Appendix B

Medical Specialty Board Certification Requirements

Twenty-four medical specialty boards have been approved by the American Board of Medical Specialties (ABMS) and the American Medical Association (AMA) Council on Medical Education through the Liaison Committee for Specialty Boards (LCSB). Applications for recognition as a specialty board are submitted to the LCSB and reviewed for compliance with the requirements and criteria published in the Essentials for Approval of New Examining Boards in Medical Specialties approved by both the ABMS and the AMA. If an applicant is approved for recognition as a medical specialty board by the LCSB, the application must then be approved by the membership of the ABMS and the AMA Council on Medical Education.

The Essentials may be obtained from the office of the Executive Vice President of the ABMS, 1007 Church St/Ste 404, Evanston, IL 60201-5913, or from the Council on Medical Education, AMA, 515 N State St, Chicago, IL 60610.

The primary objective of medical specialty boards is the improvement of the quality of medical education and medical care. The primary functions of each of the medical specialty boards are to evaluate candidates in a medical specialty field who voluntarily appear for examination and to certify as diplomates those candidates who are qualified. To accomplish these functions, medical specialty boards determine whether candidates have received adequate preparation in accordance with established educational standards; provide comprehensive examinations designed to assess knowledge, skills, and experience required to provide quality patient care in that specialty; and certify those candidates who have satisfied the requirements. In collaboration with the other organizations and agencies concerned, the approved medical specialty boards assist in improving the quality of medical education by elevating the standards of graduate medical education and approving facilities for specialty training.

The actual accreditation review for the approval of residency programs in each specialty is conducted by a Residency Review Committee on which the respective specialty board has equal representation with the AMA Council on Medical Education and, in some cases, with a related specialty society.

Medical specialty board certification is an additional process to receiving a medical degree, completing residency training, and receiving a license to practice medicine.

Certification requirements of each member board of ABMS are included on subsequent pages. Inquiries regarding specialty board certification requirements should be directed to the specialty board executive offices listed in Table 1. The member boards of ABMS publish materials containing statements on the requirements for certification, which are also reprinted in each edition of the Official American Board of Medical Specialties Directory of Board Certified Medical Specialists. This publication contains certification and biographical information on each specialist who has been certified by a member board of ABMS. The Directory is available from Elsevier Science, 655 Avenue of the Americas, New York, NY 10010; 888 437-4636; fax 212 633-3820.

Definition of an Allergist/Immunologist

A certified specialist in allergy and immunology is a physician who previously has passed the certification examination of the American Board of Internal Medicine (ABIM) and/or the American Board of Pediatrics (ABP) with additional certification by the ABAI, a Joint Board of the ABIM and the ABP. Diplomates of the ABAI have detailed knowledge of the underlying pathophysiology and the diagnosis, treatment, and prevention of allergic diseases such as allergic rhinitis, allergic asthma, urticaria, anaphylaxis, hypereosinophilia pneumonitis, atopic and contact dermatitis, and allergic gastrointestinal disorders, as well as comparable clinical problems without an apparent allergic etiology or component such as vasomotor rhinitis, nonallergic asthma, and idiopathic and/or hereditary forms of urticaria and/or angioedema. Diplomates also have expertise in the management of pulmonary complications of certain of these diseases.

Diplomates of the ABAI also possess advanced understanding of the biology of inflammation, immunohistochemistry, immunohistochemistry, and pharmacology and experience in the application of this knowledge to the diagnosis, management, and therapy of immunologic diseases. This includes inborn or acquired defects of host resistance, autoimmune diseases, bone marrow and solid organ transplantation, gene replacement therapy, adverse drug reactions, and related conditions. Diplomates have demonstrated to the satisfaction of

their peers that they possess the general qualifications specified and are ethical and humanistic practitioners of medicine.

The purpose of certification by the ABAI is to provide assurance to the public and the medical profession that a certified internist or pediatrician has successfully completed an accredited educational program and an evaluation, including a secure, proctored examination, and possesses the knowledge, skills, and experience requisite to the provision of high-quality patient care in allergy and immunology.

Organization and Purpose

The ABAI was established in 1971 as a nonprofit organization and is one of 24 member boards of the American Board of Medical Specialties (ABMS). The ABAI is a Joint Board of the ABIM and the ABP and is sponsored jointly by the American Academy of Allergy, Asthma and Immunology (AAAAI), the American Academy of Pediatrics (AAP) - Section on Allergy and Immunology, the American College of Allergy, Asthma and Immunology (ACAAI), the American Medical Association (AMA) - Section Council of Allergy and Immunology, and the Clinical Immunology Society (CIS). The Board of Directors consists of an equal number of ABAI-certified internists and ABAI-certified pediatricians, who are nominated by the AAAAI, AAP, ACAAI, AMA, CIS, and the ABAI Board of Directors themselves. The nominees are appointed by the ABIM and ABP for a 6-year term of office.

The ABAI's major purposes are to
a. establish qualifications and examine physician candidates for certification as specialists in allergy/immunology,
b. serve the public and the health care community by providing the names of physicians certified as allergists/immunologists,
c. improve the quality of health care,
d. establish and improve standards for the teaching and practice of allergy/immunology, and
e. establish standards for training programs in allergy/immunology working with the Residency Review Committee for Allergy and Immunology of the Accreditation Council for Graduate Medical Education (ACGME).

Certification

The ABAI serves candidates who have embarked on a graduate program of study with the express purpose of excelling in the practice of the subspecialty of allergy/immunology. The ABAI is responsible for the establishment and maintenance of the standards of knowledge required for certification. The ABAI anticipates that during a post-medical school training program, the candidates will acquire adequate knowledge in basic science, as applied to this discipline. In outlining its requirements, the ABAI assists the candidate to select superior educational programs that will develop his/her competency in allergy/immunology. The ABAI believes that all allergists/immunologists should have a fundamental knowledge of the biological science basic to this discipline. The responsibility of acquiring the knowledge rests with the candidate. Such knowledge is essential to the continued professional progress of any qualified allergist/immunologist. The Certification Examination is offered annually.

To justify certification in allergy and immunology, each candidate must satisfy the general and professional qualifications listed below.

Content for Certification Examination

The 350-item examination covers all content areas listed in the current Program Requirements for Residency Education in Allergy and Immunology and an examination item classification list determined
by the Board of Directors, which is distributed with the application, and the following:

Candidates must be familiar with the fundamental elements of the immune system, such as the types of immune cells and the anatomical organs that constitute the immune system, the circulation patterns of immune cells, the biologic roles of products of the immune system, the abnormal conditions of the immune system that constitute immunopathology, and the biology of inflammation. Moreover, the candidate will be expected to be proficient in understanding the molecular basis of allergic and other immune reactions, including interaction between immune cells, cell membrane signal transduction pathways, gene expression, cytokine release, receptor targeting, cellular differentiation, and cell death. Proficiency must be demonstrated in the diagnosis and treatment of allergic and other immunologic diseases.

Because the ABAI is a joint board representing pediatric and adult medicine, the candidate must master the spectrum of allergic and immunologic diseases as it presents in children and adults. In addition to a familiarity with allergic diseases, including allergic rhinitis, asthma, atopic dermatitis, and urticaria, the candidate must be knowledgeable in autoimmune conditions. Equally important as knowledge in diseases of immune dysfunction is the knowledge of human pathology that results from an absence of immunity, whole or partial, congenital or acquired. Thus, an understanding of immunodeficiency states is required, including congenital disorders, absence of specific complement components, lack of specific neutrophil function, absence of specific adhesive cellular glycoproteins, and dysfunctional states of the immune system produced by external agents. Candidates must be familiar with the immunologic factors operative in bone marrow and solid organ transplantation. With the proliferation of immunomodulatory reagents used in other specialties, candidates are expected to be familiar with those reagents, their mechanism of action and their impact (both foreseen and unexpected) on aspects of the immune system other than the intended target.

It is important for the candidate to demonstrate proficiency in the proper selection of appropriate clinical and laboratory tests, which aid the formulation of a clinical diagnosis based upon first obtaining a detailed medical history and performing a complete physical examination. The candidate must understand the scientific basis of the following list (non-inclusive) of tests:

- serum immunoglobulin determination,
- functional antibody measurement,
- complement component and functional assays,
- lymphocyte subset analysis using monoclonal antibodies and flow cytometry,
- lymphocyte proliferation assays with mitogen and antigens, and
- assessment of neutrophil and monocyte chemotaxis, phagocytosis, and killing.

In addition, the candidate must be familiar with the use of molecular diagnostic techniques involving the binding of ligands to nucleic acid or polypeptide sequences. The importance of DNA replication technology must be understood. The molecular basis for immediate hypersensitivity skin testing must be understood in the context of the detailed molecular events occurring in the tissue mast cell and blood basophil, particularly the release of preformed mediators, and in the generation of newly formed mediators. Similarly, skin testing for T-cell competence with recall antigens must be understood in relation to antigen presentation, cytokine secretion and interaction, and lymphocyte subset activation and function. Candidates must also have familiarity with the misuse of standard tests and with controversial tests in allergy and immunology. The candidate must understand the principles and analytic methods employed in experimental clinical studies for determining the diagnostic utility of specific tests and in evaluating the safety, toxicity, efficacy, and outcomes of treatments and drugs for allergic and immunologic disease. Candidates must be familiar with the principles and methods employed in epidemiologic studies.

- A corollary of the competence of the candidate in understanding the pathophysiology, clinical presentation, and immunologic testing of allergic and other immunologic diseases is the knowledge of appropriate treatment options. For example, the common aspect of all types of asthma is the presence of airway inflammation. Definitive treatment of asthma demands interruption of the inflammatory response. Thus, candidates must understand use of drugs that decrease airway inflammation in asthma. Based upon the molecular knowledge of the allergic response, the candidate must appreciate the importance of allergen avoidance and medical treatment of allergic rhinitis before initiation of the more intense treatment of immunotherapy. In the latter therapy, candidates must have experience in allergen selection and administration in successful treatment regimens. Therapy for immunologic diseases must be understood, such as (non-inclusive): immune globulin replacement therapy for antibody deficiency, treatment of immunodeficiency with biologic response modifiers, HLA-identical and HLA-haploidentical (T cell-depleted) bone marrow transplants for cellular immunodeficiencies, and gene replacement therapy currently used for the immunodeficiency associated with adenosine deaminase deficiency as well as theoretical principles/potential approaches in other congenital immune disorders.

Requirements for Certification

Candidates qualify for admittance to the examination if ALL the following criteria are met:

1. Certification by the ABIM and/or ABP as of the date of the ABAI examination.
2. Evidence acceptable to the Board of Directors of at least 2 years of full-time residency/fellowship in allergy/immunology programs accredited by the ACGME or other acceptable training in allergy/immunology programs. These programs are listed in the Graduate Medical Education Directory, published by the American Medical Association.
3. Documentation on file at the ABAI (available through the training program) including four Clinical Competence Evaluations, one Procedural Skills Assessment Form, and a letter from the training program director substantiating clinical competence, at least 2 full-time years of allergy/immunology training, and readiness to sit for the examination. A corollary of the competence of the candidate in understanding the pathophysiology, clinical presentation, and immunologic testing of allergic and other immunologic diseases is the knowledge of appropriate treatment options. For example, the common aspect of all types of asthma is the presence of airway inflammation. Definitive treatment of asthma demands interruption of the inflammatory response. Thus, candidates must understand use of drugs that decrease airway inflammation in asthma. Based upon the molecular knowledge of the allergic response, the candidate must appreciate the importance of allergen avoidance and medical treatment of allergic rhinitis before initiation of the more intense treatment of immunotherapy. In the latter therapy, candidates must have experience in allergen selection and administration in successful treatment regimens. Therapy for immunologic diseases must be understood, such as (non-inclusive): immune globulin replacement therapy for antibody deficiency, treatment of immunodeficiency with biologic response modifiers, HLA-identical and HLA-haploidentical (T cell-depleted) bone marrow transplants for cellular immunodeficiencies, and gene replacement therapy currently used for the immunodeficiency associated with adenosine deaminase deficiency as well as theoretical principles/potential approaches in other congenital immune disorders.

4. Documentation on file at the ABAI (available through the training program) including four Clinical Competence Evaluations, one Procedural Skills Assessment Form, and a letter from the training program director substantiating clinical competence, at least 2 full-time years of allergy/immunology training, and readiness to sit for the examination. Areas to be reviewed include clinical judgment, medical knowledge, clinical skills of history taking, physical examination and procedural skills, humanistic qualities, attitudes and professional behavior, medical care (utilizing laboratory tests and diagnostic procedures), commitment to scholarship, and work habits. Procedural skills assessed include allergen immunotherapy, delayed hypersensitivity skin testing, drug desensitization and challenge, immediate hypersensitivity skin testing, immunoglobulin therapy treatment, pulmonary function testing, physical urticaria testing, exercise challenge, methacholine and other bronchial challenge testing, nasal cytology, oral challenge testing, patch testing, and rhinoscopy.

5. Valid (current) unrestricted license to practice medicine in at least one jurisdiction in the United States, its territories, or Canada, and, if licenses are held in more than one jurisdiction, all licenses held by a diplomate must meet this requirement. Should there be extenuating circumstances, a written explanation is
necessary. Candidates are required to submit copies of their un restricted, unexpired licenses with their Certification application. Licenses must be unrestricted, and unexpired at the time of admission of the Certification Examination. Candidates with any revoked, suspended, probational, or conditional license at the time of application or examination will not be admitted to the Certification Examination or become certified.

Program Director Requirements
In addition to the four Clinical Competence Evaluations and one summary Procedural Skills Form, the program director must submit a letter attesting to the candidate’s clinical experience and readiness to sit for the examination. In compliance with the ACGME Program Requirements for Residency Training in Allergy and Immunology, a semi-annual record must be maintained with copies to the ABAI for tracking purposes. If a trainee has received two consecutive evaluations with overall unsatisfactory ratings, the program director must provide the trainee and the ABAI with a written plan for remediation of the trainee’s deficiencies. After 6 months, the program director must provide the ABAI and the trainee with a report of the success or failure of the remediation program, as well as any additional plans for corrective action.

Recertification/Maintenance of Certification
Since 1977, the ABAI has offered its diplomates a Recertification process so that the effectiveness of each diplomate’s own efforts in continuing education would be evaluated. It is offered annually.

Beginning with 1988, new ABAI diplomates receive certificates valid for 10 years. Time-unlimited certificates were issued prior to October 1, 1989. However, all diplomates, especially those involved in training programs, are strongly encouraged to recertify at a minimum of every 10 years. Maintaining a current certificate is an expression of professional accountability. Presently, 1,918 ABAI diplomates hold time-limited certificates. Diplomates are permitted to recertify up to two years prior to the expiration of their time-limited certificate.

The two-part Recertification process is composed of the Home Study Open-Book Examination and the Final Examination. Recertification candidates are required to attain an 80% correct score on the 150-item Home Study Examination to gain entry to the Final Examination. If such an absolute score is not attained, the diplomate is required to pass a subsequent Retest and attain an 80% correct score. Should performance not meet this standard, the candidate is not permitted entry to the proctored, Final Examination.

The Final Examination contains 200 items. The ABAI anticipates that most diplomates seeking recertification will be successful. Recertification candidates will be required to attain an absolute minimum score to ultimately gain recertification in Allergy and Immunology. Standards are established to justify public confidence.

Content for Recertification (MOC) Examination
The content of the Home Study Examination covers the broad area of allergy and immunology listed previously under “Content for Certification Examination” and will provide diplomates a learning experience in the following areas of clinical science: immediate hypersensitivity, immunological disorders, pharmacology and therapeutics, specific diagnostic modalities, and allergens and antigens. Attention will also be given to the following areas of basic science: immune mechanisms, cells involved in immune responses, specific immune mechanisms, and laboratory tests. This examination contains approximately 20% Basic Science and 80% Clinical Science Items. Many Home Study Examination items require reference to standard textbooks or recently published review articles to be answered correctly.

The Final Examination reflects the current ABAI examination item classification list, which is distributed upon successful performance on the Home Study Examination. It focuses on Clinical Science items pertinent to the practice of allergy and immunology that reflect the breadth of the field of allergy and clinical immunology. Many of the items can be answered correctly based on clinical experience without reference to textbooks or journals.

Requirements for Recertification in 2005
Diplomates qualify for admittance to the examination if all of the following criteria are met:
1. Previous certification by the ABAI (recertification in internal medicine or pediatrics is encouraged of ABAI diplomates, but not required);
2. Documentation from two ABAI-certified diplomates in the community. Chief of Medicine or Pediatrics, chiefs of community hospitals, or officers of state or regional societies to verify the medical and professional standing and clinical competence of the candidate as a specialist in allergy/immunology;
3. Valid (current) unrestricted license to practice medicine in at least one jurisdiction of the United States, its territories, or Canada, and, if licenses are held in more than one jurisdiction, all licenses held by a diplomate must meet this requirement. Should there be extenuating circumstances, a written explanation is necessary. Diplomates are required to submit copies of their unrestricted, unexpired licenses with their Recertification application for Part 1, the Home Study Open-Book Examination. Licenses must be unrestricted and unexpired at the time of admission to Part 2, the Final Examination. Diplomates with any revoked, suspended, probational, or conditional license at the time of application or examination will not be admitted to the Recertification process or become recertified.

Maintenance of Certification Program
The ABAI is gradually transitioning from its current Recertification program into a more comprehensive Maintenance of Certification (MOC®) program in accordance with the requirements of the ABMS. Regulatory agencies, health maintenance organization, and the community require reassurance and documentation of continual professional development and education by physicians. However, there are several components of physician professionalism, such as lifelong learning and self-assessment, communication skills, empathy, patient advocacy, etc, that cannot be assessed by traditional written or computer-based examinations.

Currently, Part 1, the Home Study Open-Book Examination, has proven useful in identifying a diplomate’s cognitive strengths and weaknesses; this examination is being retained in the MOC program. Part 2, the Final Examination, is also being retained to provide credibility for the MOC program. To assess lifelong learning and self-assessment, a continuing medical education (CME) component is being added. MOC candidates need to obtain a minimum of 75 hours of Allergy/Immunology CME over each 3-year period to fulfill the Lifelong Learning and Self-Assessment component. Finally, feedback about a diplomate’s professionalism and communication skills is being obtained by a confidential Patient and Physician Peer Assessment (PAPPA) module through ratings compiled utilizing an automated telephone system. The ABAI collects and calculates the responses and provides aggregate performance results along with comparisons generated from data on other recertifying diplomates. To maintain patient and peer confidentiality, all individual identifiers are removed from the data received by the ABAI. There is no pass-fail standard for PAPPA. After reviewing the PAPPA feedback rating, the diplomate will complete and return a Quality Improvement Plan to the ABAI in order to receive credit for the module. Diplomates participating in the MOC program must complete
their PAPPA module prior to participating in the Final examination. Diplomates who do not complete the module and pass the Final Examination will not receive their scores or certificate until all PAPPA module requirements are met. If a diplomate participating in the MOC® program does not actively see patients, notarized documentation must be submitted to the ABAI office from the diplomate's direct supervisor attesting to this fact.

As MOC® plans are further refined, they will be announced in future ABAI newsletters and on the ABAI Web site.

**Pathways for Dual Certification**

Formal special pathways exist for individuals wishing to qualify for dual certification in either allergy/immunology and pediatric pulmonology, adult rheumatology, or pediatric rheumatology. Individuals pursuing dual certification must complete all requirements for both boards before sitting for either examination. Additional information regarding special pathways is available upon request to the ABAI.

**Examination Methodology**

**Announcements**

The proctored Certification and Recertification Examinations are computer-based and administered annually at Pearson Professional Centers in multiple US locations. The times and places are determined by the ABAI and announced in the appropriate specialty journals, in the ABAI newsletters, and on the ABAI Web site.

**Applications**

The act of filing an application is the candidate’s responsibility. Application forms are available on the ABAI Web site. One recent signed photograph and the necessary fees must be received with the completed application before the close of registration. All certification and recertification requirements must be met prior to approval and entry permission to the examinations. The Conjunct Credentials Committee, composed of representatives from the ABAI, ABIM, and ABP, reviews the credentials of candidates for the Certification Examination and Recertification process as deemed necessary.

**Board Review Courses**

The ABAI does not sponsor or maintain any records on any courses that claim to be review courses in preparation for its examinations, nor does it offer or endorse any specific publications or courses to prepare for its examinations.

**Cancellations**

Certification Examination fee is refundable in full if written notification of withdrawal is received prior to the cancellation deadline listed. Recertification Examination fee is refundable in full if written notification of withdrawal is received prior to mailing of the Home Study Examination.

**Certificates**

Candidates/Diplomates who pass the examinations will be certified or recertified in the specialty of allergy/immunology as of the date of the examination and receive a time-limited certificate (TLC) (subject to revocation by the ABAI for cause) expiring December 31 ten years later. This information becomes public information and will be listed on the ABAI and ABMS Web sites and in printed and electronic editions of The Official ABMS Directory of Board Certified Specialists. Certificates will be mailed using the US mail tracking system to ensure delivery.

**Description**

The Certification and Recertification (Part 2) Examinations are administered by computer in proctored settings throughout the country and vary in length; the Certification Examination is administered in two 3.5-hour sessions totaling 7 hours, separated by a scheduled lunch break; the Recertification Final Exam is administered in one 4-hour session. The one-best-answer multiple-choice items are objective and designed to test the individual's knowledge through recall, interpretation, problem solving, and clinical judgment. Examinations may contain both previously used and new items.

**Disability Accommodations**

Individuals requiring special accommodations during the examinations must provide written documentation by their specialist to the ABAI at the time of application for examination, in accordance with the Americans with Disabilities Act (ADA), in order to receive information about the ABAI's Disability Policy and approval.

**Fees**

The fees are set forth in the instruction sheet included with the application. Checks must accompany completed applications; cash and credit cards are not accepted. Installment payments may be made upon formal notice. Candidates whose applications are accepted will receive a refund of the examination fee. The Certification Examination fee is refundable in full if written notification of withdrawal is received prior to the cancellation date. The Recertification Examination fee is refundable in full if written notification of withdrawal is received prior to mailing of the Home Study Examination, or prior to the cancellation date, whichever date is first. The ABAI retains the registration fee in all instances to cover processing and credentialing costs. A nonrefundable late fee will apply to those applications received after the close of registration and prior to the cancellation deadline. A $50 fee is assessed for all checks returned for insufficient funds. Should a rescore be requested, a $50 fee is assessed and must be received within 30 days following the release of the results.

**Irregular Behavior**

At the time of the administration of the examinations by computer, individuals are required to sign a nondisclosure statement stating that they will not give or receive aid during this examination; will not disclose, copy, or reproduce any portion of the material contained therein; and will comply with the instructions of proctors and with all rules of the examinations. All examinations are supervised by proctors, who are required to report any irregular behavior, which includes, but is not limited to, giving or obtaining unauthorized information or aid before, during, or after the examination as evidenced by observation. The ABAI's psychometric consultants also identify possible irregularities by statistical analysis of examinees' answers. Offering financial or other benefit to a proctor, employee, or agent of the ABAI is forbidden.

**Re-examination**

Candidates who are unsuccessful on any examination may re-apply for subsequent scheduled examinations; there is no restriction on the number of opportunities for re-examination. Once admitted to an examination, candidates will be considered to have fulfilled the training requirements for future examination. All candidates for re-examination must meet the current requirements for licensure and professional standing and phasing in of MOC®.

**Results**

The validity of the individual's performance on the examination is secured by every means available. Individuals will be informed of the results of the examinations before December 31.
Scoring
Since 2003, the ABAI has utilized a criterion-reference, which verifies a candidate's ability level (score) relative to the performance on the content of the examination. The standard is established prior to the examination based on the difficulty of test items. The complexity of each item is determined by the directors, acting as content experts, using a modified-Angoff rating system. The passing score is computed from an estimate of the probability of an average candidate answering each item correctly. Theoretically, all candidates can pass or fail the examination. The Conjoint Standards Committee, with representation from the ABAI, ABIM, and ABP, recommends the passing grade for the Certification Examination to the Board for its determination.

Special Policies
Verification of Board Certification Status
Based on ABMS recommended policy, the ABAI does not issue statements of or implying "Board Eligibility" for any reason. Medical specialty certification is a process of advancement through several individual steps, including examination. Having completed one step, such as the minimal educational requirements, should not imply that a candidate is now possessed of some special qualification which is more or less equivalent to certification. For written verification of the status of an allergist/immunologist, the ABAI charges a nominal fee per name. Status will be confined to active candidate, inactive candidate, certified, or not certified. Verification is also available online at www.abms.org or by calling 1-888-ASK-ABMS.

Revocation of Certificate
All certificates issued by the ABAI are subject to revocation or suspension. The ABAI may, at its discretion, revoke or suspend certification if: 1) the diplomate has made any misstatement of fact in the application for such certificate or otherwise, or to any third party concerning the diplomate's certification status; 2) the diplomate was not qualified to receive the certificate at the time it was issued, even if the certificate was issued as a result of a mistake on the part of the ABAI; or 3) the diplomate fails to maintain moral, ethical, or professional behavior satisfactory to the ABAI or engages in misconduct that adversely affects professional competence or integrity. The ABAI may, at its discretion, revoke or suspend certification if the diplomate's license to practice medicine has been revoked, suspended, surrendered, or restricted in any jurisdiction. To be reconsidered for reinstatement of certification, the diplomate must provide written documentation that the license has been restored without restrictions. Should a certificate be revoked or suspended, the ABAI affords the diplomate an appeals process for review of that decision.

Absences During Residency
Absences in excess of a total of 2 months over the 2-year allergy/immunology training program, whether for vacation, sick leave, maternity leave, etc., should be made up. If program directors believe that an absence of more than 2 months is justified, they should send a letter of explanation to the ABAI for review and approval by the Credentials Committee as deemed necessary.

Changes in Policies and Procedures
The ABAI reserves the right to make changes in its Policies and Procedures and fees at any time, and cannot assume responsibility for giving advance notice thereof. The provisions of this publication are not intended to nor shall they be construed as creating any legal obligation on the ABAI's part or as creating any contractual relationship between any candidate and the ABAI.

Examination Schedule
Certification
Date: October 9-13, 2006
Registration period: January 1-April 1, 2006
Fee: $2,400
Cancellation Date: June 30, 2006

Recertification
Home Study Examination: January 15, - March 31, 2006
Proctored Final Examination: October 16-20, 2006
Registration period: December 15, 2005-January 31, 2006
Fee: $2,400
Cancellation date: January 15, 2006
Patient and Physician Peer Assessment (PAPPA) Module:
Registration period: Currently available (must be completed no later than September 30, 2006)
Fee: $175
Cancellation date: None after module mailed or after January 15, 2006

No applications will be accepted 30 days after the close of registration.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Anesthesiology [ABA] to ascertain whether the information below is current.)

Introduction

The American Board of Anesthesiology (ABA) publishes its Booklet of Information to inform all interested individuals of the policies, procedures, regulations, and requirements governing its certification programs.

A copy of the booklet is sent annually to the chairs of anesthesiology departments and the directors of Accreditation Council for Graduate Medical Education (ACGME)-accredited anesthesiology residency programs and to every resident in those programs who is properly registered by the program with the ABA.

The chair of the anesthesiology department is ultimately responsible for the residency program. The ABA corresponds officially about training matters only with the department chair. If the chair notifies the ABA that a faculty member has been appointed program director with responsibility for administering the program, the ABA corresponds with the program director about training matters and sends the department chair a copy of the correspondence.

The program must ensure that each resident’s training fulfills all criteria for entering the ABA examination system. However, it is crucial that the resident know the requirements described in this document, since the resident ultimately bears responsibility for compliance with the requirements and bears the consequences if one or more aspects of training prove unacceptable. This is especially important when requests are made for special training sequences or sites or for exemptions. If, after speaking with the department chair, there is any question about the acceptability of any portion of training, the resident should write the Secretary of the ABA directly at the ABA office.

Applicants and candidates for ABA examinations have the ultimate responsibility to know and comply with the Board’s policies, procedures, requirements, and deadlines regarding admission to and opportunities for examination.

Primary Certification in Anesthesiology Certification Requirements

At the time of certification by the ABA, the candidate shall be capable of performing independently the entire scope of anesthesiology practice and must:

A. Hold an unexpired license to practice medicine or osteopathy in at least one state or jurisdiction of the United States or province of Canada that is permanent, unconditional, and unrestricted.

Further, every United States and Canadian medical license the applicant holds must be free of restrictions.

Candidates for initial certification and ABA diplomates have the affirmative obligation to advise the ABA of any and all restrictions placed on any of their medical licenses and to provide the ABA with complete information concerning such restrictions within 60 days after their imposition. Such information shall include, but not be limited to, the identity of the state medical board imposing the restriction as well as the restriction’s duration, basis, and specific terms and conditions. Candidates and diplomates discovered not to have made disclosure may be subject to sanctions on their candidate or diplomate status.

B. Have fulfilled all the requirements of the Continuum of Education in Anesthesiology.

C. Have on file with the ABA a Certificate of Clinical Competence with an overall satisfactory rating covering the final 6-month period of clinical anesthesia training in each anesthesiology residency program.

D. Have satisfied all examination requirements of the Board.

E. Have a professional standing satisfactory to the ABA.

ABA certificates in anesthesiology issued on or after January 1, 2000, are valid for 10 years after the year the candidate passes the examination for certification. A person certified by the ABA is designated a diplomate in publications of the American Board of Medical Specialties (ABMS) and the American Society of Anesthesiologists (ASA).

Continuum of Education in Anesthesiology

The continuum of education in anesthesiology consists of four years of full-time training subsequent to the date that the medical or osteopathic degree has been conferred. The continuum consists of a clinical base year and 36 months of approved training in anesthesiology (CA-1, CA-2, and CA-3 years).

A. During the clinical base year the physician must be enrolled and training as a resident in a transitional year or primary specialty training program in the United States or its territories that is accredited by the ACGME or approved by the American Osteopathic Association, or outside the United States and its territories in institutions affiliated with medical schools approved by the Liaison Committee on Medical Education.

Acceptable clinical base experiences include training in internal or emergency medicine, pediatrics, surgery or any of the surgical specialties, obstetrics and gynecology, neurology, family practice, critical care medicine, or any combination of these as approved for the individual resident by the director of his or her training program in anesthesiology. The clinical base year must include at least 10 months of clinical rotations during which the resident has responsibility for the diagnosis and treatment of patients with a variety of medical and surgical problems, of which at most 1 month may involve the administration of anesthesia. At most, 2 months of the clinical base year may involve training in specialties or subspecialties that do not meet the aforementioned criteria.

The resident must complete the clinical base year before beginning CA-3 year clinical rotations.
B. The 3-year clinical anesthesia curriculum ("CA-1-3") consists of experience in basic anesthesia training, subspecialty anesthesia training, and advanced anesthesia training. It is a graded curriculum of increasing difficulty and learning that is progressively more challenging of the resident's intellect and technical skills.

1. Experience in basic anesthesia training is intended to emphasize basic and fundamental aspects of the management of anesthesia. It is recommended that at least 12 months of the CA-1 and CA-2 years be spent in basic anesthesia training, with a majority of this time occurring during the CA-1 year.

2. Subspecialty anesthesia training is required to emphasize the theoretical background, subject material, and practice of subspecialties of anesthesiology. These subspecialties include obstetric anesthesia, pediatric anesthesia, cardiothoracic anesthesia, neuroanesthesia, anesthesiology for outpatient surgery, recovery room care, regional anesthesia, and pain medicine. It is recommended that these experiences be subspecialty rotations and occupy 7 to 12 months of the CA-1 and CA-2 years. The sequencing of these rotations in the CA-1 and CA-2 years is left to the discretion of the program director.

In addition to the above requirements for subspecialty experiences, 2 months of training in critical care medicine are required during clinical anesthesia training. An acceptable critical care rotation should include active participation in patient care, active involvement by anesthesiology faculty experienced in the practice and teaching of critical care, and an appropriate population of critically ill patients. Experience in short-term overnight post-anesthesia units, intermediate step-down units, or emergency rooms does not fulfill this requirement.

3. Experience in advanced anesthesia training constitutes the CA-3 year. The CA-3 year is a distinctly different experience from the CA-1-2 years, requiring progressively more complex training experiences and increased independence and responsibility for the resident. Residents must complete the clinical base and CA-1-2 years of training before they begin clinical rotations in fulfillment of the CA-3 year requirement.

The program director, in collaboration with the resident, will design the resident's CA-3 year of training. They will select one of two tracks designated as the advanced clinical track and the clinical scientist track. Regardless of the track selected, resident assignments in the CA-3 year should include the more difficult or complex anesthetic procedures and care of the most seriously ill patients.

Residents in the advanced anesthesia track are required to complete a minimum of 6 months of advanced anesthesia training. They may spend the remaining months in advanced anesthesia training, in one to three selected subspecialty rotations, or in research. Residents may train in one anesthesia subspecialty for at most 6 months during the CA-3 year and no more than 12 months during the CA-1-3 years.

The clinical scientist track consists of clinical training in combination with research experience. Research may occur at any time during residency training although often it will be conducted in the CA-3 year. The resident must be enrolled in an ACGME-accredited anesthesiology program and remain active in the educational component of the program while pursuing research.

The clinical scientist track may be fulfilled by completing 6 months of clinical or laboratory research experience during 48 months of training, which must include 12 months of clinical base and a minimum of 30 months of clinical anesthesia.

A resident must have a satisfactory Clinical Competence Committee report for 6 months of clinical anesthesia training immediately preceding any research period.

C. The ABA grants a resident credit toward the CA-1-3 year requirements for clinical anesthesia training that satisfies all four of the following conditions:

1. The CA-1-3 years of training are spent as a resident enrolled with the ABA by no more than two ACGME-accredited residency programs in the United States or its territories. An ACGME-accredited program includes the parent institution and institutions that have an RRC-approved integration or affiliation agreement with the parent institution.

2. The period of clinical anesthesia training as an enrolled resident of any single program is at least 6 months of uninterrupted training.

3. The 6-month period clinical anesthesia training in any one program ends with receipt of a satisfactory Certificate of Clinical Competence. To receive credit from the ABA for a period of clinical anesthesia training that is not satisfactory, the resident must immediately complete an additional 6 months of uninterrupted clinical anesthesia training in the same program with receipt of a satisfactory Certificate of Clinical Competence. If a resident receives consecutive Certificates of Clinical Competence that are not satisfactory, additional training is required. When a resident receives a satisfactory Certificate of Clinical Competence immediately following consecutive periods of training that are not satisfactory, the ABA will grant credit only for the period of satisfactory training and the most recent of the periods of unsatisfactory training immediately preceding it.

4. Training away from the resident's ACGME-accredited anesthesiology program cannot occur until completion of at least 1 year of clinical anesthesia or during the last 3 months of the CA-3 year, unless such training will be in another ACGME-accredited anesthesiology program.

Current RRC requirements limit training in institutions not integrated with the resident's ACGME-accredited program to a maximum of 12 months throughout the CA-1-3 years. The ABA will accept no more than 6 of these months in institutions not affiliated with the ACGME-accredited program. Therefore, residents must complete a minimum of 24 months of clinical anesthesia training in their ACGME-accredited program's parent and integrated institutions and may complete at most 6 months of clinical anesthesia training away from their ACGME-accredited program.

The Credentials Committee of the ABA must prospectively approve clinical anesthesia training away from the ACGME-accredited program, even if the training will occur in another ACGME-accredited program. The request for approval must include a chronological description of the rotations, information about the supervision of the resident, and assurances that the resident will be in compliance with the limits on training away from his/her ACGME-accredited program. Further, the resident must remain enrolled in his/her program while training away from the ACGME-accredited program, and his/her program must report the training on the Clinical Competence Committee report filed for the period involved.

D. Prospective approval is required for exceptions to policies regarding the training planned for residents. The Credentials Committee of the ABA considers requests for prospective approval on an individual basis. The ABA office must receive the request from the program director on behalf of a resident at least 4 months before the resident begins the training in question. It is the
responsibility of the program director and the resident to assure that the request is received in a timely manner.

**Principal Objectives**

The examination system for the ABA's primary certificate has two distinct parts, the written examination and the oral examination. Each is designed to assess different qualities of a Board-certified anesthesiologist.

A Board-certified anesthesiologist is a physician who provides medical management and consultation during the perioperative period, in pain medicine and in critical care medicine. A diplomate of the Board must possess knowledge, judgment, adaptability, clinical skills, technical facility, and personal characteristics sufficient to carry out the entire scope of anesthesiology practice. An ABA diplomate must logically organize and effectively present rational diagnoses and appropriate treatment protocols to peers, patients, their families, and others involved in the medical community. A diplomate of the Board can serve as an expert in matters related to anesthesiology, deliberate with others, and provide advice and defend opinions in all aspects of the specialty of anesthesiology. A Board-certified anesthesiologist is able to function as the leader of the anesthesiology care team.

Because of the nature of anesthesiology, the ABA diplomate must be able to manage emergent life-threatening situations in an independent and timely fashion. The ability to independently acquire and process information in a timely manner is central to assure individual responsibility for all aspects of anesthesiology care. Adequate physical and sensory faculties, such as eyesight, hearing, speech, and coordinated function of the extremities, are essential to the independent performance of the Board-certified anesthesiologist. Freedom from the influence of or dependency on chemical substances that impair cognitive, physical, sensory, or motor function also is an essential characteristic of the Board-certified anesthesiologist.

**Irregular Examination Behavior**

The Board acts to maintain the integrity of its examination and certification process and to ensure the equitable and objective administration of its examinations to all candidates. Information about behavior the Board considers a violation of the integrity of its examination and certification process is sent to all candidates scheduled for examination. Statistical analyses may be conducted to verify observations and reports of suspected irregularities in the conduct of an examination. The examination of a candidate whose conduct, in the Board's judgment, violates or attempts to violate the integrity of its examination and certification process will be invalidated and no results will be reported. Furthermore, the candidate will be subject to punitive action as determined by the Board. In that event the candidate would be informed of the reasons for the Board's actions and could request an opportunity to present information deemed relevant to the issue and to petition the Board to reconsider its decision.

**Nonstandard Examination Conditions**

The ABA supports the intent of the Americans with Disabilities Act ("ADA") and has a process for considering requests that its assessment programs be modified to accommodate an individual with a disability. Anyone having questions about the process should write or call the Executive Vice President of the Board at the ABA office.

**Unforeseeable Events**

In the event a natural disaster, war, government regulations, strikes, civil disorders, curtailment of transportation facilities, or other unforeseeable events make it inadvisable, illegal, or impossible for the ABA to administer an examination to a candidate at the appointed date, time, and location, or to conclude a candidate's examination, the ABA is responsible neither for any personal expense the candidate may have incurred to be present for the examination nor for any such expense the candidate may incur for any subsequent examination.

**Application Procedure**

Application for admission to the examination system of the ABA must be made using the ABA Electronic Application System via the ABA Web site at www.theABA.org. Exceptions to this requirement will be considered upon written request. Written requests are to be addressed to the ABA Secretary and must include the basis for the requested exception.

**Filing and Documentation Deadlines**

**Standard deadline.** The standard deadline for the ABA to receive the completed application and the application fee is December 15 of the year immediately preceding the year in which the written examination is to be administered.

**Late deadline.** The late deadline by which the ABA must receive the completed application with the application fee and a late fee is January 15 of the examination year.

The January 15 late deadline for receipt of a completed application and the appropriate fee is absolute. Regardless of the reason, the ABA will not consider an application it receives after January 15 of the examination year.

The ABA must receive all documentation it requires to make a determination about an applicant's qualifications for admission to examination no later than March 15 of the examination year. This includes, but is not limited to, references and evidence of having qualified for medical licensure. An application will not be accepted if the required documentation is not received by that date. It ultimately is the responsibility of every applicant to ensure that the ABA receives all required documentation in a timely manner.

**Applicant Acknowledgement and Release**

The application form includes the following acknowledgement, which the applicant shall be required to sign by electronic signature.

I, the undersigned applicant ("Applicant"), hereby apply to the ABA for entrance into its examination system for the purpose of obtaining ABA certification status ("Certification"). I acknowledge that my application is subject to the ABA rules and regulations. I further acknowledge and agree that if I withdraw my application or the ABA does not accept it, the ABA will retain the application fee and any late fees.

I represent and warrant to the ABA that all information contained in this application ("Application") is true, correct and complete in all material respects. I understand and acknowledge that any material misstatement in or omission from this Application shall, at any time, constitute cause for disqualification from the ABA examination system or from the issuance of an ABA Certificate or to forfeiture and redeployment of such Certificate.

I agree that the Acknowledgement, as submitted by me, shall survive the electronic submission of the Application, regardless of whether or not the information or data provided in the Application has been reformatted in any manner by the ABA. I also agree that this Acknowledgement is part of and incorporated into the Application whether submitted along with the Application or not.

I acknowledge that I have received a copy of the applicable ABA Booklet of Information and read the Booklet. I agree to be bound by the policies, rules, regulations and requirements published in the applicable Booklet, in all matters relating to consideration of
and action upon this Application and Certification should it be granted. In addition, I understand and acknowledge that in the event I have violated any of the ABA rules governing my Application and/or Certification, or in the event I fail to comply with any provisions of the ABA Certificate of Incorporation or Bylaws, such violations shall constitute cause for disqualification from the ABA examination system or from the issuance of an ABA Certificate or to forfeiture and redelivery of such Certificate.

The application also includes the following Release, which the applicant shall be required to sign by electronic signature.

I, the undersigned applicant ("Applicant"), hereby apply to the ABA for entrance into its examination system for the purpose of obtaining ABA certification status ("Certification"). I acknowledge that this application ("Application") is subject to the ABA rules and regulations.

In connection with my Application, I authorize all persons holding testimony records, documents, opinions, information and data relevant to or pertaining to my professional competence and ethical conduct and/or behavior (the "Information") to release such Information to the ABA, its employees and agents. This authorization applies whether or not such persons are listed as reference on my Application. The Information includes any information relating to any addictive use of alcohol and/or illegal use of drugs, and any treatment or rehabilitation related thereto. The purpose of releasing such Information is to determine or verify my qualifications for entrance into the ABA entrance examination and ABA Certification. A copy of this release may accompany any request made by the ABA for such Information.

I authorize the ABA to: (1) report my status in the examination system, including the results of any written or oral examination, to the Director and Department Chair of the program from which I completed my clinical training; (2) use any score in psychometric analyses to confirm observations and reports of suspected irregularities in the conduct of an examination; and (3) respond to any inquiry about my status in the ABA examination system. I also authorize the ABA to use any and all Information for the purpose of conducting longitudinal studies to assess the ABA certification process. Such Information may be reported or released only in the aggregate, and any results of such studies will have no direct bearing on my Application or Certification status. Subject to applicable state and federal law requirements, the ABA shall hold all Information in confidence.

I release and agree to hold harmless each person from any liability to me arising out of the giving or releasing of Information to the ABA. This release and agreement includes liability for the inaccuracy or untruth of the Information, so long as such Information is provided in good faith. I also release and agree to hold harmless the ABA and its agents and employees, including but not limited to its directors, officers and examiners, from any liability to me as a result of any acts or proceedings undertaken or performed in connection with my Application, provided such acts or proceedings are made or conducted in good faith.

Entrance Requirements

At the time of application to enter the examination system of the ABA, the applicant shall be capable of performing independently the entire scope of anesthesia practice and must:

A. Have graduated from a medical school in a state or jurisdiction of the United States or in Canada that was accredited at the date of graduation by the Liaison Committee on Medical Education, the Committee on Accreditation of Canadian Medical Schools, or the American Osteopathic Association. Graduates of medical schools outside the jurisdiction of the United States and Canada must have one of the following: a permanent (valid indefinitely) certificate from the Educational Commission for Foreign Medical Graduates, comparable credentials from the Medical Council of Canada, or documentation of training for those who entered postdoctoral medical training in the United States via the Fifth Pathway as proposed by the American Medical Association.

B. Provide evidence satisfactory to the Board of having been awarded a medical or osteopathic degree acceptable to the Board.

C. Provide evidence acceptable to the Board of having satisfied the licensure requirement for certification. The applicant must inform the ABA of any conditions or restrictions in force on any active medical license he or she holds. When there is a restriction or condition in force on any of the applicant's medical licenses, the Credentials Committee of the ABA will determine whether, and on what terms, the applicant shall be admitted to the ABA examination system.

Residents in training may submit evidence with their application of having qualified on examinations that provide eligibility for medical licensure (eg, United States Medical Licensing Examination Steps 1, 2, and 3) on or before the standard application deadline. Residents who do so must have evidence of permanent, unconditional, unrestricted, and currently unexpired medical licensure on file in the ABA office by November 30 of the year in which the written examination for which they applied is administered.

D. Have on file in the Board office evidence of having satisfactorily fulfilled all requirements of the continuum of education in anesthesia before the date of examination and after receiving a medical or osteopathic degree acceptable to the ABA. Such evidence must include a satisfactory Certificate of Clinical Competence covering the final 6 months of clinical anesthesia training in each residency program. A grace period will be permitted so that applicants completing this requirement by August 31 may apply for the immediately preceding July written examination.

E. Have on file with the Board documentation attesting to the applicant's current privileges and evaluations of various aspects of his or her current practice of anesthesia. Such evaluations will include verification that the applicant meets the Board's clinical activity requirement by spending, on average, at least 1 day per week during 1 of the previous 3 years in the clinical practice of anesthesia and/or related subspecialties. The ABA may solicit such documentation and evaluations from the residency program director or others familiar with the applicant's current practice of anesthesia and use them in determining the applicant's qualifications for admission to the examination system. The Clinical Competence Committee report from the department and the evaluation of the program director and others will be used as the basis for assessing admission qualifications.

F. If residency training was completed more than 12 years before the date of application or if a second or subsequent application has been declared void, the applicant must have reestablished his or her qualifications for admission to the examination system.

Admission qualifications may be reestablished by qualifying on an entry examination designated by the Board. The Board has designated the examination administered annually by the Joint Council on In-Training Examinations as the entry examination. Information about the entry examination and a registration form may be obtained by writing the Joint Council c/o the American Society of Anesthesiologists.

Alternatively, the applicant may complete 12 consecutive months of additional clinical training in anesthesia as a CA-3 year resident in one ACGME-accredited program with receipt of
a satisfactory Certificate of Clinical Competence covering the final 6 months.

The applicant must qualify on the entry examination or satisfactorily complete the year of additional training after the date the ABA declared her or his most recent application void. The applicant must complete the requalifying examination before applying to the ABA. If the applicant will complete the year of additional training by August 31, he or she may apply to the ABA for the immediately preceding July written examination. The applicant must apply to the ABA within 3 years of having reestablished her or his qualifications for admission to examination.

The ABA will not validate or report the results to applicants who sit for the written examination and do not fulfill those conditions by the deadlines.

The ABA shall determine that entry into the examination system is warranted when required information submitted by and on behalf of the applicant is satisfactory. The ABA will notify an applicant who is accepted as a candidate for certification after approval of all credentials.

The Board, acting as a committee of the whole, reserves the right not to accept an application. The applicant has the right to seek review of such decision.

The Board reserves the right to correct clerical errors affecting its decisions.

Certificate of Clinical Competence

The Board requires every residency training program to file, on forms provided by the Board, an Evaluation of Clinical Competence in January and July on behalf of each resident who has spent any portion of the prior 6 months in Clinical Anesthesiology training in or under the sponsorship of the residency program and its affiliates.

The program director or department chair must not chair the Clinical Competence Committee.

Entry into the examination system is contingent upon the applicant having a Certificate of Clinical Competence on file with the Board attesting to satisfactory clinical competence during the final period of Clinical Anesthesiology training in or under the sponsorship of each program. The Board, therefore, will deny entry into the examination system until this requirement is fulfilled.

Absence From Training

The total of any and all absences may not exceed 60 working days (12 weeks) during the Clinical Anesthesiology 1-3 years of training. Attendance at scientific meetings, not to exceed 5 working days per year, shall be considered a part of the training program. Duration of absence during the Clinical Base year may conform to the policy of the institution and department in which that portion of the training is served. Absences in excess of those specified will require lengthening of the total training time to the extent of the additional absence.

A lengthy interruption in training may have a deleterious effect on the resident's knowledge or clinical competence. Therefore, when there is an absence for a period in excess of 6 months, the Credentials Committee of the ABA shall determine the number of months of training the resident will have to complete subsequent to resumption of the residency program to satisfy the training required for admission to the ABA examination system.

The Examination System

The examination system for the ABA's primary certificate has two distinct parts, the written examination and the oral examination. Each is designed to assess different qualities of a Board-certified anesthesiologist.

Written examination. The written examination is designed to assess the candidate's knowledge of basic and clinical sciences as applied to anesthesiology. Written examinations are held annually in locations throughout the United States and Canada on a Saturday in July. A passing grade, as determined by the Board, is required.

It is necessary for candidates to pass the written examination to qualify for the oral examination. Candidates must wait at least 6 months after passing the written examination to be eligible to appear for the oral examination.

Oral examination. The oral examination is designed to assess the candidate's ability to demonstrate the attributes of an ABA diplomate when managing patients presented in clinical scenarios. The attributes are sound judgment in decision-making and management of surgical and anesthetic complications, appropriate application of scientific principles to clinical problems, adaptability to unexpected changes in the clinical situations, and logical organization and effective presentation of information. The oral examination emphasizes the scientific rationale underlying clinical management decisions. The ABA conducts oral examinations in the spring and fall of each year at a single location in the United States. Examiners are Directors of the Board and other ABA diplomates who assist as associate examiners. A passing grade, as determined by the Board, is required.

The ABA will not schedule candidates to appear at consecutive oral examinations. Candidates who do not take or do not pass an oral examination for which they are scheduled, for whatever reason, are not eligible to appear at the next regularly scheduled oral examination.

A. Duration of candidate status. The duration of candidate status is limited. Every candidate is given one opportunity per calendar year, for 3 years, to successfully complete each examination requirement. All candidates must satisfy the written examination requirement within 3 years of the date of the first examination that follows acceptance of the application. All candidates must satisfy the oral examination requirement within 3 years of the date of the first oral examination for which they become eligible. The ABA will declare the candidate's application void if the candidate does not satisfy an examination requirement within the prescribed number of opportunities or time, whichever comes first.

B. The ABA sends notification of examination opportunity to every candidate eligible to appear for the examination at least 4 months prior to the examination date. The notification is sent to candidates at their address of record on file in the Board office.

Candidates are required to respond to every written and oral examination notice via the ABA Web site at www.theABA.org by the response date established by the ABA, whether or not they accept the examination opportunity.

The ABA notifies candidates of the exact date, time, and location of their examination and the rules for its conduct at least 2 months before the date of examination.

The Board office is not responsible for an interruption in communication with a candidate that is due to circumstances beyond its control. Candidates must immediately notify the ABA of an address change via the ABA Web site at www.theABA.org or by writing to the ABA office. Candidates must call the Board office if they do not receive an examination notice they are expecting within the timeframe described above. The candidate's ABA identification number, or alternatively social security number, should be included on all correspondence to the Board solely for identification purposes.

C. The ABA requires every candidate to accept each examination opportunity. The ABA must receive the candidate's reply to the notice of an examination opportunity via the ABA Web site at
www.theABA.org by the deadline specified in the notification. The candidate forfeits the examination opportunity if the ABA does not receive acceptance of the examination opportunity or a request to be excused from the examination by the response deadline.

The ABA will excuse a candidate from at most one opportunity to satisfy an examination requirement without forfeiture of the opportunity. The candidate must send the ABA a written request to be excused from the examination opportunity. The ABA must receive the written request and the reason for it by the date the reply to the examination opportunity notice is due.

Canceling or not keeping an examination appointment results in forfeiture of the examination opportunity and the examination fee. If an event over which the candidate had no control prevented the candidate from keeping the examination appointment, the candidate may request to be excused from the examination without forfeiting the examination opportunity or examination fee. The candidate's written request must include an explanation and independent documentation of the event. The ABA must receive the candidate's request no later than 3 weeks after the examination date. The ABA will consider the request only if it is the candidate's first request to be excused from an opportunity to satisfy the examination requirement.

The Board reserves the right to limit the number of candidates to be admitted to any examination. Places in the oral examination schedule are assigned randomly when more candidates request the examination than can be accommodated. Candidates who are not assigned to the examination they requested are assigned to the next examination for which they are eligible.

**Fees**

The ABA is a nonprofit organization. Application and examination fees are based on the cost of maintaining the functions of the Board. The Board reserves the right to change fees when necessary.

All fees paid to the ABA are nonrefundable.

**Application fee.** The application fee for initial certification is $550.

**Late fee.** A $350 late fee is due with an initial certification application received by the ABA after the standard deadline and no later than the late deadline (see section 2.07).

**Written examination fee.** A $400 examination fee is due when candidates accept a written examination opportunity.

**Oral examination fee.** A $1,725 examination fee is due when candidates accept an oral examination opportunity.

**Returned check fee.** A $50 charge will be made whenever a check is returned for nonpayment.

**Reapplication**

The ABA declares void the application of a candidate who does not satisfy the examination requirements in the prescribed number of opportunities or time for whatever reason. The physician may reapply by submitting a new application. Such application shall be subject to the fees, rules, privileges, and requirements that apply at the time of reapplication. The applicant who meets existing requirements will be readmitted into the examination system.

The reapplicant for primary certification who has had a second more than 12 years before the date of reapplication must reestablish his or her qualifications for admission to the examination system before filing another application. In all instances, the candidate must pass both the written and oral examinations under the new application.

**Status of Individuals**

The ABA reserves to itself exclusively the right to define an individual's status relative to its examination and certification system. Status is limited to the period of time the physician's certification or application for certification is valid.

Inquiries about the current status of individuals should be addressed to the ABA office. In addition to the physician's full name, inquiries should include other identification information if available. The ABA responds to inquiries with one of the following statements:

- The physician is certified by the ABA.
- The physician was certified by the ABA from (date of certification) to (date certification expired) and is a candidate in the ABA maintenance of certification system.
- The physician was certified by the ABA from (date of certification) to (date certification expired) and is not recertified at this time.
- The physician is a candidate in the ABA examination system.
- The physician has applied to the ABA, and the ABA is determining whether the applicant meets its requirements for admission to its examination system.
- The physician is neither certified by the American Board of Anesthesiology nor a candidate in the ABA examination system.

The fee for written confirmation of an individual's status is $35.

**Alcoholism and Substance Abuse**

The Americans with Disabilities Act (ADA) protects individuals with a history of alcohol or substance abuse who are not currently abusing alcohol or using drugs illegally. The ABA supports the intent of the ADA.

The ABA will admit qualified applicants and candidates with a history of alcohol abuse to its examination system and to examination if, in response to its inquiries, the ABA receives acceptable documentation that they do not currently pose a direct threat to the health and safety of others.

The ABA will admit qualified applicants and candidates with a history of illegal use of drugs to its examination system and to examination if, in response to its inquiries, the ABA receives acceptable documentation that they are not currently engaged in the illegal use of drugs.

After a candidate with a history of alcohol abuse or illegal use of drugs satisfies the examination requirements for certification, the ABA will determine whether it should defer awarding its certification to the candidate for a period of time to avoid certifying a candidate who poses a direct threat to the health and safety of others. If the ABA determines that deferral of the candidate's certification is appropriate because the candidate does currently pose a threat to the health and safety of others, the ABA will assess the specific circumstances of the candidate's history of alcohol abuse or illegal use of drugs to determine when the candidate should write the Board to request issuance of its certification.

**Revocation of Certificate**

A certificate is issued by the Board with the understanding that it remains the property of the Board. Any certificate issued by the Board shall be subject to revocation in the event that:

A. The issuance of such certificate or its receipt by the person so certified shall have been contrary to, or in violation of, any provision of the Certificate of Incorporation of this Board or its By-Laws; or

B. The person certified shall not have been eligible to receive such certificate whether or not the facts making him or her ineligible were known to, or could have been ascertained by, the Board or any of the directors at the time of issuance of such certificate; or
C. The person certified shall have made any misstatement of fact in his or her application for such certificate or in any other statement or representation to the Board or its representatives; or

D. The person certified shall fail to maintain a professional standing satisfactory to the Board.

The Board shall be the sole judge of whether or not the evidence or information before it is sufficient to require or permit revocation of any certificate issued by the Board, and the decision of the Board shall be final. The individual has the right to seek review of such decision.

Certification by Other Organizations

The ABA will make no statement about the comparability of the ABA certificate and another organization's certificate. The ABA will not accept certification by another entity as meeting the requirements for entrance into the ABA examination system for specialty or subspecialty certification or recertification.

Records Retention

The ABA retains documents pertaining to an individual's residency training, application for certification, examination opportunities, and examination results ("Certification Records") for the sole purpose of determining that its requirements for admission to the examination system, certification, or recertification are fulfilled.

A complete copy of the Certification Records Retention Policy is available upon written request. The following is a summary of the ABA's Certification Records Retention Policy:

In the absence of an application for certification, Certification Records pertaining to the ABA entrance requirements are retained for 7 years from the date of the most recent correspondence to or from the ABA regarding the requirements. Certification Records pertaining to an unsuccessful application are retained until the individual submits another application to the ABA or the aforementioned 7-year period expires, whichever occurs first. Certification Records corroborating the results of a candidate's examination are retained until 6 months after the date of the most recent correspondence to or from the ABA regarding the results. Certification Records corroborating the candidate's fulfillment of the ABA certification requirements (eg, evidence of medical licensure) are retained until 1 year after the date of the most recent correspondence to or from the ABA regarding the candidate's certification by the ABA. Certification Records pertaining to adverse board actions, including termination or other sanctions, are retained for 7 years from the date of the most recent correspondence to or from the ABA regarding such board action. Certification Records corroborating a diplomate's completion of an ABA maintenance of certification program are retained until the diplomate is recertified or 10 years, whichever occurs first. All other Certification Records related to an ABA maintenance of certification program, including supporting documentation and evaluation results, are retained until 6 months after the date of the most recent correspondence to or from the ABA regarding the results. A Certification Record pertaining to a candidate's completion of an ACGME-accredited anesthesiology residency program is retained indefinitely. This Certification Record includes entries that identify the training program, the dates of training, and the faculty's overall evaluation of the resident's performance during training. Certification Records for candidates issued an ABA certification are retained indefinitely. These Certification Records include documents and entries attesting that each certification requirement was met.

The ABA sees to the secure destruction of the documents in its file for an individual when the period specified for retention of the documents has expired.

Formal Review Process

The only actions of the ABA that are subject to formal review are a decision not to accept an application, a decision not to grant a request for an examination under nonstandard testing conditions, and a decision to revoke a certificate issued by the ABA.

The individual must give the ABA written notification of the intention to seek a formal review within 30 days of receiving notification of the Board's decision. The individual shall address the notice to the ABA Secretary at the Board office and shall set forth the grounds upon which the request for formal review is based. If the individual does not give the ABA written notification of the intent to seek formal review within the time and in the manner prescribed, the individual shall be considered to have accepted the decision of the Board and the decision shall become final.

Upon receipt of notice of a request for formal review within the time and in the manner prescribed, the request will be screened to determine whether or not it meets the standards for a formal review to occur. Minimum criteria for a formal review are grounds that the Board's action was inconsistent with ABA policies or not supported by the evidence available to the Board when the action was taken. If it is determined that there are grounds for a formal review, the ABA shall form a Review Panel and schedule a hearing. Otherwise, the decision of the Board shall become final.

Subspecialty Certification in Critical Care Medicine

A. Definition of Critical Care Medicine

The discipline of critical care medicine has evolved over the last few decades parallel with the development of techniques and technology for acute and long-term life support of patients with multiple organ system derangement. Because problems encountered in the critically ill patient encompass aspects of many different specialties, critical care medicine is a multidisciplinary endeavor that crosses traditional department and specialty lines.

The critical care medicine physician is a specialist whose knowledge is of necessity broad, involving all aspects of management of the critically ill patient, and whose primary base of operation is the intensive care unit ("ICU"). This physician has completed training in a primary specialty and has received additional training in critical care medicine aspects of many disciplines. This background enables the physician to work in concert with the various specialists on the patient care team in the ICU; to utilize recognized techniques for vital support; to teach other physicians, nurses, and health professionals the practice of intensive care; and to foster research.

B. Certification Requirements

At the time of subspecialty certification in critical care medicine by the ABA, each candidate shall be capable of performing independently the entire scope of anesthesiology critical care medicine practice and must:

- Be a diplomate of the ABA.
- Fulfill the licensure requirement for certification.
- Have fulfilled the requirement of the continuum of education in critical care medicine as defined by the ABA.
- Have satisfied the critical care medicine examination requirement of the ABA.
- Have a professional standing satisfactory to the ABA.

ABA subspecialty certificates in critical care medicine issued on or after January 1, 2000 are valid for 10 years after the year the candidate passes the examination for certification. Holders of the certificate may apply to the ABA to maintain certification in the subspecialty no sooner than 3 years before their subspecialty certification ends.
C. Continent of Education in Critical Care Medicine

The continuum of education in critical care medicine consists of 12 months of full-time training in critical care medicine. The training must be in an anesthesiology critical care medicine program in the United States or its territories accredited by the ACGME from the date the training begins to the date it ends. The training must follow completion of the continuum of education in anesthesiology (ie, clinical base and CA 1-3 years) unless the Credentials Committee of the ABA prospectively approves a different training sequence for the fellow.

The ABA will accept no more than 2 months of training in institutions not recognized by the RRC as part of the accredited subspecialty program. Therefore, the ABA requires that fellows complete a minimum of 10 months of training in their ACGME-accredited subspecialty program.

The total of any and all absences during the critical care medicine residency may not exceed the equivalent of 20 working days (4 weeks) per year. Attendance at scientific meetings, not to exceed 5 working days during the year of training, shall be considered part of the training program. Absences in excess of those specified will require lengthening of the total training time to the extent of the additional absence.

Training in critical care medicine must not be interrupted by frequent or prolonged periods of absence. When there is an absence for a period in excess of 2 months, the Credentials Committee of the ABA shall determine the number of months subsequent to resumption of the program that are necessary to satisfy the training requirements for admission to the ABA subspecialty examination system.

D. Entrance Requirements

At the time of application to enter the critical care medicine examination system of the ABA, the applicant shall be capable of performing independently the entire scope of anesthesiology critical care medicine practice and must:

- Be certified by the ABA.
- Submit proof of having fulfilled the licensure requirement for certification. The applicant must inform the ABA of any conditions or restrictions in force on any active medical license he or she holds. When there is a restriction or condition in force on any of the applicant’s medical licenses, the Credentials Committee of the ABA will determine whether, and on what terms, the applicant shall be admitted to the ABA examination system.
- Have on file in the ABA office documentation of having fulfilled the requirement of the continuum of education in critical care medicine.
- Have on file with the Board documentation attesting to the applicant's current privileges and evaluations of various aspects of the applicant's current practice of anesthesiology critical care medicine. Such evaluations will include verification that the applicant meets the Board's clinical activity requirement by practicing the subspecialty of critical care medicine, on average, at least 1 day per week during 1 of the previous 3 years. The ABA may use such documentation and evaluations as part of its assessment of the applicant's qualifications for admission to its critical care medicine examination system.
- If an applicant completed anesthesiology critical care medicine residency training more than 12 years before the date of application, or if an applicant has had a second or subsequent subspecialty application declared void, the ABA must have evidence that the applicant has reestablished his or her qualifications for admission to the subspecialty examination system. To fulfill the subspecialty requalification requirement, the applicant must complete 4 more consecutive months of training in the subspecialty. The training must be in an ACGME-accredited anesthesiology critical care medicine program and be completed satisfactorily before applying for examination.

The ABA shall determine that entry into the critical care medicine examination system is warranted when required information submitted by and on behalf of the applicant is satisfactory. The ABA will notify an applicant who is accepted as a candidate for critical care medicine certification after approval of all credentials.

The Board, acting as a committee of the whole, reserves the right not to accept an application. The applicant has the right to seek review of such decision.

The Board reserves the right to correct clerical errors affecting its decisions.

E. Application Procedure

1. Application for admission to the examination system of the ABA must be made using the ABA Electronic Application System, via the ABA Web site at www.theABA.org. Exceptions to this requirement will be considered upon written request. Written requests are to be addressed to the ABA secretary and must include the basis for the requested exception.

2. The application form includes the identical Acknowledgement and Release statements included in the application for primary certification. The applicant for examination in critical care medicine shall be required to sign each statement by electronic signature.

F. Filing and Documentation Deadlines

Standard deadline. The standard deadline for the ABA to receive a completed application and the application fee for the critical care medicine examination is February 15 of the examination year.

Late deadline. The late deadline for the ABA to receive a completed application with the application fee and a late fee is March 15 of the examination year.

The March 15 late deadline for receipt of a completed application and the appropriate fee is absolute. Regardless of the reason, the ABA will not consider a critical care medicine application it receives after March 15 of the examination year.

The ABA must receive all documentation it requires to make a determination about an applicant's qualifications for admittance to the examination no later than May 15 of the examination year. This includes, but is not limited to, references and verification that the training requirement is met. An application will not be accepted if the required documentation is not received by that date. It ultimately is the responsibility of every applicant to assure that the ABA receives all required documentation in a timely manner.

G. Fees

The ABA is a nonprofit organization. Application and examination fees are based on the cost of maintaining the functions of the Board. The Board reserves the right to change fees when necessary. All fees paid to the ABA are nonrefundable.

Application fee. The application fee for critical care medicine certification is $250.

Late fee. A $200 late fee is due with a critical care medicine application received by the ABA after the standard deadline and no later than the late deadline (see Section 3.06).

Examination fee. A $750 examination fee is due when candidates accept a critical care medicine examination opportunity.

Returned check fee. A $50 charge will be made whenever a check is returned for nonpayment.

H. Examination System

The written examination in critical care medicine is designed to test for the presence of knowledge that is considered essential for the ABA diplomate to function as a practitioner of critical care
The examination analyzes the cognitive and deductive skills as well as the clinical judgment of the candidates.

The critical care medicine examination is administered annually. The ABA will mail notice to all eligible candidates announcing the location(s) and date of the critical care medicine examination approximately 4 months prior to the date of its scheduled administration.

**Duration of candidate status.** The duration of candidate status is limited. Every candidate is given one opportunity per calendar year, for 3 years, to satisfy the critical care medicine examination requirement. The candidate must satisfy the examination requirement within 3 years of the date of the first examination that follows acceptance of the application. The ABA will declare the candidate's application void if the candidate does not pass the examination within the prescribed number of opportunities or time, whichever comes first. Physicians whose application has been declared void may reapply to the ABA.

**I. Status of Individual**

Inquiries about the current status of physicians relative to the ABA critical care medicine certification system should be addressed to the ABA office. The ABA will affirm the status of physicians who are certified in critical care medicine by the ABA. For others, the response to the inquiry will be in keeping with the ABA policy.

**J. Reapplication**

The ABA declares void the application of a candidate who has failed to satisfy the examination requirement in the prescribed number of opportunities or time for any reason. The physician may reapply by submitting a new application. Such application shall be subject to the fees, rules, privileges, and requirements that apply at the time of reapplication. The applicant who is judged to meet existing requirements will be readmitted into the examination system.

Every reapplicant who qualified previously by Temporary Criteria is required to have completed satisfactorily the 1-year continuum of education in critical care medicine before reapplying for the subspecialty certificate.

**Subspecialty Certification in Pain Medicine**

**A. Definition of Pain Medicine**

Pain medicine is the medical discipline concerned with the diagnosis and treatment of the entire range of painful disorders. Because of the vast scope of the field, pain medicine is a multidisciplinary subspecialty. The expertise of several disciplines is brought together in an effort to provide the maximum benefit to each patient. Although the care of patients is heavily influenced by the primary specialty of physicians who subspecialize in pain medicine, each member of the pain treatment team understands the anatomical and physiological basis of pain perception, the psychological factors that modify the pain experience, and the basic principles of pain medicine.

**B. Certification Requirements**

At the time of subspecialty certification in pain medicine by the ABA, each candidate shall be capable of performing independently the entire scope of anesthesiology pain medicine practice and must:

- Be certified by the ABA.
- Have fulfilled the licensure requirement for certification.
- Have fulfilled the requirement of the continuum of education in pain medicine as defined by the ABA.
- Have satisfied the pain medicine examination requirement of the ABA.
- Have a professional standing satisfactory to the ABA.

The ABA subspecialty certificate in pain medicine is valid for a period of 10 years after the year the candidate passes the examination for certification. Holders of the certificate may apply to the ABA to maintain certification in the subspecialty no sooner than 3 years before their pain medicine certification ends.

**C. Continuum of Education in Pain Medicine**

The continuum of education in pain medicine consists of 12 months of full-time training in acute, chronic, and oncology pain medicine. The training must be in a pain medicine program in the United States or its territories accredited by the ACGME from the date the training begins to the date it ends. The training must follow completion of the continuum of education in anesthesiology (ie, Clinical Base and CA 1-3 years), unless the Credentials Committee of the ABA prospectively approves a different training sequence for the fellow.

The ABA will accept no more than 2 months of training in institutions not recognized by the RRC as part of the accredited subspecialty program. Therefore, the ABA requires that fellows complete a minimum of 10 months of training in their ACGME-accredited subspecialty program.

The total of any and all absences during the pain medicine residency may not exceed the equivalent of 20 working days (4 weeks) per year. Attendance at scientific meetings, not to exceed 5 working days during the year of training, shall be considered part of the training program. Absences in excess of those specified will require lengthening of the total training time to the extent of the additional absence.

Training in pain medicine must not be interrupted by frequent or prolonged periods of absence. When there is an absence for a period in excess of 2 months, the Credentials Committee of the ABA shall determine the number of months of training subsequent to resumption of the program that are necessary to satisfy the training requirements for admission to the ABA subspecialty examination system.

**D. Entrance Requirements**

At the time of application to enter the pain medicine examination system of the ABA, the applicant shall be capable of performing independently the entire scope of anesthesiology pain medicine practice and must:

- Be certified by the ABA.
- Have fulfilled the licensure requirement for certification. The applicant must inform the ABA of any conditions or restrictions in force on any active medical license he or she holds. When there is a restriction or condition in force on any of the applicant's medical licenses, the Credentials Committee of the ABA will determine whether, and on what terms, the applicant shall be admitted to the ABA examination system.
- Have on file in the Board office documentation of having fulfilled the requirement of the continuum of education in pain medicine.
- Have on file with the Board documentation attesting to the applicant's current privileges and evaluations of various aspects of the applicant's current practice of anesthesiology pain medicine. Such evaluations will include verification that the applicant meets the Board's clinical activity requirement by practicing the subspecialty of pain medicine, on average, at least 1 day per week during 1 of the previous 3 years. The ABA may use such documentation and evaluations as part of its assessment of the applicant's qualifications for admission to its pain medicine examination system.
- If an applicant completed anesthesiology pain medicine residency training more than 12 years before the date of application, or if an applicant has had a second or subsequent subspecialty application declared void, the ABA must have evidence that the applicant has reestablished his or her qualifications for admission to the subspecialty examination system. To fulfill the
The written examination in pain medicine is designed to test for the presence of knowledge that is considered essential for the ABA diplomat to function as a practitioner of pain medicine. The examination analyzes the cognitive and deductive skills as well as the clinical judgment of the candidates.

The pain medicine examination is administered annually. The ABA will mail notice to all eligible candidates announcing the location(s) and date of the pain medicine examination approximately 4 months prior to the date of its scheduled administration.

Duration of candidate status. The duration of candidate status is limited. Every candidate is given one opportunity per calendar year, for 3 years, to satisfy the pain medicine examination requirement. The candidate must satisfy the examination requirement within 3 years of the date of the first examination that follows acceptance of the application. The ABA will declare the candidate's application void if the candidate does not pass the examination within the prescribed number of opportunities or time, whichever comes first. Physicians whose application has been declared void may reapply to the ABA.

I. Status of Individuals
Inquiries about the current status of physicians relative to the ABA pain medicine certification system should be addressed to the ABA office. The ABA will affirm the status of physicians who are certified in pain medicine by the ABA. For others, the response to the inquiry will be in keeping with ABA policy.

J. Reapplication
The ABA declares void the application of a candidate who has failed to satisfy the examination requirement in the prescribed number of opportunities or time for whatever reason. The physician may reapply by submitting a new application. Such application shall be subject to the fees, rules, privileges, and requirements that apply at the time of reapplication. The applicant who is judged to meet existing requirements will be readmitted into the examination system. Every reapplicant who qualified previously by Temporary Criteria is required to have completed satisfactorily the 1-year continuum of education in pain medicine before reapplying for the subspecialty certificate.

Recertification and Maintenance of Certification
A. Background
Initiatives at federal, state, and local levels convinced the ABA that some of its diplomates would need or desire a mechanism to demonstrate their continuing qualifications. In May 1989, the ABA announced its intent to develop a program for continued demonstration of qualifications ("CDQ"), which would afford its diplomates the opportunity to voluntarily demonstrate current knowledge and quality of practice. The ABA approved a policy of time-limited certification in 1995. All certificates issued by the ABA on or after January 1, 2000, will expire 10 years after the year the candidate passed the certification examination. The ABA took this step to reassure the public that the diplomate continues to demonstrate the attributes of the Board-certified anesthesiologist. The American Board of Medical Specialties (ABMS) approved the ABA recertification proposal in March 1996. Subsequently, the ABA changed the name of the CDQ program to recertification.

In 1998, the ABMS approved the ABA proposals for recertification in the subspecialties of critical care medicine and pain medicine. The credentialing requirements, examination, and passing standard are the same for certification and recertification. The ABA administers the subspecialty examinations to recertification candidates annually.

The ABA Recertification Programs include a commitment to continuing education, assessment of the quality of practice in the local environment, and an evaluation of knowledge. Diplomates who...
hold a certificate that is not time-limited may voluntarily elect to apply to the ABA for recertification. The ABA will not alter the status of their certification if they do not recertify. The ABMS approved the concept of maintenance of certification (“MOC”) in 2000. The 24 ABMS Member Boards subsequently endorsed the concept. MOC is a program of continual self-assessment and lifelong learning, along with periodic assessment of professional standing, cognitive expertise, and practice performance. The ABA is committed to evolving its recertification programs to MOC programs.

The ABA presented a proposal for Maintenance of Certification in Anesthesiology Program (“MOCA”) to ABMS in 2002. The transition from the current recertification program to MOCA began in 2004. This allows adequate time for diplomates issued a time-limited certificate to satisfy all MOCA requirements. The maximum interval between initial certification that is time-limited and successful completion of the requirements to maintain certification for the first time, as well as each time MOCA is required thereafter, is 10 years.

B. Voluntary Anesthesiology Recertification Program

The ABA established the voluntary recertification program for diplomates before it began issuing time-limited certificates in anesthesiology. Only diplomates certified in anesthesiology by the ABA before January 1, 2000, are eligible to apply for the recertification program.

The ABA recertification program will not remain open indefinitely. Diplomates certified before 2000 who might have a future need to recertify should consider participating in the program before it closes in 2009. Participation will not jeopardize a participant’s diplomate status.

The ABA recertification programs include two major components: an evaluation of the quality of current practice conducted at the local level and a secure written examination.

To be admissible to an ABA recertification examination, the applicant shall be capable of performing independently the entire scope of specialty or subspecialty practice and must:

- Be a physician to whom the ABA previously awarded certification in the specialty or subspecialty.
- Have fulfilled the licensure requirement for certification. The applicant must inform the ABA of any conditions or restrictions in force on any active medical license he or she holds. When there is a restriction or condition in force on any of the applicant’s medical licenses, the Credentials Committee of the ABA will determine whether, and on what terms, the applicant shall be admitted to the ABA examination system.
- Have on file in the ABA office documentation solicited by the ABA from the hospital/facility chief of staff, or equivalent, attesting to the applicant’s current privileges where a substantial portion of the applicant’s practice takes place. The documentation includes evaluations of various aspects of the applicant’s current practice and verification that the applicant meets the Board’s clinical activity requirement by practicing the medical discipline for which certification is being sought, on average, at least one day per week during one of the previous three years. If the applicant’s practice is entirely office-based, three letters of reference solicited by the ABA from referring physicians should be on file. The ABA shall issue a recertification certificate to the applicant who is accepted for and satisfies the recertification examination requirement established by the ABA.

C. Application Procedure

Application for admission to the examination system of the ABA must be made using the ABA Electronic Application System via the ABA Web site at www.theABA.org. Exceptions to this requirement will be considered upon written request. Written requests are to be addressed to the ABA Secretary and must include the basis for the requested exception.

The application form includes the identical Acknowledgement and Release statements included in the application for initial certification. The recertification applicant shall be required to sign each statement by electronic signature.

D. Filing and Documentation Deadlines

Anesthesiology recertification. The standard deadline for the ABA to receive a completed anesthesiology recertification application and the application fee is December 15 of the year prior to the examination year. The late deadline for the ABA to receive a completed application with the application fee and a late fee is January 15 of the examination year.

Subspecialty recertification. The standard deadline for the ABA to receive a completed subspecialty recertification application and the application fee is February 15 of the examination year. The late deadline for the ABA to receive a completed application with the application fee and a late fee is March 15 of the examination year.

The late deadlines for receipt of a completed anesthesiology or subspecialty recertification application and the appropriate fee are absolute. Regardless of the reason, the ABA will not consider a recertification application it receives after the late deadline for the examination.

The ABA must receive all the documentation it requires to make a determination about an applicant’s qualifications for admission to the anesthesiology recertification examination no later than March 15 of the examination year. The ABA must receive all the documentation it requires to make a determination about an applicant’s qualifications for admission to a subspecialty recertification examination no later than May 15 of the examination year. Documentation includes but is not limited to verification of current credentialing/hospital privileges. An application will not be accepted if the required documentation is not received by that date. Ultimately, it is the responsibility of every applicant to ensure that the ABA receives all required documentation in a timely manner.

E. Fees

The ABA is a nonprofit organization. Application and examination fees are based on the cost of maintaining the functions of the Board. The Board reserves the right to change fees when necessary. All fees paid to the ABA are nonrefundable.

Anesthesiology recertification. The application fee is $200 for admission to the anesthesiology recertification program. A $500 examination fee is due when candidates accept an anesthesiology recertification examination opportunity.

Subspecialty recertification. The application fee is $250 for admission to a subspecialty recertification program. A $750 examination fee is due when candidates accept a subspecialty recertification examination opportunity. A $200 late fee is due with a subspecialty or subspecialty recertification application received by the ABA after the standard deadline and no later than the late deadline (see Section 5.02).

A $500 charge will be made whenever a check is returned for nonpayment.

F. Examination System

The ABA shall determine that admission to the recertification examination is warranted when required information submitted by and on behalf of the applicant is satisfactory. The ABA will notify an applicant who is accepted as a candidate for recertification after approval of all credentials.
The Board, acting as a committee of the whole, reserves the right not to accept an application. The applicant has the right to seek review of such decision.

The Board reserves the right to correct clerical errors affecting its decisions.

The specialty recertification examination is designed to assess current knowledge of the breadth of anesthesia practice and presents clinically relevant items that apply to all types of anesthesia practice. The subspecialty recertification examinations are designed to test for the presence of knowledge considered essential for the ABA diplomate to function as a practitioner of the subspecialty.

The recertification examinations are administered once each year. The ABA will mail notice to all eligible candidates announcing the location(s) and date of a recertification examination approximately 4 months prior to the date of its scheduled administration.

Duration of candidate status. The duration of candidate status is limited. Every candidate is given one opportunity per calendar year, for 3 years, to satisfy the recertification examination requirement. The candidate must satisfy the examination requirement within 3 years of the date of the first examination that follows acceptance of the application. The ABA will declare the candidate's application void if the candidate does not pass the examination within the prescribed number of opportunities or time, whichever comes first. Physicians whose application has been declared void may reapply to the ABA.

G. Status of Individuals

Inquiries about the current status of physicians should be addressed to the ABA office. For physicians certified by the ABA who subsequently complete the recertification program, the ABA will affirm their diplomate status and the year of their recertification. For others, the response to the inquiry will be in keeping with ABA policy.

H. Reapplication

Physicians, whether previously recertified or not, may apply for recertification at whatever interval they prefer. To reapply, the physician must submit a new application. Such application shall be subject to the fees, rules, privileges, and requirements that apply at the time of reapplication. The applicant who is judged to meet existing requirements will be accepted as a candidate for recertification.

Maintenance of Certification in Anesthesiology Program

The ABA issued diplomates certified on or after January 1, 2000, a certificate that is valid for 10 years. The voluntary recertification program is not open to holders of a time-limited anesthesiology certificate. They must satisfactorily complete the requirements of MOCA before their time-limited certificate expires to maintain diplomate status in the specialty.

MOCA is a 10-year program of ongoing self-assessment and lifelong learning, continual professional standing assessment, periodic practice performance assessments, and an examination of cognitive expertise. Each 10-year MOCA cycle begins the year after certification or the year the diplomate applies for MOCA, whichever occurs later. Therefore, if a diplomate does not register for MOCA before the end of the first calendar year following his or her certification, the diplomate's certification will expire before he or she can complete MOCA.

Physicians should maintain competency in the following general areas: patient care, medical knowledge, practice-based learning and improvement, interpersonal and communication skills, professionalism, and systems-based practice. The MOCA requirements for Professional Standing, Lifelong Learning and Self-Assessment, Cognitive Expertise, and Practice Performance are designed to provide assessments of these six general competencies.

A. Professional Standing Assessment

ABA diplomates must hold an active, unrestricted license to practice medicine in at least one jurisdiction of the United States or Canada. Furthermore, all US and Canadian medical licenses that a diplomate holds must be unrestricted at all times.

The ABA assesses a diplomate's professional standing continually. ABA diplomates have the affirmative obligation to advise the ABA of any and all restrictions placed on any of their medical licenses and to provide the ABA with complete information concerning such restrictions within 60 days after their imposition. Such information shall include, but not be limited to, the identity of the medical board imposing the restriction as well as the restriction's duration, basis, and specific terms and conditions. Diplomates discovered not to have made disclosure may be subject to sanctions on their diplomate status in the primary specialty. Professional standing acceptable to the ABA is a prerequisite qualification for cognitive examination and for maintenance of certification.

B. Practice Performance Assessment

The ABA practice performance assessment process consists of attestations of clinical activity, acceptable clinical practice, and participation in practice improvement activities. The ABA minimum clinical activity requirement is the practice of anesthesiology or a recognized anesthesiology subspecialty, on average, at least 1 day per week during 1 of the previous 3 years.

During the fifth and ninth years of a candidate's 10-year MOCA cycle, the ABA solicits attestations about a diplomate's clinical practice participation in practice improvement activities from individuals identified by the diplomate as being familiar with his or her current practice of the specialty. Attestations of practice performance will be solicited more frequently if an assessment is not acceptable to the ABA.

Practice performance assessments acceptable to the ABA are a prerequisite qualification for cognitive examination and for maintenance of certification.

C. Lifelong Learning and Self-Assessment

ABA diplomates should continually seek to improve the quality of their clinical practice and patient care through self-directed professional development. This should be done through self-assessment and learning opportunities designed to meet the diplomate's needs and the MOCA requirement for Lifelong Learning and Self-Assessment ("LL-SA").

The LL-SA requirement for maintenance of certification is 350 credits for continuing medical education (CME) activities. Of the 350 credit total:

1. At least 250 credits must be Category 1 credits for ACCME-approved programs or activities.
2. At most 100 credits may be for programs and activities for which Category 1 credit is not awarded.

The prerequisite qualification for cognitive examination is at least 200 credits.

Diplomates should complete some LL-SA activity in at least 5 years of each 10-year MOCA cycle. They are encouraged to complete some LL-SA activity in each of the six general competencies for physicians.

MOCA candidates submit their CME activities and credits to the ABA electronically. CME activities are subject to audit and verification by the ABA within 3 years of their submission. Therefore, diplomates must keep documentation of a CME activity for at least 3 years after they submit it to the ABA for LL-SA credit.
D. Cognitive Expertise Assessment
MOCA candidates must demonstrate their cognitive expertise by passing an ABA examination administered via computer under secure, standardized testing conditions. They may take the examination no earlier than the seventh year of their 10-year MOCA cycle.

Examination pre-requisites are:
1. Professional standing acceptable to the ABA.
2. Practice performance assessments acceptable to the ABA.
3. At least 200 LL-SA credits submitted to the ABA prior to the examination year.

MOCA candidates may take the examination at most twice during a calendar year. There is no limit to the number of years they may take the examination.

E. Application Procedure
Application for MOCA must be made electronically via the ABA Web site at www.theABA.org. Exceptions to this requirement will be considered upon written request. Written requests are to be addressed to the ABA Secretary and must include the basis for the requested exception.

The application form includes the identical Acknowledgement and Release statements included in the application for initial certification. The MOCA applicant shall be required to sign each statement by electronic signature.

A diplomate may apply to participate in the MOCA system at any time after the ABA confers primary certification. Diplomates with a time-limited certificate should apply no later than the year after their certificate or their certification status will expire before they complete the MOCA program.

The ABA must receive all required information before a diplomate’s MOCA application is considered complete. This includes, but is not limited to, information on professional activities and medical licensure. The ABA also must receive the application fee. An application will not be accepted if the required information and payment is not received. It is ultimately the responsibility of every registrant to assure that the ABA receives all required information and payments.

F. Fees
The ABA is a nonprofit organization. Application and examination fees are based on the cost of maintaining the functions of the Board. The Board reserves the right to change fees when necessary.

All fees paid to the ABA are nonrefundable.

Application fee. The application fee is $200.
Secure examination fee. The $500 examination fee is due when candidates accept a secure examination opportunity.

A $50 charge will be made whenever a check is returned for nonpayment.

G. Status of Individuals
The ABA reserves to itself exclusively the right to define an individual's relationship to the ABA maintenance of certification system. Information about a physician's ABA certification status may be obtained at no charge via the ABA Online Diplomate Directory at www.theABA.org or by telephoning the ABA office.

There is a $35 charge for written confirmation of a physician's ABA certification status. Inquiries about the current status of individuals should be addressed to the ABA office. In addition to the physician's full name, inquiries should include other identification information if available. The ABA responds to inquiries about current and former diplomates with one of the following statements:
• The physician is certified by the ABA from (date of certification) to (date certification expires).
• The physician was certified by the ABA from (date of certification) to (date certification expired).

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Colon and Rectal Surgery [ABCRS] to ascertain whether the information below is current.)

Qualifications of Candidates
All candidates shall comply with the following regulations:

General Requirements
1. A candidate shall appear personally before the Board and shall submit to the required examinations.
2. A candidate shall limit the majority of his/her practice to colon and rectal surgery.
3. A candidate may be required to deliver to the Board sufficient case reports to demonstrate proficiency in colon and rectal surgery.
4. A bibliography of papers and books published by the candidate shall be submitted to the Board upon its request.
5. The moral and ethical fitness of a candidate must be satisfactory to the Board and in conformity with the Statements on Principles of the American College of Surgeons and the Principles of Medical Ethics of the American Medical Association. Practices not conforming therewith may result in rejection of an application or in deferral of examination until such matters have been resolved.

Professional Qualifications
1. A candidate must have completed an accredited residency program in colon and rectal surgery following successful completion of general surgical training in an ACGME-accredited residency program.
2. All candidates must have a currently valid registered, full, and unrestricted license to practice medicine in a state, territory, or possession of the United States or in a Canadian province and must continue to be licensed throughout the certification process.
3. A candidate must successfully complete the Qualifying Examination of the American Board of Surgery before being admitted to the ABCRS Written Examination (Part I).

4. A candidate must achieve certification by the American Board of Surgery before being admitted to the ABCRS Oral Examination (Part II).

**Application for Examination**

Each candidate for examination must complete and submit an Application for Examination, which may be obtained from the secretary of the Board. Applications must be submitted by July 15 of each year. The application must be accompanied by two recent photographs of the applicant and the required application fee.

All applicants must submit a list of all operative procedures performed during their training period. The ABCRS has adopted a policy that beginning with the 2005-2006 residency year, all resident case log reporting will be completed using the ACGME electronic software program. Details specific to colon and rectal surgery can be found on the ACGME Web site (www.acgme.org).

The acceptability of a candidate for examination depends not only upon completion of the requirements listed under “Qualifications for Candidates” but also upon information available to the Board regarding the candidate’s professional maturity, surgical judgment, and technical competence.

**Examinations**

To achieve certification by the ABCRS, a candidate must pass a Written Examination (Part I) and an Oral Examination (Part II). The Written Examination is offered in the spring of the year, and a candidate is required to pass this examination before being permitted to take the Oral Examination, which is given in the fall of the year. Examinations are conducted at times and places determined by the Board, and this information may be obtained from the Board office. It is also published in Diseases of the Colon and Rectum and in the Journal of the American Medical Association. Examinations will be held in one designated city in the United States.

**Part I—Written Examination**

The Written Examination is an assessment of a candidate’s knowledge of the theory and practice of colon and rectal surgery, with a separate Visual Diagnostic examination. The written portion of the examination is a 4-hour test of multiple-choice questions covering the spectrum of colon and rectal surgery and the body of basic science pertinent to it. The Visual Diagnostic portion is a 2-hour test consisting of questions and slide presentations.

**Part II—Oral Examination**

The Oral Examination is conducted by members of the Board or its designated examiners. Its objective is to evaluate the candidate’s clinical experience, problem-solving ability, and surgical judgment and to ascertain the candidate’s knowledge of current literature on colon and rectal diseases and surgery. Each candidate will undergo at least three 30-minute oral examinations by three 2-member examining teams.

**Examination Results**

The Board makes every effort to be as prompt as possible in notifying candidates of their examination results, and letters of notification may be expected within 4 to 6 weeks following the examination.

**Reexaminations**

A candidate who has failed either the written or oral part of the examination may be reexamined after 1 year has elapsed.

A candidate who fails to pass either the written or oral portion of the examination may repeat that part of the examination twice, thus offering the candidate three opportunities to pass each part of the examination.

A candidate who fails to pass either the written or oral portion of the examination three times may not repeat the examination without satisfactory completion of an approved remedial colon and rectal surgery residency program and submission of a new application for examination. A copy of the Remedial Training Guidelines may be obtained from the Board office upon request.

**Status of Applicant**

The Board does not use or sanction the terms “Board eligible” or “Board qualified.” The status of an applicant with the Board is determined by and varies with the current status of his/her credentials.

A candidate must apply to the Board’s certification process within 5 years after completion of approved colon and rectal surgery training.

Candidates who apply after the prescribed 5-year period (late applicants) must observe the Board’s special reentry policy. The requirements include submission of updated background and training information, a current list of operative procedures, documentation of 100 Category 1 CME credit hours (2 years prior to the application date), and a $350 processing fee (in addition to the standard application fees). Late candidates will undergo a database search by the Federation of State Medical Boards (FSMB) to ensure no restrictions are pending against their license. Also, verification from the chief of surgery from their institution/hospital will be requested attesting to the ethical/moral standing of the applicant. Pending approval of these requirements, the applicant may submit the standard Application for Examination (along with the required fees) to the Board. Complete details may be obtained by writing the Board office.

The entire certification process with the Board must be successfully completed within 7 years following approval of the formal application. In addition, a candidate whose application for examination has been approved but who does not take the examination within 3 years must submit a new application.

In exceptional or unusual circumstances, the Board may, at its discretion, waive one or more of the limitations specified under “Status of Applicant.”

**Fees**

Application fee: A nonrefundable fee of $400 shall accompany the application.

Written Examination fee (Part I): A fee of $500 is due and payable when the candidate is notified of approval to take the Written Examination.

Oral Examination fee (Part II): A fee of $700 is due and payable when the candidate is notified of approval to take the Oral Examination.

Reexamination fee: Fees for reexamination are the same as shown above for each examination.

Withdrawal from examination: A candidate who withdraws must notify the Board office at least 10 business days before a scheduled examination. A candidate who fails to appear for examination or who withdraws without giving at least 10 days’ notice as defined above will forfeit $200 of the designated examination fee and will have to resubmit the forfeited amount before being admitted to the next scheduled examination.
Late applications: Recognizing that a situation may arise that prevents an applicant from meeting the July 15 deadline; the Board has a provision for late applications. Late applications are those that are postmarked from July 16 through August 15 each year. There is a nonrefundable late application fee of $200, bringing the total processing fee for a late application to $600. No applications postmarked after August 15 will be accepted.

Fees are subject to change as directed by the Board.

Reconsideration and Appeals
The Board has adopted a policy with regard to reconsideration and appeals of decisions adverse to applicants. A request for reconsideration, which is the first step, must be made in writing and received by the Board office within 60 days of the date of notice from the Board of the action in question. A copy of the Reconsideration and Appeals Policy may be obtained from the Board office upon request.

Certification
A candidate who has met all the requirements and successfully completed the examinations of the ABCRS will be issued a certificate attesting to his/her qualifications in colon and rectal surgery. The certificate shall be signed by the president or vice president and the secretary and shall bear the corporate seal of the Board.

The certificate granted by the Board does not confer privilege or license to practice colon and rectal surgery but is evidence that a physician's qualifications for specialty practice are recognized by his/her peers. It is not intended to define the requirements for membership on hospital staffs, to gain special recognition or privileges for its diplomates, to define the scope of specialty practice, or to state who may or may not engage in the practice of the specialty.

Unless the candidate specifies otherwise, the Board forwards the names of candidates who have achieved certification to the American Board of Medical Specialties (ABMS) for publication in the Official ABMS Directory of Board Certified Medical Specialists, published jointly by the ABMS and Elsevier Science.

Time-Limited Certification
Beginning with those candidates who passed the certifying examination in 1990 and thereafter, the ABCRS will issue time-limited certificates. Certificates will be valid for 10 years from the date of certification, after which the certificates will no longer be valid.

[Note: Time-limited certification will not affect diplomates holding certificates issued prior to 1990.]

Maintenance of Certification (MOC)
The ABCRS offers Maintenance of Certification in the specialty. Certificates can be renewed prior to expiration by fulfilling the requirements for Maintenance of Certification specified by the Board. The examination is offered annually, on a voluntary basis, to all certified colon and rectal surgeons who apply and meet the Board's requirements. An information booklet, which outlines the MOC requirements and procedures, is available by writing the Board office.

Revocation of Certificates
The filing of an application for examination, participating in examination, and accepting a certificate are voluntary acts. Therefore, the Board assumes no responsibility for any effects that certification or failure to obtain certification may have on the private or professional activities of candidates.

When an application is submitted, candidates are required to sign an agreement, a portion of which reads as follows: "I agree to disqualification from examination or from the issuance of a certificate, and I agree to the forfeiture and redelivery of such certificate in the event that any of the statements herein made by me at this time or at any time in the past or future in regard to my application for a certificate are false or in the event that any of the rules and regulations of the Board governing such examinations and certificate are violated by me."

Certificates that have been issued are subject to the provisions of the Articles of Incorporation and the Constitution and Bylaws of the American Board of Colon and Rectal Surgery, Inc, and may be revoked for violation of any of these provisions.

Examination of Candidates With Disabilities
The ABCRS supports the intent of the Americans with Disabilities Act. The Board will make a reasonable effort to provide Board applicants who have documented disabilities with modifications in its examination process that are appropriate for such disabilities but that do not alter the measurement of the skills or knowledge that the examination process is intended to test.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Dermatology (ABD) to ascertain whether the information below is current.)

Requirements for Eligibility to Take the Examination
Each applicant must satisfy the following requirements before he/she is eligible to take the certifying examination of the Board.

General Qualifications
1. The candidate must have graduated from a medical school in the United States accredited by the Liaison Committee for Medical Education (LCME), an accredited medical school in Canada, or an accredited osteopathic school in the United States; if a graduate of a foreign medical school, the candidate must possess the standard certificate of the Educational Commission for Foreign Medical Graduates (ECFMG). If, however, the foreign medical school graduate is in training in an accredited program in Canada, the Board will recognize the certificate of the Medical Council of Canada.

2. The candidate must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in the state or province of his or her residence in either the United States or Canada. The candidate may be denied certification if his or her license has been revoked, suspended, restricted, or surrendered in any jurisdiction or if the candidate is subject to adverse licensure proceedings.

3. The candidate must not have engaged in conduct that, in the judgment of the Board, (i) reflects unprofessional activity relating to the practice of medicine, or (ii) casts significant doubt on the ability of the candidate to practice dermatology in the best interests of patients.

Residency Training Requirements
1. Candidates for certification by the ABD are required to have a total of 4 years of postgraduate training, as described below in Sections (a) and (b).

   a. The first year must consist of clinical training in one of the following types of broad-based programs in the United States accredited by the Accreditation Council for Graduate Medical Education (ACGME) or a similar program in Canada accredited by the Royal College of Physicians and Surgeons of Canada (RCPSC): transitional year (formerly called flexible first postgraduate year) or a first-year residency in emergency medicine, family practice, general surgery, internal medicine, obstetrics and gynecology, or pediatrics.

   b. Three years of full-time training as a resident in a dermatology residency training program in the United States accredited by the ACGME or 3 years of full-time training as a resident in a dermatology residency training program in Canada accredited by the RCPSC: Accreditation of dermatology training programs in the United States is the responsibility of the Residency Review Committee (RRC) for Dermatology acting with authority delegated to it by the ACGME (accredited dermatology residency training programs and clinical programs for first postgraduate year credit are listed in this Directory).

   c. The resident's time throughout each year (PGY2 - PGY4) must be related to direct care of outpatients and inpatients (to include clinical conferences and didactic lectures related to patient care, consultations, inpatient rounds, dermatologic surgery, dermatopathology, and other subspecialty rotations concerning dermatology).

   Dermatopathology, microbiology, and other basic science lectures, seminars, and conferences are essential components of the resident's training (see the Program Requirements for Residency Education in Dermatology).

   The Board also emphasizes the importance of basic and clinical investigation in the educational experience of trainees. Accordingly, all residents should participate in basic and/or clinical research during their training. Individual programs may permit elective time, not to exceed 3 months per 3-year period. Residency training requirements for individuals enrolled in an Investigative/Academic Training Track are discussed below.

   d. For those candidates whose career plans involve a primary commitment to investigative or academic dermatology, an Investigative/Academic Training Track, which must assure adequate clinical education and experience in accordance with the general requirements described above, may also be acceptable. Program directors should contact the executive director of the Board for information concerning this special track, such as eligibility requirements and when and how to submit applications to the Board. The essential elements of such training tracks are as follows:

      1) Training experiences for individuals in the Investigative/Academic Training Track must be candidate-specific (i.e., not a program-specific pathway).

      2) The first year (PGY2) of this track must be 100% clinical in character.

      3) Investigative or academic experience can be integrated with the required clinical training during the second (PGY3), third (PGY4) and/or fourth (PGY5) years. In this track (i.e., the Investigative/Academic Training Track), residents must satisfy a requirement for 225% direct patient
care time (as defined by 100% clinical training in the first [PGY2] year and the balance of 125% clinical training apportioned over the second [PGY3], third [PGY4], and/or fourth [PGY5] years of this track). In addition, the Investigative/Academic Track must include the equivalent of a one-half day clinic per week each year until the 225% requirement is met. Continuity of patient care should be stressed as much as possible in this clinic experience. Rotations on the consultation service, for a period comparable to the time similarly scheduled for general dermatology residents, may be substituted for the clinic time during the special training track years of the residency.

4) Requests for approval of this Investigative/Academic Training Track must be submitted prospectively, at least 4 months prior to the beginning of such training. This will be on or before March 1 of the PGY2 year for a special track beginning on July 1 of the PGY3 year, or later if special track training is to begin later. Requests earlier than January 1 of the PGY2 year will not be considered because the program director must have had an opportunity to judge the clinical potential of the trainee.

The request for consideration of this Investigative/Academic Training Track must include details of the scheduled program and time commitments during the entire training period for these candidates. It is incumbent upon program directors to select candidates for this special training track whose skills and learning capabilities permit the acquisition of clinical competence as well as the execution of their investigative or academic responsibilities. Moreover, the program director must monitor the training of these residents throughout their residency and must validate their clinical experience at the completion of their residencies.

2. A preliminary registration form must be filed by the candidate and signed by his/her training director shortly after the resident begins residency training in dermatology (i.e., by August 1 or within 30 days of the start of training).

3. It is mandatory that the training director submit a yearly report form for each resident to the Board office by August 1 after completion of the first and second year of training and by May 15 for residents who will complete their third year of training on June 30. Tabulation of Experience in Dermatologic Surgery forms are required from residents in their final year of training. In order for a candidate to take the certifying examination, the training director must certify that each year of training was completed in a satisfactory manner.

4. Training must be completed within 5 years after the beginning of dermatology residency, except when military service or other compelling circumstances intervene.

5. It is the responsibility of the residency program director to determine if a resident has satisfactorily completed the required 3 years of dermatology training and is therefore eligible to sit for the certifying examination of the ABD.

Guidelines for Determining Adequacy of Clinical Training

The following guidelines are designed to assist program directors in their determination of the adequacy of the clinical training of residents and to assure satisfaction of the eligibility requirements for certification by the ABD. Of special concern are those residents on the special investigative/academic track or those residents whose training experience differs from the standard 36 months of full-time clinical training, as approved for each program by the RRC of the ACGME:

a. In general, high priority should be given to completing 36 continuous months of full-time dermatology training. For most residents, this will consist of full-time clinical training; for residents with a primary commitment to investigative or academic dermatology, this may be a special training track, as defined previously.

b. Any departure from (a), as required, for example, for a medical leave of absence, should be documented and fully justified in the resident evaluation forms filed annually with the Board by the training program director.

c. An absence exceeding 6 weeks in any 1 academic year or a total of 14 weeks over 3 years, including vacation, should be approved only under truly exceptional circumstances. In addition, any resident approved to sit for the certifying examination despite such an absence should have completed each year of training in an above-average or excellent manner.

d. Any resident who will have been absent more than 6 weeks in 1 year or 14 weeks over 3 years and whose performance has not been uniformly above average or excellent throughout residency training should be required to complete an additional period of training at least equal in length to the total period of absence in excess of routinely provided total vacation time. If the program director anticipates that this additional training will be completed in a satisfactory manner before August 1, the director may approve the resident to sit for the certifying examination in that year, just as if training had been completed by July 1.

In-Training Examination

An in-training examination (ITE) is administered annually online in April (usually the third Thursday in April) to dermatology residents. The intent of the ITE is to identify knowledge-based strengths and weaknesses in both the training program and the residents in a non-punitive manner. Although participation in the in-training examination program is voluntary, most training programs participate annually because both training directors and residents find the ITE to be a valuable educational experience. The format of the ITE includes only the types of multiple-choice questions that appear on the certifying examination, i.e., one best answer, matching, and identification of images.

The examination is a 4-hour Web-based proctored examination administered through the individual dermatology residency training programs. Contact the Board office for the optimal computer requirements.

In 2006, the In-Training Examination will be given on Thursday, April 6. Applications are mailed to training programs in December and the deadline for returning the applications to the Board office is February 1. Results will be sent to individual residents as well as to training directors.

Registration for the Examination of the Board

Candidates who have completed the training requirements as outlined above are eligible to apply for examination by the Board. Candidates should request an Application for Certification Form from the office of the executive director of the Board. However, for those candidates who are completing their residency training, application forms will be sent to the program directors for distribution to each candidate. The completed application must be filed with the Board office before March 1 of the year in which the candidate plans to take the examination. Physicians who complete their residency training in dermatology by July 1 of a given year are eligible to apply to take the examination in August of that year. Under the special conditions described previously ("Guidelines for Determining Adequacy of Clinical Training"), candidates completing additional (make-up) training before September 1 may also be eligible to take the certifying examination. It is emphasized that it is the candidate's responsibility to send a completed application form to the Board if he/she plans to take the certifying examination of the Board.

American Board of Dermatology

Graduate Medical Education Directory 2006-2007 857
A candidate is not considered an "active" candidate until his/her application has been received and approved by the Board. This approval includes a review of the application and annual evaluation reports from the candidate's training director. After the application is approved, the candidate is required to take the examination within 2 years. Candidates who do not exercise the examination privilege within 2 years of the date they are declared eligible will be required to file a new application and have their eligibility for examination reviewed by the Requirements Committee. If the re-application is approved by the Board, the candidate is again eligible to take the examination for another 5-year period. It should be noted that candidates who have had an extended lapse in clinical practice or in other activities related to dermatology may be required to submit evidence of their continued involvement with the specialty of dermatology. Alternatively, it may be necessary for such individuals to spend at least 1 year in clinical practice or with an academic department in order to become eligible for the certification examination.

The Board does not use the term "Board eligible" in corresponding with directors of hospitals or others who send inquiries to the Board office. On written request by a candidate and payment of a fee, the Board will send to the candidate a letter stating his/her status with the Board at any given time.

Combined Training in Dermatology and Internal Medicine

The ABD and the American Board of Internal Medicine have jointly approved the Guidelines for Combined Training in Dermatology and Internal Medicine, copies of which may be obtained from the Board office or downloaded from the ABD Web site (www.abderm.org).

Program directors interested in establishing a combined training program should write to the Board office for application forms, which must be reviewed and approved by the ABD and the American Board of Internal Medicine. Application forms may also be downloaded from the ABD Web site (www.abderm.org).

Combined Training in Dermatology and Pediatrics

The ABD and the American Board of Pediatrics have jointly approved the Guidelines for Combined Training in Dermatology and Pediatrics, copies of which may be obtained from the Board office or downloaded from the ABD Web site (www.abderm.org).

Program directors interested in establishing a combined training program should write to the Board office for application forms, which must be reviewed and approved by the ABD and the American Board of Pediatrics. Application forms may also be downloaded from the ABD Web site (www.abderm.org).

Board Examination

The certifying examination in dermatology, which is administered over a period of 2 days, includes the following:

1. Comprehensive Multiple-Choice Examination in Dermatology (Part I): This is a 3-hour comprehensive examination, and was formerly referred to as the Written examination. It tests the candidate's knowledge of the basic science and clinical aspects of dermatology, including all the related disciplines. Among the topics included in this part of the examination are clinical dermatology, pediatric dermatology, preventive dermatology, entomology, epidemiology, dermatopathology, cutaneous allergy and immunology, dermatologic surgery, cutaneous oncology, sexually transmitted diseases, internal medicine as it pertains to dermatology, medical ethics, photobiology, and cutaneous microbiology, as well as anatomy, physiology, biochemistry, molecular biology, radiation physics, radiation therapy, physical therapy, pharmacology, genetics, and electron microscopy as related to dermatology. Considerable emphasis is placed on comprehensive knowledge of the literature.

2. Examination in Clinical and Laboratory Dermatology (Part II A): Projected images are utilized in this part of the examination. Candidates must answer multiple-choice-type questions about the projected pictorial material, which is drawn from all areas of clinical and laboratory dermatology. Examples of the types of slides used include photographs of patients; diagrams and illustrative drawings and pictures of dermatologic surgical procedures (including Mohs micrographic surgery, hair transplantation, dermabrasion, sclerotherapy, liposuction, chemical peels, and tissue augmentation); histopathologic sections, fungal cultures, culture mounts, bacterial cultures, TruNck preparations, skin scrapings and smears, reagents, photomicrographs, histochemical and fluorescent photomicrographs, electron micrographs, darkfield micrographs, and drawings or photographs of organisms, including viruses, rickettsiae, bacteria, and parasites that affect the skin.

3. Examination in Dermatologic Surgery (Part II B): Projected images are utilized in this part of the examination. Candidates must answer multiple-choice-type questions about the projected pictorial material covering dermatologic surgical areas including, but not limited to, Mohs micrographic surgery, hair transplantation, dermabrasion, sclerotherapy, liposuction, chemical peels, tissue augmentation, and anatomy as it relates to dermatologic surgery.

4. Examination in Dermatopathology (Part III C): In this section, candidates are questioned on histopathologic slides that they examine microscopically on microscopes provided by the Board. This section of the examination encompasses the entire spectrum of dermatopathology.

For the purposes of scoring, the Part IIA and Part IIB examinations are combined with the Part IIC examination; candidates must pass this combined Part II examination as well as the Part I examination in order to be certified. If a candidate fails either the Part I or Part II examination, only the failed component must be repeated.

Upon completion of the certifying examination, candidates will receive a letter notifying them whether they passed or failed. A pass/fail notification letter will also be sent to the candidate's training director.

The examination is given annually over a 2-day period and lasts a total of approximately 10 hours. In 2006, it will be held on August 12 and 13 at the Holiday Inn O'Hare in Rosemont, Illinois.

Irregular Behavior

Irregular behavior that is observed by a proctor during an examination, that is made apparent by statistical analysis, or is shown by other means, may lead to ineligibility for certification or other sanctions, including invalidation of your examination. A candidate found to have engaged in cheating or irregular behavior may be barred from retaking the examination in the future for a period determined by the Board in its sole discretion. The materials comprising all examinations are confidential and are the sole property of the American Board of Dermatology. Any unauthorized reproduction, distribution, or use of any of these materials is prohibited.

Reexamination

With their initial examination application, candidates have a 2-year period during which they may take the examination or any necessary reexamination on either a failed part (see above) or both parts of the examination. For a reexamination, they must notify the Board office by March 1 of the year they plan to retake the examination. If a candidate has not passed or does not take the
examination during this 2-year period, he/she must reapply and complete the necessary forms, after which he/she will have another 2-year period of eligibility during which to take the examination or reexamination. For further information concerning this as well as the appropriate fees required, the Board office should be contacted.

Candidates With Disabilities

The ABD supports the intent of the Americans with Disabilities Act (ADA) and, therefore, will provide or allow the use of necessary auxiliary aids, services, or testing conditions that do not fundamentally alter the measurement of the skills or knowledge the Board assessment program is intended to test. In order to implement this policy, notification of the need for special testing circumstances must be given to the ABD by a candidate for certification at the time that he/she submits the application for any of the Board's certifying examinations. This deadline is necessary in order to allow the Board to request the necessary documentation, to review the records, and to verify the disability, if necessary. In addition, since this policy also applies to the In-Training Examination, which is under the jurisdiction of the ABD, appropriate advance notification of the need for special testing circumstances must be provided when the application for the In-Training Examination is submitted by the department.

Upon receipt of such request, the ABD will initiate the appropriate procedural steps, but it should be understood that all special arrangements must be made and agreed upon in advance; special arrangements cannot be made at the time the examination is given. Therefore, early notification of the need for special testing circumstances is encouraged.

Chemical Dependency or Substance Abuse

A candidate with a chemical dependency or substance abuse problem will not be permitted to take the examination unless he/she can submit evidence, which must be verifiable, that the disorder is being treated and is under control. Individuals with such problems or a history thereof must provide the necessary documentation at the time of application to take the examination. A confirmatory letter from a licensed physician within 1 month of the examination stating that the disorder no longer exists or is currently controlled is also necessary.

Certification

After meeting the above requirements and passing the examination, the candidate will be awarded a certificate that acknowledges that he/she has completed the required course of graduate study and clinical training, has met other specific standards and qualifications, and has passed the examination conducted by the Board. The candidate is then referred to as a diplomate of the American Board of Dermatology, Inc. The names of diplomates of the Board appear in The Official ABMS Directory of Board Certified Medical Specialists, published by Elsevier Science in cooperation with the American Board of Medical Specialties (ABMS). The certificate is issued for a 10-year period. Renewal is subject to completion of Maintenance of Certification requirements.

Each certificate is subject to revocation in the event that (a) the diplomate was not eligible to receive the certificate, whether or not the facts concerning ineligibility were known to the Board when the certificate was issued; (b) the diplomate has made any material misrepresentation or omission in the application for certification or in any other statement to the Board or has failed in timely fashion to supplement any response to any question on any application for certification or recertification with respect to criminal conduct, loss or suspension of a medical license, medical staff privileges, or medical society membership; (c) the diplomate is convicted of or pleads nolo contendere to a crime that, in the judgment of the Board, relates to the practice of medicine; (d) the diplomate is found to have engaged in conduct which, in the judgment of the Board, (i) reflects unethical activity relating to the practice of medicine, or (ii) casts significant doubt on the ability of the diplomate to practice medicine in the best interests of patients; or (e) the diplomate is found by the Board to have (i) engaged in irregular behavior in connection with the examination, (ii) had a license to practice medicine revoked or suspended, (iii) been expelled from a medical society for reasons other than nonpayment of dues or failure to attend meetings, (iv) has had medical staff privileges revoked or suspended for reasons relating to the practice of medicine, (v) taken other action reasonably deemed by the Board to be inconsistent with diplomate status, or (vi) willfully and materially violated any rule or policy of the Board.

Review of Adverse Decisions

The ABD recognizes a candidate's right of appeal following an adverse action at any stage of the certification process. Within the residency program, trainees must be accorded due process in compliance with provisions established by the parent institution and as stipulated in the Essentials of Accredited Residencies in Graduate Medical Education (July 1, 1982) of the ACGME.

Any candidate for certification (primary specialty or subspecialty) or recertification shall be given prompt written notice of any adverse decision by the Board. Such notice shall briefly state the reason for the adverse decision. It shall advise whether or not the candidate has a right to appeal the decision and shall include a copy of this document.

A candidate found to have engaged in cheating or other irregular behavior in connection with an examination may appeal the Board's finding, any consequent invalidation of the candidate's examination, and any disbarment from future examinations. Such appeal must be received in the Board office within 30 days of mailing the notification of the finding by the Board.

A. Appealable Decisions

1. Request for Appeal

Any physician (a) whose credentials for eligibility to sit for an ABD examination have not been approved, or (b) who has been denied certification for a reason other than receipt of a failing grade on the examination, or (c) whose certification or recertification has been revoked, or (d) whose application for reinstatement has been denied, shall have a right to appeal the adverse decision by submitting a written request for appeal in compliance with this policy on Review of Adverse Decisions.

Such request must contain a concise statement of why the physician believes that the adverse decision was improper. It shall include any supporting material that the physician wishes to have considered, and must be received in the Office of the Board within 30 days after the date of the Board's notice of an adverse decision. The request may also include a request for a hearing. If a proper request for appeal is not received within 30 days, the adverse decision shall constitute the final decision of the Board.

2. Review by Appeals Committee

Each proper and timely request for appeal will be reviewed by an Appeals Committee consisting of three individuals appointed by the President. No member of the Appeals Committee shall have participated in the adverse decision under review unless that decision was made by the full Board of Directors. The Appeals Committee, after reviewing the request for appeal, shall either (a) affirm, reverse, or modify the adverse decision or (b) grant a hearing if one has been requested and the Committee determines that a hearing might be useful.
If the Appeals Committee determines that a hearing might be useful, it shall schedule a hearing within 60 days after that determination. Not less than 30 days prior to the scheduled date of the hearing, the Appeals Committee shall notify the physician in writing of the date, time, and place of the hearing. The Appeals Committee, at its sole discretion, may determine whether legal counsel for the physician may be present at the hearing and the extent to which such counsel may participate.

The physician’s written intent to appear at the hearing must be received in the Office of the Board not later than 14 days before the scheduled date of the hearing. A physician who chooses to appear shall be given the opportunity to make a statement summarizing his/her position. The Appeals Committee shall not be bound by technical rules of evidence usually employed in legal proceedings, but may consider any evidence it deems appropriate. A record of the proceedings shall be kept. A copy of the hearing record shall be made available to the physician upon payment of the cost of reproduction. All expenses incurred by the physician in connection with the hearing shall be borne by the physician.

Following the hearing, the Appeals Committee shall determine whether to affirm, reverse, or modify the adverse decision. The physician shall be promptly notified in writing of the action of the Appeals Committee and the reason for the action. The Committee’s action in affirming, reversing, or modifying the adverse decision shall be subject only to ratification by the Board of Directors.

3. Review by the Board of Directors
The action of the Appeals Committee shall be reviewed no later than the next regularly scheduled meeting of the Board of Directors. The Board of Directors shall ratify the action of the Appeals Committee unless it finds that action to have been arbitrary, unreasonable, or not sustained by the record. The physician shall be promptly notified of the Board’s decision. The decision of the Board of Directors shall constitute the final action of the Board on the matter.

B. Nonappealable Decisions
1. Decisions by Residency Program or Program Director
Decisions by a physician’s residency program, program director, or sponsoring institution regarding credit for training or any other matter shall not be appealable to the Board. Any disagreement by a physician with such decisions should be communicated to the residency program, program director, or sponsoring institution. The Board will not second-guess judgments of these entities. However, the physician may contact the Board to determine what further steps, if any, may be available.

2. Decisions Based on Failure of the Certifying Examination
Adverse decisions based on a physician’s receipt of a failing grade on an ABD examination shall not be appealable. Instead, the physician may, within 30 days after the mailing of the examination results, request rescoring of the examination by hand. Such request must be accompanied by payment of a fee of $35. Upon receipt of a proper and timely request for rescoring, the Board shall have the examination rescoring by hand. It shall communicate the rescoring results to the physician promptly after receiving those results.

Reapplication After Revocation of Certification or Recertification
A physician whose certification or recertification has been revoked may apply for reinstatement as a diplomate when the physician believes that the circumstances underlying the Board’s action have been satisfactorily resolved. The physician shall apply by providing a written statement setting forth in detail the changes in circumstances. The Board shall consider such statement and determine whether to reinstate the physician’s certification or recertification. The physician shall be promptly notified of the Board’s decision.

Maintenance of Certification/Recertification
The Board began issuing time-limited certificiates, valid for 10 years, in 1991, and its process of voluntary recertification was approved by the ABMS in 1984. The Recertification examination was first administered in 1996.

The American Board of Medical Specialties (ABMS) has recently introduced the concept of Maintenance of Certification, a program of continuous professional development that is intended to replace the current process of recertification. Maintenance of certification is an ongoing process through which a diplomate’s credentials, licensure, and professional standing are verified and his or her knowledge are evaluated. In the future, when reliable methods are available, practice performance will be evaluated as well. The maintenance of certification process is composed of four components:

1. Evidence of professional standing
2. Evidence of commitment to lifelong learning and periodic self-assessment
3. Evidence of cognitive expertise
4. Evaluation of performance in practice

The ABD is committed to the gradual conversion of its current process of recertification to a process of maintenance of certification that is consistent with guidelines established by the ABMS and with the distinctive nature and elements of the specialty of dermatology. In so doing, the Board will strive to plan and implement maintenance of certification as a fair and credible process that will withstand public and professional scrutiny, will be properly considerate of the concerns and responsibilities of its diplomates, and will preserve the high standards of the specialty of dermatology. As the various phases of the maintenance of certification process are being developed and put into place, diplomates will be informed in newsletters and other communications.

Requirements For Qualification
At present, the requirements for qualification for Components 1 (Evidence of Professional Standing) and 3 (Evidence of Cognitive Expertise) have been defined and are listed below. The resources of the American Academy of Dermatology and other dermatological organizations will be utilized to ensure adequate opportunities for diplomates to satisfy the requirements of Component 2 (Commitment to Lifelong-Learning and Periodic Self-Assessment). The implementation of Component 4 (Evaluation of Performance in Practice) is currently under evaluation and development.

Component 1: Evidence of Professional Standing
- Valid time-limited or lifetime certification in dermatology from the ABD.
- Currently valid, full, and unrestricted license to practice medicine or osteopathy in the candidate’s state or province of residence in the United States or Canada.
- Listing of other current or past state licenses.
- Past or present restrictions, modifications, or suspensions of any state license.
- Letter(s) verifying hospital privileges from the chief of the department/staff at each hospital where privileges are granted, if applicable.
- Letter(s) from local medical society, hospital chief of staff, personal physician, comparable professional society, or ABD-certified dermatologist attesting to the candidate’s moral and ethical character and lack of drug dependency.
Component 2: Commitment to Lifelong Learning and Periodic Self-Assessment
- 90 hours of documented Category I CME credit are required in the 3 years preceding the date of the application for recertification but including also the first 3 months of the year of administration of the recertification examination. This CME should be acquired in educational programs that are related to dermatology, such as, but not limited to, those that would be approved by the AAD for its CME award.

Component 3: Cognitive Expertise
- Successful completion of an examination. The current examination is a clinically focused, take-home, open-book examination that is administered online annually. This component will likely change to a secure closed-book examination in future years.
- The examination is clinically focused and is tailored to the candidate's practice profile through selection of applicable examination modules. In addition to the required General Dermatology module, the candidate must select an elective module from one of the four listed below. In other words, the recertification examination consists of the successful completion of two modules (one required and one elective):
  1. General Dermatology (required)
  2. Medical Dermatology (elective)
  3. Dermatopathology (elective)
  4. Dermatologic Surgery (elective)
  5. Pediatric Dermatology (elective)
- Candidates may choose to take additional elective modules for self-assessment for an additional fee.
- The ABD will modify the recertification examination in the future as required in order to conform to the standards of the maintenance of certification process and to permit the equitable and effective evaluation of its diplomates.

Component 4: Evaluation of Practice Performance
- Development in process.

Deadline for receipt of applications for the recertification examination is December 15. Requests for applications should be directed to the office of the ABD. Applications may also be downloaded from the Board's Web site (www.abderm.org). The examination will be available to approved candidates from May 1 to June 15, 2006. Notification of performance on the examination and other pertinent related information will be mailed to the candidates approximately 8-10 weeks later. Diplomates with time-limited certificates may apply to take the recertification examination any year in which it is offered. However, for formal (official) completion of the recertification process, candidates must pass either of the two recertification examinations that immediately precede the expiration of their time-limited certificate. In other words, a diplomate will only be granted a new 10-year certificate after passing the recertification examination in year 8, 9, or 10 of his/her 10-year cycle.

Diplomates with lifetime certification may elect to pursue voluntary recertification in any year the examination is offered. Any questions or correspondence relating to the recertification process should be directed to the executive director of the ABD.

Alternate Pathway
Diplomates who require a proctored recertification examination to satisfy state medical licensure requirements may elect to take the Part II A/B portion of the certifying examination of the Board administered in August each year. Contact the Board office for further details.

Certificate and CME Award
After meeting the requirements stated above and passing the examination, the candidate will be awarded a certificate acknowledging that he or she has met specific standards and qualifications and has passed the examination conducted by the Board. Candidates are responsible for contacting the AAD or American Medical Association for information about CME credit.

Expiration of Certificate
If the candidate does not successfully complete the recertification process prior to expiration of his/her time-limited certificate, he/she will remain eligible to participate in the recertification process but will cease to be Board-certified until the process is successfully completed and a new time-limited certificate is issued. If the candidate successfully completes the recertification process before expiration of his/her certificate, eg, in years 8, 9, or 10 of the 10-year certificate, the new certificate will be issued for 10 years commencing January 1 of the year immediately following the expiration date of the prior certificate.

Should a diplomate with a time-limited certificate not be recertified by the end of the tenth year, the certificate will expire and the physician will lose diplomate status. Once the certificate has expired, the physician may not represent himself/herself to the profession or the public as being certified until successfully recertified by the ABD. The physician may reapply for a future recertification examination, but must meet all the criteria in effect at that time.

Diplomates who require a proctored recertification examination to satisfy state medical licensure requirements may elect to take the Part II A portion of the certifying examination of the Board. Contact the Board office for further details.

Military waiver: Military personnel with time-limited certificates who are serving overseas and unable to complete the maintenance of certification process before expiration of their certificate will receive an extension and be allowed to take the examination at the next available opportunity upon their return from overseas duty.

Fees for Examination and Reexamination
The directors of the Board serve without compensation. Fees are based on the actual expenses incurred in administration of the Board office and related activities and on the costs of development and administration of the Board examinations. For current applicable fees, contact the Board office or go to the Web site (www.abderm.org).

All fees are payable when the application for an examination is submitted and are applied to the first examination of that type given after approval of the application. Except as indicated below, or because of verifiable extenuating circumstances, there will be no refunds of any of these fees. Contact the Board office for the current fee schedule.

All checks are to be made payable to The American Board of Dermatology, Inc.

When a candidate's application for the certifying examination in dermatology or a subspecialty certification examination is disapproved, the Board retains an administrative fee of $100 and will refund the balance to the candidate.

If a candidate withdraws within 10 days of the examination or fails to appear for the examination and does not provide verifiable evidence of extenuating circumstances that prevented him or her from appearing for the examination, the Board will retain the entire examination fee. On reapplying, such candidates will be
required to again submit the examination fee in effect at the time of the application.

Candidates who fail the certifying examination in dermatology retain the right to apply to retake the examination in subsequent years. For further information concerning Board policy in effect and for the applicable examination fee, candidates are advised to write or call the Board office (313 874-1088). Candidates who do not take the certifying examination at the first opportunity after completion of their training are also advised to contact the Board office for clarification of Board policy and the examination fee if they intend to apply to take the certifying examination in any given year.

Publication
The ABD publishes a booklet of information, which may be obtained from the Board office or downloaded from the ABD Web site (www.abderm.org).

All correspondence should be sent to

Fellowships with Subspecialty Certification
The ABD has established certification processes for the subspecialties of dermatopathology, clinical and laboratory dermatological immunology, and pediatric dermatology. These subspecialty certifications have been approved by the American Board of Medical Specialties and its 24 member boards. Surveillance and periodic reviews of the training programs are carried out by the respective RRCs, under the auspices of the ACGME, and/or by the ABD. Although all general dermatology residents receive comprehensive training in each of these subspecialties, candidates who pursue the additional year(s) of training in subspecialty fellowships will have met additional standards and qualifications that will prepare them for specialized careers in teaching, research, and/or the practice of these subspecialties. [Note: It is emphasized also that the additional year(s) of training in clinical and laboratory dermatological immunology and pediatric dermatology must be taken after the candidate has met the full training requirements for certification in the primary specialty of dermatology. Similarly, the additional year(s) of training in dermatopathology must be taken after the candidate has met the full training requirements for certification in the primary specialty of dermatology or pathology.]

Certification in Dermatopathology
Subspecialty certification in Dermatopathology is a joint and equal function of the ABD and the American Board of Pathology (ABP). Such function will relate to qualifications of candidates, standards of examination, and the form of the certificate.

All candidates applying to sit for this certifying examination must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in the state or province of his/her residence in either the United States or Canada. The candidate may be denied certification if his/her licensure has been revoked, suspended, restricted, or surrendered in any jurisdiction, or if the candidate is subject to adverse licensure proceedings.

All candidates for this certification must satisfy the following requirements:

Prerequisites
1. Primary certification by both the ABD and the ABP (anatomic pathology or anatomic and clinical pathology);
   or
2. Primary certification by either the ABD or the ABP (anatomic pathology or anatomic and clinical pathology) and the satisfactory completion of 1 year of training in dermatopathology in a program accredited by a joint action of the RRCs for Dermatology and Pathology; or the completion of a program accredited by the ACGME. Information concerning accredited dermatopathology training programs may be found in this Directory.

Examination: Deadline for Application and Date of Examination
Candidates who have satisfied the above requirements are eligible to apply to the Board to take the examination for subspecialty certification in dermatopathology, which is a comprehensive assessment of the candidates' knowledge of dermatopathology, including the related basic sciences, and laboratory and clinical areas pertaining to this discipline.

Candidates planning to take the subspecialty certification examination should request an application from the office of the executive director of the ABD. The deadline for receipt of applications is May 1 of the year in which the candidate plans to take the examination. In 2006, the examination will be held on Tuesday, September 19, in Tampa, Florida.

Pediatric Dermatology Subspecialty Certification
All candidates for subspecialty certification in pediatric dermatology must meet the following requirements:

A. Prerequisites
1. A currently valid, full, and unrestricted license to practice medicine or osteopathy in the state or province of the candidate's residence in either the United States or Canada. The candidate may be denied certification if his/her licensure has been revoked, suspended, restricted, or surrendered in any jurisdiction, or if the candidate is subject to adverse licensure proceedings.

B. Education, Training, Experience
Additional specific education and training or experience that must be completed:
1. One or more years of ACGME-accredited residency training in pediatrics followed by the requisite training and certification in dermatology and 1 additional year of fellowship training in pediatric dermatology;
2. An ACGME-accredited transitional year or an ACGME-accredited broad-based year of residency training in internal medicine, family practice, obstetrics and gynecology, general surgery, or emergency medicine, followed by the requisite training and certification in dermatology. This track also requires the completion of a final 2 additional years of fellowship training in pediatric dermatology;

or

3. Special interest, experience, and expertise in pediatric dermatology for at least 5 years. This pathway will be open for only 5 years, commencing with the year of the first certifying examination (2004) in this subspecialty.

In the initial phase of certification in this subspecialty, qualified practicing physicians will be eligible for subspecialty certification with a minimum of 5 years of clinical practice in which pediatric dermatology comprises at least 50% of the total practice. Publications and invited lectures in pediatric dermatology may also be submitted as documentation of special expertise. Individuals intending to sit for the certification examination along this pathway would be approved on a case-by-case basis upon application to the ABD. Candidates who trained in pediatric dermatology fellowships prior to the development of approved fellowship training programs would be permitted to sit for the certification examination after approval on a case-by-case basis upon application to the ABD.

The ABD wishes to emphasize that in the pathway described under (B2), sufficient education and experience in pediatrics (equivalent to 6 months of residency training in pediatrics) will be required during the pediatric dermatology fellowship. The entire curriculum outline for subspecialty training in pediatric dermatology is available on the ABD Web site (www.abderm.org).

C. Examination – Date of Examination
Candidates who have satisfied the above requirements are eligible to apply to the Board to take the subspecialty certification examination in pediatric dermatology. The deadline for receipt of applications is April 1 of the year in which the candidate plans to take the examination. The next examination will be administered on October 23, 2006.

D. Certificate
The Pediatric Dermatology certificate has a 10-year time limit.

E. Appeals Process
An appeals procedure similar to that described for the certification process in dermatology ("Review of Adverse Decisions") is available for candidates for subspecialty certification in pediatric dermatology who were declared ineligible by the Board for pediatric dermatology or who failed the subspecialty examination. Candidates submitting such appeals should contact the Board for additional current information.

Clinical and Laboratory Dermatological Immunology Subspecialty Certification
The requirements for subspecialty certification in clinical and laboratory dermatological immunology are as follows:

A. Prerequisites
1. A currently valid, full, and unrestricted license to practice medicine or osteopathy in the state or province of the candidate’s residence in either the United States or Canada. The candidate may be denied certification if his/her license has been revoked, suspended, restricted, or surrendered in any jurisdiction, or if the candidate is subject to adverse licensure proceedings.

2. Primary certification by the ABD and the satisfactory completion of at least 1 year of training in an accredited fellowship in clinical and laboratory dermatological immunology.

B. Training
Information concerning accredited training programs in clinical and laboratory dermatological immunology is available from the office of the ABD. As stated above, a minimum of 1 year of full-time training in a clinical and laboratory dermatological immunology training program is required of all candidates. A preliminary registration form must be filed with the Board by each trainee.

C. Examination
Candidates who have satisfied the above requirements are eligible to apply to the Board to take the subspecialty certification examination in clinical and laboratory dermatological immunology.

D. Appeals Process
An appeals procedure similar to that described for the certification process in dermatology ("Review of Adverse Decisions") is available for candidates for subspecialty certification in clinical and laboratory dermatological immunology who were declared ineligible by the Board for clinical and laboratory dermatological immunology or who failed the subspecialty examination. Candidates submitting such appeals should contact the Board for additional current information.

Fellowship Without Certification
In 2003, a 1-year PGY5 level fellowship program in procedural dermatology achieved accreditation status by the ACGME. Procedural dermatology includes dermatologic surgery, which may be learned in an ACGME-accredited dermatology residency program. This fellowship program builds on the experience of a dermatology resident and provides surgical training beyond the scope which is expected in a dermatology program (PGY2 to PGY4). At the present time, a certification examination process in procedural dermatology has not been developed.

Procedural dermatology is the subspecialty within dermatology concerned with the study, diagnosis, and surgical treatment of diseases of the skin and adjacent mucous membranes, cutaneous appendages, hair, nails, and subcutaneous tissue. Dermatologic surgical procedures are minimally invasive and may be safely performed in outpatient settings without general anesthesia or other intravascular physiologic alteration. An especially important technique is Mohs micrographic surgical excision, which is used for certain cancers of the skin and incorporates training in clinical dermatology and dermatopathology as they apply to dermatologic surgery. In addition, cutaneous reconstruction of surgical defects, sclerotherapy, chemical peel, hair transplantation, dermabrasion, small-volume liposuction, cutaneous soft tissue augmentation with injectable filler material, rhinophyma correction, and laser surgery are important components of these fellowships.

Procedural dermatology fellowships are accredited to offer 12 months of education and experience subsequent to the satisfactory completion of an ACGME-accredited residency in dermatology, when all residents are required to develop initial competence in dermatologic surgery. These fellowship programs in procedural dermatology provide an organized, systematic, and progressive educational experience for physicians seeking to acquire advanced competence as a dermatologic surgeon.

The procedural dermatology fellowship programs provide organized education in all aspects of procedural dermatology, including basic science, anatomy, anesthesia, ethics, pre- and post-operative management, surgical technique, wound healing, Mohs micrographic surgery, laboratory technique, interpretation of
pathologic specimens related to Mohs micrographic surgery, cutaneous reconstruction or surgical defects, sclerotherapy, chemical peel, hair transplantation, dermabrasion, small-volume liposuction, cutaneous soft tissue augmentation with injectable filler material, rhinophyma correction, cutaneous oncology, laser surgery, epidemiology, medicolegal and regulatory issues, quality assurance, and self-assessment.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Emergency Medicine [ABEM] to ascertain whether the information below is current.)

Requirements for Certification in Emergency Medicine

An applicant must satisfy all credential requirements at the time the application is submitted. Requirements fulfilled after the date of application will not be considered.

The applicant must have graduated from a medical school approved by the Liaison Committee on Medical Education.

1. Graduates of approved schools of osteopathic medicine in the United States are considered when they have satisfactorily met the credential requirements as outlined.

2. An applicant graduating from a medical school other than one in the United States, its territories, or Canada must provide the Board with a verified and translated diploma.

Each physician applying for Emergency Medicine (EM) or subspecialty certification, participating in a certification process, holding current diplomat status with the Board, and/or participating in the Emergency Medicine Continuous Certification (EMCC) process must continuously hold a current, active, valid, unrestricted, and unqualified license to practice medicine in at least one jurisdiction in the United States, its territories, or Canada, and in each jurisdiction in which he or she practices.
The applicant must have successfully completed a total of 36 months of postmedical school training, under the control of an accredited emergency medicine residency program. Emergency medicine programs must be accredited by the Accreditation Council for Graduate Medical Education (ACGME) or the Royal College of Physicians and Surgeons of Canada for Canadian programs.

If the emergency medicine residency training program is structured so that it exceeds the length of training specified above, the resident must successfully complete the requirements of his/her residency program to apply under the emergency medicine residency category of application.

[Note: For residents who began their emergency medicine training prior to July 1, 1987, the candidate must have successfully completed a total of 36 months of postmedical school training, at least 24 months of which were under the control of an accredited emergency medicine residency program at the PGY2 level and above.]

The applicant must submit evidence of 50 hours of continuing medical education in emergency medicine annually, acceptable to the Board, starting 1 year from the date of graduation from the emergency medicine residency program and continuing until the date of application. If a resident applies to the Board within 1 year of graduation, no continuing medical education is required.

Combined Training Programs
A special agreement exists between the ABEM and the American Board of Pediatrics whereby an applicant may fulfill the training requirements of both Boards by completing joint training in 5 years. Training programs must be approved prospectively by both Boards. Guidelines for combined training have been approved by both Boards and are available from either Board office. Applicants may not appear for the certifying examination until all training has been satisfactorily completed.

A special agreement exists between the ABEM and the American Board of Internal Medicine whereby an applicant may fulfill the training requirements of both Boards by completing joint training in 5 years. Training programs must be approved prospectively by both Boards. Guidelines for combined training have been approved by both Boards and are available from either Board office. Applicants may not appear for the certifying examination until all training has been satisfactorily completed.

The American Board of Internal Medicine and the ABEM have approved guidelines for 6-year training that, upon completion, will provide physicians the option for certification in internal medicine, emergency medicine, and critical care medicine. These guidelines, approved by both boards in February 1999, are applicable to ACGME-accredited programs and residents entering training in July 1999 and after. The guidelines are available from both Board offices. Applicants may not appear for the certifying examination until all training has been satisfactorily completed.

Applications
Applications are distributed in the spring of each year (mid April) and are available from the Board office. Applications are accepted from April 15 through July 31 of each year. A mailing list is maintained throughout the year for applicants received during times when applications are not available.

A nonrefundable processing fee must accompany the application at the time it is submitted.

Applicants wishing to be considered for examination must submit a fully completed application form to the Board. The Board will not be responsible for any opinion expressed concerning the individual's credentials for the examination unless it is in writing and over the signature of the president or secretary of the Board.

Examination Information
The certification examination in emergency medicine is composed of two parts, a written examination and an oral examination.

The written certification examination is a 6.5-hour comprehensive examination that is administered once a year. It includes approximately 335 single-best-answer, multiple-choice test items. Approximately 10% to 15% of the items have a pictorial stimulus.

The oral certification examination is administered twice a year. It includes five simulated patient encounters, each involving one patient, and two simulated situation encounters, each involving more than one patient.

A candidate must successfully complete the fall written examination to be scheduled for either the spring or fall oral examination the following year.

Examination fees are due upon assignment to an examination administration.

Certification
All candidates who successfully complete both the written and the oral certification examinations shall be known as diplomates of the ABEM. Diplomates receive an appropriate certificate, which shall remain the property of ABEM. Certification is for a period of 10 years.

Any certificate issued by the Board shall be subject to revocation at any time, should the Board determine, in its sole judgment, that a candidate who has received a certificate was in some respect not properly qualified to receive or retain it.

Emergency Medicine Continuous Certification
Emergency Medicine Continuous Certification (EMCC) began in 2004.

All diplomates who want to maintain their certification with ABEM beyond the current expiration date must participate fully in the EMCC program.

A full description of EMCC, including details of diplomates' participation requirements, is available on the ABEM Web site at www.abem.org. Questions should be directed to the ABEM office.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Family Medicine [ABFM] to ascertain whether the information below is current.)

ABFM Official Definition of Family Medicine

Family medicine is the medical specialty which is concerned with the total health care of the individual and the family. It is the specialty in breadth which integrates the biological, clinical, and behavioral sciences. The scope of family medicine is not limited by age, sex, organ system, or disease entity.

Board Eligibility

The ABFM does not recognize or use the term “board eligible” and does not issue statements concerning “board eligibility.” The Board informs an applicant of admissibility to an examination to be given on a specified date after a formal application has been reviewed and approved.

Certification Process

The ABFM administers the certification and recertification examinations in various centers throughout the United States on multiple dates in July-August. A second administration is offered in December with limited eligibility. The ABFM certification and recertification examinations are computerized tests of cognitive knowledge and problem-solving abilities relevant to family medicine. Appropriate subject areas of the following disciplines are included: adult medicine; care of neonates, infants, children, and adolescents; care of the surgical patient; maternity and gynecologic care; human behavior and mental health; emergent and urgent care; community medicine; and care of the older patient. Elements of the examination include but are not limited to diagnosis, management, and prevention of disease. The Board makes every effort to be as prompt as possible in notifying candidates of their examination results, and notification may be expected within 4 to 6 weeks following the examination.

Eligibility

All candidates for the American Board of Family Medicine Certification Examination must have satisfactorily completed 3 years of training (a full 36 calendar months with 12 months in each of the G1, G2, and G3 years) in a family medicine residency program accredited by the Accreditation Council for Graduate Medical Education (ACGME) subsequent to receipt of the MD or DO degree from an accredited institution and, when applicable, a Fifth Pathway year, or receipt of a Standard Certificate from the Educational Commission for Foreign Medical Graduates (ECFMG), or compliance with other ACGME requirements for entry into graduate medical training in the United States. If a physician does not meet the eligibility requirements of the ACGME for residency training in family medicine, his/her training will not be recognized by the Board.

Candidates who obtained their MD degree from medical schools in the United States or Canada must have attended a school accredited by the Liaison Committee on Medical Education or the Committee for Accreditation of Canadian Medical Schools. Candidates who obtained a DO degree must have graduated from a college of osteopathic medicine accredited by the American Osteopathic Association (AOA). All applicants for the Certification Examination are subject to the approval of the Board, and the final decision regarding any applications rests solely with the ABFM. No candidate will be allowed to take the examination until all fees are paid and all requirements have been satisfactorily met.

The Board prefers all 3 years of postgraduate training to be in the same ACGME-accredited family medicine program; however, other training may be considered as equivalent (eg, Flexible/Transitional year, AOA Osteopathic Internship, etc.). The ABFM expects residency programs to submit notification of transfers or advanced placement credit at the time the program authorizes the credit. Transfer/advanced placement requiring special attention, such as requests for credit beyond the beginning of the PG-2 year, transfers associated with the closing of a program, transfers involving hardship circumstances, and advanced placement of international training, will require prior approval from the ABFM. If a program director fails to comply, the Board will determine the amount of transfer credit at the time of its discovery of the transfer. Consequently, the resident may receive less credit toward certification than anticipated and may be required to extend the duration of training.

The last 2 years of family medicine residency training must be completed in the same accredited program. Transfers after the beginning of the G2 year are approved only in extraordinary circumstances.

Verification of satisfactory completion of residency training must be received from the program director prior to the examination date. All applicants for the certification examination are subject to the approval of the Board, and the final decision regarding any application rests solely with the ABFM.

All candidates' education and training experiences are subject to review and approval by the ABFM. No credit may be given for any
previous training as equivalent to family medicine training without written notification to the Board.

Candidates must complete all training requirements of the Board no later than June 30 of the year of the examination.

**Continuing Medical Education (CME)**

Candidates who apply for the Certification Examination within 3 years of completion of an ACGME-accredited family medicine residency are not required to document any continuing medical education. Candidates who apply after the 3-year grace period must provide documentation of 50 hours of CME for each subsequent year up to a maximum of 300 hours.

**Licensure Requirements**

All candidates must hold a currently valid, full, and unrestricted license to practice medicine in the United States or Canada. Institutional, temporary, and training medical licenses are not acceptable. Furthermore, every license to practice medicine held by the candidate in any state or territory of the United States or province of Canada must be currently valid, full, and unrestricted, whether or not the candidate in effect practices in such state, territory, or province. Candidates shall be required to maintain a full and unrestricted medical license in the United States or Canada even if they are out of the country for extended periods of time. Any adverse action by a state licensing agency, agreement between a licensing agency and a physician, or voluntary action by a physician that revokes, restricts, or suspends the physician’s medical license is a violation of ABFM policy.

Any candidate whose license to practice medicine has been revoked, suspended, or restricted in any state or territory of the United States or province of Canada shall be ineligible for certification until such time as the encumbered license is reinstated in full. Should a license be revoked, restricted, or suspended following the submission of an application for certification but prior to the notification of examination results, the application and certification will be simultaneously invalidated.

It is the responsibility of the candidate to inform the Board immediately upon a change in licensure status. If the candidate fails to notify the Board of any suspension, revocation, restriction, or probation within 60 days after the effective date, he/she shall be ineligible to seek certification for up to 1 year following the reinstatement of full and unrestricted licensure. Candidates should be aware that the ABFM receives periodic *Disciplinary Action Reports* from the American Medical Association of actions by states against medical licenses.

In cases where a physician has changed his or her residency delib erately to avoid prosecution, loss of license, or disciplinary action by a state licensing agency, the Board reserves the right to revoke or suspend diplomat status, and/or prohibit application for certification.

An opportunity for certification will be denied to any physician otherwise eligible who has been involved in the fraudulent misrepresentation of certification by the ABFM. Eligibility to make application for certification will be denied to the offending party for a period not to exceed 6 years from the date of discovery of the offense. In the event the individual appeals or otherwise challenges the declaration of ineligibility, the 6-year period shall be postponed until the action of the Board is determined to be final and enforceable. Questions about licensure should be presented to the Board in writing.

**Osteopathic Physicians**

Physicians who have graduated from an American Osteopathic Association (AOA)-approved school of osteopathic medicine in the United States may qualify for certification if they meet all the same requirements as specified for allopathic medical school graduates. They may apply to ACGME-accredited family medicine programs for entry into the first year (G1). Osteopathic physicians who have documented satisfactory completion of an AOA-approved internship (G1) year may receive credit for that portion of the G1 year which meets the American Board of Family Medicine guidelines for Advanced-Level Entry or Interprogram Transfers.

All candidates (MD or DO) must satisfactorily complete at least 36 calendar months of accredited graduate medical education. Only the G1 year may be fulfilled by an AOA-approved internship year. The training beyond the G1 year must be completed in continuity in an ACGME-accredited family medicine residency program.

**Reciprocity Agreements**

The American Board of Family Medicine has reciprocity agreements with the College of Family Physicians of Canada, the Royal New Zealand College of General Practitioners, and the Royal Australian College of General Practitioners. Diplomates of the ABFM may be eligible to seek certification by these colleges. Members in good standing of these colleges (and the Royal College of General Practitioners of Great Britain) who meet all of the other requirements of the ABFM and reside in the United States may be eligible to take the Certification Examination. Eligibility to sit for the American Board of Family Medicine Certification Examination through reciprocity is available only to physicians who have satisfactorily completed formal family medicine training accredited by a nationally recognized accrediting organization within the country in which they are certified. Effective August 2000, diplomates of the American Board of Family Medicine are no longer eligible to seek certification by the Royal College of General Practitioners of Great Britain.

**Canadian Applicants**

The following two options are available:

1. Physicians who have satisfactorily completed 2 years of training in a family medicine residency program accredited by the College of Family Physicians of Canada may apply for certification by the ABFM upon the successful completion of a third year of accredited family medicine residency. The third year of training must be satisfactorily completed in an ACGME-accredited family medicine program or, if taken in Canada, must be approved by the College of Family Physicians of Canada. The third year must have prior approval of the American Board of Family Medicine and bring the total residency experience into compliance with the ACGME Program Requirements for Residency Education in Family Medicine. The request must be accompanied by documentation of satisfactory performance of the last 2 years of training (including a description of the curriculum) signed by the program director.

2. Physicians who have passed the College of Family Physicians of Canada Certification Examination in Family Medicine may apply to sit for the American Board of Family Medicine Certification Examination, if they:
   - are members in good standing of the College of Family Physicians of Canada at the time of application;
   - have completed postgraduate residency training in family medicine accredited by the College of Family Physicians of Canada;
   - have been residents of the United States for at least 6 months;
   - hold a valid and unrestricted license to practice medicine in the United States; and
   - are actively involved in family medicine in the United States.
Registants of the Royal College of General Practitioners (Great Britain)

Physicians who have been certified by the Royal College of General Practitioners by examination may apply to sit for the American Board of Family Medicine Certification Examination if they:

- are members in good standing of the Royal College of General Practitioners;
- possess a Certificate of Prescribed/Equivalent Experience issued by the Joint Committee on Postgraduate Training for General Practice;
- reside in the United States;
- hold a valid and unrestricted license to practice medicine in the United States; and
- are actively involved in family medicine in the United States.

Members of the Royal New Zealand College of General Practitioners

Physicians who are members of the Royal New Zealand College of General Practitioners may apply to sit for the American Board of Family Medicine Certification Examination if they:

- are members in good standing of the Royal New Zealand College of General Practitioners;
- have completed the General Practice Vocational Training Program;
- reside in the United States;
- hold a valid and unrestricted license to practice medicine in the United States; and
- are actively involved in family medicine in the United States.

Fellows of the Royal Australian College of General Practitioners

Physicians who are fellows of the Royal Australian College of General Practitioners may apply to sit for the American Board of Family Medicine Certification Examination if they:

- are members in good standing of the Royal Australian College of General Practitioners;
- have completed the Royal Australian College of General Practice Training Program;
- reside in the United States;
- hold a valid and unrestricted license to practice medicine in the United States; and
- are actively involved in family medicine in the United States.

Recertification Process

The American Board of Family Medicine confers diplomate status for the 7-year period specified on the certificate. In order to maintain diplomate status, the physician must be recertified before the certificate expires. Although the certificate is dated for 7 years, the Board offers the recertification process electively on a 6-year cycle. This allows a reserve year for those diplomates who for some reason are unable to participate in the sixth year, or in cases where the diplomate fails to receive a satisfactory score in the sixth year. For diplomates who participate in the recertification process during the sixth year and pass, the new certificate of 7 years’ duration is dated from the time of that examination.

Should a diplomate not be recertified by the end of the seventh year, the certificate will expire and the physician will lose diplomate status. Once the certificate has expired, the physician may not represent himself/herself to the profession or the public as being certified unless and until successfully recertified by the American Board of Family Medicine. The physician may reapply for a future recertification examination, but must meet all criteria in effect at that time.

Requirements for Recertification

A. Submission of a formal online application.

B. Documentation of 300 hours of approved continuing medical education.

C. Submission of statement of acknowledgment and compliance with Board policy regarding medical licensure.

D. Satisfactory performance on the written test of cognitive knowledge.

Diplomates will be given advance notice of any changes in the recertification requirements.

Reexamination

Candidates who fail the examination may apply for admission to the December examination or to the next annual examination. There is no limit to the number of times a qualified candidate may take the examination when it is offered, provided the qualifications are met with each reapplication. In addition to valid and unrestricted licensure status, 50 hours per year of CME since the last application are required for reexamination. Full fees are charged for each examination.

Maintenance of Certification for Family Physicians (MC-FP)

The Maintenance of Certification Program for Family Physicians (MC-FP) began in 2004 for those diplomates of the American Board of Family Medicine who certified or recertified in 2003. All other diplomates will continue with the current recertification process until they successfully complete the Recertification Examination and will then enter MC-FP. All diplomates are expected to be in the MC-FP program by 2010.

The MC-FP process is composed of four parts: Part I: Professionalism, Part II, Lifelong Learning; Part III, Cognitive Expertise, and Part IV: Performance in Practice.

The requirements for MC-FP include:

- Part I (Professionalism): The diplomate must show evidence of a full and unrestricted license to practice medicine in the US or Canada;
- Part II (Lifelong Learning): The diplomate must successfully complete one Self Assessment Module (SAM) composed of an online, 60-question assessment and patient simulation on a specific topic each year for 6 years;
- Part III (Cognitive Expertise): The diplomate must successfully complete a cognitive examination;
- Part IV (Performance in Practice): One Performance in Practice Module (PPM) must be completed during the 7-year MC-FP cycle. This module utilizes a Web-based instrument that assists diplomates with a mini-audit focusing on quality indicators for a specific disease entity, the development of a quality improvement plan, and a repeat audit to measure their improvement.

Certificates of Added Qualifications (CAQs)

The American Board of Family Medicine currently offers Certificates of Added Qualifications (CAQs) in Geriatrics, Sports Medicine, and Adolescent Medicine. These CAQs are offered in conjunction with other medical boards. Successful CAQ candidates will be awarded the ABFM Certificate of Added Qualifications. The certificate will be valid for 10 years, at which time recertification is required for renewal of the certificate.

If for any reason primary certification in family medicine is lost (eg, expiration, revocation, etc), the certificate of added qualification will be simultaneously withdrawn. With restoration of the primary certificate, the CAQ will be reinstated for any remaining period of time on the CAQ certificate.

Questions or comments about the CAQ may be addressed to the ABFM Help Desk at 877 223-7437.
Geriatric Medicine
In a joint venture, the American Board of Family Medicine and the American Board of Internal Medicine offer a Certificate of Added Qualifications in Geriatric Medicine. The "added certificate" is designed to recognize excellence among those diplomates who provide care to the elderly. Geriatric Medicine Examinations are given annually. Announcements will be made in the Journal of the American Board of Family Medicine and on the ABFM Web page concerning exact dates and the application process.

Certification Requirements
1. Family physicians must be certified by the American Board of Family Medicine and must be diplomates in good standing at the time of the examination.
2. The diplomate must hold a currently valid, full, and unrestricted license to practice medicine in the United States or Canada.
3. Diplomates must satisfactorily complete an ACGME-accredited fellowship training program in geriatric medicine.
4. Diplomates must achieve a satisfactory score on the 1-day computer-based Examination.

Recertification Requirements
The recertification process for the geriatric medicine certificate may be completed in the ninth or tenth year of the 10-year certificate; it includes the following requirements:
1. Current primary certification in family medicine at the time of the examination
2. Submission of a nonrefundable Self-Assessment Fee
3. Successful completion of two Self-Evaluation Process (SEP) modules
4. Completion of a formal geriatric medicine examination application and submission of the appropriate examination fee
5. Verification that all licenses held in the United States and Canada are currently valid, full, and unrestricted
6. Successful completion of a 1-day written examination

Sports Medicine
The American Board of Family Medicine offers certification in Sports Medicine. The Certificate of Added Qualifications in Sports Medicine is offered annually in conjunction with the American Board of Emergency Medicine, the American Board of Internal Medicine, and the American Board of Pediatrics.

Certification Requirements
1. Family physicians must be certified by the American Board of Family Medicine and must be diplomates in good standing at the time of the examination.
2. The diplomate must hold a currently valid, full, and unrestricted license to practice medicine in the United States or Canada.
3. Family physicians must have satisfactorily completed, or will have completed by June 30 of the examination year, a minimum of 1 year in an ACGME-accredited sports medicine fellowship program associated with an ACGME-accredited residency in family medicine, emergency medicine, internal medicine, or pediatrics.
4. Diplomates must achieve a satisfactory score on a half-day written examination.

Recertification Requirements
Recertification in sports medicine is offered in the ninth or tenth year of the certificate to be consistent with other ABFM examinations. Candidates who choose to seek recertification in the ninth year will have a "reserve year" in case of failure or the inability to complete the examination or application process.

Requirements to sit for the Sports Medicine Recertification Examination include:
1. Submission of a formal application with appropriate fee
2. Evidence of licensure status consistent with ABFM requirements
3. Satisfactory score on a half-day examination

Adolescent Medicine
The American Board of Family Medicine offers certification in adolescent medicine. The Certificate of Added Qualifications in Adolescent Medicine will be offered biennially in odd-numbered years in conjunction with the American Board of Pediatrics and the American Board of Internal Medicine.

Certification Requirements
1. Family physicians must be certified by the American Board of Family Medicine and must be diplomates in good standing at the time of the examination.
2. A candidate must have completed a minimum of 2 years in an adolescent medicine fellowship program approved by the ACGME or by the American Board of Family Medicine until such time as accreditation of all programs is established by the Residency Review Committee. A Verification of Fellowship Training Form must be completed by the program director. No credit will be given for fellowship training and/or practice experience in adolescent medicine obtained during the core family medicine residency. All training must be completed by September 30 in order to qualify for that year's examination.
3. The diplomate must hold a currently valid, full, and unrestricted license to practice medicine in the United States or Canada.
4. Diplomates must achieve a satisfactory score on a half-day computer-based examination.

Revocation of Diplomate Status
Authority to Revoke Certification
The Board of Directors of the American Board of Family Medicine shall have sole power and authority to determine whether or not the evidence or information before it is sufficient to constitute grounds for revocation of any certificate issued by the Board. The Board of Directors may, however, at its discretion, require any person so certified to appear before the Board of Directors, upon not less than 30 days' written notice by registered mail, and to show cause, at the time and place specified in such notice, why the certificate should not be revoked. The failure of any person so notified to appear as required in such notice shall, at the discretion of the Board of Directors, constitute cause for revocation of the certificate. The decision of the Board of Directors in all such matters shall be final.

Misrepresentations by the Candidate
Each certificate issued by the Board of Directors shall be subject to revocation in any of the following circumstances:
1. The issuance of such certificate or its receipt by the person so certified shall have been contrary to, or in violation of, any provision of the Articles of Incorporation of the American Board of Family Medicine, Inc, or of the Bylaws of the American Board of Family Medicine.
2. The person so certified shall not have been eligible to receive such certificate, irrespective of whether or not the facts constituting such ineligibility were known to, or could have been ascertained by, the Directors of the Corporation or its representatives.
3. The person so certified shall have made a misstatement of fact in the application for such certificate or in any other statement or representation to the Board or its representatives.
4. The person so certified shall at any time have neglected to maintain the degree of competency in the field of family medicine as established by the Board.

5. The person so certified has fraudulently altered, copied, or changed a certificate of the American Board of Family Medicine, or has fraudulently presented, or allowed to be presented on behalf of the individual, an altered, copied or changed certificate of the Board. In such cases, the Board reserves the right to revoke, suspend, and/or prohibit subsequent certification of the offending party for a period not to exceed 6 years from the date of discovery of the offense. In the event the individual appeals or otherwise challenges the suspension, the 6-year period shall be postponed until the action of the Board is determined to be final and enforceable.

Licensure Status
A diplomate of the American Board of Family Medicine is required to hold a currently valid, full, and unrestricted license to practice medicine in the United States or Canada. Furthermore, every license to practice medicine held by a diplomate in any state or territory of the United States or province of Canada must be currently valid, full, and unrestricted, whether or not the diplomate in effect practices in such state, territory, or province. Diplomates shall be required to retain a full and unrestricted medical license in the United States or Canada even if they are out of the country for extended periods of time. Failure to retain a license will result in loss of diplomate status and will result in loss of the ability to make application for certification, recertification, or other examinations offered by the Board.

In the event a diplomate's license to practice in any state or territory of the United States or province of Canada is revoked, restricted, or suspended, the diplomate's certificate is simultaneously rescinded at the time of the licensure revocation, restriction, or suspension. The physician must advise the American Board of Family Medicine within 60 days and cease immediately identifying himself/herself in any way directly or indirectly as a diplomate of the American Board of Family Medicine. If the physician fails to notify the American Board of Family Medicine of any revocation, restriction, or suspension within 60 days after the effective date, he/she shall be ineligible to seek reinstatement of diplomate status for up to 1 year following the reinstatement of full and unrestricted licensure. Candidates for recertification and diplomates of the ABFM should be aware that the ABFM receives periodic Disciplinary Action Reports from the American Medical Association of actions by states against medical licenses.

Any adverse action by a state licensing agency, agreement between a licensing agency and a physician, or voluntary action by a physician, that revokes, restricts, or suspends the physician's medical license is a violation of ABFM policy. In cases where a physician has changed his or her residence deliberately to avoid prosecution, loss of license, or disciplinary action by a state licensing agency, the Board reserves the right to revoke or suspend diplomate status and/or prohibit application for certification. Questions about licensure should be presented to the Board in writing.

If and when the physician's revoked, restricted, or suspended license is reinstated in full (with no restrictions) and official written documentation of reinstatement is provided, the ABFM will honor the remainder of the current certificate and the diplomat will not be required to be reexamined. If the current certificate has expired prior to the reinstatement of the license, the physician may make application for the next annual examination. Successful compliance with all application requirements in effect at that time will be expected.

Applications and Additional Information
Application and additional information may be obtained by writing to:

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Internal Medicine [ABIM] to ascertain whether the information below is current.)

Preface

The Board's decision about a candidate's eligibility for certification is determined by the policies and procedures described in this document. This edition of policies and procedures supersedes all previous publications. The Board reserves the right to make changes in its fees, examinations, policies, and procedures at any time without advance notice. Admission to the Board's examinations will be determined under policies in force at the time of application.

Introduction

The American Board of Internal Medicine (ABIM) was established in 1936 and is a private, not-for-profit corporation. Board members are elected by the Board of Directors and serve 2-year terms. The Board receives no public funds and has no licensing authority or function.

The mission of the ABIM is to enhance the quality of health care available to the American public by continuously improving the process and maintaining high standards for certifying internists and subspecialists who possess the knowledge, skills, and attitudes essential for the provision of excellent care.

Certification by the ABIM recognizes excellence in the discipline of internal medicine, its subspecialties, and areas of added qualifications. Certification is not a requirement to practice internal medicine, and the Board does not confer privileges to practice. The ABIM does not intend either to interfere with or to restrict the professional activities of a licensed physician based on certification status.

The ABIM administers the certification process by (1) establishing requirements for training and self-evaluation, (2) assessing the professional credentials of candidates, (3) obtaining substantiation by appropriate authorities of the clinical competence and professional standing of candidates, and (4) developing and conducting examinations.

All ABIM certificates issued in 1980 (1987 for critical care medicine and 1988 for geriatric medicine) and thereafter are valid for 10 years. Dates of validity are noted on the certificates. To maintain a valid certificate, these certificates must be renewed through the ABIM's Maintenance of Certification program. Certificates issued before these dates are not time limited, although the Board recommends such certificate holders recertify also.

For information about Maintenance of Certification, visit the ABIM Web site, www.abim.org, or contact the Board.

Requirements for Certification in Internal Medicine

To receive a certificate in internal medicine, a physician must complete the required predoctoral medical education, meet the postdoctoral training requirements, demonstrate clinical competence in the care of patients, meet the licensure requirements, and pass the Certification Examination in Internal Medicine.

Predoctoral Medical Education

Candidates who graduated from medical schools in the United States or Canada must have attended a school that was accredited at the date of graduation by the Liaison Committee on Medical Education (LCME), the Committee for Accreditation of Canadian Medical Schools, or the American Osteopathic Association.

Graduates of international medical schools must have one of the following: (1) a standard certificate from the Educational Commission for Foreign Medical Graduates without expired examination dates; (2) comparable credentials from the Medical Council of Canada; or (3) documentation of training for those candidates who entered postdoctoral medical training in the United States via the Fifth Pathway, as proposed by the American Medical Association.

Graduate Medical Education (GME)

To be admitted to the Certification Examination in Internal Medicine, physicians must have satisfactorily completed, by August 31 of the year of examination, 36 months of graduate medical education accredited by the Accreditation Council for Graduate Medical Education (ACGME), the Royal College of Physicians and Surgeons of Canada, or the Professional Corporation of Physicians of Quebec. Residency or research experience occurring before completion of the requirements for the MD or DO degree cannot be credited toward the ABIM's requirements.

The 36 months of residency training must include 12 months of accredited internal medicine training at each of three levels: R-1, R-2, and R-3. No credit is granted for training repeated at the same level.
Content of Training

The 36 months of full-time medical residency education:
1. Must include at least 30 months of training in general internal medicine, subspecialty internal medicine, critical care medicine, geriatric medicine, and emergency medicine. Up to 4 months of the 30 months may include training in areas related to primary care, such as neurology, dermatology, office gynecology, or office orthopedics.
2. May include up to 3 months of other electives approved by the internal medicine program director.
3. May include up to 3 months of leave for vacation time, parental leave, or illness. Vacation or other leave cannot be forfeited to reduce training time.

In addition, the following requirements for direct patient responsibility must be met:
1. At least 24 months of the 36 months of residency education must occur in settings where the resident personally provides or supervises junior residents who provide direct care to patients in inpatient or ambulatory settings.
2. At least 6 months of the direct patient responsibility on internal medicine rotations must occur during the R-1 year.

Clinical Competence Requirements

The Board requires documentation that candidates for certification in internal medicine are competent in (1) patient care (medical interviewing, physical examination, and procedural skills); (2) medical knowledge; (3) practice-based learning and improvement; (4) interpersonal and communication skills; (5) professionalism; and (6) systems-based practice.

Through its tracking process, the Board requires program directors to complete clinical competency evaluations each spring for internal medicine residents. A candidate may be excluded from an ABIM examination if the required components of clinical competence are not satisfactorily documented by the training program.

As outlined in the table below, all residents must receive satisfactory ratings in overall clinical competence and moral and ethical behavior in each year of training. In addition, residents must receive satisfactory ratings in each of the components of clinical competence during the final year of required training. It is the resident's responsibility to arrange for any additional training needed to achieve a satisfactory rating in each component of clinical competence.

Procedures Required for Internal Medicine

For certification in internal medicine, the ABIM requires that candidates must be judged competent by their program director in the procedures listed below:
1. Interpreting electrocardiograms; and
2. Performing the following procedures, understanding their indications, contraindications, and complications, and interpreting their results:
   - Advanced cardiac life support
   - Abdominal paracentesis
   - Arterial puncture
   - Arthrocentesis
   - Central venous line placement
   - Lumbar puncture
   - Nasogastric intubation
   - Pap smear and endocervical culture
   - Thoracentesis

The Board recommends three to five as the minimum number of directly supervised, successfully performed procedures; confirmation of proficiency is not credible with fewer procedures.

Credit in Lieu of Standard Training for Internal Medicine Candidates

Training Completed Prior to Entering Internal Medicine Residency

The Board may grant credit for some or all of the 12-month requirement at the R-1 level for training taken prior to entering training in internal medicine, as outlined below. The program director of an accredited internal medicine residency program must petition the Board to grant credit in lieu of standard R-1 internal medicine training. No credit will be granted to substitute for 24 months of accredited R-2 and R-3 internal medicine training.

1. Month-for-month credit may be granted for satisfactory completion of internal medicine rotations taken during a US or Canadian accredited non-internal medicine residency program if all of the following criteria are met:
   a. the internal medicine training occurred under the direction of a program director of an accredited internal medicine program;
   b. the training occurred in an institution accredited for training internal medicine residents; and
   c. the rotations were identical to the rotations of the residents enrolled in the accredited internal medicine residency program.

2. For trainees who have satisfactorily completed some US or Canadian accredited training in another specialty, the Board may grant:
   a. month-for-month credit for the internal medicine rotations that meet the criteria listed under (1) above; plus
   b. a maximum of 6 months of credit for the training in a family medicine or pediatrics program; or
   c. a maximum of 3 months of credit for training in a non-internal medicine specialty program.

3. Up to 12 months of credit may be granted for at least 3 years of full-time US or Canadian accredited training in another clinical specialty, and certification by an ABMS member Board in that specialty.*

4. Up to 12 months of credit may be granted for at least 3 years of verified internal medicine training abroad.*

* Requires a fee of $300. Guidelines for proposals are available at www.abim.org.

Training Completed Abroad by Current Full-Time US or Canadian Faculty*

Full-time internal medicine faculty members in an LCME-accredited medical school or an accredited Canadian medical school may qualify for admission to the Certification Examination in Internal Medicine if they:
1. are proposed by the chair or program director of an accredited internal medicine residency program;
2. have completed 3 or more years of verified internal medicine training abroad;
3. hold an appointment at the level of associate professor or higher at the time of proposal; and
4. have completed 8 years, after formal training, as a clinician-educator or a clinical investigator in internal medicine with a full-time appointment on a medical school faculty.

* Requires a fee of $300. Guidelines for proposals are available at www.abim.org.

Training in Combined Programs

The ABIM recognizes internal medicine training combined with training in the following programs:
- Dermatology
- Emergency medicine
- Emergency medicine/critical care medicine
• Family medicine  
• Medical genetics  
• Neurology  
• Nuclear medicine  
• Pediatrics  
• Physical medicine and rehabilitation  
• Preventive medicine  
• Psychiatry

Guidelines for the combined training programs and requirements for credit toward the ABIM Certification Examination in Internal Medicine are available at www.abim.org.

*The six required components are: (1) patient care (which includes medical interviewing, physical examination, and procedural skills), (2) medical knowledge, (3) practice-based learning and improvement, (4) interpersonal and communication skills, (5) professionalism; and (6) systems-based practice.

**Requirements for Certification in Subspecialties and Added Qualifications**

**General Requirements**

In addition to the primary certificate in internal medicine, the Board offers subspecialty certificates and certificates of added qualifications (AQs). Subspecialty certificates are offered in cardiovascular disease; endocrinology, diabetes, and metabolism; gastroenterology; hematology; infectious disease; medical oncology; nephrology; pulmonary disease; and rheumatology.

Certificates of added qualifications recognize special expertise in areas that have a fundamental practice-oriented relationship to an underlying discipline and are offered currently in adolescent medicine, clinical cardiac electrophysiology, critical care medicine, geriatric medicine, interventional cardiology, sports medicine, and transplant hepatology. Diplomates must maintain a valid underlying certificate to obtain certification and be eligible for renewal of a certificate of added qualification. Information regarding each of the added qualifications examinations is available upon request.

To become certified in a subspecialty, physicians must have been previously certified in internal medicine by the ABIM. To certify in an added qualification, a physician must hold a currently valid certificate in the underlying discipline. For all subspecialties and areas of added qualifications, a physician must also have completed the requisite training, demonstrated clinical competence in the care of patients, met the licensure and procedural requirements, and passed the secure examination for that discipline.

No credit will be granted toward certification in a subspecialty or area of added qualifications for training completed outside of an accredited US or Canadian program.

Fellowship training taken before completing the requirements for the MD or DO degree, training as a chief medical resident, practice experience, and attendance at postgraduate courses may not be credited toward the requirements for subspecialty certification.

To be admitted to an examination, candidates must have completed the required training in the subspecialty or area of added qualifications by October 31 of the year of examination.

Candidates for certification in the subspecialties and the areas of added qualifications must meet the Board’s requirements for duration of training as well as minimum duration of full-time clinical training. Clinical training requirements may be met by aggregating full-time clinical training that occurs throughout the entire fellowship training period; clinical training need not be completed in successive months. Time spent in continuity outpatient clinic, during non-clinical training, is in addition to the requirement for full-time clinical training. Educational rotations completed during training may not be double counted to satisfy both internal medicine and subspecialty training requirements.

**Training and Procedural Requirements**

The total months of training required, including specific clinical months, and requisite procedures for each subspecialty and area of added qualifications are outlined by discipline below.

1 Two years of accredited cardiovascular disease training are required for candidates who initiated fellowship training prior to June 1990.
2 Two years of accredited gastroenterology training are required for candidates who initiated fellowship training prior to June 1996.
3 Requires minimum ½ day per week in continuity outpatient clinic.
Procedural Requirements

Subspecialties/AQs

Adolescent Medicine
No required procedures.

Cardiovascular Disease
Advanced cardiac life support (ACLS), including cardioversion; electrocardiography, including ambulatory monitoring and exercise testing; echocardiography; arterial catheter insertion; and right-heart catheterization, including insertion and management of temporary pacemakers.

Clinical Cardiac Electrophysiology
Electrophysiologic studies both with a catheter and intraoperatively; catheter-based and other ablation procedures; and implantation of pacemakers, and cardioverters-defibrillators (a minimum of 150 intracardiac procedures in at least 75 patients, of which 75 are catheter-based ablation procedures, including postdiagnostic testing, and 25 are initial implantable cardioverter-defibrillator procedures, including programming).

Critical Care Medicine
Maintenance of open airway; oral/nasotracheal intubation; ventilator management, including experience with various modes; insertion and management of chest tubes; advanced cardiac life support (ACLS); placement of arterial, central venous, and pulmonary artery balloon flotation catheters; and calibration and operation of hemodynamic recording systems.

Endocrinology, Diabetes, and Metabolism
Thyroid aspiration biopsy.

Gastroenterology
Proctoscopy and/or flexible sigmoidoscopy; diagnostic upper gastrointestinal endoscopy; colonoscopy, including biopsy and polypectomy; esophageal dilation; therapeutic upper and lower gastrointestinal endoscopy, and liver biopsy.

Geriatric Medicine
No required procedures.

Hematology
Bone marrow aspiration and biopsy, including preparation, staining, examination, and interpretation of blood smears, bone marrow aspirates, and touch preparations of bone marrow biopsies; measurement of complete blood count, including platelets and white cell differential, using automated or manual techniques with appropriate quality control; administration of chemotherapeutic agents and biological products through all therapeutic routes; and management and care of indwelling venous access catheters.

Infectious Disease
Microscopic evaluation of diagnostic specimens including preparation, staining, and interpretation; management, maintenance, and removal of indwelling venous access catheters; and administration of antimicrobial and biological products via all routes.

Interventional Cardiology
A minimum of 250 therapeutic interventional cardiac procedures during 12 months of accredited interventional cardiology fellowship training. Those out of interventional cardiology training 3 years or more as of June 30 of the year of exam must document post-training performance as primary operator of 150 therapeutic interventional cardiac procedures in the 2 years prior to application for exam.

Medical Oncology
Bone marrow aspiration and biopsy; administration of chemotherapeutic agents and biological products through all therapeutic routes; and management and care of indwelling venous access catheters.

Nephrology
Placement of temporary vascular access for hemodialysis and related procedures; acute and chronic hemodialysis; peritoneal dialysis (excluding placement of temporary peritoneal catheters); continuous renal replacement therapy (CRRT); and percutaneous biopsy of both autologous and transplanted kidneys.

Pulmonary Disease
Oral/nasal intubation; fiberoptic bronchoscopy and accompanying procedures; ventilator management; thoracentesis and percutaneous pleural biopsy; arterial puncture; placement of arterial and pulmonary artery balloon flotation catheters; calibration and operation of hemodynamic recording systems; supervision of the technical aspects of pulmonary function testing; progressive exercise testing; and insertion and management of chest tubes.

Rheumatology
Diagnostic aspiration of and analysis by light and polarized light microscopy of synovial fluid from diarthrodial joints, bursae, and tenosynovial structures; and therapeutic injection of diarthrodial joints, bursae, tenosynovial structures, and entheses.

Sports Medicine
No required procedures.

Clinical Competence Requirements

The Board requires documentation that candidates for certification in the subspecialties are competent in (1) patient care (which includes medical interviewing, physical examination, and procedural skills), (2) medical knowledge, (3) practice-based learning and improvement, (4) interpersonal and communication skills, (5) professionalism, and (6) systems-based practice.

Through its tracking process, the Board requires verification of subspecialty fellows' clinical competence from both the subspecialty training program director and the chair of the department of medicine.

As outlined in the "Program Director Ratings of Clinical Competence" table above, all fellows must receive satisfactory ratings of overall clinical competence and moral and ethical behavior in each of the required years of training. In addition, fellows must receive satisfactory ratings in each of the components of clinical competence and the requisite procedures during the final year of required training. It is the fellow's responsibility to arrange for any additional training needed to achieve a satisfactory rating in each component of clinical competence.

Dual Certification Requirements

Hematology and Medical Oncology
Dual certification in hematology and medical oncology requires 3 years of accredited combined training which must include a minimum of 18 months of full-time clinical training, of which at least 12 months are in the diagnosis and management of a broad spectrum of neoplastic diseases including hematological malignancies, and 6 months are in the diagnosis and management of a broad spectrum of non-neoplastic hematological disorders. If the combined training must be taken in two different programs, 24 continuous months must be in one institution, and both institutions must be accredited in both hematology and medical oncology.

During the entire 3 years, the fellow must attend a minimum of ¾ day per week in continuity outpatient clinic. Time spent in continuity outpatient clinic, during non-clinical training, is in addition to the requirement for full-time clinical training.

Candidates must complete all 3 years of required combined training before being admitted to an examination in either subspecialty. Those who elect to take an examination in one subspecialty following only 2 years of fellowship training will be required to complete 4 years of accredited training for dual certification.
Pulmonary Disease and Critical Care Medicine

Candidates seeking dual certification in pulmonary disease and critical care medicine must complete a minimum of 3 years of accredited combined training, 18 months of which must be full-time clinical training. Critical care medicine is an added qualification to the subspecialty of pulmonary disease; thus, certification in pulmonary disease must be achieved before the candidate is eligible to apply for admission to the critical care medicine examination.

Rheumatology and Allergy and Immunology

Dual certification in rheumatology and allergy and immunology requires a minimum of 3 years of training which must include: (1) at least 12 months of clinical rheumatology training supervised by the director of an accredited rheumatology training program, (2) 18 consecutive months of rheumatology continuity clinic; and (3) at least 18 months of allergy and immunology training supervised by the training program director of an accredited program in allergy and immunology. Plans for combined training should be prospectively approved in writing by both the rheumatology and the allergy and immunology training program directors and by the ABIM and the American Board of Allergy and Immunology. Admission to either examination requires (1) certification in internal medicine; (2) satisfactory clinical competence; and (3) completion of the entire 3-year combined program.

Candidates seeking dual certification for other subspecialty combinations should contact the ABIM for information.

Special Candidates for Subspecialties and Added Qualifications

ABIM diplomates in internal medicine may be proposed for special consideration for admission to a subspecialty or added qualifications examination by the program director of an accredited fellowship program if they:

1. have completed the full training required by ABIM in the subspecialty or area of added qualifications in another country and have met all current applicable ABIM procedural requirements;
2. are a full-time associate professor or higher in the specified subspecialty division of the department of medicine in an LCME-accredited medical school or an accredited Canadian medical school;
3. have served 8 years, after formal training, as a clinician-educator or clinical investigator with a full-time appointment on a medical school faculty; and
4. possess a valid, unrestricted license to practice medicine in a state, territory, commonwealth, province, or possession of the United States or Canada.

Guidelines for proposing candidates for special consideration for admission to the subspecialty and added qualifications examinations are available at www.abim.org. Proposals require a fee of $300.

Certification Using the Research Pathway

The Research Pathway is intended for trainees planning academic careers as investigators in basic or clinical science. The pathway integrates training in clinical medicine with 3 years of training in research methodology. Although prospective planning of this pathway by trainees and program directors is necessary, prospective approval by the Board is no longer a requirement. However, program directors must document the clinical and research training experience each year through the Board’s tracking program. The chart below describes the Research Pathway requirements.

The Research Pathway requires a minimum of 36 months of research training in which 80% of time is devoted to research and, at most, 20% of time to clinical work. During the entire 3 years the trainee must attend a minimum of 1/2 day per week in continuity outpatient clinic. Time spent in continuity outpatient clinic during non-clinical training is in addition to the requirement for full-time clinical training.

The Board defines research as scholarly activities intended to develop new scientific knowledge. The research experience of trainees should be mentored and reviewed. Unless the trainee has already achieved an advanced graduate degree, training should include completion of work leading to one or its equivalent. The last year of research training may be taken in a full-time faculty position if the level of commitment to mentored research is maintained at 80%.

During internal medicine research training, 20% of each year must be spent in clinical experiences including at least 1/2 day per week in a continuity clinic. During subspecialty research training, at least 1/2 day per week must be spent in an ambulatory clinic. Ratings of satisfactory clinical performance must be maintained annually for each trainee in the ABIM Research Pathway.

For additional information, contact the Board.

Internal Medicine Research Pathway

Internal medicine training

(Direct patient responsibility) 24 months
Research training (80%) 20 months
Ambulatory clinics during research training (10%) 36 months
Additional clinical training during research (10%) [may be intermittent or block time]

Total training 5 years
Internal Medicine examination August, R-5

Subspecialty Research Pathway

Internal medicine training

(Direct patient responsibility) 24 months
Subspecialty clinical training (80%) 20 months
Research training (80%) 12-24 months*
Ambulatory clinic during research training (10%) 36 months
Total training 6 or 7 years*
Internal medicine examination August, R-4
Subspecialty/AQ examination Fall, R-6 or 7*
* Based on subspecialty

Special Training Policies

Disclosure of Performance Information

Trainees planning to change programs must make requests to their current program and to the Board to send written evaluations of past performance to the new program. These requests must be made in a timely manner to ensure that the new program director has the performance evaluations for review before offering a position. A new program director may also request performance evaluations from previous programs and from the Board concerning trainees who apply for a new position. The Board will respond to requests from trainees and program directors by providing any performance evaluations it has in its possession and the total credits accumulated toward the Board’s training requirements for certification.

Due Process for Evaluations

The responsibility for the evaluation of a trainee’s clinical competence and moral and ethical behavior rests with the program, not with the Board. The Board is not in a position to re-examine the facts and circumstances of an individual’s performance. As required
by the ACOME in its Essentials of Accredited Residencies in Graduate Medical Education, the educational institution must provide appropriate due process for its decisions regarding a trainee's performance.

**Leave of Absence and Vacations**

Trainees may take up to 1 month per year of training for vacation, parental or family leave, or illness (including pregnancy-related disabilities). Training must be extended to make up any absences exceeding 1 month per year of training. Vacation leave is essential and cannot be forfeited for any reason.

**Definition of Full-time Training**

Full-time training is defined as daily attendance with respect to such matters. Faculty and trainees of full-time training must include systematic clinical observation with formative and summative evaluation of performance by faculty and senior trainees.

**Reduced-Schedule Training**

Interrupted full-time training is acceptable, provided that no period of full-time training is shorter than 4 weeks. In any 12-month period, at least 6 months should be spent in training. Patient care responsibilities should be maintained in a continuity clinic during the non-training component of the year. Board approval must be obtained before initiating an interrupted training plan. Part-time training, whether or not continuous, is not acceptable.

**Other Policies**

**Board's Evaluations and Judgments**

Candidates for certification and maintenance of certification agree that their professional qualifications, including their moral and ethical standing in the medical profession and their competence in clinical skills, will be evaluated by the Board, and the Board's good faith judgment concerning such matters will be final.

The Board may make inquiry of persons named in candidates' applications and of other persons, such as authorities of licensing bodies, hospitals, or other institutions as the Board may deem appropriate with respect to such matters. Candidates agree that the Board may provide information it has concerning them to others whom the Board judges to have a legitimate need for it.

The Board makes academic and scientific judgments in its evaluations of the results of its examinations. Situations may occur, even though no fault of the candidates, that render examination results unreliable in the judgment of the Board. Candidates agree that if the Board determines that, in its judgment, the results of their examination are unreliable, the Board may require the candidates to retake an examination at its next administration or other time designated by the Board.

**Board Eligibility**

The Board does not use, define, or recognize the term "Board Eligible."

**Reporting Certification Status**

The Board will routinely report through its Web site or by mail, whether candidates are certified (including dates) or not certified. If a diplomate was previously certified, the dates of former certification will be reported. If certification is revoked, the Board will report certification status as "Revoked." If certification is suspended, the Board will report "Not Certified." The Board routinely informs the American Board of Medical Specialties (ABMS) of the status of its diplomates. Those with suspended certification will be listed as "inactive" by the ABMS while their certification is suspended.

On a candidate's written request to the Board, the following information will also be provided in writing: (1) that an application is currently in process and/or (2) the year the candidate was last admitted to examination.

**Representation of Certification Status**

Diplomates of the Board must accurately state their certification status at all times. This includes descriptions in curriculum vitae, advertisements, publications, directories, and letterheads. Diplomates with expired time-limited certification may not claim board certification and must revise all descriptions of their qualifications accordingly. When a physician misrepresents certification status, the Board may notify local credentialing bodies, licensing bodies, law enforcement agencies, and others.

**Errors and Disruptions in Examination Administration**

Occasionally problems occur in the creation, administration, and scoring of examinations. For example, power failures, hardware and software problems, human errors, or weather problems may interfere with some part of the examination process. When such problems occur, ABIM will provide the affected candidates with an opportunity for reexamination. Re-examination without fee shall be the candidate's sole remedy. The ABIM shall not be liable for inconvenience, expense, or other damage caused by any problems in the creation, administration, or scoring of an examination, including the need for retesting or delays in score reporting. In no circumstance will ABIM reduce its standards as a means of correcting a problem in examination administration.

**Confidentiality Policy**

The ABIM considers the certification or recertification status of its candidates and diplomates to be public information.

The ABIM provides a diplomate's certification status and personal identifying information, including address and social security number, to the Federation of State Medical Boards (FSMB) and the American Board of Medical Specialties (ABMS), which publishes the Official ABMS Directory of Board Certified Medical Specialists. The FSMB and ABMS use personal identifying information, including social security numbers, as a unique internal identifier to maintain the confidentiality of this information.

The ABIM provides residency and fellowship training directors with information about a trainee's prior training and pass/fail status on certifying examinations. If a diplomate wishes for the ABIM to provide the program director with the trainee's score on his/her first attempt at the certification examination for that area of training. The ABIM uses performance on examinations and other information for research purposes. In these instances, the Board does not identify specific individuals, hospitals, or practice associations.

The ABIM reserves the right to disclose information it possesses about any individual whom it judges has violated ABIM rules, engaged in misrepresentation or unprofessional behavior, or shows signs of impairment.

**Licensure**

All candidates for certification and maintenance of certification must possess a valid, unrestricted, and unchallenged medical license in the jurisdiction where they practice. Candidates with licenses that are restricted, suspended, revoked, or surrendered in lieu of disciplinary action in a jurisdiction will be denied admission to a certifying examination or denied recertification. Restrictions include but are not limited to conditions, contingencies, probation, and stipulated agreements.
Disability  

The Board recognizes that some candidates have physical limitations that make it impossible for them to fulfill the requirements for proficiency in performing procedures. For such individuals, the procedural skills requirement may be waived. Program directors should write to the Board for an exception before the individual enters training or when the disability becomes established.

The Board is committed to offering suitable examination accommodations for all candidates, including individuals with disabilities.

When necessary, alternative arrangements under conditions comparable to those provided for other candidates are offered to disabled individuals. Candidates who need accommodation for a disability during an examination must provide a written request to the Board at the time of application for examination. The Board will then inform the candidate of the documentation that must be received by the Board no later than the examination registration deadline.

Reapplication for special accommodation is not required for each examination administration unless a new accommodation is requested. The Board treats requests for accommodations as confidential. For additional information about the process and documentation requirements, please contact the Board at 800 441-2246, extension 3520 or accommodations@abim.org, or refer to the ABIM Web site at www.abim.org/cert/adainfo.shtml.

Substance Abuse

If a candidate or a diplomate has a history of substance abuse, documentation of at least 1 year of continuous sobriety from a reliable monitoring source must be submitted to the Board for admission to an examination or to receive a certificate. The Board treats such information as confidential.

Suspension and Revocation of Certificates

The Board may, at its discretion, revoke certification if the diplomate was not qualified to receive the certificate at the time it was issued, even if the certificate was issued as a result of a mistake on the part of the Board. It may also revoke the certificate if the diplomate fails to maintain moral, ethical, or professional behavior satisfactory to the Board or engages in misconduct that adversely affects professional competence or integrity. It may revoke or suspend the certificate if (1) the diplomate made any material misstatement of fact or omission of fact to the Board in connection with application or to any third party concerning the diplomate’s certification status; or (2) the diplomate’s license to practice medicine has been revoked, suspended, restricted, or surrendered in lieu of disciplinary action in any jurisdiction. Reinstatement of suspended certification requires restoration of licensure in the jurisdiction(s) where the physician practices.

Irregular Behavior on Examinations

The Board’s examinations are copyrighted and administered in secure testing centers by test administrators who are responsible for maintaining the integrity and security of the certification process. Test administrators are required to report to the Board any irregular or improper behavior by a candidate, such as giving or obtaining information or aid, looking at the test material of others, removing examination materials from the test center, taking notes, bringing electronic devices (e.g., beepers, pagers, cell phones) into the examination, failing to comply with time limits or instructions, talking, or other disruptive behavior. Irregular or improper behavior that is observed, made apparent by statistical analysis, or uncovered by other means will be considered a subversion of the certification process and will constitute grounds for invalidation of a candidate’s examination.

Other actions that the Board may take at its discretion include exclusion from future examinations and informing program director(s), licensing bodies, impaired physicians advocacy groups, or law enforcement agencies of ABIM actions.

Late Applications and Refunds

The schedule of examination dates appears at www.abim.org. There is a non-refundable $300 late fee for any application submitted during the Late Registration period. Fifty-five percent of the exam fee will be refunded if written cancellation is received on or before 11:59 pm (Eastern Time) on the cancellation deadline, or if the application is disapproved. Fifty percent of the exam fee will be refunded if written cancellation is received between 12:00 am (Eastern Time) on the day after the cancellation deadline and 11:59 pm (Eastern Time) on the day prior to the exam. No refund will be issued if written cancellation is received after 12:00 am (Eastern Time) on the day of the exam. All requests for cancellations must be in writing (letter, e-mail, or fax). Late fees are not eligible for refund. There are no “extenuating circumstances” which will result in an exception to these policies.

Re-examination

Candidates who are unsuccessful on any certification examination may apply for re-examination. There is no restriction on the number of opportunities for re-examination. Once admitted to an examination, candidates will be considered to have fulfilled the training requirements for future examinations in that discipline. All candidates for re-examination must meet the requirements for licensure status and professional standing and any applicable procedural requirements.

Publications

The following publications are available from the ABIM upon request at no charge. These are not designed to aid in preparation for examinations. To request a publication, send an email to request@abim.org or call 800 441-2246.

The Board has a fact sheet with information about each Certificate of Added Qualifications on:

- Adolescence Medicine
- Clinical Cardiac Electrophysiology
- Critical Care Medicine
- Geriatric Medicine
- Interventional Cardiology
- Sports Medicine
- Transplant Hepatology

For information about the ABIM Research Pathway, request:

- Guidelines and Criteria for the ABIM General and Subspeciality Internal Medicine Research Pathway

The Board offers several tools to assist program directors, faculty, and trainees with the evaluation process:

- Mini-CEX: Clinical Evaluation Exercise
- Documentation Log Book for Internal Medicine Procedures
- Residents: Evaluating Your Clinical Competence in Internal Medicine
- Attending Physicians: Your Role in Evaluating Internal Medicine Residents
- Attending Physicians’ Evaluation of Trainees’ Competencies
- Self-Assessment for Trainees’ Competencies
- Maintenance of Certification: Continuous Professional Development Program
- Selecting Self-Evaluation Modules

For other ABIM Publications, visit our Web site at www.abim.org.
Schedule of Examinations
Certification examination in

Internal Medicine
Date(s): August 15, 18, 21, 23, 25, 28 or 30, or September 1, 6 or 8, 2006
Registration Period: December 1, 2005, to February 1, 2006
Late Registration Period*: February 2 to March 1, 2006
Fee (US): $1,080
Cancellation Deadline: June 1, 2006

Adolescent Medicine¹
Date(s): Not Available, given every other year
Please see 2007 schedule when it is released

Cardiovascular Disease
Date(s): November 1-2 or 2-3, 2006
Registration Period: March 1 to May 1, 2006
Late Registration Period*: May 2 to June 1, 2006
Fee (US): $1,500
Cancellation Deadline: September 1, 2006

Clinical Cardiac Electrophysiology
Date(s): November 10, 2006
Registration Period: March 1 to May 1, 2006
Late Registration Period*: May 2 to June 1, 2006
Fee (US): $1,500
Cancellation Deadline: September 1, 2006

Critical Care Medicine
Date(s): October 20 or November 6, 2006
Registration Period: March 1 to May 1, 2006
Late Registration Period*: May 2 to June 1, 2006
Fee (US): $1,500
Cancellation Deadline: September 1, 2006

Endocrinology, Diabetes, and Metabolism
Date(s): October 30, 2006
Registration Period: March 1 to May 1, 2006
Late Registration Period*: May 2 to June 1, 2006
Fee (US): $1,500
Cancellation Deadline: September 1, 2006

Gastroenterology
Date(s): October 16 or November 15, 2006
Registration Period: March 1 to May 1, 2006
Late Registration Period*: May 2 to June 1, 2006
Fee (US): $1,500
Cancellation Deadline: September 1, 2006

Geriatric Medicine
Date(s): October 23 or November 13, 2006
Registration Period: March 1 to May 1, 2006
Late Registration Period*: May 2 to June 1, 2006
Fee (US): $1,500
Cancellation Deadline: September 1, 2006

Hematology
Date(s): October 27, 2006
Registration Period: March 1 to May 1, 2006
Late Registration Period*: May 2 to June 1, 2006
Fee (US): $1,500
Cancellation Deadline: September 1, 2006

Infectious Disease
Date(s): October 24, 2006
Registration Period: March 1 to May 1, 2006
Late Registration Period*: May 2 to June 1, 2006
Fee (US): $1,500
Cancellation Deadline: September 1, 2006

Interventional Cardiology
Date(s): November 9, 2006
Registration Period: March 1 to May 1, 2006
Late Registration Period*: May 2 to June 1, 2006
Fee (US): $1,500
Cancellation Deadline: September 1, 2006

Medical Oncology
Date(s): October 26 or November 16, 2006
Registration Period: March 1 to May 1, 2006
Late Registration Period*: May 2 to June 1, 2006
Fee (US): $1,500
Cancellation Deadline: September 1, 2006

Nephrology
Date(s): October 18, 2006
Registration Period: March 1 to May 1, 2006
Late Registration Period*: May 2 to June 1, 2006
Fee (US): $1,500
Cancellation Deadline: September 1, 2006

Pulmonary Disease
Date(s): October 19 November 7, 2006
Registration Period: March 1 to May 1, 2006
Late Registration Period*: May 2 to June 1, 2006
Fee (US): $1,500
Cancellation Deadline: September 1, 2006

Rheumatology
Date(s): November 20, 2006
Registration Period: March 1 to May 1, 2006
Late Registration Period*: May 2 to June 1, 2006
Fee (US): $1,500
Cancellation Deadline: September 1, 2006

Sports Medicine²
Dates: July 20, 21, 22, 27, 28 or 29, or August 3, 4 or 5, 2006
Registration Period: November 1, 2005, to January 1, 2006
Late Registration Period*: January 2, to February 1, 2006
Fee (US): $1,500
Cancellation Deadline: May 1, 2006

Transplant Hepatology
Date(s): Fall TBA
Registration Period: March 1 to May 1, 2006
Late Registration Period: May 2 to June 1, 2006
Fee (US): $1,500
Cancellation Deadline: September 1, 2006

Maintenance of Certification (Recertification)
Date(s): Spring 2006**
Registration Period: December 1, 2005, to February 15, 2006
Date(s): Fall 2006**
Registration Period: May 1 to August 1, 2005

* $300 nonrefundable penalty fee for applications received during the Late Registration Period.
¹Administered by the American Board of Pediatrics.
²Administered by the American Board of Family Practice.
**Check ABIM Web site for information, www.abim.org.

Refund Policy: 85% of exam fee refunded for cancellation before registration closes; 50% of exam fee refunded for cancellations after registration closes, up to the day of the examination.
Note: It is the sole responsibility of the candidate to be aware of and comply with registration deadlines. To register for an examination, go to "online services" at www.abim.org.

American Board of Medical Genetics

Sharon B Robinson, MS, Administrator
9650 Rockville Pike
Bethesda, MD 20814-3998
301 634-7316
301 634-7320 Fax

2005 Board of Directors
Georgia L Wiesner, MD, MS, President, Cleveland, Ohio
Jean Amos-Wilson, MD, Secretary, Cypress, California
Arthur S Aylsworth, MD, Chapel Hill, North Carolina
Nancy J Carpenter, PhD, Tulsa, Oklahoma
Richard W Erbe, MD, Treasurer, Buffalo, New York
William A Gahl, MD, PhD, Bethesda, Maryland
Jacqueline T Hecht, PhD, Houston, Texas
Cynthia A Moore, MD, PhD, Atlanta, Georgia
Maximilian Muenke, MD, Vice President, Bethesda, Maryland
Stuart Schwartz, PhD, Chicago, Illinois
Margretta R Seashore, MD, New Haven, Connecticut
Karla J Matteson, PhD, Executive Director, Knoxville, Tennessee

(These criteria and conditions apply to the 2007 certification examination cycle and are subject to change without notice. The American Board of Medical Genetics [ABMG] offers examinations every 2 years; the next examination cycle is August, 2007. All applicants are advised to contact the Board to ascertain whether the information below is current.)

Purpose and Sponsorship
The ABMG certifies individuals who provide services in medical genetics. The ABMG determines the doctoral degree requirements, the graduate medical training requirements, the medical genetics training requirements, the credentialing requirements, and the examination requirements for ABMG certification. The ABMG offers certification in five primary specialty areas:
- clinical genetics
- PhD medical genetics (2007 will be the last offering of this specialty certification)
- clinical cytogenetics
- clinical biochemical genetics
- clinical molecular genetics

The ABMG is responsible for preparation, administration, and grading of the certifying examinations in medical genetics.

The ABMG provides accreditation for medical genetics training programs. The ABMG accredits medical genetics fellowship programs in the specialties of PhD medical genetics, clinical cytogenetics, clinical biochemical genetics, and clinical molecular genetics. The Residency Review Committee (RRC) for Medical Genetics of the Accreditation Council for Graduate Medical Education (ACGME) accredits genetics residency programs in the specialty of clinical genetics.

The ABMG was incorporated in 1980 under sponsorship of the American Society of Human Genetics, Inc, and has been recognized as a member board of the American Board of Medical Specialties (ABMS) since 1991.

I. Training Requirements for Certification by the American Board of Medical Genetics
Individuals seeking certification by the ABMG must fulfill all requirements for certification as detailed in this document. For an
individual who has a doctoral degree earned outside of the US, Canada, or Puerto Rico, additional requirements may pertain (see Section XII).

A. Doctoral Degree Requirements:

<table>
<thead>
<tr>
<th>Clinical Genetics</th>
<th>MD or DO</th>
</tr>
</thead>
<tbody>
<tr>
<td>PhD Medical Genetics</td>
<td>PhD*</td>
</tr>
<tr>
<td>Clinical Cytogenetics</td>
<td>MD, DO, or PhD*</td>
</tr>
<tr>
<td>Clinical Biochemical Genetics</td>
<td>MD, DO, or PhD*</td>
</tr>
<tr>
<td>Clinical Molecular Genetics</td>
<td>MD, DO, or PhD*</td>
</tr>
</tbody>
</table>

* PhD must be in genetics, human genetics, or a related field, as determined by the ABMG.

B. For applicants for the Clinical Genetics specialty only, graduate medical training requirements are either:

1. Twenty-four months of satisfactorily completed full-time training in an ACGME-accredited residency program in a specialty other than clinical genetics that is recognized by the ABMS (eg, pediatrics, OB-GYN, internal medicine);

or

2. Forty-eight months of satisfactorily completed full-time training in an ACGME-accredited 4-year clinical genetics residency. *Note: In this instance the 48 months of training satisfy both the graduate medical training requirement and the medical genetics training requirement; *

or

3. Five years of satisfactorily completed full-time training in an ACGME-accredited combined pediatric/medical genetics residency or internal medicine/medical genetics residency. Upon successful completion of all requirements of the combined pediatrics and or internal medicine and medical genetics residency, a trainee is qualified to apply for certification by either or both Boards. Applicants must satisfactorily complete the specific credentialing requirements of each Board to be eligible to sit for the examination of that Board. Certification in one specialty is not contingent upon certification in the other.

C. Medical genetics training requirements for all specialties:

1. For certification in any one of the ABMG specialties: 24 months of completed full-time training in an ABMG-accredited fellowship program in that specialty or ACGME-accredited clinical genetics residency.

2. For certification in clinical genetics as an additional ABMG specialty: 24 months of completed full-time training in an ACGME-accredited clinical genetics residency.

3. For certification in each additional ABMG specialty (except clinical genetics): an additional 12 months of completed full-time training in an ABMG-accredited fellowship program in that specialty.

<table>
<thead>
<tr>
<th>Number of ABMG specialty certifications*</th>
<th>Months of completed ABMG-approved medical genetics training</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>24 months</td>
</tr>
<tr>
<td>2</td>
<td>36 months</td>
</tr>
<tr>
<td>3</td>
<td>48 months</td>
</tr>
<tr>
<td>4</td>
<td>60 months</td>
</tr>
</tbody>
</table>

*Note: Certification in clinical genetics always requires 24 months of completed training in an ACGME-accredited clinical genetics residency.

4. An individual who holds an earned PhD from a training program that also has an ABMG-accredited PhD medical genetics training program may, at the discretion of the program director of the individual's ABMG-accredited medical genetics training program, apply for certification in the PhD medical genetics specialty and one laboratory specialty after 2 years of combined medical genetics training in these two specialties in an ABMG-accredited program, if and only if:

- The earned PhD is from a degree-granting program that is documented to be integrated with a postdoctoral program that is ABMG-accredited for at least PhD medical genetics and one laboratory specialty; and
- During the degree program, the individual has taken graduate course work including formal medical genetics and mathematical genetics courses, and the individual documents significant participation in clinical genetics: interacting with patients, communicating with referring physicians, and regular attendance at clinical conferences. These activities must be documented and described in detail by the director of the ABMG-accredited medical genetics program and by the institution's director of the PhD program granting the doctoral degree; and
- The applicant submits two logbooks, one of 150 cases for the laboratory specialty collected during the medical genetics fellowship training and one of 75 cases for the specialty of PhD medical genetics (unrelated to the laboratory specialty) also collected during the medical genetics fellowship training.

The applicant's proposed medical genetics training program, along with a description of the clinical experience during training for the doctoral degree, must be submitted in writing by the director of the ABMG-accredited medical genetics program to the ABMG in advance of initiating the fellowship and must be approved by the ABMG Credentials Committee.

II. Credentialing Requirements for Certification by the American Board of Medical Genetics

The credentialing process determines an applicant's candidate status for the ABMG certifying examination. All documents required for the credentialing process must be submitted to the ABMG Administrative Office and postmarked by the deadline (see Deadlines, Section IX).

Four categories of applicants are recognized:

- First-time applicants for ABMG certification
- ABMG diplomates seeking certification in an additional specialty or specialties
- Individuals who have been active candidates but who have failed to achieve certification in two consecutive examination cycles or within 6 years of initial application
- Individuals who have been active candidates but who failed to achieve certification in one cycle and who are reapplicants for the following examination cycle

A. First-time applicants for ABMG certification must submit:

1. A completed and notarized application form.
2. Application review fee (see Fees, Section X).
3. Curriculum vitae with bibliography that includes dates and location of undergraduate education, doctoral education, postdoctoral training, medical genetics training, and professional employment.
4. Documentation of doctoral degree: An official final transcript (including degree earned, field in which the degree was earned, and date the degree was earned). A photocopy of a final transcript is not acceptable.
5. Documentation of required medical genetics training in an ABMG-accredited fellowship or ACGME-accredited clinical genetics residency: "Verification of Training in Medical Genetics" form completed and signed by the trainee's medical genetics fellowship program director or clinical genetics residency director verifying the specialty area(s) of training, inclusive
dates of training, satisfactory progress of the trainee, and good character of the trainee.

An applicant completing his/her required medical genetics training by July 31, 2007, may apply for ABMG certification in 2007. If the required medical genetics training is not completed by December 31, 2006, the ABMG Administrative Office will contact the program/residency director at the conclusion of the medical genetics training period for verification of successful completion of training.

6. Three letters of endorsement: Each letter must support the applicant's candidacy for ABMG certification and at a minimum attest to the applicant's honesty, integrity, and good moral character. At least one letter must be from an ABMG diplomate who is a faculty member, other than the program director, in the ABMG-accredited fellowship/ACGME-accredited clinical genetics program in which the applicant trained; the other two letters must be from ABMG diplomates who are in good standing with the ABMG. Each letter of endorsement must be in a sealed envelope and signed by the diplomate over the seal.

7. Logbook of 150 cases obtained during the inclusive dates of the applicant's medical genetics training for each specialty area in which the applicant is seeking certification: The logbook must be in the format specified by the ABMG with appropriate signatures. (Note the exception from Section I.C.4 above.) An applicant who has completed his/her entire medical genetics training by December 31, 2006, must submit a completed logbook with the application. An applicant whose training in a specialty is completed between January 1, 2007, and July 31, 2007, must submit a logbook with at least 100 cases by November 30, 2006, and must submit a logbook with the remainder of the cases postmarked by March 1, 2007. [Note: Late fees do not apply to the portion of the logbook submitted between December 1, 2006, and December 15, 2006.]

8. For applicants in clinical genetics:
   a. Documentation of 24 months of training in an ACGME-accredited residency other than clinical genetics: Either a letter from the director of the ACGME-accredited residency program (other than clinical genetics) documenting satisfactory completion of 24 months of the ACGME-accredited residency training and documentation of board certification in an ABMS-recognized specialty. [Note: Completion of 48 months of training in an ACGME-accredited clinical genetics residency fulfills this requirement.]
   b. Copy of current, valid, unrestricted license to practice medicine in the US. The license must be valid on the date on which the ABMG certifying examination is taken. A temporary, limited license such as an educational or institutional license or housestaff permit is not acceptable.

B. ABMG diplomates seeking certification in an additional specialty must submit:
   1. A completed and notarized application form.
   2. Application review fee (see Fees, Section X).
   3. Curriculum vitae with bibliography that includes dates and location of undergraduate education, doctoral education, postdoctoral training, medical genetics training, and professional employment.
   4. Documentation of doctoral degree for applicants whose ABMG certification was prior to 1999: An official final transcript (including degree earned, field in which the degree was earned, date the degree was earned). A photocopy of the final transcript is not acceptable.

5. Documentation of required medical genetics training in an ABMG-accredited fellowship or ACGME-accredited clinical genetics residency: "Verification of Training in Medical Genetics" form completed and signed by the trainee's medical genetics fellowship program director or clinical genetics residency director verifying the specialty area(s) of training, inclusive dates of training, satisfactory progress of the trainee, and good character of the trainee.

6. Three letters of endorsement: Each letter must support the applicant's candidacy for ABMG certification and at a minimum attest to the applicant's honesty, integrity, and good moral character. At least one letter must be from an ABMG diplomate who is a faculty member, other than the program director, in the ABMG-accredited fellowship/ACGME-accredited clinical genetics residency in which the applicant trained; the other two letters must be from ABMG diplomates who are in good standing with the ABMG. Each letter of endorsement must be in a sealed envelope and signed by the diplomate over the seal.

7. Logbook of 150 cases obtained during the inclusive dates of the applicant's medical genetics training for each specialty area in which the applicant is seeking certification. The logbook must be in the format specified by the ABMG with the appropriate signatures. An applicant who has completed his/her entire medical genetics training by December 31, 2006, must submit a completed logbook with the application. An applicant whose training in a specialty is completed between January 1, 2006, and July 31, 2006, must submit a logbook with at least 100 cases by November 30, 2006, and must submit a logbook with the remainder of the cases postmarked by March 1, 2007. [Note: Late fees do not apply to the portion of the logbook submitted between December 17, 2006, and March 1, 2006.]

8. Those individuals seeking additional certification in clinical cytogenetics, clinical biochemical genetics, clinical molecular genetics, or PhD medical genetics must submit documentation of 12 months required medical genetics training in an ABMG-accredited fellowship: "Verification of Training in Medical Genetics" form completed and signed by the trainee's medical genetics fellowship program director verifying the specialty area(s) of training, inclusive dates of training, satisfactory progress of the trainee, and good character of the trainee.

   An applicant completing his/her required medical genetics training by July 31, 2007, may apply for ABMG certification in 2007. If the required medical genetics training has not been completed by December 31, 2006, the ABMG Administrative Office will contact the program director at the conclusion of the medical genetics training period for verification of successful completion of training.

9. Those applicants seeking additional certification in clinical genetics who have completed 24 months of training in an ACGME-accredited clinical genetics residency must submit:
   a. Documentation of 24 months of training in an ACGME-accredited residency other than clinical genetics: Either a letter from the director of the ACGME-accredited residency program (other than clinical genetics) documenting successful completion of the 24 months of the ACGME-accredited residency training and documentation of board certification in an ABMS-recognized specialty. [Note: Completion of 48 months of training in an ACGME-accredited clinical genetics residency fulfills this requirement.]
   b. Documentation of 24 months required medical genetics training in an ACGME-accredited clinical genetics residency: "Verification of Training in Medical Genetics" form
completed and signed by the trainee's clinical genetics residency program director verifying the inclusive dates of training, satisfactory progress of the trainee, and good character of the trainee.

An applicant completing his/her required medical genetics training by July 31, 2007, may apply for ABMG certification in 2006. If the required medical genetics training has not been completed by December 31, 2006, the ABMG Administrative Office will contact the residency program director at the conclusion of the clinical genetics residency for verification of successful completion of training.

c. Copy of current, valid, unrestricted license to practice medicine in the US. The license must be valid on the date on which the ABMG certifying examination is taken. A temporary, limited license such as an educational or institutional license or housestaff permit is not acceptable.

C. Individuals who have been active candidates, but who have failed to achieve certification in two consecutive examination cycles or within 6 years of initial application:

All such individuals must complete the equivalent of an additional 12 months of full-time medical genetics training in an ABMG-accredited fellowship program in that specialty or in an ACGME-accredited clinical genetics residency. A letter requesting approval for this additional training should be submitted by the program director to the ABMG Credentials Committee at the ABMG Administrative Office prior to the onset of the additional training. This letter must specify the inclusive dates and content of the additional training and must be signed by the trainee and the program director. [Note: It is the applicant's responsibility to assure that this request is submitted before, or no later than 2 months after, commencement of the additional training.]

Individuals who will have completed their additional 12 months of training by July 31, 2007, must submit:

1. A completed and notarized application form.
2. Application review fee (see Fees, Section X).
3. Curriculum vitae with bibliography that includes dates and location of undergraduate education, doctoral education, postdoctoral training, medical genetics training, and professional employment.
4. Documentation of doctoral degree: An official final transcript (including the degree earned, the field in which the degree was earned, and the date the degree was earned). A photocopy of the final transcript is not acceptable.
5. Documentation of the required additional year of medical genetics training in an ABMG-accredited fellowship program or ACGME-accredited clinical genetics residency. "Verification of Training In Medical Genetics" form completed and signed by the trainee's medical genetics fellowship program director or clinical genetics residency director verifying the specialty area(s) of training, inclusive dates of training, satisfactory progress of the trainee, and good character of the trainee.
6. Three letters of endorsement: Each letter must support the applicant's candidacy for ABMG certification and at a minimum attest to the applicant's honesty, integrity, and good moral character. At least one letter must be from an ABMG diplomate who is a faculty member, other than the program director, in the ABMG-accredited fellowship/ACGME-accredited medical genetics residency program in which the applicant trained; the other two letters must be from ABMG diplomates who are in good standing with the ABMG. Each letter of endorsement must be in a sealed envelope and signed by the diplomate over the seal.
7. A new logbook of 150 additional cases in the specialty area in which the applicant is seeking certification collected during the inclusive dates of the approved additional training period in an ABMG-accredited fellowship/ACGME-accredited clinical genetics residency program. The logbook must be in the format specified by the ABMG with the appropriate signatures.

An applicant who has completed his/her approved additional medical genetics training by December 31, 2006, must submit a completed logbook with the application.

An applicant whose training in a specialty is completed between January 1, 2007, and July 31, 2007, must submit a logbook with at least 100 cases by November 30, 2006, and must submit a logbook with the remainder of the cases postmarked by March 1, 2007. [Note: Late fees do not apply to the portion of the logbook submitted between December 17, 2006, and March 1, 2006.]

8. Applicants in clinical genetics: Copy of current, valid, unrestricted license to practice medicine in the US. The license must be valid on the date on which the ABMG certifying examination is taken. A temporary, limited license such as an educational or institutional license or housestaff permit is not acceptable.

D. Individuals who have been active candidates, but who have failed to achieve certification in one cycle and who are reapplicants for the following examination cycle, must submit:

1. A completed and notarized application form.
2. Reapplication review fee (see Fees, Section X).
3. Examination fee (see Fees, Section X).
4. Applicants in clinical genetics only: Copy of current, valid, unrestricted license to practice medicine in the US. The license must be valid on the date on which the ABMG certifying examination is taken. A temporary, limited license such as an educational or institutional license or housestaff permit is not acceptable.

III. Applicants With a Disability Requesting Special Accommodations During the Certification Examination

Applicants with a physical or mental disability who need special accommodations during the certifying examinations must check the "Application for Special Accommodations" box on the application form and must complete and submit the "Application for Special Accommodations" form with the application. The ABMG supports the intent of the Americans with Disabilities Act (ADA) and attempts to make reasonable accommodations for applicants with disabilities. The ABMG offers examinations in a place and manner accessible to individuals with disabilities or offers alternative accessible arrangements for such individuals. Auxiliary aids and services are offered only if they do not fundamentally alter the measurement of the skills and knowledge the examination is intended to test.

The applicant must notify the ABMG Administrative Office immediately if new circumstances arise after submission of the application that cause the applicant to request special accommodations during the certifying examination.

IV. Results of Application Review

A. If further documentation is required and/or the application is in some manner incomplete, the applicant will be notified.

B. The Credentials Committee of the ABMG will notify, in writing, each applicant of his/her candidate status.

1. Active candidate status granted—All credentialing requirements have been satisfied in one or more specialty areas and all application review fees have been paid. The active candidate is eligible to sit the certifying examination(s). The active
candidate will be asked to submit the examination fees at this time (see Fees, Section X).

[Note: The term "Board eligible" is not used to describe active candidate status. Active candidate status expires at the time that the results of the ABMG certifying examination are released. If a candidate fails to achieve certification for any reason (including withdrawing from the examination process), the individual loses active candidate status.]

2. Active candidate status denied—The applicant has failed to satisfy one or more credentialing requirements.

Applicants who are denied active candidate status and who are considering an appeal may write to the ABMG Administrative Office to obtain a copy of the "Appeal Process for Adverse Decisions Affecting Certification." Appeals of candidate status must be made in writing to the ABMG Administrative Office within 30 days after receipt by the applicant of notice of the adverse decision.

V. ABMG Certifying Examination

The ABMG certifying examination is offered every 2 years, beginning with the 2006 examination. The next ABMG certifying examination will be held in August 2007. Approved applicants will be sent written notification of active candidate status. This letter will also include information on examination fees and deadlines and examination sites and scheduling procedures.

A. Admission to the examination site: Candidates must bring a current government-issued photo ID (e.g., driver's license or passport) to the examination and the scheduling permit that will be mailed to the candidate. No one will be admitted to the examination without a government-issued photo identification and the scheduling permit.

B. The ABMG certifying examination is composed of two parts: a general examination and a specialty examination in one of five specialty areas. An active candidate for ABMG certification must take the general examination and at least one specialty examination. A candidate may only take the specialty examination(s) for which s/he has been credentialed.

C. An active candidate who is an ABMG diplomate and who is applying for certification in an additional specialty or specialties must take both the general examination and the specialty examination(s) for which s/he has been credentialed.

D. To be certified by the ABMG, active candidates must pass both the general examination and at least one specialty examination.

E. Failure to pass the certifying examination is not grounds for appeal.

F. Candidates must inform the proctor of any difficulties encountered at the examination site. In addition, candidates must inform the ABMG Administrative Office in writing within 1 week of the examination of any such difficulties encountered at the examination site.

G. The content of the certification examinations is proprietary and strictly confidential information. Applicants must sign a notarized statement agreeing that they will not disclose, either directly or indirectly, any question or any part of any question from the examination to any person or entity. The unauthorized receipt, retention, possession, copying, or disclosure of any certification examination materials, including but not limited to the content of any examination question, before, during, or after the examination may subject the applicant to legal action. Such legal action may result in monetary damages and/or disciplinary action including denial or revocation of certification.

VI. ABMG Certification

A. Time-limited ABMG Certificates

Candidates for ABMG certification who pass the general examination and at least one specialty examination will become diplomates of the ABMG for a period of 10 years from the date of the certifying examination. A certificate will be mailed to all diplomates in the spring following the examination. This information becomes public information and is listed in the Official ABMS Directory of Board Certified Medical Specialists.

B. Revocation of ABMG Certificates

Any certificate issued by the ABMG shall be subject to revocation at any time should the ABMG determine, in its sole judgment, that a candidate who has received a certificate was in some respect not properly qualified to have received it or is in some respect not properly qualified to retain it.

VII. Failure to Achieve ABMG Certification

A. Individuals who do not pass the ABMG certifying examination, who withdraw from the certifying examination, or who do not appear at the certifying examination site fail to achieve ABMG certification.

B. No portion of the ABMG certifying examination score will be carried forward to any future certifying examination cycle. Thus, if an applicant has passed either the general examination or a specialty examination, but not both, neither score will be carried forward.

VIII. Request to Withdraw

If an approved applicant withdraws from the examination, examination fees will not be refunded. All fees are nonrefundable.

Active candidate status is not maintained after examination results are released. Such applicants may reapply for "active candidate status." Applicants are required to achieve certification within two successive examination cycles or within 6 years of achieving active candidate status, whichever comes first. Credentials carry an applicant for two cycles. Withdrawing from an examination cycle is counted as failure to achieve certification during that cycle.

IX. Deadline for Applications

A. The electronic portions of the application must be completed online no later than November 30, 2006, and other nonelectronic materials must be postmarked no later than November 30, 2006. All required fees, documents, letters of endorsement, and other nonelectronic materials must be submitted to the ABMG Administrative Office and must be postmarked no later than November 30, 2006.

B. Late Fee: Applications electronically submitted and/or postmarked between December 1, 2006, and December 31, 2006, must be accompanied by a late fee (see Fees, Section X).

C. Applications electronically submitted and/or postmarked January 1, 2007, or later will be returned to the applicant without review.

D. Notification of Receipt of Applications

1. Candidates will automatically be notified of the receipt of an online application form.

2. The ABMG Administrative Office cannot respond to individual inquiries regarding receipt of other application materials. Candidates should send any required written materials via United States Postal Service certified mail with a return receipt of delivery. It is the applicant's responsibility to ensure on-time delivery of the application.
X. Fees

All fees must be paid in US currency by check or money order made payable to the American Board of Medical Genetics. The ABMG does not accept credit card payments. All fees are nonrefundable.

A. Application Review Fee

All application review fees must accompany the application (see Deadlines for Application, Section IX). Fees for all first-time applicants, ABMG diplomates seeking certification in another specialty, and individuals who have failed to achieve certification in two examination cycles or within 6 years:

- One specialty: TBD
- Two specialties: TBD
- Three specialties: TBD
- Four specialties: TBD

B. Reapplication Review Fee

Fee for individuals who have been active candidates, but who failed to achieve certification in one cycle and who are reapplicants within one examination cycle:

- TBD

C. Late Application Review Fee

Additional fee for any application which is postmarked (or electronically submitted) between December 1, 2006, and December 31, 2006:

- TBD

D. Examination Fees

1. Examinations Fees:
   a) General examination: TBD
   b) Specialty examination:
      - Clinical genetics: TBD
      - PhD medical genetics: TBD
      - Clinical cytogenetics: TBD
      - Clinical biochemical genetics: TBD
      - Clinical molecular genetics: TBD

2. First-time applicants for ABMG certification, ABMG diplomates seeking certification in an additional specialty(ies), and individuals who have been active candidates and who have failed to achieve certification in two consecutive examination cycles must submit the examination fees to the ABMG Administrative Office upon notification of active candidate status.

3. Individuals who have been active candidates but who failed to achieve certification in one cycle and who are reapplicants within one examination cycle must submit the examination fees with the application and the reapplication fee (see Deadline for Applications).

XI. Recognition of Training by the Canadian College of Medical Geneticists (CCMG)-Accredited Programs and ACGME/ABMG-Accredited Programs

A. The ABMG recognizes CCMG specialty certification as evidence of equivalency of successful completion of ABMG- or ACGME-accredited training.

B. Applicants for ABMG certification who are CCMG diplomates or who have received medical genetics training in a CCMG-accredited program must also meet all other applicable credentialing requirements of the ABMG.

C. Individuals trained in a CCMG-accredited training program, but who are not CCMG certified, may apply to the ABMG for certification. Evidence of completion of a prescribed course of accredited training must be submitted by the applicant's training program director. Cases obtained from a CCMG-accredited training program are acceptable and must be submitted in the ABMG logbook format. The ABMG reserves the right to require additional training to ensure that its requirements for certification are met.

D. Three letters of endorsement may be submitted by CCMG or ABMG diplomates, one of whom must be the director of the applicant's medical genetics training program.

E. Applicants are responsible to the ABMG for the full application review fee, examination fee(s), and any other applicable fees (see Section X) and deadlines (see Section IX).

XII. International Doctoral Degrees and International Graduate Medical Training

A. All individuals seeking certification by the ABMG must fulfill all basic requirements for certification detailed above.

B. All individuals with a doctoral degree earned outside of the US, Canada, or Puerto Rico are strongly urged to petition the ABMG Credentials Committee at the ABMG Administrative Office in writing prior to the onset of medical genetics training in an ABMG-accredited fellowship or ACGME-accredited clinical genetics residency program for determination of equivalency of the doctoral degree.

The following should accompany the petitioning letter:

1. Copy of the doctoral diploma and transcript of doctoral degree.

2. Curriculum vitae with bibliography that includes dates and location of undergraduate education, doctoral education, post-doctoral training, and professional employment.

3. For an individual with an MD degree: Copy of a standard certificate from the Educational Commission for Foreign Medical Graduates (ECFMG). This is required for all individuals in the specialty of clinical genetics.

4. If it is required that an individual with an earned PhD degree from a country in which English is not the primary language must have taken the Test of Spoken English (TOEFL) examination within 2 years of entering an accredited training program or applying for ABMG certification. A minimal acceptable TOEFL score is 45.

Individuals applying for ABMG certification in 2007 must have the official TOEFL examination scores sent directly to the ABMG Administrative Office by the Educational Testing Service (Rosedale Rd, Princeton, NJ, 08541; 609-921-9000) no later than November 30, 2006. Applicants must enter the TOEFL code of 8500 on their answer sheet as well as on the Score Report forms (for tests previously taken). These scores will then be sent to the ABMG from the Educational Testing Service.

[Note: Because the Educational Testing Service retains TOEFL examination scores for only 2 years following the examination, applicants for ABMG certification must have these scores sent to the ABMG Administrative Office within 2 years of taking the examination. The TOEFL examination scores may be sent to the ABMG Administrative Office before the applicant submits any other portions of the application. It is suggested that official scores be sent to the ABMG Administrative Office as soon as an individual enters a training program.]

C. Individuals interested in entering an ACGME-accredited clinical genetics residency who have received graduate medical training outside the US, Canada, or Puerto Rico should petition the ABMG Credentials Committee at the ABMG Administrative Office in writing prior to beginning training for determination of equivalency of their graduate medical training. The following must accompany the petitioning letter: Copy of certificate of graduate medical training and letter from the director of the graduate medical training program stating the inclusive dates and the amount of time the individual spent in the training program.

The Credentials Committee may grant graduate medical training equivalency for 2 years, 1 year, or no years.
If the Credentials Committee grants 1 year of graduate medical training equivalency, the individual must complete 12 months of full-time training in an ACGME-accredited residency program (other than clinical genetics).

If no graduate medical training equivalency is granted, the individual must complete 24 months of full-time training in an ACGME-accredited residency program (other than clinical genetics) or 48 months of full-time training in an ACGME-accredited 4-year clinical genetics residency.

XIII. Points Offered to Help Understand the Process of ABMG Certification

A. Requirements for ABMG certification, including doctoral degree requirements, medical training requirements, medical genetics training requirements, credentialing process, and certifying examinations reside exclusively with the Board of Directors of the ABMG. Any questions that trainees or program directors have about the ABMG certification process must be directed in writing to the ABMG Administrative Office, at 9650 Rockville Pike, Bethesda, MD 20814-3998.

B. Individuals interested in pursuing ABMG certification must be enrolled in an ABMG-accredited fellowship or an ACGME-accredited clinical genetics residency. The program must be accredited in the specialty(ies) in which the trainee plans to seek certification. The list of ABMG-accredited fellowships and ACGME-accredited clinical genetics residencies is available in the Training Guide to North American Graduate and Post-Graduate Training Programs in Human Genetics prepared by the American Society of Human Genetics (http://www.ashg.org/genetics/ashg/pubs/002.shtml).

C. The program director must submit to the ABMG Administrative Office documents verifying the training of each medical genetics trainee planning to seek ABMG certification. Trainees are advised to check with their program director to assure that these forms contain correct information and have been properly filed. The required documents are:

1. The “Trainee Information Sheet,” which is submitted to the ABMG Administrative Office by the program director at the onset of the applicant’s training. Of note, the specific date, month, and year of the start and conclusion of the trainee’s medical genetics training, and the ABMG specialty(ies) for which the trainee is receiving training must be reported on this form.

2. The annual report of the training program, which is filed each year with the ABMG Administrative Office. The annual report includes for each trainee the inclusive dates of training and the ABMG specialty(ies) for which the trainee is receiving training.

D. A trainee is only eligible to apply for ABMG certification in 2007 in specialties for which the necessary training will have been completed by July 31, 2007.

E. An individual who is interested in pursuing medical genetics training and ABMG certification and who has received a doctoral degree and/or some or all graduate medical training outside of the US, Canada, or Puerto Rico may need to fulfill additional requirements for certification (see Section XII). The interested person and the director of the medical genetics training program should petition the ABMG Credentials Committee in writing via the ABMG Administrative Office to clarify any additional requirements for ABMG certification before that individual commences medical genetics training.

F. The ABMG limits “active candidate status” to individuals who fulfill the criteria for certification. Those practitioners working in the field of medical genetics who do not meet the specific criteria, despite academic or clinical backgrounds, are not eligible to sit for the ABMG certifying examination.

G. It is strongly recommended that an interested person or trainee whose training does not conform to the training requirements outlined in this document petition the ABMG in writing prior to the onset of medical genetics training to clarify the requirements for certification by the ABMG.

Description of Specialties in Medical Genetics

To be an active candidate for certification by the ABMG, an individual must meet the criteria in the area of desired certification and provide the required supporting documentation. Certification is offered in clinical genetics, PhD medical genetics, clinical cytogenetics, clinical biochemical genetics, and clinical molecular genetics.

Clinical Geneticist

A clinical geneticist is an individual who holds a US- or Canadian-earned, or the equivalent of an earned, MD or DO degree, has had 2 years in an ACGME-accredited clinical residency program in another medical specialty, 3 years in an ACGME-accredited residency in clinical genetics (or 4 years in an accredited clinical genetics residency program), a valid medical license, and demonstrates competence to provide comprehensive genetic diagnostic, management, therapeutic, and counseling services.

These requirements imply that the individual possesses

• broad knowledge in human and medical genetics, including an understanding of heterogeneity, variability, and natural history of genetic disorders;

• diagnostic and therapeutic skills in a wide range of genetic disorders;

• the ability to elicit and interpret individual and family histories;

• the ability to integrate clinical and genetic information and understand the uses, limitations, interpretation, and significance of specialized laboratory and clinical procedures;

• expertise in genetic and mathematical principles to perform risk assessment;

• skills in interviewing and counseling techniques required to (1) elicit from the patient or family the information necessary to reach an appropriate conclusion; (2) anticipate areas of difficulty and conflict; (3) help families and individuals recognize and cope with their emotional and psychological needs; (4) recognize situations requiring psychiatric referral; and (5) transmit pertinent information in a way that is comprehensible to the individual or family; and

• knowledge of available health care resources (community, regional, and national) required for appropriate referral or support.

PhD Medical Geneticist

A PhD medical geneticist is an individual with a US- or Canadian-earned, or the equivalent of an earned, PhD degree in genetics, human genetics, or a related field who demonstrates competence to provide comprehensive genetic diagnostic, management, and counseling services, as well as expertise in complex risk assessments and in the integration of clinical and genetic information.

These requirements imply that the individual possesses

• broad knowledge in human and medical genetics, including an understanding of heterogeneity, variability, and natural history of genetic disorders;

• the ability to elicit and interpret individual and family histories;

• the ability to integrate clinical and genetic information and understand the uses, limitations, interpretation, and significance of specialized laboratory and clinical procedures;
• expertise in genetic and mathematical principles to perform complex risk assessments and paternity and forensic computations, interpret pedigree analysis (both segregation and linkage), and understand the principles of medical genetics;
• skills in interviewing and counseling techniques required to (1) elicit from the patient or family the information necessary to reach an appropriate conclusion, (2) anticipate areas of difficulty and conflict, (3) help families and individuals recognize and cope with their emotional and psychological needs, (4) recognize situations requiring psychiatric referral, and (5) transmit pertinent information in a comprehensible way to the individual or family; and
• knowledge of available health care resources (community, regional, and national) required for appropriate referral or support.

Clinical Biochemical Geneticist
A clinical biochemical geneticist is an individual with a US- or Canadian earned, or the equivalent of an earned, doctoral degree (MD, DO, PhD) who can correctly perform and interpret biochemical analyses relevant to the diagnosis and management of human genetic diseases and who acts as a consultant regarding laboratory diagnosis of a broad range of biochemical genetic disorders.

These requirements imply that the individual possesses
• the ability to supervise and direct the operations of a clinical biochemical genetics diagnostic laboratory, including technical expertise and knowledge in quality control and quality assessment procedures;
• broad knowledge of (1) basic biochemistry and genetics, (2) the application of biochemical techniques to the diagnosis and management of genetic diseases, and (3) the etiology, pathogenesis, clinical manifestations, and management of human inherited biochemical disorders;
• an understanding of the heterogeneity, variability, and natural history of biochemical genetic disorders;
• diagnostic and interpretive skills in a wide range of biochemical genetic problems; and
• the ability to communicate biochemical laboratory results in the capacity of consultant to medical genetics professionals and other clinicians and directly to patients in concert with other professional staff.

Clinical Cytogeneticist
A clinical cytogeneticist is an individual with a US- or Canadian earned, or the equivalent of an earned, doctoral degree (MD, DO, PhD) who can correctly perform and interpret cytogenetic analyses relevant to the diagnosis and management of human genetic diseases and who acts as a consultant regarding laboratory diagnosis of a broad range of cytogenetic disorders, including inherited and acquired conditions.

These requirements imply that the individual possesses
• the ability to supervise and direct the operations of a clinical cytogenetic diagnostic laboratory, including technical expertise and knowledge in quality control and quality assessment procedures;
• broad knowledge in human cytogenetics, including prenatal and postnatal cytogenetic diagnosis, infertility and pregnancy loss, cancer, and leukemia;
• an understanding of the heterogeneity, variability, and natural history of cytogenetic disorders;
• diagnostic and interpretive skills in a wide range of cytogenetic problems; and
• the ability to communicate cytogenetic laboratory results in the capacity of consultant to medical genetics professionals and other clinicians and directly to patients in concert with other professional staff.

Clinical Molecular Geneticist
A clinical molecular geneticist is an individual with a US- or Canadian earned, or the equivalent of an earned, doctoral degree (MD, DO, PhD) who can correctly perform and interpret molecular analyses relevant to the diagnosis and management of human genetic diseases and who can act as a consultant regarding laboratory diagnosis of a broad range of molecular genetic disorders.

These requirements imply that the individual possesses
• the ability to supervise and direct the operations of a clinical molecular genetics diagnostic laboratory, including technical expertise and knowledge in quality control and quality assessment procedures;
• the ability to perform a variety of molecular diagnostic assays;
• an understanding of the heterogeneity, variability, and natural history of molecular genetic disorders;
• broad knowledge of (1) basic molecular biology and genetics, (2) the application of recombinant DNA techniques and linkage analysis to the diagnosis of genetic diseases; and (3) the etiology, pathogenesis, clinical manifestations, and management of human genetic disorders;
• diagnostic and interpretive skills in a wide range of clinical molecular genetics problems; and
• the ability to communicate molecular diagnostic laboratory results in the capacity of consultant to medical genetics professionals and other clinicians and directly to patients in concert with other professional staff.

Molecular Genetic Pathology
A molecular genetic pathologist is expert in the principles, theory, and technologies of molecular biology and molecular genetics. This expertise is used to make or confirm diagnoses of Mendelian genetic disorders, of human development, infectious diseases and malignancies, and to assess the natural history of these disorders. A molecular genetic pathologist provides information about gene structure, function, and alteration and applies laboratory techniques for diagnosis, treatment, and prognosis for individuals with related disorders.

Certification in molecular genetic pathology is a joint and equal function of the ABMG and the American Board of Pathology (ABP). Such function relates to qualifications of candidates, standards of examination, and the form of the certificate.

Each candidate applying for certification must be a physician and hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in the United States or Canada.

The ABMG and the ABP will qualify candidates for examination for certification in MGP who:
1. Are certified by the ABP and the ABMG.
2. Are certified by the ABP (anatomic pathology, clinical pathology, or combined anatomic pathology and clinical pathology) or the ABMG and

Document molecular genetic pathology practice of at least 25% full-time experience within each of the immediately preceding 5 years or 100% experience over the immediately preceding 2 years to the satisfaction of the ABMG and the ABP and

Submit a completed application that includes a logbook of 150 cases from the time period indicated above and a completed supplemental information form.

The by-experience pathway will end in 2006, 5 years after ACGME began accreditation of molecular genetic pathology
training programs. Unaccredited training in molecular genetic pathology will count as experience.

3. Are certified by the ABP (anatomic pathology, clinical pathology, or combined anatomic pathology and clinical pathology) or the ABMG and have completed at least 1 year of training in molecular genetic pathology in a program accredited for such training by the ACGME.

Training programs in molecular genetic pathology are a joint and equal function of departments of pathology and medical genetics. The pathologist applicant must participate in the diagnosis, management, and treatment of the patient and the family.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Neurological Surgery to ascertain whether the information below is current.)

Diplomates
A list of diplomates and the bylaws of the American Board of Neurological Surgery (ABNS) appear in the Official American Board of Medical Specialties Directory of Board Certified Medical Specialists, which can be obtained from Elsevier Science (655 Avenue of the Americas, New York, NY 10010; 888 437-4636; fax 212 633-3820). In addition, a list of new diplomates is published in the Journal of Neurosurgery shortly after each oral examination.

Information regarding training programs acceptable for certification can be found in the Graduate Medical Education Directory. This directory can be purchased from the American Medical Association (515 N State St, Chicago, IL 60610).

Qualifications
The ABNS evaluates all qualified applicants for their proficiency in neurosurgery.

The minimum educational requirements of the Board do not restrict programs to these standards. To ensure satisfactory competence in neurosurgery, neurological program directors may retain residents in their programs beyond the required 5 years of training.

It is the responsibility of the candidate to seek information concerning current requirements for certification by the ABNS. Even though directors of approved neurosurgical residency programs are well informed regarding requirements for certification, placement in an approved program does not guarantee adequate training for certification. The candidate must make sure he/she receives such training.

Training Prior to Neurosurgery Residency
1. Graduation from a medical school that is acceptable to the Board.
2. Currently valid license to practice medicine in the state, province, or country of residence.
3. Twelve months devoted to acquiring adequate knowledge of fundamental clinical skills. This is known as postgraduate year one (PGY1), general surgery year one, or internship. Completion is recommended prior to beginning neurosurgical training but must be done prior to beginning the third year of residency. It may be achieved by 1 year of training in a general surgery program accredited by the Accreditation Council for Graduate Medical Education (ACGME) in the United States or, for applicants entering training programs prior to July 16, 1997, a Canadian equivalent. It may also be acquired during the course of training in an ACGME-accredited neurosurgical residency program in the US or, for applicants entering training programs prior to July 16, 1997, a Canadian equivalent. Such training must include not less than 6 months in surgical disciplines other than neurosurgery. The remaining 6 months must consist of clinical skills considered appropriate by the program director but may not include more than 3 months of neurosurgery and 3 months of neurology.

Neurological Surgery Training Requirements
For residents beginning the neurosurgery portion of their training on or after July 16, 1997:
1. Completion of a minimum of 5 years of training following PGY1 in neurological residencies programs accredited by the Residency Review Committee for Neurosurgery. For applicants entering residency training prior to July 16, 1997, training programs may be accredited by the Canadian equivalent.
2. At least 36 months of core clinical neurosurgery with progressive responsibility culminating in 12 months served as senior-most resident with major, primary patient management and administrative responsibilities, all as deemed appropriate and designated by the program director.
3. Training in clinical neurosurgery must be progressive and not obtained during repeated short intervals in a number of institutions. At least 24 months of training in core clinical neurosurgery must be obtained in one program.
4. At least 3 months must be devoted to training in clinical neurology as a full-time assigned resident in an accredited neurology training program, or, for residents entering training prior to July 16, 1997, a Canadian equivalent. Six months is recommended. Up to 3 months of this training may be undertaken during PGY1.
5. The unobligated 21 or more months must be devoted to aspects of the basic or clinical neurological sciences which, at the discretion of the program director, may include neurology, neurosurgery, neuropathology, neuroradiology, research, and/or other disciplines related to the nervous system. Trainees are expected to acquire basic knowledge and skills in each of these disciplines.
6. Elective training by residents outside of their parent neurosurgical residency program does not count toward fulfilling training requirements unless specifically arranged by the trainee's program director and approved by the Board in advance. In such instances, the secretary of the Board must be notified in writing of the prospective rotation. Such training may in no way compromise the 36 months of core neurosurgery.
7. Residents are required to record and supply to the Board a log of all operative procedures during all clinical years. NeuroLog, the ABNS Web-based program for logging data, is recommended.
8. The program director must notify the Board of the appointment of each new neurosurgical resident and whether he/she is entering the program with intent to obtain certification. If so, the director must inform the trainee of the requirements necessary to obtain such certification.
9. Prior to acceptance for the certification process, the Board requires a statement from the candidate's program director to the effect that the candidate has met the minimum time requirements, has performed in a satisfactory manner, and is well prepared to enter into the independent practice of neurosurgery.

Exceptional Modifying Circumstances
Upon recommendation of the program director, the Board may at its own discretion consider and give retroactive credit for previous training if a resident, before entering an approved neurological training program, has had substantially more than the prerequisite training in general surgery, medical neurology, or the basic neurological sciences. Such credit is not automatic and must be approved by the Board.

If a resident leaves an accredited neurological training program, the director of the program must indicate in writing to the Board the credits for training, in respect to time and category, he/she is prepared to certify that the trainee successfully completed. Should the individual enter a new neurological residency program, the new program director may or may not honor such credit, depending upon appraisal of the resident's professional and educational progress in the new program; a statement of how much training credit will be accepted must be submitted to the Board by the new program director. Requests for transfers must be handled in the same way and submitted to the Board prospectively.

Training by preceptorship is not considered as fulfilling certification requirements; no credit is given for time spent in such training.

Credit for elective training in foreign or other nonapproved centers may be granted by the Board on an individual basis when the training is carried out as an integral part of the residency program with the advice and approval of the trainee's program director. Requests for training away from a parent institution must be submitted in writing to the Board prospectively, not retroactively.

The above provisions in no way alter the basic minimum requirement of 60 months of neurological residency training, including a minimum of 3 months of training in clinical neurology and 36 months of core clinical neurosurgery in accredited institutions, 12 months of which must be as senior-most resident and 24 months in one institution.

Primary Examination
Each applicant for the ABNS oral examination and certification must first pass for credit the Primary Examination, which is prepared by the Board with the assistance of the National Board of Medical Examiners. The examination includes information on neuroanatomy, neurobiology, neurology, neuropathology, neuropharmacology, neurophysiology, neuroimaging, neurosurgery, fundamental clinical skills, and critical care, plus material from other relevant disciplines deemed suitable and important by the Board.

The Primary Examination is given in March of each year at neurological residency programs throughout the United States and Canada. Residents may take it for self-assessment or credit toward certification at the discretion of their program directors. It is also open to all neurosurgeons who have successfully completed their accredited programs; they may take it as often as desired for self-assessment or credit. Residents beginning training after July 1, 1998, must pass it for credit before the completion of training.

Applications must be received by the Board before mid-December, the deadline for receipt. They must be accompanied by the fee set by the Board. The fee will be refunded only until the deadline date for receipt of applications. Examinees are required to sign a pledge that states they (1) agree to be bound by the Board's ruling regarding credentials, irrespective of scores on the examination, (2) grant permission to the ABNS and its testing organization to release the results, either for credit or self-assessment, to the
examinee's program director, and (3) will not reproduce or copy the examination in any form in part or in whole.

**Practice Requirements**
After beginning practice, the candidate shall furnish to the Board the names of three physicians in the community (two neurosurgeons, including one ABNS diplomate) who are knowledgeable about the quality of the candidate's practice. The Board will request reference letters from these physicians and others in the candidate's community. It is also the prerogative of the Board to send representatives to review the candidate's practice.

The candidate shall submit the names and addresses of all hospitals where he/she has or has had privileges. Letters will be requested to advise the Board of the candidate's status regarding admitting and operating privileges in each hospital. At the time of credentialing, each candidate must be in possession of hospital staff privileges in all hospitals in which he/she cares for patients. Such privileges must be unrestricted in respect to the hospital's requirements for a neurosurgeon.

The candidate must also submit a chronological list of all inpatients for whom he/she was the responsible physician or surgeon. Twelve current, consecutive months are required, with a minimum of 100 operative cases. The case material must be signed by the chief of staff, chief of service, president of the medical staff, or hospital administrator of each hospital where the candidate practices. The Board will request permission to review the candidate's practice and will advise the hospital administrator of such a request.

A candidate who passes the oral examination is thereby certified and will be forwarded the Board's certificate, once it has been suitably engrossed and signed by the officers of the Board.

**Certification of Those Training in Canadian Programs**
Individuals who began neurological residency training in approved Canadian programs before July 16, 1997, and hold a fellowship in neurosurgery from the Royal College of Physicians and Surgeons of Canada are eligible for certification through the same route as candidates training in the United States.

**Applications**
Applications for oral examination and certification are automatically sent to graduating residents at the end of their last year of training. Additional applications and practice data information are available from the ABNS office. The application should be filled out and returned to the Board as soon as the data have been logged.

A pledge is part of the application for oral examination. By signing the application, the applicant agrees to abide by the Bylaws, Rules and Regulations, and Code of Ethics of the Board.

Upon receipt of an application, the Board takes such steps as deemed appropriate to verify the statements of facts made therein. Inquiries are made from references and others familiar with the candidate to obtain information relevant to the requirements for examination. Once the year of practice data is received, it is reviewed and, when approved, becomes part of the application.

The Board makes the final decision regarding a candidate's eligibility for oral examination and potential certification after considering all available information pertaining to the entire process of certification.

Application fees are not refunded, even when the application for oral examination is denied.

**Oral Examination**
Oral examinations—clinical problem-solving and patient-management examinations—are held twice a year. Candidates are given case histories and, where appropriate, x-rays, scans, and other visual aids to augment the presentation and development of cases. The candidate must be able to explain orally how he/she would proceed in evaluating and managing cases and in planning and performing any proposed operations, if indicated. A one-hour session is devoted to neurological surgery-intracranial diseases; 1 hour to neurological surgery-spinal and peripheral nerve diseases; and 1 hour to a mixture. Neurosurgical neurology is included in all examinations. Each of the 3 hours is conducted in an interview setting with two examiners.

A candidate who passes the oral examination is thereby certified and will be forwarded the Board's certificate, once it has been suitably engrossed and signed by the officers of the Board.

**Reexamination Rules**
A candidate failing the oral examination once may request reexamination within 3 years. A minimum of 1 year must elapse before taking the examination for the second time. A new examination fee must be paid.

A candidate who has failed the oral examination on two or more occasions must pass the Primary Examination for credit again before becoming eligible to retake the oral examination. Two letters of reference from neurosurgeons certifying the nature and quality of the candidate's practice must be submitted to the Board, as well as hospital privilege letters and a year of current practice data. In addition, the candidate must pay the oral examination fee. Under these circumstances, candidates must take the oral examination within 3 years of repassing the Primary Examination. Should the candidate do not apply for or fail to appear for oral examination within the 3-year period, he/she must repass the Primary Examination before being eligible for the oral examination once again.

**Payment of Fees**
All fees are determined by the Board and reflect the costs that the Board incurs through obligations associated with the certification process.

**Revocation of Certification**
Pursuant to the Rules and Regulations established by the ABNS, the Board has the authority to revoke any certificate issued by it for reasons including: the person to whom the certificate was issued is convicted of a felony, his/her license to practice medicine has been lost or encumbered, or he/she gave false information on the application for oral examination. Should revocation be disputed, there is a hearing mechanism for such an action.
American Board of Nuclear Medicine

Suite 119
4555 Forest Park Boulevard

2006 ABNM Board of Directors
Tom R Miller, MD, PhD, Chairman, St Louis, Missouri
Christopher J Palestro, MD, Vice Chairman, New Hyde Park, New York
Michael M Graham, MD, PhD, Past Chairman, Iowa City, Iowa
J Anthony Parker, MD, PhD, Secretary-Treasurer, Boston, Massachusetts
Henry D Royal, MD, Executive Director, St Louis, Missouri
Abass Alavi, MD, Philadelphia, Pennsylvania
Dominique Delbeke, MD, PhD, Nashville, Tennessee
Marcelo P DiCarli, MD, Boston, Massachusetts
Gary Dillehay, MD, Maywood, Illinois
Sally J DeNardo, MD, Sacramento, California
Steven M Larson, MD, New York, New York
Bruce Line, MD, Baltimore, Maryland
Barry Shulkin, MD, MBA, Member-At-Large, Memphis, Tennessee
Harvey Z Weissman, MD, Baltimore, Maryland

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Nuclear Medicine [ABNM] to ascertain whether the information below is current.)

General Requirements for Each Candidate
Assurance that the applicant represents himself/herself to be a specialist in nuclear medicine.

General Professional Education
Graduation from a medical school approved by the Liaison Committee on Medical Education or from a school of osteopathy. If the applicant is a graduate of a medical school outside the United States or Canada, he/she must hold a currently valid ECFMG certificate issued by the Educational Commission for Foreign Medical Graduates, 3624 Market St, Philadelphia, PA 19104-2685; 215 386-5900.

Preparatory Postdoctoral Training
Training required for admission to the certifying examination in nuclear medicine shall be comprised of 1 or more years of preparatory postdoctoral training and 2 or more years of residency training in nuclear medicine.

Preparatory postdoctoral training shall consist of 1 or more years of residency training in programs satisfactory to the ABNM. Such programs shall provide broad experience in clinical medicine in which the primary emphasis is on the patient and his or her clinical problems. Preparatory training may be in any specialty in a residency program in the US that is accredited by the Accreditation Council for Graduate Medical Education (ACGME), or programs in Canada approved by the Royal College of Physicians and Surgeons of Canada (RCPSC) or the Professional Corporation of Physicians of Quebec (PCPQ), or alternative training as approved by the ABNM. Preparatory postdoctoral training must precede the training in nuclear medicine.

Each nuclear medicine residency training program director must ensure that for each resident entering his/her program the preparatory postdoctoral training has been in (1) a US program accredited by the ACGME or (2) a Canadian program approved by the RCPSC or the PCPQ or (3) an alternative training program as approved by the ABNM.

Postdoctoral Training in Nuclear Medicine
1. After completion of the preparatory postdoctoral training program, there shall be satisfactory completion of a 2-year formal residency training program in nuclear medicine in a nuclear medicine residency training program recognized and approved by the Residency Review Committee for Nuclear Medicine of the ACGME or a Canadian program approved by the RCPSC or PCPQ as competent to provide satisfactory training in nuclear medicine.

2. The 2-year formal residency training program in nuclear medicine must include:
   a. Training in clinical nuclear medicine which must include, but not be limited to, performance and interpretation of in vivo imaging studies of body organs and systems using radiopharmaceuticals; training and experience in the application of nonimaging procedures, including instruction in principles of immunology, radioimmunoassay, and receptor assay technology; radiopharmaceutical absorption, dilution, excretion, and organ function studies; and therapeutic uses of unsealed radiopharmaceuticals, including patient selection, dosimetry, and dose administration in the treatment of cancer and hematologic and metabolic disorders. In vivo studies will include use of external detectors and scintillation cameras, including single-photon tomography and positron emission tomography; cardiovascular nuclear medicine procedures, including exercise and pharmacologic stress testing, as well as management of cardiac emergencies related to such testing; and correlation of nuclear medicine procedures with other imaging modalities, such as computed tomography, ultrasonography, nuclear magnetic resonance imaging, and angiography.
   b. Training in basic and allied sciences, which must include medical nuclear physics; instrumentation; radiopharmaceutical chemistry including reactor, cyclotron, and generator production of radionuclides; computer sciences; statistics; radiation biology; and radiation safety, including safe management and disposal of radioactive substances. Training in allied sciences may include pathology, physiology, and other basic sciences associated with nuclear medicine. The time spent in training in allied science may be spaced throughout the period of training in nuclear medicine and in a manner that does not exceed 6 months of training.
   c. For applicants who have completed residency training programs in clinical disciplines closely related to nuclear medicine in residency programs accredited by the ACGME, the RCPSC, or the PCPQ, credit may be given for some of that training. Applicants desiring credit toward the nuclear medicine requirements should write to the Board requesting such credit (see "Applications," below).

Combined Training Programs
1. Nuclear Medicine and Diagnostic Radiology/Nuclear Radiology
The ABNM and the American Board of Radiology offer dual certification for candidates who have satisfactorily completed a combined total of 6 years of suitable accredited training in programs approved by both Boards and successfully passed the certifying examination of both Boards.
To be eligible for dual certification, a resident must obtain residency training in diagnostic radiology and nuclear medicine that must include (a) a preparatory clinical year and (b) 4 years of education in diagnostic radiology program that includes 6 months of nuclear medicine training, followed by (c) 1 year of education in a combined nuclear medicine and nuclear radiology program. Certifying examinations of each board cannot be taken until all required years of training in both specialties are satisfactorily completed. All training must be in ACGME, RCPSC- or PCPQ-accredited programs and approved by the director of each program.

2. Nuclear Medicine and Internal Medicine

The ABNM and the American Board of Internal Medicine offer a training pathway for candidates who have completed 4 years of combined accredited training in internal medicine and nuclear medicine leading to admission to certification in both specialties. To meet eligibility for dual certification, the resident must satisfactorily complete 48 months of combined training that is verified by the directors of both training programs. It is strongly recommended that combined training occur in the same institution. Residents who complete dual certification training in a radiology program and clinical nuclear medicine program must be eligible for admission to the written certifying examination in internal medicine after successfully completing the R-3 year of training and for the nuclear medicine examination after the R-4 year. All training must be in ACGME, RCPSC, or PCPQ-accredited programs and approved by the director of each program.

3. Nuclear Medicine and Cardiology

Applicants who have completed an accredited program in internal medicine/cardiology, which includes 3 months in the clinical subspecialties of internal medicine, 3 months of invasive cardiology, and 6 months of noninvasive cardiology (with an emphasis on nuclear cardiology), may apply to take the ABNM examination upon completion of an additional 12 months of nuclear medicine training (with an emphasis on noncardiac aspects of nuclear medicine) in an accredited nuclear medicine program. All training must be in programs accredited by the ACGME, RCPSC, or PCPQ and approved by the director of each program.

4. Nuclear Medicine and Neurology

The ABNM and the American Board of Psychiatry and Neurology offer dual certification for candidates who have completed 5 years of combined accredited training in nuclear medicine and neurology. It is strongly recommended that the participating residencies be in the same institution. To be eligible for dual certification, the resident must satisfactorily complete 60 months of training, which must be verified by the respective directors of both programs. The certifying examinations may not be taken until all required years of training in both specialties are satisfactorily completed. All training must be in ACGME, RCPSC, or PCPQ-accredited programs and approved by the directors of each program.

Evaluation of Clinical Training in Nuclear Medicine

1. The Board considers demonstration of clinical competence in the management of the nuclear medicine patient of paramount importance in its qualification of the applicant to take the certifying examination. The Board designates the directors of nuclear medicine residency programs and their supporting evaluation committees as the authorities who most appropriately can provide to the Board the necessary documentation of competence in clinical nuclear medicine, and requires that all program directors certify to the Board that each applicant from their programs is competent in clinical nuclear medicine. These reports will be reviewed by the Board before accepting an applicant to take the certifying examination.

2. If a residency program director's evaluation indicates an applicant's competence in clinical nuclear medicine is unsatisfactory, the applicant will not be admitted to the examination unless the Board finds that the applicant's overall performance meets its standards. An applicant not admitted to an examination on the basis of these findings may appeal in writing to the Board for a special evaluation of competence in clinical nuclear medicine within 45 days of receipt of notification. The appeal should state that a request is made for review of the decision not to admit to the examination and why the applicant considers the decision to be in error. Applicants whose clinical competence is judged satisfactory in this evaluation will be admitted to the next examination for which they apply. Applicants judged not satisfactory in this evaluation are advised to spend an additional year in training before applying again for special evaluation of competence.

Applications submitting false credentials are subject to disqualification from examination or revocation of certification.

3. All preliminary and nuclear medicine residency training must be completed prior to September 1 of the year the candidate takes the certifying examination.

Patient Care Responsibility

Applicants for certification in nuclear medicine will have 1 or more years of training in which the primary emphasis is on the patient and his/her clinical problems.

Canadian Training

Physicians who satisfactorily complete training in Canadian nuclear medicine programs approved by the RCPSC or the PCPQ are eligible for admission to the ABNM certifying examinations.

Completion of Training

All preliminary and nuclear medicine residency training must be completed prior to September 1 of the year the candidate takes the certifying examination.

Licensure Requirement

A valid, unrestricted license to practice medicine in a state, territory, possession, or province of the United States or Canada will be required of all applicants for the certifying examination. If a candidate is licensed in more than one such jurisdiction, each license must be valid and unrestricted. A photocopy of every license held by the candidate must be submitted to the Board.

Approved Residency Training Programs

Residency training programs in nuclear medicine accredited by the ACGME may be found in the Graduate Medical Education Directory, published annually by the American Medical Association and the ACGME, or may be obtained by contacting the Secretary, Residency Review Committee for Nuclear Medicine, ACGME, 515 N State St/St Ste 2000, Chicago, IL 60610.

Admissibility to Examination

An applicant is admissible to the examination only when all of the preliminary and graduate educational requirements of the Board currently in force at the time of receipt of the formal application have been satisfactorily fulfilled and deemed acceptable.

Examination

An objective type, computer-based examination is administered in a morning and an afternoon session. The examination evaluates the candidate's knowledge of and competence in the management of
patients in the area of clinical nuclear medicine, including nuclear imaging, therapy with unsealed radionuclides, the medical effects
of exposure to ionizing radiation, and the medical management and
disposal of radioactive substances. Also included is an evaluation of
the candidate's knowledge in the related sciences of medical nu­
clear physics, radiation biology, radiation protection, instrumenta­
tion, radiopharmaceutical chemistry, immunology and receptor
assay technology, computer sciences, and statistics; it may also in­
clude pathology, physiology, and other basic sciences associated
with nuclear medicine.

Applications
Applicants who wish to be examined by the Board must complete,
sign, and file with the Board office an application on the official
form together with the supporting data required by the application.
It is the responsibility of the applicant to make certain that the re­
quired evaluation forms have been completed by his/her program
director and sent to and received by the ABNM.

As soon as determination is made concerning admission or
nonadmission to the examination, the applicant will be notified by
mail, and, if admitted, assignment of the candidate number and no­
tification of the examination sites will be given. Applications must
be complete with all required documentation by July 20.

Before the final action on applications, officers, members, and
employees of the Board are not authorized to estimate the eligibil­
ity of applicants. Applicants are requested not to discuss or write
for opinions regarding the status of their applications. The Board
decides on eligibility to take the examination only by approving or
disapproving individual applications and accordingly has no
“Board-eligible” category.

Inquiries concerning the applicability of previous training and
experience should be sent with complete documentation of all edu­
cation and training to the Board office. A copy of the Board’s re­
ponse to these inquiries should be forwarded with any subsequent
examination application.

Release of Information
Candidates will receive the results of their examinations (pass/fail
letter) approximately 3 months after the examination.

A list of diplomates of the ABNM will be found in the Official
American Board of Medical Specialties Directory of Board Cer­
tified Medical Specialists, published by the American Board of
Medical Specialties and Elsevier Science.

Upon request, and with the approval of the Board chairman, the
Board releases information on diplomates to federal and state li­
censing bodies and to educational and professional organizations
for specific, limited, and appropriate professional use. An authori­
zation for release of this information is a part of the examination
application form.

Policy on Reexamination
Candidates who fail the examination are eligible for reexamination.
An examination fee must accompany each completed application
for reexamination. If a candidate is disqualified from the examina­
tion by reason of dishonesty in the application or in taking the ex­
amination and his/her examination is invalidated by the Board, re­
examination shall be at the Board's discretion.

Recertification
The ABNM offers its diplomates voluntary recertification based
upon fulfillment of certain requirements, including passing an ob­
jective cognitive examination. The ABNM will not rescind initial
will be valid for a period of 10 years and may be revalidated by
recertification.

Journals Publishing Information on Application
and Examination Schedules
Annals of Internal Medicine (Medical News Section)
Journal of the American Medical Association (Examinations and
Licensure Monthly Section)
Journal of Nuclear Medicine
Radiology.

Changes in Policies and Procedures
The Board reserves the right to make changes in its fees, policies,
and procedures at any time and cannot assume responsibility for
giving advance notice thereof. The provisions of this publication are
not to be construed as a contract between any candidate and the
ABNM.

Fees
The examination fee must accompany the application. If the appli­
cant is rejected by the Board or withdraws prior to August 1, the
application processing fee will be retained by the Board. If the appli­
cant withdraws after August 1, the entire examination fee will be
retained by the Board.

(The criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Obstetrics and Gynecology [ABOG] to ascertain whether the information below is current.)

Objectives and Purposes
As stated in the Articles of Incorporation, the purposes of the Board include the functions: "To arrange and conduct examinations and/or other procedures to test the qualifications of voluntary candidates for certification and recertification by this Corporation. The criteria for certification and recertification shall be applied equally to all candidates regardless of sex, race, color, or national origin. To issue Certificates or any other evidences of competence to eligible physicians whom this Corporation considers to have demonstrated special knowledge and professional competence relating to Obstetrics and Gynecology, which Certificates or any other evidences of competence may, at the discretion of this Corporation, be valid only for a limited period of time. To determine from time to time whether physicians who have been issued Certificates or other evidences of competence have continued to maintain their professional qualifications and to issue recertification Certificates or other evidences of competence to those physicians who successfully demonstrate continued maintenance of such qualifications."

Definitions
Obstetrician-gynecologists are physicians who, by virtue of satisfactory completion of a defined course of graduate medical education and appropriate certification, possess special knowledge, skills, and professional capability in the medical and surgical care of the female reproductive system and associated disorders, such that it distinguishes them from other physicians and enables them to serve as consultants to other physicians and as primary physicians for women.

Over the years of practice, each obstetrician-gynecologist builds upon this broad base of knowledge and skills and may develop a unique type of practice and changing professional focus. Such diversity contributes to high quality health care for women.

A physician's certification by the ABOG attests to the physician's professional colleagues and to the public that the diplomate possesses special knowledge and professional capability. Each certificate granted or issued does not of itself confer or purport to confer upon any person any degree or legal qualifications, privileges, or license to practice obstetrics and/or gynecology, nor does the Board intend in any way to interfere with or limit the professional activities of any duly licensed physician who is not certified by this Board. The privileges granted physicians in the practice of obstetrics and gynecology in any hospital are the prerogative of that Board.
Types of Board Status

1. ABOG Registered - Residency Graduate
An individual is registered with the Board when, upon application, the Board rules that he/she has fulfilled the requirements to take the written examination (see "Requirements" for the written examination).

2. Active Candidate
a. An individual achieves active candidate status by passing the written examination.
b. To maintain active candidate status, the candidate must fulfill all requirements for admission to the oral examination (see "Requirements") and must not have exceeded the limitations to admittance for the oral examination.
c. Active candidate status that has expired may be regained by repeating and passing the Board's written examination.

3. Diplomate
a. An individual becomes a diplomate of the Board when the written and the oral examinations have been satisfactorily completed and the Board's certifying diploma has been awarded.
b. Certificates have limited duration of validity (see "Duration").

4. Expired Certificate
a. An individual has failed to complete successfully a maintenance of certification examination prior to the expiration date printed on his/her time-limited certifying diploma (see "Duration").
b. Individuals in this category are no longer diplomates of the ABOG and may not advertise or otherwise designate that they are ABOG certified.
c. Former diplomates whose time-limited certificates have expired may re-obtain diplomate status by successfully completing an ABOG Maintenance of Certification process.

5. Retired Diplomate
a. This is an individual who has retired from clinical practice at a time when they were a diplomate.
b. Individuals in this category are retired diplomates. If they return to active practice after their time-limited certificate has expired, they must complete an ABOG maintenance of certification process in order to reactivate their diplomate status.
c. Individuals choosing to be a retired diplomate must notify the Board. Failure to take this action will result in an Expired Certificate status for an individual holding a time-limited certificate that has expired.

The term "Board Eligible" is not a term used or recognized by ABOG, and it is not appropriate for an individual seeking Board certification, nor for those who have only completed residency training, to use the term to describe their status.

Rights of Applicants and Diplomates

Jurisdiction and Venue
The Corporation shall require, as a condition precedent for any person or entity to become a member, director, officer, employee, agent, applicant for examination, a diplomate certified by the Corporation, a committee or division member, whether paid or volunteer (hereinafter, individually and collectively, "Person or Entity"), that such person or entity agree as follows: In any dispute of any kind with the Corporation or any Person or Entity, such Person or Entity shall be subject to suit, if at all, only in the County and State where the Corporation maintains its principal place of business and its headquarters, which is currently Dallas, Dallas County, Texas. Each Person or Entity shall be required to consent to the exclusive jurisdiction and venue of courts located in Dallas, Texas and laws of the State of Texas for the resolution of any and all such disputes.

Further, in the event any diplomate engages in any activity or form of conduct which would reasonably diminish the reputation of the Corporation and the value of its certification, the Board may require such diplomate to appear and show cause why his/her certification should not be revoked and diplomate status terminated. The Board of Directors shall establish procedures to assure that any diplomate required to appear shall be afforded due process and the opportunity to defend himself/herself.

Obligations
The acceptance of an applicant for examination by the Corporation and the granting of diplomate status to a physician who has satisfied the requirements for certification is contingent on the agreement of the applicant or diplomate to abide, at all times, with the rules, Regulations and Directives of the Corporation, its Board of Directors and Officers, of which they are advised or on notice.

Rights
Individuals who are certified as diplomates by the Corporation acquire no property right or vested interest in their certification or in their diplomate status, the duration, terms, and conditions of which may be extended, reduced, modified, or otherwise changed as determined by the Board of Directors, in its absolute discretion to assure greater protection of the public, to recognize knowledge and skills deemed to require further evaluation or to accommodate legal requirements.

Candidate Responsibility
It is the responsibility of the candidate to seek information concerning the current requirements for certification as an obstetrician and gynecologist. The Board does not assume responsibility for notifying a candidate of changing requirements for admittance to any examination or impending loss of admittance to any examination. Moreover, candidates must meet the eligibility requirements published in the Bulletin dated for the year in which they are to take the examination.

It is the candidate's responsibility to read the applicable Bulletin, to follow the published requirements, and to meet the published deadlines.

Certification Process
Certification as a specialist in obstetrics and gynecology is the end of a process lasting many years. The required minimum duration of graduate education is 4 years.

Written Examination
Between September 1 and November 30 of the final year of residency, candidates must request and complete the application for the written examination. If ruled admissible to take the examination, the candidate will do so on the last Monday in June of the final year of residency. (This paragraph applies to candidates who are due to complete their residency prior to September 30.) For candidates who will complete their residency training after September 30, application for the written examination must be delayed until the following year. If ruled admissible to take the examination, the candidate will do so in June of the following year, that is, up to 21 months after completion of residency.

Oral Examination
To be ruled admissible to take the oral examination, candidates are required to provide a list of patients under their care (herein after "case list") for a 12-month period beginning on July 1 of the
second year of practice after the written examination is passed. After November 1 of this second year of practice and before the following February 28, candidates should request and complete the application (November 1-February 28). For the accelerated process, see Section IV. Accelerated Oral Examination Process for Primary Certification.

The examination process is voluntary. The ABOG will not contact candidates. Candidates are responsible for requesting an application and submitting it in a timely fashion.

The candidate's case list must be mailed to the Board office between July 1 and August 2 following the completion of the 12-month period of patient care. The case lists should not be mailed until the candidate is notified of approval to submit his/her case list. If ruled admissible, the candidate will be allowed to take the oral examination in November, December, January, or February.

Important Dates in the Certification Process Not Pertaining to the Accelerated Oral Process

I. Final Year of Residency (ending on or before the following September 30)
   A. July 1—Commence
   B. September 1 to November 30—Apply for basic written examination
   C. Last Monday in June—Take basic written examination

II. Practice
   A. First year of practice
      No Board activities necessary
   B. Second year of practice
      July 1 to June 30—Patient case list
      November 1 to February 28—Apply for general oral examination
   C. Third year of practice
      August 1—Deadline for submission of patient list
      November, December, January, or February—Take general oral examination

III. Fellowship in Subspecialty
   A. First year (fellowship) (July 1-June 30)
      No Board activities
   B. Second year (fellowship) (July 1-June 30)
      No general Board activities
   C. Third year (fellowship) (July 1-June 30)
      1. No general Board activities
      2. (September 1 to November 30—Apply for subspecialty written examination)
   D. Fourth year—First year of practice (July 1-June 30)
      1. July 1 to June 30—Patient case list
      2. November 1 to February 28—Apply for the November, December, or January general oral examination
   E. Fifth year—Second year of practice (July 1-June 30)
      1. August 1—Deadline for submission of patient list
      2. November, December, or January—Take general oral examination
      3. January 1 to April 30—Apply for subspecialty oral examination
      4. January 1 to December 31—Subspecialty patient case list
   F. Sixth year—Third year of practice (July 1-June 30)
      1. January 1—Deadline for submission of thesis
      2. January 1 to December 31—Deadline for submission of subspecialty patient case list
      3. March or April—Take oral subspecialty examination

IV. Accelerated Oral Examination Process
   The length of time between successful completion of the written examination and the oral examination may be shortened. Specifically, after completion of the written examination on the last Monday in June, the candidate may begin collection of cases on July 1, but must start prior to September 1. This means that an active hospital practice must be established prior to September 1. After September 1, see “Application for Examination.” Individuals who have not completed their residency prior to August 31 are not eligible for the accelerated process.

   Approximately 300 total combined candidates from graduating residency programs and from fellowship programs (see V, below) will be allowed to enter this accelerated process each year.

   All graduating residents who pass the written examination will be notified by mail prior to August 1 that they have passed the written examination. In this same letter, they will be told that they are eligible to apply for this accelerated process. They must request the application form and return it with the appropriate fee to the Board office prior to 5:00 PM Central Standard Time on September 15, 2005. If more than 300 completed application forms are received for the 2006-2007 examinations, only 300 candidates will be chosen from the recent resident graduates and the fellows currently enrolled in ABOG-accredited fellowship programs, using a computerized random selection process. All applicants will be notified by October 1 if they are among the 300 candidates chosen for this accelerated process.

   A candidate selected for this accelerated process must meet all other requirements applicable to the oral examination. No late applications will be accepted, and all deadlines and requirements must be met in order to participate in the accelerated program. For those not selected in the randomization process, application fees will be refunded and case collection may be discontinued.

   It is important to understand that, if accepted into this accelerated program, it is the candidate’s responsibility to understand the requirements and to comply with them (see “Case Preparation”). The most important of all requirements is to supply the Board with a current, accurate address. Additionally, all such candidates should request a current Bulletin from the Board office or download a Bulletin from the ABOG Web site.

V. Accelerated Oral Examination for Fellows
   Fellows currently enrolled in Board-accredited fellowship programs may apply for the accelerated general obstetrics and gynecology oral examination. Such candidates must:
   A. have their fellowship program director’s approval;
   B. be a second, third, or fourth year fellow at the time of the examination;
   C. meet all the requirements outlined in this Bulletin, including those outlined above, under IV, and in the following table, and finally,
   D. sit for the oral examination only once during their fellowship.

   Case lists of candidates in fellowship programs must include those women cared for by the fellow during their fellowship program. Senior residency cases may be included to complete a case list, if necessary.

Recent Resident Graduates

Summary of Dates, Fees, and Late Fees for Accelerated Oral Examination
   July 1 of year written exam taken and passed
   Candidate begins collection of cases for case list
   Prior to August 1, 2005
   Candidate will be notified of pass/fail on written examination by the Board office
   August 1, 2005 - September 15, 2005 (5:00 PM CST)
Candidate must return automated application for oral examination with application fee of $770
September 15, 2005
No applications accepted after this date
October 1, 2005
Candidates will be notified of acceptance into accelerated process for the 2006 examination
July 2006 - August 1, 2006
Candidates will be notified to submit properly formatted case lists and examination fee of $805
August 1-18, 2006
Candidates notified by the Board in July to submit their properly formatted case lists and examination fee must include a late fee of $315 ($805 plus $315 = $1,210)
August 18, 2006
No case lists or examination fees accepted after this date
November & December 2006, and January 2007
Oral Examination, ABOG Test Center, 2915 Vine Street, Dallas, TX 75204

Fellowship Applicants

Summary of Dates, Fees, and Late Fees for Accelerated Oral Examination

July 1 of 1st, 2nd, 3rd or 4th year
Candidate begins collection of cases for case list
Prior to August 1, 2005
Candidate will be notified of pass/fail on written examination by the Board office
August 1, 2005 - September 15, 2005 (5:00 PM CST)
 Candidate must return automated application for oral examination with application fee of $770
September 15, 2005
No applications accepted after this date
October 1, 2005
Candidates will be notified of acceptance into accelerated process for the 2006 examination
July 2006 - August 1, 2006
Candidates will be notified to submit properly formatted case lists and examination fee of $805
August 1-18, 2006
Candidates notified by the Board in July to submit their properly formatted case lists and examination fee must include a late fee of $315 ($805 plus $315 = $1,210)
August 18, 2006
No case lists or examination fees accepted after this date
November & December 2006, and January 2007
Oral Examination, ABOG Test Center, 2915 Vine Street, Dallas, TX 75204

Residency Program

1. Residents who are candidates for certification are required to complete 4 years of graduate medical education in an obstetrics and gynecology residency program(s) accredited by the Accreditation Council for Graduate Medical Education (ACGME).
2. The final year of a resident's program must include the responsibilities of a chief (senior) resident in accordance with the description of the program as accredited by the ACGME.
3. When a resident's graduate education and clinical experience has been gained in more than one residency program, the application to take the written examination must be accompanied by verification of the candidate's satisfactory performance in each program. Less than 6 months in a program is not acceptable as a part of an approved clinical experience.
4. Within the required 48 months, education in the basic sciences should be so integrated with clinical experience as to emphasize the application of such related disciplines to total care of the patient.
5. Requests to modify training to accommodate clinical training and/or research for individuals preparing for academic careers are encouraged by the Board and will be considered individually if a detailed application is received from the individual and the program director in advance of initiation of the program. Annual progress reports of activities performed by individuals so approved are required by August 1 each year.
6. An exchange of residents between accredited programs of obstetrics-gynecology is acceptable.
7. Up to 6 months credit for previous training in another ACGME-accredited residency may be granted for residents entering an ACGME-accredited Ob/Gyn residency after July 1, 2005. The residency program director must request this from the Board prior to the start of the candidate's residency.
8. Leaves of absence and vacation may be granted to residents at the discretion of the program director in accordance with local policy. If, within the 4 years of graduate medical education the total of such leaves and vacation, for any reason (eg, vacation, sick leave, maternity or paternity leave, or personal leave) exceeds 8 weeks in any of the first 3 years of graduate training, or 6 weeks during the fourth graduate year, or a total of 20 weeks over the 4 years of residency, the required 4 years of graduate medical education must be extended for the duration of time the individual was absent in excess of either 8 weeks in years 1-3, or 6 weeks in the fourth year, or a total of 20 weeks for the 4 years of graduate medical education.
9. The program director is required to attest to the resident's satisfactory performance, competence, and completion of the program. The program director is expected to sign on behalf of the program, not as an individual.
10. Each resident is required to keep a record of the number and type of obstetric and gynecologic procedures performed during residency to demonstrate the adequacy of his/her operative experience.
11. Resident education must include inpatient and ambulatory primary preventive (generalist) care throughout the duration of residency and provide a continuity of care.
12. Concurrent private practice during residency is not permitted except in rare instances and only after advanced prior approval of the ABOG. This policy does not preclude supervised ongoing longitudinal care of patients over several years of residency training.
13. Resident education must include the diagnosis and management of breast disease.
14. Resident education must include the diagnosis and management of lower urinary tract dysfunction in women.
15. Resident education must include the performance and interpretation of diagnostic abdominal, pelvic, and transvaginal ultrasound.
16. Residents must have acquired decision-making skills and judgment essential for selection of appropriate treatment, as well as the capability to perform, independently, major gynecologic operations and spontaneous and operative obstetric deliveries, to manage the complications thereof, and to be capable of performing the essential diagnostic procedures required of a consultant in obstetrics and gynecology.

Duration of Certificate Validity

Certificates have a limited valid duration for a maximum of 6 years, after which they are no longer valid. Each diplomate must undergo
a Board-approved method of maintenance of certification in order to receive a new certificate.

**Maintenance of Certification**

Maintenance of certification is achieved by a certificate renewal process. Diplomates certified prior to 1986 may sit for voluntary recertification. Beginning in 1986, 10-year time-limited certificates were issued by the Board, and commencing in 2001, such certificates will be limited to 6 years.

Certificate renewal or voluntary recertification may be achieved in one of three different ways. These methods are:

1. a cognitive 3½-hour written examination; or
2. a 1½-hour oral examination; or
3. Annual Board Certification (ABC), a continuous certificate renewal, achieved by reviews of assigned scientific and/or clinical publications.

More specific information about these methods of certificate renewal/voluntary recertification can be obtained by writing Ms. Marsh Markham, Maintenance of Certification Administrator, at the ABOG address or downloading the Bulletin from the Board's Web site, www.abog.org.

The application fees for the written or the oral maintenance of certification examination are due with the application. The application and examination fees for both the written and oral examination are $880 and $830, respectively. Both fees are due prior to either the written or the oral examination. The fees for the ABC, a form of continuous certification, will be $225 per year for general obstetrics and gynecology and $285 per year for subspecialists (includes general and subspecialty items).

A new application form and application fee are required for each cycle of the written, oral, or ABC examination. Application fees are not refundable.

**Written Examination**

Inquiries, applications, and correspondence must be in English. All fees must be paid in US currency.

**Types of Questions**

The basic written examination is offered to approved candidates once each year on the last Monday in June. The examination consists of objective, single-best answer, multiple-choice questions. Many of the questions are constructed to be thought provoking and/or problem solving in contrast to "recall" type questions. They contain a continuum of answers. Specifically, all possible answers may be correct, but only one answer is the most correct.

**Topics Covered in Examination**

Approximately 30% of the questions are from topics listed under each of the general headings of gynecology, obstetrics, and office practice-preventive/primary care. The remaining 10% of the questions are based on topics listed under the cross-content topics, such as genetics, immunology and pharmacology. An individual disease process might be considered under multiple topics such as inclusion of endometriosis under acute pelvic pain, chronic pelvic pain, infertility, laparoscopy, major gynecologic surgery, and several others.

Listed below are major areas of emphasis on the examination. Please note the examples included in parentheses are not meant to be all-inclusive. The listing of topics under a major heading is arbitrary and does not reflect the relative emphasis of that specific topic in the examination.

22. Major gynecologic surgery (colposcisis, myomectomy)
23. Postoperative care, complications, and problems (pulmonary embolus, ileus)
24. Emergency care (vulvar hematoma, hemoperitoneum)
25. Invasive neoplasia of the reproductive tract and breasts
26. Premalignant conditions of the reproductive tract and breasts (endometrial hyperplasia, cervical dysplasia)
27. Trophoblastic diseases
28. Coexisting medical diseases (diabetes, asthma)
29. Concurrent surgical conditions (necrotizing fasciitis, small bowel obstruction)
30. Coexisting psychiatric conditions (depression, personality disorders)

Office Practice—Preventive/Primary Care
1. Age-appropriate periodic assessment, preventive care, and health maintenance (mammography, colonoscopy, immunizations, blood pressure monitoring, counseling for diet and exercise)
2. Family planning (contraception, sterilization)
3. Life style modification (smoking cessation, weight loss, substance abuse treatment)
4. Diagnosis and treatment of uncomplicated medical disease and disorders (headache, asthma, low back pain, irritable bowel, arthritis, acne)
5. Benign breast disorders
6. Urinary tract infections
7. Diabetes mellitus and thyroid disorders
8. Cardiovascular diseases (hypertension, hyperlipidemia, atherosclerosis)
9. Perimenopause and menopause
10. Osteoporosis
11. Polycystic ovarian syndrome
12. Primary and secondary amenorrhea
13. Reproductive endocrinologic disorders (galactorrhea, hirsutism, anovulation, hyperandrogenism)
14. Early pregnancy loss (spontaneous and habitual abortion)
15. Psychiatric conditions (depression, anxiety)
16. Domestic violence and sexual assault
17. Sexuality and sexual dysfunction
18. Problems relating to physiology of menstruation (premenstrual syndrome, menstrual migraine, primary dysmenorrhea)
19. Office surgery
20. Vulvar disease (ulcers, dermatologic conditions, cysts, masses)
21. Vaginal discharge
22. Psychosomatic conditions (tension headache, chronic muscular pain)
23. Pediatric and adolescent gynecology
24. Geriatric gynecology

Cross Content Areas
1. Basic science (maternal and fetal physiology, pathology of reproductive endocrinology, pathology, immunology, microbiology, pharmacology, anatomy, embryology)
2. Genetics
3. Ethics and professionalism
4. Epidemiology and evidence-based medicine
5. Systems-based practice and patient safety
6. Communications

The candidate will be expected to demonstrate skills necessary to apply basic knowledge to the management of clinical problems. These skills include:
1. Obtaining of needed information;
2. Interpretation and use of data obtained;
3. Selection, institution, and implementation of care;
4. Management of complications;
5. Following and continuance of care.

The areas of information and skills that are examined are described in further detail in the manual "Educational Objectives for Resident Education in Obstetrics and Gynecology," published by the Council on Resident Education in Obstetrics and Gynecology.

Requirements
1. Degree of Doctor of Medicine, or an equivalent degree. Candidates with a DO degree must have graduated from a school of osteopathy accredited by the American Osteopathic Association.
2. An unrestricted license. An educational or institutional license to practice medicine in any of the states or territories of the United States or a province of Canada meets this requirement. The requirement of unrestricted license in all states in which the candidate holds a medical license must have been met prior to the time that the application is submitted and prior to the time of the examination.
3. The candidate must have unrestricted hospital privileges (excluding preliminary restrictions for newly requested hospital privileges) to practice as an obstetrician-gynecologist in each of the hospitals in which the candidate has patient care responsibilities. If the candidate is under investigation or on probation (for cause), the examination will be deferred until an investigation is completed, the probation is lifted, and full and unrestricted privileges are granted.
4. The candidate must have completed or be near completion (see "Application") of no less than 42 to 48 months in clinical obstetrical and gynecological programs accredited by the ACGME. Canadian applicants must have no less than 5 years in clinical obstetrical and gynecological programs accredited by the Council of the Royal College of Physicians and Surgeons of Canada (CRCPSC). Such programs must include the usual time as chief (senior) resident in the program. A year spent in an ACGME-accredited transitional-year program (PGY-1) sponsored or cosponsored by an ACGME-accredited obstetrics and gynecology program will meet the requirement for PGY-1 year. Time spent in an osteopathic hospital or in any program not accredited in obstetrics and gynecology by the ACGME or the CRCPSC will not fulfill this requirement.
5. A statement signed by the program director certifying that the candidate has:
   a. satisfactorily completed the course of instruction designed for this program.
   b. taken leaves of absence and vacation not exceeding those described above.
   c. completed and submitted to the program director a satisfactory list of obstetrical patients with medical and obstetrical complications, as well as operative obstetrical and gynecological procedures performed during all the years of residency training. This residency experience log may be used to document the adequacy of such technical training.
   d. achieved the appropriate knowledge, ability, and judgment in order to provide appropriate clinical care in obstetrics, gynecology, and women's health, as documented by ongoing evaluation during the entire resident program.
   e. demonstrated the necessary technical skills to perform:
      1. Major abdominal and vaginal surgical procedures upon the female pelvis and related structures.
2. major surgical procedures for female urinary and fecal incontinence and other forms of pelvic dysfunction (reconstructive pelvic surgery);
3. spontaneous and operative obstetric deliveries;
4. surgical exploration of the abdomen;
5. pelvic and abdominal endoscopic procedures;
6. diagnostic evaluations including electronic fetal monitoring, ultrasonography, colposcopy, amniocentesis, and urodynamic testing; and
7. the diagnosis and treatment of complications of the above.

f. demonstrated good moral and ethical character.

Application for the Written Examination in 2006
A candidate, who completes an accredited residency program on or before September 30, 2006, must apply on or before November 30, 2005, to write the examination on June 26, 2006.

The application form to write the written examination on June 26, 2006, may be obtained by writing to the Board office after September 1, 2005. Each applicant must meet the requirements effective in the year of requested admission to the examination. As a part of the application form, endorsement and verification of the resident's experience, competence, satisfactory performance, and confirmation of the scheduled date for completion of the candidate's residency are required to be affirmed by the current director of the obstetrics-gynecology residency program.

The Board will make the final decision concerning the applicant's admission to the examination after considering all circumstances affecting the application.

Fees

Two fees are required, an application fee and an examination fee.

Application Fee
A candidate's application to write the examination on June 26, 2006, completed in all details, together with payment of the application fee (see "Fees"), must be received in the Board office on or before November 30, 2005. [Note: Application fees must accompany the application.] Application fees sent prior to the mailing of an application are subject to late charges. A copy of the candidate's current license showing a current expiration date also is required.

Late fees will be applied to applicants who have not submitted all required materials by November 30, 2005.

Examination Fee
The candidate ruled admissible to the examination will be notified by April 10, 2006; that:
1. the examination is scheduled to be written on June 26, 2006,
2. the examination fee is payable and the date the fee must be paid is specified (see "Fees"), and
3. two 2 x 2 inch photographs should accompany the examination fee.

[Note: If a candidate has not been contacted by the Board by April 17, 2006, concerning admissibility for the June 26, 2006, written examination, it is the candidate's responsibility to contact the Board office in writing or by fax no later than April 28, 2006, in order to ascertain why they have not received notification. It also is the candidate's responsibility to inform the Board of a change of address in writing in order to receive notifications in a timely manner.]

If a candidate is found to be involved in litigation or investigation regarding ethical or moral issues, the application will be reviewed. Usually, the Board will defer a decision for entry into the examination to gain further information.

Falsification of data (including case lists) or evidence of other egregious ethical, moral, or professional misbehavior may result in a deferral of a candidate's application for at least 3 years (see "Revocation of Diploma or Certificate"). The candidate must then meet all eligibility requirements in effect at the end of the deferred period.

When the Board rules an applicant not admissible to the written examination, a new application and application fee must be submitted. The candidate must fulfill the requirements in effect the year of the new application.

Admission to the Written Examination
The candidate ruled admissible to the examination will be sent an authorization for admission form, which must be presented to the proctor at the time and place of examination. After submission of the application (but before September 30, 2006), verification that the candidate is completing residency in a satisfactory manner must be reaffirmed by the signature of the director of the residency program on the authorization for admission form, dated within the month the candidate is scheduled to write the examination.

Results of the Examination
The results of the written examination will be reported confidentially to each candidate by August 1. A candidate may grant the Board permission to release the results of their examination to the candidate's program director.

A passing grade on the written examination does not ensure a candidate's admissibility to the oral examination for certification, nor does it allow the use of the term "Board eligible." The term "Board eligible" is not approved by the Board for any individual seeking Board certification or for those who have only completed residency training. An individual who has completed residency training, but not yet passed the written examination, should be referred to as a "residency graduate." An individual who has passed the written examination should be referred to as an "active candidate" (see "Types of Board Status" and "Requirements").

Requests for Reexamination
A candidate scheduled to write the examination but who does not do so, as well as the candidate who writes but does not pass the examination, must write to the Board office after September 1 to request reapplication materials for the next examination. It is necessary for each applicant to meet the requirements in effect the year of the requested admission to the examination. The reapplicant must have submitted completed reapplicant materials, a copy of current license with a current expiration date, and the reapplication fee prior to the November deadline. There is no limit to the number of times a candidate may take the written examination provided the candidate is not subject to sanctions imposed by the Board for misconduct or misbehavior as elsewhere provided herein.

The application and examination fees (see "Fees," below) must be paid for each year a candidate is to be scheduled to write an examination.

Written Examination Fees

Fees have been computed to cover the costs of examination and administrative expenses. Application fees will not, therefore, be refunded or credited against a future examination. All fees must be paid in United States currency. The candidate's canceled check is to be considered the receipt.

The application fee must be enclosed with each application or reapplication to write the examination. The candidate will be notified by April 10, 2006, of the approval of the application or reapplication, at which time the examination fee will be due. If payment of the examination fee has not been received in the Board office on or before May 8, the candidate will not be scheduled to write the examination in June.

No application fees will be refunded or credited against a future application.
Examination fees may be refunded, provided candidates inform the Board office in writing of their inability to write the examination prior to May 8, 2006.

**Dates, Deadlines, Fees, and Late Fees for the Written Examination**
- September 1, 2005-November 11, 2005
  - Candidate must request in writing an application form
- November 14, 2005-November 30, 2005
  - Application and application fee of $705 must be received in the Board office
- December 1, 2005-January 31, 2006
  - Application, application fee ($705), and late fee ($315) (total $1,020) due in the Board office
- February 1, 2006-March 31, 2006
  - Application, application fee ($705), and late fee ($760) (total $1,465) due in the Board office
- March 31, 2006
  - No applications accepted after this date
- April 10, 2006-May 8, 2006
  - Candidates will be notified to submit two 2"x2" photographs and examination fee ($645)
- May 8, 2006
  - No examination fees accepted after this date
- June 26, 2006
  - Written examination at various sites
  - All correspondence, applications, and information directed to the Board must be in English.
  - All fees must be paid in US currency.

**Oral Examination**
The oral examination will evaluate the candidate’s mode and rationale for the clinical care of various patient management problems in obstetrics, gynecology, and women’s health. The candidate's case list and other structured hypothetical cases, with possible visual aids, will be used by the examiners.

The fund of knowledge required for passing the oral examination is similar to those categories listed in regard to the written examination.

Candidates will be expected to demonstrate that they have acquired the capability to perform, independently, major gynecologic operations, spontaneous and operative obstetric deliveries, to manage the complications thereof, and to perform the essential diagnostic procedures required of a consultant in obstetrics, gynecology, and women’s health.

Candidates will be expected to demonstrate a level of competence that allows them to serve as consultants to physicians who are nonobstetrician-gynecologists in their community.

The report of the examining team will be reviewed by the Board of Directors, and each candidate is passed or failed by vote of the Board.

The examination will be completed within 1/2 day.

Recording devices, cellular phones, radio-paging devices, and any other electronic communication devices will not be permitted during the oral examination. If such devices are discovered at any time during the examination, this will result in the candidate's immediate dismissal from the examination.

**Appeal Process**
If, at the completion of the oral examination, a candidate believes the examination has not been conducted in a fair and unprejudiced manner, a second examination may be requested.

The request must be made within 1 hour of the completion of the oral examination. To do so, a candidate must telephone the Board office (214 871-1619).

If the request is granted:
- a. the results of the “appealed” examination, regardless of pass or fail, will be discarded.
- b. a second examination will be provided approximately 1 year later at the next regularly scheduled annual oral examinations at no additional charge;
- c. the repeat examination will be conducted by an entirely different team of examiners, no one of whom shall have previously participated in an examination of the candidate or know that this examination is being conducted as an appeal examination;
- d. neither the questions nor the candidate's answers on the first examination will be known to or taken into account by the second group of examiners; and
- e. the decision of the examiners conducting the second examination will be used by the Board to record the results of the candidate's oral examination.

**Requirements**
1. Passing grade on the written examination prior to making application for the oral examination. Duration of Active Candidate status is limited. Candidates must pass the oral examination within 6 years of passing the written examination and may take the oral examination only three times. Time spent in Board-approved fellowship training is excluded from this 6-year limitation. If a candidate fails the oral examination three times, or fails to pass the oral examination within 6 years, the candidate becomes ineligible to repeat the oral examination at that time. The candidate must repeat and pass the written examination to become admissible to the oral examination again. There is no limit to the number of times the written examination and the 6-year cycle to pass the oral examination can be repeated.

2. Good moral and ethical character. The Board will require, usually by hospital inquiry, documented evidence concerning a candidate’s professional reputation, moral and ethical character, and in-hospital practice privileges from administrative officers of organizations and institutions to whom the candidate and his/her conduct of practice is known. If a candidate is involved in litigation or investigation regarding practice activities, ethical or moral issues, the individual will not be scheduled for examination, and the application will be reexamined. The Board usually will defer such a decision for 1 year to gain further information.

3. Unrestricted license to practice medicine in any state or territory (United States or province of Canada) in which the candidate has held a medical license. An educational or institutional license does not meet this requirement. Time spent as a resident in excess of that necessary to fulfill the requirements to take the written examination is not acceptable. Time spent in a teaching or research appointment, which does not involve appointment to the staff of an approved hospital with unrestricted privileges to practice as an obstetrician and gynecologist, will not be sufficient evidence of responsibility for patient care, ie, acceptable to fulfill the requirement of "independent practice."

4. A written explanation must be provided with the application of the circumstances involved if a candidate has ever had his or her medical license restricted or revoked in any territory, province, or state in the United States or Canada. A written explanation also must be provided with the application of the circumstances involved if a candidate has ever had his or her hospital practice terminated or restricted because of personal physical/mental impairments or excessive operative complications or for disciplinary reasons.

5. Actively engaged in unsupervised practice, defined as:
- a. Independent continuous, unsupervised patient care in obstetrics and gynecology for at least the time from July 1, 2005, through June 30, 2006, and
b. unrestricted hospital privileges to practice as an obstetrician-gynecologist in each of the hospitals in which the candidate has been responsible for patient care during this time. Unrestricted hospital privileges implies the physician has full clinical privileges to practice general obstetrics and gynecology. Situations of required proctoring for new privileges is not considered a "restriction" for examination purposes. However, when quality of care or peer review activities have led to a limitation of privileges, this is considered a restricted practice and the physician is not eligible for the oral examination process. If the candidate is under investigation or on probation (for cause), the examination will be deferred until the investigation is completed, the probation is lifted, and full and unrestricted privileges are granted.

6. Submission of typewritten case lists (three copies) and summary sheets (three copies) of all patients dismissed from care in all hospitals during the 12 months ending June 30 prior to the scheduled examination, as well as a list of 40 patients from his/her outpatient/office practice. Practice which consists of ambulatory care exclusively will not be considered adequate to fulfill these requirements. This information must be received in the Board office prior to August 1. Longer times for collection of a patient case list may be required, or obstetrical cases may be chosen from the candidate's fellowship or last year of residency, if necessary.

With the exception of information required to be removed in order to "de-identify" the patient case list as further detailed below, patient case lists that fail to provide the required information, or have not been prepared in the required format, or have insufficient numbers of patients, or are inadequately or incompletely prepared, or fail to provide sufficient breadth and depth of clinical problems may disqualify the candidate from admission to the oral examination.

Falsification of data (including case lists) or evidence of other egregious ethical, moral, or professional misbehavior (see "Revocation of Diploma or Certificate") may result in deferral of a candidate's application for at least 3 years. The candidate must then meet all requirements in effect at the end of the deferred period.

The completeness and accuracy of submitted case lists are subject to audit by the ABOG. All audits will be conducted in accordance with the provisions of the HIPAA Privacy Rule. Permission to conduct on-site audits will be required of each candidate prior to final approval to take the oral examination.

7. The candidate must assure that the patient case lists provided have been "de-identified" in accordance with the requirements of Section 164.514(b)(2)(i) & (ii) of the Final Privacy Rule, Standards for Privacy of Individually Identifiable Health Information issued by the Department of Health and Human Services under the Health Insurance Portability and Accounting Act of 1996 (HIPAA). The information which must be removed from patient, hospital, and other physician records in order for the patient case lists to be deemed "de-identified" under the HIPAA Privacy Rule (see "De-Identification" of Patient Case Lists) Each candidate will be required to furnish the Board with certain prescribed information to the extent permitted by the HIPPA Privacy Rule [see below], concerning performance in practice [eg, maternal mortality rate, perinatal mortality rate, cesarean delivery rate, etc].

The candidate is personally responsible for the proper preparation, accuracy, and completeness of the case lists, which will reflect their practice [private or nonprivate] activity.

8. On the day of the examination the candidate will be expected to sign the following statement: "There have been no restrictions in my hospital privileges, or restrictions placed on any license I have to practice medicine in any country, since the date of my application." Candidates who are unable to sign this statement will not be admitted to the examination until and unless they present evidence that full and unrestricted privileges have been restored.

9. Candidates practicing in a country other than the United States or Canada must submit, with the application, a letter(s) from a senior responsible officer in the hospital(s) where the candidate practices, verifying the candidate's responsibility for independent, unsupervised care of patients.

**Application for the Oral Examination in 2006**

The form on which to apply to take the oral examinations administered in November and December 2006, and January 2007, must be obtained by writing to the Board office after November 1, 2006. The application, complete in all details, along with payment of the application fee, a copy of each current medical license with current expiration date, and two passport-sized (2 x 2 inches) photographs with the candidate's signature across the front, must be received in the Board office on or before February 28, 2006.

[Note: The application fee must accompany the oral examination application. Application fees sent prior to the mailing of an application are subject to a late charge. The deadline date for receipt of applications in the board office is February 28, 2006.]

Late fees will apply for late or incomplete applications.

Applications will be accepted for early examinations for 300 candidates. These 300 candidates will be determined based upon a computerized random selection process.

**Admission to the Oral Examination**

The Board will make the final decision concerning the applicant's admission to the oral examination after considering all circumstances affecting the individual situation.

A candidate ruled admissible to the oral examination in November or December 2006 or January 2007, will be so notified in July 2006. On or before August 1, 2006, the candidate must submit:

a. Triplicate case lists (see items 6 and 7 under "Requirements"), and

b. Payment of the examination fee and late fee, if applicable, by personal check or money order in US funds.

**Patient Lists for the Oral Examination**

Each candidate for the oral examination must prepare the following patient case lists for review by the examiners at the time of examination. The candidate's patient case list will be freely used as a basis for questions that will be patient-management oriented. Questions will be developed which test the ability of the candidate to:

a. develop a diagnosis including the necessary clinical, laboratory, and diagnostic procedures;

b. select and apply proper treatment under elective and emergency conditions;

c. prevent, recognize, and manage complications; and

d. plan and direct follow-up and continuing care.

Carelessly prepared or incomplete case lists may contribute to failure to pass the oral examination. The ABOG offers a case list collection and reporting software package for the oral examination. E-mail caselist@abog.org or phone 214 871-619 for price and availability.

The candidate should bring a copy of their patient case list to the oral examination for personal reference.

Case lists must consist of office practice plus hospitalized and day (short-stay) surgery patients in obstetrics and gynecology, or obstetrics alone, or gynecology alone. All day surgery and hospitalized patients must be reported. If a candidate practices both
obstetrics and gynecology, case lists must be submitted in (1) office practice, (2) obstetrics, and (3) gynecology. Case lists limited to office practice and obstetrics or gynecology can be submitted only by those individuals who limit their practice to either gynecology or obstetrics. In this case, the appropriate and types of gynecological or obstetrical cases must be obtained from the resident's chief residency year, as explained below. The candidate will be examined in all three areas. The case lists must have sufficient numbers and sufficient breadth and depth of clinical experience. The case list must include 40 office practice patients and a minimum of 20 hospitalized or short-stay gynecological and 20 hospitalized or short-stay obstetrical patients with significant problems as defined below. If, but only if, a minimum of 40 such gynecological and obstetrical patients cannot be obtained during the 12-month period from July 1, 2005, through June 30, 2006, the candidate may submit a complete 18-month case list dating from January 1, 2005, through June 30, 2006, and/or submit a list of patients obtained from their senior year of residency. This will require the preparation and submission of separate patient case lists, in triplicate, each with a separate summary sheet, plus three copies of a combined summary sheet, which includes the cases from the 12-month and 6-month case lists, and/or a case list from their senior year of residency. The minimum requirement of 20 gynecological and 20 obstetrical patients will still apply. Case lists may not be composed solely of cases from the senior residency year.

For candidates who are in or have successfully completed a Board-approved fellowship and who are active candidates for certification, case lists must contain obstetrical and gynecological cases, either from their practice and/or from their fellowship or senior residency case log. All day surgery and hospitalized patients must be reported, including all subspecialty patients. Moreover, the 40 non-office practice cases must represent the breadth and depth of obstetrics and gynecology and be chosen for the categories listed under “Office Practice Categories” and “Gynecological Categories,” below. The candidate will be examined in all three areas, and for individuals with a practice limited to a subspecialty (gynecologic oncology, maternal-fetal medicine, or reproductive endocrinology/infertility), the candidate must have a minimum of 20 cases in gynecology and/or 20 cases in obstetrics from their practice and/or from their fellowship or senior residency year that meet the criteria listed under “Gynecological and Obstetrical Categories.” Case lists may not be composed solely of cases from the senior residency year.

The patients listed must be only those for whom the candidate has had personal responsibility for professional management and care. Recording such professional responsibility implies that the candidate has personally controlled the medical and/or surgical management of each patient listed. In the case of partnership or group practice, the patients listed should be those managed by the candidate.

The case list must be received in the Board office on or before August 2 preceding the oral examinations, but only after receipt of approval to submit the case list has been granted by the Board.

Procedure
A patient list should be accurately typed across unbound sheets of white paper 8.5 x 11 inches in size. The font must be no smaller than 10 point. The headings must conform in all details and provide the information requested. Three copies of the complete list must be submitted, as well as three copies of the summary sheet. Standard nomenclature should be used. Only approved abbreviations (see “Acceptable Case List Abbreviations”) are acceptable. Only the English language will be accepted.

The triplicate lists of patients will not be returned to the candidate after the examination.

1. Office Practice Patients
The list of 40 patients (not more and not less) from the candidate's office practice should be prepared in the requested format. List separately patients who have presented with any of the following problems. List no more than two patients from any one category. Do not include any patients who appear on the hospital lists.

Office Practice Categories
1. Preventive Care and Health Maintenance
2. Counseling for Smoking Cessation and Treatment of Obesity
3. Counseling for Sexual Dysfunction
4. Contraception
5. Psychosomatic Problems
6. Genetic Counseling
7. Primary or Secondary Amenorrhea
8. Hirsutism
9. Infertility
10. Hyperprolactinemia
11. Endometriosis
12. Menopausal Care
13. Office Surgery
14. Abnormal Uterine Bleeding
15. Abnormal Cervical Cytology
16. Pelvic Pain
17. Vaginal Discharge
18. Vulvar Skin Disease
19. Breast Diseases
20. Urinary Incontinence and Pelvic Floor Defects
21. Urinary Tract Infections
22. Sexually Transmitted Diseases
23. Preconceptional Counseling
24. Immunizations
25. Pediatric Gynecology
26. Sexual Assault
27. Spousal Abuse
28. Dysmenorrhea
29. Premenstrual Syndrome
30. Benign Pelvic Masses
31. Abnormal Vaginal Ultrasonography
32. Back Pain
33. Respiratory Tract Diseases
34. Gastrointestinal Diseases
35. Cardiovascular Diseases
36. Endocrine Diseases (Diabetes Mellitus, Thyroid or Adrenal Disease)
37. Hypertension
38. Diagnosis and Management of Hypercholesterolemia and Dyslipidemias
39. Recognition and Counseling for Substance Abuse (Alcohol, Narcotics, etc.)
40. Depression
41. Geriatrics

List separately each patient and include the problem (one of the listed categories), diagnostic procedures, treatment, results, and number of office visits during the 12-month period. Group patients together under each separate category.

2. Gynecology Patients
A list of all gynecologic patients should be prepared in the requested format accompanying the application and listed in order as follows:

List all gynecologic patients managed during the same 12-month period (or 18-month period, if an extended time case list is submitted and/or patients chosen from the fellowship or senior year of residency).
The preoperative diagnosis should appear for all major and minor surgical procedures. The size of ovarian cysts and neoplasms must be recorded. For nonsurgical conditions, the admission diagnosis should be recorded. The treatment recorded should include all surgical procedures, as well as primary nonsurgical therapy. Surgical diagnosis refers to pathology diagnosis. For hysterectomy specimens, the uterine weight in grams must be recorded. In cases without tissue for histologic diagnosis, the final clinical diagnosis should be listed.

Days in hospital on this listing of patients, as well as on all other lists, is the arithmetic difference between date of discharge and date of admission. Specific dates of admission and discharge must not be provided.

A minimum of 20 gynecological patients is required, and a candidate cannot count more than two patients from each of the categories listed below. For example, if a candidate has five patients who have had diagnostic laparoscopies, they all must be reported on the case list, but only two of the five will be counted as meeting the minimum requirement of twenty gynecological cases.

Group patients together under each separate category (1-30), then list the remaining patients who do not “fit into” categories 1 through 30.

### Gynecological Categories
1. Abdominal Hysterectomy
2. Laparotomy (other than Tubal Sterilization)
3. Vaginal Hysterectomy (Including Laparoscopically Assisted)
4. Diagnostic Laparoscopy
5. Operative Laparoscopy (Other than Tubal Sterilization)
6. Operative Hysteroscopy
7. Uterine Myomas
8. Defects in Pelvic Floor
9. Endometriosis
10. Tubal Sterilization
11. Invasive Carcinoma
12. Carcinoma in situ
13. Infertility Evaluation
14. Infertility Treatment
15. Urinary Incontinence
16. Urinary Incontinence (Surgical Treatment)
17. Ectopic Pregnancy
18. Pelvic Pain
19. Congenital Abnormalities of the Reproductive Tract
20. Pelvic Inflammatory Disease
21. Adnexal Problems excluding Ectopic Pregnancy and Pelvic Inflammatory Disease
22. Abnormal Uterine Bleeding
23. Vulvar Masses
24. Vulvar Ulcers
25. Adenomyosis
26. Postoperative Wound Complications
27. Postoperative Thrombophlebitis and/or Embolism
28. Postoperative Fever for Greater than 48 Hours
29. Rectovaginal or Urinary Tract Fistula
30. Culposcopy

If, but only if, a candidate cannot acquire the necessary 20 gynecological cases in the above categories, they may use an 18-month case list and/or select an appropriate number of cases from their fellowship or senior residency case list.

</table>

The list of obstetric patients should be prepared in the requested format. List separately each patient with a complication or abnormality, as well as medical and surgical intervention during pregnancy, labor, delivery, and the puerperium. In addition, a total of the number of normal, uncomplicated obstetric patients managed during the same 12-month period (or 18-month period, if an extended time, case list is submitted) should appear on the obstetrical summary sheet and at the beginning of the obstetrical list. These normal, uncomplicated obstetrical patients should NOT be listed individually.

Interpretation of “normal obstetrical patients” for this listing implies that:
- pregnancy, labor, delivery, and the puerperium were uncomplicated, and labor began spontaneously between the 37th and 42nd week of gestation;
- membranes ruptured or were ruptured after labor began;
- presentation was vertex, position was occiput anterior or transverse, and labor was less than 24 hours in duration;
- delivery was spontaneous or by outlet forceps with or without episiotomy, from an anterior position;
- infant had a 5-minute Apgar score of 6 or more and weighed between 2500 and 4500 gms and was healthy; and
- placental delivery was uncomplicated and blood loss was less than 500 mL.

All deliveries not fulfilling these criteria must be listed individually. Include gestational age at admission.

A minimum of 20 obstetrical patients is required, and a candidate cannot count more than two patients from each of the categories listed below. For example, if a candidate has five patients with diabetes mellitus, they must all be reported on the case list, but only two of the five will be counted as meeting the minimum requirement of 20 obstetrical cases. Group patients together under each separate category (1-27), then list the remaining patients who do not “fit into” categories 1 through 27.
If, but only if, a candidate cannot acquire the necessary 20 obstetrical cases in the above categories, they may use an 18-month case list and/or select an appropriate number of cases from their fellowship or senior residency case list.

The ABOG offers a case list collection and reporting software package for the oral examination (e-mail caselists@abog.org or phone 214 871-1619).

**Acceptable Case List Abbreviations**

- A&P Repair: Anterior and posterior colporrhaphy
- Ab: Abortion
- AIDS: Acquired immune deficiency syndrome
- BS&O: Bilateral salpingo-oophorectomy
- CD: Cesarean delivery
- cm: Centimeter
- D&C: Dilatation and curettage
- D&E: Dilatation and evacuation
- DHEAS: Dihydroepiandrosterone
- E: Estrogen
- FSH: Follicle stimulating hormone
- gms: Grams
- HIV: Human immunodeficiency virus
- HRT: Hormone replacement therapy
- IUD: Intrauterine device
- Kg: Kilogram
- PAP: Pap smear
- PROM: Premature rupture of membranes
- PTL: Preterm labor
- SAB: Spontaneous abortion
- SVD: Spontaneous vaginal delivery
- T: Testosterone
- TAH: Total abdominal hysterectomy
- TSH: Thyroid stimulating hormone
- TVH: Total vaginal hysterectomy
- VBAC: Vaginal birth after cesarean
- VIP: Voluntary interruption of pregnancy

**4. Affidavits**

Each patient case list of (a) gynecological (hospitalized and ambulatory) and (b) obstetrical patients from each hospital should be verified on the appropriate affidavit form. The record librarian or fellowship or senior residency year.

**6. Case List Verification and Audit**

The list of patients provided by the candidate is subject to independent verification and audit by an agent or employee of the Board. As a condition of candidacy, the candidate agrees to cooperate fully with any audit authorized by the Board, including, but not limited to:

a. providing full and unrestricted access to the candidate's office records of patients for whom the candidate had personal responsibility for professional management and care during the period for which the lists of patients are required;

b. authorizing access to such hospital or other institutional records as the Board deems necessary, in its absolute discretion, to verify the completeness and accuracy of the patient lists submitted by the candidate;

c. using the candidate's best efforts to obtain, where necessary and possible, written patient consent to the release to the Board of any health information concerning the patient's condition and treatment.

Any audit undertaken by the Board pursuant to the authority granted by this Section shall be conducted in compliance with the HIPAA Privacy Rule.

**"De-identification" of Patient Case Lists**

**General.** Pursuant to the Health Insurance Portability and Accountability Act of 1996 (HIPAA), the Secretary of the Department of Health and Human Services has issued a Final Privacy Rule (HIPAA Privacy Rule) governing the terms and conditions on which health care providers can make available "individually identifiable health information." Under the HIPAA Privacy Rule, candidates would have to obtain the "prior written knowledgeable consent" of their patients before they could release any information concerning those patients that would permit them to be individually identified. The HIPAA Privacy Rule does, however, permit the release of patient information if the information released does not permit the patient to be individually identified.

The ABOG has determined that it would be substantially impossible for candidates seeking certification to obtain prior written knowledgeable consent from all patients who might be included on the patient case lists that the Board requires for its oral examinations. Accordingly, the patient lists that candidates are required to submit for oral examinations must be "de-identified," that is, candidates must exclude from the records they submit to the Board such information as could permit the identification of the patient.

**Requirements.** The HIPAA Privacy Rule specifically enumerates the categories of information that must be removed from patient case lists in order for such case lists to be "de-identified" and thereby become available for submission to the Board.

1. Section 164.514(a) provides, in pertinent part, as follows:

   "Health information that does not identify an individual and with respect to which there is no reasonable basis to believe that the information can be used to identify an individual is not individually identifiable health information." [Emphasis added]

2. Section 164.514(b) provides that:

   "A covered entity (physician/candidate) may determine that health information is not individually identifiable health information only if..." ***The following identifiers of the individual or of relatives, employers, or household members of the individual are removed:***

   a. Names
   b. All geographic subdivisions smaller than a state, including street address, city, county, precinct, zip code, and their equivalent geocodes, except for the initial three digits of a zip code if, according to the currently publicly available data from the Bureau of the Census:
(1) The geographic unit formed by combining all zip codes with the same three initial digits contains more than 20,000 people, and
(2) The initial three digits of a zip code for all such geographic units containing 20,000 or fewer people is changed to 000.
c. All elements of dates (except year) for dates directly related to an individual, including birth date, admission date, discharge date, date of death, and all ages over 89 and all elements of dates (including year) indicative of such age, except that such ages and elements may be aggregated into a single category of age 90 or older;
d. Telephone numbers;
e. Fax numbers;
f. Electronic mail addresses;
g. Social Security numbers;
h. Medical record numbers;
i. Health plan beneficiary numbers;
j. Account numbers;
k. Certificate/license numbers;
l. Vehicle identifiers and serial numbers, including license plate numbers;
m. Device identifiers and serial numbers;
n. Web Universal Resource Locators (URLs);
o. Internet Protocol (IP) and address numbers;
p. Biometric identifiers, including finger and voice prints;
q. Full face photographic images and any comparable images; and
r. Any other unique identifying number, characteristic, or code, except as permitted by paragraph (C) of this Section.
3. Finally, Section 164.51 4(b)(2)(i)&(ii) stipulates that patient information can only be provided to the Board if the "covered entity (physician/candidate) does not have actual knowledge that the information (provided to the Board in the patient case lists) could be used alone or in combination with other information to identify an individual who is the subject of the information."

Summary
When a candidate prepares the required patient case lists, it is the responsibility of the candidate to do so in accordance with the requirements listed above. Specifically, the information listed in Section 2. a. through r. above must not be included in the list. Failure to prepare a list in accordance with these rules may result in the candidate not being allowed to sit for the oral examination.

Warning
The de-identification of patient case lists does not sanction the omission of any cases involving patients under the candidate's care that are otherwise required to be reported. The completeness of the candidate's case list is subject to audit, and the Board has identified and implemented various audit procedures that are consistent with the HIPAA privacy rule. Any effort to use the HIPAA privacy rule to mislead the Board as to the breadth and depth of the candidate's practice, the numbers of patients, or the outcome of their treatment will subject the candidate to disqualification from examination and other discipline as appropriate.

Final Approval and Notification of Admission to the Oral Examination
If the examination fee has been paid and the three copies of lists of patients have been submitted and received by August 1, 2006, and are approved by the Board, the candidate will receive an authorization for admission form and a hotel reservation card at least 1 month prior to the examination, indicating the day, time, and place to report for the examination. Reservations must be made by returning the reservation card or by calling the hotel via telephone.

Reservations made on the Internet are not guaranteed. It is the candidate's responsibility to keep the Board office informed of his/her current mailing address.

Ruling Not Admissible
A candidate not admitted to an oral examination may reapply by submitting a new application, paying the application fee, and meeting the requirements applicable at the time of the reapplication (see "Status").

If the candidate was disqualified because the case lists were judged insufficient for a comprehensive examination, the new case lists may be added to those previously submitted. Thus, the requirement of sufficient numbers, breadth, and depth in the case list makes time in practice the variable and experience the constant.

Reexaminations and Postponement
A candidate who is disqualified or postpones or fails to pass the oral examination must reapply by submitting a written request for a new application form and following the instructions listed in the applicable Bulletin.

Oral Examination Fees
Fees have been computed to cover the costs of examination and administrative expenses. They will not, therefore, be refunded or credited against a future examination. All fees must be paid in United States currency. The candidate's canceled check is to be considered the receipt.

The application fee must be enclosed with each application to take the oral examination. A candidate notified in July of admission to the oral examination in November, December or January is required to pay the examination fee before being scheduled to take the oral examination. If the examination fee and case list have not been received in the Board office on or before August 1 or if these items, including the late fee, have not been received in the Board office before August 18, the candidate will not be scheduled to take the examination in November, December, January, or at another date, if an extra examination is needed.

No application fees will be credited against a future application or refunded. Examination fees may be refunded provided candidates inform the Board office in writing of their inability to sit for the examination prior to September 20.

Listing of Certified Diplomates
Each year the Board office notifies the American College of Obstetricians and Gynecologists of the names and addresses of the diplomates certified in that year. A list of the names of the most recently certified diplomates also is sent to the American Board of Medical Specialties with the request that they be included in the next issue of the Directory of Certified Obstetricians-Gynecologists.

After this effort to assure initial listings of the newly certified diplomates, the Board assumes no responsibility for a diplomate's listing in subsequent issues of any Directory.

Dates, Deadlines, Fees, and Late Fees for Oral Examination (Does not pertain to the Accelerated Oral Examination)
- November 1, 2005
  Request application
  Deadline for receipt—February 28, 2006
- November 1, 2005-February 28, 2006
  Application, current medical license, two 2"x2" photographs, plus application fee ($770)
  Deadline for receipt—February 28, 2006
- March 1-April 28, 2006
  Application, current medical license, two 2"x2" photographs,
application fee ($770) plus late fee ($315) = $1,085  
Deadline for receipt—April 28, 2006  
- May 1–June 12, 2006  
  Application, current medical license, two 2"x2" photographs, application fee ($770) plus late fee ($760) = $1,530  
  Deadline for receipt—June 12, 2006  
- June 12, 2006  
  No applications accepted after this date  
- July 2006  
  Candidates notified to submit properly formatted case lists and examination fee ($895)  
  Deadline for receipt—August 1, 2006  
- August 2–18, 2006  
  Candidates notified by the Board in July to submit their properly formatted case lists and examination fee ($895), which must include a late fee ($315) = $1,210  
- August 18, 2006  
  No case lists or examination fees accepted after this date  
- November & December 2006 and January 2007  
  Oral Examination, ABOG Test Center, 2915 Vine St, Dallas 75204  

Monitoring Oral Examinations  
All oral examinations conducted at the ABOG Test Center will be monitored by closed-circuit television and sound in order to improve the oral examination process. Recordings will not be maintained by the Board.

Revocation of Diploma or Certificate  
1. All Candidates for Certification, Recertification, and Maintenance of Certification and all physicians holding diplomate status must hold an unrestricted license to engage in the practice of medicine in all of the states and territories in which they are licensed, subject to the exceptions hereinafter specified.  
   a. A physician's license shall be deemed "restricted" for purposes of this policy if, as a result of final action by a state or other legally constituted medical board (hereinafter "state medical board"), the physician shall have:  
      (1) had his/her license revoked or surrendered his/her license in lieu of revocation;  
      (2) had his/her license suspended for a specified period of time or until specified conditions have been met and the suspension is not longer in effect;  
      (3) been placed on probation and the probationary period had not expired;  
      (4) been made subject to special conditions or requirements which are still in effect (including, but not limited to, supervision, chaperoning during the examination of patients, additional training beyond that required of all physicians for maintenance of licensure) and regardless of whether or not such conditions or requirements are imposed by order of the state medical board or are the result of a voluntary agreement between the physician and the state medical board.  
   b. Letters of concern or reprimand, not resulting in one of the stipulations which are enumerated in Section 1.a of these requirements, shall not be considered a restriction on the physician's license, even if such letters are made part of the physician's record. Likewise, a physician who has voluntarily entered into a rehabilitation program for chemical dependency or a practice improvement plan with the approval of a state medical board shall not be considered, for purposes of this policy, to have a restriction on his/her license to practice medicine.  
2. Consequences of License Revocation, Restriction, or Surrender  
   a. Upon receipt of notice that the license of a physician seeking to sit for Initial Certification, Recertification, or Maintenance of Certification has been revoked or restricted, as herein defined, such physician shall be disqualified from sitting for any ABOG Certifying Examination until such restriction has been removed or expires.  
   b. Upon receipt of notice that a diplomate's license has been revoked or restricted, as herein defined, the Board has the authority and, at its discretion, undertake proceedings, consistent with due process to revoke his/her diplomate status. Once revoked, the diplomate status of the physician shall be reinstated only after the revocation or restriction on his/her license has been removed or expires and then only on such terms as the Board deems appropriate, considering, among others things, the period of time the physician has not been able to engage in the unrestricted practice of medicine and his/her specialty.  
   c. Upon receipt of notice that the license of a candidate or diplomate has been revoked or restricted under an order which nevertheless permits him/her to continue to practice medicine, the Board has the authority and shall at its discretion undertake proceedings, consistent with due process, to determine whether or not such restriction is of such nature and extent as to preclude consideration for initial Certification, Recertification, or Maintenance of Certification until the revocation or restriction is removed. In making such determination, the Board must evaluate such restrictions or revocations in accordance with preestablished standards, which are objective and nondiscriminatory and are applied consistently and uniformly.  
   d. The Board shall require each diplomate or any physician seeking to sit for Initial Certification, Recertification, or Maintenance of Certification to provide the Board with complete information concerning revocation or any and all restrictions placed on his/her license within 60 days after its imposition. Such information shall include, but not be limited to, the identity of the state medical board imposing the restriction, as well as the restriction's duration, basis, and specific terms and conditions. The Board shall also periodically review the database of the Federation of State Medical Boards, as appropriate and when available, to identify any candidates or diplomates who have failed to disclose license restrictions in a timely manner. However, the candidate or diplomate has the affirmative obligation to advise the Board of all revocations or restrictions and to inform the Board when such restrictions or revocations expire or are otherwise removed. Candidates or diplomates who are discovered not to have made timely disclosure shall be required to show cause why their candidate or diplomate status should not be withdrawn, deferred, or otherwise sanctioned and the Board may defer further consideration or reinstatement of diplomate status until such showing is satisfactorily made.  
3. Each candidate, when making application, signs an agreement regarding disqualification or revocation of his/her diploma, certificate, or other evidence of qualification for cause. Revocation may occur whenever:  
   a. the physician shall not in fact have been eligible to receive the diploma or certificate, irrespective of whether or not the facts constituting such ineligibility were known to or could have been ascertained by this Board, its members, directors, examiners, officers, or agents at or before the time of issuance of such diploma or certificate;  
   b. any rule governing examination for a diploma or certificate shall have been violated by the physician but the fact of such
violation shall not have been ascertained until after the issuance of his/her diploma or certificate;

c. the physician shall have violated the moral or ethical standards of the practice of medicine then accepted by organized medicine in the locality where the diploma is practicing and, without limitation of the foregoing, the forfeiture, revocation, or suspension of his/her license to practice medicine, or the expulsion from or suspension from the rights and privileges of membership in a local, regional, or national organization of their professional peers shall be evidence of a violation of such standards of the ethical practice of medicine;

d. the physician shall fail to comply with the rules and regulations of this Board;

e. the issuance of or receipt of such diploma, certificate, or other evidence of qualification shall have been contrary to or in violation of the Certificate of Incorporation or the By-laws of this Board; or

f. the physician shall have violated any of "The Ethical Considerations in the Practice of Obstetrics and Gynecology" currently published by the American College of Obstetricians and Gynecologists and adhered to by the Board.

Upon revocation of any diploma or certificate by this Board as aforesaid, the holder shall return his/her diploma or certificate and other evidence of qualification to the executive director of the Board and his/her name shall be removed from the list of certified specialists.

Appeals

Appeals from any action of the Board may be initiated by writing to the executive director within 90 days of notification of the action which is being appealed.

Other Considerations

Governmental Services

1. Residency Experience

An applicant, under orders in a hospital conducted by governmental authority, may be credited with time in residency only if that hospital is conducting a residency program in obstetrics-gynecology accredited by the ACGME or by the CRCPSC.

2. Time-in-practice Requirement

A candidate for the oral examination may receive time-in-practice credit for time in government service:

a. with verification of the duration of active duty;

b. when practice has involved chiefly the care of obstetrical and gynecological patients;

c. when the Board has received favorable reports of the candidate’s professional activities while in service.

If a candidate for the oral examination has fulfilled a portion of the required obstetrical and gynecological practice as a civilian before entering governmental service, the remainder of the time needed to fulfill the requirement may be made in governmental service.

Emergency Care and Limitation of Practice

Physicians who assume responsibility for the health of male patients for operative or other care will not be regarded as specialists in obstetrics, gynecology, and women’s health, except as this practice is related to governmental services, investigation and management of an infertility problem, diagnosis and treatment of sexually transmitted diseases, provision of family planning services, or care in an emergency. Candidates for certification may, when necessary, participate in general emergency care. What constitutes a satisfactory limitation of practice to the specialty necessarily depends upon the qualifications and experience of the individual, the availability and capabilities of other physicians in the community, and, to some extent, what is customary in local practices. As a rule, the privileges granted physicians in the practice of obstetrics, gynecology, and women’s health in any hospital are the prerogative of that hospital, not of this Board.

Certification in Critical Care

On September 18, 1985, the ABOG was authorized to issue certificates in obstetrics and gynecology with added qualification in critical care. The purpose of certifying in critical care is to recognize those obstetricians/gynecologists who through added education and examination have demonstrated added knowledge and skill in the care of critically ill patients.

An individual who meets the requirements will be issued a certificate in obstetrics and gynecology with added qualification in critical care by the ABOG. Certificates will bear a date limiting their initial validity to 6 years. A program for renewal certificates will be established.

Requirements

The following qualifications are required for applicants for certification.

1. Certified diplomate of the ABOG.

2. Good standing with the Board.

3. Satisfactory completion of education in critical care of no less than 12 months’ full-time duration. This education must be in a program fulfilling the requirements of the American Board of Surgery for surgical critical care or the requirements of the American Board of Anesthesiology for critical care medicine. These requirements also must be acceptable to the ABOG.

4. The credentials and training of the candidate must be approved by the ABOG, Inc prior to admission to the examinations in surgical critical care or critical care medicine. Applications must be received at least 6 months prior to the date of the examination.

5. Successful completion of the examination in surgical critical care administered by the American Board of Surgery or the examination in critical care medicine administered by the American Board of Anesthesiology.

Application Procedure

1. A candidate intending to make application for certification of added qualification in critical care must notify the Board office at least 6 months prior to the anticipated start of education in critical care. This letter of intent must be accompanied by a nonrefundable registration fee of $415.

2. The Board office of the ABOG must receive an affidavit from the program director of the critical care program attesting to the candidate's satisfactory completion of the program.

3. Application for certification in critical care must be made at least 6 months prior to the date of examination. The application fee is $925 and must accompany the application.

4. The examination may be taken at the conclusion of the education in critical care contingent upon availability of examination by either the American Board of Surgery or the American Board of Anesthesiology, but the examination must be from the Board that approved the fellowship program where the candidate received education.

5. The Surgery or Anesthesiology Board must submit a statement on behalf of the candidate indicating that the candidate is in good standing with the Board.

6. Time spent in a critical care fellowship cannot be used to meet the practice requirements for eligibility to take the principal oral examination in obstetrics and gynecology.

7. All respondents should make application to the executive director of the ABOG.

Governing Rules and Regulations

The Board's Rules and Regulations, which are subject to change from time to time without notice, contain specific provisions concerning eligibility for the examinations administered by the Board; an admission appeals process, which is available under certain circumstances; the application process; the examination processes (initial and renewal); a description of the circumstances under which candidates will be required to reactivate an existing application, or submit a new application, or repeat an examination; a list of occurrences that could lead the Board to revoke a certificate previously issued by it to a diplomate or to place the diplomate on probation; and other matters relating to the Board's examination and certification/maintenance of certification processes. Many, but not all, of those provisions are summarized or described in this document. In the event of any inconsistency between the Board's Rules and Regulations and this document, or any omission from this document of any provision of the Rules and Regulations, the Rules and Regulations shall govern. Copies of the Rules and Regulations are available upon request from the Board's Executive Office.

Certification Requirements

Many physicians write to the Board outlining their training and asking for an estimate of their qualifications and whether further training is required. The Board's requirements, as published hereafter, provide this information, and any potential candidate should be able to determine his/her status after studying these requirements. Individual officers or directors of the Board cannot and will not make such determinations. All evaluations of an applicant's status will be made by the Committee on Admissions in accordance with the rules and regulations of the Board, after submission of an application for examination and payment of the registration fee, which must accompany the application.

It is the responsibility of the candidate to seek information concerning the current requirements for certification as an ophthalmologist. The Board does not assume responsibility for notifying a candidate of changing requirements or the impending loss of his/her eligibility to take an examination.

Educational Requirements

All applicants must have graduated from an allopathic or osteopathic medical school.

All applicants, both graduates of allopathic or osteopathic medical schools, entering ophthalmology training programs must have completed a postgraduate clinical year (PG-1) in a program in the United States accredited by the Accreditation Council for Graduate Medical Education (ACGME) or a program in Canada approved by the appropriate accrediting body in Canada. The PG-1 year must be composed of training in which the resident has primary responsibility for patient care in fields such as internal medicine, neurology, pediatrics, surgery, family practice, or emergency medicine. As a minimum, 6 months of this year must consist of a broad experience in direct patient care. It is a requirement of the Board that the program chair ascertain that an individual has completed an accredited PG-1 year in the United States or in Canada prior to the start of the ophthalmology residency.

In addition to a PG-1 year, all applicants must have satisfactorily completed an entire formal graduated residency training program in ophthalmology of at least 36 months duration (PG-4 or better) in either the United States accredited by the ACGME, or in Canada accredited by the Royal College of Physicians and Surgeons of Canada. No other training, including any form of fellowship, is acceptable.

The applicant's chair is required to verify satisfactory completion of an entire formal graduated ophthalmology residency training program in medical and surgical care of at least 36 months' duration.

When a resident's training has been gained in more than one residency program, an interim evaluation must be completed by the first program. The first program may not be able to verify all competencies. It is the responsibility of the second program to obtain the interim evaluation from the first program. The second program, in its Satisfactory Completion document, must evaluate all competencies, taking into account any deficiencies noted in the interim evaluation by the preceding program(s).

Less than 6 months' service in an accredited program is not acceptable as a part of the required training in ophthalmology. The chair's verification form(s) cannot be submitted to the Board until the applicant has completed the entire residency training program.

If a program is disapproved or withdrawn during the course of a resident's training, he/she must complete the remaining required number of months of training in another accredited program.

Only those applicants who have completed their PGY-1 and entire ophthalmology training program, PGY-4 or beyond, by August 1 are eligible to apply for the Written Qualifying Examination given in the spring of the following year.

Licensure

Graduates of United States and Canadian Medical Schools

A person shall be eligible to apply for and to take any examination administered by the Board only if, as of the date of application and at all times throughout certification, the person has a valid and unrestricted license to practice medicine in the United States, its
Applications
An applicant who wishes to be examined by the Board shall complete an online application via the ABO Web site: www.abop.org. In March of every year, the Board sends residency training programs a username and password for each resident who is scheduled to complete his/her residency training as of August 1 of that year. Programs are responsible for distribution of the user names and passwords to residents. Eligible residents use this information to log on to the ABO Web site and complete an application for the Written Qualifying Examination. The application shall be considered complete only when all supporting data required by the application are received in the Board office. Supporting data includes a copy of a current registration to practice medicine, a copy of an ECFMG certificate (if applicable) and the chair’s verification form.

The Board also mails a username and password to candidates who have active applications with the Board and who are eligible to take the WQE in March of every year. All candidates and residents may also obtain a username and password by submitting a request in writing to the Board office.

Written Examination Deadline
If an applicant wishes to be considered for a Written Qualifying Examination to be conducted in a particular year, his/her application and all supporting data, including supporting data furnished directly by others with respect to the applicant, must be completed via the ABO Web site between March 1 and August 1, except for the chair’s verification form, which must be postmarked on or before October 1 of the calendar year immediately preceding the calendar year in which the Written Qualifying Examination is to be conducted. By paying a late fee the deadline for completing the application may be extended from August 1 to September 1. No other exceptions to, or extensions of, these requirements will be made for any reason. The dates of future examinations can be found on the Internet at www.abop.org.

An applicant who does not receive notification from the Board office by January 15 of the acceptance or rejection of his/her application must contact the Board office in writing to inquire about the status of the application. Failure to contact the Board office in writing by February 15 will result in such applicant’s removal from the examination roster.

If a completed application and all required supporting data are not timely submitted, the application will not be valid and the application fee shall be returned. No application will be considered to be complete until the fee and all required supporting data, including a copy of a current registration to practice medicine and a copy of an ECFMG certificate (if applicable), have been received by the executive director. The online WQE application will require payment by Visa or MasterCard.

The application form contains a pledge that explains the prohibitions regarding improper conduct before, during, and after examinations. Candidates must certify that the information they provide in their applications is true and accurate. If (1) any misrepresentation is discovered in the application, in any other information submitted to the Board, or in the identity of a person applying to take or taking the examinations, (2) any financial or other benefit is offered by a candidate to any director, officer, employee, proctor, or other agent or representative of the Board in order to obtain a right, privilege, or benefit not usually granted by the Board to similarly situated candidates, or (3) any irregular behavior during the examination such as copying answers, sharing information, using notes, or otherwise giving or receiving aid is discovered by observation, statistical analysis of answer sheets, or otherwise, the candidate in question shall be given written notice of the charges and an opportunity to respond in accordance with the procedures set forth in the Rules and Regulations of the Board. If the Board determines that a violation has occurred, the Board may permanently bar the person(s) involved in the violation from all future examinations, invalidate the results of prior examinations taken by the person(s), withhold or revoke the certificate of the person(s), or take other appropriate action. If sanctions are imposed pursuant to the Rules and Regulations of the Board, the Board may notify legitimately interested third parties of its action.

When the Board determines that irregular behavior has occurred during an examination, the Board will make every effort to withhold the scores of only those candidates directly implicated in the irregularity. Nevertheless, in some instances the evidence of irregularity, though sufficiently strong to cast doubt on the validity of scores, may not enable the Board to identify the specific candidates involved in the irregularity. In such circumstances, the Board may withhold the scores of candidates not directly implicated in the irregularity and, if necessary, may require those candidates to take an additional examination at a later date to ensure the validity of all scores.

The examination questions used in the Written Qualifying Examination and the illustrative materials and questions asked in the Oral Examination are copyrighted as the sole property of the Board and must not be removed by the candidate from the test area or reproduced in any way. Any reproduction, in whole or in part, of the Written test questions or Oral Examination materials and questions is a federal offense and also may subject the candidate to the sanctions listed above. No notes, textbooks, other reference materials, scratch paper, or recording devices may be taken into either the Written or the Oral Examinations.

Written Qualifying Examination
In order to qualify for an Oral Examination, each candidate must pass a Written Qualifying Examination. The Written Qualifying Examination consists of 250 multiple-choice questions. The purpose of the Written Qualifying Examination is to evaluate the breadth and depth of the basic science and clinical knowledge of candidates who have satisfactorily completed an accredited program of
education in ophthalmology. Candidates who successfully complete the Written Qualifying Examination will be further evaluated in an Oral Examination.

Aspects of the Candidate's Ability That Are Tested:
- recall of information
- understanding and application of basic knowledge
- relation of pathogenesis to disease process
- evaluation of clinical data
- utilization of diagnostic and therapeutic procedures
- anticipation and recognition of complications
- ethics of ophthalmic practice

Topics Covered Include:
1. optics, visual physiology, and correction of refractive errors
2. retina, vitreous, and uvea
3. neuro-ophtalmology
4. external disease and cornea
5. glaucoma, cataract, and anterior segment
6. plastic surgery and orbital diseases
7. ophthalmic pathology

The Written Qualifying Examination (WQE) is a computer-based exam administered at approximately 300 Prometric® testing centers on March 27, 2007. (Prometric is a part of the Thomson Corporation.)

Oral Examination
Upon successful completion of the Written Qualifying Examination candidates will be sent specific instructions for online registration for the Oral Examination. The Oral Examination is designed to simulate how candidates care for patients in a clinical setting. Candidates are assessed with regard to their ability to incorporate the cognitive knowledge demonstrated in the Written Examination with judgment on caring for a patient.

Online Oral registration will require candidates to update personal contact information, agree to terms and conditions, and submit payment by either Visa or MasterCard. Once a candidate completes the online oral examination registration, he/she will be required to submit a current 2 inch by 2 inch photo to the Board office in order to complete the registration process. Information about the examination procedures and scheduling is sent to all candidates after they have been registered for the Oral Examination.

Oral Examination Schedule
It has been the custom of the Board to hold two oral examinations a year with candidates who have passed the Spring Written Qualifying Examination. These candidates are assigned either to a group taking the Oral Examinations in the fall of that year or to a group taking the Oral Examinations in the spring of the following year.

Candidates who pass the April 2007 Written Qualifying Examination will be assigned to either the Fall 2007 oral or the Spring 2008 oral. The Board reserves the right to limit the number of candidates admitted to any scheduled examination and to designate the candidates to be examined.

Oral Examination Subjects
The Oral Examination will cover the subjects listed and described in the following paragraphs. A candidate is presented with a series of props, each of which represents one patient or clinical situation, and is asked to identify how he/she would care for that patient. The examiner assesses a candidate's ability to demonstrate patient care skills in the following areas:

I. Data Acquisition
Recognition by the candidate of depicted abnormalities and diseases that affect the eye, ocular adnexa, and the visual pathways. Candidates will be asked for historical information and examination data that might be obtained on a patient with a particular condition depicted or described.

II. Diagnosis
The ability of candidates to synthesize historical and physical evaluation information, along with the appropriate laboratory data, to arrive at correct diagnoses and differential diagnoses.

III. Treatment
Candidates will be expected to provide a reasonable and appropriate plan for medical and/or surgical management of patients with the conditions depicted or described and be able to discuss the prognosis and/or therapeutic complications for the particular condition.

The oral examination is a timed examination and requires candidates to "care for" a series of patients. All examinations are given by appointment within a half-day period. The half-day period is divided into six examinations to allow multiple examiners to assess the candidate's patient care ability. The pooled group of examiners is referred to as a panel.

Scope of the Examination
The oral examination includes clinical scenarios representative of developmental, dystrophic, degenerative, inflammatory, infectious, toxic, traumatic, neoplastic, and vascular diseases affecting the eye and its surrounding structures, including but not limited to the following information:

- Candidates should be familiar with the basic principles of physical and geometrical optics and the operation of standard optical instruments. They should understand the essentials of visual physiology including visual acuity, light and dark adaptation, accommodation, and color vision. They should know the various forms of ametropia, principles and techniques of refraction, principles of lens design, and methods of correction of ametropia including spectacles, contact lenses, intraocular lenses, and keratorefractive surgery.
- Candidates should be familiar with the methods for prescribing protective lenses, absorptive lenses, and aids for low vision.
- Candidates should be familiar with diseases affecting the eye of infants and children and associated systemic abnormalities. Candidates should understand the anatomy, pathology, and physiology of the neuro-muscular mechanisms subserving ocular motility and binocular vision.
- Candidates should be familiar with the methods of examination for detection and assessment of sensory and ocular motor disorders. They should also know the clinical features, differential diagnosis, natural course, and management of the various types of comitant and noncomitant deviations. They should be familiar with the principles and complications of surgery upon the extraocular muscles.
- Candidates should know the anatomy of the orbit and the neuro-anatomy of the afferent and efferent visual systems. They should understand the principles and techniques of various diagnostic procedures and be able to interpret visual field testing, visually evoked responses, ultrasonography, conventional x-ray imaging, CT scanning, and magnetic resonance imaging.
- Candidates should be familiar with the clinical features, pathology, differential diagnosis, and management of disorders of the orbit, visual pathways, oculomotor system, and pupillomotor pathways, including the indications for, principles of, and complications of orbital surgery.
- Candidates should understand the anatomy, embryology, physiology, and pathology of the structures comprising the lacrimal system,
lids, cornea, conjunctiva, and sclera. They will be expected to discuss conditions affecting these structures and provide an appropriate differential diagnosis.

Candidates should also be able to describe and discuss medical and surgical treatment for diseases and abnormalities involving these tissues, including indications for and complications of surgery.

Candidates should know the anatomy, embryology, physiology, and pathology of abnormalities and diseases of the cornea, anterior chamber angle, iris, ciliary body, and lens.

Candidates are expected to discuss conditions affecting these structures and those to be considered in their differential diagnosis. They should also be able to describe and provide indications for medical and surgical therapy directed toward alleviating or curing these conditions.

Candidates should know the anatomy, embryology, physiology, and pathology of abnormalities and diseases of the vitreous, retina, choroid, and posterior sclera.

Candidates are expected to discuss conditions affecting these structures and those to be considered in their differential diagnosis. They should also be able to describe and provide indications for medical and surgical therapy directed toward alleviating or curing these conditions.

Candidates are expected to discuss medical ethics and professionalism in the care of ophthalmological patients.

Candidates are expected to demonstrate judgment pertaining to other aspects of patient care including: ethics/professionalism (such as informed consent, commercial relationships, delegation of authority, communications to the public, surrogacy/autonomy issues, unnecessary surgery); medical error/patient safety; patient regulatory rules; and interaction with other disciplines (such as primary care physicians, pathologists), in discerning appropriate patient care.

**Reactivation**

**Written Qualifying Examination**

A candidate shall be required to reactivate his/her application for approval and submit an additional application fee under the following circumstances that relate to the Written Qualifying Examination:

1. if a candidate fails to take the Written Qualifying Examination within 24 months after notice has been sent to him/her that his/her application has been accepted;
2. if a candidate does not pass the Written Qualifying Examination within 24 months after failing such examination;
3. if the candidate does not pass the entire examination in three attempts.

**Oral Examination**

The grading process of the oral examination is an overall pass/fail grade. The Board requires that each candidate be examined in six separate subsections of the Oral Examination. A percent correct is calculated for each subsection and these six scores are averaged to arrive at a total score. Failure to achieve the necessary overall passing score requires that an individual repeat the entire six subsections of the Oral Examination. Additional information on grading is specified in the "Rules for Grading" which are sent to all candidates at the time of their Oral Examination registration.

A candidate shall be required to reactivate his/her application for approval, submit an additional application fee, and pass another Written Qualifying Examination before being admitted to the Oral Examination under the following circumstances:

1. if a candidate does not take the Oral Examination within 24 months after notice has been sent to the candidate that he/she has passed the Written Qualifying Examination;
2. if a candidate who is eligible to do so fails to repeat the Oral Examination within 24 months after failing such examination;
3. if the candidate does not pass the entire examination in three attempts.

**Reactivation Procedure**

In order to reactivate an application the following actions must be completed by the postmarked August 1 registration deadline:

- complete a new online application
- remit the current fee
- submit a copy of a current valid and unrestricted license to practice medicine in the United States, its territories, or a Canadian province

**Certification**

A candidate who successfully passes both the Written Qualifying and Oral Examinations within the required time limitations herein above set forth, as determined by the Board in its sole discretion, shall be entitled to receive a certificate without further consideration of his/her qualifications by the Board. Physicians who have received the certificate are diplomates of the Board.

**Duration of Certification**

Certificates issued by the Board after July 1, 1992, are valid for a period of 10 years. Thereafter, a diplomate will be required to satisfactorily complete a designated renewal program every 10 years in order to extend the validity of his/her certificate. Certificates issued prior to July 1, 1992, are valid during the diplomate’s lifetime. Diplomates who hold a lifetime certificate are also eligible to participate in the maintenance of certification process.

**Maintenance of Certification**

**Background**

The American Board of Ophthalmology's Maintenance of Certification (MOC) replaces elements that promote a commitment to lifelong learning and practice improvement.

The Board's MOC process was developed according to standards established by the American Board of Medical Specialties (ABMS), the umbrella organization of the 24 medical specialty boards. Maintenance of Certification focuses on six general competencies integral to quality care:

- patient care
- medical knowledge
- practice-based learning and improvement
- interpersonal and communication skills
- professionalism
- systems-based practice

These competencies were identified jointly by the ABMS and the ACGME in an effort to define the skills and information necessary for a physician to deliver high quality patient care. MOC evaluates the competencies through the following four basic components:

1. Evidence of Professional Standing
2. Evaluation of Practice Performance
3. Evidence of a Commitment to Lifelong Learning and Self Assessment
4. Evidence of Cognitive Expertise

**Time-limited Certificates**

Certificates issued in 1992 and thereafter are valid for a period of 10 years and expire December 31 of the tenth year. Thereafter, a diplomate is required to satisfactorily participate in the MOC process in order to extend the validity of his/her certificate.
Certificates issued prior to July 1, 1992, are valid during the diplomate's lifetime. Diplomates who hold a lifetime certificate are also encouraged to participate in the MOC process, however, passing or failing the process does not affect the status of their original certificate.

**MOC Components**

MOC evaluates the competencies through the four basic components detailed below.

1. **Evidence of Professional Standing**

   As of the date of application and at all times throughout certification the diplomate must hold a valid and unrestricted license(s) to practice medicine in the United States, its territories, or Canadian province in which the applicant's practice of medicine is regularly conducted and in each other place in which the person practices or has practiced medicine and has an unexpired license. A diplomate must notify the Board of any action taken by a State Medical Board within 60 days of such action. The definitions of restricted licensure and the exceptions to these definitions are described in the Board's Rules and Regulations.

2. **Evidence of Practice Performance**

   The Office Record Review (ORR) is a self review of clinical practice. The ORR consists of over 40 ophthalmic diagnoses with specific definitions and timeframe requirements (ORR modules). An example of an ORR module definition and timeframe requirement is: Myopia - a new adult patient who presents with myopia, seen by you at least once in the past 12 months.

   ORR modules encompass the standards of care and practice patterns related to the specific diagnosis and assess the quality of practice through verification of the documentation of appropriate measurements, diagnosis, management, and follow-up. To complete the ORR, diplomates select three ORR modules. For each of the three ORR modules selected, the diplomate finds five patient records that correspond to the module's definition and timeframe requirement. Diplomates will review 15 of their patient records in all.

   Diplomates must complete the ORR once during the 10-year MOC cycle. The ORR is administered online and is available to eligible diplomates 24 hours a day, 7 days a week through the ABO Web site. Once the ORR is started, users will have 30 days to complete it. During the 30-day timeframe, users can access and re-access the ORR at any time. Once the ORR is complete, diplomates will receive instant feedback on responses and overall performance.

3. **Evidence of a Commitment to Lifelong Learning and Self Assessment**

   **Part A. Continuing Medical Education (CME)**

   Diplomates must obtain an average of 30 Category 1 CME credits per year from an Accreditation Council for Continuing Medical Education (ACCME)-approved organization as of the date of certification and throughout the 10-year MOC cycle.

   **Ethics CME Requirement**

   Three credit hours must be in ethics. The Board's ethics requirement is designed to encourage ophthalmologists to recognize and resolve the ethical dilemmas that arise which directly impact patient care. While there are no specific guidelines regarding courses that satisfy the ethics requirement, the course should contain the word "ethics" in the title or be designated as ethics by the sponsoring organization.

   Ethics courses can be found through various institutions, such as bioethics departments of many universities, community hospitals, and medical centers. The American Academy of Ophthalmology (AAO) also has an active ethics program which offers courses at its annual meeting and has on-line ethics courses at www.aao.org.

   Please note, even if an ACCME-sponsored organization designates a specific course as ethics, the Board reserves the right to accept or reject any course submitted as ethics based on course content. Diplomates can submit documentation on the content of CME courses to the Board office for further review as ethics.

   **Part B. Periodic Ophthalmic Review Tests (PORT)**

   The PORT is a series of 50-item, web-based self-review tests in core ophthalmic knowledge (knowledge considered fundamental to the practice of ophthalmology regardless of the practice emphasis) and areas of practice emphasis.

   Ultimately, all diplomates will be required to complete two PORTs during the MOC cycle: one in core ophthalmic knowledge and one in a practice emphasis area of choice, as listed below:

   - General Ophthalmology
   - Cornea/External Disease
   - Neuro-ophthalmology and Orbit
   - Pediatric Ophthalmology/Strabismus
   - Refractive Management/Intervention
   - Cataract/Anterior Segment
   - Glaucoma
   - Oculoplastics and Orbit
   - Retina/Vitreous
   - Uveitis

   There will be three versions of each PORT. All diplomates participating in MOC will have access to two PORTs: one core ophthalmic knowledge and one in a practice emphasis area of choice.

   There is no limit to the number of PORTs done each year. Upon completion of two PORTs, a $100 fee is required for each additional PORT.

   Content of the PORT exams will reflect the content of the Demonstration of Ophthalmic Cognitive Knowledge (DOCK) exam. Participation in PORT is designed to promote continuous learning and to help diplomates identify his/her strengths and weaknesses prior to sitting for the closed-book cognitive exam, DOCK. Feedback to missed items will be provided.

   The PORT is administered online and is available 24 hours a day, 7 days a week through the ABO Web site beginning January 10, 2006. Eligible diplomates will register for and complete the PORT online and will receive instant feedback.

4. **Evidence of Cognitive Expertise**

   **Demonstration of Ophthalmic Cognitive Knowledge (DOCK)**

   The Demonstration of Ophthalmic Cognitive Knowledge (DOCK) is a computer-based, proctored, 150-item examination administered at approximately 300 Prometric testing centers for a period of 1
month each year in September. DOCK consists of one 50-item module on core ophthalmic knowledge and two 50-item modules drawn from the following practice emphasis areas:

- General Ophthalmology
- Cornea/External Disease
- Neuro-ophthalmology and Orbit
- Pediatric Ophthalmology/Strabismus
- Refractive Management/Intervention

Diplomates can select two of the same practice emphasis areas or two different practice emphasis areas. However, while two modules are available for most practice emphasis areas, some topics will have only one available module. Other areas to be covered in the DOCK include patient safety, environment of medical practice, and ethics. Diplomates for MOC will be required to achieve an overall passing grade based on the combined grades of all three modules.

The DOCK will be offered for the first time in September 2006. All eligible diplomates will be able to apply for the DOCK from January-April 1 of each year online via the ABO Web site: www.abop.org.

**Timeframe and Transition**

The ABO MOC process is designed to be completed over the 10-year certification cycle. Ultimately, each component will be completed in a specific timeframe: ORR in years 3-4, PORT in years 5-7, and DOCK in years 8-10. However, in order to transition from recertification to MOC, requirements and timeframes will be slightly different for each group of diplomates. Charts illustrating the requirements and timeframe for all diplomates according to the year they were certified or recertified can be found on the ABO Web site: www.abop.org.

Diplomates who hold time-limited certificates and who have not recertified or diplomates certified prior to 1992 who hold lifetime certificates can apply for MOC during the scheduled application periods and complete the MOC components as they are offered.

**Failure to Adhere to Timeframe**

Diplomates who fail to take components within the specified timeframe will incur a financial penalty and risk exceeding the 10-year time limit and, therefore, loss of board certification.

**Failure to Pass MOC Components**

All MOC components can be repeated as often as necessary during the designated years until the MOC process is successfully completed. Repeat examinations or reviews are subject to re-registration fees.

**Board Policies**

**Applicant Disclosure Obligations**

At the time a person submits an application to the Board and at all times thereafter, the person shall have a continuing obligation to disclose promptly to the Board the existence or occurrence of any circumstances causing the person to fail to satisfy the foregoing condition of eligibility to apply for and take any examination administered by the Board. A person submitting an application to the Board shall inform the Board or, in a written submission accompanying, the person's application or in a written submission to the Board before taking any examination administered by the Board, as the case may be, if the person's license to practice medicine in the United States, its territories, or Canadian province has previously been surrendered or not renewed upon its expiration or if the person's practice of medicine or license to practice medicine in the United States, its territories, or Canadian province has previously been revoked, restricted, conditioned, suspended, limited, qualified, or subject to the terms of probation.

**Disabilities**

The American Board of Ophthalmology complies with the Americans with Disabilities Act (ADA) to mitigate the effects of the disability on the testing activity. To accommodate individuals with disabilities the Board will make reasonable modifications to its examinations that do not fundamentally alter the requirements of the examination or the measurement of the skills or knowledge the Board examinations are intended to test.

A candidate for Board certification/maintenance of certification who believes that he or she is disabled within the meaning of the ADA, and who requests an examination under nonstandard conditions, shall specify on (or in a supplement submitted with) the application form the existence, the specific nature, and the extent of his/her disability and the specific modification requested. The candidate shall also submit either with the timely filed application, or no later than 30 days after the deadline for applying for a particular examination, all independent documentary evidence substantiating the individual's disabilities.

Documentation includes, but is not limited to:
- Name, address, telephone number, and qualifications of each expert who provides a report documenting the individual's disabilities.
- Dates and locations of all assessments performed and included in the documentation.
- Copies of evaluation reports with scores or ratings for each standard instrument or assessment method used. The Board requires that this documentation be no more than 3 years old.
- A full description of any nonstandard instruments and assessment methods used to determine the disabilities and diagnoses.
- Any diagnoses of the individual's disabilities using standard nomenclature, ie, International Classification of Diseases (ICD), American Psychiatric Association Diagnostic and Statistical Manual (DSM).
- A description of the individual's functional limitations due to any disabilities.
- Reports of any past accommodations on examinations the individual received because of the disabilities.

The ABO will verify the documentation of the disability and reserves the right to have the individual independently evaluated at its own expense.

**Examination Fees**

Beginning in 2006, application or registration for all ABO examinations and MOC components will be completed online via the ABO Web site: www.abop.org. Payment for all examinations and MOC components must be made using either a Visa or MasterCard.

The fees for examinations shall be established annually by the Board of Directors on the basis of the actual and anticipated costs of the Board in the examination of candidates and the administration of its business. The directors of the Board serve without compensation except for reimbursement of expenses.

To find out the current fees for the Board examinations, contact the Board office or visit the Board Web site at www.abop.org.

**Mailing Procedures**

It is best not to mail application supporting materials just before the postmark deadline because packets are sometimes postmarked a day or two after mailing. Caution: If there is a discrepancy between a metered postmark and an official US Postal Service postmark, the latter will be considered official. The Board advises applicants to send all supporting materials that must be received in the
Board office by a specific deadline by registered mail or a traceable
courier service.

Refund Policy
When a candidate registers for an examination, significant costs are
incurred by the American Board of Ophthalmology. Therefore, to
keep costs down for all candidates, fees for examinations are non-
refundable, regardless of the reason. However, in case of cancella-
tion, 50% of the examination fee will be applied to the subsequent
examination, if taken within the 2-year time limit for an active ap-
lication. In addition, all application fees include a $300 non-
refundable administrative fee.

Cancellation of Examination
If the American Board of Ophthalmology is unable to administer or
complete the administration of a Written or Oral Examination at
the scheduled date, time, and location due to circumstances beyond
the Board's control, the examination may be cancelled. If the exami-
nation is cancelled, the Board is not responsible for any expense an affected candidate may
have incurred in connection with the cancelled examination or for
any expense the candidate may incur in connection with any substi-
tute examination.

Results of Examinations
Within a reasonable time after completion of the Written, Oral,
and/or Maintenance of Certification Examinations, the candidate
shall be notified by the executive director as to the results thereof.
The decision of the Board as to these results shall be final and con-
clusive. Grades are not subject to appeal. Because such is the case,
individual directors of the Board or associate examiners should not
be contacted about specific examination results. To preserve confi-
dentiality, results of an examination will not be given over the tele-
phone, facsimile, or computer.

AMA Physician's Recognition Award
The American Medical Association (AMA) allows 25 hours to be
claimed toward an AMA Physician's Recognition Award (PRA)
for specialty board certification and recertification. PRA applications
may be obtained from the AMA via telephone at 312-464-4669; fax
312-464-4657; or on the Internet at www.ama-assn.org/go/cme.

Disciplinary Sanctions
The Board shall have the authority to impose disciplinary sanctions
upon a candidate or a diplomate for any of the following reasons:
1. violation of rules and regulations of the Board relating to the
Written Qualifying, Oral, and Recertification Examinations and
applications to take the examinations;
2. substantial misstatement or omission of a material fact to the
Board in an application or in any other information submitted to the
Board;
3. presenting or distributing, or aiding or assisting another per-
son(s) to present or distribute, a forged document or other writ-
ten instrument purporting to have been issued by or under the
authority of the Board to evidence that a candidate, diplomate,
or any other person(s) is currently or was previously certified by
the Board when that is not the case, or claiming orally or in writ-
ing, or assisting another person(s) to claim, that a candidate,
diplomate, or any other person(s) is currently or was previously
certified by the Board, when that is not the case;
4. any license of the person to practice medicine is not, or ceases to
be, a valid and unrestricted license to practice medicine within
the meaning set forth in the Rules and Regulations of the Board;
5. issuance of a certificate contrary to or in violation of the rules
and regulations of the Board;
6. illegibility of the person to whom the certificate was issued to
receive the certificate;
7. engaging in any conduct that materially disrupts any examina-
tion or that could reasonably be interpreted as threatening or
abusive toward any examinee, proctor, or staff.

Statements of Eligibility
The Board does not issue statements of "eligibility" for its examina-
tions. The only information the Board will divulge is whether a phy-
sician is or is not certified. Inquiries to the Board by outside agen-
ties about the certification status of physicians who have inactive
applications or who hold lapsed certificates will be answered by
stating that said physician is not Board certified.
The American Board of Ophthalmology charges a $35 fee for each
formal verification of a physician's certification.

American Board of Medical Specialties
The American Board of Medical Specialties (ABMS) was estab-
lished in 1938 to serve in an advisory capacity to the American spe-
cialty boards and to cooperate with organizations that seek its ad-
vice concerning the certification of medical specialists. The
American Board of Ophthalmology is officially recognized by the
ABMS, and contributes an annual fee of $6,000 in addition to a per
capita fee for each new diplomate certified, as do all other medical
specialty boards, to the American Board of Medical Specialties in
support of the activities of ABMS.
The American Board of Ophthalmology provides an annual list-
ing of new diplomates for inclusion in the Official ABMS Directory
of Board Certified Medical Specialists and the ABMS Medical Spec-
ialists Plus CD-ROM, published by Elsevier Science and the Ameri-
can Board of Medical Specialties, which are used by credentialing
organizations. Each diplomate will be contacted directly by Elsevier
Science (Reed Elsevier Publishing) to update biographical informa-
tion each year. This listing is cost free.

Associates
All Board directors and associates, whether examiners or members
of special committees, are informed by the Board that they shall not
promote, or permit others to promote, his/her participation in com-
mercial or educational activities (domestic or foreign) under cir-
cumstances that exploit, or might be perceived to exploit, his/her
familiarity with examinations administered by the American Board
of Ophthalmology or otherwise might be perceived to compromise
the integrity of those examinations. All computerized educational
devices should be monitored so that this material does not com-
promise the Board and the valued role of our associate examiners.
It is advisable that associates ascertain in writing an agreement
stating that their educational material will not be published or mar-
keted in any way that could jeopardize their relationship with the
Board. In addition, Board directors and associates may not exploit
their association with the ABO through communications to the pub-
lie or through self-promotional items. It is, however, acceptable to
include a factual reference on a curriculum vitae.

(Technical changes are subject to change without notice. All applicants are advised to contact the American Board of Orthopaedic Surgery [ABOS] to ascertain whether the information below is current.)

I. Introduction

A. Definition
Orthopaedic surgery is the medical specialty that includes the preservation, investigation, and restoration of the form and function of the extremities, spine, and associated structures by medical, surgical, and physical methods.

B. Purpose
The ABOS was founded in 1984 as a private, voluntary, nonprofit, autonomous organization. It exists to serve the best interest of the public and of the medical profession by establishing educational standards for orthopaedic residents and by evaluating the initial and continuing qualifications and competence of orthopaedic surgeons. For this purpose, the Board reviews the credentials and practices of voluntary candidates and issues certificates as appropriate. It defines minimum educational requirements in the specialty, stimulates graduate medical education and continuing medical education, and aids in the evaluation of educational facilities and programs.

The Board does not confer any rights on its diplomates, nor does it purport to direct licensed physicians in any way in the conduct of their professional duties or lives. It is neither the intent nor the purpose of the Board to define requirements for membership in any organization or for staff privileges at any hospital.

C. Directors
The directors of the ABOS are elected from diplomates of the Board who are nominated by the American Orthopaedic Association, the American Medical Association, and the American Academy of Orthopaedic Surgeons. They serve without salary.

D. Organization
Directors of the Board elect a president, president-elect, secretary, and treasurer annually. An executive director, who is a diplomate, serves as an ex officio director of the Board. The president appoints directors to serve on standing committees on credentials, examinations, finance, graduate education, and research. Other committees may be formed as deemed necessary. The Board holds regularly scheduled meetings yearly.

E. Directory
A current directory of certified orthopaedic surgeons is maintained by the Board. The names of diplomates also appear in the Official ABMS Directory of Board Certified Medical Specialists, published by the American Board of Medical Specialties.

II. Orthopaedic Surgery Education
The goal of orthopaedic education is to prepare orthopaedic residents to be competent and ethical practitioners of orthopaedic surgery. In fulfillment of this goal, applicants for certification must have received through orthopaedic residency: A. education in the entire field of orthopaedic surgery, including inpatient and outpatient diagnosis and care as well as operative and nonoperative management and rehabilitation; B. the opportunity to develop, through experience, the necessary cognitive, technical, interpersonal, teaching, and research skills; C. the opportunity to create new knowledge and to become skilled in the critical evaluation of information; D. education in the recognition and management of basic medical and surgical problems; E. an evaluation of ethical performance.

Orthopaedic residency program accreditation is conducted by the Residency Review Committee for Orthopaedic Surgery (RRC). This committee functions autonomously under the aegis of the Accreditation Council for Graduate Medical Education (ACGME). The RRC has a total of 10 members, three representing each of its three sponsoring organizations—the American Board of Orthopaedic Surgery, Council on Medical Education of the American Medical Association, and American Academy of Orthopaedic Surgeons—and a resident member. The RRC evaluates orthopaedic residency programs with regard to number of residents, training program organization, educational experience, and institutional responsibility. It makes recommendations to the ACGME, which is responsible for the acts of accreditation for all RRCs. Individual questions regarding qualifications for eventual board certification are addressed by the ABOS, whereas program accreditation questions are addressed by the RRC for Orthopaedic Surgery.
III. Minimum Educational Requirements for Board Certification

The Board has established the following minimum educational requirements for certification. These requirements should not be interpreted as restricting programs to minimum standards.

Throughout these rules, the term "accredited" denotes approval by the ACGME.

A. Time Requirements

1. Five years (60 months) of accredited postdoctoral residency are required.

2. Prior to July 1, 2000, 4 of these years (48 months) must be served in a program whose curriculum is determined by the director of an accredited orthopaedic surgery residency. Three of these years (36 months) must be served in an accredited orthopaedic surgery residency program. One year (12 months) may be served in an accredited graduate medical program whose educational content is determined by the director of an accredited orthopaedic surgery residency program.

Beginning on July 1, 2000, 1 year (12 months) must be served in an accredited graduate medical education program whose curriculum fulfills the content requirements for the graduate year 1 (PGY-1) (see B.1, below) and is determined or approved by the director of an accredited orthopaedic surgery residency program. An additional 4 years (48 months) must be served in an accredited orthopaedic surgery residency program whose curriculum is determined by the director of the accredited orthopaedic surgery residency.

3. Each program may provide individual sick and vacation times for the resident in accordance with overall institutional policy. However, 1 year of credit must include at least 46 weeks of full-time orthopaedic education. Vacation or leave time may not be accumulated to reduce the 5-year requirement.

4. Program directors may retain a resident for as long as needed beyond the minimum required time to ensure the necessary degree of competence in orthopaedic surgery. According to the current Program Requirements for Residency Education in Orthopaedic Surgery, the committee must be notified of such retention. This information must also be provided to the Board on the Record of Residency Assignment form.

B. Content Requirements

1. Requirements for PGY-1

Prior to July 1, 2000, a minimum of 9 months during the PGY-1 must be served in clinical services other than orthopaedics. This requirement may be fulfilled by a year of accredited residency in any broad-based program involving patient care.

Beginning on July 1, 2000, the residency program director should be responsible for the design, implementation, and oversight of the PGY-1. The PGY-1 must include:

a. a minimum of 6 months of structured education in surgery to include multisystem trauma, plastic surgery/burn care, intensive care, and vascular surgery;

b. a minimum of 1 month of structured education in at least 3 of the following—emergency medicine, medical/cardiac intensive care, internal medicine, neurology, neurological surgery, rheumatology, anesthesiology, musculoskeletal imaging, and rehabilitation;

c. a maximum of 3 months of orthopaedic surgery.

2. Orthopaedic requirements beyond the PGY-1

a. Minimum distribution. Orthopaedic education must be broadly representative of the entire field of orthopaedic surgery. The minimum distribution of educational experience must include:

1) 12 months of adult orthopaedics;

2) 12 months of fractures/trauma;

3) 6 months of children's orthopaedics;

4) 6 months of basic science and/or clinical specialties.

Experience may be received in two or more subject areas concurrently. Concurrent or integrated programs must allocate time by proportion of experience.

b. Scope. Orthopaedic education must provide experience with all of the following:

1) Children's orthopaedics. The educational experience in children's orthopaedics must be obtained either in an accredited position in the specific residency program in which the resident is enrolled or in a children's hospital in an assigned accredited residency position.

2) Anatomic areas. All aspects of diagnosis and care of disorders affecting the bones, joints, and soft tissues of the upper and lower extremities, including the hand and foot; the entire spine, including intervertebral discs; and the bony pelvis.

3) Acute and chronic care. Diagnosis and care, both operative and nonoperative, of acute trauma (including athletic injuries), infectious disease, neurovascular impairment, and chronic orthopaedic problems including reconstructive surgery, neuromuscular disease, metabolic bone disease, benign and malignant tumors, and rehabilitation.

4) Related clinical subjects. Musculoskeletal imaging procedures, use and interpretation of clinical laboratory tests, procthetics, orthotics, physical modalities and exercises, and neurological and rheumatological disorders.

5) Research. Exposure to clinical and/or laboratory research.

6) Basic science. Instruction in anatomy, biochemistry, biomaterials, biomechanics, microbiology, pathology, pharmacology, physiology, and other basic sciences related to orthopaedic surgery. The resident must have the opportunity to apply these basic sciences to all phases of orthopaedic surgery.

c. Options. Twelve months of the 4 required years under the direction of the orthopaedic surgery residency program director may be spent on services consisting partially or entirely of:

1) additional experience in general adult or children's orthopaedics or fractures/trauma;

2) an orthopaedic clinical specialty;

3) orthopaedics-related research;

4) experience in an accredited graduate medical education program whose educational content is preapproved by the director of the orthopaedic surgery residency program.

C. Accreditation Requirements

1. The educational experience in orthopaedic surgery obtained in the United States must be in an approved position in programs accredited by the RRC for Orthopaedic Surgery and by the ACGME.

All other clinical education obtained in the United States must be in programs accredited by the ACGME and the appropriate RRC. The Graduate Medical Education Directory, published annually by the American Medical Association, 515 N State St, Chicago, IL 60610, lists accredited rotations of 6 months or longer.

2. During the 5 years of accredited residency, a total period of no more than 6 months may be served in unaccredited institutions.

3. Credit for time spent in residency education will be granted only for the period during which the residency program is accredited, and only for time served in an approved position within an accredited program.

4. If an orthopaedic residency program has its accreditation withdrawn by the RRC for Orthopaedic Surgery and the ACGME, no
educational credit will be granted past the effective date of withdrawal of accreditation.
5. Educational experience obtained in Canada must be on services approved by the Royal College of Physicians and Surgeons of Canada (RCPSC) and must extend over a minimum of 5 years. The content requirements outlined in III.B must be met.
6. The Board does not grant credit for foreign educational experience, other than as permitted in 2 and 5, above. Also see IV.E.
7. The term "fellow" is not synonymous with the term "resident" for the purpose of obtaining Board credit for educational experience. A resident is an individual enrolled in an approved program in an accredited educational program.

D. Achievement Requirements
1. The director of the program providing general graduate medical education must certify the satisfactory completion of that segment of education.
2. In orthopaedic surgery residency programs, the program director must certify the satisfactory completion of each rotation for which credit is awarded. (See III.F, below.)
3. The program director responsible for the final year of the resident's education must certify that the resident has achieved a satisfactory level of competence and is qualified for the certifying process. This would include sufficient and consistently demonstrated acquisition of medical knowledge with the ability to appropriately apply knowledge to patient care, interpersonal skills and effective qualities needed by an orthopaedic surgeon, manual capabilities, ethics, and professionalism.
4. The certification referred to in 2 and 3, above, must be made on the appropriate Record of Residency Assignment form.
5. Medical practice activity outside of residency duties must not be allowed to interfere with the educational experience. Residents may not engage in such activities without the specific prior approval of the program director. Approval must be based on the judgment that rotations are being completed without compromise and that the circumstances of the resident warrant such activity.

E. Continuity Requirements
The resident should have progressively increasing patient care responsibility. A part-time or piecemeal approach to residency requirements is discouraged. The final 24 months of orthopaedic residency education must be obtained in a single orthopaedic residency program unless prior approval of the Credentials Committee is obtained.

F. Documentation Requirements
1. For orthopaedic education obtained in the United States, the program director must provide the Board with yearly documentation during the residency. Each June, program directors will receive by e-mail necessary information to complete each resident's Record of Residency Assignment (RRA) Information. Completed RRA forms must be signed by the program director and submitted to the Board office.
2. The Record of Residency Assignment forms are to be completed for each resident as follows:
   a. Form 1 will be submitted the year the resident enters the program.
   b. Form 2-A must be submitted at the end of the academic year for each PGY-1 resident.
   c. Form 2-A must be submitted at the end of the academic year for each PGY-2 through PGY-5 resident.
   d. Form 3 must be submitted on each resident who graduates or leaves the program prematurely.
3. The original, signed forms are due in the Board office within 30 days of completion of the academic year. Part I examination results for candidates who take the examination in the same year they complete their residencies will not be mailed either to the candidates or to the program directors until the forms have been received in the Board office.
4. When a resident leaves a program prematurely, the program director must notify the Board office in writing within 30 days. The letter must record the reasons for leaving and confirm credit granted for rotations during the academic year in which the resident left. At the end of the academic year, Form 2-A and Form 3 must be completed.
5. Before a resident enters a new program, the new program director must obtain copies of the resident's Record of Residency Assignment forms from the Board office and review them thoroughly in order to develop an appropriate individual program that will meet the minimum educational requirements and include progressively increasing responsibility.

IV. Requirements for Taking the Certifying Examinations
The certifying examination is divided into two parts. Part I is a written examination, which may be taken at any time after the completion of the educational requirements. Part II is an oral examination, which may be taken after passing Part I, completion of the 22-month practice requirement, evaluation of the applicant's practice, and admission to the examination. A candidate must pass both parts of the certifying examination to be certified.

After taking and passing the written examination, candidates have 5 years to take or retake the oral examination. Candidates who do not pass the oral examination within those 5 years must retake and repass the written examination before applying to take the oral examination. Time spent in fellowship education after passing Part I will not count as part of the 5-year time limit.

An applicant seeking certification by the ABOS must satisfy the educational requirements that were in effect when he/she first enrolled in an accredited orthopaedic residency. For all other requirements, an applicant must meet the specifications in effect at the time of application.

A. Educational Requirements
1. An applicant must satisfactorily complete and document the minimum educational requirements in effect when he/she first enrolled in an accredited orthopaedic residency.
2. Upon successful completion of 54 of the 60 months of required education and on the recommendation of the program director, a candidate may apply to take Part I of the examination.
3. In order to be admitted to the examination, the candidate must complete the full 60 months of required education by June 30 of the year of the examination.
4. An applicant who has received orthopaedic surgery residency education in Canada must have fulfilled the requirements of the ABOS and must have passed the qualifying examination in orthopaedic surgery of the RCPSC before applying for either part of the Board's certifying examination.

B. License Requirement
Applicants who are in practice at the time they apply for Part I and all applicants for Part II must either possess a full and unrestricted license to practice medicine in the United States or Canada or be engaged in full-time practice in the US federal government, for which licensure is not required. An applicant will be rendered ineligible for any part of the certifying examination by limitation, suspension, or termination of any right associated with the practice of medicine in any state, province, or country due to a violation of a
medical practice act or other statute or governmental regulation; to disciplinary action by any medical licensing authority; by entry into a consent order; or by voluntary surrender while under investiga-
tion or suspension of license. Entry into and successful participa-
tion in a nondisciplinary rehabilitation or diversionary program for
career dependency authorized by the applicable medical licensing authority shall not, by itself, disqualify an applicant from taking a
certification examination.

C. Board Eligible Status
Effective July 1, 1996, the Board will recognize those candidates who have successfully completed Part I and are awaiting to take Part II as being "Board eligible." The limit of Board eligibility is the 5
years candidates have to take or retake the oral examination (Part II) after passing Part I. Candidates who do not pass the oral examination (Part II) within those 5 years will lose their Board-eli-
gible status. (See Section IV.)

D. Practice Requirements
1. The applicant must be continuously and actively engaged in the practice of operative orthopaedic surgery other than as a resi-
dent or fellow (or equivalent) for at least 22 full months immediately prior to the Part II examination. An applicant must have started practice and been granted hospital admitting and sur-
gical privileges on or before September 1, 2003, in order to qual-
ify for the 2005 Part II exam. An applicant who interrupts the 22
months of practice with a fellowship can count the months of practice that preceded the fellowship as part of the 22-month requirement.
2. The applicant must be in one practice location for a minimum of 12 consecutive months during the required 22-month period. A change in location, type of hospital practice; or practice associa-
tion may result in deferral. The practice must be located in the United States or its territories, Canada, or a US service installation.
3. The practice must include hospital admitting and surgical privi-
leges (temporary privileges acceptable) for the 22 full months immediately prior to the Part II examination (excluding fellow-
ship time as described in B.1. above) and continue through the date of the examination. The practice must allow independent decision-making in matters of patient care.
4. The applicant must demonstrate professional competence and adherence to acceptable ethical and professional standards. The applicant should not publicize him or herself through any medium or form of public communication in an untruthful, mislead-
ing, or deceptive manner or otherwise misrepresent his or her status with the Board to any third party. It is the responsibility of the applicant to provide documentation that he/she is an ethical and competent practitioner.
5. An applicant in the United States uniformed services may satisfy the practice requirement if assigned as an orthopaedic surgeon for at least 22 full months prior to the date of the Part II exami-
nation, meaning that the applicant must have started practice on or before September 1, 2001. The applicant must submit a letter from his or her immediate supervisor evaluating his or her capa-
bility in the practice of orthopaedic surgery as well as any other documentations the Credentials Committee may require to demonstra-
ate professional competence and adherence to acceptable ethical and professional standards.
6. Evaluation of Applicant
   a. Individuals who do not engage in active orthopaedic surgery cannot be adequately evaluated for the Part II examination and will not be certified.
   b. Qualifications for taking the Part II examination will be deter-
minal by the Credentials Committee after review of the appli-
cation, letters of recommendation, and other relevant information.
   c. It is the responsibility of the applicant to provide the informa-
tion on which the Credentials Committee bases its evaluation of the qualifications of the applicant. This responsibility ex-
tends to information that the Credentials Committee requests from other persons. If the Credentials Committee does not re-
ceive requested information from the applicant, a program di-
rector, a reference, a hospital representative, or another source, the Board will notify the applicant and defer the deci-
son on admission to the examination until the information has been received. The applicant may be required to authorize release of peer review information to the Board.

E. Distinguished Scholar Pathway
An orthopaedic surgeon who received his or her graduate medical education outside of the United States or Canada and does not meet the education requirements of Section III.A. above, but who is engaged in full-time academic practice, may apply and qualify to sit for the certifying examination upon the recommendation of the Credentials Committee and approval of the Board. To be considered for qualification, the applicant must satisfy all the requirements to sit for the Part I and Part II certification examinations, respec-
tively, as specified in the Board's Rules and Procedures, except the education requirements of Section III.A. and, in addition, satisfy the following requirements:
1. Provide documentation of satisfactory completion of an orthopaedic surgery residency program outside the United States or Canada, including a signed attestation by the program director and institution;
2. Provide documentation of having successfully passed the applicable certification examination in the applicant's country of educa-
tion and prior practice;
3. Be in full-time academic practice and be a member of the teaching faculty of an academic institution with an ACGME-accredited orthopaedic surgery residency program;
4. Been in active practice of orthopaedic surgery in the United States for at least 5 years;
5. Provide a curriculum vitae detailing comprehensive professional accomplishments; and having achieved the rank of associate professor;
6. Provide at least three references attesting to the applicant's ex-
ceptional academic and scholarly qualifications, including at least two references from Board-certified academic orthopaedic surgeons not affiliated with the applicant's academic institution or residency program.

V. Impaired Physicians

A. Chemical Dependency
An applicant for either part of the certifying examinations who, within 3 years of his or her application, has been diagnosed as chemically dependent, has been treated for drug or other substance abuse, and/or has entered a nondisciplinary rehabilitation or diversionary program for chemical dependency authorized by the applicable medical licensing authority, will be required to present evidence to the Credentials Committee that he or she (1) has suc-
cessfully completed the authorized rehabilitation or diversionary program or (2) is successfully enrolled in such a program or is suc-
cessfully enrolled in or completed a private treatment program and presents attestations from the responsible program administrators and physicians demonstrating, to the satisfaction of the Board, that the applicant has been free of chemical dependency for a period sufficient to establish that the applicant is not currently using il-
legal drugs and/or that the use of illegal drugs or other substance
abuse is not an on-going problem. This documentation must accompany the completed application form.

B. Mental and Physical Condition
Applicants for either part of the certifying examination who have a mental or physical condition that could affect their ability to practice orthopaedic surgery will be required, as part of their demonstration that they meet the practice requirements in I.V.D., to present medical evidence from the appropriate physicians, treatment centers, and hospitals demonstrating to the Board that the impairment does not compromise their ability to render safe and effective care to their patients. This documentation must accompany the completed application form.

VI. Procedure for Application for Part I and Part II of the Certifying Examinations

A. Application Dates and Requests
1. The dates, locations, and application deadlines for Part I and Part II of the certifying examination are announced in the Journal of Bone and Joint Surgery. They are also listed on the Board's Web site: www.abos.org. Examination dates may be changed at the discretion of the Board. Confirmation of published examination dates can be obtained from the Board's office.

2. To apply for either Part I or Part II of the certifying examination, go to the Board Web site at www.abos.org and follow the directions from there. Printed applications are no longer available.

B. Application Submission and Deadlines

Part I
The postmark and electronic submission deadline for all required documents for application (those submitted electronically and those required to be mailed in) is March 1 of the year of the examination. These include:
1. Electronic submission of a completed application
2. Paper submission to the Board office of:
   - the printed signature page(s)
   - other required documents (if applicable)
   - a nonrefundable examination fee of $875 in US funds
   Both steps must be completed by the deadline, March 1.

Part II
The postmarked and electronic submission deadline for all required documents for application, those submitted electronically and those required to be mailed in, is October 31 of the year preceding the examination. These include:
1. Electronic submission of a completed application
2. Paper submission to the Board office of:
   - the printed signature page signed in three places
   - signed and notarized hospital/surgery center letters
   - a nonrefundable application and credentialing fee of $850 in US funds
   Both steps must be completed by the deadline, October 31.

Late or incomplete applications
If the application is not submitted, or if any of the required documents are not postmarked by the deadline for Part I or Part II of the certifying examination, the application will not be accepted and the received documents will be returned along with the fee check.

a. If a Part I applicant wishes to submit the application and required documents by the late deadline of March 31, the examination fee of $875 and a nonrefundable late fee of $250 must be enclosed.

b. If a Part II applicant wishes to submit the application and required documents by the late deadline of November 30, the nonrefundable application and credentialing fee of $850 and a nonrefundable late fee of $250 must be enclosed.

C. Notifying the Board of Application Changes
1. It is the responsibility of all applicants to notify the Board office of any change of address, practice association, or hospital affiliation.

2. If a Part II applicant changes practice location or practice association or acquires new hospital staff affiliations, new references will be solicited by the Board.

3. An applicant is also required to notify the Board of the denial of any request for hospital privileges; of any action to restrict, suspend, or terminate all or any portion of surgical staff privileges; of any request by a hospital to resign all or any portion of surgical staff privileges; and of any action by a governmental agency that would result in the restriction, suspension, or probation of the applicant's license or any right associated with the practice of medicine, including the entry into a nondisability rehabilitation or diversionary program for chemical dependency whether by order or consent decree by the applicable medical licensing authority or on a voluntary basis.

D. Notifying the Applicant of Examination Admission
1. For Part I, the applicant will receive examination information, an assigned examination number, and an admission card not later than 30 days prior to the examination date.

2. For Part II, the decision of the Credentials Committee is mailed to the applicant not later than 60 days prior to the examination date.

E. Fees
1. For Part I, the nonrefundable examination fee of $875 must be submitted with the application form.

2. For Part II:
   a. The nonrefundable application and credentialing fee of $950 must be submitted with the application form.
   b. The candidate must also submit an examination fee of $925 on or before the date specified in the letter of notification of admission to the examination. This fee will be forfeited if the candidate fails to appear for the examination or cancels after being scheduled.

3. There will be a $50 charge levied for any application or examination fee check that is returned not paid by the Board’s bank.

4. The fees paid to the American Board of Orthopaedic Surgery, Inc are not tax deductible as a charitable contribution, but may be deductible under some other provision of the Internal Revenue Service code.

   Part I examination fee $875
   Part II application and credentialing fee $950
   Part II examination fee $925
   Late fee $250
   Returned check service charge $50

F. Practice-Based Oral Examination
The Part II examination is practice based. The purpose of the practice-based examination is to evaluate a candidate's own practice as broadly as possible. This exercise will be conducted much as rounds or conferences are during residency, with the candidate presenting his/her cases and responding to the examiner's questions and comments. Applicants are urged to attend to details and follow procedures carefully and exactly to ensure admission to the examination.

1. Case Collection: Cases are collected in a program accessible through the ABOS Web site using the applicant's unique password and user ID. Each applicant will receive his/her password and user ID when logging in to apply for Part II on the Web site.
This case collection program must be used to compile the case list that is submitted to the Board.

The applicant is to collect all operative cases, including same-day surgery, for which he/she was the responsible operating surgeon for 6 consecutive months beginning July 1 of the year before the Part II examination. If time is taken off during those 6 months, the starting point for the collection period must be backed up by the amount of time missed. For example, case collection for an applicant who took a 2-week vacation in August would begin in mid June.

All cases must be collected from each hospital and/or surgery center at which the applicant has operated during the 6-month period. If the applicant did not collect cases during the case collection period, this fact must be verified by a letter from the hospital and/or surgery center. The letter(s) must be sent to the Board office along with the case lists. It is understood, as stated in the Practice Requirements (IV.D.), that the applicant during this period has been actively engaged in the practice of operative, orthopaedic surgery with independent decision making in matters of patient care. The case list must reflect this and must demonstrate ample cases to allow selection of material for the oral examination.

Once all cases have been entered the applicant will finalize and print the case lists by hospital. No changes can be made to the case lists after this is done. Each complete hospital list must then be certified by the director of medical records. His/her signature must then be notarized.

2. Case Submission: By January 31 of the year of the Part II examination, the applicant must submit to the Board:
   a. The finalized, printed case list for the required 6-month period. Each hospital list must be stapled separately and have the required signatures and notarization. Before mailing, the applicant should make three copies of the complete case list(s) as the copies the applicant must bring to the examination must be of these printed and certified lists.
   b. For each hospital or surgery center where no cases were performed, a letter stating that no cases were performed there during the 6-month period.
   c. This information must be sent to the Board office by registered mail or courier of applicant's choice (ie, Federal Express, Express Mail, certified mail, etc) to ABOS, Part II Exam, 400 Silver Cedar Ct, Chapel Hill, NC 27514. Case lists must be postmarked by January 31 of the year of the examination. The Board office will not verify receipt of case lists.
   d. The Board will select 12 cases from the applicant's 6-month case list(s). The list of 12 cases selected by the Board will be sent to the candidate in mid May. From the list of 12, the applicant will then select ten cases to bring to the examination for detailed presentation.
   e. Exam Materials/Preparation: Once the candidate has received the list of the 12 cases selected by the Board, he or she must gather all of the following to bring to the examination:
       a. Three copies of the list of 12 selected cases.
       b. Three copies of the case list summary sheet.
       c. Three copies of the complication list.
       d. Three copies of the applicant's complete case list that was submitted to the Board in January.
       e. Images (including x-rays) for the 10 cases selected by the candidate—the pertinent preoperative, intra- or immediate postoperative, and most recent follow-up x-rays for each case selected by the candidate for presentation. Before the examination begins, x-rays should be arranged in order of presentation and clearly marked in terms of date pre- and postoperative. Pertinent images in CT and MRI panels must also be marked. The candidate must bring hard copies of all image studies even if his/her institution uses a digital image system.
       f. Three copies of notes for the 10 cases selected by the applicant—this includes admission and discharge notes, operative notes, office notes, and any other patient chart material that will aid in case presentation. All records must be unaltered copies of the original materials.
       g. Video prints or photographic prints for arthroscopy cases selected that show the initial lesion(s) and the lesion(s) after treatment. (Do not bring videotapes.)
       h. For selected cases with complications, images (including x-rays) pertinent to the complication and its treatment and three copies of any consultation report(s).

All materials for the examination must be in English. All materials required to be brought to the examination, including all records, notes, and images, must be in their original form. Materials must not be altered or changed in any respect for presentation except as listed in 1 and 2 below:

1. Because the examination is to be anonymous the candidate should remove his or her name from written material brought to the examination, including the 6-month case list(s), the complication sheet, the board's list of 12 selected cases, and the case list summary sheet.

2. To comply with the HIPAA Privacy Rule, candidates should limit the scope of identifiable patient information disclosed at the oral examination to the minimum necessary to conduct the examination. Therefore, you should not remove from the case materials you bring to present at the examination:
   • Patient ID number
   • Medical record number
   • Patient name
   • Birth date
   • Medical device identifiers
   • Serial numbers
   • Any other unique identifying characteristic

Failure to bring sufficient materials for the 10 selected cases to enable the examiners to evaluate the cases may result in the disqualification of the candidate, termination of his participation in the examination, or the withholding of scores.

Although the examiners will concentrate on cases brought for presentation, they may also ask questions pertaining to a candidate's case lists or practice. The candidate should not be concerned if all material brought to the examination is not covered. Discussion may focus on one area or candidate and examiners may become involved in a few cases in such detail that time will not allow presentation of all patients. The candidate will not be penalized for this during grading.

Applicants who have questions about materials and procedures for the practice-based oral portion of the Part II examination should call or write the Board office well before the exam. Failure to comply with the steps outlined may invalidate an examination.
VII. Falsified Information and Irregular Behavior

A. If it is determined that an applicant has falsified information on the application form, case list, or the materials submitted in connection with the cases presented for oral examination or has failed to provide material information, the applicant's application will not be considered for either part of the examination not already passed and the applicant must wait 3 years before being allowed to file a new application.

B. Examination applicants should understand that the following may be sufficient cause to bar them from future examinations, terminate participation in the examination, invalidate the results of an examination, withhold or revoke scores or certificates, or take other appropriate action:
1. The giving or receiving of aid in the examination, as evidenced either by observation or by statistical analysis of answers of one or more participants in the examination
2. The unauthorized possession, reproduction, or disclosure of any materials, including, but not limited to, examination questions or answers, before, during, or after the examination
3. The offering of any benefit to any agent of the Board in return for any right, privilege, or benefit that is not usually granted by the Board to other similarly situated candidates or persons
4. The engaging in irregular behavior in connection with the administration of the examination

C. The following are examples of behavior considered to be irregular and that may be cause for invalidation of the examination or imposition of a penalty:
1. Referring to books, notes, or other devices at any time during the examination. This prohibited material includes written information or information transferred by electronic, acoustical, or other means.
2. Any transfer of information or signals between candidates during the test. This prohibition includes any transfer of information between the candidate and any other person at any time during the testing period, including bathroom breaks.
3. Any appearance of looking at the answer sheet or the examination booklet of another candidate during the examination.
4. Allowing another candidate to view one's answer sheet or examination booklet or otherwise assisting another candidate in the examination.
5. Taking any examination material outside the examination room. All examination materials are the property of the Board and must be left in the room at the end of the examination.
6. Breaking of the seal on the examination booklet before being told to do so and/or recording answers on the answer sheet after being told to stop.

D. Applicants should also understand that the Board may or may not require a candidate to retake one or more portions of the examination if presented with sufficient evidence that the security of the examination has been compromised, notwithstanding the absence of any evidence of a candidate's personal involvement in such activities.

VIII. Credentials Decisions

A. Determining Admission to Examinations
1. The Credentials Committee meets at least once each year to consider applications for the examinations. At this meeting, a decision about each applicant will be made either to approve admission to the next examination, to deny admission, or to defer decision pending further evaluation.
2. A decision approving admission to an examination applies only until the next available examination and does not carry over from one examination until the next. A new application is required for each examination.

B. Deferral of Admission Decision
1. A decision on an applicant's admission to either Part I or Part II of the examination may be deferred if information received by the Credentials Committee is insufficient for the Committee to make a judgment and/or warrants further investigation. Typically, the committee will defer such a decision for 1 year to gain further information. If information is still insufficient, the decision will be deferred for a second year to enable representatives of the Board to conduct a site visit.
2. A denial, reduction, restriction, suspension, termination, or resignation at the request of a hospital of all or any portion of an applicant's surgical staff privileges, or pending action to do so, will normally result in a deferral until such action is finally resolved and the applicant's practice has stabilized sufficiently for it to be evaluated. A change in location, type of hospital practice or practice association may also result in deferral.
3. A deferral of not more than 2 consecutive years is not viewed by the Board as an adverse action; thus, no appeal of a decision of the Credentials Committee is permitted unless an applicant has been denied admission or has been deferred for more than 2 consecutive years.

C. Site Visit

Representatives of the Board may visit the site of an applicant's practice if the Credentials Committee believes that this is necessary for adequate evaluation of the applicant's work.

D. Appeal of Admission Decision

An applicant denied admission to the examination or deferred for more than 2 years will be informed of the basis for such action and may request a hearing by an appeals committee of the ABOS. (See XII.)

IX. Certificates and Certificate Renewal

A. Awarding Certificates

The ABOS awards a certificate to a candidate who specializes in orthopaedic surgery, has met the educational requirements of the Board, has demonstrated competence in orthopaedic surgery and adherence to ethical and professional standards, and has passed both parts of the certifying examination. Certificates awarded after 1985 are valid for 10 years. This portion of the Board's responsibility is discharged by issuance of a certificate to an individual found qualified as of the date of certification.

B. Certificate Revocation

At its discretion, the Board may revoke a certificate for due causes, including, but not limited to the following:
1. The diplomate did not possess the required qualifications and requirements for examination, whether or not such deficiency was known to the Board or any committee thereof prior to examination or at the time of issuance of the certificate, as the case may be.
2. The diplomate made an intentional and material misrepresentation or withheld information in the application to either part of the examination or in any other representation to the Board or any committee thereof.
3. The diplomate made a misrepresentation to the Board or any third party as to his/her status as a diplomate of the Board.
4. The diplomate engaged in irregular behavior in connection with an examination of the Board (as described under Irregular Behavior, above), whether or not such practice had an effect on the performance of the candidate on an examination.
5. The diplomate was convicted by a court of competent jurisdiction of a felony or misdemeanor involving moral turpitude and, in the opinion of the Board, having a material relationship to the practice of medicine.

6. There has been a limitation, suspension, or termination of any right of the diplomate associated with the practice of medicine in any state, province, or country, including the imposition of any requirement of surveillance, supervision, or review due to a violation of a medical practice act, or other statute or governmental regulation, disciplinary action by any medical licensing authority, entry into a consent order, or voluntary surrender of license.

A diplomate may appeal the revocation of his/her certificates pursuant to the procedures set forth in Section XII.

C. Certificate Reinstatement
Should the circumstances that justified revocation or surrender of the diplomate's certificate be corrected, the Board may reinstate the certificate after appropriate review of the individual's qualifications and performance, using the same standard applied to other applicants for certification.

D. Certificate Renewal
Diplomates are encouraged to renew their credentials periodically through the Board's recertification process. Information about recertification options can be obtained from the Board office or Web site, www.abos.org.

X. Unsuccessful Candidates
Unsuccessful Part I candidates may repeat the examination by submitting a new application form for the examination and again being found admissible. (See VI.B.1.)

Unsuccessful Part II candidates may repeat the examination by submitting a new application form for the examination and again being found admissible. (See VI.B.2 and VIII.) Candidates who do not pass Part II within 5 years (as measured in Section IV) of passing Part I must retake and repass Part I before applying to take Part II.

XI. Program Accreditation
Institutions offering orthopaedic education must meet the Institutional and Program Requirements of the ACGME and the RRC for Orthopaedic Surgery as stated in the Graduate Medical Education Directory. (See III.C.)

A. RRC for Orthopaedic Surgery
Program accreditation is issued by the RRC for Orthopaedic Surgery, an autonomous committee composed of three representatives from each of the three sponsoring organizations: the ABOS, the Council on Medical Education of the American Medical Association, and the American Academy of Orthopaedic Surgeons. In evaluating orthopaedic residency programs, the RRC considers the number of residents, training period, program organization, educational experience, and institutional responsibility. The committee meets twice yearly.

B. Changes in Accreditation
Programs seeking changes in accredited positions or institutional affiliations can obtain information and application forms from the secretary of the RRC for Orthopaedic Surgery at the ACGME, 515 N State St., Chicago, IL 60610. Completed forms are to be returned to the secretary at the above address.

C. Program Surveys
Programs applying for accreditation or changes in accreditation will be surveyed at the earliest feasible date by a specialist site visitor or by a field representative for the ACGME. A report of the survey is submitted to the RRC for Orthopaedic Surgery for evaluation and official action. The RRC makes a determination regarding the accreditation of the program under authority delegated by the ACGME, and it notifies the program director and the sponsoring institutions.

D. Number of Residents
The total number of residents assigned to any orthopaedic residency program and the number at each level of education is determined by the RRC for Orthopaedic Surgery.

XII. Appeals Procedure
A. An individual who has received an unfavorable ruling from a committee of the Board may appeal such determination by mailing a notice of appeal to the office of the ABOS within 60 days of the date such ruling was mailed to him or her. Exception: The decisions by the Examinations Committee that a candidate has failed either part of the certifying examination may be appealed only in the manner and to the extent provided in G and H, below.

Decisions by the Credentials Committee that an applicant's admission to either Part I or Part II of the examination has been deferred is not viewed by the Board as an adverse action, and no appeal of the decision is permitted unless an applicant has been denied admission or has been deferred for more than 2 consecutive years.

B. Upon receipt of a notice of appeal, the concerned Board committee shall consider any information submitted therewith by the individual in support of his/her appeal and make such further investigation as it deems appropriate. If the committee then decides in a manner favorable to the individual, it shall so notify the individual. If the committee does not so determine, it shall notify the individual and the president of the ABOS.

C. The individual shall then have the right to an appeals hearing to decide whether the determination of the concerned Board committee shall be confirmed, modified, or overruled in accordance with the hearing process described in this appeals procedure.

1. The president of the ABOS shall appoint an ad hoc appeals committee consisting of three directors of the Board who did not participate in making the determination being appealed, one of whom shall be designated by the president as chairman of the appeals committee.

2. In the event that the subject matter of the appeal involves complex issues of fact or issues not solely dependent upon medical, surgical, or professional standards, the president of the ABOS, at his/her sole discretion, may appoint a hearing officer to conduct the appeals hearing and to submit a full written report and a recommended decision to the ad hoc appeals committee. The hearing officer appointed at the discretion of the president shall be an impartial physician, lawyer, or other professional.

3. The chairman of the appeals committee shall convene a hearing before the appeals committee or the hearing officer, if one is appointed, within a reasonable time after their respective appointments, but not less than 60 days after the appointment of the appeals committee and the hearing officer, whichever is later.

D. Prior to the Hearing
1. The concerned Board committee shall provide the executive director with such written information concerning its decision as it deems appropriate; a list of witnesses, if any, whom it expects to call to testify; copies of any written material that it considered in making the determination appealed (but only if it intends to present such material at the hearing); and a list of information and documents the individual is required to produce at the hearing. This material, together with written
notice stating the time and place of the hearing, shall be sent to the individual by the executive director not less than 30 days prior to the hearing. Not less than 7 days prior to the hearing, the concerned Board committee shall provide the executive director and the individual with copies of any written reports, affidavits, or statements of experts that the concerned Board committee intends to present at the hearing.

2. Not less than 7 days prior to the hearing, the individual shall provide the executive director and the concerned Board committee with such written information concerning his/her position as he/she deems appropriate; a list of witnesses, if any, whom he/she expects to call to testify; and copies of any written reports, affidavits, or statements of experts that he/she intends to present at the hearing.

3. The executive director shall submit the written material referred to in this section D to the members of the appeals committee or to the hearing officer, if one has been appointed, prior to the hearing. Copies of this material must also be submitted to the individual and to the concerned Board committee not later than the time when submitted to the appeals committee or the hearing officer.

4. The hearing officer shall prepare a written report based on the evidence presented, if any, and the hearing officer's findings as to whether the information and evidence presented at the hearing has been conducted before a hearing officer, the conclusions of the determination being appealed should be confirmed or modified, the appeals committee should be confirmed, modified, or overruled. The hearing officer shall submit the written report to the appeals committee and send copies to the individual and the concerned Board committee. The individual and/or the concerned Board committee may file objections to the report and recommendations of the hearing officer with the appeals committee within 10 days after receipt of the report. The opposing party shall then have 10 days to file its response to such objections with the appeals committee.

2. The appeals committee shall make its decisions following the hearing. If the hearing has been conducted before a hearing officer, the appeals committee will first receive the written report and recommendations of the hearing officer and the objections and responses filed thereto by the parties. If a majority of the members of the appeals committee determine, on the basis of the information and evidence presented, including, when applicable, the report and recommendations of the hearing officer, that the determination of the concerned Board committee should be confirmed or modified, the appeals committee shall so declare. If a majority determines that the concerned Board committee's determination should be overruled, the appeals committee shall so declare. The appeals committee shall inform the individual and the concerned Board committee of its decision in writing within a reasonable time following the hearing, explaining the basis for its judgment. The decision of the appeals committee shall be final and binding.

G. A candidate who believes that the Part II examination was administered in an unfair or inaccurate manner or that one or more of his/her oral examiners was acquainted with him or her or was not impartial may immediately, upon completion of the examination, request that he/she be reexamined. The request shall be made to the chairman of the Oral Examinations Committee and reviewed by the president and the secretary. If, after discussing the matter with the candidate and making such other investigation as they may deem appropriate, a majority of the president, the secretary, and the chairman of the Oral Examinations Committee determine that reasonable grounds exist for the candidate's request, he/she shall be immediately reexamined by another panel of oral examiners. In such event, the first oral examination will be disregarded and only the candidate's performance on the reexamination shall be considered in determining his/her score on the examination.

H. A candidate who fails the Part I examination may request in writing that his/her examination be rescored by hand to verify the accuracy of the results as reported to him or her. Such a request is to be made within 60 days of his/her being notified of the results of the examination. The request must be accompanied by a check for $100 payable to the ABOS to cover the cost of hand scoring. There shall be no further appeal of a failure on the Part I examination.

(This information is published annually by the American Board of Otolaryngology (ABOTO) in October and conveys its rules, regulations, and policies at the time of publication. The ABOTO reserves the right to alter the procedures and requirements for certification without issuing a new publication. Updates are posted to the ABOTO Web site at www.aboto.org as changes occur.)
General Information Regarding Fees

- Fees are subject to change at the discretion of the Board.
- Fees are not refundable, nor can they be "held over" to a subsequent exam.
- A late fee is applied if the document is not postmarked by the due date.
- All fees must be paid in US funds, drawn on a US bank. Applicants residing outside the United States must submit payment by International Money Order.

Objectives

The objectives of the ABOto are:
1. To establish standards of qualification for otolaryngologist-head and neck surgeons who desire and request Board certification.
2. To determine which candidates fulfill these standards of qualification.
3. To examine such candidates and issue certificates upon satisfactory completion of requirements.
4. To encourage development and maintenance of the highest standards in the teaching and training of otolaryngologist-head and neck surgeons.

The ABOto certificate carries with it no legal qualification or license to practice medicine. There is no intention by the Board to interfere with or limit the professional activities of any licensed physician, whether certified or not. It is neither the intent nor the purpose of the Board to define requirements for membership on the staffs of hospitals or similar institutions or to confer special privileges upon its diplomates.

History

The American Board of Otolaryngology was founded and incorporated in 1924, and is the second oldest of the 24 member boards of the American Board of Medical Specialties (ABMS). The Board is a nonprofit corporation, and the directors and examiners receive no compensation, with the exception of the president and the examination chairs who receive an honorarium.

Founding members included two representatives from each of the following specialty organizations: the American Laryngological Association, American Otological Society, American Laryngological, Rhinological and Otological Society, American Academy of Ophthalmology and Otolaryngology, and Section on Laryngology, Otology and Rhinology of the American Medical Association. This group of 10 founding members, delegated authority by the above organizations, was established as the ABOto.

The ABOto office is located in Houston, Texas, and is separate and distinct from the American Academy of Otolaryngology-Head and Neck Surgery (AAO-HNS) in Alexandria, Virginia, which is the specialty's largest membership organization.

Definition of a Certified Specialist in this Field of Medicine

An otolaryngologist-head and neck surgeon is a physician who has been prepared by an accredited residency program to provide comprehensive medical and surgical care of patients with diseases and disorders that affect the ears, the respiratory and upper alimentary systems, and related structures of the head and neck.

The otolaryngologist-head and neck surgeon should have command of the core knowledge and understanding of:
- The basic medical sciences relevant to the head and neck; the respiratory and upper alimentary systems; the communication sciences, including knowledge of audiology and speech-language pathology; the chemical senses; and allergy/immunology, endocrinology, and neurology as they relate to the head and neck;
- The clinical aspects of diagnosis and the medical and/or surgical therapy or prevention for diseases, neoplasms, deformities, disorders and/or injuries of the ears, the respiratory and upper alimentary systems, the face, jaws, and the other head and neck systems. Head and neck oncology and facial plastic and reconstructive surgery are fundamental areas of expertise.

(Note: This definition is printed in Which Medical Specialist For You, a publication of the American Board of Medical Specialties.)

Certification, Rejection, and Revocation

The Board may issue an appropriate certificate of qualification in otolaryngology (or in a subdivision thereof) to those who show themselves worthy of such certification according to the requirements of training and experience as stated in the current Booklet of Information of the Board.

All certificates issued by this Board are the property of the Board, and they are issued pursuant to the rules and regulations as outlined in the current Booklet of Information of the Board. The Board makes no representations as to whether its certification process will satisfy the recertification or specialty certification requirements of any state medical board. Any such determination must be made by the state medical board.

Each certificate is issued to an individual physician who, by nature, agrees to revocation of the certificate if the Board shall determine that the person involved:

a. did not possess the required qualifications and other requirements or is not eligible for examination, whether or not such deficiency was known to the Board or any member thereof, or could have been ascertained by the Board prior to examination or at the time of the issuance of a certificate as the case may be;

b. made a material misstatement or withheld information in his/her application or any other representation to the Board or any committee thereof, whether intentional or unintentional;

c. has been convicted by a court of competent jurisdiction of any felony;

d. has been convicted by a court of competent jurisdiction of any misdemeanor involving moral turpitude or, in the opinion of the Board, having a material relationship to the practice of medicine;

e. has a license to practice medicine revoked or shall have been disciplined or censured by any court or other body having proper jurisdiction or authority, because of any act or omission arising from the practice of medicine, including, but not limited to, a state licensing board, a health care facility, or a medical staff;

f. has neglected to maintain appropriate professional standards in the practice of the specialty of otolaryngology, as established by the Board, and shall refuse to submit to reexamination by the Board; or

g. has failed to comply with the Maintenance of Certification process (for those certified in 2002 and thereafter).

The Board may be required and, in any event, reserves the right to report revocation of a diplomate's certificate to accrediting, credentialing, and licensing bodies and government agencies.
If the Board determines to withhold or revoke any certificate for any reason set forth above, the person affected thereby shall be given written notice of the reasons therefor. If circumstances warrant, the Board may require any physician so certified to appear before the board of directors, before any one or more of them, or before an individual designated by the Board upon not less than 20 days written notice, and to show cause at that time and place specified in the notice why the certificate may not be revoked on any one of the grounds specified in such notice. If such a hearing is convened, the physician may bring to this hearing persons or documents in defense of any action. Failure of any physician so notified to appear as required in such notice, without due excuse deemed sufficient to the board of directors, shall constitute cause for revocation of the certificate. The board of directors of the ABOto shall have the sole power, jurisdiction, and right to determine and decide whether the evidence and information before it is sufficient to constitute one of the grounds for withholding or revocation of any certificate issued by the Board. Any such action or determination by the Board shall be regarded as final.

Examination Procedure
The Board vigorously enforces the highest standards of honesty and integrity in its examination processes. Accordingly, the following are considered a breach of ABOto policy and are forbidden, and may be sufficient cause for the ABOto to terminate an applicant's participation in the examination, to invalidate the results of the examination, to withhold an applicant's score or certificate, to bar an applicant permanently from all future examinations, to revoke a certificate, or to take other appropriate action:
1. Falsification of the application or the submission of any falsified documents to the ABOto;
2. The giving or receiving of aid in the examination, including but not limited to, copying answers from another candidate or permitting one's answers to be copied, as evidenced by observation at the time of the examination or by statistical analysis afterward;
3. The offer of any financial or other benefit to any director, officer, employee, proctor, or other agent or representative of the ABOto in return for any right, privilege, or benefit which is not usually granted by the ABOto to other similarly situated candidates or persons;
4. The unauthorized possession, reproduction, recording, discussion, or disclosure of any material, including but not limited to written, oral, or OTE examination questions or answers before, during, or after the examination.

Proctors are required to report any suspected irregularity during an examination. A candidate may be moved to a more isolated area, or his/her participation in the examination may be terminated. Additionally, the ABOto may undertake statistical studies of a candidate's answers compared with the answers of other participants in the examination to provide evidence that would support or fail to support a suspected irregularity. If, in the opinion of the ABOto, there exists a probability that an irregularity occurred, the ABOto will afford the suspected individual(s) procedural due process in order to assure fairness in the determination as to whether an irregularity occurred.

The ABOto will not report scores or grant certification on the basis of scores which it determines to be invalid, and reserves the right to take whatever legal action is indicated with regard to violation of ABOto copyright or examination violations.

Board Eligibility and Status Inquiries
The ABOto does not recognize or use the term "Board eligible." The Board states whether an individual is certified, is not certified, or is in the process of being examined (ie, between written and oral examinations).

Applicants With Disabilities
The ABOto fully supports the intent of the Americans with Disabilities Act (ADA). Upon request, ABOto will make reasonable accommodations in its examination procedures for candidates with documented disabilities. An applicant who believes that he or she is disabled within the meaning of the ADA law should request detailed information concerning ABOto's policy regarding accommodation so that he or her special needs can be met in a timely manner. Current documentation of the disability must accompany the application.

Otolaryngology Training Examination
Statement of Purpose
The Otolaryngology Training Exam (OTE) is intended to be used as an educational instrument to assist individuals in evaluating their educational progress as compared with others of the same level of expertise or training.

As such, it is appropriate for program directors to use the aggregate performance of their residents when evaluating the strengths and weaknesses of their educational program. It is inappropriate for program directors to use this measure of resident performance as the sole form of assessment when evaluating residents for advancement.

Examination
- The OTE is a closed-book, proctored, timed examination offered once a year to all interested practitioners and residents in the specialty.
- More than 100 test centers administer the exam annually throughout the US, Canada, and limited locations outside North America.
- Any resident, practicing otolaryngologist-head and neck surgeon, or other interested physician may register for the OTE.
- Test scores are confidential for practitioners; resident scores are reported to their training programs.

Applications
The OTE application form is mailed to all ACGME programs. Others who wish to participate may download a copy of the application from the ABOto Web site at www.aboto.org. The application becomes available September 1 of each year.

Certification Examination
The ABOto certification process consists of two phases: a written qualifying examination and an oral certifying examination.

All candidates must take a written examination, which is offered in the spring of each year on a Friday. All candidates then take an oral exam, offered on Saturday or Sunday. Candidates who do not achieve the qualifying score on the written exam fail, and their oral exam is not scored. They may retake the written and oral exam in a subsequent year.

Oral exam results for candidates who meet or exceed the qualifying score on the written exam are then processed. Candidates are given three consecutive opportunities to take the oral exam. If a passing score is not achieved after three exam cycles, the candidate must reapply to take the written exam.

Written and oral examination scores are not combined. An individual must successfully complete both the written and the oral exam in order to be certified. A certificate is granted by the ABOto to a candidate who has met all the requirements and has satisfactorily passed its examinations.
Requests for an appeal regarding a certification decision must be postmarked within 40 days of the date exam results are postmarked at the ABOto office. A copy of the Appeals Policy as related to the certification process is available upon request.

The Board makes no representation as to whether its certification process satisfies the recertification or specialty certification requirements of any state medical board. Any such determination must be made by the state medical board.

Training Requirements

Training programs in otolaryngology-head and neck surgery in the United States are evaluated by the Residency Review Committee for Otolaryngology (RRC), which consists of representatives from the American Medical Association (AMA), the American College of Surgeons (ACS) and the ABOto, and are accredited by the Accreditation Council for Graduate Medical Education (ACGME). Information concerning approved educational programs can be found in the Graduate Medical Education Directory, published by the AMA.

Individuals who entered otolaryngology-head and neck surgery training between July 1, 2000 and June 30, 2005 must satisfactorily complete a minimum of 5 years of training, as specified below, in an ACGME-approved program(s):

- At least 1 year of general surgical training. It is preferred that the general surgical residency be taken prior to otolaryngologic training, but it may not be taken after otolaryngologic training.
- At least 4 years of residency training in otolaryngology-head and neck surgery. This training must involve increasing responsibility each year and must include a final year of senior experience. This final year must be spent within the accredited program in which the previous year of training was spent, unless prior approval is obtained from the ABOto.
- The first year of otolaryngology-head and neck surgery training should include a minimum of 5 months of structured education in at least three of the following: general surgery, thoracic surgery, vascular surgery, plastic surgery, and surgical oncology. In addition, 1 month of structured education in each of the following four clinical areas: emergency medicine, critical care unit, anesthesia, and neurological surgery. An additional maximum of 3 months of otolaryngology-head and neck surgery is optional, and any remaining months of the PGY-1 year may be taken in any clinical service that has an ACGME-approved training program.
- All residency training must be completed in a manner acceptable to the director of that residency program.

Leaves of Absence

Leaves of absence and vacation may be granted to residents at the discretion of the program director in accordance with local rules. The total of such leave and vacation may not exceed 6 weeks in any 1 year. If a longer leave of absence is granted in any year, the required period of graduate medical education may be extended accordingly.

Foreign Training

An applicant who entered otolaryngologic training in the United Kingdom or the Republic of Ireland prior to July 1, 2000, in a program accredited by the Specialist Advisory Committee, and who received a certificate of accreditation in otolaryngology from the Joint Committee on Higher Surgical Training in the United Kingdom or the Republic of Ireland may be considered for examination.

An applicant who entered otolaryngologic training under the New Zealand program after January 1, 1984, but before July 1, 2000, and who passed the examination leading to Fellowship in the Royal Australasian College of Surgeons may be considered for examination.

Individuals who entered otolaryngologic training in Canadian programs prior to July 1, 2000, may be considered for examination.

Prerequisite Requirements

1. Resident Registry

All residents must be registered with the ABOto during the first year of otolaryngology training in order to subsequently apply to take the certification examination. A New Resident Form must be filed for each new resident by the program director by July 10 of the first year of otolaryngology-head and neck surgery training.

New residents then receive instructions on the procedure and deadline for submitting an official medical school transcript and documentation of previous training (see Section 2 below).

The program director subsequently submits a Resident Evaluation Form for each returning resident by July 10 of each year. It must be noted whether the previous year was successfully completed.

Resident Evaluation Forms become part of the individual's ABOto file, and are a prerequisite for application for the certification examination. Credit may not be granted by the ABOto for any year of training for which an Evaluation Form is not received. Programs not meeting the July 10 deadline for submission of forms will be assessed a late fee.

2. Transcript and Surgical Training Verification

The resident must be a graduate of a medical school approved by the Liaison Committee on Medical Education (LCME) or the American Osteopathic Association, and must request that their medical school send an official certified transcript to the ABOto by November 1 of the first year of otolaryngology training. The transcript must show the degree and date conferred. If the transcript is in a language other than English, the resident will subsequently be billed for translation expenses incurred by the ABOto.

Residents entering training prior to July 1, 2005 must also submit a Verification of Surgery/Verification of Additional Residencies Form to the ABOto by November 1 of the first year of otolaryngology training. Residents who entered training after July 1, 2005, and who have prior residency training must submit the verification form to the ABOto by November 1 of the first year of otolaryngology training. Residents not meeting the November 1 deadline for submission of transcripts and surgery forms will be assessed a late fee.

3. Transfers

A resident wishing to transfer from one residency program to another must notify the ABOto in writing at least 6 weeks prior to the
date of transfer, and must explain the circumstances of the proposed transfer. Letters from the current and prospective directors of training must also be submitted:
- The letter from the current program director must verify the exact amount of training successfully completed in the program.
- The letter from the prospective program director must verify that sufficient residency positions, accredited by the Residency Review Committee for Otolaryngology of the ACGME, exist in the program to provide the transferring resident with the training necessary to meet the requirements of the ABOto for certification.

Failure to comply with the transfer requirements may result in loss of eligibility to participate in the ABOto certification process.

Application for Examination

There is no required time interval between completion of the residency program and making application for examination. However, all residency training must be successfully completed before the date of the examination in any given year.

Application materials for the written examination in any given year become available June 1 on the ABOto Web site at www.aboto.org and must be completed and postmarked by September 1 of that year. The application consists of the following:

1. Resident Registry Evaluations, submitted annually by the program director.
2. Applicants who have not participated in the Resident Registry through their residency program must submit an official, certified medical school transcript, submitted directly to the ABOto by the institution. The transcript must show the date the degree was conferred. If the transcript is in a language other than English, the resident will subsequently be billed for translation expenses incurred by the ABOto.
3. Residents entering training prior to July 1, 2005, must submit a Verification of Surgery/Verification of Additional Residency Form to the ABOto by November 1 of the first year of otolaryngology training. Residents who entered training after July 1, 2005, and who have prior residency training must submit the verification form to the ABOto by November 1 of the first year of otolaryngology training.
4. Application Form, signed by the program director and the program chair.
5. If more than one otolaryngology program was attended, a Verification of Otolaryngology Residency Form must be signed by the previous program director, attesting to satisfactory completion of training in that program.
6. Verification of all licenses to practice medicine, showing nonrestricted status and date of expiration of each. All applicants must submit evidence of medical licensure, with the following exceptions:
   a. Individuals who have completed residency training but who will enter a fellowship program utilizing an institutional license must submit a statement from the program director as evidence of this fact.
   b. Individuals who have completed residency training but who will go on to practice medicine in a foreign country not requiring licensure must make a written request to be accepted for the examination without medical license. Such requests must be submitted with the application.
7. The Operative Experience Report (printout), which lists procedures assisted in and performed by the applicant during otolaryngology residency, must be signed by the program director and the resident.

8. The applicant must possess high moral, ethical, and professional qualifications as determined by, and in the sole discretion of, the Board. Additional information may be requested by the Board from the following: Federation of State Medical Boards, local medical society, board-certified otolaryngologists from the geographical area in which the applicant practices, the director of the applicant's training program, hospital chiefs of staff, and/or other individuals and entities who may have knowledge of the applicant's moral and ethical standing, qualifications, or abilities.

9. Applications are approved by the Credentials Committee in October, and applicants are then notified if they have been approved for examination. The Board reserves the right to reject any application.

10. Applications are valid for one written exam and three oral exams. At the conclusion of this period, or upon failure of the written exam, the application expires, and the individual is required to submit new forms.

11. The ABOto maintains the full, legal name of the applicant for its records. If, at any time after submission of the application, the legal name of the applicant changes due to marriage, divorce, or other circumstances, the applicant must provide copies of the official documentation of the change. It is not possible to maintain two names (ie, a legal name and a professional name) for any one individual. At the time of any examination, the name on the official identification (ie, driver's license or passport) must match the name on record at the ABOto.

Purpose of Examination

The purpose of the examination is to determine the candidate's knowledge and understanding of the following:

1. Morphology, physiology, pharmacology, pathology, microbiology, biochemistry, genetics, and immunology relevant to the head and neck, the respiratory and upper alimentary systems; the communication sciences, including knowledge of audiology and speech-language pathology; the chemical senses and allergy/immunology, endocrinology, and neurology as they relate to the head and neck

2. Diagnosis and diagnostic methods including audiological and vestibular assessments, electrophysiological techniques, and other related laboratory procedures for diseases and disorders of the ears, the respiratory and upper alimentary systems, and the head and neck

3. Therapeutic and diagnostic radiology, including the interpretation of medical imaging techniques relevant to the head, neck, and thorax, including the temporal bone, skull, nose, paranasal sinuses, salivary and thyroid glands, larynx, neck, lungs, and esophagus

4. Diagnostic evaluation and management of congenital anomalies, allergy, sleep disorders, trauma, and other diseases in the regions and systems mentioned above

5. The cognitive management, including operative intervention with its preoperative and postoperative care, of congenital, inflammatory, endocrine, neoplastic, degenerative, and traumatic states, including:
   - temporal bone surgery
   - paranasal sinus and nasal surgery
   - skull-base surgery
   - maxillofacial surgery including the orbits, jaws, and facial skeleton
   - aesthetic, plastic, and reconstructive surgery of the face, head, and neck
   - surgery of the thyroid, parathyroid, pituitary, and salivary glands
• head and neck reconstructive surgery relating to the restoration of form and function in congenital anomalies and head and neck trauma and neoplasms
• endoscopy, both diagnostic and therapeutic
• surgery of the lymphatic tissues of the head and neck
6. The habilitation and rehabilitation techniques and procedures pertaining to respiration, deglutition, chemoreception, balance, speech, and hearing
7. The current literature, especially pertaining to the areas listed above
8. Research methodology
   In order to assist otolaryngology program directors in evaluating their programs, the Board reports each applicant's examination results to the director of the program in which the applicant completed his/her senior resident year.

**Neurotology Subspecialty Certification Examination**

**Objectives of Subspecialty Certification**

The objectives of the ABOTO with regard to subspecialty certification are:

1. To establish standards of qualification for otolaryngologist-head and neck surgeons who desire and request subspecialty certification in neurotology.
2. To determine which subspecialty candidates fulfill these standards of qualification.
3. To examine such candidates and issue certificates upon satisfactory completion of requirements.
4. To encourage development and maintenance of the highest standards in the teaching and training of neurotologists.

The ABOTO subspecialty certificate carries with it no legal qualification or license to practice medicine. There is no intention by the Board to interfere with or limit the professional activities of any licensed physician, whether certified or not. It is neither the intent nor the purpose of the Board to define requirements for membership on the staffs of hospitals or similar institutions or to confer special privileges upon its diplomates.

**Definition of a Neurotologist**

A neurotologist is an American Board of Otolaryngology-certified otolaryngologist-head and neck surgeon who has been prepared by an ACGME-accredited subspecialty residency program (fellowship) or who meets the Alternate Pathway criteria to provide comprehensive medical and surgical care of patients with diseases and disorders that affect the temporal bone, lateral skull base, and related structures of the head and neck.

The neurotologist should have command of the core knowledge and understanding of:

- the basic medical sciences relevant to the temporal bone, lateral skull base, and related structures; the communication sciences, including knowledge of audiology, endocrinology, and neurology as they relate to the temporal bone, lateral skull base, and related structures;
- advanced diagnostic expertise and advanced medical and surgical management skills for the care of diseases and disorders of the petrous apex, infratemporal fossa, internal auditory canals, cranial nerves, and lateral skull base (including the occipital bone, sphenoid bone, temporal bone, mesial aspect of the dura and intradural management), in conjunction with neurological surgery.

A neurotologist has acquired expertise in the medical and surgical management of diseases and disorders of the temporal bone, lateral skull base, and related structures beyond that inherent to the practice of otolaryngology-head and neck surgery by virtue of either:

1. satisfactory completion of an ACGME-accredited neurotology subspecialty training program (Standard Pathway), or
2. satisfactory completion of a neurotologic practice over at least a 7-year period (Alternate Pathway).

**Note:** The Alternate Pathway will remain valid through the 2012 examination, applications for which are due by September 1, 2011. Thereafter, the Standard Pathway will be the only route to neurotology subspecialty certification.

**Examination**

The ABOTO neurotology subspecialty certification process consists of an oral examination. All candidates must successfully complete this examination in order to become certified. A certificate, which is valid for 10 years, is granted by the ABOTO to a candidate who meets all requirements and satisfactorily passes this exam.

Requests for an appeal regarding a subspecialty certification decision must be postmarked within 40 days of the date exam results are postmarked at the ABOTO office. A copy of the Appeals Policy as related to the subspecialty certification process is available upon request.

The Board makes no representations as to whether its certification process will satisfy the recertification or specialty certification requirements of any state medical board. Any such determination must be made by the state medical board.

**Training Requirements**

Subspecialty training programs in neurotology in the United States are evaluated by the Residency Review Committee for Otolaryngology (RRC), which consists of representatives from the American Medical Association (AMA), the American College of Surgeons (ACS), and the ABOTO, and are accredited by the ACGME. Information concerning approved educational programs can be found in the Graduate Medical Education Directory, published by the AMA.

All subspecialty residency training must be completed in ACGME-approved programs in a manner acceptable to the director of that subspecialty residency program.

**Prerequisite Requirements**

At this time, there are two pathways to achieving subspecialty certification in neurotology. The prerequisite requirements for each are outlined below.

A. **Standard Pathway**

The Standard Pathway is open to ABOTO diplomates in good standing who have satisfactorily completed an ACGME-accredited neurotology subspecialty residency program. Prerequisite requirements are as follows:

1. **Resident Registry**

   All subspecialty residents must be registered with the ABOTO during the first year of neurotology subspecialty training in order to subsequently apply to take the subspecialty certification examination.

   A New Subspecialty Resident Form must be filed for each new subspecialty resident by the program director by July 10 of the first year of neurotology training.

   The program director subsequently submits a Subspecialty Resident Evaluation Form for each returning subspecialty resident by July 10 of each year. It must be noted whether the previous year was successfully completed.

   Subspecialty Resident Evaluation Forms become part of the individual's ABOTO file, and are a prerequisite for application for the certification examination. Credit may not be granted by the ABOTO for any year of training for which an Evaluation Form is not received. Programs not meeting the July 10 deadline will be assessed a $200 late fee.

2. **Transfers**
A subspecialty resident wishing to transfer from one subspecialty residency program to another must notify the ABOto in writing at least 6 weeks prior to the date of transfer, and must explain the circumstances of the proposed transfer.

Letters from the current and prospective directors of training must also be submitted:

- The letter from the current program director must verify the exact amount of training successfully completed in the program.
- The letter from the prospective program director must verify that sufficient subspecialty residency positions, accredited by the ACGME, exist in the program to provide the transferring subspecialty resident with the training necessary to meet the requirements of the ABOto for neurotology certification.

Failure to comply may result in the loss of eligibility to participate in the ABOto subspecialty certification process.

4. Leaves of Absence

Leaves of absence and vacation may be granted to subspecialty residents at the discretion of the program director in accordance with local rules. The total of such leaves and vacation may not exceed 6 weeks in any one year. If a longer leave of absence is granted in any year, the required period of graduate medical education may be extended accordingly.

B. Alternate Pathway

The Alternate Pathway allows ABOto diplomates to sit for the neurotology subspecialty certification examination who have not completed an ACGME-accredited neurotology subspecialty residency.

The application must be received by September 1 of the previous year. The application consists of the following:

1. Verification of American Board of Otolaryngology certification.
2. Subspecialty Resident Registry Evaluations, submitted annually by the program director.
3. Application Form, signed by the program director and another ABOto diplomate.
4. If more than one neurotology program was attended, an additional Verification of Neurotology Subspecialty Residency Form must be signed by the previous program director, attesting to satisfactory completion of training in that program.
5. Verification of all licenses to practice medicine, showing nonrestricted status and date of expiration of each. All applicants must submit evidence of medical licensure, with the following exception:

Individuals who have completed subspecialty residency training but who will go on to practice medicine in a foreign country not requiring licensure must make a written request to be accepted for the examination without medical license. Such requests must be submitted with the application.

6. Operative Experience Report (data and printout), which lists procedures assisted in and performed by the applicant during neurotology subspecialty residency, signed by the applicant and the program director.

7. The applicant must possess high moral, ethical, and professional qualifications as determined by, and in the sole discretion of the Board. Additional information may be requested by the Board from the following: Federation of State Medical Boards, local medical society, board certified otolaryngologists from the geographical area in which the applicant practices, the director of the applicant's training program, hospital chiefs of staff, and/or other individuals and entities who may have knowledge of the applicant's moral and ethical standing, qualifications, or abilities.

8. Applications are approved by the Credentials Committee in October, and applicants are then notified if they have been approved for examination. The Board reserves the right to reject any application.

B. Alternate Pathway

Application materials for the examination in any given year become available June 2 on the ABOto Web site at www.aboto.org and must be completed and returned (postmarked) by September 1 of that year. The application consists of the following:

1. Verification of American Board of Otolaryngology certification.
2. Subspecialty Resident Registry Evaluations, submitted annually by the program director.
3. Application Form, signed by the program director and another ABOto diplomate.
4. If more than one neurotology program was attended, an additional Verification of Neurotology Subspecialty Residency Form must be signed by the previous program director, attesting to satisfactory completion of training in that program.
5. Verification of all licenses to practice medicine, showing nonrestricted status and date of expiration of each. All applicants must submit evidence of medical licensure, with the following exception:

Individuals who have completed subspecialty residency training but who will go on to practice medicine in a foreign country not requiring licensure must make a written request to be accepted for the examination without medical license. Such requests must be submitted with the application.

6. Operative Experience Report (data and printout), which lists procedures assisted in and performed by the applicant during neurotology subspecialty residency, signed by the applicant and the program director.

7. The applicant must possess high moral, ethical, and professional qualifications as determined by, and in the sole discretion of the Board. Additional information may be requested by the Board from the following: Federation of State Medical Boards, local medical society, board certified otolaryngologists from the geographical area in which the applicant practices, the director of the applicant's training program, hospital chiefs of staff, and/or other individuals and entities who may have knowledge of the applicant's moral and ethical standing, qualifications, or abilities.

8. Applications are approved by the Credentials Committee in October, and applicants are then notified if they have been approved for examination. The Board reserves the right to reject any application.
have knowledge of the applicant's moral and ethical standing, qualifications, or abilities.

6. Applications are approved by the Credentials Committee in October, and applicants are then notified if they have been approved for examination. The Board reserves the right to reject any application.

Applicants With Disabilities

The ABOM fully supports the intent of the Americans with Disabilities Act (ADA). Upon request, ABOM will make reasonable accommodations in its examination procedures for candidates with documented disabilities. An applicant who believes that he or she is disabled within the meaning of the ADA law should request detailed information concerning ABOM's policy regarding accommodation so that his or her special needs can be met in a timely manner. Current documentation of the disability must accompany the application.

Purpose of Examination

The purpose of the subspecialty examination in neurotology is to determine the candidate's knowledge and understanding in the following categories, which exceed that expected of an ABOM diplomate holding a primary certificate in otolaryngology.

1. Morphology, physiology, pharmacology, pathology, microbiology, biochemistry, genetics, and allergy and immunology relevant to the temporal bone, lateral skull base, and related structures; the communication sciences, including knowledge of audiology; endocrinology and neurology as they relate to the temporal bone, lateral skull base, and related structures; neurophysiology, neuropathophysiology, diagnosis, and therapy of advanced neurologic disorders, including advanced audiologic and vestibular testing; evaluation of cranial nerves and related structures; interpretation of imaging techniques of the temporal bone and lateral skull base; and electrophysiological monitoring of cranial nerves VII, VIII, X, XI, and XII.

2. Audiometric testing including auditory brainstem responses and otoacoustic emissions.

3. Vestibular testing, facial nerve testing, electrophysiologic monitoring strategies, and neuroradiologic procedures used to evaluate the temporal bone, skull base, and related structures.

4. Diagnostic expertise and ability to develop medical and surgical management strategies, including intracranial exposure, and postoperative care necessary to treat congenital, inflammatory, neoplastic, idiopathic, allergic, immunologic, and traumatic diseases of the petrous apex, internal auditory canal, cerebellopontine angle, cranial nerves, and lateral skull base, including the occipital bone, temporal bone, and craniovertebral junction.

5. Diagnostic evaluation and management of the surgical revision procedures for the treatment of chronic otitis media; disorders of the vestibular system; otosclerosis; profound hearing loss; facial nerve disorders; and congenital, inflammatory, neoplastic, idiopathic, and traumatic disorders of the extradural petrous bone and apex, occipital bone, sphenoid bone, and related structures.

6. Advanced surgical techniques to deal with diseases and disorders of the auditory and vestibular systems; extradural skull base, including the sphenoid bone, temporal bone, and reconstructive techniques for repair of deficits in these areas.

7. The habilitation and rehabilitation techniques and procedures pertaining to vestibular disorders, hearing disorders (including not limited to, hearing aids, cochlear implants, and assistive listening devices), and cranial nerve neuropathies, as well as the speech rehabilitation of the hearing impaired.

8. The diagnosis and medical and surgical management of congenital, traumatic, inflammatory, degenerative, neoplastic, allergic, immunologic, and idiopathic diseases and other disease states of the temporal bone, occipital bone, sphenoid bone, craniovertebral junction, and related structures are required experiences.

9. The current literature, especially pertaining to the areas listed above.

In order to assist otolaryngology program directors in evaluating their programs, the Board reports each applicant's examination results to the director of the program in which the applicant completed his/her neurotology subspecialty residency training, if appropriate.

Maintenance of Certification

Individuals certified in 2002 and thereafter receive certificates that are valid for 10 years. Revalidation is accomplished by satisfactory completion of the ABOM Maintenance of Certification Process, which is outlined below and meets the guidelines established by the American Board of Medical Specialties.

To remain current in the MOC process, diplomates with time-limited certificates and participants must complete a brief form and submit a fee annually. A penalty fee will be assessed for late submissions, and nonparticipation may result in default of the Maintenance of Certification process.

1. Professional Standing

Participants in the Maintenance of Certification process must:

a. hold a valid certificate issued by the American Board of Otolaryngology;

b. hold a valid, unrestricted license to practice medicine in all locations where licensed, as defined by ABOM policy;

c. hold privileges to practice otolaryngology-head and neck surgery in hospitals or surgical centers accredited by the Joint Commission on the Accreditation of Health Care Organizations or AAAHC, or must provide a letter of explanation why this requirement cannot be met.

2. Lifelong Learning and Self-Assessment

a. Primary Certification

Participants in the Maintenance of Certification process are required to complete 100 credits of ACCME-approved Category 1 continuing medical education (CME) every 2 years, of which 60% must be specialty related, as evidence of lifelong learning. CME credits are calculated on the calendar year for reporting purposes. Periodic audits will be conducted by the ABOM to assure compliance. It is the responsibility of the individual diplomate to maintain the CME record.

OR

Neurotology subspecialty-certified individuals need only participate in the Neurology MOC program to maintain the primary and neurotology certificates. Participants in the Neurology Maintenance of Certification process are required to complete 100 credits of ACCME-approved Category 1 CME every 2 years, of which 60% must be either otology or neurotology subspecialty related, as evidence of life-long learning. CME credits are calculated on the calendar year for reporting purposes. Periodic audits will be conducted by the ABOM to assure compliance. It is the responsibility of the individual diplomate to maintain the CME record.

b. Participation in the AAO-HNSF Home Study Course is a recommended form of participation in lifelong learning with periodic self-assessment.
3. Cognitive Expertise
   a. The Scope of Knowledge Study is the definition of the content for the specialty and will be used for the development of the revalidation examination, which will be conducted in a secure, proctored environment and will be subject to psychometric and statistical analysis.
   b. Candidates will be required to complete a core component examination, which includes knowledge fundamental to the practice of otolaryngology-head and neck surgery, as well as knowledge of practice environment issues such as quality assurance, safety, regulations, ethics of practice, professionalism, legal and reimbursement issues, and one module, to be selected by the candidate, which focuses on a specific area. Neurotology subspecialty-certified diplomates will take the neurotology module.

4. Evaluation of Performance in Practice
   This area remains under development.

Policies, Procedures, and Requirements

This document supersedes all previous publication of the American Board of Pathology (ABP) concerning its policies, procedures, and requirements for certification. (Some information regarding ABP certification has changed since publication of this directory. Please visit the ABP Web site at www.abpath.org for current information.)

All candidates for ABP certification are admitted to the examinations at the discretion of the ABP.

The admission of a candidate to an ABP certifying examination is governed by the policies, procedures, and requirements in effect during the current application period.

The ABP reserves the right to make changes in its fees, policies, procedures, and requirements at any time, with or without prior notice.

Organizational History

In June 1935, the Section on Pathology and Physiology of the American Medical Association (AMA) and the American Society of Clinical Pathologists (ASCP) appointed committees that together considered the feasibility and desirability of establishing a national certifying board. The joint committee agreed unanimously that such a board should be established and proceeded to draw up bylaws.

In May 1936, the ASCP and the Section on Pathology and Physiology of the AMA accepted the proposed bylaws, authorized the nomination of four members each to the ABP, and suggested incorporation in Michigan. Approval of the ABP was granted by the Advisory Board for Medical Specialties and the Council on Medical Education and Hospitals of the AMA.

On July 19, 1936, the ABP met for the first time in Chicago. The original Trustees were Doctors F W Hartman, E B Krumhhaar, H T Karsner, and J J Moore from the Section on Pathology and Physiology of the AMA, and Doctors A H Sanford, F H Lamb, A G Foord, and R R Kracke from the ASCP.

Officers elected were Doctors A H Sanford, president; F H Lamb, vice president; and F W Hartman, secretary-treasurer.

Cooperating Societies of the ABP
- Academy of Clinical Laboratory Physicians and Scientists
- American Medical Association Section Council on Pathology
- American Society for Clinical Pathology
- American Society for Investigative Pathology
• Association of Directors of Anatomic and Surgical Pathology
• Association of Pathology Chairs
• College of American Pathologists
• United States and Canadian Academy of Pathology, Inc

Mission and Purpose
The mission of the ABP, as a member of the American Board of Medical Specialties, is to promote the health of the public by advancing the practice and science of pathology.

The ABP accomplishes its mission through the following principal activities:
1. Establishing certification standards.
2. Assessing the qualifications of those seeking to practice the specialty of pathology.
3. Conducting voluntary primary and subspecialty certification examinations and awarding certificates to successful candidates.
4. Encouraging the maintenance of certification of those practicing pathology.
5. Participating in the review of pathology training programs and supporting the directors and trainees of these programs.
6. Maintaining communication with pathology and other medical organizations, with its diplomates, and with others as appropriate.
7. Encouraging the study of pathology.
8. Maintaining a registry of its diplomates.

The ABP does not seek special privileges for its diplomates, nor does it:
1. Confer an academic degree.
2. Confer a legal qualification or license to practice pathology.
3. Define hospital privileges.
4. Define the scope of specialty practice.
5. Delineate who may or may not engage in the practice of pathology.

Certification by the ABP
The ABP seeks to improve the quality of training and practice of pathology by continual review of the program requirements of graduate training in conjunction with the Residency Review Committee for Pathology (RCPSC) and by improving the certification process. In this way, the ABP serves the public, the profession, and the individual physician.

I. Certification in Anatomic Pathology, Clinical Pathology, or Combined Anatomic Pathology and Clinical Pathology
The granting of a certificate to a physician by the ABP denotes that the pathologist is a physician who:
A. Successfully completed a graduate medical education program in pathology approved by the RCPSC and accredited by the Accreditation Council for Graduate Medical Education (ACGME) or the Royal College of Physicians and Surgeons of Canada (RCPSC) and
B. Has been endorsed by the pathology training program director and recommended by other pathologists familiar with the candidate’s competence and
C. Has successfully completed a voluntary evaluation process designed and administered by the ABP to assure the public and other physicians that, at the time of certification, the candidate had knowledge, skills, and other abilities that the ABP deems important for the practice of pathology.

II. Subspecialty Certification
Pathology is a broad discipline; therefore, it is appropriate that some certified pathologists seek greater knowledge and expertise in one of the component areas of pathology. Presently, the ABP issues subspecialty certificates in blood banking/transfusion medicine, chemical pathology, cytopathology, forensic pathology, hematology, medical microbiology, neuropathology, pediatric pathology, and, in conjunction with the American Board of Dermatology (ABD), subspecialty certification in dermatopathology and, in conjunction with the American Board of Medical Genetics (ABMG), subspecialty certification in molecular genetic pathology.

Certification in a subspecialty requires additional training and an additional examination. Pathologists with subspecialty certification may choose to limit their activities entirely or in part to a specific area of competence or they may place special emphasis on it in their practices. The achievement of subspecialty certification does not reflect on the ability of other pathologists to practice in that area.

III. Maintenance of Certification
It is the position of the ABP that continuing medical education and practice experience are required to maintain general and subspecialty knowledge after successful completion of the certification process. (See Time-Limited Certificates and Voluntary Recertification and Maintenance of Certification.)

Requirements for Primary and Subspecialty Certification
All applications for certification are evaluated by the Credentials Committee of the ABP. The evaluation process requires consideration of the following:

I. Professional Education
II. Medical Licensure
III. Training Requirements
IV. The Credentialing Year (for primary certification)
V. Examination

I. Professional Education
An applicant must have graduated from a medical school in the United States or Canada accredited by the Liaison Committee on Medical Education, an osteopathic college of medicine accredited by the Bureau of Professional Education of the American Osteopathic Association, or a medical school outside the United States or Canada acceptable to the ABP.
A graduate of a medical school outside the United States or Canada must submit with the application a notarized copy of the medical school diploma, along with an English translation, showing the medical degree and the date that it was awarded. A certificate showing that the applicant has passed a final examination is not acceptable.

II. Medical Licensure
An applicant for primary or subspecialty certification must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in a state or jurisdiction of the United States or Canada. If the applicant is in the process of applying for a license to practice medicine or osteopathy, a copy of the application and evidence of successful completion of USMLE Step 3 or other examination required by the licensing authority must be submitted with the completed application. Results of the certification examinations will not be released until a notarized copy of a currently valid, full, and unrestricted license to practice medicine or osteopathy is received by the ABP.
A candidate or diplomate must notify the ABP in writing within 30 days of: (a) any revocation, suspension, or limitation of his/her license or right to practice by any licensing agency in the United States or Canada; (b) voluntary surrender of such a license or right in connection with any disciplinary action or consent decree; or (c) entry into a rehabilitation or diversionary program for chemical
A.

The candidate or diplomate must also provide the ABP all relevant documentation relating to such action, including any administrative complaints or decisions, consent decrees, or settlement agreements. Failure to report such an action may result in the denial of qualification to sit for a certifying examination or the revocation of any and all certificates issued by the ABP, as applicable. (See Revocation of Certificate.) Entry into and successful participation in a rehabilitation or diversionary program for chemical dependency authorized by the applicable licensing agency will not, by itself, disqualify an applicant from taking a certification examination.

II. Training Requirements

To acknowledge the diverse activities in the practice of pathology and to accommodate the interests of individuals wanting to enter the field, the ABP offers primary certification through the following three routes: combined anatomic pathology and clinical pathology, anatomic pathology only, and clinical pathology only. A variety of subspecialty certificates is offered. Primary certification in anatomic pathology or clinical pathology may be combined with some of the subspecialty certifications.

For primary certification, only pathology training taken in the United States or, in certain circumstances, in Canada is acceptable toward meeting the ABP requirements. The training must be in programs that have been inspected and accredited by the ACGME or the RCPSC. For subspecialty certification, credit is not given for pathology training taken outside of the United States, nor is credit given for subspecialty training that was part of the training program for primary certification in AP and/or CP. For both primary and subspecialty certification, training must have been successfully completed during the 5-year period immediately preceding the final filing date for submission of the application. Verification of the applicant's qualifications by the pathology training program director is required. Program directors have the opportunity to observe the applicants over the course of training and the responsibility to evaluate the individual's overall educational advancement and competency. Therefore, the individual's most recent pathology training program director is asked to complete an evaluation form to verify to the ABP that the training has been appropriate and successfully completed and that the individual is ready to take the certifying examinations. In addition, each pathology training program director who had responsibility for any portion of the individual's training is asked to complete a form verifying successful completion of the training in that program. The ABP may also solicit written evaluations of the individual's performance from other persons acceptable to the ABP for such evaluation. This evaluation is a critical factor considered by the ABP in determining the individual's qualification for examination and certification.

Each institution sponsoring a pathology training program should develop individual sick, vacation, parental, and other leave policies for the resident. However, 1 year of approved training credit toward ABP certification requirements must be 52 weeks in duration, and the resident must document an average of 48 weeks per year of full-time pathology training over the course of the training program. Any additional leave must be made up. Unused vacation and other leave time may not be accumulated to reduce the overall duration of training.

A. Primary Certification

In addition to accredited pathology training, applicants for primary certification who began pathology training prior to 2002 must meet the 1-full-year credentialing requirement as defined in Section IV. The Credentialing Year. Residents who began pathology training in 2002 or later do not have a credentialing year requirement.

1. Training. The applicant must satisfactorily complete pathology training in a program accredited by the ACGME or the RCPSC as follows:

a. Combined Anatomic Pathology and Clinical Pathology (AP/CP) Certification

Four full years of full-time, approved training in an accredited APCP-4 program that includes at least 18 months of structured training in anatomic pathology and 18 months of structured training in clinical pathology, plus a "flexible year" that may be either an additional 12 months of full-time, continued training in anatomic pathology and/or clinical pathology or 12 months of full-time, approved training in other areas of pathology as part of the defined 4-year accredited AP/CP training program. Residents must perform a minimum of 50 autopsies, and a list of completed autopsies performed by the resident must be provided at the time of application.

b. Anatomic Pathology (AP) Certification

1. Three full years of full-time, approved training in anatomic pathology in an accredited APCP-4 or AP-3 program that includes at least 24 months of structured training in anatomic pathology, plus a "flexible year" that may be either an additional 12 months of full-time, continued training in anatomic pathology or 12 months of full-time, approved training in other areas of pathology as part of the defined accredited training program. Residents must perform a minimum of 50 autopsies, and a list of completed autopsies performed by the resident must be provided at the time of application.

2. Primary certification in clinical pathology and 2 full years of full-time, approved training in anatomic pathology in an accredited APCP-4 or AP-3 program, with at least 18 months of structured training in anatomic pathology. Six months may be full-time, approved training in a subspecialty area of anatomic pathology as part of the defined accredited training program. Residents must perform a minimum of 50 autopsies, and a list of completed autopsies performed by the resident must be provided at the time of application.

c. Clinical Pathology (CP) Certification

1. Three full years of full-time, approved training in clinical pathology in an accredited APCP-4 program that includes at least 24 months of structured training in clinical pathology, plus a "flexible year" that may be either an additional 12 months of full-time, continued training in clinical pathology or 12 months of full-time, approved training in other areas of pathology as part of the defined accredited training program.

2. Primary certification in anatomic pathology and 2 full years of full-time, approved training in clinical pathology in an accredited APCP-4 program, with at least 18 months of structured training in clinical pathology. Six months may be full-time, approved training in a subspecialty area of clinical pathology as part of the defined accredited training program.

2. Advanced Pathology Training Credit Mechanisms. Advanced credit will not be granted to applicants who began pathology training on or after July 1, 2008. For applicants who began pathology residency training before this date, advanced credit may be given under special circumstances by the mechanisms described hereafter.

Advanced credit is any medically relevant, post-baccalaureate, 12-month experience that is not approved by the ACGME for training in pathology and is relevant to the education of pathologists as determined by the ABP. Such training may be applied to satisfy the flexible year in pathology. The acceptance of advanced
3. Post-Pathology-Course Fellowship and Graduate

Within 12 months, the Advanced Evaluation form should not be submitted, as the examination, the director has observed the performance of the applicant. After the applicant is determined qualified for recommendation for credit will be made to the director. Before the applicant is qualified, potential applicants should complete at least 1 year of pathology training necessary for certification in AP/CP, AP, or CP.

Advanced credit cannot be applied to combined primary and subspecialty certification requirements. (See Section III.C. Combined Primary and Subspecialty Certification) To avoid any misunderstanding, potential applicants should complete at least 1 full year of training before communicating with the ABP to ascertain whether credit may be acceptable. In order to determine the amount of advanced credit for which the applicant may be eligible, the applicant should submit to the ABP a written request for the Advanced Credit/Credentialing Requirement Evaluation form. The form must be completed and returned with the appropriate supporting documentation, including a letter of support from the pathology training program director. This letter should include a recommendation as to the amount of credit that the director believes the individual should receive. This recommendation should be made only after the pathology training program director has observed the performance of the applicant. After review of the application, the ABP will notify the applicant and the director of the pathology training program whether or not a recommendation for credit will be made to the Credentials Committee. Before the applicant is determined qualified for examination, the director of the final year of training must certify that the individual is fully qualified to sit for the examination.

If the applicant will be applying for primary certification within 12 months, the Advanced Credit/Credentialing Requirement Evaluation form should not be submitted, as the information requested on this form is also requested on the application for primary certification.

a. For residents entering pathology training programs on or after July 1, 2003, credit for a PhD degree will not be granted.

For residents who entered pathology training programs before this date, the following remains in effect: Applicants holding a PhD degree in a special discipline of pathology or a basic science related to pathology may, under certain circumstances, obtain pathology training credit. The evaluation and granting of the amount of training credit will depend on an assessment by the ABP regarding relevance of the field of study to anatomic pathology or clinical pathology.

b. For residents entering pathology training programs on or after July 1, 2003, the ABP will grant up to 6 months of research credit for primary certification. The research must be done during the pathology training program and with the approval of the pathology training program director.

For residents who entered pathology training programs before July 1, 2003, the following remains in effect: Research with a direct application to the practice of anatomic pathology or clinical pathology and not leading to an advanced degree may be considered for credit not to exceed 12 months in combination with other advanced credits. The research must be full-time, and the applicant must be able to demonstrate active participation in the generation of the hypothesis and development of the protocol. No credit is given for research employment as a technician or technologist.

3. Post-Pathology-Course Fellowship and Student Fellowship Training During Medical School. For students entering post-pathology-course fellowships on or after July 1, 2003, credit for successful completion of such programs will not be granted.

For those who began post-pathology-course fellowships prior to July 1, 2003, the following remains in effect: Under certain circumstances, applicants may receive advanced pathology training credit toward the primary certification requirements for post-pathology-course fellowship training or research in pathology. Such credit is not given toward the requirements for subspecialty certification or combined primary/subspecialty certification. Credit is assessed on an individual basis and may be applied only to the "flexible year" of required primary training. Credit may not be applied to the required 18 months of structured anatomic pathology training or the required 18 months of structured clinical pathology training necessary to qualify for combined anatomic and clinical pathology certification.

Advanced credit toward single certification in anatomic pathology or single certification in clinical pathology will be applied to the "flexible year" of required pathology training only and not to the 24 months of required structured training.

A separate application for advanced credit for post-sophomore fellowship training is not necessary, provided the following guidelines are met:

a. The fellowship program must be approved by the ABP.
b. The fellow must satisfactorily complete medical school in which the pathology course was taught prior to enrolling in the program.
c. The fellow did not receive credit (elective or required) toward the requirements for graduation from medical school for the pathology fellowship activities.
d. Training was full-time in a department of pathology with a fully accredited pathology training program.
e. Training has been validated by the director of the student fellowship program and is approved as an acceptable experience by the director of the accredited pathology training program in which the applicant is registered.
f. Training was under the direction of the director of the pathology training program or the chair of the department of pathology.
g. A description of proposed activities, responsibilities, and assignments for anatomic pathology, clinical pathology, and research was available and on file with the ABP prior to the beginning of the fellowship. If a formal institutional program exists, a copy should be filed with the ABP.
h. A validation and evaluation report was submitted to the ABP on completion of the fellowship by the pathology training program director or chair of the department of pathology.

4. Interval of Training. An applicant for primary certification who has not been declared qualified for examination within 5 years after completion of the required pathology training must have successfully completed 1 year of additional pathology training in the area(s) in which certification is desired (ie, 1 year in AP and 1 year in CP for APCP certification) before the application will be considered. Such training must occur in an approved residency position in a pathology training program accredited by the ACGME or RCPSC.

B. Subspecialty Certification

Applicants may seek certification in only one subspecialty at a time. All applicants for subspecialty certification must hold a primary certificate from the ABP. All certificates, where indicated, from another member medical specialty board of The American Board of Medical Specialties (ABMS). With the exception of pediatric pathology (see III B 10), credit is not given for pathology training taken outside of the United States, nor is credit given for subspecialty training that was part of the training program for the primary examination in AP
and/or CP. No advanced credit will be given toward the requirements for subspecialty certification.

Subspecialty training should occur no sooner than after 2 full years of training in APCP, AP, or CP. In the case of dermatopathology and pediatric pathology, training must take place after the applicant has met the full training requirements for primary certification.

A candidate for subspecialty certification who has not been declared qualified for the examination within 6 years after completion of the required training must have successfully completed 1 year of additional subspecialty training in the area in which certification is desired. This training must have occurred during the 5 years immediately preceding the final filing date for submission of the application and must have been in a program accredited for such training by the ACGME.

Each applicant applying for certification must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in a state or jurisdiction of the United States or Canada.

Individuals may hold no more than two subspecialty certificates issued by the ABP. As a condition of admission to an examination for subspecialty certification, an individual who already holds two or more subspecialty certificates (formerly special competence, special qualification, and/or added qualification) must surrender all but one of them. If the individual fails the examination, and the period of board qualification terminates, the surrendered certificate(s) will be restored.

Modified training (part-time training) for subspecialty certification may be acceptable if the part-time training is approved by the ABP prior to the beginning of the training, if it occurs in a program accredited by the ACGME, and if it is in an approved training position. The proposal must include a training plan and must indicate the duration of training, which may not exceed twice that required for qualification. If the training plan is approved, trainees must file performance reports from the program director semi-annually. A completion report must be filed with the application for certification.

1. Blood Banking/Transfusion Medicine (BB/TM)
   a. For applicants who are certified in anatomic pathology and clinical pathology or clinical pathology only, or who have a primary certificate plus a subspecialty certificate in hematology from another member medical specialty board of the ABMS: 1 full year of additional training in blood banking/transfusion medicine in a program accredited for such training by the ACGME.
   b. For diplomates of the American Board of Anesthesiology: 1 full year of additional training in blood banking/transfusion medicine in a program accredited for such training by the ACGME.
   c. For applicants, other than those described in 1a or 1b, who are certified by another member medical specialty board of the ABMS: 2 years, full time, in blood banking/transfusion medicine, including 1 year as a trainee in a program accredited for such training by the ACGME and 1 additional year in blood banking/transfusion medicine acceptable to the ABP. ABP approval for the additional year should be obtained before the individual begins the additional year.
   d. For applicants seeking combined certification in clinical pathology and blood banking/transfusion medicine, see Section III.C, Combined Primary and Subspecialty Certification.

2. Chemical Pathology (Chem P)
   a. For applicants who are certified in anatomic pathology and clinical pathology or clinical pathology only: 1 full year of additional training in chemical pathology in a program accredited for such training by the ACGME.
   b. For applicants, other than those described in 2a, who are certified by another member medical specialty board of the ABMS: 2 full years of full-time training in chemical pathology, including 1 year as a trainee in a program accredited for such training by the ACGME and 1 additional year in chemical pathology acceptable to the ABP. ABP approval for the additional year should be obtained before the individual begins the additional year.
   c. For applicants seeking combined certification in clinical pathology and chemical pathology, see Section III.C, Combined Primary and Subspecialty Certification.

3. Cytopathology
   a. For applicants who are certified in anatomic pathology or combined anatomic and clinical pathology: 1 full year of full-time training in cytopathology in a program accredited for such training by the ACGME.
   b. For applicants seeking combined certification in anatomic pathology and cytopathology, see Section III.C, Combined Primary and Subspecialty Certification.

4. Dermatopathology (DP)
   Certification in dermatopathology is a joint and equal function of the ABP and the American Board of Dermatology (ABD). Such function relates to qualifications of applicants, standards of examinations, and the form of the certificate.
   a. Prerequisites
      The ABD and the ABP will qualify candidates for examination in dermatopathology who:
      1. Are certified by the ABD.
      2. Are certified by the ABP (anatomic pathology or combined anatomic pathology and clinical pathology) or the ABD and have completed at least 1 year of training in dermatopathology in a program accredited for such training by the ACGME. This additional training must be taken after the applicant has met the full training requirements for certification in pathology or dermatology.
   b. Training
      Training programs in dermatopathology are a joint and equal function of departments of pathology and dermatology. The pathologist applicant must spend half of the required training time in clinical dermatology.

5. Forensic Pathology (FP)
   a. For applicants who are certified in anatomic pathology and clinical pathology or anatomic pathology only: 1 full year of additional training in forensic pathology in a program accredited for such training by the ACGME.
   b. For applicants seeking combined certification in anatomic pathology and forensic pathology, see Section III.C, Combined Primary and Subspecialty Certification.

6. Hematology (HEM)
   a. For applicants who hold any primary certificate in pathology or have a primary certificate plus a subspecialty certificate in hematology from another member medical specialty board of the ABMS: 1 full year of additional training in hematology (pathology) in a program accredited for such training by the ACGME.
   b. For applicants, other than those described in 6a, who are certified by another member medical specialty board of the ABMS: 2 years of full-time training in hematology (pathology) including 1 year as a trainee in a program accredited for such training by the ACGME and 1 additional year in hematology acceptable to the ABP. ABP approval for the additional year should be obtained before the applicant begins the additional year.
c. For applicants seeking combined certification in clinical pathology or anatomic pathology and hematology, see Section III.C, Combined Primary and Subspecialty Certification.

7. Medical Microbiology (MMB)

a. For applicants who hold any primary certificate in pathology or have a primary certificate plus a subspecialty certificate in infectious disease from another member medical specialty board of the ABMS: 1 full year of additional training in medical microbiology in a program accredited for such training by the ACGME.

b. For applicants, other than those described in 7a, who are certified by another member medical specialty board of the ABMS: 2 full years of full-time training in medical microbiology including 1 year as a trainee in a program accredited for such training by the ACGME and 1 additional year in medical microbiology acceptable to the ABP: ABP approval for the additional year should be obtained before the applicant begins the additional year.

c. For applicants seeking combined certification in anatomic pathology or clinical pathology and medical microbiology, see Section III.C, Combined Primary and Subspecialty Certification.

8. Molecular Genetic Pathology (MGP)

Certification in molecular genetic pathology is a joint and equal function of the American Board of Medical Genetics (ABMG) and the ABP. Such function relates to qualifications of applicants, standards of examination, and the form of the certificate. Each individual applying for certification must be a physician and hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in the United States or Canada.

a. Prerequisites

The ABMG and the ABP will qualify applicants for examination for certification in molecular genetic pathology who:

1. Are certified by the ABP and the ABMG.

2. Are certified by the ABP (anatomic pathology, clinical pathology, or combined anatomic pathology and clinical pathology) or the ABMG

and

Document molecular genetic pathology practice of at least 25% full-time experience within each of the immediately preceding 5 years or 100% experience over the immediately preceding 2 years to the satisfaction of the ABMG and the ABP

and

Submit a completed application that includes a logbook of 150 cases from the time period used for certification plus a completed supplemental information form.

The by-experience pathway will end in 2006, 5 years after the ACGME began accreditation of molecular genetic pathology training programs. Training in molecular genetic pathology in a program that is not accredited will count as experience. Applications for certification in molecular genetic pathology via the by-experience pathway, based on experience through 2006, will be accepted for the 2007 examination.

3. Are certified by the ABP (anatomic pathology, clinical pathology, or combined anatomic pathology and clinical pathology) or the ABMG and have completed at least 1 year of training in molecular genetic pathology in a program accredited for such training by the ACGME.

b. Training

Training programs in molecular genetic pathology are a joint and equal function of departments of pathology and medical genetics. The pathologist applicant must participate in the diagnosis, management, and treatment of the patient and the family.

9. Neuropathology (NP)

a. For applicants who are certified in anatomic pathology and clinical pathology or anatomic pathology only: 2 full years of additional supervised training in neuropathology in a program accredited for such training by the ACGME.

b. For applicants who are certified in clinical pathology or are certified by another member medical specialty board of the ABMS:

1. One full year of approved training in anatomic pathology in a program accredited for such training by the ACGME and

2. Two full years of additional supervised training in neuropathology in a program accredited for such training by the ACGME.

c. For applicants seeking combined certification in anatomic pathology and neuropathology, see Section III.C, Combined Primary and Subspecialty Certification.

10. Pediatric Pathology (PP)

a. For applicants who are certified by the ABP in anatomic pathology and clinical pathology or anatomic pathology only or in anatomic pathology or general pathology from the RCPSC: 1 full year of additional supervised training in pediatric pathology in a program accredited for such training by the ACGME.

b. The pediatric pathology training should occur after the completion of the full training requirements necessary to qualify for certification in AP/CP or AP.

C. Combined Primary and Subspecialty Certification

Under certain circumstances, subspecialty training may be combined with the primary training requirements, permitting an applicant to qualify for a combined certificate. Applicants for combined certification who began training prior to 2002 must also meet the additional credentialing year requirement. (See Section IV, The Credentialing Year.) Residents beginning pathology training in 2002 or later do not have a credentialing year requirement.

All applicants for AP/subspecialty certification must meet the autopsy requirement described under Section A, Primary Certification.

Advanced credit will not be given toward the requirements for combined certification. The acceptable combinations of certification and required training are:

1. Anatomic Pathology and Cytopathology—3 full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and 1 full year of approved training in cytopathology in a program accredited for such training by the ACGME.

2. Anatomic Pathology and Forensic Pathology—2 full years of approved training in anatomic pathology in a program accredited for such training by the ACGME, 1 full year of approved training in forensic pathology in a program accredited for such training by the ACGME, and 1 additional year of approved training in another area of pathology such as neuropathology, toxicology, or chemical pathology. ABP approval for the additional year should be obtained before the candidate begins the additional year.

3. Anatomic Pathology and Hematology—2 full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and 2 years, full time, in hematology including 1 year as a trainee in a program accredited for such training by the ACGME and 1 additional year in hematology acceptable to the ABP. ABP approval for the additional year should be obtained before the applicant begins the additional year.
4. Anatomic Pathology and Medical Microbiology—2 full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and 2 full years of approved training in medical microbiology including 1 year as a trainee in a program accredited for such training by the ACGME and 1 additional year in medical microbiology acceptable to the ABP. ABP approval for the additional year should be obtained before the applicant begins the additional year.

5. Anatomic Pathology and Neuropathology—2 full years of approved training in anatomic pathology and 2 full years of approved training in neuropathology in a program accredited for such training by the ACGME with adequate experience in diagnostic neuropathology.

6. Clinical Pathology and Subspecialty Certification—3 full years of approved training in clinical pathology in a program accredited for such training by the ACGME and 1 full year of approved subspecialty training in blood banking/transfusion medicine, chemical pathology, hematology, or medical microbiology in a program accredited for such training by the ACGME, as defined in Section III.B., Subspecialty Certification or 2 full years of approved training in clinical pathology and 2 years, full time, in blood banking/transfusion medicine, chemical pathology, hematology, or medical microbiology, including 1 year as a trainee in a program accredited for such training by the ACGME and 1 additional year in the subspecialty acceptable to the ABP. ABP approval for the additional year should be obtained before the applicant begins the additional year.

IV. The Credentialing Year

Residents beginning pathology training in 2002 or later do not have a credentialing year requirement. All other residents will be expected to satisfy the credentialing year requirement as follows:

The 12-month credentialing year requirement is in addition to the required pathology training and can be satisfied only after the individual has obtained the medical degree (see B1).

If the applicant will be applying for primary certification within 12 months, the Advanced Credit/Credentialing Requirement Evaluation form should not be submitted, as the information requested on this form is also requested on the application for primary certification.

The requirement may be met by:

A. One full year of full-time, approved graduate medical education in a transitional year training program or in a clinical area of medicine such as internal medicine, surgery, obstetrics and gynecology, pediatrics, emergency medicine, or family medicine or

B. One full year of full-time research in pathology or in another clinical discipline, provided the research was done in the United States or Canada and has clearly defined clinical implications.

The standards for acceptance of research activity are:

1. The research activity must have taken place (a) as part of a combined degree program in which the applicant obtains both a recognized medical degree and a doctoral degree in medical sciences without reference to sequence, or (b) after the applicant has obtained a recognized medical degree.

2. The applicant must have had a clearly defined investigator role in the research program.

3. The research must have directly involved patients, or materials obtained from patients, or techniques that can be applied directly to the diagnosis of human disease or to the understanding of the basic mechanisms of disease.

4. Credit for research activity completed prior to entering a pathology training program must be approved by the director of the pathology training program and the ABP.

or

C. One year of training in one of the recognized subspecialty fields of pathology that includes clinical correlation and patient contact. (This year cannot be used to meet the requirements for both the credentialing year and subspecialty certification.)

D. The satisfactory completion of 1 full year of a combination of clinical training, clinical research, or subspecialty pathology training in addition to the required pathology training necessary to qualify for certification in anatomic pathology and clinical pathology, anatomic pathology, or clinical pathology. The pathology training program director is responsible for defining and justifying this year to the ABP. The ABP recommends that for applicants meeting the credentialing year requirement by combinations of pathways A, B, and C, the periods of activity be at least 4 months in duration wherever possible.

E. Under certain circumstances, clinical training taken outside the United States and Canada may be acceptable toward meeting the ABP credentialing year requirement of clinical training, provided the following criteria are fully met and validated:

1. Clinical training was taken after the applicant obtained a medical degree acceptable to the ABP.

2. The applicant satisfactorily completed 1 full year of full-time training in clinical medicine in a multidisciplinary training program (Internship) or in a training program in internal medicine, pediatrics, general surgery, or obstetrics and gynecology.

3. Documentation is received from the training institution that the program in question has been inspected and accredited for graduate medical education.

4. The ABP has received a letter from the director of the clinical training program stating that the applicant was registered in the program, completed the training satisfactorily, and was the physician of record in the diagnosis and treatment of patients throughout the full 12 months.

5. The pathology training program director submits a letter of support for the applicant's request.

The acceptability of clinical training toward meeting the ABP requirements is assessed on an individual basis, and it is imperative that an opinion be obtained from the ABP well in advance of the submission of an application for certification. The amount of advanced credit for clinical training outside of the United States and Canada toward the ABP requirements for certification cannot exceed a total of 12 months.

It is the responsibility of the person seeking credit to ensure that all validating items for these criteria are submitted to the ABP for consideration. No assessment of possible credit will be given until all validating and reference information has been received.

V. Examination

Candidates must pass an objective written and practical examination designed to evaluate the candidate's factual knowledge of pathology and to assess practical problem solving skills, interpretive skills, and diagnostic abilities. Candidates must pass both the written and practical portions of the examination in order to pass the examination as a whole.

Application for Examination

All application forms are available in Microsoft Word on the ABP Web site. The appropriate application(s) is to be downloaded, saved, completed, and printed and a hard copy returned to the ABP with the required credentials and the application-examination fee. Applications completed by hand will not be accepted. An
application will not be given consideration unless it includes the application-examination fee.

**Fees**
The application-examination fee schedule for 2005 is as follows:
- Anatomic pathology only: $1,800
- Clinical pathology only: $1,800
- Anatomic pathology portion of combined AP/CP: $1,800
- Clinical pathology portion of combined AP/CP: $1,800
- Anatomic pathology portion of combined AP/subspecialty: $1,800
- Clinical pathology portion of combined CP/subspecialty: $1,800
- Combined anatomic pathology and clinical pathology: $2,200
- Subspecialty only: $1,800
- Subspecialty portion of combined AP/subspecialty: $1,800
- Subspecialty portion of combined CP/subspecialty: $1,800
- Anatomic pathology or clinical pathology combined with subspecialty: $2,200

(For this fee to apply, the application must be for the combined examination as explained in Section III.C, Combined Primary and Subspecialty Certification. In addition, the examinations must be taken within the same calendar year. Otherwise, the standard fee of $1,800 will be assessed for each examination.)

The application-examination fee includes a nonrefundable administrative fee of $100. If the different divisions of the AP/CP and the combined primary and subspecialty examinations are taken at separate sittings, there is a separate examination fee for each sitting. If the candidate fails in the examination, admission to a repeat examination is permitted, but any reexamination must occur within the period of qualification described under Qualification Period for Examination. The applicant must pay the examination fee according to the current fee schedule before another examination can be taken. See Final Filing and Cutoff Dates.

**Reporting of Results**
Following the examination(s) each candidate will receive a report from the ABP indicating whether or not he/she has been successful and providing information regarding relative performance on the examination.

In December, each program director (primary and subspecialty) will receive a report of the examination performance of each graduate (by name) of that training program over the previous five years. Cumulative information (without names) will also be sent to each program director and will be made available to the RRC for use in accreditation.

**Candidates With Disabilities**
1. Policy. The ABP will provide qualified candidates who have documented disabilities reasonable accommodations in the administration of its examinations, including auxiliary aids and services, where appropriate. Such accommodations must not, however, fundamentally alter the measurement of the skills or knowledge the examination is intended to test or result in an undue burden.

2. Documentation of Disability. Candidates requesting accommodation due to a disability must provide documentation of the disability and the appropriateness of the requested accommodation for the documented disability. Such documentation must include a specific diagnosis of the disability and medical records or other documentation of the diagnosis of the disability by an appropriate medical professional. The ABP reserves the right to verify the disability and to request additional documentation as necessary. All required documentation acceptable to the ABP must be received no later than the application deadline for the examination(s) in question.

3. Type of Accommodation. Candidates requesting accommodation must identify the type of accommodation requested. The ABP, however, will determine the type of accommodation to be made for a candidate with a verified disability. Accommodations that fundamentally alter the measurement of skills or knowledge the examination is intended to test will not be offered.

4. Application Deadline. Candidates requesting accommodations are urged to contact the ABP as far in advance of the examination as possible. Requests for accommodation and documentation of disability must be received no later than the application deadline.

**Chemical Dependency**
An applicant for certification who, within 3 years of his or her application, has been diagnosed as chemically dependent, has been treated for drug or other substance abuse, and/or has entered a rehabilitation or diversionary program for chemical dependency authorized by the applicable medical licensing authority will be required to provide additional information to the ABP. The applicant must show that he/she has successfully completed the authorized rehabilitation or diversionary program, is successfully enrolled in such a program, or is successfully enrolled in or has completed a private treatment program. In the latter case, the responsible program administrators and physician must attest to the satisfaction of the ABP, that the applicant has been free of chemical dependency for a period of time sufficient to establish that the individual is not currently engaged in the use of illegal drugs or other substance abuse and/or that the use of illegal drugs or other substance abuse is not an on-going problem. This documentation must accompany the completed application form.

**Qualification Period for Examination**
The ABP does not recognize or use the term "board eligible" and does not issue statements concerning board eligibility. An applicant is declared qualified for examination only after an application has been received and approved by the Credentials Committee.

Candidates who have been qualified for a primary examination will be permitted to sit for the examination during a period of 3 years after being declared qualified to take the examination.

Candidates who have been qualified for a subspecialty examination given every year will be permitted to sit for the examination during a period of 3 years after being declared qualified to take the examination.

Candidates who have been qualified for a subspecialty examination given every other year will have three opportunities to sit for the subspecialty examination.

At any time after declaring an applicant qualified for examination, the Credentials Committee, at its discretion, may withdraw such qualification or, as a condition, may require satisfaction by the applicant of specified conditions. In the exercise of its discretion under this regulation, the Credentials Committee will be entitled to act without reason assigned.

If it is determined that an applicant has (a) falsified information or has withheld material information in connection with his or her application or in any other representation to the ABP or any committee thereof, including, but not limited to, an applicant's failure to report any revocation or suspension of, or limitation to, his or her license as required in Section II, Medical Licensure, or (b) misrepresented to any third party his or her status as a diplomate of the ABP and/or (c) engaged in irregular behavior, the applicant will not be approved for the certifying examination and will be ineligible for a period of up to 3 years before being permitted to file a new application.
Irregular Behavior

In the interest of protecting the integrity of the ABP and its certification examinations, the following irregular behaviors may be sufficient to bar a person from qualification, terminate participation in an examination, invalidate the results of a candidate’s examination, cause the withholding or revocation of scores or certificates, or merit other appropriate action by the ABP:

1. The giving or receiving of aid in the examination as evidenced either by observation or by statistical analysis of candidates’ answers
2. The unauthorized possession, reproduction, or disclosure of any ABP examination-related materials, including, but not limited to, examination questions or answers, before, during, or after the examination
3. The offering of any benefit to any agent of the ABP in return for any right, privilege, or benefit that is not usually granted by the ABP to other similarly situated candidates or persons
4. Possession of notes, books, or any other examination aid in the vicinity of the examination room
5. Engaging in irregular behavior in connection with the administration of the examination, including but not limited to:
   a. referring to notes, books, or any other examination aid at any time during the examination, including breaks;
   b. transferring or receiving information relating to the contents or answers of the examination to or from another candidate or a third party before, during, or after the examination. This prohibition includes any transfer of information between a candidate and another person at any time during the examination, including breaks, and any reconstruction of examination questions and answers and the transfer of information concerning the same after the examination.

In addition, the ABP may withhold a candidate’s scores and require that the candidate retake one or more portions of the examination if presented with sufficient evidence that the security of the examination has been compromised, notwithstanding the absence of any evidence of the candidate’s personal involvement in such activities.

Unsuccessful Candidates

Once the initial period of primary or subspecialty qualification has terminated, candidates who have been unsuccessful in any of the certification examinations may apply for an additional period of qualification based on satisfactory experience in the field(s) of pathology in question. This will be granted on submission of appropriate and acceptable documentation of 2 years of full-time experience in the area(s) in which the candidate was unsuccessful, or candidates may apply for one additional period of qualification based on satisfactory completion of 1 additional year of training in an ACGME-accredited training program in the area(s) in which the individual was unsuccessful.

Candidates who continue to be unsuccessful in certification examinations may apply for an additional period of qualification, which may be granted only to those who submit evidence of satisfactory completion of 1 additional year of training in an ACGME-accredited training program in the area(s) in which the candidate was unsuccessful.

Candidates Qualified for Combined Certification Who Are Successful in Only One of the Examinations

Candidates who are qualified for combined anatomic pathology and clinical pathology must pass both examinations to receive a combined certificate.

Candidates successful in only one of the primary examinations during the initial period of qualification have the option to request the ABP to award a single certificate in the primary area in which they were successful. This option must be requested within 2 years of expiration of the initial period of qualification. This option is available only within this timeframe.

To exercise this option, candidates must complete the application for single certification, which is available on the ABP Web site. Original applications and any subsequent training will be evaluated with reference to single certificate requirements. All of the requirements for certification in anatomic or clinical pathology must be satisfied as listed in the current Booklet of Information. In addition, the candidate’s practice must be in the area in which certification is requested.

Training used to satisfy the requirements for a single certificate may not be used subsequently to obtain additional certification. Candidates will be expected to satisfy existing requirements for the other primary certificate at the time of application.

Candidates who are qualified for combined primary and subspecialty certification must pass both examinations to receive a combined certificate. Candidates successful in the primary examination (AP or CP) but not in the subspecialty examination may apply for the awarding of a single primary certificate using the procedure previously described. Candidates successful in the subspecialty examination but not in the primary examination are not eligible for the awarding of a subspecialty certificate. Those candidates must not identify themselves as having subspecialty certification.

Applications for single certification are evaluated in May and November. Applications received by March 1 will be evaluated in May. Applications received in October 1 will be evaluated in November.

Examination Dates

All examinations are computer based and are administered at the ABP Examination Center in Tampa, Florida.

Anatomic Pathology and Clinical Pathology Examinations

The Spring 2006 primary examinations will begin on Monday, June 5, 2006, and will continue until all qualified, registered candidates have been examined. Individuals applying for the Spring primary certification examinations must complete their training by July 1 of the year of application.

The Fall 2006 primary examinations will begin on Monday, October 9, 2006, and will continue until all qualified, registered candidates have been examined. Individuals applying for the Fall primary certification examinations must complete their training by November 1 of the year of application.

Subspecialty Examinations

The subspecialty examinations in chemical pathology, medical microbiology, molecular genetic pathology, neuropathology, and pediatric pathology are given every 2 years. Individuals applying for subspecialty examinations must complete their training by October 1 of the year of application.

Blood Banking/Transfusion Medicine—September 1, 2006
Cytopathology—September 13, 2006
Dermatopathology—September 19, 2006
Forensic Pathology—September 22, 2006
Hematology—September 26, 2006

Depending on the number of candidates, it may be necessary to give certain subspecialty examinations on multiple days. In that case, each candidate will be notified of his or her examination date at least 6 weeks prior to the examination date listed.
Final Filing and Cutoff Dates
The final filing dates for receipt of applications or registrations are as follows:
- January 15 for Spring primary examinations
- May 1 for Fall primary examinations for initial applicants
- August 15 for Fall primary examinations for those who have been declared qualified by ABP
- May 1 for other subspecialty examinations

If the candidate cancels an appearance for the examination after these dates or does not appear for the examination, the entire application-examination fee is forfeited with the following exceptions:
1. Personal illness at the time of the examinations, validated by the candidate’s personal physician. In this case, consideration will be given to transferring a major portion of the examination fee to the following examination.
2. Inability to accept the date assignment (primary certification applicants only). Once examination date assignments are mailed, candidates for the primary certification examination have 4 weeks from notification of their assignment to accept. These candidates may request a transfer to a future examination, in which case the entire examination fee will be applied to that examination. There will be a $500 fee assessed for any additional transfer of examination dates. There is no opportunity to change the assignment within a given examination period. If the ABP is not notified within the 4-week period, the assignment will stand.

Issuance of Certificate
All certificates issued by the ABP after January 1, 2006, will be valid for 10 years. Certificates issued prior to that date are not time-limited.

On passing the appropriate examination(s) and satisfying all other requirements, a candidate will be issued a certificate by the ABP in those fields of pathology for which the ABP declared the candidate qualified. Thus, a candidate who is qualified for the combined examination in anatomic pathology and clinical pathology will receive a certificate only after both anatomic pathology and clinical pathology examinations have been passed.

Candidates qualified for examination in anatomic pathology or clinical pathology and a subspecialty area of pathology on the basis of the required training in each area will receive a certificate only after each of the examinations has been passed.

A candidate who has fulfilled all the prerequisites, including the minimum requirement of 36 months of approved training in anatomic pathology only or clinical pathology only, will receive a certificate after passing the examination in anatomic pathology or clinical pathology.

The ABP does not issue duplicate certificates. If a certificate is lost or destroyed, the diplomate must request a replacement in writing, stating the reason for replacement of the original certificate. The replacement certificate will indicate that the certificate is a replacement and the date of the replacement. A fee of $50 must accompany the written request.

Update of the ABP Certificate
The ABP will permit its diplomates to retake the examination in the area of pathology in which they are already certified for the purpose of updating their certificate(s). The application-examination fee and the passing requirements are the same as for initial candidates. Successful candidates will be issued new, currently dated certificates. This process is not the same as the maintenance of certification process, which has requirements in addition to examination. (See Maintenance of Certification.)

Voluntary Recertification
To enable diplomates with non-time-limited certificates to demonstrate maintenance of competence in the practice of pathology, the ABP offers a voluntary process of recertification. For additional information on this process, please download the Voluntary Recertification booklet from the ABP Web site.

Maintenance of Certification
The Maintenance of Certification (MOC) program is directed primarily toward those pathologists with time-limited certificates (certificates received in 2006 or after). The process will be open, however, to all certified pathologists. A pathologist who holds a non-time-limited certificate will not put that certificate in jeopardy by participating in the MOC program.

Maintenance of Certification will be based on four components:
1. Evidence of professional standing.
3. Evidence of cognitive expertise.

Diplomates may begin the CME portion of the MOC process on or after January 1 of the year following certification. If a diplomate is successful in the MOC process, a new certificate will be issued. If a diplomate does not successfully complete all requirements of the MOC process, the diplomate’s certificate will expire 10 years after issuance and he or she will no longer be listed as a diplomate. Additional details regarding MOC requirements will be forthcoming.

Revocation of Certificate
At its discretion, the ABP may revoke or suspend a certificate for due cause, including, but not limited to:
a. The diplomate did not possess the required qualifications and requirements for examination, whether or not such deficiency was known to the ABP or any committee thereof prior to examination.
b. The diplomate did not successfully complete all requirements of the issuance and he or she will no longer be listed as a diplomate. Additional details regarding MOC requirements will be forthcoming.
c. The diplomate made a material misrepresentation to the ABP or any committee thereof, whether intentional or unintentional;
d. The diplomate engaged in irregular behavior in connection with an examination of the ABP (as described under Irregular Behavior), whether or not such practice had an effect on his or her performance on an examination; or
e. The diplomate was convicted by a court of competent jurisdiction of a felony or of a misdemeanor that involves moral turpitude and that in the opinion of the ABP, has a material relationship to the practice of medicine; or
f. The diplomate receives information that an adverse licensure action has been taken against a diplomate. For purposes of this policy, "adverse licensure action" will mean a final action by one of the licensing agencies of the United States or Canada that revokes, suspends, or limits (including the imposition of any requirement of probation, surveillance, supervision, or review) any license or right associated with the practice of medicine issued by one of the licensing agencies of the United States or Canada and that resulted from or is based on misconduct involving patient care and/or ethical practice; or the voluntary surrender of a license or associated right in connection with or in lieu of any disciplinary action by, or consent decree or settlement agreement with, one of the licensing agencies of the United States or Canada.

Graduate Medical Education Directory 2006-2007
A diplomat may appeal a revocation of certificate pursuant to the ABP Appeals Procedure set forth herein.

**Appeals Procedure**

1. An individual who has received an unfavorable ruling from the ABP or a committee of the ABP may appeal such determination by mailing a notice of appeal to the ABP within 60 days of the date such ruling was mailed to the individual. However, failure of a certifying examination may be appealed only in the manner and to the extent provided in Paragraph 11, which follows.

2. On receipt of a notice of appeal, the applicable ABP committee will invite the individual to submit in writing such information as the individual feels appropriate in support of the appeal. The committee may make such further investigation as it deems appropriate and may request the individual to submit additional information. The committee, acting on all the information before it, will reconsider the unfavorable ruling and report its decision to the individual and the president of the ABP. Any notice of unfavorable action will specify the grounds for the action and inform the individual that he or she may request a hearing before an appeals committee of the ABP by doing so in writing within 30 days of the date the notice of unfavorable action was mailed.

3. On receipt of a request for a hearing, the executive vice president will inform the president of the ABP, who will appoint an ad hoc appeals committee consisting of three trustees who are not members of the committee whose determination is being appealed. The chairperson of the ad hoc committee will convene a meeting of the committee within 90 days of the date of its appointment to conduct a hearing at which the individual may appear in person with a legal and/or other representative to present such information deemed appropriate in support of the individual’s position.

4. Not less than 30 days prior to the hearing, the executive vice president will send written notice to the ad hoc committee and to the appellant stating the time and place of the hearing and will provide them copies of written material and a list of witnesses that the concerned committee intends to present at the hearing. The executive vice president will also specify any information and documents the individual is required to produce at the hearing. Not less than 7 days prior to the hearing, the concerned ABP committee will provide the executive vice president and the individual with copies of any written reports, affidavits, or statements of experts the concerned ABP committee intends to present at the hearing.

5. Not less than 7 days prior to the hearing, the individual will provide the executive vice president with such written information concerning his or her position as he or she deems appropriate; a list of witnesses, if any, whom he or she expects to call to testify; and copies of any written reports, affidavits, or statement of experts he or she intends to present at the hearing.

6. The executive vice president will submit the written material referred to in Paragraphs 4 and 5 to the members of the Appeals Committee prior to the hearing.

7. At the hearing, the concerned ABP committee and its legal or other representatives will present such relevant information and evidence as it deems appropriate to support its previously made determination. However, the committee will not have the right to present any information or evidence not previously provided as required in Paragraphs 4 and 5. The committee may call, examine, and cross-examine witnesses.

8. The individual will have the right to be represented at the hearing by legal counsel or any person of his or her choice. He or she may present such relevant information and evidence as he or she deems appropriate in support of his or her position. However, the individual will not have the right to present any information or evidence if not previously provided as required in Paragraphs 4 and 5. The failure of the individual to produce information or documents requested by the concerned ABP committee as required in Paragraph 4 will be grounds for upholding and confirming the determination of the concerned ABP committee.

9. The individual and the concerned ABP committee may submit written statements at the close of the hearing. A written record of the hearing will be made available to the individual at one-half the cost of its preparation.

10. The decision of the Appeals Committee will be by vote of a majority of the committee members based on the information presented at the hearing. The committee may affirm, modify, or overrule the decision of the ABP committee. The Appeals Committee will inform the individual, the concerned committee, and the president of the ABP in writing of its decision and the reasons therefore within a reasonable time of the hearing. The decision of the Appeals Committee will be final and binding.

11. A candidate who fails a certifying examination may request that the examination be rescored to verify the accuracy of the results as reported. Such request must be made in writing to the executive vice president of the ABP within 90 days of the date of mailing of the results of the examination to the candidate and must include a fee of $50 per certifying examination or part thereof. There will be no further appeal from failure of an examination.

**Verification of Certification**

Requests for written verification of a pathologist's certification should be made in writing and must include enough information to identify the pathologist in question. Requests must include a check for $25 made payable to the American Board of Pathology.

The American Board of Pathology routinely provides the American Board of Medical Specialties (ABMS) with a listing of Diplomates. ABMS publishes this information online at www.abms.org for the public and specialists. The ABP also releases this information to cooperating societies of the ABP (ACLS, ADASP, APC, ASIP, ASCP, CAP, and USCAP) and on request to any recognized pathology society.

**Test Development and Advisory Committees**

Since 1971, the ABP has established test committees for the various areas of pathology. The committees consist of ABP trustees, as well as other pathologists and physicians who are recognized experts in the various disciplines. In 2001, the role of these committees was expanded to include not only a test development function but also an advisory function for the Board. The current non-trustee members of the test development and advisory committees are:

- **Anatomic Pathology**
  - James L Connelly, MD
  - Jonathan Epstein, MD
  - Joel Greenson, MD
  - Richard Kempson, MD
  - Stacy E Mills, MD
  - Dean K White, MD
  - James R Stubbs, MD

- **Blood Banking/Transfusion Medicine**
  - Kaaron Benson, MD
  - Susan D Roseff, MD
  - Toby L Simon, MD
  - Ronald G Strauss, MD
  - James R Stubbs, MD
Chemical Pathology
Jay Bock, MD, PhD
Susan A Fuhrman, MD
Michael J Kelner, MD
Frederick L Kiechle, MD, PhD

Clinical Pathology
John P Anhalt, MD
Edward R Ashwood, MD
David Chou, MD
C Darrell Jennings, MD
Ronald Lepoff, MD
Elizabeth M Van Cott, MD
Jeffrey S Warren, MD

Cytopathology
Barbara S Ducatman, MD
Lester J Layfield, MD
Rita Navar, MD
Celeste N Powers, MD
Gregg A Staerkel, MD
Paul E Waked, Jr, MD

Dermatopathology (Includes ABP and ABD appointees)
Marsha L Chaffins, MD
Anita C Gilliam, MD
Earl J Glusac, MD
Sabine S Kohler, MD
Glynis A Scott, MD
Mary S Stone, MD

Forensic Pathology
Gregory G Davis, MD
John J Howard, MD
Donald R Jason, MD
Mary J Jumbelic, MD
Kurt B Noke, MD
Barbara A Sampson, MD

Hematology
Russell K Brynes, MD
Louis M Fink, MD
Jonathan L Miller, MD
LeAnn C Peterson, MD
Nancy S Rosenthal, MD
Steven H Swerdlow, MD

Medical Microbiology/Medical Parasitology
Karen C Carroll, MD
Nancy E Cornish, MD
Thomas E Davis, MD
Ann Marie Nelson, MD
Gary W Procop, MD
John C Steele, MD
James Versalovic, MD

Molecular Genetic Pathology (Includes ABP and ABMG appointees)
Angela Caliendo, MD, PhD
Carleton T Garrett, MD
David R Hillyard, MD
Anthony A Kilian, MD
Debra G B Leonard, MD, PhD
Nicholas T Potter, PhD
Thomas Prior, PhD
Cindy Vnencak-Jones, PhD
Jean Amos Wilson, PhD

Neuropathology
Dawna Armstrong, MD
Andrew W Bollen, MD
Barbara J Crain, MD
Michael N Hart, MD
Roger E McLendon, MD
Joseph E Parisi, MD
Robert L Schelper, MD

Pediatric Pathology
John J Buchino, MD
Milton Finegold, MD
Jeffrey D Goldstein, MD
Cynthia G Kaplan, MD
Theodore Fysher, MD
Beverly B Rogers, MD
Joe C Rutledge, MD
Glenn P Taylor, MD

Joint Policy Committee for Dermatopathology
Clifton B White, Jr, MD, Chairperson (ABD)
Robert McKenna, MD, Vice Chairperson (ABP)
Terry L Barrett, MD (ABD)
John V Collins, MD (ABP)
Evan F Farmer, MD (ABD)
Sharon W Weiss, MD (ABP)

Joint Policy Committee for Molecular Genetic Pathology
Maximilian Muenke, MD, Chairperson (ABMG)
James L Madara, MD, Vice Chairperson (ABP)
Stephen D Allen, MD (ABP)
Robert W McKenna, MD (ABP)
Stuart Schwartz, PhD (ABMG)
Jean Amos Wilson, PhD (ABMG)

Accreditation of Pathology Training Programs
The accreditation of all programs in graduate medical education in the United States is the responsibility of the ACGME. The member organizations are the American Board of Medical Specialties, American Hospital Association, American Medical Association, Association of American Medical Colleges, and Council of Medical Specialty Societies.

The responsibility for evaluating the quality of residency training programs in pathology is delegated to the Residency Review Committee (RRC) for Pathology of the ACGME. Members are appointed by the ACGME on nomination. The committee is also responsible for the preparation of the Program Requirements for Residency Education in Pathology of the Essentials of Accredited Residencies in Graduate Medical Education.

Review Process
Staff support of RRC work is provided by the ACGME. This staff includes the secretary of the RRC and the field representatives. The secretary is responsible for the administrative matters pertaining to the RRC and its activities. The field representatives perform the on-site surveys of the residency programs and prepare the survey reports. Prior to the survey visit by the field representative, an application information form is sent to the sponsoring institution. The program director completes this form in accordance with the instructions provided and presents it to the surveyor at the visit. The surveyor examines the information supplied in the form and
collects additional information through interviews with the program director, departmental staff, hospital and/or school administrators, residents, and others pertinent to the program.

The survey report, together with the information received from the program director, is reviewed by the RRC, and a formal written notification of action is sent to the program director and administrator(s) of the institution(s) involved.

Written requests in regard to residency programs in pathology should be sent to:
Steven P Nestler, PhD, Secretary
Residency Review Committee for Pathology
515 N State St, Ste 2000
Chicago, Illinois 60610
312 755-5000
312 755-7498 Fax

For detailed and specific information in regard to the requirements for residency training programs in pathology, consult the ACGME Web site.
Graduate Pediatrics

The American Board of Pediatrics (ABP) has developed the following definition of pediatrics and the knowledge, skills, and experience requisite to the provision of high-quality care for children. Pediatrics is the specialty of medical science concerned with the physical, emotional, and social health of children from birth to young adulthood. Pediatric care encompasses a broad spectrum of health services ranging from preventive health care to the diagnosis and treatment of acute and chronic diseases.

Pediatrics is a discipline that deals with biological, social, and environmental influences on the developing child and with the impact of disease and dysfunction on development. Children differ from adults anatomically, physiologically, immunologically, psychologically, developmentally, and metabolically.

The pediatrician understands this constantly changing functional status of his or her patients in growth and development and the consequent changing standards of normal for age. A pediatrician is a medical specialist who is primarily concerned with the health, welfare, and development of children and is uniquely qualified for these endeavors by virtue of interest and initial training. Maintenance of these competencies is achieved by experience, training, continuous education, self-assessment, and practice improvement.

A pediatrician is able to define accurately the child's health status as well as to serve as a consultant and to make use of other specialists as consultants. Because the child's welfare is heavily dependent on the home and family, the pediatrician supports efforts to create a nurturing environment. Such support includes education about healthful living and anticipatory guidance for both patients and parents.

A pediatrician participates at the community level in preventing or solving problems in child health care and publicly advocates the causes of children.

2006 General Pediatrics Certifying Examination

Registration Dates and Fees

It is the applicant's responsibility to be aware of and to meet registration deadlines.

**Fees for New Applicants**

- Regular Registration: December 1, 2005-February 28, 2006
- Late Registration: March 1, 2006-May 1, 2006
- Processing and Evaluation: $425
- Examination: $925
- Total New Candidate Fees: $1,350
- Late Registration Fee: $245
- Total Late Registration Fees: $1,595

**Fees for Re-registrants**

- Regular Registration: February 15, 2006-May 1, 2006
- Late Registration: May 2, 2006-May 31, 2006
- Processing and Evaluation: $325
- Examination: $925
- Total Re-registrant Fees: $1,250
- Late Registration Fee: $245
- Total Late Registration Fees: $1,495

2006 Subspecialty Certifying Examination Fees

It is the applicant's responsibility to be aware of and to meet registration deadlines.

**Fees for New Subspecialty Applicants**

- Processing and Evaluation: $480
- Examination: $1,090
- Regular Registration: $1,570
- Late Registration Fee: $245
- Total Late Registration Fees: $1,815

**Fees for Subspecialty Re-registrants**

- Processing and Evaluation: $380
- Examination: $1,090
- Regular Registration: $1,470
- Late Registration Fee: $245
- Total Late Registration Fees: $1,715

Purpose of Certification

The purpose of certification by the ABP is to provide assurance to the public and the medical profession that a certified pediatrician has successfully completed an accredited educational program and an evaluation, including an examination, and possesses the knowledge, skills, and experience requisite to the provision of high-quality care in pediatrics.

Definition of Pediatrics and a Pediatrician

The ABP, in conjunction with the American Academy of Pediatrics, has developed the following definition of pediatrics and a pediatrician:

- Pediatrics is the specialty of medical science concerned with the physical, emotional, and social health of children from birth to young adulthood. Pediatric care encompasses a broad spectrum of health services ranging from preventive health care to the diagnosis and treatment of acute and chronic diseases.
- Pediatrics is a discipline that deals with biological, social, and environmental influences on the developing child and with the impact of disease and dysfunction on development. Children differ from adults anatomically, physiologically, immunologically, psychologically, developmentally, and metabolically.
- The pediatrician understands this constantly changing functional status of his or her patients in growth and development and the consequent changing standards of normal for age. A pediatrician is a medical specialist who is primarily concerned with the health, welfare, and development of children and is uniquely qualified for these endeavors by virtue of interest and initial training. Maintenance of these competencies is achieved by experience, training, continuous education, self-assessment, and practice improvement.
- A pediatrician is able to define accurately the child's health status as well as to serve as a consultant and to make use of other specialists as consultants. Because the child's welfare is heavily dependent on the home and family, the pediatrician supports efforts to create a nurturing environment. Such support includes education about healthful living and anticipatory guidance for both patients and parents.
- A pediatrician participates at the community level in preventing or solving problems in child health care and publicly advocates the causes of children.

General Examination Admission Requirements

An applicant (throughout the document the term "candidate" will be synonymous with "applicant") requesting admission to a certifying examination must meet the following general requirements:

Graduation From Medical School

The applicant must be a graduate of a medical school that has been accredited by the Liaison Committee on Medical Education (LCME) in the United States, by the Royal College of Physicians and Surgeons of Canada (RCPSC) in Canada, or by the American Osteopathic Association (AOA) in the United States. (Note: The training requirements for individuals who graduated from medical school before July 1, 1978, are different from these requirements. Such applicants should contact the ABP for details.) An applicant who is a graduate of a medical school outside the United States or Canada that cannot be accredited by the LCME, RCPSC, or AOA but is listed by the World Health Organization may apply for the examination if he or she has a standard certificate either from the Educational Commission for Foreign Medical Graduates (ECFMG) or the Medical Council of Canada. A copy of the ECFMG certificate must be submitted to the ABP at the time of application.

The graduate of a foreign medical school must submit, at the time of application, a photocopy of the medical school diploma showing the medical degree and the date it was awarded. A certificate showing that the applicant has passed a final examination is not acceptable.

Training Requirements

The applicant must complete 3 years of pediatric training in programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) on the advice of the Residency Review Committee for Pediatrics (RRC). (Note: Hereafter, accreditation will refer to accreditation by the RRC or in programs in Canada accredited by the RCPSC.) The ABP recognizes and defines these three levels of pediatric training (PL-1 through PL-3) as follows:
The first postgraduate year in general comprehensive pediatric training in an accredited program.

The second postgraduate year, following PL-1, in general comprehensive pediatric training in an accredited program, but with increased responsibility for patient care and for the supervision of junior house staff and medical students.

The third postgraduate year, following PL-2, in general comprehensive pediatric training in an accredited program, but with increased responsibility for patient care and supervision of junior house staff and medical students.

The training curriculum must be compatible with the Program Requirements for Residency Education in Pediatrics, which are published annually in the Graduate Medical Education Directory. During this period of training, the applicant is expected to assume progressive responsibility for the care of patients. Supervisory experience must be an integral part of the total 3-year program; the last 24 months of training must include 5 months of direct supervisory responsibility in general pediatrics. All applicants are advised to consult the ABP before undertaking any variations in training.

The ABP requires program directors to verify satisfactory completion of training and to evaluate the acceptability of the applicant as a practitioner of pediatrics.

Applicants requesting admission to a certifying examination must have a valid (current), unrestricted license to practice medicine in one of the states, districts, or territories of the United States or a province of Canada or unrestricted privileges to practice medicine in the United States Armed Forces. If licenses are held in more than one jurisdiction, all licenses held by a physician should meet this requirement.

Individuals practicing exclusively abroad, i.e., who are not practicing in the United States or Canada and who do not hold a US or Canadian license, must provide proof of licensure in the country in which they practice. In addition to submitting proof of licensure in another country, applicants who intend to practice exclusively abroad must submit a letter stating this fact.

The licensure requirement for the general pediatrics certifying examination may be waived if, during the academic year of 2006-2007, the applicant is in pediatric subspecialty training, nonpediatric specialty training, or is serving as a chief resident (PL-4) in a state, province, or district in which the medical licensing board does not require an unrestricted license. In order to obtain a waiver, the program director of that training must submit a written confirmation of the applicant's training to the ABP by the published licensure deadline. Following the completion of training, applicants must fulfill all licensure requirements.

If an applicant has any action pending regarding the right to have an unrestricted license to practice medicine, admission to the examination may be denied.

A physician transferring to pediatric residency training from another accredited residency (e.g., family practice, internal medicine, transitional year) must correspond with the ABP to determine whether partial credit may be awarded for this training. Requests for credit must be submitted either by the candidate or the pediatric residency program director before the candidate enters pediatric residency training.

The ABP has established requirements for a physician who has had at least 3 years of general comprehensive pediatric training in programs not accredited by the RRC or RCPSC (i.e., international training or training in accredited osteopathic programs in the United States) who wishes to apply for a waiver of training. The interested physician, department chair, or program director must write to the ABP before training begins to receive approval for credit for this training.

The individual must provide documentation of the successful completion of at least 3 years of general pediatric residency training that includes the actual beginning and ending dates of the training and that is signed by the residency program director. The individual must also provide a copy of his/her medical school diploma and ECFMG certificate. Suggested training for those who receive a waiver of training under this policy is available on the ABP Web site, www.abp.org. Upon review and confirmation by the ABP of this information, the individual may have 1 year of accredited training waived. A full year at the PL-3 level must be completed and, additionally, a year at the PL-1 or PL-2 level or a training combination at both of those levels. (The training must be completed in general pediatrics; subspecialty training may not be substituted.)

The director of the residency program that the individual enters will decide at what level the individual may begin residency and whether the 1 year of waived training will be accepted by the program. Individuals should investigate the licensure requirements in the state in which they wish to seek permanent licensure to ensure they meet the requirements if they choose to shorten pediatric training completed in the United States.

In order to meet the training requirements to apply for certification by the ABP, an individual must train in an accredited program and the program director must certify that the individual has met the training requirements.

The duration of general pediatrics training is 36 months. Thirty-three months of clinical training are required. One month of absence is allowed each year for leave (e.g., vacation, sick, parental leave). Absences greater than 3 months during the 3 years of residency should be made up by additional periods of training. If the program director believes that the candidate is well qualified and has met all training requirements, the program director may submit a petition to the ABP requesting an exemption to the policy. Residents in combined training may not take more than 1 month of leave per year.

A fundamental concept of the ABP is that a residency training program should provide for properly organized, progressive responsibility for the care of children. The ABP believes that this can be accomplished through continuity of clinical experience under the supervision of attending physicians who are responsible for the care of these children.

No more than a total of 3 months of the required 3 years of residency training may be taken outside of an accredited pediatric residency program. These experiences must be approved by the program director, must have goals and objectives for training, and must provide an evaluation of the resident’s performance.

The substitution of a formal graduate or postgraduate school course that does not carry the essential ingredient of responsibility for patient care is inconsistent with this principle. Accordingly, the ABP will not accept such courses in fulfillment of its training requirements in general pediatrics.
Military Service
Military service, unless as a resident in a military training program that is accredited by the RRC, cannot be substituted for training requirements.

Veterans Administration GI Bill Benefit
As of March 1, 2001, the Veterans Administration (VA) has implemented a new benefit for qualified individuals. Under this benefit, qualified individuals may be reimbursed for the cost of initial certification or maintenance of certification (ie, recertification). See the VA Web site for details of this new benefit (www.gibill.va.gov/Education/LNC%20Brochure.pdf).

(Note: This is a benefit offered through the VA. Please do not contact the ABP for application forms for this benefit; all necessary forms and information must be obtained through the VA Web site [www.gibill.va.gov/Education/LCNets.htm].)

Training in Pediatrics/Neurology
A special agreement exists with the American Board of Psychiatry and Neurology (ABPN) whereby an applicant who completes at least 2 years of accredited training in general comprehensive pediatrics and the neurology training necessary to meet the requirements for certification in neurology with special qualifications in child neurology fulfills the training requirements of both the ABP and the ABPN. An applicant may not take the certifying examination of the ABP until all training in both programs has been successfully completed.

Accelerated Research Pathway
The Accelerated Research Pathway (ARP) is designed to accommodate and encourage candidates who are committed to an academic career as physician scientists with a strong research emphasis in a pediatric subspecialty. Candidates entering the ARP may begin subspecialty training after completion of 2 years of general comprehensive pediatric training. The curriculum for the PL-1 and PL-2 years of general pediatrics training should include a broad exposure to the specialty and must include 22 months of clinical experiences, 20 months of which are specified. The specific requirements can be found on the ABP Web site, www.abp.org. Although it may be advantageous for both general pediatrics and subspecialty training to occur in the same institution, this is not a requirement of the pathway.

Subspecialty training must be at least 4 years in duration and in a discipline for which the ABP offers a Certificate of Special Qualifications (CSQ). The duration of clinical training will be dependent on the pediatric subspecialty. It is understood that a minimum of 1 year of clinical training is required. Trainees will be required to meet the same standards for scholarly achievement as defined for those in the standard 3-year subspecialty fellowship training programs.

Candidates for this pathway should be identified early, preferably prior to the start of the PL-1 year but no later than 9 months into the PL-1 year. This is necessary so that the second year of training can be adapted in such a way that specified curricular requirements in general pediatrics will be met. The program director and candidate will not be required to seek prospective approval by the ABP, but must notify the ABP by means of the tracking roster in May of the PL-1 year.

To meet the eligibility requirements for certification in general pediatrics, the trainee must satisfactorily complete 2 years of core general pediatrics training (22 clinical months) and an additional year (11 months of clinical experience) in the subspecialty fellowship. Verification of clinical competence and training will be required from both the general pediatrics program director and the subspecialty training program director.

Eligibility to take the subspecialty certifying examination will require completion of 6 years of total training (2 years of general pediatrics and 4 years of subspecialty training). The subspecialty program director will be required to verify training dates, as well as clinical and research competence.

Integrated Research Pathway
The Integrated Research Pathway (IRP) was designed to accommodate MD/PhD graduates who would benefit by having the ability to continue ongoing research during their pediatric residency. During the 3 years of general pediatric residency, a maximum of 11 months may be spent in research, with at least 5 months in the PL-3 year and no more than 1 month in the PL-1 year. Individuals must apply for this pathway either before entering an accredited pediatric residency program or during the first 9 months of the PL-1 year. The curricular components of the minimum of 22 months of core clinical pediatric residency must be fulfilled.

A supervisory/review committee must be established by the residency program and the research mentors to ensure that each trainee is meeting the requirements of training and is successfully completing each experience before continuing in the pathway. The general pediatrics program director must provide careful evaluation of clinical training to determine whether the resident is attaining the knowledge and experience necessary to provide independent care of children. A research mentor must oversee the research experiences to ensure that the trainee is accomplishing pathway goals.

To meet the eligibility requirements for certification in general pediatrics, the resident must satisfactorily complete 36 months in the IRP. The pediatric program director must verify that the resident has completed the prescribed training, verify clinical competence, and recommend the individual for the examination. An additional 12 months of pediatric clinical experience must be successfully completed to be eligible to apply for the certifying examination in general pediatrics. This experience must be in an accredited specialty residency or subspecialty fellowship approved by the ABP. The program director of the additional clinical experience will be asked to verify clinical competence and training. The certifying examination may not be taken until the 3-year IRP and the additional 1 year of clinical training have been completed.

Special Alternative Pathway
The ABP recognizes that occasionally an exceptional candidate should be given special consideration to begin pediatric subspecialty or related training after the completion of the PL-2 year of general comprehensive pediatrics. The duration of the pediatric subspecialty training or related training for the Special Alternative Pathway (SAP) must be 3 years. Guidelines are available on the ABP Web site, www.abp.org.

Before the start of the PL-2 year, the department chair or program director must petition that a resident be considered for the SAP, indicating that the candidate has superior overall competence. The subspecialty program director must also provide a letter outlining the clinical and research training proposed, including special requirements to be met during the PL-2 and PL-3 years. In addition, such applications will be required to take a screening examination. The application material and the score on the screening examination will be reviewed by the Credentials Committee.

A SAP trainee may take the certifying examination in general pediatrics in the fifth year of training provided that he or she has successfully completed the required 2 years of general pediatrics.
residency and at least 12 months of clinical rotations in the pediatric subspecialty.

Accreditation of Training Programs
The ABP does not accredit training programs. The ABP approves applicants for admission to its certifying process. Program Requirements for Residency Education in Pediatrics may be found in the Graduate Medical Education Directory or on the ACGME Web site at www.acgme.org. Requests for information regarding accreditation should be addressed to the Director, Residency Review Committee for Pediatrics, 515 N State St, Chicago, IL 60610, 312 785-5000.

Special Situations
The ABP recognizes that situations may arise that are not explained by the preceding information. The physician should contact the ABP for further information.

Combined Programs

Medicine/Pediatrics Program
A special agreement exists with the American Board of Internal Medicine (ABIM) whereby an applicant may fulfill the training requirements of both the ABP and the ABIM by completing 2 years of accredited training in general comprehensive pediatrics and 2 years of accredited training in general comprehensive internal medicine in an integrated program, reviewed by both boards. Guidelines for combined training have been approved by both the ABP and the ABIM and are available by contacting either board or visiting either Web site at www.abp.org or www.abim.org.

The 4 years must be completed in the same combined training program; any deviation must be approved prospectively by both the ABP and the ABIM. Continuity clinics in each specialty must be provided throughout the 4 years. A list of institutions offering combined programs is published in the Graduate Medical Education Directory. An applicant may not take the certifying examination of the ABP until all 4 years of training have been successfully completed.

Pediatrics/Dermatology Program
A special agreement exists with the American Board of Dermatology (ABD) whereby an applicant may fulfill the training requirements of both the ABP and the ABD by completing joint training in 5 years. All 5 years should be completed in the same combined training program; any deviation must be approved prospectively by both the ABP and the ABD. Guidelines for combined training have been approved by both the ABP and the ABD and are available by contacting either board or visiting the ABP Web site at www.abp.org. The training in programs must also be approved prospectively by both the ABP and the ABD. An applicant may not take the certifying examination of the ABP until all training in both programs has been successfully completed.

Pediatrics/Emergency Medicine Program
A special agreement exists with the American Board of Emergency Medicine (ABEM) whereby an applicant may fulfill the training requirements of both the ABP and the ABEM by completing joint training in 5 years. All 5 years should be completed in the same combined training program; any deviation must be approved prospectively by both the ABP and the ABEM. Guidelines for combined training have been approved by both the ABP and the ABEM and are available by contacting either board or visiting the ABP Web site at www.abp.org. The training in programs must also be approved prospectively by both the ABP and the ABEM.

An applicant may not take the certifying examination of the ABP until all training in both programs has been successfully completed.

Pediatrics/Medical Genetics Program
A special agreement exists with the American Board of Medical Genetics (ABMG) whereby an applicant may fulfill the training requirements of both the ABP and the ABMG by completing joint training in 5 years. All 5 years should be completed in the same combined training program; any deviation must be approved prospectively by both the ABP and the ABMG. Guidelines for combined training have been approved by both the ABP and the ABMG and are available by contacting either board or visiting the ABP Web site at www.abp.org. The training in programs must also be approved prospectively by both the ABP and the ABMG. An applicant may take the certifying examination of the ABP in the fifth year of training provided that 30 months of required pediatric residency training have been successfully completed.

Pediatrics/Physical Medicine and Rehabilitation Program
A special agreement exists with the American Board of Physical Medicine and Rehabilitation (ABPMR) whereby a physician interested in pediatric rehabilitation can qualify for admission to the certifying examinations of both the ABP and the ABPMR. The integrated residency training can be completed in 5 years in programs accredited by the Residency Review Committees for Pediatrics and Physical Medicine & Rehabilitation. Guidelines for combined training have been approved by both the ABP and the ABPMR and are available by contacting either board or visiting the ABP Web site at www.abp.org. The proposed training in programs must be submitted to the ABP and the ABPMR for approval before a candidate can be accepted into the joint training program. All training should be completed at one academic institution; any deviation must be approved prospectively by both the ABP and the ABPMR. An applicant may take the certifying examination of the ABP in the fifth year of training provided that 30 months of required pediatric residency training have been successfully completed.

Pediatrics/Psychiatry/Child and Adolescent Psychiatry Program
A special agreement exists with the American Board of Psychiatry and Neurology (ABPN) whereby an applicant may fulfill the training requirements for certification in pediatrics, psychiatry, and child and adolescent psychiatry by completing joint training in 5 years. Training includes 24 months of general comprehensive pediatrics, 18 months of child and adolescent psychiatry, and 18 months of adult psychiatry. Guidelines for combined training have been approved by the ABP and the ABPN and are available by contacting either board or visiting the ABP Web site at www.abp.org. Physicians pursuing training in these programs may take the certifying examination of the ABP in the fall of the fifth year of training, provided that all pediatric training (except continuity clinics) is completed by the date of the examination. Credit for training via this route may be obtained only by training in one of the programs reviewed by both boards. Further information concerning these combined training programs may be obtained by contacting the ABPN.

Tracking and Evaluation for Residents and Fellows
The ABP regards the evaluation of trainee competency as a continuum that begins during training and concludes with the certifying examination following formal training. The ABP believes that the program director(s) and faculty play significant roles in the certification process and are the keys to a responsible system of determining which applicants should be admitted to the certifying examination. The program director is able to provide a meaningful overview of the resident's or fellow's professional competence, especially in skills such as patient care, medical knowledge,
interpersonal and communication skills, professionalism, practice-based learning and improvement, and systems-based practice.

The ABP tracking and evaluation program is part of the certifying process of the ABP. The program director is required to indicate annually whether each resident’s or fellow’s performance is satisfactory, marginal, or unsatisfactory in overall clinical competence and whether the evaluation in professionalism is satisfactory or unsatisfactory. A marginal rating implies that more time and information are needed to determine whether the performance is satisfactory or unsatisfactory.

Residents in combined medicine-pediatrics training will receive a separate evaluation in each specialty; however, if either evaluation is marginal or unsatisfactory, the yearly evaluation will be recorded as marginal or unsatisfactory. In addition to the evaluation, the program directors are asked to provide the number of months credit the resident received in each specialty.

The following table illustrates the consequences of not receiving a satisfactory evaluation in clinical competence during the first 2 years of training. Residents and fellows must receive a satisfactory rating in each of the components of clinical competence during the final year of required training. It is the resident’s or fellow’s responsibility to arrange for any additional training required.

| Professionalism                      |
| Satisfactory                         |
| Full credit                          |
| Unsatisfactory                       |
| Repeat year, or, at the ABP’s discretion, a period of observation will be required.|

*Includes patient care, medical knowledge, interpersonal and communication skills, practice-based learning and improvement, and systems-based practice.

For professionalism, which includes moral/ethical behavior, must be either satisfactory or unsatisfactory. If an unsatisfactory evaluation is given for professionalism, the resident or fellow must repeat the year of training or, at the discretion of the ABP and recommendation by the program director, complete a period of observation. A resident or fellow who receives an unsatisfactory evaluation for professionalism receives no credit for that year of training unless the program director provides evidence as to why a period of observation rather than a repeat year of training should be completed.

The tracking system also identifies residents and fellows who transfer from one program to another or to a new specialty and assures that the new program director recognizes those residents and fellows who need remediation. Summary evaluations may be sent to a new training program if a resident or fellow transfers.

Verification of Training by Pediatric Program Directors

Program directors of general pediatrics residencies will be sent Verification of Clinical Competence forms for residents who are in their last year of training. Program directors of fellowship programs are sent Verification of Competence forms for fellows who have applied for certification. The ABP requires the program director to verify the dates and completion of training and to attest: “I certify that the evaluations on the reverse side of this form are an accurate reflection of this physician’s competence as a pediatrician upon completion of residency training.”

Possession of certificates of satisfactory completion of training will not automatically admit the person to the ABP’s certification process. Most training certificates attest to the achievement of a minimal level of competence or to the fulfillment of an employment contract. Program directors are urged not to issue certificates of successful completion of training when the resident is deemed not to have met those standards. Therefore, the program director’s final evaluations on the Verification form will take precedence over the certificate from the hospital. The ABP must have the program director’s assurance that an applicant meets the standards expected of a certified pediatrician.

Competencies Expected of All Physicians

In completing the Verification form, a program director should keep in mind the definition of a qualified applicant as determined by the ABP. An applicant shall demonstrate the following competencies as they pertain to infants, children, and adolescents:

**Patient Care**
- Gathering essential and accurate information, performing a complete history and physical examination; and ordering appropriate diagnostic studies.
- Making informed diagnostic and treatment decisions; analyzing and synthesizing information; and knowing one’s limits of knowledge and expertise and when to obtain appropriate consultation.
- Developing and carrying out patient care management plans; prescribing and performing procedures; effectively counseling patients and families and, in so doing, allaying fears and providing comfort.

**Medical Knowledge**
- Knowing, critically evaluating, and using current medical information and scientific evidence for patient care.

**Interpersonal and Communication Skills**
- Demonstrating interpersonal and communication skills that result in effective information exchange and teaming collaboration with patients, their families, and professional associates.

**Professionalism**
- Demonstrating a commitment to carry out professional responsibilities, adhering to ethical principles, and being sensitive to diversity.

**Practice-based Learning and Improvement**
- Investigating and evaluating patient care practices, appraising and assimilating scientific evidence, and using that evidence to improve patient management; demonstrating a willingness to learn from errors.

**Systems-based Practice**
- Practicing quality health care that is cost-effective and advocating for patients within the health care system.

An applicant who receives an unsatisfactory evaluation in any one of the competencies will be disqualified for the certifying examination and will be required to complete an additional year of general pediatrics training at the PL-3 level in an accredited training program in the United States or Canada before reapplying to the ABP.

The program director and the applicant must submit a plan for remediation to be reviewed and approved by the ABP. The director of the program where the additional training occurs must complete a separate Verification form.
At the program director’s recommendation, and at the ABP’s discretion, a period of observation may be required in lieu of additional training for an applicant who receives an unsatisfactory evaluation in professionalism only. A plan for remediation must be submitted for review and approval by the ABP.

Program directors are encouraged to have all residents in their programs take the In-training Examination (ITE). Fellows in subspecialty programs are encouraged to take the Subspecialty In-training Examination (SITE). The results of the ITE and the SITE can provide valuable information for residents, fellows, and programs.

To be compliant with the Program Requirements for Residency Education in Pediatrics and the Program Requirements for Subspecialties of Pediatrics established by the ACGME, the program director and the faculty must develop evaluation procedures for assessment of resident and fellow performance.

**Appeals Process**

Applicants who wish to appeal evaluations or final recommendations must proceed through institutional due process mechanisms. The ABP is not in a position to reexamine the facts and circumstances of an individual’s performance.

**Information for All Certifying Examinations**

1. An applicant must satisfactorily complete the standard length of training before the first day of the month in which the examination is administered. An applicant whose contracted training period does not expire before the first day of the month of the examination will not be eligible for that examination, even if all formal training has been completed earlier and the remaining time is used only for leave.

2. Applications and re-registration forms for all certifying examinations are available only via the ABP Web site, www.abp.org. First-time applicants and re-registrants may apply during the specified registration periods only. Application payment can only be made using either a VISA or MasterCard credit card. If an applicant experiences a technical difficulty, he or she must contact the ABP’s same or next business day. **IMPORTANT:** Computer technical difficulties, operator error, or difficulties arising from username or password problems (eg, forgotten password or inability to log on to the ABP application system due to an inconsistency with the spelling of names) must be resolved and the application completed and submitted before the 3:00 PM Eastern Standard or Eastern Daylight Time deadline. Please be aware that it can take up to 24 hours (excluding weekends) to resolve certain technical difficulties. The ABP makes every effort to assist with these issues promptly; however, applicants are responsible for checking their ability to apply well before the deadline.

3. Applicants must refer to the Candidate Progress Report (CPR) to monitor the status of the application. A receipt of payment is available only from the CPR. The CPR will display items missing from the application (if applicable), acceptance letters, site assignment, and the results of the examination. Although reminders of missing material will be sent by e-mail, it is the applicant’s responsibility to frequently review the CPR to ensure the required material is received by the ABP by the published deadlines and to notify the ABP of e-mail and US Postal Service address changes.

4. Applicants for general pediatrics certification who graduated from a medical school outside the US or Canada must ensure that a copy of the medical school diploma, with translation if necessary, and the ECFMG certificate (or acceptable substitute) are received by the ABP by June 30, 2006.

5. The ABP does not sponsor or maintain records about any courses that claim to be review courses in preparation for its certifying examinations, nor does the ABP track continuing medical education credits.

6. The ABP reserves the right to withhold permission for applicants to take its examinations and/or certification in the event of circumstances demonstrating that an applicant is not capable of performing the role of physician and advocate for infants, children, and adolescents. In such instances, the applicant will be notified, and the applicant may appeal the decision to the Credentials Committee of the ABP or the Credentials Committee of the Subboard.

7. The validity of the performance of candidates on the certifying examination of the ABP is secured by every means available.

8. The names of certified pediatricians, but not their scores, will be sent to appropriate organizations, directories, and journals.

9. The certificate awarded for passing a certifying examination of the ABP will reflect the candidate’s medical degree awarded at the time of graduation from medical school (eg, MD, DO, MBBS, MBChB, MBCh). Degrees awarded either before or after graduation from medical school will not be included on the certificate.

10. For candidates who are concerned that their answer sheets provided for written examinations were not scored correctly, hand scoring is available for a fee of $60. However, candidates are not encouraged to request this service since neither mechanical nor computer errors have ever been found. Requests should be made in writing accompanied by a check or money order. Hand scoring is available for 11 months following the date of the examination. Examinations administered at computer testing centers cannot be hand scored.

11. The ABP’s examinations are copyrighted and administered in secure testing centers by proctors who are responsible for maintaining the integrity and security of the certification process. Proctors are required to report to the ABP any irregular or improper behavior by a candidate, such as giving or obtaining information or aid, looking at the test material of others, removing examination materials from the test center, taking notes, bringing electronic devices (eg, beepers, pagers, cell phones) into the examination, failing to comply with time limits or instructions, or talking or other disruptive behavior. Irregular or improper behavior that is observed, made apparent by statistical analysis, or uncovered by other means will be considered a subversion of the certification process and will constitute grounds for invalidation of a candidate’s examination.

12. The ABP reserves the right to make changes in its fees, policies, and procedures at any time and will make every effort to give advance notice when such changes are made.

**2006 General Pediatrics Certifying Examination**

**Registration Dates and Fees**

All applicants must pay the total application fee by using either a VISA or MasterCard credit card. **IMPORTANT:** Computer technical difficulties, operator error, or difficulties arising from username or password problems (forgotten password or inability to log on to the ABP application system due to an inconsistency with the spelling of names, etc.) must be resolved and the application completed and submitted before the 3:00 PM Eastern Standard or Eastern Daylight Time deadline. Please be aware that it can take up to 24 hours (excluding weekends) to resolve certain technical difficulties. The ABP makes every effort to assist with these issues promptly; however, applicants are responsible for checking their ability to apply well before the deadline.
Graduate Medical Education Directory 2006-2007

New Applicants
Withdrawal Deadline August 15, 2006

New Applicant Fees
Processing and Evaluation $425
Examination $255
Total New Candidate Fees $1,350
Late Registration Fee $245
Total Late Registration Fees $1,595

Regular Registration December 1, 2005-February 28, 2006
Late Registration March 1, 2006-May 1, 2006

An application submitted by February 28, 2006, before the 3:00 PM Eastern Standard or Eastern Daylight Time deadline, must be accompanied by the application fee of $1,350. A nonrefundable penalty fee of $245 is required for applications submitted March 1, 2006, through May 1, 2006, before the 3:00 PM Eastern Standard or Eastern Daylight Time deadline; thus, the late registration fee is $1,595. New applications cannot be submitted after May 1, 2006, 3:00 PM Eastern Standard or Eastern Daylight Time.

New applicants must ensure that the ABP receives a copy of a valid (current), unrestricted license to practice medicine or a license waiver request from their program director by October 2, 2006.

Re-registrants
Withdrawal Deadline August 15, 2006
Re-registrant Fees
Processing and Evaluation $325
Examination $255
Total Re-registrant Fees $1,250
Late Registration Fee $245
Total Late Registration Fees $1,495

Re-registration material submitted online by May 1, 2006, before the 3:00 PM Eastern Standard or Eastern Daylight Time deadline, will require the re-registration fee of $1,250. Late re-registration begins May 2 and extends through May 31, 2006, before the 3:00 PM Eastern Standard or Eastern Daylight Time deadline. A nonrefundable penalty fee of $245 is required for all re-registration material submitted May 2 through May 31, 2006, before the 3:00 PM Eastern Standard or Eastern Daylight Time deadline; thus, the late registration fee is $1,495. Re-registration material cannot be submitted after May 31, 2006, 3:00 PM Eastern Standard or Eastern Daylight Time.

Re-registrants must ensure that the ABP receives a copy of his or her valid (current), unrestricted license to practice medicine or a license waiver request from their program director by August 15, 2006. Re-registrants who do not meet the licensure deadline and do not withdraw by the withdrawal deadline of August 15, 2006, will forfeit all fees.

The certifying examination is given once a year in the fall in a number of locations throughout the United States. The 2006 Certifying Examination in General Pediatrics will be administered on October 23 and 24, 2006. The examination lasts 2 days. Each day there are two sessions, each of 3 hours’ duration, with a luncheon break between sessions.

The content of the examination for certification is appropriate for the practice of general comprehensive pediatrics. Emphasis is placed on practical aspects; however, good practice is founded on sound scientific knowledge, and the candidate should be prepared to demonstrate an understanding of basic science.

The examination consists of multiple-choice questions. Examples of the types of questions to be used are available to registered candidates before the administration of the examination. Some questions are included in the examination for experimental purposes only. These questions will not contribute to the score.

Each candidate’s examination score will be reported to his or her general pediatric program director. Periodically, the ABP conducts research utilizing data it has compiled; the candidate’s anonymity is guaranteed in all such cases.

The General Pediatrics Certifying Examination application is available online via the ABP Web site at www.abp.org. Applicants must meet the training requirements of the ABP and must receive satisfactory evaluations in all areas of competence by their program director(s). In addition, the licensure requirement must be met. It is the applicant’s responsibility to be aware of and to meet all deadlines. First-time applicants and re-registrants may apply during registration periods only.

Applications submitted by the deadline will be processed and evaluated, and the ABP will request program directors of general pediatrics training programs to verify successful completion of training. Confirmation of the receipt of the application and payment will be sent by e-mail to the e-mail address provided in the online application. If an applicant does not receive this e-mail within 48 hours of submission of the online application, the ABP should be contacted immediately. A letter acknowledging the receipt of the application and noting any missing items from the application will be posted on the Candidate Progress Report (CPR) located on the ABP Web site, www.abp.org, within 30 days of the receipt of the application. Access to the CPR requires the same user name and password used when the applicant submitted an application.

Candidates are reminded that the user name and password should remain secure and that all candidate activity will be accessed using the CPR. The ABP cannot acknowledge receipt of licenses and other required material. It is the applicant’s responsibility to check the CPR and ensure the required material is received by the ABP by the published deadlines to complete the application. A letter indicating the acceptance of the application and notification of site assignment will be posted for all qualified candidates by August 10, 2006.

Diploma, ECFMG, Licensure, and Withdrawal Deadlines

Applicants who are first-time registrants and who graduated from a medical school outside the US or Canada must submit a copy of the medical school diploma, with translation if necessary, and the ECFMG certificate (or acceptable substitution) by June 30, 2006.

New applicants must ensure that the ABP receives a copy of a valid (current), unrestricted license to practice medicine or a license waiver request from their program director by October 2, 2006.

Re-registrants must ensure that the ABP receives a copy of a valid (current), unrestricted license to practice medicine or a license waiver request from their program director by August 15, 2006.

An applicant may withdraw from the examination and receive a refund of the examination fee ($925) if signed notification of withdrawal is received by the ABP by August 15, 2006.

A new applicant for the examination who does not meet the October 2, 2006, licensure deadline will be disqualified and no refund will be issued. In order for the applicant to receive a refund of the examination fee ($925), signed notification of withdrawal from the examination must be received by the ABP by the deadline of August 15, 2006. A new applicant who takes the certifying examination, but who did not meet the licensure deadline, will have the examination invalidated, all fees forfeited, and the application will be disapproved. A new applicant whose application is disapproved due to failure to meet the licensure requirement must submit a new application via the ABP Web site, www.abp.org, and pay the full application fee to apply for a future examination.

A re-registrant who does not meet the August 15, 2006, licensure deadline will be disqualified and no refund will be issued. In order
for the re-registrant to receive a refund of the examination fee ($825), signed notification of withdrawal from the examination must be received by the ABP by the deadline of August 15, 2006. A re-registrant who takes the certifying examination, but who did not meet the licensure deadline, will have the examination invalidated and all fees forfeited, and the application will be disapproved. A re-registrant who does not meet the licensure requirement may apply for a future examination via the ABP Web site, www.abp.org, during the re-registration application period.

If an application is disapproved for the certifying examination for reasons other than failure to meet the licensure requirement, the examination fee will be refunded. Neither the processing fee and evaluating fee nor the late fee is refundable.

Certification in the Pediatric Subspecialties

The RRC currently reviews and accredits pediatric subspecialty programs in most of the certified subspecialties. A list of accredited programs is published in the Graduate Medical Education Directory or may be found at www.acgme.org.

Subspecialty Certificates

The ABP issues a certificate of special qualifications in the following subspecialties:
- Adolescent medicine
- Pediatric cardiology
- Pediatric critical care medicine
- Developmental-behavioral pediatrics
- Pediatric emergency medicine
- Pediatric endocrinology
- Pediatric gastroenterology
- Pediatric hematology-oncology
- Pediatric infectious diseases
- Neonatal-perinatal medicine
- Pediatric nephrology
- Pediatric pulmonology
- Pediatric rheumatology

A certificate of added qualifications in sports medicine is offered by the American Board of Family Medicine, the ABEEM, the ABIM, and the ABP. Further information may be obtained by contacting the ABP.

A certificate of added qualifications in medical toxicology is offered by the ABEEM, the ABP, and the American Board of Preventive Medicine. Further information may be obtained by contacting the ABP.

A certificate of added qualifications in neurodevelopmental disabilities is offered by the ABP and the American Board of Psychiatry and Neurology. Further information may be obtained by contacting the ABP.

A certificate of added qualifications in pediatric transplant hepatology is offered by the ABP and the ABM. Further information may be obtained by contacting the ABP.

Subspecialty Fast-tracking

A subspecialty fellow who is believed to have demonstrated meaningful accomplishment in research, either before or during residency, may have a part of the training requirement waived. Evidence of such accomplishment might include a PhD degree in a discipline relevant to the subspecialty or career path of the fellow, or sustained research achievement relevant to the subspecialty or career path of the fellow. The subspecialty program director may petition the Subboard to waive the research requirements or, for those beginning subspecialty training July 1, 2004, and thereafter, the requirement for scholarly activity and to reduce the length of subspecialty training by as much as 1 year. This petition must be made either before the beginning of training or during the first year of training.

A candidate for this pathway must have satisfactorily completed 3 core years of general pediatrics or approved combined pediatrics and other specialty training in an accredited program in the US or Canada. This pathway would also be available to candidates who have satisfactorily completed at least 3 years of non-accredited general pediatrics training (eg, abroad) and qualified for a waiver of 1 year of general pediatrics training through the Policy Regarding Individuals with Non-Accredited Training. An individual who enters subspecialty training via the Special Alternative Pathway would not be eligible for subspecialty fast-tracking.

A subspecialty fellow who receives a waiver by the Subboard must complete at least 2 years of training in the subspecialty with at least 1 year of broad-based clinical training. In order for an individual to be eligible for subspecialty certification, all requirements for general pediatrics certification must be fulfilled.

Training Leading to Dual Pediatric Subspecialty Certification

If an individual is certified in one subspecialty, he or she can become eligible to take another subspecialty examination after 2 years of additional training, of which at least 1 year must be broad-based clinical training.

An individual or program director(s) may petition the Credentials Committees of two pediatric subspecialties with a proposal for a 4- to 5-year integrated training program that would meet the eligibility requirements for certification in both subspecialties. This petition must be approved before subspecialty training begins or early in the first year of subspecialty training. Guidelines for dual subspecialty training may be obtained from the ABP or can be found on the ABP Web site at www.abp.org.

Training Leading to Eligibility for Combined Subspecialty Certification

An individual who has completed internal medicine-pediatrics training should contact the American Board of Internal Medicine and the ABP regarding opportunities for combined training opportunities (ie, training in both the adult and pediatric subspecialties). Combined training must be prospectively approved by both boards.

Subspecialty Examination Admission Requirements

The applicant must be currently certified in pediatrics by the ABP. An applicant whose time-limited general pediatrics certificate will expire before the examination must complete all requirements for maintenance of certification at least 5 months before the examination date.

No credit toward subspecialty qualification will be granted for elective time spent in the subspecialty during the years of general pediatric training.

For candidates for certificates of special qualifications, 3 years of training are currently required. The program director(s) is required to verify completion of training and to sign a statement indicating whether the candidate is recommended to take the certifying examination. In addition, the program director(s) must verify clinical competence and meaningful accomplishment in research or scholarly activity by completing the Verification of Competence form. (Note: The training requirements for candidates who began subspecialty training before January 1, 2002, may differ. Such individuals should contact the ABP or visit the Board's Web site at www.abp.org to obtain the eligibility criteria for each subspecialty offered by the ABP.)

An applicant must satisfactorily complete all subspecialty training before the first day of the month in which the examination is administered. An applicant should consult the ABP before undertaking any variations in training.
The applicant must have a valid (current), unrestricted license to practice medicine in one of the states, districts, or territories of the United States or a province of Canada or unrestricted privileges to practice medicine in the United States Armed Forces. If licenses are held in more than one jurisdiction, all licenses held by a physician should meet this requirement.

A copy of the license may be submitted separately from the initial application or re-registration, but it must be submitted by the deadline stated in the application instructions. If an applicant has any action pending regarding the right to have an unrestricted license to practice medicine, admission to the examination may be denied.

Individuals practicing exclusively abroad, ie, who are not practicing in the United States or Canada and who do not hold a US or Canadian license, must provide proof of licensure in the country in which they practice. In addition to submitting proof of licensure in another country, applicants who intend to practice exclusively abroad must submit a letter stating this fact.

2006 Subspecialty Certifying Examinations
Each subspecialty certifying examination in those subspecialties offering certificates of special qualifications is administered every 2 years. Dates of the examinations and other information may be found on the ABP Web site, www.abp.org.

Application material for admission to a subspecialty examination are available online for all applicants. Please check the ABP Web site, www.abp.org, for information. Applications are available only during the registration period for that examination.

If an applicant is not accepted to take a certifying examination, the examination fee will be refunded. Neither the processing and evaluating fee nor the late fee is refundable.

For examinations administered by the ABP at computer testing centers, there is a 15-minute tutorial and a 15-minute survey in addition to the 4½-hour time limit. An examination tutorial and a content outline are available on the ABP Web site, www.abp.org.

After an application has been accepted, the candidate is expected to take the next examination offered. A candidate who withdraws from the examination by the published withdrawal deadline will be issued a refund of the examination fee. A candidate who withdraws after the published withdrawal deadline will forfeit all fees paid. To register for a future examination, payment of a re-registration fee will be required. If a new applicant whose application is disapproved wishes to pursue certification in the future, he or she will be required to complete a new application and submit the full fee again.

Each candidate's examination score will be reported to the subspecialty program director where training was completed.

The names of those certified are sent to the American Board of Medical Specialties (ABMS) for publication in the Directory of Certified Pediatricians and to various pediatric journals.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Pediatrics to ascertain whether the information they have is current.

General Criteria for Certification in the Pediatric Subspecialties
A. Certification by the American Board of Pediatrics (ABP)
An applicant must be currently certified in general pediatrics to be accepted for a pediatric subspecialty certifying examination. Applicants whose time-limited certification will expire before the examination must complete the requirements for maintenance of certification at least 5 months before the examination date.

B. Licensure
An applicant must have a valid (current), unrestricted license to practice medicine in one of the states, districts, or territories of the United States or a province of Canada in which he/she practices or have unrestricted privileges to practice medicine in the US Armed Forces. If licenses are held in more than one jurisdiction, all licenses held by a physician should meet this requirement.

An applicant who is practicing the subspecialty abroad may be exempted from this license requirement upon presentation of proof of licensure equivalency in the country in which he or she practices. Candidates who practice or plan to practice abroad exclusively must submit a letter, in addition to the licensure equivalency, stating this fact. A copy of the license must accompany the application material.

C. Verification of Training
An applicant will be asked to list the program(s) where fellowship training occurred as well as the name(s) of the program director(s). The ABP will send a Verification of Competence Form to the program director(s) for completion. (Note: For new subspecialties, alternatives to the usual training requirements, such as practice experience, will be acceptable as criteria for admission to the examination. Candidates should refer to the specific subspecialty eligibility criteria for details.) The role of the program director in the certification process is to verify completion of training, evaluate clinical competence including professionalism, and provide evidence of the trainee's meaningful accomplishment in research or scholarly activity.

An applicant must have the Verification Form(s) on file at the ABP in order to be admitted to the subspecialty examination. If an applicant's training is not verified or if the applicant receives an unsatisfactory evaluation in any of the competencies (with the exception of professionalism alone), the applicant will be required to complete an additional period of subspecialty fellowship training before reapplying. The director of the program where the additional training occurred must complete a separate Verification of Competence Form. If the unsatisfactory evaluation is in professionalism only, the applicant will be required to complete an additional period of fellowship training or, at the program director's recommendation and at the ABP's discretion, a period of observation may be required in lieu of additional training. A plan for remediation must be submitted for review and approval by the ABP.

Appeals Process: Applicants who wish to appeal evaluations must proceed through institutional due process mechanisms. The ABP is not in a position to reexamine the facts and circumstances of an individual's performance.

Transfer of Fellowship Training: For continuity of training experiences, mentoring, and assurance of meeting training requirements, it is best that a fellow complete all training in the same program. Occasionally, a fellow may need to transfer to another program for compelling reasons. In such circumstances, it is incumbent that the program directors of the current program and the proposed program communicate to ensure that the fellow who transfers will meet all requirements if he/she desires to apply for a certifying examination in the subspecialty. A Fellow Transfer Information (FTI) form should be completed by the current program director and submitted to the ABP with a copy to the proposed new program. Fellow evaluations should be submitted to the proposed program as well. Months of credit for clinical experience and research or scholarly activity completed must be clearly communicated. For those fellows beginning training July 1, 2004, and thereafter, the ABP must be informed of the plan to ensure continued appropriate mentoring for scholarly activity upon transfer, including the role of the Scholarship Oversight Committee.
An applicant must satisfactorily complete all subspecialty training before the first day of the month in which the examination is administered. An applicant whose contracted training period does not expire before the first day of the month of the examination will not be eligible for that examination, even if all formal training has been completed earlier and the remaining time is used only for leave.

No credit will be given for subspecialty training during the core general pediatric residency or a chief residency.

An applicant seeking certification in another pediatric subspecialty or a non-ABP specialty (eg, allergy/immunology) on the basis of practice and/or training may not apply the same period of time toward fulfillment of these requirements.

D. Research/Scholarly Activity

The ABP will continue to require scholarly activity during fellowship training, but the requirement for meaningful accomplishment in research has been modified to accommodate a wider variety of academic scholarly activities. The new scholarly activity training requirements (as outlined in Section F, below) will apply to fellows beginning subspecialty training July 1, 2004, and thereafter. Those fellows who have completed training by June 30, 2004, must meet the requirement for meaningful accomplishment in research, which was in place at the time they entered training (as outlined in Section E, below).

The ABP will allow two options for those fellows who are currently in training or who have interrupted training, i.e., those who began training prior to July 1, 2004, and who will not have completed training by June 30, 2004. These options are:

- Fulfill the requirement for meaningful accomplishment in research, which was in place at the time training began. Approval of the research submission will be made by the ABP.
- Meet the new training requirements for scholarly activity provided there is a Scholarship Oversight Committee in place for a minimum of 24 months to oversee the activity and judge whether it meets the requirements of the ABP.

The program director is responsible for notifying all fellows of the research/scholarly activity requirements necessary for certification upon entry to the subspecialty training program. Furthermore, in the description of the candidate's research performance or scholarly activity on the Verification of Competence form, the program director must provide a description of the experiences on which the acceptable evidence of research or scholarly activity is based.

E. Principles Regarding the Assessment of Meaningful Accomplishment in Research (for those who began training prior to July 1, 2004)

The general requirements for research and scholarly activity in pediatric subspecialties approved by the ACGME for program accreditation must be met as evidence of research experience. Currently these are as follows:

"Subspecialty residents must be instructed in the scientific and ethical bases of clinical research, including study design, methodology, statistical concepts, and data collection and analysis. The institution must provide the support necessary for a subspecialty resident to participate in such scholarly activities. Research experience must begin in the first year and continue for the entire period of training to allow adequate time for the development of research skills, completion of research projects, and presentation of results to the medical community. Each subspecialty resident must actively participate in the design, conduct, evaluation, and preparation for publication of a clinical or laboratory research project in his/her subspecialty area.

Subspecialty residents also should have experience and be given guidance in the critical evaluation of pertinent medical literature, the process of grant application, preparation of scientific articles, and medical writing. In addition, they should be required to conduct research seminars and prepare reports of their research activities. These efforts should be reviewed and evaluated by supervising faculty."

Additional evidence of meaningful accomplishment in research must be submitted, including one or more of the following:

- First author of a hypothesis-driven research paper accepted for publication in a peer-reviewed journal deemed acceptable by the Subboard. A reprint of the paper, or a copy of the letter of acceptance by the journal and a copy of the manuscript, must be submitted. This paper should be a product of the fellowship training.
- A PhD degree in a field of science. A copy of the degree certificate must be provided.
- A thesis as partial fulfillment of the requirements for a postgraduate degree in a field relevant to the subspecialty. The thesis or a research progress report as described in 2(e) must be submitted for review with documentation that the thesis was accepted and/or the degree awarded.
- First author of a hypothesis-driven research paper that has been submitted but not yet accepted for publication in a peer-reviewed journal deemed acceptable by the Subboard. A letter and/or electronic communication from the journal confirming the receipt of the manuscript must be included, as well as a copy of the submitted manuscript.
- A research progress report (signed by both the applicant and mentor) no more than five pages in length that must include (a) a statement of hypothesis, (b) delineation of methodology, (c) results and analysis, and (d) significance of the research. A research progress report may not be used to meet the requirement if an applicant is more than 2 years beyond completion of fellowship training unless there are extenuating circumstances that may have prevented submission of a manuscript.

The Credentials Committee of each subspecialty will review submitted research accomplishment materials and decide whether the requirement has been met.

F. Principles Regarding the Assessment of Scholarly Activity (for those who began training July 1, 2004, and thereafter)

In addition to participating in a core curriculum in scholarly activities, all fellows will be expected to engage in projects in which they develop hypotheses or in projects of substantive scholarly exploration and analysis that require critical thinking. Areas in which scholarly activity may be pursued include, but are not limited to: basic, clinical, or translational biomedicine; health services; quality improvement; bioethics; education; and public policy.

In addition to biomedical research, examples of acceptable activities might include a critical meta-analysis of the literature, a systematic review of clinical practice, a critical analysis of public policy, or a curriculum development project with an assessment component. Involvement in scholarly activities must result in the generation of a specific written "work product." Examples include, but are not limited to:

- A peer-reviewed publication in which a fellow played a substantial role
- An in-depth manuscript describing a completed project
- A thesis or dissertation written in connection with the pursuit of an advanced degree
- An extramural grant application that has either been accepted or favorably reviewed
- A progress report for projects of exceptional complexity, such as a multi-year clinical trial

Review of scholarly activity and the written work product will occur at the local level with each fellow having a Scholarship Oversight Committee responsible for overseeing and assessing the
progress of each fellow and verifying to the ABP that the require-
ment has been met.

Upon application for subspecialty certification, the ABP will require:
• Verification from the training program director that the clinical and scholarly skills requirements have been met
• Submission by the fellow to the ABP of a comprehensive document describing the scholarly activity that includes a description of the fellow's role in each aspect of the activity and how the scholarly activity relates to the trainee's own career development plan
• Submission by the fellow to the ABP of the actual "work product" of the scholarly activity as described above
• Signature of the fellow, program director, and members of the Scholarship Oversight Committee on the submitted documents described above

Details of the scholarly activity requirement have been published by the ABP in a document entitled Training Requirements for Subspecialty Certification (January 2004). This document can be obtained directly from the ABP. Detailed information is also available on the ABP's Web site at www.abp.org.

Program Requirements for Residency Education in the Subspecialties of Pediatrics

Program Requirements for Residency Education in adolescent medicine, pediatric cardiology, pediatric critical care medicine, developmental-behavioral pediatrics, pediatric emergency medicine, pediatric endocrinology, pediatric gastroenterology, pediatric hematology-oncology, pediatric infectious diseases, medical toxicology, neonatal-perinatal medicine, pediatric nephrology, neurodevelopmental disabilities, pediatric pulmonology, pediatric rheumatology, and sports medicine have been approved by the ACGME or by the RCPSC. Copies of the Program Requirements and lists of accredited programs are available from the office of the Residency Review Committee for Pediatrics, 515 N State St, Chicago, IL 60610 or on the ACGME Web site at www.acgme.org, or the Office of Training and Evaluation, the Royal College of Physicians and Surgeons of Canada, 74 Stanley, Ottawa, Ontario, K1M 1P4. This information is published in the Graduate Medical Education Directory or in the RCPSC booklets of general information.

Training Leading to Dual Pediatric Subspecialty Certification

If an individual is certified in one subspecialty, he/she can become eligible to take another subspecialty examination after 2 years of additional training, of which at least 1 year must be broad-based clinical training. If the individual was not required to meet the meaningful accomplishment in research as a requirement for certification for the first subspecialty, he/she must meet the meaningful accomplishment in research or scholarly activity during the second fellowship training period.

An individual or program director(s) may petition the Credentials Committees of two pediatric subspecialties with a proposal for a 4- or 5-year integrated training program that would meet the eligibility requirements for certification in both subspecialties. This petition must be approved before subspecialty training begins or early in the first year of subspecialty training. Guidelines for dual subspecialty training may be obtained from the ABP or can be found on the ABP Web site at www.abp.org.

Training Leading to Eligibility for Combined Subspecialty Certification

An individual who has completed internal medicine/pediatrics training should contact the American Board of Internal Medicine and the American Board of Pediatrics regarding opportunities for combined training opportunities (ie, training in both the adult and pediatric subspecialties). Combined training must be prospectively approved by both boards. All training in internal medicine and pediatric subspecialty training must be completed in order for an applicant to take a pediatric subspecialty certifying examination.

Subspecialty "Fast-tracking"

A subspecialty fellow who is believed to have demonstrated accomplishment in research, either before or during residency, may have a part of the training requirement waived. Evidence of such accomplishment might include a PhD degree in a discipline relevant to the subspecialty or career path of the fellow, or sustained research achievement relevant to the subspecialty or career path of the fellow. The subspecialty program director may petition the Subboard to waive the research requirements or, for those beginning subspecialty training July 1, 2004, and thereafter, the requirement for scholarly activity, and to reduce the time of subspecialty training by as much as 1 year. This petition must be made either before the beginning of training or during the first year of training.

A candidate for this pathway must have satisfactorily completed 3 core years of pediatrics or approved combined pediatrics and other specialty training in an accredited program in the US or Canada. This pathway would also be available to candidates who have satisfactorily completed at least 3 years of nonaccredited general pediatrics training (eg, overseas) and qualified for a waiver of 1 year of general pediatrics training through the Policy Regarding Individuals Without Accredited Training. An individual who enters subspecialty training via the Special Alternative Pathway would not be eligible for subspecialty fast-tracking. A subspecialty fellow who receives a waiver by the Subboard must complete at least 2 years of training in the subspecialty with at least 1 year of broad-based clinical training. In order for an individual to be eligible for subspecialty certification, all requirements for general pediatrics certification must be fulfilled.

Eligibility Criteria for Certification in Adolescent Medicine

Admission Requirements

Physicians who entered training in adolescent medicine on or after July 1, 2000, are required to complete their training in a program accredited for training in adolescent medicine by the ACGME or the RCPSC in Canada.

A subspecialty fellow who entered adolescent medicine training before January 1, 1995, may apply for admission on the basis of completion of 2 years of fellowship training in adolescent medicine. Only those adolescent medicine training programs that were operated in association with general comprehensive pediatrics or internal medicine residency programs accredited by the ACGME or by the RCPSC are acceptable.

Three years of full-time, broad-based fellowship training in adolescent medicine is required for fellows entering training on or after January 1, 1995. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc, must be made up. If the program director believes that combined absences/leave that exceed 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began adolescent medicine training on or after January 1, 1995, the following must be accomplished in order to become certified in the subspecialty:
• A Verification of Competence Form must be completed by the program director(s) verifying satisfactory completion of the required training, evaluating clinical competence including professionalism, and providing evidence of meaningful accomplishment in research/scholarly activity;
• The fellow must meet either the criteria stated in the "Principles 
Regarding the Assessment of Meaningful Accomplishment in Re-
search" or the criteria stated in the "Principles Regarding the 
Assessment of Scholarly Activity" as described in the General 
Criteria for Certification in the Pediatric Subspecialties;
• The fellow must pass the subspecialty certifying examination.
A fellow beginning part-time training after January 1, 1986, may 
complete the required training on a part-time basis not to exceed 6 
years. No continuous absence of more than 1 year will be permitted.

Eligibility Criteria for Certification in Pediatric 
Cardiology

Admission Requirements
Physicians who entered training in pediatric cardiology on or after 
January 1, 1965, are required to complete their training in a pro-
gram accredited for training in pediatric cardiology by the RRC for 
Pediatrics in the United States or the RCPSC in Canada.
A subspecialty fellow who entered pediatric cardiology training 
before January 1, 1988, may apply for admission on the basis of 
completion of 2 years of fellowship training in pediatric cardiology. 
Only those pediatric cardiology training programs that were oper-
ated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable.
Three years of full-time, broad-based subspecialty fellowship 
training in pediatric cardiology is required for fellows entering 
training on or after January 1, 1988. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc, must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.
For a fellow who began pediatric critical care medicine training 
on or after January 1, 1988, the following must be accomplished in 
time to become certified in the subspecialty:
• A Verification of Competence Form must be completed by the 
program director(s) verifying satisfactory completion of the re-
quired training, evaluating clinical competence including profes-
sionalism, and providing evidence of meaningful accomplishment 
in research/scholarly activity;
• The fellow must meet either the criteria stated in the "Principles 
Regarding the Assessment of Meaningful Accomplishment in Re-
search" or the criteria stated in the "Principles Regarding the 
Assessment of Scholarly Activity" as described in the General 
Criteria for Certification in the Pediatric Subspecialties;
• The fellow must pass the subspecialty certifying examination.
A fellow beginning part-time training after January 1, 1988, may 
complete the required training on a part-time basis not to exceed 6 
years. No continuous absence of more than 1 year will be permitted.

Eligibility Criteria for Certification in Pediatric 
Critical Care Medicine

Admission Requirements
Physicians who entered training in pediatric critical care medicine 
on or after January 1, 1982, are required to complete their training in a program accredited for training in pediatric critical care medi-
cine by the RRC for Pediatrics in the United States or the RCPSC in Canada.
A subspecialty fellow who entered pediatric critical care medi-
cine training before January 1, 1988, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric 
critical care medicine. Only those pediatric critical care medicine 
training programs that were operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable.
Three years of full-time, broad-based subspecialty fellowship training in pediatric critical care medicine is required for fellows 
entering training on or after January 1, 1988. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc, must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

Eligibility Criteria for Certification in 
Developmental-Behavioral Pediatrics

Admission Requirements
To qualify for admission to the examination, an applicant must have 
completed one of the following:
A. Training
Physicians who enter training in developmental-behavioral pediat-
RICS on or after January 1, 2005, are required to complete their training in a program accredited for training in developmental-behavioral pediatrics by the RRC for Pediatrics in the United States or the RCPSC in Canada.
A subspecialty fellow who entered developmental-behavioral pediatrics training before January 1, 2002, may apply for admission on the basis of completion of 2 years of fellowship training in developmental-behavioral pediatrics in a program under the supervision of a director who is certified in developmental-behavioral pediatrics or, lacking such certification, possesses appropriate educational qualifications. Only those developmental-behavioral pediatrics training programs that were operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC will be considered.
Three years of full-time, broad-based fellowship training in develop-
mental-behavioral pediatrics is required for fellows entering training on or after January 1, 2002. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc, must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.
For a fellow who began developmental-behavioral pediatrics training on or after January 1, 2002, the following must be accomplished in order to become certified in the subspecialty:

- A Verification of Competence Form must be completed by the program director(s) verifying satisfactory completion of the required training, evaluating clinical competence including professionalism, and providing evidence of meaningful accomplishment in research/scholarly activity;
- The fellow must meet either the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research" or the criteria stated in the "Principles Regarding the Assessment of Scholarly Activity" as described in the General Criteria for Certification in the Pediatric Subspecialties;
- The fellow must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 2002, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

**B. Practice Experience**

Five years of broad-based practice experience in developmental-behavioral pediatrics in the US or Canada is required. A minimum of 50% of full-time, focused professional activity (and a minimum of 20 hours a week) must have been spent in the practice of developmental-behavioral pediatrics to receive credit. It is assumed that night and weekend time would be distributed in the same manner as regular time. These 5 years should be of such type and quality that they substitute for the clinical exposure one might have encountered during subspecialty fellowship training. All developmental-behavioral pediatrics practice experience must be accrued before December 31, 2006.

For an individual utilizing the developmental-behavioral pediatrics practice experience route (B), an Evaluation Form(s) will be required from the developmental-behavioral pediatrics program director (if there is a subspecialty training program) or the pediatric department chair or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing developmental-behavioral pediatrics.

**C. Partial Subspecialty Training and Practice**

A combination of subspecialty fellowship training and practice experience in the US or Canada equal to 5 years as outlined below may be utilized. These 5 years must be accrued before December 31, 2006. No credit for partial training will be given for fellowship training that began on or after January 1, 2002.

A fellow completing less than 12 months of fellowship training in developmental-behavioral pediatrics may receive practice credit on a month-for-month basis. For example, a 9-month subspecialty fellowship would be credited for 9 months of experience, and 3 months of developmental-behavioral pediatrics practice experience would total 6 months or 5 years.

For an individual utilizing the combination training and practice experience route (C), a Verification Form(s) will be required from the director(s) of the applicant's developmental-behavioral pediatrics training program(s), and an Evaluation Form(s) will be required from the developmental-behavioral pediatrics program director (if there is a subspecialty training program) or the pediatric department chair or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing developmental-behavioral pediatrics.

The completed Verification and Evaluation Form(s) should be sent directly to the ABP.

**Eligibility Criteria for Certification in Pediatric Emergency Medicine**

**Admission Requirements**

To qualify for admission to the examination, an applicant must have completed one of the following:

**A. Training**

Physicians who entered training in pediatric emergency medicine on or after July 1, 2001, are required to complete their training in a program accredited for training in pediatric emergency medicine by the RRC for Pediatrics or the RRC for Emergency Medicine in the United States or the RCPSC in Canada.

A subspecialty fellow who entered pediatric emergency medicine training before January 1, 1995, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric emergency medicine. The program and the training must conform to the Program Requirements for Residency Education in Pediatric Emergency Medicine. Only those pediatric emergency medicine training programs that were operated in association with general comprehensive pediatrics or emergency medicine residency programs accredited by the ACGME or by the RCPSC are acceptable.

Three years of full-time, broad-based fellowship training in pediatric emergency medicine is required for fellows entering training on or after January 1, 1996. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc, must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric emergency medicine training on or after January 1, 1996, the following must be accomplished in order to become certified in the subspecialty:

- A Verification of Competence Form must be completed by the program director(s) verifying satisfactory completion of the required training, evaluating clinical competence including professionalism, and providing evidence of meaningful accomplishment in research/scholarly activity;
- The fellow must meet either the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research" or the criteria stated in the "Principles Regarding the Assessment of Scholarly Activity" as described in the General Criteria for Certification in the Pediatric Subspecialties;
- The fellow must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1995, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

**Dual Certification**

A candidate who is currently certified by the ABP in general pediatrics and the ABEM in emergency medicine may apply via this pathway. A candidate who has met the certification requirements of the ABP and the ABEM before January 1, 1999, may apply via this pathway. For a candidate utilizing the dual certification pathway, the certificate number and year of certification for each board must be provided.

**Eligibility Criteria for Certification in Pediatric Endocrinology**

**Admission Requirements**

Physicians who entered training in pediatric endocrinology on or after January 1, 1987, are required to complete their training in a
program accredited for training in pediatric endocrinology by the RRC for Pediatrics in the United States or the RCPSC in Canada.

A subspecialty fellow who entered pediatric endocrinology before January 1, 1988, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric endocrinology. Only those pediatric endocrinology training programs that were operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable.

Three years of full-time, broad-based fellowship training in pediatric endocrinology is required for fellows entering training on or after January 1, 1988. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc., must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric endocrinology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty:

- A Verification of Competence Form must be completed by the program director(s) verifying satisfactory completion of the required training, evaluating clinical competence including professionalism, and providing evidence of meaningful accomplishment in research/scholarly activity;
- The fellow must meet either the criteria stated in the “Principles Regarding the Assessment of Meaningful Accomplishment in Research” or the criteria stated in the “Principles Regarding the Assessment of Scholarly Activity” as described in the General Criteria for Certification in the Pediatric Subspecialties;
- The fellow must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Eligibility Criteria for Certification in Pediatric Gastroenterology

Admission Requirements

Physicians who entered training in pediatric gastroenterology on or after January 1, 1988, are required to complete their training in a program accredited for training in pediatric gastroenterology by the RRC for Pediatrics in the United States or the RCPSC in Canada.

A subspecialty fellow who entered pediatric gastroenterology training before January 1, 1986, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric gastroenterology. Only those pediatric gastroenterology training programs that were operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable.

Three years of full-time, broad-based fellowship training in pediatric gastroenterology is required for fellows entering training on or after January 1, 1988. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc., must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric gastroenterology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty:

- A Verification of Competence Form must be completed by the program director(s) verifying satisfactory completion of the required training, evaluating clinical competence including professionalism, and providing evidence of meaningful accomplishment in research/scholarly activity;
- The fellow must meet either the criteria stated in the “Principles Regarding the Assessment of Meaningful Accomplishment in Research” or the criteria stated in the “Principles Regarding the Assessment of Scholarly Activity” as described in the General Criteria for Certification in the Pediatric Subspecialties;
- The fellow must pass the subspecialty certifying examination.

Eligibility Criteria for Certification in Pediatric Hematology-Oncology

Admission Requirements

Physicians who entered training in pediatric hematology-oncology on or after January 1, 1986, are required to complete their training in a program accredited for training in pediatric hematology-oncology by the RRC for Pediatrics in the United States or the RCPSC in Canada.

A subspecialty fellow who entered pediatric hematology-oncology training before January 1, 1986, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric hematology-oncology. Only those pediatric hematology-oncology training programs that were operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable.

Three years of full-time, broad-based fellowship training in pediatric hematology-oncology is required for fellows entering training on or after January 1, 1988. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc., must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric hematology-oncology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty:

- A Verification of Competence Form must be completed by the program director(s) verifying satisfactory completion of the required training, evaluating clinical competence including professionalism, and providing evidence of meaningful accomplishment in research/scholarly activity;
- The fellow must meet either the criteria stated in the “Principles Regarding the Assessment of Meaningful Accomplishment in Research” or the criteria stated in the “Principles Regarding the Assessment of Scholarly Activity” as described in the General Criteria for Certification in the Pediatric Subspecialties;
- The fellow must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Eligibility Criteria for Certification in Pediatric Infectious Diseases

Admission Requirements

Physicians who entered training in pediatric infectious diseases on or after January 1, 2000, are required to complete their training in a program accredited for training in pediatric infectious diseases by the RRC for Pediatrics in the United States or the RCPSC in Canada.

A subspecialty fellow who entered pediatric infectious diseases training before January 1, 1986, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric infectious diseases. Only those pediatric infectious diseases training
programs that were operated in association with general comprehensive pediatric residency programs accredited by the RRC or the RCPSC are acceptable.

Three years of full-time, broad-based fellowship training in pediatric infectious diseases is required for fellows entering training on or after January 1, 1995. Combined absences/leave in excess of 9 months during the 3 years of training, whether for vacation, parental leave, illness, etc., must be made up. If the program director believes that combined absences/leave that exceeds 8 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric infectious diseases training on or after January 1, 1995, the following must be accomplished in order to become certified in the subspecialty:

- A Verification of Competence Form must be completed by the program director(s) verifying satisfactory completion of the required training, evaluating clinical competence including professionalism, and providing evidence of meaningful accomplishment in research/scholarly activity;
- The fellow must meet either the criteria stated in the “Principles Regarding the Assessment of Meaningful Accomplishment in Research” or the criteria stated in the “Principles Regarding the Assessment of Scholarly Activity” as described in the General Criteria for Certification in the Pediatric Subspecialties;
- The fellow must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1995, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Eligibility Criteria for Certification in Medical Toxicology

Admission Requirements

A. Certification by the American Board of Pediatrics (ABP)
An applicant must be currently certified in general pediatrics to be eligible to apply for a pediatric subspecialty certifying examination. Applicants whose time-limited certification will expire before the examination must complete the requirements for maintenance of certification at least 5 months before the examination date.

B. Licensure
An applicant must have a valid (current), unrestricted license to practice medicine in one of the states, districts, or territories of the United States or a province of Canada in which he/she practices or have unrestricted privileges to practice medicine in the US Armed Forces. If licenses are held in more than one jurisdiction, all licenses held by a physician must meet this requirement.

An applicant who is practicing the subspecialty exclusively abroad may be exempted from this licensure requirement upon presentation of proof of licensure equivalency in the country in which he/she practices. Candidates who practice or plan to practice abroad must submit a letter, in addition to the licensure equivalency, stating this fact. A copy of the license must accompany the application material.

C. Medical Toxicology Subspecialty Training
For a fellow who began medical toxicology training on or after July 1, 2000, 2 years of fellowship training must be completed in a program accredited for training in medical toxicology by the RRC for Emergency Medicine or Preventive Medicine.

An applicant must complete a fellowship in medical toxicology of 24 months' duration. Combined absences/leave in excess of 2 months during the 2 years of training, whether for vacation, parental leave, illness, etc., must be made up. If the program director believes that combined absences/leave that exceeds 2 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

The training program should be sponsored by and be based within a reasonable geographical proximity of an accredited residency program in emergency medicine, pediatrics, preventive medicine, or any combination of these programs. An institution is discouraged from sponsoring more than one accredited medical toxicology program.

D. Verification of Training
An applicant will be asked to list the program(s) where fellowship training occurred as well as the name(s) of the program director(s). The ABP will send a Verification of Competence Form to the program director(s) for completion. The role of the program director in the certification process is to verify completion of training and evaluate clinical competence including professionalism.

An applicant must have the Verification Form(s) on file at the ABP in order to be admitted to the subspecialty examination. If an applicant's training is not verified or if the applicant receives an unsatisfactory evaluation in any of the competencies (with the exception of professionalism alone), the applicant will be required to complete an additional period of subspecialty fellowship training before reapplying. The director of the program where the additional training occurred must complete a separate Verification of Competence Form. If the unsatisfactory evaluation is in professionalism only, the applicant will be required to complete an additional period of fellowship training or, at the program director's recommendation and at the ABP's discretion, a period of observation may be required in lieu of additional training. A plan for remediation must be submitted for review and approval by the ABP.

Appeals Process: Applicants who wish to appeal evaluations must proceed through institutional due process mechanisms. The ABP is not in a position to reexamine the facts and circumstances of an individual's performance.

Transfer of Fellowship Training: For continuity of training experiences, mentoring, and assurance of meeting training requirements, it is best that a fellow complete all training in the same program. Occasionally, a fellow may need to transfer to another program for compelling reasons. In such circumstances, it is incumbent that the program directors of the current program and the proposed program communicate to ensure that the fellow who transfers will meet all requirements if he/she desires to apply for a certifying examination in the subspecialty. A Fellow Transfer Information (FTTI) form should be completed by the current program director and submitted to the ABP with a copy to the proposed new program. Fellow evaluations should be submitted to the proposed program as well. Months of credit for clinical and research experience completed must be clearly communicated.

An applicant must satisfactorily complete all subspecialty training before the first day of the month in which the examination is administered. An applicant whose contracted training period does not expire before the first day of the month of the examination will not be eligible for that examination, even if all formal training has been completed earlier and the remaining time is used only for leave.

No credit will be given for subspecialty training during the core general pediatric residency or a chief residency.

An applicant seeking certification in another pediatric subspecialty or a non-ABP specialty (e.g., allergy/immunology) on the basis of practice and/or training may not apply the same period of time toward fulfillment of these requirements.
Eligibility Criteria for Certification in Neonatal-Perinatal Medicine

Admission Requirements
Physicians who entered training in neonatal-perinatal medicine on or after January 1, 1986, are required to complete their training in a program accredited for training in neonatal-perinatal medicine by the RBC for Pediatrics in the United States or the RCPSC in Canada.

A subspecialty fellow who entered neonatal-perinatal medicine training before January 1, 1988, may apply for admission on the basis of completion of 2 years of fellowship training in neonatal-perinatal medicine. Only those neonatal-perinatal medicine training programs that were operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable.

Three years of full-time, broad-based fellowship training in neonatal-perinatal medicine are required for fellows entering training on or after January 1, 1989. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc, must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began neonatal-perinatal medicine training on or after January 1, 1989, the following must be accomplished in order to become certified in the subspecialty:

- A Verification of Competence Form must be completed by the program director(s) verifying satisfactory completion of the required training, evaluating clinical competence including professionalism, and providing evidence of meaningful accomplishment in research/scholarly activity;
- The fellow must meet either the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research" or the criteria stated in the "Principles Regarding the Assessment of Scholarly Activity" as described in the General Criteria for Certification in the Pediatric Subspecialties;
- The fellow must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1989, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Eligibility Criteria for Certification in Pediatric Nephrology

Admission Requirements
Physicians who entered training in pediatric nephrology on or after January 1, 1986, are required to complete their training in a program accredited for training in pediatric nephrology by the RBC for Pediatrics in the United States or the RCPSC in Canada.

A subspecialty fellow who entered pediatric nephrology training before January 1, 1988, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric nephrology. Only those pediatric nephrology training programs that were operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable.

Three years of full-time, broad-based fellowship training in pediatric nephrology are required for fellows entering training on or after January 1, 1989. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc, must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric nephrology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty:

- A Verification of Competence Form must be completed by the program director(s) verifying satisfactory completion of the required training, evaluating clinical competence including professionalism, and providing evidence of meaningful accomplishment in research/scholarly activity;
- The fellow must meet either the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research" or the criteria stated in the "Principles Regarding the Assessment of Scholarly Activity" as described in the General Criteria for Certification in the Pediatric Subspecialties;
- The fellow must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Eligibility Criteria for Certification in Neurodevelopmental Disabilities

Admission Requirements

A. Certification by the American Board of Pediatrics (ABP)
An applicant must be currently certified in general pediatrics to be eligible to apply for a pediatric subspecialty certifying examination. Applicants whose time-limited certification will expire before the examination must complete the requirements for maintenance of certification at least 5 months before the examination date. Once training in an accredited neurodevelopmental disabilities program is required, the applicant must be currently certified by both the ABP, in general pediatrics, and the ABPN, in neurology with special qualifications in child neurology. After the 2007 examination, all applicants must apply through ABPN.

B. Licensure
An applicant must have a valid (current), unrestricted license to practice medicine in one of the states, districts, or territories of the United States or a province of Canada in which he/she practices or have unrestricted privileges to practice medicine in the US Armed Forces. If licenses are held in more than one jurisdiction, all licenses held by a physician must meet this requirement.

An applicant who is practicing the subspecialty exclusively abroad may be exempted from this license requirement upon presentation of proof of licensure equivalency in the country in which he or she practices. Candidates who practice or plan to practice abroad exclusively must submit a letter, in addition to the licensure equivalency, stating this fact. A copy of the license must accompany the application material.

C. Training or Practice Pathways
To qualify for admission to the examination, an applicant must have completed one of the following:

Training
For a period of 6 years following the date of the initial administration of the examination in neurodevelopmental disabilities (2001), the satisfactory completion of at least 24 months of formal training in neurodevelopmental disabilities acceptable for subspecialization in neurodevelopmental disabilities is required. Combined absences/leave in excess of 2 months during the 2 years of training, whether for vacation, parental leave, illness, etc, must be made up.

If the program director believes that combined absences/leave that exceeds 2 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee. To qualify for admission to the examination after 2007, the applicant must have completed training in neurodevelopmental disabilities in an ACGME-accredited neurodevelopmental disabilities program.
For an applicant using the neurodevelopmental disabilities fellowship training pathway, a Verification of Competence Form(s) will be required from the director(s) of the fellow’s neurodevelopmental disabilities program(s).

Practice Experience
For a period of 6 years following the first date of administration of the examination in neurodevelopmental disabilities, a minimum of 50% of practice time in the US or Canada devoted to neurodevelopmental disabilities is required. The experience in neurodevelopmental disabilities must consist of broad-based and focused professional activity (a minimum of 20 hours a week). These 5 years should be of such type and quality that they substitute for the clinical exposure one might have encountered during subspecialty fellowship training.

For an applicant utilizing the neurodevelopmental disabilities practice experience pathway, an Evaluation Form(s) will be required from the neurodevelopmental disabilities program director (if there is a subspecialty training program) or the pediatric department chair or chief of pediatrics in the hospital(s) where the applicant is now or has been practicing in neurodevelopmental disabilities.

Partial Subspecialty Training and Practice
For a period of 6 years following the first date of administration of the examination in neurodevelopmental disabilities, the satisfactory completion of 12 months of formal training in neurodevelopmental disabilities acceptable for subspecialization in neurodevelopmental disabilities and 50% of practice time devoted to neurodevelopmental disabilities for the previous 2.5 years is required.

For an individual utilizing the combination of subspecialty training and practice experience, a Verification Form(s) will be required from the director(s) of the applicant’s neurodevelopmental disabilities training program(s), and an Evaluation Form(s) will be required from the neurodevelopmental disabilities program director (if there is a subspecialty training program) or the pediatric chair or chief of pediatrics in the hospital(s) where the applicant is now or has been practicing in neurodevelopmental disabilities.

Partial Fellowship Training Pathway
The completed Verification and Evaluation Form(s) should be sent directly to the ABP.

An applicant entering the examination via neurodevelopmental disabilities nonaccredited training, practice experience, or the combination of subspecialty training and practice experience must be approved for the examination by 2007. After 2007, all applicants must complete the accredited training pathway to subspecialization in neurodevelopmental disabilities.

D. Verification of Training
An applicant will be asked to list the program(s) where fellowship training occurred as well as the name(s) of the program director(s). The ABP will send a Verification of Competence Form to the program director(s) for completion. The role of the program director in the certification process is to verify completion of training and evaluate clinical competence including professionalism.

An applicant must have the Verification Form(s) on file at the ABP in order to be admitted to the subspecialty examination. If an applicant’s training is not verified or if the applicant receives an unsatisfactory evaluation in any of the competencies (with the exception of professionalism alone), the applicant will be required to complete an additional period of subspecialty fellowship training before reapplying. The director of the program where the additional training occurred must complete a separate Verification of Competence form. If the unsatisfactory evaluation is in professionalism only, the applicant will be required to complete an additional period of fellowship training or, at the program director’s recommendation and at the ABP’s discretion, a period of observation may be required in lieu of additional training. A plan for remediation must be submitted for review and approval by the ABP.

Appeals Process: Applicants who wish to appeal evaluations must proceed through institutional due process mechanisms. The ABP is not in a position to reexamine the facts and circumstances of an individual’s performance.

Transfer of Fellowship Training: For continuity of training experiences, mentoring, and assurance of meeting training requirements, it is best that a fellow complete all training in the same program. Occasionally, a fellow may need to transfer to another program for compelling reasons. In such circumstances, it is incumbent that the program directors of the current program and the proposed program communicate to ensure that the fellow who transfers will meet all requirements if he/shel desires to apply for a certifying examination in the subspecialty. A Fellow Transfer Information (FTI) form should be completed by the current program director and submitted to the ABP with a copy to the proposed new program. Fellow evaluations should be submitted to the proposed program as well. Months of credit for clinical and research experience completed must be clearly communicated.

An applicant must satisfactorily complete all subspecialty training before the first day of the month in which the examination is administered. An applicant whose contracted training period does not expire before the first day of the month of the examination will not be eligible for that examination, even if all formal training has been completed earlier and the remaining time is used only for leave.

No credit will be given for subspecialty training during the core general pediatric residency or a chief residency.

An applicant seeking certification in another pediatric subspecialty or a non-ABP specialty (eg, allergy/immunology) on the basis of practice and/or training may not apply the same period of time toward fulfillment of these requirements.

Eligibility Criteria for Certification in Pediatric Pulmonology

Admission Requirements
Physicians who entered training in pediatric pulmonology on or after January 1, 1992, are required to complete their training in a program accredited for training in pediatric pulmonology by the RCPSC in Canada. A subspecialty fellowship program trained on before January 1, 1996, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric pulmonology. Only those pediatric pulmonology training programs that were operated in association with general comprehensive pediatric residency programs accredited by the RCPSC or by the RCPSC are acceptable.

Three years of full-time, broad-based fellowship training in pediatric pulmonology is required for fellows entering training on or after January 1, 1986. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc, must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric pulmonology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty:

- A Verification of Competence Form must be completed by the program director(s) verifying satisfactory completion of the required training, evaluating clinical competence including professionalism, and providing evidence of meaningful accomplishment in research/scholarly activity;
The fellow must meet either the criteria stated in the “Principles Regarding the Assessment of Meaningful Accomplishment in Research” or the criteria stated in the “Principles Regarding the Assessment of Scholarly Activity” as described in the General Criteria for Certification in the Pediatric Subspecialties;

The fellow must pass the subspecialty certifying examination. A fellow beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

**Subcertification in Pediatric Pulmonology and Allergy/Immunology**

A candidate who is certified in pediatrics may qualify for subcertification in both pediatric pulmonology and allergy/immunology with a shorter total period of training than that presently required (3 years of pediatric pulmonology plus 2 years of allergy/immunology). This compression of training by 1 year can be accomplished by successfully completing research training relating to the requirements of both the Subboard of Pediatric Pulmonology and the Conjoint Board of Allergy/Immunology.

The total training program would require no less than 4 years (48 months) with at least 1 year spent in clinical pulmonology training and 1 year in clinical training for allergy/immunology. The minimum research requirement is 12 months in an environment and project relevant to both pulmonology and allergy/immunology. The fourth year would be spent in training acceptable to the Subboard of Pediatric Pulmonology and may be in clinical training or relevant additional research training.

Training in pediatric pulmonology may precede or follow training in allergy/immunology.

The candidate must train in pediatric pulmonology and allergy/immunology programs accredited by the RRC; the two programs do not necessarily have to be at the same institution. The research project selected by the trainee must be discussed with and approved by both training program directors.

The trainee must supply written details of any research project for which he/she plans to seek joint approval of both the Subboard of Pediatric Pulmonology and the Conjoint Board of Allergy/Immunology before or early in the course of his/her first year in a subspecialty program. The Subboard and Conjoint Board, in turn, will provide a preliminary written opinion to the trainee concerning the acceptability of the research project. This early approval is no guarantee of acceptance of the final research product.

The trainee is required to satisfy both the General Eligibility Requirements for Certification in Pediatric Subspecialties and the Eligibility Criteria specific to the Subboard and Conjoint Board as listed in the Graduate Medical Education Directory. Final admission to either certification examination is granted by the Credentials Committee after completion of training, fulfillment of the research competence requirements, and review of all application materials submitted by the candidate.

**Eligibility Criteria for Certification in Pediatric Rheumatology**

**Admission Requirements**

Physicians who entered training in pediatric rheumatology on or after January 1, 1992, are required to complete their training in a program accredited for training in pediatric rheumatology by the RRC for Pediatrics in the United States or the RCPS in Canada. A subspecialty fellow who entered pediatric rheumatology training before January 1, 1992, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric rheumatology. Only those pediatric rheumatology training programs that were operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPS are acceptable.

Three years of full-time, broad-based fellowship training in pediatric rheumatology is required for fellows entering training on or after January 1, 1992. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc, must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric rheumatology training on or after January 1, 1992, the following must be accomplished in order to become certified in the subspecialty:

- A Verification of Competence Form must be completed by the program director(s) verifying satisfactory completion of the required training, evaluating clinical competence including professionalism, and providing evidence of meaningful accomplishment in research/scholarly activity.
- The fellow must meet either the criteria stated in the “Principles Regarding the Assessment of Meaningful Accomplishment in Research” or the criteria stated in the “Principles Regarding the Assessment of Scholarly Activity” as described in the General Criteria for Certification in the Pediatric Subspecialties;
- The fellow must pass the subspecialty certifying examination. A fellow beginning part-time training after January 1, 1992, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

**Subcertification in Pediatric Rheumatology and Allergy/Immunology**

A candidate who is certified in pediatrics may qualify for subcertification in both pediatric rheumatology and allergy/immunology with a shorter total period of training than that presently required (3 years of pediatric rheumatology plus 2 years of allergy/immunology). This compression of training by 1 year can be accomplished by successfully completing research training relating to the requirements of both the Subboard of Pediatric Rheumatology and the Conjoint Board of Allergy/Immunoology.

The total training program would require no less than 4 years (48 months) with at least 1 year spent in clinical pediatric rheumatology plus 2 years of allergy/immunology. No continuous absence of more than 1 year will be permitted.

Training in pediatric rheumatology may precede or follow training in allergy/immunology.

The candidate must train in pediatric rheumatology and allergy/immunology programs accredited by the RRC; the two programs do not necessarily have to be at the same institution. The research project selected by the trainee must be discussed with and approved by both training program directors.

The trainee must supply written details of any research project for which he/she plans to seek joint approval of both the Subboard of Pediatric Rheumatology and the Conjoint Board of Allergy/Immunoology before or early in the course of his/her first year in a subspecialty program. The Subboard and Conjoint Board, in turn, will provide a preliminary written opinion to the trainee concerning the acceptability...
of the research project. This early approval is no guarantee of the acceptance of the final research product.

The trainee is required to satisfy both the General Eligibility Requirements for Certification in Pediatric Subspecialties and the Eligibility Criteria specific to the Subboard and Conjoint Board as listed in the Graduate Medical Education Directory. Final admission to either certification examination is granted by the Credentials Committees after completion of training, fulfillment of the research competence requirements, and review of all application materials submitted by the candidate.

Eligibility Criteria for Certification in Sports Medicine

Admission Requirements

A. Certification by the American Board of Pediatrics (ABP)

An applicant must be currently certified in general pediatrics to be eligible to apply for a pediatric subspecialty certification examination. Applicants whose time-limited certification will expire before the examination must complete the requirements for maintenance of certification at least 5 months before the examination date.

B. Licensure

An applicant must have a valid (current), unrestricted license to practice medicine in one of the states, districts, or territories of the United States or a province of Canada in which he/she practices or have unrestricted privileges to practice medicine in the US Armed Forces. If licenses are held in more than one jurisdiction, all licenses held by a physician must meet this requirement.

An applicant who is practicing the subspecialty exclusively abroad may be exempted from this licensure requirement upon presentation of proof of licensure equivalency in the country in which he or she practices. Candidates who practice or plan to practice abroad exclusively must submit a letter, in addition to the licensure equivalency, stating this fact. A copy of the license must accompany the application material.

C. Training

Physicians who entered training in sports medicine on or after January 1, 2001, are required to complete their training in a program accredited by the RRC for either Family Medicine, Emergency Medicine, Internal Medicine, or Pediatrics.

An applicant who began training before January 1, 2001, must have completed a minimum of 1 year in a sports medicine training program that is associated with an accredited residency program in family medicine, emergency medicine, internal medicine, or pediatrics.

Combined absences/leave in excess of 1 month during the 1 year of training, whether for vacation, parental leave, illness, etc., must be made up. If the program director believes that combined absences/leave that exceeds 1 month is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

D. Verification of Training

An applicant will be asked to list the program(s) where fellowship training occurred as well as the name(s) of the program director(s). The ABP will send a Verification of Competence Form to the program director(s) for completion. The role of the program director in the certification process is to verify completion of training and evaluate clinical competence including professionalism.

An applicant must have the Verification Form(s) on file at the ABP in order to be admitted to the subspecialty examination. If an applicant's training is not verified or if the applicant receives an unsatisfactory evaluation in any of the competencies (with the exception of professionalism alone), the applicant will be required to complete an additional period of subspecialty fellowship training before reapplying. The director of the program where the additional training occurred must complete a separate Verification of Competence form. If the unsatisfactory evaluation is in professionalism only, the applicant will be required to complete an additional period of fellowship training or, at the program director's recommendation and at the ABP's discretion, a period of observation may be required in lieu of additional training. A plan for remediation must be submitted for review and approval by the ABP.

Appeals Process: Applicants who wish to appeal evaluations must proceed through institutional due process mechanisms. The ABP is not in a position to reexamine the facts and circumstances of an individual's performance.

Transfer of Fellowship Training: For continuity of training experiences, mentoring, and assurance of meeting training requirements, it is best that a fellow complete all training in the same program. Occasionally, a fellow may need to transfer to another program for compelling reasons. In such circumstances, it is incumbent that the program directors of the current program and the proposed program communicate to ensure that the fellow who transfers will meet all requirements if he/she desires to apply for a certifying examination in the subspecialty. A Fellow Transfer Information (FT11) form should be completed by the current program director and submitted to the ABP with a copy to the proposed new program. Fellow evaluations should be submitted to the proposed program as well. Months of credit for clinical and research experience completed must be clearly communicated.

An applicant must satisfactorily complete all subspecialty training before the first day of the month in which the examination is administered. An applicant whose contracted training period does not expire before the first day of the month of the examination will not be eligible for that examination, even if all formal training has been completed earlier and the remaining time is used only for leave.

No credit will be given for subspecialty training during the core general pediatric residency or a chief residency.

An applicant seeking certification in another pediatric subspecialty or a non-ABP specialty (e.g., allergy/immunology) on the basis of practice and/or training may not apply the same period of time toward fulfillment of these requirements.

Eligibility Criteria for Certification in Pediatric Transplant Hepatology

Admission Requirements

A. Subspecialty Certification by the American Board of Pediatrics (ABP)

An applicant must be currently certified in pediatric gastroenterology to be eligible to apply for the pediatric transplant hepatology certifying examination. Applicants whose time-limited certification will expire before the examination must complete the requirements for maintenance of certification at least 5 months before the examination date.

B. Licensure

An applicant must have a valid (current), unrestricted license to practice medicine in one of the states, districts, or territories of the United States or a province of Canada in which he/she practices or have unrestricted privileges to practice medicine in the US Armed Forces. If licenses are held in more than one jurisdiction, all licenses held by a physician must meet this requirement.

An applicant who is practicing the subspecialty exclusively abroad may be exempted from this licensure requirement upon presentation of proof of licensure equivalency in the country in which he or she practices. Candidates who practice or plan to practice abroad exclusively must submit a letter, in addition to the licensure
equivalency, stating this fact. A copy of the license must accompany the application material.

**C. Training or Practice Experience**

To qualify for admission to the examination, an applicant must have completed one of the following:

**Training**

An applicant must have completed a minimum of 1 year in a transplant hepatology training program that is associated with a pediatric gastroenterology fellowship program accredited by ACGME or by RCPSC. The training should be broad-based and, in general, be consistent with the clinical components outlined in the Guidelines for Training in Pediatric Gastroenterology developed by the North American Society for Pediatric Gastroenterology, Hepatology, and Nutrition (NASPGHAN) [Journal of Pediatric Gastroenterology and Nutrition 29:SI-28, 1999, or the most recent version] as they specifically relate to advanced training for the expert in pediatric hepatology. The training experience must be gained at a UNOS-approved center with a qualified pediatric liver transplantation specialist and a qualified liver transplantation surgeon. The trainee should spend a minimum of 6 months on the clinical inpatient liver service, with weekly continuity clinic for 12 months. The remaining months should consist of other hepatology or transplant-related experience, including involvement in basic or clinical transplant research. The trainee should have direct involvement in pre-, peri-, and postoperative care of at least 10 pediatric liver transplantation patients. The trainee should have direct involvement in outpatient management of at least 20 pediatric liver transplant recipients. Fewer may be adequate or more may be necessary depending on the structure of the program and the involvement of the trainee.

Training completed as part of the fellowship program in pediatric gastroenterology cannot be used to qualify for the certification examination in pediatric transplant hepatology.

A Verification of Competence form must be completed by the program director stating satisfactory completion of the required training as well as verification of clinical competence. The ABP will send this form to the program director for completion.

**Practice Experience**

Three years of practice experience (36 months) in pediatric transplant hepatology accrued during the most recent 5-year period is required. A minimum of 20% of full-time focused professional activity must have been spent in the practice of pediatric transplant hepatology in a pediatric transplant center approved by UNOS.

The clinical activities that qualify an applicant should be consistent with the Guidelines for Training in Pediatric Gastroenterology developed by NASPGHAN with emphasis on preoperative and postoperative care of the transplant patient.

Partial training in pediatric transplant hepatology (ie, less than 12 months) will be credited on a month-by-month basis as practice experience.

An Evaluation Form must be completed to verify that at least 20% of an individual's professional time is devoted to pediatric transplant hepatology. The form must be completed by a physician who is knowledgeable about the applicant's practice, such as the pediatric department chair, the chief of pediatrics, the chief of pediatric gastroenterology, the medical director of a pediatric liver transplantation program, or the liver transplantation surgeon. Completion of the form by a partner or practice associate is not acceptable.

All pediatric transplant hepatology practice experience must be accrued before July 1, 2010.

**2006 Subspecialty Examinations**

**Registration & Fees**

Application payment for both first-time applicants and re-registrants is required using either a VISA or MasterCard credit card.

**IMPORTANT:** Computer technical difficulties, operator error, or difficulties arising from username or password problems (forgotten password or inability to log on to the ABP application system due to an inconsistency with the spelling of names, etc) must be resolved and the application completed and submitted before the 3:00 PM Eastern Standard or Eastern Daylight Time deadline. Please be aware that it can take up to 24 hours (excluding weekends) to resolve certain technical difficulties. The ABP makes every effort to assist with these issues promptly; however, applicants are responsible for checking their ability to apply well before the deadline.

The Sports Medicine examination will be administered by the American Board of Family Medicine in various cities throughout the United States on the following dates:

- July 20-22, 2006 / 27-29, 2006 / August 3-5, 2006

Pediatric subspecialty examinations administered in August 2006 will be held at computer testing centers throughout the United States and Canada:

- August 16, 2006—Cardiology
- August 17, 2006—Pulmonology
- August 18, 2006—Critical Care Medicine

**New Applicants**

- Regular Registration: September 15-November 15, 2005
- Late Registration: November 16-December 15, 2005

**Re-Registrants**

- Regular Registration: December 15, 2005-February 15, 2006
- Late Registration: February 16-March 15, 2006

Pediatric subspecialty examinations administered in November 2006 will be held at computer testing centers throughout the United States and Canada:

- November 10, 2006—Rheumatology
- November 14, 2006—Medical Toxicology
- November 15, 2006—Developmental-behavioral Pediatrics
- November 16, 2006—Emergency Medicine
- November 17, 2006—Hematology-Oncology
- November 17, 2006—Pediatric Transplant Hepatology—administered by ABIM

**New Applicants**

- Regular Registration: February 1-March 31, 2006
- Late Registration: April 1-May 3, 2006

**Re-Registrants**

- Regular Registration: March 16-May 16, 2006
- Late Registration: May 17-June 16, 2006

**New Applicant Subspecialty Fees**

Maintenance of Certification (Formerly Recertification)

In November 1985, the ABP established a policy of time-limited certification. This policy became effective for those individuals certified in general pediatrics and in the pediatric subspecialties after May 1, 1988. Initial certificates expire after 7 years except medical toxicology, neurodevelopmental disabilities, sports medicine, and pediatric transplant hepatology, which are valid for 10 years.

Diplomates certified before May 1, 1988, were not affected by the policy of time-limited certification; however, those choosing to achieve certification renewal on a voluntary basis may do so. Their permanent certification is not affected by this change. Pediatric Critical Care Medicine has been time-limited since 1987. Pediatric Pulmonology has been time-limited since 1986.

Maintenance of Certificates in General Pediatrics

Beginning in 2008, diplomates who wish to renew an ABP certificate in general pediatrics must successfully complete the Program for Maintenance of Certification in General Pediatrics® (PMCP-G®). (Note: The Program for Maintenance of Certification in Pediatrics, PMCP, PMCP-G and PMCP-S are trademarks of the American Board of Pediatrics®.) PMCP-G requirements are contingent upon the ending date listed on a certificate, ie, expiration date of the certificate.

If a certificate has an ending date prior to 2010, only the licensure and examination activities are required to renew the certificate for another 7 years. If a certificate has an ending date of 2010 and beyond, all PMCP-G requirements must be completed prior to the ending date of the certificate in order to renew the certificate for another 7 years. For a complete listing of PMCP-G requirements, please refer to the ABP Web site, www.abp.org.

Maintenance of Certificates in Pediatric Subspecialties

Beginning in 2003, recertification in the subspecialties will occur through the Program for Maintenance of Certification in Pediatric Subspecialties (PMCP-S®). The details vary from PMCP-G, but the basic components are similar.

Diplomates are not required to maintain their general pediatric certificates in order to maintain certification in a subspecialty; however, diplomates desiring to maintain both certificates may be eligible for reduced fees. Please see the ABP Web site, www.abp.org, for more information on PMCP-S.

Policies

Board Status

The ABP follows the long-standing recommendations of the American Board of Medical Specialties to its member boards not to use the term “board eligible” because of continuing confusion about the term. The allegation by an applicant that he or she has completed the required training and, therefore, is board eligible, without review and approval by the ABP, is not acceptable.

If an inquiry is made to the ABP regarding the status of an individual, the response will be only whether the individual has or has not been certified. Upon receipt of a signed release form, provided by the ABP, information will be released regarding whether an individual’s application to take a general or subspecialty certifying examination was accepted and when.

Time Limit to Certification

Candidates who have met the training requirements and whose applications to take the certifying examinations have been accepted by the ABP have unlimited time to become certified, subject to their continued compliance with ABP policies and requirements, which are subject to change.

Expiration of Board Certificates

All ABP time-limited certificates expire on December 31 of the year of expiration.

Test Accommodations

An applicant who wishes to request test accommodations to take a certifying examination due to a disability is urged to notify the ABP in writing of the need for accommodations as early as possible during the application period even if they have received accommodations on a prior examination. Guidelines and application forms are available on the ABP Web site, www.abp.org, or upon request. The deadline for receipt of the questionnaire and supporting documentation is the examination registration deadline.

ABP Licensure Policy

Certification and maintenance of certification is contingent upon medical licensure. Physicians must hold a valid, unrestricted medical license in at least one jurisdiction in the United States, its territories, or Canada, or unrestricted privileges to practice medicine in the United States Armed Forces. If more than one license is held, all licenses should meet this requirement. Should a medical license become encumbered (ie, restricted, revoked, or suspended) at any time during the certification period, the Board shall undertake proceedings consistent with due process to revoke the certificate(s). Physicians are responsible for notifying the ABP of any restriction placed on any medical license held, and such notification must occur within 60 days of a final action taken by an authorized agency. Upon successful reinstatement or remedy of the encumbered medical license, and upon the ABP being notified of such by the former diplomate, and subsequent verification of such by the ABP, certification may be regained by successful completion of the maintenance of certification process.

A physician’s license shall be deemed "restricted" for purposes of this policy if, as a result of final action by a State or other legally constituted Medical Board (hereafter “State Medical Board”), the physician:

- Shall have had his/her license revoked or surrendered his/her license in lieu of revocation;
- Shall have had his/her license suspended for a specific period of time and the suspension is still in effect;
- May have been placed on probation and the probationary period had not expired;
- May have been made subject to special conditions or requirements which are still in effect (including, but not limited to, supervision, chaperoning during the examination of patients, additional training beyond that required of all physicians for the maintenance of licensure), and regardless of whether or not such conditions or requirements are imposed by order of the State Medical Board or are the result of a voluntary agreement between the physician and the State Medical Board.

Individuals practicing exclusively abroad, ie, who are not practicing in the US or Canada, and who do not hold a US or Canadian license, must provide proof of licensure in the country in which they practice.

Applicants for initial general pediatrics certification may receive a waiver of the license requirement if, during the academic year of the examination, the applicant is completing acceptable training or, a chief residency in a state, province, or district in which the medical licensing board does not require an unrestricted license. Following the completion of training, applicants must fulfill all licensure requirements.

Applicants for initial subspecialty certification who intend to practice abroad exclusively must submit a letter stating this fact. In addition, they must submit proof of licensure in the country in which they intend to practice.
The American Board of Pediatrics expects residents and fellows in training, candidates for initial certification, and its diplomates to uphold fundamental moral and ethical principles. As specified by the ACGME and the ABMS, residents, fellows, candidates, and diplomates must demonstrate a commitment to carrying out professional responsibilities, adherence to ethical principles, and sensitivity to diverse patient populations.

The materials developed by the ABP for its in-training, certification, and maintenance of certification examinations and other certification activities are copyrighted as the sole property of the ABP and may not be reproduced in any way. Reproduction of copyrighted material, in whole or in part, is a federal offense. Irrespective of copyright, any attempt to distribute ABP in-training, certification, or maintenance of certification materials, in whole or part, undermines the fairness of the certification process and will be considered unethical, unprofessional, and dishonorable, and will constitute grounds for the ABP to disqualify the resident, fellow, candidate, or diplomat from future examinations and/or other certification activities, invalidate current activities, revoke certificates, or take any other action deemed appropriate by the ABP and its legal counsel.

Residents, fellows, candidates, and diplomates must understand that unethical and unprofessional behavior including but not limited to the listing below may be sufficient cause for the ABP to deny admission to an examination for a period of up to 5 years, to terminate participation in an examination, to invalidate the result of an examination, to withhold scores or certificates, to require an individual to retake an entire activity or portions thereof, to revoke a certificate(s), or to take other appropriate action as deemed appropriate by the ABP and its legal counsel:

- Falsification of an ABP application;
- Submission of any falsified documents to the ABP;
- Use of any falsified ABP documents or the submission of such documents to other persons;
- Giving or receiving of aid in an examination as evidenced either by observation at the time of the examination or by statistical analysis;
- Unauthorized possession, reproduction, recording, discussion, reconstruction of content from memory, or disclosure of any materials, including, but not limited to, examination questions or answers before, during, or after an examination or other certification activities;
- Offering of any financial or other benefit to any director, officer, employee, proctor, or other agent or representative of the ABP in return for any right, privilege, or benefit which is not usually granted by the ABP to other similarly situated candidates or persons.

Candidates and diplomates must also understand that the ABP may withhold scores and may or may not require a candidate or diplomat to retake one or more portions of an examination if the ABP is presented with sufficient evidence that the security of one or more portions of the examination has been compromised, notwithstanding the absence of any evidence of personal involvement in such activities. Candidates must agree that the ABP will not be liable for candidate travel and/or other losses or expenses incurred as a result of an examination cancellation or postponement for such cases.

Revocation of Certificates

All certificates issued by the ABP are subject to the provisions of the articles of incorporation and the bylaws of the ABP. Each certificate is subject to possible revocation in the event that:

1. the issuance of such certificate or its receipt by the physician so certified shall have been contrary to or in violation of any of the provisions of the ABP's articles of incorporation or bylaws;
2. the physician so certified shall not have been eligible to receive such certificate, irrespective of whether the facts constituting him or her so ineligible were known to any or all of the members of the ABP at the time of the issuance of such certificate;
3. the physician so certified shall have made any misstatement of fact in his or her application for such certificate or in any other statement or representation to the ABP, its members, representatives, or agents;
4. the physician so certified is not in compliance with the ABP licensure policy.

If the ABP obtains probable cause to believe that a certificate should be revoked for any of the reasons set forth above, it may institute proceedings for revocation by mailing written notice to the holder of such certificate. The steps to be taken to appeal this determination are outlined in the Rules of Appellate Procedure of the ABP, which may be obtained by writing to the ABP.

Becoming Certified Again Following Revocation or Surrender of Certification

Once a certificate issued by the ABP has been revoked or surrendered, that certificate ceases to exist. Former diplomates desiring to become certified again must complete all then-current requirements for maintenance of certification in order to receive a new time-limited certificate.
Residency Training Requirements

Applicants for the certification examinations must have satisfactorily completed 48 months (4 years) of training in a PM&R residency accredited by the Accreditation Council for Graduate Medical Education (ACGME) or the Royal College of Physicians and Surgeons of Canada (RCPSC). The 48 months of training must be completed after the completion of medical school.

Twelve of the 48 months must consist of a coordinated program of experience in fundamental clinical skills such as an accredited transitional year, or include 6 months or more in accredited training in family practice, internal medicine, obstetrics and gynecology, pediatrics, or surgery, or any combination of these patient care experiences. The remaining months of this year may include any combination of accredited specialties or subspecialties.

Accredited training in any of the specialties or subspecialties must be for a period of at least 4 weeks. No more than 8 weeks may be in non-direct patient care experiences. Training in fundamental clinical skills must be completed within the first 2 years of the 4-year training program.

The program director and the Credentials Committee of the Board, at the beginning of the residency, will make the decision regarding the acceptability for credit of the 12 months of training in fundamental clinical skills approved by the ACGME, the RCPSC, or the AOA.

The program must include 36 months in PM&R in a training program accredited by the ACGME or the RCPSC. This format is mandatory for all residents who entered training in 1985 or subsequently. A resident is expected to complete training in a single accredited program except when significant extenuating circumstances make a change advisable. In the event of a transfer, the resident is expected to complete all of the PM&R program requirements as outlined by the RRC. All required training and experience as stated above must be taken in the United States, Puerto Rico, or Canada.

The training program must include a significant amount of time spent in primary responsibility for the direct patient care management of hospitalized patients on the PM&R service. Residents must devote at least one third of their residency experience to the care of these hospitalized PM&R patients. They must spend at least one third of the training in the care of outpatients, including a significant experience in the care of musculoskeletal problems.

During PM&R training, the resident must develop comprehensive basic and clinical knowledge, skills, experience, and measurable competencies in areas such as:

- History and physical examination pertinent to PM&R;
• assessment of neurological, musculoskeletal, and cardiovascular-pulmonary systems;
• determining impairment and disability; data gathering and interpreting of psychosocial and vocational factors;
• achievement of basic qualifications in the performance and interpretation of electrodiagnostic evaluations;
• physiatric therapeutic and diagnostic injection techniques;
• prescriptions for orthotics, prosthetics, wheelchair and ambulatory devices, special beds, and other assistive devices;
• prescriptions with specific details appropriate to the patient for therapeutic modalities and therapeutic exercises;
• understanding of coordinated psychologic and vocational interventions and tests;
• familiarity with the safety, maintenance, and actual use of medical equipment common to the various therapy areas and laboratories;
• formal experience in evaluation and application of cardiac and pulmonary rehabilitation as related to physiatric responsibilities;
• inpatient and outpatient pediatric rehabilitation;
• collaboration with other medical professionals and members of the allied health team, including management techniques consistent with the resident's team leadership role, and the treatment program management role of the physiatrist;
• geriatric rehabilitation;
• sports medicine rehabilitation; and
• injury, illness, and disability prevention.

Also, the resident must achieve the ability to accept progressive responsibility in diagnosing, assessing, and managing the conditions commonly encountered by the physiatrist in the rehabilitative management of conditions, such as:
• acute musculoskeletal pain syndromes;
• chronic pain management;
• congenital or acquired myopathies, peripheral neuropathies, and motor neuron and motor system diseases;
• neurorehabilitative care of traumatic brain injury, cerebrovascular accident, and other brain disorders;
• hereditary, developmental, and acquired central nervous system disorders;
• rehabilitative care of spinal cord trauma and diseases;
• rehabilitative care of patients with amputations for both congenital and acquired conditions in patients of all ages;
• sexual dysfunction common to the patient with physical impairment;
• post-fracture care and rehabilitation of post-operative joint arthroplasty;
• pulmonary, cardiac, oncologic, and other common medical conditions seen in persons with physical disabilities;
• geriatric diseases, impairments, and functional limitations;
• rheumatologic disorders treated by the physiatrist;
• medical conditions or complications commonly seen and managed in the physiatric patient;
• medical conditioning, reconditioning, and fitness; and
• soft tissue disorders.

The Program Requirements for Residency Education in PM&R provide additional details of PM&R residencies and cite specific programming by the individual residency and its institutional base.

Credit for Other Specialty Training
Physicians who have satisfactorily completed 1 or more years of training (up to and including certification) in a program accredited by the ACGME, the RCPSC, or the AOA in related relevant specialties may receive up to a maximum of 12 months of non-PM&R training credit upon recommendation of the program director and at the discretion of the Board.

These relevant specialties include internal medicine, neurology, obstetrics and gynecology, orthopedics, pediatrics, family practice, and surgery. Completion of 36 months of training in an ACGME-accredited PM&R residency is still mandatory.

The Board will consider approval for non-PM&R training credit only upon recommendation of the residency training program director. Alternatively, upon the recommendation of the program director, the Board may accept a non-coordinated ACGME-approved "transitional" year or an ACGME-accredited year of training. This alternative training may be in family practice, internal medicine, obstetrics and gynecology, pediatrics, neurology, orthopedics, or surgery.

No credit will be given toward shortening the basic required 4-year program for non-ACGME-accredited residencies, fellowships, or internships, for Fifth Pathway in a United States AMA-designated training institution, or for hospital house physician experience. No credit will be allowed for fellowships prior to or during residency training.

All of the required training and experience as stated above must have been taken in the United States, Puerto Rico, or Canada. If a candidate wishes to complete an elective rotation at an international site or at any other location not accredited by the ACGME, the RCPSC, or the AOA, this must be accomplished during the 6 weeks of leave time allowed for each resident.

Absence From Training
A resident should not be absent from the residency training for more than 6 weeks (30 working days) yearly. Regardless of institutional policies regarding absences, any leave time beyond 6 weeks would need to be made up by arrangement with the program director.

"Leave time" is defined as sick leave, vacation, maternity or paternity leave, leave for locum tenens, or work in another program that is not ACGME-accredited. A candidate may not accumulate leave time or vacation to reduce the overall duration of training.

Clinical Investigator Pathway
The ABPMR provides an opportunity for interested residents to participate in a Clinical Investigator Pathway (CIP) during their training. The ABPMR's criteria for certification as a Clinical Investigator require that a resident complete a 5-year residency program that integrates training in PM&R and clinical research.

The purpose of the CIP is to increase both quality and capacity of physiatric research nationally by enabling a select group of clinically and research-minded residents to become well trained in physiatric practice and research. The CIP is intended for PM&R residents in PM&R programs that have a strong emphasis on physiatric research.

Planning
Trainees interested in a research career should work with their residency program director and research mentor to design an appropriate training plan that will provide an adequate clinical experience and meet the Board's requirements. Ideally, planning for their pathway should occur during PGY-1, and the Board must be notified of and approve a trainee's intention to pursue such training by the end of PGY-2.

Training
The first year of the 5-year program is devoted to fundamental clinical skills as required for a PM&R training program. The following 4 years of residency training combine clinical and investigative training. Training should preferably occur at one institution.
PM&R Training
All trainees in the CIP must satisfactorily complete 2 years of accredited PM&R training.

Research Training
Two years of research training at 80% commitment is required. The Board defines research as scholarly activities intended to develop scientific knowledge.

The research experience of trainees should be mentored and reviewed; training should include completion of work leading to a graduate degree (if not already acquired). The last year of research training may be undertaken in a full-time faculty position if the level of commitment to mentored research is maintained at 80%.

Clinical Experience during Research Years
During PM&R research training, 20% of each year must be spent in clinical experiences. Ratings of satisfactory clinical performance must be maintained annually for each trainee in the CIP.

Certification Examination in PM&R
Trainees in the PM&R clinical investigator pathway may apply for the Part I (computer-based) certification examination in PM&R after successful completion of 4 years of training, which must include 24 months of accredited training in PM&R and 12 months of research training. Trainees may apply for the Part II (oral) examination after successful completion of 5 years of residency training.

The ABP certificate examinations and the Board certificate are the same for all Board candidates whether they pursue the clinical investigator pathway or standard PM&R training. A table illustrating the requirements for the ABP clinical investigator pathway follows.

PM&R Clinical Investigator Pathway Requirements

Dual Specialty Certification
Residents may elect to pursue integrated training in PM&R and another specialty by enrolling in a combined training program. The ABP currently approves three types of combined training: Pediatrics and PM&R, Internal Medicine and PM&R, or Neurology and PM&R. All three programs require completion of at least 36 months of accredited training in general comprehensive PM&R.

The proposed program agreed to by the respective residency training program directors should be submitted by the program directors to both Boards for approval. Admissibility to Part I of the PM&R certification examination may be sought during the last year of training.

A full year of clinical practice, fellowship, research, or a combination of these activities, consisting of at least 6 months of clinical practice in PM&R, is required for admissibility to the Part II certification examination in PM&R. Guidelines for program directors interested in developing such a program are available through the ABP office.

Combined Training in Pediatrics and PM&R
A special agreement exists between the American Board of Pediatrics (ABP) and the ABP where a physician interested in dual specialty certification in pediatrics and PM&R can qualify for admission to the certification examinations of both Boards. The individual resident must be registered in an approved combined Peds/PM&R residency training program no later than the end of the R-2 year of the combined program.

The programs are designed to be completed in a minimum of 60 months. Vacation is shared pro rata between the training time spent in pediatrics and that spent in PM&R. The non-PM&R 12-month segment of the 4-year PM&R residency will be credited based on satisfactory completion of the regular first year of pediatrics residency.

The ABP requires a minimum of 36 months of general comprehensive pediatric training with 6 months' credit for pediatric rehabilitation within the PM&R training. The ABP requires a minimum of 36 months of an accredited PM&R residency with 6 months' credit for related rotations during the pediatric training. These rotations could include developmental pediatrics, neonatology, pediatric neurology, pediatric neurosurgery, or pediatric orthopedics.

Six months' full-time equivalent (FTE) of pediatric rehabilitation is required. Twenty-four months of the 36 months PM&R training must be in adult PM&R.

It is recommended that all training be completed at one academic institution; any deviation will require prospective approval by both Boards. When two separate institutions are involved, there should be evidence of adequate coordination to provide an appropriate educational experience.

Combined Training in Internal Medicine and PM&R
A special agreement exists between the American Board of Internal Medicine (ABIM) and the ABP whereby a prospective resident interested in dual specialty certification in internal medicine and PM&R can qualify to apply for admission to the certification examination of each Board. Admissibility is determined by satisfactory completion of a preplanned, combined, and integrated program that could be designed to be completed in a minimum of 60 months.

The individual resident must be registered in an approved combined internal medicine/PM&R residency training program no later than the end of the R-2 year of the combined program.

The non-PM&R 12-month segment of the 48 months of PM&R residency concerned with basic fundamental clinical skills will be credited on the basis of satisfactory completion of the regular first year of internal medicine residency.

In addition, the ABP requires a minimum of 36 months of accredited PM&R residency with 6 months' credit for internal medicine rotations. These rotations may be in such areas as rheumatology, endocrinology, cardiovascular, or pulmonary subspecialties of internal medicine.

During the 30 months in PM&R, the resident must satisfactorily complete 24 months of hospital and outpatient clinical management of patients receiving PM&R services. Physical medicine and rehabilitation training includes basic and advanced knowledge of musculoskeletal and neuromuscular anatomy and physiology as related to kinesiology, exercise, and functional activities as well as to immobilization and inactivity. Applications and prescription of therapeutic exercise, orthotics, prosthetics, assistive, and supportive devices for ambulation and mobility are essential.

The following segments of training in PM&R are also required: experience with inpatient or outpatient pediatric rehabilitation, adequate training to achieve basic qualifications in electromyography and electrodiagnosis, and opportunities to achieve understanding of special aspects of rehabilitation of patients in geriatric age groups.

The 3-year internal medicine residency requirements are met in part by the ABIM recognizing 6 months' credit for PM&R residency training involving PM&R management of patients with problems related to internal medicine. Such problems include those occurring in patients with rheumatologic, cardiovascular, pulmonary, stroke, and oncologic conditions.
It is recommended that all training be completed at one academic institution. If two separate institutions are involved, there should be evidence of adequate coordination to provide an appropriate educational experience. Any deviation requires prospective approval by both Boards. After the program is approved, the resident's registration form is submitted. Vacation is shared pro rata between the two training programs.

Combined Training in Neurology and PM&R

The American Board of Psychiatry and Neurology (ABPN) and the ABPMR have an agreement that residents interested in dual certification in neurology and PM&R can qualify to apply for admission to the certification examinations of each Board. This is accomplished by satisfactory completion of an integrated program planned and approved by both Boards before the end of the R-2 year, designed to be completed in a minimum of 72 months.

For purposes of this dual certification, both specialty Boards require a 12-month basic clinical skills segment in internal medicine. The ABPMR requires a minimum of 36 months of accredited PM&R residency, and the ABPN requires 36 months of accredited neurology residency.

In order to decrease the total training time to 72 months (a reduction of 1 year), 12 months of training in areas that satisfy the special requirements in neurology and in PM&R must consist of 6 months of training in PM&R acceptable to the program director in neurology and 6 months of training in neurology acceptable to the program director in PM&R.

It is recommended that all training be completed at one academic institution. If two institutions are involved, adequate coordination should provide an appropriate educational experience that meets the requirements and approval of each Board. Before the end of the R-2 year of training in either specialty, both program directors sign and submit a training plan for a given resident to the ABPMR for approval. After the program is approved, the resident's registration form is submitted. Vacation is shared pro rata between the two training programs.

**Application Requirements and Fees**

**Part I**

- The application forms for Part I (computer-based examination) are completed and submitted online from the ABPMR Web site (www.abpmr.org). The completed application must include a copy of the medical degree diploma or certificate, the program director's statement that the applicant has or is expected to have satisfactorily completed an approved graduate program, and the names of three or more physiatrists or other physicians to whom the Board can write for professional and character references.

- In order to have the application considered for examination, the applicant must be scheduled to complete the graduate medical education requirements on or before August 31 immediately following the scheduled examination date for which he or she has applied. Satisfactory completion of the educational and training requirements in force at the beginning of the resident's training in an accredited program will be considered acceptable for application for admissibility to the certification examinations.

- A form included in the application materials is a professional reference form, to be completed and submitted to the Board office by the applicant's residency program director. The applicant should supply this form to the program director, who then should promptly send it to the ABPMR office.

Final admissibility is contingent upon receipt of the final-year evaluation by the program director, due July 1 in the examination year. If a resident is placed on probationary status during the final year of the residency program, this status must be rescinded by the program director before July 1 for the resident to be admissible.

No decision regarding an applicant's admissibility to the examinations will be made until the physician references are received. All references will remain confidential and will not be disclosed to the applicant without the permission of the physician providing the reference. Strict confidentiality of references submitted is required to ensure that the Board will receive complete and accurate evaluations of all applicants.

**Part II**

Part II of the ABPMR certification examination is an oral examination. To be admissible to Part II, applicants are required to complete at least 48 weeks of full-time PM&R clinical practice, PM&R-related clinical fellowship, or a combination of these activities after satisfactory completion of an accredited PM&R residency training program.

The applicant must complete a form provided by the ABPMR that describes the professional time spent during his or her 48 weeks of full-time PM&R clinical practice, PM&R-related fellowship, or a combination of these.

The applicant must also submit verification forms from two physicians (from the applicant's local or regional area), preferably Board-certified physiatrists, verifying the applicant's clinical practice, fellowship, research, or combination of these according to acceptable professional, ethical, and humanistic standards. Only references from persons unrelated to the applicant will be accepted.

The applicant is required to submit copies of all current, valid, unrestricted licenses to practice medicine or osteopathy in a United States licensing jurisdiction. A copy of the applicant's permanent mailing address in the United States is required.

Applications must be submitted by March 1 before applying for Part II. Applicants must be scheduled to complete the clinical practice requirements on or before August 31 immediately following the scheduled examination date for which he or she has applied.

**Deadlines**

**Part I**

The appropriate fees must be postmarked and mailed and the completed application materials for admissibility must be submitted online by March 1 preceding the scheduled examination. This applies to initial applications or reapplications.

An additional $500 nonrefundable late fee will be required for consideration of applications postmarked between March 2 and March 31. Any application submitted March 31 or later will not be accepted. The postmark applied by the United States Postal Service (or the appropriate national postal service for non-US citizens) is the date of mailing and takes precedence over postmarks applied by in-house mailing equipment.

**Part II**

The appropriate fees postmarked and mailed and completed application materials for admissibility must be submitted online by November 15 preceding the scheduled examination. This applies to initial applications or reapplications.

An additional $500 nonrefundable late fee will be required for consideration of applications postmarked between November 16 and December 15. Any application submitted December 16 or later will not be accepted. The postmark applied by the United States Postal Service (or the appropriate national postal service for non-US citizens) is the date of mailing and takes precedence over postmarks applied by in-house mailing equipment.
Fees
Refer to the Booklet of Information at the ABPMR Web site for the current fees.

Part I
An applicant who plans to take Part I must submit a fee of $1,250 with completed application materials, $600 of which is an application processing fee and is not refundable.

Part II
An applicant who plans to take Part II must submit a fee of $1,700 along with the required documentation for Part II application, $600 of which is an application processing fee and is not refundable.

Late Fee
An additional nonrefundable $500 is required after the March 1 deadline for Part I and after the November 15 deadline for Part II.

Reapplication
Physicians who have initially applied for and failed or did not take the either Part I or Part II can apply for admissibility for re-examination or examination during any subsequent examination period. The same requirements will be in effect for reapplication as for initial admissibility. Currently, there is no limit to the number of times a physician may reapply for examinations.

Refunds and Forfeiture of Fees
Except as hereafter provided, no fees paid will be refunded. The Board will return the refundable portion of the fee only in the event that:
- an applicant withdraws the application prior to the meeting of the Board to act thereon, or
- an applicant is declared not admissible to the examination.

Once an applicant has been declared admissible and is a candidate, the fees will be forfeited if the candidate withdraws for any reason, or does not appear for the scheduled examination for which he or she applied.

The ABPMR does not assume responsibility for notifying an applicant of the impending loss of admissibility due to an incomplete application or incomplete qualifications.

The Board is a nonprofit organization, and the candidates' fees are used solely for defraying the actual expenses of the Board. The directors of the Board serve without remuneration. The Board reserves the right to change the fees when necessary.

Board Admissibility
"Board admissible" is a term used by the ABPMR to define the status of an applicant who has been accepted by the ABPMR as a candidate to take the examination for which he or she has applied.

Designation of "Board admissible" does not continue beyond the date such an examination is given, regardless of results. The Board does not accept any use of the term "Board eligible" in lieu of documented admissibility.

The Examination
As part of the requirements for certification by the ABPMR, candidates must demonstrate satisfactory performance in an examination conducted by the Board covering the field of PM&R. The examination for certification is given in two parts, computer-based (Part I) and oral (Part II).

Part I and Part II of the Board examination are given once each year at such times and places as the Board designates. While Part I of the examination is administered simultaneously at Pearson Professional Centers nationwide, Part II is administered only in Rochester, Minnesota.

Additional information provided in several brochures, Preparing for Your Computer-Based Exam and Computer-Based Testing Fact Sheet, and Preparing for the ABPMR Oral Examination, are provided to applicants.

Exam Irregularity and Nondisclosure Policy and Acknowledgement/Cooperation Agreement
All ABPMR certification exams, including the content and wording of exam questions, constitute confidential ABPMR information protected by copyright law. Any unauthorized receipt, possession, or transmission of ABPMR written, computer-based, or oral examination questions, content, or materials, either before the examination, on-site, or in the future, is strictly forbidden. Use of ABPMR examination materials for the purpose of examination preparation or training is also strictly forbidden.

Violation of the ABPMR Exam Irregularity and Nondisclosure Policy, or the giving or receiving of aid in any ABPMR examination as evidenced either by observation at the time of the examination or by statistical analysis, or engaging in other conduct that subverts or attempts to subvert the examination or the ABPMR certification process, is sufficient cause for the ABPMR to:
- bar an individual from the examination,
- terminate participation in the examination,
- withhold and/or invalidate the results of the examination,
- withhold a certificate,
- revoke a certificate, or
- take other appropriate action.

Residents, candidates, and diplomates in physical medicine and rehabilitation will be required to sign a Nondisclosure Agreement acknowledging and agreeing that all ABPMR examinations are confidential and are protected by copyright law. The Nondisclosure Agreement expressly prohibits disclosing, publishing, reproducing, or transmitting any ABPMR examination content, in whole or in part, in any form by any means, verbal or written, electronic or mechanical, for any purpose.

Part I
The computer-based examination is divided into morning and afternoon periods, each allowing 3 ½ hours. An on-screen tutorial is available at the beginning of the first session, allowing examinees to become familiar with both the computer and the format of the examination.

The examination questions are designed to test the candidate's knowledge of basic sciences and clinical management as related to PM&R and will be in the form of objective testing. The Part I examination is based on the content areas in the Part I examination outline, available on the ABPMR Web site or online in the Certification Booklet of Information.

Part II
As currently structured, the oral examinations consist of three examiners examining the candidate, with each examiner conducting a 40-minute segment of the total 120-minute examination. Two 5-minute breaks divide the three portions of the oral examination. Candidates will be expected to present in a concise, orderly fashion evidence of their proficiency in the management of various clinical conditions that come within the field of PM&R. During the oral examination, the examiner will ask questions about diagnostic procedures, therapeutic procedures, and patient management.

The Certificate
Upon approval of the application and the candidate's successful completion of the examinations, the ABPMR will grant a certificate to the effect that the candidate has met the requirements of the ABPMR. The recipient of a certificate will be known as a diplomate.
The Board began issuing 10-year, time-limited diplomate certificates in 1993. The expiration date for these certificates is December 31 of the given year. Maintenance of Certification procedures and requirements are described briefly in a following section and in depth in a separate Booklet of Information available upon request from the Board office or may be downloaded from the ABPMR Web site, www.abpmr.org. Certificates issued prior to 1993 have no time-limited stipulations; however, holders of these pre-1993 certificates may voluntarily participate in the Maintenance of Certification program.

Residents entering a training program are hereby informed and must be aware that time-limited certification for PM&R began in 1993 for all diplomates certified thereafter.

A certificate granted by this Board does not of itself confer or purport to confer any degree or legal qualifications, privileges, or license to practice PM&R. The Board does not limit or interfere with the professional activity of any duly licensed physician who is not certified by this Board. Privileges granted physicians in the practice of PM&R in any hospital or clinic are the prerogatives of that hospital or clinic, not of this Board. Certification is a voluntary process by which the ABPMR grants recognition to a physician specialist who has met predetermined qualifications specified by ABPMR. Many qualities are necessary to be a competent physician, and many of these qualities cannot be quantified or measured. Thus, certification is not a guarantee of the competence of the physician specialist.

**Communication**

**Published Listing of Certified Diplomates**

**Reporting Changes in Information**

Once certified, diplomates are asked to notify the ABPMR office of any changes in address, place of employment, telephone or fax number, or e-mail address or personal name. Such information may be submitted in writing by fax, e-mail, mail, or through the physician's home page on the ABPMR Web site. For name changes, a copy of the official documentation is required. Diplomates are responsible to notify the Board office regarding any changes in licensure status.

**Board Policies**

**Accommodations for Persons With Disabilities**

The ABPMR supports the Americans with Disabilities Act (ADA) and makes reasonable accommodations in examination procedures for individuals with documented disabilities. Applicants with disabilities may request modifications in the administration of the examination. The ABPMR will grant such requests unless the modifications would place undue burden on the ABPMR or would fundamentally alter the measurement of the knowledge and skills that the examination is intended to assess.

Applicants considering the need for modifications are urged to obtain a copy of Procedures for Requesting Accommodations under the ADA. This publication, available from the ABPMR, outlines the documentation required of applicants with disabilities who request examination modifications.

All required documentation must be submitted to the ABPMR office by the date specified in the application materials. Applicants anticipating the need for accommodations should contact the ABPMR well in advance of the date specified in the application materials in order to allow sufficient time to submit any required documentation.

**Exam Irregularity Policy, Nondisclosure Policy and Cooperation Agreement**

**ABPMR Exam Irregularity Policy**

All American Board of Physical Medicine and Rehabilitation (ABPMR) certification exams, including the content and wording of exam questions, constitute confidential ABPMR information protected by copyright law. Any unauthorized receipt, possession, or transmission of ABPMR written, computer-based, or oral examination questions, content, or materials, either before the examination, on-site, or after an exam administration, is strictly forbidden. Use of ABPMR examination materials for the purpose of examination preparation or training is also strictly forbidden.

Violation of the ABPMR Exam Irregularity Policy and/or Nondisclosure Policy and Cooperation Agreement, or the giving or receiving of aid in any ABPMR examination, or engaging in other conduct that subverts or attempts to subvert the examination or the ABPMR certification process, is sufficient cause for the ABPMR to:

- Bar an individual from the examination and/or future examinations,
- Terminate participation in the examination,
- Withhold and/or invalidate the results of the examination,
- Withhold a certificate,
- Revoke a certificate, or
- Take other appropriate action.

The ABPMR reserves the right to take whatever measures are necessary to protect the integrity of its examinations.

**ABPMR Nondisclosure Policy**

All ABPMR examinations are confidential and are protected by copyright law. The examinations are made available to the examinee solely for the purpose of becoming certified or maintaining certification in the specialty or subspecialties of physical medicine and rehabilitation. Examinees are expressly prohibited from disclosing, publishing, reproducing, or transmitting any ABPMR examination, in whole or in part, in any form or by any means, verbal or written, electronic or mechanical, for any purpose.

**Acknowledgement/Cooperation Agreement**

All examination candidates will be asked to sign an acknowledgement/cooperation agreement agreeing to cooperate with any ABPMR investigation of potential examination irregularities.

**Unethical or Irregular Behavior**

Applicants for an examination must certify that the information provided in their applications is true and accurate, and must also agree not to engage in any unethical or irregular behavior intended to subvert the integrity of the exam. Examples of unethical or irregular behavior include, but are not limited to, situations where:

1. any misrepresentation is discovered in the candidate's application, in any other information submitted to the Board, or in the identity of a person applying to take or taking the examination;
2. any financial or other benefit is offered by a candidate to any director, officer, employee, proctor, or other agent or representative of the ABPMR in order to obtain a right, privilege, or benefit not usually granted by the ABPMR to similarly situated candidates;
3. any irregular behavior during the examination such as copying answers, sharing information, using notes, or otherwise giving or receiving aid is discovered by observation, statistical analysis of
computer-based testing results, or violation of the Exam Irregularity and Nondisclosure Policy; or
4. the on-site proctor of the computer-based examination or the oral examiner deems any portion of the candidate's absence from the designated examination room for whatever reason and any duration as unexcused or otherwise impermissible.

If the ABPMR determines that unethical or irregular behavior has occurred prior to, during, or after the examination, the ABPMR may permanently bar the involved person(s) from all future examinations, invalidate the results of or refuse to score prior examinations taken by the person(s), withhold or revoke the certificate(s) of the person(s), and/or take other appropriate action. If sanctions are imposed pursuant to the Board policy, the ABPMR may notify legitimately interested third parties of its action. The person in question shall be given written notice of the charges and an opportunity to respond in accordance with the rules and regulations of the ABPMR.

In the event of such a determination, the ABPMR will make every effort to withhold the scores of only those candidates directly implicated in the irregularity. In some instances, the evidence of irregularity, though sufficiently strong enough to cast doubt on the validity of scores, may not enable the Board to identify the specific candidates involved in the irregularity. In such circumstances, the Board may withhold the scores of candidates not directly implicated in the irregularity and, if necessary, may require those candidates to take an additional examination at a later date to ensure the validity of all scores.

All examinations administered by the ABPMR are copyrighted as the sole property of the ABPMR and must not be reproduced or retained in any manner. Any collection of administered test items, in whole or in part, is a federal offense and also may subject the candidate to the sanctions listed above. No notes, computer disks, textbooks, other reference materials, scratch paper, or electronic devices may be taken into either the computer-based or oral certification examinations.

Misrepresentation
Misrepresentation or alleged misrepresentation of a person as a diplomate of the American Board of Physical Medicine and Rehabilitation, or as having obtained a status of certification to take the certification examination will be investigated and acted upon by the ABPMR. The Board will seek verifiable evidence of such misrepresentation from the individual in question and other sources. Once sufficient evidence for reasonable verification of such misrepresentation has been obtained, the Board will notify the individual and each related licensing agency of the evidence it has been able to obtain. Such misrepresentation may include, but is not limited to, inclusion of an uncertified physician's name in a listing of other certified physicians, whether in newspapers, telephone yellow pages, or other means of soliciting patients, with the implication that all so listed are certified in PM&R.

Substance Abuse
If a history of substance abuse exists, candidates must provide documentation that they can safely and effectively perform the duties and responsibilities of a Board diplomate. The Board treats this information as confidential. Such documentation may consist of:
1. evidence of a successful completion of a supervised treatment program,
2. evidence of a documented period of abstinence, or
3. evidence of current participation in a supervised rehabilitation program combined with evidence that the candidate is no longer engaged in the abuse of drugs and/or alcohol.

Revocation of Certification
Any certificate issued by the ABPMR remains the property of the Board. Any certificate issued by the ABPMR shall be subject to revocation at any time if the Board determines, in its sole judgment, that the diplomate holding the certificate was in some respect not properly qualified to receive or retain it. The Board may, at its discretion, revoke a certificate due cause, including, but not limited to, the following:
1. The diplomate made any material misstatement or omission to the Board;
2. The diplomate did not possess the necessary qualifications and requirements to receive the certificate at the time it was issued, whether or not the Board knew of such a deficiency;
3. The diplomate engaged in unethical or irregular behavior in connection with an examination of the ABPMR, whether or not such practice had an effect on the performance of the candidate on that examination. Examples of unethical or irregular behavior may include, but are not limited to, copying answers from or knowingly giving answers to another individual, using notes during an examination, copying or distributing examination questions, or any violation of the ABPMR Exam Irregularity and Non-Disclosure Policy;
4. The diplomate misrepresented his or her status with regard to Board certification, including any misstatement of fact about being Board certified in any specialty or subspecialty;
5. The diplomate engaged in conduct that violated the moral or ethical standards of medical practice accepted by organized medicine in the locality where the diplomate is practicing, resulting in a revocation, suspension, qualification, or other limitation of his or her license to practice medicine, or the expulsion, suspension, disqualification, or other limitation from membership in a local, regional, national, or other organization of his/her professional peers; or
6. The diplomate's license to practice medicine has been revoked, suspended, qualified, or limited in any jurisdiction.

If the Board determines to revoke any certificate for any reason, the person affected thereby shall be given written notice of the reasons for the proposed revocation.

Upon revocation of certification, the holder shall return the ABPMR certificate and other evidence of certification to the Board, and his or her name shall be removed from the list of certified physiatrists.

Appeal of Decisions
An appeal process is available to individuals who disagree with the ABPMR's decisions regarding their admissibility to examinations, requests for special accommodations, accuracy of scoring procedures, or revocation of certification. A copy of the ABPMR Appeal Policy and Procedure is available upon request from the ABPMR office.

Certificate Reinstatement
Should the circumstances that justified revocation of the certificate be corrected, the Board may, at its discretion, reinstate the certificate after appropriate review of the individual's licensure and performance, using the same standards and requirements applied to the applicants for certification.

Maintenance of Certification
Beginning in 1993, the Board issued time-limited certificates that are valid for 10 years. To maintain certification beyond the 10-year period, diplomates certified since 1993 must participate in the Maintenance of Certification (MOC) program.

The guiding principle of the ABPMR MOC program is to foster the continuing professional development of quality patient care and
all aspects of the practice of PM&R by its diplomates. Through its MOC program, the ABPMR seeks to encourage, stimulate, and support its diplomates in a program of self-directed, life-long learning through the pursuit of continuing medical education.

The MOC process permits diplomates to demonstrate that they continue to meet the requirements of the ABPMR. Maintenance of Certification also provides patients and their families, funding agencies, and the public in general with assurance of the continuing up-to-date knowledge of PM&R diplomates.

To participate in the MOC program, an ABPMR diplomat must:
• hold a current, valid, unrestricted license to practice medicine or osteopathy in a United States licensing jurisdiction or Puerto Rico, or licensure in Canada. Evidence of unrestricted licensure in all states where a license is held will be required;
• pay an annual $100 fee;
• provide evidence of an average of 50 continuing medical education (CME) credits annually, for a total of 500 CME hours over the 10-year period (with all such CME credits being recognized by the AMA or AOA); and
• successfully complete a written or computer-based examination. Beginning in 2006, this will be a proctored examination.

Diplomates are automatically enrolled in the MOC program upon issuance of their time-limited certificates. Those who do not pay their fees or do not report CME credits for 4 or more years are considered nonparticipants. The Board office will notify nonparticipants when their certificates have expired.

In February 2006, the MOC examination will be administered as a proctored, computer-based examination given at Pearson Professional Centers nationwide. For complete information on the MOC process and requirements, refer to the current Maintenance of Certification Booklet of Information on the ABPMR Web site at www.abpmr.org, or by contacting the ABPMR office.

Subspecialty Certification
Spinal Cord Injury (SCI) Medicine
The authority to grant subspecialty certification in SCI medicine was granted to the ABPMR by the ABMS in March 1995, with the first examination given in October 1998. The application and information on the examination process for subspecialization in spinal cord injury medicine are available to all diplomates of ABMS Member Boards.

The SCI Medicine examination is administered as a computer-based examination at Pearson Professional Centers nationwide.

Applications for the SCI medicine examination are available on the ABPMR Web site after April 1 in the year the examination will be given. Completed applications are due by July 1 of the same year. The Subspecialty Certification in Spinal Cord Injury Medicine section of the Certification Booklet of Information which summarizes the training and/or practice requirements and the application process, including deadlines and fees, is available from the ABPMR office or via the ABPMR Web site.

Pain Medicine
In March 1998, the ABPMR and the American Board of Psychiatry and Neurology (ABPN) joined the American Board of Anesthesiology (ABA) in recognition of pain management (pain medicine) as an interdisciplinary subspecialty with a single standard of certification. The ABA administers the examination, which covers the various content areas of pain medicine. The examination is administered as a computer-based examination, and future pain medicine examinations are slated for September each year at testing centers nationwide. Contact the Board office for specific dates.

Applications for each pain medicine examination are available on the ABPMR Web site in January, and the completed applications are due by February 15 of the year in which the examination will be given. The Subspecialty Certification in Pain Medicine section of the Certification Booklet of Information, which summarizes the training requirements and the application process, including deadlines and fees, is available from the ABPMR office and via the ABPMR Web site.

Pediatric Rehabilitation Medicine
The authority to grant subspecialty certification in pediatric rehabilitation medicine (PRM) was granted to the ABPMR by the ABMS in March 1999, with the first examination given in November 2003. The application and information on the examination process for subspecialization in PRM is available to all ABPMR diplomates.

The PRM examination is administered as a computer-based examination at Pearson Professional Centers nationwide. Applications for each year’s PRM examination are available on the ABPMR Web site after April 1. Completed applications are due by July 1 of the year in which the exam will be taken. The Subspecialty Certification in Pediatric Rehabilitation Medicine section of the Certification Booklet of Information, which summarizes the training and/or practice requirements and the application process, including deadlines and fees, is available from the ABPMR office or via the ABPMR Web site.

The Board's Advisory Council Members
The members listed below were nominated from the American Association of Plastic Surgeons (AAAPS), the American Society of Plastic Surgeons (ASPS), the American Society for Aesthetic Plastic Surgeons (ASAPS), the American Association of Hand Surgeons (AAHS), the American Society for Surgery of the Hand (ASSH) and the American Society of Maxillofacial Surgeons (ASMFs).

Comprehensive Plastic Surgery
Mimis N Cohen, MD (AAAPS)
Walter L Erhardt, Jr, MD (ABPS), Chair
Robert A Hardesty, MD (AAAPS)
Donald H Lalonde, MD (ABPS)
James H Wells, MD (ASPS)

Cosmetic Surgery
Franklin L DiSpaltro, MD (ASAPS)
Foad Nahai, MD (ABPS)
James M Stuzin, MD (ABPS), Chair
Charles H Thorne, MD (ASPS)
Vernon L Young, MD (ASAPS)

Craniomaxillofacial Surgery
Arun K Gosain, MD (ASMS)
Bahman Guyuron, MD (ABPS)
Robert J Havlik, MD (ASPS)
A Michael Sadove, MD (ABPS), Chair
Seth R Thaller, MD (ASMS)

Hand Surgery
Keith E Brandt, MD (ASPS)
Kwai C Chung, MD (ASSH)
Vincent R Henta, MD (ABPS), Chair
W P Andrew Lee, MD (AAHS)
Nicholas B Vedder, MD (ABPS)

Board Staff
Theresa M Callison, RN, MSN, Administrator
Kya Geiger, Staff Assistant
Gwen A Hanuscin, Examination and Projects Coordinator
Jennifer M Wise, Administrative Assistant
Melissa M Rinnier, Administrative Assistant

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Plastic Surgery, Inc [ABPS], to ascertain whether the information below is correct.)

Introduction
The ABPS, which was organized in June 1937 by representatives of various groups interested in this type of surgery, received recognition as a subsidiary of the American Board of Surgery (ABS) in May 1938. The ABPS was given the status of a major specialty board in May 1941 by action of the Advisory Board for Medical Specialties as approved by the Council on Medical Education of the American Medical Association (AMA), which has designated certain specialty fields as being suitable to be represented by specialty boards.

The Board is organized under the laws of the State of Illinois for charitable, scientific, and educational purposes. No part of its net earnings shall inure to the benefit of any private member, director, officer, or other individual, nor shall the Board ever declare or make to any such persons any dividend or other distribution. Nothing herein, however, shall prevent the payment of reasonable compensation for services rendered or the reimbursement of reasonable expenses incurred in connection with the Board's affairs.

Plastic surgeons certified by the Board are listed in the Official ABMS Directory of Board Certified Medical Specialists, published by Elsevier Science in cooperation with the American Board of Medical Specialties (ABMS).

Mission Statement
The mission of the ABPS is to promote safe, ethical, efficacious plastic surgery to the public by maintaining high standards for the education, examination, certification and recertification of plastic surgeons as specialists and subspecialists.
Description of Plastic Surgery

Plastic surgery deals with the repair, reconstruction, or replacement of physical defects of form or function involving the skin, musculoskeletal system, craniofacial structures, hand, extremities, breast and trunk, and external genitalia, or cosmetic enhancement of these areas of the body. Cosmetic surgery is an essential component of plastic surgery. The plastic surgeon uses cosmetic surgical principles both to improve overall appearance and to optimize the outcome of reconstructive procedures.

Special knowledge and skill in the design and surgery of grafts, flaps, free tissue transfer, and replantation is necessary. Competence in the management of complex wounds, the use of implantable materials, and in tumor surgery is required. Plastic surgeons have been prominent in the development of innovative techniques such as microvascular and craniofacial surgery, liposuction, and tissue transfer. Anatomy, physiology, pathology; and other basic sciences are fundamental to the specialty.

Competency in plastic surgery implies an amalgam of basic medical and surgical knowledge, operative judgment, technical expertise, ethical behavior, and interpersonal skills to achieve problem resolution and patient satisfaction.

Sponsoring Organizations

The ABPS consists of at least 20 directors who manage the affairs of the organization. The Board elects one director from names submitted by the American Board of Surgery. Public member(s) are elected from nominations submitted by the directors. The Board elects at least 19 directors from names submitted by the following 20 sponsoring organizations:

- American Association of Plastic Surgeons
- American Burn Association
- American College of Surgeons
- American Head and Neck Society
- American Society for Aesthetic Plastic Surgery, Inc
- American Society for Reconstructive Microsurgery
- American Society for Surgery of the Hand
- American Society of Maxillofacial Surgeons
- American Society of Plastic and Reconstructive Surgeons
- American Surgical Association
- Association of Academic Chairmen of Plastic Surgery
- Canadian Society of Plastic Surgeons
- Council of Regional Societies of Plastic and Reconstructive Surgery
- Plastic Surgery Education Foundation
- Plastic Surgery Research Council

Once elected to the Board, that person's obligation will be primarily to the Board and not to the sponsoring organization.

In addition, one director is elected by the Board from names submitted by the ABS.

These individuals are the directors of the Board. Surgeons who fulfill the requirements of the Board and who are granted certification by the Board are known as diplomates of the ABPS.

Purposes

The essential purposes of the Board are

1. to establish requirements for the qualifications of applicants who request a certificate of their ability in the field of plastic surgery in its broadest sense;
2. to conduct examinations of approved candidates who seek certification by the Board;
3. to issue certificates to those who meet the Board's requirements and pass the respective examinations;
4. to do and engage in any and all lawful activities that may be incidental or reasonably related to any of the foregoing purposes.

The Board is not an educational institution, and certificates issued by the Board are not to be considered degrees. The certificate does not confer on any person legal qualifications, privileges, or license to practice medicine or the specialty of plastic surgery.

Standards of certification are clearly distinct from those of licensure; possession of a Board certificate does not indicate total qualification for practice privileges, nor does it imply exclusion of others not so certified. The Board does not purport in any way to interfere with or limit the professional activities of any licensed physician, nor does it desire to interfere with practitioners of medicine or any of their regular or legitimate activities.

It is not the intent nor has it been the function of the Board to define requirements for membership on the staff of hospitals or to define who shall or shall not perform plastic surgical operations. The Board is not a primary source of censure or primary review of ethical problems.

Policies

It is the Board's prerogative to determine the professional, ethical, moral, physical, and mental fitness of any candidate for its certificate.

The Board will consider opinions expressed concerning an individual's credentials only if they are in writing and signed.

It is the policy of the Board to maintain its autonomy and independence from political and economical considerations that might affect plastic surgery.

Advertising Requirements

The Board recognizes the role of legitimate advertising in the changing medical scene, but it does not approve of advertising that arouses unrealistic expectations, is false or misleading, minimizes the magnitude and possible risks of surgery, or solicits patients for operations that they might not otherwise consider.

Such advertising is improper and inconsistent with the high standards of professional and ethical behavior implied by certification by the ABPS. Misstatements regarding Board status are also inconsistent with the minimum ethical standards of the certified physician. The Board may penalize individuals misstating their status.

Although in the examination process, candidates may not advertise any status with the Board until certified after passing the Oral Examination.

This includes, but is not limited to, statements, forms, or images that express or imply that one is a candidate, admissible, eligible, qualified, or affiliated with the Board prior to achieving certification.

Candidates are required to submit photocopies of all advertising materials to the Board. Examples of practice advertisements include, but are not limited to, business cards, letterhead, brochures, Curriculum Vitae, website content listing the candidate's qualifications, telephone book (yellow page) advertisements, and other print advertisements such as announcement flyers, magazines, and newspapers.

Candidates also may not represent themselves as members of the American Society of Plastic Surgeons (ASPS) by statements or use of the Society symbol as this can be regarded by the public as evidence of certification by the Board. The Board recommends that candidates and senior partners contact the marketing department.
of ASPS to determine adherence to the Society's policies before placing practice advertisements in print.

A candidate will be deferred from the examination process for at least 1 year if the Board receives written documentation of such advertising.

**General Requirements**

The following requirements for admissibility are in agreement with those promulgated by the ABMS:

1. The Board will accept only those persons whose major professional activity is limited to the field of plastic surgery.
2. The person must maintain an ethical standing in the profession and moral status in the community acceptable to the ABPS in conformity with the Board's Code of Ethics. Moral and ethical practices that do not conform with the Board's Code of Ethics may result in rejection of an application or in deferral of examination until such matters have been resolved satisfactorily.

The Board may deny a candidate the privilege of sitting for an examination, or may refuse issuance of a certificate, if it is found by additional disclosures or a recent change in status that the candidate no longer meets the general or professional requirements.

**Professional Requirements**

The Board considers the requirements detailed in the sections on prerequisite training and training requirements to be minimal. Candidates are encouraged to take advantage of broadening experiences in other fields.

The Board reserves the right to

1. request lists of operations performed solely by the candidate for 1 or more years;
2. request special and extra examinations: written, oral, or practical;
3. request any specific data concerning the candidate that may be deemed necessary before making a final decision for certification;
4. consider evidence that a candidate's practice after completion of training is not in accord with generally accepted medical or ethical standards, which may result in rejection of the application or deferral of the examination until such time as the matter has been satisfactorily resolved.

**Undergraduate Medical or Osteopathic Education**

Before prerequisite training, candidates must have graduated from a medical school in a state or jurisdiction of the United States that is accredited at the date of graduation by the Liaison Committee for Medical Education (LCME), a Canadian medical school accredited by the Committee on Accreditation of Canadian Medical Schools (CACMS), or a US osteopathic school accredited by the American Osteopathic Association (AOA).

Graduates of medical schools located outside the jurisdiction of the United States and Canada must possess a currently valid standard certificate from the Educational Commission for Foreign Medical Graduates (ECFMG) or have completed a Fifth Pathway program in an accredited school of medicine in the United States.

**Official Evaluation of Prerequisite Training**

Official evaluation of prerequisite training by the Board is required prior to the initiation of residency training in plastic surgery for residents in independent programs and after the first year of residency for those in integrated plastic surgery programs. This simple preliminary step will prevent later disappointment. It is the responsibility of all residents in plastic surgery to obtain this evaluation. The Request for Evaluation of Training Forms are mailed upon request throughout the year. There is no deadline for submission of material to the Board office. Each prospective candidate must obtain a Request for Evaluation of Training Form from the Board office prior to completion of prerequisite training. The completed Request for Evaluation of Training Form, a $150 nonrefundable processing fee (made payable to The American Board of Plastic Surgery, Inc, in US Funds), and a copy of the prospective candidate's medical school diploma is required upon submission.

A Confirmation Letter will be sent directly to the resident upon review and approval of the prerequisite training. The Plastic Surgery Matching Program does require the Board's Confirmation Letter for the Match Application. Prospective candidates should be aware of the Match Application deadline, usually in the fall. Please allow 6 weeks for the processing of the Request for Evaluation of Training Forms and mailing of the Confirmation Letter from the Board office.

Directors of accredited residency training programs in plastic surgery must require all prospective trainees to have an official evaluation and approval of their prerequisite training by the Board before they begin plastic surgery training.

Approval for residency training in plastic surgery will be provided to those individuals who clearly meet the Board's established training requirements. Further information for detailed credential review will be obtained on all other individuals where training was in other than accredited programs.

Official evaluations will be made by the Credentials and Requirements Committee. Individual officers or members of the Board cannot and will not make such estimates or rulings. It should be emphasized that the answers to many questions require a decision by one or more of the committees of the Board. This applies particularly to evaluation of training and questions of admissibility. Decisions are referred to the entire Board at the next scheduled Board meeting.

The process of reaching a final decision may require several months, since the full Board meets only twice annually. March 1 and September 1 are the deadline dates for receipt of written submission of special requests, documentation, and required fee for consideration by the Credentials and Requirements Committee.

The Board will issue neither a letter verifying prerequisite training nor an Application for Examination and Certification Form until the Request for Evaluation of Training Form has been received and approved.

**Training Requirements**

There are two major pathways toward obtaining acceptable graduate level training in plastic surgery: the independent model and the integrated model.

In an independent model, the candidate must complete both (1) prerequisite training and (2) requisite training (plastic surgery). In an integrated model, no such distinction exists.

Residents may transfer, prior to the last 2 years, from an independent type of program to another independent program and from an integrated type of program to another integrated program, but they may not exchange accredited years of training between the two different models without specific prior approval by the Residency Review Committee for Plastic Surgery. The candidate must also provide written notification to the Board of anticipated transfers and obtain prior approval by the Board.

The minimum acceptable residency year, for both prerequisite and requisite training, must include at least 48 weeks of full-time training experience per year.

**Independent Model**

This model includes programs with 2 or 3 years of plastic surgery training. The Independent Model has two options. The first option
has two variations. Each of the pathways described satisfy the requirements of the Board for entry into the certification process.

1. **Option 1, variation A** requires at least 3 years of clinical general surgery residency training to complete the prerequisite requirements of the Board. Residents must complete a minimum requirement of 36 months of training including specific rotations, which are noted in this document. This requirement of the Board stipulates that a minimum of 3 years of clinical training in general surgery, with progressive responsibility, in the same program, must be completed before the resident enters a plastic surgery residency.

**Option 1, variation B** is the "combined" or "coordinated" residency. This option is the same as option #1A, with the exception that medical students are matched into a general surgery training program with a noncontractual understanding that they will become plastic surgery residents at the same institution after satisfactorily completing the 3-year minimum prerequisite requirement in general surgery. During this time they are considered residents in general surgery with an "expressed" interest in plastic surgery, but are not considered plastic surgery residents by the RRC-PS, AACPS, or ABPS until completing the prerequisite training program and entering the requisite years. These programs are not differentiated in the *Graduate Medical Education Directory* (the "Green Book"), but rather are found listed among general surgery and independent plastic surgery programs. **Prerequisite and requisite requirements are completed at the same institution in this model.**

2. **Option 2** is available for residents who have satisfactorily completed a formal training program (and are board admissible or certified) in general surgery, otolaryngology, neurologic surgery, orthopedic surgery, urology, oral and maxillofacial surgery (the latter requiring 2 years of clinical general surgery training in addition to an MD/DDS). Successful completion of these Accreditation Council for Graduate Medical Education (ACGME)- or American Dental Association (ADA)-accredited programs fulfills the prerequisite training requirement.

Residents can officially begin a plastic surgery training program (requisite training) after completion of any of these requisite options, which all require confirmation by the Board (Request for Evaluation of Training Form with confirmation letter regarding the acceptability of the prerequisite training for the Board's certification process).

In the Independent Model options, only the requisite period of training in the Independent Model is under the supervision of the RRC-PS. Note that the education in the Independent Model is accredited by the RRC-PS. However in the "combined" model, the general surgery years are accredited by the RRC for General Surgery and not the RRC-PS.

**Prerequisite Training**

For United States or Canadian doctors of medicine or osteopathy with their medical degree or osteopathic degree granted in the United States or Canada, and international medical graduates, one of the following pathways must be taken:

1. A minimum of 3 years of clinical training in general surgery with progressive responsibility in the same program is required. Programs must be accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada (RCPSC). Rotating internships will not be accepted in lieu of a clinical year in general surgery. Broad surgical training experience is required.

A total of 36 months of general surgery is required. A minimum of 18 months must be devoted to rotations in the primary and secondary in the primary and secondary components of general surgery as listed in Categories 1 through 12 below:

1. General surgery

2. Alimentary tract surgery
3. Abdominal surgery
4. Breast surgery
5. Head and neck surgery
6. Vascular surgery
7. Endocrine surgery
8. Surgical oncology
9. Trauma
10. Critical care
11. Pediatric surgery
12. Transplant

During the 36 months of general surgery, no more than a total of 12 months may be served in the other areas of surgical training, such as:

1. Gynecology
2. Neurologic surgery
3. Ophthalmology
4. Orthopedic surgery
5. Otolaryngology
6. Urology
7. Anesthesia
8. Burns
9. Surgical Pathology
10. Surgical Dermatology
11. Oral and Maxillofacial Surgery
12. Cardiothoracic surgery

During the 36 months of general surgery no more than 1 month can be spent on pathology or dermatology and no more than 2 months on oral and maxillofacial surgery. During the 36 months of general surgery no more than 3 months may be spent on a single rotation of the other subspecialties and no more than 6 months may be assigned on the combination of plastic surgery and hand surgery rotations.

This program must be approved by the Residency Review Committee (RRC) for Surgery and accredited in the United States by the Accreditation Council for Graduate Medical Education (ACGME) or in Canada by the Royal College of Physicians and Surgeons (RCPSC) for full training. The minimum of 3 years of clinical training with progressive responsibility in the same program in general surgery must be completed before the candidate enters a plastic surgery residency. The satisfactory completion of this requirement must be verified in writing by the general surgery program director (see "Verification of Prerequisite Training," below). Or

2. An accredited residency training program in neurological surgery, orthopedic surgery, otolaryngology, or urology. Prospective candidates may initiate residency training in plastic surgery following satisfactory completion of the entire course of training in the United States or Canada, as prescribed for certification by the American Board of Neurological Surgery, the American Board of Orthopaedic Surgery, the American Board of Otolaryngology, or the American Board of Urology. They must meet and comply with the most current requirements in these specialties. Satisfactory completion of training must be verified in writing by the training program director (see "Verification of Prerequisite Training," below) and evidence of current admissibility to the respective specialty board's examination process in the United States is required.

For prospective candidates with an MD degree obtained in the United States or Canada combined with a DMD or DDS degree

Satisfactory completion of a residency program in oral and maxillofacial surgery approved by the American Dental Association (ADA) is an alternate pathway for prerequisite training prior to plastic surgery residency. The satisfactory completion of this
training must be verified in writing by the oral and maxillofacial surgery program director. This program may include the integration of a medical school component resulting in a doctor of medicine (MD) degree or the medical degree may be obtained before or after residency training in oral and maxillofacial surgery.

This combined training must also include a minimum of 2 years of only clinical general surgery training progressive responsibility under the direction of the general surgery program director after obtaining the MD degree. These 24 months may be devoted only to those rotations in the 15 primary and secondary components of general surgery as listed previously. The general surgery program director must verify in writing the completion of 2 years of general surgery training, the level of responsibility held, inclusive dates, and specific content of rotation. Rotations in general surgery during medical school, prior to the MD degree, will not be considered as fulfilling any part of the 24-month minimum requirement. If the general surgery component is completed at an institution other than the sponsoring institution of the oral and maxillofacial surgery residency, then this training must be completed consecutively, with all 24 months spent in the same general surgery program that has been reviewed by the RRC for Surgery and is accredited by the ACGME in the United States.

Verification of Prerequisite Training
To obtain written verification from the program director under whom the candidate completed prerequisite training, the Board office will mail a verification form to the program director for completion and return by the program director. It is the candidate's responsibility to determine that the form has been completed and returned to the Board office.

Requisite Training
Graduate Education in Plastic Surgery
Two years of plastic surgery training is required, and the final year must be at the senior level. Residents entering a plastic surgery residency accredited for 3 years of training must complete the entire 3 years, including 1 year of senior responsibility.

Prospective candidates are required to complete both years of a 2-year program in the same institution or the last 2 years of a 3-year program in the same institution. In either instance, the final year must be at the senior level.

Training in plastic surgery must be obtained in either the United States or Canada. The Board recognizes training in those programs in the United States that have been approved by the Residency Review Committee (RRC) for Plastic Surgery and accredited by the ACGME or those programs approved by the RCPSC.

Content of Training
Candidates must hold positions of increasing responsibility for the care of patients during these years of training. For this reason, major operative experience and senior responsibility are essential to surgical education and training.

An important factor in the development of a surgeon is an opportunity to grow, under guidance and supervision, by progressive and succeeding stages to eventually assume complete responsibility for the surgical care of the patient. It is imperative that a resident hold positions of increasing responsibility when obtaining training in more than one institution, and 1 full year of experience must be at the senior level. The normal training year for the program must be completed. No credit is granted for part of a year of training.

The Board considers a residency in plastic surgery to be a full-time endeavor and looks with disfavor upon any other arrangement. The minimum acceptable training year is 48 weeks. Should absence exceed 4 weeks per annum for any reason, the circumstances and possible makeup time of this irregular training arrangement must be approved by the RRC for Plastic Surgery, and documentation of this approval must be provided to the Board by the program director. No credit but no penalty is given for military, maternity/paternity or other leaves during training. Residents or Candidates in the examination process called to active military duty do not need to submit a reapplication if 5 years expire during the active duty period.

Training in plastic surgery must cover the entire spectrum of plastic surgery. It should include experience in both the functional and cosmetic management of congenital and acquired defects of the head and neck, trunk, and extremities. Sufficient material of a diversified nature should be available to prepare the trainee to pass the examination(s) of the Board after the prescribed period of training.

This period of specialized training should emphasize the relationship of basic science—anatomy, pathology, physiology, biochemistry, and microbiology—to surgical principles fundamental to all branches of surgery and especially to plastic surgery. In addition, the training program must provide in-depth exposure to the following subjects: the care of emergencies, shock, wound healing, blood replacement, fluid and electrolyte balance, pharmacology, anesthetics, and chemotherapy.

Accredited Residency Programs
Information concerning accredited training programs for the independent model may be found in the Graduate Medical Education Directory (the "Green Book") published by the American Medical Association (AMA) under the aegis of the ACGME. Copies of this directory are available at many medical schools and libraries, or candidates may order the directory directly from the AMA by calling toll-free 800 621-8335, or by writing to Order Department PO416706, American Medical Association (AMA), PO Box 830876, Atlanta, GA 31193-0876; www.ama-assn.org. The Board does not inspect or approve residencies. The RRC for Plastic Surgery inspects and makes recommendations for or against approval of a residency training program in plastic surgery only after the director of the residency has filed an application for approval by the Residency Review Committee (RRC) for Plastic Surgery. For information contact the office of Doris A Stoll, PhD, 516 N State St, Chicago, Illinois 60610; 312 404-5505; www.acgme.org.

The RRC consists of nine members, with three representatives from each of the following: the ABPS, ACS, and AMA.

Neither the Board nor its individual members can be responsible for the placement of applicants for training. The Board does not maintain a list of available openings in programs. Prospective candidates seeking accredited training in plastic surgery should correspond directly with the directors of those training programs in which they are interested.

Most plastic surgery residencies participate in a special Plastic Surgery Matching Program. For information, contact Plastic Surgery Matching Program, PO Box 7584, San Francisco, California 94120-7584; 415 447-0350; www.sfmatch.org.

Nonapproved Residencies
No other residencies in the United States, Canada, or other countries are acceptable in lieu of those specified above. This in no way implies that quality training cannot be acquired elsewhere, but the Board has no method of evaluating the quality of such programs and must be consistent in its requirements.

The Board grants no credit for training, residency, and/or experience in disciplines other than those named.
Integrated Model

United States Program

Candidates must have a medical or osteopathic degree granted in the United States or Canada by an institution accredited by the LCME or the AOA.

Graduates of allopathic medical schools in the United States or its territories not accredited by the Liaison Committee for Medical Education (LCME) who have successfully completed the licensure requirements in a US jurisdiction are deemed to have appropriate undergraduate medical credentials.

Graduates of schools of medicine from countries other than the US or Canada must present evidence of final certification by the Educational Commission for Foreign Medical Graduates (ECFMG). Information on this certification can be obtained by writing to ECFMG, 3624 Market St/4th Fl, Philadelphia, PA 19104-2688; 215 386-6900; www.ecfmg.org.

Accreditation by the ACGME is required for all years of the training program.

Training in the Integrated Model requires no less than 5 years of RRC-PS-accredited residency under the authority and direction of the plastic surgery program director. The curriculum includes the basic experience as detailed above under “prerequisite training” and is determined by the plastic surgery program director and accredited by the RRC-PS. No less than 2 years of this program must be concentrated in plastic surgery, and the final 12 months must entail senior clinical plastic surgery responsibility. The last 2 years of training must be completed in the same program.

Transfers To Integrated Programs

A resident transfer into a vacant position in an Integrated Program must be approved by the Program Director, RRC-PS, and ABPS. The following documentation must be provided to the Board office for review and approval:

1. Letter from the RRC-PS approving the opening in the integrated program;
2. Letter from the general surgery program director indicating the exact dates of training that will be completed at the time of the transfer;
3. Letter from the integrated plastic surgery program director indicating the acceptance of the resident; and
4. Completed Request for Evaluation of Training Form, $150 Processing Fee, and photocopy of medical school diploma from the resident.

Canadian Combined Program

This requirement will pertain to all those applying for admission to the ABPS examination process beginning in the year 2000, but candidates may begin such a course of training before then if they so desire.

The third year of training in the Canadian 5-year combined program must consist of varied rotations of a general surgery nature demonstrating progressive responsibility at a third-year level. This program must be approved by the RCPSC for full training.

Rotations may include the alimentary tract; the abdomen and its contents; the breast, skin, and soft tissue; the head and neck, including trauma, vascular, endocrine, congenital, and oncologic disorders, particularly tumors of the skin, salivary glands, thyroid, parathyroid, and oral cavity; the vascular system, excluding the intracranial vessels, the heart, and those vessels intrinsic and immediately adjacent thereto; the endocrine system; surgical oncology, including coordinated multimodality management of the cancer patient by screening surveillance, surgical adjunctive therapy, rehabilitation, and follow-up; comprehensive management of trauma, including musculoskeletal, hand, and head injuries (responsibility for all phases of care of the injured patient is an essential component of general surgery); and complete care of critically ill patients with underlying surgical conditions in the emergency room, intensive care unit, and trauma/burn units. No more than 6 months of this training may be spent on any single subspecialty surgical service, such as a burn unit, during the 3 years.

A Request for Evaluation of Training Form must be completed and returned by the candidate to the Board office along with a $150 nonrefundable processing fee in US funds (made payable to The American Board of Plastic Surgery, Inc.).

A Verification Form must be completed and signed by both the director of postgraduate education for the university's department of surgery and the director of the university's training program in plastic surgery. After completion of plastic surgery training, the director of postgraduate surgical education and the plastic surgery program director will be required to complete and sign the last page of the Application for Examination and Certification Form.

Applying for Examination and Certification

The prime purpose of the Board is to evaluate the education, training, and knowledge of broadly competent and responsible plastic surgeons. The Board can not issue letters attesting to admissibility to the examination process to any person, institution, or organization until this formal application, along with the required supporting documents, have been received and approved.

The Application Process

In order to be admitted to the examination process leading to Board certification, prospective candidates should write to the Board office requesting application materials no later than December 30 of the final year of their plastic surgery residency by one of the following methods:

- submitting the Senior Resident Form provided by the Board to each plastic surgery program director
- writing, faxing, or sending an email to the Board office requesting Application Materials
- submitting a Web site application request at www.abplsurg.org

A Senior Resident Form may be obtained from the residency program director, who will receive these post cards in December. Upon this written request, an Application for Examination and Certification Form will be provided and should be completed and submitted to the Board office by the deadline indicated in the application cover letter.

Prospective candidates must submit a completed Application for Examination and Certification Form to the Board office within 2 years after completion of their residency in plastic surgery in order to be considered for admission to the examinations leading to Board certification. Prospective candidates with disabilities requesting special accommodations for the examination process must do so in writing and provide documentation of the disability when submitting the Application for Examination and Certification Form (refer to "Examination of Candidates with Disabilities").

Deadline for Submission of Application Material

Applications for admission to the written examination must be received in the Board office by the deadlines listed in the Booklet of Information.

Licensure

All candidates must have a current, valid, registered, full, and unrestricted license to practice medicine in a state, territory, or possession of the United States or in a Canadian province, and they must continue to be licensed throughout the certification process. A temporary limited license, such as an educational, institutional, or house permit, will be acceptable for the first year of admissibility to
the Written Examination until full licensure is achieved. Candidates must submit a photocopy of an active registration certificate bearing a date that will be valid at the time of examination(s), with each Reply Form submitted.

Commissioned officers of the medical service of the armed forces of the United States or Canada on active duty need not present evidence of current registration of licensure but must provide appropriate information regarding their status.

**Restrictions to Medical Licensure**

It is the candidate's responsibility to report, in a timely manner, all disciplinary actions to medical licenses from any and all state medical boards. The following sanctions by any and all state medical licensing boards where the candidate holds a license are considered a restricted license and will delay a candidate's admissibility to the Written or Oral Examination:

1. Limitation on practice or parts of practice
2. Probation
3. Probation with monitoring
4. Probation with supervision
5. Suspension

Other sanctions to a candidate's medical license such as reprimands, fines, community service, or a stayed suspension must be reported to the Board and will be considered by the Ethics Committee before a candidate is admissible to the Written or Oral Examination.

**Hospital Privileges**

Candidates must provide evidence of active operating privileges in plastic surgery in a hospital throughout the examination process. Exceptions may be made for Written Examination candidates at the initiation of practice in plastic surgery or those pursuing additional fellowship training. Privileges held exclusively in outpatient facilities are not acceptable.

**Letters of Recommendation**

If a candidate has completed training in more than one program in plastic surgery, the program director of the first year of training must verify to the Board, in writing, the satisfactory completion of that year of training. Additionally, the Board may require favorable evaluations and verification from other surgeons.

**Residency Graduation Form (US Programs)**

A Residency Graduation Form will be mailed by the Board office directly to the plastic surgery program director for completion at the end of the resident's training in plastic surgery. A single form will be sent for each resident and will require signatures in two places. The first signature, by the program director, will attest that the resident has completed a residency training program in plastic surgery accredited by the RRC for Plastic Surgery or by the RCPSC under his/her direction and that the accredited number of years included a year of senior responsibility. The second signature will signify that the program director recommends the resident for admission to the examination process of the Board.

The Board requires each program director to complete a Residency Graduation Form for each graduating resident by July 15 of the year of residency completion.

If the program director elects not to sign either statement, the director is required to provide a full written explanation of the reason the required signature(s) is not provided. The individual's application cannot be processed, nor will the individual be admitted to the examination process of the Board, without both required signatures.

The program director must record any deficiencies that were responsible for the lack of signature(s) and discuss these with the individual. This written communication must be given to the individual and a copy must be forwarded to the Board office. If further educational training or experience is completed, the program director should request, within 30 days, that another Residency Graduation Form be sent for the required signature(s). If the individual is still felt to be deficient and not recommended for admission to the examination process of the Board, the program director again must communicate the cause for the lack of signature(s) to the Board office.

Failure on the part of the program director to complete the Residency Graduation Form within the stipulated framework will be considered an abrogation of the responsibility of the program director, and the Residency Review Committee for Plastic Surgery or the Royal College of Physicians and Surgeons of Canada (RCPSC) shall be so notified.

**Notification of Admissibility**

Candidates have unlimited opportunities to successfully complete the Written and Oral Examinations. Candidates must reapply every 5 years to remain admissible to the examination process. Candidates deferred from the examination process may contact the Board office in writing to request Reapplication Materials for admissibility to the Written Examination. Candidates must adhere to the Board's Advertising Requirements, listed earlier in this document, as well as the Code of Ethics.

All candidates must comply with the current requirements in effect for the year in which the examination is taken, regardless of the time the original application was approved.

It is the responsibility of candidates to seek information concerning the current requirements for certification by the Board. These requirements are delineated annually in the Booklet of Information. The Board does not assume responsibility for notifying candidates of changing requirements. The Board recommends that candidates visit the Board's Web site or contact the Board annually by email to obtain a Booklet of Information for the current requirements and deadline dates.

All candidates taking an examination of The American Board of Plastic Surgery, Inc, must complete the entire examination.

Certification by any other specialty board does not exempt candidates from any part of the examination process.

Fellowship training does not affect admissibility to the Written Examination. However, active practice in plastic surgery is required for admissibility to the Oral Examination.

**Written Examination: October 16, 2006**

**Requirements for the Written Examination**

1. Candidates must hold medical staff privileges in plastic surgery in a United States, Canadian, or foreign hospital throughout the examination process. Verification of current plastic surgery privileges must be provided to the Board from the medical staff office(s) of each institution(s).

2. Candidates must have a valid, unrestricted license to practice medicine. Restrictions or sanctions to any medical license must be reported to the Board within 60 days of the restriction. Details of license restrictions are listed earlier in this document. Restrictions will delay the candidate's progress through the examination process.

The Written Examination will be conducted in the fall each year or at any other time deemed suitable by the Board. The examination will be given on 1 day throughout the United States and Canada. No exceptions will be made, and special examinations will be given only under unusual circumstances (see Special Situations).

The Written Examination is a Computer Based Test (CBT) offered at Prometric Testing Centers (PTC). The Board cannot guarantee scheduling for specific test centers.
Test Centers for CBT
Prometric® provides services for professional licensure, academic assessment, and certification for various other professional and academic needs. Prometric administers testing programs for educational institutions, corporations, professional associations, and other organizations.

All Prometric® Test Centers are set up similarly. This not only helps enhance security, but also provides the same standards of comfort and uniformity for all candidates. Locations of Prometric® Test Centers available for the Written Examination can be found at the Prometric® Web site, www.prometric.com under the “Test Takers” & “Locate a Test Site” buttons. In the Test Center Locator drop down field under “Select your area of study,” choose Professional Licensure and Certification. Select your test state on the right drop down field. Click “NEXT.” Scroll down the client/program list to American Board of Plastic Surgery. Click next and ABPS-PS-WE Plastic Surgery Written Examination will appear. The list of test centers in your selected state will appear.

Admissibility to the Written Examination
Candidates will be admissible to the Written Examination in the fall following successful completion of residency in plastic surgery, provided the Application for Examination and Certification is approved.

The Board reserves the right to defer a candidate in the examination process for consideration of ethical or other issues. Refer to the Board's Code of Ethics.

Admission to Examination
Candidates will not be accepted for admission to the Written CBT Examination if the Reply Form (green), medical license, verification of hospital privileges in plastic surgery, and Examination Fee are not received by the deadline date indicated in the Announcement Letter. Reply Forms that are incomplete will be subject to a Missing Items Penalty Fee.

Announcement Information
Reply Form & Examination Fee Deadline
Two groups of candidates are taking the examination in 2006. These include those who completed residency before 2006 and have an approved Application for Examination and Certification and those who complete residency on June 30, 2006. The instructions and deadlines below pertain to these two groups.

Candidates Approved for Examination
An Announcement Packet will be sent in January to candidates approved for the examination process on or before December 31, 2005. The Reply Form (green) deadline for the Written Examination is the close of the business day on March 3, 2006. The Examination Fee of $1,250 and all required materials must accompany the Reply Form (green) in order to be scheduled for the Written Examination. A late penalty fee of $500 must accompany the Reply Form and Examination Fee if received by the Board office from March 4, 2006 up to and including the close of the business day on March 15, 2006. Reply Forms (green), Examination Fees, and documents noted above received March 4 up to March 15 will be considered only on a space available basis.

Senior Resident Candidates
An Approval Letter and Announcement Packet will be sent in July 2006 for candidates approved for the examination process after June/July 2006. The Reply Form (green) deadline for the Written Examination is the close of the business day on July 20, 2006. The Examination Fee of $1,250, and all required materials must accompany the Reply Form (green) on July 20, 2006. This deadline for candidates completing residency on June 30, 2006 is absolute. No late Reply Forms will be accepted.

Reply Forms (green) and Examination Fees received in the Board office after the close of the business day on March 15 or July 20, as noted above, will not be accepted for admission to the 2006 Written Examination.

Important: Both sides of the Reply Form (green) must be completed. Candidates will not be scheduled for examination without a complete listing of hospital or academic appointments. Please note on the Reply Form if these privileges are pending with a full explanation of details.

Candidates are responsible for their own travel and expenses to test center sites.
A guaranteed delivery service is recommended to ensure receipt of materials by the deadline dates.

Receipt of the Scheduling Permit
Upon receipt and approval of all required materials, candidates will be scheduled for the examination. Candidates will be sent a Scheduling Permit (orange) approximately 4 to 6 weeks before the examination. The Scheduling Permit (orange) will include the date of the examination, instructions, a scheduling number, candidate identification number (CIN), and toll-free phone number for making an appointment at a Prometric® Test Center. Contact the Board office immediately if the name on the Scheduling Permit is not an exact match to that listed on the photographic identification that was submitted to the Board office with the Reply Form.

Scheduling a Test Center Appointment
Candidates should contact Prometric® immediately upon receipt of the Scheduling Permit in order to schedule an appointment. Candidates must have the Scheduling Permit in hand to schedule the appointment. Assignments are made on a first-come, first-served basis. (If a candidate delays scheduling an appointment, he/she may not receive the preferred location.) When calling, a Prometric representative will ask for information from the Scheduling Permit and provide details regarding the test centers and location specified by the candidate. If a preferred test center is not available, the candidate will be advised of other nearby test centers where a testing appointment is available. Prometric® does not make appointments prior to the provision of the permit to candidates.

Testing Day Requirements
Advise the Board office immediately by telephone if the Scheduling Permit is lost prior to the examination. Candidates will not be admitted to the PTC without the scheduling permit and a valid government-issued photograph identification. The candidate’s name as listed on the Scheduling Permit must be an exact match to that listed on the photographic identification. Contact the Board immediately if there is a difference in name. Candidates must present the following items to the Prometric Test Center:
1. Scheduling Permit (orange)
2. Photographic Identification

Withdrawal from Examination
The Board office must receive a letter from the candidate indicating the intent to withdraw from the examination at least 30 calendar days before the date of the examination. Candidates will be refunded $500, the Examination Fee less a processing charge of $700. Candidates who withdraw from the examination after this date or who fail to appear for the examination will forfeit the entire Examination Fee. Withdrawal is final. No rescheduling will be considered.
**Content of the Written Examination**

The Examination consists of multiple-choice (one best answer) questions. In general, each test item consists of a question, a case history, or a situation, followed by a list of possible answers. Instructions for completion of questions are provided in the computer program, which candidates will receive at the start of the examination.

The subjects covered in the examination are listed below and will cover the entire field of plastic surgery:

2. Basic knowledge of pathology, eg, the biologic behavior of neoplasms, inflammation, and repair.
3. Basic techniques, wound healing, microsurgery, transplantation.
5. Pre- and postoperative care, anesthesia, cardiorespiratory care, complications, and clinical pharmacology.
6. Cosmetic and breast surgery.
7. Tumors of the head and neck, skin, and breast; including treatment by radiation therapy, immunotherapy, chemotherapy, and surgery.
8. Trunk, lower extremity, musculoskeletal system, pressure ulcers, and rehabilitation.
9. Hand, peripheral nerves, and rehabilitation.
10. Maxillofacial and craniofacial surgery and microsurgery.
11. Congenital anomalies, genetics, teratology, facial deformity, speech pathology, gynecology, and genitourinary problems.
12. Psychiatry and legal medicine.

The questions for the examination cover subjects considered to be of fundamental importance to competent performance in the field of plastic surgery. Every effort is made to avoid "trick" questions, ambiguity, and questions involving irrelevant facts. All questions are analyzed by psychometric methods to assure their quality.

Candidates will pass or fail on the strength of their performance on the entire CBT format Written Examination.

**Result Letters**

Written Examination result notification letters (pass or fail) will be mailed on December 22nd. The time period between administration of the examination and notification of the results is necessary to allow for extensive analysis and to assure that individual results are reliable and accurate.

Results of the examination will be divulged to no one until after the result letter has had time to reach candidates. If a week has elapsed after the “Result Mailing Date” and candidates still have not received the result letter, they may then call the Board office for the examination results. Information will be given only to the candidate. No designees will be accepted. The board staff will verify the candidate's identity before releasing results by telephone.

Each candidate will receive a single final grade (pass or fail) for the entire examination. The score (pass or fail) on the examination will be determined by the total number of alternatives answered correctly. Therefore, candidates are encouraged to answer all items.

**Pass**

If a candidate passes the Written Examination, he/she will be informed in writing.

**Fail**

If a candidate fails the Written Examination, he/she will be informed in writing. A candidate who has received a failing result must repeat the entire Written Examination.

**Score Validation ($200)**

Score Validation of the Written Examination is available upon written request. To request score validation, candidates must write to American Board of Plastic Surgery.

**Registration and Administration of the Written Examination**

All candidates must take the entire examination on the same day. Individual Prometric Test Center issues will be handled on site with final approval by the Board.

If for any reason candidates are delayed or cannot arrive on time, they must notify the Board office immediately and the Board will contact the Prometric Test Center. If candidates are unable to attend the examination, they must notify the Board office either by letter or by telephone. Any candidate who is more than 30 minutes late may not be admitted to the examination.

Candidates are not permitted to bring any notes, textbooks, clipboards, pocketbooks, personal digital assistants (Palm Pilots, etc), electronic devices or other reference materials into the test center. Cell phones and beepers must be turned off. Scratch paper is not permitted.

Examination questions are prepared by and/or at the direction of the ABPS and said examination items are protected under the copyright laws of the United States and other countries. The examination items may only be used for such purposes as are designated from time to time by the Board and other than such designated purposes. The Board reserves all other rights.

Copying, by any means, of all or any part of such examination items or unauthorized use in any way whatsoever of said examination items is strictly prohibited.

**Change of Address**

If a candidate's address, as it appears on the Scheduling Permit, is incorrect or will change before the “Result Mailing Date,” please contact the Board office immediately.

**Examination Schedule**

Candidates are advised to read the Announcement Letter for possible changes in the Written Examination format.

The Written Examination Computer Based Test will consist of the following format:

- 15-minute optional tutorial
- 400 multiple-choice questions formatted in four blocks of 100 questions. Each block is 1 hour and 40 minutes in length
- Total break time of 35 minutes (optional)
- Total testing time is 6 hours and 40 minutes. Total time at the test center is no longer than 7 hours and 30 minutes

All candidates will have the same number of questions and the same time allotment. Within each block, candidates may answer questions in any order and review and/or change their answers. When exiting a block, or when time expires, no further review of questions or changing of answers within that block is possible.

Candidates will have 35 minutes of total break time, which may be used to make the transition between blocks and for a break. A break may only be taken between each block of questions.

**Examination Tutorial**

A tutorial is provided, which reviews each screen and 10 to 20 inactive items for practice. This is intended to relieve anxiety about the mechanics of computer-based testing. The tutorial also reviews the process of marking items for review at the completion of each section or block of the examination. Once a section has been completed, candidates may not access questions from the previous section or block of items. The tutorial is available for downloading to personal computers from the Board's Web site in the Examination Information section. The Board strongly recommends that candidates preview the tutorial a number of times to become familiar with the CBT format.
the Board office within 30 days of the date on the result letter. The Score Validation Fee is $200.

The Written Examination is scored and analyzed by the National Board of Medical Examiners (NBME), which has extensive experience in the field of medical examinations.

Cancellation of Examination
Should The American Board of Plastic Surgery, Inc, in its sole discretion, cancel the Written Examination, or as a result of events beyond its control be unable to administer the Written Examination at the appointed date, time, and location; or should the Board fail to conclude a candidate's Written Examination, the Board is not responsible for any expense the candidate may have incurred in connection with the canceled Written Examination, nor for any expense the candidate may incur for any substitute Written Examination.

Oral Examination: November 9, 10, 11, 2006
Case Collection Instructions Requirements and Information
Prior to becoming admissible to the Oral Examination, candidates must have passed the Written Examination.

Candidates admissible to the Oral Examination will be sent an Information Letter annually, including registration instructions to obtain an individual user name, password and requirements for case list compilation. The case list compilation program is a Web-based application hosted by DataHarbor.com. A common portal for data collection called Tracking Operations and Outcomes in Plastic Surgery (TOPS) is used by the Board and the American Society of Plastic Surgeons (ASPS). The program provides a standardized case format that facilitates the Board's review. The data submitted to the Board is strictly confidential and will not be shared with ASPS. These standardized data collection fields will be familiar to candidates in the future when presenting data to ASPS for membership and research activities.

Candidates must have Internet access to complete the case list compilation. It is strongly recommended that candidates dedicate at least 30 minutes to thoroughly review all requirements for case list compilation and case report preparation before beginning the case collection process.

Admissibility to the November 2006 Oral Examination
Candidates are required to submit a 7-month case list collected during the period beginning September 1, 2004, through March 31, 2006, the $540 non-refundable Case List Review Fee and advertising materials by the April 21, 2006, deadline to be sent an Announcement Packet for the November 2006 Oral Examination.

Candidates have unlimited opportunities to successfully complete the examination process. Candidates must reapply every 5 years to remain admissible to the Examination process. Candidates deferred from the Examination process may contact the Board office in writing to request Reapplication Materials for admissibility to the Oral Examination.

The Board reserves the right to defer a candidate from the Examination process for consideration of ethical or other issues.

Practice Requirements for Oral Examination
1. Candidates must be actively engaged primarily in the practice of plastic surgery before, during, and after the case collection period and throughout the examination process.
2. Candidates must hold medical staff privileges in plastic surgery in a United States, Canadian or foreign hospital throughout the case collection and examination process. Current verification of hospital privileges in plastic surgery must be provided from all medical staff offices of every institution with the Reply Form.
3. Candidates must have a valid, unrestricted license to practice medicine. Restrictions or sanctions to any medical license must be reported to the Board within 60 days of the restriction. Details of license restrictions are listed earlier in this booklet. Restrictions will delay the candidate's progress through the examination process.
4. A fellowship is not considered independent practice. Case collection may not occur during fellowship training.
5. The Board reserves the right to defer a candidate from the examination process for consideration of ethical or other issues. The candidate is urged to refer to the Advertising Requirements and the Board's Code of Ethics.

Case List Compilation
Candidates for the November 2006 Oral Examination are required to provide the Board with a compilation of all operative cases and hospitalized patients during the 7-month period beginning September 1, 2005, and ending March 31, 2006. Case lists, fees and advertising materials are due in the Board office by the close of the business day on April 21, 2006. The Board utilizes the data provided to become familiar with the candidate's practice and to select five cases for the case report session of the examination.

Note: Candidates should make address corrections on the Data Harbor website. An address correction upon first entry onto the TOPS site will generate an email notification to the Board office of any address changes. Notification can also be made by e-mail to oral@apbulsurg.org. Candidates should not assume that address changes entered later in the candidate data fields will automatically alert the Board office to address changes.

The printed case list will be in chronological order for each institution (hospital, office-based surgery, etc) and will include patient's initials, hospital (or other) identifying number, age in years calculated from date of birth, gender, date of operation, case classification, diagnosis, procedure(s) performed (if any), CPT codes plus modifiers (identical to those used for billing on that case), outcome (including complications), site of operation (ie, inpatient vs outpatient facility), and duration of procedure. Affidavits for each institution are automatically printed out on the last page of each institution's list of cases. The Candidate Affidavit, printed as a separate document, attests that the case list contains all cases performed during the 7-month period. The Candidate Affidavit also attests that the CPT codes listed are an exact representation of those submitted, or would have been submitted (eg, CPT codes listed for cosmetic cases, Veterans, Military, Kaiser Permanente, or foreign practice environments) for billing purposes.

Data entry, proofing, and editing must be completed by April 21, 2006, in order to meet the submission deadline. The Clinical Log application program will not allow changes in the case list data after this date, although candidates may view and print the case list at later dates.

The case list is prepared, selected, and printed from the menu options. After generation of the case list and preparation of the additional material, the original case list and an exact photocopy of the original case list and the candidate case summary sheet, all advertising documents, and the $540 Case List Review Fee must be submitted to the Board office by the deadline date of April 21, 2006.

The Board recommends that candidates begin compiling the case list on a weekly or monthly basis, rather than waiting until the last month of the case list collection period to begin data compilation on the TOPS application. The case log screen will assist in reviewing the cases. Candidates can sort by all headings on the Case Log screen including case number, patient name, record number, facility, date of surgery, edit date, and status. A search can be accomplished by clicking the Search Cases at the top of that page. The
Add Case Screen highlights all required fields with an asterisk and outlines incomplete required fields with a red box. A trial printing well in advance of the deadline will also help in troubleshooting problems. Do not underestimate the magnitude of the data collection task. To comply with HIPAA regulations, the Board and candidates must complete a Business Associate Agreement.

General Guidelines
The case list must include:
- All operative procedures whether inpatient, outpatient, or office-based surgery.
- All patients hospitalized by the candidate as the admitting physician, even if the patient is managed non-operatively.
- All emergency room patients who required an operative note must be included.
- Multiple operative procedures performed on the same patient. This inclusion allows automatic cross-referencing by the computer program. However, hospital number or other identifying numbers and patient initials must be consistent for the patient with multiple procedures (eg, if a patient is listed at more than one institution, the same identifying number must be used to identify the patient). Do not use the full Social Security Number (SSN) as an identifier, in order to protect patient confidentiality. For the purposes of the case list, candidates should use only the last four digits, which should allow the medical record administrator to verify and identify the cases with the patient initials. For cases performed by a resident and attended by the candidate, or cases billed as co-surgeon, do not include:
- Office-based surgery of a minor nature (eg, excision of nevus) does not need to be included. However, the Board suggests that the candidate err in the direction of inclusion of cases rather than exclusion when in doubt.
- Voluntary surgical activity in developing countries. Cases performed during such service are not to be included in case compilation because of the lack of continuum of care.
- Inpatient consultations on patients admitted by physicians on other services that did not culminate in a surgical procedure.
- Assistant cases, namely cases billed by the candidate as an assistant surgeon.

Data Entry
Required fields are noted with an asterisk and are outlined with a red box (incomplete) until data is entered.
1. Enter patient name. Only patient initials (first, middle—if available—last) will be displayed to the Board and on the caselist.
2. Enter a patient number in the medical record # field. Use the same patient number for all procedures for the same patient during the case collection time regardless of the location (eg, office, outpatient facility, hospital) to allow for cross-referencing. Do not use full Social Security numbers, to protect patient confidentiality.
3. Enter patient date of birth. Age in years (years/months/days) will be calculated and displayed on the printed list.
4. Enter patient gender. Patient Race is not a required field and will not be displayed on the printed list.
5. Enter Hospital Facility Name. Click on the yellow asterisk/pencil to add/edit the name of a facility.
6. Enter the admission status as inpatient or outpatient. An inpatient admission is defined as an overnight stay of one or more nights. An outpatient admission is defined as 23 hours or less.
7. Enter date of procedure. Multiple procedures on the same patient, on the same date, should be entered as one case. Use the date of admission for non-operative inpatient cases.
8. Enter duration of procedure. Duration is defined as skin to skin excluding anesthesia time. Approximate duration of the surgical procedure should be entered in hours and minutes.
9. Enter the diagnosis description as free text. Providing complete diagnosis and procedure information is essential. From the operative notes, give an accurate written description of the diagnosis and the operative procedure(s). Ignore the ADD ICD-9 code function. Do not use ICD-9 and CPT codes in place of the written description of the diagnosis and procedure(s). If the case was non-operative, include a discharge summary diagnosis.
10. Enter the procedure description as free text. Comments about complications or death of a patient may also be added here.
11. Include all CPT codes plus modifiers used for insurance billing purposes. CPT codes must be assigned as well for all cases that were not billed to insurance (eg, cosmetic cases). CPT codes starting with 99 (evaluation and monitoring codes for office visits, consultations, etc) are not required. For nonsurgical admissions 99 CPT codes can be used.

To provide an equitable examination for all candidates, no candidate will be exempt from CPT coding. Candidates practicing in managed care relationships, Military, Veterans Administration, Kaiser Permanante, Shriners Hospitals, Canada, and foreign countries must also include CPT codes for all cases.

The automatic CPT code descriptors, which print when a CPT code is entered, are the copyright of the AMA. A CPT code frequency field is included so that a CPT code may be entered once with the number of times the procedure was performed (X2, X3, etc, eg, for multiple skin grafting procedures).

12. Case classification is a two-part item in order to reduce the category overlap. The Category relates to the nature or origin of the defect. The Anatomy relates to the anatomical location of the procedure. Fields (noted in contrasting colors) other than those listed below, utilized for other data collection projects, should not be used. In the TOPS screen, these fields become available when the Add CPT Code option is clicked. Pick one option in each column for every CPT code listed. One selection from each column is required:
- Category
  - Cosmetic
  - Burn
  - Cancer (non-skin)
  - Congenital
  - Skin (including skin cancer)
  - Trauma
  - Other
- Anatomy
  - Head & Neck
  - Breast
  - Hand
  - Upper Extremity
  - Trunk
  - Lower Extremity
  - Genitalia
- Non-Operative

There are no quotas with respect to the categories. The Board office staff cannot advise the candidate on how to classify a case. Candidates should make the most reasonable assignment for each case. When more than one category applies to a case, candidates should use their professional judgment. If the case involves microsurgery, be sure to indicate this in the procedure description. A few examples are:
- Reduction Mammaplasty: Other, Breast
- Breast Reconstruction: Cancer, Breast
- Abdominoplasty: Cosmetic, Trunk
- Abdominoplasty with Abdominal Hernia Repair: Other, Trunk

13. ASA Status, Mode of Anesthesia, and Anesthesia Supervised By are optional. Do not complete these fields, as they are not displayed on your final case list.
14. Providing “outcome” information is essential. A complications menu appears when number 3 “complications” is selected. Not
all cases "heal without complications." Examples include "necrosis of tip of flap" or "normal sensation returned, but index finger stiff after tendon repair."

Compilations are displayed on the case list only as a Minor, Moderate or Major Complication. Refer to the Web Manual for the category breakdown. Narrative statements can be included in the procedure description text box. The outcome categories are:

1. No Complications: No complication or complication so trivial that no intervention is required.
2. Outcome Unknown: This includes patients lost to follow-up and is displayed that way on the caselist.
3. Complications: Check all that apply including delayed healing, infection, unplanned consultation with another specialist, adverse event such as DVT, MI, PE, or Flap loss or unplanned re-operation.

Complete the Mortality within 30 days of the procedure box. This is treated as a required field. However, the Mortality data will not be displayed in the printed case list.

16. The Primary Payment Source field is not a required field.

17. Two Candidate Case Summary Reports (original and copy) must be submitted. This report facilitates the Board’s review. The TOPS application generates the form directly by menu selection after the case list has been finalized.

Preparation for Submission of Data

1. The Finalize Case List action, noted with a key icon, is used to print the 7-month Case List. This is the only copy that is accepted. Use the Case Log screen to view the list of all cases. Carefully proofread for accuracy. Handwritten information is not accepted. Once the case list is finalized it is not possible to add, delete, or modify any data. Printing must be done in advance to meet the April 21, 2006 deadline.

Note: The TOPS program displays a prompt to complete missing data elements before allowing you to proceed with the Finalize Case list action.

2. Obtain notarized affidavits from the medical record librarian/administrator of each institution (hospital, ambulatory surgery center, etc.) and properly notarized as a complete list of the candidate's operative experience. The notarized affidavit attests that the cases listed for the institution represent all cases performed by the candidate at the facility. Operations done by the candidate in the office must also be listed and notarized by the appropriate office personnel who can attest to the completeness of the cases listed. The institution's affidavit sheet prints out in sequence as the last page of each institution's case list. The Board recommends that the candidates contact the medical records department well in advance of the case list submission date to schedule the review and notarized signature process. Clearly, prompt completion of the case list in early April will be necessary to accomplish the tasks required for submission.

17. Two Candidate Case Summary Reports (original and copy) must be submitted. This report facilitates the Board’s review. The TOPS application generates the form directly by menu selection after the case list has been finalized.

Preparation for Submission of Data

1. The Finalize Case List action, noted with a key icon, is used to print the 7-month Case List. This is the only copy that is accepted. Use the Case Log screen to view the list of all cases. Carefully proofread for accuracy. Handwritten information is not accepted. Once the case list is finalized it is not possible to add, delete, or modify any data. Printing must be done in advance to meet the April 21, 2006 deadline.

Note: The TOPS program displays a prompt to complete missing data elements before allowing you to proceed with the Finalize Case list action.

2. Obtain notarized affidavits from the medical record librarian/administrator of each institution (see Instructions for Data Compilation, above). Only the "Finalize Case list" printout may be used to obtain the notarized affidavits.

3. It is the candidate's responsibility to ensure that all materials have been proofread, placed in numerical order, and properly collated. Candidates should then copy the entire case list including notarized affidavits. The Candidate Affidavit should be the first page and the Statistical Summary Report should be the last page. Candidates often use this list for application to the American College of Surgeons. Therefore, candidates should retain an additional photocopy of the case list. The Board office does not supply copies. Candidates should save an electronic copy from the Internet site (using the “Save AS” option under File on the toolbar) to disk, CD, or personal hard drive for reference purposes.

4. Staple the "Candidate Affidavit Sheet" to the top left-hand corner of the first institution's section of your case list. Follow the same procedure for the copy. The Candidate Affidavit Sheet prints as the last page of the "Finalize Case List" Report. It should accurately note the total number of pages in the case list; eg, "these are all the cases from page 1 to 151."

5. Arrange the original 7-month case list, including the signed and notarized affidavits for each institution in numerical order with the pages for each institution stapled together at the top left-hand corner. Arrange an exact copy of the case list in the same manner. The end of each institution's case list is noted by the Institution Affidavit Sheet which includes the six-digit candidate number, name, address, telephone number(s), and notarized affidavit signed by the medical records administrator. Follow these instructions carefully. Improperly stapled case lists delay processing and review of the submissions.

6. Prepare the stapled original 7-month case list together, including the signed and notarized affidavits. Place the Statistical Summary Report on the bottom. Candidates should bind the entire 7-month case list using a clip or a rubber band. Follow the same procedure for the stapled copy. Do not place this material in binders, folders, notebooks, or sheet protectors.

7. Candidates are required to submit photocopies of all advertising materials to the Board. Examples of practice advertisements include, but are not limited to, business cards, letterhead, brochures, Web site content listing the candidate's qualifications, telephone book (yellow page) advertisements, and other print advertisements such as announcement flyers and magazine and newspaper advertisements and articles. No video or audiotapes are required. The candidate is instructed to refer to information on advertising in the Admissibility section of the Booklet.

Submitting Material to the Board Office

The deadline date for submission of case list materials for the November 2006 Examination is the close of the business day on April 21, 2006. No additions, deletions or modifications can be made after that date.

To summarize, candidates are required to submit the following items to the Board office:

• One original and one photocopy of the case list. This includes the signed and notarized affidavits for each institution and the top page, which is the Candidate Affidavit Sheet.

• One original and one photocopy of the Statistical Summary Report. Attached separately as the last page.

• One original only of all advertising materials including, but not limited to, business cards, letterhead, brochures, Web site content listing the candidate's qualifications, telephone book (yellow page) advertisements, and other print advertisements such as announcement flyers and magazine and newspaper advertisements and articles.

• Check in the amount of $600 (nonrefundable, United States currency only) made payable to The American Board of Plastic Surgery, Inc.

Submit all required material to the Board office: Seven Penn Center, 1635 Market Street, Suite 400, Philadelphia, PA 19103-2204.

The Board strongly recommends that candidates send materials by a guaranteed delivery carrier, thus providing assurance and receipt of delivery. Use of a guaranteed delivery carrier, which often can verify receipt of delivery within 30 minutes, eliminates candidate concerns regarding delivery by the deadline date and minimizes the need to call the Board office. Certified mail service does not provide a guaranteed delivery date.
Reminder
Candidates who do not provide the required items in the manner outlined will not be considered for admission to the Oral Examination.
Incomplete or incorrectly submitted items will be returned to the candidate with the Review Fee. No exceptions will be made regarding late, incomplete, incorrect or missing data from the case lists.
No case lists or other material will be accepted after the April 21, 2006 deadline date.

Photographic Documentation
Particular emphasis should be placed on the necessity of photographic documentation. Preoperative and postoperative photographs are mandatory for all cases selected for case reports, and intraoperative photographs may aid in further illustration of the clinical problem. The candidate must provide a signed, notarized affidavit attesting that all submitted photographs are the original and unaltered documentation of the five selected patient cases presented for the Oral Examination. The Board provides this form in the case report packet sent after the Reply Form (green) is received. Digital photographs are acceptable.

The Board advises candidates who have not acquired the habit of routine photographic documentation of all patients to do so immediately. Any cases from the collection period may be selected and all must have photographic documentation, including all hand cases (ie, carpal tunnel cases, etc). Transparencies are not acceptable.

It is the candidate’s responsibility to maintain patient confidentiality and to follow HIPAA Requirements and state law as appropriate. For all cases, the candidate must obtain a signed consent/release form for use of illustrations, photographs, or imaging records for examination, testing, credentialing, and/or certification purposes by The American Board of Plastic Surgery Inc. HIPAA requirements and state law must be followed. Wording for the consent a candidate must provide to the patient would be:

“I hereby grant permission for the use of any of my medical records, including illustrations, photographs, or other imaging record created in my case, for use in examination, testing, credentialing, and/or certifying purposes by The American Board of Plastic Surgery, Inc.”

Patient Signature
Witness Signature
Date

Board Review and Selection Process
The Board reviews the candidate’s 7-month case list and the Statistical Summary Report to determine if the candidate’s operative list reflects sufficient diversity, complexity, and volume of plastic surgery procedures to permit construction of a reasonable examination of the candidate for certification. In the event that the case list submitted is not adequate for selection of cases, the candidate will not be admissible to the 2006 Oral Examination. This will not count as an unsatisfactory performance.

The candidate may submit another case list for the following year. Candidates are notified in writing regarding case lists that the Board has found to be inadequate. This decision is final and not subject to appeal.

The Board selects five cases from the candidate’s case list and the candidate is required to prepare five case reports for these selected cases. The selected case reports will be prepared in the same format and with similar requirements as in past years.

Attending the Oral Examination
The Oral Examination will be conducted each fall or at such other time as deemed suitable by the Board. The examination will be given on the dates and at the times specified. No exceptions will be made.

Candidates admissible to the Oral Examination, who have five cases selected by the reviewers from the submitted case list materials, will be mailed an Announcement Packet on August 5, 2006. This Packet includes a Booklet of Information, Reply Form (green), a hotel reservation card, and the list of five selected cases for preparation of case reports.

Candidates must signify their intent to take the examination by completing and returning the Reply Form (green). Examination Fee of $1,000, a photocopy of a valid unrestricted medical license, and current verification of medical staff privileges in plastic surgery maintained throughout the case collection and examination process to the Board office by the close of the business day on September 1, 2006. Candidates must return all of the items above to be scheduled for the 2006 Oral Examination.

Important: All items on the Reply Form (green) must be completed. Candidates will not be scheduled for examination without a complete listing of hospital or academic appointments. Please note on the Reply Form if these privileges are pending with a full explanation of details.

Material received September 2, 2006, through September 8, 2006 will require a Late Penalty Fee of $700. Material received after the close of the business day on September 8, 2006, will not be accepted for admission to the Oral Examination.

Candidates are responsible for their own travel, hotel accommodations, and expenses.

Admission to the Oral Examination
Once the Reply Form and required materials are received and approved and the candidate is scheduled, the candidate will be mailed a case report preparation packet, including materials for assembling and binding the selected case reports. These materials include folders, tabs, indices, a Photographic Affidavit Sheet, Progress Note Section Dividers, and labels for the front of each folder. It is essential that candidates indicate the Board six-digit candidate number on each label to be affixed to the cover of each case report, along with the other required information.

The candidate will also be mailed an Admission Form (white) approximately 4 weeks before the examination. The Admission Form lists the candidate’s name, current address, candidate number, date and location of the examination, and the examination schedule.

The candidate must advise the Board office immediately by telephone if the Admission Form (white) is lost prior to the examination or for any change in address.

The Board reserves the right to independently corroborate medical records in case report submissions for the five Board selected cases and to review issues related to informed consent.

Withdrawal from the Examination
Candidates wishing to withdraw from the examination must provide written notice to the Board office at least 30 calendar days before the date of the examination. Candidates will be refunded $800, which is the Examination Fee less a processing charge of $700. Candidates who withdraw from the examination after this date or who fail to appear for the examination will forfeit the entire Examination Fee. Withdrawal is final. No rescheduling will be considered.
Case Report Preparation and Presentation Requirements for Case Reports

Insufficient Case Support Data
Candidates should review the selected cases as soon as possible after they are received, and must read carefully the instructions on case preparation detailed later in this Booklet. Failure to prepare the cases according to the specific instructions may lead to disqualification at the examination site. Questions regarding insufficient case support data, especially photographs, must be directed in writing to the Board office no later than October 1, 2006. The following materials, collated in the order below, must be present in each of the submitted case reports. Candidates are required to use folders, tab indices, Candidate Photographic Affidavit Sheets, and Progress Note Section Dividers provided by the Board to assemble each of the five case reports. This will facilitate review of the case reports by the Examiners.

Note: Patient names should be blanked out, with the exception of the initials, in all materials submitted as listed below to protect patient confidentiality. Sample: Terry L. Cullison.

The required materials are:

Before the First Tab:
1. One Selected Case List Summary Sheet
   (before the first tab of case report #1 only)
2. One Photographic Affidavit Sheet
   (before the first tab of case report #1 only; provided by the Board)
3. Title Page for each case report
   (before the first tab of each case report)

Tabs:
1. Narrative Summary
2. Photographs **
3. Operative Notes: Photocopies of the operative notes
4. Anesthetic Report: Photocopies of the anesthesia records
5. Laboratory Data: Photocopies of pertinent laboratory data
6. Pathology: Photocopies of pertinent pathology reports
7. Radiology: Photographs of the pertinent radiographs
8. Progress Notes: Copies of hospital progress notes and/or office/clinic notes (separate office/clinic from hospital notes with divider sheet provided)
9. Billing: Photocopies of bills including CPT codes and procedures with notarized statements
10. Other: if needed (eg, information from patient case before or after the 7-month case collection period if needed)

**Patient Photographic Consent Forms from the candidate’s office should be included in the photographic section of the case report folder. Patient names should be blanked out as noted above. Candidates must use the ten tab indices, provided by the Board, to divide the material compiled when assembling case reports for the required sections above.

See the detailed explanation of the requirements for each section below. The candidate is encouraged to read this section carefully. Incomplete, improper, or incorrectly organized presentation of this material is sufficient cause to disqualify a candidate for continued examination.

In the event that more than one procedure is performed on the patient during the 7-month case collection period, all procedures and hospitalization(s) that fall within the 7-month collection period must be included. Candidates are not required to document procedures that fall prior to or after the 7-month case collection period. However, if these procedures increase the understanding of the case, they should be included at the candidate’s discretion. Documentation for procedures falling outside the 7-month case collection period does not have to be complete—the candidate may be selective.

Note: If the records are not in English, an accurate, complete, and concurrent English translation of the entire record must be included.

Explanation of Requirements
These guidelines, based in part on suggestions from previous candidates, are provided as assistance for candidates to produce uniform and consistent case report submissions for an equitable examination.

Before the First Tab:
1. Selected Case List Summary Sheet
   (Before the first tab of case report #1 only)
Candidates must provide one Selected Case List Summary Sheet, typed on standard letter-sized (8 1/2" X 11") white paper. If necessary, copy multiple pages as a double-sided list. Insert the summary sheet(s) before Tab 1, at the beginning of the folder for case report #1. The list must be identified with the candidate name and six-digit Board candidate number. This is a separate page from the title sheet for case #1.

2. Photographic Affidavit Sheet
   (Before case report #1 only—one sheet, provided by the Board)
The Board provides one Affidavit Sheet, which must be signed and properly notarized, attesting that all digital or regular photographs are the original and unaltered documentation of the patient cases presented for the Oral Examination. The Candidate Photographic Affidavit must be placed immediately behind the Selected Case List Summary Sheet prior to the first Tab in case report #1.

3. Title Page
   (Before the first tab of each case report)
Each report must be typed or reproduced on standard, letter-sized (8 1/2" X 11") white paper with the candidate’s full name, Board candidate identification number, the Board case number (ie, #1, 2, 3, 4, & 5, not the assigned number from the case list compilation), the hospital or other identifying number (eg, office-assigned patient number—do not use the patient’s full Social Security number), the principal diagnosis, and the primary operation listed on the title page. Categorize cases exactly as was done on the 7-month case list compilation.

Tabs:
1. Narrative Summary (First Tab)
Preoperative, operative, and postoperative course of the patient is required. A final separate paragraph entitled “outcome” must be included. The outcome of the treatment and the final condition of the patient must be indicated. If more than one procedure was performed on the selected patient, this information will be included on the next page or in column format on one page.

2. Photographs
Preoperative and postoperative photographs, approximately 4" X 6" color, black and white or digital prints should be provided on standard letter-sized (8 1/2" X 11") white paper. The Board strongly recommends intraoperative photographs when they provide clarifying information. Note the one Photographic Affidavit Sheet (provided by the Board and placed behind the Selected Case List Summary Sheet) applies to all submitted photographs. It must be signed and properly notarized attesting that all photographs are original and unaltered documentation of patient cases presented for the Oral Examination. Diagrams or simple drawings may be substituted for intraoperative photographs only. Descriptive legends and dates of the photographs must be placed adjacent to or below each photograph.
The five Patient Consent or Release Forms for use of patient photographs and records must be included in each casebook. Consent or Release Forms should include each patient's permission for use of photographs and records for educational, testing, and credentialing purposes. Patient names should be blanked out, with the exception of the initials, on the consent form and on all materials to protect patient confidentiality.

3. Operative Report
This should include photocopies of originals for all operative reports for procedures performed by the candidate on this specific patient during the 7-month collection period. Operative reports of minor procedures performed by the candidate in the office during the 7-month collection period should also be included. Candidates may include photocopies of the operative reports of procedures performed outside the 7-month collection period if that another surgeon performed if they clarify the patient's course. All operative notes are to be grouped together in chronological order.

4. Anesthetic Report
Photocopies of the original anesthetic records are required. This should include all anesthetic records for procedures performed by the candidate during the 7-month collection period. Candidates may include photocopies of the anesthetic reports of procedures performed outside the 7-month collection period or that another surgeon performed if they clarify the patient's course. Anesthetic records should be organized in chronological order.

5. Laboratory Data
Photocopies of pertinent laboratory data are required. These should also be grouped together in chronological order. Candidates are encouraged to use their judgment when including this material.

6. Pathology
Photocopies of any pertinent pathology reports are required. All pathology reports should be organized in chronological order.

7. Radiology
Photographs of pertinent x-rays or scans are required. Actual x-rays are unacceptable. Each x-ray or scan must be dated in a manner that is easily visible. Photocopies of corresponding reports from the radiologist for each x-ray should be included in this section. This material should be organized in chronological order, with reports placed adjacent to the corresponding reproduction of the radiograph.

8. Progress Notes: Hospital Progress Records and Office/Clinic Notes
Photocopies of the original progress notes, including the patient's history and physical examination, discharge summaries, and all post-operative and post-discharge progress notes, both in the hospital and from the office/clinic records, including the initial consultation, must be included. If legibility is a problem, a typewritten copy may be added. Photocopies of physician orders, vital signs, and nursing notes are not necessary, and may be included only if they are needed to clarify the patient's course. All notes should be organized in chronological order. Hospital notes and office/clinic progress notes should be separated with the divider sheet provided by the Board. When excessively long hospitalizations result in progress note sections of such thickness that they cannot be bound in one case folder, this section may be edited of non-essential notes, bound separately, and brought to the examination. The candidate retains the notes and does not turn them in with the case reports. A notation regarding the editing must appear at the beginning of the progress note section. The candidate will produce this extra material only upon the examiners' request.

9. Billing (including CPT Codes)
Each case must include a copy of a bill with the dollar amount deleted.

All CPT Codes as listed on the case list must be included.

The individual responsible for generation of the bill must provide a notarized signature on each bill. This could be a billing company representative, hospital billing clerk, or a candidate's office manager. The signature should attest that the bill represents a copy of the actual bill sent or that the bill was not submitted to a patient or third party payors. The notary public verifies the identity of the person providing the signature.

If coding was not generated for a procedure, the affidavit should attest that no coding or billing was required. However, the CPT codes as listed on the case list should be included.

These bills include, but are not limited to:
1. Health Insurance Claim Forms (HICF)
2. Electronically generated bills
3. Bills to patients not submitted to third party payors
4. Cosmetic Procedures when no bill was sent
5. Procedures performed gratis for or charity
6. A computer-generated replacement for a missing bill

To facilitate review by examiners, procedures or CPT code descriptors must be included on the billing statement even though it may not be a part of the original bill.

CPT codes for Veterans Administration patients and services performed gratis should be coded exactly as any other case.

10. Other (Tenth Tab)
Any additional material such as procedures performed on the patient before or after the case collection period may be added here. Edited material from long hospitalizations should not be included in this tab.

Insufficient Case Support Data
Candidates should review the selected cases as soon as possible after they are received, and must read carefully the instructions on case preparation detailed in this document. Failure to prepare the cases according to the specific instructions may lead to disqualification at the examination site. Questions regarding insufficient case support data, especially photographs must be directed in writing to the Board office no later than October 1, 2006.

Disqualification of Case Reports
If a candidate is disqualified for continuation in the examination process because the Case Reports are judged unacceptable (for whatever reason) it will not be recorded as a failure. However, because the Board has incurred expenses to provide a candidate with an examination, a refund of $300, the Examination Fee less the processing charge of $700, will be refunded to the candidate.

Presentation of Case Reports
During the 45-minute examination, the candidate must be prepared to defend his/her treatment planning and choice of and execution of the operation, to present alternate treatment plans considered, and to discuss ethical or economic issues related to the case. Hospital and office records must clearly identify the candidate as the attending physician and surgeon. However, the candidate need not necessarily be the admitting physician, so long as he/she is clearly the attending plastic surgeon. Cases done by a resident under the candidate's supervision may be chosen by the Board and will be considered in the same way as cases done personally by the candidate.

The Board regards the Case Reports submitted as important evidence of the candidate's basic ability to carry out plastic surgical procedures and to organize and present information in a succinct and complete fashion. Improper or disorganized preparation of this material or evidence that the photographs or records have been
altered will be sufficient cause to disqualify a candidate for continued examination.

Examination Schedule
The Oral Examination will occupy 2 ½ days. A detailed schedule is included in the Announcement Letter. Candidates are required to be present for each day of the examination at the times listed in the Announcement Letter. Late arrival may result in denial of admission to the examination.

Instructions and Procedures
Candidates will receive specific instructions concerning the examination during the Registration and Orientation Session at the examination site. Candidates will also be given a schedule indicating the time, the room, and the Examiner Teams for the Case Report Session and the two Theory and Practice Sessions of the examination. Failure to appear on time for any session of the examination will lead to a grade of fail on that section. Candidates should be outside the examination room 10 minutes before the scheduled time for the Theory and Practice Sessions and 5 minutes before the Case Report Session. It is not necessary for candidates to announce their presence. If, however, a candidate has not been invited into the examination room by the examiners by 10 minutes after the scheduled time, candidates should notify the temporary Board office immediately.

The Board has made every effort to assign candidates to examiners whose knowledge of the candidate’s background would not bias their evaluation of the candidate’s performance. If a candidate finds that an examiner to whom he/she has been assigned played a role in the candidate’s training, is a friend or relative, is a professional associate, or has examined the candidate previously, the temporary Board office must be notified immediately. Unless conflicts are identified in advance of the actual examination, the conduct and grades of that session cannot be contested based on prior contact or knowledge.

Description of the Examination
Each examination session is designed to evaluate the candidate’s breadth and depth of knowledge, the ability to apply that knowledge in the solution of a wide range of clinical problems, and the candidate’s ability to assess matters related to ethics. During each session, the examiners are given some guidelines to follow. This approach facilitates uniformity of examination technique and limits duplication. Each of the examiners on each team will pose problems and questions to candidates.

The following criteria are provided to the examiners as guidelines.

The candidate:
1. Identifies the general problems
2. Considers reasonable goals in case diagnosis and management
3. Selects appropriate options in case diagnosis and management
4. Understands risks and benefits of various approaches
5. Addresses complications and unexpected problems adequately
6. Demonstrates ability to structure an alternative

The examination consists of one Case Report Session and two Theory and Practice Sessions. Each session is 40 minutes in duration.

Oral Examination Examiners
All examiners are diplomates of The American Board of Plastic Surgery, Inc., are active in the practice and/or teaching of plastic surgery, and have been certified by the Board for a minimum of 5 years. They are respected members of the profession and are known for their surgical knowledge, expertise, and scientific contributions. They have been formally instructed in the technique and purposes of the examination process. Each team includes a Senior Examiner, who is either a present or former Board Director or who has examined multiple times, and a Guest Examiner. Evaluators review performance of the teams during all examination sessions. The Evaluators are current or past Directors of the Board and do not participate in evaluation or grading of the candidate’s performance during the session observed.

The Case Report and Theory and Practice Sessions are considered as one total examination. Candidates will pass or fail on the strength of their combined performance on all three sessions of the Oral Examination.

At the conclusion of each examination session, candidates may be offered an opportunity to add to earlier answers, modify them, or simply comment on the examination process.

Three teams of two examiners will examine each candidate. All six examiners will give grades and all six grades combined will determine the passing or failing status of each candidate.

The Board is committed to the standard that the examination shall be as comprehensive and objective as can be practically offered. The intention is that every candidate be provided an equal opportunity to become Board Certified.

Change of Address
If a candidate’s address, as it appears on the Admission Form (white), is incorrect, the corrected or new address must be indicated on the Admission Form (white) in the space provided. This card is required when receiving the Result Letter on the last day of the Oral Examination. The Admission Form also contains a space to list the candidate name, as it should appear on the certificate.

Debriefing Session
On the evening of the last examination day, there will be a voluntary debriefing session, which the Board encourages candidates to attend, for the purpose of evaluating the examination.

Distribution of Result Letters to Candidates
Result letters will be distributed after the conclusion of the debriefing session offered on the third day of the examination. Candidates are required to present the Admission Form (white), photographic identification, and the candidate survey to the proctors in order to receive their result letters. Candidates not present for distribution of the result letters will have the letter mailed from the Board office the week following the Examination.

Cancellation of Examination
Should the ABPS, in its sole discretion, cancel the Oral Examination, or as a result of events beyond its control be unable to administer the Oral Examination at the appointed date, time, and location, or should ABPS fail to conclude a candidate’s Oral Examination, the ABPS is not responsible for any expense the candidate may have incurred in connection with the cancelled Oral Examination, nor for any expense the candidate may incur for any substitute Oral Examination.

Fee Schedule
Schedule: US funds only
Processing Fee - Training Evaluation $150
Application Registration Fee $500
Application Registration Late Penalty Fee $500
Written Examination Fee $1,250
Written Examination Late Penalty Fee $500
Written Examination Withdraw Fee $700
Written Examination Score Validation Fee $200
Oral Examination Case List Review Fee $500
Oral Examination Case List Late Penalty Fee $500
Oral Examination Fee $1,000
Oral Examination Late Penalty Fee $700
Oral Examination Withdrawal Fee (~30 days prior to exam) $700
Oral Examination Critique Fee $200
Missing Items Penalty Fee $100
Written and Oral Examination Fee $1,000
Reapplication Registration Fee $500
Credential Review Fee $150
Ethics Review Fee $150
Certificate Fee $100
Verification of Status Fee $25
Check Returned for Insufficient Funds Fee $50
Photocopying Fee $10
Repeat Examination Fee $500
Examination Fees above
Informal Appeal Fee $1,000
 Formal Appeal Fee $1,000

All fees must be submitted in United States currency by check or money order. Foreign currencies, including Canadian, are unacceptable.

Credit Cards are not accepted.

Fees are subject to change by the Board.

The fee schedule is applicable to current examinations and will apply regardless of when a candidate is approved for admission to the examination process.

The Board is a nonprofit organization, and the fees of candidates are used solely for defraying the actual expenses of the Board. The directors of the Board serve without remuneration.

Most fees are nonrefundable.

Diplomate Annual Dues Fee $100
An annual dues fee was initiated in 1999. The Board office sends out announcements annually. Retired diplomates are excluded from the annual dues request.

Because of the limited number of plastic surgeons certified by this Board, it may be necessary for the Board to request a voluntary annual contribution from its diplomates.

Repeat Examination Fee
Fees for repeat examinations are the same as for the current original examinations.

Refunds
For the Written Examination, a refund of the examination fee (less a processing charge of $700) will be granted provided the candidate submits a written request for withdrawal received in the Board office at least 30 calendar days prior to the date of the examination.

For the Oral Examination, a refund of the examination fee (less a processing charge of $700) will be granted provided the candidate submits a written request for withdrawal received in the Board office at least 30 calendar days prior to the date of the examination.

For either the Written or Oral Examination, candidates who notify the Board office in writing less than 30 calendar days prior to the examination date of their intent to withdraw, or who fail to appear for examination, will forfeit the entire examination fee. The Board may waive this rule only if the circumstances warrant.

Special Situations

Appeals Policy
The Board has established a policy relative to resolution of questions or disagreements regarding its decisions on admissibility to examination; the form, content, administration, or results of the Written Examination; the administration of the Oral Examination; and the revocation of certificates. If an individual has a concern in any of these areas, it should be expressed in writing to the Board office, and a copy of the Appeals Policy will be sent to that individual.

Examination of Candidates with Disabilities
The ABPS has established a policy regarding examination of candidates with disabilities. If a candidate is requesting an accommodation based on a disability, the request should be expressed in writing to the Board office when submitting the Application for Examination and Certification Form. A copy of the policy regarding Examination of Candidates with Disabilities will be sent to that candidate. The ABPS complies with the Americans with Disabilities Act (ADA) and will provide reasonable accommodations to candidates with proven disabilities.

All materials submitted to document a disability must be received in the Board office in a timely fashion but no later than the deadline for all other documents required for admission to the examination for which accommodation is sought.

Examination Irregularities
The validity of scores on the Board's examinations is protected by every means available. The Board will not report a score which it has determined to be invalid, ie, which does not represent a reasonable assessment of the candidate's knowledge or competence sampled by the examination. The performance of all candidates is monitored and may be analyzed for the purposes of detecting invalid scores.

Prometric Test Center (PTC) proctors supervise the Written Examination to ensure that the examination is properly conducted. If evidence by observation or analysis suggests that a candidate's scores may be invalid because of irregular behavior, the Board will withhold those scores pending further investigation and the affected candidate will be notified.

Examples of irregularities affecting the validity of scores would include (but not be limited to) the following: 1) using notes; 2) sharing information or discussing the examination in progress; 3) copying answers from another candidate; 4) permitting one's answers to be copied; or 5) unauthorized possession, reproduction, or disclosure of examination questions or other specific information regarding the content of the examination, before, during, or after the examination.

In such circumstances, upon analysis of all available information, the Board will make a determination as to the validity of the scores in question. If the Board determines that the scores are invalid, it will not release them, and notification of that determination may be made to legitimately interested third parties.

Candidates or other persons who are directly implicated in an irregularity are subject to additional sanctions. For example, the Board may bar such persons permanently from all future examinations, terminate a candidate's participation in an ongoing examination, invalidate the results of the candidate's examination, and withhold or revoke a certificate or take other appropriate action. Candidates or other persons subject to additional sanctions will be provided with a written notice of the charges and an opportunity to respond to such charges in accordance with the reconsideration and appeal procedure established by the Board.

Substance Abuse or Chemical Dependency
Candidates with a history of abuse of a controlled substance or chemical dependency will not be admitted to any examination unless they present evidence satisfactory to the Board that they have successfully completed the program of treatment prescribed for their condition and the Board is satisfied that they are currently free of such substance abuse or chemical dependency.
Certification

After candidates have met the requirements for admissibility and passed the examinations, the Board will issue certificates attesting to their qualifications in plastic surgery. A surgeon granted certification by the Board is known as a diplomate of the Board.

It shall be the prerogative of the Board to determine the fitness, professionally and ethically, of any candidate for a certificate, and the Board, for cause, may defer or deny certification to any candidate.

Certificates

Certificates issued by the Board shall be in such form as the Directors may from time to time determine. Certificates are signed by the chair, vice-chair, and secretary-treasurer of the Board and shall have placed upon them the official seal of the Board.

Certificates of the Board shall state that the holder has met the requirements of the Board and is certified by the Board as a medical specialist in plastic surgery and is entitled to be known as a "Diplomate of the American Board of Plastic Surgery, Inc." The names of all diplomates will be submitted to the American Board of Medical Specialties (ABMS) for publication in its directory. Diplomates should notify the Board in advance if they do not wish to be listed.

Additional certificates are available upon written request. A fee of $100 for each certificate ordered should be included with the request. The diplomate's name should be listed, as it should appear on the certificate.

Recertification Program/Maintenance of Certification in Plastic Surgery (MOC/PS)

Effective 1995, certificates issued by the Board are dated and valid for 10 years. Certificates issued prior to 1995 are valid indefinitely. A diplomate may enter the Recertification Program during the 3 years preceding the certificate's original expiration date.

The Recertification Program has several key components, including evidence of 1) professional standing, 2) lifelong learning, 3) practice profile and 4) successful completion of cognitive examination. Refer to the Recertification Booklet of Information and the information posted on the Board's Web site.

The Recertification Program will be phased into the Maintenance of Certification Program in 2007.

Revocation

Any diplomate of the Board will be subject to disciplinary action, including suspension and revocation, if at any time the Board determines, in its sole judgment, that the diplomate holding the certificate was not properly qualified to receive it or the diplomate holding the certificate has violated any of the following reasons for disciplinary action:

1. Conviction of a felony;
2. The diplomate did not possess the necessary qualifications and requirements to receive the certificate at the time it was issued;
3. The diplomate misrepresented his/her status with regard to Board certification, including any misstatement of fact about being Board certified in any specialty or subspecialty;
4. The diplomate engaged in conduct resulting in discipline by any medical licensing authority or in a revocation, suspension, qualification, or other limitation of his/her license to practice medicine in any jurisdiction;
5. The diplomate engaged in conduct resulting in the expulsion, suspension, disqualification, or other limitation from membership in a local, regional, national, or other organization of his/her professional peers;
6. Resignation from any organization while under investigation.

The diplomate will be given written notice of the reasons for the Board's action by registered or certified mail to the last address that the holder has provided to the Board. Discipline is final upon the mailing of the notification.

Individuals may appeal the decision imposing discipline by complying with the Appeals Policy. Failure to make a timely appeal will result in a loss of appeal rights.

The Board may discipline a diplomate for just and sufficient cause, at its discretion, reinstate the diplomate after an appropriate review of the diplomate's licensure and performance.

Each certificate issued by the Board shall be subject to revocation if the diplomate so certified has made any misstatement of material fact, or has failed to make any statement of material fact, in his/her application for such certificate or in any other statement or representation to the Board or its representatives, or has otherwise acquired the certificate by deception. Upon revocation, the certificate must be returned to the Board.

The Board shall have the jurisdiction and right to determine whether or not the information placed before it is sufficient to constitute grounds for the revocation of any certificate. The diplomate will be provided with a copy of the Appeals Policy of the Board, and this policy will be observed in pursuing resolution of the problem.

Certification and Recertification in the Subspecialty of Surgery of the Hand (formerly CAQSH)

The Board offers an examination for Certification and Recertification in the Subspecialty of Surgery of the Hand. The examination is described in a separate Hand Surgery Booklet of Information, which may be obtained from the Board office upon request. There is no requirement necessarily for a certificate of The American Board of Plastic Surgery, Inc., to hold a Certificate in the Subspecialty of Surgery of the Hand in order to be considered qualified to include hand surgery within the practice of plastic surgery.

Under no circumstances should a diplomate be considered not qualified to practice within an area of a subspecialty solely because of lack of subspecialty certification.

Foreign Certificates

A physician holding a foreign certificate issued by the Board between 1969 and 1973 must relinquish the certificate to the Board in the event that the individual returns to the United States for the purpose of practicing plastic surgery. A foreign certificate is not valid in the United States. Such individuals may apply for examination and certification in the manner described herein.

Inquiries as to Status

The Board does not consider a candidate's record to be in the public domain. When an inquiry is received by the Board regarding a candidate's status with the Board, a general, but factual, statement is provided which indicates that candidate's status within the process of certification. The Board provides this information only to individuals, organizations, and institutions with a reasonably valid "need to know" for professional reasons. Only written requests for verification of a candidate's status during the process of certification are accepted.

A charge of $25 will apply to all individuals, institutions and/or organizations that submit a written request for information on the status of an individual.

Important Dates and Deadlines

Written Exam - Computer Based Test: October 16, 2006
Senior Resident's Form Due: December 31, 2005

Requirements for Admission to Examinations

Each applicant for a certificate in aerospace medicine, occupational medicine, or public health and general preventive medicine must meet certain requirements to be admitted to the certifying examination. Such requirements are determined by the American Board of Preventive Medicine (ABPM).

Approval for admission to the examination can only be established after the review of a complete application by the full Board. No individual member of the Board is authorized to give an opinion on the admissibility of candidates, nor does the Board do preliminary credential reviews.

For the information of applicants, such requirements are summarized below. An applicant worksheet is available from the ABPM Web site at www.abprevmed.org for use in comparing the ABPM requirements to an applicant's training and experience.

General Requirements

1. Medical School: Graduation from a medical school in the United States which at the time of the applicant's graduation was accredited by the Liaison Committee on Medical Education, a school of osteopathic medicine approved by the American Osteopathic Association, an accredited medical school in Canada, or a medical school located outside the United States and Canada that is deemed satisfactory to the Board.

2. Current License(s): Unrestricted and currently valid license(s) to practice medicine in the District of Columbia or a state, territory, commonwealth, or possession of the United States or in a province of Canada. No license may be restricted, revoked, or suspended or currently under such notice.

3. Clinical Year: A year of supervised postgraduate clinical training provided as part of a graduate medical education program accredited by the Accreditation Council for Graduate Medical Education (ACGME). Clinical training accredited by the Royal...
College of Physicians and Surgeons of Canada or the College of Family Physicians of Canada is also acceptable. The training must include at least 6 months of direct patient care comprising ambulatory and inpatient experience with hands-on patient care involving diagnostic workup and treatment of individual patients.

4. Academic Year: Successful completion of a course of graduate academic study and award of a Master of Public Health or equivalent masters or doctoral post-graduate degree, the course content of which shall include biostatistics, epidemiology, health services management and administration, and environmental health.

5. Practicum Year: Residency practicum of not less than 1 year that is accredited by the ACGME in the specialty area for which certification is being sought and that shall have provided supervised experience in the practice of that specialty area of preventive medicine and planned instruction, observation, and active participation in a comprehensive organized program.

6. Current Practice: The applicant must have been engaged in essentially full-time training for, or practice in, the specialty area for which certification is being sought for at least 1 of the 3 years preceding application for certification (alternative pathway and special pathway applicants will need to demonstrate 2 of the 5 years preceding application for certification in the specialty area for which certification is being sought).

Special Requirements in Aerospace Medicine, Occupational Medicine, and Public Health and General Preventive Medicine

A period of not less than 1 year of supervised training and instruction, accredited by the ACGME in the specialty area for which certification is being sought, is required. (See No. 5 under "General Requirements," above.)

Alternative Pathway to Certification

Persons graduating from a school of medicine or school of osteopathic medicine prior to January 1, 1984, who have not formally completed all of the components previously described, may be considered for admission to the examination if their training and experience are judged by the Board to provide a suitable alternative to formal training.

The Board will consider granting credit toward satisfying training requirements for such factors as:

1. Completion of 3-credit hour, postgraduate-level academic course work in each of the four core areas: epidemiology, biostatistics, health services management and administration, and environmental health or teaching one or more of the four courses at the postgraduate level and that is acceptable to the Board; and

2. Periods of full-time practice, research, or teaching in the specialty area of preventive medicine in which certification is sought. A total of 8 years of full-time practice is required if no other specialty certification is held, but may be reduced to 6 years if certification is held in another specialty recognized by the American Board of Medical Specialties (ABMS). For those with an MPH or equivalent masters or doctoral postgraduate degree but no practicum year, a period of 4 years of full-time practice is required in the specialty area of preventive medicine for which certification is being sought, a period that can be reduced to 3 years if other ABMS specialty certification is held.

Each applicant is considered individually by the Board in accordance with the existing guidelines. An applicant worksheet is available from the ABPM Web site at www.abprevmed.org for use in comparing the ABPM requirements to an applicant's training and experience. Practice time needed for the alternative pathway to certification is summarized on this worksheet. Applications must be received by June 1 of each year. Requirements must be completed by August 1 of the year in which the applicant wishes to sit for the examination.

Persons graduating from a school of medicine or school of osteopathic medicine after January 1, 1984, will be admissible to the examination only after completing ACGME-accredited residency training in preventive medicine. This alternative pathway to certification is not available for such graduates.

Special Pathway for ABPM Diplomates

Diplomates of ABPM who have graduated from medical school after January 1, 1984, may request consideration through a special pathway. In order to qualify for this special pathway, applicants must have completed an ACGME-accredited residency in a specialty area of preventive medicine, been certified in that specialty area, be applying for certification by ABPM in an additional preventive medicine specialty area, and have sufficient practice time to meet the requirements. A total of 2 years of essentially full-time practice is required in the specialty area for which the additional certification is sought. In addition, the applicant must have been engaged in essentially full-time training for, or practice in, the specialty area for which the second certification is being sought for at least 2 of the last 5 years.

Subspecialties

Medical Toxicology

Every 2 years the ABPM offers subspecialty certification in medical toxicology to ABPM diplomates who meet the appropriate requirements for medical toxicology. Applications for the 2006 examination cycle will be available from the Board office beginning in March 2006 and will be accepted with postmark dates through May 1, 2006.

Undersea and Hyperbaric Medicine

ABPM offers subspecialty certification in undersea and hyperbaric medicine in late fall each year to physicians who hold current certification by one of the ABMS member boards and meet the appropriate requirements in undersea and hyperbaric medicine. The American Board of Emergency Medicine (ABEM) also offers subspecialty certification in undersea and hyperbaric medicine. Those physicians certified only by the ABEM must apply through that Board.

Internet Web Site

ABPM has a Web site that includes the latest version of its application and other publications: www.abprevmed.org. Please refer to this Web site address for current information about the ABPM.

Application

Applications are available on the ABPM Web site (www.abprevmed.org) from March 1 to June 1. The deadline for applications is June 1st each year. Applicants are encouraged to use the online application process. If you choose to submit a paper application, there will be a $200 processing fee in addition to the application fee.

Applicants requiring special examination accommodations due to a disability should contact the Board office to obtain the Application for Testing Accommodations form. This form is required at the time the examination application is submitted.

Examination

The examination is a 1-day computer-based examination given in late fall each year. It is administered at Pearson VUE Professional Centers across the United States. This multiple choice examination consists of a morning portion covering the core knowledge of preventive medicine and an afternoon portion covering either
aerospace medicine, occupational medicine, or public health and general preventive medicine.

The subspecialty examination in undersea and hyperbaric medicine is a 1½-day computer-based examination. The subspecialty examination in medical toxicology is administered every other year by the American Board of Emergency Medicine. The next offering is 2006.

Reapplication and Reexamination
An applicant approved for admission to the examination who does not take the examination, or who fails to pass the examination within the 3-year approval period, is required to fill a new application and pay a new application fee.

Applicants not approved for admission to the examination may request reconsideration of their applications on the basis of new or additional information within 2 years of the filing date of the original application, with payment of the re-review fee.

Candidates not passing the examination may, upon timely registration and payment of appropriate fee, be admitted to reexamination during their approval period.

A candidate who has failed the examination on two or more occasions may be required to have additional training, in accordance with recommendations from the full Board, before being admitted to further examination.

Beginning with the exam offered in 2001 applicants who passed only the Core or Specialty Area component of the examination may achieve certification by retaking and passing the failed component of the exam at the next offering (approximately 1 year later). This policy applies only to the next examination offering; an examinee does not pass the component at the next examination offering, taking both components of the examination will be required on future attempts.

Multiple Certification
An individual may apply sequentially for admission to examination in more than one specialty area of preventive medicine. Applicants may not apply in more than one specialty area in a given year. An applicant must fulfill the individual requirements of each specialty area in which application is made and cannot double-count the same periods for practice time.

Beginning with applicants who passed both the Core and Specialty Area components of the exam offered in 2001, diplomats may achieve certification in an additional specialty area by qualifying for, taking, and passing only the Specialty Area component of the exam within 7 years of their initial certification.

Certification
Upon satisfactory completion of the examination, a certificate will be issued stating that the applicant has been found to possess special knowledge in the specified specialty area of preventive medicine. The certificate will be signed by officers of the Board and will have the seal of the Board affixed. Each certificate remains the property of the Board, but the person to whom it is issued is entitled to its possession unless it is revoked.

Any certificate issued by the Board may be revoked if evidence, satisfactory to the Board, is presented that the applicant was not eligible to receive it at the time of issuance; or that any pertinent fact had been misrepresented, or concealed; or that any license to practice medicine has been suspended or revoked. [Note: The issuance of a certificate to a person does not constitute membership on the Board.]

Time-Limited Certificates
Note: By action of the Board in August 1994, ABPM now issues 10-year, time-limited certificates. The first time-limited certificates were issued in 1998 to candidates who passed the certifying examination given in November 1997.

Notice of Certification
The examination results, without individual identifiers, are reviewed by the full Board in January. Final determination of candidates' certification status is made at that time.

Candidates who have taken the examination may expect to be notified of results by mail within 3 months after taking the examination.

Fees
The members of the Board serve without compensation. Fees are based on the actual expenses incurred in review of applications, examination development, administration and scoring, and office administration.

A nonrefundable application fee of $400* is required if the applicant holds an MPH or equivalent masters or doctoral postgraduate degree and has completed an ACGME-accredited residency in the specialty area of preventive medicine in which certification is sought.

A nonrefundable application fee of $685* is required if the applicant is applying through the alternative pathway to certification.

A nonrefundable application fee of $570* is required if the applicant is applying through the special pathway for ABPM diplomates.

An additional application fee, there is a $200 processing fee for paper applications.

A nonrefundable re-review fee of $185* is required to reactivate an application within 2 years of the original review.

An additional fee of $60* may be required for an incomplete application after the July 15 deadline.

Fees for the Subspecialty of Medical Toxicology
The next offering of Medical Toxicology will be in 2006. Fees are to be determined.

Fees for the Subspecialty of Undersea and Hyperbaric Medicine
A nonrefundable application fee of $375* is required if the applicant is applying through the fellowship pathway.

The examination fee of $1,700* is due with the application fee.

*Note: All fees are reviewed annually and are subject to change at the direction of the Board. Please contact the Board office for the current fee schedule.

Listing of Individuals Certified
A list, current to the date of publication, of persons to whom certificates have been issued by the Board may be found in The Official ABMS Directory of Board Certified Medical Specialists, the ABMS Web site at www.abms.org, and the ABPM Web site at www.abpvedmed.org.

Reporting of Changes of Address
Once certified, physicians should notify the following offices in writing of any changes of address:
1. The American Board of Preventive Medicine, Inc, by completing the online address change form at www.abpvedmed.org
2. The Physician Biographic Records Department, American Medical Association, 515 N State St, Chicago, IL 60610, the office that maintains a master file of all physicians in the US
3. The American Board of Medical Specialties, 1007 Church St, Ste 404, Evanston, IL 60201, source of the records for The Official ABMS Directory of Board Certified Medical Specialists

Important Dates
- April 15 — Deadline for receipt of action plans from candidates failing examinations on two or more occasions.
- June 1 — Deadline for completed application forms, application fees, and reapplication requests to be received in the Board office for the examination.
- June 1 — Deadline for receipt of re-review requests and fees.
- July 15 — Deadline for receipt of additional information not included with the June 1 application.
- August 1 — Deadline for completion of requirements to sit for the examination.
- August — Meeting of the Board to determine admissibility of applicants to the examination. Letters of notification of admissibility for the examination are mailed to candidates after the August Board meeting. Notification is not given by telephone.
- Fall — Annual 1-day computer-based examination at various sites across the United States. Current examination dates are listed on the ABPM Web site at www.abpvmed.org.
- January — Meeting of the Board to determine the pass/non-pass score for the examination.
- January — Results of the certifying examination are mailed to candidates. Notification is not given by telephone.

Applicants With Disabilities and Qualifications for Testing Accommodations

General Information
The Board recognizes that physicians with disabilities may wish to take the certifying examinations and will attempt to make accommodations for applicants with verified disabilities. The Board supports the intent of the Americans with Disabilities Act (ADA). Applicants are reminded, however, that "auxiliary aids (and services) can only be offered if they do not fundamentally alter the measurement of skills or knowledge the examination is intended to test" (Americans with Disabilities Act, Public Law 101-336 (§309 [b][3])). To this extent, the Board will provide reasonable accommodations during testing to provide equal opportunity for persons with disabilities. The documentation requesting reasonable accommodations must identify a disability and provide a rationale for specified accommodations to standard testing procedures.

Applicants who request accommodations because of a disability must advise the Board in writing no later than the deadline for filing an application for examination. All documentation and other evidence substantiating the disability must be submitted to the Board no later than 30 days after the deadline for filing an examination. Required documentation includes completion of the Application for Testing Accommodations and appropriate checklists. If the Board deems it necessary, an independent assessment may be requested at the expense of the Board.

Documentation and other evidence substantiating the disability include, but are not limited to, each of the following:
- A report diagnosing the applicant's disability written by a professional appropriately qualified for evaluating the disability. The report must be printed on the certified examiner's letterhead, with the examiner's credentials, address, and telephone number given in the letterhead or title. The report must include the candidate's name, date of birth, and date of testing, and it must be signed by the examiner.
- A history of the disability, including previous settings in which accommodations have been granted. Having had prior accommoda-

(Please note that this is not an official document of the American Board of Psychiatry and Neurology, Inc. The Board cannot accept responsibility for errors made in the printing of this material. Please contact the Board’s executive office for official policies and procedures of the Board.)

Throughout this section, the American Board of Psychiatry and Neurology may be referred to as the “Board” or as “ABPN.”

The information in the ABPN section is effective for the October 23-27, October 30-November 3, November 6-10, 2006, specialties examinations only. Contact the Board office for the most current information.

Deadline for the October 23-27, October 30-November 3, November 6-10, 2006, Specialties Examinations

Part I Application: February 1, 2006
Part I Late Application: March 1, 2006
Completion of residency training: June 30, 2006
Written confirmation of completion of residency training: July 15, 2006
Part I Reexamination Fee: Board will notify applicant

(Contact the Board office if you have not received a reexamination billing statement by February 15, 2007.)

Fee Schedule (Effective March 2006)

Note: All fees must be submitted in US currency.

Part I Application Fee $700
Part I Examination Fee $500
Total fees $1,600
Part I Late Application Fee (in addition to the above) $500
Part I Rescheduling Fee $300
Part I Reexamination Fee* $950
Part I Reexamination Late Application Fee (in addition to the above) $500
Part I Examination Fee $1,775
Psychiatry Part II Reexamination Fee* $1,775
Neurology/Child Neurology Part II Reexamination Fee:
One section $1,200
Two or three sections $1,775
Application/Licensure Appeal Fee $250
Part I Appeal Fee $300
Part II Feedback Fee $100
Part II Appeal Fee $750
One section $1,000
Two or three sections $1,775
Irregular behavior appeal fee $350
Application for testing accommodations appeal fee $350
Duplicate certificate fee $150
Returned check charge $50

*Reexamination fees are in addition to any appeal fees.
^Appeal fees are refundable if decision is in applicant’s favor. The ABPN reserves the right to revise fee schedules at any time.

I. General Information

A. Introduction

I. History

The ABPN is a nonprofit corporation that was founded in 1934 following conferences of committees appointed by the American Psychiatric Association, the American Neurological Association, and the then Section on Nervous and Mental Diseases of the American Medical Association. This action was taken as a method of identifying qualified specialists in psychiatry and neurology.

II. Mission Statement

The mission of the ABPN is to serve the public interest and the professions of psychiatry and neurology by promoting excellence in practice through certification and maintenance of certification processes.

Methods for achieving that goal include (but are not limited to) efforts to:
1. Describe, in terms of knowledge and skills, a physician with special expertise in evaluation, diagnosis, and treatment of patients with psychiatric and/or neurologic disorders or who require psychiatric and/or neurologic assessment.
2. Set the standards for knowledge and skills required for certification.
3. Construct and administer examinations designed to evaluate required knowledge and skills.
4. Monitor, evaluate, and improve the standards and procedures of the certification process.
5. Participate in the appropriate Residency Review Committees of the Accreditation Council for Graduate Medical Education (ACGME) to set standards for the quality and scope of residency training programs to ensure that their graduates will obtain necessary training credit toward certification.
6. Issue certificates and other forms of recognition to successful candidates.
7. Make lists available of diplomates who have fulfilled the requirements for certification.
8. Inform the public, other professions, and other medical organizations of the purposes, activities, and responsibilities of the ABPN.
9. Participate in the activities of the American Board of Medical Specialties (ABMS) and its member boards.

Graduate Medical Education Directory 2006-2007

997
iii. Composition of the Board
The Board consists of 16 voting members. The nominating organizations for psychiatry are the American College of Psychiatrists, American Medical Association, and American Psychiatric Association; for neurology, they are the American Academy of Neurology and American Neurological Association. Each of these organizations proposes nominees to serve on the Board, but the Board itself selects its members. The Board is independently incorporated.

Elections to fill the places of members whose terms have expired take place annually. Neurology and psychiatry are always represented equally on the Board. The Board holds meetings several times each year for the purpose of examining candidates and transacting business.

iv. Conflict of Interest
To maintain the confidence of the public and the medical profession in the integrity of the Board, it is important for those doing its work to avoid certain activities that could provide opportunity for a conflict of interest or the appearance thereof. A conflict of interest is defined as an instance wherein a competing outside activity or holding could influence or appear to influence the Board’s activities in the area of policy development, evaluation of training programs, or examination development. Examples of such competing outside interests are compensated direct employment, paid advisory or consultant positions, significant personal investments, or other affiliations as an officer and/or director in a pharmaceutical or medical supply company.

As an alternative to regulating investment or employment, the Board has chosen to manage matters related to the appearance of a conflict of interest by encouraging disclosure of significant financial interests or relationships and abstention from participation in decision-making related to a matter that could give rise to a conflict of interest (due to a material financial interest or relationship).

Annually, Board members, test committee members, written examination proctors, the Executive Vice President, and staff members of the Board are required to complete a form disclosing the following general information:

1. License restrictions to practice medicine.
2. Participation in board review courses or publication of materials in any media format, including the Internet, regarding board review in psychiatry, neurology, or any of the subspecialties.
3. Significant financial holdings in any pharmaceutical or medical supply company.
4. An affiliation in the capacity of trustee, officer, director, or other major capacity with any pharmaceutical or medical supply company.
5. Any other affiliations that would present a potential or apparent conflict of interest or commitment.

Any individual who participates in any review course that is publicized as being a board review course, or in any course that could be construed as a board review course, or who has edited or provided written or audiovisual materials for publications identified as preparation for Board examinations, or who copies, reproduces, or discloses examination materials or content should not participate as an examiner in any oral examination, as a proctor in any written examination, or as a member of any Board committee for at least 12 months subsequent to the course or publication of any written or audiovisual materials.

All ABPN examiners are diplomates of the ABPN.

v. Certificates
The Board currently issues certificates for the following specialties:

- Psychiatry
- Neurology
- Neurology with special qualification in child neurology

- The Board also currently issues certificates for the following subspecialties:
  - Addiction psychiatry
  - Child and adolescent psychiatry
  - Clinical neurophysiology
  - Forensic psychiatry
  - Geriatric psychiatry
  - Neurodevelopmental disabilities
  - Pain medicine
  - Psychosomatic medicine
  - Vascular neurology

A physician may be certified in more than one area and will receive a separate certificate for each area in which he or she qualifies. Each certificate shall be in such form and for such period of time as specified by the Board.

B. Rules and Regulations
In carrying out its specified functions, the Board has formulated rules and regulations to guide its activities and to communicate to applicants and other interested persons its policies regarding training requirements, examinations, fees, etc.

These rules and regulations are amended from time to time. The statements contained in this publication are the most recent amendments and represent the policies of the Board as of the date of this publication.

The Board has authority to periodically issue and thereafter amend the rules and regulations relating to the issuance and revocation of certificates of qualification in the practice of psychiatry, neurology, child neurology, and the recognized subspecialties.

C. Licensure
Throughout the certification and maintenance of certification processes, physicians must hold an unrestricted license to practice medicine in at least one state, commonwealth, territory, or possession of the United States or province of Canada. If licenses are held in more than one jurisdiction, all licenses held by the physician must meet this requirement, subject to the exceptions noted below.

An unrestricted medical license is a license to practice medicine that has been issued by an appropriate licensing board and contains no restrictions on the physician’s privilege to practice professionally. Restrictions include, but are not limited to, revocation, suspension, condition, negotiated agreement, stipulation, probation, or contingency.

Subject to the exceptions noted below, certification shall continue in force only as long as the holder has an unrestricted medical license in at least one state, commonwealth, territory, or possession of the United States or province of Canada. If licenses are held in more than one jurisdiction, all licenses held by the physician must meet this requirement. An unrestricted medical license must be maintained even if a physician is out of the country for extended periods of time.

A candidate in possession of any restricted medical license, even if the candidate also possesses an unrestricted license, will not be scheduled for examination, be issued a certificate, be authorized to be in possession of a certificate, or be allowed to represent himself or herself as an ABPN-certified physician.

It is the responsibility of the candidate/diplomate to inform the Board immediately upon a change in licensure status.

Exceptions
Restriction of a physician’s medical license does not include voluntary participation in an impaired physicians’ program or other appropriate, monitored alcohol or chemical substance-abuse recovery program if the physician has not been reported to either the National Practitioner Data Bank or the Data Bank of the Federation of State Medical Boards.
Restriction of a physician’s medical license does not include medical licenses that, when issued, are limited to a geographic area within a jurisdiction (eg, practice limited to underserved areas) as long as such licenses are not in any way limited due to, because of, or by virtue of a disciplinary, legal, or administrative action against the license holder.

Applicants who do not yet have an unrestricted medical license because they are in training are not required to submit a copy of their medical license at the time of application for the Part I examination. However, such applicants must submit a copy of their unrestricted medical license no later than December 15 of the year in which they sat for the Part I examination. Applicants holding more than one license must submit a copy of each license. Candidates who do not submit copies of their medical licenses by the December 15 deadline will not be scheduled for the Part II examination until the Board office receives copies of the candidate’s medical licenses.

D. Recertification and Maintenance of Certification

Recertification

As of October 1, 1994, all individuals achieving Board certification by the ABPN are issued 10-year, time-limited certificates. Certificates issued in the subspecialties of addiction psychiatry, clinical neurophysiology, forensic psychiatry, geriatric psychiatry, neurodevelopmental disabilities, pain medicine, psychosomatic medicine, and vascular neurology, including those issued prior to October 1, 1994, are 10-year, time-limited certificates. Time-limited certificates for child and adolescent psychiatry began in 1995. All ABPN time-limited certificates, regardless of their exact dates of issuance, are considered to expire 10 years later on December 31.

Diplomates who are not recertified before their certificates expire are no longer Board-certified in that area of certification. Once a former diplomate passes the recertification examination, however, he or she will regain certification status.

Diplomates with certificates in the subspecialties of addiction psychiatry, clinical neurophysiology, forensic psychiatry, geriatric psychiatry, pain medicine, psychosomatic medicine, and vascular neurology must also maintain certification in their specialty in order to apply for recertification in the area of subspecialization. Diplomates in neurodevelopmental disabilities must maintain certification in neurology with special qualification in child neurology. If certification in the specialty lapses, certification in the subspecialty is no longer valid.

Diplomates in child and adolescent psychiatry do not need to maintain current certification in general psychiatry for their subspecialty certification to remain valid and to recertify in child and adolescent psychiatry.

There is no time limit on regaining certification status through recertification. It is the responsibility of diplomates to contact the Board office to request application materials for recertification.

Diplomates applying for the 2006 recertification examinations are required to satisfy the licensure requirements (See Section 1.C) and pass the cognitive (recertification) examination in order to renew their certification status.

Maintenance of Certification

As mandated by the American Board of Medical Specialties, the Board is in the process of completing the development of its maintenance of certification (MOC) program. The ABPN MOC program includes four components:

1. Professional standing
2. Lifelong learning and self-assessment
3. Cognitive expertise
4. Performance in practice

Diplomates applying for the 2007 cognitive (recertification) examination will be required to fulfill the ABPN maintenance of certification requirements for components 1, 2, and 3 as listed below:

1. Professional standing
   To show evidence of professional standing, the ABPN requires that diplomates hold an unrestricted license(s) to practice medicine in at least one state, commonwealth, territory, or possession of the United States or province of Canada as described in Section 1.C.

2. Self-assessment and lifelong learning
   Diplomates of the ABPN will be required to give evidence of participation in some self-assessment activity or activities. Such activities may include, but are not limited to formal programs sponsored by specialty societies. The ABPN reserves the right to approve or reject any course or guideline submitted.

   The following materials are approved as self-assessment activities for neurology:
   - Post-reading questions from Continuum
   - Quintessentials® Program modules
   - Organized post-CME activities (after Category 1 activity)

   The following materials are approved as self-assessment activities for psychiatry:
   - The Psychiatrist in Practice Examination (PIPE)
   - Post-reading questions from Focus
   - Focus annual self-assessment exam supplement - 100 items
   - APA Practice Guidelines Program - 12 online credits on the ACGME Web site (acgme.org)
   - Organized post-CME activities (after Category 1 activity)

   The following materials are approved as self-assessment activities for child and adolescent psychiatry:
   - AACAP Module 1 Disruptive Behavior Disorders, Violence and Homicide
   - Post-reading questions from Focus
   - Organized post-CME activities (after Category 1 activity)

   Diplomates of the ABPN will be required to complete an average of 30 specialty- or subspecialty-specific, Category 1 continuing medical education (CME) credits per year over the ten-year MOC cycle. In the event a diplomate is certified in two or more areas, the specialty- or subspecialty-specific credits may accrue from one or all disciplines and count for multiple certifications. The implementation of this component is being phased in on a graduated basis beginning in 2007. Diplomates will be required to maintain a record of their CME and self-assessment activities.

   For example, diplomates applying for the 2007 cognitive (recertification) examination, will be required to show evidence of participation in some self-assessment activity and completion of 30 specialty- or subspecialty-specific Category 1, CME credit hours to fulfill this MOC component.

3. Cognitive expertise
   Diplomates of the ABPN fulfill the cognitive expertise component by passing a cognitive (recertification) examination prior to the expiration date on their certificates. To sit for a cognitive examination, all current MOC requirements must be satisfied. A passing score on the cognitive examination extends the renewal date of the certificate to December 31 10 years from the year of the cognitive examination.

   The cognitive (recertification) examinations are multiple-choice, computer-based examinations that are administered by Pearson VUE at Pearson Professional Centers at over 200 locations throughout the country. Cognitive examinations differ from the initial certification examinations in that they are practice-relevant and focus on the clinical applications of knowledge. To prepare for the cognitive examinations, a diplomate should keep current with research and develop-
ments in the respective field, read specialty-specific journals and practice guidelines, and attend relevant continuing medical education programs.

4. Performance in practice
The Performance in Practice component is under development and there is no requirement to fulfill at this time.

The ABPN has submitted its plan to the ABMS for the Performance in Practice component and anticipates its approval in 2005. It includes the completion of Performance-in-Practice modules during each 10-year MOC cycle. Diplomates will be required to submit a summary statement after each module.

Non-practicing diplomates will have other options from which to choose. Visit our Web site at www.abpn.com for developments in our MOC program.

E. Revocation of Certificates
The Board has the authority to revoke any certificate issued by it for cause or to place a certificate holder on probation for a fixed or indefinite period of time.

F. Irregular Behavior Including Unethical Behavior of Candidates
The Board believes that the ethics of candidates for certification are of concern. The following rules apply:
1. Falsification of credentials will be cause for the Board's refusal to admit a candidate to examination for up to 5 years.
2. The Board will consider legal action against anyone who forges an ABPN certificate, copies an ABPN examination, or otherwise uses them in conflict with copyright laws or in any other way violates the legal prerogatives of the Board. Such activities will be cause for the Board's refusal to admit a candidate to examination for up to 5 years.
3. Scores on examinations (computer and/or oral) may be invalidated for reasons of irregular behavior. Statistical analyses may be used to confirm suspected cheating. If an examination score is invalidated, the candidate may submit a written appeal within 30 days of notice of invalidation. (See below for a description of the appeal process.) If an examination score is invalidated because of irregular behavior, the Board will not consider the candidate for examination for a period of up to 5 years, depending on the irregular behavior. A new application form and current application fee and examination fee will be required.
4. Irregular behavior shall include, but not be limited to, the following conduct:
   a. copying answers from another candidate's examination;
   b. knowingly permitting another candidate to copy one's answers on an examination;
   c. unauthorized possession, reproduction, or disclosure of examination materials or content, at any time;
   d. use of audio equipment to record any part of an oral examination;
   e. offering any financial or other benefit to any director, officer, employee, proctor, diplomate, or other agent or representative of the Board in return for any right, privilege, or benefit that is not granted by the Board to other similarly situated candidates or persons;
   f. not complying with proctors' or examiners' instructions;
   g. disregarding time limits;
   h. bringing food, drink, cellular phones, pagers or other electronic devices, books, study materials, personal belongings, or other prohibited material into an examination room;
   i. making telephone calls during an examination; and
   j. any other form of disruptive behavior, including repeated or excessive verbal complaints.

5. Notification of the Board's action may be sent to legitimately interested third parties, including the American Medical Association, state medical societies, medical licensing boards, and appropriate specialty societies.

Appeal procedure for invalidation due to irregular behavior
A candidate whose examination scores are invalidated because of irregular behavior may appeal this decision by submitting the following materials to the Executive Vice President at the Board office:
- A written request for a formal appeal of the invalidation of examination scores
- The applicable appeal fee
- Additional written information that rebuts the invalidation

The appeal materials must be sent in a single mailing that is postmarked within 30 days of the date indicated on the letter of invalidation. The appeal materials are sent to the respective Appeals Committee, which reviews the materials, deliberates, and makes a determination. In all events, the Appeals Committee's determination is final and binding on both the Board and the candidate.

G. Board Eligibility
The ABPN, in accordance with the policy of the ABMS, does not recognize or use the term "Board eligible" and does not issue statements concerning "Board eligibility." The Board informs an applicant of admissibility to examination only when the applicant has an active, approved application on file in the Board office.

II. Requirements for Admission to Examination
A. General Requirements for All Applicants
To qualify to sit for examination, an applicant must:
1. Be a graduate of an accredited medical school in the United States or Canada or of an international medical school listed by the World Health Organization.
2. Have a medical license as defined in Section I.C above. Applicants are required to submit a copy of their medical licenses with their applications. * If more than one medical license is held, a copy of each license is required.
   *Applicants who do not yet have an unrestricted medical license because they are in training are not required to submit a copy of their medical license at the time of application for the Part I examination. However, such applicants must submit a copy of their medical licenses no later than December 15 of the year in which they sat for the Part I examination.
3. Have satisfactorily completed the Board's specialized training requirements in psychiatry, neurology, child neurology, or any of the subspecialties. Training requirements for the specialties are described in the sections that follow.
4. Submit a completed official application form including all required attachments and the appropriate application and examination fees by the specified deadlines. (See fee schedule and application deadlines. See Section III for a complete description of the application process.) Only applications submitted on the current application form are accepted. Faxed copies of applications are not accepted.

B. General Training Requirements
References to "residency" refer to entry at the second year of postgraduate (PGY-2) training unless otherwise stated. Residency training must be in the specialty in which the applicant seeks certification, except for residents who are in an approved combined training program. (See Section VI for more information about combined training programs.)

Training programs approved by the Residency Review Committees and accredited by the ACGME can be found in the current edition of the Graduate Medical Education Directory published
by the American Medical Association. Training may be completed on a part-time basis, provided that it is no less than half time. Training programs may schedule individual leave or vacation time for residents in accordance with the overall institutional policy. Leave or vacation time may not be utilized to reduce the total amount of required residency training or to make up deficiencies in training.

Effective for residents entering residency training (PGY-2 in psychiatry or neurology or PGY-3 in child neurology) as of July 1, 2003: The 36 months of full-time specialized residency training must be completed in no more than two blocks. If completed in two blocks, the blocks must not be more than 10 years apart.

C. Training in More Than One Residency Program
To ensure continuity of training, the Board requires that 2 of the 3 years of residency training, excluding the PGY-1, be spent in a single program. In addition, credit will not be given for less than 1-year blocks of training, including the PGY-1. The ABPN Credentials Committee will consider exceptions to these rules only under extraordinary circumstances. In such cases, respective program directors should contact the Board office, in writing, prior to the transfer. The letters must outline the resident's training content, duties, and responsibilities, including exact dates of training, and indicate clearly that the resident will satisfy all ACGME program requirements. Each case will be considered on an individual basis.

If the Credentials Committee approves the request, the Board will notify the program directors in writing. A copy of this letter should be given to the resident to submit with his or her Part I application. Residents who have not received prior approval from the Credentials Committee risk the possibility that the Board will deny their Part I applications.

When training is completed in more than one program, the training director of the first program should send the training director of the second program a letter detailing the training satisfactorily completed, including exact dates of training, and areas of training that are deficient. After reviewing this documentation, the training director of the second program should inform the resident whether or not the second program will be able to provide the resident with the experience necessary to remove the deficits.

D. Psychiatry: Specific Training Requirements
Unless otherwise specified, all training must be completed in programs accredited by the ACGME. (See sections on Canadian and other international training below.)

An applicant seeking admission to examination for certification in psychiatry must have satisfactorily completed an ACGME-accredited PGY-1 (See below) and 3 full years of postgraduate, specialized residency training in a psychiatry program accredited by the ACGME. Different requirements apply for applicants who began training in psychiatry prior to 1986. These candidates should call the Board office if they have any questions.

Two patterns of training are acceptable:

1. Three-year psychiatry residency program
A broad-based clinical year of ACGME-accredited training in internal medicine, family medicine, or pediatrics; or an ACGME-accredited transitional year program that included a minimum of 4 months of primary care; or an ACGME-accredited residency in a clinical specialty requiring comprehensive and continuous patient care.

Three full years of postgraduate, specialized residency training in a psychiatry program accredited by the ACGME or

2. Four-year psychiatry residency program
Four years of training in an ACGME-accredited program in psychiatry is acceptable. A psychiatry PGY-1 must include at least 4 months in internal medicine, family medicine, and/or pediatrics. This training must be in a clinical setting that provides comprehensive and continuous patient care. No more than 1 month of this requirement may be fulfilled by an emergency medicine rotation, as long as the experience predominantly involves medical evaluation and treatment, rather than surgical procedure. Neurology rotations may not be used to fulfill this 4-month requirement.

Canadian Training Programs
Physicians entering residency training in psychiatry (PGY-2) on or after July 1, 2001, may apply to the ABPN for examination only if they:

1. Complete their training in a Canadian program accredited by the Royal College of Physicians and Surgeons of Canada;

2. Achieve certification by the Royal College of Physicians and Surgeons of Canada;

3. Possess an unrestricted license to practice medicine in a Canadian province.

Physicians entering residency training in psychiatry prior to July 1, 2001, may be granted credit for training completed in Canada if the training was completed in a program accredited by the Royal College of Physicians and Surgeons of Canada. These applicants must initiate the ABPN certification process by 2007 and should contact the Board office if they have any questions.

Other International Training
Physicians entering psychiatry residency training on or after July 1, 1997, will not be granted credit for other international training. Physicians entering psychiatry residency training prior to July 1, 1997, may be granted credit for other international training only if they:

1. Achieve a national certificate accepted by the ABPN by the year 2006. The only certificates accepted by the ABPN are MRCPsych, FRANZCP, FF Psych (SA), and Israel's Specialty Certification of the Scientific Council of the Israel Medical Association. If a physician's training was not completed in its entirety (internship and residency training) in the country issuing the certificate, the physician must complete an additional year of approved primary care training in the United States; and

2. Initiate the ABPN certification process by the year 2007.

Physicians who entered residency training in the United Kingdom prior to July 1, 1986, should contact the Board office for training credit information.

E. Neurology: Specific Training Requirements
Unless otherwise specified, all training must be completed in programs accredited by the ACGME. (See sections on Canadian and other international training below.)

An applicant seeking admission to examination for certification in neurology must have satisfactorily completed an ACGME-accredited PGY-1 (See below) and 3 full years of postgraduate, specialized residency training in a neurology program accredited by the ACGME. The PGY-1 must be completed prior to the 3 years of residency training. Different requirements apply for applicants who began training in neurology prior to 1991. These candidates should call the Board office if they have any questions.

Two patterns of training are acceptable:

1. Three-year neurology residency program
A full year of ACGME-accredited training in internal medicine, or as an acceptable alternative, a full year in an ACGME-accredited program.
program in which a minimum of 6 months of training must be in internal medicine, the details of which must be documented by the training director. The composition of these 6 months may not include rotations in neurology, family medicine, or emergency medicine. To ensure that these 6 months constitute a high-quality experience, they should emphasize progressive responsibility for the resident. At least two of the additional 6 months must be spent in internal medicine, pediatrics, and/or emergency medicine. For candidates entering neurology residency training on or after July 1, 2001, at least 2 of the additional 6 months must be spent in internal medicine, pediatrics, family medicine, and/or emergency medicine. No more than 2 of the remaining 4 months may be spent in neurology; and

Three full years of postgraduate, specialized residency training in a neurology program accredited by the ACGME; or

2. Four-year neurology residency program

Four years of training in a neurology residency program accredited by the ACGME. Effective for residents entering residency training in neurology as of July 1, 2002, 6 months of neurology credit may be granted for neurosurgery training provided the training has not been accepted by another board for certification. A letter from the neurology program director, detailing the proposed training, must be submitted to the Board office for review and approval. Documentation, including exact dates of the neurosurgery training (from month/day/year to month/day/year), should accompany the letter.

Note: For residents entering residency training on or after July 1, 2005, there are new requirements for completion of the 3-year and 4-year neurology residency programs that involve clinical skills evaluations during residency training. See Section IV for an explanation of these changes and visit our Web site at www.abpn.com for updated information and announcements.

Canadian Training Programs

Physicians entering residency training in neurology (PGY-2) on or after July 1, 2001, may apply to the ABPN for examination only if they:

1. Complete their training in a Canadian program accredited by the Royal College of Physicians and Surgeons of Canada; and

2. Achieve certification by the Royal College of Physicians and Surgeons of Canada; and

3. Possess an unrestricted license to practice medicine in a Canadian province.

Physicians entering residency training in neurology prior to July 1, 2001, may be granted credit for training completed in Canada if the training was completed in a program accredited by the Royal College of Physicians and Surgeons of Canada. These applicants must initiate the ABPN certification process by 2007 and should contact the Board office if they have any questions.

Other International Training

Physicians entering neurology residency training on or after July 1, 1997, will not be granted credit for international training. Physicians entering neurology residency training prior to July 1, 1997, may be granted PGY-1 credit for international training only if they:

1. Achieve a national certificate accepted by the ABPN in internal medicine by the year 2005. The only internal medicine certificates accepted by the ABPN are MRCP(UK), MRACP, FCP, and MRCP(1); and

2. Initiate the ABPN certification process by the year 2007.

F. Neurology With Special Qualification in Child Neurology: Specific Training Requirements

Proper preparation for the practice of child neurology requires that the practitioner be a qualified neurologist who has had additional training in pediatrics and child neurology. To qualify for this certificate, a different type of preparation and certifying examination are required. The same diploma will be used, the only difference being that instead of certifying qualification in "neurology," it certifies qualification in "neurology with special qualification in child neurology."

Unless otherwise specified, all training must be completed in programs accredited by the ACGME. (See sections on Canadian and other international training below.) Different requirements apply for applicants who began training in child neurology prior to 1991. These candidates should call the Board office if they have any questions.

Three patterns of training are acceptable for 2 of the 5 years of training:

1. General pediatrics

The usual pathway is 2 years of training in general pediatrics in an ACGME-accredited program. This is the only pathway that allows the applicant admission for examination by both the American Board of Pediatrics (ABP) and the ABPN; or

2. General pediatrics/basic neuroscience research

One year of training in general pediatrics in an ACGME-accredited program and 1 year of research in the basic neurosciences. The basic neuroscience pathway was created as an alternative track for residents who are planning a research career in academic child neurology. The year of basic neuroscience must provide training in a research discipline related to child neurology and is intended to increase the trainee's knowledge base and competitiveness for federal and nonfederal grant support. The trainee must make at least an 80% time commitment to basic neuroscience during this year of training.

For the purpose of this training track, "basic neuroscience" is defined as laboratory research related to the cellular or molecular basis of neurologic diseases. Examples of relevant basic disciplines include molecular neurogenetics, neurochemistry, neuropharmacology, neuropathology, neuroanatomy, neuroimmunology, developmental neurobiology, biophysics, and cell biology.

Effective for residents entering residency training in child neurology as of July 1, 2003: The neuroscience training track must be approved prior to entry into residency training in child neurology. A form to guide the applicant's description of the research, his or her role, skills to be acquired, and the likely outcomes (eg, presentations, peer-reviewed manuscripts) is part of the information to be provided. Credit will be given for basic neuroscience training obtained as part of an integrated clinical neuroscience program leading to certification in neurology with special qualification in child neurology. Credit cannot be obtained for basic neuroscience training obtained as part of a degree granting program (eg, PhD).

Residents entering child neurology training prior to July 1, 2003, must have this training track approved by the Board prior to completion of the 5 years of training.

A program director who intends to propose a neuroscience research training track for a resident should contact the Credentials Department at the Board office to request the proposal form. The form may also be downloaded from the ABPN Web site, www.abpn.com. This form along with letters from the mentor (and child neurology program director, if a different individual) must be submitted describing the research and explaining how
the year of neuroscience relates to child neurology and to the trainee’s academic career. Documentation must include exact dates of training (from month/day/year to month/day/year); or

3. General pediatrics/internal medicine
One year of training in general pediatrics and 1 year of training in internal medicine in ACGME-accredited programs. An acceptable alternative to the 1 year of internal medicine is a full year of ACGME-accredited training that includes a minimum of 6 months of internal medicine, the details of which must be documented by the training director. The composition of these 6 months may not include rotations in neurology, family medicine, pediatrics, or emergency medicine. To ensure that these 6 months constitute a high-quality experience, they should emphasize progressive responsibility for the resident. At least 2 of the additional 6 months must be spent in internal medicine, pediatrics, and/or emergency medicine. For candidates entering child neurology residency training on or after July 1, 2002, at least 2 of the additional 6 months must be spent in internal medicine, pediatrics, family medicine, and/or emergency medicine. No more than 2 of the remaining 4 months may be spent in neurology; and

All candidates will be required to complete 3 full years of postgraduate, specialized residency training in a child neurology program accredited by the ACGME.

Canadian Training Programs
Physicians entering training in child neurology (PGY-3) on or after July 1, 2002, may apply to the ABPN for examination only if they:
1. Complete their training in a Canadian program accredited by the Royal College of Physicians and Surgeons of Canada; and
2. Achieve certification by the Royal College of Physicians and Surgeons of Canada; and
3. Possess an unrestricted license to practice medicine in a Canadian province.

Physicians entering residency training in child neurology prior to July 1, 2002, may be granted credit for training completed in Canada if the training was completed in a program accredited by the Royal College of Physicians and Surgeons of Canada. These applicants must initiate the ABPN certification process by 2008 and should contact the Board office if they have any questions.

Other International Training
Physicians entering child neurology residency training on or after July 1, 1998, will not be granted credit for other international training. Physicians entering child neurology residency training prior to July 1, 1998, may be granted up to 2 years of general pediatrics and/or 1 year of internal medicine credit for training completed in another international program only if they:
1. Achieve a national certificate accepted by the ABPN in pediatrics and/or internal medicine by the year 2005. The only certificates accepted by the ABPN for pediatrics and/or internal medicine are MRCP(UK), MRACP, FCP(SA), and MRCP(P); and
2. Initiate the ABPN certification process by the year 2007.

III. Application for Certification
A. General Information
Applicants seeking certification in psychiatry, neurology, or neurology with special qualification in child neurology must complete, sign, and file with the Executive Vice President of the Board an application on the current official form together with the required supporting documents. The Information for Applicants publication and associated Application for Certification are reviewed each year and may be downloaded from www.abpn.com or obtained from the Board office. Only applications submitted on the current application form are accepted. Faxed copies of applications are not accepted.

An acknowledgment mailer accompanies each application. This mailer, when stamped, self-addressed, and enclosed with the application, will be returned to the applicant as acknowledgment that the Board office has received the application. Once the mailer is returned to the applicant, it may take up to 16 weeks for the applicant to receive further information regarding the status of the application. Applications are reviewed in the order of receipt.

Applicants who do not receive any notification from the Board regarding their applications by July 1, 2006, should contact the Board office to inquire about the status of their application.

Applications accepted for examination are notified via a mailing that includes a content outline indicating the broad areas to be tested and the percent of items assigned to each of the areas. Applicants denied admissions to the examination are notified of their deficiencies in meeting the standards of the Board.

The 2006 Part I examinations are administered via computer, in a national network of computer test centers. Approximately 2 months prior to the examination date, accepted candidates receive registration procedures and deadlines.

Applications remain active for two consecutive examinations only. Candidates who fail to present themselves for the first scheduled examination following the date of acceptance of their applications are required to reapply by submitting a new application form, current application fee, and examination fee.

B. Deadlines and Fees
The deadline for receipt of completed applications in the Board office for the October 23-27, October 30-November 3, November 6-10, 2006 Part I examination is February 1, 2006. Applications received in the Board office after February 1, 2006, must include a nonrefundable late fee, and must be received in the Board office by March 1, 2006. Applications received in the Board office after March 1, 2006, will not be accepted and will be returned.

A complete list of fees appears at the beginning of this document. Applications submitted without the appropriate fees will not be accepted. Fees received without applications will be returned.

Part I application and examination fees are neither refundable nor transferable.

C. Completing the Application Form and Supporting Documentation
1. Select a Specialty
Check the appropriate box to indicate the specialty in which you are seeking certification.

2. Candidate Name
The name on the application must be identical to the name on the photo identification to be used at examination registration. If the name stated on the application is different from that on the photo identification, admittance to Pearson VUE Testing Centers may be denied.

In addition, if the name on supporting documentation differs from the name provided on the application, certified, legal documentation (marriage license, name change determination, etc) must be presented with the application. If the name changes at any time subsequent to submission of the application, certified, legal documentation of the name change must be submitted to the Board office.

3. Social Security Number
Provide your social security number.
4. Mailing Address
This is an address at which the Board can contact you; therefore,
do not use a temporary address. Candidates are responsible for
keeping the Board informed about any change of address. Ad-
dress change information may be sent to the Board via mail, fax,

5. Home or Cell and Office Telephone Numbers, Fax Number,
and E-mail Address
Provide your home or cell phone number, primary office tele-
phone number, fax number, and e-mail address. Candidates are
responsible for keeping the Board informed about any changes.
Change information may be sent to the Board via mail, fax, or the

6. Date of Birth
Provide your birth date.

7. Medical Education
Include the complete name of each medical school attended. In-
clude accurate and complete attendance and graduation dates
for each school, as well as the degree received (MD, DO, etc).

8. Licensure
All questions regarding licensure must be answered. Do not leave
any blanks. In addition, enclose with the application a copy of ei-
ther your unrestricted medical license or the current renewal
registration card for your unrestricted medical license, which-
evously shows the license expiration date. If more than one license
is held, enclose with your application a copy of each license or
renewal registration card. An applicant in possession of a re-
stricted, suspended, or revoked medical license will not be ac-
cepted for any examination. (See Section I.C for information on
restrictions and exceptions.)

9. Previous Application for Certification
Indicate if you have previously applied to this Board for certifica-
tion. If this application was under a different name, provide all
previous names, and include appropriate certified, legal docu-
mentation (marriage license, name change determination, etc)
of the change. If your name changes at any time subsequent to
the submission of this application, certified, legal documentation
of the name change must be submitted to the Board office.

10. Other Applications on File
Indicate if you have other applications on file with the ABPN,
and, if so, in what specialty or subspecialty. A candidate may not
have more than one application for certification or recertification in
the same specialty or subspecialty on file with the Board office at any one time. Candidates completing train-
ning both in psychiatry and in neurology or child neurology may
apply to sit for both Part I examinations during the same admin-
istration. Candidates who intend to follow this examination pat-
tern should contact the Board office for further information.

11. Request for Testing Accommodations Due to a Disability
Please refer to Section VII.

12. First Postgraduate Year (PGY-1) (or first 2 years for child
neurology)
Enclose with the application a letter verification from the
PGY-1 training director describing the exact length and content
of rotations completed during the PGY-1. All documentation
must include exact dates (from month/day/year to
month/day/year) of training.

Psychiatry candidates only:
If the PGY 1 was a full year of internal medicine, pediatrics, or
family medicine, a photocopy of the certificate of completion,
including exact dates, may be submitted in lieu of the letter
from the PGY 1 training director.

Neurology candidates only:
If the PGY 1 was a full year of internal medicine, a photocopy of
the certificate of completion, including exact dates, may be sub-
mited in lieu of the letter from the training director.

Neurology with special qualification in child neurology
candidates only:
If either of the first 2 years was a full year of internal medicine
or pediatrics, a photocopy of the certificate(s) of completion, in-
including exact dates, may be submitted in lieu of the letter from
the PGY 1 and PGY 2 training director(s).

Reapplicants only:
Reapplicants previously accepted for examination must com-
plete the application; PGY 1 documentation is not required with
this reapplication.

13. Residency Training
List all residency training in chronological order, beginning with
the date you entered residency training. Include exact dates
(from month/day/year to month/day/year).
In addition, enclose with the application a copy of your certifi-
cate(s) of training, including exact dates, or a letter of verifica-
tion of training from the training director(s) indicating exact
dates of training. If training was completed in child and adoles-
cent psychiatry, the training director of the child and adolescent
psychiatry program must document the child and adolescent
psychiatry training.

If you are still in training, a letter from the training director
must be submitted with the application documenting that you
are in the final year of training and that training will be com-
peted by June 30, 2006. This letter must include the date on
which you started training and the anticipated completion date.
Immediately after you have completed training, the training di-
rector must submit to the Board a letter verifying successful
completion of training or a copy of the certificate of training. All
documentation must include exact dates (from month/day/year
to month/day/year) of training. If documentation of successful
completion of training is not received in the Board office by July
15, 2006, the candidate may be removed from the Part I roster.
Candidates who complete training after June 30, 2006, but no
later than July 31, 2006, may submit a Part I application. The
training director must submit a letter verifying successful com-
pletion of training to the Board by August 10, 2006. All docu-
mentation must include exact dates (from month/day/year
to month/day/year) of training. Applicants who complete training
after July 31, 2006, will be denied an opportunity to sit for the
2006 Part I examination.

Due to the large volume of documentation that the Board of-
office will receive on or before July 15, we ask that applicants do
call to verify that the Board received documentation from
their residency program. Applicants should check with their
training director to confirm that documentation was sent to the
Board office.

Reapplicants only:
Reapplicants previously accepted for examination must com-
plete the application; residency training documentation is not required with this reapplication.

14. Examination Site
The Part I examination will be administered at Pearson VUE
testing centers. (For additional information, see Section IV.B,
Part I Examination General Procedures.)

15. Other Diplomate Information (if any)
List any other Board certifications.
16. Application Statement

Read, sign, and date the application statement. Applications with altered or unsigned application statements are not accepted and are returned.

D. Appeal Procedure for Negative Determinations Regarding Credentials

The rejection of credentials for admission to an examination is considered a negative determination. An applicant who has submitted a formal application and receives a negative determination regarding the application may appeal this decision by submitting the following materials to the Executive Vice President at the Board office:

- A written request for a formal appeal of the rejection of the application
- The applicable appeal fee
- Additional written information that rebuts the negative determination

The appeal materials must be sent in a single mailing that is postmarked within 30 days of the date indicated on the letter of negative determination. The appeal materials are sent to the respective Appeals Committee, which reviews the materials, deliberates, and makes a determination. In all events, the Appeals Committee's determination is final and binding on both the Board and the applicant.

IV. Examinations

A. General Information Pertaining to All Examinations

The Board may conduct examinations at such times and places as it deems appropriate. The Board reserves the right to limit the number of candidates admitted to any scheduled examination. The administration and grading of all examinations shall be at the sole discretion of the Board.

The purpose of the ABPN certification examinations is to test the qualifications of candidates in psychiatry, neurology, or both. As these medical disciplines constitute part of the broad field of general medicine, the Board requires proficiency in neurology on the part of those it certifies in psychiatry and vice versa, but examines the candidate in accordance with the certificate he or she seeks. Each examination shall cover such subjects as the Board may determine. The ABPN uses the American Psychiatric Association (APA) Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition, Text Revision (DSM-IV-TR) as the primary authority on psychiatric diagnostic nomenclature for its examinations.

The Board does not endorse or recommend any texts or other teaching aids identified as "board preparation" material. Furthermore, neither the Board nor any of its committees has any affiliation with or responsibility for programs identifying themselves as "board review courses."

To become Board certified, each candidate must pass both the Part I, and Part II examinations. There is no limit on the number of times a candidate may apply for the Part I examination. To ensure that candidates have a current fund of knowledge at the time of certification, a passing grade on the Part I examination is valid for a period of 6 years or three opportunities to pass the Part II examination, whichever comes first. Candidates will be scheduled for examination and reexamination, if necessary, until they have exhausted their opportunities. The Board anticipates that the three opportunities will not take the maximum of 6 years. Candidates who are unsuccessful in the Part II examination during the allotted time period will be required to retake the Part I examination.

The Board is not liable for candidate travel and/or other related expenses incurred as a result of the cancellation of an examination.

General questions about requirements and logistics of ABPN examinations may be asked of ABPN staff by telephone or on-site. Verbal complaints to staff, directors, proctors, or examiners that continue after explanation of ABPN policy may rise to the level of harassment which may be considered irregular behavior (see Section I.F). At no time should a candidate discuss the administration or the grading of an examination with the examiners or proctors. Candidates may not speak to one another or confer with one another about any examination content. These actions may constitute irregular behavior and may be cause for invalidation of examination results (see Section 1.F).

B. Part I Examination General Procedures

1. Assignment, Fees, and Scheduling

Successful completion of the Part I examination is required of candidates seeking certification in psychiatry, neurology, or neurology with special qualification in child neurology. To successfully complete the Part I examination, a candidate must pass both the psychiatry and neurology sections of the examination at the same administration. Currently, there is no limit on the number of times an applicant may apply to take the Part I examination.

Approximately 2 to 3 months prior to the examination, a notice describing registration procedures and deadlines is mailed to candidates whose applications have been accepted. Upon receipt of this notice, candidates are urged to contact Pearson VUE as soon as the registration process opens to schedule an appointment for the examination. A delay in contacting Pearson VUE can result in fewer available openings for the examination.

Candidates are required to sit for the examination for which they have applied. Candidates who fail to do so are required to reapply by submitting a new application form, copies of all medical licenses, and the application fee and the examination fee.

Candidates who fail Part I:

Candidates who fail the initial Part I examination may pay a re-examination fee and repeat the examination at the next available administration. A failing score on the Part I examination is considered a negative determination. Two negative determinations on the Part I examination necessitate reapplication (a new application form, copies of all medical licenses held, and payment of the current Part I application fee and examination fee).

Reexaminees who do not sit for reexamination as scheduled are also required to submit a new application, copies of their medical licenses, and payment of the current Part I application fee and examination fee. Candidates applying for reexamination do not need to include another copy of their PGY-1 and residency documentation.

Unable to attend Part I examination:

Candidates who are unable to attend their scheduled or rescheduled Part I examination are required to submit a new Part I application form, copies of their medical licenses, and the current Part I application fee and examination fee.

Unable to sit for an examination on the scheduled date:

Candidates who are unable to sit for the examination on the date they scheduled, must first contact Pearson VUE at least 24-hours in advance to reschedule the examination. If Pearson VUE is unable to reschedule the examination, candidates should then contact the Board office to determine the availability of rescheduling opportunities. Candidates may be rescheduled, provided there is still an opening in the testing date range. If there is no other date available, they must sit for the originally scheduled date or forfeit their fees.
Unable to sit for a scheduled examination due to a medical or other emergency:
Candidates who are unable to sit for a scheduled Part I examination due to a medical or other emergency must submit documentation of the emergency to the Board office, in writing, no later than 30 days after the date of the examination. The Board will then evaluate the documentation and determine whether the absence is excusable. If the absence is determined excusable, the candidate is rescheduled for the next Part I examination and the examination fee will be transferred. Such candidates will be responsible for paying a rescheduling fee.

2. Computer-administered Examination Procedures
Candidates are required to present two current (not expired) forms of identification, including one government-issued photo identification, upon arrival at the testing center. Government-issued photo identification includes military IDs, passports, driver's licenses, and state IDs. Both forms of identification must include signatures. In addition, one form of identification must include a recent photograph of the candidate. The name on the government-issued identification must match the name on the candidate's application for examination.

If the name that the candidate uses on the application is different than the name that appears on the identification, certified, legal documentation (marriage license, name change determination, etc.) verifying the name change must also be presented. Failure to comply with these requirements may result in the candidate's inability to gain admission to the examination.

Prior to the date of the examination, candidates must contact the Board office regarding any name or address changes. Certified, legal documentation verifying the name change must be provided to the Board office.

Candidates may not bring food, drink, cellular phones, pagers, other electronic devices, books, study materials, or other personal belongings including watches and wallets into the examination room. A secure locker is available to store personal items. Candidates may not make telephone calls during an examination. Bringing prohibited items into the testing center or making telephone calls during an examination constitutes irregular behavior and may be cause for invalidation of examination results (see Section LF).

The Part I examination is scheduled for two 3 1/2-hour sessions on the same day and is administered at Pearson VUE testing centers. The Board advises applicants, in writing, of acceptance to the examination.

Candidates are photographed and required to provide an electronic signature at the computer test centers. These data are stored electronically. For security purposes, candidates are also electronically fingerprinted each time they enter or leave the computer test center.

Candidates are observed at all times while taking the examination. This observation includes direct monitoring by testing center staff, as well as, video and audio recording of the examination session.

C. Psychiatry Part I Examination Content
The psychiatry section of the examination will include questions in the following areas:
- Development through the life cycle
- Neuroscience
- Behavioral and social sciences
- Epidemiology and public policy
- Diagnostic procedures
- Psychiatric disorders
- Treatment of psychiatric disorders
- Special topics (suicide, dangerousness, ethics, gender, psychosomatic medicine, and emergency psychiatry)
- The neurology section of the examination will include questions in the following areas:
  - Basic science aspects of neurologic disorders
  - Incidence/risk of neurologic disorders
  - Diagnostic procedures related to neurologic disorders
  - Clinical evaluation of neurologic disorders/syndromes
  - Management and treatment of neurologic disorders

D. Neurology/Neurology With Special Qualification in Child Neurology Part I Examination Content
The neurology section of the examination will include questions in the following areas of adult and child neurology:
- Neuroanatomy
- Neuropathology
- Neurochemistry
- Neurophysiology
- Neuropharmacology
- Neuroimmunology/neurovirology
- Neurogenetics/molecular neurology/neuroepidemiology
- Neuroendocrinology
- Neuroimaging
- Neuro-ophthalmology
- Neuro-otology
- Cerebrospinal fluid

The section of the examination covering psychiatry, including cognition and behavior, will include questions in the following areas:
- Development and disorders of childhood
- Psychopathology and diagnostic criteria for common psychiatric disorders
- Physician-patient relationships
- Behavioral and personality changes associated with structural changes
- Alcoholism and substance abuse
- Psychopharmacology
- Therapeutic modalities other than drugs
- Altered states of consciousness
- Memory disorders and cortical changes with dysfunction
- Diagnostic procedures
- Psychiatric/neurologic problems associated with medical disease
- Forensic psychiatry and neurology, epidemiology, transcultural psychiatry, public mental health, and systems-based practice

E. Appeal Procedure for Negative Determinations Regarding Part I Examinations
A failing grade on the Part I examination is considered a negative determination. A candidate who receives a negative determination may appeal the negative determination by submitting the following materials to the Executive Vice President at the Board office:
- A written request for hand-scoring of the examination
- The applicable appeal fee
- Additional written information in support of the appeal

The appeal materials must be sent in a single mailing that is postmarked within 30 days of the date indicated on the letter of negative determination. The candidate is informed in writing of the result of the hand-scoring, which is final and binding on both the Board and the candidate.

F. Part II Examination General Procedures
1. Assignment, Fees, and Scheduling:
   To ensure that candidates have a current fund of knowledge at the time of certification, a passing grade on the Part I examination...
tion is valid for a period of 6 years or three opportunities to complete the Part II examination successfully, whichever comes first. Successful Part I candidates receive a notice of assignment to a Part II examination with a billing statement for the required examination fee. Scheduling for the Part II examination is done on a regional basis whenever feasible.

Candidates must sign a statement that they possess a current, unrestricted licenses to practice medicine in a state, commonwealth, territory, or possession of the United States or province of Canada that complies with the requirements outlined in Section I.C. Candidates who do not submit copies of their licenses or who submitted a temporary (education or training) medical license at the time of application for Part I are required to submit copies of their unrestricted licenses by December 15 of the year in which they sit for the Part I examination. Candidates who do not submit copies of their medical licenses by this deadline will not be scheduled for the Part II examination until all three sections are passed.

Approximately 5 weeks prior to the date of the assigned Part II examination, candidates receive informational materials and an admission notice specifying the date, time, and place to report for registration. Candidates are requested to report for registration only on the day and at the time indicated on the admission notice. Registration schedules are arranged to accommodate candidates in accordance with their examination schedules.

The Board's policy regarding scheduling has changed. The Part II application and the 60-day pre-examination withdrawal policy have been eliminated.

Beginning with the April 2000 Part II examination, an unexcused absence counts as an opportunity to take the Part II examination.

Beginning with the May 2000 Part II examination, candidates who do not pay the Part II examination fee for their scheduled examination or reexamination by the deadline specified forfeit an opportunity to sit for the examination.

Candidates who decline or do not attend the Part II examination for which they are scheduled, unless excused, forfeit an opportunity and fees. Such candidates are removed from the roster of candidates for that examination. They are scheduled for the earliest Part II examination that has space available, which may not be the next consecutive Part II examination. Candidates may have to wait up to 1 year for an available examination slot. The Board consistently schedules candidates for an examination until they have exhausted or forfeited their three opportunities or exhausted the 6 years to pass the Part II examination.

Excused absences:

Candidates who are unable to sit for a scheduled Part II examination due to a medical or other emergency should submit documentation of the emergency to the Board office, in writing, no later than 30 days after the date of the examination. The Board will then evaluate the documentation and determine whether the absence is excusable. If the absence is determined excusable, the Part II fees are transferred and such candidates are scheduled for the next Part II examination that has space available. Candidates may have to wait up to 1 year for an available examination slot. Candidates who are transferred to another examination are required to pay any fee increase in the Part II examination. Candidates who do not pay this fee by the deadline specified will forfeit an opportunity and all fees.

Wait list for an earlier examination:

Candidates not reasigned to the requested Part II examination are notified in writing and are removed from the roster of the originally assigned Part II examination. Candidates who do not sit for the reassigned Part II examination forfeit an opportunity and fees. The Board is unable to schedule candidates for a specific oral examination, such candidates must sit for the Part II examination originally assigned.

Candidates are required to bring government-issued photo identification with them to the examinations. They will be asked to present this ID at candidate registration. Government-issued photo IDs include military IDs, passports, valid driver's licenses, and state IDs. If the name on the admission slip is different from the name that appears on the photo ID, certified, legal documentation verifying the name change must also be presented.

Candidates may NOT bring food, drink, cellular phones, pagers, or other electronic devices, books, or study materials into the examination room. Candidates may not make telephone calls during an examination. Candidates may not speak to one another or confer with one another about any examination content. These actions may constitute irregular behavior and may be cause for invalidation of examination results (see Section I.F).

2. Required Sections and Reexamination:

Psychiatry candidates must pass both sections of the Part II examination. Candidates who fail one or both sections of the examination must repeat both sections at each subsequently scheduled examination until both sections are passed at the same examination.

Neurology candidates must pass all three (two adult and one child) sections of the Part II examination. Candidates must repeat the section or sections failed at each subsequently scheduled examination until all three sections are passed.

Child Neurology candidates must pass all three (two child and one adult) sections of the Part II examination. Candidates must repeat the section or sections failed at each subsequently scheduled examination until all three sections are passed.

All candidates taking the Part II examination are required to be examined in all sections for which they are scheduled. If a candidate does not appear for a scheduled section of the examination, the examination results for sections taken are invalidated, fees are not refunded, and this counts as an opportunity to take the Part II examination.

Exceptions: Candidates who are unable to sit for all sections of their scheduled Part II examination due to a medical or other emergency should submit documentation of the emergency to the Board office, in writing, no later than 30 days after the date of the examination. The Board evaluates the documentation and determines whether the absence is excusable.

For candidates in psychiatry: If the Board classifies the absence as excusable, the examination results for the completed section are invalidated, and the fees are transferred or refunded. The examination does not count as an opportunity to take the Part II examination.

For candidates in neurology or in neurology with special qualification in child neurology: If the Board classifies the absence as excusable, the results for the section(s) that were completed stand, and the grade for the section(s) not completed are
are not used in the assignment of grades and are destroyed. Note-taking is permitted during the Part II examination provided that only blank paper is used. ALL notes must be left in the examination room at the conclusion of the examination. Failure to adhere to this policy constitutes irregular behavior (see Section I.F.). Notes are not used in the assignment of grades and are destroyed.

G. Part II Examination Format

Part II, an oral examination, includes the examination of patients under the observation of one or more examiners. The manner of examining patients and the reasoning and deductions there from constitutes an important part of the examination. Knowledge of basic science principles, special diagnostic procedures, management recommendations, and assessment of risk are also essential aspects of the examination, which focuses on evaluation of clinical skills. Candidates are expected to discuss their findings with their examiners. Questions frequently cover such areas as diagnosis, differential diagnosis, evaluation, treatment, prognosis, and management. Reference to the basic sciences of psychiatry and neurology may be made.

Note-taking is permitted during the Part II examination provided that only blank paper is used. ALL notes must be left in the examination room at the conclusion of the examination. Failure to adhere to this policy constitutes irregular behavior (see Section I.F.). Notes are not used in the assignment of grades and are destroyed.

1. Psychiatry

**Psychiatry candidates take two examinations:**

- One 1-hour examination in clinical psychiatry (patient)
- One 1-hour examination in clinical psychiatry (audiovisual)

In the patient section, the psychiatry candidate is given approximately 30 minutes to examine a patient under the observation of one or more examiners. Following the examination of the patient, the discussion with the examiner(s), which is approximately 30 minutes in length, focuses on physician-patient interaction, conduct of the clinical examination, capacity to elicit clinical data, formulation, differential diagnosis and prognosis, therapeutic management, and knowledge of therapies. Additional questions may address the basic science of psychiatry.

Note: Psychiatry Part II examination changes will take place effective with the May 2006 examination. The 1-hour audiovisual section will consist of four vignettes based on written cases and/or short video clips. Candidates will be examined by one or more examiners with particular reference to the content of the vignettes. These discussions may also include other clinical topics. All candidates in the examination cycle as of May 2006 will take the Part II examination in psychiatry in this new format.

2. Neurology and Child Neurology

**Neurology candidates take three examinations:**

- One 1-hour examination in clinical neurology (patient)
- One 1-hour examination in clinical neurology (vignette)

**Child Neurology candidates take three examinations:**

- One 1-hour examination in clinical child neurology (vignette)

One 1-hour examination in clinical neurology (vignette)

In the neurology and child neurology patient sections, the candidate is given approximately 35 minutes to examine a patient under the observation of one or more examiners. During the patient examination, the candidate's ability to obtain a history and perform a neurologic examination is observed. Following the patient examination, the discussion with the examiner(s), which is approximately 15 minutes in length, focuses on the evaluation of the findings and discussion of the diagnosis, treatment, and management.

Note: Changes for neurology and neurology with special certification in child neurology examinations will affect candidates who entered residency training (PGY-2 for neurology, PGY-3 for child neurology) on or after July 1, 2005. Some of the clinical skills evaluations that are currently conducted in the Part II examination will take place within the residency training programs and documentation of satisfactory performance in the evaluation of clinical skills will be required as part of the credentialing process. Assessment of other clinical skills evaluations will be integrated into the Part I computer-administered examination.

Candidates for neurology and child neurology who are in the examination cycle currently will not be affected by these changes until 2008, at which point candidates who have exhausted three opportunities to pass will be transitioned to the new format. It is anticipated that the Part II examination for all neurology and child neurology candidates will be eliminated by February 1, 2013. Candidates who do not meet this deadline will be required to complete a minimum of five clinical skills evaluations.

For the most up-to-date information, please visit our Web site at www.abp.com.

H. Notifications and Certificates

1. Grade Letters

After completion of the Part I examination, the Executive Vice President of the Board notifies the candidates of the results in writing. Results for Part II are mailed approximately 30 days after the Part II examination. The Board sends the names of all those achieving certification to the ABMS for publication.

2. Certificates

Successful candidates receive their certificates within 10 weeks of receiving their grade letters. It is the candidate's responsibility to notify the Board office, in writing, if he or she does not receive the certificate within the timeframe specified in the grade
letter. If a candidate does not submit written notification, the candidate must request a duplicate certificate and pay a processing fee.

3. Duplicate Certificates
Photocopies of Board certificates are not available.
Requests for duplicates of ABPN certificates must include the diplomate’s name, address, phone number, birth date, signature, and indication of how the diplomate wants his or her name printed on the certificate. The diplomate must include (1) a copy of each current unrestricted medical license held stating the expiration date; (2) for security purposes, a copy of government-issued photo identification, such as a driver’s license or passport; (3) the appropriate fee.
A form for requesting a duplicate certificate may be obtained from the ABPN Web site, www.abpn.com. Certificates are printed approximately four times per year. Depending on when a duplicate certificate is requested, it may be 4 to 6 months until the diplomate receives the duplicate certificate.

I. Feedback and Appeal Procedures for Negative Determinations Regarding Part II Examinations
A failing grade on a Part II examination is considered a negative determination.
1. Request for Feedback
A candidate who receives a negative determination may request feedback by submitting the following materials to the Executive Vice President at the Board office:
• A letter requesting feedback on his or her Part II examination
• The applicable feedback fee
The request for feedback must be postmarked within 30 days of the date indicated on the letter of negative determination.
For psychiatry, feedback shall consist of a checklist indicating those sections not passed.
For neurology and child neurology, feedback for the patient section shall consist of a checklist indicating those sections not passed. No specific feedback will be given for the vignette sections.
No other information will be provided as feedback.
2. Request for Appeal
A candidate who receives a negative determination may appeal the negative determination by submitting the following materials to the Executive Vice President at the Board office:
• A written request for a formal appeal of the negative determination
• The applicable appeal fee
• Additional written information in support of the appeal
The appeal materials must be sent in a single mailing that is postmarked within 60 days of the date indicated on the letter of negative determination or within 30 days of the date indicated on the feedback letter.
The appeal materials are sent to the respective Appeals Committee, which reviews the materials, deliberates, and makes a determination. In all events, the Appeals Committee’s determination is final and binding on both the Board and the candidate.

V. Subspecialization
For complete information about subspecialty certification, please contact the Board office to request the current editions of the following ABPN publications. These publications are also available in a downloadable format from the ABPN Web site, www.abpn.com.
• Information for Applicants for Certification in the Subspecialty of Child and Adolescent Psychiatry
• Information for Applicants for Certification in the Subspecialties of Addiction Psychiatry, Clinical Neurophysiology, Forensic Psychiatry, Geriatric Psychiatry, Neurodevelopmental Disabilities, Psychosomatic Medicine, and Vascular Neurology
• Information for Applicants for Certification in the Subspecialty of Pain Medicine

VI. Special Programs
A. Supplementary Certification
Candidates may apply for certification in another specialty. A candidate may have more than one application on file with the Board if the applications are for certification in different specialties or subspecialties. Candidates completing training both in psychiatry and in neurology or child neurology may apply to sit for both Part I examinations during the same administration. Candidates who intend to follow this examination pattern should contact the Board office for further information.
1. Dual Certification in Psychiatry and Neurology
Unless otherwise specified, all training must be completed in programs accredited by the ACGME. Applicants seeking certification both in psychiatry and neurology who began residency training prior to January 1, 1988, should contact the Board office for requirements. Applicants seeking certification both in psychiatry and neurology who began residency training on or after January 1, 1988, must have completed one of the following training tracks:
a. ABPN-approved combined psychiatry/neurology training program (recommended)
   A PGY-1 that meets the requirements for entry into a neurology program;*
   and
   Five years of residency training in an ABPN-approved combined psychiatry/neurology training program; or
b. Individual psychiatry and neurology programs
   A PGY-1 that meets the requirements for entry into a neurology program;*
   and
   Six full years of postgraduate residency training in ACGME-accredited programs including 3 full years in psychiatry and 3 full years in neurology.
or
c. Non-ABPN-approved combined training programs
   A PGY-1 that meets the requirements for entry into a neurology program;*
   and
   At the discretion and approval of both training directors, and in accordance with Residency Review Committee requirements, applicants may complete 5 full years of postgraduate training in ACGME-accredited programs including 2 full years of residency training in psychiatry in a single program, 2 full years of residency training in neurology in a single program, and a full year that is jointly sponsored and coordinated by the psychiatry and neurology training directors to allow the resident to successfully complete all of the requirements for an approved residency program in psychiatry and an approved residency program in neurology. The 5 years of residency training usually are taken at one institution but may be taken at no more than two institutions. An application for examination may be submitted after completion of the PGY-1, the 2 full years of residency training in one specialty, and the full year of jointly sponsored residency training.
*See Section II.E for information on entry into neurology programs.
For residents entering residency training on or after July 1, 1999: Program directors must contact the Board office for a
copy of the combined psychiatry/neurology guidelines and must submit to the Board for review, no later than the beginning of the PGY-3, a proposal for a resident to train in psychiatry and neurology that conforms to these guidelines.

2. Dual Certification in Neurology and Neurology With Special Qualification in Child Neurology

Applicants who have achieved certification in neurology and who wish to be certified in neurology with special qualification in child neurology will need to obtain the additional training described below. Unless otherwise specified, all training must be completed in programs approved by the ACGME.

Training requirements include:

A minimum of 12 months of approved training in general pediatrics and

A minimum of 12 months of approved training in clinical child neurology

A maximum of 3 months of child neurology training obtained during a neurology residency may be applied toward the required 12 months of child neurology training only if the 3 months took place in an ACGME-accredited child neurology program and if the training is documented by the neurology program director.

Candidates will be required to submit a new Part I application and the current application fee. Such candidates will not be required to retake the Part I examination in neurology. The Part II examination fee will be requested after the application has been approved. Two 1-hour examinations in child neurology will be taken during the Part II examination.

3. Dual Certification in Child and Adolescent Psychiatry and in Neurology With Special Qualification in Child Neurology

An applicant who wishes to obtain certificates both in child and adolescent psychiatry and in neurology with special qualification in child neurology must meet the following requirements:

Certification by the Board in the specialty of general psychiatry is required prior to applying for examination in child and adolescent psychiatry (a minimum of 2 years of approved residency training in general psychiatry is required); and

Completion of the requirements for certification in child and adolescent psychiatry; and

Completion of the requirements for certification in neurology with special qualification in child neurology.

B. Joint Training in Pediatrics/Psychiatry/Child and Adolescent Psychiatry

The American Board of Pediatrics, the American Board of Psychiatry and Neurology, Inc., and the Committee on Certification in Child and Adolescent Psychiatry of the ABPN have approved programs for combined pediatrics/psychiatry/child and adolescent psychiatry residency training. This training consists of 24 months of pediatrics, 18 months of psychiatry, and 18 months of child and adolescent psychiatry. Completion of the program will satisfy the training requirements for certification in all three areas. Physicians pursuing training in these programs may not apply for examination until all training has been completed.

C. Joint Training in Neurology/Diagnostic Radiology/Neuroradiology

The American Board of Radiology and the American Board of Psychiatry and Neurology, Inc., have approved programs for combined training in neurology/diagnostic radiology/neuroradiology. Completion of the program will satisfy the training requirements for certification in all three areas. In order to be certified in neuroradiology, a resident must have completed certification in both diagnostic radiology and neurology.

In order to satisfy training requirements in neurology, a resident who resigns from a combined neurology/diagnostic radiology/neuroradiology training program must complete 36 months of residency training, beyond the PGY-1, of which 30 months of training must be completed in neurology. The Board will grant up to 6 months of credit for training in neuroradiology toward the 36 months of training. In addition, the program requirements for neurology as defined by the ACGME must be satisfied.

D. Combined Training Leading to Certification by Two Boards

Board-approved combined/joint training programs are listed in the Graduate Medical Education Directory. The Board currently has the following four programs:

1. Dual Certification in Psychiatry/Family Medicine

The American Board of Family Medicine and the American Board of Psychiatry and Neurology, Inc., have approved programs for combined psychiatry/family medicine residency training. In order to satisfy training requirements in psychiatry, a resident who resigns from the combined psychiatry/family medicine training program must complete 36 months of residency training, beyond the PGY-1, of which 30 months of training must be completed in psychiatry. In addition, the program requirements for psychiatry as defined by the ACGME must be satisfied.

2. Dual Certification in Psychiatry/Internal Medicine

The American Board of Internal Medicine and the American Board of Psychiatry and Neurology, Inc., have approved programs for combined psychiatry/internal medicine residency training. In order to satisfy training requirements in psychiatry, a resident who resigns from the combined psychiatry/internal medicine training program must complete 36 months of residency training, beyond the PGY-1, of which 30 months of training must be completed in psychiatry. In addition, the program requirements for psychiatry as defined by the ACGME must be satisfied.

3. Dual Certification in Neurology/Internal Medicine

The American Board of Internal Medicine and the American Board of Psychiatry and Neurology, Inc., have approved programs for combined neurology/internal medicine residency training. In order to satisfy training requirements in neurology, a resident who resigns from the combined neurology/internal medicine training program must complete 36 months of residency training, beyond the PGY-1, of which 30 months of training must be completed in neurology. In addition, the program requirements for neurology as defined by the ACGME must be satisfied.

4. Dual Certification in Neurology/Physical Medicine and Rehabilitation

The American Board of Physical Medicine and Rehabilitation and the American Board of Psychiatry and Neurology, Inc., have approved programs for combined neurology/physical medicine and rehabilitation residency training. In order to satisfy training requirements in neurology, a resident who resigns from the combined neurology/physical medicine and rehabilitation training program must complete 36 months of residency training, beyond the PGY-1, of which 30 months of training must be completed in neurology. In addition, the program requirements for neurology as defined by the ACGME must be satisfied.

VII. Applicants With Disabilities and Qualifications for Testing Accommodations

A. General Information

The Board recognizes that physicians with disabilities may wish to take the examinations and will attempt to make accommodations for applicants with verified disabilities. The Board supports the
intent of the Americans with Disabilities Act (ADA). The Board will provide reasonable accommodations during testing to provide equal opportunity for persons with disabilities. Applicants are reminded, however, that “auxiliary aids (and services) can only be offered if they do not fundamentally alter the measurement of skills or knowledge the examination is intended to test” (Americans with Disabilities Act, Public Law 101-336 §306 [b][3]). To this extent, the Board will provide reasonable accommodations during testing to provide equal opportunity for persons with disabilities. Documentation requesting reasonable accommodations must identify the disability and provide a rationale for specified modifications to standard testing procedures.

Applicants who request accommodations because of a disability must advise the Board in writing no later than the deadline for submitting applications for examination. All documentation and other evidence substantiating the disability must be submitted to the Board no later than 30 days after the deadline for filing an application for examination. Required documentation includes completion of the Application for Testing Accommodations and appropriate checklists.

Candidates seeking disability accommodations should download the appropriate application from the ABPN Web site, www.abpn.com, or should contact the Board office immediately for an application.

Applicants for reexaminations requesting accommodations must check the box provided on the billing statement and comply with all requirements regardless of previous requests and/or granted accommodations. Documentation of a disability and a completed Application for Testing Accommodations is required no later than 30 days after the fee due date on the billing statement in order to be considered for special examination assistance or test modification. If the Board deems it necessary, an independent assessment may be requested at the expense of the Board. Documentation and other evidence substantiating the disability includes, but is not limited to, each of the following:

- A report diagnosing the applicant’s disability written by a professional appropriately qualified to evaluate the disability. The report must be printed on the certified examiner’s letterhead, with the examiner’s credentials, address, and telephone number given in the letterhead or title. The report must include the candidate’s name, date of birth, and date of testing, and it must be signed by the examiner.
- A history of the disability, including previous settings in which accommodations have been granted. Having had prior accommodations granted does not necessarily influence the decision of the Board to grant or deny a current request for accommodation. If there is no history of prior accommodations, the examiner must explain why current circumstances necessitate accommodations.
- Diagnostic information about the specified disability using standard nomenclature from sources such as the International Classification of Diseases (ICD) and the APA Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition, Text Revised (DSM-IV-TR).

Specific recommended accommodations with a rationale for why each accommodation is needed. A description of any functional limitations associated with the disability is important to the Board’s evaluation of the request.

**B. Review of Documentation**

A letter detailing the specific accommodations requested because of a disability must be submitted for each examination and/or reexamination. Documentation should be marked “ADA Materials” and mailed to the attention of the Executive Vice President at the Board office. Each report is reviewed carefully before accommodations are provided. If the Board does not find appropriate and sufficient evidence to grant accommodations, the applicant will be informed that the request has been denied.

An applicant who was denied accommodations may appeal this decision by submitting the following materials to the Executive Vice President at the Board office:

- a written request for a formal appeal of the denial of accommodations
- the applicable appeal fee
- additional written information in support of the appeal

The appeal materials must be sent in a single mailing that is postmarked within 30 days of the date indicated on the letter of denial of accommodations. The appeal materials will be sent to the respective Appeals Committee, which will review the materials, deliberate, and make a determination. In all events, the Appeal Committee’s determination is final and binding on both the Board and the applicant.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Radiology [ABR] to ascertain whether the information below is current.)

Qualifications of Applicants for Certification by the ABR

Each applicant for admission to an examination for a certificate to be issued by the ABR in diagnostic radiology or radiation oncology shall be required to present evidence satisfactory to the Board that the applicant has met the following standards:

1. General Qualifications: That the applicant is a specialist in diagnostic radiology or radiation oncology as outlined in Article II, Section 2, of the Rules and Regulations and is recognized by his/her peers to have high moral and ethical standards in his/her profession.

2. General Professional Education: Graduation from a medical school accredited at the date of graduation by the Liaison Committee on Medical Education of the American Medical Association and Association of American Medical Colleges, the RCPSC, or from a college of osteopathic medicine approved by the AOA. If the applicant is a graduate of a medical school outside the United States or Canada, the applicant must be screened with approval by an agency acceptable to the Board of Trustees.

3. Special Training: The period of special training shall be as the Board of Trustees, by resolution or motion, shall determine from time to time. The Board of Trustees requires a written statement from the applicant's current program director, attesting that the applicant will have satisfactorily completed the required special training in radiology or radiation oncology by the appointed time and is prepared to take that examination.

4. In special instances these requirements may be modified by majority vote of the entire Board of Trustees or by the executive committee acting in its stead.

5. If the program director fails to indicate in writing that the applicant will have the required special training, documentation of the reason(s) must be submitted along with evidence that the candidate has been appropriately apprised of his/her deficiencies. The executive committee of the Board will notify the applicant in writing that an appeals mechanism exists as outlined in paragraphs 6 and 7 below.

6. In utilizing the appeals mechanism, the applicant must provide the executive committee of the Board with a written statement supporting the appeal. The executive committee may ask the program director to submit a written response to the applicant's appeal.

7. The executive committee must reach a final decision without delay in determining the candidate's admissibility to the examination.

Certificates

A 10-year time-limited certificate will be issued to each candidate who has finished a prescribed and approved period of training and study and has passed written and oral examinations demonstrating an adequate level of knowledge and ability in diagnostic radiology or radiation oncology in accordance with the definitions as stated in the Bylaws and Rules and Regulations of the ABR.

A certificate granted by the Board does not of itself confer, or purport to confer, any degree or legal qualifications, privileges, or license to practice radiology.

Definitions

1. Diagnostic radiology encompasses a variety of diagnostic and image-guided therapeutic techniques, including all aspects of radiological diagnosis, nuclear radiology, diagnostic ultrasound, magnetic resonance, computed tomography, interventional procedures, and the use of other forms of radiant energy.

2. Radiation oncology is that branch of clinical medicine concerned with the causes, prevention, and treatment of cancer and certain nonneoplastic conditions, utilizing ionizing radiation.

Diagnostic Radiology Training Requirements

Candidates are required to have 5 years of approved training with a minimum of 4 years in diagnostic radiology. These 4 years must be spent in a department approved for training in diagnostic radiology by the Residency Review Committee (RRC) for Diagnostic Radiology of the Accreditation Council for Graduate Medical Education (ACGME), or by the Royal College of Physicians and Surgeons of Canada (RCPSC). A minimum of 4 months, but not more than 12 months, must be spent in nuclear radiology in the 4-year program. Candidates may spend no more than 6 months in rotations outside the parent institutions.

The other year must be accredited clinical training in internal medicine, pediatrics, surgery or surgical specialties, obstetrics and gynecology, neurology, family medicine, emergency medicine, or any other field.
combination of these. This clinical year should be the first postgraduate year. No more than a total of 3 months may be spent in radiology, radiation oncology, and/or pathology. All clinical training must be in an ACGME, American Osteopathic Association (AOA), or equivalent approved program.

It is not the intent of the ABR for programs to use any of the 4 years for traditional fellowship training. The designation of "fellowship" is reserved for training beyond the 4-year residency.

In a 4-year approved residency program, not more than 12 months may be spent in a single discipline (research is considered a discipline).

In a 4-year diagnostic radiology program, the resident is expected to remain in that program for all 4 years. If a transfer to another program is necessary or desired, that transfer must have verification from the initial program director that the resident has successfully completed the training in their institution, with a listing of the specific rotations. This training must be accepted by the new program director.

Candidates will be considered for the physics portion of the written examination only when they have completed 12 months of diagnostic training. After 24 months of diagnostic training, the candidate will be allowed to take the clinical examination.

A candidate who has passed the written examination and will complete the clinical training requirements and 48 months of approved diagnostic radiology training by September 30 in the year in which the exam is given will be considered for the oral examination. Admissibility to the oral examination is determined by the executive committee.

Radiation Oncology

Candidates are required to have 5 years of approved training with a minimum of 4 years in radiation oncology. These 4 years must be spent in a department approved to train in radiation oncology by the RRC for Radiation Oncology for the ACGME, or by the RCPSC. The 4-year residency training period must include 36 months of clinical radiation oncology with exposure to pathology, adult and pediatric medical oncology, and diagnostic imaging. Candidates may spend no more than 3 months in rotations outside the parent institution.

The other year, which must precede the radiation oncology training, must be ACGME, AOA-, or RCPSC-accredited clinical training in internal medicine, surgery or surgical specialties, pediatrics, family practice, obstetrics and gynecology, transitional, or categorical radiation oncology, or any combination of these. Specialties other than those listed, including pathology, do not satisfy the PG1 requirement of the ABR.

Candidates will be admissible to the written examination only after they have completed 4 years of approved training or if they will complete this amount of training by September 30 of the year in which the examination is given. This must include a PGY1 clinical year of training in the United States or Canada. Requests for credit for this training in other countries must be submitted to the executive committee. [Note: Beginning with those candidates completing their training in 2004 and later, candidates must have completed their clinical PGY1 and 48 months of training in radiation oncology to take the clinical written examination, but may take the biology and physics exams after 36 months of radiation oncology training.]

The resident is expected to remain in the same radiation oncology training program for the duration of the training. If a transfer to another program is necessary or desired, the program director of the initial program must verify that the candidate has successfully completed the portions of the training that were undertaken in that program, and this training must be accepted by the program director of the new program.

A candidate who has passed the written examination and will complete 60 months of approved training by September 30 in the year in which the exam is given will be considered for the oral examination. Admissibility to the oral examination is determined by the executive committee.

Successful candidates are issued a 10-year, time-limited certificate in radiation oncology.

Subspecialty Certificates

A 10-year time-limited certificate will be issued to each diplomate certified in either radiology or diagnostic radiology who has finished an ACGME-approved fellowship and has passed an oral examination demonstrating an adequate level of knowledge and ability in the area of expertise for which he/she has applied in accordance with the definitions stated in the Bylaws and Rules and Regulations of the ABR.

Definitions

1. Neuroradiology is a subspecialty of diagnostic radiology that encompasses plain film diagnosis of the skull, sinuses, mastoids, and head and neck structures, and all other imaging and special procedures related to the central nervous system and head and neck, including angiography, myelography, interventional techniques, and magnetic resonance imaging.

2. Pediatric radiology is a subspecialty of diagnostic radiology that encompasses imaging procedures for the diagnosis of diseases of infants and children, such as plain film radiography, contrast studies, ultrasonography, nuclear radiology, computerized tomography, digital radiography, angiography, interventional techniques, and magnetic resonance imaging.

3. Vascular and interventional radiology is a subspecialty of diagnostic radiology that encompasses imaging of abnormalities and anomalies of the arteries, veins, and lymphatics. It includes all vascular and nonvascular imaging-directed interventional procedures. All modalities and techniques used in diagnostic and interventional procedures are also part of this subspecialty.

4. Nuclear radiology is a subspecialty of diagnostic radiology that encompasses dynamic and static nuclear imaging of pathophysiologic processes, radiopharmaceuticals, and quality control of nuclear imaging instruments.

Application and Fee

Application for examination must be made in exact duplicate (two copies on prescribed forms that may be obtained downloaded from the ABR Web site at www.theabr.org). These forms should be submitted with the current application fee (US currency) by the deadline established for filing. Applications for the written examination to be given in any year will not be accepted prior to July 1 of the preceding year and must be filed no later than the deadline of September 30 of the preceding year. There is a nonrefundable fee for any application postmarked between October 1 and October 31. No application will be accepted after October 31.

Incomplete applications will not be accepted. The postmark affixed to the last item received to complete the application must be on or before the deadline date.

In the event of withdrawal of an application, only a portion of the fee can be refunded.

Failure to accept an appointment, cancellation of an appointment, or failure to appear for a scheduled oral examination will be regarded as one of the three opportunities.
A candidate who finds it necessary for any reason to cancel after acceptance of an appointment for either the written or oral examination shall be required to submit an additional fee. This amount represents administrative costs to the Board. A candidate who fails to appear for an examination without notifying the office of the ABR at least 20 days prior to the first date of the examination may be charged the full application fee in existence at the time of payment.

Content of Written Examination in Each Field (Diagnostic Radiology)

Each examination consists of multiple-choice "A" type questions (one best-response type). The Part I "Physics of Medical Physics, Biological Effects and Safety" examination is given on the morning of 1 day and the Part II "Diagnostic Imaging" examination is given on the afternoon of the same day.

New written examinations are formulated each year in all categories of radiology, and the content of the examinations is carefully evaluated in order to keep pace with new information and developments. The number of questions in each category may be changed as necessity dictates from year to year.

Failures/Missed Opportunities

Candidates for the written examination will have three consecutive opportunities to appear for and pass the examination. A candidate who fails to accomplish this on the first application must submit a new application and the fee in effect at that time and retake the entire written examination. Failure to accept an appointment, cancellation of an appointment, or failure to appear for a scheduled examination will be regarded as one of the three opportunities.

Conditions

Candidates conditioning the written examination will have three consecutive opportunities to appear for and pass the examination. If after three opportunities the candidate fails to pass the examination, he/she must submit a new application and fee in effect at that time and retake the entire written examination.

Oral Examination

Oral examinations are given at a time designated by the Board of Trustees. At the present time, the oral examinations are conducted yearly in May or June.

Admissibility to the oral examination is determined by the executive committee.

No recording device of any kind may be brought to the examination.

A certificate will not be issued until verification has been received from the program director that all requirements have been fulfilled in the training program.

Content of Oral Examination for Diagnostic Radiology

Candidates applying for examination in diagnostic radiology will be examined for a period of 25 minutes each by ten examiners. The categories to be covered are musculoskeletal, pulmonary, gastrointestinal tract, genitourinary tract, neuroradiology, vascular and interventional radiology, nuclear radiology, ultrasound, pediatric radiology, breast radiology, and cardiac.

Content of Oral Examination for Radiation Oncology

Candidates applying for examination in radiation oncology will be examined for a period of 30 minutes each by eight examiners. The subject matter of this examination concerns the clinical management of malignant disease and is usually presented according to the anatomical site of the primary tumor. The anatomical sites are divided into the following eight categories: gastrointestinal tract; gynecologic malignancies; genitourinary tract; lymphoma/leukemia; head, neck, and skin; breast; central nervous system and pediatric malignancies; and lung and mediastinum, soft tissue, and bone.

Reexaminations

Failures

A candidate who fails the oral examination in diagnostic radiology or in radiation oncology may be scheduled for reexamination. The reexamination fee in effect at that time must be submitted.

A candidate who fails to pass the oral examination after three consecutive opportunities must start the examination procedure from the beginning with the submission of a new application and fee in effect at that time, and retake the entire written examination.

Conditions

Candidates in diagnostic radiology who have conditioned one, two, or three categories in the oral examination will be reexamined by two examiners in each conditioned category. Candidates in radiation oncology who have conditioned one or two categories in the oral examination will be reexamined by two examiners in each conditioned category. Candidates must pass the reexamination by both examiners in each category to remove the condition. Candidates conditioning in the oral examination will have three consecutive opportunities to appear for and pass the examination. If after three opportunities the candidate fails to pass the examination, the candidate must submit a new application and fee in effect at that time and will be required to repeat the entire oral examination at the next opportunity.

Status of a Physician

The Board will reply to an inquiry concerning the status of a physician with one of the following statements:

1. The physician is Board certified.
2. The physician is in the examination process, that is, has an approved application on file but has not passed the examination.
3. The physician is neither certified nor in the examination process.

[Note: No official status of Board qualified or Board eligible is recognized by the Board.]

Final Action of the Board

The final action of the Board is based on the applicant's professional record, training, and attainment in the field of diagnostic radiology or in radiation oncology, as well as on the results of his/her examination. This Board has been organized, not to prevent qualified radiologists from obtaining certification, but to assist them in becoming recognized in their communities as men and women competent to practice diagnostic radiology or radiation oncology.

Revocation of Certificates

Certificates issued by this Board are subject to the provisions of Articles of Incorporation and the Bylaws. According to Article IX, Section 4, of the Bylaws, any certificate issued by the Board of Trustees shall be subject to revocation in the event that

1. the issuance of such certificate, or its receipt by the individual so certified, shall have been contrary to, or in violation of, any provision of the Certificate of Incorporation of this, the ABR, or of these Bylaws or rules and regulations adopted by the Board of Trustees; or
2. the individual so certified shall not have been eligible in fact to receive such certificate; or
3. the individual so certified shall have made any misstatement of fact in the application, or in any other communication, to the corporation or its representatives; or
4. the individual so certified shall have been convicted by a court of competent jurisdiction of a felony or of any misdemeanor involving, in the opinion of the Board of Trustees, moral turpitude; or
5. the license to practice medicine of the individual so certified shall be revoked.

Before any such certificate shall be revoked, a notice shall be sent by registered or certified mail to the last known address of the holder of such certificate, as it appears on the records of this corporation, setting forth the act, omission, or conduct alleged or complained of and giving the holder of such certificate a reasonable opportunity to answer in writing thereto. Such certificate holder shall have not less than 30 days in which to reply thereto. The Board of Trustees may, at its discretion, make such further investigation as it deems necessary and proper.

The Board of Trustees of this corporation shall have the sole power, jurisdiction, and right to determine and decide whether the evidence or information before it is sufficient to constitute one of the grounds for revocation of any certificate issued by this corporation, and the decision of such Board of Trustees in the premise shall be final.

All correspondence should be addressed to the executive director:

(The material below, published in 2004-2005, is under continual review and revision. The American Board of Surgery (ABS) reserves the right to make changes in its policies, procedures, fees, and requirements at any time. As the requirements and procedures outlined below are subject to change, applicants are also encouraged to visit the ABS Web site at www.absurgery.org for the most recent updates.)

**Specialty of Surgery (General Surgery) Defined**

The ABS interprets the term "general surgery" in a comprehensive yet specific manner, as a discipline having a central core of knowledge embracing anatomy, physiology, metabolism, immunology, nutrition, pathology, wound healing, shock and resuscitation, intensive care and neoplasia within the essential content areas outlined below.

Surgeons certified by the ABS have through their training acquired knowledge and experience related to the diagnosis and preoperative, operative, and postoperative management, including the management of complications, in the essential content areas listed below.

- Abdomen and its contents
American Board of Surgery

- Alimentary tract
- Breast, skin, and soft tissue
- Endocrine system
- Head and neck surgery
- Pediatric surgery
- Surgical critical care
- Surgical oncology
- Trauma/burns
- Vascular surgery

Experience in any of these content areas does not necessarily encompass its full range and complexity of procedures, particularly advanced operations and treatments of a specialized nature. This is especially true of disciplines that have residencies approved by the Accreditation Council for Graduate Medical Education (ACGME) and have processes for additional certification.

The certified general surgeon is also expected to have
- preoperative, operative, and postoperative experience in transplantation surgery, plastic surgery (including familiarity with the role of breast reconstruction after mastectomy), and cardiothoracic surgery;
- significant experience in performing minimally invasive surgical procedures, including basic and advanced laparoscopic procedures;
- experience with endoscopic techniques, particularly proctosigmoidoscopy, colonoscopy, esophagogastroduodenoscopy, laryngoscopy, and bronchoscopy;
- experience with sentinel lymph node mapping for breast cancer and melanoma;
- experience with diagnostic ultrasonography, particularly of the following areas:
  - head and neck;
  - breast;
  - abdomen, including intraoperative and laparoscopic ultrasound;
  - endoscopic;
- knowledge and skills in palliative care and management of pain, weight loss, and cachexia in patients with malignant and chronic conditions;
- familiarity with diagnostic and therapeutic techniques related to:
  - fine needle aspiration techniques for cytologic biopsy;
  - investigation and manipulation of the distal common bile duct (including sphincterotomy);
  - physiologic testing and evaluation of the gastrointestinal tract;
  - noninvasive diagnostic evaluation of the vascular system and invasive vascular interventional techniques;
- familiarity with the special requirements of bariatric and geriatric surgical patients, including operative care and counseling of patients and families;
- an understanding of the administration of anesthetic agents, airway intubation, and conscious sedation;
- an understanding of the diagnosis and management of urgent and emergent problems in gynecologic, neurological, orthopaedic, and urologic surgery.

The Certification Process

The ABS considers certification to be based upon a process of education, evaluation, and examination. The ABS holds that undergraduate and graduate education are of the utmost importance and requires the attestation of the residency program director that the applicant has completed an appropriate educational experience and attained a sufficiently high level of knowledge, clinical judgment, and technical skills, as well as ethical standing, to be admitted to the certification process and designated by the ABS as a certified surgeon upon successful completion of both a written and oral examination.

Possession of a certificate is not meant to imply that a diplomate is competent in the performance of the full range of complex procedures that encompass each content area. It is not the intent or the role of the ABS to designate who shall or shall not perform surgical procedures or any category thereof. Credentialing decisions are best made by locally constituted bodies based on an assessment of an applicant's extent of training, depth of experience, and patient outcomes relative to peers.

Individuals who believe they meet the ABS educational, ethical, and experience requirements may begin the certification process by applying for admission to the Qualifying Examination (QE). The application is reviewed by the ABS and, if approved, the applicant is granted admission to the examination.

Upon successful completion of the Qualifying Examination, the applicant is then considered a "candidate" for certification and granted the opportunity to take the Certifying Examination (CE). If the candidate is also successful at this examination, the candidate is deemed certified in Surgery and becomes a diplomate of the American Board of Surgery.

Requirements for Certification in Surgery

General Requirements

Applicants must:
- Have demonstrated to the satisfaction of the program director of an acceptable graduate medical educational program in surgery that they have attained the level of qualifications required by the ABS. All phases of the graduate educational process must be completed in a manner satisfactory to the ABS.
- Have an ethical, professional, and moral status acceptable to the ABS.
- Be actively engaged in the practice of surgery as indicated by holding admitting privileges to a surgical service in an accredited health care organization, or be currently engaged in pursuing additional graduate education in a component of surgery or other recognized surgical specialty. An exception to this requirement is active military duty.
- Hold a currently registered full and unrestricted (permanent) license to practice medicine in the United States or Canada within 6 months after completion of residency or prior to taking the Certifying Examination in Surgery, whichever comes earlier.

Educational Requirements

Undergraduate Medical Education

Applicants must have graduated from an accredited school of allopathic or osteopathic medicine in the United States or Canada.

Graduates of schools of medicine from countries other than the United States or Canada must present evidence of certification by the Educational Commission for Foreign Medical Graduates (ECFMG), which must be valid indefinitely if enrolled in an accredited US residency program. For those enrolled in accredited Canadian programs, the certificate must be valid past the date of application.

Graduate Surgical Education

General Information

The purpose of graduate education in surgery is to provide the opportunity to acquire a broad understanding of human biology as it relates to disorders of a surgical nature and the technical knowledge and skills appropriate to be applied by a specialist in surgery. This goal can best be attained by means of a progressively graded curriculum of study and clinical experience under guidance and supervision of senior surgeons, which provides progression through
succeeding stages of responsibility for patient care up to the final one of complete management. Major operative experience and chief responsibility at the final stage of the program are essential components of surgical education. The ABS will not accept into the process of certification anyone who has not had such an experience in the specialty of surgery, as previously defined, regardless of the number of years spent in educational programs.

The graduate educational requirements set forth on these pages are considered to be the minimal requirements of the ABS and should not be interpreted to be restrictive in nature. The ABS recognizes that the time required for the total educational process should be sufficient to provide adequate clinical experience for the development of sound surgical judgment and adequate technical skill. These requirements do not preclude additional desirable educational experience, and program directors are encouraged to retain residents in a program as long as is required to achieve the necessary level of qualifications.

The integration of basic sciences with clinical experience is considered to be superior to formal courses in such subjects. Accordingly, while recognizing the value of formal courses in the study of surgery and the basic sciences at approved graduate schools of medicine, the ABS will not accept such courses in lieu of any part of the required clinical years of surgical education.

The ABS may at its discretion require that a member of the ABS, or a designated diplomate observe and report upon the clinical performance of an applicant before establishing admissibility to examination or awarding certification.

While a residency program may develop its own vacation, illness, and other leave policies for the resident, 1 year of approved residency requires must be 52 weeks in duration and must include at least 48 weeks of full-time surgical experience. Furthermore, unused vacation and other leave time may not be accumulated to reduce the overall duration of residency required by the ABS.

Specific Requirements
Applicants must:
- Have satisfactorily completed a minimum of 5 years of progressive residency education following graduation from medical school in a program in surgery (general surgery) accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada. Individuals must apply to the ABS within 3 years of completing such a program to retain their eligibility for certification with the ABS.
- Have completed all phases of graduate education in surgery in the accredited surgery program. Experience obtained in accredited programs in other recognized specialties, although containing some exposure to surgery, is not acceptable. Additionally, a flexible or transitional first year will not be credited toward PGY-1 training unless it is accomplished in an institution with an accredited program in surgery and at least 6 months of the year is spent in surgical disciplines.
- Have obtained, over the 5 years in the accredited surgery program, at least 54 months of clinical surgical experience with progressively increasing levels of responsibility. There must be no fewer than 36 months devoted to the essential content areas of surgery (general surgery) as previously defined. The entire chief resident experience must be devoted to the primary components of the specialty of surgery, with no more than 4 months devoted to any one component. During junior years, a maximum of 6 months may be assigned to non-clinical or non-surgical disciplines that are supportive of the needs of the individual resident and appropriate to the overall goals of the general surgery training program. Experience in surgical pathology and endoscopy is considered to be clinical surgery, but obstetrics and ophthalmology are not. No more than a total of 12 months during junior years may be allocated to any one surgical specialty other than general surgery.
- Have acted in the capacity of chief resident in general surgery for a 12-month period, with the majority of the 12 months served in the final year. A portion of the chief residency may be served in the next to the last year, provided it is no earlier than the fourth clinical year and has been approved by the Residency Review Committee for Surgery (RRC-S) followed by notification to the ABS. The chief residency must be spent only in the parent or an affiliated institution unless rotation to an affiliated institution has been approved by the RRC-S.
- Have spent no fewer than 48 weeks of full-time surgical experience in each residency year.
- For documented medical problems or maternity leave, the ABS will accept 46 weeks of surgical training in one of the first 3 years, for a total of 142 weeks during the first 3 years, and 46 weeks of training in one of the last 2 years, for a total of 94 weeks during the last 2 years.
- Have spent the final 2 residency years in the same program, unless prior approval for a different arrangement has been granted by the ABS. For residents who will complete their residency training in June 2008 or thereafter, the required 60 months of residency training may be accomplished at no more than three residency programs overall.

Operative Experience
Applicants for examination must be the operating surgeon for a minimum of 500 operative procedures in 5 years and for a minimum of 150 operative procedures in the chief resident year. These procedures must include operative experience in each of the essential content areas listed in the definition of surgery (general surgery) set forth in section I-D. The ABS does not require a certain minimum number of procedures within a content area.

Applicants must submit a report that tabulates their operative experience during residency, including the number of patients for whom the applicant had primary responsibility that required critical care irrespective of previous operative history, and the number of patients with multiple organ trauma where a major general surgical operation was not required. Applicants must also indicate their level of responsibility (eg, surgeon chief year, surgeon junior years, teaching assistant, first assistant) for the procedures listed. While the ABS provides an operative experience report form for this purpose, the ABS will also accept the ACGME Resident Operative Experience Report. Regardless of which form is used, the information provided must be in proper sequence and indicate the resident's level of responsibility.

Applicants may claim credit as "surgeon" only when they have actively participated in making or confirming the diagnosis, selecting the appropriate operative plan, and administering preoperative and postoperative care. Additionally, they must have personally performed either the entire operative procedure or the critical parts thereof and participated in postoperative follow-up. All of the above must be accomplished under the supervision of the responsible staff member.

When previous personal operative experience justifies a teaching role, residents may act as teaching assistants and list such cases for the fourth and fifth year only. Applicants may claim credit as a teaching assistant when they have been present and scrubbed and acted as assistant to guide a more junior trainee through the procedure. Applicants may not claim credit both as "surgeon" and "teaching assistant."

All operative experience forms must be verified and signed by the individual who was the applicant's program director at the time the residency was completed. Applicants are advised to keep a copy
of the submitted form for their files as the ABS is not able to furnish copies of the original form.

**Ethics and Professionalism**
The ABS believes that certification in Surgery carries an obligation for ethical behavior and professionalism in all conduct. The exhibition of unethical behavior or a lack of professionalism by an applicant or diplomate may therefore prevent certification of the applicant or may result in suspension or revocation of certification. All such determinations shall be at the sole discretion of the ABS.

Unethical and unprofessional behavior is denoted by any dishonest behavior, including: cheating; lying; falsifying information; misrepresenting one's educational background, certification status, and/or professional experience; and failure to report misconduct.

The American Board of Surgery has adopted a "zero tolerance" policy toward these behaviors, and individuals caught exhibiting such behaviors risk being permanently barred from certification, reported to state medical boards, and/or legally prosecuted.

**Military Service**
Credit will not be granted toward the requirements of the ABS for service in the US Armed Forces, the US Public Health Service, the National Institutes of Health, or other governmental agencies unless the service was as a duly appointed resident in an accredited program in surgery.

**Credit for Foreign Graduate Education**
No credit will be granted directly to an applicant for surgical education in a foreign country. The ABS will consider granting partial credit only upon the request of the program director of an accredited surgery program in the US who has observed the applicant as a junior resident for a minimum of 9 to 12 months and wishes to advance the applicant to a higher level in that program. The credit granted will not be valid until the applicant has successfully completed that program. If the applicant moves to another program, the credit is not automatically transferable and must be requested by the applicant's new program director after a suitable period of evaluation.

Applicants from accredited Canadian programs must have completed all of the requirements in the Canadian program or in combination with an accredited US program. No credit for postgraduate surgical education outside the US and Canada will be granted to those applicants seeking certification who completed a Canadian program. Applicants from Canadian programs must complete the ABS' stipulated requirements.

**Reconsideration and Appeals**
The ABS may deny or grant an applicant or candidate the privilege of examination whenever the facts in the case are deemed by the ABS to so warrant.

Applicants and candidates may request the reconsideration and appeal of: (1) an adverse decision regarding their credentials and admissibility to examinations; or (2) the administration and results of certain examinations. A copy of the Reconsideration and Appeals Policy is available from the ABS office or Web site (www.absurgery.org) to any individual considering a request for reconsideration or an appeal. A request for reconsideration, which is the first step, must be made in writing to the ABS office within 90 days of receipt of notice from the ABS of the action in question.

**Information for Program Directors**
When making advancement determinations, program directors are cautioned against appointing residents to advanced levels without first ensuring that their previous training is in accordance with the ABS requirements for certification. Program directors should contact the ABS prior to making a promotion decision if there is any question of a resident's completed training not meeting ABS requirements.

Effective July 1, 2005, the program director is responsible for supplying documentation of satisfactory completion of all years of graduate medical education for residents whose training encompasses more than one training program.

In addition to its own requirements, the ABS also adheres to the ACGME's program requirements for residency training in general surgery, which state that program directors must obtain the approval of the RRC-S in the following situations: (1) if a chief resident is assigned to an institution other than a parent or "integrated" institution; (2) if rotations to any approved "affiliate" hospital exceed 6 months; (3) if more than 1 year of the total program is spent outside the parent and integrated institutions; (4) if more than 6 months total is spent in any assignment outside the parent, integrated, or approved affiliated institutions; or (5) if chief resident rotations are carried out prior to the last 12 months of residency training. Documentation of such approval or prior ABS approval should accompany the individual's application.

**The Examinations**

**The In-Training Examination**
The ABS offers annually to US residency programs the In-Training/Surgical Basic Science Examination (IT/SBSE), a written examination designed to measure the progress attained by residents in their general level of knowledge regarding the fundamentals of the basic sciences and management of clinical problems related to surgery. The IT/SBSE is solely meant to be used by program directors as an evaluation instrument in assessing residents' progress and results of the examination are released to program directors only. It is not required by the ABS as part of the certification process.

The examination is protected by copyright and duplication or improper use of the examination materials is not permitted. The ABS reserves the right to withhold participation in the examination by an institution where there are cases of improper use, unacceptable test administration, or irregular behavior by residents taking the examination.

As of 2006, the IT/SBSE will be offered in two versions: a junior-level version for PGY-1 and PGY-2 and a senior-level version for PGY-3 to PGY-5.

**The Qualifying Examination**

**Format**
The Qualifying Examination is a computer-based examination offered once yearly by the ABS. The examination consists of multiple-choice questions designed to evaluate a candidate's knowledge of general surgical principles and the basic sciences applicable to surgery. The examination is a 1-day examination lasting 8 hours. Examination results are mailed and posted on the ABS Web site (www.absurgery.org) approximately 4 weeks after the examination.

**Application Process**
Individuals who believe they meet the requirements for certification may apply to the ABS for admission to the certification process. Please refer to the ABS Web site, www.absurgery.org, for detailed instructions on applying and using the ABS online application process, as well as related application and examination dates and fees.

Please note that the individual who served as the applicant's program director during the period of his or her residency must certify that all application and operative experience information supplied by the applicant is accurate.

Applicants are strongly urged to maintain an up-to-date mailing address with the ABS throughout the application process. An incorrect address will cause unnecessary delays in application approval and examination scheduling.
**Additional Admissibility Requirements**

- Applicants who desire certification must submit their application for certification within 8 academic years after completion of residency.
- Once an application is approved, the applicant must take the Qualifying Examination for the first time either in the year of application approval or the year following.
- Applicants who exceed any of the above restrictions will lose admissibility to the ABS certification process and must fulfill one of the readmissibility pathways if they still wish to seek certification.

**Examination Opportunities**

After approval of an application, the applicant has a maximum of five opportunities within a 5-year period to pass the QE. If the applicant chooses not to take the examination in a given year, this is considered a lost opportunity as the 5-year limit is absolute.

**Readmissibility**

Applicants who had an approved application but who lost admissibility to the ABS certification process may regain admissibility by either of two pathways:

**Standard Pathway**

The applicant must complete an additional year (12 months) of structured education in surgery in an ACGME-accredited general surgery residency program, in which the program director has agreed to provide the applicant with structured teaching that meets ABS guidelines. The structured educational program must be submitted to the ABS in advance for approval and it must be a full-time activity. The program director must submit quarterly summaries to the ABS of the applicant's progress. Upon completion of the year, the program director must provide written attestation that the candidate has successfully completed all requirements. The applicant must then complete an Application for Readmissibility and provide documentation of a current full and unrestricted medical license.

**Alternative Pathway**

The applicant may pursue an alternative educational pathway to acquire and demonstrate adequate surgical knowledge, which may be pursued at a pace determined by the applicant. The initial readmissibility application includes evidence of Continuing Medical Education activity, reference letters, and an operative report. Upon approval of the application, the applicant must complete the American College of Surgeons' Surgical Education and Self-Assessment Program (SESAP) and pass two secure examinations: one derived from the IT/SBSE and another derived from the two latest versions of SESAP. Please refer to the ABS Web site, www.absurgery.org, for specific requirements.

Upon successful completion of either of the above pathways, the applicant will again be admissible to the QE for five opportunities within 5 years.

**The Certifying Examination**

**Format**

The Certifying Examination is an oral examination consisting of three 30-minute sessions conducted by teams of two examiners that evaluates the candidate's clinical skills in organizing the diagnostic evaluation of common surgical problems and determining appropriate therapy. The focus of the examination is on the application of basic knowledge to clinical problems, the evaluation of surgical judgment and decision making, the management of complex complications, and the assessment of technical knowledge.

The CE is administered five times per year in geographically diverse metropolitan areas across the US. The examinations are conducted by directors of the American Board of Surgery and by associate examiners who are experienced ABS diplomats in the local/regional medical community. The ABS makes every effort to avoid conflicts of interest between candidates and their examiners.

Please refer to the ABS Web site, www.absurgery.org, for information regarding examination dates and fees. Examination results are mailed and posted on the ABS Web site the day after the final day of examination.

**Admissibility**

A candidate must have successfully completed the Qualifying Examination to be admissible to the Certifying Examination. At the time of the Certifying Examination, a candidate must hold a full and unrestricted (permanent) license to practice medicine in the United States or Canada and provide evidence of this to the ABS office.

**Examination Opportunities**

Candidates are offered five opportunities within a 5-year period to pass the Certifying Examination. Both of these limits are absolute; exceptions will only be made for active duty military service outside the United States. The 5-year period begins upon successful completion of the QE.

Candidates for certification are encouraged not to unduly delay taking the CE, as such delays may adversely affect performance. Candidates are discouraged from taking the CE more than once in an academic year, as the examination evaluates a candidate's clinical knowledge and judgment, which in general do not markedly improve over the course of a few months.

Candidates may take the Certifying Examination no more than twice in an academic year. Priority for examination site assignment, however, will be given to candidates who have not yet taken a CE in that academic year.

If candidates are not successful in the five opportunities taken during the 5-year period, they will be required to undertake additional training to regain admissibility. This process may begin as soon as the five opportunities are exhausted by the candidate.

Unsuccessful examinees may request in writing a critique of their examination performance from the ABS within 90 days of receiving their examination results letter.

**Readmissibility**

Candidates may regain admissibility to the Certifying Examination by either of two pathways:

**Standard Pathway**

The candidate must complete an additional year (12 months) of structured education in surgery in an ACGME-approved surgical residency program, in which the program director has agreed to provide the applicant with structured teaching that meets ABS guidelines. The structured educational program must be submitted to the ABS in advance for approval and it must be a full-time activity. The program director must submit quarterly summaries to the ABS of the applicant's progress. Upon completion of the year, the program director must provide written attestation that the candidate has successfully completed all requirements. The applicant must then complete an Application for Readmissibility and provide documentation of a current full and unrestricted medical license.

**Alternative Pathway**

The applicant may pursue an alternative educational pathway to acquire and demonstrate adequate surgical knowledge, which may be pursued at a pace determined by the applicant. The initial readmissibility application includes evidence of Continuing Medical Education activity, reference letters, and an operative report. Upon approval of the application, the applicant must complete the American College of Surgeons' Surgical Education and Self-Assessment Program (SESAP) and pass two secure examinations: one derived from the IT/SBSE and another derived from the two latest versions of SESAP. Please refer to the ABS Web site, www.absurgery.org, for specific requirements.

Upon successful completion of either of the above pathways, the applicant will again be admissible to the CE for five opportunities within 5 years.
Specific Issues

Persons With Disabilities
The American Board of Surgery complies with the Americans with Disabilities Act by making a reasonable effort to provide modifications in its examination process to examination applicants with documented disabilities. These modifications are appropriate for such disabilities but do not alter the measurement of the skills or knowledge that the examination process is intended to test. The ABS has adopted a specific policy and procedure regarding examination of such applicants, which is available from the ABS office or Web site (www.absurgery.org). Any disability which an applicant believes requires modification of the administration of an examination must be identified and documented by the applicant in accordance with this policy. All materials submitted to the ABS documenting such a disability must be postmarked no later than 30 days prior to the published late application deadline date for the examination in question. Requests for test accommodations and documentation received after this date may not be processed in time.

Examination Irregularities and Unethical Behavior
Examination irregularities, e.g., cheating in any form or other unethical behavior, by an applicant or diplomate may result in the barring of the individual from examination, the denial or revocation of a certificate, and/or other appropriate actions, up to and including legal prosecution.

Substance Abuse
Applicants with a history of substance abuse will not be admitted to any examination unless they present evidence satisfactory to the ABS that they have successfully completed the program of treatment prescribed for their condition. The ABS must additionally be satisfied that they are currently free of substance abuse.

Issuance of Certificates
A candidate who has met all requirements and successfully completed the Qualifying and Certifying Examinations of the American Board of Surgery will be deemed Certified in Surgery and issued a certificate by the ABS, signed by its officers, attesting to these qualifications.

It is the policy of the ABS that all certificates issued on or after January 1, 1976, are valid for a period of 10 years, from the date of issuance through June 30 of the year of expiration. Certificates issued before January 1, 1976, are valid indefinitely.

Reporting of Status
The ABS considers a diplomate's record not to be in the public domain. Additionally, the ABS does not recognize the terms "board eligible" or "board qualified."

The ABS reports the following designations for applicants, candidates, and diplomates, along with the dates of certification and/or recertification and expiration if applicable: In the Examination Process, Certified, Recertified, Recertified (Clinically Inactive), Not Certified, Suspended, Revoked, and Deceased. An applicant or candidate who has an approved application and remaining examination opportunities is deemed "in the examination process." To receive verification of status in writing, a written inquiry must be submitted to the ABS office.

The ABS supplies basic demographic data on diplomates to the American Board of Medical Specialties (ABMS) for its Directory of Certified Medical Specialists, which is available in print and on the ABMS Web site (www.abms.org). Upon certification, diplomates will be contacted by the ABMS to specify which biographical information they would like to appear in the directory. Diplomates will have their biographic listings retained in the directory only if they maintain their certification according to the ABS Maintenance of Certification Program.

Certification in Surgical Specialties
The ABS has been authorized by the American Board of Medical Specialties to award certification to diplomates of the ABS who meet defined requirements in certain disciplines related to the overall specialty of surgery. These disciplines currently include pediatric surgery, vascular surgery, surgical critical care, and surgery of the hand.

Those seeking subspecialty certification by the ABS must
- Be currently certified by the ABS in general surgery;
- Have completed the required additional education in the discipline beyond that required for general certification;
- Demonstrate operative experience and/or patient care data acceptable to the ABS;
- Show evidence of dedication to the discipline as specified by the ABS;
- Receive favorable endorsement by the director of the residency program in the particular discipline;
- Successfully complete the prescribed examinations.

Two specific exceptions to this policy apply:
- Pending approval by the ACGME, this requirement will no longer apply as of July 1, 2006, for certification in vascular surgery.
- Applicants who complete an accredited surgical critical care fellowship after completion of 3 years of general surgery residency may take the Certifying Examination in Surgical Critical Care while still in residency, though the certificate will not be awarded until general surgery certification is achieved.

Individuals interested in certification in pediatric surgery, vascular surgery, surgical critical care, or surgery of the hand may request information from the ABS office or refer to the ABS Web site, www.absurgery.org.

Maintenance of Certification
Maintenance of Certification (MOC) is a program of continuous professional development initiated by the American Board of Medical Specialties and its 24 member boards, including the ABS. MOC, which replaces the ABS' previous recertification requirements, is intended to document to the public and the health care community the ongoing commitment of diplomates to lifelong learning and quality patient care. Given the growing public concern over health care quality, the ABS believes that broader evaluation of diplomates is in their own best interest as well as the public interest.

MOC consists of four key elements: (1) evidence of professional standing; (2) evidence of commitment to lifelong learning and periodic self-assessment; (3) evidence of cognitive expertise; and (4) evidence of evaluation of performance in practice. Candidates and diplomates who certify or recertify after July 1, 2005, must comply with the requirements of the ABS Maintenance of Certification Program. Please refer to the ABS Web site, www.absurgery.org, for additional information.

The ABS considers Maintenance of Certification to be voluntary in the same manner as the original certification. Upon recertification prior to the date of expiration, the dates of the new certificate will start from the date of expiration of the previous certificate, not the date of recertification. Maintenance of Certification will also be offered to diplomates holding subspecialty certificates and will have comparable requirements.

Sanction of Certificate
Certification by the American Board of Surgery may be subject to sanction such as revocation or suspension at any time that the
directors shall determine, in their sole judgment, that the
diplomate holding the certification was in some respect not prop-
erly qualified to receive it or is no longer properly qualified to re-
tain it.

The directors of the ABS may consider sanction for just and suffi-
cient reason, including, but not limited to, any of the following:
• The diplomate did not possess the necessary qualifications nor
meet the requirements to receive certification at the time it was
issued; falsified any part of the application or other required doc-
umentation; participated in any form of examination irregulari-
ties; or made any material misstatement or omission to the ABS,
whether or not the ABS knew of such deficiencies at the time;
• The diplomate misrepresented his or her status with regards to
board certification, including any misstatement of fact about be-
ing board certified in any specialty or subspecialty;
• The diplomate engaged in conduct resulting in a revocation, sus-
pension, qualification, or other limitation of his or her license to
practice medicine in any jurisdiction;
• The diplomate engaged in conduct resulting in the expulsion, sus-
pension, or other limitation on his or her privileges to practice
surgery in a health care organization.

The holder of a revoked or suspended certificate will be given
written notice of the reasons for its sanction by
express messenger (eg, FedEx) to the last address that the holder has provided to
the ABS. Sanction is final upon mailing of the notification.

Upon revocation of certification, the holder's name shall be re-
moved from the list of certified surgeons and the holder is required
to return the certificate to the ABS office.

Individuals may appeal the decision to revoke or suspend a cer-
tificate by complying with the ABS' Reconsideration and Appeals
Policy, available from the ABS office or Web site
(www.absurgery.org). Failure to make a timely appeal will result in
a loss of appeal rights. Should the circumstances that justified revo-
cation of certification be corrected, the directors of the ABS may, at
their sole discretion, reinstate certification after appropriate re-
view of the individual's licensure and performance, using the same
standards and requirements applied to the applicants for
certification.

(These criteria and conditions are subject to change without no-
tice. All applicants are advised to contact the American Board of
Thoracic Surgery (ABTS) to ascertain whether the information
below is current.)

General Requirements
Certification by the ABTS may be achieved by completing one of the
following two pathways and fulfillment of the other requirements:
1. Pathway One is the successful completion of a full residency in
general surgery approved by the Accreditation Council for Gradu-
ate Medical Education (ACGME) or the Royal College of Physi-
cians and Surgeons of Canada, followed by the successful com-
pletion of an ACGME-approved thoracic surgery residency.

Pathway Two is the successful completion of a 6-year categori-
ocal-integrated thoracic surgery residency developed along guide-
lines established by the TSA and having the approval of the
ACGME (RRC-TS).

These pathways must provide adequate education and opera-
tive experience in cardiovascular and general thoracic surgery.
2. For residents who begin their thoracic surgery residency in July
2005 and after, certification by the American Board of Surgery
(ABS) will be optional rather than mandatory.
3. An ethical standing in the profession and a moral status in the
community that are acceptable to the Board.
4. A satisfactory performance on the American Board of Thoracic
Surgery examinations.
5. A currently registered full and unrestricted license to practice
medicine granted by a state or other United States jurisdiction.
The license must be valid at the time of application for admission
to examination and maintained throughout the certification.
process. A temporary limited license such as educational, institutional, or house staff permit is not acceptable to the Board.

Residency Requirements
Candidates must have fulfilled all of the residency requirements of the Board in force at the time their applications are received.

Candidates for certification must complete a minimum of 24 months of residency training in thoracic and cardiovascular surgery in a program accredited by the RRC. This must include 12 months of continuous senior responsibility. The director of the thoracic training program is required to approve the application form by signature, certifying that the candidate has satisfactorily completed the residency in thoracic surgery as described above. Once an application is received, it is considered the official and only record. The Board assumes that the appropriate signatures authenticate the accuracy of the case lists and all other information submitted on the application.

Education and adequate operative experience in both general thoracic surgery and cardiovascular surgery are essential parts of any approved thoracic surgery residency program, irrespective of the area of thoracic surgery in which a candidate may choose to practice.

Operative Case Criteria
The operative experience requirement of the American Board of Thoracic Surgery has 2 parts. One is concerned with the intensity or volume of cases and the other with the distribution of cases (index cases).

1. Surgical Volume (Intensity)
The Board’s operative experience requirements include an annual average of 125 major operations performed by each resident for each year that the program is approved by the Residency Review Committee for Thoracic Surgery. In a 2-year program, this requirement is met if a resident performs a total of 250 major cases over the course of his or her residency; in a 3-year program, the resident must perform 375 major cases.

This guideline on intensity of cases conforms with the Program Requirements for Residency Education in Thoracic Surgery as published by the ACGME and the Residency Review Committee for Thoracic Surgery.

The application of any candidate whose supervised operative experience fails to meet the requirement of an annual average of 125 major operations with a minimal number of 100 in any 1 year will be referred to the Credentials Committee for review.

2. Index Cases (Distribution)
Index cases are full credit cases only.

The applications of candidates whose operative experience does not include the required number of index cases as listed below will be sent to the Credentials Committee for review. The number of index cases required to meet the minimal acceptable standards in the various areas are:

- Lungs, pleura, chest wall — 50
- Pneumonectomy, lobectomy, segmentectomy — 30
- Other — 20
- Esophagus, mediastinum, diaphragm — 15
- Esophageal operations — 8
- Resections — 4
- Other esophageal — 4
  (A total of 8 esophageal operations are required; of that number 4 must be esophageal resections.)
- Other — 7
- Congenital cardiac — 20
- Full credit — 10

Operative Experience Credit
Credit will be allowed for supervised operative experience in a well-organized teaching setting only when the following criteria are met:

- First assistant — 10
- (Exposure to 20 congenital heart cases with a minimum of 10 cases for full credit)
- Adult cardiac — 75
- Valvular surgery — 20
- Myocardial revascularization — 40
- Other — 15
- Reoperations — 5
  (Includes any reoperation procedures for adult cardiac)
- Bronchoscopy and esophagoscopy — 30
  (must include at least 10 esophagoscopy)
- VATS — 10

Endoscopic procedures may be counted for credit whether they are performed as independent procedures or immediately preceding a thoracic operation.

Reoperation procedures can be counted twice for any adult cardiac procedure. For example, a re-op coronary artery bypass surgery may be counted as both a myocardial revascularization and a re-operation.

Major vascular operations outside the thorax and procedures, such as pacemaker implantation and closed electrophysiology procedures, should be listed separately.

The Board recognizes that supervised operative experience in a well-organized teaching setting that is approved by the Residency Review Committee for Thoracic Surgery protects the patient, who, in most instances, is the personal and identifiable responsibility of a faculty surgeon. This supervised experience optimally prepares the candidate to begin the independent practice of cardiothoracic surgery after the completion of residency.

The Credentials Committee has been authorized by the Board to reject a candidate if his or her operative experience during the thoracic surgery residency is considered to be inadequate. The candidate, the program director, and the Residency Review Committee for Thoracic Surgery will be notified if such action is taken. If the Credentials Committee finds the applicant’s operative experience inadequate and additional training is required, the additional training must be approved in advance. Should the program director determine that a resident needs additional training beyond the number of years that have been approved by the ACGME and the Residency Review Committee for Thoracic Surgery, before submitting an application, this additional training must also be approved by the Board in advance.

Even though emphasis on one or another facet of thoracic surgery (pulmonary, cardiovascular, esophageal, thoracic trauma, etc) may have characterized a candidate’s residency experience, the candidate is nevertheless held accountable for knowledge concerning all phases of the field, including extracorporeal perfusion (physiological concepts, techniques, and complications), cardiac devices, management of dysrhythmias, and thoracic oncology. In addition, a candidate should have had responsibility for the care of pediatric general thoracic surgical patients and be competent in video-assisted thoracoscopic surgery. The candidate should also have an in-depth knowledge of the management of acutely ill patients in the intensive care unit. This requires an understanding of cardiorespiratory physiology, respirators, blood gases, metabolic alterations, cardiac output, hyperalimentation, and many other areas. By virtue of his or her residency in thoracic surgery, the candidate is expected to be fully qualified in the surgical care of critically ill patients.
a. The resident participated in the diagnosis, preoperative planning, surgical indications, and selection of the appropriate operation;
b. The resident performed under appropriate supervision in a well-organized teaching setting approved by the Residency Review Committee for Thoracic Surgery; those technical manipulations that constituted the essential parts of the procedure itself;
c. The resident was substantially involved in postoperative care.

Supervision and active participation by the thoracic surgery faculty are required in preoperative, intraoperative, and postoperative care.

The Board also emphasizes that first-assisting at operations is an important part of resident experience, particularly in complex or relatively uncommon cases.

Applications

Before applying for examination, prospective candidates should consider whether they are able to meet the minimum requirements of the Board.

Effective July 1, 2002, all residents must meet the new operative case requirements. The new requirements are listed in this document and are available on the Board’s Internet site: www.abts.org.

Utilization of the CTNet Operative Logs for recording operative cases is required of all residents who started their thoracic surgery training in 2001 or later. These residents are also required to use the online application process when applying for certification. The standard paper application is still available upon request for residents who started their thoracic surgery training in 2000 or earlier. The online application is an efficient and precise method for submitting the application and the operative case reports from CTNet, and residents are strongly urged to use the online version. Access to the online application is through the Board’s Web site at www.abts.org.

Directions for utilizing the online application should be carefully followed since some of the forms must be printed from the Internet, signed by the appropriate individual, and sent to the Board office with a copy of the medical license and the registration fee. A list of the documents that must be submitted with the online application is available on the Web site. Be certain to include a copy of a your valid license to practice medicine.

When the resident is ready, the draft online application is reviewed by the program director. Once he/she approves the application, the program director submits it online to the Board office.

The operative case logs and completion of residency will be considered individually. The recommended additional training must be completed before an application can be submitted.

Examinations

It is the policy of the ABTS to consider a candidate for examination only after he or she has completed a thoracic surgery residency program approved by the Residency Review Committee for Thoracic Surgery.

Separate written and oral examinations are held annually at times and places determined by the Board. Information regarding the dates and places of the examinations is published in the Examination and Licensure column of the Journal of the American Medical Association, the Journal of Thoracic and Cardiovascular Surgery, and the Annals of Thoracic Surgery.

The 2006 Part II (oral) examination will be held on June 2 and 3, 2006, in Chicago.

The 2006 Part I (written) examination date has not yet been determined.

Part I—Written Examination

The examination consists of a written examination designed primarily to assess cognitive skills. The content of the questions on this examination represents uniform coverage of all aspects of the thoracic surgery specialty.

Part II—Oral Examination

Successful completion of the Part I (written) examination is a requirement for admission to the Part II (oral) examination. The oral examination is designed to test the candidate’s knowledge, judgment, and ability to correlate information in the management of clinical problems in general thoracic and cardiovascular surgery.

Examination Sequence

Candidates should apply for the examination within 5 years of the satisfactory completion of their thoracic surgery residency. Any candidates applying for the examination 5 years or more after the satisfactory completion of residency will be considered individually.

Additional training may be required of these individuals. To be eligible, the recommended additional training must be completed before an application can be submitted.

After a candidate is declared eligible for the written examination (Part I), he or she must pass Part I within 4 years. The candidate who successfully completes Part I of the examination then must pass Part II within the succeeding 4 years.

Candidates who fail an examination (Part I or Part II) are eligible to repeat the examination the following year.

Candidates who fail either Part I or Part II of the examination three times, or do not pass either part of the examination within the allotted time period of 4 years, will be required to complete an additional thoracic surgical educational program which must be approved in advance by the Board before they will be permitted to retake the examination. The required additional training must be completed within the succeeding 2-year period after failing either the written or the oral examination. Candidates who complete the required additional training must file an addendum to their application, have their eligibility for examination reviewed by the Credentials Committee, and pay a new registration fee. They will be given two more opportunities to take the examination (Part I or Part II) within the succeeding 2 years.

Candidates who fail either Part I or Part II a fifth time will be required to complete another approved thoracic surgery residency before they will be eligible to reapply for examination by the Board.

Fees

The following fees are subject to change:

<table>

</tr>
</thead>
<tbody>
<tr>
<td>Registration fee (not refundable)</td>
<td>$475</td>
</tr>
<tr>
<td>Part I examination fee</td>
<td>$1,100</td>
</tr>
<tr>
<td>Part I reexamination fee</td>
<td>$1,100</td>
</tr>
</tbody>
</table>
Applicants who are certified in thoracic surgery are issued certificates that are valid for 10 years. The certificates will no longer be valid if the certificate is not renewed before expiration by fulfilling the requirements for recertification specified by the Board. Diplomates must be current with annual Certification Maintenance Fee in order to enter the certification process.

**Denial or Revocation of Certificate**

No certificate shall be issued or a certificate may be revoked by the Board if it determines that:

a. the candidate for certification or diplomate did not possess the required qualifications and requirements for examination; whether such deficiency was known to the Board or any Committee thereof before examination or at the time of issuance of the certificate as the case may be;
b. the candidate for certification or diplomate withheld information in his or her application or made a material misstatement or any other misrepresentation to the Board or any Committee thereof, whether intentional or unintentional;
c. the candidate for certification or diplomate was convicted by a court of competent jurisdiction of any felony or misdemeanor involving moral turpitude and, in the opinion of the Board, having a material relationship to the practice of medicine;
d. the candidate for certification or diplomate had his or her license to practice medicine revoked or was disciplined or censured by any court or other body having proper jurisdiction and authority because of any act or omission arising from the practice of medicine; or
e. the candidate for certification or diplomate had a history of chemical dependency or developed such during the certification process and failed to report same to the Board.

**Chemical Dependency**

Qualified applicants who have a history of chemical dependency that has been reported to the Board and who submit documentation suitable to the Board that their dependency has been under control for a period of at least 2 years will be admitted to the examination process.

For candidates who are already in the examination process and develop a chemical dependency as reported to the Board, the process will be suspended until the candidate can provide documentation suitable to the Board that the condition has been under control for a period of 2 years. At that time, the candidate will be readmitted to the examination process. The requirement to be accepted for examination within 5 years of completion of an approved thoracic surgery residency will not be waived.

**Certification**

After a candidate has met the requirements for eligibility and passed the examination, a certificate attesting to the candidate’s qualifications in thoracic surgery will be issued by the Board. The certificate is valid for 10 years.

**Recertification**

Applicants who are certified in thoracic surgery are issued certificates that are valid for 10 years from the date of certification, after which the certificates will no longer be valid. Certificates can be renewed before expiration by fulfilling the requirements for recertification specified by the ABTS at that time. A Recertification (Maintenance of Certification) Booklet is available upon request.

**Annual Certification Maintenance Fee**

An annual Certification Maintenance Fee of $100 is required of all active diplomates, age 65 and younger. The fee is not assessed to diplomates in the year of their certification. The fee, which is cumulative, helps defray administrative expenses related to maintaining and utilizing the diplomate’s information on the Board’s computer system. The board will not respond to inquiries about the

Certifying (Part 2) Examination
February 17-18, 2006
February 22-23, 2008

All examination dates are subject to change.

Organization

The American Board of Urology was organized in Chicago on September 24, 1934. Members of the Board present from the American Association of Genito-Urinary Surgeons were Dr. William F. Brasch, Dr. Henry G. Bugbee, and Dr. Gilbert J. Thomas; those from the American Urological Association were Dr. Herman L. Kretschner, Dr. Nathanial P. Rathbun, and Dr. George Gilbert Smith; those from the Section of Urology of the American Medical Association were Dr. Clarence G. Bandler, Dr. A. I. Folsom, and Dr. T. Leon Howard.

The officers of the Board elected at this meeting were Dr. Herman L. Kretschner, President; Dr. Clarence G. Bandler, Vice President; and Dr. Gilbert J. Thomas, Secretary-Treasurer.

The American Board of Urology is a nonprofit organization. It was incorporated May 6, 1935, and held its first legal meeting on May 10, 1935.

The Board of Trustees has twelve members (including officers). No salary is paid for service on the Board.

The nominating societies of this Board and sponsors of its activities are: the American Urological Association, the American Association of Genito-Urinary Surgeons, the American Association of Clinical Urologists, the Society of University Urologists, the American College of Surgeons, and the Section on Urology of the American Academy of Pediatrics.

The American Board of Urology and 23 other medical specialty boards are members of the American Board of Medical Specialties (ABMS), which includes as associate members the Association of American Medical Colleges, the American Hospital Association, the American Medical Association, the Federation of State Medical Boards of the USA, the National Board of Medical Examiners, and the Council of Medical Specialty Societies.

The trademark and seal of the American Board of Urology are registered. Any unauthorized use of the trademark or seal is prohibited without express permission of the Board.

Purpose of Certification

The American Board of Urology, Inc., hereinafter sometimes referred to as “the Board,” is organized to encourage study, improve standards, and promote competency in the practice of urology. The objective of the Board is to identify for the public’s knowledge those physicians who have satisfied the Board’s criteria for certification and recertification in the specialty of urology. Certification by the Board does not guarantee competence in practice, but does indicate that the physician has completed basic training requirements and has demonstrated at the time of examination a fund of knowledge and expertise in the care of those patients whose cases were reviewed by the Board, as described elsewhere in this section.

Functions of the Board

The Board arranges and conducts examinations testing the qualifications of voluntary candidates and grants and issues certificates to accepted candidates duly licensed to practice medicine. The certificate is the property of the Board, and the Board holds the power to revoke such a certificate. The Board also evaluates and examines diplomates for purposes of recertification.

The Board endeavors to serve the public, hospitals, medical schools, medical societies, and practitioners of medicine by preparing a list of urologists whom it has certified. Lists of diplomates of this Board are published annually in the Official ABMS Directory of Board Certified Medical Specialists and in the Directory of Physicians of the American Medical Association.

The Board is not responsible for opinions expressed concerning an individual’s credentials for the examinations or status in the certification process unless they are expressed in writing and signed by the President or Executive Secretary of the Board.

Application for certification is entirely voluntary. Only one certificate for each qualified individual is issued by the Board.

The Board makes no attempt to control the practice of urology by license or legal regulation, and in no way interferes with or limits the professional activities of any duly licensed physician.

The Certification Process

Applicants approved by the Board to enter the certification process must complete both a Qualifying (Part 1) Examination and, after passing this examination, a subsequent Certifying (Part 2) Examination. Assessment of clinical practice through review of practice logs and peer review will also be carried out prior to admission to the Certifying (Part 2) Examination. Certification must be achieved within 5 years of the successful completion of residency.

Applicants who have not applied for or have not successfully completed the certification process within 5 years of the completion of their urological residency will be required to pass a written Preliminary Examination before being permitted to re-enter the certification process. The Preliminary Examination is given each
November in conjunction with the annual AUA In-Service Examination.

After passing the Preliminary Examination, the applicant must take the Qualifying (Part 1) Examination one of the next two times it is offered. Any such candidate who fails to do so must successfully retake the Preliminary Examination to proceed with certification. Contact the Board office prior to the August 15 deadline for more Preliminary Examination Information.

**Educational Requirements**
An applicant may initiate application for certification by the Board during the final year of his or her residency training or at some point thereafter. Every applicant must meet certain basic requirements as follows:

**Education & Residency**
Except as noted below for international medical graduates, the applicant must be a graduate of a medical school approved by the Liaison Committee on Medical Education or a school of osteopathy approved by the Bureau of Professional Education of the American Osteopathic Association, and have completed a urology residency program accredited by the Accreditation Council for Graduate Medical Education (ACGME) or Royal College of Physicians and Surgeons of Canada (RCPS(C)).

**Postgraduate Training Requirements**
The American Board of Urology mandates a minimum of 5 clinical years of postgraduate medical training. The pre-urology requirements are 12 months of general surgery; 12 months of general surgery and/or urology, including a minimum of 6 months of general surgery/urology. Suggested guidelines for the remaining 6 months of the second 12 months are: 6-6 months of abdominal, endocrine, plastic, pediatric, urologic, vascular surgery; 0-2 months of ICU/critical care, transplant, ER/trauma, gynecology (not obstetrics), or nephrology; and 0-1 month of GU/invasive radiology, anesthesia, or genito-urinary pathology. The remaining 36-48 months must be spent as chief resident in urology. Dedicated research rotations are permitted in and only in 6-year programs. Scholarly endeavors are permitted during primary clinical rotations within a 5-year program (2+3 or 1+4).

All of the above training must be in ACGME-approved programs. Regardless of the training format provided, the final 12 months must be spent as chief resident in urology with appropriate clinical responsibility under supervision in institutions that are part of the ACGME-approved program.

For a program requiring more than 36 months of urology training, the candidate must complete the program as defined by the Residency Review Committee for Urology. Variance shall not be granted for an individual to take pre-urology training out of sequence after the completion of his or her urology residency. Pre-urology credit will be given only to a physician who has trained in ACGME-approved or RCPS(C)-approved training programs. Lesser degrees of training shall not receive such approval.

To be admissible to the certification process of the Board, the resident must have completed in a satisfactory manner the training requirements of his or her specific program in effect at the time of acceptance in the program, as established by the Residency Review Committee for Urology or the Accreditation Committee of the RCPS(C).

**Changing Programs**
Any resident who intends to transfer to another urology residency program during the urologic portion of the training must obtain the approval of the Board prior to the change. The resident must petition the Board in advance for said approval. The Board also requires the written acknowledgment and approval of both program directors.

**Leaves of Absence**
In regard to leaves of absence for parental leave, illness, injury, disability, vacation, alcohol or substance abuse during residency training in urology, time away from clinical residency may not exceed 15% of the clinical residency training period and not more than 20% of the chief resident year.

**Requirements for Canadian Trainees**
To meet the requirements for admissibility to the certification process of the Board, a Canadian-trained urologist must have graduated from a US or Canadian medical school approved by the Liaison Committee for Medical Education and have completed the previously described pre-urology and urology requirements with the final year as chief resident, in programs approved by the ACGME or the Accreditation Committee of the RCPS(C). Upon successful completion of this training, the candidate may sit for the Qualifying (Part 1) Examination of the American Board of Urology. To be admissible to the Certifying (Part 2) Examination, the Canadian-trained candidate must be certified by the RCPS(C).

**Requirements for International Medical Graduates**
International medical graduates from schools outside the US that provide an equivalent medical background and who have completed an ACGME-approved urology residency and the prerequisite ACGME-approved pre-urology training in the US may qualify for examination by the American Board of Urology. All such applicants must have a valid certificate from the Education Committee for Foreign Medical Graduates (ECFMG).

**Other Requirements**

**Credentials Approval**
Applicants for certification must be approved by the Credentials Committee and the Board. Additional information may be requested by the Executive Secretary. No duty or obligation to assist any applicant in completing the application process is implied. The applicant is responsible for ensuring that all supporting documents are received in the Board office by the indicated time.

**Release of Liability**
As a condition of application to the certification process, applicants must sign a waiver releasing, discharging, and exonerating the Board, its trustees, officers, members, examiners, employees, and agents from any and all claims, losses, costs, expenses, damages, and judgments (including reasonable attorneys' fees) alleged to have arisen from, out of, or in connection with the certification process.

**Release of Results**
As a condition of application to the certification or recertification process, the applicant must sign a waiver agreeing to allow the Board to release application information or examination results achieved in the Qualifying, Certification, or Recertification Examinations to the residency program director, the Residency Review Committee for Urology, and any third parties the Board deems necessary.

**Disability Accommodations Policy**
An applicant requesting accommodations during Board examinations due to a physical or mental disability that substantially limits a major life activity must indicate this request on the application provided by the Board. A recent evaluation and appropriate formal documentation by a qualified professional that substantiates the disability must accompany the application. The Board may then have
any and all documentation and/or evaluations submitted by the candidate reviewed by an additional qualified professional. This can be done at the Board's discretion and the Board will bear the cost of any additional review or evaluation. The Credentials Committee of the Board will make the final decision regarding the accommodations that will be offered if the request under consideration is made by a candidate for certification.

Misrepresentation and Nonresponse Procedure

Applicants for certification who misrepresent or do not respond to questions on the application will be, at a minimum, deferred from the process for 1 year.

Requirements for Applicants With a History of Chemical Dependency

Such applicants will not be admitted to the Qualifying (Part 1) or Certifying (Part 2) Examinations unless they present evidence to the Board that they have satisfactorily completed the program of treatment prescribed for their condition. In addition, any such applicants for the Certifying (Part 2) Examination may have a site visit of their practices by a representative of the Board.

The Qualifying (Part 1) Examination

The Qualifying (Part 1) Examination is given annually the first Monday in August. The examination is given in a computer-based format at over 200 Pearson VUE Testing Centers across the US. An appointment to sit for the examination can be scheduled at the prescribed time, after the candidate has met all requirements, paid all fees, and been approved by the Board. A letter will be sent to the candidate notifying the candidate he or she is eligible to sit for his or her examination and when he or she may schedule an examination appointment. The examination is made up of 300 multiple choice questions which will be presented in groups of 150 each over two 3-hour sessions in 1 day, with a lunch break between sessions.

The examination is designed to assess knowledge of the entire field of urology and allied subjects. This includes, but may not be limited to, andrology (including infertility), calculous disease (including endourology and shock-wave litho-tripsy), congenital anomalies, pediatric urology, urologic disorders of females, infectious diseases, nephrology and urodynamics, obstructive diseases, psychological disorders, renovascular hypertension and renal transplantation, sexuality and impotence, adrenal diseases and endocrinology, trauma, urologic pathology, urologic imaging, and urologic oncology.

Application

An application provided by the Executive Secretary shall be completed by the applicant and returned to the Board office by courier for guaranteed receipt. Applications must be in the Board office by November 1 in order to permit the applicant to be admitted for the Qualifying (Part 1) Examination the following August. Applications and documentation not postmarked by November 1 will incur a late fee of $400.

No applications will be accepted after December 1. No application will be considered by the Credentials Committee or the Board unless it is submitted by the deadline set forth and is complete and includes all required supporting documentation. The Executive Secretary will determine if an application is complete.

Documentation of Education and Training

The application must be accompanied by a notarized copy of a graduation certificate from a medical school approved by the Liaison Committee on Medical Education or from a school of osteopathy approved by the Bureau of Professional Education of the American Osteopathic Association.

The candidate must provide specific verification (such as a notarized certificate or an original letter from the director of the program(s) where the applicant completed PGY 1 and 2) of successful completion of the pre-urology postgraduate training requirement in a program approved by the ACGME. Pre-urology training must be documented separately from urology training.

Graduates of medical schools not approved by the Liaison Committee on Medical Education, the Bureau of Professional Education of the American Osteopathic Association, or the Accreditation Committee of the RCPS(C) must furnish a notarized copy of a valid ECFMG certificate.

The director of the program where the applicant is finishing residency training must provide a letter to the Board office by January 1 confirming that the applicant is expected to have successfully completed 1 year of training in the capacity of chief resident during the calendar year in which the Qualifying (Part 1) Examination is to be taken. The program director must also complete an evaluation form supplied by the Board. This evaluation must be received in the Board office by March 1 preceding the Qualifying (Part 1) Examination given in August.

Failure to Pass the Examination

An applicant failing the Qualifying (Part 1) Examination must repeat the exam the next year unless the absence is excused by the Board office. Failure to retake the examination at the first available opportunity will result in assessment of an unexcused absence fee on subsequent applications. The applicant must pass the Qualifying (Part 1) Examination process in sufficient time to allow for completion of the certification process within the allotted 5 years of completion of residency.

The Certifying (Part 2) Examination

Candidates for the Certifying (Part 2) Examination must meet all training requirements and have passed the Qualifying (Part 1) Examination. Candidates will be expected to demonstrate knowledge and surgical experience in the broad domains of urology such as: infertility, impotence, calculous disease, endourology, extracorporeal shock wave lithotripsy, neurourology, urodynamics, urologic imaging, uropathology, female urology, pediatric urology, infectious disease, obstructive disease, psychologic disorders, renovascular disease, transplantation, genitourinary sexuality, trauma, and oncology.

The Certifying (Part 2) Examination includes assessment of clinical practice through review of practice logs, peer review, and oral examinations.

Period of Admissibility

The candidate must successfully complete all components of the Certifying (Part 2) Examination within 5 years of the completion of residency, unless an extension has been granted. In the event a candidate does not successfully complete certification within this timeframe, it is necessary to pass a written Preliminary Examination and reenter the certification process at the Qualifying (Part 1) Examination level.

A yearly extension of the period of admissibility may be granted by the Board for approved fellowships relevant to urology of 1 year or longer. Credit is subject to Board approval; notarized documentation of fellowship training is required. A 6-month credit toward the 18-month practice period requirement may be awarded to an individual for fellowship training approved by the Board, effective with documentation of the successful completion of the fellowship. The candidate must notify the Board in writing if he or she spends 1 or more years in post-residency fellowship training.

All extensions of the period to complete certification are granted by the Board because of extenuating circumstances.
(eg, involvement in a fellowship of 1 or more years’ duration subject to Board approval, and deferral for an inadequate practice log). The candidate should request such extensions in writing, and include the reason for the request.

Application
Application for admission to the Certifying (Part 2) Examination is made by completing the Supplemental Application form mailed from the Board office in May to all potential applicants. This application should be returned by courier for guaranteed receipt, and must be received in the Board office by July 1 prior to the Certifying (Part 2) Examination of the following year. Applicants will be assessed $400 for applications received between July 1 and August 1. No applications will be accepted after August 1.

Licensure Requirements
Applicants seeking certification by the American Board of Urology must also have a valid medical license that is not subject to any restrictions, conditions, or limitations. Notarized documentation of licensure is required. The applicant must inform the Board of any conditions or restrictions in force on any active medical license he or she holds. When there is a restriction or condition in force on any of the applicant’s medical licenses, the Credentials Committee of the Board will determine whether the applicant satisfies the licensure requirement.

Practice Requirements
Candidates for the Certifying (Part 2) Examination must be in the full-time practice of urology and must be licensed to practice medicine in the area of current practice activity. In addition, the candidate must have engaged in a minimum of 18 months of urological practice with primary patient responsibility in a single community, an academic institution, or in the Armed Forces.

Practice Log
Candidates must submit logs of all office visits, as well as all hospital, ambulatory care, and office procedures for each facility where they practice for a 6-month period. Procedures performed as the primary surgeon and procedures performed by auxiliary personnel and reviewed by the candidate should be included. Each log must document the same 6 consecutive months from the 16-month period between May 1, 2004 and September 1, 2005.

Procedures done outside of the US are acceptable. In the case of military or public health physicians subject to unexpected changes of assignment, the Board may accept cases from the previous assignment.

All logs must be received in the Board office by September 1 prior to the Certifying (Part 2) Examination. Logs must be verified by the candidate and notarized. Courier service for guaranteed receipt is recommended. Applicants will be assessed $400 for logs received between September 1 and September 15. No practice logs will be accepted after September 15.

Candidates deferred on the basis of their practice log should submit a new log with their next application. The 5-year period of admission for completing certification will be extended one time by 1 year for candidates whose certification is delayed because of an inadequate practice log. Logs must be prepared in accordance with the format provided by the Board.

All logs must include the following information:
1. Location where procedure was performed
2. Medical record number or other unique identifier
3. Age and gender of patient
4. Date of procedure
5. Diagnosis code(s)
6. Procedure code(s)
7. Practice breakdown form
8. Verification statement with notarized signature

Practice log review is an important component of the certification process. While there is no minimum number of cases established for an acceptable log, a practice experience well below the norm for the peer group may be cause for delaying the certification process until there is sufficient experience to adequately assess a candidate’s practice pattern and management abilities. The Board will review the practice logs of urologic subspecialists in the context of the expected subspecialty experience.

Copies of patient records from the patient care facility and/or office records of any one or more of the above cases may be requested by the Board. The candidate is expected to furnish such records within 1 month of the request. The candidate shall ensure that the patient records so disclosed do not contain any patient-identifying information.

Peer Review
To further ascertain and document the candidate’s qualifications for certification, the Board will solicit information and comments from appropriate individuals, such as fellow practitioners, or from organizations, such as medical societies and licensing agencies. The candidate must sign a waiver authorizing any and all third parties contacted by the Board to furnish to the Board such records and information, including confidential information related to the candidate’s abilities and reputation as a urologist, as the Board (in its sole discretion) may deem necessary or advisable. Under no circumstances will the source of any peer review be revealed to any person other than trustees and staff of the Board.

Board Review of Credentials
Upon receipt of the practice logs and peer review information, the Credentials Committee of the Board will review the candidate’s credentials. Evidence of ethical, moral, and professional behavior, and an appropriate pattern of urologic practice including experience with an adequate volume and variety of clinical material, will be sought. Areas of inadequacy may be cause for deferral or discontinuation of the certifying process until these areas are clarified or corrected. Actions of the Board to achieve clarification may include:

a. Inquiry by the Credentials Committee of the Board into practice irregularities;
b. Request for certified copies of candidate’s health care facility and/or office records for review;
c. Invitation to appear before the Board for a personal interview;
d. A site visit to the candidate’s community at the candidate’s expense; and/or
e. Other appropriate measures that may be deemed necessary to assess apparent deviations from standard urologic practice.

The candidate will not be permitted to continue the certification process until the Board has satisfied itself of the appropriateness of the candidate’s practice pattern and professional behavior. The Board may elect to defer continuation of the certification process pending investigation and resolution of any inadequacies or deviations.

Oral Examination
The oral examinations are given annually in February in Dallas, Texas. The examination is an interactive process between examiner and candidate during which an assessment is made of the candidate’s ability to diagnose and manage urologic problems. There are
two 1-hour examination encounters with different examiners, composed of three protocols each.

Since the candidate has passed the Qualifying (Part 1) Examination, the examiner presumes in the oral examination that the candidate has a satisfactory degree of cognitive knowledge of urology. Therefore, the oral examination will concentrate on the candidate's professional conduct, problem-solving ability, and response to changes in a clinical situation.

Evaluation is made of the candidate's ability to collect pertinent information systematically, integrate it, assess the problem, and propose appropriate solutions. The candidate's ability to manage changing clinical conditions is evaluated through the flexible interaction between the examiner and the candidate. Changed clinical conditions may be posed by the examiner in order to assess various responses by the candidate, or may be developed by the examiner from the outcome of management recommendations offered by the candidate during the interview. The candidate's attitude, interaction with the examiner, and expression of patient management concerns contribute to the assessment of professional behavior.

**Fees and Deadlines**

See “Summary of Fees,” below.

The current examination fees may be charged without notice. Fees reimburse the Board for expenses incurred in preparing and processing the applications and examinations of the candidate.

**Application Fees**

Payment of $1,100 must accompany the initial application for the Qualifying (Part 1) Examination except in the case of chief residents, who shall pay $1,000 as the fee for their initial application. Only chief residents may delay the fee payment of their Qualifying (Part 1) examination until January 5. An additional fee of $1,150 must accompany the application for the Certifying (Part 2) Examination. An applicant or candidate secures no vested right to certification as a result of paying an examination fee.

**Late Fees**

A $400 late fee will be assessed for any application and/or documentation and/or fees not received in the Board office by the prescribed deadlines. Courier service for guaranteed receipt is recommended.

**Cancellation Fees**

Cancellation fees are as follows: $500 for failure to appear; $300 for an excused absence; $200 for an excused absence (in cases of personal or family illness or death).

**Excused Absences**

Only one excused absence is permitted, at the discretion of the Board, and this extends the period of admissibility for 1 year. The excused absence fee of $300 will be assessed. Following one excused absence, any subsequent absences are classified as unexcused. There will be no further extensions of admissibility, and an unexcused absence fee and reinstatement fee, if any, will be assessed.

**Inactive Status**

Applications will be considered inactive if two successive examination appointments are canceled by the applicant. A reinstatement fee is assessed after two consecutive absences. If the candidate does not already exceed the 5-year time limit, he or she may regain active status by paying the reinstatement fee of $600 plus an additional fee for an unexcused absence or for a non-appearance.

**Other Fees**

A $100 fee will be assessed for all returned checks. The fee for the Preliminary Examination is $600. If a Preliminary Examination appointment is canceled, a $300 cancellation fee will be assessed. The fee for a site visit by a Board representative is $2,000 plus expenses.

**Refunds**

Fees are refundable, less an administrative fee, in most cases of cancellation or deferral. Fees shall be refunded to candidates deferred by the Board, less a $100 administrative fee; or, if deferred for an inadequate practice log, a $175 administrative fee.

**Recertification**

Certificates issued by the American Board of Urology on or after January 1, 1985, expire on the anniversary of the date of issue and are valid for 10 years only. A physician who fails to be recertified by the expiration date is no longer a diplomate of the Board, and his or her name is deleted from The Official ABMS Directory of Board Certified Medical Specialists. The expired certificate must be returned to the Board.

The Board endorses the concept of lifelong learning in urology for its diplomates. Beginning in 2007, diplomates will enter a process of Maintenance of Certification (MOC). MOC is designed to evaluate the continued competence of a diplomate. MOC was developed by the ABMS and its member boards and has been supported by the ACGME, the American Medical Association (AMA), the Federation of State Medical Boards (FSMB), and many other organizations.

Maintenance of Certification will be integrated into the current recertification process. Diplomates will be required to periodically complete self-assessment programs developed by the Board, meet continuing medical education requirements, and submit practice logs as part of this process. Successful completion of an examination will be required within the 3-year period prior to expiration of the candidate's certification. This process is awaiting final approval. Further details will be released as they are finalized.

The office of the American Board of Urology will notify diplomates holding a time-limited certificate when each phase of MOC is required. At that time a handbook detailing the MOC and recertification process will be provided. This handbook will also be available at the Board's Web site, www.abu.org, and on request from the Board office.

Diplomates are responsible for keeping the Board office informed of address changes.

**Code of Ethics**

Ethics are moral values. They are aspirational and inspirational, as well as model standards of exemplary professional conduct for all applicants for certification and all diplomates certified by the American Board of Urology. The term "urologist" as used here shall include all such candidates and diplomates.

The issue of ethics in urology is resolved by a determination that the best interests of the patient are served. It is the duty of a urologist to place the patient's welfare and rights above all other considerations. Urological services must be provided with compassion, respect for human dignity, honesty, and integrity.

A urologist must maintain qualification by continued study, performing only those procedures in which he or she is qualified by virtue of specific training or experience, or with the assistance of one who is so qualified. This experience must be supplemented with the opinions and talents of other professionals and with consultations when indicated.

Open communication with the patient or, if the patient is unable to understand a communication, the patient's relatives or other
authorized representative is essential. Patient confidences must be safeguarded within the constraints of the law. The performance of medical or surgical procedures shall be preceded by the appropriately informed consent of the patient or the patient’s authorized representative. Timely communication of the patient’s condition to referring and consulting physicians should also be practiced.

Urologic surgery shall be recommended only after careful consideration of the patient’s physical, social, emotional, and occupational needs. The preoperative assessment must document indications for surgery. Performance of unnecessary surgery is an extremely serious ethical violation.

Fees for urologic services must not exploit patients or others who pay for those services. In addition, a urologist must not misrepresent any service which has been performed or is to be performed or the charges which have been made or will be made for that service. Payment by or to a physician solely for the referral of a patient (fee splitting) is unethical.

Delegation of services is the use of auxiliary health care personnel to provide patient care for which the urologist is responsible. A urologist must not delegate to an auxiliary those aspects of patient care within the unique practice of the urologist (which do not include those permitted by law to be performed by auxiliaries). When other aspects of patient care for which the urologist is responsible are delegated to an auxiliary, the auxiliary must be qualified and adequately supervised. A urologist may make different arrangements for the delegation of patient care in special circumstances, such as emergencies, if the patient’s welfare and rights are placed above all other considerations.

Providing a patient’s postoperative medical or surgical care until that patient has recovered is integral to patient management. The operating urologist should provide those aspects of postoperative patient care within the unique experience of the urologist (which do not include those permitted by law to be performed by auxiliaries). Otherwise, the urologist must make arrangements before surgery for referral of the patient to another urologist, with the approval of the patient and the other urologist. The urologist may make different arrangements for delegation of those aspects of postoperative patient care within the unique experience of the urologist in special circumstances, such as emergencies or when no other urologist is available, if the patient’s welfare and rights are placed above all other considerations. Fees should reflect postoperative medical or surgical care arrangements with advance disclosure to the patients.

Scientific investigations and communications to the public must be accurate. They must not convey false, deceptive, or misleading information through statements, testimonials, photographs, graphs, or other means. They must not omit material information without which the communication would be deceptive. Communications must not appeal to an individual’s anxiety in an excessive or unfair way; they must not create unjustified expectations of results. If communications refer to benefits or other attributes of urologic procedures which involve significant risks, a realistic assessment of safety and efficacy must also be included, as well as the availability of alternatives, with descriptions and/or assessments of the benefits and other attributes of those alternatives when necessary to avoid deception.

Communications must not misrepresent a urologist’s credentials, training, experience, or ability, or contain material claims of superiority which cannot be substantiated. If a communication results from payment to a urologist, such must be disclosed, unless the nature, format, or medium makes that apparent. Offering or accepting payment for referring patients to research studies for finder’s fees is unethical.

Those urologists who are deficient in character or who engage in fraud, deception, or substance abuse should be identified to appropriate local, regional, state, and/or national authorities. A physically, mentally, or emotionally impaired urologist should withdraw from those aspects of practice affected by the impairment.

**Policies**

**Disciplinary Action**

The Board of Trustees of the American Board of Urology shall have the sole power to censure, suspend, or revoke the certificate of any diplomate. Certificates issued by the Board are the property of the Board and are issued pursuant to the rules and regulations of the Board. Each certificate is issued to an individual physician who, by signature, agrees to censure or suspension or revocation of the certificate as described herein.

The Board of Trustees shall have the sole power, jurisdiction, and right to determine and decide whether the evidence and information before it is sufficient to constitute one of the disciplinary actions by the Board. The levels of disciplinary action and manner of notification, appeal, and reinstatement, shall be defined as follows:

**Notification and Appeal**

**Notification:** If the action of the Board is to censure, suspend, or revoke the certificate of a diplomate, the Board shall send written notice thereof to the diplomate. The notice shall state the reasons for the Board’s decision.

**Appeal:** See “Appeals Procedure” below for details on the appeals process.

**Censure and Suspension**

A diplomate may be censured or have his or her certificate suspended if he or she has been found by the Board to have engaged in professional misconduct or moral turpitude or for violations of the Code of Ethics of the American Board of Urology not warranting certificate revocation. The Board of Trustees of the American Board of Urology shall have the sole power to determine the level of disciplinary action and the designated level of suspension. Censure or suspension of a diplomate may be listed in the annual *ABU Report*.

**Censure:** A censure shall be a written reprimand to the diplomate. Such censure shall be made part of the file of the diplomate.

**Suspension:** A suspension shall require the diplomat to return his or her certificate to the Board for a designated time so determined by the Board. The Board shall have the sole power to determine the designated time of suspension. Prior to return of the certificate the diplomat must meet with the Board within 60 days prior to the end of the designated time period. Recertification will be necessary if a time-limited certificate expires during the period of suspension.

**Revocation of Certificate**

Certificates issued by this Board are the property of the Board and are issued pursuant to the rules and regulations of the Board. Each certificate is issued to an individual physician who, by signature, agrees to revocation of the certificate in the event that:

- the issuance of the certificate or its receipt by the physician so certified shall have been contrary to, or in violation of any provision of the Certificate of Incorporation, Bylaws, or rules and regulations of the Board in force at the time of issuance; or
- the physician or party certified shall not have been eligible to receive such certificate, regardless of whether or not the facts constituting ineligibility were known to, or could have been ascertained by, the Trustees of the Board at the time of issuance of such certificate; or
c. the physician or party so certified shall have made a material misstatement of fact in application for such certification or recertification or in any other statement or representation to the Board or its representatives; or
d. the physician so certified shall at any time have neglected to maintain the degree of knowledge in the practice of the specialty of urology as set up by the Board, and shall refuse to submit to re-examination by the Board; or
e. the physician so certified is convicted of a felony, scientific fraud, or a crime involving illicit drugs; or
f. any license to practice medicine of the physician so certified is surrendered, suspended, revoked, withdrawn, or voluntarily returned in any state regardless of continuing licensure in any other state, or he or she is expelled from any of the nominating societies, a county medical society, or a state medical association for reasons other than non-payment of dues or lack of meeting attendance; or
g. the physician so certified has been found guilty by the Board of serious professional misconduct or moral turpitude or for serious violation of the Code of Ethics of the American Board of Urology that adversely reflects on professional competence or integrity.

Revocation of a diplomate's certificate may be mentioned in the annual ABU Report.

Reinstatement of Certificate
Should the circumstances that justified revocation of the diplomate's certificate be corrected, the Board may allow the candidate to reapply for certification. The Board of Trustees shall have the sole power to determine the time of initiation of the reinstatement process. The applicant whose certificate has been revoked may be required to complete the certification or recertification process at the discretion of the Board.

Prior to reinstatement of certification, the applicant must meet with the Board. The diplomate will be required to attest that he or she has read and understands the above provisions regarding disciplinary action and the procedures to be followed and agree to hold the Board, its officers, and agents harmless from any damage, claim, or complaint by reason of any action taken which is consistent with such procedures.

Appeals Procedure

Adverse Decision Inquiries
During the course of the certification or recertification process, a candidate may receive an adverse decision regarding one or more elements of the process. Inquiries regarding an adverse decision must be made in writing to the Executive Secretary within 30 days after written notification by the Board, and will be promptly answered. The candidate will be guaranteed the following:
a. hand scoring of the answer sheet for failure of the Qualifying (Part 1) Examination;
b. review by the Executive Secretary of the examiners' scoring sheets for the failure of the Certifying (Part 2) Oral Examination; and
c. review of the record by the Chairman of the Credentials Committee or Recertification Committee for an adverse decision concerning peer review, practice logs, and/or malpractice and professional responsibility experience.

Adverse Decisions
If the final action of the Board is a decision to deny certification to an applicant, to deny recertification to a diplomate with a time-limited certificate, or to revoke the certificate of a diplomate, the Board shall send written notice thereof to the applicant or diplomate. The notice shall state the reasons for the Board's decision. For those holding a time-limited certificate, their certificate shall stay in effect until the appeals process is completed.

Request for Hearing
An applicant or a diplomate who receives such a notice may, within 30 days after mailing by the Board, give written notice to the Board that he or she wishes to request a hearing to appeal the Board's decision. The written notice shall set forth the specific reasons given by the Board which are alleged to be erroneous and shall indicate whether the applicant or diplomate wishes to attend the hearing. Such applicant or diplomate is hereinafter referred to as the "appellant."

Notice of Hearing
If the Board receives the appellant’s notice requesting a hearing in a timely manner, the Board shall set the date, time, and place of the hearing, and shall give the appellant at least 30 days prior written notice thereof.

Hearing
The hearing shall be held before the Board of Trustees or before a hearing panel consisting of one or more persons appointed by the Board, as it may determine in its sole discretion. The President of the Board, or, if a hearing panel is appointed, a person appointed by the Board of Trustees, shall preside at the hearing. At the hearing, the burden shall be on the appellant to prove by a preponderance of the evidence that the Board’s decision was erroneous.

Failure to Appear
Failure to appear at the hearing may result in the forfeiture of the right to a hearing, as the Board of Trustees may determine, in its sole discretion. Despite such failure to attend, the Board of Trustees (or the hearing panel) may nevertheless hold the hearing, consider the information submitted, and decide the appeal.

Hearing Procedure
The appellant may appear at the hearing to present his or her position in person, at the time and place specified, subject to any conditions established by the Board. A transcript of the proceedings shall be kept. The Board shall not be bound by technical rules of evidence employed in legal proceedings, but may consider any information it deems appropriate. The appeals process is a peer review process and neither party may be represented by, or bring along, legal counsel.

Notice of Decision
Within a reasonable time after completion of the hearing, the Board shall furnish written notice to the appellant of the decision, including a statement of the basis therefore.

Finality
The decision of the Board shall be final and binding on the Board and on the appellant.

Notices
All notices or other correspondence pertaining to the appeal should be sent to the following address:
The American Board of Urology
2216 Ivy Road, Suite 210
Charlottesville, VA 22903
Attention: Executive Secretary

"Board Eligible" Status
The American Board of Urology does not recognize or use the term "Board Eligible" in reference to its applicants or candidates. A candidate is not certified (i.e., does not become a diplomate) until all
components of the certification process have been successfully completed.

Inquiry as to Status
The Board considers a candidate's record not to be in the public domain. When a written inquiry is received by the Board regarding a candidate's status, a general but factual statement is provided that indicates the person's status within the examination process. The Board provides this information only to individuals, organizations, and institutions supplying a signed release of information from the candidate, and a charge of $35 per request will apply.

Unforeseeable Events
Certain unforeseeable events such as a natural disaster, war, power outages, government regulations, strikes, civil disorders, curtailment of transportation, and the like may make it inadvisable, illegal, or impossible for the Board to administer an examination to a candidate at the scheduled date, time, and location. In any such circumstance, the Board is not responsible for any expense the candidate may have incurred to be present for the examination or may incur for any future or substitute examinations.

Final Action of the Board
Final action regarding each applicant is the sole prerogative of the Board and is based upon the applicant's training, professional record, performance in clinical practice, and the results of the examinations given by the Board.

Regardless of the sequence by which the various steps of certification may have been accomplished, the process itself is not considered complete until the Board's final action. At any point in the process, the Board may delay or even deny certification upon consideration of information that appears to the Board to justify such action.

The activities described in this document proceed from the Certificate of Incorporation and Bylaws, which state the nature of the business, objects, and purposes proposed to be transacted and carried out by this corporation.

Appendix D
Graduate Medical Education Glossary

Accreditation Council for Graduate Medical Education (ACGME)—An accrediting agency with the mission of improving health care by assessing and advancing the quality of resident physicians' education through accreditation. The ACGME establishes national standards for graduate medical education by which it approves and continually assesses educational programs under its aegis. The ACGME accredits GME programs through its 28 review committees (26 Residency Review Committees, or RRCs, the Transitional Year Review Committee, and the Institutional Review Committee). The ACGME has five member organizations:

- American Board of Medical Specialties
- American Hospital Association
- American Medical Association
- Association of American Medical Colleges
- Council of Medical Specialty Societies

Each member organization nominates four individuals to the ACGME’s Board of Directors. In addition, the Board of Directors includes three public representatives, two resident representatives, and the chair of the Council of Review Committee Chairs. A representative for the federal government also serves on the Board in a non-voting capacity.

Affiliated institution (see "Major participating institution")—Term no longer in use by the AMA or ACGME; it has been replaced by "major participating institution."

American Board of Medical Specialties (ABMS) (see also “Certification”)—The umbrella organization for the 24 approved medical specialty boards in the United States. Established in 1933, the ABMS serves to coordinate the activities of its Member Boards and to provide information to the public, the government, the profession, and its members concerning issues of specialization and certification in medicine. The mission of the ABMS is to maintain and improve the quality of medical care in the United States by assisting the member Boards in their efforts to develop and utilize professional and educational standards for the evaluation and certification of physician specialists. See Appendix B for more information.

Annual Survey of Graduate Medical Education Programs—see "National GME Census."

Attending—see "Teaching staff."

Categorical positions (see also "Graduate Year 1" and "Preliminary Positions")—Positions for residents who remain in a given program or specialty until completion of the total year(s) required for admission to specialty board examination.

Certification (see also "American Board of Medical Specialties")—A voluntary process intended to assure the public that a certified medical specialist has successfully completed an approved educational program and an examination including an examination process designed to assess the knowledge, experience, and skills requisite to the provision of high-quality patient care in that specialty. Medical specialty boards determine whether candidates have received appropriate preparation in approved residency training programs in accordance with established educational standards, evaluate candidates with comprehensive examinations, and certify those candidates who have satisfied the board requirements. Physicians who are successful in achieving certification are called diplomates of the respective specialty board. The boards also offer a Maintenance of Certification® program for qualified diplomates at intervals of 7 to 10 years. See Appendix B for more information.

Chief resident—A position in the final year of the residency (e.g., surgery) or in the year after the residency is completed (e.g., internal medicine and pediatrics); the individual in this position plays a
significant administrative and teaching role in guiding new residents.

Combined specialty programs—Combined training consists of a coherent educational experience in two or more closely related specialty or subspecialty programs (listed below; see Appendix A for more information). The educational plan for combined training is approved by the specialty board of each of the specialties to assure that resident physicians completing combined training are eligible for board certification in each of the component specialties. Each specialty or subspecialty program is separately accredited by the Accreditation Council for Graduate Medical Education (ACGME) through its respective Residency Review Committee (RRC). The duration of combined training is longer than any one of its component specialty programs standing alone, and shorter than all of its component specialty programs together. Current combined specialties are:

- Diagnostic radiology/nuclear medicine/nuclear radiology
- Internal medicine/dermatology
- Internal medicine/emergency medicine
- Internal medicine/emergency medicine/critical care medicine
- Internal medicine/family medicine
- Internal medicine/medical genetics
- Internal medicine/neurology
- Internal medicine/nuclear medicine
- Internal medicine/pediatrics
- Internal medicine/physical medicine and rehabilitation
- Internal medicine/preventive medicine
- Internal medicine/psychiatry
- Neurology/diagnostic radiology/neuroradiology
- Neurology/nuclear medicine
- Neurology/physical medicine and rehabilitation
- Pediatrics/dermatology
- Pediatrics/emergency medicine
- Pediatrics/medical genetics
- Pediatrics/physical medicine and rehabilitation
- Pediatrics/psychiatry/child and adolescent psychiatry
- Psychiatry/family medicine
- Psychiatry/neurology

Consortium—A group of healthcare organizations established to pursue joint objectives in patient care, education, research, or other areas. If a consortium is formally established as an ongoing organizational entity with a commitment to graduate medical education, it may serve as a sponsoring institution of one or more GME programs.

Core discipline program—See “General specialty program”

Council on Medical Education—This AMA council formulates policy on medical education by recommending educational policies to the AMA House of Delegates, through the AMA Board of Trustees. The Council is also responsible for recommending the appointments of more than 100 representatives to accrediting bodies and to other national organizations.

Designated institutional official—An individual at an institution sponsoring or participating in one or more GME programs who has the authority and responsibility for the oversight and administration of GME programs.

Educational Commission for Foreign Medical Graduates (ECFMG)—A nonprofit organization that assesses the readiness of graduates of foreign medical schools to enter graduate medical education in the United States. ECFMG certification provides assurance to GME program directors, and to the people of the United States, that graduates of foreign medical schools have met minimum standards of eligibility required to enter such programs. This certification does not guarantee that such graduates will be accepted into GME programs in the United States. (For more information, see Section I.)

ECFMG number—The number assigned by the Educational Commission for Foreign Medical Graduates (ECFMG) to each international medical graduate physician who applies for certification from ECFMG. Almost all graduates of foreign medical schools must have an ECFMG certificate to participate in GME in the US.

Electronic Residency Application Service (ERAS)—A service for medical students/residents through which residency/fellowship applications, letters of recommendation, Medical Student Performance Evaluations (MSPEs), transcripts, and other supporting credentials are transmitted via the Internet from medical schools to residency program directors. For more information about ERAS, a service of the Association of American Medical Colleges (AAMC), consult www.aamc.org/eras or see Section I.

Fellow (also see “Resident or resident physician” and “Intern”)—A physician in an ACGME-accredited program that is beyond the requirements for eligibility for first board certification in the discipline. Such physicians may also be termed “residents.” The term “fellow” may require modifiers for precision and clarity, eg, “research fellow.”

Fifth Pathway—One of several ways that individuals who obtain their undergraduate medical education abroad can enter GME in the United States. The Fifth Pathway is a period of supervised clinical training for students who obtained their premedical education in the United States, received undergraduate medical education in countries that do not grant the MD degree until the completion of 1 year of national service after medical school, and passed Step 1 of the United States Medical Licensing Examination. After these students successfully complete a year of clinical training sponsored by an LCME-accredited US medical school and pass USMLE Step 2, they become eligible for an ACGME-accredited residency. (For more information, see Section I.)

FREIDA Online* (Fellowship and Residency Electronic Interactive Database Access)—An online information resource, available through the AMA Web site at www.ama-assn.org/go/freida, that assists medical students and residents in selecting GME programs. It includes information on all ACGME-accredited residency programs and combined specialty programs, the majority with expanded listings that provide such information as program benefits (including compensation), resident-to-faculty ratio, work schedule, policies, and educational environment.

General specialty program—A primary specialty (eg, anesthesiology, family practice, internal medicine) that provides resident physicians, under supervision, with the knowledge and skills needed to become practitioners in a specified area of medical practice; sometimes referred to as a “core discipline program.” General specialty programs function within an institution and are subject to all ACGME accreditation actions, policies, and procedures. Completing an ACGME-accredited residency in a general specialty program is one of the requirements for certification by a specialty board and is a prerequisite to subspecialty training.

GME Track (see also “National GME Census”)—Available at www.aamc.org/gmetrack, this secure Web-based application of the Association of American Medical Colleges includes, among other services, the National GME Census. Through GME Track, residency information is collected for both the AAMC and the AMA.
Graduate medical education (GME) (see also “Postgraduate medical education”)—As the second of three major phases of medical education in the US, graduate medical education (GME) prepares physicians for the independent practice of medicine in a medical specialty. GME focuses on the development of clinical skills and professional competencies and on the acquisition of detailed factual knowledge in a medical specialty. GME programs are based in hospitals or other health care institutions and, in most specialties, utilize both inpatient and ambulatory settings. GME programs, including Transitional Year programs, are usually called “residency programs” and the physicians educated in them “residents.”

Graduate Medical Education Directory—Annual publication that lists of residency/fellowship programs accredited by the ACGME. Known informally as the “Green Book,” the Directory lists all ACGME-accredited programs in 124 specialties and subspecialties, Board-approved combined programs in 19 specialties, and the certification requirements of 24 medical specialty boards.

Graduate Year (GY) (see also “Program year” and “Postgraduate year”—Refers to an individual’s current year of accredited GME, this may or may not correspond to the program year. For example, a fellow in pediatric cardiology could be in the first program year of the pediatric cardiology program but in his/her fourth graduate year of GME (including the 3 prior years of pediatrics). The AMA does not use the term “postgraduate year” (PGY).

Graduate Year 1 (GY1)—Used in connection with residents and with residency positions to indicate the first year of training after medical school. Individuals in GY1 positions who plan to complete the entire program are counted as enrolled in Graduate Year 1 (GY1), Categorical. Individuals in GY1 positions who are using their first year in a residency program as a prerequisite to enter another specialty or subspecialty program are counted as enrolled in Graduate Year 1 (GY1), Preliminary. Not all specialties offer GY1 positions, and in those specialties with approved GY1 positions, some programs do not offer them. Furthermore, although by definition residents in GY1 positions are not required to have prior GME, some residents who fill such positions may have had previous training.

Institution—A sponsoring institution is the institution (e.g., a university, medical school, hospital, school of public health, health department, public health agency, organized health care delivery system, medical examiner’s office, consortium, or educational foundation) that assumes the ultimate responsibility for a GME program. ACGME-accredited GME programs must operate under the authority and control of a sponsoring institution, which must be appropriately organized for the conduct of GME in a scholarly environment and committed to excellence in both medical education and patient care. A sponsoring institution must be in substantial compliance with the ACGME Institutional Requirements and must ensure that its ACGME-accredited programs are in substantial compliance with the Institutional, Common, and specialty-specific Program Requirements.

A major participating institution is an institution to which residents rotate for a required experience of long duration and/or those that require explicit approval by the appropriate RRC prior to utilization. Major participating institutions are listed as part of an accredited program in the Graduate Medical Education Directory.

Note: Hospitals and other institutions that provide rotations of less than one-sixth of the program length or less than a total of 6 months are not listed in the Directory.

Intern (see “Resident or resident physician” and “Fellow”)—No longer used by the AMA or ACGME. Historically, “intern” was used to designate individuals in the first post-MD year of hospital training, less commonly, it designated individuals in the first year of any residency program. Since 1975, the Graduate Medical Education Directory and the ACGME have used “resident,” “resident physician,” or “fellow” to designate all individuals in ACGME-accredited programs.

International medical graduate (IMG)—A graduate from a medical school outside the US and Canada.

In-training examination (also known as “in-service examination”)—Examinations to gauge residents’ progress toward meeting a residency program’s educational objectives. Certification boards of the American Board of Medical Specialties (ABMS) or medical specialty societies offer in-training examinations on a periodic basis.

Liaison Committee for Specialty Boards (LCSB)—The body that reviews and recommends approval of new examining boards in medical specialties to the ABMS and AMA, which are the sponsors of the LCSB.

Liaison Committee on Medical Education (LCME)—The body that accredits allopathic medicine educational programs in the US and Canada leading to the MD degree. The American Osteopathic Association (AOA) accredits educational programs leading to the doctor of osteopathic medicine (DO) degree.

Licensure—The process by which a state or jurisdiction of the United States admits physicians to the practice of medicine. Licensure is intended to ensure that practicing physicians have appropriate education and training and that they abide by recognized standards of professional conduct while serving their patients. Candidates for first licensure must complete a rigorous examination sequence (the United States Medical Licensing Examination, or USMLE) designed to assess a physician’s ability to apply knowledge, concepts, and principles that are important in health and disease and that constitute the basis of safe and effective patient care. All applicants must submit proof of medical education and training and provide details about their work history. Finally, applicants must reveal information regarding past medical history (including the use of habit-forming drugs and emotional or mental illness), arrests, and convictions. For more information, see State Medical Licensure Requirements and Statistics, published by the AMA, or visit www.ama-assn.org/go/licensure.

Major participating institution—See “Institution.”

Match—See “National Resident Matching Program.”

Medical school affiliation—Institutions sponsoring an accredited GME program may have a formal relationship with a medical school. Where such a relationship exists, the affiliation is identified by the dean of the medical school as major (M), graduate only (G), or limited (L). Major affiliation signifies that an institution is an important part of the teaching program of the medical school and plays a significant role in the clinical clerkship program. Graduate only affiliation indicates that the institution is affiliated with the medical school only for its graduate programs. Limited affiliation signifies that the institution is affiliated with the medical school’s teaching program only for brief, occasional, and/or unique rotations of students or residents.

Medical school number—Unique 5-digit identifier for each medical school. See Appendix C for a list of LCME-accredited medical schools and medical school numbers.

Medical Student Section (MSS)—A section of the AMA House of Delegates, the AMA-MSS represents 36,000 medical student members of the AMA. For more information, see www.ama-assn.org/go/mss.
National GME Census—Beginning in 2006, the AMA’s Annual Survey of Graduate Medical Education Programs was replaced by the National GME Census, a joint effort of the AMA and the Association of American Medical Colleges (AAMC). All programs accredited by the ACGME and combined specialty programs approved by their respective boards are asked to complete this online census, available at www.aamc.org/gmctrack. The census collects data on program characteristics such as clinical and research facilities and the work and learning environment residents can expect, as well as biographical data on residents in the programs. Data collected from the census are used in the following AMA publications and products:

- Graduate Medical Education Directory
- Graduate Medical Education Library on CD-ROM
- FREIDA Online (Fellowship and Residency Electronic Interactive Database Access)
- Medical Education issue of the Journal of the American Medical Association
- State-level Data for Accredited Graduate Medical Education Programs in the US
- AMA Physician Masterfile
- AMA Physician Select

National Resident Matching Program (NRMP)—Informally referred to as the “Match,” this process matches GME programs and applicants to those programs. Managed by the Association of American Medical Colleges (AAMC), the NRMP system was developed to provide both applicants and residency program directors an opportunity to consider their options for accepting and offering appointments to residency programs, respectively, and to have their decisions announced at a specific time. For more information, consult www.nrmp.org or see Section I.

Participating institution—See “Institution.”

Postgraduate medical education (see “Graduate medical education”)—The AMA does not use the term “postgraduate medical education” to refer to any stage of physician education. The term is sometimes used in the United Kingdom and Canada to refer to graduate medical education. The AMA does not use this term to describe any part of graduate medical education. The preferred term is graduate year (GY).

Preliminary positions (see also “Graduate Year 1”)—Positions for residents who are obtaining training required to enter another program or specialty. Some residents in preliminary positions may move into permanent positions in the second year. Preliminary positions are usually 1 year in length and usually offered for Graduate Year 1. Internal medicine, surgery, and transitional year programs commonly offer preliminary positions.

Program—The unit of GME residency/fellowship training, comprising a series of learning experiences within a GME specialty/subspecialty, which is evaluated for accreditation.

Program director—The individual responsible for maintaining the quality of a specific GME program so that it meets ACGME accreditation standards. Other duties of the program director include preparing a written statement outlining the program’s educational goals; providing an accurate statistical and narrative description of the program as requested by the Residency Review Committee (RRC); and providing for the selection, supervision, and evaluation of residents for appointment to and completion of the program.

Program year (see also “Graduate Year”)—Refers to the current year of training within a specific program; this may or may not correspond to the graduate year. For example, a fellow in pediatric cardiology could be in the first program year of the pediatric cardiology program but in his/her fourth graduate year of GME (including the 3 prior years of pediatrics).

Resident and Fellow Section (RFS)—A section of the AMA House of Delegates, the AMA-RFS represents 30,000 resident members of the AMA. For more information, see www.ama-assn.org/go/rfs.

Residency Review Committees (RRCs)—The 28 review committees within the ACGME system (including the Transitional Year Review Committee) that meet periodically to review programs within their specialty and/or subspecialty, propose Program Requirements for new specialties/subspecialties, and revise requirements for existing specialties/subspecialties.

Resident or resident physician (see also “Fellow”)—Any individual at any level in an ACGME-accredited GME program, including subspecialty programs. Local usage might refer to these individuals as interns, house officers, housestaff, trainees, fellows, junior faculty, or other comparable terminology. Beginning in 2000, the ACGME has used the term “fellow” to denote physicians in subspecialty programs (versus residents in specialty programs) or in GME programs that are beyond the requirements for eligibility for first board certification in the discipline.

Section on Medical Schools (SAMS)—A section of the AMA House of Delegates with representation from the 126 LCME-accredited US medical schools. For more information, see www.ama-assn.org/go/sms.

Sponsoring institution—See “Institution.”

Subspecialty program—Provides advanced GME in a highly specialized field of study within a specialty, eg, gastroenterology within the field of internal medicine. Many subspecialty programs are subject to ACGME accreditation actions, policies, and procedures. Completing an ACGME-accredited residency/fellowship in a particular subspecialty program may qualify the physician to seek certification by the related subspecialty board. Some subspecialty programs are accredited independently of the related general specialty program and are not dependent on a general specialty program. Other subspecialty programs function only in conjunction with an accredited general specialty program, and the subspecialty program’s accreditation status is related to the status of the accredited general specialty program.

Teaching staff—Any individual who has received a formal assignment to teach resident physicians. In some institutions appointment to the medical staff of the hospital constitutes appointment to its teaching staff.

Transitional year program (see also “Preliminary positions”)—Broad-based clinical training in an ACGME-accredited graduate year 1 (GY1) residency program that provides a balanced curriculum in multiple clinical disciplines. Developed for the year between medical school graduation and a specialty residency program, the transitional year is designed to facilitate the choice of and/or preparation for a specific specialty; it is not meant to prepare participants for the independent practice of medicine. To sponsor a transitional year program, an institution and its affiliate must conduct two or more ACGME-accredited programs that participate in the transitional year.

United States Medical Licensing Examination (USMLE)—A three-step examination that is required for licensure of all practicing physicians in the US. For more information, see www.usmle.org or refer to State Medical Licensure Requirements and Statistics, published annually by the AMA.
Web ADS—The Web Accreditation Data System (ADS) of the ACGME. This Internet-based data collection system contains the current data on file with the ACGME for all sponsoring institutions and programs, which are required to verify and update general information annually via this secure online system. In addition, programs are required to verify the accredited training of all residents and to communicate organizational changes as they occur. See www.acgme.org/ADS for more information.
Appendix E
Listings of Subspecialty and Fellowship Programs

Introduction
In addition to the 8,177 residency/fellowship programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) in 124 specialties/subspecialties, a number of medical specialty societies maintain lists of subspecialty and fellowship programs outside the purview of the ACGME accreditation process.

Note: Inclusion on this list does not reflect AMA approval or recognition of these practice areas.

To propose an additional list of subspecialties/fellowships for this section, contact Fred Donini-Lenhoff at fred.lenhoff@ama-assn.org.

Dermatology Fellowships
http://tinyurl.com/5f834 (PDF, 139KB, requires Adobe Reader)
The 2005 Fellowship Directory includes dermatology fellowships in the following disciplines or areas:

- Burn
- Clinical Dermatology
- Clinician Educator
- Cosmetic
- Dermatopathology
- Dermatopharmacology and Epidermolysis Bullosa
- HIV
- Immunodermatology
- Immunology
- Laser
- Mohs Surgery
- Oncology
- Oncology/Melanoma
- Pediatric Dermatology
- Pharmacology
- Phototherapy
- Research

Electrodiagnostic Medicine Fellowships
www.aanem.org/education/training/fellowship_listing.cfm

The Listing of Fellowships in Electrodiagnostic Medicine from the American Association of Neuromuscular & Electrodiagnostic Medicine (AANEM) is an informational service offered to AANEM members. This listing has been assembled from information submitted voluntarily by various institutions. The AANEM does not review, evaluate, or provide input regarding the listing. This listing is not necessarily complete, and inclusion of a program does not imply sponsorship or endorsement by the AANEM. This listing is not affiliated with or endorsed by the American Board of Electrodiagnostic Medicine (ABEM) in any way. Completion of any of the listed fellowships does not guarantee satisfaction of the ABEM eligibility requirement of completion of a preceptorship in electrodiagnostic medicine. Any statement included in this listing that completion of the fellowship will enable a candidate to qualify for examination by a particular board should be investigated by the individual applying for the fellowship. Candidates should contact the individual boards for determination of eligibility requirements.

Fellowships in many areas are listed, including:
- Clinical electrodiagnostic medicine
- EMG/neuromuscular
- Electrodiagnostic medicine and electrophysiology of movement disorders
- Epilepsy, neuromuscular disorders
- Neuromuscular diseases
- Spine/neuromuscular

Gynecologic Endoscopy Fellowships
www.aagl.com/fellowships.asp?0.6806318

The Fellowship in Gynecologic Endoscopy, an affiliate of the American Association of Gynecologic Laparoscopists (AAGL) and the Society of Reproductive Surgeons (SRS), sponsors fellowships in advanced gynecologic endoscopy. These fellowships were created to produce a standardized training program with a research requirement. The fellowship provides an opportunity for gynecologists who have completed their residency to acquire additional skills in minimally invasive gynecologic surgery.

Educational objectives focus on evidence-based medicine, anatomical principles, instrumentation, operative laparoscopy, and operative hysteroscopy. The fellowship offers in-depth experience using state-of-the-art techniques to treat abnormal uterine bleeding, pelvic pain, myomata, endometriosis, adhesive disease, and pelvic relaxation.

This fellowship also aims to further research in the field of minimally invasive gynecology. Fellows are required to complete a scholarly contribution to be presented at the annual meetings of the AAGL and ASRM.

The Fellowship in Gynecologic Endoscopy actively encourages applications from postgraduate physicians aspiring to develop their surgical skills in minimally invasive gynecology.

Hospitalist and Hospital Medicine Programs
www.hospitalmedicine.org

Hospitalists are physicians whose primary professional focus is the general medical care of hospitalized patients. Their activities include patient care, teaching, research, and leadership related to hospital care.

The term “hospitalist” refers to physicians whose practice emphasizes providing care for hospitalized patients. The term was coined by Drs. Robert Wachter and Lee Goldman in a New England Journal of Medicine article in August 1996 (Wachter RM, Goldman L. The emerging role of “hospitalists” in the American health care system. N Engl J Med 1996;335:514-7). A review in the Journal of the American Medical Association (Wachter, RM, Goldman L: The Hospitalist Movement: 5 Years Later, JAMA 287:487-494, Jan 23/30, 2002) further defines the field of hospital medicine. While some doctors have emphasized inpatient care for many years, there has been an explosive growth of such doctors since 1994. There are now more than 12,000 hospitalists in the US according to a study by the American Hospital Association. There are more new jobs available for hospitalists than in any aspect of internal medicine. Hospital medicine is a significant career path option for those trained in general internal medicine, general pediatrics, family practice, and obstetrics.

The majority (85%) of practicing hospitalists are trained in internal medicine, and some (5%) have completed subspecialty fellowships, pulmonary disease and critical care medicine being the most common. Recognizing that many medical students and residents are interested in this field, academic centers have recently begun to develop hospitalist residency and fellowship programs in hospital medicine. Hospitalist tracks are generally part of an internal medicine residency program, but offer additional exposure to the broad range of issues confronting hospital-based physicians, such as end-of-life care, quality improvement, and medical consultation. Fellowship programs tend to emphasize research training, teaching skills, and additional clinical experience.

Neurology Fellowship Programs

www.aan.com/students/awards/fellowship.cfm

This online Directory for Fellowship Positions is provided by the American Academy of Neurology's Graduate Education Subcommittee (GES), Association of University Professors of Neurology (AUPN), and American Neurological Association (ANA). The goals of the GES are to provide opportunities for resident involvement in the Academy, encourage attendance at the annual meeting, and provide information to residents on fellowships.

The AUPN promotes medical education and research in neurology and patient care for neurological disorders. Its members are the heads or chairs of departments or divisions of neurology in accredited medical schools in the United States.

The ANA is a professional society of academic neurologists and neuroscientists devoted to advancing the goals of academic neurology; training and educating neurologists and other physicians in the neurologic sciences; and expanding both our understanding of diseases of the nervous system and our ability to treat them.

The Directory lists fellowships covering the following disciplines:

- Advanced Clinical Neurology
- AIDS
- Alzheimer's Disease
- Basic Research
- Behavioral Neurology
- Cerebrovascular Disease/Stroke
- Clinical Neuropsychology
- Dementia
- EEG
- EMG
- Epilepsy
- Geriatric Neurology
- Headache
- Interventional Neurology
- Movement Disorders
- Multiple Sclerosis
- Neuroepidemiology
- Neurogenetics
- Neuroimaging
- Neuroimmunology
- Neurologic Critical Care
- Neuroradiology
- Neuromuscular Disorders
- Neuro-Oncology
- Neuro-Ophthalmology
- Neuro-Otolaryngology
- Neuropathology
- Neuropharmacology
- Neuropsychology
- Neurorehabilitation
- Neurovirology
- Pain
- Sleep Disorders
- Spine

Obstetrics-Gynecology Subspecialty Programs

www.abog.org/app/app.html

The American Board of Obstetrics and Gynecology (ABOG) approves GME fellowship programs in the following subspecialties of obstetrics and gynecology:

- Female Pelvic Medicine and Reconstructive Surgery
- Gynecologic Oncology
- Maternal-Fetal Medicine
- Reproductive Endocrinology/Infertility

An educational program in gynecologic oncology, maternal-fetal medicine, or reproductive endocrinology and infertility must (with rare exceptions) be affiliated with a medical school and be an integral part of a department of obstetrics and gynecology that conducts an accredited residency program in obstetrics and gynecology. It must function with the approval, but not necessarily under the direction, of the chair of the department. A subspecialty program requires special facilities, services, and personnel, and the activities of the subspecialty fellows and the residents in the core program must be clearly and separately identified.

Institutions may apply for approval of education programs of 3 years' duration. Refer to the General and Special Requirements for Graduate Medical Education for detailed guidelines.

Subspecialty Certification

Fellows who enter a 3-year fellowship program must satisfactorily complete 3 years of training to be admissible to the subspecialty division's written examination. The certification process for all candidates will be identical. Program directors and candidates must be aware that in order to become certified in any subspecialty, the candidate must pass both the written and oral examinations of the principal Board.

It is recommended that continued contact with the broad aspects of obstetrics and gynecology be continued throughout the fellowship, including such mechanisms as participation in lectures, conferences, or night and weekend call. The extent of these activities, however, must not significantly alter the training program as proposed by the program director and approved by the division.

Pathology Fellowship Programs
www.pathologytraining.org

The Intersociety Council for Pathology Information (ICPI) is a non-profit educational organization sponsored by national pathology societies to serve as a central source of information about pathology in the practice of medicine and in medical research and education. It publishes annually the Directory of Pathology Training Programs in the US and Canada, which includes specialty and subspecialty programs in US and Canada. Other features of the Directory include listings of post-sophomore fellowships for medical students and information about careers in pathology, as well as a description of the principal pathology societies. A searchable Web version of the Directory is available at www.pathologytraining.org.

Listings of programs in pathology subspecialties include:
- Anatomic pathology
- Blood banking/transfusion medicine
- Breast pathology
- Cardiovascular respiratory pathology
- Chemical pathology/clinical chemistry
- Clinical microbiology
- Coagulation
- Cytopathology
- Dermatopathology
- Forensic pathology
- Gastrointestinal pathology/hepatic pathology
- Genitourinary pathology
- Gynecologic, OB-Gyn, and perinatal pathology
- Head and neck pathology
- Hematopathology
- Immunohistochemistry
- Immunopathology/transplantation
- Informatics
- Laboratory medicine
- Molecular diagnostics
- Molecular pathology
- Neuropathology
- Oncologic pathology
- Ophthalmic pathology
- Orthopedic pathology
- Pediatric/developmental/perinatal pathology
- Renal pathology
- Soft tissue pathology
- Surgical/anatomic pathology

The Directory is intended for reference by medical students and residents, who can obtain a complimentary copy with a request countersigned by a pathologist or by sending a check for $8 (to cover shipping and handling) to the below address.

The Intersociety Committee also offers a 16-page brochure, Pathology as a Career in Medicine.

Medical Licensure Information

Obtaining a Medical License: The Basics

By the Federation of State Medical Boards
[Reprinted from Licensing and Credentialing: What Physicians Need to Know]

Increasing public demand for protection, coupled with the growth in the number and sophistication of fraudulent practitioners over the past 2 decades, has resulted in stronger and more complex licensing boards and licensing statutes throughout the country. As might be expected, the rate of change differs widely among the states' licensing boards, depending on each jurisdiction's resources and Medical Practice Act, as well as on legislative, media, and public expectations. All medical boards have continued to improve licensure processes, and a trend toward uniformity among licensing boards exists to enhance both the initial licensure process and licensure portability.

Many states have expanded what is considered to be the practice of medicine to address new trends in the medical field that need to be regulated by medical boards. For example, a number of states have passed legislation in recent years that empower medical boards to have jurisdiction over the practice of medicine across state boundaries or treatment decisions made by medical directors of managed care organizations.

Within this context, a physician seeking initial licensure or subsequently applying for a license in other states should anticipate the possibility of delays due to the necessary investigation of credentials and past practice, as well as the need to comply with necessary licensing standards. To assist a physician in the quest for licensure, this article attempts to provide some ground rules. These suggestions will not apply in all cases but generally will help most physicians applying for licensure as well as benefit the licensing board of the state in which the physician wishes to practice.

When contacting a licensing board for the first time, ask for a copy of its current licensing requirements and the average time it takes to process applications. This will provide the physician with a solid idea of when to consider closing an existing practice and/or plan a move as well as with information about the potential problem areas to be addressed in completing an application. While initial licensure requirements for domestic and international medical graduates differ somewhat among states, all states will require proof of prior education and training and proof of the completion of a licensure examination approved by the board. Specifically, all physicians must submit proof of successful completion of all three steps of the United States Medical Licensing Examination (USMLE). However, because some medical students and physicians had completed portions of the National Board of Medical Examiners and Federation Licensing Examination (FLEX) sequences before the implementation of USMLE in 1994, certain combinations of examinations may be considered by medical licensing authorities as comparable to the USMLE.
Medical Licensure Information

To send a USMLE or FLEX transcript to state medical boards, visit www.fsbmb.org or contact:
Federation of State Medical Boards
PO Box 619850
Dallas, TX 75261-9850
817 888-4000
www.fsbmb.org

For info on the USMLE, visit www.usmle.org or see:
USMLE Office of the Secretariat
3750 Market St.
Philadelphia, PA 19104-3910
215 690-9700

At the initial contact, the physician should provide the licensing board with a resume or curriculum vitae. This will allow a licensing board to evaluate potential problem areas early in the process. In short, the initial contact should be used to develop a set of reasonable expectations about the duration and complexity of the licensing process in a state to avoid frustration about the time required to obtain licensure. Unreasonable expectations can result in financial jeopardy due to the premature closing of a practice or failure to meet a starting date with an employer in the new state.

A physician should never try to hide derogatory information from a licensing board. It is much better to come forward with the information, assist the board in obtaining records and other necessary data, and provide information about mitigating circumstances that would prevent license denial. Full and frank disclosure of all information requested is by far the best approach to successful licensure. A physician should remember that in most states, making a false statement on an application for licensure is grounds for denial or future restriction.

A physician who is actively involved in the licensing process can often shorten the length of time it takes to obtain a license. Personally contacting and following up with the medical schools, training programs, and appropriate hospitals will motivate these institutions to verify credentials more expeditiously. Following up with the licensing boards in other states where the physician holds or has held a license also may assist in shortening the time for licensure. It is important to note a difference between follow-up and excessive use of phone contact, which often delays the processing of requested verification materials, since the physician's application or request may need to be pulled from the "stack" to answer an inquiry. A short note to the organization processing the request for information 30 days after the initial letter or form was mailed may be a better course to follow than frequent phone contact.

Another option for physicians applying for licensure is the Federation Credentials Verification Service (FCVS). The FCVS was created in 1996 by the Federation of State Medical Boards of the United States to provide a centralized, uniform process for state medical boards—as well as private, governmental and commercial entities—to obtain a verified, primary source record of a physician's core credentials. The FCVS repository of information allows a physician to establish a confidential, lifetime professional portfolio that can be forwarded, at the physician's request, to any entity that has established an agreement with FCVS. Currently, the majority of licensing authorities accept FCVS-verified documents for licensure.

For more information on FCVS, call 888 ASK-FCVS (275-3287).

A wise physician will exercise patience and courtesy in the licensing process. State licensing boards and their staffs, in most cases, do the best job possible to protect the public with the resources provided them. This requires taking the necessary time to fairly evaluate each application for licensure. In that same context, all actively practicing physicians should be cognizant of state laws; they may be providing care or performing acts that might not, until recently, have required them to hold a license.

Even for physicians with uncomplicated histories who submit complete and accurate applications, delays in obtaining a medical license may be encountered. Physicians should plan for at least a 60-day period from the time they submit a completed application for license and the actual date licensure is granted. Physicians who are graduates of a medical school outside the United States should anticipate a slightly longer period. All physicians should be cognizant of the fact that, in general, the highest volume of licensure applications is received between the months of April and September.

This is the peak period because physicians with families want to relocate before the academic school year starts for their children, residents want and need licensure to begin practicing, and state employees with school-age children often take their earned vacation time during this period. Finally, it is important to remember that hospital credentialing and qualification for medical malpractice insurance are based on possession of full and unrestricted licensure. This too may mean additional time before a physician can actually begin practicing.

Physicians informed about the process and working cooperatively with the licensing board need not find licensing an unpleasant experience. Members of the medical profession should always remember that the business of medical licensing boards is to protect the public from unqualified and unfit physicians. However, licensing boards also strive to ensure a process that protects the legal rights and privileges of physicians. While maintaining this balance often appears bureaucratic and cumbersome, the end result is improved health care for the people of the United States.
State Medical Licensure Requirements and Statistics:

Contents

State Medical Licensure Requirements and Statistics, 2006 edition, includes the information shown below. On the following pages are selected tables that are relevant to GME.

To order your copy, call the AMA at 800 621-8335 or visit www.ama-assn.org/go/licensure.

Section I: Licensure Policies and Regulations of State Medical Boards

- Administration of the United States Medical Licensing Examination Steps 1 and 2
- Administration of the United States Medical Licensing Examination Step 3
- Endorsement Policies for Physicians Holding an Initial License
- Additional Requirements for Endorsement of Licenses Held by International Medical Graduates
- Policies About the Special Purpose Examination (SPEX)
- Initial Licensure of US Medical/Osteopathic School Graduates
- Initial Licensure of Canadian Citizens Who Are Graduates of Accredited Canadian Medical Schools
- Initial Licensure of International Medical Graduates
- Medical Student Clerkship Regulations
- Additional Policies Concerning IMGs and DOs
- Accredited Subspecialties and Nonaccredited Fellowships That Satisfy GME Requirements for Licensure
- Licensure Requirement Exemptions for Eminent Physicians and Medical School Faculty
- Licensure and Reregistration Fees and Intervals; CME Reporting Requirements
- Continuing Medical Education for Licensure Reregistration
- Teaching (Visiting Professor) and Resident Physician Licenses
- Noneeducational Temporary or Limited Licenses, Permits, Certificates, and Registration
- Regulations on the Practice of Telemedicine and Out-of-state Consulting Physicians

- Boards of Osteopathic Medical Examiners in the United States and Possessions
- Member Boards of the Federation of Medical Licensing Authorities of Canada
- Glossary of Medical Licensure Terms and List of Common Abbreviations
Administration of the United States Medical Licensing Examination Step 3

In 1990, the Federation of State Medical Boards (FSMB) and the National Board of Medical Examiners (NBME) established the United States Medical Licensing Examination (USMLE), a single examination for assessment of US and international medical school students or graduates seeking initial licensure by US licensing jurisdictions. The USMLE replaced the Federation Licensing Examination (FLEX) and the certification examination of the NBME, as well as the Foreign Medical Graduate Examination in the Medical Sciences (FMGEE), which was formerly used by the Educational Commission for Foreign Medical Graduates (ECFMG) for certification purposes.

The USMLE is a single examination program with three steps. Each step is complementary to the others; no step can stand alone in the assessment of readiness for medical licensure.

Many states require US or Canadian medical school graduates to have from 6 to 12 months of accredited US or Canadian graduate medical education (GME) to take USMLE Step 3. In some states, graduates of foreign medical schools are required to have completed more GME (as much as 3 years in several states). A number of states do not require completion of GME to take Step 3 or require only that a physician taking the examination be enrolled in a GME program.

Nearly all medical licensing authorities require completion of Steps 1, 2, and 3 within a 7-year period (or 10 years for those in MD/PhD or similar dual-degree programs). Exceptions are Kansas and Maryland, which allow 10 years; and California, Delaware, Florida, Louisiana, Michigan, and New York, which do not impose a time limit. This 7-year period begins when the medical student or graduate first passes Step 1 or Step 2. Many licensing authorities also limit the number of attempts allowed to pass each step (particularly Step 3) and require additional education, training, or experience after a given number of failed attempts.

Additional Notes for Specific Licensing Jurisdictions

**Alabama**—If an applicant fails to achieve a passing score on Step 3 in three administrations, the Board may approve one additional attempt to pass Step 3 after demonstration by the applicant of additional education, experience, or training acceptable to the Board.

Applicants who are “dual degree candidates” (see definition, below) must achieve a passing score on Step 3 in not more than three administrations and complete Steps 1, 2, and 3 within a 10-year period, beginning when the applicant initially passes his or her first step. The Board does not accept scores from a retaking of a previously passed step of the USMLE.

For purposes of the USMLE, dual degree candidates are defined as the following:

- The applicant is pursuing the MD or DO degree and the PhD degree in an institution or program accredited by the LCME and a regional university accrediting body; and
- The applicant is a student in good standing, enrolled in the institution or program; and
- The PhD studies are in a field of biological sciences tested in the USMLE Step 1 content, including, but not limited to, anatomy, biochemistry, physiology, microbiology, pharmacology, pathology, genetics, neuroscience, and molecular biology.

**Arizona**—No time limit for USMLE Step 3 for applicants who hold a license in another jurisdiction (licensure by endorsement); for initial licensure, the 7-year limit applies.

**Florida**—An extension of the 7-year period for completing all three steps of the USMLE will be allowed for applicants who pursue a simultaneous MD/PhD or DO/PhD program. This extension will not exceed the second anniversary of the date the MD or DO degree was awarded.

**Ohio**—All 3 steps must have been passed within a 7-year period, and the performance achieved on each step must have been recognized by the USMLE as a recommended passing performance. A limited exception to this rule may be granted to an applicant who in conjunction with a medical degree is actively pursuing a doctoral degree in an institution or program accredited by the Liaison Committee on Medical Education and a regional university accrediting body. The applicant must be a student in good standing when enrolled in the institution or program, and the doctoral degree must be in a field of biological sciences tested in the Step 1 content. These fields include, but are not necessarily limited to, anatomy, biochemistry, physiology, microbiology, pharmacology, genetics, neuroscience, and molecular biology. Fields not excepted include, but are not necessarily limited to, business, economics, ethics, history, and other fields not directly related to biological science.

A limited exception to this rule may also be granted to an applicant who suffered from a significant health condition which by its severity would necessarily cause a delay to the applicant’s medical study. Regardless, all three steps must have been passed within a 10-year period.

**Texas**—Applicants for licensure must pass each part of the USMLE within three attempts, but an applicant who has passed all but one part within three attempts may take the remaining part of the examination one additional time.

Notwithstanding the above, an applicant is considered to have satisfied the requirements if the applicant (1) passed all but one part of a board-approved examination within three attempts and passed the remaining part within five attempts; (2) is specialty board certified by an ABMS or AOA specialty board; and (3) completed an additional 2 years of board-approved GME in Texas.

**Virgin Islands**—The USMLE is not administered; SPEX is used to evaluate physicians’ knowledge.

**Abbreviations**

ACGME—Accreditation Council for Graduate Medical Education  
AOA—American Osteopathic Association  
USMLE—United States Medical Licensing Examination  
ECFMG—Educational Commission for Foreign Medical Graduates  
GME—graduate medical education

* Refer to introductory text to this table for more information on this state's regulations.  
** Note:** All information should be verified with the licensing board; medical licenses are granted to those physicians meeting all state requirements—at the discretion of the board.
Initial Licensure of US Medical/Osteopathic School Graduates

All states require a written examination for initial licensure: generally, for MDs, the three-step United States Medical Licensing Examination (USMLE), which has replaced the Federation Licensing Examination (FLEX) and the national board examination of the National Board of Medical Examiners (NBME). Osteopathic physicians take the three-level Comprehensive Osteopathic Medical Licensing Examination (COMLEX-USA) of the National Board of Osteopathic Medical Examiners (NBOME).

To be eligible to take Level 3 of the Comprehensive Osteopathic Medical Licensing Examination (COMLEX), osteopathic physicians must be currently participating in and in good standing with an AOA-accredited internship or ACGME-accredited GME program or must have successfully completed such an internship or program.

To be eligible to take USMLE Step 3, more than half of the state medical boards require graduates of US medical schools to have completed at least 1 year of graduate medical education (GME). Twenty-two boards do not require completion of any GME to take USMLE Step 3 (although in some cases a candidate must be enrolled in a GME program).

All medical and osteopathic boards require completion of at least 1 year of GME before issuing a full, unrestricted license.

**Note:** All information should be verified with the licensing board; medical licenses are granted to those physicians meeting all state requirements—at the discretion of the board.
Initial Licensure of Canadian Citizens
Who Are Graduates of Accredited
Canadian Medical Schools

When considering applications for licensure, all state medical boards consider Canadian citizens who have graduated from an accredited Canadian medical school on the same basis as graduates of accredited US medical schools.

Forty-six licensing boards endorse the Licentiate of the Medical Council of Canada (LMCC) as evidence of passing an acceptable licensing examination (applicants must also pass all other board requirements for licensure).

With the exception of Guam and the Virgin Islands, all licensing boards accept Canadian graduation medical education (GME) as equivalent to GME in a US program accredited by the Accreditation Council for Graduate Medical Education (ACGME). These rules do not uniformly apply to international medical graduates, who should refer to Table 5.

**Abbreviations**

ACGME—Accreditation Council for Graduate Medical Education  
GME—graduate medical education  
LMCC—certification by the Licentiate of the Medical Council of Canada

**Note:** All information should be verified with the licensing board; licenses based on endorsement are granted to those physicians meeting all state requirements.
Initial Licensure of International Medical Graduates

All international medical graduates (IMGs) must hold a certificate from the Educational Commission for Foreign Medical Graduates (ECFMG) examination before taking Step 3 of the United States Medical Licensing Examination (USMLE).

Thirty-nine states will endorse for licensure the Licentiate of the Medical Council of Canada (LMCC) when held by an IMG. Eighteen state boards allow IMGs to take USMLE Step 3 before they have had GME in a US or Canadian hospital. All states, however, require at least 1 year of GME for licensure, and 30 states require 3 years. Candidates are not awarded a license until they undertake the required GME in the United States and meet other board requirements (eg, an ECFMG certificate, personal interview, payment of fees).

Fifth Pathway

In 1971, the AMA established Fifth Pathway, a program for US citizens studying abroad at foreign medical schools. The program requires that participants have

1. Completed, in an accredited US college or university, undergraduate premedical work of a quality acceptable for matriculation in an accredited US medical school, evaluated by measures such as college grade point average and scores on the Medical College Admission Test.

2. Studied medicine in a foreign medical school located outside the US, including Puerto Rico, and Canada that is listed in the International Medical Education Directory available on the ECFMG Web site at www.ecfmg.org and developed and maintained by the Foundation for Advancement of International Medical Education and Research (FAIMER®), a nonprofit foundation of the ECFMG.

3. Completed all formal requirements for a diploma of the foreign medical school except internship and/or social service (Those who have completed all the formal graduation requirements of the foreign medical school, including internship and/or social service, and are consequently eligible to apply for ECFMG certification, are not eligible for the Fifth Pathway.)

If the aforementioned criteria are met, the candidate may substitute the Fifth Pathway program for internship and/or social service in the foreign country. After receiving a Fifth Pathway certificate from an accredited US medical school, these US citizens are eligible to enter the first year of GME in the United States.

In 52 jurisdictions (exceptions are Guam and the Virgin Islands), individuals who hold Fifth Pathway certificates (but not the ECFMG certificate) are eligible for licensure. Fifth Pathway certificate holders must pass Steps 1 and 2 of the USMLE before entering a GME program accredited by the Accreditation Council for Graduate Medical Education (ACGME).

Additional Notes for Specific Licensing Jurisdictions

Florida—ECFMG certificate required for licensure if a candidate is not a graduate of a foreign medical school approved by the Florida Board of Medicine (none has yet been approved).

Hawaii—With pending legislation in the state during summer 2004, Hawaii may accept Canadian GME as equivalent to US GME in the future; IMG applicants are advised to check with the board for more information.

Iowa—Starting July 1, 2006, IMGs will need 2 years of accredited US/Canadian training for licensure.

Maine—GME taken in Canada or the British Isles (accredited by a national body deemed equivalent to ACGME) may be considered qualifying on an individual basis.

Maryland—In addition to 2 years of ACGME- or AOA-accredited GME required for licensure, 1 year of GME required if a candidate failed any part of an examination three times; no more than three failures permitted.

Mississippi—ABMS board certification required for candidates who completed the Fifth Pathway.

North Dakota—Three years of US or Canadian GME is required for licensure; if a candidate has not completed 3 years of GME but has met all other licensing requirements and has completed 1 year of GME in the United States or Canada in a board-approved program, and if the board finds that the candidate has other professional experience and training substantially equivalent to the second and third years of GME, the candidate may be deemed eligible for licensure (upon passing SPEX or ABMS board certification).

Oregon—IMG candidates for licensure must have completed at least 3 years of progressive GME in not more than two specialties in not more than two US or Canadian hospitals accredited for such training.

Pennsylvania—The board will grant unrestricted license by endorsement to a candidate who does not meet standard requirements if the candidate has achieved cumulative qualifications that are endorsed by the board as being equivalent to the standard license requirements.

South Carolina—ABMS/AOA board certification required for candidates who completed the Fifth Pathway.

Wyoming—Oral examination is required for IMGs.

**Abbreviations**

- GME—graduate medical education
- IMG—international medical graduate
- LMCC—Licentiate of the Medical Council of Canada
- USMLE—United States Medical Licensing Examination

* Refer to introductory text to this table for more information on this state’s regulations.

**Note:** All information should be verified with the licensing board; licenses are granted to those physicians meeting all state requirements—at the discretion of the board.
Medical Student Clerkship Regulations

For purposes of this publication, a clerkship is defined as clinical education provided to medical students. Twenty states evaluate the quality of clinical clerkships in connection with an application for licensure. In most states, clerkships for US medical students must take place in hospitals affiliated with medical schools accredited by the Liaison Committee on Medical Education (LCME). Eleven states have additional and/or more specific bases for evaluation.

Fourteen boards regulate clerkships provided in their states to students of foreign medical schools (including US citizens studying medicine in foreign schools). Of these, Pennsylvania and Puerto Rico forbid such clerkships. For purposes of licensure, 19 states accept only those clerkships completed in hospital departments with graduate medical education (GME) programs accredited by the Accreditation Council for Graduate Medical Education (ACGME). Eight states have additional regulations.

Additional Notes for Specific Licensing Jurisdictions

California—Students of foreign medical schools may complete up to 18 of 72 required weeks in nonapproved clerkships outside of California.

Florida—Rules on clinical clerkships for international medical graduates adopted by the Florida Board before October 1986 do not apply to any graduate who had already completed a clinical clerkship or who had begun a clinical clerkship, as long as the clerkship was completed within 3 years.

An international medical school must be registered with the Florida Department of Education for its students to perform clinical clerkships in Florida.

Michigan—Specific clerkships are required.

Texas—Clerkships are accepted if the hospital departments with ACGME-accredited programs are in the same subject as the clerkship.

* Refer to introductory text to this table for more information on this state's regulations.

† In many cases, clerkships must take place in hospitals affiliated with LCME-accredited medical schools or ACGME-accredited residency programs. These states require additional and/or more specific criteria for evaluation.

Note: All information should be verified with the licensing board; medical licenses are granted to those physicians meeting all state requirements—at the discretion of the board.
Additional Policies Concerning IMGs and DOs

A number of state medical boards have additional graduate medical education (GME) and specialty certificate policies for international medical graduates (IMGs). Sixteen states have requirements for appointment to GME programs other than requiring an Educational Commission for Foreign Medical Graduates (ECFMG) certificate or a limited license.

Five boards—Connecticut, Maine, Nebraska, Ohio, and Oklahoma—indicated that GME completed in foreign countries other than Canada may be considered for credit toward a license. Specialty certificates of foreign boards, such as the Royal College of Physicians in the United Kingdom, are accepted for credit toward a license in 11 states.

Thirty-five medical boards accept GME accredited by the Accreditation Council for Graduate Medical Education (ACGME) for licensure of osteopathic medical graduates.

Additional Notes for Specific Licensing Jurisdictions

Maine—The board may accept GME completed in England, Scotland, and Ireland for credit toward a license, if it is accepted by the specialty board as meeting board eligibility in the United States and notified via certified letter.

Pennsylvania—IMGs seeking appointment to a GME program need a passing score on United States Medical Licensing Examination (USMLE) Steps 1 and 2 (or National Board of Medical Examiners [NBME] Parts I and II or Federation Licensing Examination [FLEX] Component 1) for graduate year 2 medical education; for graduate year 3 and beyond, all parts of USMLE (or NBME or FLEX) are required.

**Note:** All information should be verified with the licensing board; medical licenses are granted to those physicians meeting all state requirements—at the discretion of the board.
Accredited Subspecialties and Nonaccredited Fellowships That Satisfy GME Requirements for Licensure

Both the AMA and the Accreditation Council for Graduate Medical Education (ACGME) define a residency as graduate medical education (GME) that takes place in any of the medical specialties with ACGME Program Requirements (eg, internal medicine, pediatrics, surgery). Beginning in 2000, the ACGME has used the term fellowship to denote GME in ACGME-accredited subspecialty programs (eg, cardiovascular disease, vascular surgery, rheumatology) that is beyond the requirements for eligibility for first board certification in the discipline.

All state medical boards accept residency education in specialty programs accredited by the ACGME as satisfying their GME requirements for licensure. Fifty jurisdictions—all except Arkansas, Montana, Pennsylvania, and Puerto Rico—accept residency education in subspecialty programs accredited by ACGME as satisfying their GME requirements for licensure.

Eight boards accept clinical fellowships not accredited by ACGME, and four boards—Hawaii, Nevada, New York, and North Carolina—may accept (with board approval, in some cases) research fellowships not accredited by ACGME to satisfy the GME requirement for licensure.

Additional Notes for Specific Licensing Jurisdictions

Nevada—The board accepts clinical fellowships and research fellowships not accredited by the ACGME, but this time does not count towards satisfying the 36-month GME requirement.

**Abbreviations**

- **ACGME**—Accreditation Council for Graduate Medical Education
- **GME**—Graduate Medical Education

* Refer to introductory text to this table for more information on this state’s regulations.

**Note:** All information should be verified with licensing board; medical licenses are granted to those physicians meeting all state requirements—at the discretion of the board.
Licensure Requirement Exemptions for Eminent Physicians and Medical School Faculty

Thirteen boards license physicians through recognition of eminence in medical education or medical practice. Physicians appointed to a medical school faculty are excused from the graduate medical education (GME) requirement for limited licensure in 18 states and from the examination requirement for limited licensure or teaching certification in 18 states. These faculty appointees would, however, receive a limited license or similar credential.

Notes/Comments:
- Physicians appointed to a medical faculty are eligible for a visiting medical faculty certificate, with which they may practice only at the school or teaching hospitals affiliated with the school. This nonrenewable certificate is valid 1 year or duration of the appointment, whichever is shorter.
- IMGs who are not eligible for licensure may be granted a Limited License, Medical Faculty (LL, MF) if appointed to a full-time medical school faculty position under direction of the department head. LL, MF may be granted annually for 4 years, during which the applicant must pass USMLE Steps 1, 2, and 3 or have passed FLEX or the National Boards. The physician would then be eligible for licensure.
- Distinguished foreign physicians recommended by the medical school dean may serve on faculty; academic limited registration may be renewed for a maximum of 5 years.
- Physicians appointed as full medical school professors in a salaried full-time position may be designated Distinguished Professors and be excluded from the Special Purpose Examination (SPEX) if required under the 10-year rule.
- Exemption granted at Board's discretion.

Note: All Information should be verified with licensing board; medical licenses are granted to those physicians meeting all state requirements—at the discretion of the board.
Teaching (Visiting Professor) and Resident Physician Licenses

Fifty-nine jurisdictions issue educational licenses, permits, certificates, or registration to resident physicians in graduate medical education (GME) programs, with fees ranging from $0 to $600 per year. (The GME program director generally provides a list of residents and any other required information directly to the licensing jurisdiction.) In 36 of those jurisdictions, residents must obtain a new permit/license when changing residency programs within the state.

Medical boards in 14 states require that prospective residents have passed United States Medical Licensing Examination (USMLE) Step 1 to receive a permit/license. California, Mississippi, and Montana require passage of Steps 1 and 2.

Thirty-eight jurisdictions issue teaching (visiting professor) licenses, with fees ranging from $0 to $400.

Additional Notes for Specific Licensing Jurisdictions

California—Renewable certificates of registration are awarded on an individual basis for 1 to 5 years to physicians who do not immediately meet licensure requirements and who have been offered full-time teaching positions in California medical schools.

Permits are awarded on an individual basis for a maximum of 5 years to noncitizen physicians for postgraduate work in a California medical school.

IMGs must submit an application to determine that all core requirements have been met before they may begin training in California.

Biennially renewable faculty permits are awarded on an individual basis to academically eminent physicians, for whom the medical school has assumed direct responsibility. The holder may practice medicine only within the sponsoring medical school and affiliated institutions.

Florida—A medical faculty certificate, valid for 180 days, is granted to MDs who are graduates of an accredited medical school or its equivalent and hold a valid current license to practice medicine in another US jurisdiction. The certificate authorizes practice only in conjunction with teaching duties at an accredited Florida medical school or in its main teaching hospitals. No more than three physicians per year per institution may hold this certificate; the certificate can be granted to a physician only once in a given 5-year period.

Illinois—Limited temporary licenses (valid for 6 months) are awarded to persons in non-Illinois residency programs who are accepted for a specific period of time to perform a portion of that program at a clinical residency program in Illinois due to the lack of adequate facilities in their state.

Visiting Professor Permits for a maximum of 2 years are issued to persons receiving faculty appointments to teach in either a medical or osteopathic school.

Visiting Physician Permits for up to 180 days are issued to persons receiving an invitation or appointment to study, demonstrate, or perform a specific medical, osteopathic, or chiropractic subject or technique in medical, osteopathic, or chiropractic schools; hospitals; or facilities operated pursuant to the Ambulatory Surgical Treatment Center Act.

Visiting Resident Permits are issued for 180 days to persons who have been invited or appointed for a specific period of time to perform a portion of that clinical residency program under the supervision of an Illinois-licensed physician in an Illinois patient care clinic or facility affiliated with the out-of-state GME program.

Massachusetts—Limited registration is issued to physicians enrolled in accredited residency programs and physicians enrolled in fellowships at hospitals with accredited residency programs in the area of the applicant's specialty.

Temporary registration is issued to physicians who hold a temporary faculty appointment at a Massachusetts medical school, are substituting temporarily for a fully licensed Massachusetts physician, or are enrolled in a CME course that requires Massachusetts licensure.

Physicians requesting temporary registration must be currently licensed in another state.

Mississippi—Institutional license is issued to interns and IMG physicians providing health care in state institutions. Applicants are not required to meet all requirements for permanent unrestricted licensure.

Restricted temporary license is issued to physicians enrolled in first year of graduate medical education at the University of Mississippi School of Medicine for practice limited to that school.

Addictionology Fellowship License is issued to physicians admitted for treatment in a board-approved drug and/or alcohol addiction treatment program or to physicians enrolled in fellowship of addictionology of the Mississippi State Medical Association Impaired Professionals Program.

Oregon—Limited license (LL) is issued for Visiting Professor (VP), Medical Faculty (MF), SPEX, Special, Postgraduate (PG), and Fellow. LL-VP and Fellow licenses may be renewed for 1 additional year, LL-MF for 3 additional years, LL-PG annually until training is completed.

LL-VP is valid for a 1-year teaching position.

LL-MF is valid for a full-time faculty position offered by the dean of the medical school.

Pennsylvania—Interim Limited License (up to 12 consecutive months) is issued to physicians providing medical service other than at the training location of the licensee's accredited GME program.

Graduate License allows the licensee to participate for a period of up to 12 consecutive months in GME within the complex of the hospital to which the license is assigned and any satellite facility or other training location used in the program.

Institutional License allows a qualified person to teach and/or practice medicine for a period of time not to exceed 3 years in one of the Commonwealth's medical colleges, its affiliates, or community hospitals.

Temporary License allows the licensee to teach medicine and surgery or participate in a medical procedure necessary for the well-being of a specified patient within the Commonwealth. Applicants for a temporary license must hold an unrestricted license in another state, territory, possession, or country.

Appendix G

Accredited Residency Programs in Canada

Introduction

The following listing includes all residency programs accredited by the Royal College of Physicians and Surgeons of Canada as of December 2005.

The College will consider for accreditation only those residency programs that are sponsored by a medical school in a Canadian university.

All programs are accredited for full training in the specialty or subspecialty. Where a university has sufficient resources to provide most of the components in a specialty program but lacks resources for one or more essential elements, an inter-university affiliation agreement must be developed. Such a program is listed with the following designation:

“This program is accredited as an inter-university program and includes mandatory rotations at [name of receiving university].”

For information regarding inter-university affiliations, refer to the General Information Concerning Accreditation of Residency Programs booklet.

“Accreditation Without Certification” is a process whereby the College recognizes subspecialties for the purpose of accrediting programs but does not offer examinations or certification to individuals completing these programs.

Two special programs are also accredited by the College: the Clinician Investigator Program (CIP) and Palliative Medicine.

The major goal of the CIP is to assist in the career development of clinician investigators in Canada by providing a minimum of 2 years of structured, rigorous research training in addition to the existing specialty requirements.

Palliative Medicine is a 1-year program jointly accredited by the Royal College of Physicians and Surgeons of Canada and the College of Family Physicians of Canada. An accredited program in Palliative Medicine will provide advanced training at a post-certification level for those physicians who wish to develop added competence in this area.

Applications or enquiries regarding any of the programs listed should be addressed to the respective Program Director.

All residents training in Canada and seeking credit toward RCPSC examinations must be registered with the university office of postgraduate medical education and enrolled in a residency program accredited by the RCPSC. Residents must also have an educational license from the medical licensing authority of the province in which they are training. Information about licensing requirements may be obtained from the following:

College of Physicians and Surgeons of British Columbia
Suite 400, 885 Beatty Street

Neurology
As of April 2004, the college has changed the
status of neuropathology from a 5-year
specialty to a 2-year sub specialty of
"Certificate of Special Competence." Current
neuropathology programs are in the process of
converting from the 6-year specialty to the
2-year sub specialty.

Room 2000A, Dickson Bldg  
QEH Health Sciences Centre, VG Site  
5020 University Avenue  
Halifax NS B3H 1V7

### Thoracic Surgery

As of September 2002, the College has changed the status of thoracic surgery from a 6-year specialty to a 2-year subspecialty of "Certificate of Special Competence." Current thoracic programs are in the process of converting from the 6-year specialty to the 2-year subspecialty.

**University of British Columbia, Vancouver**  
Dr Kenneth Evans  
Department of Surgery  
LSP 3  
Room 3109  
950 West 10th Avenue  
Vancouver BC V6Z 4E3

**University of Manitoba, Winnipeg**  
Dr A Lawrence Tan  
Room GE 611  
General Hospital  
Health Sciences Centre  
820 Sherbrook Street  
Winnipeg MB R3A 1B9

**University of Western Ontario, London**  
Dr Richard Jaouet  
Division of General Thoracic Surgery  
LHSC South Street Campus  
375 South Street  
Room N344, PO Box 5375  
London ON N6A 4G5

The Graduate Medical Education Directory 2006-2007
Graduate Medical Education Directory 2006-2007

Canadian GME Programs in Gastroenterology (Adult and Pediatric)

Pediatric Endocrinology and Metabolism
Dr Anastasia Hadjiyannakis
Division of Pediatric Endocrinology and Metabolism
CHEO, Room 2291
401 Smyth Road
Ottawa ON K1H 8L1

McGill University, Montreal
Adult Endocrinology and Metabolism
Dr Patrick Donan
Div Endocrinology & Metabolism
Room M9.06
Royal Victoria Hospital
687 Pine Avenue West
Montreal QC H3A 1A1

Pediatric Endocrinology and Metabolism
Dr Cecia Rodd
Dept of Endocrinology & Metabolism
Suite #6 135
Montreal Children's Hospital
2300 Tupper Street
Montreal QC H3H 1P1

Université de Montréal, Montréal
Endocrinologie et métabolisme chez l'adulte
Dr Pierre D'Amour
Département de médecine
CHUM Hôpital St Luc
Pavillon Édouard Amelin
264, boul. René Lévesque Est, bureau 302
Montréal QC H2X 1P1

Endocrinologie et métabolisme chez l'enfant
Dr Cheri Deal
Secrétariat d'endocrinologie
Hôpital Sainte Justine
3175, chemin côte Ste Catherine
Montréal QC H3T 1C5

Université de Sherbrooke, Sherbrooke
Endocrinologie et métabolisme chez l'adulte
(Ce programme est agréé comme un programme interuniversitaire et comprend des stages obligatoires à l'Université de Montréal ou de l'Université McGill)
Dr Jean Patrice Ballanger
Dép. d'endocrinologie et métabolisme
Centre Universitaire de Santé de l'Estrie
3001, 12e avenue nord
Sherbrooke QC J1H 5N4

Dalhousie University, Halifax
Adult Endocrinology and Metabolism
Dr S M Kaiser
Division of Endocrinology
7 North, Rm 044, Victoria Bldg.
QEH Health Sciences Centre, VG Site
1275 Tower Road
Halifax NS B3H 2V9

Forensic Pathology
Forensic pathology was officially recognized by the College as a subspecialty of "Certificate of Special Competence" in September 2003. No programs in forensic pathology have yet been accredited.

Gastroenterology (Adult and Pediatric)
University of British Columbia, Vancouver
Adult Gastroenterology
Dr W C Kwan
2647 Willow Street
Room 100
Vancouver BC V5Z 3P1

Pediatric Gastroenterology
Dr Collin Barker
Div Pediatric Gastroenterology
BC Children's Hospital
4480 Oak Street, Rm K4-180
Vancouver BC V6H 3W4

University of Calgary, Calgary
Adult Gastroenterology
Dr Eldon Shaffer
Department of Adult Gastroenterology
Rm G162, Health Sciences Centre
3330 Hospital Drive N.W.
Calgary AB T2N 4N1

Pediatric Gastroenterology
Dr Leanna McKenzie
Alberta Children's Hospital
1620 Richmond Road SW
Calgary AB T2T 5C7

University of Alberta, Edmonton
Adult Gastroenterology
Dr Winnie Wong
Ziedler Leduc Centre
130 University Campus
University of Alberta
Edmonton AB T6G 2H3

Pediatric Gastroenterology
Dr Hien Huynh
4222 Aberhart Centre #1
11402 University Ave NW
Edmonton AB T6G 2H3

University of Manitoba, Winnipeg
Adult Gastroenterology
Dr Charles Bernstein
Section of Gastroenterology
John Ruhler Research Foundation
Health Sciences Centre, Room 804P
715 McDermot Avenue
Winnipeg MB R3E 3P4

University of Western Ontario, London
Adult Gastroenterology
Dr Jamie Gregor
Department of Medicine
Division of Gastroenterology
LHSC South Street Campus
375 South Street, Rm N565
London ON N6A 4G5

McMaster University, Hamilton
Adult Gastroenterology
Dr John Marshall
Division of Gastroenterology
Department of Medicine
Room 4W8
McMaster University Medical Centre
1200 Main Street West
Hamilton ON L8N 3Z5

University of Toronto, Toronto
Adult Gastroenterology
Dr Peter Rossos
Toronto General Hospital
9 RN 215
200 Elizabeth Street
Toronto ON M5T 2B8

Pediatric Gastroenterology
Dr Nicola Jones
Gastroenterology & Nutrition Division
The Hospital for Sick Children
555 University Avenue
Toronto ON M5G 1X9

Queen's University, Kingston
Adult Gastroenterology
Dr W Depew
Division of Gastroenterology
Sydenham 4
Hotel Dieu Hospital
166 Brock Street
Kingston ON K7L 5G2

University of Ottawa, Ottawa
Adult Gastroenterology
(This program is accredited as an inter-university program and includes mandatory rotations to another university for the completion of training)
Dr Alan Rostom
Division of Gastroenterology
GH Unit A1
The Ottawa Hospital Civic Campus
1053 Carling Avenue
Ottawa ON K1Y 4B9

McGill University, Montreal
Adult Gastroenterology
Dr Alain Biton
Division of Gastroenterology
Rm 228
Royal Victoria Hospital
687 Pine Avenue W
Montréal QC H3G 1A1

Pediatric Gastroenterology
Dr Sylviane Forget
Pediatric Gastroenterology Department
Montreal Children's Hospital
2000 Tupper Street
Rm D 562
Montréal QC H3H 1P3
Canadian GME Programs in Gastroenterology (Adult and Pediatric)

University of Montréal, Montréal
Gastroentérologie chez l'adulte
Dr Michel Lemoyne
Département de médecine
Hôpital St Luc du CHUM
1068, rue St Denis
Montréal QC H2X 3J5

Gastroentérologie chez l'enfant
Dr Éric Dequin
Service de gastroentérologie
Hôpital Sainte Justine
3175, chemin Côte Ste Catherine
Montréal QC H3T 1C5

Université de Sherbrooke, Sherbrooke
Gastroentérologie chez l'adulte
(Ce programme est agréé comme un programme interuniversitaire et comprend des stages obligatoires à l'Université de Montréal)
Dr Julie Carrier
Département de médecine (gastro.)
CHUS Hôpital Hôtel Dieu
1500 boulevard de Sherbrooke Qc J1G 2E8

Université Laval, Québec
Gastroentérologie chez l'adulte
(Ce programme est agréé comme un programme interuniversitaire et comprend des stages obligatoires à l'Université de Montréal)
Dr Claude Parent
CHAQ Enfant Jésus
1401, 18e Rue
Québec QC G1J 1Z4

Dalhousie University, Halifax
Adult Gastroenterology
Dr Sunil Patel
Division of Gastroenterology
Room 833, Victoria Building
QEH Health Sciences Centre, VG Site
1375 Tower Road
Halifax NS B3H 3J9

Geriatric Medicine
University of British Columbia, Vancouver
Dr Janet Kushnir Kow
Division of Geriatric Medicine
2nd Floor, Koerner Pavilion
UBC Hospital
2311 Wesbrook Mall
Vancouver BC V6T 2B5

University of Calgary, Calgary
Dr David Hogan
Geriatric Medicine
Health Sciences Centre
3330 Hospital Drive NW
Calgary AB T2N 4N1

University of Alberta, Edmonton
Dr Darryl Robison
Geriatric Medicine
Glenrose Hospital
Room 1259
10230 111 Avenue
Edmonton AB T5G 1B7

University of Manitoba, Winnipeg
Dr Cornelia van Ineweld
Department of Medicine
Room E4003
St Boniface General Hospital
469 Tache Avenue
Winnipeg MB R2H 2A6

University of Western Ontario, London
Dr Laura Diachun
St Joseph's Health Care
Parkwood Site, Rm A280
801 Commissioner's Rd E
London ON N6C 5J1

McMaster University, Hamilton
Dr Michelle D Gagnon
Division of Geriatric Medicine
St Joseph's Hospital
50 Charlton Avenue East
Hamilton ON L8N 4A6

University of Toronto, Toronto
Dr Terumi Inakawa
Baycrest Centre for Geriatric Care
3560 Bathurst Street
Room 1 C 10
North York ON M6A 2E1

University of Ottawa, Ottawa
Dr Barbara Power
Division of Geriatrics
The Ottawa Hospital Civic Campus
1063 Carling Avenue
Ottawa ON K1Y 4E9

Quebec Provincial Network Program
Université Laval
McGill University
Université de Montréal
Université de Sherbrooke
Dr Michel Dugas
Service de gérontologie
CHUQ CHUL
2705, boulevard Laurier
Ste Foy QC G1V 4G2

Dalhousie University, Halifax
Dr Dan Carver
Division of Geriatric Medicine
Room 1308, Veterans Memorial Bldg
QEH Health Sciences Centre, Camp Hill Site
5865 Jubilee Road
Halifax NS B3H 2E1

Hematology
Note: Pediatric hematology/oncology is recognized as a separate subspecialty. For information on these programs please see the section "Hematology/Oncology (Pediatric)."

University of British Columbia, Vancouver
Dr Peter Tsang
Division of Hematology
Department of Medicine
Room 3300 - JPPN 3
950 West 10th Avenue
Vancouver BC V5Z 4E3

University of Calgary, Calgary
Dr Karen Valentine
Department of Hematology
Foothills Medical Centre
1403 29th Street NW
Calgary AB T2N 2T9

University of Alberta, Edmonton
(This program is accredited as an inter-university program and includes mandatory rotations at the University of Calgary)
Dr Marlene Hamilton
Hematology
c/o 2F1 Walter Mackenzie Health Sciences Centre
8440 112 Street
Edmonton AB T6G 2B7

University of Manitoba, Winnipeg
Dr Donald Houston
Manitoba Institute of Coll Biologic
CancerCare Manitoba
Room CC2056
676 McDermot Avenue
Winnipeg MB R3S 0P9

University of Western Ontario, London
Dr Joy Mangel
Division of Hematology
London Health Sciences Centre
112 Street, Westrinster Campus
880 Commissioners Road E
London, ON N6A 4G5

**Palliative Medicine**

Palliative medicine is a 1-year program jointly accredited by the Royal College of Physicians and Surgeons of Canada and the College of Family Physicians of Canada. An accredited palliative medicine program provides advanced training at a post-certification level for those physicians who wish to develop added competence in this area.
