## Accredited Programs in Neurological Surgery

### Utah

#### Salt Lake City

**University of Utah Program**  
**Sponsor:** University of Utah Medical Center  
**Prgm Director:** John Kestle, MD, PhD  
**Dept of Neurosurgery**  
**30 N 1900 E, Ste 3B409**  
**Salt Lake City, UT 84132**  
**Tel:** 801-581-3400  
**Fax:** 801-581-3409  
**Email:** Julie.Service@hsc.utah.edu  
**Length:** 5 Yrs  
**ACGME Approved/Offered Positions:** 10  
**Program ID:** 160-49-31-686

### Vermont

#### Burlington

**University of Vermont Program**  
**Sponsor:** Fletcher Allen Health Care  
**Prgm Director:** Bruce F Tramme, MD  
**111 Colchester Ave**  
**Burlington, VT 05401**  
**Tel:** 802-847-3075  
**Fax:** 802-847-0980  
**Length:** 5 Yrs  
**ACGME Approved/Offered Positions:** 5  
**Program ID:** 160-59-21-101

### Virginia

#### Charlottesville

**University of Virginia Program**  
**Sponsor:** University of Virginia Medical Center  
**Prgm Director:** John A Jane Sr, MD, PhD  
**PO Box 802109**  
**Charlottesville, VA 22908**  
**Tel:** 434-982-3244  
**Fax:** 434-243-2664  
**Length:** 5 Yrs  
**ACGME Approved/Offered Positions:** 10  
**Program ID:** 160-51-21-988

### Wisconsin

#### Madison

**University of Wisconsin Program**  
**Sponsor:** University of Wisconsin Hospital and Clinics  
**Prgm Director:** John E Masters, MD  
**PO Box 8183**  
**2400 Health Science Center**  
**Madison, WI 53792**  
**Tel:** 608-263-9505  
**Length:** 5 Yrs  
**ACGME Approved/Offered Positions:** 8  
**Program ID:** 160-56-21-092

### Washington

#### Seattle

**University of Washington Program**  
**Sponsor:** University of Washington School of Medicine  
**Prgm Director:** Richard G Ellenbogen, MD  
**255 Ninth Avenue**  
**Seattle, WA 98104**

## Pediatric Infectious Diseases (Pediatrics)

### Alabama

**Birmingham**  
University of Alabama Medical Center Program  
**Sponsor:** University of Alabama Hospital  
**Pgm Director:** Pravin R Asami, MD  
**Telephone:** 205 429-3336  
**Fax:** 205 361-3551  
**Program ID:** 335-08-12-006

### Arkansas

**Little Rock**  
University of Arkansas for Medical Sciences Program  
**Sponsor:** University of Arkansas College of Medicine  
**Pgm Director:** Gordon E Schutte, MD  
**Telephone:** 501 364-1416  
**Fax:** 501 364-3551  
**Program ID:** 335-04-21-002

### California

**Los Angeles**  
Cedars-Sinai Medical Center Program  
**Sponsor:** Cedars-Sinai Medical Center  
**Pgm Director:** Moshe Arditis, MD  
**Telephone:** 213 476-8016  
**Fax:** 213 476-1343  
**Program ID:** 335-04-22-005

**Children's Hospital Los Angeles Program**  
**Sponsor:** Children's Hospital Los Angeles  
**Pgm Director:** Paul A Krosgstad, MD, MS  
**Telephone:** 310 206-5295  
**Fax:** 310 206-4764  
**Program ID:** 335-05-11-005

**UCLA Medical Center Program**  
**Sponsor:** UCLA Medical Center/UCLA David Geffen School of Medicine  
**Telephone:** 310 206-5295  
**Fax:** 310 206-4764  
**Program ID:** 335-05-11-005

**San Francisco**  
University of California (San Francisco) Program  
**Sponsor:** University of California (San Francisco) School of Medicine  
**Telephone:** 415 723-5858  
**Fax:** 415 723-8040  
**Program ID:** 335-05-23-005

**Stanford**  
Stanford University Program  
**Sponsor:** Stanford University Hospital  
**Telephone:** 650 723-5858  
**Fax:** 650 723-8040  
**Program ID:** 335-05-23-005

**Torrance**  
Los Angeles County-Harbor-UCLA Medical Center Program  
**Sponsor:** Los Angeles County-Harbor-UCLA Medical Center  
**Pgm Director:** Margaret A Keller, MD  
**Telephone:** 310 222-4175  
**Fax:** 310 320-2271  
**Program ID:** 335-05-21-010

### Colorado

**Denver**  
University of Colorado Program  
**Sponsor:** University of Colorado School of Medicine  
**Telephone:** 303 315-4630  
**Fax:** 303 387-2707  
**Program ID:** 335-07-21-011

### Connecticut

**New Haven**  
Yale-New Haven Medical Center Program  
**Sponsor:** Yale-New Haven Hospital  
**Pgm Director:** George Miller, MD  
**Telephone:** 203 785-4758  
**Fax:** 203 785-4691  
**Program ID:** 335-08-21-012

### District of Columbia

**Washington**  
Children's National Medical Center/George Washington University Program  
**Sponsor:** Children's National Medical Center  
**Pgm Director:** Barbara A Jantausch, MD  
**Telephone:** 202 884-6151  
**Fax:** 202 884-3850  
**Program ID:** 335-10-21-013

### Florida

**Jacksonville**  
University of Florida Health Science Center/Jacksonville Program  
**Sponsor:** University of Florida College of Medicine at Jacksonville  
**Telephone:** 904 244-5341  
**Fax:** 904 244-5341

Program ID: 429-24-15-002

Cardiovascular Disease (Internal Medicine)
New York Hospital Medical Center of Queens/Cornell University Medical College Program
Flushing, NY
Program ID: 141-35-12-209
New York Presbyterian Hospital (Cornell Campus)/Brooklyn Hospital Center Program
New York, NY
Program ID: 141-35-31-208

Child and Adolescent Psychiatry (Psychiatry)
Maricopa Medical Center Program
Phoenix, AZ
Program ID: 405-02-11-131
Austin Medical Education Programs of Seton Healthcare Network Program
Austin, TX
Program ID: 405-45-15-181

Child Neurology (Neurology)
University of Virginia Program
Charlottesville, VA
Program ID: 185-51-31-097

Clinical Cardiac Electrophysiology (Internal Medicine)
UMDNJ-Robert Wood Johnson Medical School (Camden) Program
Camden, NJ
Program ID: 154-33-11-096
Baylor University Medical Center Program
Dallas, TX
Program ID: 154-49-13-100

Clinical Neurophysiology (Neurology)
University of California (San Diego) Program
San Diego, CA
Program ID: 187-05-13-110
Georgetown University Program
Washington, DC
Program ID: 187-10-21-111

Craniofacial Surgery (Plastic Surgery)
Indiana University School of Medicine Program
Indianapolis, IN
Program ID: 861-17-22-005
Medical College of Wisconsin Program
Milwaukee, WI
Program ID: 861-66-31-004

Cytopathology (Pathology)
Stanford University Program
Stanford, CA
Program ID: 807-65-13-006
New Programs

Dermatology
Pitt County Memorial Hospital/East Carolina University Program
Greenville, NC
Program ID: 060-36-13-132

Developmental-Behavioral Pediatrics (Pediatrics)
University of Arkansas for Medical Sciences Program

Medical Genetics
Washington University/B-JH/SLCH Consortium Program
St Louis, MO
Program ID: 130-28-22-079

University of Virginia Program
Charlottesville, VA
Program ID: 130-51-21-055

Medical Toxicology (Emergency Medicine)
University of Arizona Program
Tucson, AZ
Program ID: 118-03-31-024

University of Pennsylvania (Children's Hospital) Program
Philadelphia, PA
Program ID: 118-41-33-023

Molecular Genetic Pathology
Brigham and Women's Hospital/Harvard Medical School Program
Boston, MA
Program ID: 190-24-13-010

Mayo School of Graduate Medical Education (Rochester) Program
Rochester, MN
Program ID: 190-26-12-011

University of Pittsburgh Medical Center Medical Education Program
Pittsburgh, PA
Program ID: 190-41-21-009

Neurodevelopmental Disabilities
(Neurology)
McGaw Medical Center of Northwestern University Program
Chicago, IL
Program ID: 186-16-13-005

Children's Hospital/Beth Israel Deaconess Medical Center/Harvard Medical School Program
Boston, MA
Program ID: 186-24-22-002

Cincinnati Children's Hospital Medical Center/University of Cincinnati College of Medicine Program
Cincinnati, OH
Program ID: 186-38-21-004

University of Pittsburgh Medical Center Medical Education Program
Pittsburgh, PA
Program ID: 186-41-13-007

Baylor College of Medicine Program
Houston, TX
Program ID: 186-45-33-003

Neurological Surgery
University of Arizona Program
Tucson, AZ
Program ID: 160-03-21-112

Neurology
Mayo School of Graduate Medical Education (Scottsdale) Program
Scottsdale, AZ
Program ID: 180-03-11-150

Cleveland Clinic Hospital (Florida) Program
Weston, FL
Program ID: 180-11-22-152

Neuroradiology
(Radiology-Diagnostic)
University of California (Davis) Health System Program
Sacramento, CA
Program ID: 423-06-13-104

Drexel University College of Medicine (MCP Hahnemann) Program
Philadelphia, PA
Program ID: 423-41-31-106

Nuclear Radiology
(Radiology-Diagnostic)
Los Angeles County-Harbor-UCLA Medical Center Program
Torrance, CA
Program ID: 425-05-31-065

Pain Management
(Anesthesiology)
University of Southern California/LAC+USC Medical Center Program
Los Angeles, CA
Program ID: 048-05-22-111

Caritas St. Elizabeth's Medical Center Program
Boston, MA
Program ID: 048-24-13-112

Wayne State University/Detroit Medical Center Program
Detroit, MI
Program ID: 048-25-11-109

Pain Management (Neurology)
Medical College of Georgia Program
Augusta, GA
Program ID: 181-12-21-001

Pediatric Anesthesiology
(Anesthesiology)
Oregon Health & Science University Program
Portland, OR
Program ID: 042-49-23-052

Penn State University/Milton S Hershey Medical Center Program
Hershey, PA
Program ID: 042-41-31-048

Pediatric Cardiology (Pediatrics)
Medical College of Wisconsin Program
Milwaukee, WI
Program ID: 325-56-13-076

Pediatric Critical Care Medicine (Pediatrics)
Children's Hospital/Ohio State University Program
Columbus, OH
Program ID: 323-38-22-078

Pediatric Emergency Medicine (Pediatrics)
Phoenix Children's Hospital/Maricopa Medical Center Program
Phoenix, AZ
Program ID: 324-05-21-050

Case Western Reserve University/University Hospitals of Cleveland Program
Cleveland, OH
Program ID: 324-38-31-049

Pediatric Hematology/Oncology (Pediatrics)
Grand Rapids Medical Education and Research Center/Michigan State University Program
Grand Rapids, MI
Program ID: 237-25-13-097

Pediatric Nephrology (Pediatrics)
University of North Carolina Hospitals Program
Chapel Hill, NC
Program ID: 328-36-22-070
New Programs

Pediatric Rheumatology (Pediatrics)
Children's Hospital Los Angeles Program
Los Angeles, CA
Program ID: 381-46-01-928

University of Pittsburgh Medical Center Medical Education Program
Pittsburgh, PA
Program ID: 381-41-13-026

Medical College of Wisconsin Program
Milwaukee, WI
Program ID: 381-56-22-027

Pediatric Sports Medicine (Pediatrics)
Children's Hospital/Boston Medical Center Program
Boston, MA
Program ID: 335-24-31-009

Plastic Surgery
University of Nevada School of Medicine Program
Las Vegas, NV
Program ID: 860-31-21-138

Psychiatry
UCLA-Kern Medical Center Program
Bakersfield, CA
Program ID: 400-05-22-298

University of Nevada School of Medicine (Las Vegas) Program
Las Vegas, NV
Program ID: 400-31-21-297

Austin Medical Education Programs of Seton Healthcare Network Program
Austin, TX
Program ID: 400-48-13-299

Radiation Oncology
California Pacific Medical Center Program
San Francisco, CA
Program ID: 430-06-23-012

University of Colorado Program
Denver, CO
Program ID: 430-07-13-130

Radiology-Diagnostic
Bronx-Lebanon Hospital Center Program
Bronx, NY
Program ID: 428-35-12-128

Naval Medical Center (Portsmouth) Program
Portsmouth, VA
Program ID: 430-51-13-252

Selective Pathology (Pathology)
Office of the Chief Medical Examiner-City of New York Program
New York, NY
Program ID: 301-35-31-033

University of Pittsburgh Medical Center Medical Education/Magee-Women's Hospital Program
Pittsburgh, PA
Program ID: 301-41-23-035

Virginia Commonwealth University Health System Program
Richmond, VA
Program ID: 301-51-12-034

Sports Medicine (Emergency Medicine)
University of Rochester Program
Rochester, NY
Program ID: 116-35-31-004

Sports Medicine (Family Practice)
Southern Illinois University (Quincy) Program
Quincy, IL
Program ID: 127-16-22-079

University of Massachusetts (Fitchburg) Program
Worcester, MA
Program ID: 127-24-13-086

Montana Family Practice Sports Medicine Program
Billings, MT
Program ID: 127-29-11-078

Surgical Critical Care (General Surgery)
North Shore-Long Island Jewish Health System Program
Great Neck, NY
Program ID: 443-35-31-100

The University of Texas Medical Branch Program
Galveston, TX
Program ID: 442-48-31-098

University of Virginia Program
Charlottesville, VA
Program ID: 442-51-13-097

Thoracic Surgery
Case Western Reserve University/University Hospitals of Cleveland Program
Cleveland, OH
Program ID: 488-38-21-074

Transitional Year
Tufts-New England Medical Center Program
Boston, MA
Program ID: 999-24-00-199

Undersea and Hyperbaric Medicine (Preventive Medicine)
Duke University Hospital Program
Durham, NC
Program ID: 399-36-12-001

Urology
University of Tennessee Medical Center at Knoxville Program
Knoxville, TN
Program ID: 488-47-11-181

Vascular Neurology (Neurology)
UCLA Medical Center Program
Los Angeles, CA
Program ID: 188-05-12-007

Stanford University Program
Stanford, CA
Program ID: 188-05-33-006

Medical College of Georgia Program
Augusta, GA
Program ID: 188-12-21-011

Indiana University School of Medicine Program
Indianapolis, IN
Program ID: 188-17-12-013

Massachusetts General Hospital/Brigham and Women's Hospital/Harvard Medical School Program
Boston, MA
Program ID: 188-24-31-018

Boston University Medical Center Program
Boston, MA
Program ID: 188-24-31-010

UMDNJ-New Jersey Medical School Program
Newark, NJ
Program ID: 188-33-13-005

University of Rochester Program
Rochester, NY
Program ID: 188-35-12-016

Cleveland Clinic Foundation Program
Cleveland, OH
Program ID: 188-38-12-009

University Hospital/University of Cincinnati College of Medicine Program
Cincinnati, OH
Program ID: 188-35-13-019

University of Texas Southwestern Medical School Program
Dallas, TX
Program ID: 188-48-31-008

University of Texas at Houston Program
Houston, TX
Program ID: 188-48-31-014

University of Virginia Program
Charlottesville, VA
Program ID: 188-51-31-017
Withdrawn Programs

The accreditation of the following programs was withdrawn or voluntarily withdrawn since the publication of the 2003-2004 Directory. These programs are not listed in this year's edition. Note: Any programs withdrawn after January 20, 2004, when ACGME transferred its data to the AMA for publication, are not shown on this list and would be listed in Section III.

Adolescent Medicine (Pediatrics)

UCLA Medical Center Program
Los Angeles, CA
Program ID: 321-05-01-004

Adult Reconstructive Orthopaedics (Orthopaedic Surgery)

University of Kansas (Wichita) Program
Wichita, KS
Program ID: 261-19-13-027

Allergy and Immunology

New York Presbyterian Hospital (Cornell Campus) Program
New York, NY
Program ID: 620-35-21-046

New York Presbyterian Hospital (Cornell Campus) Program A
New York, NY
Program ID: 620-35-21-084

Blood Banking/Transfusion Medicine (Pathology)

University of Connecticut Program
Farmington, CT
Program ID: 305-08-21-025

Cardiovascular Disease (Internal Medicine)

Georgetown University Hospital Program
Washington, DC
Program ID: 141-19-21-107

Brooklyn Hospital Center Program
Brooklyn, NY
Program ID: 141-35-12-166

San Juan City Hospital Program
San Juan, PR
Program ID: 141-42-11-118

Chemical Pathology (Pathology)

University of Texas Southwestern Medical School Program
Dallas, TX
Program ID: 306-48-21-012

Child and Adolescent Psychiatry (Psychiatry)

Austin State Hospital Program
Austin, TX
Program ID: 405-48-12-122

Clinical and Laboratory Immunology (Allergy and Immunology)

Nassau University Medical Center Program
East Meadow, NY
Program ID: 625-05-21-015

San Antonio Uniformed Services Health Education Consortium Program
Lackland AFB, TX
Program ID: 625-48-31-017

Critical Care Medicine (Internal Medicine)

UCLA Medical Center Program
Los Angeles, CA
Program ID: 142-05-11-007

Cytopathology (Pathology)

Georgetown University Hospital Program
Washington, DC
Program ID: 907-10-21-089

Dermatopathology (Dermatology and Pathology)

Texas Tech University (Lubbock) Program
Lubbock, TX
Program ID: 190-48-21-066

Endocrinology, Diabetes, and Metabolism (Internal Medicine)

San Juan City Hospital Program
San Juan, PR
Program ID: 143-42-11-082

Family Practice

Rush University Medical Center/Illinois Masonic Medical Center Program
Chicago, IL
Program ID: 120-16-21-543

Loyola University/Provident Hospital of Cook County Program
Chicago, IL
Program ID: 120-16-21-612

University of Kentucky Medical Center Rural Program
Corbin, KY
Program ID: 120-30-21-643

Geisinger Health System Program
Danville, PA
Program ID: 120-41-11-392

Forensic Pathology (Pathology)

San Bernardino County Coroner's Office Program
San Bernardino, CA
Program ID: 310-05-21-062

Georgia Bureau of Investigation-Division of Forensic Sciences Program
Decatur, GA
Program ID: 310-12-31-082

Boston University Medical Center Program
Boston, MA
Program ID: 310-24-21-009

Office of the Chief Medical Examiner Program
Oklahoma City, OK
Program ID: 310-39-11-022

Geriatric Medicine (Internal Medicine)

Cleveland Clinic Foundation (Florida) Program
Weston, FL
Program ID: 151-11-21-138

New York Medical College at Westchester Medical Center Program
Valhalla, NY
Program ID: 151-35-11-036

Geriatric Psychiatry (Psychiatry)

Rush University Medical Center Program
Chicago, IL
Program ID: 407-16-13-006

Tufts-New England Medical Center Program
Boston, MA
Program ID: 407-24-12-009

Vanderbilt University Program
Nashville, TN
Program ID: 407-47-21-066

Eastern Virginia Medical School Program
Norfolk, VA
Program ID: 497-51-31-053

Hand Surgery (Plastic Surgery)

Yale-New Haven Medical Center Program
New Haven, CT
Program ID: 803-08-21-024

Hematology (Internal Medicine)

Louisiana State University Program
New Orleans, LA
Program ID: 145-31-21-173

Wayne State University/Detroit Medical Center Program
Detroit, MI
Program ID: 145-25-21-186

Albany Medical Center Program
Albany, NY
Program ID: 145-35-31-026

Hematology (Pathology)

University of Maryland Program
Baltimore, MD
Program ID: 311-35-21-005

Infectious Disease (Internal Medicine)

Albany Medical Center Program
Albany, NY
Program ID: 146-35-31-027
## Internal Medicine
- Tucson Hospitals Medical Education Program
  - Tucson, AZ
  - Program ID: 140-03-21-028
- Cleveland Clinic Foundation (Florida) Program
  - Weston, FL
  - Program ID: 140-11-12-026
- Methodist Hospitals of Memphis-Central Program
  - Memphis, TN
  - Program ID: 140-47-31-411

## Interventional Cardiology (Internal Medicine)
- Georgetown University Hospital Program
  - Washington, DC
  - Program ID: 153-10-31-007

## Medical Genetics
- University of Iowa Hospitals and Clinics Program
  - Iowa City, IA
  - Program ID: 130-18-21-004
- Boston University Medical Center Program
  - Boston, MA
  - Program ID: 130-24-31-029

## Neonatal-Perinatal Medicine (Pediatrics)
- North Shore University Hospital/ NYU School of Medicine Program
  - Manhasset, NY
  - Program ID: 328-35-21-073
- Albert Einstein Healthcare Network Program
  - Philadelphia, PA
  - Program ID: 329-41-11-097

## Neurological Surgery
- SUNY Health Science Center at Brooklyn Program
  - Brooklyn, NY
  - Program ID: 160-35-21-056

## Neuropathology (Pathology)
- University of Iowa Hospitals and Clinics Program
  - Iowa City, IA
  - Program ID: 315-18-21-016
- Tulane University Program
  - New Orleans, LA
  - Program ID: 315-21-12-090
- SUNY at Stony Brook Program
  - Stony Brook, NY
  - Program ID: 315-35-21-065
- Case Western Reserve University/University Hospitals of Cleveland Program
  - Cleveland, OH
  - Program ID: 318-35-11-037

## Neuroradiology (Radiology-Diagnostic)
- Loyola University Program
  - Maywood, IL
  - Program ID: 423-16-21-010

## Nuclear Radiology (Radiology-Diagnostic)
- Rush University Medical Center Program
  - Chicago, IL
  - Program ID: 425-16-21-049
- Brigham and Women's Hospital/Harvard Medical School Program
  - Boston, MA
  - Program ID: 425-24-21-036
- St Barnabas Medical Center Program
  - Livingston, NJ
  - Program ID: 425-33-21-037

## Oncology (Internal Medicine)
- Louisiana State University Program
  - New Orleans, LA
  - Program ID: 147-21-21-058
- Wayne State University/Detroit Medical Center Program
  - Detroit, MI
  - Program ID: 147-25-21-042
- Providence Hospital and Medical Centers Program
  - Southfield, MI
  - Program ID: 147-35-21-155
- Albany Medical Center Program
  - Albany, NY
  - Program ID: 147-35-31-026

## Ophthalmology
- UMDNJ-Robert Wood Johnson Medical School (Camden) Program
  - Camden, NJ
  - Program ID: 249-33-21-172

## Orthopaedic Sports Medicine (Orthopaedic Surgery)
- University of Tennessee College of Medicine at Chattanooga Program
  - Knoxville, TN
  - Program ID: 268-47-21-092

## Pain Management (Anesthesiology)
- Tufts-New England Medical Center Program
  - Boston, MA
  - Program ID: 048-24-21-091
- UMDNJ-New Jersey Medical School Program
  - Newark, NJ
  - Program ID: 048-33-21-014
- Albany Medical Center Program
  - Albany, NY
  - Program ID: 048-35-21-016

## Pathology-Anatomic and Clinical
- VA Greater Los Angeles Healthcare System Program
  - Los Angeles, CA
  - Program ID: 300-05-31-035

## Pediatric Anesthesiology (Anesthesiology)
- University of Texas Medical Branch Hospitals Program
  - Galveston, TX
  - Program ID: 042-48-31-034

## Pediatric Critical Care Medicine (Pediatrics)
- Georgetown University Hospital Program
  - Washington, DC
  - Program ID: 325-10-21-058
- University of Florida Health Science Center/Jacksonville Program
  - Jacksonville, FL
  - Program ID: 325-11-21-046

## Pediatric Emergency Medicine (Emergency Medicine)
- Drexel University College of Medicine (MCP Hahnemann) Program
  - Philadelphia, PA
  - Program ID: 114-41-21-003

## Pediatric Gastroenterology (Pediatrics)
- University of Wisconsin Program
  - Madison, WI
  - Program ID: 332-56-31-049

## Pediatric Hematology/Oncology (Pediatrics)
- University of Texas Health Science Center at San Antonio Program
  - San Antonio, TX
  - Program ID: 327-48-21-047

## Pediatric Orthopaedics (Orthopaedic Surgery)
- University of California (San Diego) Program
  - San Diego, CA
  - Program ID: 265-05-21-099

## Pediatric Radiology (Radiology-Diagnostic)
- University of Alabama Medical Center Program
  - Birmingham, AL
  - Program ID: 424-01-21-004

## Pediatric Rheumatology (Pediatrics)
- Children's Hospital of Orange County Program
  - Orange, CA
  - Program ID: 331-05-21-001

## Pediatric Surgery (General Surgery)
- SUNY Health Science Center at Brooklyn Program
  - Brooklyn, NY
  - Program ID: 445-35-11-007
Pediatrics
Bridgeport Hospital/Yale University Program
Bridgeport, CT
Program ID: 320-08-31-044

Howard University Program
Washington, DC

Section V
Graduate Medical Education Teaching Institutions

Section V lists hospitals and organizations that sponsor graduate medical education (GME) programs or participate in GME. Sponsoring institutions assume final responsibility for a GME program. Most GME programs are sponsored by specific clinical departments within a hospital, another health care institution such as a medical school, or an educational consortium. Major participating institutions include hospitals or other sites recognized by at least one residency review committee as providing a major portion of required GME. Hospitals and other institutions that provide rotations of less than one-sixth of the program length or less than a total of 6 months are not listed in the Directory.

All institutions that sponsor GME programs or participate in GME are listed in alphabetical order by state and city. Each listing includes the institution name, address, and identification code. Also provided are codes of medical schools affiliated with each institution (where applicable) and abbreviations for the specialty and subspecialty programs affiliated with each institution. (A key for specialty and subspecialty abbreviation codes is provided on the inside front cover of this Directory.)

Candidates seeking a residency should refer to the list of programs in Section III. Applications for a residency position should be addressed to the program director rather than to an institution.

Relationships Between Hospitals and Medical Schools (Medical School Affiliation)
Hospitals that sponsor an accredited program are not required to have a formal relationship with a medical school. Where such a relationship exists, the affiliation is identified by the dean of the medical school as M (major), G (graduate only), or L (limited). The medical school associated with the code number in this listing is identified in Appendix D.

Major affiliation (M) signifies that an institution is an important part of the teaching program of the medical school and is a major unit in the clinical clerkship program. Major teaching institutions provide clerkship experience in two or more of the major specialties: internal medicine, surgery, pediatrics, and obstetrics-gynecology. An institution responsible for most of the teaching in a single specialty, such as psychiatry or pediatrics, may also be considered a major affiliation. In a major teaching institution, medical students serve clinical clerkships regularly on inpatient services, under the direct supervision of medical school faculty. A major teaching institution may or may not be used for medical school residencies.

Graduate affiliation (G) indicates that the institution is affiliated with the medical school only for its graduate programs and that one or more of the following arrangements is in effect:
1. House staff of the GME programs are selected by officials of a medical school department or by a joint committee of the institution teaching staff and medical school faculty.
2. Medical school faculty (other than the institution's attending staff) are regularly scheduled to participate in the teaching programs of the institution. No graduate affiliation is indicated if medical school faculty participation at the institution is limited to an occasional lecture or consultation visit, or if the institution's residents attend medical school teaching conferences only as visitors.
3. A contractual arrangement (with or without financial commitment) specifies the medical school participation in the organization and supervision of the GME program in the institution.
4. There is some degree of exchange of residents between this institution and the principal teaching institution of the medical school.

Limited affiliation (L) signifies that the institution is affiliated with the medical school's teaching program only for brief and/or unique rotations of students or residents.

Combined specialty programs in two or more specialties are approved by each respective specialty board; resident physicians completing these programs are eligible for board certification. The Accreditation Council for Graduate Medical Education (ACGME) and its Residency Review Committees do not accredit combined programs; instead, they separately accredit the core specialty programs that form the combined program. In 2001, the ACGME began to list all active combined programs in its accreditation database and on its Web site (www.acgme.org); program information is also available via the AMA's FREIDA Online Web site at www.ama-assn.org/go/freida. Requests for information about the guidelines for these programs should be directed to the specialty boards at the addresses listed in Appendix B. Applicants to combined specialty programs are encouraged to review requirements for admission to the certification process of each board, also listed in Appendix B.

### Diagnostic Radiology/Nuclear Medicine

The American Board of Radiology (ABR) and the American Board of Nuclear Medicine (ABNM) offer dual certification for candidates who have satisfactorily completed a combined total of 6 years of suitable accredited training in programs approved by both boards and successfully passed the certifying examination of both boards.

To be eligible for dual certification, a resident must obtain residency training in diagnostic radiology and nuclear medicine that must include a) a preparatory clinical year in an ACGME-accredited program and b) 4 years of education in an ACGME-accredited diagnostic radiology program that includes 6 months of nuclear medicine training, followed by c) 1 year of education in a combined nuclear medicine and nuclear radiology program. Certifying examinations of each board cannot be taken until all required years of training in both specialties are satisfactorily completed.

### Internal Medicine/Dermatology

The American Board of Internal Medicine and the American Board of Dermatology offer dual certification for candidates who have completed at least 2½ years of suitable accredited training in each specialty. A combined residency consists of 5 years of balanced education in the two disciplines. It is strongly recommended that the participating residencies be in the same academic health center.

To be eligible for dual certification, the resident must satisfactorily complete 60 months of combined education, which must be verified by the directors of both programs. The certifying examinations cannot be taken until all 5 years are completed.

### Internal Medicine/Emergency Medicine

The American Board of Internal Medicine and the American Board of Emergency Medicine offer dual certification for candidates who have completed at least 2½ years of suitable accredited training in each specialty. A combined residency consists of 5 years of balanced education in the two disciplines. It is strongly recommended that the participating residencies be in the same academic health center.

To be eligible for dual certification, the resident must satisfactorily complete 00 months of combined education, which must be verified by the directors of both programs. The certifying examinations cannot be taken until all 5 years are completed.

### Internal Medicine/Emergency Medicine/Critical Care Medicine

The American Board of Internal Medicine and the American Board of Emergency Medicine offer triple certification for candidates who complete a 6-year (72-month) integrated, coherent program of combined training in internal medicine, emergency medicine, and critical care medicine, approved by both boards.

Upon successful completion and verification of the first 5 years of this program, candidates may apply to take the certification exami-
nations in internal medicine and emergency medicine. To meet eligibility for certification in critical care medicine, the candidate must: 1) have satisfactorily completed the 6-year combined program; 2) be certified by the American Board of Internal Medicine; and 3) have met the certification requirements of the American Board of Emergency Medicine.

**Internal Medicine/Family Practice**
The American Board of Internal Medicine and the American Board of Family Practice offer dual certification for candidates who have satisfactorily completed 4 years of combined training in programs approved by both boards.

To be eligible for dual certification, combined residency training in internal medicine and family practice must include at least 48 months of balanced education in the two disciplines and be verified by the training director(s) of the program. The written certifying examinations cannot be taken until all required years in both specialties are completed.

**Internal Medicine/Medical Genetics**
The American Board of Internal Medicine and the American Board of Medical Genetics have approved a pathway leading to admissibility to the certification processes in internal medicine and medical genetics for candidates who have satisfactorily completed 5 years of combined training in internal medicine and medical genetics in an approved training track, beginning with a GYI in internal medicine. Such training, which must be verified by the program directors of both specialties, is intended to provide educational and practical experiences in each discipline that are equivalent to those in the training programs of the parent specialties.

This combined residency training must be conducted in the same institution and its affiliated hospitals. There should be no interruption in training.

**Internal Medicine/Neurology**
The American Board of Internal Medicine and the American Board of Psychiatry and Neurology offer dual certification for candidates who have completed 5 years of combined training suitable to both boards. A combined residency in internal medicine and neurology must include at least 5 years of coherent education integral to residencies in the two disciplines. It is strongly recommended that the participating residencies be in the same institution.

To meet eligibility requirements for dual certification, the resident must satisfactorily complete 60 months of combined education, which must be verified by the directors of both programs. The written certifying examinations cannot be taken until required training in a specialty has been satisfactorily completed. The certifying examination in internal medicine cannot be taken prior to the fall of the fifth year in the combined program.

**Internal Medicine/Nuclear Medicine**
The American Board of Internal Medicine and the American Board of Nuclear Medicine offer dual certification in internal medicine and nuclear medicine. A combined residency must include at least 5 years of coherent training integral to residencies in the two disciplines. Participating residencies must be in the same institution.

To meet eligibility requirements for dual certification, the resident must satisfactorily complete 60 months of combined education, which must be verified by the directors of both programs. The written certifying examinations cannot be taken until all required years in both specialties are satisfactorily completed.

**Internal Medicine/Pediatrics**
The American Board of Internal Medicine and the American Board of Pediatrics offer dual certification in internal medicine and pediatrics. A combined residency must include at least 2 years in each specialty, for a total of 4 years of coherent training integral to residencies in the two disciplines. The participating residencies should be in the same academic health center. Continuity clinics in each specialty should be provided throughout the 4 years.

To meet eligibility requirements for dual certification, the resident must satisfactorily complete 48 months of combined education, and clinical competence in both specialties must be verified by the directors of both programs. The certifying examinations cannot be taken until all required years in both specialties are satisfactorily completed.

**Internal Medicine/Physical Medicine and Rehabilitation**
The American Board of Internal Medicine and the American Board of Physical Medicine and Rehabilitation offer dual certification for candidates who have completed at least 2½ years of suitable accredited training in each specialty. A combined residency must include at least 5 years of coherent training integral to residencies in the two disciplines. It is strongly recommended that the participating residencies be in the same institution.

To meet eligibility requirements for dual certification, the resident must satisfactorily complete 60 months of combined education, which must be verified by the directors of both programs. The written certifying examinations cannot be taken until required training in a specialty has been satisfactorily completed. The certifying examination in internal medicine cannot be taken prior to the fall of the fifth year in the combined program.

**Internal Medicine/Preventive Medicine**
The American Board of Internal Medicine (ABIM) and the American Board of Preventive Medicine (ABPM) offer dual certification for candidates who have completed a minimum of 4 years of accredited training in combined internal medicine/preventive medicine programs that meet the Guidelines for Combined Internal Medicine-Preventive Medicine Residency Training Programs approved by ABPM and ABIM. In addition to satisfactory completion of the combined training programs, applicants for the ABPM certifying examination must have completed the required year of preventive medicine practice to qualify.

**Internal Medicine/Psychiatry**
The American Board of Internal Medicine and the American Board of Psychiatry and Neurology offer dual certification in internal medicine and psychiatry. A combined residency must include at least 5 years of coherent education integral to residencies in the two disciplines. Participating residencies must be in the same institution.

To meet eligibility requirements for dual certification, the resident must satisfactorily complete 60 months of combined education, which must be verified by the directors of both programs. The written certifying examinations cannot be taken until all required years of training in both specialties are satisfactorily completed.

**Neurology/Nuclear Medicine**
The American Board of Psychiatry and Neurology and the American Board of Nuclear Medicine offer dual certification in neurology and nuclear medicine. A combined residency must include 5 years of combined education. It is strongly recommended that the participating residencies be in the same institution.

To qualify for dual certification, the resident must satisfactorily complete 60 months of combined education, which must be verified by the respective directors of both programs. The written certifying examinations may not be taken until all required years of training in both specialties are satisfactorily completed.
Neurology/Physical Medicine and Rehabilitation
The American Board of Psychiatry and Neurology and the American Board of Physical Medicine and Rehabilitation offer dual certification in neurology and physical medicine and rehabilitation. A combined residency must include 5 years of combined education. This combined training must follow a year in a residency program that meets the requirements for neurology and should be completed in the same institution. All required years in both specialties must be satisfactorily completed prior to admission to the certifying examinations of each board.

Neurology/Diagnostic Radiology/Neuroradiology
The American Board of Psychiatry and Neurology and the American Board of Radiology offer certification in neurology, diagnostic radiology, and neuroradiology. The combined residency must include at least 7 years of coherent training integral to all three residencies. It is recommended that the participating residencies be in the same academic health center.

To meet eligibility requirements for triple certification, the resident must satisfactorily complete 84 months of combined training, which must be verified by the directors of each program. Lacking verification of acceptable clinical competence in the combined program, the resident must satisfactorily complete the standard length of residency training and all other requirements before each certifying examination may be taken. Applicants may not take the certifying examination until all required years of training have been completed. In order to be eligible for the neuroradiology exam, a resident must have completed certification in both diagnostic radiology and neurology.

Pediatrics/Dermatology
The American Board of Pediatrics and the American Board of Dermatology offer dual certification for candidates who fulfill the requirements of both boards by completing joint training in 5 years. All 5 years should be completed in the same combined program; exceptions must be approved in advance by both boards. Applicants may not take the certifying examinations until all required years in both specialties have been completed.

Pediatrics/Emergency Medicine
The American Board of Pediatrics and the American Board of Emergency Medicine offer dual certification for candidates who fulfill the requirements of both boards by completing joint training in 5 years. All 5 years should be completed in the same combined program; exceptions must be approved in advance by both boards. Applicants may not take the certifying examinations until all required years in both specialties have been completed.

Pediatrics/Medical Genetics
The American Board of Pediatrics and the American Board of Medical Genetics offer dual certification for candidates who fulfill the requirements of both boards by completing joint training in 5 years. All 5 years should be completed in the same combined program; exceptions must be approved in advance by both boards. Applicants may not take the certifying examinations until all required years in both specialties have been completed.

Pediatrics/Physical Medicine and Rehabilitation
The American Board of Pediatrics and the American Board of Physical Medicine and Rehabilitation permit applicants interested in pediatric rehabilitation to qualify for admission to the certifying examinations of both boards by completing a 5-year combined program. All 5 years should be completed at one academic institution; exceptions must be approved in advance by both boards.

Applicants may not take the certifying examinations until all required years in both specialties have been completed.

Pediatrics/Psychiatry/Child and Adolescent Psychiatry
The American Board of Pediatrics, the American Board of Psychiatry and Neurology, and the Committee on Certification in Child and Adolescent Psychiatry have developed a committee that is overseeing training via a different format. This is a 5-year curriculum with 24 months of pediatrics, 18 months of adult psychiatry, and 18 months of child and adolescent psychiatry. Completion of the program will satisfy the training requirement for certification in all three areas. Applicants pursuing training in these programs may not take the certifying examinations until all training has been completed. Credit for training via this route may be obtained only by training in one of these programs.

Psychiatry/Family Practice
The American Board of Family Practice and the American Board of Psychiatry and Neurology offer dual certification in family practice and psychiatry. A combined residency in family practice and psychiatry must include at least 5 years of coherent training integral to residencies in the two disciplines. It is required that the combined training be under the aegis of the same academic institution.

To meet eligibility for dual certification, the resident must satisfactorily complete 60 months of combined training, which must be verified by the directors of both programs. The certifying examinations may not be taken until all required years of training in both specialties are satisfactorily completed.

Psychiatry/Neurology
The American Board of Psychiatry and Neurology has established guidelines for combined training in psychiatry and neurology. A combined residency must include one postgraduate year (PGY1) of training that is acceptable to neurology plus a minimum of 5 years of combined residency training. The 5 years of residency training are usually taken at one approved institution but may be taken at no more than two approved institutions.

Appendix B

Medical Specialty Board Certification Requirements

Twenty-four medical specialty boards have been approved by the American Board of Medical Specialties (ABMS) and the American Medical Association (AMA) Council on Medical Education through the Liaison Committee for Specialty Boards (LCSB). Applications for recognition as a specialty board are submitted to the LCSB and reviewed for compliance with the requirements and criteria published in the Essentials for Approval of New Examining Boards in Medical Specialties approved by both the ABMS and the AMA. If an applicant is approved for recognition as a medical specialty board by the LCSB, the application must then be approved by the membership of the ABMS and the AMA Council on Medical Education. The Essentials may be obtained from the office of the Executive Vice President of the ABMS, 1007 Church St/Ste 404, Evanston, IL 60201-5913, or from the Council on Medical Education, AMA, 515 N State St, Chicago, IL 60610.

The primary objective of medical specialty boards is the improvement of the quality of medical education and medical care. The primary functions of each of the medical specialty boards are to evaluate candidates in a medical specialty field who voluntarily appear for examination and to certify as diplomates those candidates who are qualified. To accomplish these functions, medical specialty boards determine whether candidates have received adequate preparation in accordance with established educational standards; provide comprehensive examinations designed to assess knowledge, skills, and experience required to provide quality patient care in that specialty; and certify those candidates who have satisfied the requirements.

In collaboration with the other organizations and agencies concerned, the approved medical specialty boards assist in improving the quality of medical education by elevating the standards of graduate medical education and approving facilities for specialty training.

The actual accreditation review for the approval of residency programs in each specialty is conducted by a Residency Review Committee on which the respective specialty board has equal representation with the AMA Council on Medical Education and, in some cases, with a related specialty society.

Medical specialty board certification is an additional process to receiving a medical degree, completing residency training, and receiving a license to practice medicine.

Certification requirements of each member board of ABMS are included on subsequent pages. Inquiries regarding specialty board certification requirements should be directed to the specialty board executive offices listed in Table 1. The member boards of ABMS publish materials containing statements on the requirements for certification, which are also reprinted in each edition of the Official American Board of Medical Specialties Directory of Board Certified Medical Specialists. This publication contains certification and biographical information on each specialist who has been certified by a member board of ABMS. The Directory is available from Elsevier Science, 655 Avenue of the Americas, New York, NY 10010; 888 437-4686; fax 212 633-3820.

(The Board reserves the right to make changes in its policies and procedures at any time and cannot assume responsibility for giving advance notice thereof. All applicants are advised to contact the American Board of Allergy and Immunology (ABAI) to determine whether the following information remains current.)

Significance of Certification

A certified specialist in allergy and immunology is a physician who has successfully passed the certification examination of the American Board of Internal Medicine (ABIM) and/or the American Board of Pediatrics (ABP) with additional certification by the American Board of Allergy and Immunology (ABAI), a Conjoint Board of the ABIM and the ABP. Diplomates of the ABAI have detailed knowledge of the underlying pathophysiology and the diagnosis, treatment, and prevention of allergic diseases such as allergic rhinitis, allergic asthma, urticaria, anaphylaxis, hypersensitivity pneumonitis, atopic and contact dermatitis, and allergic gastrointestinal disorders, as well as comparable clinical problems without an apparent allergic etiology or component such as vasomotor rhinitis, nonallergic asthma, and idiopathic and/or hereditary forms of urticaria and/or angioedema. Diplomates also have expertise in the management of pulmonary complications of certain of these diseases.

Diplomates of the ABAI also possess advanced understanding of the biology of inflammation, immunochemistry, immunobiology, and pharmacology and experience in the application of this knowledge to the diagnosis, management, and therapy of immunologic diseases. This includes inborn or acquired defects of host resistance, autoimmune diseases, bone marrow and solid organ transplant-

ation, gene replacement therapy, adverse drug reactions, and related conditions. Diplomates have demonstrated to the satisfaction of their peers that they possess the general qualifications specified and are ethical and humanistic practitioners of medicine.

The purpose of certification by the ABAI is to provide assurance to the public and the medical profession that a certified internist or pediatrician has successfully completed an accredited educational program and an evaluation, including a secure, proctored examination, and possesses the knowledge, skills, and experience requisite to the provision of high-quality patient care in allergy and immunology.

Organization and Purpose

The ABAI was established in 1971 as a nonprofit organization and is one of 24 member boards of the American Board of Medical Specialties (ABMS). The ABAI is a Conjoint Board of the ABIM and the ABP and is sponsored jointly by the American Academy of Allergy, Asthma and Immunology (AAAAI), the American Academy of Pediatrics (AAP), the Section on Allergy and Immunology, the American College of Allergy, Asthma and Immunology (ACAAI), the American Medical Association (AMA), the Section Council of Allergy and Immunology, and the Clinical Immunology Society (CIS). The Board of Directors consists of an equal number of ABAI-certified internists and ABAI-certified pediatricians, who are nominated by the AAAAI, AAP, ACAAI, AMA, CIS and the ABAI Board of Directors themselves. The nominees are appointed by the ABIM and ABP for a 6-year term of office.

The ABAI's major purposes are to:

a. establish qualifications and examine physician candidates for certification as specialists in allergy/immunology,
b. serve the public and the health care community by providing the names of physicians certified as allergists/immunologists,
c. improve the quality of health care,
d. establish and improve standards for the teaching and practice of allergy/immunology,

e. establish standards for training programs in allergy/immunology working with the Residency Review Committee for Allergy and Immunology of the Accreditation Council for Graduate Medical Education (ACGME).

Certification

The ABAI serves candidates who have embarked on a graduate program of study with the express purpose of excelling in the practice of the subspecialty of allergy/immunology. The ABAI is responsible for the establishment and maintenance of the standards of knowledge required for certification. The ABAI anticipates that during a post-medical school training program, the candidates will acquire adequate knowledge in basic science, as applied to this discipline. In outlining its requirements, the ABAI assists the candidate to select superior educational programs that will develop his/her competency in allergy/immunology. The ABAI believes that all allergists/immunologists should have a fundamental knowledge of the biological science basic to this discipline. The responsibility of acquiring the knowledge rests with the candidate. Such knowledge is essential to the continued professional progress of all qualified allergist/immunologist.

To justify certification in allergy and immunology, each candidate must satisfy the general and professional qualifications listed below.

Content for Certification Examination

The examination covers all content areas listed in the current Program Requirements for Residency Education in Allergy and Immunology and the Content Outline determined by the Board of
A corollary of the competence of the candidate in understanding the pathophysiology, clinical presentation, and immunologic testing of allergic and other immunologic diseases is the knowledge of appropriate treatment options. For example, the common aspect of all types of asthma is the presence of airway inflammation. Definitive treatment of asthma demands interruption of the inflammatory response. Thus, candidates must understand use of drugs that decrease airway inflammation in asthma. Based upon the molecular knowledge of the allergic response, the candidate must appreciate the importance of allergen avoidance and medical treatment of allergic rhinitis before initiation of the more intense treatment of immunotherapy. In the latter therapy, candidates must have experience in allergen selection and administration in successful treatment regimens. Therapy for immunologic diseases must be understood, such as (noninclusive): intravenous immune globulin for antibody deficiency, treatment of immunodeficiency with biologic response modifiers, HLA-identical and HLA-haploidentical (T cell-depleted) bone marrow transplants for cellular immunodeficiencies, and gene replacement therapy currently used for the immunodeficiency associated with adenosine deaminase deficiency as well as theoretical principles/potential approaches in other congenital immune disorders.

Requirements for Certification

The candidate qualifies for examination by:
1. holding certification by the ABIM and/or ABP as of the date of the ABAI examination, and;
2. presenting evidence acceptable to the Board of Directors of at least 2 years of full-time residency/fellowship in allergy/immunology programs accredited by the ACGME or other acceptable training in allergy/immunology programs. These programs are listed in the Graduate Medical Education Directory, published by the American Medical Association, and
3. written documentation and evaluations from the training program director substantiating clinical competence and 2 full-time years of allergy/immunology training. Areas to be reviewed include the general competencies: patient care, medical knowledge, practice-based learning and improvement, interpersonal and communication skills, professionalism, and systems-based practice, together with specific competencies. Procedural skills to be assessed include immediate hypersensitivity skin testing, delayed hypersensitivity skin testing/specific allergen immunotherapy, drug desensitization, pulmonary function testing, exercise challenge; methacholine/cold air challenge, and intravenous immunoglobulin therapy.

The training program director must also provide written evidence of the candidate's clinical experience and readiness to sit for the examination. In compliance with the ACGME Program Requirements for Residency Education in Allergy and Immunology, a semi-annual record must be maintained with copies to the ABAI for tracking purposes. The Evaluation Form together with the Explanation of Ratings Scale may be obtained from the ABAI. If a trainee has received two consecutive evaluations with overall unsatisfactory ratings, the training program director must provide the ABAI with a written plan for remediation of the trainee's deficiencies. After 6 months, the training program director must provide the ABAI and the trainee with a report of the success or failure of the remediation program, as well as any additional plans for corrective action; and
4. documentation from the chief of medicine or pediatrics, ABAI diplomates in the geographical area, chiefs of community hospitals, or officers of state or regional societies to verify the medical, ethical, and moral standing and clinical competence of the candidate as a specialist in allergy/immunology; and
5. evidence of a valid (current), unrestricted license to practice medicine in a state, territory, possession, or province of the United States or Canada where the individual practices medicine or providing a written explanation of extenuating circumstances. Candidates with a restricted, suspended, or revoked license at the time of application or examination will not be admitted to the examination or certified. Restrictions include, but are not limited to, conditions, contingencies, probation, and stipulated agreements.

Conjoint Committees—The nature of a Conjoint Board requires involvement of the sponsoring primary boards in critical areas of decision-making. The ABAI has formed two advisory committees with representation from the ABAI, ABIM, and ABP. The Conjoint Credentials Committee reviews the credentials of candidates for the certification examination and makes recommendations to the Board for its determination. The Conjoint Standards Committee recommends the passing grade for the certification examination to the Board for its determination.

Pathways for Dual Certification
Formal special pathways exist for individuals wishing to qualify for dual certification in allergy/immunology and pediatric pulmonology; allergy/immunology and pediatric rheumatology; and allergy/immunology and adult rheumatology. Additional information regarding special pathways is available upon request to the ABAI.

Recertification
Since 1977, the ABAI has offered its diplomates a recertification process every other year so that the effectiveness of each diplomate's own efforts in continuing education would be evaluated.

Beginning with 1989, new ABAI diplomates receive certificates valid for 10 years. Time-unlimited certificates were issued prior to October 1, 1989. However, all diplomates, especially those involved in training programs, are strongly encouraged to recertify at a minimum of every 10 years. Maintaining a current certificate is an expression of professional accountability. Presently, 1,667 ABAI diplomates hold time-limited certificates; renewal may be achieved in the interim.

The two-part recertification process is composed of the home study examination and the proctored examination administered the following summer. Recertification candidates will be required to attain an 80% correct score on the 150-item home study examination to gain entry to the proctored examination. If such an absolute score is not attained, the diplomate will be required to pass a subsequent retest examination and attain an 80% correct score. Should performance not meet this standard, the diplomate will not be permitted entry to the proctored examination.

The proctored examination contains 200 items, including 50 items emphasizing new knowledge in the specialty and 150 items in allergy and immunology. The ABAI anticipates that most diplomates seeking recertification will be successful. Diplomates will be required to attain an absolute minimum score to ultimately gain recertification in allergy/immunology. Standards are established to justify public confidence.

Content for Recertification Examination
The content of the home study examination covers the broad area of allergy and immunology listed previously under "Content for Certification Examination" and will provide diplomates a learning experience in the following areas of clinical science: immediate hypersensitivity, immunological disorders, pharmacology and therapeutics, specific diagnostic modalities, and allergens and antigens. Attention will also be given to the following areas of basic science: immune mechanisms, cells involved in immune responses, specific immune mechanisms, and laboratory tests.

The proctored examination reflects the current ABAI Content Outline, which is distributed and published on the ABAI Web site.

Requirements for Recertification
The diplomate qualifies for examination:
1. by having previously been certified by the ABAI (recertification in internal medicine or pediatrics is encouraged of ABAI diplomates); and
2. by presenting documentation from physicians in the ABAI diplomate's community that he/she is recognized as an allergist/immunologist; and
3. by presenting evidence of a valid (current), unrestricted license to practice medicine in a state, territory, possession, or province of the United States or Canada or provide a written explanation of extenuating circumstances. Diplomates with a restricted, suspended, or revoked license at the time of application or examination will not be admitted to the examination or recertified. Restrictions include, but are not limited to, conditions, contingencies, probation, and stipulated agreements.

Examination Methodology
Announcements
The proctored certification and recertification examinations are administered simultaneously in multiple US locations annually. The times and places are determined by the ABAI and announced in the appropriate specialty journals and the ABAI Web site.

Applications
The act of filing an application is the candidate's responsibility. The application form is available from the ABAI office and can be downloaded from the ABAI Web site. Two recent photographs that are signed by the candidate and the necessary fees must be received with the completed application or before the close of registration (postmark applicable).

Board Review Courses
The ABAI does not sponsor or maintain any records on any courses that claim to be review courses in preparation for its examinations, nor does it offer or endorse any specific publications or courses to prepare for its examinations.

Cancellations
Candidates who are accepted for examination, but fail to appear or who withdraw after the deadline for cancellation will have their examination fee refunded. For each subsequent examination, candidates will be required to pay the current registration and examination fees.

Certificates
Candidates/diplomates who pass the examinations will be certified or recertified in the specialty of allergy/immunology or CLI as of the date of the examination and receive a 10-year time limited certificate (subject to revocation by the ABAI for cause), expiring on December 31 ten years later. This information becomes public information and will be listed in The Official ABMS Directory of Board Certified Specialists.

Description
The computer-based examinations vary in length, certification being two 4-hour sessions and recertification being one 4-hour session. The multiple-choice questions are objective and designed to test the individual's knowledge through recall, interpretation, and problem solving. Each examination may contain previously used questions and new questions.
Disabled Candidates
Individuals who may need accommodation during the examination must provide written details to the ABAI at the time of application for examination in order to receive information about ABAI’s disability policy and accommodations approval from the Credentials Committee.

Fees
The fees are set forth in the instruction sheet included with the application. Candidates whose applications are rejected will receive a refund of the examination fee; however, the ABAI will retain the registration fee to cover the processing and evaluation costs. A nonrefundable late fee will apply to those applications received after the close of registration and prior to the cancellation deadline.

Irregular Behavior
All Board examinations are supervised by proctors, who are required to report any irregular behavior, which includes, but is not limited to, giving or obtaining unauthorized information or aid before, during, or after the examination as evidenced by observation or subsequent statistical analysis of answer sheets. Offering financial or other benefit to a proctor, employee, or agent of the ABAI is forbidden.

Reexamination
Candidates who are unsuccessful on any examination may reapply, as there is no restriction on the number of opportunities for reexamination. Once admitted to an examination, candidates will be considered to have met the training requirements for future examination in that discipline. All candidates for reexamination must meet the current requirements for licensure and professional standing.

Rescoring
On written request and payment of a nominal fee, candidates may obtain rescoring within 3 months of receiving results. Answer sheets will be destroyed 12 months after administration of the examination.

Results
Individuals will be informed of the results of the examinations within 3 months of administration. The validity of the individual’s performance on the examination is secured by every means available.

Special Policies
Verification of Board Status
Based on ABMS-recommended policy, the ABAI does not issue statements of or implying “Board eligibility” for any reason. Medical specialty certification is a process of advancement through several individual steps including examination. Having completed one step, such as the minimal educational requirements, should not imply that a candidate is now possessed of some special qualification that is more or less equivalent to certification. For written verification of the status of an allergist/immunologist, ABAI charges a nominal fee per name.

Revocation of Certificate
Certificates issued by the ABAI shall be subject to revocation under specific circumstances, including but not limited to a state medical license revocation or revocation of certification by either the ABIM or ABP.

These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Anesthesiology [ABA] to ascertain whether the information below is current.

Introduction

The American Board of Anesthesiology (ABA) publishes its Booklet of Information to inform all interested individuals of the policies, procedures, regulations, and requirements governing its certification programs.

A copy of the booklet is sent annually to the chairs of anesthesiology departments and the directors of Accreditation Council for Graduate Medical Education (ACGME)-accredited anesthesiology residency programs and to every resident in those programs who is properly registered by the program with the ABA.

The chair of the anesthesiology department is ultimately responsible for the residency program. The ABA corresponds officially with the department chair if the chair notifies the ABA that a faculty member has been appointed program director with responsibility for administering the program, the ABA corresponds with the program director about training matters and sends the department chair a copy of the correspondence.

The program must ensure that each resident's training fulfills all requirements regarding admission to and opportunities for examination.

Primary Certification in Anesthesiology Certification Requirements

At the time of certification by the ABA, the candidate shall be capable of performing independently the entire scope of anesthesiology practice and must:

A. Hold an unexpired license to practice medicine in at least one state or jurisdiction of the United States or province of Canada that is permanent, unconditional, and unrestricted.

B. Have fulfilled all the requirements of the Continuum of Education in Anesthesiology.

C. Have on file with the ABA a Certificate of Clinical Competence with an overall satisfactory rating covering the final 6-month period of Clinical Anesthesia training in each anesthesiology residency program.

D. Have satisfied all examination requirements of the Board.

E. Have a moral, ethical, and professional standing satisfactory to the ABA.

ABA certificates in anesthesiology issued on or after January 1, 2000, are valid for 10 years after the year the candidate passes the examination for certification. A person certified by the ABA is designated a diplomate in publications of the American Board of Medical Specialties (ABMS) and the American Society of Anesthesiologists (ASA).

Continuum of Education in Anesthesiology

The continuum of education in anesthesiology consists of 4 years of training subsequent to the date that the medical or osteopathic degree has been conferred. The continuum consists of a Clinical Base Year (CBY) and 36 months of approved training in anesthesia (CA-1, CA-2, and CA-3 years).

A. During the Clinical Base year the physician must be enrolled and training as a resident in a transitional year or primary specialty training program in the United States or its territories that is accredited by the ACGME or approved by the American Osteopathic Association, or outside the United States and its territories in institutions affiliated with medical schools approved by the Liaison Committee on Medical Education.

Acceptable clinical base experiences include training in internal or emergency medicine, pediatrics, surgery or any of the surgical specialties, obstetrics and gynecology, neurology, family practice, critical care medicine, or any combination of these as approved for the individual resident by the director of his or her training program in anesthesiology. The Clinical Base year must include at least 10 months of clinical rotations during which the resident has responsibility for the diagnosis and treatment of patients with a variety of medical and surgical problems, of which at least 1 month may involve the administration of anesthesia. At most, 2 months of the Clinical Base year may involve training in specialties or subspecialties that do not meet the aforementioned criteria.

The resident must complete the Clinical Base year before beginning CA-3 year clinical rotations.

B. The 3-year Clinical Anesthesia curriculum (CA-1-3) consists of experience in basic anesthesia training, subspecialty anesthesia training, and advanced anesthesia training. It is a graded curriculum of increasing difficulty and learning that is progressively more challenging of the resident's intellect and technical skills.
1. Experience in Basic Anesthesia Training is intended to emphasize basic and fundamental aspects of the management of anesthesia. It is recommended that at least 12 months of the CA-1 and CA-2 years be spent in basic anesthesia training, with a majority of this time occurring during the CA-1 year.

2. Subspecialty Anesthesia Training is required to emphasize the theoretical background, subject material, and practice of subdisciplines of anesthesiology. These subdisciplines include obstetric anesthesia, pediatric anesthesia, cardiothoracic anesthesia, neuroanesthesia, anesthesia for outpatient surgery, recovery room care, regional anesthesia, and pain medicine. It is recommended that these experiences be subspecialty rotations and occupy 7 to 12 months of the CA-1 and CA-2 years. The sequencing of these rotations in the CA-1 and CA-2 years is left to the discretion of the program director.

In addition to the above requirements for subspecialty experiences, 2 months of training in critical care medicine are required during Clinical Anesthesia training. An acceptable critical care rotation should include active participation in patient care, active involvement by anesthesia faculty experienced in the practice and teaching of critical care, and an appropriate population of critically ill patients. Experience in short-term overnight post-anesthesia units, intermediate step-down units, or emergency rooms does not fulfill this requirement.

3. Experience in Advanced Anesthesia Training constitutes the CA-3 year. The CA-3 year is a distinctly different experience from the CA-1-2 years, requiring progressively more complex training experiences and increased independence and responsibility for the resident. Residents must complete the Clinical Base and CA-1-2 years of training before they begin clinical rotations in fulfillment of the CA-3 year requirement.

The program director, in collaboration with the resident, will design the resident’s CA-3 year of training. They will select one of two tracks designated as the advanced clinical track and the clinical scientist track. Regardless of the track selected, resident assignments in the CA-3 year should include the more difficult or complex anesthetic procedures and care of the seriously ill patients.

Residents in the Advanced Clinical Track are required to complete a minimum of 6 months of advanced anesthesia training. They may spend the remaining months in advanced anesthesia training, in one or more selected subspecialty rotations, or in research. Residents may train in one anesthesia subspecialty for at most 6 months during the CA-3 year and no more than 12 months during the CA-1-3 years.

The Clinical Scientist Track consists of clinical training in combination with research experience. Research may occur at any time during residency training although often it will be conducted in the CA-3 year. The resident must be enrolled in an ACGME-accredited anesthesiology program and remain active in the educational component of the program while pursuing research. There are two options for fulfilling the requirements of this track.

Option A of the Clinical Scientist Track may be fulfilled by completing 6 months of clinical or laboratory research experience during 48 months of training, which must include 12 months of Clinical Base and a minimum of 30 months of Clinical Anesthesia.

Option B of the Clinical Scientist Track, intended for residents who plan careers as academic investigators, may be fulfilled by completing 18 months of clinical or laboratory research at any time during 40 months of training, which must include 12 months of Clinical Base and a minimum of 30 months of Clinical Anesthesia. They are eligible for entrance into the ABA examination system after they have completed their Clinical Base requirement, 30 months of Clinical Anesthesia satisfactorily, and a minimum of 6 months of research experience.

The anesthesiology program director may request 6 months of credit toward the research component of Option B for a resident with a PhD degree in a discipline relevant to Anesthesiology. Documents supporting this request should include documentation of the PhD degree, a description of the current research, and a copy of the resident’s curriculum vitae. Approval is at the discretion of the Credentials Committee and must be obtained prior to the start of the last 12 months of residency training. Credit will be granted only upon completion of all other requirements of Option B of the clinical scientist track.

Regardless of which CA-3 Track is chosen, a resident must have a satisfactory Clinical Competence Committee report for 6 months of Clinical Anesthesia training immediately preceding any research period.

C. The ABA grants a resident credit toward the CA1-3 year requirements for Clinical Anesthesia training that satisfies all four of the following conditions:

1. The CA 1-3 years of training are spent as a resident enrolled with the ABA by no more than two ACGME-accredited residency programs in the United States or its territories. An ACGME-accredited program includes the parent institution and institutions that have an RRC-approved integration or affiliation agreement with the parent institution.

2. The period of Clinical Anesthesia training as an enrolled resident of any single program is at least 6 months of uninterrupted training.

3. The 6-month period Clinical Anesthesia training in any one program ends with receipt of a satisfactory Certificate of Clinical Competence. To receive credit from the ABA for a period of Clinical Anesthesia training that is not satisfactory, the resident must immediately complete an additional 6 months of uninterrupted clinical anesthesia training in the same program with receipt of a satisfactory Certificate of Clinical Competence. If a resident receives consecutive Certificates of Clinical Competence that are not satisfactory, additional training is required. When a resident receives a satisfactory Certificate of Clinical Competence immediately following consecutive periods of training that are not satisfactory, the ABA will grant credit only for the period of satisfactory training and the most recent of the periods of unsatisfactory training immediately preceding it.

4. Training away from the resident’s ACGME-accredited anesthesiology program cannot occur until completion of at least 1 year of Clinical Anesthesia or during the last 3 months of the CA-3 year, unless such training will be in another ACGME-accredited anesthesiology program.

Current RRC requirements limit training in institutions not integrated with the resident’s ACGME-accredited program to a maximum of 12 months throughout the CA 1-3 years. The ABA will accept no more than 6 of these months in institutions not affiliated with the ACGME-accredited program. Therefore, residents must complete a minimum of 24 months of Clinical Anesthesia training in their ACGME-accredited program’s parent and integrated institutions and may complete at most 6 months of Clinical Anesthesia training away from their ACGME-accredited program.

The Credentials Committee of the ABA must prospectively approve Clinical Anesthesia training away from the
ACGME-accredited program, even if the training will occur in another ACGME-accredited program. The request for approval must include a chronological description of the rotations, information about the supervision of the resident, and assurances that the resident will be in compliance with the limits on training away from his/her ACGME-accredited program. Further, the resident must remain enrolled in his/her program while training away from the ACGME-accredited program, and his/her program must report the training on the Clinical Competence Committee report filed for the period involved.

D. Prospective approval is required for exceptions to policies regarding the training planned for residents. The Credentials Committee of the ABA considers requests for prospective approval on an individual basis. The ABA office must receive the request from the program director on behalf of a resident at least 4 months before the resident begins the training in question. It is the responsibility of the program director and the resident to assure that the request is received in a timely manner.

Principal Objectives

The examination system for the ABA's primary certificate has two distinct parts, the written examination and the oral examination. Each is designed to assess different qualities of a Board-certified anesthesiologist.

A Board-certified anesthesiologist is a physician who provides medical and consultation during the perioperative period in pain medicine and in critical care medicine. A diplomate of the Board must possess knowledge, judgment, adaptability, clinical skills, technical facility, and personal characteristics sufficient to carry out the entire scope of anesthesiology practice. An ABA diplomate must logically organize and effectively present rational solutions to problems in all aspects of the specialty of anesthesiology. A Board-certified anesthesiologist is able to function as the leader of the anesthesiology care team.

Because of the nature of anesthesiology, the ABA diplomate must be able to manage emergent life-threatening situations in an independent and timely fashion. The ability to independently acquire and process information in a timely manner is central to assure individual responsibility for all aspects of anesthesiology care. Adequate physical and sensory faculties, such as eyesight, hearing, speech, and coordinated function of the extremities, are essential to the independent performance of the Board-certified anesthesiologist. Freedom from the influence of or dependency on chemical substances that impair cognitive, physical, sensory, or motor function also is an essential characteristic of the Board-certified anesthesiologist.

Irregular Behavior

The Board acts to maintain the integrity of its examination and certification process and to ensure the equitable and objective administration of its examinations to all candidates. Information about behavior the Board considers a violation of the integrity of its examination and certification process is sent to all candidates scheduled for examination. Statistical analyses may be conducted to verify observations and reports of suspected irregularities in the conduct of an examination. The examination of a candidate whose conduct, in the Board's judgment, violates or attempts to violate the integrity of its examination and certification process will be invalidated and no results will be reported. Furthermore, the candidate will be subject to punitive action as determined by the Board. In that event the candidate would be informed of the reasons for the Board's actions and could request an opportunity to present information deemed relevant to the issue and to petition the Board to reconsider its decision.

Nonstandard Examination Administration

The ABA supports the intent of the Americans with Disabilities Act (ADA) and has a process for considering requests that its assessment programs be modified to accommodate an individual with a disability. Anyone having questions about the process should write or call the Executive Vice President of the Board at the ABA office.

Unforeseeable Events

In the event a natural disaster, war, government regulations, strikes, civil disorders, curtailment of transportation facilities, or other unforeseeable events make it inadvisable, illegal, or impossible for the ABA to administer an examination to a candidate at the appointed date, time, and location, or to conclude a candidate's examination, the ABA is not responsible for any personal expense the candidate may have incurred to be present for the examination or for any such expense the candidate may incur for any subsequent examination.

Application Form

Application for admission to the examination system of the ABA must be made to the Secretary upon a form prescribed by the Board.

An application may be made electronically, using the ABA Electronic Application System (EAS), via the ABA Web site at www.abanes.org. Alternatively, a paper application form may be mailed to the ABA Secretary at the ABA office.

A paper application form may be printed from the ABA Web site or obtained by writing to the ABA office. Telephone requests are not acceptable.

Filing and Documentation Deadlines

The standard deadline for the ABA to receive the completed application and the application fee is December 15 of the year immediately preceding the year in which the written examination is to be administered.

The late deadline by which the ABA must receive the completed application with the application fee and a late fee is January 15 of the examination year.

The January 15 late deadline for receipt of a completed application and the appropriate fee is absolute. Regardless of the reason, the ABA will not consider an application it receives after January 15 of the examination year.

The ABA must receive all documentation it requires to make a determination about an applicant's qualifications for admission to examination no later than March of the year in which the written examination is to be administered. This includes but is not limited to references and evidence of medical licensure or of having qualified for such licensure. An application will not be accepted if the required documentation is not received by that date. It ultimately is the responsibility of every applicant to ensure that the ABA receives all required documentation in a timely manner.

Applicant Acknowledgement and Release

The application form includes the following Acknowledgement, which the applicant shall be required to sign:

I, the undersigned applicant ("Applicant"), hereby apply to The American Board of Anesthesiology Inc. ("ABA"), for entrance into its examination system for the purpose of obtaining ABA...
certification status (“Certification”); I acknowledge that my application is subject to the ABA rules and regulations. I further acknowledge and agree that if I withdraw my application or the ABA does not accept it, the ABA will retain the administrative services fee and all late fees and refund only the remainder of my application fee.

I represent and warrant to the ABA that all information contained in this application (“Application”) is true, correct and complete in all material respects. I understand and acknowledge that any material misstatement in or omission from this Application shall constitute cause for disqualification from the ABA examination system or from the issuance of an ABA Certificate or to forfeiture and redelivery of such Certificate.

I understand that if the Application is electronically submitted to the ABA, the Acknowledgement portion of the Application will be assigned a number (#_____), which will match the portion of the Application submitted electronically. I agree that the Acknowledgement shall survive the electronic submission of the Application, regardless of whether or not the information or data provided in the Application has been aggregated or reformatted in any manner by the ABA. I also agree that this Acknowledgement precludes me from claiming the Acknowledgement does not relate to the Application.

I acknowledge that I have received a copy of the applicable ABA Booklet of Information and read the Booklet. I agree to be bound by the policies, rules, regulations and requirements published in the applicable Booklet, in all matters relating to consideration of and action upon this Application and Certification should it be granted. In addition, I understand and acknowledge that in the event I have violated any of the ABA rules governing my Application and/or Certification, or in the event I fail to comply with any provisions of the ABA Certificate of Incorporation or Bylaws, such violations shall constitute cause for disqualification from the ABA examination system or from the issuance of an ABA Certificate or to forfeiture and redelivery of such Certificate.

The application form also includes the following Release, which the applicant shall be required to sign:

I, the undersigned applicant (“Applicant”), hereby apply to the American Board of Anesthesiology, Inc. (“ABA”) for entrance into its examination system for the purpose of obtaining ABA certification status (“Certification”). I acknowledge that this application (“Application”) is subject to the ABA rules and regulations. In connection with my Application, (if electronically submitted, Application #_____), I authorize all persons holding testimony records, documents, opinions, information and data relevant to or pertaining to my professional competence and ethical conduct and/or behavior (the “Information”) to release such Information to the ABA, its employees and agents. This authorization applies whether or not such persons are listed as a reference on my Application. The Information includes any information relating to any abusive use of alcohol and/or illegal use of drugs, and any treatment or rehabilitation related thereto. The purpose of releasing such Information is to determine or verify my qualifications for entrance into the ABA examination system and ABA Certification. A copy of this release may accompany any request made by the ABA for such Information.

I authorize the ABA to: (1) report my status in the examination system, including the results of any written or oral examination, to the Director of the program from which I completed my clinical training; (2) use any score in psychometric analyses to confirm observations and reports of suspected irregularities in the conduct of an examination; and (3) respond to any inquiry about my status in the ABA examination system. I also authorize the ABA to use any and all Information for the purpose of conducting longitudinal studies to assess the ABA certification process. Such Information may be reported or released only in the aggregate, and any results of such studies will have no direct bearing on my Application or Certification status. Subject to applicable state and federal law requirements, the ABA shall hold all Information in confidence.

I release and agree to hold harmless each person from any liability to me arising out of the giving or releasing of Information to the ABA. This release and agreement includes liability for the inaccuracy or untruth of the Information, so long as such Information is provided in good faith. I also release and agree to hold harmless the ABA and its agents and employees, including but not limited to its directors, officers and examiners, from any liability to me as a result of any acts or proceedings undertaken or performed in connection with my Application, provided such acts or proceedings are made or conducted in good faith.

Entrance Requirements

At the time of application to enter the examination system of the ABA, the applicant shall be capable of performing independently the entire scope of anesthesiology practice and must:

A. Have graduated from a medical school in a state or jurisdiction of the United States or in Canada that was accredited at the date of graduation by the LCME, the Committee on Accreditation of Canadian Medical Schools, or the American Osteopathic Association. Graduates of medical schools outside the jurisdiction of the United States and Canada must have one of the following: a permanent (valid indefinitely) certificate from the Educational Commission for Foreign Medical Graduates, comparable credentials from the Medical Council of Canada, or documentation of training for those who entered postdoctoral medical training in the United States via the Fifth Pathway as proposed by the American Medical Association.

B. Provide evidence satisfactory to the Board of having been awarded a medical or osteopathic degree acceptable to the Board.

C. Provide evidence acceptable to the Board of having satisfied the licensure requirement for certification. The applicant must inform the ABA of any conditions or restrictions in force on any active medical license he or she holds. When there is a restriction or condition in force on any of the applicant's medical licenses, the Credentials Committee of the ABA will determine whether, and on what terms, the applicant shall be admitted to the ABA examination system.

Residents in training may submit evidence with their application of having qualified on examinations that provide eligibility for medical licensure (e.g., United States Medical Licensing Examination Steps 1, 2, and 3) on or before the standard application deadline. Residents who do so must have evidence of permanent, unconditional, unrestricted, and currently unexpired medical license on file in the ABA office by November 30 of the year in which the written examination for which they applied is administered.

D. Have on file in the Board office evidence of having satisfactorily fulfilled all requirements of the continuum of education in anesthesiology before the date of examination and after receiving a medical or osteopathic degree acceptable to the ABA. Such evidence must include a satisfactory Certificate of Clinical Competence covering the final 6 months of clinical anesthesia training in each residency program. A grace period will be permitted so that applicants completing this requirement by August 31 may apply for the immediately preceding July written examination.

E. Have on file with the Board documentation attesting to the applicant's current privileges and evaluations of various aspects of his...
or her current practice of anesthesiology. Such evaluations will include verification that the applicant meets the Board's clinical activity requirement by spending, on average, 1 day per week during 1 of the previous 5 years in the clinical practice of anesthesiology and/or related subspecialties. The ABA may solicit such documentation and evaluations from the residency program director or others familiar with the applicant's current practice of anesthesiology and use them in determining the applicant's qualifications for admission to the examination system. The Clinical Competence Committee report from the department and the evaluation of the program director and others will be used as the basis for assessing admission qualifications.

F. If residency training was completed more than 12 years before the date of application or if a second or subsequent application has been declared void, the applicant must submit proof of having reestablished his or her qualifications for admission to the examination system.

Acceptable proof consists of documentation of having qualified on an entry examination designated by the Board. The Board has designated the examination administered annually by the Joint Council on In-Training Examinations as the entry examination. Information about the entry examination and a registration form may be obtained by writing the Joint Council c/o the American Society of Anesthesiologists. Alternatively, the applicant may complete 12 consecutive months of additional clinical training in anesthesia as a CA-3 year resident in one ACGME-accredited program with receipt of a satisfactory Certificate of Clinical Competence covering the final 6 months.

The applicant must qualify on the entry examination or satisfactorily complete the year of additional training after the date the ABA declared her or his most recent application void. The applicant must complete the requalifying examination before applying to the ABA. If the applicant will complete the year of additional training by August 31, he or she may apply to the ABA for the immediately preceding July written examination. The applicant must apply to the ABA within 3 years of having reestablished her or his qualifications for admission to examination.

The ABA will not validate or report the results to applicants who sit for the written examination and do not fulfill the deadlines.

After an applicant has met all of the entrance requirements listed above, the Board shall determine that entry into the examination system is merited when a judgment of adequate levels of scholarship and clinical competence can be made from the information submitted. The ABA will notify an applicant who is accepted as a candidate for certification after approval of all credentials.

The Board, acting as a committee of the whole, reserves the right to accept an application. The applicant has the right to seek review of such a decision.

The Board reserves the right to correct clerical errors affecting its decisions.

Certificate of Clinical Competence
The Board requires every residency training program to file, on forms provided by the Board, an Evaluation of Clinical Competence in January and July on behalf of each resident who has spent any portion of the prior 5 months in clinical anesthesia training in or under the sponsorship of the residency program and its affiliates. The program director (department chair) must not chair the Clinical Competence Committee.

Entry into the examination system is contingent upon the applicant having a Certificate of Clinical Competence on file with the Board attesting to satisfactory clinical competence during the final period of clinical anesthesia training in or under the sponsorship of each program. The Board, therefore, will deny entry into the examination system until this requirement is fulfilled.

Absence From Training
The total of any and all absences during clinical anesthesia training may not exceed the equivalent of 20 working days per year. Attendance at scientific meetings, not to exceed 5 working days per year, shall be considered a part of the training program. Duration of absence during the clinical base year may conform to the policy of the institution and department in which that portion of the training is served. Absences in excess of those specified will require lengthening of the total training time to the extent of the additional absence.

A lengthy interruption in training may have a deleterious effect on the resident's knowledge or clinical competence. Therefore, when there is an absence for a period in excess of 6 months, the Credentials Committee of the ABA shall determine the number of months of training the resident will have to complete subsequent to resumption of the residency program to satisfy the training required for admission to the ABA examination system.

Entrance Into the System
The examination system for the ABA's primary certificate has two distinct parts, the written examination and the oral examination. Each is designed to assess different qualities of a Board-certified anesthesiologist.

The written examination is designed to assess the candidate's knowledge of basic and clinical sciences as applied to anesthesiology. Written examinations are held annually in locations throughout the United States and Canada on a Saturday in July. A passing grade, as determined by the Board, is required.

It is necessary for candidates to pass the written examination to qualify for the oral examination. Candidates must wait at least 6 months after passing the written examination to be eligible to appear for the oral examination.

The oral examination is designed to assess the candidate's ability to demonstrate the attributes of an ABA diplomate when managing patients presented in clinical scenarios. The attributes are sound judgment in decision-making and management of surgical and anesthetic complications, appropriate application of scientific principles to clinical problems, adaptability to unexpected changes in the clinical situations, and logical organization and effective presentation of information. The oral examination emphasizes the scientific rationale underlying clinical management decisions. The ABA conducts oral examinations in the spring and fall of each year at a single location in the United States. Examiners are Directors of the Board and other ABA diplomates who assist as associate examiners. A passing grade, as determined by the Board, is required.

The ABA will not schedule candidates to appear at consecutive oral examinations. Candidates who do not take or do not pass an oral examination for which they are scheduled, for whatever reason, are not eligible to appear at the next regularly scheduled oral examination.

A. The duration of candidate status is limited. Every candidate is given one opportunity a calendar year, for 3 years, to successfully complete each examination requirement. All candidates must satisfy the written examination requirement within 3 years of the date of the first examination that follows acceptance of the application. All candidates must satisfy the oral examination requirement within 3 years of the date of the first oral examination for which they become eligible. The ABA will declare the candidate's application void if the candidate does not satisfy an
In the event an application is not accepted, or the application is accepted and subsequently withdrawn by the candidate, the ABA will retain the administrative services fee, and the late fee if one was assessed, and refund the balance of the fee it received. No fee will be remitted if the candidate's notice of withdrawal from the examination system is received in the Board office after the deadline by which candidates must notify the Board of their choice of test center for the first written examination for which they are eligible.

The reexamination fee is $400 for the anesthesiology written examination and $1,500 for the oral examination. The reexamination fee will be charged to candidates whether they have failed a previous examination, canceled a scheduled appointment for examination, or failed to appear for any examination for which they were properly scheduled.

A charge of $50 will be made whenever a check is returned for nonpayment.

The ABA is a nonprofit organization. The fees for application and examination are computed on a basis of cost of maintaining the functions of the Board. The Board reserves the right to change the fees when necessary.

Reapplication

The ABA declares void the application of a candidate who does not satisfy the examination requirements in the prescribed number of opportunities or time for whatever reason. The physician may reapply by submitting a new application. Such application shall be subject to the fees, rules, privileges, and requirements that apply at the time of reapplication. The applicant who meets existing requirements will be readmitted into the examination system.

The re-applicant for primary certification who has had a second or subsequent application declared void for any cause, or has completed anesthesiology residency training more than 12 years before the date of reapplication, must reestablish his or her qualifications for admission to the examination system before filing another application. In all instances, the candidate must pass both the written and oral examinations under the new application.

Status of Individuals

The ABA reserves to itself exclusively the right to define and confer Board eligible status whenever such status refers to an individual's relationship to the ABA examination and certification system. The ABA shall confer Board eligible status only on physicians who are candidates in the ABA examination and certification system. The ABA does not confer Board eligible status indefinitely.

Inquiries about the current status of individuals should be addressed to the ABA office. In addition to the physician's full name, inquiries should include other identification information if available. The ABA responds to inquiries with one of the following statements:

- The physician is certified by the ABA.
- The physician was certified by the ABA from (date of certification) to (date certification expired) and presently is a candidate in the ABA recertification system.
- The physician is Board eligible in anesthesiology.
- The physician has applied to the ABA, and the ABA is determining whether the applicant meets its requirements to be Board eligible.
- The physician is neither certified by the American Board of Anesthesiology nor Board eligible.

The fee for written confirmation of an individual's status is $35.
Alcoholism and Substance Abuse

The Americans with Disabilities Act (ADA) protects individuals with a history of alcohol or substance abuse who are not currently abusing alcohol or using drugs illegally. The ABA supports the intent of the ADA.

The ABA will admit qualified applicants and candidates with a history of alcohol abuse to its examination system and to examination if, in response to its inquiries, the ABA receives acceptable documentation that they do not currently pose a direct threat to the health and safety of others.

The ABA will admit qualified applicants and candidates with a history of illegal use of drugs to its examination system and to examination if, in response to its inquiries, the ABA receives acceptable documentation that they are not currently engaged in the illegal use of drugs.

After a candidate with a history of alcohol abuse or illegal use of drugs satisfies the examination requirements for certification, the ABA will determine whether or not it should defer awarding its certification to the candidate for a period of time to avoid certifying a candidate who poses a direct threat to the health and safety of others. If the ABA determines that deferral of the candidate's certification is appropriate because the candidate does currently pose a threat to the health and safety of others, the ABA will assess the specific circumstances of the candidate's history of alcohol abuse or illegal use of drugs to determine when the candidate should write the Board to request issuance of its certification.

Revocation of Certificate

A certificate is issued by the Board with the understanding that it remains the property of the Board during the life of the diplomate. Any certificate issued by the Board shall be subject to revocation in the event that:

A. The issuance of such certificate or its receipt by the person so certified shall have been contrary to, or in violation of, any provision of the Certificate of Incorporation of this Board or its By-Laws; or
B. The person certified shall not have been eligible to receive such certificate whether or not the facts making him or her ineligible were known to, or could have been ascertained by, the Board or any of the directors at the time of issuance of such certificate; or C. The person certified shall have made any misstatement of fact in his or her application for such certificate or in any other statement or representation to the Board or its representatives; or
D. The person certified shall fail to maintain a moral, ethical, or professional standing satisfactory to the Board.

The Board shall be the sole judge of whether or not the evidence of misstatement, misrepresentation, or immorality is sufficient to require or permit revocation of any certificate issued by the Board, and the decision of the Board shall be final. The individual has the right to seek review of such decision.

Certification by Other Organizations

The ABA will make no statement about the comparability of the ABA certificate and another organization's certificate. The ABA will not accept certification by another entity as meeting the requirements for entrance into the ABA examination system for specialty or subspecialty certification or recertification.

Records Retention

The ABA retains documents pertaining to an individual's residency training, application for certification, examination opportunities, and examination results for the sole purpose of determining that its requirements for admission to examination and for certification are fulfilled.

In the absence of an application for certification, documents pertaining to the ABA entrance requirements are retained for 7 years from the date of the most recent correspondence to or from the ABA regarding the requirements. Documents pertaining to an unsuccessful application are retained until the individual submits another application to the ABA or the aforementioned 7-year period expires, whichever occurs first. Documentation corroborating the results of a candidate's examination is retained until 1 year after the date of the most recent correspondence to or from the ABA regarding the results. Documentation corroborating the candidate's fulfillment of the ABA certification requirements is retained until 1 year after the date of the most recent correspondence to or from the ABA regarding the candidate's certification by the ABA. The ABA sees to the secure destruction of the documents in its file for an individual when the period specified for retention of the documents has expired.

The ABA retains indefinitely an electronic record for residents who trained in an ACGME-accredited anesthesiology program. This record includes entries that identify the training program, the dates of training, and the faculty's overall evaluation of the resident's performance during training.

The ABA retains indefinitely microfiche and electronic records for candidates issued its certification. These records include documents and entries attesting that each certification requirement was met.

Formal Review Process

The only actions of the ABA that are subject to formal review are a decision not to accept an application, a decision not to grant a request for an examination under nonstandard testing conditions, and a decision to revoke a certificate issued by the ABA.

The individual must give the ABA written notification of the intention to seek formal review within 30 days of receiving notification of the Board's decision. The individual shall address the notice to the ABA Secretary at the Board office and shall set forth the grounds upon which the request for formal review is based. If the individual does not give the ABA written notification of the intent to seek formal review within the time and in the manner prescribed, the individual shall be considered to have accepted the decision of the Board and the decision shall become final.

Upon receipt of notice of a request for formal review within the time and in the manner prescribed, the request will be screened to determine whether or not it meets the standards for a formal review to occur. Minimum criteria for a formal review are grounds that the Board's action was inconsistent with ABA policies or not supported by the evidence available to the Board when the action was taken. If it is determined that there are grounds for a formal review, the ABA shall form a Review Panel and schedule a hearing. Otherwise, the decision of the Board shall become final.

Subspecialty Certification in Critical Care Medicine

A. Definition of Critical Care Medicine

The discipline of critical care medicine has evolved over the last few decades in parallel with the development of techniques and technology for acute and long-term life support of patients with multiple organ system derangement. Because problems encountered in the critically ill patient encompass aspects of many different specialties, critical care medicine is a multidisciplinary endeavor that crosses traditional department and specialty lines.

The critical care medicine physician is a specialist whose knowledge is of necessity broad, involving all aspects of management of the critically ill patient, and whose primary base of operation is the intensive care unit (ICU). This physician has completed training in a primary specialty and has received additional training in critical
The continuum of education in forming independently the entire scope of anesthesiology critical care medicine consists of 12 months of full-time training in critical care medicine. The training must be in an anesthesiology critical care medicine program in the United States or its territories accredited by the ACGME from the date the training begins to the date it ends. The training must follow completion of the continuum of education in anesthesiology as defined by the ABA. The holder of the certificate when to apply to the ABA for examination is left to the holder of the certificate when to apply to the ABA for examination and recertification in the subspecialty.

**B. Certification Requirements**

At the time of subspecialty certification in critical care medicine by the ABA, each candidate shall be capable of performing independently the entire scope of anesthesiology critical care medicine practice and must:

- Be a diplomate of the ABA.
- Fulfill the licensure requirement for certification.
- Have fulfilled the requirement of the continuum of education in critical care medicine as defined by the ABA.
- Have satisfied the critical care medicine examination requirement of the ABA.

ABA subspecialty certificates in critical care medicine issued on or after January 1, 2000, are valid for 10 years after the year the candidate passes the examination for certification. It is left to the holder of the certificate when to apply to the ABA for examination and recertification in the subspecialty.

**C. Continuum of Education in Critical Care Medicine**

The continuum of education in critical care medicine consists of 12 months of full-time training in critical care medicine. The training must be in an anesthesiology critical care medicine program in the United States or its territories accredited by the ACGME from the date the training begins to the date it ends. The training must follow completion of the continuum of education in anesthesiology as defined by the ABA. It is left to the holder of the certificate when to apply to the ABA for examination and recertification in the subspecialty.

The total of any and all absences during the critical care medicine residency may not exceed the equivalent of 20 working days per year. Attendance at scientific meetings, not to exceed 5 working days during the year of training, shall be considered part of the training program. Absences in excess of those specified will require lengthening of the total training time to the extent of the additional absence.

Training in critical care medicine must not be interrupted by frequent or prolonged periods of absence. When there is an absence for a period in excess of 1 month, the Credentials Committee of the ABA shall determine the number of months of training the resident will have to complete subsequent to resumption of the residency program to satisfy the training required for admission to the ABA subspecialty examination system.

**D. Entrance Requirements**

At the time of application to enter the critical care medicine examination system of the ABA, the applicant shall be capable of performing independently the entire scope of anesthesiology critical care medicine practice and must:

- Be certified by the ABA.
- Submit proof of having fulfilled the licensure requirement for certification. The applicant must inform the ABA of any conditions or restrictions in force on any active medical license he or she holds. When there is a restriction or condition in force on any of the applicant's medical licenses, the Credentials Committee of the ABA will determine whether, and on what terms, the applicant shall be admitted to the ABA examination system.
- Have on file in the ABA office documentation of having fulfilled the requirement of the continuum of education in critical care medicine.
- Have on file with the Board documentation attesting to the applicant's current privileges and evaluations of various aspects of the applicant's current practice of anesthesiology critical care medicine. Such evaluations will include verification that the applicant meets the Board's clinical activity requirement by practicing the subspecialty of critical care medicine, on average, 1 day per week during 1 of the previous 3 years. The ABA may use such documentation and evaluations as part of its assessment of the applicant's qualifications for admission to its critical care medicine examination system.
- If an applicant completed anesthesiology critical care medicine residency training more than 12 years before the date of application, or if an applicant has had a second or subsequent subspecialty application declared void, the applicant must submit proof of having reestablished his or her qualifications for admission to the subspecialty examination system. To fulfill the subspecialty requalification requirement, the applicant must complete 4 more consecutive months of training in the subspecialty. The training must be in an ACGME-accredited anesthesiology critical care medicine program and be completed satisfactorily before applying for examination.

The ABA shall determine that entry into the critical care medicine examination system is warranted when required information submitted by and on behalf of the applicant is satisfactory. The ABA will notify an applicant who is accepted as a candidate for critical care medicine certification after approval of all credentials.

The Board, acting as a committee of the whole, reserves the right not to accept an application. The applicant has the right to seek review of such decision.

The Board reserves the right to correct clerical errors affecting its decisions.

**E. Application Procedure**

1. **Application for Admission**

Application for admission to the examination system of the ABA must be made to the Secretary upon a form prescribed by the Board. An application may be made electronically, using the ABA Electronic Application System (EAS), via the ABA Web site at www.abanes.org. Alternatively, a paper application form may be mailed to the ABA Secretary at the ABA office.

A paper application form may be printed from the ABA website or obtained by writing to the ABA office. Telephone requests are not acceptable.

2. **Filing and Documentation**

The March 15 later deadline for receipt of a completed application and the application fee for the critical care medicine examination is February 15 of the examination year.

The late deadline for the ABA to receive a completed application with the application fee and a late fee in March 15 of the examination year.

The March 15 late deadline for receipt of a completed application and the appropriate fee is absolute. Regardless of the reason, the ABA will not consider a critical care medicine application it receives after March 15 of the examination year.

The ABA must receive all documentation it requires to make a determination about an applicant's qualifications for admission to the examination no later than May 15 of the examination year. This includes but is not limited to references, evidence of medical licensure, and verification that the training requirement is met. An application will not be accepted if the required documentation is
not received by that date. It ultimately is the responsibility of every applicant to assure that the ABA receives all required documentation in a timely manner.

G. Fees
The application fee for admission to the critical care medicine examination is $1,000. It includes a nonrefundable $250 administrative services fee and must accompany the application. The late fee for critical care medicine application is $200 and is nonrefundable. The application and late fees must accompany applications the ABA receives after the standard deadline and no later than the late deadline.

In the event an application is not accepted, or the application is accepted and subsequently withdrawn by the candidate, the ABA will retain the administrative services fee, and the late fee if one was assessed, and refund the balance of the application fee. No fee will be refunded if the candidate’s notice of withdrawal from the examination system is received in the Board office after the deadline by which candidates must notify the Board of their choice of test center for the first critical care medicine examination for which they are eligible.

The reexamination fee for the critical care medicine examination is $750.

A charge of $50 will be made whenever a check is returned for nonpayment.

H. Examination System
The written examination in critical care medicine is designed to test for the presence of knowledge that is considered essential for the ABA diplomate to function as a practitioner of critical care medicine. The examination analyzes the cognitive and deductive skills as well as the clinical judgment of the candidates.

The critical care medicine examination is administered annually. The ABA will mail notice to all eligible candidates announcing the location(s) and date of the critical care medicine examination approximately 4 months prior to the date of its scheduled administration.

The duration of candidate status is limited. Every candidate is given one opportunity a calendar year, for 3 years, to satisfy the critical care medicine examination requirement. The candidate must satisfy the examination requirement within 3 years of the date of the first examination that follows acceptance of the application. The ABA will declare the candidate’s application void if the candidate does not pass the examination within the prescribed number of opportunities or time, whichever comes first. Physicians whose application has been declared void may reapply to the ABA.

I. Status of Individual
Inquiries about the current status of physicians relative to the ABA critical care medicine certification system should be addressed to the ABA office. The ABA will affirm the status of physicians who are certified in critical care medicine by the ABA. For others, the response to the inquiry will be in keeping with the ABA policy.

J. Reapplication
The ABA declares void the application of a candidate who has failed to satisfy the examination requirement in the prescribed number of opportunities or time for any reason. The physician may reapply by submitting a new application. Such application shall be subject to the fees, rules, privileges, and requirements that apply at the time of reapplication. The applicant who is judged to meet existing requirements will be readmitted into the examination system.

Every reapplicant who qualified previously by Temporary Criteria is required to have completed satisfactorily the 1 year continuum of education in critical care medicine before reapplying for the subspecialty certification.

Subspecialty Certification in Pain Medicine
A. Definition of Pain Medicine
Pain medicine is the medical discipline concerned with the diagnosis and treatment of the entire range of painful disorders. Because of the vast scope of the field, pain medicine is a multidisciplinary subspecialty. The expertise of several disciplines is brought together in an effort to provide the maximum benefit to each patient. Although the care of patients is heavily influenced by the primary specialty of physicians who subspecialize in pain medicine, each member of the pain treatment team understands the anatomical and physiological basis of pain perception, the psychological factors that modify the pain experience, and the basic principles of pain medicine.

B. Certification Requirements
At the time of subspecialty certification in pain medicine by the ABA, each candidate shall be capable of performing independently the entire scope of anesthesiology pain medicine practice and must:

• Be a diplomate of the ABA.
• Fulfill the licensure requirement for certification.
• Have fulfilled the requirement of the continuum of education in pain medicine as defined by the ABA.
• Have satisfied the pain medicine examination requirement of the ABA.

The ABA subspecialty certificate in pain medicine is valid for a period of 10 years after the year the candidate passes the examination for certification. It is left to the holder of the certificate when to apply to the ABA for examination and recertification in the subspecialty.

C. Continuum of Education in Pain Medicine
The continuum of education in pain medicine consists of 12 months of full-time training in acute, chronic, and oncology pain medicine. The training must be in an anesthesiology pain medicine program in the United States or its territories accredited by the ACCME from the date the training begins to the date it ends. The training must follow completion of the continuum of education in anesthesiology (ie, Clinical Base and CA 1-3 years), unless the Credentials Committee of the ABA prospectively approves a different training sequence for the resident.

The total of any and all absences during the pain medicine residency may not exceed the equivalent of 20 working days per year. Attendance at scientific meetings, not to exceed 5 working days during the year of training, shall be considered part of the training program. Absences in excess of those specified will require lengthening of the total training time to the extent of the additional absence.

Training in pain medicine must not be interrupted by frequent or prolonged periods of absence. When there is an absence for a period in excess of 2 months, the Credentials Committee of the ABA shall determine the number of months of training the resident will have to complete subsequent to resumption of the residency program to satisfy the training required for admission to the ABA subspecialty examination system.

D. Entrance Requirements
At the time of application to enter the pain medicine examination system of the ABA, the applicant shall be capable of performing independently the entire scope of anesthesiology pain medicine practice and must:

• Be certified by the ABA.
• Submit proof of having fulfilled the licensure requirement for certification. The applicant must inform the ABA of any conditions or restrictions in force on any active medical license he or
she holds. When there is a restriction or condition in force on any of the applicant’s medical licenses, the Credentials Committee of the ABA will determine whether, and on what terms, the applicant shall be admitted to the ABA examination system.

- Have on file in the Board office documentation of having fulfilled the requirement of the continuum of education in pain medicine.
- Have on file with the Board documentation attesting to the applicant’s current privileges and evaluations of various aspects of the applicant’s current practice of anesthesiology pain medicine. Such evaluations will include verification that the applicant meets the Board’s clinical activity requirement by practicing the subspecialty of pain medicine, on average, 1 day per week during 1 of the previous 3 years. The ABA may use such documentation and evaluations as part of its assessment of the applicant’s qualifications for admission to its pain medicine examination system.
- If an applicant completed anesthesiology pain medicine residency training more than 12 years before the date of application, or if an applicant has had a second or subsequent subspecialty application declared void, the applicant must submit proof of having reestablished his or her qualifications for admission to the subspecialty examination system. To fulfill the subspecialty requalification requirement, the applicant must complete 4 more consecutive months of training in the subspecialty. The training must be in an ACGME-accredited anesthesiology pain medicine program and be completed satisfactory before applying for examination.

The ABA shall determine that entry into the pain medicine examination system is warranted when required information submitted by and on behalf of the applicant is satisfactory. The ABA will notify an applicant who is accepted as a candidate for pain medicine certification after approval of all credentials.

The Board, acting as a committee of the whole, reserves the right not to accept an application. The applicant has the right to seek review of such decision.

The Board reserves the right to correct clerical errors affecting its decisions.

E. Application Procedure
1. Application for admission to the examination system of the ABA must be made to the Secretary upon a form prescribed by the Board.

An application may be made electronically, using the ABA Electronic Application System (EAS), via the ABA Web site at www.abaes.org. Alternatively, a paper application form may be mailed to the ABA Secretary at the ABA office.

A paper application form may be printed from the ABA Web site or obtained by writing to the ABA office. Telephone requests are not acceptable.

2. The application form includes the Identical Acknowledgement and Release statements in the application for primary certification. The applicant for examination in pain medicine shall be required to sign each statement.

F. Filing and Documentation Deadlines
The standard deadline for the ABA to receive a completed application and the application fee for the pain medicine examination is February 15 of the examination year.

The late deadline for the ABA to receive a completed application with the application fee and a late fee is March 15 of the examination year.

The March 15 late deadline for receipt of a completed application and the appropriate fee is absolute. Regardless of the reason, the ABA will not consider a pain medicine application it receives after March 15 of the examination year.

The ABA must receive all documentation it requires to make a determination about an applicant’s qualifications for admission to the examination no later than May 15 of the examination year. This includes but is not limited to references, evidence of medical licensure, and verification that the training requirement is met. An application will not be accepted if the required documentation is not received by that date. It ultimately is the responsibility of every applicant to ensure that the ABA receives all required documentation in a timely manner.

G. Fees
The application fee for admission to the pain medicine examination system is $1,000. It includes a nonrefundable $250 administrative services fee and must accompany the application.

The late fee for pain medicine application is $200 and is nonrefundable. The application and late fees must accompany applications the ABA receives after the standard deadline and no later than the late deadline.

In the event an application is not accepted, or the application is accepted and subsequently withdrawn by the candidate, the ABA will retain the administrative services fee, and the late fee if one was assessed, and refund the balance of the application fee. No fee will be remitted if the candidate’s notice of withdrawal from the examination system is received in the Board office after the deadline by which candidates must notify the Board of their choice of test center for the first pain medicine examination for which they are eligible.

The reexamination fee for the pain medicine examination is $750.

A charge of $50 will be made whenever a check is returned for nonpayment.

H. Examination System
The written examination in pain medicine is designed to test for the presence of knowledge that is considered essential for the ABA diplomate to function as a practitioner of pain medicine. The examination analyzes the cognitive and deductive skills as well as the clinical judgment of the candidates.

The pain medicine examination is administered annually. The ABA will mail notice to all eligible candidates announcing the location(s) and date of the pain medicine examination approximately 4 months prior to the date of its scheduled administration.

The duration of candidate status is limited. Every candidate is given one opportunity a calendar year, for 3 years, to satisfy the pain medicine examination requirement. The candidate must satisfy the examination requirement within 3 years of the date of the first examination that follows acceptance of the application. The ABA will declare the candidate’s application void if the candidate does not pass the examination within the prescribed number of opportunities or time, whichever comes first. Physicians whose application has been declared void may reapply to the ABA.

I. Status of Individuals
Inquiries about the current status of physicians relative to the ABA pain medicine certification system should be addressed to the ABA office. The ABA will affirm the status of physicians who are certified in pain medicine by the ABA. For others, the response to the inquiry will be in keeping with ABA policy.

J. Reaplication
The ABA declares void the application of a candidate who has failed to satisfy the examination requirement in the prescribed number of opportunities or time for whatever reason. The physician may reapply by submitting a new application. Such application shall be subject to the fees, rules, privileges, and requirements that apply at the
time of reapplication. The applicant who is judged to meet existing requirements will be readmitted into the examination system. Every reapplicant who qualified previously by Temporary Criteria is required to have completed satisfactorily the 1-year continuum of education in pain medicine before reapplying for the subspecialty certificate.

Recertification and Maintenance of Certification

A. Background

Initiatives at federal, state, and local levels convinced the ABA that some of its diplomates would need or desire a mechanism to demonstrate their continuing qualifications. In May 1988, the ABA announced its intent to develop a program for continued demonstration of qualifications (CDQ), which would afford its diplomates the opportunity to voluntarily demonstrate current knowledge and quality of practice. The ABA approved a policy of time-limited certification in 1994-1996. All certificates issued by the ABA on or after January 1, 2000, will expire 10 years after the year the candidate passed the certification examination. The ABA took this step to reassure the public that the diploma continues to demonstrate the attributes of a Board-certified anesthesiologist. The American Board of Medical Specialties (ABMS) approved the ABA recertification proposal in March 1996. Subsequently, the ABA changed the name of the CDQ program to recertification.

In 1998, the ABMS approved the ABA proposals for recertification in the subspecialties of critical care medicine and pain medicine. The credentialing requirements, examination, and passing standards are the same for certification and recertification. The ABA administers the subspecialty examinations to recertification candidates annually.

The ABA Recertification Programs include a commitment to continuing education, assessment of the quality of practice in the local environment, and an evaluation of knowledge. Diplomates who hold a certificate that is not time-limited may voluntarily elect to apply to the ABA for recertification. The ABA will not alter the status of their certification if they do not recertify.

The ABMS approved the concept of maintenance of certification (MOC) in 2000. The 24 ABMS Member Boards subsequently endorsed the concept. MOC is a program of continual self-assessment and lifelong learning, along with periodic assessment of professional standing, cognitive expertise, and practice performance. The ABA is committed to evolving its recertification programs to MOC programs.

The ABA presented a proposal for a Maintenance of Certification in Anesthesiology Program (MOC) to ABMS in 2004. The transition from the current recertification program to MOC will begin in late 2004. This will allow adequate time for diplomates issued a time-limited certificate to satisfy all MOC requirements. The maximum interval between initial certification that is time-limited and successful completion of the requirements to maintain certification for the first time, as well as each time MOC is required thereafter, is 10 years.

B. Voluntary Recertification Requirements

The ABA established the voluntary recertification program for diplomates before it began issuing time-limited certificates in anesthesiology. Only diplomates certified in anesthesiology by the ABA before January 1, 2000, are eligible to apply for the recertification program.

The ABA recertification program will not remain open indefinitely. Diplomates certified before 2000 who might have a future need to recertify should consider participating in the program before it closes in 2009. Participation will not jeopardize a participant's diplomate status.

The ABA recertification programs include two major components: an evaluation of the quality of current practice conducted at the local level and a secure written examination.

To be admissible to an ABA recertification examination, the applicant shall be capable of performing independently the entire scope of specialty or subspecialty practice and must:

• Be a physician to whom the ABA previously awarded certification in the specialty or subspecialty.

• Submit proof of having fulfilled the licensure requirement for certification. The applicant must inform the ABA of any conditions or restrictions in force on any active medical license he or she holds. When there is a restriction or condition in force on any of the applicant's medical licenses, the Credentials Committee of the ABA will determine whether, and on what terms, the applicant shall be admitted to the ABA examination system.

• Have on file in the ABA office documentation solicited by the ABA from the hospital/facility chief of staff, or equivalent, attesting to the applicant's current privileges where a substantial portion of the applicant's practice takes place. The documentation includes evaluations of various aspects of the applicant's current practice and verification that the applicant meets the Board's clinical activity requirement by practicing the medical discipline for which recertification is being sought, on average, 1 day per week during each of the previous 3 years. If the applicant's practice is entirely office-based, three letters of reference solicited by the ABA from referring physicians should be on file.

The ABA shall issue a recertification certificate to the applicant who is accepted for and satisfies the recertification examination requirement established by the ABA.

C. Application Procedure

Application for admission to the examination system of the ABA must be made to the Secretary upon a form prescribed by the Board.

An application may be made electronically, using the ABA Electronic Application System (EAS), via the ABA Web site at www.abanes.org. Alternatively, a paper application form may be mailed to the ABA Secretary at the ABA office.

A paper application form may be printed from the ABA Web site or obtained by writing to the ABA office. Telephone requests are not acceptable.

The application form includes the identical Acknowledgement and Release statements included in the application for initial certification. The recertification applicant shall be required to sign each statement.

D. Filing and Documentation Deadlines

The standard deadline for the ABA to receive a completed anesthesiology recertification application and the application fee is December 15 of the year prior to the examination year. The late deadline for the ABA to receive a completed application with the application fee and a late fee is January 15 of the examination year.

The standard deadline for the ABA to receive a completed subspecialty recertification application and the application fee is February 15 of the examination year. The late deadline for the ABA to receive a completed application with the application fee and a late fee is March 15 of the examination year.

The late deadlines for receipt of a completed anesthesiology or subspecialty recertification application and the appropriate fee are absolute. Regardless of the reason, the ABA will not consider a recertification application it receives after the late deadline for the examination.

The ABA must receive all the documentation it requires to make a determination about an applicant's qualifications for admission to the anesthesiology recertification examination no later than March
15 of the examination year. The ABA must receive all the documentation it requires to make a determination about an applicant’s qualifications for admission to a subspecialty recertification examination no later than May 15 of the examination year. Documentation includes but is not limited to evidence of medical licensure and verification of current credentialing/hospital privileges. An application will not be accepted if the required documentation is not received by that date. It ultimately is the responsibility of every applicant to ensure that the ABA receives all required documentation in a timely manner.

E. Fees

The application fee is $700 for admission to the voluntary anesthesiology recertification program. It includes a nonrefundable administrative service fee of $200. The fee must accompany the anesthesiology recertification application.

The application fee is $1,000 for admission to a subspecialty recertification program. It includes a nonrefundable administrative service fee of $250. The fee must accompany the subspecialty recertification application.

The late fee for anesthesiology and subspecialty recertification applications is $200 and is nonrefundable. The application and late fees must accompany applications the ABA receives after the standard deadline and no later than the late deadline.

In the event an application is not accepted, or the application is accepted and subsequently withdrawn by the candidate, the ABA will retain the administrative services fee, and the late fee if one was assessed, and refund the balance of the application fee. No fee will be remitted if the candidate’s notice of withdrawal from the examination system is received in the Board office after the deadline by which candidates must notify the Board of their choice of test center for the first recertification examination for which they are eligible.

The reexamination fee is $500 for the anesthesiology recertification examination and $750 for a subspecialty recertification examination.

A charge of $50 will be made whenever a check is returned for nonpayment.

F. Examination System

The ABA shall determine that admission to the recertification examination is warranted when required information submitted by and on behalf of the applicant is satisfactory. The ABA will notify an applicant who is accepted as a candidate for recertification after approval of all credentials.

The Board, acting as a committee of the whole, reserves the right not to accept an application. The applicant has the right to seek review of such decision.

The Board reserves the right to correct clerical errors affecting its decisions.

The specialty recertification examination is designed to assess current knowledge of the breadth of anesthesia practice and presents clinically relevant items that apply to all types of anesthesia practice. The subspecialty recertification examinations are designed to test for the presence of knowledge considered essential for the ABA diplomat to function as a practitioner of the subspecialty.

The recertification examinations are administered once each year. The ABA will mail notice to all eligible candidates announcing the location(s) and date of a recertification examination approximately 4 months prior to the date of its scheduled administration.

The duration of candidate status is limited. Every candidate is given one opportunity a calendar year, for 3 years, to satisfy the recertification examination requirement. The candidate must satisfy the examination requirement within 3 years of the date of the first examination that follows acceptance of the application. The ABA will declare the candidate’s application void if the candidate does not pass the examination within the prescribed number of opportunities or time, whichever comes first. Physicians whose application has been declared void may reapply to the ABA.

G. Status of Individuals

Inquiries about the current status of physicians should be addressed to the ABA office. For physicians certified by the ABA who subsequently complete the recertification program, the ABA will affirm their diplomat status and the year of their recertification. For others, the response to the inquiry will be in keeping with ABA policy.

H. Reapplication

Physicians, whether previously recertified or not, may apply for recertification at whatever interval they prefer. To reapply, the physician must submit a new application. Such application shall be subject to the fees, rules, privileges, and requirements that apply at the time of reapplication. The applicant who is judged to meet existing requirements will be accepted as a candidate for recertification.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Colon and Rectal Surgery [ABCRS] to ascertain whether the information below is current.)

Qualifications of Candidates

All candidates shall comply with the following regulations:

General Requirements
1. A candidate shall appear personally before the Board and shall submit to the required examinations.
2. A candidate shall limit the majority of his/her practice to colon and rectal surgery.
3. A candidate may be required to deliver to the Board sufficient case reports to demonstrate proficiency in colon and rectal surgery.
4. A bibliography of papers and books published by the candidate shall be submitted to the Board upon its request.
5. The moral and ethical fitness of a candidate must be satisfactory to the Board and in conformity with the Statements on Principles of the American College of Surgeons and the Principles of Medical Ethics of the American Medical Association. Practices not conforming therewith may result in rejection of an application or in deferral of examination until such matters have been resolved satisfactorily.

Professional Qualifications
1. A candidate must have completed an accredited residency program in colon and rectal surgery following successful completion of general surgical training in an ACGME-accredited residency program.
2. All candidates must have a currently valid registered, full, and unrestricted license to practice medicine in a state, territory, or possession of the United States or in a Canadian province and must continue to be licensed throughout the certification process.
American Board of Colon and Rectal Surgery

3. A candidate must successfully complete the Qualifying Examination of the American Board of Surgery before being admitted to the ABCRS Written Examination (Part I).

4. A candidate must achieve certification by the American Board of Surgery before being admitted to the ABCRS Oral Examination (Part II).

Application for Examination

Each candidate for examination must complete and submit an Application for Examination, which may be obtained from the secretary of the Board. Applications must be submitted before July 15 of each year.

The application must be accompanied by two unmounted, recent photographs of the applicant and the required application fee.

Within 2 weeks after conclusion of the training program, the applicant must submit to the secretary of the Board a prescribed form, listing all operative procedures performed during the training period. This form is available from the secretary of the Board and must be countersigned by the program director.

The acceptability of a candidate for examination depends not only upon completion of the requirements listed under “Qualifications for Candidates” but also upon information available to the Board regarding the candidate’s professional maturity, surgical judgment, and technical competence.

Examinations

To achieve certification by the ABCRS, a candidate must pass a Written Examination (Part I) and an Oral Examination (Part II). The Written Examination is offered in the spring of the year, and a candidate is required to pass this examination before being permitted to take the Oral Examination, which is given in the fall of the year.

Examinations are conducted at times and places determined by the Board, and this information may be obtained from the Board office. It is also published in Diseases of the Colon and Rectum and in the Journal of the American Medical Association. Examinations will be held in one designated city in the United States.

Part I—Written Examination

The Written Examination is an assessment of a candidate’s knowledge of the theory and practice of colon and rectal surgery, with separate examinations in pathology and radiology. The written portion of the examination is a 4-hour test of multiple-choice questions covering the spectrum of colon and rectal surgery and the body of basic science pertinent to it. The pathology and radiology portions of the examination are each 1 hour in length and consist of questions and slide presentations.

Part II—Oral Examination

The Oral Examination is conducted by members of the Board or its designated examiners. Its objective is to evaluate the candidate’s clinical experience, problem-solving ability, and surgical judgment and to ascertain the candidate’s knowledge of current literature on colon and rectal diseases and surgery. Each candidate will undergo at least three 30-minute oral examinations by three 2-member examining teams.

Examination Results

The Board makes every effort to be as prompt as possible in notifying candidates of their examination results, and letters of notification may be expected within 4 to 6 weeks following the examination.

Reexaminations

A candidate who has failed either the written or oral part of the examination may be reexamined after 1 year has elapsed.

A candidate who fails to pass either the written or oral portion of the examination may repeat that part of the examination twice, thus offering the candidate three opportunities to pass each part of the examination.

A candidate who fails to pass either the written or oral portion of the examination three times may not repeat the examination without satisfactory completion of an approved remedial colon and rectal surgery residency program and submission of a new application for examination. A copy of the Remedial Training Guidelines may be obtained from the Board office upon request.

Status of Applicant

The Board does not use or sanction the terms “Board eligible” or “Board qualified.” The status of an applicant with the Board is determined by and varies with the current status of his/her credentials.

A candidate must apply to the Board’s certification process within 5 years after completion of approved colon and rectal surgery training.

The entire certification process with the Board must be successfully completed within 7 years following approval of the formal application. In addition, a candidate whose application for examination has been approved but who does not take the examination within 3 years must submit a new application.

In exceptional or unusual circumstances, the Board may, at its discretion, waive one or more of the limitations specified under “Status of Applicant.”

Fees

Application fee: A nonrefundable fee of $400 shall accompany the application.

Written Examination fee (Part I): A fee of $500 is due and payable when the candidate is notified of approval to take the Written Examination.

Oral Examination fee (Part II): A fee of $700 is due and payable when the candidate is notified of approval to take the Oral Examination.

Reexamination fee: Fees for reexamination are the same as shown above for each examination.

Withdrawal from examination: A candidate who withdraws must notify the Board office at least 10 business days before a scheduled examination. A candidate who fails to appear for examination or who withdraws without giving at least 10 days’ notice as defined above will forfeit $200 of the designated examination fee and will have to resubmit the forfeited amount before being admitted to the next scheduled examination.

Late applications: Recognizing that a situation may arise that prevents an applicant from meeting the July 15 deadline, the Board has a provision for late applications. Late applications are those that are postmarked from July 16 through August 15 each year.

There is a nonrefundable late application fee of $200, bringing the total processing fee for a late application to $900. No applications postmarked after August 15 will be accepted.

Fees are subject to change as directed by the Board.

Reconsideration and Appeals

The Board has adopted a policy with regard to reconsideration and appeals of decisions adverse to applicants. A request for reconsideration, which is the first step, must be made in writing and received by the Board office within 60 days of the date of notice from the
Board of the action in question. A copy of the Reconsideration and Appeals Policy may be obtained from the Board office upon request.

**Certification**

A candidate who has met all the requirements and successfully completed the examinations of the ABCRS will be issued a certificate attesting to his/her qualifications in colon and rectal surgery. The certificate shall be signed by the president or vice president and the secretary and shall bear the corporate seal of the Board. The certificate granted by the Board does not confer privilege or license to practice colon and rectal surgery but is evidence that a physician's qualifications for specialty practice are recognized by his/her peers. It is not intended to define the requirements for membership on hospital staffs, to gain special recognition or privileges for its diplomates, to define the scope of specialty practice, or to state who may or may not engage in the practice of the specialty.

Unless the candidate specifies otherwise, the Board forwards the names of candidates who have achieved certification to the American Board of Medical Specialties (ABMS) for publication in the *Official ABMS Directory of Board Certified Medical Specialists*, published jointly by the ABMS and Elsevier Science.

**Time-Limited Certification**

Beginning with those candidates who passed the certifying examination in 1990 and thereafter, the ABCRS will issue time-limited certificates. Certificates will be valid for 10 years from the date of certification, after which the certificates will no longer be valid.

[Note: Time-limited certification will not affect diplomates holding certificates issued prior to 1990.]

**Recertification**

The ABCRS offers recertification in the specialty. Certificates can be renewed prior to expiration by fulfilling the requirements for recertification specified by the Board. The recertification examination is offered annually, on a voluntary basis, to all certified colon and rectal surgeons who apply and meet the Board's requirements. A recertification information booklet, which outlines the requirements and procedures, is available by writing to the Board office.

**Revocation of Certificates**

The filing of an application for examination, participating in examination, and accepting a certificate are voluntary acts. Therefore, the Board assumes no responsibility for any effect that certification or failure to obtain certification may have on the private or professional activities of candidates.

When an application is submitted, candidates are required to sign an agreement, a portion of which reads as follows: "I agree to disqualification from examination or from the issuance of a certificate, and I agree to the forfeiture and redelivery of such certificate in the event that any of the statements herein made by me at this time or at any time in the past or future in regard to my application for a certificate are false or in the event that any of the rules and regulations of the Board governing such examinations and certificate are violated by me."

Certificates that have been issued are subject to the provisions of the Articles of Incorporation and the Constitution and Bylaws of the American Board of Colon and Rectal Surgery, Inc, and may be revoked for violation of any of these provisions.

**Examination of Candidates With Disabilities**

The ABCRS supports the intent of the Americans with Disabilities Act. The Board will make a reasonable effort to provide Board applicants who have documented disabilities with modifications in its examination process that are appropriate for such disabilities but that do not alter the measurement of the skills or knowledge that the examination process is intended to test.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Dermatology [ABD] to ascertain whether the information below is current.)

Requirements for Eligibility to Take the Examination

Each applicant must satisfy the following requirements before he/she is eligible to take the certifying examination of the Board.

General Qualifications

1. The candidate must have graduated from a medical school in the United States accredited by the Liaison Committee for Medical Education (LCME), an accredited medical school in Canada, or an accredited osteopathic school in the United States; if a graduate of a foreign medical school, the candidate must possess the standard certificate of the Educational Commission for Foreign Medical Graduates (ECFMG). If, however, the foreign medical school graduate is in training in an accredited program in Canada, the Board will recognize the certificate of the Medical Council of Canada.

2. The candidate must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in either the United States or Canada, but may be denied certification if the candidate's license has been revoked, suspended, restricted, or surrendered in any jurisdiction or if the candidate is subject to adverse licensure proceedings.

3. The candidate must not have engaged in conduct that, in the judgment of the Board, (i) reflects unethical activity relating to the practice of medicine, or (ii) casts significant doubt on the ability of the candidate to practice dermatology in the best interests of patients.

Residency Training Requirements

1. Candidates for certification by the ABD are required to have a total of 4 years of postgraduate training, as described below in Sections (a) and (b).

a. The first year must consist of clinical training in one of the following types of broad-based programs in the United States accredited by the Accreditation Council for Graduate Medical Education (ACGME) or a similar program in Canada accredited by the Royal College of Physicians and Surgeons of Canada (RCPSC): transitional year (formerly called flexible first postgraduate year) or a first-year residency in internal medicine, general surgery, family practice, obstetrics and gynecology, pediatrics, or emergency medicine.

b. Three years of full-time training as a resident in a dermatology residency training program in the United States accredited by the ACGME or 3 years of full-time training as a resident in a dermatology residency training program in Canada accredited by the RCPSC. Accreditation of dermatology training programs in the United States is the responsibility of the Residency Review Committee (RRC) for Dermatology acting with authority delegated to it by the ACGME (accredited dermatology residency training programs and clinical programs for first postgraduate year credit are listed in this Directory).

c. At least 75% of the resident's time throughout each year (PGY-2, PGY-3, PGY-4) of dermatology residency training must be related to the direct care of dermatologic outpatients and inpatients; this includes clinical conferences and didactic lectures related to patient care, consultations, and inpatient rounds. During the 3 years of dermatology residency, therefore, 225% of the 300% (100% per year) of training must involve these direct patient care activities. In special training tracks, which are discussed further under d. below, residents must satisfy the 225% requirement over the 3 years (PGY-2, PGY-3, PGY-4). 4 years (PGY-2, PGY-3, PGY-4, PGY-5), or 5 years (PGY-2, PGY-3, PGY-4, PGY-5, PGY-6) of dermatology training.

In addition, special-training tracks must include the equivalent of one 1/2 day clinic per week each year until the 225% requirement is met. Continuity of patient care should be stressed as much as possible in this clinic experience. Rotations on the consultation service, for a period comparable to the time similarly scheduled for general dermatology residents, may be substituted for the clinic time during the special training track years of the residency.

Dermatopathology, microbiology, and other basic science lectures, seminars, and conferences are essential components of the resident's training (see the Program Requirements for Residency Education in Dermatology).

The Board also emphasizes the importance of basic and clinical investigation in the educational experience of trainees. Accordingly, all residents should participate in basic and/or clinical research during their training.

d. For those candidates whose career plans involve a primary commitment to investigative or academic dermatology, a special training track, which must assure adequate clinical education and experience in accordance with the general requirements described above, may also be acceptable. Program directors should contact the executive director of the Board for information concerning this special track, such as eligibility requirements and when and how to submit applications to the Board. The essential elements of such training tracks are as follows:

1) The first year (PGY2) of this track must be at least 75% clinical in character.
2) Investigative or academic experience can be integrated with the required additional clinical training during the second (PGY2) and/or third (PGY3) year(s).
3) Please refer to c. above.
4) Requests for approval of this special track must be submitted prospectively, at least 4 months prior to the beginning of such training. This will be on or before March 1 of the PGY2 year for a special track beginning on July 1 of the PGY3 year, or later if special track training is to begin later. Requests earlier than January 1 of the PGY2 year will not be considered because the program director must have had an opportunity to judge the clinical potential of the trainee.

The request for consideration of this investigative/academic track must include details of the scheduled program and time commitments during the entire training period of these candidates. It is incumbent upon program directors to select candidates for this special training track whose skills and learning capabilities permit the acquisition of clinical competence as well as the execution of their investigative or academic responsibilities. Moreover, the program director must monitor the training of these residents throughout their residency and must validate their clinical experience at the completion of their residencies.

2. A preliminary registration form must be filed by the candidate and signed by his/her training director shortly after the resident begins residency training in dermatology (ie, by August 1 or within 30 days of the start of training).
3. It is mandatory that the training director submit a yearly report form for each resident to the Board office by August 1 after completion of the first and second year of training and by May 15 for residents who will complete their third year of training on June 30. In order for a candidate to take the certifying examination, the training director must certify that each year of training was completed in a satisfactory manner.

Guidelines for Determining Adequacy of Clinical Training

The following guidelines are designed to assist program directors in their determination of the adequacy of the clinical training of residents and to assure satisfaction of the eligibility requirements for certification by the ABD. Of special concern are those residents on the special investigative/academic track or those residents whose training experience differs from the standard 36 months of full-time clinical training, as approved for each program by the RRC of the ACGME:

a. In general, high priority should be given to completing 36 continuous months of full-time dermatology training. For most residents, this will consist of full-time clinical training; for residents with a primary commitment to investigative or academic dermatology, this may be a special training track, as defined previously.

b. Any departure from (a), as required, for example, for a medical leave of absence, should be documented and fully justified in the resident evaluation forms filed annually with the Board by the training program director.

c. An absence exceeding 6 weeks in any 1 academic year or a total of 14 weeks over 3 years, including vacation, should be approved only under truly exceptional circumstances. In addition, any resident approved to sit for the certifying examination despite such an absence should have completed each year of training in an above-average or excellent manner.

d. Any resident who will have been absent more than 6 weeks in 1 year or 14 weeks over 3 years and whose performance has not been uniformly above average or excellent throughout residency training should be required to complete an additional period of training at least equal in length to the total period of absence in excess of routinely provided total vacation time. If the program director anticipates that this additional training will be completed in a satisfactory manner before August 1, the director may approve the resident to sit for the certifying examination in that year, just as if training had been completed by July 1.

Registration for the Examination of the Board

Candidates who have completed the training requirements as outlined above are eligible to apply for examination by the Board. Candidates should request an Application for Certification Form from the office of the executive director of the Board. However, for those candidates who are completing their residency training, application forms will be sent to the program directors for distribution to each candidate. The completed application must be filed with the Board office before March 1 of the year in which the candidate plans to take the examination. Physicians who complete their residency training in dermatology by July 1 of a given year are eligible to apply to take the examination in August of that year. Under the special conditions described previously ("Guidelines for Determining Adequacy of Clinical Training"), candidates completing additional (make-up) training before September 1 may also be eligible to take the certifying examination. It is emphasized that it is the candidate's responsibility to send a completed application form to the Board if he/she plans to take the certifying examination of the Board.

A candidate is not considered an "active" candidate until his/her application has been received and approved by the Board. This approval includes a review of the application and annual evaluation reports from the candidate's training director. After the application is approved, the candidate is required to take the examination within 2 years. Candidates who do not exercise the examination privilege within 2 years of the date they are declared eligible will be required to file a new application and have their eligibility for examination reviewed by the Requirements Committee. If the reaplication is approved by the Board, the candidate is again eligible to take the examination for another 2-year period. It should be noted that candidates who have had an extended lapse in clinical practice or in other activities related to dermatology may be required to submit evidence of their continued involvement with the specialty of dermatology. Alternatively, it may be necessary for such individuals to spend at least 1 year in clinical practice or with an academic department in order to become eligible for the certification examination.

The Board does not use the term "Board eligible" in correspondence with directors of hospitals or others who send inquiries to the Board office. On written request by a candidate and payment of a fee, the Board will send to the candidate a letter stating his/her status with the Board at any given time.

Combined Training in Dermatology and Internal Medicine

The ABD and the American Board of Internal Medicine have jointly approved the Guidelines for Combined Training in Dermatology and Internal Medicine, copies of which may be obtained from the Board office or downloaded from the ABD Web site (www.abderm.org).
Program directors interested in establishing a combined training program should write to the Board office for application forms, which must be reviewed and approved by the ABD and the American Board of Pediatrics. Application forms may also be downloaded from the ABD Web site (www.abderm.org).

Combined Training in Dermatology and Pediatrics

The ABD and the American Board of Pediatrics have jointly approved the Guidelines for Combined Training in Dermatology and Pediatrics, copies of which may be obtained from the Board office or downloaded from the ABD Web site (www.abderm.org).

Program directors interested in establishing a combined training program should write to the Board office for application forms, which must be reviewed and approved by the ABD and the American Board of Pediatrics. Application forms may also be downloaded from the ABD Web site (www.abderm.org).

Board Examination

The certifying examination in dermatology, which is administered over a period of 2 days, includes the following:

1. Comprehensive Multiple-Choice Examination in Dermatology (Part I): This is a 3-hour comprehensive examination, and was formerly referred to as the Written examination. It tests the candidate’s knowledge of the basic science and clinical aspects of dermatology, including all the related disciplines. Among the topics included in this part of the examination are clinical dermatology, pediatric dermatology, preventive dermatology, entomology, epidemiology, dermatopathology, cutaneous allergy and immunology, dermatologic surgery, cutaneous oncology, sexually transmitted diseases, internal medicine as it pertains to dermatology, medical ethics, photobiology, and cutaneous microbiology, as well as anatomy, physiology, biochemistry, molecular biology, radiation physics, radiation therapy, physical therapy, pharmacology, genetics, and electron microscopy as related to dermatology. Considerable emphasis is placed on comprehensive knowledge of the literature.

2. Examination in Clinical and Laboratory Dermatology (Part IIA): Projected Kodachrome slides are utilized in this part of the examination. Candidates must answer multiple-choice-type questions about the projected pictorial material, which is drawn from all areas of clinical and laboratory dermatology. Examples of the types of slides used include photographs of patients; diagrams and illustrative drawings and pictures of dermatologic surgical procedures (including Mohs micrographic surgery, hair transplantation, dermabrasion, sclerotherapy, liposuction, chemical peels and tissue augmentation); histopathologic sections, fungal cultures, culture mounts, bacterial cultures, transect preparations, skin scrapings and smears, roentgenograms, histochemical and dermatologic surgery, cutaneous oncology, sexually transmitted diseases, internal medicine as it pertains to dermatology, medical ethics, photobiology, and cutaneous microbiology, as well as anatomy, physiology, biochemistry, molecular biology, radiation physics, radiation therapy, physical therapy, pharmacology, genetics, and electron microscopy as related to dermatology. Considerable emphasis is placed on comprehensive knowledge of the literature.

3. Examination in Dermatopathology (Part IIIB): In this section, candidates are questioned on histopathologic slides that they examine microscopically, utilizing personal or rented microscopes. This section of the examination encompasses the entire spectrum of dermatopathology.

For the purposes of scoring, the Examination in Clinical and Laboratory Dermatology is combined with the Examination in Dermatopathology, and candidates must pass this combined examination as well as the Comprehensive Multiple Choice Examination in Dermatopathology in order to be certified. If a candidate fails either the combined Examination in Clinical and Laboratory Dermatology/Examination in Dermatopathology or the Comprehensive Multiple Choice Examination in Dermatology and not the other, only the failed component must be repeated.

A candidate who, after investigation by the Board, has been found to have engaged in cheating or irregular behavior in connection with an examination of the Board, whether or not such behavior had an effect on the candidate’s performance on the examination, shall have his or her examination invalidated. Such candidate shall not be certified and may be barred from retaking the examination in the future for a period determined by the Board in its sole discretion. Also see Review of Adverse Decisions, below.

The examination is given annually over a 2-day period and lasts a total of approximately 10 hours. In 2004, it will be held on August 15 and 16 at the Holiday Inn O’Hare in Rosemont, Illinois, which is in the O’Hare International Airport area of Chicago.

Reexamination

With their initial examination application, candidates have a 2-year period during which they may take the examination or any necessary reexamination on either a failed part (see above) or both parts of the examination. For a reexamination, they must notify the Board office by March 1 of the year they plan to retake the examination. If a candidate has not passed or does not take the examination during this 2-year period, he/she must reapply and complete the necessary forms, after which he/she will have another 2-year period of eligibility during which to take the examination or reexamination. For further information concerning this as well as the appropriate fees required, the Board office should be contacted.

Candidates With Disabilities

The ABD supports the intent of the Americans with Disabilities Act (ADA) and, therefore, will provide or allow the use of necessary auxiliary aids, services, or testing conditions that do not fundamentally alter the measurement of the skills or knowledge the Board assessment program is intended to test. In order to implement this policy, notification of the need for special testing circumstances must be given to the ABD by a candidate for certification at the time that he/she submits the application for any of the Board’s certifying examinations. This deadline is necessary in order to allow the Board to request the necessary documentation, to review the records, and to verify the disability, if necessary. In addition, since this policy also applies to the In-Training Examination, which is under the jurisdiction of the ABD, appropriate advance notification of the need for special testing circumstances must be provided when the application for the In-Training Examination is submitted by the department.

Upon receipt of such request, the ABD will initiate the appropriate procedural steps, but it should be understood that all special arrangements must be made and agreed upon in advance; special arrangements cannot be made at the time the examination is given. Therefore, early notification of the need for special testing circumstances is encouraged.

Chemical Dependency or Substance Abuse

A candidate with a chemical dependency or substance abuse problem will not be permitted to take the examination unless he/she can submit evidence, which must be verifiable, that the disorder is being treated and is under control. Individuals with such problems or a history thereof must provide the necessary documentation at the time of application to take the examination. A confirmatory letter from a licensed physician within 1 month of the examination stating that the disorder no longer exists or is currently controlled is also necessary.

American Board of Dermatology

Graduate Medical Education Directory 2004-2005
Certification

After meeting the above requirements and passing the examination, the candidate will be awarded a certificate that acknowledges that he/she has completed the required course of graduate study and clinical training, has met other specific standards and qualifications, and has passed the examination conducted by the Board. The candidate is then referred to as a diplomate of the American Board of Dermatology, Inc. The names of diplomates of the Board appear in The Official ABMS Directory of Board Certified Medical Specialties, published by Elsevier Science in cooperation with the American Board of Medical Specialties (ABMS). The certificate is issued for a 10-year period. Renewal is subject to completion of Maintenance of Certification requirements.

Each certificate is subject to revocation in the event that (a) the diplomate was not eligible to receive the certificate, whether or not the facts concerning ineligibility were known to the Board when the certificate was issued; (b) the diplomate has made any material misrepresentation or omission in the application for certification or in any other statement to the Board or has failed in timely fashion to supplement any response to any question on any application for certification or recertification with respect to criminal conduct, loss or suspension of a medical license, medical staff privileges, or medical society membership; (c) the diplomate is convicted of or pleads nolo contendere to a crime that, in the judgment of the Board, relates to the practice of medicine; (d) the diplomate is found to have engaged in conduct which, in the judgment of the Board, (i) reflects unethical activity relating to the practice of medicine, or (ii) casts significant doubt on the ability of the diplomate to practice medicine in the best interests of patients; or (e) the diplomate is found by the Board to have (i) engaged in irregular behavior in connection with the examination, (ii) had a license to practice medicine revoked or suspended; (iii) been expelled from a medical society for reasons other than nonpayment of dues or failure to attend meetings, (iv) had medical staff privileges revoked or suspended for reasons relating to the practice of medicine, (v) taken other action reasonably deemed by the Board to be inconsistent with diplomate status, or (vi) willfully and materially violated any rule or policy of the Board.

Review of Adverse Decisions

The ABD recognizes a candidate's right of appeal following an adverse action at any stage of the certification process. Within the residency program, trainees must be accorded due process in compliance with provisions established by the parent institution and as stipulated in the Essentials of Accredited Residencies in Graduate Medical Education (July 1, 1982) of the ACGME.

Any candidate for certification (primary specialty or subspecialty) or recertification shall be given prompt written notice of any adverse decision by the Board. Such notice shall briefly state the reason for the adverse decision. It shall advise whether or not the candidate has a right to appeal the decision and shall include a copy of this document.

A candidate found to have engaged in cheating or other irregular behavior in connection with an examination may appeal the Board's finding, any consequent invalidation of the candidate's examination, and any disbarment from future examinations. Such appeal must be received in the Board office within 30 days of mailing the notification of the finding by the Board.

A. Appealable Decisions

1. Request for Appeal

Any physician (a) whose credentials for eligibility to sit for an ABD examination have not been approved, or (b) who has been denied certification for a reason other than receipt of a failing grade on the examination, or (c) whose certification or recertification has been revoked, or (d) whose application for reinstatement has been denied, shall have a right to appeal the adverse decision by submitting a written request for appeal in compliance with this policy on Review of Adverse Decisions. Such request must contain a concise statement of why the physician believes that the adverse decision was improper, must include any supporting material that the physician wishes to have considered, and must be received in the Office of the Board within 30 days after the date of the Board's notice of an adverse decision. The request may also include a request for a hearing. If a proper request for appeal is not received within 30 days, the adverse decision shall constitute the final decision of the Board.

2. Review by Appeals Committee

Each proper and timely request for appeal will be reviewed by an Appeals Committee consisting of three individuals appointed by the President. No member of the Appeals Committee shall have participated in the adverse decision under review unless that decision was made by the full Board of Directors. The Appeals Committee, after reviewing the request for appeal, shall either (a) affirm, reverse, or modify the adverse decision or (b) grant a hearing if one has been requested and the Committee determines that a hearing might be useful.

If the Appeals Committee determines that a hearing might be useful, it shall schedule a hearing within 60 days after that determination. Not less than 30 days prior to the scheduled date of the hearing, the Appeals Committee shall notify the physician in writing of the date, time, and place of the hearing. The Appeals Committee, at its sole discretion, may determine whether legal counsel for the physician may be present at the hearing and the extent to which such counsel may participate.

The physician's written intent to appear at the hearing must be received in the Office of the Board not later than 14 days before the scheduled date of the hearing. A physician who chooses to appear shall be given the opportunity to make a statement summarizing his/her position. The Appeals Committee shall not be bound by technical rules of evidence usually employed in legal proceedings, but may consider any evidence it deems appropriate. A record of the proceedings shall be kept. A copy of the hearing record shall be made available to the physician upon payment of the cost of reproduction. All expenses incurred by the physician in connection with the hearing shall be borne by the physician.

Following the hearing, the Appeals Committee shall determine whether to affirm, reverse, or modify the adverse decision. The physician shall be promptly notified in writing of the action of the Appeals Committee and the reason for the action. The Committee's action in affirming, reversing, or modifying the adverse decision shall be subject only to ratification by the Board of Directors.

3. Review by the Board of Directors

The action of the Appeals Committee shall be reviewed no later than the next regularly scheduled meeting of the Board of Directors. The Board of Directors shall ratify the action of the Appeals Committee unless it finds that action to have been arbitrary, unreasonable, or not sustained by the record. The physician shall be promptly notified of the Board's decision. The decision of the Board of Directors shall constitute the final action of the Board on the matter.

B. Nonappealable Decisions

1. Decisions by Residency Program or Program Director

Decisions by a physician's residency program, program director, or sponsoring institution regarding credit for training or any other matter shall not be appealable to the Board. Any disagree-
ment by a physician with such decisions should be communicated to the residency program, program director, or sponsoring institution. The Board will not second-guess judgments of these entities. However, the physician may contact the Board to determine what further steps, if any, may be available.

2. Decisions Based on Failure of the Certifying Examination

Adverse decisions based on a physician's receipt of a failing grade on an ABD examination shall not be appealable. Instead, the physician may, within 30 days after the mailing of the examination results, request rescoring of the examination by hand. Such request must be accompanied by payment of a fee of $35. Upon receipt of a proper and timely request for rescoring, the Board shall have the examination rescored by hand. It shall communicate the rescored results to the physician promptly after receiving those results.

Reappraisal After Revocation of Certification or Recertification

A physician whose certification or recertification has been revoked may apply for reinstatement as a Diplomate when the physician believes that the circumstances underlying the Board's action have been satisfactorily resolved. The physician shall apply by providing a written statement setting forth in detail the changes in circumstances. The Board shall consider such statement and determine whether to reinstate the physician's certification or recertification. The physician shall be promptly notified of the Board's decision.

Maintenance of Certification/Recertification

The Board began issuing time-limited certificates, valid for 10 years, in 1991, and its process of voluntary recertification was approved by the ABMS in 1994. Recertification examinations were administered in 1999, 2001, and 2003. A total of 1,250 diplomates, including 1,117 time-limited and 133 lifetime certificate holders, sat for these examinations as part of the recertification process.

The American Board of Medical Specialties (ABMS) has recently introduced the concept of Maintenance of Certification, a program of continuous professional development that is intended to replace the current process of recertification. Maintenance of certification is an ongoing process through which a diplomate's credentials, licensure, and professional standing are verified and his or her knowledge are evaluated. In the future, when reliable methods are available, practice performance will be evaluated as well. The maintenance of certification process is composed of four components:

1. Evidence of professional standing
2. Evidence of commitment to lifelong-learning and periodic self-assessment
3. Evidence of cognitive expertise
4. Evaluation of performance in practice

The ABD is committed to the gradual conversion of its current process of recertification to a process of maintenance of certification that is consistent with guidelines established by the ABMS and with the distinctive nature and elements of the specialty of dermatology. In so doing, the Board will strive to plan and implement maintenance of certification as a fair and credible process that will withstand public and professional scrutiny, will be properly considerate of the concerns and responsibilities of its diplomates, and will preserve the high standards of the specialty of dermatology. As the various phases of the maintenance of certification process are being developed and put into place, diplomates will be informed in newsletters and other communications.

At present, the requirements for qualification for Components 1 (Evidence of Professional Standing) and 2 (Evidence of Cognitive Expertise) have been defined and are listed below. The resources of the American Academy of Dermatology and other dermatological organizations will be utilized to ensure adequate opportunities for diplomates to satisfy the requirements of Component 2 (Commitment to Lifelong-Learning and Periodic Self-Assessment). The implementation of Component 4 (Evaluation of Practice Performance) must await the definition of appropriate standards and methods of assessment.

Component 1: Evidence of Professional Standing

- Valid time-limited or lifetime certification in dermatology from the ABD.
- Currently valid, full, and unrestricted license to practice medicine or osteopathy in the candidate's state or province of residence in the United States or Canada.
- Listing of other current or past state licenses.
- Past or present restrictions, modifications, or suspensions of any state license.
- Letter(s) verifying hospital privileges from the chief of the department/staff at each hospital where privileges are granted, if applicable.
- Letter(s) from local medical society, hospital chief of staff, personal physician, comparable professional society, or ABDE-certified dermatologist attesting to the diplomate's moral and ethical character and lack of drug dependency.

The diplomate should report any changes in professional standing, such as any incident of expulsion or suspension from a medical society for reasons other than nonpayment of dues, loss of DEA license, and/or conviction for criminal conduct.

Component 2: Commitment to Lifelong-Learning and Periodic Self-Assessment

- 90 hours of Category I CME credit are required in the 3 years preceding the date of the application for recertification but including also the first 3 months of the year of administration of the recertification examination. This CME should be acquired in educational programs that are related to dermatology, such as, but not limited to, those that would be approved by the AAD for its CME award.

Component 3: Cognitive Expertise

- Successful completion of an examination. The current examination is a clinically focused, take-home, open-book examination that is administered online annually.
- The examination is clinically focused and is tailored to the candidate's practice profile through selection of applicable examination modules. In addition to the required General Dermatology module, the candidate must select an elective module from one of the four listed below. In other words, the recertification examination consists of the successful completion of two modules (one required and one elective):
  1. General Dermatology (required)
  2. Medical Dermatology (elective)
  3. Dermatopathology (elective)
  4. Dermatologic Surgery (elective)
  5. Pediatric Dermatology (elective)
- Candidates may choose to take additional elective modules for self-assessment for an additional fee.
- The ABD will modify the recertification examination in the future as required in order to conform to the standards of the maintenance of certification process and to permit the equitable and effective evaluation of its diplomates.

Component 4: Evaluation of Practice Performance

- Implementation currently on hold (see above).
Deadline for receipt of applications for the next recertification examination is January 1, 2004. Requests for applications should be directed to the office of the ABD.

Applications may also be downloaded from the Board's website (www.abderm.org). The examination will be available to approved candidates from May 1 to June 15, 2004. Notification of performance on the examination and other pertinent related information will be mailed to the candidates approximately 8-10 weeks later.

Diplomates with time-limited certificates may apply to take the recertification examination any year in which it is offered. However, for formal (official) completion of the recertification process, candidates must take either of the two recertification examinations that immediately precede the expiration of their time-limited certificate. In other words, a diploma will only be granted a new 10-year certificate after passing the recertification examination in year 9 or 10 of his/her 10-year cycle.

Diplomates with lifetime certification may elect to pursue voluntary recertification in any year the examination is offered. Any questions or correspondence relating to the recertification process should be directed to the executive director of the ABD. Successful completion of the recertification process also provides diplomates with the equivalent of 3 years or 150 hours (90 hours of Category 1) of continuing medical education, qualification for the CME Award of the AAD and for the Physician's Recognition Award (PRA) of the AMA. Eligibility for the 3-year AMA PRA certificate is contingent upon and reflects verification of completion of at least 90 hours of AMA PRA Category 1 education. Candidates are responsible for contacting the AAD or AMA for more information.

If the candidate does not successfully complete the recertification process prior to expiration of his/her time-limited certificate, he/she will remain eligible to participate in the recertification process but will cease to be Board-certified until the process is successfully completed and a new time-limited certificate is issued. If the candidate successfully completes the recertification process before expiration of his/her certificate, eg, in year 9 or 10 of the 10-year certificate, the new certificate will be issued for 10 years commencing January 1 of the year immediately following the expiration date of the prior certificate.

Should a diplomate with a time-limited certificate not be recertified by the end of the tenth year, the certificate will expire and the physician will lose diplomate status. Once the certificate has expired, the physician may not represent himself/herself to the profession or the public as being certified until successfully recertified by the ABD. The physician may reapply for a future recertification examination, but must meet all the criteria in effect at that time.

Diplomates who require a proctored recertification examination to satisfy state medical licensure requirements may elect to take the Part IIA portion of the certifying examination. Contact the Board office for further details.

Fees for Examination and Reexamination
The directors of the Board serve without compensation. Fees are based on the actual expenses incurred in administration of the Board office and related activities and on the costs of development and administration of the Board examinations.

All fees are payable when the application for an examination is submitted and are applied to the first examination of that type given after approval of the application. Except as indicated below, or because of verifiable extenuating circumstances, there will be no refunds of any of these fees. Contact the Board office for the current fee schedule.

All checks are to be made payable to The American Board of Dermatology, Inc.

When a candidate's application for the certifying examination in Dermatology or a subspecialty certification examination is disapproved, the Board retains an administrative fee of $100 and will refund the balance to the candidate.

If a candidate withdraws within 10 days of the examination or fails to appear for the examination and does not provide verifiable evidence of extenuating circumstances that prevented him or her from appearing for the examination, the Board will retain the entire examination fee. On reapplying, such candidates will be required to again submit the examination fee in effect at the time of the application.

Candidates who fail the certifying examination in Dermatology retain the right to apply to retake the examination in subsequent years. For further information concerning Board policy in effect and for the applicable examination fee, candidates are advised to write or call the Board office (313 874-1088). Candidates who do not take the certifying examination at the first opportunity after completion of their training are also advised to contact the Board office for clarification of Board policy and the examination fee if they intend to apply to take the certifying examination in any given year.

Publication
The ABD publishes a booklet of information, which may be obtained from the Board office.

All correspondence should be sent to Antoinette F Hood, MD Executive Director The American Board of Dermatology, Inc Henry Ford Health System One Ford Place Detroit, MI 48202-3450

Subspecialty Certification
The ABD has established certification processes for the subspecialties of dermatopathology, clinical and laboratory dermatological immunology, and pediatric dermatology. These subspecialty certifications have been approved by the American Board of Medical Specialties and its 24 member boards. Surveillance and periodic reviews of the training programs are carried out by the respective RRCs, under the auspices of the ACGME, and/or by the ABD. Although all general dermatology residents receive comprehensive training in each of these subspecialties, candidates who pursue the additional year(s) of training in subspecialty fellowships will have met additional standards and qualifications that will prepare them for specialized careers in teaching, research, and/or the practice of these subspecialties. [Note: It is emphasized also that the additional year(s) of training in clinical and laboratory dermatological immunology and pediatric dermatology must be taken after the candidate has met the full training requirements for certification in the primary specialty of dermatology. Similarly, the additional year(s) of training in dermatopathology must be taken after the candidate has met the full training requirements for certification in the primary specialty of dermatology or pathology.]

Certification in Dermatopathology
Subspecialty certification in Dermatopathology is a joint and equal function of the ABD and the American Board of Pathology (ABP). Such function will relate to qualifications of candidates, standards of examination, and the form of the certificate.

All candidates applying to sit for this certifying examination must hold a currently valid, full, and unrestricted license to practice
Prerequisites

1. Primary certification by both the ABD and the ABP (anatomic pathology or anatomic and clinical pathology).
2. Primary certification by either the ABD or the ABP (anatomic pathology or anatomic and clinical pathology) and the satisfactory completion of 1 year of training in dermatopathology in a program accredited for such training (see below) by the ACGME. This additional training must be taken after the candidate has met the full training requirements for certification in dermatology or pathology. The dermatologist applicant must spend one-half of the required training time in pathology. The pathologist applicant must spend one-half of the required training time in clinical dermatology.

Training

Accredited institutional training programs in dermatopathology are an equal and joint function of the departments of dermatology and pathology of that institution. Training programs in dermatopathology are reviewed and accredited by the Residency Review Subcommittee for Dermatopathology, which includes three members from the RRC for Dermatology and three members from the RRC for Pathology. Upon recommendation by this subcommittee, training programs in dermatopathology are accredited by joint action of the RRCs for Dermatology and Pathology acting with authority delegated by the ACGME.

Information concerning accredited dermatopathology training programs may be found in this Directory.

Examination: Deadline for Application and Date of Examination

Candidates who have satisfied the above requirements are eligible to apply to the Board to take the examination for subspecialty certification in Dermatopathology, which is a comprehensive assessment of the candidates' knowledge of dermatopathology, including the related basic sciences, and laboratory and clinical areas pertaining to this discipline.

Candidates planning to take the subspecialty certification examination should request an application from the office of the executive director of the ABD. The deadline for receipt of applications is May 1 of the year in which the candidate plans to take the examination. The date of the 2004 examination had not been determined at press time.

Pediatric Dermatology Subspecialty Certification

All candidates for subspecialty certification in Pediatric Dermatology must meet the following requirements:

A. Prerequisites

1. Possession of a medical degree or its equivalent, and a currently valid, full, and unrestricted license to practice medicine or osteopathy in either the United States or Canada. The candidate may be denied certification if his/her licensure has been revoked, suspended, restricted, or surrendered in any jurisdiction, or if the candidate is subject to adverse licensure proceedings.
2. Primary certification in dermatology by the ABD.

B. Education, Training, Experience

Additional specific education and training or experience that must be completed:

1. One or more years of ACGME-accredited residency training in pediatrics followed by the requisite training and certification in Dermatology and 1 additional year of fellowship training in pediatric dermatology;
2. An ACGME-accredited transitional year or an ACGME-accredited broad-based year of residency training in internal medicine, family practice, obstetrics and gynecology, general surgery, or emergency medicine, followed by the requisite training and certification in dermatology. This track also requires the completion of a final 2 additional years of fellowship training in pediatric dermatology;
3. Special interest, experience, and expertise in pediatric dermatology for at least 5 years. This pathway will be open for only 5 years, commencing with the year of the first certifying examination (2004) in this subspecialty.

In the initial phase of certification in this subspecialty, qualified practicing physicians will be eligible for subspecialty certification with a minimum of 5 years of clinical practice in which pediatric dermatology comprises at least 50% of the total practice. Publications and invited lectures in pediatric dermatology may also be submitted as documentation of special expertise. Individuals intending to sit for the certification examination along this pathway would be approved on a case-by-case basis upon application to the ABD. Candidates who trained in pediatric dermatology fellowships prior to the development of approved fellowship training programs would be permitted to sit for the certification examination after approval on a case-by-case basis upon application to the ABD.

The ABD wishes to emphasize that in the pathway described under (B2), sufficient education and experience in pediatrics (equivalent to 6 months of residency training in pediatrics) will be required during the pediatric dermatology fellowship. Such training will be provided during the fellowship in the following ways:

Fellows will:
1. Participate in didactic sessions along with pediatric residents, including, but not limited to, pediatric grand rounds (weekly), morning report (twice weekly), and pediatric teaching conferences (twice weekly). Participation will include formal presentations by the fellow.
2. Be responsible for inpatient dermatology consultations in all areas of pediatrics, including the newborn nursery, neonatal intensive care unit, pediatric intensive care unit, pediatric wards, and pediatric emergency room.
3. Participate in outpatient pediatric clinics relevant to dermatology such as developmental pediatrics, well-child care, adolescent medicine, allergy/immunology, rheumatology, genetics, and acute care.
4. Participate in all aspects of pediatric dermatologic surgery, including laser surgery. Some of these cases may require general anesthesia.
5. Encounter a large number of varied pediatric problems during the required pediatric dermatology clinics. Since the majority of these clinics will be held at academically affiliated institutions and/or children's hospitals, the patient population will exhibit higher than average associated medical and surgical problems, including chronic diseases, infectious diseases, and congenital anomalies.

C. Examination - Date of Examination

Candidates who have satisfied the above requirements are eligible to apply to the Board to take the subspecialty certification examination in pediatric dermatology. The deadline for receipt of applications is April 1 of the year in which the candidate plans to take the
examination. The first examination will be administered October 4, 2004, in Deerfield, Illinois.

D. Appeals Process
An appeals procedure similar to that described for the certification process in dermatology (Review of Adverse Decisions) is available for candidates for subspecialty certification in pediatric dermatology who were declared ineligible by the Board for pediatric dermatology or who failed the subspecialty examination. Candidates submitting such appeals should contact the Board for additional current information.

Clinical and Laboratory Dermatological Immunology Subspecialty Certification
The requirements for subspecialty certification in clinical and laboratory dermatological immunology are as follows:

A. Prerequisites
1. A currently valid, full, and unrestricted license to practice medicine or osteopathy in either the United States or Canada. The candidate may be denied certification if his/her licensure has been revoked, suspended, restricted, or surrendered in any jurisdiction, or if the candidate is subject to adverse licensure proceedings.
2. Primary certification by the ABP and the satisfactory completion of at least 1 year of training in an accredited fellowship in clinical and laboratory dermatological immunology.

B. Training
Information concerning accredited training programs in clinical and laboratory dermatological immunology is available from the office of the ABP. As stated above, a minimum of 1 year of full-time training in a clinical and laboratory dermatological immunology training program is required of all candidates. A preliminary registration form must be filed with the Board by each trainee.

C. Examination
Candidates who have satisfied the above requirements are eligible to apply to the Board to take the subspecialty certification examination in clinical and laboratory dermatological immunology.

D. Appeals Process
An appeals procedure similar to that described for the certification process in dermatology (Review of Adverse Decisions) is available for candidates for subspecialty certification in clinical and laboratory dermatological immunology who were declared ineligible by the Board for clinical and laboratory dermatological immunology or who failed the subspecialty examination. Candidates submitting such appeals should contact the Board for additional current information.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Emergency Medicine [ABEM] to ascertain whether the information below is current.)

Requirements for Certification in Emergency Medicine
An applicant must satisfy all credential requirements at the time the application is submitted. Requirements fulfilled after the date of application will not be considered.

The applicant must have graduated from a medical school approved by the Liaison Committee on Medical Education.
1. Graduates of approved schools of osteopathic medicine in the United States are considered when they have satisfactorily met the credential requirements as outlined.

2. An applicant graduating from a medical school other than one in the United States, its territories, or Canada must provide the Board with a verified and translated diploma.
Throughout the certification process, physicians must hold a current, active, valid, unrestricted and unqualified license to practice medicine in at least one jurisdiction in the United States, its territories, or Canada, and in each jurisdiction in which they practice. All licenses held by the physician must fulfill the above stated criteria.

The applicant must have successfully completed a total of 36 months of postmedical school training, under the control of an accredited emergency medicine residency program. Emergency medicine programs must be accredited by the Accreditation Council for
Graduate Medical Education (ACGME) or the Royal College of Physicians and Surgeons of Canada for Canadian programs.

If the emergency medicine residency training program is structured so that it exceeds the length of training specified above, the resident must successfully complete the requirements of his/her residency program to apply under the emergency medicine residency category of application.

[Note: For residents who began their emergency medicine training prior to July 1, 1987, the candidate must have successfully completed a total of 36 months of postmedical school training, at least 24 months of which were under the control of an accredited emergency medicine residency program at the PGY2 level and above.]

The applicant must submit evidence of 50 hours of continuing medical education in emergency medicine annually, acceptable to the Board, starting 1 year from the date of graduation from the emergency medicine residency program and continuing until the date of application. If a resident applies to the Board within 1 year of graduation, no continuing medical education is required.

Combined Training Programs
A special agreement exists between the ABEM and the American Board of Pediatrics whereby an applicant may fulfill the training requirements of both Boards by completing joint training in 5 years. Training programs must be approved prospectively by both Boards. Guidelines for combined training have been approved by both Boards and are available from either Board office. Applicants may not appear for the certifying examination until all training has been satisfactorily completed.

A special agreement exists between the ABEM and the American Board of Internal Medicine whereby an applicant may fulfill the training requirements of both Boards by completing joint training in 5 years. Training programs must be approved prospectively by both Boards. Guidelines for combined training have been approved by both Boards and are available from either Board office. Applicants may not appear for the certifying examination until all training has been satisfactorily completed.

The American Board of Internal Medicine and the ABEM have approved guidelines for 6-year training that, upon completion, will provide physicians the option for certification in internal medicine, emergency medicine, and critical care medicine. These guidelines, approved by both boards in February 1999, are applicable to ACGME-accredited programs and residents entering training in July 1999 and after. The guidelines are available from both Board offices. Applicants may not appear for the certifying examination until all training has been satisfactorily completed.

Applications
Applications are distributed in the spring of each year (mid April) and are available from the Board office. Applications are accepted from April 15 through July 31 of each year. A mailing list is maintained throughout the year for requests received during times when applications are not available.

A nonrefundable processing fee must accompany the application at the time it is submitted.

Applicants wishing to be considered for examination must submit a fully completed application form to the Board. The Board will not be responsible for any opinion expressed concerning the individual's credentials for the examination unless it is in writing and over the signature of the president or secretary of the Board.

Examination Information
The certification examination in emergency medicine is composed of two parts, a written examination and an oral examination.

The written certification examination is a 6.5-hour comprehensive examination that is administered once a year. It includes approximately 355 single-best-answer, multiple-choice test items. Approximately 10% to 15% of the items have a pictorial stimulus.

The oral certification examination is administered twice a year. It includes five simulated patient encounters, each involving one patient, and two simulated situation encounters, each involving more than one patient.

A candidate must successfully complete the fall written examination to be scheduled for either the spring or fall oral examination the following year.

Examination fees are due upon assignment to an examination administration.

Certification
All candidates who successfully complete both the written and the oral certification examinations shall be known as diplomates of the ABEM. Diplomates receive an appropriate certificate, which shall remain the property of ABEM. Certification is for a period of 10 years.

Any certificate issued by the Board shall be subject to revocation at any time, should the Board determine, in its sole judgment, that a candidate who has received a certificate was in some respect not properly qualified to receive or retain it.

Emergency Medicine Continuous Certification
Emergency Medicine Continuous Certification (EMCC) will begin in 2004.

All diplomates who want to maintain their certification with ABEM beyond the current expiration date must participate fully in the EMCC program.

Effective 2004, the licensure requirement for all diplomates will change. Diplomates will be required to continuously maintain a current, active, valid, unrestricted, and unqualified license in at least one jurisdiction in the United States, its territories, or Canada, and in each jurisdiction in which they practice. Inactive medical licenses voluntarily held by physicians are in compliance with the Policy on Medical Licensure.

A special option will be available only from 2004-2006 for former diplomates to reign their diplomate status through participation in EMCC. Former diplomates must begin their participation in EMCC in 2004 to take advantage of this option.

A full description of EMCC, including details of diplomates' participation requirements, is available on the ABEM Web site at www.abem.org. Questions should be directed to the ABEM office.

Roger M. Bean, CPA, Chief Financial Officer, Lexington, Kentucky

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Family Practice [ABFP] to ascertain whether the information below is current.)

**ABFP Official Definition of Family Practice**

Family practice is the medical specialty which is concerned with the total health care of the individual and the family. It is the specialty in breadth which integrates the biological, clinical, and behavioral sciences. The scope of family practice is not limited by age, sex, organ system, or disease entity.

**Board Eligibility**

The ABFP does not recognize or use the term "board eligible" and does not issue statements concerning "board eligibility." The Board informs an applicant of admittance to an examination to be given on a specified date after a formal application has been reviewed and approved.

**Certification Process**

The ABFP administers the certification and recertification examinations in various centers throughout the United States annually, on the second Friday in July. The ABFP certification and recertification examinations are written tests of cognitive knowledge and problem-solving abilities relevant to family practice. Appropriate subject areas of the following disciplines are included: adult medicine; care of neonates, infants, children, and adolescents; care of the surgical patient; maternity and gynecologic care; human behavior and mental health; emergent and urgent care; community medicine; and care of the older patient. Elements of the examination include but are not limited to diagnosis, management, and prevention of disease. The Board makes every effort to be as prompt as possible in notifying candidates of their examination results, and letters of notification may be expected within 4 to 6 weeks following the examination.

**Eligibility**

All candidates for the American Board of Family Practice Certification Examination must have satisfactorily completed 3 years of training (a full 36 calendar months with 12 months in each of the G1, G2, and G3 years) in a family practice residency program accredited by the Accreditation Council for Graduate Medical Education (ACGME) subsequent to receipt of the MD or DO degree from an accredited institution and, when applicable, a Fifth Pathway year, or receipt of a Standard Certificate from the Educational Commission for Foreign Medical Graduates (ECFMG), or compliance with other ACGME requirements for entry into graduate medical training in the United States. If a physician does not meet the eligibility requirements of the ACGME for residency training in family practice, his/her training will not be recognized by the Board.

Candidates who obtained their MD degree from medical schools in the United States or Canada must have attended a school accredited by the Liaison Committee on Medical Education or the Committee for Accreditation of Canadian Medical Schools. Candidates who obtained a DO degree must have graduated from a college of osteopathic medicine accredited by the American Osteopathic Association (AOA). All applicants for the Certification Examination are subject to the approval of the Board, and the final decision regarding any applications rests solely with the ABFP. No candidate will be allowed to take the examination until all fees are paid and all requirements have been satisfactorily met.

The Board prefers all 3 years of postgraduate training to be in the same ACGME-accredited family practice program; however, other training may be considered as equivalent (eg, Flexible/Transitional year, AOA Osteopathic Internship, etc.). In these cases, and for physicians who have had international training, each individual's training will be evaluated by the Board. The ABFP requires residency programs to submit prospective requests for advanced placement of residents. Program directors are responsible for notifying the Board prior to the entry of the transferring resident. If a Program director fails to comply, the Board will determine the amount of transfer credit at the time of its discovery of the transfer. Consequently, the resident may receive less credit toward certification than anticipated and may be required to extend the duration of training.

The last 2 years of family practice residency training must be completed in the same accredited program. Transfers after the beginning of the G2 year are approved only in extraordinary circumstances.

Verification of satisfactory completion of residency training must be stated in writing by the program director. All applicants for the certification examination are subject to the approval of the Board, and the final decision regarding any applications rests solely with the ABFP.

All candidates' education and training experiences are subject to review and approval by the ABFP. Any variance from the above must have prior written approval of the Board. No credit may be given for any previous training as equivalent to family practice training without the written approval of the Board.
Candidates must complete all training requirements of the Board no later than June 30 of the year of the examination. Applications, supplied to the residents directly through the program director, are made available only to residents expected to meet this requirement. Complete written documentation from the program director that the resident has, or is expected to have, satisfactorily completed the residency must be received by the Board by June 30. Any such documentation that is received beyond June 30 will result in the resident being deferred to the following year's examination. Residents who complete their training at an interim date must write to the Board for an application.

Continuing Medical Education (CME)
Candidates who apply for the Certification Examination within 3 years of completion of an ACGME-accredited family practice residency are not required to document any continuing medical education. Candidates who apply after the 3-year period must provide documentation of 60 hours of CME for each subsequent year. A form for documentation of CME and an explanation of the types of CME acceptable to the Board will be provided with the application for these candidates applying after the 3-year period.

Licensure Requirements
