 30 minutes each by eight examiners. The subject matter of this examination concerns the clinical management of malignant disease and is usually presented according to the anatomical site of the primary tumor. The anatomical sites are divided into the following eight categories: gastrointestinal tract; gynecologic malignancies; genitourinary tract; reticuloendothelial system; head, neck, and skin; breast; central nervous system and pediatric malignancies; and lung and mediastinum, soft tissue, and bone.

Reexaminations
Failures
A candidate who fails the oral examination in diagnostic radiology or in radiation oncology may be scheduled for reexamination. The reexamination fee in effect at that time must be submitted.

A candidate who fails to pass the oral examination after three consecutive opportunities must start the examination procedure from the beginning with the submission of a new application and fee in effect at that time, and retake the entire written examination.

Conditions
Candidates in diagnostic radiology who have conditioned one, two, or three categories in the oral examination will be reexamined by two examiners in each conditioned category. Candidates in radiation oncology who have conditioned one or two categories in the oral examination will be reexamined by two examiners in each conditioned category. Candidates must pass the reexamination by both examiners in each category to remove the condition. Candidates conditioning in the oral examination will have three consecutive opportunities to appear for and pass the examination. If after three opportunities the candidate fails to pass the examination, he/she must submit a new application and fee in effect at that time and will be required to repeat the entire oral examination at the next opportunity.

Status of a Physician
The Board will reply to an inquiry concerning the status of a physician with one of the following statements:
1. The physician is Board certified.
2. The physician is in the examination process, that is, has an approved application on file but has not passed the examination.
3. The physician is neither certified nor in the examination process.

Note: No official status of Board qualified or Board eligible is recognized by the Board.

Final Action of the Board
The final action of the Board is based on the applicant's professional record, training, and attainment in the field of diagnostic radiology or in radiation oncology, as well as on the results of his/her examination. This Board has been organized, not to prevent qualified radiologists from obtaining certification, but to assist them in becoming recognized in their communities as men and women competent to practice diagnostic radiology or radiation oncology.

Revocation of Certificates
Certificates issued by this Board are subject to the provisions of Articles of Incorporation and the Bylaws. According to Article IX, Section 4, of the Bylaws, any certificate issued by the Board of Trustees shall be subject to revocation in the event that
1. the issuance of such certificate, or its receipt by the individual so certified, shall have been contrary to, or in violation of, any

(The material that follows is under continual review and revision. All applicants are advised to consult the American Board of Surgery to obtain current information.)

Specialty of Surgery (General Surgery) Defined

The Board interprets the term “general surgery” in a comprehensive but specific manner, as a discipline having a central core of knowledge embracing anatomy, physiology, metabolism, immunology, nutrition, pathology, wound healing, shock and resuscitation, intensive care, and neoplasia, which are common to all surgical specialties.

A general surgeon is one who has acquired specialized knowledge and experience related to the diagnosis and preoperative, operative, and postoperative management, including the management of complications, in nine primary components of surgery, all of which are essential to the education of a broadly based surgeon:

- Vascular system, excluding the intracranial vessels and heart.
- Endocrine system, including thyroid, parathyroid, adrenal, and endocrine pancreas.
- Surgical oncology, including coordinated multimodality management of the cancer patient by screening, surveillance, surgical adjunctive therapy, rehabilitation, and follow-up.
- Comprehensive management of trauma, including musculoskeletal, hand, and head injuries. The responsibility for all phases of care of the injured patient is an essential component of general surgery.
- Complete care of critically ill patients with underlying surgical conditions, in the emergency room, intensive care unit, and trauma/burn units.

Additionally, the general surgeon is expected to have significant preoperative, operative, and postoperative experience in pediatric, plastic, general thoracic, and transplant surgery. Also, the surgeon must have an understanding of the management of the more common problems in cardiac, gynecologic, neurologic, orthopedic, and urologic surgery, and of the administration of anesthetic agents.

The general surgeon must be capable of employing endoscopic techniques, particularly proctosigmoidoscopy, colonoscopy, esophagogastroduodenoscopy, laparoscopy, and operative choledochoscopy, and must have experience in other relevant diagnostic and therapeutic techniques including laryngoscopy, bronchoscopy, and fine needle aspiration. The general surgeon should also have the opportunity to become familiar with evolving diagnostic and therapeutic methods, including the following:

- Investigation and manipulation of the distal common bile duct (including sphincterotomy)
- Stereotactic breast biopsy techniques, including advanced breast biopsy instrumentation (ABBI), core needle biopsy, and mammmotome techniques
- Physiologic testing and evaluation of the gastrointestinal tract
- Diagnostic ultrasonography of the following areas: Head and neck, breast, abdomen, including intraoperative and laparoscopic ultrasound, and endorectal
- Noninvasive diagnostic evaluation of the vascular system and invasive vascular interventional techniques
- Sentinel lymph node mapping and biopsy techniques for breast cancer and melanoma

The Meaning of Certification

The Board considers certification to be based on a process that includes the education and evaluation phases and an examination phase. It holds that undergraduate and graduate education are of the utmost importance and requires the program director’s endorsement and attestation that the applicant has had an appropriate educational experience and has attained a sufficiently high level of knowledge, judgment, and skills to be prepared for designation by the Board's Certificate as a Specialist in Surgery, upon successful completion of the examinations, and to enter into independent practice of the specialty.

Graduate Education in Surgery

I. General Information

The purpose of graduate education in surgery is to provide the opportunity to acquire a broad understanding of human biology as it relates to disorders of a surgical nature and the technical knowledge and skills appropriate to be applied by a specialist in surgery. This goal can best be attained by means of a progressively graded curriculum of study and clinical experience under guidance and supervision of senior surgeons that provides progression through succeeding stages of responsibility for patient care up to the final one of complete management. Major operative experience and
senior/chief responsibility at the final stage of the program are essential components of surgical education. The Board will not accept into the process of certification anyone who has not had such an experience in the specialty of surgery, as previously defined, regardless of the number of years spent in educational programs.

The graduate educational requirements set forth on these pages are considered to be the minimal requirements of the Board and should not be interpreted to be restrictive in nature. The Board recognizes that the time required for the total educational process should be sufficient to provide adequate clinical experience for the development of sound surgical judgment and adequate technical skill. These requirements do not preclude additional desirable educational experience, and program directors are encouraged to retain residents in a program as long as is required to achieve the necessary level of qualifications.

The integration of basic sciences with clinical experience is considered to be superior to formal courses in such subjects. Accordingly, while recognizing the value of formal courses in the study of surgery and the basic sciences at approved graduate schools of medicine, the Board will not accept such courses in lieu of any part of the required clinical years of surgical education.

The Board may at its discretion require that a member of the Board or a designated diplomate observe and report upon the clinical performance of an applicant before establishing admisibility to examination or awarding certification.

While a program may develop its own vacation, illness, and other leave policies for the resident, 1 year of approved residency toward the Board's requirements must be 52 weeks in duration and must include at least 48 weeks of full-time surgical experience. Furthermore, unused vacation and other leave time may not be accumulated to reduce the overall duration of residency expected by the Board.

All phases of the graduate educational process must be completed in a manner satisfactory to the Board.

II. Acceptable Programs

The residency programs in surgery in the United States that are reviewed and approved by the Residency Review Committee for Surgery and the Accreditation Council for Graduate Medical Education (ACGME) are acceptable to the Board as an adequate educational experience.

In Canada, those university residency programs in surgery that are accredited by the Royal College of Physicians and Surgeons of Canada (RCPSBC) offer an acceptable educational experience. Applicants from such programs must meet the Board's specific requirements and cannot receive credit for postgraduate education in countries other than the United States or Canada.

Except as mentioned above, participation in postgraduate surgical programs in countries other than the United States is not creditable toward the Board's educational requirements unless under the specific conditions set forth in the section "Credit for Foreign Graduate Education."

Listings of accredited programs in the United States may be found in the Graduate Medical Education Directory, published annually under the auspices of the ACGME.

Requirements for Certification in Surgery

I. General

A. Must have demonstrated to the satisfaction of the authorities of the graduate educational program in surgery, to their peers, and to the Board that one has attained the level of qualifications in surgery required by the Board.

B. Must have a moral and ethical standing satisfactory to the Board and in conformity with the Statements on Principles of the American College of Surgeons, and its interpretations.

C. Must be actively engaged in the practice of surgery as indicated by holding admitting privileges to a surgical service in an accredited health care organization, or be currently engaged in pursuing additional graduate education in a component of surgery or one of the other recognized surgical specialties.

D. Must hold a permanent, unconditional, unrestricted, and unexpired license to practice allopathic or osteopathic medicine in a state or jurisdiction of the United States or province of Canada. The applicant must inform the Board of any conditions or restrictions in force on any active medical license he or she holds. When there is a restriction or condition in force on any of the applicant's medical licenses, the Credentials Committee of the Board will determine whether the applicant satisfies the licensure requirement of the Board.

II. Educational

A. Undergraduate Medical

1. Must have graduated from an accredited school of allopathic or osteopathic medicine in the United States or Canada.

2. Graduates of schools of medicine from countries other than the United States or Canada must present evidence of Final Certification by the Educational Commission for Foreign Medical Graduates (ECFMG).

B. Graduate Education in Surgery

1. Must have satisfactorily completed a minimum of 5 years of progressive education following graduation from medical school in a program in surgery accredited by the ACGME or the RCPSC.

2. Must have completed all phases of graduate education in surgery in a program in surgery so accredited. Experience obtained in accredited programs in other recognized specialties, although containing some exposure to surgery, is not acceptable. A flexible or transitional first year is not creditable toward the Board's requirements as a PGY1 unless it is accomplished in an institution having an accredited program in surgery and at least 6 months of the year is spent in surgical disciplines.

3. Candidates entering programs on or after July 1, 1995, must have, in a program accredited for a minimum of 5 years, at least 54 months of clinical surgical experience with progressively increasing levels of responsibility. There must be no less than 36 months devoted to the primary components of surgery (general surgery) as previously defined. The entire chief resident experience must be devoted to the primary components of the specialty of surgery. No more than 4 months of the chief residency may be devoted to any one of the primary components of surgery. During junior years, a total of 6 months may be assigned to nonclinical or nonsurgical disciplines that are clearly supportive of the needs of the individual resident and appropriate to the overall goals of the general surgical training program. Experience in surgical pathology and endoscopy is considered to be clinical surgery, but obstetrics and ophthalmology are not. No more than a total of 12 months during junior years may be allocated to any one surgical specialty other than general surgery.

4. Must have 12 months in the capacity of chief resident in general surgery. The Board considers the terms chief resident and senior resident to be synonymous and to mean the 12 months in the program in which the resident assumes the ultimate clinical responsibilities for patient care under the supervision of the teaching staff. The majority of the 12 months of chief residency must be served in the final year. However, to take advantage of a unique educational opportunity in a program during a resident's final year, a portion of the chief residency may be served in the next to
the last year, provided it is no earlier than the fourth clinical year and has been approved by the Residency Review Committee (RRC) for Surgery followed by notification to the Board. The chief residency must be spent only in the parent or an integrated institution unless rotation to an affiliated institution has been approved by the Residency Review Committee for Surgery.

5. The Board expects a residency year to include no less than 48 weeks of full-time surgical experience. In order to provide programs with flexibility, the Board will accept as creditable a total of 144 weeks of experience during the first 3 clinical years and a total of 96 weeks during the last 2 clinical years.

6. All phases of the graduate educational process must be in accordance with the Program Requirements for Residency Education in General Surgery as promulgated by the ACGME and approved by the RRC for Surgery.

7. The Board believes that for optimal surgical education the resident should spend at least the final 2 residency years in the same program.

III. Operative Experience
Applicants for examination must meet the criteria established by the RRC, i.e., a minimum of 500 procedures in 5 years and a minimum of 150 procedures in the chief/senior year. This must include operative experience in each of the areas of primary responsibility in the “Surgery” category (General Surgery) defined set forth above.

Each applicant must submit a tabulation of the operative procedures performed as surgeon and those performed as first assistant or teaching assistant. The Board provides an Operative Experience form for this purpose when application material is obtained by the applicant. The Resident’s Record form, available to program directors for residents’ use through the RRC for Surgery, may be submitted in lieu of the Board’s Operative Experience form.

In tabulating cases toward Board requirements, credit may be claimed “As Surgeon” when the resident has actively participated in the patient’s care; has made or confirmed the diagnosis; has participated in the selection of the appropriate operative procedure; has either performed or been responsible for performing the critical portions of the operative procedure; and has been a responsible participant in both pre- and postoperative care.

When previous personal operative experience justifies a teaching role, residents may act as teaching assistants and list such cases for the fourth and fifth year only. You may claim credit as a teaching assistant when you have actually been present and scrubbed and acted as an assistant to guide a junior resident through the procedure. All this must be accomplished under the supervision of the responsible member of the senior staff. An individual cannot claim credit as both responsible surgeon and teaching assistant.

Applicants must also list the number of patients with multiple organ trauma for whom operation was not required and the number of patients with critical surgical problems for whom they had primary responsibility. Failure to submit a complete and properly authenticated list of operative procedures will constitute an incomplete application.

Applicants are advised to keep a copy of the lists of operative work they submit, for their records, as the Board cannot furnish copies.

IV. Special Information for Program Directors
A. Program directors are cautioned that appointment of residents at advanced levels, without being certain that their previous training is in accordance with the Board’s requirements, may result in the affected residents not being accepted by the Board upon completion of the program. In any case in which there is question, program directors should make inquiry of the Board prior to taking action.

B. According to the Program Requirements for Residency Education in General Surgery promulgated by the ACGME, special approval of the RRC for Surgery must be obtained (1) if a chief resident is assigned to an institution other than the parent one or an “integrated” one; (2) if rotations to any one approved “affiliates” exceed 6 months; (3) if more than 1 year of the total program is spent away from the parent and integrated institutions; or (4) if more than 6 months’ total is spent in any assignment outside the parent, the integrated, or approved affiliated institutions. The Board concurs in this and deviations from these stipulations will be considered unacceptable training.

C. Since the RRC does not act upon the adequacy of postgraduate surgical education outside the United States, program directors must request the Board’s approval, in advance, if they wish periods of training abroad to be creditable toward the Board’s requirements. The Board will rule on individual requests.

Credit for Military Service
Credit will not be granted toward the minimum requirements of the Board for service in the Armed Forces, the Public Health Service, the National Institutes of Health, or other governmental agencies unless the service was as a duly appointed resident in an accredited program in surgery.

Credit for Foreign Graduate Education
Acceptance for examination and certification by the American Board of Surgery is based upon satisfactory completion of the stated requirements in accredited residency programs in surgery in the United States. Regardless of an individual’s professional attainments here or abroad, no credit will be granted directly to an applicant for surgical education in a foreign country. The Board will consider granting partial credit only upon the request of the program director of an accredited program who has observed the applicant as a junior resident for 9 to 12 months and wishes to advance the applicant to a higher level in that program. The credit granted will not be valid until the applicant has successfully completed that program. If the applicant moves to another program the credit is not transferable and must again be requested by the new program director.

Applicants from accredited Canadian programs must have completed all of the requirements of the Canadian program or in combination with an accredited US program. No credit for postgraduate surgical education outside the US and Canada will be granted to those applicants seeking certification who completed a Canadian program. Applicants from Canadian programs must complete the Board’s stipulated requirements.

Requirements Governing Admissibility to Examinations for Certification in Surgery
1. An applicant is admissible to the examinations only when all of the preliminary and graduate educational requirements of the Board, currently in force at the time of receipt of the formal application, have been satisfactorily fulfilled; the operative experience has been reviewed and deemed acceptable; the general credentials are in order; the program director has certified to the Board in writing that the applicant has attained the required clinical skills; and the formal application has been reviewed and approved. The applicant then must successfully complete the Qualifying Examination before becoming admissible to the Certifying Examination.

2. Applicants will be offered five opportunities to take the Qualifying Examination within the 5-year period following approval of
the formal application, at centers designated by the Board in acco-

American Board of Surgery

the Board's geographical examination schedule.

Candidates will be offered three and only three opportunities to appear for examination during the 5 academic years after completion of the Qualifying Examination. The admissibility expiration date shall be established as June 30 of the fifth calendar year after passing the Qualifying Examination. An opportunity offered that is refused or not taken will be counted as one of the three available. Failure to respond in writing to the examination reply card is considered an opportunity offered that is not taken and will therefore be counted as one of the three opportunities.

After three opportunities (i.e., failure at Certifying Examinations and/or opportunities refused—including failure to appear for a scheduled examination), a candidate will no longer be ad-

missible to examination, regardless of the original expiration date for admissibility. Satisfactory completion of an additional year of education in general surgery in an accredited program that has agreed to structure the additional year according to the Board's guidelines, with a favorable endorsement from the Board from the program director, will be required in order to be consid-

ered for readmission to examination. This year must be approved in advance by the Board.

If the Board approves the candidate's application for readmis-
sion to the Certifying Examination upon completion of the specified additional year of education in general surgery, the candidate will then be offered three further opportunities within the ensuing 5 years. If not successful within that time, the can-

didate cannot again be considered until completion of a minimum of 5 years of residency in general surgery, including a chief year, in an accredited program and favorable endorsement to the Board by the program director. The candidate must then reapply as a new applicant. This necessitates submission of a Reappli-
cation for Admission to Examination and all supporting documents, payment of the established fees, and successful completion again of the Qualifying Examination before advancing to the states of "Candidate for Certification."

4. Those who, 10 years after approval of their original application or reapplication, have not become certified and from whom there has been no written communication will no longer be considered active applicants. If they wish to reapply later they will be consi-

dered "New Applicants" and must fulfill the requirements then in place.

5. The Board, on the basis of its judgment, may deny or grant an "applicant" or "candidate for certification" the privilege of

examination whenever the facts in the case are deemed by the Board to so warrant.

The Board does not use or sanction the terms "Board eligible" or "Board qualified." The standing of an individual with the Board varies according to the current status of credentials and will be so reported.

Certification in Surgical Subspecialties

The Board has been authorized by the American Board of Medical Specialties to award Certification in certain disciplines related to the overall specialty of surgery to those diplomates of this Board who meet the defined requirements. These disciplines include gen-

eral vascular surgery, pediatric surgery, surgery of the hand, and surgical critical care.

The Board considers all of the above disciplines to be an integral part of the specialty of surgery and expects that all surgeons certi-

fied in surgery by this Board may practice in these areas if they so desire and demonstrate the capability, even though they may not have obtained additional certification. Subspecialty certification is designed to recognize those diplomates who have advanced education, experience, and other activities beyond that of the well-trained general surgeon.

Those seeking the American Board of Surgery's Subspecialty Cer-

tification must have a currently valid Certificate in Surgery issued by the Board; must have completed the required additional educa-

tion in the discipline beyond that required for General Certifica-

tion; must demonstrate operative experience and/or patient care data acceptable to the Board; must show evidence of dedication to the discipline by the means specified by the Board; and must re-

cieve favorable endorsement by the director of the residency pro-

gram in the particular discipline. Finally, successful completion of the prescribed examinations is required.

Those who are interested in obtaining information regarding Cer-
tification in general vascular surgery, pediatric surgery, surgery of the hand, or surgical critical care may obtain it from the Board upon request.

Examinations Offered by the Board

The Board offers examinations leading to certification in surgery, general vascular surgery, pediatric surgery, surgery of the hand, and surgical critical care; also, in-training examinations in general surgery and in pediatric surgery.

The examinations for certification are offered to individuals, but the in-training examinations are offered to program directors for their use as an educational assessment of the individual resident's gras of surgical fundamentals.

The Board notifies candidates for general and subspecialty certi-

fication of their performance on examinations. The Board also re-
eports examinee performance to the director of the program in which the candidate completed the final year of residency. All re-

ports pertaining to in-training examinations are provided only to program directors.

All examinations are developed by directors of the American Board of Surgery with contributions by examination consultants.

I. Examinations for Certification in Surgery

A. The Qualifying Examination

This examination is written and is offered once a year in the fall. It is given simultaneously in a number of locations in the United States.

Applicants whose applications have been approved by the Board are sent annually, throughout their period of admissibility, an an-

nouncement of the examination. With the announcement is a reply card that must be returned to the Board with other specified
material if the applicant wishes to be scheduled for this examination. Shortly before the date of an examination an admission card is sent to the applicant indicating the specific location of the examination center and reporting times, with a pamphlet describing the examination and the types of questions to be expected.

The 1-day Qualifying Examination consists of multiple-choice questions designed to evaluate knowledge of general surgical principles and the basic sciences applicable to surgery.

Successful completion of the Qualifying Examination is a requirement for all, to attain the status of "Candidate for Certification" and admission to the Certifying Examination.

Those unsuccessful on the Qualifying Examination may review the examination at the Board office if such a request is made and the review is completed within 90 days after examination results are mailed. The review requires an appointment and payment of a fee.

B. The Certifying Examination

Examinations are held six times a year within the continental United States. Candidates for Certification will receive an announcement of the examination to which they may be assigned, based on their geographic location, approximately 2 months prior to the examination session, with a reply card that must be returned at once if a candidate wishes to be included in that examination. Failure to return or late return of a card will result in that examination being counted as one of the three opportunities to be offered. If the Board cannot accommodate a candidate at that particular examination it will not be counted as an opportunity. A candidate assigned to an examination will be sent an Admission Card indicating the specific time and place to report for examination.

The examinations are conducted by members of the American Board of Surgery and selected associate examiners who are diplomates of the Board and usually from the local geographic area.

The examinations consist of three oral sessions conducted by teams of two examiners, directed toward determining the candidate's understanding of clinical entities, level of surgical judgment, problem-solving ability, and sensitivity to moral and ethical issues. During all sessions the ability to apply knowledge of anatomy, physiology, pathology, biochemistry, and bacteriology to clinical problems is also evaluated.

II. Examinations for Subspecialty Certification

The Board offers examinations for subspecialty certification in general vascular surgery, pediatric surgery, surgery of the hand, and surgical critical care. These examinations are described in separate pamphlets pertaining to the respective disciplines, which may be obtained from the Board office upon request.

III. In-Training Examinations

The Board offers annually to directors of accredited residency programs in surgery and in pediatric surgery written in-training examinations that are designed to measure the general level of knowledge attained by residents regarding the fundamentals of the basic sciences and management of clinical problems related to surgery and to pediatric surgery. The In-Training Examination in Surgery is constructed to evaluate the knowledge of the resident who has completed 2 years of graduate education in surgery, but, at the program director's discretion, may be administered to anyone. It is also designed to meet the first milestone required by the Essentials for residencies in general surgery. Directors of accredited programs in pediatric surgery should find the Pediatric Surgery In-Training Examination useful in the evaluation of all residents in their programs.

The Board will normally furnish pertinent information to the directors of all accredited programs in surgery and in pediatric surgery several months in advance of each year's examination andascertain the number of test booklets desired. The examinations, administered by the participating program directors, take place each winter.

Program directors should take note of the fact that the Board does not contact each integrated or affiliated institution in which residents are located but depends upon the director of the program to order an adequate number of test booklets for all residents in the total program, which includes not only the parent institution but also all those included under the program designation in the Graduate Medical Education Directory.

It is important to note that the In-Training Examinations are not offered to individuals, but only to program directors. The In-Training Examinations are not required by the Board as part of the certification process.

The In-Training Examinations are prepared by the Board as an evaluation instrument for program directors, to be used as an assessment of residents' progress and not as a pool of questions for study or other purposes. Duplication and improper use of the examination material defeats the purpose of the examinations and will not be tolerated by the Board. The examinations are protected by copyright.

Application for Examination for Certification in Surgery

In the early spring the Board will mail a Booklet of Information and a Preliminary Evaluation Form to all residents who, according to the Board's records, will be expected to complete their residency that summer in surgery programs accredited by the ACGME. This form must be completed precisely and be received in the Board office no later than May 1. Applicants should not submit documents, testimonials, letters of recommendation, case reports, or other information unless requested to do so by the Board.

If, after review of the information submitted on the Preliminary Evaluation Form, it is determined by the Board that applicants have met or will meet the educational requirements for admission to examination in the past or current year, a formal Application for Admission to Examination will be sent to the applicant.

The Application for Admission to Examination must be completed and returned to be received in the Board Office by no later than July 15. An application is not considered to be complete unless the form is accompanied by all required documents including an identification form with a photograph attached, a completed American Board of Surgery Operative Experience Form or a copy of the Resident's Record, and a check for $200.

If the completed application is received between July 15 and August 15, a late fee will be charged. No applications will be accepted after August 15.

Applicants who complete the educational requirements after September 30 will not be considered for admission to the Qualifying Examination in that year but must wait until the following year.

The acceptability of an applicant does not depend solely upon the completion of an approved program of education but also upon information available to the Board regarding professional maturity, surgical judgment, technical capabilities, and ethical standing.

Applicants who have submitted an Application for Examination form will be notified regarding admissibility to examination.

Fees

Registration (Prior to July 15)
(payable with application form and nonrefundable) US $200
Registration (Late—July 15 to August 15)
(payable with application form and nonrefundable) US $450
Qualifying Examination (payable with Reply Card) US $400
Certifying Examination (payable with Reply Card) US $600
Fees for reexamination are the same as shown above for each examination.
Each fee for examination or reexamination includes a US $200 processing charge, which is not refunded if an individual withdraws after being scheduled for an examination.
To withdraw, one must notify the Board Office at least 15 business days before a scheduled examination. Failure to appear for examination, or withdrawal without giving at least 15 business days' notice, will result in forfeiture of the entire fee for examination.
Fees are subject to change as directed by the Board.
The Board is a nonprofit organization. The directors of the Board, except those on the executive staff, serve without remuneration.

Issuance of Certificates
A candidate who has met all requirements and has successfully completed the examinations of the American Board of Surgery in one or another of the areas of certification will then be issued a certificate by this Board, signed by its officers, attesting to qualifications in that area.
The Board issues certificates in surgery, general vascular surgery, pediatric surgery, surgery of the hand, and surgical critical care.
Those certified in surgery prior to December 31, 1975, were issued a certificate with no indication of time-limited validity. All certificates issued on or after January 1, 1976, bear a limiting date of 10 years, after which they are no longer valid.
Those whose certificates have expired and who have not achieved recertification will no longer be listed in the ABMS Directory of Board-Certified Medical Specialists as diplomates in the discipline concerned.

Recertification
The American Board of Surgery offers recertification in surgery to its diplomates and in all the disciplines in which it offers subspecialty certification. The Board considers recertification to be voluntary in the same connotation as is original certification.
The purpose of recertification is to demonstrate to the profession and the public, through periodic evaluations, that the surgical specialist has maintained continuing qualifications on a currently acceptable level in the diplomate's chosen area of practice. The American Board of Surgery believes that such periodic evaluation of its diplomates is in their own interest as well as in the public interest.
A diplomate can initiate the recertification process when certification has been held at least 7 years. Pamphlets outlining requirements for recertification in the various disciplines may be obtained from the Board upon request. To facilitate receiving the Board's mailings pertaining to the recertification process, it is important for all diplomates to notify the Board promptly whenever their addresses change.

Recertification in Surgical Subspecialties
Subspecialty recertification is offered to diplomates holding certificates in general vascular surgery, pediatric surgery, surgery of the hand, and surgical critical care.
Details concerning requirements for recertification in the disciplines mentioned above are similar to those for recertification in surgery, and pertinent pamphlets may be obtained from the Board upon request.

Inquiry as to Status
The Board considers an individual's record not to be in the public domain. When a written inquiry is received by the Board regarding an individual's status, a general but factual statement is provided that indicates the person's location within the examination process.

Special Situations
Irregularities
The furnishing of false information to the Board or examination irregularities may result in the rejection of an application, the barring of an applicant from examination, the denial or revocation of a certificate, or other appropriate sanctions, as set forth more fully in the Application For Admission to Examination and Instructions to Examinees.
Substance Abuse
Applicants with a history of substance abuse will not be admitted to any examination unless they present evidence satisfactory to the Board that they have successfully completed the program of treatment prescribed for their condition. Further, the Board must be satisfied that they are currently free of substance abuse.
Disabilities
The American Board of Surgery complies with the Americans with Disabilities Act by making a reasonable effort to provide Board applicants who have documented disabilities with modifications in its examination process that are appropriate for such disabilities but that do not alter the measurement of the skills or knowledge that the examination process is intended to test. Any disability that an applicant believes requires such a modification in the Board's examination must be identified and documented by the applicant within 60 days after the applicant is notified of admissibility to examination or within 60 days after the applicant learns of such disability, whichever is later.

Reconsideration and Appeals
The Board has adopted a policy with regard to reconsideration and appeals of decisions adverse to applicants regarding their individual credentials and admissibility to the examinations and questions regarding the form, administration, and results of examinations. A copy of that policy is available from the Board office to anyone considering a request for reconsideration or an appeal. A request for reconsideration, which is the first step, must be made in writing to the Board office within 90 days of receipt of notice from the Board of the action in question.

Revocation of Certificate
Any certificate issued by the American Board of Surgery, Inc., shall be subject to revocation at any time that the directors shall determine, in their sole judgment, that a candidate who has received the certificate falsified any part of the application or the required documentation, or was in some other respect not properly qualified to receive it.

(The criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Thoracic Surgery [ABTS] to ascertain whether the information below is current.)

General Requirements
Certification by the ABTS may be achieved by fulfilling the following requirements:
1. Certification by the American Board of Surgery (for information, the applicant should see the current Booklet of Information available from the American Board of Surgery, 1617 John F Kennedy Blvd, Philadelphia, PA 19103).
2. Completion of a thoracic surgical residency accredited by the Residency Review Committee (RRC) for Thoracic Surgery that provides adequate education and operative experience in cardiovascular and general thoracic surgery.
3. An ethical standing in the profession and a moral status in the community that are acceptable to the Board.
4. A satisfactory performance on the ABTS examinations.
5. A currently registered full and unrestricted license to practice medicine granted by a state or other United States jurisdiction. The license must be valid at the time of application for admission to examination. A temporary limited license such as an educational, institutional, or house staff permit is not acceptable to the Board.

Residency Requirements
Candidates must have fulfilled all of the residency requirements of the Board in effect at the time their applications are received.
Candidates for certification must complete a minimum of 24 months of residency training in thoracic and cardiovascular surgery in a program accredited by the RRC for Thoracic Surgery. This must include 12 months of senior responsibility. The director of the thoracic training program is required to approve the application form by signature, certifying that the candidate has satisfactorily completed the residency in thoracic surgery as described above. Once an application is received, it is considered the official and only record. The Board assumes that the appropriate signatures authenticate the accuracy of the case lists and all other information submitted on the application.

Education and adequate operative experience in both general thoracic surgery and cardiovascular surgery are essential parts of any approved thoracic surgery residency program, irrespective of the area of thoracic surgery in which a candidate may choose to practice.

Operative Case Criteria
The operative experience requirement of the ABTS has two parts. One is concerned with the intensity or volume of cases, and the other with the distribution of cases (index cases).

1. Surgical Volume (Intensity)
The Board's operative experience requirements include an annual average of 125 major operations performed by each resident for each year that the program is approved by the RRC for Thoracic Surgery. In a 2-year program, this requirement is met if a resident performs a total of 250 major cases over the course of his/her residency; in a 3-year program, the resident must perform 375 major cases.

This guideline on intensity of cases conforms to the Program Requirements for Residency Education in Thoracic Surgery as published by the Accreditation Council for Graduate Medical Education (ACGME) and the RRC for Thoracic Surgery.

The application of any candidate whose supervised operative experience fails to meet the requirement of an annual average of 125 major operations with a minimal number of 100 in any 1 year will be referred to the Credentials Committee for review.

2. Index Cases (Distribution)
Index cases are full-credit cases only, unless specified as first assistant. The applications of candidates whose operative experience does not include the required number of index cases as listed below will be sent to the Credentials Committee for review. The number of index cases required to meet the minimal acceptable standards in the various areas, for those in residencies as of July 2000, are:

- Lungs, pleura, chest wall — 50
- Pneumonectomy, lobectomy, segmentectomy — 30
- Other — 20
- Esophagus, mediastinum, diaphragm — 15
- Esophageal operations — 8
- (resections — 4; other esophageal — 4)
- Other — 7
- Congenital heart — 20
- Full credit — 10
- First assistant — 20
- Adult cardiac — 190
- Acquired valvular heart — 20
- Myocardial revascularization — 60
- Reoperations — 5
- Other — 15
- Pacemaker implantation/closed EP — 10
- Bronchoscopy and esophagoscopy — 30
- (must include at least 10 esophagoscopy)
- VATS — 10

Endoscopic procedures may be counted for credit whether they are performed as independent procedures or immediately preceding a thoracic operation.)
Major vascular operations outside the thorax should be listed.

The Board recognizes that supervised operative experience in a well-organized teaching setting that is approved by the RRC for Thoracic Surgery protects the patient, who, in most instances, is the personal and identifiable responsibility of a faculty surgeon. This supervised experience optimally prepares the candidate to begin the independent practice of cardiothoracic surgery after the completion of residency.

The Credentials Committee has been authorized by the Board to reject a candidate if his/her operative experience during the thoracic surgery residency is considered to be inadequate. The candidate, the program director, and the RRC for Thoracic Surgery will be notified if such action is taken. If the Credentials Committee finds the applicant's operative experience inadequate and additional training is required, the additional training must be approved in advance. Should the program director determine that a resident needs additional training beyond the number of years that have been approved by the ACGME and the RRC for Thoracic Surgery, before submitting an application, this additional training must also be approved by the Board in advance.

Even though emphasis on one or another facet of thoracic surgery (pulmonary, cardiovascular, esophageal, thoracic trauma, etc) may have characterized a candidate's residency experience, the candidate is nevertheless held accountable for knowledge concerning all phases of the field, including extracorporeal perfusion (physiological concepts, techniques, and complications), cardiac devices, management of dysrhythmias, and thoracic oncology. In addition, a candidate should have had responsibility for the care of pediatric general thoracic surgical patients and be competent in video-assisted thoracoscopic surgery. The candidate should also have an in-depth knowledge of the management of acutely ill patients in the intensive care unit. This requires an understanding of cardiorespiratory physiology, respirators, blood gases, metabolic alterations, cardiac output, hyperalimentation, and many other areas. By virtue of his/her residency in thoracic surgery, the candidate is expected to be fully qualified in the surgical care of critically ill patients.

Operative Experience Credit

Credit will be allowed for supervised operative experience in a well-organized teaching setting only when the following criteria are met:
1. The resident participated in the diagnosis, preoperative planning, surgical indications, and selection of the appropriate operation.
2. The resident performed under appropriate supervision in a well-organized teaching setting approved by the RRC for Thoracic Surgery those technical manipulations that constituted the essential parts of the procedure itself.
3. The resident was substantially involved in postoperative care.

Supervision and active participation by thoracic surgery faculty are required in preoperative, intraoperative, and postoperative care.

The Board also emphasizes that first-assisting at operations is an important part of resident experience, particularly in complex or relatively uncommon cases.

Applications

Before applying for examination, prospective candidates should consider whether they are able to meet the minimum requirements of the Board, which include certification by the American Board of Surgery. They should then submit a letter to the office of the secretary of the Board, briefly outlining their thoracic surgery residency experience and requesting an application.

An application will be sent to candidates who have completed residency programs that have been approved by the RRC for Thoracic Surgery. Each applicant should consult with his/her program director regarding the correct way to complete the operative case list forms.

The deadline for submitting the completed application is August 1. Failure to meet that deadline will result in a delay of at least 1 year.

The ABPTS takes particular note of the problems facing those with disabilities and stands ready to alter its examination procedures in such a way that individuals who are competent to practice thoracic surgery have the opportunity to take the Board's examination under circumstances that accommodate the individual's disability. Individuals requiring special consideration because of a disability should notify the Board at least 60 days before the August 1 deadline for submitting an application.

Candidates are notified of their eligibility for examination when their applications have been approved.

Examinations

It is the policy of the ABPTS to consider a candidate for examination only after he/she has completed a thoracic surgery residency program approved by the RRC for Thoracic Surgery.

Separate written and oral examinations are held annually at times and places determined by the Board. Information regarding the dates and places of the examinations is published in the Examination and Licensure column of the Journal of the American Medical Association, the Journal of Thoracic and Cardiovascular Surgery, and the Annals of Thoracic Surgery.

Part I—Written Examination

The examination consists of a written examination designed primarily to assess cognitive skills.

Part II—Oral Examination

Successful completion of the Part I (written) examination is a requirement for admission to the Part II (oral) examination. The oral examination is designed to test the candidate's knowledge, judgment, and ability to correlate information in the management of clinical problems in general thoracic and cardiovascular surgery.

Examination Sequence

Candidates should apply for the examination within 5 years of the satisfactory completion of their thoracic surgery residency. Any candidates applying for the examination 5 years or more after the satisfactory completion of residency will be considered individually, and recommendations for additional training will be made before they will be eligible to apply for examination.

After a candidate is declared eligible for the written examination (Part I), he/she must pass Part I within 4 years. The candidate who successfully completes Part I of the examination then must pass Part II within the succeeding 4 years.

Candidates who fail an examination (Part I or Part II) are eligible to repeat the examination the following year.

Candidates who fail either Part I or Part II of the examination three times, or do not pass either part of the examination within the allotted time period of 4 years, will be required to complete an additional thoracic surgical educational program, which must be approved in advance by the Board, before they will be permitted to retake the examination. Candidates who complete the required additional training must file an addendum to their application, have their eligibility for examination reviewed by the Credentials Committee, and pay a new registration fee. They will be given two more opportunities to take the examination (Part I or Part II) within the succeeding 3 years.
Candidates who fail either Part I or Part II a fifth time will be required to complete another approved thoracic surgery residency before they will be eligible to reapply for examination by the Board.

**Fees**

- Registration fee (not refundable): $425
- Part I examination fee: $1,000
- Part I reexamination fee: $1,000
- Part II examination fee: $1,075
- Part II reexamination fee: $1,075

Candidates who do not appear for their scheduled examination (Part I or Part II) or who cancel less than 6 weeks prior to either examination may forfeit their examination fee.

The Board is a nonprofit corporation, and the fees from candidates are used solely to defray actual expenses incurred in conducting examinations and carrying out the business of the Board. The directors of the Board serve without remuneration.

**Appeals**

Individuals who receive an unfavorable ruling from a committee of the Board may appeal such determination by mailing a notice of appeal to the office of the ABTS within 30 days of the date such ruling was mailed. A copy of the appeals procedure will be mailed to the candidate.

The only appeal permitted if an applicant fails the written examination is a request for a hand resoring to verify the accuracy of the score as reported. This request must be made within 30 days of the time the examination results are received by the candidate.

The only appeal with respect to the oral examination is the opportunity to request immediate reexamination following the completion of the oral examination. A candidate who believes that any of his/her examiners has been unfair or biased during a portion of the oral examination may request reexamination by another examiner. The grade on reexamination will be the final grade of the candidate for that portion of the examination.

**Chemical Dependency**

Qualified applicants who have a history of chemical dependency that has been reported to the Board and who submit documentation suitable to the Board that their dependency has been under control for a period of at least 2 years will be admitted to the examination process.

For candidates who are already in the examination process and develop a chemical dependency as reported to the Board, the process will be suspended until the candidate can provide documentation suitable to the Board that the condition has been under control for a period of 2 years. At that time, the candidate will be readmitted to the examination process. The requirement to be accepted for examination within 5 years of completion of an approved thoracic surgery residency will not be waived.

**Certification**

After a candidate has met the requirements for eligibility and passed the examination, a certificate attesting to the candidate’s qualifications in thoracic surgery will be issued by the Board. The certificate is valid for 10 years.

**Recertification**

Applicants who are certified in thoracic surgery are issued certificates that are valid for 10 years from the date of certification, after which the certificates will no longer be valid. Certificates can be renewed before expiration by fulfilling the requirements for recertification specified by the ABTS at that time. A Recertification Booklet is available upon request.

---

**Denial or Revocation of Certificate**

No certificate shall be issued or a certificate may be revoked by the Board if it determines that:

a. the candidate for certification or diplomate did not possess the required qualifications and requirements for examination, whether such deficiency was known to the Board or any committee thereof before examination or at the time of issuance of the certificate, as the case may be;

b. the candidate for certification or diplomate withheld information in his/her application or made a material misstatement or any other misrepresentation to the Board or any committee thereof, whether intentional or unintentional;

c. the candidate for certification or diplomate was convicted by a court of competent jurisdiction of any felony or misdemeanor involving moral turpitude and, in the opinion of the Board, having a material relationship to the practice of medicine;

d. the candidate for certification or diplomate had his/her license to practice medicine revoked or was dislicensed or censured by any court or other body having proper jurisdiction and authority because of any act or omission arising from the practice of medicine;

e. the candidate for certification or diplomate had a history of chemical dependency or developed such during the certification process and failed to report same to the Board.
American Board of Urology

Stuart S Howards, MD, Executive Secretary
2216 Ivy RdSuite 210
Charlottesville, VA 22903
804-973-0059
804-978-0266 Fax

Michael E Mitchell, MD, Seattle, Washington
Martin J Resnick, MD, Cleveland, Ohio
Thomas J Rohner, Jr, MD, Hershey, Pennsylvania
Paul F Schellhammer, MD, Norfolk, Virginia
Joseph A Smith, MD, Nashville, Tennessee
Robert M Weiss, MD, New Haven, Connecticut

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Urology to ascertain whether the information they have is current.)

Purpose

The American Board of Urology, Inc., hereinafter sometimes referred to as “the Board,” is organized to encourage study, improve standards, and promote competency in the practice of urology. The objective of the Board is to identify for the public’s knowledge those physicians who have satisfied the Board’s criteria for certification and recertification in the specialty of urology. Certification by the Board does not guarantee competence in practice but does indicate that the physician has completed basic training requirements and has demonstrated at the time of examination a fund of knowledge and expertise in the care of those patients whose cases were reviewed by the Board, as described elsewhere in this booklet.

Functions of the Board

The Board arranges and conducts examinations testing the qualifications of voluntary candidates, and it grants and issues certificates to accepted candidates duly licensed to practice medicine. The Board holds the power to revoke such a certificate.

The Board endeavors to serve the public, hospitals, medical schools, medical societies, and practitioners of medicine by preparing a list of urologists whom it has certified. Lists of diplomates of this Board are published annually in The Official ABMS Directory of Board Certified Medical Specialists and in the Directory of Physicians in the United States, published by the American Medical Association (AMA).

The Board is not responsible for opinions expressed concerning an individual’s credentials for the examinations or status in the certification process unless they are expressed in writing and signed by the president or executive secretary of the Board.

Associations of the Board

The nominating societies of this Board and sponsors of its activities are the American Urological Association, the American Association of Genito-Urinary Surgeons, the American Association of Clinical Urologists, the Society of University Urologists, the American College of Surgeons, and the Section on Urology of the American Academy of Pediatrics.

The American Board of Urology and 23 other medical specialty boards are members of the American Board of Medical Specialties (ABMS), which includes as associate members the Association of American Medical Colleges, the American Hospital Association, the AMA, the Federation of State Medical Boards of the United States, the National Board of Medical Examiners, and the Council of Medical Specialty Societies.

Limitations of Functions of the Board

Application for certification is entirely voluntary.

Only one certificate for each qualified individual is issued by the Board.

The Board makes no attempt to control the practice of urology by license or legal regulation and in no way interferes with or limits the professional activities of any duly licensed physician.

Requirements

An applicant may initiate application for certification by the Board during the final year of his or her residency training or at some point thereafter. For details of the certification process see "The Certification Process." Every applicant, however, must meet certain basic requirements, as follows:

A. Prerequisites

1. Education and residency: Except as noted in the requirements for international medical graduates, the applicant must be a graduate of a medical school approved by the Liaison Committee on Medical Education or a school of osteopathy approved by the Bureau of Professional Education of the American Osteopathic Association and have completed a urology residency program accredited by the Accreditation Council for Graduate Medical Education (ACGME) or Royal College of Physicians and Surgeons of Canada (RCPC). The ACGME training programs in urology are described in the AAM's Graduate Medical Education Directory, Section II, The Essentials of Accredited Residents in Graduate Medical Education.

2. Postgraduate training requirements: The American Board of Urology mandates a minimum of 5 clinical years of postgraduate medical training. The pre-urology requirements are 12 months of general surgery and 12 months of general surgery and/or urology, including a minimum of 6 months of general surgery/urology. Suggested guidelines for the remaining 6 months of the second 12 months are zero to 6 months of abdominal endocrine, plastic, pediatric, urologic, and vascular surgery; zero to 2 months of ICU/critical care, transplanta, ER/truma, gynecology (not obstetric), or nephrology; and zero to 1 month of GI/invasive radiology, anesthesia, or genito-urinary pathology. The remaining 36-48 months must be spent in clinical urology, except that dedicated research rotations are permitted in and only in 6-year programs. Scholarly endeavors are permitted during primary clinical rotations within a 5-year program (2-3 or 1-4).

All the above training must be in ACGME-approved programs. Regardless of the training format provided, the final 12 months of training must be spent as a chief resident in urology. The chief residency should be part of a planned program curriculum as outlined in a preapproved rotation provided to the Board. A minimum of 12 months must be served as a chief resident in urology with appropriate clinical responsibility under supervision in institutions that are part of the ACGME-approved program.

For a program requiring more than 36 months of urology training, the candidate must complete the program as defined by the Residency Review Committee for Urology. Variances shall not be granted for an individual to take urology training out of sequence after the completion of his or her urology residency.
Preurology credit will be given only to an individual who has trained in AC_2014ME-approved or RCPS_2014SC-approved training programs. Lesser degrees of training shall not receive such approval. Any resident who intends to transfer to another urology residency program during the urologic portion of the training must obtain the approval of the Board prior to the change. The resident must petition the Board in advance for said approval. The Board also requires the written acknowledgment and approval of both program directors.

In regard to leaves of absence for parental leave, illness, injury, disability, alcohol or substance abuse, and vacation during residency training in urology, no more than 10% of the time allocated to the clinical training portion of the residency program can be omitted.

To be admissible to the certification process of the Board, the resident must have completed in a satisfactory manner the training requirements for his or her specific program in effect at the time of acceptance in the program, as established by the Residency Review Committee for Urology or the Accreditation Committee of the RCPS.

3. Requirements for Canadian trainees: To meet the requirements for admissibility to the certification process of the Board, a Canadian-trained urologist must have graduated from a US or Canadian medical school approved by the Liaison Committee for Medical Education and have completed the previously described preurology and urology requirements, with the final year as chief resident, in programs approved by the AC_2014ME or the Accreditation Committee of the RCPS. Upon successful completion of this training, the candidate may sit for the Qualifying (Part 1) Examination of the American Board of Urology. To be admissible to the Certifying (Part 2) Examination, the Canadian-trained candidate must be certified by the RCPS.

4. Requirements for international medical graduates: International medical graduates from schools outside the United States providing an equivalent medical background who have completed an AC_2014ME-approved urology residency and the prerequisite AC_2014ME-approved preurology training in the United States may qualify for examination by the American Board of Urology. All such applicants must have a valid certificate from the Education Committee for Foreign Medical Graduates.

5. Licensure requirements: Applicants seeking certification by the American Board of Urology must also have a valid medical license that is not subject to any restrictions, conditions, or limitations. The applicant must inform the Board of any conditions or restrictions in force on any active medical license he or she holds. When there is a restriction or condition in force on any of the applicant's medical licenses, the Credentials Committee of the American Board of Urology will determine whether the applicant satisfies the licensure requirement of the Board.

6. Clinical competency requirements: In addition to the training and licensure requirements, the applicant must demonstrate competence in clinical practice. The Board will obtain evidence of this through a review of logs of cases performed by the applicant and by direct communication with the applicant's peers.

7. Misrepresentation and nonresponse procedures: Applicants for certification who misrepresent or do not respond to questions on the application will be, at a minimum, deferred from the process for 1 year.

8. Requirements for applicants with a history of chemical dependency: Such applicants will not be admitted to the Qualifying (Part 1) or Certifying (Part 2) Examination unless they present evidence to the Board that they have satisfactorily completed the program of treatment prescribed for their condition. In addition, any such applicants for the Certifying (Part 2) Examination may have a site visit of their practices by a representative of the Board.

B. Application

1. A special application form provided by the Executive Secretary shall be completed by the applicant and returned to the Board office by courier for guaranteed receipt. Applications must be in the Board office by November 1 in order to permit the applicant to be admitted for the Qualifying (Part 1) Examination the following May or June. Applications and documentation material postmarked before but not received in the Board office by November 1 will incur a late fee of $300. No applications will be accepted after December 1. No application will be considered by the Credentials Committee or the Board unless it is submitted by the deadline set forth and is complete and includes all required supporting documentation. The Executive Secretary will determine if an application is complete.

2. The application must be accompanied by a notarized copy of a graduation certificate from a medical school approved by the Liaison Committee on Medical Education or from a school of osteopathy approved by the Bureau of Professional Education of the American Osteopathic Association.

3. The candidate must provide specific verification (such as a notarized certificate or an original letter from the director of the program(s) where the applicant completed G1 and G2) of successful completion of the preurology postgraduate training requirement in a program approved by the AC_2014ME. Preurology training must be documented separately from urology training.

Graduates of medical schools not approved by the Liaison Committee on Medical Education, the Bureau of Professional Education of the American Osteopathic Association, or the Accreditation Committee of the RCPS must furnish a notarized copy of a valid Education Committee for Foreign Medical Graduates Certificate (or Fifth Pathway certificate).

4. Examination fees and dates for the Qualifying (Part 1) Examination are described under "Fees and Deadlines."

5. For each applicant, the director of the program where the applicant is finishing residency training must provide a letter to the Board office by January 1 confirming that the applicant is expected to have successfully completed 1 year of training in the capacity of chief resident during the calendar year in which the Qualifying (Part 1) Examination is to be taken. The program director must also complete an evaluation form supplied by the Board. This evaluation must be received in the Board office by March 1 preceding the Qualifying (Part 1) Examination to be given the following May or June.

6. Applicants for certification must be approved by the Credentials Committee and the Board. Additional information may be requested by the executive secretary. No duty or obligation to assist any applicant in completing the application is implied. The applicant is responsible for ensuring that all supporting documents are received in the Board office at the indicated time.

7. As a condition of application to the certification process, applicants must sign a waiver releasing, discharging, and exonerating the Board, its directors, officers, members, examiners, employees, and agents from any and all claims, losses, costs, expenses, damages, and judgments (including reasonable attorneys' fees) alleged to have arisen from, out of, or in connection with the certification process.

8. As a condition of application to the certification process, the applicant must sign a waiver allowing the Board to release examination results achieved in the Qualifying and Certifying Examinations to the residency program director and to the Residency Review Committee for Urology.
9. Any applicant who requires special aids or assistance due to a physical or mental disability during the Board examinations should indicate this on the application. You will be expected to submit appropriate documentation substantiating your disability. The Board reserves the right to verify your disability.

C. Fees and Deadlines

1. The current examination fee may be changed without notice. This fee reimburses the Board for expenses incurred in preparing and processing the applications and examinations of the candidate. No fees are refundable. Unused fees will be credited for the next available examination only. If the credit is not used at the first available opportunity, it will be forfeited.

2. Payment of $220 must accompany the initial application for the Qualifying (Part 1) Examination except in the case of chief residents, who shall pay $775 as the fee for the initial application. Chief residents only may delay the fee payment until January 5. An additional fee of $320 must accompany application for the Certifying (Part 2) Examination. An applicant or candidate secures no vested right to certification as a result of paying an examination fee.

3. Cancellation fees are as follows:
   - $50 for failure to appear
   - $300 for unexcused absence
   - $200 for excused absence (in cases of personal or family illness/death).

4. Only one excused absence is permitted at the discretion of the Board and extends the period of admisibility for 1 year. The excused absence fee of $200 will be assessed. Following one excused absence, any subsequent absences are classified as unexcused. There will be no further extensions of admisibility, and an unexcused absence fee and reinstatement fee, if any, will be assessed. Applications will be considered inactive if two successive examination appointments are canceled by the applicant. Reinstatement fee is assessed after two consecutive absences. If the candidate does not already exceed the 5-year time limit, he or she may regain active status by paying the reinstatement fee of $600 plus an additional fee for an unexcused absence or for a nonappearance.

5. A $300 late fee will be assessed for any application and/or documentation and/or fees not received in the Board office by the prescribed deadlines. Overnight courier for guaranteed receipt is recommended. A $100 fee will be assessed for all returned checks.

6. The fee for the Preliminary Examination is $400. If a Preliminary Examination appointment is canceled, a $150 cancellation fee will be assessed.

7. The application fee for recertification is $850.

8. The fee for a site visit by a Board representative is $2,000 plus expenses.

9. Fees shall be refunded to candidates deferred by the Board, minus a $50 administrative fee, or, if deferred for an inadequate surgical log, a $175 administrative fee.

The Certification Process

Applicants approved by the Board to enter the certification process must complete both a Qualifying (Part 1) Examination and, after passing this examination, a subsequent Certifying (Part 2) Examination. Assessment of clinical competence through review of practice logs and peer review will also be carried out prior to admission to the Certifying (Part 2) Examination. Certification must be achieved within 5 years of the first scheduled Qualifying (Part 1) Examination.

Applicants who have not applied for or have not successfully completed the Qualifying (Part 1) Examination within 5 years of the completion of their urological residency will be required to pass a written Preliminary Examination before being permitted to enter the certification process. The Preliminary Examination is given each November during the annual In-Service Examination. After passing the Preliminary Examination, the applicant must take the Qualifying (Part 1) Examination one of the next two times it is offered. Any such candidate who fails the Qualifying Examination must successfully retake the Preliminary Examination to proceed with certification. Contact the Board office by August 15 for information.

A. The Qualifying (Part 1) Examination

The Qualifying (Part 1) Examination is given in May or June of each year simultaneously at several different locations. An applicant failing any component of the Qualifying (Part 1) Examination must repeat it the next year unless the absence is excused by the Board office (see "Fees and Deadlines"). Failure to retake the failed components of the examination at the first available opportunity will result in assessment of an unexcused absence fee on subsequent applications. The applicant must pass all components of the Qualifying (Part 1) Examination in sufficient time to allow for completion of the certification process within the 5 years of active candidate allotted.

The Qualifying (Part 1) Examination is a 2-day exam and includes three components: written, pathology, and urologic imaging (pathology and urologic imaging graphics will be in booklet format). The exam is designed to assess knowledge of the entire field of urology and allied subjects. This includes, but may not be limited to andrology (including infertility), calculus disease (including endourology and shock-wave lithotripsy), congenital anomalies, pediatric urology, anorectal disorders of females, infectious diseases, general surgery, urology, and urologic imaging. Sexuality and impotence, adrenal diseases and endocrinology, trauma, and urologic oncology.

The written, urologic imaging, and pathology examinations are all regarded as separate examinations. In the event of failure of any one or two of the three, only the failed examination need be repeated.

B. The Certifying (Part 2) Examination

Candidates for the Certifying (Part 2) Examination must have met all training requirements and have passed the Qualifying (Part 1) Examination. The Certifying Examination includes assessment of clinical competence through review of practice logs, peer review, and three practical examinations (an oral examination and written examinations in pathology and urologic imaging). In addition, the candidate must have engaged in a minimum of 18 months of urologic practice with primary patient responsibility in a single community, an academic institution, or in the Armed Forces.

A yearly extension of the period of admisibility may be granted for fellowships relevant to urology of 1 year or longer. Credit is subject to Board approval; notarized documentation of fellowship training is required. A 6-month credit toward the 18-month period is granted to those individuals who pass the examination within 6 months of post-residency fellowship training.

Application for admission to the Certifying (Part 2) Examination is made by completing the Supplemental Application form mailed from the Board office in May to all potential applicants. This application should be returned by courier for guaranteed receipt and
must be received in the Board office by July 1 prior to the Certifying (Part 2) Examination of the following year. In addition, a surgical log of all major and minor cases performed as the primary surgeon, including narrative descriptions of deaths, complications, and errant diagnoses, prepared in accordance with the formats provided by the American Board of Urology, must be received in the Board office by November 15 prior to the next Certifying (Part 2) Examination the following year. Each log must document no less than 12 and no more than 18 consecutive months. This log must be verified by the candidate and notarized. Courier service for guaranteed receipt is recommended.

Applicants will be assessed $300 for logs received between November 15 and December 1. No surgical logs will be accepted after December 1.

Extensions of the period to complete certification are granted by the Board because of extenuating circumstances (e.g., involvement in a fellowship of 1 or more years' duration, subject to Board approval, and deferral for an inadequate surgical log). The candidate should request such extensions in writing, including the reason.

The candidate must successfully complete all components of the Certifying (Part 2) Examination within 5 years of the first scheduled Qualifying (Part 1) Examination after entering the certification process. To reenter the process, it is necessary to pass a written Preliminary Examination and reenter the certification process at the Qualifying (Part 1) Examination level. See the first paragraph under "The Certification Process," above.

C. Steps in the Certifying (Part 2) Examination

1. Assessment of Clinical Competence

Urology is the specialty that deals with the medical and surgical disorders of the genito-urinary tract including the adrenal gland. Candidates must demonstrate knowledge, competence, and surgical experience in the broad domains of urology, such as infertility, impotence, calculus disease, endourology, extracorporeal shock wave lithotripsy, neurourology, urodynamic imaging, uropathology, female urology, pediatric urology, infectious disease, obstructive disease, psychologic disorders, renovascular disease, transplantation, genitourinary sexuality, trauma, and oncology.

Candidates for the Certifying (Part 2) Examination must be in the full-time practice of urology and must be licensed to practice medicine in the area of current practice activity. Notarized documentation of licensure is required.

The candidate must sign a waiver authorizing any and all third parties contacted by the Board to furnish to the Board such records and information, including confidential information related to the candidate's abilities and reputation as a urologist, as the Board (in its sole discretion) may deem necessary or advisable.

Under no circumstances will the source of peer review letters be revealed to any person other than members of the American Board of Urology.

The candidate will be required to release, discharge and exonerate the Board, its directors, officers, members, examiners, employees, and agents (including any and all third parties furnishing information to the Board) from any and all claims, losses, costs, expenses, damages, and judgments (including reasonable attorneys' fees) alleged to have arisen from, out of, or in connection with the certification process.

As evidence of competency, the candidate must submit a log of his/her cases performed as primary surgeon that is to be no less than 12 consecutive months and no more than 18 consecutive months in length. Logs should reflect the most recent 12-18 months in the area of current practice as described earlier in this section.

Photostatic copies of patient records from the patient care facility and/or office records of any one or more of the above cases may be requested by the Board. The candidate shall be responsible for obtaining patient consent for the disclosure of patient records to the Board or for ensuring that the patient records so disclosed do not contain any patient-identifying information. The candidate is expected to furnish such records within 1 month of the request. Surgical log review is an important component of the certification process. While there is no minimum number of cases established for an acceptable log, a surgical experience well below the norm for the peer group may be cause for delaying the certification process until there is sufficient experience to assess adequately a candidate's practice pattern and management abilities.

In the case of military or public health physicians subject to unexpected changes of assignment, the Board may accept cases from the previous assignment.

The Board will review the surgical logs of urologic subspecialists in the context of the expected subspecialty experience. The 5-year period of admissibility for completing certification will be extended one time by 1 year for candidates whose certification is delayed because of an inadequate surgical log.

To further ascertain and document the candidate's qualifications for certification, the American Board of Urology will solicit information and comments from appropriate individuals, such as fellow practitioners, or from organizations, such as medical societies and licensing agencies.

Upon receipt of the practice logs and peer review information, the Credentials Committee of the Board will review the candidate's credentials. Evidence of ethical, moral, and professional behavior, and an appropriate pattern of urologic practice including experience with an adequate volume and variety of clinical material, will be sought. Areas of inadequacy may be cause for deferment or discontinuation of the certifying process until these areas are clarified or corrected. Actions of the Board to achieve clarification may include:

a. Inquiry by the Credentials Committee of the Board into practice irregularities;

b. Request for certified copies of candidate's health care facility and/or office records for review;

c. Invitation to appear before the Board for a personal interview;

d. A site visit to the candidate's community at the candidate's expense; and/or

e. Other appropriate measures that may be deemed necessary to assess apparent deviations from standard urologic practice.

The candidate will not be permitted to continue the certification process until the Board has satisfied itself of the appropriateness of the candidate's practice pattern and professional behavior. The Board may elect to defer continuation of the certification process pending investigation and resolution of any inadequacies or deviations. It may deny certification when serious practice deviations or unethical conduct are involved. These include, but are not limited to, cheating on or improper or disruptive conduct during any examination conducted by the Board, the solicitation or distribution of examination materials, and misrepresentation of an applicant's or candidate's status in the certification process.

2. The Oral, Pathology, and Urologic Imaging Examinations

These examinations are given annually in February in Dallas, Texas. The pathology and urologic imaging examinations are written and are based on projected slides. After 2001, the pathology and urologic imaging exams will be given only with the Qualifying (Part 1) Examination. The oral examination is an interactive process between examiner and candidate during which an assessment is made of ability to diagnose and manage urologic problems. Since the candidate has passed the Qualifying (Part 1) Examination, the examiner presumes in the oral examination that the candidate has a satisfactory degree of cognitive knowledge of urology. Therefore, the oral examination will concentrate upon the following:
a. Problem-solving ability. Evaluation is made of the candidate's ability to collect pertinent information systematically, integrate it, assess the problem, and propose an appropriate solution.
b. Response to a change in a clinical situation. The candidate's ability to manage changing clinical conditions is evaluated through the flexible interaction between the examiner and the candidate. Changed clinical conditions may be posed by the examiner in order to assess various responses by the candidate or may be developed by the examiner from the outcome of management recommendations offered by the candidate during the interview.
c. Professional behavior in the role of a urologist. The candidate's attitude, interaction with the examiner, and expression of patient management concerns contribute to the assessment of professional behavior.

Unforeseeable Events
Certain unforeseeable events such as a natural disaster, war, government regulations, strikes, civil disorders, curtailment of transportation, and the like may make it inadvisable, illegal, or impossible for the Board to administer an examination to a candidate at the scheduled date, time, and location. In any such circumstance, the Board is not responsible for any expense the candidate may have incurred to be present for the examination or may incur for any future or substitute examination.

Final Action of the Board
Final action regarding each applicant is the sole prerogative of the Board and is based upon the applicant's training, professional record, performance in clinical practice, and the results of the examinations given by the Board.

Regardless of the sequence by which the various steps of certification may have been accomplished, the process itself is not considered complete until the Board's final action. At any point in the process, the Board may delay or even deny certification upon consideration of information that appears to the Board to justify such action.
The activities described in "Requirements" and "The Certification Process" of this guidebook proceed from the Certificate of Incorporation and Bylaws, which state the nature of the business, objects, and purposes proposed to be transacted and carried out by this corporation.

Appeals Procedure
The Board has established an appeals process for candidates denied certification or for diplomates with time-limited certificates denied recertification. A copy of the appeals process may be obtained from the Board office upon written request by the affected party.

An appeal must be initiated by a candidate or diplomat within 30 days after the mailing by the Board of the adverse decision. The candidate or diplomat must provide written notice requesting a hearing to appeal the Board's decision and cite the specific reasons given by the Board that are alleged to be erroneous.

Board Eligible Status
The American Board of Urology does not recognize or use the term "Board eligible" in reference to its applicants or candidates. A candidate is not certified (ie, does not become a diplomat) until all components of the certification process are successfully completed. Active candidacy for Board certification shall begin when the candidate first makes application for the Qualifying (Part 1) Examination which must occur within 5 years of completing the residency and the candidate must have passed the Certifying (Part 2) Examination within 5 years of active candidacy. When the 5-year period of candidacy has expired, the individual is no longer a candidate for certification.

Inquiry as to Status
The Board considers a candidate's record not to be in the public domain. When a written inquiry is received by the Board regarding a candidate's status, a general but factual statement is provided that indicates the person's status within the examination process. The Board provides this information only to individuals, organizations, and institutions supplying a signed release of information from the candidate, and a charge of $35 per request will apply.

Recertification
Certificates issued by the American Board of Urology on or after January 1, 1986, expire on the anniversary of the date of issue and are valid for 10 years only. A physician who fails to be recertified by the expiration date is no longer a diplomate of the Board, and his or her name is deleted from The Official ABMS Directory of Board Certified Medical Specialties. It is recommended, therefore, that diplomates possessing a time-limited certificate make plans to obtain recertification beginning up to 3 years before the expiration date of their current certificate.

The Board endorses the concept of lifelong learning in urology for its diplomates. Candidates for recertification must demonstrate their involvement in continuing urologic education by documenting 90 urology-related credits, 30 hours of which must be Category I, within a 3-year period by September 1 of the year the Recertification Examination is to be taken. The office of the American Board of Urology will notify diplomates holding a time-limited certificate 3 years prior to its expiration. At that time a handbook detailing the recertification process titled Information for Applicants for Recertification will be provided. This handbook is also available on request from the Board office.

Diplomates are responsible for keeping the Board office informed of address changes.

Revocation of Certificate
Certificates issued by this Board are the property of the Board and are issued pursuant to the rules and regulations of the Board. Each certificate is issued to an individual physician who, by signature, agrees to revocation of the certificate in the event that:
a. the issuance of such certificate or its receipt by the physician so certified shall have been contrary to, or in violation of, any provision of the Certificate of Incorporation, Bylaws, or rules and regulations of the Board in force at the time of issuance; or
b. the physician or party certified shall not have been eligible to receive such certificate, regardless of whether or not the facts constituting ineligibility were known to, or could have been ascertained by, the directors of the Board at the time of issuance of such certificate;

c. the physician or party so certified shall have made a material misstatement of fact in application for such certificate or in any other statement or representation to the Board or its representatives; or

d. the physician so certified shall at any time have neglected to maintain the degree of competency in the practice of the specialty of urology as set up by the Board and shall refuse to submit to reexamination by the Board; or

e. the physician so certified has been found by the Board to be guilty of unethical practices or immoral conduct or of conduct leading to revocation of license. These objective standards include conduct that violates state medical laws, rules and regulations of local and state medical boards, and relevant AMA guidelines, and conduct leading to revocation of license to practice
medicine in any state, regardless of continuing licensure in any other state.

The Board of Trustees of this corporation shall have the sole power, jurisdiction, and right to determine and decide whether the evidence and information before it is sufficient to constitute one of the grounds for revocation of any certificate issued by this Board.

When the Board is made aware of facts possibly constituting grounds for revocation, the Board will give the physician written notification identifying the specific facts that have come to its attention. The Board may require any physician so certified to appear before the Board of Trustees or before any one or more of them, or before an individual designated by the Board, upon not less than 20 days written notice, and to show cause at that time and place specified in the notice why the certificate may not be revoked on any one of the grounds specified in such notice. The diplomat may bring to this hearing persons or documents in defense of any actions.

The failure of any physician so notified to appear as required in such notice, without due excuse deemed sufficient to the Board of Trustees, shall constitute ipso facto cause for revocation of the certificate. The decisions of the Board of Trustees relating to all matters under this section shall be final and binding.

The diplomat will be required to attest that he/she has read and understands the above provisions regarding the grounds for revocation of certificate issued and the procedures to be followed in determining whether or not a certificate should be revoked and to release, discharge, and exonerate the Board, its directors, officers, members, employees, and agents from any and all loss, damage, claim, or complaint by reason of any act or omission.

**Trademark and Seal**

The trademark and seal of the American Board of Urology are registered. Any unauthorized use of the trademark and seal is prohibited without express permission of the Board.

**Summary of Fees**

Checks should be made payable to the American Board of Urology. All checks must be in US dollars. A $100 fee will be assessed for all checks returned by the bank.

Appendix C

Medical Licensure Information

This section contains two articles on the basics of medical licensure and the United States Medical Licensing Examination, as published in Licensing and Credentialing: What Physicians Need to Know, in addition to information on the licensure policies of state medical boards, published in State Medical Licensure Requirements and Statistics, 1999-2000. To order these books, call the AMA at 800-621-8385.

Important Note
It is strongly recommended that candidates contact the medical licensing board in a given US state or jurisdiction for the most current information on that licensing jurisdiction's requirements.

Obtaining a Medical License:
The Basics

By the Federation of State Medical Boards

[Reprinted from Licensing and Credentialing: What Physicians Need to Know, pages 1-4]

Increasing public demand for protection, coupled with the growth in the number and sophistication of fraudulent practitioners over the past 2 decades, has resulted in stronger and more complex licensing boards and licensing statutes throughout the country. As might be expected, the rate of change differs widely among the states' licensing boards, depending on each jurisdiction's resources and Medical Practice Act, as well as on legislative, media, and public expectations. All medical boards have continued to improve licensure processes, and a trend toward uniformity among licensing boards exists to enhance both the initial licensure process and licensure portability.

Many states have expanded what is considered to be the practice of medicine to address new trends in the medical field that need to be regulated by medical boards. For example, a number of states have passed legislation in recent years that empower medical boards to have jurisdiction over the practice of medicine across state boundaries or treatment decisions made by medical directors of managed care organizations.

Within this context, a physician seeking initial licensure or subsequently applying for a license in other states should anticipate the possibility of delays due to the necessary investigation of credentials and past practice, as well as the need to comply with necessary licensing standards. To assist a physician in the quest for licensure, this article attempts to provide some ground rules. These suggestions will not apply in all cases but generally will help most physicians applying for licensure as well as benefit the licensing board of the state in which the physician wishes to practice.

When contacting a licensing board for the first time, ask for a copy of its current licensing requirements and the average time it takes to process applications. This will provide the physician with a solid idea of when to consider closing an existing practice and/or plan a move as well as with information about the potential problem areas to be addressed in completing an application. While initial licensure requirements for domestic and international medical graduates differ somewhat among states, all states will require proof of prior education and training and proof of the completion of a rigorous licensure examination approved by the board. Specifically, all physicians must submit proof of successful completion of all three steps of the United States Medical Licensing Examination (USMLE). However, because some medical students and physicians had completed portions of the National Board of Medical Examiners and Federation Licensing Examination (FLEX) sequences before the implementation of USMLE in 1994, certain combinations
of examinations may be considered by medical licensing authorities as comparable to the USMLE. The USMLE program recommends that such combinations be accepted for medical licensure only if completed prior to the year 2000. For information on the USMLE, physicians should contact the USMLE Office of the Secretariat at 3750 Market St Philadelphia, PA 19104-3910 215 690-9600.

At the initial contact, the physician should provide the licensing board with a resume or curriculum vitae. This will allow a licensing board to evaluate potential problem areas early in the process. In short, the initial contact should be used to develop a set of reasonable expectations about the duration and complexity of the licensing process in a state to avoid frustration about the time required to obtain licensure. Unreasonable expectations can result in financial jeopardy due to the premature closing of a practice or failure to meet a starting date with an employer in the new state.

A physician should never try to hide derogatory information from a licensing board. It is much better to come forward with the information, assist the board in obtaining records and other necessary data, and provide information about mitigating circumstances that would prevent license denial. Full and frank disclosure of all information requested is by far the best approach to successful licensure. A physician should remember that in most states, making a false statement on an application for licensure is grounds for denial or future restriction.

A physician who is actively involved in the licensing process can often shorten the length of time it takes to obtain a license. Personally contacting and following up with the medical schools, training programs, and appropriate hospitals will motivate these institutions to verify credentials more expeditiously. Following up with the licensing boards in other states where the physician holds or has held a license also may assist in shortening the time for licensure. It is important to note a difference between follow-up and excessive use of phone contact, which often delays the processing of requested verification materials, since the physician’s application or request may need to be pulled from the “stack” to answer an inquiry. A short note to the organization processing the request for information 30 days after the initial letter or form was mailed may be a better course to follow than frequent phone contact.

Another option for physicians applying for licensure is the Federation Credentials Verification Service (FCVS). The FCVS was created in 1996 by the Federation of State Medical Boards of the United States to provide a centralized, uniform process for state medical boards—as well as private, governmental and commercial entities—to obtain a verified, primary source record of a physician’s core credentials. The FCVS repository of information allows a physician to establish a confidential, lifetime professional portfolio that can be forwarded, at the physician’s request, to any entity that has established an agreement with FCVS. Currently, the majority of licensing authorities accept FCVS-verified documents for licensure. For more information on FCVS, call toll-free, 1-888-ASK-FCVS (1-888-278-3287).

A wise physician will exercise patience and courtesy in the licensing process. State licensing boards and their staff, in most cases, do the best job possible to protect the public with the resources provided them. This requires taking the necessary time to fairly evaluate each application for licensure. In that same context, all actively practicing physicians should be cognizant of state laws; they may be providing care or performing acts that might not, until recently, have required them to hold a license.

Even for physicians with uncomplicated histories who submit complete and accurate applications, delays in obtaining a medical license may be encountered. Physicians should plan for at least a 60-day period from the time they submit a completed application for licensure and the actual date licensure is granted. Physicians who are graduates of a medical school outside the United States should anticipate a slightly longer period. All physicians should be cognizant of the fact that, in general, the highest volume of licensure applications is received between the months of April and September. This is the peak period because physicians with families want to relocate before the academic school year starts for their children, residents want and need licensure to begin practicing, and state employees with school-age children often take their earned vacation time during this period. Finally, it is important to remember that hospital credentialing and qualification for medical malpractice insurance are based on possession of full and unrestricted licensure. This too may mean additional time before a physician can actually begin practicing.

Physicians informed about the process and working cooperatively with the licensing board need not find an unpleasant experience. Members of the medical profession should always remember that the business of medical licensing boards is to protect the public from unqualified and unfit physicians. However, licensing boards also strive to ensure a process that protects the legal rights and privileges of physicians. While maintaining this balance often appears bureaucratic and cumbersome, the end result is improved health care for the people of the United States.

This article was provided by the Federation of State Medical Boards as an update to the original, authored by the late Douglas N. Cerf.

Examinations Used for Entry to Residency Education and the Practice of Medicine
By Arthur Osteen, PhD

[Reprinted from Licensing and Credentialing: What Physicians Need to Know, pages 5-11]

Introduction
A single examination for licensure of physicians, other than osteopathic physicians, was a long time in coming. Prior to the development of the Federation Licensing Examination (FLEX) by the Federation of State Medical Boards (FSMB) in 1968, each licensing jurisdiction had its own official examination. Because licensing jurisdictions did not always accept scores on examinations given by other jurisdictions, moving from one state to another could easily involve passing a licensing examination in the new state. The private, nongovernmental National Board of Medical Examiners (NBME) provided the NBME examination, which was adopted by most, but not all, licensing boards. Over several years following the development of FLEX, the number of state examinations gradually dwindled until there were only two examinations in use for licensing purposes—FLEX and the NBME examination.

Even this degree of uniformity did not completely simplify the medical examination process. During the time when FLEX, particularly the three-part FLEX, was in use, individual states had different
rules about what constituted passing marks, as well as other rules related to passing the examination. Was the FLEX weighted-average (FWA) used—a system of determining a passing score that gave greater emphasis to clinical questions than to basic science questions—or did the candidate have to receive a passing score on all parts of the examination? And did the candidate have to pass all parts of the examination at a single sitting, or could separate parts of the examination be passed at different administrations of the examination? The fact that states had conflicting rules on these matters meant that frequently a physician passing the FLEX could have a license in one jurisdiction but be denied a license in a neighboring one.

The issues raised by these differing state rules have been resolved by the implementation of the United States Medical Licensure Examination (USMLE) and a standard set of rules for what constitutes passing scores. But some questions still remain with regard to the use of the current examination, and a new set of issues has arisen with the introduction of a clinical skills assessment (OSA) by the Educational Commission for Foreign Medical Graduates (ECFMG). The following comments are intended to describe the current debate about the USMLE and to suggest that progress is being made in finding equitable solutions. When the current questions are resolved, it is likely that a new and different set will appear.

United States Medical Licensure Examination

The USMLE has replaced the two earlier licensing examinations, the NBME examination and the FLEX, sponsored by the FSBM. The first two steps of the USMLE, the three-step examination prepared by the NBME and in use since 1991, are administered on the same day in examination centers in the United States and abroad. It is used by many medical schools for promotion and graduation. These two steps are also used by the ECFMG as part of its requirement for certification of international medical graduates (IMGs), replacing the ECFMG’s Foreign Medical Graduates Examination in the Medical Sciences (FNGEMS).

Factors Leading to the Development of the USMLE

Prior to development of the USMLE, the majority of US medical school graduates (USMGs) took the earlier NBME examination for licensure, while the rest took either the two-part or the three-part FLEX. The NBME examination was administered to USMGs on site at medical schools during the academic year. All IMGs took either the three-part FLEX or its successor examination, the two-part FLEX. The examinations were administered to IMGs by individual state licensing boards. In spite of the fact that the IMGs who achieved licensure through the FLEX were outnumbered by the USMGs who achieved licensure through that route, some members of the IMG community believed that requiring IMGs to take FLEX was discriminatory and that it was in fact more difficult than the NBME examination, which only USMGs were allowed to select.

FNGEMS Not Equivalent to FLEX or USMLE

The IMGs were also concerned that they were required to pass an additional examination. The Health Professions Educational Assistance Act of 1976 (PL 94-484) required IMGs coming to the United States to either practice medicine or as exchange visitors for graduate medical education (GME) to pass an examination “equivalent” to the NBME examination, Parts I and II. The FNGEMS was determined as equivalent by the Secretary of the Department of Health and Human Services only for the purposes of PL 94-484, but not in all respects. In fact, the FNGEMS did not cover all of the NBME examination content areas and was not the same length. Furthermore, and of even more importance, the FNGEMS was never officially adopted by licensing boards as a licensing examination. Therefore, IMGs who passed FNGEMS but did not pass the FLEX when it was available must now pass the USMLE to gain a license to practice medicine in the United States.

Reporting Combination Scores from FLEX and USMLE

The USMLE was phased into use over a 4-year period from 1991 to 1994; the last complete FLEX was given in 1993. Combinations of scores from the FLEX and USMLE can be submitted for licensing purposes until 2000. The various acceptable combinations are generally described in US Medical Licensure Statistics and Requirements by State. More specific information is available each year in the NBME’s Bulletin of Information about the USMLE.

The USMLE as a Prerequisite for GME: Pros and Cons

Some Program Directors Require IMGs to Pass USMLE Steps 1 and 2

Most GME programs in the United States accept ECFMG certificates based on pre-USMLE ECFMG examinations as fulfilling the requirements for entering a residency program. However, some GME program directors reportedly will not appoint IMGs unless they have passed USMLE Steps 1 and 2. These program directors may be in states where the licensing board requires that all graduates pass USMLE Steps 1 and 2 in order to be appointed. Some program directors may believe that the USMLE provides a better evaluation than the FNGEMS. Those who remember GME before PL 94-484 was passed recall that a large number of IMGs admitted to the US before that time were not able to qualify for appointment to residency training and were, consequently, unable to practice medicine in the US.

Requiring USMGs and IMGs to Pass USMLE Steps 1 and 2 Versus Requiring only IMGs to Do So

As noted above, program directors in some states are able to appoint only residents who have passed Steps 1 and 2 of the USMLE. In those states, USMGs will have had to pass Steps 1 and 2 to be appointed. In the majority of states, USMGs can be appointed without having passed Steps 1 and 2. The argument is made that requiring USMGs to take USMLE Steps 1 and 2 prior to entering GME is not justified, because the content and quality of US medical schools is known to program directors, and they do not need additional assessment of knowledge and skills.

Moreover, requiring USMGs to complete the first two USMLE steps prior to being accepted to a GME program can cause timing problems. The USMLE Step 2 is given in August and March, and scores are not available for several weeks. If medical students take the examination in August before their senior year in order to receive scores in time to apply for a residency, some will not have completed all of the subject matter covered in Step 2. If they wait until March of their senior year, when they will have covered most of the subject matter, their scores will not be available in time for applying for residency.

The problems related to timely access to Step 2 by USMGs will be alleviated when the NBME completes its arrangements to provide a computer-based USMLE on a less rigid schedule at examination centers throughout the United States, making it possible for US medical students to take the examination during their senior year, but in time to apply for residency education.
Fifty-one Medical Schools Require USMGs to Pass the USMLE to Graduate

Data from the Liaison Committee for Medical Education (LCME) surveys for 1997-1998 indicate that 114 of the 125 LCME-accredited medical schools require students to take USMLE Step 1; 96 of these schools require students to pass Step 1. Ninety-six of the 125 schools require students to take Step 2; 96 of these schools require students to pass. Fifty-seven of the 125 schools require students to pass both Steps 1 and 2 in order to graduate. While 23-4% of USMGs fail the USMLE after the maximum allowable number of attempts, 7-16% fail on the first attempt and would not be able to enter a GME program on schedule if passing were a requirement. It is the perception that the percentage of students passing the examination on the first attempt increases when a school requires it for graduation.

Many medical educators, supported by current American Medical Association policy, argue against a requirement that USMGs pass USMLE Steps 1 and 2 prior to being accepted into a residency program. They contend that the faculty of a medical school function more reliably than a written examination in determining who is qualified to enter a residency. Those medical educators arguing for a universal requirement for USMLE Steps 1 and 2 contend that a requirement to pass the examination is justified to prevent these few USMGs unable to pass the USMLE from entering a residency. A resident who is unable to pass the examination causes problems for the program, since virtually all residents need a license at some point in residency education. Losing a resident, particularly in a small program, causes administrative problems, including that of providing care to patients.

Increasing Numbers of USMGs Voluntarily Taking USMLE Steps 1 and 2

Even when no requirements exist, increasing numbers of USMGs are electing to take USMLE Steps 1 and 2 before applying to a GME program, believing that their chances of being appointed are increased by having passed the first two steps. Data from the NBME indicate that in 1996-1997 the number of individuals taking USMLE Step 2 for the first time (18,168) was higher than the number of US graduates (15,887) for that academic year. While the larger number includes individuals who postponed their examination until after graduation as well as Canadian medical students, it appears that, even without a universal requirement, more USMGs are taking Step 2 than are required to do so by the 86 medical schools mentioned above. The NBME reports that, in recent years, more students are taking Step 1 in August than in March, which also indicates that more USMGs are taking the examination in preparation for application to residency programs.

FSMB Proposal for USMLE Steps 1 and 2 Requirement Prior to GME Adopted by Nine States

In 1996, the FSMB adopted the "Report on Licensure of Physicians Enrolled in Postgraduate Training Programs," which recommended that all state medical boards "develop mechanisms to allow resident physicians to be brought under the jurisdiction of the medical boards." The report recommended that all applicants for a resident educational permit or license be required to pass USMLE Step 1 and 2 or the examination of the National Board of Osteopathic Medical Examinations. Nine states have adopted such a requirement; 17 other states require full licensure at some point during residency (usually the second year), and it is likely that additional states will adopt similar rules.

At its June 1998 Annual Meeting, the AMA House of Delegates adopted a report that called for a meeting of representatives from organizations involved in medical education and licensure to discuss this issue and, if possible, to reach an agreement concerning appropriate policy. Like the AMA, the Association of American Medical Colleges (AAMC) opposes requiring US graduates to pass a licensing examination to gain eligibility for appointment to residency. The AAMC's concern, like that of the AMA, is that such a requirement would infringe on the responsibilities of medical faculty to determine readiness for entry to GME. The AAMC is also concerned that the requirement could influence faculty to "teach to" the examination, thereby weakening the medical curriculum.

While it was hoped that replacing three examinations for medical education and licensing purposes with a multipurpose, single examination would alleviate IMG perceptions of inequitable treatment, it is likely that this perception will remain as long as some program directors continue to appoint only IMGs who have passed USMLE Steps 1 and 2.

Clinical Skills Assessment: A New Controversy

The ECFMG Clinical Skills Assessment

Since July 1, 1998, the ECFMG has required IMGs seeking ECFMG certification to pass a clinical skills assessment (CSA). At present, USMGs are not required to pass a national examination of this kind. Some US medical schools administer a similar examination, and all US schools assess the core clinical skills and behaviors of students, including their ability to interview patients.

The USMLE Steps 1 and 2 will continue to be accepted as the ECFMG medical science examination. The new CSA will incorporate the English language proficiency test, providing a direct measure of the examinee's ability to gather and interpret data and communicate effectively in a physician-patient relationship. The IMGs express concern that the CSA is inequitable, not only in that IMGs are burdened with an examination not required of USMGs, but also because all IMG examinees are required to travel to Philadelphia and to pay the $1,200 fee. At its June 1998 Annual Meeting, the AMA House of Delegates adopted a resolution proposing that the CSA be offered at multiple sites and at the lowest cost feasible. It is possible that the examination will be offered at multiple sites after ECFMG has had more experience with it.

The NBME Clinical Skills Assessment

The IMGs may not feel at a disadvantage in this regard for too long. The NBME is well advanced in its development of a clinical skills assessment instrument to be used as part of the regular administration of the USMLE. It is anticipated that this assessment will be implemented by 2003.

A Look Back—and Ahead

For the past 21 years, I have been a member of the staff of the Continuing Medical Education Division of the AMA. In this capacity, I have worked with the Council on Medical Education, which is concerned with AMA policies regarding licensure, and have assisted in preparing various AMA reports and publications dealing with licensure matters.

It appears to me that during those 21 years, many of the inequities relating to the use of licensing examinations have been resolved. There is only one examination in use now. It has a single pass rate and a single set of rules concerning what is an acceptable score. It appears likely that the few remaining differences between examination requirements for USMGs and IMGs will be resolved, either through the adoption of the same rules for both or through development of a consensus on why different rules for the two groups are desirable.
Those who are concerned should continue to debate. They should keep in mind, however, that considerable progress has already been made in unifying the medical examination process, which has been of benefit to physicians and to the public.

Arthur Osteen, Ph.D., is Director of the Department of PRA, Policy, and Liaison Activities, Division of Continuing Physician Professional Development, American Medical Association. He may be reached at

Licensure Policies and Regulations of State Medical Boards
[Summarized from State Medical Licensure Requirements and Statistics, 1999-2000]

State Medical Board Standards for Administration of the United States Medical Licensing Examination
In 1990, the Federation of State Medical Boards (FSMB) and the National Board of Medical Examiners (NBME) established the United States Medical Licensing Examination (USMLE), a single examination for assessment of US and international medical school students or graduates seeking initial licensure by US licensing jurisdictions. The USMLE replaced the Federation Licensing Examination (FLEX) and the certification examination of the NBME, as well as the Foreign Medical Graduate Examination in the Medical Sciences (FMGEE), which was formerly used by the Educational Commission for Foreign Medical Graduates (ECFMG) for certification purposes.

The USMLE is a single examination program with three steps. Each step is complementary to the others; no step can stand alone in the assessment of readiness for medical licensure. Each USMLE step is composed of multiple-choice questions, requires 2 days of testing, and is administered semiannually.

Many states require US or Canadian medical school graduates to have from 6 months to 1 year of accredited US or Canadian graduate medical education (GME) to take USMLE Step 3. Graduates of foreign medical schools are generally required to have completed more GME (as much as 3 years in several states). A number of states do not require completion of GME to take Step 2 or require only that a physician taking the examination be enrolled in a GME program.

Nearly all medical licensing authorities require completion of Steps 1, 2, and 3 within a 7-year period (exceptions are Rhode Island, which requires passage within 6 years; California, which allows 20 years; and Michigan, Nevada, New York, and North Carolina, which do not impose a time limit). This 7-year period begins when the medical student or graduate first passes Step 1 or Step 2. Many licensing authorities also limit the number of attempts allowed to pass each step.

Endorsement Policies of State Boards
Policies of medical licensing boards for endorsements of medical licensing examinations taken before and after the development of the Federation Licensing Examination (FLEX) vary from state to state. Each state board created its own licensing examination before FLEX, which may partially explain the sizable variation in endorsement policies from one state to another. Some boards will endorse scores on state licensing examinations in use prior to the development of FLEX, which may be endorsed in connection with a passing score on the Special Purpose Examination (SPEX). Endorsement of a certificate of the NBME or of an examination refers to issuance of a license based on an acceptable score on the NBME or the state’s board exam.

Endorsement relates to the issuance of licenses to physicians who hold licenses in other states or jurisdictions. Each state has strict endorsement requirements.

Thirty-nine state medical boards require some or all candidates for licensure endorsement to appear for an interview; five (Idaho, Maine, North Carolina, Wisconsin, and Wyoming) require some or all candidates to appear for an oral examination.

Fourteen boards require that a license be endorsed within a certain period after examination (usually 10 years, but 3 months in Delaware). In most of these 14 states, SPEX is required if the time limit is not met.

All medical boards will accept or consider for endorsement the national board certificate of the NBME or the USMLE, except the Virgin Islands, which does not accept endorsements. Texas will not endorse the NBME certificate held by a candidate who has never been licensed. Forty-four boards will endorse the Licensate of the Medical Council of Canada (LMCC); 16 will endorse a state board examination from another jurisdiction, occasionally in combination with a certificate from an American Board of Medical Specialties (ABMS) specialty board; six will endorse an ABMS board certificate; and eight will endorse the certificates of the National Board of Osteopathic Medical Examiners (NBOME). Endorsement of these credentials is subject to any specific requirements in effect in that state.

Additional Requirements for Endorsement of Licenses Held by International Medical Graduates
In all states, international medical graduates (IMGs) seeking licensure by endorsement must meet the same requirements as US graduates.

All states except Oklahoma require that IMGs seeking licensure endorsement hold a certificate from the Educational Commission for Foreign Medical Graduates (ECFMG). In lieu of holding that certificate, a candidate for licensure in Maine may have passed a certification examination of an American Board of Medical Specialties (ABMS) board or the Visa Qualifying Examination; in North Dakota, a specialty board examination; and in Wisconsin, the Foreign Medical Graduate Examination in the Medical Sciences (FMGEE).

About half of the boards require IMG candidates to have graduated from a state-approved foreign medical school; some also require 3 years of US or Canadian GME. A majority of jurisdictions also may require an interview or oral examination prior to endorsement.

Policies of State Medical Boards About the Special Purpose Examination (SPEX)
The Special Purpose Examination (SPEX), a 1-day, computer-administered examination with approximately 426 multiple-choice questions, assesses knowledge required of all physicians, regardless of specialty. SPEX is used to assess physicians who have held a valid, unrestricted license in a US or Canadian jurisdiction who are:

• required by the state medical board to demonstrate current medical knowledge,
• seeking endorsement licensure some years beyond initial examination, or
• seeking license reinstatement after a period of professional inactivity. Physicians holding a valid, unrestricted license may also apply for SPEX, independent of any request or approval from a medical licensing board.

Forty-eight jurisdictions use SPEX to assess current competence or if a candidate has not taken a written licensure exam or the ABMS board certification examination within a specified number of years (usually 10). In 22 states, SPEX scores are valid for an unlimited length of time. Forty jurisdictions will accept SPEX scores from other licensing jurisdictions.

Six US jurisdictions do not have SPEX policies—Massachusetts, New Jersey, Puerto Rico, Rhode Island, South Dakota, and Vermont. Of these, however, Puerto Rico will accept SPEX scores from other jurisdictions for licensure endorsement.

Policies of State Medical Boards for Initial Medical Licensure of US Medical School Graduates
All states require a written examination for initial licensure—generally the three-step USMLE, which has replaced the Federation Licensing Examination (FLEX) and the national board examination of the NBME.

More than half of the state medical boards require graduates of US medical schools to have completed 1 year of GME to take USMLE Step 3. Seventeen boards do not require completion of any GME to take Step 3 (although in some cases a candidate must be enrolled in a GME program). All boards require completion of at least 1 year of GME before issuing a full, unrestricted license. Forty-two jurisdictions require 1 year; Connecticut, Maine, Michigan, New Hampshire, New Mexico, Pennsylvania, South Dakota, Utah, and Washington require 2 years; Nevada requires 3 years.

Policies for Initial Medical Licensure of Canadian Citizens Who Are Graduates of Accredited Canadian Medical Schools
When considering applications for licensure, all state medical boards consider Canadian citizens who have graduated from an accredited Canadian medical school on the same basis as graduates of accredited US medical schools. Forty-four licensing boards endorse the Licensiate of the Medical Council of Canada (LMCC) as evidence of passing an acceptable licensing examination (applicants must also pass all other board requirements for licensure).

With the exception of Guam, all medical boards accept Canadian GME as equivalent to GME in a US program accredited by the Accreditation Council for Graduate Medical Education (ACGME). These rules do not uniformly apply to international medical graduates, who should refer to the following section.

Policies of State Medical Boards for Initial Licensure of International Medical Graduates
All IMGs must hold a certificate from the Educational Commission for Foreign Medical Graduates (ECFMG) examination before taking Step 3 of the USMLE. For IMGs seeking licensure, Oklahoma is the only state that does not require an ECFMG certificate.

Thirty-seven states will endorse for licensure the Licensiate of the Medical Council of Canada (LMCC) when held by an IMG. Forty-nine state boards allow IMGs to take USMLE Step 3 before they have had GME in a US or Canadian hospital. All states, however, require at least 1 year of GME for licensure, and 27 states require 2 years. Candidates are not awarded a license until they undertake the required GME in the United States and meet other board requirements (eg, an ECFMG certificate, personal interview, payment of fees).

Medical Student Clerkship Regulations of State Medical Boards
For purposes of this publication, a clerkship is defined as clinical education provided to medical students. Twenty-four states evaluate the quality of clinical clerkships in connection with an application for licensure. In most states, clerkships for US medical students must take place in hospitals affiliated with medical schools accredited by the Liaison Committee on Medical Education (LCME). Fourteen states have additional and/or more specific bases for evaluation.

Nineteen boards regulate clerkships provided in their states to students of foreign medical schools (including US citizens studying medicine in foreign schools). Of these, Pennsylvania, Puerto Rico, and Texas forbid such clerkships. For purposes of licensure, 10 states accept only those clerkships completed in hospital departments with GME programs accredited by the Accreditation Council for Graduate Medical Education (ACGME). Seven states have additional unspecified regulations.

Additional Graduate Medical Education and Specialty Certificate Policies of State Medical Boards
A number of state medical boards have additional GME and specialty certificate policies for international medical graduates (IMGs). Forty states have requirements for appointment to GME programs other than requiring an Educational Commission for Foreign Medical Graduates (ECFMG) certificate or a limited license—California, Connecticut, Iowa, Kansas, Kentucky, Louisiana, Michigan, Minnesota, Nevada, New Jersey, New Mexico, Pennsylvania, Texas, and Vermont.

Three boards—Connecticut, Maine, and Nebraska—indicated that GME completed in foreign countries other than Canada may be considered for credit toward a license. Specialty certificates of foreign boards, such as the Royal College of Physicians in the United Kingdom, are accepted for credit toward a license in eight states—Connecticut, Delaware, Maine, New York, Pennsylvania, Rhode Island, Tennessee, and Vermont.

Thirty-seven medical boards accept GME accredited by the Accreditation Council for Graduate Medical Education (ACGME) for licensure of osteopathic medical graduates.

Accredited Subspecialties and Nonaccredited Fellowships That Satisfy GME Requirements for Licensure
Both the AMA and the ACGME define a residency as GME that takes place in any of the more than 100 specialties or subspecialties that have ACGME Program Requirements (eg, the specialty of internal medicine, the subspecialty of cardiovascular disease). A fellowship is defined as clinical or research-oriented GME in an area of medicine that does not have ACGME Program Requirements.

All state medical boards accept GME in specialties accredited by the ACGME as satisfying their GME requirements for licensure. Forty-nine jurisdictions—all except Arkansas, Guam, Montana, Pennsylvania, and Puerto Rico—accept residency education in subspecialties accredited by ACGME as satisfying their GME requirements for licensure.

Seven boards accept clinical fellowships not accredited by the ACGME, and three boards—Missouri, New York, and North Carolina—accept research fellowships not accredited by ACGME to satisfy the GME requirement for licensure.
Licensure Requirement Exemptions for Eminent Physicians and Medical School Faculty

Nine boards license physicians through recognition of eminence in medical education or medical practice. Physicians appointed to a medical school faculty are exempted from the GME requirement for licensure in 14 states and from the examination requirement for limited licensure or teaching certification in 13 states. These faculty appointees would, however, receive a limited license or similar credential.

Medical Licensure and Reregistration Fees and Intervals

The National Board of Medical Examiners administers USMLE Steps 1 and 2 to students and graduates of US and Canadian medical schools at test centers established by the NBME; application materials are usually available at these medical schools. The Educational Commission for Foreign Medical Graduates administers USMLE Steps 1 and 2 to students and graduates of foreign medical schools; application materials are available only through the ECFMG.

Administration of USMLE Step 3 is the responsibility of the individual medical licensing jurisdictions. Step 3 application materials for physicians who have successfully completed Steps 1 and 2 are available from the medical licensing authorities or the Federation of State Medical Boards (FSMB), which administers the examination for 46 jurisdictions. (For more information on USMLE Step 3 in those states where it is administered by the FSMB, call 800 USMLE XM—800 876-5386.) USMLE Step 3 fees, including all examination costs and processing, application, and administrative fees, range from $800 in Texas to $355 in Guam; the average is $451.

Fees for licensure by endorsement, including processing, application, and administrative fees, range from $1,108 in California to $20 in Pennsylvania; the average is $339.

The majority of boards require physicians licensed in the state to reregister (or renew) their licenses every 1 or 2 years; four jurisdictions—Illinois, Michigan, New Mexico, and Puerto Rico—have a 3-year reregistration interval.

The reregistration fee ranges from $600 in California, Nevada, and New York (every 2 years) to $40 in Indiana (every 2 years); the average annual reregistration fee is $148. Many states offer reduced fees for reregistration of inactive licenses. Completion and reporting of a specified number of hours of CME is required for reregistration in 35 jurisdictions.

Continuing Medical Education for Licensure Reregistration

Thirty-five boards require anywhere from 12 hours (Alabama) to 60 hours (several states) of CME per year for license renewal. Some states also mandate CME content, such as HIV/AIDS, risk management, or medical ethics. Many states also require that a certain percentage of CME be category 1, as measured, for example, through the AMA Physician's Recognition Award. In Ohio, all CME must be certified by the Ohio State Medical Association or the Ohio Osteopathic Association.

Temporary or Limited Licenses, Permits, Certificates, and Registration Issued by State Medical Boards

Forty-four states issue educational licenses, permits, certificates, or registration to resident physicians in GME programs. (The GME program director generally provides a list of residents and any other required information directly to the licensing jurisdiction.) In 25 of those states, residents must obtain a new permit/license when changing residency programs within the state. In seven states—California, Indiana, Kentucky, Massachusetts, Mississippi, New Hampshire, and New Mexico—prospective residents must have passed USMLE Step 1 to receive a permit/license. California requires passage of Steps 1 and 2.

Forty-five boards issue temporary and educational permits, limited and temporary licenses, or other certificates for the practice of medicine. The terms for the issuance of such certificates vary, but in general they must be renewed once a year with a stipulated maximum number of renewals allowed (usually 5 years).

Some states permit state institutions to hire unlicensed physicians to work under the supervision of licensed physicians. In many instances, the state departments of mental health and public health that operate these hospitals will not hire physicians who have not had at least 1 year of GME in an English-speaking hospital. International medical graduates are generally not considered for these positions unless they are in the United States with a permanent resident visa. An unlicensed physician employed by a state hospital is required in most states to register with the state board of medical examiners, which may issue a limited permit to practice within the institution.

Thirty-two states issue teaching (visiting professor) licenses, 15 issue locum tenens permits, and 23 issue inactive licenses (for physicians who want to maintain licensure in that state although they are currently practicing in another state).

Appendix E
Graduate Medical Education Glossary

Accreditation Council for Graduate Medical Education (ACGME)—An accrediting agency composed of representatives from five national associations interested in graduate medical education (each of which appoints four representatives) in addition to a federal government representative, three public representatives chosen by the ACGME, and a resident physician representative. The chair of the Residency Review Committee Council, an ACGME advisory body, participates in ACGME meetings in a nonvoting capacity. The ACGME, through its 27 review committees (26 Residency Review Committees, or RRCs, and the Transitional Year Review Committee), accredits graduate medical education programs.

Affiliated institution (see "Major participating institution")—Term no longer used by the AMA or ACGME; it has been replaced by "major participating institution."

Annual Survey of Graduate Medical Education Programs—Conducted by the AMA Department of Data Collection. All programs accredited by the ACGME and combined specialty programs approved by their respective boards receive the survey, which collects data on program characteristics such as clinical and research facilities and the work and learning environment residents can expect. Data collected from the survey are used to produce the following products:

- Graduate Medical Education Directory
- Graduate Medical Education Directory on CD-ROM
- FREIDA Online (Fellowship and Residency Electronic Interactive Database Access system)
- State-level Data for Accredited Graduate Medical Education Programs in the US
- Medical Education Issue of the Journal of the American Medical Association
- AMA Physician Masterfile
- AMA Physician Select

Categorical positions (see also "Graduate Year 1" and "Preliminary Positions")—Positions for residents who remain in a given program or specialty until completion of the year(s) required for admission to specialty board examination.

Combined specialty programs—Programs recognized by two or more separate specialty boards to provide GME in a particular combined specialty (listed below). Each combined specialty program is made up of two or three programs, accredited separately by the ACGME, at the same institution. Neither the ACGME nor the Residency Review Committees reviews the combined program as a single entity. Resident physicians completing these programs are eligible for board certification.

- Internal medicine/emergency medicine
- Internal medicine/emergency medicine/critical care medicine
- Internal medicine/family practice
- Internal medicine/neurology
- Internal medicine/nuclear medicine
- Internal medicine/pediatrics
- Internal medicine/physical medicine and rehabilitation
- Internal medicine/preventive medicine
- Internal medicine/psychiatry
- Neurology/physical medicine and rehabilitation
- Neurology/diagnostic radiology/neuroradiology
- Nuclear radiology/nuclear medicine
- Pediatrics/emergency medicine
- Pediatrics/medical genetics
- Pediatrics/physical medicine and rehabilitation
- Pediatrics/psychiatry/child and adolescent psychiatry
- Psychiatry/family practice
- Psychiatry/neurology
Consortium—A group of healthcare organizations established to pursue joint objectives. If a consortium is formally established as an ongoing organizational entity with a commitment to graduate medical education, it may serve as a sponsoring institution of a GME program.

Core discipline program (see “General specialty program”—Term still appears, but is being replaced by “general specialty program.”

Chief resident—A position in the final year of the residency (e.g., surgery) or in the year after the residency is completed (e.g., internal medicine and pediatrics); the individual in this position plays a significant administrative or teaching role in guiding new residents.

ECFMG number—The number assigned by the Educational Commission for Foreign Medical Graduates (ECFMG) to each international medical graduate physician who applies for certification from ECFMG. Almost all graduates of foreign medical schools must have an ECFMG certificate to participate in GME in the US.

Electronic Residency Application Service (ERAS)—A service for medical students through which residency applications, letters of recommendation, Dean’s letters, transcripts, and other supporting credentials are transmitted via the Internet from medical schools to residency program directors. More information about ERAS, a service of the Association of American Medical Colleges (AAMC), is available at www.aamc.org/eras.

Fellow (see “Resident or resident physician”—An individual undertaking post-residency training in a field of research that is not accredited by the ACGME. Some specialties also use “fellow” to designate resident physicians in subspecialty GME programs, but both the AAMC and ACGME prefer “fellow” or “resident physician” to designate individuals in all ACGME-accredited programs.

Fellowship and Residency Electronic Interactive Database Access (FREIDA Online)—An electronic information resource maintained by the AAMC that assists medical students and residents in selecting GME programs. It includes all ACGME-accredited residency programs, with expanded listings for the more than 85% of programs that provide such information as program benefits (including compensation), resident-to-faculty ratio, work schedule, policies, and educational environment. FREIDA became available on-line in a Beta test version in 1996 and became fully operational in 1997; it is currently available through the AMA home page at www.ama-assn.org/freida. The last DOS version of FREIDA was produced in 1996.

Fifth pathway—One of several ways that individuals who obtain their undergraduate medical education abroad can enter GME in the United States. The fifth pathway is a period of supervised clinical training for students who obtained their premedical education in the United States, received undergraduate medical education abroad, and passed Step 1 of the United States Medical Licensing Examination. After these students successfully complete a year of clinical training sponsored by an LCME-accredited US medical school and pass USMLE Step 2, they become eligible for an ACGME-accredited residency as an international medical graduate. (For more information, refer to article in Section 1.)

General specialty program (see also “Core discipline program”—The primary specialty (e.g., anesthesiology, family practice, internal medicine) to which subspecialty programs are attached. Provides resident physicians, under supervision, with the knowledge and skills needed to be practitioners in a specified area of medical practice. General specialty programs function within an institution and are subject to all ACGME accreditation actions, policies, and procedures. Completing an ACGME-accredited residency in a general specialty program is one of the requirements of certification by a specialty board.

GME—Graduate medical education.

Graduate Medical Education Directory—Annual publication recognized as the official list of programs accredited by the ACGME. Known informally as the “Green Book,” the Directory lists all ACGME-accredited programs in 108 specialties and subspecialties, current educational standards (“Program Requirements”) for 107 areas, and the certification requirements of 24 medical specialty boards.

Graduate Year (see also “Program year”—Refers to an individual’s current year of accredited GME; this may or may not correspond to the program year. For example, a resident in pediatric cardiology could be in the first program year of the pediatric cardiology program but in his/her fourth graduate year of GME (including the 3 prior years of pediatrics).

Graduate Year 1 (GY1)—Used in connection with residents and with residency positions to indicate the first year of training after medical school. Individuals in GY1 positions who plan to complete the entire program are counted as enrolled in Graduate Year 1 (GY1), Categorical. Individuals in GY1 positions who are using their first year in a residency program as a prerequisite to enter another specialty or subspecialty program are counted as enrolled in Graduate Year 1 (GY1), Preliminary. Not all specialties offer GY1 positions; in those specialties approved for GY1 positions, some programs do not offer them. Furthermore, although by definition residents in GY1 positions are not required to have prior GME, some residents who fill such positions may have had previous training.

Health care organizations/structures
- An academic medical center (or academic health center) is composed of a medical school, a teaching hospital, and one or more health professions schools. These may be both inpatient and outpatient (ambulatory) sites for training within an academic medical center.
- An ambulatory care site—such as a physician’s office, outpatient or ambulatory clinic, or emergency room—provides care on an outpatient basis (i.e., does not require an overnight stay in a licensed hospital or nursing home bed).
- A group practice involves physicians working in systematic association, with the joint use of equipment and technical personnel and with centralized administration and financial organization. Group practices may be multispecialty or single specialty, open panel or closed panel.
  1. A multispecialty group practice is made up of physicians practicing various specialties/subspecialties who work together.
  2. In a closed-panel system, a managed care organization (MCO) employs a select group of physicians—either directly (i.e., staff-model HMO) or through a contract arrangement with a physician group (i.e., group-model HMO)—who agree to provide care only to patients enrolled in the MCO.
- A health maintenance organization (HMO) handles the financing and the delivery of a broad range of health services to an enrolled population in exchange for a prepaid fee. Four common types of HMOs are:
  1. Staff model—owns and operates its own facilities and directly employs its physicians.
  2. Group model—contracts with an outside physician group practice to provide health care services to HMO enrollees.
  3. Network model—contracts with two or more outside physician groups.
4. IPA model—contracts with physicians in independent practice (IPPs) to provide health care services to enrollees.

Institution—An organization having the primary purpose of providing educational and/or health care services (e.g., a university, medical school, hospital, school of public health, health department, public health agency, organized health care delivery system, medical examiner's office, consortium, or educational foundation). A sponsoring institution is the institution that assumes the ultimate responsibility for a GME program. A major participating institution is an institution in which residents rotate for a required experience of long duration and/or those that require explicit approval by the appropriate RRC prior to utilization. Major participating institutions are listed as part of an accredited program in the Graduate Medical Education Directory.

Note: Hospitals and other institutions that provide rotations of less than one-sixth of the program length or less than a total of six months are not listed in the Directory.

Intern (see "Resident or resident physician")—No longer used by the AAMC or ACGME; replaced by "resident" or "resident physician." Historically, "intern" was used to designate individuals in the first post-MD year of hospital training; less commonly, it designated individuals in the first year of any residency program. Since 1976, the Graduate Medical Education Directory and the ACGME have used "resident" or "resident physician" to designate all individuals in ACGME-accredited programs.

International medical graduate (IMG)—A graduate from a medical school not accredited by the Liaison Committee on Medical Education (LCME).

In-training examination (also known as "in-service examination")—Examinations to gauge residents’ progress toward meeting a residency program’s educational objectives. Certification boards of the American Board of Medical Specialties (ABMS) and medical specialty societies offer in-training examinations on a periodic basis.

LCME—Liaison Committee on Medical Education.

Major participating institution—See "Institution."

Match—See "NRMP."

Medical school affiliation—Institutions that sponsor an accredited program are not required to have a formal relationship with a medical school. Where such a relationship exists, the affiliation is identified by the dean of the medical school as major (M), graduate only (G), or limited (L). Major affiliation signifies that an institution is an important part of the teaching program of the medical school and is a significant unit in the clinical clerkship program. Graduate only affiliation indicates that the institution is affiliated with the medical school only for its graduate programs. Limited affiliation signifies that the institution is affiliated with the medical school's teaching program only for brief, occasional, and/or unique rotations of students or residents.

Medical school number—Unique 6-digit identifier for each medical school.

Medical Student Section (MSS)—A section of the AMA House of Delegates, the AMA-MSS represents 36,000 medical student members of the AMA.

National Resident Matching Program (NRMP)—Informally referred to as the "Match," this process matches GME programs and applicants to those programs. Managed by the Association of American Medical Colleges (AAMC), the NRMP system was developed to provide both applicants and residency program directors an opportunity to consider their options for accepting and offering appointments to residency programs, respectively, and to have their decisions announced at a specific time.

Preliminary positions (see also "Graduate Year 1")—Positions for residents who are obtaining training required to enter another program or specialty. Some residents in preliminary positions may move into permanent positions in the second year. Preliminary positions are usually 1 year in length and usually offered for Graduate Year 1. Internal medicine, surgery, and transitional year programs commonly offer preliminary positions.

Program—The unit of GME specialty training, comprising a series of learning experiences, which is evaluated for accreditation.

Program Accreditation System (PAS)—A database system developed by the ACGME to maintain information on programs, institutions, survey dates, accreditation status, codes, etc.

Program director—The official responsible for maintaining the quality of a GME program so that it meets ACGME accreditation standards. Other duties of the program director include preparing a written statement outlining the program's educational goals; providing an accurate statistical and narrative description of the program as requested by the Residency Review Committee (RRC); and providing for the selection, supervision, and evaluation of residents for appointment to and completion of the program.

Program merge/split/absorption—In a merge, two programs combine to create one new program; the new program becomes the accredited unit and accreditation is voluntarily withdrawn from both former programs. In a split, one program divides into two separate programs and each program receives accreditation. In an absorption, one program takes over the other program; the absorbed program is granted voluntary withdrawal status, while the other program remains accredited.

Program year (see also "Graduate Year")—Refers to the current year of training within a specific program; this may or may not correspond to the graduate year. For example, a resident in pediatric cardiology could be in the first program year of the pediatric cardiology program but in his/her fourth graduate year of GME (including the 3 prior years of pediatrics).

Resident and Fellow Section (RFS)—A section of the AMA House of Delegates, the AMA-RFS represents 40,000 resident members of the AMA.

Residency review committees (RRCs)—The 26 committees within the ACGME system that meet periodically to review programs within their specialty and/or subspecialty, propose Program Requirements for new specialties/subspecialties, and revise requirements for existing specialties/subspecialties.

Resident or resident physician—Any individual at any level in an ACGME-accredited GME program, including subspecialty programs. Local usage might refer to these individuals as interns, house officers, house staff, trainees, fellows, junior faculty, or other comparable terminology.

Section on Medical Schools—A section of the AMA House of Delegates with representation from the 125 LCME-accredited US medical schools.

Sponsoring institution—See "Institution."

Subspecialty program—Provides advanced GME in a narrow field of study within a medical specialty, e.g., geriatric medicine within the field of internal medicine. Most subspecialty programs are subject to ACGME accreditation actions, policies, and procedures.
Completing an ACGME-accredited residency in a particular subspecialty program may qualify the physician to seek certification by the related subspecialty board. Some subspecialty programs are accredited independently of the related general specialty program and are not dependent on a general specialty program. Other subspecialty programs function only in conjunction with an accredited general specialty program, and the subspecialty program's accreditation status is related to the status of the accredited general specialty program. The Residency Review Committee (RRC) determines whether accreditation of a given subspecialty program is dependent on accreditation of the related general specialty program.

Teaching staff—Any individual who has received a formal assignment to teach resident physicians. In some institutions appointment to the medical staff of the hospital constitutes appointment to the teaching staff.

Transitional year program—Broad-based clinical training in an ACGME-accredited residency program that provides a balanced GME curriculum in multiple clinical disciplines. Developed for the year between medical school graduation and a specialty residency program, the transitional year is designed to facilitate the choice of and/or preparation for a specific specialty; it is not meant to prepare participants for the independent practice of medicine. To sponsor a transitional year program, an institution and its affiliate must conduct two or more ACGME-accredited programs that participate in the transitional year.

USMLE (see also “ECFMG number”)—United States Medical Licensing Examination.

USMLE number—Refer to “ECFMG number.”
