1112  Subspecialty Programs: Accreditation Without Certification
1114  Special Programs
Preface

The Graduate Medical Education Directory (91st edition), published by the American Medical Association (AMA), lists programs accredited by the Accreditation Council for Graduate Medical Education (ACGME).

The Directory provides medical students with a list of accredited graduate medical education (GME) programs in the United States, which aids them in making important professional decisions. State licensing boards, specialty societies, and hospitals refer to the Directory to verify the authenticity of programs presented by physicians who wish to qualify for licensure, certification, or hospital privileges. The Directory provides a unique historical record of accredited GME programs and background information about the ACGME accreditation process.

Contents of the Directory

- Section I—Graduate Medical Education Information—provides descriptions of various organizations involved in GME, including the ACGME, National Resident Matching Program (NRMP), Electronic Residency Application Service (ERAS), and Educational Commission for Foreign Medical Graduates (ECFMG), as well as information on AMA products, projects, and initiatives relevant to medical students, residents/fellows, program directors, and academic physicians.
- Section II—Specialty/Subspecialty Information and Data—provides descriptions of and data for the 126 specialties/subspecialties with ACGME-accredited residency/fellowship programs and/or ACGME Program Requirements in effect. Also included are subspecialties for which a member board of the American Board of Medical Specialties (ABMS) offers certification.
- Section III—Accredited Graduate Medical Education Programs—lists GME programs accredited by the ACGME as of January 16, 2006, the date the ACGME shared with the AMA the data used in this section. Section III provides program name, sponsoring institution, major participating institution(s), program director name, address, and phone/fax numbers, e-mail address, accredited program length, ACGME approved/offered positions, and program ID number. Specialties and subspecialties are listed in alphabetical order. Programs within each specialty or subspecialty are listed in alphabetical order by state and city. A list of accredited transitional year programs offered by hospitals or groups of hospitals is also included. Newly appointed program directors since the publication of last year's Directory are noted with an asterisk. (Note: The Directory may include programs on probation. To check a program's current accreditation status, go to the ACGME Web site, www.acgme.org, click on "public," then click on "Search Through Accredited Programs and Sponsors" to look up information about programs and sponsors, including current accreditation status.)
- Section IV—New and Withdrawn Programs—lists GME programs newly accredited since the publication of the 2005-2006 edition of the Directory and programs that are no longer accredited to offer GME as of December 31, 2005, or earlier.
- Section V—Graduate Medical Education Teaching Institutions—lists institutions and organizations that sponsor or participate in GME programs. Teaching institution listings include type of affiliation (sponsor and/or participant) and are listed alphabetically by state and city. Institution listings include the name and address of the institution, medical school affiliations (as verified biennially by the deans of accredited US medical schools), a list of the specialties and subspecialties in which the institution provides training, and the institution identification number.
- Appendix A—Combined Specialty Programs—provides information on programs that offer combined specialty training. Combined training consists of a coherent educational experience in two or more closely related specialty or subspecialty programs. The educational plan for combined training is approved by the specialty board of each of the specialties to assure that resident physicians completing combined training are eligible for board certification in each of the component specialties. Each specialty or subspecialty program is separately accredited by the ACGME through its respective specialty review committee. The duration of combined training is longer than any one of its component specialty programs standing alone, and shorter than all of its component specialty programs together.
- Appendix B—Medical Specialty Board Certification Requirements—contains information about the American Board of Medical Specialties (ABMS) and the certification requirements for each of the 24 member boards of the ABMS. Certification is the process by which a medical specialty board grants recognition to a physician who has met certain predetermined qualifications, as specified by the board. Certification requirements are also published by and available from each medical specialty board. Questions concerning certification requirements should be directed to the particular specialty board office listed in Appendix B.
- Appendix C—Medical Schools in the United States—contains a list of US medical schools accredited by the Liaison Committee on Medical Education (LCME), including the identification number, name, and location of each LCME-accredited medical school.
- Appendix D—Graduate Medical Education Glossary—defines various terms commonly used in GME.
- Appendix E—Listings of Subspecialty and Fellowship Programs—provides information on subspecialty and fellowship programs outside the purview of the ACGME accreditation process.
- Appendix F—Medical Licensure Information—contains an article on the basics of medical licensure, in addition to information on GME-related licensure policies of state medical boards, as published in 2006 edition of State Medical Licensure Requirements and Statistics.
- Appendix G—Accredited Residency Programs in Canada—lists residency/fellowship programs accredited by the Royal College of Physicians and Surgeons of Canada (RCPSC) as of December 2005.

Production of the Directory

The work of the ACGME's review committees, which review and evaluate programs and sponsoring institutions, provide the basis for program and institutional information included in Sections III through V of the Directory. The ACGME shares its data on accreditation actions and program changes with the AMA quarterly for the exclusive purpose of maintaining an accurate database to benefit programs, residents, applicants, and the public. The AMA, in turn,
Preface

shares with the ACGME information collected through its annual survey of GME programs, but program directors are reminded that most review committees require prompt notification in writing of changes in the program's leadership. Providing information on program director changes through the National GME Census does not meet this requirement. In addition, most review committees require a current copy of the curriculum vitae for new program directors.

The Directory reflects accreditation actions completed as of January 18, 2006, the date the ACGME shared with the AMA the data used in Sections III through V. Readers are reminded that accreditation actions and related changes can alter the ACGME program population on a daily basis, and that the Directory serves only as a "snapshot" of this population at a given moment. For the most current information on ACGME-accredited programs, consult the ACGME Web site: www.acgme.org.

The data for combined programs listed in Appendix A were obtained via the National GME Census (see Section I for more information).

Disclaimer

It is the AMA's understanding that all institutions listed in the Graduate Medical Education Directory are required by law to include the phrase "EEO, M/F/D/V" (Equal Employment Opportunity, Minority/Female/Disabled/Veteran) on any information distributed for public view.

Back issues of the Directory

Copies of previous editions of the Directory are available for purchase at $25 per copy. For more information or to order, please call 312 464-5333. In addition, the CD-ROM version of the Directory contains Adobe Acrobat files of editions from 1996-1997 to the present.

Special Acknowledgment to the ACGME

The AMA gratefully acknowledges the cooperation of the Accreditation Council for Graduate Medical Education (ACGME) in supplying the list of programs accredited by the ACGME and sponsoring/participating institutions and relevant information about the ACGME and its accreditation process. The AMA thanks all RRC executive directors and accreditation administrators as well as ACGME staff Jeanne Heard, MD, PhD, Ingrid Philibert, John Nylen, MBA, Rebecca Miller, MS, Doris Stoll, PhD, and Julie Jacob for their many ongoing contributions to the Directory.

Acknowledgments

Many people contributed to the publication of this edition of the Graduate Medical Education Directory. In addition to collaborative efforts with the ACGME (see "Special Acknowledgment," above), the ABMS and staff of the member boards of the ABMS provided requirements for certification in each of the medical specialties and subspecialties.

Special acknowledgment is also given to the following groups and individuals:

- AMA Department of Data Collection, for data collection and information resources management: Susan Montrivas, Chris Mathews, Frank Karnavas, John Wilson, and Charles Fisher.
- Association of American Medical Colleges, for its collaboration with the AMA in collecting data on combined programs (see Appendix A) via the National GME Census: Jennifer Faerberg and Jason Cantow.
- AMA Book Group, for production support and assistance in disseminating this product: Suzanne Fraker, Jean Roberts, Bonnie Summers, Erin Vorbies, Sean Al Tan, J D Kinney, Amy Burgess, Lori Hollacher, Mark Daniels, and Al Novak.
- AMA Medical Education Group, for data cleaning, QA, and editorial advising and assistance: Sarah Brotherton, PhD, Sylvia Etzel, Irrie Swopshire, Barbara Barzansky, PhD, Frank Simon, MD, Rabia Akram, Dorothy Grant-Bryant, Enza Perrone, and Areicia Washington.

In addition, we would like to acknowledge the many contributions of the following individuals/organizations for assistance with the indicated sections/appendices of this book:

Section I

- Careers in Medicine—George V Richard, PhD
- Electronic Residency Application Service—Reneé Overton, Moira Edwards
- National Resident Matching Program—Mona Signer
- Entry of Foreign-born Medical Graduates to the United States—Elizabeth M Ingraham, Educational Commission for Foreign Medical Graduates; Cathryn Cotten and Edward Ashworth, Duke University Medical Center International Office
- AMA Alliance—Harry Bauer
- AMA International Medical Graduates Section—J Mori Johnson
- Virtual Mentor—Faith Layag, PhD
- Association of American Medical Colleges—Sunny Yoder

Section II

- American Board of Medical Specialties—Alexis Rodgers
- Salary information supplement from Modern Healthcare—Dave Burda, Perley Marion

Appendix E

- Hospitalist and Hospital Medicine Programs—Larry Wellikson, MD, Society of Hospital Medicine
- Pathology Fellowship Programs—Donna Stivers, Intersociety Council for Pathology Information

Appendix G

- Canadian Residency Programs—Peggy Brule, Royal College of Physicians and Surgeons of Canada

We would also like to recognize the many contributions of Red Hill of North Coast Associates, the typesetter of this publication.

Fred Donini-Lenhoff, MA, Editor
Paul H Rockey, MD, MPH, Director,
Division of Graduate Medical Education

## Match Timeline

<table>
<thead>
<tr>
<th>Class Year</th>
<th>Period</th>
<th>Suggested Activities and Tasks</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Year 3</strong></td>
<td>October - March</td>
<td>• Begin working on your curriculum vitae (CV). Crafting a high quality CV can take 8-10 hours. Information for the CV can be used in the ERAS application and provided to those writing your letters of recommendation.</td>
</tr>
<tr>
<td></td>
<td>February - June</td>
<td>• Review residency programs and physician workforce data through the AAMC Careers in Medicine Specialty Pages and FREIDA Online • Depending on your school's schedule, make an appointment with your Associate Dean to discuss the Medical School Performance Evaluation (MSPE) process (at some schools this may occur later in the year) • Write your personal statement</td>
</tr>
<tr>
<td></td>
<td>Summer</td>
<td>• Obtain your ERAS token (a special code) from your advisor or the Student Affairs dean’s office • Register with the National Resident Matching Program (NRMP) for the Main Residency Match • Register for early Match, if applicable</td>
</tr>
<tr>
<td><strong>Year 4</strong></td>
<td>July - September</td>
<td>• Complete the ERAS application using the MyERAS site (<a href="http://www.aamc.org/students/eras/start.htm">www.aamc.org/students/eras/start.htm</a>), including the designation of programs where your application is to be transmitted • Identify additional faculty for writing letters of recommendation</td>
</tr>
<tr>
<td></td>
<td>September - October</td>
<td>• Begin preparing for residency interviews • If you haven’t taken the USMLE Step 2, consider using this time to prepare</td>
</tr>
<tr>
<td></td>
<td>October - January</td>
<td>• MSPE released November 1 • Residency interviews • Early Match deadlines usually occur in early or mid-January</td>
</tr>
<tr>
<td></td>
<td>January - February</td>
<td>• Begin entering your Rank Order List for the NRMP match</td>
</tr>
<tr>
<td></td>
<td>March</td>
<td>• Match Day—typically the third Thursday in March; results are formally announced at 12:30pm EST</td>
</tr>
<tr>
<td></td>
<td>April - June</td>
<td>• Sign the contract with your residency program • Graduate and prepare to begin residency — Congratulations! • Begin preparing for moving</td>
</tr>
<tr>
<td></td>
<td>June - July</td>
<td>• Residency begins</td>
</tr>

Fellowship and Residency Electronic Interactive Database Access (FREIDA) Online®

FREIDA Online is a free Internet database of approximately 8,180 graduate medical education programs accredited by the Accreditation Council for Graduate Medical Education (ACGME), as well as more than 300 combined specialty programs approved by member boards of the American Board of Medical Specialties.

Users of FREIDA Online can search the database by specialty/ subspecialty or state/region, among other criteria. The SearchPlus feature also allows users to compare programs by features of importance, such as number of first year positions, salary, and program setting. In addition, FREIDA Online also displays aggregate statistics for each specialty and subspecialty, providing averages and percents, for example, on the average number of faculty per program in the specialty, or the average number of hours on-duty.

Starting in 2005, AMA student and resident members can save their favorite programs in an electronic folder and can print their own mailing labels to contact programs.

GME programs update data for FREIDA Online via the National GME Census, an annual survey conducted by the AMA and Association of American Medical Colleges. The survey instrument, GME Track, is available online at www.aamc.org/gmetrack.

Programs: Modifying Your FREIDA Online Listing

In addition to providing data via the National GME Census, as explained above, program directors and staff can also modify the basic information that appears on FREIDA Online throughout the year by accessing www.ama-assn.org/ama/pub/category/5598.html.

For example, if there is a new program director or a new contact person, you can make these changes on FREIDA Online directly. Changes are reviewed by FREIDA staff before the data are updated; changes take approximately 2 weeks to process.

FREIDA Online listings: Basic and Expanded

All programs listed in FREIDA include the following Basic Listing:

- Program name
- Program identifier (eg, 120-36-21-000)
- Specialty/subspecialty (eg, family medicine)
- Program director (name, mailing address, phone, fax, e-mail, Web address)
- Person to contact for more information about the program (name, mailing address, phone, fax, e-mail)
- Accredited length; required length
- Accepting applications
- Program start date
- Participates in ERAS
- Affiliated with US government
- Institution list (sponsor and participant[s])

In addition, programs that select the Expanded Detailed Listing option (as most programs do) provide the following information to students and residents:

General information

- Comments (used to highlight special qualities about the program, such as special features or description of surrounding hospital setting)
- Total program size (by year)
- Primary teaching site (eg, city university hospital)
- Program best described as (eg, community-based hospital)
- Previous GME required
- Preliminary positions offered
- Information on USMLE Step 2-CS
- Participation in National Resident Matching Program (NRMP); code(s)
- Participation in San Francisco match
- Participation in another matching program
- Number of interviews conducted last year for first year positions
- Required letters of recommendation
- Earliest date for applications; latest date for applications; interview period

Program faculty

- Number of faculty (physician and nonphysician)
- Full-time and part-time physicians and nonphysicians
- Percentage of full-time paid female physician faculty
- Ratio of full-time equivalent paid faculty to positions

Work schedule

- Average hours/week on duty during first year (excluding beeper call)
- Maximum consecutive hours on duty during first year (excluding beeper call)
- Average number of 24-hour off duty periods per week during first year
- Moonlighting allowed within institution
- Night float system (Residents do/do not participate during first year)
- Call schedule (by year)
- Most taxing schedule and frequency per year
- Beeper or home call (weeks/year)

Educational environment

Educational setting

- Average hours/week of regularly scheduled lectures/conferences
- Training at hospital outpatient clinics
- Training in ambulatory non-hospital community-based settings, eg, physician offices, community clinics

Educational benefits

- Debt management/financial counseling
- Formal program to develop teaching skills
- Formal mentoring program
- Continuous quality improvement training
- International experience
- Resident/fellow retreats
- Off-campus electives
- Hospice/home care experience
- Cultural competence awareness
- Instruction in medical Spanish or other non-English language
- Alternative/complementary medicine curriculum
- Training in identifying and reporting of domestic violence/abuse
- MPH/MBA training
- PhD training
- Research rotation

Educational features

- Offers additional training or educational experience beyond accredited length
- Residents supervise medical students
- Offers a primary care track, rural track, women's health track, hospitalist track, research track/nonaccredited fellowship, and/or another special track

Evaluation

- Yearly specialty in-service examination required (Advancement based/is not based on exam results)
- Approximate program completion rate
Program uses the following to evaluate program quality
- Program graduation rates
- Board certification rates
- In-training examinations
- Performance-based assessments

**Employment policies and benefits**
- Part-time/shared positions
- PDAs available
- On-site child care; subsidized child care
- Allowance/stipend for professional expenses
- Leave for educational meetings/conferences
- Moving allowance
- Housing stipend
- On-call meal allowance
- Parking
- Job placement assistance
- Cross coverage in case of illness/disability

**Compensation and leave (by year)**
- Salary compensation
- Vacation weeks
- Sick days

**Leave availability**
- Maternity/paternity leave for birth
- Maternity/paternity leave for adoption
- Family leave
- Medical leave

**Major medical benefits**
- Major medical insurance for residents and dependents
- Outpatient/inpatient mental health insurance
- Group life insurance
- Dental Insurance
- Disability insurance
- Disability insurance for occupationally acquired HIV

**Pricing for Expanded Detailed Listing in FREIDA**
- $90 Subspecialty program
- $160 Specialty program

*Note:* As an added bonus for those programs that choose an expanded listing in FREIDA Online, the CD-ROM includes a link to those programs' FREIDA Online listing, under "Other Information."

**Program information**
- Program name
- Program setting
- Accredited length (years)
- Years required
- Program size
- Graduate Year I (GY1) positions
- Requires prior GME (years)

**Work schedule**
- Average hours/week duty
- Maximum hours consecutive duty
- Most taxing call schedule
- Duration
- Moonlighting allowed
- Employment policies/benefits
- Salary, program year one
- On-site child care
- Part-time/shared positions
- Multiple start dates

**Educational curriculum**
- Continuous quality improvement
- International experience
- Resident/fellow retreats
- Off-campus electives
- Hospice/home care experience
- Cultural competence awareness
- Non-English language instruction
- Alternative/complementary medicine
- Research rotation/duration

**Additional training**
- MPH/MBA training
- PhD training
- Offers additional training
- Requires additional training
- Additional training length

**Other information**
- FREIDA listing
- Plastic surgery integrated model
- Preventive medicine specialty area
- Military
- Subspeciality code(s)
- Sponsoring specialty

**Contact information**
- Sponsoring institution
- Major participating institution(s)
- Program director and program codirector
- Address
- Phone/fax/e-mail

---

**GME Library on CD-ROM**

The *Graduate Medical Education Library on CD-ROM* combines all information from the text version of the *Directory* with advanced search functions to help users find the program or institution they're seeking. Its Web browser interface—no installation required—allows for quick, easy access to all program and institution data and many clickable links, including hyperlinks to program Web sites.

The CD-ROM also includes archive copies of each year's *Directory* since 1996-1997. The CD's XML capabilities allow for quick data sorts and program comparison by a large number of data variables, including the majority of those listed below. These data are derived from the National GME Census, as are the data for FREIDA Online.

*Note:* As an added bonus for those programs that choose an expanded listing in FREIDA Online, the CD-ROM includes a link to those programs' FREIDA Online listing, under "Other Information."

**Information**

Information

The CD-ROM is $105 list price or $80 for AMA members, plus shipping/handling and state tax, if applicable. To place an order, contact: AMA Order Department PO Box 930876 Atlanta, GA 31193-0876 800 621-8385 312 464-5600 Fax www.amabookstore.com

Careers in Medicine

Careers in Medicine is a comprehensive, four-phase career planning and development program sponsored by the Association of American Medical Colleges (AAMC). Designed to equip medical students with the skills and information needed to make informed career decisions, it focuses on helping students understand their medical career options, select their specialty, and apply to a residency program that fits their career goals. The program is offered in conjunction with medical school staff, and can also be accessed via the Internet at www.aamc.org/careersinmedicine.

As students work through the program they engage in a process of self-assessment, career exploration, decision-making, and career planning. They can assess their career goals and aspirations online and access their results at any time through their personal Personal Profile. Of special interest to students exploring specialty options are the Careers in Medicine specialty pages, which provide comprehensive information for 112 specialty and subspecialty areas, including nature of the work, personal characteristics, residency/fellowship training requirements, Match results, workforce statistics, physician compensation, and links to over 1,000 specialty associations, journals, and newsletters.

Careers in Medicine offers guidance and interactive decision-making tools for making these important career decisions. Students can cycle through the program several times during medical school as they develop increasingly more refined views of their preferred career paths. The program is currently available to all AAMC-member US and Canadian medical schools. It is also available to medical students in osteopathic medical schools that have completed licensing agreements with the AAMC. Staffs in medical schools offer workshops using the Careers in Medicine model throughout all 4 years of medical school.

To obtain information about the program and to find out more about accessing the password-protected Web site, students should contact their Careers in Medicine Liaison, or the student affairs dean, in their medical school. Residents should contact the Careers in Medicine Office at careersinmedicine@aamc.org.

Choosing a Medical Specialty

At the 1994 Interim Meeting, the AMA Medical Student Section (AMA-MSS) Assembly adopted a resolution asking the AMA-MSS to develop a bibliography of sources for information on the medical and surgical specialties for medical students preparing to enter the residency selection process. The first edition of Choosing a Medical Specialty was a print publication detailing primarily print resources available to students. The online edition of the guide reflects the increased availability and use of electronic resources for exchanging information.

ERAS

ERAS®—the Electronic Residency Application Service, provided by the AAMC—has been working together with applicants, medical schools, and training programs to streamline the application process for more than 10 years. Using the ERAS service, applicants to residency and fellowship programs transmit applications and supporting documents to training programs over the Internet. Each year, the ERAS system transmits more than 20 million documents, bypassing the laborious paper process and the US Postal Service.

Specialties using ERAS 2007 (residency positions begin July 2007) include:

- Anesthesiology (most positions begin July 2008)
- Dermatology (most positions begin July 2008)
- Diagnostic Radiology (positions begin July 2008)
- Emergency Medicine
- Family Medicine
- Family Medicine/Physical Medicine and Rehabilitation combined programs
- Internal Medicine (preliminary and categorical)
- Internal Medicine/Dermatology combined programs
- Internal Medicine/Emergency Medicine combined programs
- Internal Medicine/Family Medicine combined programs
- Internal Medicine/Pediatrics combined programs
- Internal Medicine/Physical Medicine and Rehabilitation combined programs
- Internal Medicine/Psychiatry combined programs
- Neurology
- Nuclear Medicine
- Obstetrics/Gynecology
- Orthopaedic Surgery
- Otolaryngology
- Pathology
- Pediatrics
- Pediatrics/Emergency Medicine combined programs
- Pediatrics/Physical Medicine and Rehabilitation combined programs
- Pediatrics/Psychiatry/Child Psychiatry Triple Board programs
- Physical Medicine and Rehabilitation (most positions begin July 2008)
- Plastic Surgery Integrated Programs offering PGY1 positions
- Psychiatry
- Radiation Oncology
- Surgery (General)
- Transitional Year
- Urology
- All US Army/Navy programs offering PGY1 positions

Having successfully implemented ERAS in residency specialties, the service focused its attention on offering fellowship applicants and programs the same benefits available to residency participants. ERAS Fellowships, introduced in 2003, offers two cycles for fellowship applications. The July cycle has fellowship programs receiving applications in July for positions that commence 12 months later. The December cycle has programs receiving applications in December for positions that begin 18 months later. Fellowship specialties using ERAS 2007 include:

July Start Specialties (Apply July 2006; Positions begin July 2007)
- Colon and Rectal Surgery
Graduate Medical Education Information

- Geriatric Medicine (Family Practice and Internal Medicine)*
- Pediatric Emergency Medicine (Emergency Medicine and Pediatrics)

**December Start Specialties (Apply December 2006; Positions begin July 2008)**
- Asthma, Allergy and Immunology*
- Cardiovascular Disease
- Endocrinology, Diabetes and Metabolism
- Gastroenterology*
- Gynecologic Oncology*
- Hematology and Oncology
- Infectious Diseases
- Nephrology
- Pediatric Hematology-Oncology*
- Pediatric Nephrology
- Pediatric Rheumatology*
- Pediatric Surgery
- Pulmonary Disease and Critical Care Medicine
- Rheumatology
- Thoracic Surgery
- Vascular Surgery

* Specialties debuting in ERAS 2007

Residency students and graduates of US medical schools should contact the student affairs office at their medical schools for information about ERAS. Students and graduates of foreign medical schools should contact the Educational Commission for Foreign Medical Graduates (ECFMG). All fellowship applicants, including US and international graduates, should contact the ERAS Fellowships Document Office (EFDO). General information about ERAS, including EFDO contact information and participating programs, is available at www.aamc.org/eras.

**National Resident Matching Program**

The National Resident Matching Program (NRMP) has been matching the preferences of applicants and programs for residency positions since 1952. The program was created to provide both applicants and residency program directors a fair opportunity to consider their options for appointment, to make reasoned decisions, and to have their decisions announced at a specified time. Participants in the NRMP agree to honor the commitment to offer or to accept an appointment if a match results.

In 2005, in addition to 15,308 US medical students, another 16,564 “independent” applicants competed for 21,454 graduate year one (GY1) positions and 2,558 graduate year two positions offered in the NRMP. Independent applicants include US physicians and eligible students/graduates of osteopathic, Canadian, and foreign medical schools, and Fifth Pathway programs. The numbers of US medical students, independent applicants, and programs participating in the 2006 match increased slightly from the previous year.

Since July 2001, all NRMP services have been Web-based. Participants register for the Match, pay their registration fees, submit rank order lists, and receive match results via the NRMP Web site at www.nrmp.org.

The NRMP is not a centralized application service. Applicants apply through ERAS or directly to residency programs, and the programs administer their own selection process, including requests for interviews. Programs that participate in the NRMP require applicants to register with the NRMP. In January and February, after interviewing has been completed, applicants and programs submit to the NRMP rank order lists indicating their choices in order of preference via the Web. The system is in real time with up-to-the-minute information on applicants and programs participating in the match.

Both applicants and programs must agree that neither will ask the other to make a commitment before the Match Day, although a high level of interest may be expressed. Verbal or written contracts prior to Match Day should not be expected or made and are violations of the NRMP Match Participation Agreement signed by all participants. The final preferences of program directors and applicants as reflected on the submitted rank order lists will determine the offering of positions and the placement of applicants.

Through the NRMP process, each applicant and program submits a list of preferences in rank order. The Match algorithm places an applicant into a program he or she prefers that 1) has ranked the applicant and 2) has not been matched with another applicant who also prefers the program and is ranked higher on the program's list. Traditionally, Match results are announced in mid-March and are available on the NRMP Web site to participants. Applicants who fail to obtain a position and programs that do not fill all their offered positions are informed 2 days before the general announcement so that they may contact one another to secure appointments. The majority of appointments to residency programs begin on or about July 1.

**Positions Offered Through the NRMP**

The positions offered by programs participating in the NRMP are typically those sought by US medical school seniors; that is, positions that provide the first year of graduate medical education. In addition, specialties that start their training at graduate year two offer positions in the NRMP, so that applicants may link their first and second years of training on their rank order lists.

- Categorical positions are offered by programs that expect applicants who enter in graduate year one to continue until completion of training required for specialty certification, provided their performance is satisfactory (normally 3 to 4 years).
- Preliminary positions provide 1 or 2 years of prerequisite training for entry into advanced programs that require 1 or more years of clinical training. Internal medicine, surgery, and transitional year programs commonly offer preliminary positions.
- Advanced positions at graduate year two, which do not commence until a year after the Match, are in specialty programs that require completion of 1 or more years of preliminary training. Applicants without prior graduate medical education may apply for these positions while also applying for preliminary positions that are compatible with the program's plans.
- Resident positions at graduate year two, which begin in July of the NRMP year, are reserved for physicians who have had prior graduate medical education. These positions are not available to senior US medical students.

**Couples and Shared Residency Positions**

Applicants who are members of a couple may link their program choices together. In creating pairs of program choices, couples can mix specialties, program types, and geographic locations.

Some programs offer shared residency positions. In a shared residency, two residents share one position, usually alternating months on clinical rotations, with time off to devote to family, research, or other interests. Obtaining a shared residency position through the NRMP requires that two applicants who have enrolled separately in the NRMP become partners to be matched together in a single position.

**Specialties Matching Service**

In addition to conducting the match for graduate year one and graduate year two residency positions, the NRMP conducts matches...
Transitioning to Residency: What Medical Students Need to Know

The AMA's Minority Affairs Consortium (MAC) has developed this online resource for medical students transitioning into residency training programs. The information is meant to provide an overview of the planning, application, and selection process from the personal viewpoints of MAC members who have successfully gone through the process themselves.

Sections include the following:
- Getting Ready: Medical School Years 1-3
- The Residency Application: Information & Procedures
- The Application Process: A Timetable for Success
- Writing Your Personal Statement
- Selecting Your Residency Programs
- The Residency Interview: Making the Most of It
- Not Matched—The Decision to Reapply
- Making the Most of Your Residency
- Residency Programs: An Inside Look
- General Residency Questions

www.ama-assn.org/ama/pub/category/6672.html

The Residency Interview: A Guide for Medical Students

This online resource guide, available to AMA members, is published by the AMA Women Physicians Congress (AMA WPC), a special interest group comprised of physicians and medical students who are advocates for women's health issues and women in medicine professional and life balancing issues.

This resource addresses the following topics:
- Handling gender-based questions
- Couples Match
- Shared and part-time residencies
- Preparing for your interview
- Interview questions to ask
- Common and uncommon questions that will be asked of you
- What to bring with you

Both men and women medical students report anxiety and confusion when faced with interviews for residency placement. Women medical students reported that they had difficulty with their residency training interviews when asked questions dealing with gender. Some women reported that they were never asked gender-based questions, but many more reported being asked questions about their marriages and plans for childbearing. Men and women respondents alike said they were often asked questions which they found to be vague or provocative.

The interview process is stressful for all medical students, and medical schools seldom coach their students in how to approach residency placement. In publishing this guide, the AMA WPC Governing Council felt that it would meet the needs of all medical students and would include a special section for women on gender-based questions.

This guide is not intended to help students pick a specialty or how to interview specifically in the different specialties, nor does it suggest how to plan electives. Rather, it is an overview of the interviewing process, intended as a guide to start students' thinking about what they will encounter.
B. GME Information for IMGs

Entry of Foreign-Born Medical Graduates to the United States

[Note: The following information is provided by Catheryn Cotten, Director, and Ed Ashworth, Associate Director, Duke University and Medical Center International Office.]

The entry of foreign-born graduates of non-US medical schools to the United States is governed by the US Immigration and Nationality Act (INA), as amended, which is administered by US Citizenship and Immigration Services (CIS) of the US Department of Homeland Security, by the Department of State, and by other departments and agencies specified in the Act. It is a violation of federal law to provide employment to a non-US citizen who does not hold a visa permitting employment or other appropriate work authorization documents from the CIS. Thus, residency program directors considering foreign-born international medical graduates (IMGs) should appoint only those whose visa classification or status in the United States permits or will permit employment and participation in a training program. The most common of these are exchange visitor (J-1), temporary worker (H-1B), lawful permanent resident (LPR)—also called immigrant visa or “green card”—or a CIS-issued or CIS-approved work permit. These foreign-born IMGs must also hold the Standard Certificate of the Educational Commission for Foreign Medical Graduates.

[Note: The following information is provided by the Educational Commission for Foreign Medical Graduates.]

The Educational Commission for Foreign Medical Graduates (ECFMG®), through its program of certification, assesses the readiness of IMGs to enter US residency or fellowship programs that are accredited by the Accreditation Council for Graduate Medical Education (ACGME). The ECFMG and its organizational members define an IMG as a physician whose basic medical degree or qualification was conferred by a medical school located outside the United States and Canada. To be eligible for ECFMG Certification, the physician’s medical school and graduation year must be listed in the International Medical Education Directory of the Foundation for Advancement of International Medical Education and Research (FAIMER®). US citizens who have completed their medical education in schools outside the United States and Canada are considered IMGs, while foreign nationals who have graduated from medical schools in the United States and Canada are not. Although not considered IMGs for the purpose of ECFMG Certification, foreign nationals who have graduated from medical schools in the United States and Canada are required to obtain a visa that allows for participation in clinical programs of GME.

ECFMG Certification

ECFMG Certification provides assurance to ACGME-accredited residency and fellowship program directors and to the people of the United States that IMGs have met minimum standards of eligibility required to enter such programs. ECFMG Certification is one of the eligibility requirements to take Step 3 of the United States Medical Licensing Examination (USMLE), and is required to obtain an unrestricted license to practice medicine in the United States. To be certified by ECFMG, applicants must meet medical education credential requirements and examination requirements.
Medical Education Credential Requirements

To meet the medical education credential requirements for ECFMG Certification, applicants must:

1. Have had at least 4 credit years (academic years for which credit has been given toward completion of the medical curriculum) in attendance at a medical school that is listed in the FAIMER International Medical Education Directory (IMED). The physician's graduation year must be included in the medical school's IMED listing. (The FAIMER IMED contains information supplied by countries about their medical schools. FAIMER is not an accrediting agency.)

2. Provide the required medical education credentials, which include the final medical diploma and final medical school transcript. Applicants must document the completion of all requirements for, and receipt of, the final medical diploma. ECFMG verifies every applicant's medical diploma with the appropriate officials of the medical school that issued the diploma. When ECFMG sends the medical diploma to the medical school for verification, ECFMG requests that the medical school include the applicant's final medical school transcript when the school returns the verification of the medical diploma to ECFMG. ECFMG medical education credential requirements are not fulfilled until verification of the medical diploma and the final medical school transcript is received directly from the medical school and accepted by ECFMG.

Examination Requirements

The examination requirements for ECFMG Certification include passing Step 1 and Step 2 of the USMLE. The Step 2 exam has two components, the clinical knowledge (CK) component and the clinical skills (CS) component.

To meet the examination requirements for ECFMG Certification, applicants must:

1. Satisfy the medical science examination requirement. Step 1 and Step 2 CK of the USMLE are the exams currently administered that satisfy this requirement. To meet the medical science examination requirement for ECFMG Certification, applicants must pass both Step 1 and Step 2 CK within a specified period of time. See Time Limit for Completing Examination Requirements, below.

   Former Examinations Accepted for ECFMG Certification: The ECFMG also accepts a passing performance on the following former medical science examinations for the purpose of ECFMG Certification: ECFMG Examination, Visa Qualifying Examination (VQE), Foreign Medical Graduate Examination in the Medical Sciences (FMGEMS), and Part I and Part II Examinations of the National Board of Medical Examiners (NBME). Additionally, the ECFMG accepts, for the purpose of certification, a score of 75 or higher on each of the 3 days of a single administration of the former Federation Licensing Examination (FLEX), if taken prior to June 1985.

   Certain combinations of examinations are also acceptable. Applicants who have passed only part of the former VQE, FMGEMS, or the NBME Part I or Part II may combine a passing performance on the basic medical science component of one of these examinations or USMLE Step 1 with a passing performance on the clinical science component of one of the other examinations or USMLE Step 2 CK, provided that the components are passed within the period specified for the examination program. While these examination combinations are accepted by the ECFMG for its certification, applicants should be aware that after December 31, 1989, use of portions of FLEX or portions of the Part examination sequence of the NBME to fulfill the eligibility requirements for USMLE Step 3 is no longer accepted. Additionally, although the ECFMG Examination and FLEX, if taken prior to June 1985, satisfy the medical science examination requirement for ECFMG Certification, they have not been recognized by the US Secretary of Health and Human Services as meeting the medical science examination requirement to obtain a visa to enter the United States (see below).

2. Satisfy the clinical skills requirement. This requirement includes demonstration of data-gathering and communication (including spoken English) skills.

   Step 2 CS of the USMLE is the exam currently administered that satisfies the clinical skills requirement for ECFMG Certification. Specific time limits for passing Step 2 CS for ECFMG Certification may apply. See "Time Limit for Completing Examination Requirements," below.

   Former Examinations Accepted for ECFMG Certification: Applicants who have both passed the former ECFMG Clinical Skills Assessment (CSA®) and achieved a score acceptable to ECFMG on an English language proficiency test (such as the Test of English as a Foreign Language (TOEFL) exam or the former ECFMG English Test) can use these passing performances to satisfy the clinical skills requirement.

Time Limit for Completing Examination Requirements

[Note: These policies apply only to ECFMG Certification. The USMLE program has made specific recommendations to state medical licensing authorities regarding the time to complete all three Steps and the number of attempts allowed to pass each Step or Step Component. If you are taking the Steps for the purpose of licensure, refer to Time Limit and Number of Attempts Allowed to Complete All Steps, Retakes, Official Performance of Record for Examinees Retaking a Previously Passed Step, and Formerly Administered Examinations in the USMLE Bulletin of Information for more information. Applicants should also contact the medical licensing authority of the jurisdiction where they plan to apply for licensure or the Federation of State Medical Boards, since licensure requirements vary among jurisdictions.]

ECFMG policy requires that applicants pass those USMLE Steps or Step Components required for ECFMG Certification within a 7-year period. Once an applicant passes a Step or Step Component, the applicant will have 7 years to pass the other Step(s) or Step Component(s) required for ECFMG Certification. If an applicant does not pass all required Steps and Step Components within a maximum of 7 years, the applicant's earliest USMLE passing performance will no longer be valid for ECFMG Certification.

Before implementation of Step 2 CS on June 14, 2004, applicants were required to pass Step 1 and Step 2 CK within a 7-year period for ECFMG Certification. Effective June 14, 2004, applicants must pass Step 1, Step 2 CK, and Step 2 CS within a 7-year period for ECFMG Certification; this new 7-year requirement applies to applicants whose earliest USMLE passing performance that is valid for ECFMG Certification took place on or after June 14, 2004, as described below.

Earliest USMLE Passing Performance Before June 14, 2004

If an applicant's earliest USMLE passing performance that is valid for ECFMG Certification took place before June 14, 2004, the applicant is required to pass only Step 1 and Step 2 CK within a 7-year period for ECFMG Certification. (If the applicant is required to pass Step 2 CS to satisfy the clinical skills requirement for ECFMG Certification, the applicant will not be required to pass Step 2 CS during the 7-year period in which the applicant must pass Step 1 and Step 2 CK.)
Earliest USMLE Passing Performance on or After June 14, 2004

If an applicant's earliest USMLE passing performance that is valid for ECFMG Certification took place on or after June 14, 2004, the applicant is required to pass Step 1, Step 2 CK, and Step 2 CS within a 7-year period for ECFMG Certification.

Standard ECFMG Certificate

The Standard ECFMG Certificate is issued to applicants who fulfill the medical education credential requirements, meet the examination requirements, and clear their financial accounts with the ECFMG. The Standard ECFMG Certificate may be used for entry into accredited GME programs in the United States.

Validity of Examinations for Entry Into Graduate Medical Education

[Note: The following discussion of validity and expiration of examinations, and the “valid through” and “valid indefinitely” designations on the Standard ECFMG Certificate (if applicable), are relevant only for the purpose of entry into US GME programs. They do not pertain to eligibility for USMLE Step 3 or to any time limits imposed by medical licensing authorities or other entities for the completion of all USMLE Steps.]

Clinical Skills Examinations: For applicants who satisfy the clinical skills requirement for ECFMG Certification by passing Step 2 CS, this passing performance is not subject to expiration for the purpose of entering GME programs.

For applicants who satisfied the clinical skills requirement for ECFMG Certification by passing the former ECFMG CSA and an English language proficiency test, passing performance on the CSA may be subject to expiration for the purpose of entering GME programs, as described below.

Passing performances on CSA administrations that took place before June 14, 2001, are valid for 8 years from the date passed for the purpose of entering GME programs. The date through which passing performance on the CSA remains valid for entry into GME (the CSA “valid through” date) will be listed on the applicant’s Standard ECFMG Certificate. If the applicant has entered a program before expiration of the valid through date, the applicant may request permanent validation. This means that the CSA date is no longer subject to expiration. To request permanent validation, the applicant and an authorized official of the training institution must complete a Request for Permanent Validation (Form 246). On receipt of such official documentation, ECFMG will provide a “valid indefinitely” sticker to be affixed to the certificate. If an applicant who passed CSA before June 14, 2001, does not enter a GME program within 8 years of the CSA pass date, the applicant’s CSA passing performance will expire for the purpose of entering GME.

Before entering a program, these applicants must pass Step 2 CS. Passing performance on Step 2 CS does not expire for the purpose of entry into GME.

Passing performances on CSA administrations that took place on or after June 14, 2001, are not subject to expiration for the purpose of entering GME programs.

English Examinations: Passing performances on the English language proficiency test, regardless of the date passed, are not subject to expiration for the purpose of entering GME programs.

Visas That Permit Graduate Medical Education or Training

[Note: The following information is provided by Catheryn Cotten, Director, and Ed Ashworth, Assistant Director, Duke University and Medical Center International Office.]

Three primary factors control whether IMGs may engage in clinical training in the United States:

1. Educational preparation. The physician must meet the usual education, examination, and certification requirements described in the ACGME’s Essentials of Accredited Residencies in Graduate Medical Education for admission to a GME program.

2. State law requirements. The physician must meet state licensure requirements for the intended training in the intended venue.

3. Federal employment laws and regulations. The physician must hold visa documentation that meets federal requirements not only for employment in general but that also permits employment as a physician trainee.

In all cases of clinical training, the physician must meet the educational and licensure requirements (items 1 and 2). This section discusses the variations possible to meet the federal employment requirements (item 3).

The J-1 Exchange Visitor Program and ECFMG Sponsorship

The J-1 is a common visa class used by foreign national physicians who enter the United States to pursue programs of graduate medical education (GME) or training. The J-1 Exchange Visitor Program is administered by the US Department of State-Exchange Visitor Program (DOS-EVP) in accordance with the Code of Federal Regulations, 22 CFR Part 62. The objectives of the Exchange Visitor Program are to enhance international exchange and to promote mutual understanding between the people of the United States and other nations through the interchange of persons, knowledge, and skills. The DOS-EVP designates various US educational institutions and training organizations to serve as J-1 exchange visitor program sponsors. Each J-1 designation is designed for a specific educational purpose and may include authorization to sponsor foreign nationals in categories such as "professor," "research scholar," "short-term scholar," "student," or "alien physician."

The DOS-EVP has designated ECFMG as the only organization authorized to sponsor foreign national physicians in J-1 status in the "alien physician" category. Physicians who enter the United States in J-1 status to participate in clinical programs of graduate medical education or training must do so in the "alien physician" category under ECFMG sponsorship. According to federal regulations, a program of graduate medical education or training may include a medical specialty, a directly related medical subspecialty, or both [INA 101(a)(15)(j), INA 212(g), 22 CFR 62.27].

Foreign national physicians seeking ECFMG sponsorship as J-1 exchange visitors for enrollment in programs of graduate medical education or training in the United States must meet, among other requirements, a number of general requirements, which are detailed in the ECFMG’s application materials for J-1 visa sponsorship. At a minimum, applicants must:

- Have passed USMLE Step 1 and Step 2 CK (and/or an acceptable combination of the former FMGE, NBME, or VQE examinations)
- Hold a Standard ECFMG Certificate with expired examination dates, if applicable. [Note: See Validity of Examinations for Entry into Graduate Medical Education, above, for important information.]
- Hold a contract or an official letter of offer for a position in a program of graduate medical education or training that is affiliated with a medical school.
• Provide a Statement of Need from the Ministry of Health of the country of most recent legal permanent residence (LPR), regardless of country of citizenship. This statement provides written assurance that the country needs physicians trained in the proposed specialty and/or subspecialty. It also serves to confirm the applicant physician’s commitment to return to that country upon completion of training in the United States, as required by §212(e) of the Immigration and Nationality Act, as amended.

ECFMG facilitates the visa sponsorship of physicians through the coordinated efforts of training institutions and the foreign national physicians. The host institution is responsible to provide the J-1 physician with the approved clinical training. Each host institution designates an individual to serve as the Training Program Liaison (TPL). The TPL cooperates with ECFMG by providing administrative oversight and ensuring regulatory compliance. Communication regarding all aspects of ECFMG sponsorship must be channeled through the TPL.

The US Government requires that all J program sponsors, including ECFMG, process visa sponsorship for J-1 exchange visitors and J-2 dependents through the Student and Exchange Visitor Information System (SEVIS). SEVIS is a national, Web-based monitoring system designed to assist educational institutions and government agencies in managing student and exchange visitor data. As the designated visa sponsor for J-1 physicians, ECFMG is required to interface directly with SEVIS. Host institutions/TPLs must communicate with ECFMG regarding arrival and any change in program activity for the ECFMG-sponsored physicians. GME programs do not have access to SEVIS.

Upon establishing an applicant’s eligibility, ECFMG creates or updates the SEVIS record and issues Form DS-2019, Certificate of Eligibility for Exchange Visitor (J-1) Status. Issuance of Form DS-2019 indicates that the physician is eligible to apply for the J-1 visa. The DS-2019 is one of many factors considered by the US Government in determining visa eligibility. Policies and procedures vary and are subject to change. J-1 physicians are responsible to comply with all US laws and regulations pertaining to foreign nationals.

The Form DS-2019 reflects an approved contract and application in a specific training program. It is not transferable for participation in any other activity, program, or institution. J-1 sponsorship requires full time participation and progression in an approved training program. J-1 sponsorship is dependent on a valid GME contract, which is generally renewed on an annual basis.

Federal Regulations That Govern Exchange Visitor Physicians and Their Activities

Physicians who obtain J-1 status for the purpose of graduate medical education or training are obligated to comply with associated regulations. Following is a review of specific federal regulations governing the J-1 “alien physician” category. See 22 CFR 62.27 for complete regulations.

Duration of Participation

The duration of participation for exchange visitors in GME is the “time typically required” to complete the program. This generally refers to the minimum number of training years required by an ABMS member board for specialty or subspecialty certification and/or the accredited length of training as defined by the ACGME. Duration is further limited to 7 years, provided that the J-1 physician is advancing in an approved program of graduate medical education or training. The J-1 visa, however, does not entitle J-1 physicians to 7 years of sponsorship. J-1 physicians are encouraged to consult with ECFMG regarding proposed educational pathways and sponsorship eligibility; GME programs should also contact the ECFMG directly to determine whether a particular training period can be sponsored completely in J-1 status. The director of the DOS-EVP may consider an extension beyond 7 years based on a documented exceptional need in an exchange visitor’s home country.

Two-Year Home Country Physical Presence Requirement

In accordance with Section 212(e) of the Immigration and Nationality Act, as amended, all J-1 exchange visitors who are sponsored by ECFMG for the purpose of graduate medical education or training (and all accompanying J-2 dependents) are automatically obligated to return to their country of last legal permanent residence for an aggregate of at least 2 years. At the initiation of J-1 sponsorship, the J-1 applicant declares his country of last legal permanent residence and submits the corresponding Statement of Need, thereby committing himself to return to that country. The 212(e) obligation may not be fulfilled in a different country. An individual must fulfill (or obtain a waiver of) this obligation before being eligible for a change or adjustment of visa status to certain types of US visas. These visa types include H, temporary worker; L, intra-company transferee; and US permanent resident.

Change of J-1 Category

Each J-1 category defines the foreign national’s educational objective in coming to the US. The categories most often used by foreign nationals are “research scholar,” “professor,” “short-term scholar,” “student,” and “alien physician.” Exchange Visitors may not, as a matter of course, change from one J-1 category to another. In rare cases, ECFMG petitions the DOS to request a change of J category. The regulations limit consideration to cases that clearly demonstrate that the proposed change in category is consistent with and closely related to the participant’s original exchange objective and necessary due to unusual or exceptional circumstances. [22CFR§62.41(a)]

Training Authorization/Employment

Federal regulations prohibit work, training, and/or financial compensation for activities that are outside of the approved exchange visitor program. In accredited programs of graduate medical education, the program curriculum is established by the ACGME. The J-1 physician “... who engages in unauthorized employment shall be deemed to be in violation of his or her program status and is subject to termination as a participant in an exchange visitor program” (22CFR 62.16). Furthermore, US employers who hire unauthorized foreign nationals are subject to penalties.

Change of Specialty

The Regulations state that “...the alien physician may once, and not later than 2 years after the date the alien physician enters the US as an Exchange Visitor (or acquires exchange visitor status), change his/her designated program of graduate medical education or training...” [22CFR 62.27(7)]. Once an Exchange Visitor enters the third year of sponsorship, a change of specialty is no longer permitted.

The Exchange Visitor Sponsorship Program is administered by ECFMG in accordance with the provisions set forth in a Memorandum of Understanding between ECFMG and the DOS-EVP and the federal regulations established to implement the Mutual Educational and Cultural Exchange Act. ECFMG is responsible to ensure that J-1 physicians and host institutions meet the federal requirements for participation. For additional information about the Exchange Visitor Sponsorship Program, contact:

Sponsorship applications, instructions, and up-to-date information on the Exchange Visitor Sponsorship Program are available on the Internet at www.ecfmg.org.

Nonclinical Observation, Consultation, Teaching, and Research

Foreign national physicians who wish to enter the United States for research and nonclinical training may do so in programs involving observation, consultation, teaching, or research with or without patient contact incidental to one or more of these activities. The ECFMG holds authorization to sponsor foreign national physicians for this purpose under the J-1 "research scholar" category. Foreign national physicians applying for ECFMG sponsorship as J-1 research scholars must meet the following general requirements:

- **Medical Education.** Must be a graduate of a US, Canadian, or foreign medical school.
- **Contract.** Must hold a contract or official letter of offer for a position in a training institution affiliated with a US medical school.
- **No Patient Care.** Must obtain the appropriate certification statement confirming no patient care responsibilities (22 CFR 62.27(c))
- **Limited Prior J Status.** Must not have been physically present in the United States in J-1 or J-2 nonimmigrant status for more than 6 months during the 12-month period immediately preceding the contracted program start date (22 CFR 62.20(d)).

The DOS-EVP also authorizes universities and other health science institutions to sponsor foreign national physicians for these purposes in the categories of "professor," "research scholar," and "short-term scholar," provided they will engage in activities that involve "no patient care" or only "incidental patient contact" as defined in the regulations. The "incidental patient contact" option allows physicians to be in clinical areas, but in no way permits clinical training or patient care. Physicians applying for sponsorship by a university or other similar institution should contact that program directly for specific requirements and procedures.

Exchange visitors in programs involving observation, consultation, teaching, or research may remain in the United States for a maximum of 3 years with a possible 6-month extension under certain circumstances. Although it has the authority to do so, the DOS-EVP rarely grants extensions beyond 3½ years.

Temporary Worker H-1B

The H-1B visa is for temporary workers in specialty occupations who hold professional-level degrees (bachelor's degree minimum) appropriate to the employment in which they will be engaged. Between 1976 and 1991, graduates of foreign medical schools were not permitted to use the H-1B for residencies, except in cases where individuals were of national or international renown. The Immigration Act of 1990, and subsequent technical amendments, made the H-1B available to graduates of foreign medical schools who have passed FLEX or the equivalent, have passed an English language exam, and hold a license appropriate to the activity. The Secretary of the Department of Health and Human Services (HHS) has determined that USMLE Steps 1, 2, and 3 or the former NBME Parts I, II, and III are equivalent to FLEX for this purpose. The HHS regulation does not permit combinations of the USMLE and NBME for H-1B purposes; only the full series of one type of exam meets the H-1B requirement. For example, a physician who has passed Part I of the NBME and Steps 2 and 3 of the USMLE has not met the exam requirements for the H-1B because the types of exams differ. Individual states determine the level of licensure required for each level of clinical activity. For example, many states offer a limited or training license for residency training, and that limited or training license meets the licensure requirement for the H-1B.

The federal FLEX or equivalent examination requirement, coupled with the requirement in most states that physicians complete a certain amount of US training prior to admission to the third or final portion of the licensure exam, creates a difficult examination hurdle and minimizes the number of physicians who can qualify for and use the H-1B visa for clinical training. Note, however, that state licensing authorities set their own rules for administration of Step 3 of the USMLE. Some states permit IMGs to sit for the exam prior to receiving US training, but withhold full licensure until the IMG has completed training. For the purpose of meeting the examination requirement for the H-1B, the IMG may sit for Step 3 in any state, not necessarily the state in which he/she intends to train. In short, a physician may sit for Step 3 in state "X" and use that exam to meet the H-1B requirement for training in state "Y."

Some individuals are fortunate enough that the J-1 visa is the only appropriate temporary visa for the purpose of graduate medical education and that programs should never use the H-1B. They cite the purpose of the J-1 (exchange visitor) classification, to provide foreign nationals with opportunities to participate in educational and cultural programs in the United States, as the basis for that belief. This is a matter of philosophy, not law. Any training program may, for its own reasons, elect to file or refrain from filing H-1B petitions for trainees. For their own reasons or at the request of the trainee, some GME programs will sponsor H-1B status, and others will not. The law subjects programs neither to prohibition nor obligation in this regard.

During the training years from July 1997 through June 2000, the annual statutory limit or "cap" on the number of H-1B approvals the US Government could issue each year made it difficult or impossible for trainees to get H-1B approval early enough to begin programs on time. Confronting this uncertainty and the disruption it caused in training and patient care, many GME programs that had previously offered the H-1B option changed their policies and declined to offer the H-1B. In October 2000, Congress passed an immigration law that exempts universities and their related and affiliated nonprofit institutions from the numerical limitations that affect business and for-profit entities. Many training programs, by virtue of this university affiliation, can now claim exemption from the numerical limits and may, therefore, use the H-1B again with the reliability and certainty experienced prior to the operation of the cap. Note that some programs operating independently may not qualify for exemption from the cap.

H-1B employment authorization is employer-specific. The GME program must file an H-1B petition on behalf of the IMG; the law does not permit prospective trainees to file H-1B petitions for themselves. Therefore, the GME programs control the use of the H-1B. An H-1B petition approval for a particular program may be used only for that program and is not transferable to another institution or program. Each new institution/employer must file a new petition. The total amount of continuous time permitted in H classification is 6 years. Extension beyond 6 years is permitted in certain special circumstances where documents for lawful permanent residence have been filed and have been pending for an extended period. Program directors should consult with their institutions' immigration experts or legal counsel before relying on or anticipating such an exceptional extension to begin or extend a training program. An absence from the United States of 1 year or more restarts the 6-year period.

The H-1B also requires that the IMG pass an English language exam. The English exam associated with obtaining ECFMG certification normally meets that requirement.

There are some exceptions and special circumstances regarding the examination requirements for the H-1B. Graduates of LCME-accredited US medical schools are exempt from the FLEX (or equivalent) and English language examination requirements. Graduates of LCME-accredited Canadian medical schools are exempt from the
English language exam, but not the FLEX (or equivalent) exam. Interestingly, full licensure in Canada based on Canadian examinations, which may be reciprocal for full licensure in a US state, is not equivalent to FLEX for H-1B purposes. The FLEX, or its equivalent (currently the USMLE Steps 1, 2, and 3), is still required even if these physicians hold full licensure in the state in which training will occur. Physicians of national or international renown are exempt from the special examination requirements for the H-1B, but must meet the usual examination and certification requirements described in the ACGME's Essentials of Accredited Residencies in Graduate Medical Education for admission to a GME program and must meet licensure requirements for the intended training. Certain physicians admitted to subspecialty or upper-level GME programs may have an established reputation at the specialty level and may qualify for the national or international renown exemption.

GME program directors may wish to consider the key elements that differentiate the H-1B from J-1 under ECFMG sponsorship for GME training purposes:

- The ECFMG J-1 was specifically designed to facilitate GME training. (Note: The ECFMG does not process J-1 applications but rather J-1 sponsorship applications. In addition, the ECFMG issues the DS-2019, not the J-1 visa.) The ECFMG reserves 6 weeks to process a completed J-1 sponsorship application. The H-1B was designed to permit temporary employment in a number of professional areas. A petition must be filed with and approved by CIS for a physician to obtain H-1B status. The Department of Labor and CIS can take 12-16 weeks or longer to process and approve an H-1B petition.
- The documentation for the J-1 requires that the physician pass the USMLE, Steps 1 and 2 (or an equivalent exam). The documentation for the H-1B requires that the physician pass the USMLE, Steps 1, 2, and 3 (or an equivalent exam). Certain exceptions exist for H-1B visa purposes for physicians of national or international renown.
- The J-1 has a maximum 7-year limit, provided the training is accredited or otherwise approved by DOS-EVP. The H-1B has a 6-year limit.
- The DOS-EVP limits and controls the type and duration of programs and activities that ECFMG is permitted to sponsor. Longer programs that contain a research component or those doing training in new or unique procedures and techniques may be outside the range of sponsorship for the J-1. The H-1B relates to the general activities of the physician, not to the length of training required by the board or whether the training is accredited. Therefore, the H-1B can be used for extended or specialized programs that DOS-EVP does not permit ECFMG to sponsor on the J-1.
- The J-1 is designed for exchange. Funding can come from a variety of sources in addition to or instead of the training stipend. Sources might include government funds, funds from the hospital or employer in the home country, foreign grants, or personal funds. The H-1B is an employment-based classification. The funding must come from the US employer in the form of salary compensation, and it must meet a minimum wage level under Department of Labor regulations.
- The J-1 subjects the physician to the 2-year home country physical presence requirement [INA 212(c) and 22 CFR 41.63]. The H-1B has no such requirement, thus making the H-1B an attractive alternative for those trainees who might be prospective faculty upon completion of training.
- The J-2 spouse or child of a J-1 can apply to CIS for work permission. The H-4 spouse or child of an H-1B is not permitted to work while in H-4 status.
Employment Authorization From US Citizenship and Immigration Services (CIS)

Immigration law empowers the CIS to grant employment authorization to certain nonimmigrants or intending immigrants. Such authorization is usually temporary and may have terms or conditions.

Frequently, academic institutions sponsor professors, teachers, researchers, and students in J-1 status. J-2 dependents, the spouse or children of a J-1 exchange visitor, may apply to the CIS for work authorization. CIS generally grants that permission, provided the J-2 does not need to work to support the principal J-1. When granted, J-2 work authorization permits general employment, including residency training. Program directors should take special note that this employment authorization depends absolutely upon the J-1 exchange visitor maintaining status. If the J-1 leaves the United States or fails to maintain status, the J-2 work authorization ends, even though the spouse or child may hold a J-2 employment authorization document that appears to be valid.

Other classifications or circumstances under which the CIS may grant work authorization include, but are not limited to, G-4 dependent of a foreign government employee in the United States, temporary protected status, voluntary departure, refugee, asylee, or certain lawful permanent resident applicants. Most employment authorization in these classifications permits general employment, including clinical training, but employers must evaluate the work authorization documents case by case.

In almost all cases the work authorization has a specific beginning and ending date, and work outside those dates is not permitted. The alien must apply for extension in a timely way to ensure continuous, unbroken work permission. If the current authorization expires and the CIS has not yet granted the extension authorization and issued the extension document, then the alien may have to stop work and wait for the extension approval. Unbroken continuation of work permission depends on the basis upon which CIS granted employment authorization initially and whether the alien files a timely application for extension. This characteristic of noncontinuity of the employment authorization can cause serious interruptions in training if the alien fails to file for extension in a timely way or if documents are lost or delayed in CIS processing.

Occasionally, the Secretary of Homeland Security issues a blanket declaration that employers may consider some expired employment authorization documents to be valid for a period of time beyond the expiration date on the face of the document. This happens most often with those persons who have been granted humanitarian safe haven in the United States for a limited period of time, through a number of different legal avenues. Prospective employers must evaluate these situations case-by-case.

Lawful Permanent Resident (Immigrant or "Green Card") Status

Persons who hold lawful permanent resident (LPR) or "green card" status are permitted to remain in the United States permanently and to accept any employment.

Foreign-born IMGs may immigrate to the United States based on a relationship to a US citizen or lawful permanent resident, or based on employment and skills. In general, the rules for immigration are the same for IMGs as for any other immigrant, but special rules apply to physicians who immigrate based on their intention and ability to practice the profession of medicine, including practice at the residency level. Employment-based immigration requires that the physician pass the NBME Parts I and II examinations or the equivalent, as determined by the Secretary of the US Department of Health and Human Services. These are the same examinations needed for ECFMG sponsorship for clinical training and are included among the examinations accepted for ECFMG certification described ear-lier. Certain examination exceptions apply to physicians who are of national or international renown.

Fifth Pathway Program

American Students in Foreign Medical Schools: The AMA's "Fifth Pathway" Statement

1. A pathway for entrance to approved GME programs, other than those existing under previous policies, became available as of July 1, 1971, for students who have fulfilled the following conditions:
   a. Have completed, in an accredited American college or university, undergraduate premedical work of the quality acceptable for matriculation in an accredited United States medical school, evaluated by measures such as college grade point average and scores on the Medical College Admission Test.
   b. Have studied medicine at a medical school located outside the United States, Puerto Rico, and Canada that is listed in the International Medical Education Directory, published by the Foundation for Advancement of International Medical Education and Research; see www.ecfmg.org for more information.
   c. Have completed all of the formal requirements for a diploma of the foreign medical school except internship and/or social service. Those who have completed all of the formal graduation requirements, including internship and/or social service, and are, consequently, eligible to apply for ECFMG certification, are not eligible for the Fifth Pathway.

2. Students who have completed the academic curriculum at a foreign medical school and who have fulfilled the above conditions may be offered the opportunity to substitute an academic year of supervised clinical training for the internship/social service required by the foreign medical school. The supervised training should consist of the clinical education provided in the third year of a US medical school or in appropriate clinical subinternships. The supervised clinical training must be provided by faculty of a program in medical education accredited by the Liaison Committee on Medical Education and should be conducted in its affiliated hospitals, so as to assure that individuals who complete Fifth Pathway programs are reasonably comparable to the school's regularly graduated students. The medical school should ensure that resources are adequate for the conduct of the Fifth Pathway program, without jeopardizing its other academic programs. Fifth Pathway education should be provided only with the written approval of the dean or other appropriate official of the medical school.

3. Students must pass Step 1 of the United States Medical Licensing Examination (USMLE) in order to be eligible for admission to a Fifth Pathway program.

4. Students must successfully complete clinical training, on the judgment of the medical school's faculty based on a final evaluation comparable to that used to judge regularly-enrolled students. With the approval of the faculty, and upon passing Step 2 of the USMLE, Fifth Pathway students are eligible to enter the first year of approved graduate medical education, without completing the social service and/or internship required by the foreign country and without obtaining ECFMG certification.

5. Fifth Pathway certificates must be provided only with the approval of the dean or other medical school official and must be recorded with the registrar. The medical school must notify the American Medical Association that a student has successfully completed the Fifth Pathway program.

6. The Council on Medical Education recommends that all state medical licensing boards consider for licensure all candidates who have successfully completed a Fifth Pathway program on the same basis as they consider candidates who have received ECFMG certification.

At present, Fifth Pathway graduates must pass Step 1 and Step 2 Clinical Knowledge (Step 2 CK) as well as Step 2 Clinical Skills (Step 2 CS) of the US Medical Licensing Examination for participation in the NRMP Matching Program.

Currently, the only medical school offering the Fifth Pathway in the contiguous United States is New York Medical College in Valhalla, New York. The AMA maintains a service agreement with New York Medical College, which has run a Fifth Pathway Program since 1974. For more information, call 914 594-4490. As of January 2003, a second Fifth Pathway Program was begun at Ponce Medical School in Puerto Rico. For more information, call 787 844-3710.

Fifth Pathway Web Site

The AMA has a Web site on the Fifth Pathway that answers many questions about the program, including:

- What is a Pathway?
- What is the Fifth Pathway?
- Who can qualify for a Fifth Pathway?
- How are Fifth Pathway students different from International Medical Graduates?
- How can I verify a physician's Fifth Pathway credentials?

The site is available at: www.ama-assn.org/ama/pub/category/9306.html

The Fifth Pathway to Residency Education: A Brief History

At the AMA annual meeting in July 1971, the AMA Council on Medical Education adopted a policy, "A New Pathway for Entrance to AMA Approved Internship and Residency Programs." This policy established a new route, or pathway, to residency training for graduates of foreign medical schools. This route came to be called the Fifth Pathway, a name adopted because there were already four pathways to residency education: transfer to and graduation from a US medical school, ECFMG certification, full and unrestricted licensure by a US licensing jurisdiction, and passing the Spanish language licensing examination in Puerto Rico.

The new AMA policy resolved a controversy surrounding access to residency and practice for a group of US citizens who had studied medicine in Mexico but were unable to meet all the requirements for certification by the ECFMG. Medical education in Mexico, then and now, includes a period of internship and government social service after a student has completed the academic requirements of a medical school. Many of the US citizens who had completed the medical school academic requirements were not successful in finding internship appointments and, consequently, could not be provided with a final diploma, required for ECFMG certification. These students and their parents believed that since they had completed the required 4 years of medical school education, they were being unfairly deprived of entry to residency training and practice in the United States.

The Fifth Pathway program got under way almost immediately after the Council policy statement was issued, with five Fifth Pathway clerkship programs under way by early 1972. Eventually, 43 medical schools in 26 states and in three Canadian provinces offered the Fifth Pathway clerkship. The numerical peak of the Fifth Pathway was in 1980, when 546 Fifth Pathway physicians completed medical school; in 2005, 94 physicians completed the program.
The number of US medical schools providing the clerkship has declined over the years. In 1991, only the University of California, Irvine, Mount Sinai School of Medicine in New York, and New York Medical College in Valhalla offered the clerkship. At present, only New York Medical College and Ponce Medical School do so.

By far the largest number of Fifth Pathway physicians (about 5,000 of the 7,500 total represented in AMA files) have come from the Autonomous University of Guadalajara. Most of the other Fifth Pathway graduates are also from Mexican medical schools or from other Latin American schools. Fifth Pathway physicians are involved in every aspect of medical practice, that is, in direct patient care and medical teaching, administration, and research. They are also spread throughout the major medical specialties and a number of subspecialties, such as neonatal perinatal medicine, sports medicine, and addiction psychiatry, although they are not well represented in the preventive medicine specialties. The largest number of Fifth Pathway physicians are in New York (1,580), California (949), and New Jersey (728). Almost 3% of the physicians practicing in New Jersey are Fifth Pathway graduates.

The AMA has maintained a list of the US medical schools that have provided Fifth Pathway clerkships, as well as who completed Fifth Pathway education at those schools. Fifth Pathway information is included in the AMA Masterfile.

AMA International Medical Graduates Section

The International Medical Graduates Section (IMG) of the AMA advocates for IMG physicians by enhancing their participation in organized medicine, increasing AMA communication and interchange among IMGs, and studying issues of concern to IMGs such as the impact of IMGs on the physician workforce. An IMG member of the AMA is automatically a member of the IMG Section and can participate in the Section's annual elections and Caucus activities. The IMG Section is dedicated to improving opportunities for IMGs in the areas of licensure, training, and practicing medicine in the US.

The IMG Section Web site contains information of interest to IMGs, including:
• ECFMG certification
• Immigration
• Residency program requirements, including application tips and interview hints
• State licensure board requirements for IMGs
• IMG Governing Council and leadership opportunities
• AMA Policies related to IMGs and IMG issues
• Significant dates in US immigration policy affecting IMGs
• IMG physician demographics
• History and development of the AMA IMG Section

AMA Council on Medical Education

Recognizing the relationship between quality medical education and quality health care, the AMA established the Council on Medical Education in 1904 to formulate and implement policy. After studying and evaluating medical education across the continuum, the current Council recommends educational policies and standards to the AMA House of Delegates (HOD) and to the medical education community. The council also prepares numerous reports responding to AMA HOD actions and initiates relevant studies in areas of high concern to the educational community. For example, recent initiatives have focused on:

• The need for workforce policy that supports an adequate continuing supply of well-qualified physicians to meet the medical needs of the public
• Medical student debt and its possible influence on the decision to apply to medical school and on the career choices of graduates
• Resident working conditions, duty hours and the impact of sleep deprivation and fatigue on medical student and resident education and patient safety

The council also reviews and recommends nominees to the AMA Board of Trustees for appointment or nomination to accrediting bodies, specialty-certifying boards and other national organizations.

Key dates in the history of the Council on Medical Education and GME

1847 American Medical Association organized; Committee on Medical Education appointed
1901 First publication of the Annual Medical Education issue of the Journal of the American Medical Association
1904 Formation of the Council on Medical Education
1910 Publication of “Flexner Report” evaluating medical schools
1912 First survey of hospitals for the training of interns
1914 First publication of what was to become the GME Directory, as the Provisional List of Hospitals Furnishing Acceptable Internships for Medical Graduates (15 cents per copy)
1919 Establishment of the Essentials for Approved Internships
1927 Beginning of approval of residency programs in hospitals; publication of Hospitals Approved for Residencies in Specialties, with 270 hospitals in 14 different specialties
1928 Establishment of Essentials for registered hospitals and for approved residencies and fellowships
1934 Approval of examining boards for the certification of specialists; establishment of standards for the formation of American boards in the specialties
1948 Establishment of the Liaison Committee for Specialty Boards between the AMA Council on Medical Education and Advisory Board for Medical Specialties
1949 Conference Committee on Internal Medicine, established in 1938, reactivated
1950 Conference Committee on Graduate Training in Surgery established
1951 First operation of the National Intern Matching Program
1956 Educational Commission for Foreign Medical Graduates established
1958 Two-year integrated training program for family practice approved by the AMA House of Delegates
1966 Report of the Citizens Commission on Graduate Medical Education (Millis Report) published
1970 Advisory Board for Medical Specialties reorganized as American Board of Medical Specialties
1972 Liaison Committee on Graduate Medical Education (LGMGE) established
1975 LCME formally began to accredit programs
1981 Accreditation Council for Graduate Medical Education replaces LCGME
1991 AMA Fellowship and Residency Electronic Interactive Data Access (FREIDA) System established
1992 ACGME declares 1-year moratorium on considering accreditation requirements for new subspecialties
1996 AMA FREIDA becomes FREIDA Online
1996 First CD-ROM version of the GME Directory published
2000 ACGME becomes incorporated
2000 In collaboration with the Association of American Medical Colleges (AAMC), AMA develops online survey, the National GME Census
2004 Council celebrates its 100th anniversary
2005 Council begins its Initiative to Transform Medical Education

AMA Medical Education Group

The AMA Medical Education Group, under the guidance of the Council on Medical Education and the Section on Medical Schools, supports the development, promulgation and implementation of policies that fulfill the profession's responsibility to ensure the competence of its members.

The group facilitates the development of national medical education policy, collects survey data and widely disseminates information on undergraduate, graduate and continuing medical education as well as educational programs in 67 health-related professions. The group serves as a valuable resource for physicians, educators, policymakers, researchers and the public.

National GME Census

The National GME Census is a joint effort of the AMA and the Association of American Medical Colleges (AAMC) and replaces the AMA Annual Survey of GME Programs. Every summer, all programs accredited by the ACGME and combined specialty programs approved by their respective boards are asked to complete this online census, available at www.aamc.org/gmetrack.

The census collects data on program characteristics, such as program size, work hours, program evaluation, educational characteristics, and health benefits. GME program directors also confirm or edit information about individual residents and provide information on new residents, if necessary. These data are stored in the AMA Physician Masterfile and are used to verify the education and training credentials of physicians. Program data are used to update listings in FREIDA Online and Appendix A of the Graduate Medical Education Directory.

During the 2005 survey cycle, 84.9% of programs completed the census as of January 13, 2006, either online via the AAMC Web site or by completing a paper survey.

Medical Education Issue of JAMA

Every September, the Journal of the American Medical Association (JAMA) publishes a special issue on medical education.

The GME article, as well as the tables in the appendix, are based on data collected through the National GME Census. Program directors, specialty societies, and health workforce researchers and planners at national and state levels all rely on the data published in this issue of JAMA. The contributions of program directors to the Census are very important to the provision of accurate and timely data to the GME community. Program directors' early and complete participation in the Census is thus strongly encouraged and appreciated; without the information they provide, such reporting on GME data would be difficult, if not impossible.
In addition to "US Graduate Medical Education, 2004-2005: Trends in Primary Care Specialties," the issue included:

- Neurobehavioral Performance of Residents After Heavy Night Call vs After Alcohol Ingestion
- Medical Students' Exposure to and Attitudes About Drug Company Interactions: A National Survey
- Comparison of the Instructional Efficacy of Internet-Based CME With Live Interactive CME Workshops: A Randomized Controlled Trial
- Costs and Funding for Published Medical Education Research
- Resident Physicians' Preparedness to Provide Cross-Cultural Care
- Effects of Work Hour Reduction on Residents' Lives: A Systematic Review
- Educational Programs in US Medical Schools, 2004-2005
- Reforming Graduate Medical Education
- Separate and Equitable Promotion Tracks for Clinician-Educators
- Work Hours and Reducing Fatigue-Related Risk: Good Research vs Good Policy
- Rainbow to Dark Clouds
- Medical Education 2005: From Allegory to Bull Moose

Medical Education Data Service, mailing labels

The AMA Medical Education Data Service provides published information, existing tables, custom tables, electronic data and mailing labels to students, educational institutions, professional associations, government agencies, foundations and others interested in collecting, analyzing and disseminating medical education data. Written requests for data are screened for merit and must include the purpose of the project, specific data service requested, expected due date for data, and name, address, phone and fax number of the project contact. When requests require staff contribution or organizational overhead, a fee is assessed; program directors requesting data receive a substantial discount.

Electronic State-level GME Data

The AMA offers aggregate statistics for each state on all resident physicians, in Adobe Acrobat format. There are six different tables for each state, including Puerto Rico and the District of Columbia, as well as a set of six tables for the United States:

- Total Number of Resident Physicians and Program Year 1 Resident Physicians in GME Programs
- Resident Physicians by Type of Medical School Attended
- Resident Physicians by Gender and Race/Ethnicity
- Resident Physicians Without Prior US GME in GY1 Positions by Type of Medical School Attended
- Resident Physicians Who Completed a Graduate Medical Education Program or Completed a Preliminary Year
- Plans of Resident Physicians Completing a Program

Information
For more information on these tables, or for inquiries about other GME data, contact
AMA Data Acquisition Services
312 464-4487
Price for state-level GME data is $20 to $50 (based on number of states ordered). To order, contact: Jackie Edwards 312 464-4659 E-mail: jacqueline.edwards@ama-assn.org
www.ama-assn.org/go/mededproducts

GME E-letter

The GME E-letter, a free monthly e-mail newsletter from the AMA, is a popular source of news and information for the GME community. Comments from subscribers include:

- "Clear, concise, and relevant!"
- "Very useful since it is focused, brief and contains information of importance to program directors."
- "Loved the e-letter. Thought it was well-written, informative and appropriately succinct."
- "A great resource and the best way to share cutting-edge news re GME."

Since its debut in May 2001, the GME E-letter has grown to encompass more than 14,000 subscribers, including:

- Program directors and staff of residency and fellowship programs
- Hospital administrators
- Professional associations
- Certifying/licensing boards
- Physician recruiters
- Governmental and regulatory organizations

The E-letter covers a wide range of issues affecting GME—everything from resident work hours and pharmaceutical industry access to residency programs to updates on accreditation activities and development of new subspecialties. Following is a list of GME-related peer-reviewed studies and articles in the medical literature that were referenced in the 2005 issues of the E-letter.

Human Resources for Health: Overcoming the Crises

The authors—the Joint Learning Initiative, an international consortium of more than 100 health leaders—call for sustainable health systems in every country based on strengthening human resources. This means training more doctors and more nurses in developing nations. It also means moving every nation toward producing a health workforce sufficient to meet the health needs of its own people.

Resident Burnout
Accompanying the article on resident burnout is an editorial stating that "most GME research studies fall to adequately measure meaningful clinical outcomes and have minimal impact on medical training or practice."

Graduate Medical Education Information Directory 2006-2007

17
Graduate Medical Education Research in the 21st Century and JAMA On Call
The editorial also invites contributions to On Call, a forum for publishing original research, systematic reviews, and scholarly commentary on issues in GME.

Systematic Review: Effects of Resident Work Hours on Patient Safety
The "central question" about patient safety and reduced resident work hours is: "Who provides safer care to patients whose health is in flux? A well-rested resident who knows the patient primarily through performing the admitting history and physical examination?" The authors state that the current evidence is inconclusive and that more and better research is needed.

Extended Work Shifts and the Risk of Motor Vehicle Crashes among Interns
First-year residents more than doubled their risk of getting into a car accident after being on call for 32 consecutive hours with only 2 or 3 hours of sleep, found researchers at Harvard Medical School and Brigham and Women's Hospital. The residents, working an average of 71 hours a week, reported a total of 320 vehicle crashes, 40% of which occurred on their way home from the hospital.

Personal Digital Educator
As electronic technologies become more common in health care, this article describes how the personal digital assistant is providing crucial knowledge at the time of a clinical encounter.

Systematic Review: The Relationship between Clinical Experience and Quality of Health Care
This study suggests that physicians who have been in practice longer may be at risk for providing lower-quality care, and "raises concerns about the adequacy of continuing professional education in medicine," commented the editors.

Pharmaceutical Industry Funding for Residencies Sparks Controversy
Kuehn BM. JAMA. April 6, 2005; Vol 293, No 13:1572-1580.
Pharmaceutical company funding of 10 dermatology residency slots for the 2006 Match "has left some physicians questioning the need for more dermatologists and the wisdom of allowing pharmaceutical support for graduate medical education."

Resident Operative Experience During the Transition to Work-Hour Reform
"At the start of this study, it was anticipated that fewer work hours would decrease operative volume. . . . Instead, these findings support the limited research that demonstrates fewer work hours do not jeopardize the volume of procedures in which residents participate. While operative experience makes up a large component of surgical training and education, the way in which work-hour reform may affect other components of surgical training must be considered."

Satisfaction?
Conigliaro RL. JAMA. May 11, 2005; Vol 293, No 18:2183.
Writing in "A Piece of My Mind," a generalist admits that hospitalists are efficient and productive but laments the loss of contact with her sick patients.

Effects of Hospitalists on Outcomes and Costs in a Multicenter Trial of Academic Hospitals
Presented at the Society of General Internal Medicine meeting in May, this study shows that hospitalists did not improve care or outcomes in several academic settings.

Career Plans for Trainees in Internal Medicine Residency Programs
In 1998, 54% of third-year internal medicine residents planned to practice general internal medicine, versus 27% in 2003. The near-term future doesn’t look any brighter, with 19% of first-year residents in 2003 planning to become generalists.

Primary Care, Generalism, Public Good: Déjà vu? Again!
This article discusses the challenges facing generalism in medicine; the accompanying editorial discusses the need to ensure that the health care system is based on primary care and ways to accomplish this goal.

Clinical Empathy as Emotional Labor in the Patient-Physician Relationship
The authors compare the inculcation of empathy in students and residents to the aging of a fine wine, adding that "medical schools and residencies should play an active role in training and development of empathy. Emphasis should be both on designing training programs and creating a culture that values empathy in treatment."

How do cancer physicians say they discuss prognosis with their terminally-ill patients? A survey of ASCO members
A study of 1,200 US-based American Society of Clinical Oncology (ASCO) members showed that most cancer doctors will tell patients if their illness is terminal, but only 27% of respondents said they had been taught during training how to discuss prognosis with their patients. Further, 80% said they had no training or the training they did have was inadequate.

Medical Students’ Exposure to and Attitudes About Drug Company Interactions: A National Survey
(Note: Articles from the Medical education issue of JAMA are listed below)
Medical students believe they are entitled to gifts, that sponsored 
educational events are probably biased but nonetheless helpful, 
and that their colleagues’ prescribing habits—not their own—are 
likely to be unduly influenced by these interactions.

The Influence of Controllable Lifestyle and Sex on the Specialty 
Dorsey ER, Jarjoura D, Rutecki GW. *Academic Medicine.* September 

Has the growing number of female medical students led to the de-
mand for “controllable lifestyle” specialties? In fact, both men and 
women are choosing such specialties (eg, taking the “E-ROAD”—
emergency medicine, radiology, ophthalmology, anesthesiology, and 
dermatology).

Access to Drug Samples May Influence Resident Physician 
Prescribing 

The results of this randomized trial showed that access to drug samples 
may influence resident physician prescribing, potentially in-
creasing patients’ costs.

Impact of the University of California, Los Angeles/Charles R. 
Drew University Medical Education Program on Medical Students’ 
Intentions to Practice in Underserved Areas 
Ko M, Edelstein RA, Healin KC. *Academic Medicine.* September 
2005; 80:803-808.

Schools play a key role in students practicing in underserved areas. 
Graduating students of the joint UCLA/Drew University medical ed-
ucation program are more likely than UCLA students (86% vs 20%) 
to express intention to practice in medically underserved areas.

The Metrics of the Physician Brain Drain 

Fatal Flows—Doctors on the Move 
Chen LC, Boufford JI. *N Engl J Med.* October 27, 2005; Vol 353, No 
17:1850-1852.

The movement of health care workers from third-world to de-
veloped countries is exacerbating global health disparities and leaving 
poor countries with fewer personnel and resources to combat AIDS 
and other infectious diseases. The author calculates that lower-in-
come countries supply between 40 and 75 percent of the interna-
tional medical graduates in the US, UK, Canada, and Australia, and 
nine of the 20 countries with the highest emigration factors are in 
sub-Saharan Africa or the Caribbean.

An accompanying editorial states that US government and phil-
anthropic groups should redirect their resources to helping poor 
countries build their own human resources and health care sys-
tems, rather than simply dispatching US health professionals 
abroad.

Residency Work-Hours Reform: A Cost Analysis Including 
Preventable Adverse Events 
Nuckols TK, Escare J. *Journal of General Internal Medicine.* 

Duty hours reform could cost $1.1 billion per year nationwide if ex-
cess resident work is transferred to mid-level providers. Reform 
would be cost neutral for society if adverse events decreased by 
8.5%, but events must fall by 30.9% to be cost neutral for teaching 
hospitals.

Sleep and Motor Performance in On-call Internal Medicine 
Residents 
Saxena AD, George CFP. SLEEP. January 27, 2006; Vol 28, Issue 
11:1386-1391.

Sleep Loss and Performance in Residents and Nonphysicians: A 
Meta-Analytic Examination 

Sliding Down the Bell Curve: Effects of 24-hour Work Shifts on 
Physicians’ Cognition and Performance 

Two studies in SLEEP examine the effects of sleep deprivation on 
residents’ performance and vigilance. One study concludes that the 
current ACGME duty hour regulations may be insufficient to guard 
against the negative effects of sleep loss. A related editorial calls 
for an end to the “dangerous tradition” of 24-hour shifts, to ensure 
patient safety and quality resident education.

Recertification for Internists — One “Grandfather’s” 
Experience 

An internist with lifetime board certification takes the 
recertification plunge and finds the experience worthwhile.

Personal Metrics for Practice—How’m I Doing? 

Instead of viewing recertification as a burden imposed from above, 
physicians can consider it as a benchmark of one’s quality of the care 
and a way towards practice-based improvement. And as pay for per-
formance picks up steam, it may translate into improved income.

Renewing Board Certification 

Provides an overview of maintenance of certification.

**Medical Education Bulletin**

The Medical Education Bulletin is a newsletter published twice a 
year by the AMA Medical Education Group. It covers issues of inter-
est to the undergraduate and graduate medical education commu-
nity, including updates on AMA actions related to medical 
education at the annual and interim meetings of the AMA House of 
Delegates.

Recent issues have included such articles as:

- AMA House of Delegates Actions, 2005 Interim Meeting
- Suicide Prevention of Medical Students and Residents
- EPOCH: Educating Physicians on Controversies in Health

The Bulletin is mailed to GME program directors, medical education 
directors at teaching hospitals, members of the Section on 
Medical Schools, medical school deans, and the AMA appointees to 
the Residency Review Committees.
Guidebook for GME Program Directors

Published by the AMA Division of Graduate Medical Education, this 115-page guidebook provides residency/fellowship program directors, program coordinators, institution officials, and others information about AMA services, products, and activities related to GME. Also included are descriptions of and contact information for a number of organizations involved in GME, including American Board of Medical Specialties (ABMS) certification boards and medical licensing boards.

The book is available as an Adobe Acrobat pdf file (337 KB) at www.ama-assn.org/go/gmeguidebook.

AMA Continuing Medical Education

Advances in biomedical science and changes in the other facets of the US health care delivery environment engage physicians in a continuous process of professional development. To ensure that they provide patients with the most current and appropriate treatment, services, and information, physicians keep learning through participation in a wide array of conferences and other teaching experiences, as well as through independent study of published materials. The AMA supports these physician efforts by:

- Administering the only nonspecialty-specific credit system that recognizes physician completion of continuing medical education (CME) activities
- Offering CME publications and programs (both conferences and enduring materials, such as monographs and course materials)
- Establishing new learning modalities (performance improvement and Internet point of care) appropriate for physician professional development and investigating international opportunities for reciprocal CME relationships

The AMA Physician's Recognition Award

In 1968, the AMA House of Delegates established the AMA Physician's Recognition Award (PRA) to both encourage physicians to participate in CME and acknowledge when individual physicians complete CME activities. Approximately 17,000 physicians apply for the PRA each year, with 45,000 holding current AMA PRA certificates. Activities that meet education standards established by the AMA can be designated "AMA PRA Category 1 Credit™" by educational institutions accredited by the ACCME to provide CME to physicians. These typically include state medical societies, medical specialty societies, medical schools and hospitals. Other activities, usually independent or physician directed learning, may be reported for "AMA PRA Category 2 Credit™." AMA PRA certificates are awarded in lengths of 1, 2, or 3 years.

The AMA also offers the PRA with Commendation, awarded to physicians who exceed the credit required to earn the regular PRA. For more information, visit www.ama-assn.org/go/prac.

Through reciprocity arrangements, the AMA will also award the PRA certificate if the CME requirements of a number of specialty organizations are met. In addition, 34 states accept the PRA certificate as evidence that physicians have met the CME requirements for license reregistration.

The AMA sends PRA application forms to physicians who have had a valid PRA certificate within the past 3 years and physicians whose current certificate is expiring within 3 months.

AMA PRA rules for performance improvement and Internet Point of Care (PoC) CME

In 2004, the AMA Council on Medical Education approved new rules governing how Performance Improvement (PI) activities could be conducted for "AMA PRA Category 1 Credit." The AMA helped the Accreditation Council for Continuing Medical Education (ACCME) develop guidance for providers on how to implement these guidelines as effective PI activities.

Similarly, in 2005, the Council approved new rules governing how Internet PoC activities could be conducted for "AMA PRA Category 1 Credit." The AMA also assisted the ACCME in developing guidance for providers on how to implement these guidelines.

Performance improvement activities describe structured, long-term processes by which a physician or group of physicians can learn about specific performance measures, retrospectively assess their practice, apply these measures prospectively over a useful interval, and reevaluate their performance.

Internet PoC CME describes structured, self-directed, online learning by physicians on topics relevant to their clinical practice. Learning for this activity is driven by a reflective process in which physicians must document their clinical question, the sources consulted, and the application to practice.

For more information on either of these two new formats, visit www.ama-assn.org/go/prabooklet.

AMA CME programs

Enduring (self-assessment) CME programs

The AMA Healthcare Education Products and Standards Group offers a number of enduring CME programs that provide physician self-assessment. Available in print, CD-ROM, and Internet formats, these enduring CME programs are dedicated to improving the effectiveness and scope of CME programs by exploring new formats and delivery approaches that tap into the latest clinical information and that meet the AMA's rigorous CME standards. An updated list of available programs is available at www.ama-cme.org, and many Internet programs allow physicians to print their own CME certificates.

Monographs/Internet programs

The AMA Division of Healthcare Education Products and Standards produces and distributes both printed self-study monographs and Internet/CD-ROM programs, which are developed in cooperation with medical specialty societies and recognized medical experts and funded with educational grant support from industry. These programs are intended for primary care physicians and interested
medical specialists. For more information, e-mail cmeorders@ama-assn.org.

**Journal CME**
The AMA has launched online journal CME activities for the *Journal of the American Medical Association* and the six AMA Archives journals. Physicians can earn AMA PRA Category 1 Credit by reading the designated articles online and completing a post-test.

**AMA-sponsored conferences and live events**
As an ACCME-accredited provider, the AMA sponsors multiple conferences and live events designated for AMA PRA Category 1 Credit. Physicians receive education on topics of interest to all disciplines and specialties. Recently, AMA-sponsored conferences and live events have included Basic and Advanced Disaster Life Support programs, the AMA Medical Communications and Health Reporting Conference, and the Women Physician Leaders Summit.

**International CME**
The International Conference Recognition Program began in 1990 by an act of the AMA House of Delegates. The AMA recognized that international congresses present opportunities for physicians to participate in quality educational programs and provide opportunities for US physicians to collaborate with colleagues overseas. The AMA recognizes a handful of events each year and provides American physicians with an opportunity to earn AMA PRA Category 1 Credit at these approved events. For more information, visit www.ama-assn.org/go/internationalcme.

**Gifts to Physicians from Industry**
Starting in 2001, the AMA led this initiative to create awareness among physicians and physicians-in-training about the ethical implications of receiving gifts from industry. The initiative consists of a series of four free online educational modules available at www.ama-assn.org/go/ethicalgifts. Each module presents important general concepts, then uses gifts as the context to illustrate the idea. Every module is rich with case examples. The educational modules will also help satisfy the requirements from the Accreditation Council for Graduate Medical Education (ACGME) for education on professionalism as one of the six competencies expected of residents in training.

The four educational modules cover these topics:
- An overview of ethical, professional and legal issues for physicians' relationships with industry
- Physicians' expectations from industry and sales personnel
- Professionalism, including the issues of gifts to physicians from industry
- The AMA guidelines on gifts to physicians from industry

Using the Internet, each module is available in two formats at no cost and with 24-hour access:
- Downloadable resource materials for instructors, at any level of medical education, to use to build 1-hour learning experiences. Materials include a presenter's guide, PowerPoint slides and a participant's handout. CME providers can adapt these resources for use in their local sites.
- An online self-study version designed for individual learners, designated for one AMA PRA Category 1 Credit.

The material in the educational modules is based on the 1990 AMA Council on Ethical and Judicial Affairs (CEJA) Opinion 8.061, "Gifts to Physicians from Industry," which is part of the AMA Code of Medical Ethics. There are no new policies or guidelines in the modules.

The modules also refer to the Pharmaceutical Research and Manufacturers of America (PhRMA) guidelines, as well as those developed by other medical, industry and government groups, as appropriate, to give a broad-based understanding of the issues involved in the ethics of gift giving. The PhRMA code and others are very similar in spirit and substance to the AMA Ethical Opinion. The recent guidance to pharmaceutical and device companies by the Office of the Inspector General is provided as a reference.

**Virtual Mentor**
*Virtual Mentor* is the AMA's online ethics journal. Now in its eighth year of publication, *Virtual Mentor (VM)* explores the ethical issues and challenges that students, residents, and other physicians are likely to confront in their training and daily practice. For this reason, the journal is a valuable teaching resource for medical educators at all levels as well as for doctors and doctors-to-be. Each monthly issue of VM contains original articles and commentary on a given theme—eg, access to care, quality of life considerations in clinical decisionmaking, public roles of physicians, ethical issues in endocrinology, conflict of values in medicine. The journal also solicits articles and case commentary from experienced physicians and other ex-
D. GME-related Organizations

Accreditation Council for Graduate Medical Education (ACGME)

The Accreditation Council for Graduate Medical Education (ACGME) is a separately incorporated organization, responsible for the accreditation of approximately 8,000 allopathic graduate medical education programs. It has five member organizations:

• American Board of Medical Specialties
• American Hospital Association
• American Medical Association
• Association of American Medical Colleges
• Council of Medical Specialty Societies

Each member organization nominates four individuals to the ACGME’s Board of Directors. In addition, the Board of Directors includes three public representatives, two resident representatives, and the chair of the Council of Review Committee Chairs. A representative for the federal government also serves on the Board in a non-voting capacity.

The mission of the ACGME is to improve health care by assessing and advancing the quality of resident physicians’ education through accreditation. The ACGME’s vision is exemplary accreditation and its values are:

• Accountability through processes and results that are open and transparent; responsive to the educational community and the health care community; and reliable, valid, and consistent.
• Excellence through accreditation that is efficient and effective, outcomes-based, improvement-oriented, and innovative.
• Professionalism through actions that are respectful and collaborative, responsive, ethical, and fair.

Under the aegis of the ACGME, the accreditation of graduate medical education programs and the institutions that sponsor them is carried out by 27 residency review committees and an institutional review committee. These committees have been delegated accreditation authority by the ACGME. A Residency Review Committee (RRC) consists of representatives appointed by the American Medical Association, the appropriate specialty board, and, in some cases, a national specialty organization (see table on p. 23).

The Transitional Year Review Committee is composed of ten members who are appointed by the chair of the ACGME in conjunction with the Executive Committee. The term “review committee” is used to denote a Residency Review Committee, the Transitional Year Review Committee, and the Institutional Review Committee. The Institutional Review Committee (IRC) is composed of ten members appointed by the Chair of the ACGME in conjunction with the Executive Committee. The Institutional Review Committee assumes the responsibility for accrediting institutions which sponsor multiple programs. It evaluates institutions for substantial compliance with the Institutional Requirements.

Graduate medical education programs are accredited when they are judged to be in substantial compliance with the institutional, common and specialty program requirements. The requirements are developed and periodically revised by a review committee for its area(s) of competence, and are approved by the ACGME. The activities of the ACGME extend only to those programs and institutions within the jurisdiction of the United States of America.

ACGME institutional and program requirements are posted on the ACGME Web site: www.acgme.org. The institutional and program requirements describe curricular content for GME programs.

and may also address program resources and personnel, program length and other issues. Accredited programs and institutions are judged to be in substantial compliance with ACGME institutional, common and specialty-specific program requirements.

Also available on the ACGME Web site are the ACGME Policies and Procedures, Bylaws, and Glossary. The Policies and Procedures provide information on the review process, definitions of accreditation statuses, and other useful information.

A list of programs accredited by the ACGME, including detailed information about each program, is published by the AMA annually in the Directory (see Section III) using information provided by the ACGME. The ACGME lists accredited programs and institutions on its Web site: www.acgme.org. Click on “Search Programs/Institutions” in the left-hand navigation bar to look up the accreditation status of a program or institution. In addition, the Web site contains comprehensive information about accreditation of graduate medical education programs and sponsoring institutions.

Parker J. Palmer Award and Courage to Lead Award

In February 2001, the ACGME established the Parker J. Palmer Courage to Teach Award to recognize outstanding GME program directors. Criteria for selection include a demonstrated commitment to education with evidence of successful mentoring, program development, and improvement. The ACGME recognizes ten outstanding program directors each year with the award. The winners of the Parker J. Palmer award from 2002 to 2006 are listed below:

2002
- Robert W. Block, MD, University of Oklahoma, Tulsa (Pediatrics)
- Virginia U. Collier, MD, Christiana Care Health Services (Internal Medicine)
- George C. Curry, MD, University of Texas Southwestern Medical Center (Diagnostic Radiology)
- Alfred D. Fleming, MD, Creighton University (Obstetrics-Gynecology/Maternal Fetal Medicine)
Graduate Medical Education Information

- William H. Hester, MD, McLeod Family Medicine Center (Family Medicine)
- Earl D. Kemp, MD, Sioux Falls Family Medicine Residency (Family Medicine)
- Gail A. McGuinness, MD, University of Iowa (Pediatrics)
- Claude H. Organ, Jr, MD, University of California-San Francisco-East Bay (General Surgery)
- Keith D. Wrenn, MD, Vanderbilt University Medical Center (Emergency Medicine)
- Nikitas J. Zervanos, MD, Lancaster General Hospital (Family Medicine)
- Patricia L. Blanchette, MD, University of Washington (Physical Medicine & Rehabilitation)
- Anthony A. Meyer, MD, PhD, University of North Carolina, Chapel Hill (General Surgery)
- Glenn C. Newell, MD, UMDNJ-Robert Wood Johnson (Internal Medicine)
- Eric Scher, MD, Henry Ford Hospital (Internal Medicine)

2003
- C. Bruce Alexander, MD, University of Alabama, Birmingham (Pathology)
- Keith B. Armitage, MD, University Hospitals of Cleveland (Internal Medicine)
- Eugene V. Boresin, MD, Massachusetts General Hospital (Child-Adolescent Psychiatry)
- Frank J. Elsmont, MD, Jackson Memorial Hospital/Jackson Health System (Orthopaedic Surgery)
- Steven K. Peske, MD, Brigham and Women's Hospital (Neurology)
- Joseph T. Gilhooly, MD, Oregon Health & Sciences University (Pediatrics)
- Harold L. Johnston, MD, Alaska Family Medicine/Providence Hospital (Family Medicine)
- Henry J. Schultz, MD, Mayo Clinic (Retired, Internal Medicine)
- John L. Tarpley, MD, Vanderbilt University (General Surgery)
- Bennett S. Vogelman, MD, University of Wisconsin-Madison (Internal Medicine)
- Kathleen V. Watson, MD, University of Minnesota (Internal Medicine)

2004
- William L. Bockenek, MD, Charlotte Institute of Rehabilitation (Physical Medicine & Rehabilitation)
- Carol Carracllo, MD, University of Maryland Medical System (Pediatrics)
- Carlyle H. Chan, MD, Medical College of Wisconsin (Psychiatry)
- Paul H. Gerst, MD, Bronx-Lebanon Hospital Center, (General Surgery)
- DuPont Guerry, IV, MD, University of Pennsylvania (Hematology-Oncology)
- J. Peter Harris, MD, Golisanos Children's Hospital at Strong University of Rochester (Pediatrics)
- John B. Jeffers, MD, Wills Eye Hospital (Ophthalmology)
- Catherine K. Lineberger, MD, Duke University Medical Center (Anesthesiology)
- Gordon E. Schutte, MD, University of Arkansas for Medical Sciences/Arkansas Children's Hospital (Pediatrics)
- Eric Walsh, MD, Oregon Health & Science University (Family Medicine)

Department of Information Services: Sheri A. Bolar, help desk specialist
Association of American Medical Colleges (AAMC)
The Association of American Medical Colleges (AAMC), founded in 1876, is a nonprofit association of 125 LCME-accredited medical schools, 17 accredited Canadian medical schools, some 400 teaching hospitals and health systems, and about 100 academic societies, as well as the nation’s 67,000 medical students and 104,000 residents. The AAMC seeks to improve the nation’s health by enhancing the effectiveness of academic medicine. The AAMC assists academic medicine’s institutions, organizations, and individuals in the three main mission areas of medical education, medical research, and patient care.

In GME, the AAMC represents and supports members in improving educational quality, strengthening institutional GME leadership and institutional accountability for GME, developing faculty, and setting a national agenda for the support of GME. It carries out this work through a variety of activities:

Compact Between Resident Physicians and Their Teachers
www.aamc.org/meded/residentcompact
Contact: Patricia Green
E-mail: psgreen@aamc.org
The Compact is a declaration of the fundamental principles of GME and the major commitments of both residents and faculty to the educational process, to each other, and to the patients they serve. The Compact’s purpose is to provide institutional GME sponsors, program directors, and residents with a model statement that will foster more open communication, clarify expectations, and re-energize the commitment to the primary educational mission of training tomorrow’s doctors.

Institute for Improving Medical Education (IIME)
www.aamc.org/meded/iime/start.htm
Contact: Michael Whitcomb, MD
E-mail: mwhitcomb@aamc.org
The Institute’s mission is to boost the health of Americans by fostering innovations in medical education that will better align the knowledge, skills, and professionalism of medical students, residents, and practicing physicians with the needs and expectations of the public.

MedEdPORTAL
www.aamc.org/mededportal
Contact: Robby Reynolds
E-mail: reynolds@aaMC.org
This online resource enables faculty to publish, share, and discover peer-reviewed educational materials. It is designed to promote collaboration and educational scholarship by facilitating the exchange of peer-reviewed teaching resources such as animations, tutorials, lab manuals, assessment instruments, faculty development materials, and computer-based resources, including an inventory of virtual patients.

Project Medical Education (PME)
www.aamc.org/members/pme
Contact: Chris Tucker
E-mail: ctucker@aamc.org
Project Medical Education (PME) helps educate policymakers and others about the missions of medical schools and teaching hospitals. During visits to medical schools and teaching hospitals, policymakers assume the roles of medical students, resident physicians, and faculty physicians in a 1- to 2-day program that shows them first-hand how medical education benefits all Americans. More than 600 legislators and staff members have participated in at least one PME program held in conjunction with over 60 AAMC member institutions in 24 states since the program’s inception in 1999.

Organization of Resident Representatives (ORR)
www.aamc.org/members/orr/start.htm
Contact: Alexis Ruffin
E-mail: aruffin@aamc.org
The mission of the AAMC’s Organization of Resident Representatives (ORR) is to improve resident physician education and training for the purpose of improving the quality of health care. ORR members are appointed by the member societies of the AAMC Council of Academic Societies. They provide the resident voice in the AAMC.

Group on Education Affairs (GEA)
www.aamc.org/members/gea
Contact: M. Brownell (Brownie) Anderson
E-mail: mbanderson@aamc.org
The group’s purpose is to promote excellence in the education of physicians throughout their professional lives and, thereby, to contribute to improving the health of the public. Reflecting the continuum of medical education, the GEA is organized by four sections, including the Graduate Medical Education Section, whose activities are focused on supporting the development and continued improvement of GME programs. The Research in Medical Education (RIME) Conference, held in conjunction with the AAMC Annual Meeting, includes research papers, symposia and abstract sessions. The Innovations in Medical Education Exhibits (IME) also are held during the Annual Meeting.

Group on Resident Affairs (GRA)
www.aamc.org/members/gra
Contact: Sunny Yoder
E-mail: syoder@aamc.org
This group’s purpose is to develop GME leaders at AAMC-member medical schools, teaching hospitals and health systems, and academic societies who are responsible for GME oversight, administration, organization, financing, and quality in their institutions. The Group offers a GME Leadership Development Course—a “school for DIOS”—that explores the DIO’s responsibility, from leading a sponsoring institution successfully through an accreditation review to improving the GME enterprise and developing advanced leadership skills.

The AAMC also helps students make career decisions and enter residency programs. It assists residents in managing their medical education loans. In collaboration with the AMA, it tracks residents from entry to residency through completion and beyond. The AAMC also offers GME-related online publications.

Careers in Medicine
www.aamc.org/students/cim
Contact: George Richard
E-mail: grichard@aamc.org
This program helps students choose a medical specialty and select and apply to a residency program (see listing under “Residency Application and Career Planning Resources” for more information).
ERAS
www.aamc.org/audience/eras.htm
Contact: Renée Overton
E-mail: broverton@aamc.org
The Electronic Resident Application Service works with applicants, designated dean's offices, and training programs to streamline the residency and fellowship application process for all involved. ERAS users transmit application materials and supporting credentials to training programs using the Internet. ERAS serves almost 39,000 applicants, 163 medical schools and designated dean's offices, and just over 5,000 training programs annually (see listing under "Residency Application and Career Planning Resources" for more information).

FindAResident
www.aamc.org/audience/findaresident.htm
Contact: Nancy Nelson
E-mail: nnelson@aamc.org
FindAResident is a Web-based service designed to provide a direct and efficient way for program administrators to connect with residency and fellowship candidates. Residency and fellowship programs can share information about their programs and open positions with applicants; applicants post their resume and contact information for programs to review. FindAResident is a supplement to the Electronic Residency Application Service (ERAS), providing services not fulfilled by ERAS.

MEDLOANS
www.aamc.org/students/medloans/start.htm
Contact: Nancy-Pat Weaver
E-mail: nweaver@aamc.org
The AAMC MEDLOANS Program was the first loan program specifically designed for medical students. MEDLOANS helps borrowers manage their student loans throughout medical school, residency, and repayment. MEDLOANS provides debt management workshops and materials for medical school financial aid officers, with debt management materials specifically designed for entrance, exit, and other debt management counseling.

GME Track
www.aamc.org/programs/gmetrack/start.htm
Contact: Jennifer Faerberg
E-mail: jfaerberg@aamc.org
This resident database and tracking system was introduced in March 2000 to assist GME administrators and program directors in the collection and management of GME data. GME Track contains the National GME Census, which is jointly conducted by the AAMC and the AMA.

Association for Hospital Medical Education (AHME)
The Association for Hospital Medical Education (AHME), founded in 1956, is a national, nonprofit professional organization involved in the continuum of hospital-based medical education—undergraduate, graduate, and continuing medical education. AHME's more than 600 members represent hundreds of teaching hospitals, academic medical centers, and consortia nationwide.
- The mission of AHME is to:
  - Promote improvement in medical education to meet health care needs
  - Serve as a forum and resource for medical education information
  - Develop professionals in the field of medical education
  - Advocate the value of medical education in health care
AHME offers training and current information for medical education professionals; mentoring and training from national experts on GME institutional administration; and collaboration with accreditation, regulatory, governmental, and other professional organizations in medical education.
AHME is celebrating its 50th anniversary in Chicago, Illinois, on May 10-13, 2006, during its Spring Educational Institute. To commemorate this occasion, AHME is publishing the "50th Anniversary Celebration: 1956-2006" book to describe AHME's history of service and honor AHME's leaders, friends, and supporters.

Publications
AHME News
www.ahme.org/publications/news.html
AHME News, published as a paper copy once per year, with quarterly "electronic" versions, offers news about the Association's committees and councils in addition to updates on governmental and accreditation issues affecting medical education.

Guide to Medical Education in the Teaching Hospital
www.ahme.org/publications/guide.html
A practical guide to help navigate the constantly changing landscape of GME. Originally published in 1984, the third edition is now available online in a special section of the AHME Web site, with new chapters added periodically and existing chapters updated as they are completed.
**Organization of Program Director Associations (OPDA)**

The Organization of Program Director Associations (OPDA), a component group of the Council of Medical Specialty Societies (CMSS), works to promote the role of the residency director and residency program director societies in achieving excellence in GME. Created in 2000, OPDA is a leadership consortium of residency program director (or chair) societies in each of the 27 medical and surgical specialties that correspond to 27 ACGME Residency Review Committees. Consisting of one liaison representative from each program director society, OPDA meets regularly to provide peer interaction, information sharing, and collaborative problem solving. In addition, OPDA sponsors periodic symposia and meetings on timely GME issues, provides a forum for communication with leaders in GME, and monitors and promotes GME excellence in the activities of AAMC, ACGME, NRMP, NBME, ECFMG, and other organizations that regulate and impact GME.

Recently, OPDA was invited to appoint representatives to two key organizations in medical education (ie, NRMP and ACGME) to represent OPDA and program director interests in matters of relevance to GME.

The following societies of program directors (or chairs) are currently represented on OPDA:

- **Allergy and immunology**
  Allergy/Immunology Training Program Directors
- **Anatomic and clinical pathology**
  Pathology Residency Directors Society (PRODS)
- **Anesthesiology**
  Association of Anesthesiology Program Directors (AAPD)
- **Colon and rectal surgery**
  Association of Program Directors for Colon and Rectal Surgery (APDCRS)
- **Dermatology**
  Association of Professors of Dermatology (APD)
- **Diagnostic radiology**
  Association of Program Directors of Radiology (APDR)
- **Emergency medicine**
  Council of Emergency Medicine Residency Directors (CORD)
- **Family medicine**
  Association of Family Medicine Residency Directors (AFMRD)
- **Internal medicine**
  Association of Program Directors in Internal Medicine (APDIM)
- **Medical genetics**
  Association of Professors of Human or Medical Genetics (APHMG)
- **Neurological surgery**
  Society of Neurological Surgeons (SNS)
- **Neurology**
  Consortium of Neurology Program Directors of the American Academy of Neurologists (AAN-CNPD)
- **Nuclear medicine**
  Society of Nuclear Medicine (SNM)
- **Obstetrics and gynecology**
  Council on Residency Education in Obstetrics and Gynecology (CREOG)
- **Ophthalmology**
  Association of University Professors of Ophthalmology (AUPO)
- **Orthopedic surgery**
  Academic Orthopedic Society (AOS)
- **Otolaryngology**
  Association of Academic Departments of Otolaryngology (AADO)
- **Pediatrics**
  Association of Pediatrics Program Directors (APPD)
- **Physical medicine and rehabilitation**
  Association of Academic Physiatrists (AAP/AAPMR)
- **Plastic surgery**
  Association of Academic Chairs of Plastic Surgery (AACPS)
- **Preventive and occupational medicine**
  American College of Occupational and Environmental Medicine's Section for Residency Program Directors (ACOEM-SRPD)
- **Psychiatry**
  American Association of Directors of Psychiatric Residency Training (AADPRT)
- **Radiation oncology**
  Society Chairs Academic Radiation Oncology Department (SCAROP)
- **Thoracic surgery**
  Association of Program Directors in Surgery (APDS)
- **Thoracic surgery**
  Thoracic Surgery Directors Association (TSDA)
- **Urology**
  Society of University Urologists (SUU)
- **Transitional year**
  Council of Transitional Year Program Directors (CTYPD)

**Council of Medical Specialty Societies**

As noted above, OPDA is a component group of the Council of Medical Specialty Societies (CMSS), founded in 1966 to provide an independent forum for the discussion by medical specialists of issues of national interest and mutual concern. CMSS membership is limited to those US medical specialty societies that represent diplomates certified by a Board recognized by the American Board of Medical Specialties (ABMS), with 23 national specialty organizations representing more than 439,000 physicians nationwide. CMSS serves to represent the views of specialist physicians in influencing policy, medical education, and accreditation from a broad, cross-specialty perspective.

Section II

Specialty/Subspecialty Information and Data

Included in this section are descriptions of the 126 specialties/subspecialties with residency/fellowship programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) and/or ACGME Program Requirements in effect. Also included are subspecialties for which a member board of the American Board of Medical Specialties (ABMS) offers certification. Subspecialties are listed alphabetically under each specialty.

Sources for the information and data in this section include:

- American Board of Medical Specialties, Which Medical Specialist for You?
  (PDF, 507KB)
  (Note: Unless otherwise indicated, all text in the "Professional Description" section of each specialty/subspecialty is taken from this document.)
- "Holding Steady," Modern Healthcare, July 18, 2005
- National Resident Matching Program (NRMP) 2005 Match Data, Association of American Medical Colleges (AAMC)

Note: Generally, data are shown for specialties/subspecialties in which at least one third of programs in that specialty/subspecialty selected an expanded listing in FREIDA Online."
Allergy and Immunology

Professional Description
An allergist-immunologist is trained in evaluation, physical and laboratory diagnosis, and management of disorders involving the immune system. Selected examples of such conditions include asthma, anaphylaxis, rhinitis, eczema, and adverse reactions to drugs, foods, and insect stings as well as immune deficiency diseases (both acquired and congenital), defects in host defense, and problems related to autoimmune disease, organ transplantation or malignancies of the immune system. As our understanding of the immune system develops, the scope of this specialty is widening.

Training programs are available at some medical centers to provide individuals with expertise in both allergy/immunology and adult rheumatology, or in both allergy/immunology and pediatric pulmonology. Such individuals are candidates for dual certification.

Source: American Board of Medical Specialties, Which Medical Specialties for You?

A certified specialist in allergy and immunology is a physician who previously has passed the certification examination of the American Board of Internal Medicine (ABIM) and/or the American Board of Pediatrics (ABP) with additional certification by the American Board of Allergy and Immunology (ABAI), a Conjoint Board of the ABIM and the ABP. Diplomates of the ABAI have detailed knowledge of the underlying pathophysiology and the diagnosis, treatment, and prevention of allergic diseases such as allergic rhinitis, allergic asthma, urticaria, anaphylaxis, hypersensitivity pneumonitis, alopecia and contact dermatitis, and allergic gastrointestinal disorders, as well as comparable clinical problems without an apparent allergic etiology or component such as vasomotor rhinitis, nonallergic asthma, and idiopathic and/or hereditary forms of urticaria and/or angioedema. Diplomates also have expertise in the management of pulmonary complications of certain of these diseases.

Diplomates of the ABAI also possess advanced understanding of the biology of inflammation, immunoochemistry, immunobiology, and pharmacology and experience in the application of this knowledge to the diagnosis, management, and therapy of immunologic diseases. This includes inborn or acquired defects of host resistance, autoimmune diseases, bone marrow and solid organ transplantation, gene replacement therapy, adverse drug reactions, and related conditions. Diplomates have demonstrated to the satisfaction of their peers that they possess the general qualifications specified and are ethical and humanistic practitioners of medicine.

Source: American Board of Allergy and Immunology, certification requirements

Prerequisites; Length of Training
Prior completion of internal medicine or pediatrics program; length of accredited programs is 2 years.

Subspecialties
No subspecialty programs accredited by the Accreditation Council for Graduate Medical Education; no subspecialty certificates offered by the ABAI. The ABAI, however, does offer formal special pathways for physicians seeking dual certification in allergy/immunology and pediatric pulmonology; allergy/immunology and pediatric rheumatology; and allergy/immunology and adult rheumatology. Additional information regarding special pathways is available upon request to the ABAI.

Data
Unless otherwise noted, all data are for 2004.

Anesthesiology

Professional Description
An anesthesiologist is trained to provide pain relief and maintenance, or restoration, of a stable condition during and immediately following an operation or an obstetric or diagnostic procedure. The anesthesiologist assesses the risk of the patient undergoing surgery and optimizes the patient's condition prior to, during, and after surgery. In addition to these management responsibilities, the anesthesiologist provides medical management and consultation in pain management and critical care medicine. Anesthesiologists
- Diagnose and treat acute, long-standing and cancer pain problems
- Diagnose and treat patients with critical illnesses or severe injuries
- Direct resuscitation in the care of patients with cardiac or respiratory emergencies, including the need for artificial ventilation
- Supervise post-anesthesia recovery

Prerequisites; Length of Training
Length of accredited programs is 3 years or 4 years (the latter includes the clinical base year).

Subspecialties
Subspecialty programs accredited by the ACGME
- Critical Care Medicine
- Pain Medicine
- Pediatric Anesthesiology

Subspecialty certificates offered by the American Board of Anesthesiology
- Critical Care Medicine
- Pain Medicine

Data
Unless otherwise noted, all data are for 2004.

Table 1. Anesthesiology Programs

| Number of accredited programs | 130 |
| Number of programs providing data | 77 |
| Length of accredited training | 3/4 |
| Minimum number of prior years of GME required | 1/0 |

Critical Care Medicine

Professional Description
An anesthesiologist who specializes in critical care medicine diagnoses, treats and supports patients with multiple organ dysfunction. This specialist may have administrative responsibilities for intensive care units and may also facilitate and coordinate patient care among the primary physician, the critical care staff, and other specialists.

Prerequisites; Length of Training
Completion of anesthesiology residency is required; length of accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2004.

Pain Medicine

Professional Description
An anesthesiologist who provides a high level of care, either as a primary physician or consultant, for patients experiencing problems with acute, chronic, and/or cancer pain in both hospital and ambulatory settings. Patient care needs may also be coordinated with other specialists.

Prerequisites; Length of Training
Completion of an anesthesiology residency is required; length of accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2004.

Table 1. Pain Medicine (Anesthesiology) Programs
| Number of accredited programs | 88 |
| Number of programs providing data | 32 |

Pediatric Anesthesiology

Professional Description
A pediatric anesthesiologist is a fully trained anesthesiologist who has completed at least 1 year of specialized training in anesthesia care of infants and children. Most pediatric surgeons deliver care to children in the operating room along with a pediatric anesthesiologist. Many children who need surgery have very complex medical problems that affect many parts of the body. The pediatric anesthesiologist is best qualified to evaluate these complex problems and plan a safe anesthetic for each child.

Pediatric anesthesiologists treat children from the newborn period through the teenage years. They choose to make pediatric care the core of their medical practice, and the unique nature of medical and surgical care of children is learned from advanced training and experience in practice.

Pediatric anesthesiologists are responsible for the general anesthesia, sedation, and pain management needs of infants and children. Pediatric anesthesiologists generally provide the following services:
- Evaluation of complex medical problems in infants and children when surgery is needed
- Planning and care for before and after surgery
- A nonthreatening environment for children in the operating room
- Pain control, if needed after surgery, either with intravenous (IV) medications or other anesthetic techniques
- Anesthesia and sedation for many procedures out of the operating room such as MRI, CT scan, and radiation therapy

Colon and Rectal Surgery

Professional Description
A colon and rectal surgeon is trained to diagnose and treat various diseases of the intestinal tract, colon, rectum, anal canal, and perianal area by medical and surgical means. This specialist also deals with other organs and tissues (such as the liver, urinary, and female reproductive system) involved with primary intestinal disease.

Colon and rectal surgeons have the expertise to diagnose and often manage anorectal conditions such as hemorrhoids, fissures (painful tears in the anal lining), abscesses, and fistulae (infections located around the anus and rectum) in the office setting.

They also treat problems of the intestine and colon and perform endoscopic procedures to evaluate and treat problems such as cancer, polyps (precancerous growths), and inflammatory conditions.

Prerequisites; Length of Training
Prior completion a minimum of 5 years of a general surgery program; length of accredited programs is 1 year.

Subspecialties
No subspecialty programs accredited by the Accreditation Council for Graduate Medical Education; no subspecialty certificates offered by the American Board of Colon and Rectal Surgery.

Data
Unless otherwise noted, all data are for 2004.

Table 1. Colon and Rectal Surgery Programs

Dermatology

Professional Description

A dermatologist is trained to diagnose and treat pediatric and adult patients with benign and malignant disorders of the skin, mouth, external genitalia, hair, and nails, and those with a number of sexually transmitted diseases. The dermatologist has had additional training and experience in the diagnosis and treatment of skin cancers, melanomas, moles, and other tumors of the skin, the management of contact dermatitis, and other allergic and nonallergic skin disorders, and in the recognition of the skin manifestations of systemic (including internal malignancy) and infectious diseases. Dermatologists have special training in dermatopathology and in the surgical techniques used in dermatology. They also have expertise in the management of cosmetic disorders of the skin, such as hair loss and scars, and the skin changes associated with aging.

Source: American Board of Medical Specialties, Which Medical Specialist for You?

Dermatologists perform many specialized diagnostic procedures including microscopic examination of skin biopsy specimens, cytological smears, patch tests, photo tests, potassium hydroxide (KOH) preparations, fungus cultures, and other microbiologic examination of skin scrapings and secretions. Treatment methods used by dermatologists include externally applied, injected, and internal medications, selected x-ray and ultraviolet light therapy, and a range of dermatologic surgical procedures. The training and experience of dermatologists in dermatologic surgery include electrosurgery, cryosurgery with the use of freezing surgical units, laser surgery, nail surgery, biopsy techniques and excisional surgery with appropriate closures, including flaps and grafts. Among some of the techniques used by dermatologists for the correction of cosmetic defects are dermabrasion, chemical face peels, hair transplants, injections of materials into the skin for scar revision, sclerosis of veins, and laser surgery of vascular lesions of the skin, including certain birth marks. Patients seeking a dermatologist may come directly or may be referred by another physician. A certified specialist in dermatology may subspecialize and become certified for Special Qualification.

Source: American Academy of Dermatology

Prerequisites; Length of Training

No prerequisites required when entering programs with an accredited length of 4 years. A broad-based clinical year of training in an ACGME-accredited program is required when entering a 3-year program.

Subspecialties

Subspecialty programs accredited by the ACGME

- Dermatopathology
- Procedural dermatology

American Board of Dermatology subspecialty certificates:

- Clinical and laboratory dermatological immunology
- Dermatopathology
- Pediatric dermatology

Clinical and Laboratory Dermatological Immunology

Professional Description
A dermatologist who utilizes various specialized laboratory procedures to diagnose disorders characterized by defective responses of the body's immune system. Immunodermatologists also may provide consultation in the management of these disorders and administer specialized forms of therapy for these diseases.

Prerequisites; Length of Training
Completion of an dermatology residency is required; length of accredited programs is 1 year.

For more information
American Academy of Dermatology

Dermatopathology

Professional Description
A dermatopathologist has the expertise to diagnose and monitor diseases of the skin including infectious, immunologic, degenerative, and neoplastic diseases. This entails the examination and interpretation of specially prepared tissue sections, cellular scrapings, and smears of skin lesions by means of routine and special (electron and fluorescent) microscopes.

Prerequisites; Length of Training
Completion of an dermatology or pathology residency is required; length of accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2004.

Emergency Medicine

Professional Description
An emergency physician focuses on the immediate decision making and action necessary to prevent death or any further disability both in the pre-hospital setting by directing emergency medical technicians and in the emergency department. The emergency physician provides immediate recognition, evaluation, care, stabilization, and disposition of a generally diversified population of adult and pediatric patients in response to acute illness and injury.

Prerequisites; Length of Training
No prerequisites required when entering programs with an accredited length of 4 years. A broad-based clinical year of training in an ACGME-accredited program is required when entering a 3-year program.

Subspecialties
Subspecialty programs accredited by the ACGME
- Medical toxicology
- Pediatric emergency medicine
- Sports medicine
- Undersea and hyperbaric medicine

American Board of Emergency Medicine subspecialty certificates
- Medical toxicology
- Pediatric emergency medicine
- Sports medicine
- Undersea and hyperbaric medicine

Sports Medicine

Professional Description
An emergency physician with special knowledge in sports medicine is responsible for continuous care in the field of sports medicine, not only for the enhancement of health and fitness, but also for the prevention and management of injury and illness. A sports medicine physician has knowledge and experience in the promotion of wellness and the role of exercise in promoting a healthy lifestyle. Knowledge of exercise physiology, biomechanics, nutrition, psychology, physical rehabilitation, and epidemiology is essential to the practice of sports medicine.

Prerequisites; Length of Training
Completion of an ACGME-accredited residency is required; length of accredited programs is 1 year.

For more information

Undersea and Hyperbaric Medicine

Professional Description
An emergency medicine physician who, with additional and specialized training, has expertise in the treatment of decompression illness and diving accident cases and uses hyperbaric oxygen therapy treatment for conditions such as carbon monoxide poisoning, gas gangrene, non-healing wounds, tissue damage from radiation and burns, and bone infections. This specialist also serves as consultant to other physicians in all aspects of hyperbaric chamber operations, and assesses risks and applies appropriate standards to prevent disease and disability in divers and other persons working in altered atmospheric conditions.

Prerequisites; Length of Training
Completion of an ACGME-accredited residency is required; length of accredited programs is 1 year.

Family Medicine

Professional Description
A family physician is concerned with the total health care of the individual and the family, and is trained to diagnose and treat a wide variety of ailments in patients of all ages. The family physician receives a broad range of training that includes internal medicine, pediatrics, obstetrics and gynecology, psychiatry, and geriatrics. Special emphasis is placed on prevention and the primary care of entire families, utilizing consultations and community resources when appropriate.

Source: American Board of Medical Specialties, Which Medical Specialist is for You?

Family medicine is the medical specialty which is concerned with the total health care of the individual and the family. It is the specialty in breadth which integrates the biological, clinical, and behavioral sciences. The scope of family medicine is not limited by age, sex, organ system, or disease entity.

Source: American Board of Family Medicine

Prerequisites; Length of Training
No prerequisites required; ACGME-accredited programs are 3 years.

Subspecialties
Subspecialty programs accredited by the ACGME
- Geriatric medicine
- Sports medicine

American Board of Family Medicine subspecialty certificates
- Adolescent medicine
- Geriatric medicine
- Sports medicine

Sports Medicine

Professional Description

A family physician who is trained to be responsible for continuous care in the field of sports medicine, not only for the enhancement of health and fitness, but also for the prevention of injury and illness. A sports medicine physician must have knowledge and experience in the promotion of wellness and the prevention of injury. Knowledge about special areas of medicine such as exercise physiology, biomechanics, nutrition, psychology, physical rehabilitation, epidemiology, physical evaluation, injuries (treatment and prevention and referral practice), and the role of exercise in promoting a healthy lifestyle are essential to the practice of sports medicine. The sports medicine physician requires special education to provide the knowledge to improve the health care of the individual engaged in physical exercise (sports) whether as an individual or in team participation.

Prerequisites; Length of Training

Completion of an ACGME-accredited residency is required. ACGME-accredited programs are 1-year programs.

Data

Unless otherwise noted, all data are for 2004.

Internal Medicine

**Professional Description**

Internal medicine is the largest primary care specialty in the United States and is an ever-changing and rapidly advancing discipline. Doctors of internal medicine are known as "internists" or "general internists," and should not be confused with "interns" who are doctors in their first year of training after medical school. Internists are not the same as "general practitioners" (GPs) or "family physicians" (FPs) whose practices may include surgery, obstetrics, and pediatrics and whose training is not solely concentrated on adults.

Because internal medicine is expansive, internists must continually update their knowledge in many areas including allergy, arthritis, blood diseases, cancer, diabetes, digestive diseases, illness in the elderly, diseases of the heart and blood vessels, hormonal disorders, infections, intensive care, kidney diseases, and respiratory disorders.

The practice of internal medicine also incorporates an understanding of wellness (disease prevention and health promotion), women's health, substance abuse, mental health, and medical ethics, as well as effective treatment of common problems of the eyes, ears, skin, nervous system, and reproductive organs.

## Cardiovascular Disease

### Professional Description
An internist who specializes in diseases of the heart and blood vessels and manages complex cardiac conditions such as heart attacks and life-threatening, abnormal heart rhythms.

### Prerequisites; Length of Training
Completion of a 3-year ACGME-accredited residency program in internal medicine is required; ACGME-accredited programs in cardiovascular disease are 3 years.

### Data
Unless otherwise noted, all data are for 2004.

Clinical Cardiac Electrophysiology

Professional Description
A field of special interest within the subspecialty of cardiovascular disease that involves intricate technical procedures to evaluate heart rhythms and determine appropriate treatment for them.

Prerequisites; Length of Training
Completion of a 3-year ACGME-accredited residency program in cardiovascular disease is required; ACGME-accredited programs in clinical cardiac electrophysiology are 1 year.

Data
Unless otherwise noted, all data are for 2004.

Critical Care Medicine
Professional Description
An internist who diagnoses, treats, and supports patients with multiple organ dysfunction. This specialist may have administrative responsibilities for intensive care units and may also facilitate and coordinate patient care among the primary physician, the critical care staff, and other specialists.

Prerequisites; Length of Training
Completion of a 3-year ACGME-accredited residency program in internal medicine is required; ACGME-accredited programs in critical care medicine are 2 years.

Data
Unless otherwise noted, all data are for 2004.

Geriatric Medicine

Professional Description
An internist who has special knowledge of the aging process and special skills in the diagnostic, therapeutic, preventive, and rehabilitative aspects of illness in the elderly. This specialist cares for geriatric patients in the patient’s home, the office, long-term care settings such as nursing homes, and the hospital.

Prerequisites; Length of Training
Completion of a 3-year ACGME-accredited residency program in internal medicine is required; ACGME-accredited programs in geriatric medicine are 1 year.

Data
Unless otherwise noted, all data are for 2004.

Table 1. Geriatric Medicine (Internal Medicine) Programs
Number of accredited programs 103
Number of programs providing data 51
Length of accredited training 1
Minimum number of prior years of GME required 3
Offers graduate year 1 positions, available immediately upon medical school completion No
Average number of interviews for program year 1 positions 13.3
Percent new program directors, 2004-2005 academic year (source: ACGME) 12.0%

Residents/Fellows
Total number of active residents/fellows 288
Average number of residents/fellows per program 2.8
Average percent female 54.9%
Average percent international medical graduate 55.6%

Program Faculty
Average number of full-time physician faculty 12.2
Average number of part-time physician faculty 5.0
Average percent female full-time physician faculty 41.8%
Average ratio of full-time physician faculty to resident/fellow 1.6

Work Schedule (Program Year 1)
Average hours on duty per week 44.6
Average maximum consecutive hours on duty 12.6
Average days off duty per week 1.7
Moonlighting allowed within institution 66.7%
Night float system 2.0%
Offers awareness and management of fatigue in residents/fellows 72.5%

Educational Setting (Program Year 1)
Average hours/week of regularly scheduled lectures/conferences 4.2
Average percent of training in hospital outpatient clinics 33.9%
Average percent of training in nonhospital ambulatory care community settings 18.3%

Educational Benefits
Program to assess/enhance medical professionalism 64.7%
Debt management/financial counseling 41.2%
Formal program to develop teaching skills 96.1%
Formal mentoring program 62.7%
Continuous quality improvement training 92.2%
International experience 7.8%
Resident/fellow retreats 35.3%
Off-campus electives 66.7%
Hospice/home care experience 100.0%
Cultural competence awareness 78.4%
Instruction in medical Spanish or other non-English language 19.6%

Alternative/complementary medicine curriculum 25.5%
Training in identifying and reporting of domestic violence/abuse 62.7%
MPH/MBA training 33.3%
PhD training 9.8%
Research rotation 31.4%

Educational Features
Offers additional training or educational experience beyond accredited length 92.2%
Residents supervise medical students 23.5%
Offers a primary care track 23.5%
Offers a rural track 0.0%
Offers a women’s health track 3.9%
Offers a hospitalist track 5.9%
Offers a research track/nonaccredited fellowship 41.2%
Offers an other track 17.6%

Evaluation
Yearly specialty in-service examination required (Advancement is not based on exam result) 9.8%
Approximate program completion rate 88.2%

Program Uses the Following to Evaluate Program Quality
Program graduation rates 88.2%
Board certification rates 94.1%
In-training examinations 13.7%
Performance-based assessments 37.3%

Employment Policies and Benefits
On-site child care 38.2%
Subsidized child care 2.0%
Allowance/stipend for professional expenses 90.2%
Leave for educational meetings/conferences 98.0%
Moving allowance 3.9%
Housing stipend 3.9%
On-call meal allowance 31.4%
Free parking 56.9%
PDAs 11.8%
Placement assistance upon completion of program 31.4%
Cross coverage in case of illness/disability 88.2%

Compensation and Leave (Graduate Year 1)
Average resident/fellow compensation $16,828
Average number weeks of vacation 5.4
Sick days (paid) 24.1

Leave Availability
Maternity leave for birth 96.1%
Paternity leave for birth 86.3%
Maternity leave for adoption 88.2%
Paternity leave for adoption 82.4%
Family leave 98.0%
Medical leave 100.0%

Major Medical Benefits
Major medical insurance for residents 98.0%
Major medical insurance for dependents 94.1%
Outpatient mental health insurance 47.1%
Inpatient mental health insurance 94.1%
Group life insurance 82.4%
Dental insurance 82.4%
Disability insurance 90.2%
Disability insurance for occupationally acquired HIV 70.6%
Hematology

Professional Description
An internist with additional training who specializes in blood diseases. This specialist treats diseases such as anemia, hemophilia, and sickle cell disease as well as cancers such as leukemia, lymphoma, and multiple myeloma.

Prerequisites; Length of Training
Completion of a 3-year ACGME-accredited residency program in internal medicine is required; ACGME-accredited programs in hematology are 2 years.

Data
Unless otherwise noted, all data are for 2004.

Infectious Disease

Professional Description
An internist who deals with infectious diseases of all types and in all organ systems. Conditions requiring selective use of antibiotics call for this special skill. This physician often diagnoses and treats AIDS patients and patients who have fevers that have not been explained. Infectious disease specialists may also have expertise in preventive medicine and travel medicine.

Prerequisites; Length of Training
Completion of a 3-year ACGME-accredited residency program in internal medicine is required; ACGME-accredited programs in infectious disease are 2 years.

Data
Unless otherwise noted, all data are for 2004.

Table 1. Infectious Disease (Internal Medicine) Programs

| Number of accredited programs | 141 |
| Number of programs providing data | 71 |
| Length of accredited training | 2 |

Interventional Cardiology

Professional Description
An area of medicine within the subspecialty of cardiology that uses specialized imaging and other diagnostic techniques to evaluate blood flow and pressure in the coronary arteries and chambers of the heart and uses technical procedures and medications to treat abnormalities that impair the function of the cardiovascular system.

Prerequisites; Length of Training
Completion of a 3-year ACGME-accredited residency program in cardiovascular disease is required; ACGME-accredited programs in interventional cardiology are 1 year.

Data
Unless otherwise noted, all data are for 2004.

Nephrology

Professional Description
An internist who treats disorders of the kidney, high blood pressure, fluid and mineral balance, and dialysis of body wastes when the kidneys do not function. This specialist consults with surgeons about kidney transplantation.

Prerequisites; Length of Training
Completion of a 3-year ACGME-accredited residency program in internal medicine is required; ACGME accredited programs in nephrology are 2 years.

Data
Unless otherwise noted, all data are for 2004.

### Table 1. Nephrology (Internal Medicine) Programs

| Allowance/stipend for professional expenses | 87.5% |
| Leave for educational meetings/conferences | 98.2% |
| Moving allowance | 3.6% |
| Housing stipend | 5.4% |
| On-call meal allowance | 62.5% |
| Free parking | 62.5% |
| PDAs | 16.1% |
| Placement assistance upon completion of program | 7.1% |
| Cross coverage in case of illness/disability | 82.1% |
| **Compensation and Leave (Graduate Year 1)** | |
| Average resident/fellow compensation | $51,500 |
| Average number of weeks of vacation | 3.4 |
| Sick days (paid) | 21.1 |
| **Leave Availability** | |
| Maternity leave for birth | 94.6% |
| Paternity leave for birth | 91.1% |
| Maternity leave for adoption | 88.3% |
| Paternity leave for adoption | 87.5% |
| Family leave | 91.1% |
| Medical leave | 94.6% |
| **Major Medical Benefits** | |
| Major medical insurance for residents | 100.0% |
| Major medical insurance for dependents | 96.4% |
| Outpatient mental health insurance | 41.1% |
| Inpatient mental health insurance | 92.9% |
| Group life insurance | 91.1% |
| Dental insurance | 91.1% |
| Disability insurance | 98.2% |
| Disability insurance for occupationally acquired HIV | 76.8% |

Offers graduate year 1 positions, available immediately upon medical school completion: No
Average number of interviews for program year 1 positions: 13.5
Percent new program directors, 2004-2005 academic year (source: ACGME): 11.5%

**Residents/Fellows**
Total number of active residents/fellows: 772
Average number of residents/fellows per program: 5.8
Average percent female: 31.5%
Average percent international medical graduate: 40.3%

**Program Faculty**
Average number of full-time physician faculty: 10.7
Average number of part-time physician faculty: 1.2
Average percent female full-time physician faculty: 21.6%
Average ratio of full-time physician faculty to resident/fellow: 1.2

**Work Schedule (Program Year 1)**
Average hours on duty per week: 52.2
Average maximum consecutive hours on duty: 17.5
Average days off duty per week: 1.5
Moonlighting allowed within institution: 64.3%
Night float system: 3.6%

**Educational Setting (Program Year 1)**
Average hours/week of regularly scheduled lectures/conferences: 4.8
Average percent of training in hospital outpatient clinics: 21.5%
Average percent of training in nonhospital ambulatory care community settings: 7.3%

**Educational Benefits**
- Program to assess/enhance medical professionalism: 53.6%
- Debt management/financial counseling: 44.6%
- Formal program to develop teaching skills: 75.0%
- Formal mentoring program: 44.6%
- Continuous quality improvement training: 80.4%
- International experience: 10.7%
- Resident/fellow retreats: 25.0%
- Off-campus electives: 48.2%
- Hospice/home care experience: 12.5%
- Cultural competence awareness: 67.9%
- Instruction in medical Spanish or other non-English language: 21.4%
- Alternative/complementary medicine curriculum: 21.4%
- Training in identifying and reporting of domestic violence/abuse: 35.7%
- MPH/MBA training: 19.6%
- PhD training: 10.7%
- Research rotation: 87.5%

**Educational Features**
- Offers additional training or educational experience beyond accredited length: 98.2%
- Residents supervise medical students: 3.6%
- Offers a primary care track: 3.6%
- Offers a rural track: 0.0%
- Offers a women's health track: 0.0%
- Offers a hospitalist track: 0.0%
- Offers a research track/nonaccredited fellowship: 28.6%
- Offers an other track: 14.3%

**Evaluation**
Yearly specialty in-service examination required (Advancement is not based on exam results): 28.9%
Approximate program completion rate: 73.2%

**Program Uses the Fellow to Evaluate Program Quality**
Program graduation rates: 73.2%
Board certification rates: 92.9%

Sleep Medicine

Professional Description
Sleep medicine is a discipline of medical practice in which sleep disorders are assessed, monitored, treated, and prevented by using a combination of techniques (clinical evaluation, physiologic testing, imaging, and intervention) and medication. Specialists in sleep medicine are expected to:
• Participate in an interdisciplinary care of patients of all ages that incorporates aspects of psychiatry, neurology, internal medicine, epidemiology, surgery, pediatrics and basic science
• Acquire detailed knowledge of the sleep and respiratory control centers, physiology, and neurobiology underlying sleep and wakefulness
• Diagnose and manage sleep disorder patients in outpatient and inpatient settings

Source: Sleep Medicine Program Requirements, ACGME
www.acgme.org/acWebsite/downloads/RRC_progReq/520pr604_u605.pdf

Prerequisites; Length of Training
Completion of an ACGME-accredited residency program in internal medicine, pulmonology, psychiatry, pediatrics, neurology, or otolaryngology is required; ACGME-accredited programs in sleep medicine are 1 year.

Sports Medicine

Professional Description
An internist trained to be responsible for continuous care in the field of sports medicine, not only for the enhancement of health and fitness, but also for the prevention of injury and illness. A sports medicine physician must have knowledge and experience in the promotion of wellness and the prevention of injury. Knowledge about special areas of medicine such as exercise physiology, biomechanics, nutrition, psychology, physical rehabilitation, epidemiology, physical evaluation, injuries (treatment and prevention and referral practices), and the role of exercise in promoting a
healthy lifestyle are essential to the practice of sports medicine. The sports medicine physician requires special education to provide the knowledge to improve the health care of the individual engaged in physical exercise (sports) whether as an individual or in team participation.

Prerequisites; Length of Training
Completion of a 3-year ACGME-accredited residency program in internal medicine is required; ACGME-accredited programs in sports medicine are 1 year.

Transplant Hepatology
Professional Description
An internist with special knowledge and the skill required of a gastroenterologist to care for patients prior to and following hepatic transplantation that spans all phases of liver transplantation. Selection of appropriate recipients requires assessment by a team having experience in evaluating the severity and prognosis of patients with liver disease.

Prerequisites; Length of Training
Completion of an ACGME-accredited residency is required; programs are 1 year. Until transplant hepatology programs are separately accredited by the ACGME, transplant hepatology training must occur within programs affiliated with an ACGME-accredited gastroenterology program.

Medical Genetics
Professional Description
A specialist trained in diagnostic and therapeutic procedures for patients with genetically linked diseases. This specialist uses modern cytogenetic, radiologic, and biochemical testing to assist in specialized genetic counseling, implements needed therapeutic interventions, and provides prevention through prenatal diagnosis.

A medical geneticist plans and coordinates large-scale screening programs for inborn errors of metabolism, hemoglobinopathies, chromosome abnormalities, and neural tube defects.

Prerequisites; Length of Training
No prerequisites are required when entering a 4-year program; 2 years of ACGME-accredited GME are required when entering a 2-year program. Length of accredited programs is 2 years or 4 years.

Subspecialties
Subspecialty programs accredited by the ACGME
- Molecular Genetic Pathology

Note: Programs are jointly accredited by the Residency Review Committees for Medical Genetics and Pathology.

American Board of Medical Genetics subspecialty certificates
- Clinical Biochemical Genetics
- Clinical Cytogenetics
- Clinical Genetics
- Clinical Molecular Genetics
- PhD, Medical Genetics
- Molecular Genetic Pathology

Note: Molecular Genetic Pathology certification is jointly offered by the American Board of Medical Genetics and American Board of Pathology.

Clinical Biochemical Genetics

Professional Description
A clinical biochemical geneticist demonstrates competence in performing and interpreting biochemical analyses relevant to the diagnosis and management of human genetic diseases, and is a consultant regarding laboratory diagnosis of a broad range of inherited disorders.

Prerequisites; Length of Training
A US earned doctoral degree (MD, DO, PhD, or the equivalent) is required. Length of ABMG-accredited programs is 2 years.

Molecular Genetic Pathology

Professional Description
A molecular genetic pathologist is expert in the principles, theory, and technologies of molecular biology and molecular genetics. This expertise is used to make or confirm diagnoses of Mendelian genetic disorders, of human development, infectious diseases and malignancies, and to assess the natural history of those disorders. A molecular genetic pathologist provides information about gene structure, function, and alteration and applies laboratory...
techniques for diagnosis, treatment, and prognosis for individuals with related disorders.

**Prerequisites; Length of Training**
Completion of a 4-year ACGME-accredited program in pathology or medical genetics is required. Length of ACGME-accredited molecular genetic pathology programs is 1 year.

**For more information**

---

**Neurological Surgery**

**Professional Description**
Neurological surgery is a discipline of medicine and the specialty of surgery that provides the operative and nonoperative management (ie, prevention, diagnosis, evaluation, treatment, critical care, and rehabilitation) of disorders of the central, peripheral, and autonomic nervous systems, including their supporting structures and vascular supply; the evaluation and treatment of pathological processes that modify the function or activity of the nervous system, including the hypothysis; and the operative and nonoperative management of pain. As such, neurological surgery encompasses the surgical, nonsurgical, and stereotactic radiosurgical treatment of adult and pediatric patients with disorders of the nervous system: disorders of the brain, meninges, skull, and skull base, and their blood supply; including the surgical and endovascular treatment of disorders of the intracranial and extracranial vasculature supplying the brain and spinal cord; disorders of the pituitary gland; disorders of the spinal cord, meninges, and vertebral column, including those that may require treatment by fusion, instrumentation, or endovascular techniques; and disorders of the cranial, peripheral, and spinal nerves throughout their distribution.

*Source: American Board of Neurological Surgery*

**Prerequisites; Length of Training**
One year in an ACGME-accredited general surgery program or at least 1 year in a program accredited for the acquisition of fundamental clinical skills is required. Length of accredited programs is 5 years.

**Subspecialties**

- Endovascular Surgical Neuroradiology

**American Board of Neurological Surgery subspecialty certificates**

None.

**Data**
Unless otherwise noted, all data are for 2004.

Endovascular Surgical Neuroradiology

Professional Description
Endovascular surgical neuroradiology is a subspecialty that uses catheter technology, radiologic imaging, and clinical expertise to diagnose and treat diseases of the central nervous system. Practitioners have training and experience in:
- Signs and symptoms of disorders amenable to diagnosis and treatment by endovascular surgical neuroradiology techniques
- Neurological examinations to evaluate patients with neurological disorders
- Pathophysiologic and natural history of these disorders
- Indications and contraindications to endovascular surgical neuroradiology procedures
- Clinical and technical aspects of endovascular surgical neuroradiology procedures
- Medical and surgical alternatives
- Preoperative and postoperative management of endovascular patients
- Neurointensive care management
- Fundamentals of imaging physics and radiation biology
- Interpretation of radiographic studies pertinent to the practice

Neurology

Professional Description
A neurologist specializes in the diagnosis and treatment of all types of disease or impaired function of the brain, spinal cord, peripheral nerves, muscles, and autonomic nervous system, as well as the blood vessels that relate to these structures. A child neurologist has special skills in the diagnosis and management of neurologic disorders of the neonatal period, infancy, early childhood, and adolescence.

Prerequisites; Length of Training
Programs are either 3 years or 4 years. Residents entering a 3-year program must have completed 1 year in an accredited program in the US or Canada.

Subspecialties
Subspecialty programs accredited by the ACGME
- Child neurology
- Clinical neurophysiology
- Neurodevelopmental disabilities
- Neuromuscular medicine
- Pain medicine
- Sleep medicine
- Vascular neurology

American Board of Psychiatry and Neurology subspecialty certificates
- Child neurology (special certification)
- Clinical neurophysiology
- Neurodevelopmental disabilities
- Pain medicine
- Sleep medicine
- Vascular neurology

Child Neurology

Professional Description
A child neurologist has special skills in the diagnosis and management of neurologic disorders of the neonatal period, infancy, early childhood, and adolescence.

Prerequisites; Length of Training
The three options for prerequisite training are 2 years of pediatrics training in the US or Canada; 1 year of general internal medicine and 1 year of pediatrics; or 1 year of pediatrics and 1 year of basic neuroscience training. Length of ACGME-accredited programs is 3 years.

Data
Unless otherwise noted, all data are for 2004.

Clinical Neurophysiology

Professional Description
A neurologist who specializes in the diagnosis and management of central, peripheral, and autonomic nervous system disorders using a combination of clinical evaluation and electrophysiologic testing, such as electroencephalography (EEG), electromyography (EMG), and nerve conduction studies (NCs), among others.

Prerequisites; Length of Training
Completion of an accredited neurology, child neurology, or psychiatry program in the US or Canada is required. Length of ACGME-accredited programs is 1 year.

Neurodevelopmental Disabilities

Professional Description
A pediatrician or neurologist who specializes in the diagnosis and management of chronic conditions that affect the developing and mature nervous system, such as cerebral palsy, mental retardation, and chronic behavioral syndromes or neurologic conditions.

Prerequisites; Length of Training
Completion of 2 yrs of an accredited pediatrics program in the US or Canada is required. Length of ACGME-accredited programs is 4 years.

Neuromuscular Medicine

Professional Description
A neurologist or child neurologist specializing in the diagnosis and management of disorders of nerve, muscle, or neuromuscular junction, including amyotrophic lateral sclerosis, peripheral neuropathies (eg, diabetic and immune mediated neuropathies), various muscular dystrophies, congenital and acquired myopathies, inflammatory myopathies (eg, polymyositis, inclusion body myositis), and neuromuscular transmission disorders (eg, myasthenia gravis, Lambert-Eaton myasthenic syndrome).

Source: American Board of Psychiatry and Neurology

Prerequisites; Length of Training
Successfully completion of an ACGME- or RCPSC-accredited residency program in either adult or pediatric neurology or physical medicine and rehabilitation is required. Length of ACGME-accredited programs is 1 year.

Sleep Medicine

Professional Description
A neurologist, child neurologist, or psychiatrist who specializes in the diagnosis and management of sleep-related clinical conditions, including circadian rhythm disorders. This subspecialty includes the clinical assessment, polysomnographic evaluation, and treatment of sleep disorders including insomnias, disorders of excessive sleepiness (eg, narcolepsy), sleep-related breathing disorders (such as obstructive sleep apnea), parasomnias, circadian rhythm disorders, sleep related movement disorders, and other conditions pertaining to the sleep-wake cycle.

Source: American Board of Psychiatry and Neurology

Prerequisites; Length of Training
Completion of an ACGME-accredited residency program in internal medicine, pulmonology, psychiatry, pediatrics, neurology, or otolaryngology is required; ACGME-accredited programs in sleep medicine are 1 year.

Pain Medicine

Professional Description
A neurologist or child neurologist who provides a high level of care, either as a primary physician or consultant, for patients experiencing problems with acute, chronic, or cancer pain in both hospital and ambulatory settings. Patient care needs may also be coordinated with other specialists.

Prerequisites; Length of Training
Completion of an accredited neurology program is required. Length of ACGME-accredited programs is 1 year.

Disability insurance for occupationally acquired HIV 70.7%
Vascular Neurology

Professional Description
A neurologist or child neurologist who specializes in the evaluation, prevention, treatment, and recovery from vascular diseases of the nervous system. This subspecialty includes the diagnosis and treatment of vascular events of arterial or venous origin from a large number of causes that affect the brain or spinal cord; such as ischemic stroke, intracranial hemorrhage, spinal cord ischemia, and spinal cord hemorrhage.

Source: American Board of Psychiatry and Neurology

Prerequisites; Length of Training
Completion of an accredited neurology program is required. Length of ACGME-accredited programs is 1 year.

Nuclear Medicine

Professional Description
A nuclear medicine specialist employs the properties of radioactive atoms and molecules in the diagnosis and treatment of disease and in research. Radiation detection and imaging instrument systems are used to detect disease as it changes the function and metabolism of normal cells, tissues, and organs. A wide variety of diseases can be found in this way, usually before the structure of the organ involved by the disease can be seen to be abnormal by any other techniques. Early detection of coronary artery disease (including acute heart attack); early cancer detection and evaluation of the effect of tumor treatment; diagnosis of infection and inflammation anywhere in the body; and early detection of blood clot in the lungs are all possible with these techniques. Unique forms of radioactive molecules can attack and kill cancer cells (eg, lymphoma, thyroid cancer) or can relieve the severe pain of cancer that has spread to bone.

The nuclear medicine specialist has special knowledge in the biologic effects of radiation exposure, the fundamentals of the physical sciences, and the principles and operation of radiation detection and imaging instrumentation systems.

Prerequisites; Length of Training
Prior to entering a nuclear medicine program, residents must have completed 1 year of broad clinical education in an accredited program in the US or Canada. Nuclear medicine programs are 2 years.

Subspecialties
No subspecialty programs accredited by the Accreditation Council for Graduate Medical Education; no subspecialty certificates offered by the American Board of Nuclear Medicine.

Data
Unless otherwise noted, all data are for 2004.

Critical Care Medicine

Professional Description
An obstetrician-gynecologist who specializes in critical care medicine diagnoses, treats, and supports female patients with multiple organ dysfunction. This specialist may have administrative responsibilities for intensive care units and may also facilitate and coordinate patient care among the primary physician, the critical care staff, and other specialists.

Prerequisites; Length of Training
To earn the certificate in Obstetrics and Gynecology with Added Qualification in Critical Care from the ABOG, the applicant must have completed a program of no less than 1 year in length that fulfills the requirements of the American Board of Surgery for Surgical Critical Care or the American Board of Anesthesiology for Critical Care Medicine.

For more information
Society of Critical Care Medicine
701 Lee Street, Ste 200
Des Plaines, IL 60016

Maternal-Fetal Medicine

Professional Description
An obstetrician-gynecologist who cares for, or provides consultation on, patients with complications of pregnancy. This specialist has advanced knowledge of the obstetrical, medical, and surgical complications of pregnancy and their effect on both the mother and the fetus. He/she also possesses expertise in the most current diagnostic and treatment modalities used in the care of patients with complicated pregnancies.

Prerequisites; Length of Training
Completion of an ACGME-accredited obstetrics-gynecology program is required. Length of ABOG-accredited maternal-fetal medicine programs is 3 years.

For more information

Gynecologic Oncology

Professional Description
An obstetrician-gynecologist who provides consultation and comprehensive management of patients with gynecologic cancer, including those diagnostic and therapeutic procedures necessary for the total care of the patient with gynecologic cancer and resulting complications.

Prerequisites; Length of Training
Completion of an ACGME-accredited obstetrics-gynecology program is required. Length of ABOG-accredited gynecologic oncology programs is 3 years.
Ophthalmology

Professional Description
An ophthalmologist has the knowledge and professional skills needed to provide comprehensive eye and vision care. Ophthalmologists are medically trained to diagnose, monitor, and medically or surgically treat all ocular and visual disorders. This includes problems affecting the eye and its component structures, the eyelids, the orbit, and the visual pathways. In so doing, an ophthalmologist prescribes vision services, including glasses and contact lenses.

Prerequisites; Length of Training
One year of education in an accredited program is required. Ophthalmology programs are 3 years.

Subspecialties
No subspecialty programs accredited by the Accreditation Council for Graduate Medical Education; no subspecialty certificates offered by the American Board of Ophthalmology.

Data
Unless otherwise noted, all data are for 2004.

Orthopaedic Surgery

Professional Description
An orthopaedic surgeon is trained in preserving, investigating, and restoring the form and function of the extremities, spine, and associated structures by medical, surgical, and physical means.

An orthopaedic surgeon is involved with the care of patients whose musculoskeletal problems include congenital deformities, trauma, infections, tumors, metabolic disturbances of the musculoskeletal system, deformities, injuries, and degenerative diseases of the spine, hands, feet, knee, hip, shoulder, and elbow in children and adults. An orthopaedic surgeon is also concerned with primary and secondary muscular problems and the effects of central or peripheral nervous system lesions of the musculoskeletal system.

Prerequisites; Length of Training
No previous GME is required; length of accredited programs is 5 years.

Subspecialties

Subspecialty programs accredited by the ACGME
- Adult reconstructive orthopaedics
- Foot and ankle orthopaedics
- Hand surgery
- Musculoskeletal oncology
- Orthopaedic sports medicine
- Orthopaedic surgery of the spine
- Orthopaedic trauma
- Pediatric orthopaedics

American Board of Orthopaedic Surgery subspecialty certificates
- Orthopaedic sports medicine
- Surgery of the hand

Data
Unless otherwise noted, all data are for 2004.

Adult Reconstructive Orthopaedics

Professional Description
Adult reconstructive orthopaedics includes the in-depth study, prevention, and reconstructive treatment of musculoskeletal diseases, disorders, and sequelae of injuries by medical, physical, and surgical methods in patients 17 years and older. An educational program in adult reconstructive orthopaedics may include the care of arthritis and related disorders in many anatomic regions or be limited to areas such as the hip, knee, shoulder, elbow, or ankle and foot.

Source: Adult Reconstructive Orthopaedics Program Requirements, ACGME

Musculoskeletal Oncology

Professional Description

Musculoskeletal oncology is the component of orthopaedic surgery that is focused on the diagnosis and treatment of children and adults with benign and malignant tumors of bone and connective soft tissues. The field also includes the diagnosis, treatment, and palliative care of patients with metastatic carcinoma to the skeleton. Musculoskeletal oncologists work in concert with experts from musculoskeletal radiology, pathology, medical and pediatric oncology, radiotherapy, and surgery to care for patients with sarcomas of bone and soft tissue.

Musculoskeletal Oncology

Professional Description

Musculoskeletal oncology is the component of orthopaedic surgery that is focused on the diagnosis and treatment of children and adults with benign and malignant tumors of bone and connective soft tissues. The field also includes the diagnosis, treatment, and palliative care of patients with metastatic carcinoma to the skeleton. Musculoskeletal oncologists work in concert with experts from musculoskeletal radiology, pathology, medical and pediatric oncology, radiotherapy, and surgery to care for patients with sarcomas of bone and soft tissue.

Orthopaedic Sports Medicine

Professional Description
An orthopaedic surgeon trained in sports medicine provides appropriate care for all structures of the musculoskeletal system directly affected by participation in sporting activity.
A sports medicine surgeon is proficient in areas including conditioning, training, and fitness; athletic performance and the impact of dietary supplements, pharmaceuticals, and nutrition on performance and health; coordination of care within the team setting and utilizing other health care professionals; field evaluation and management; and soft tissue biomechanics injury, healing and repair. The specialist understands treatment options, both surgical and nonsurgical, as they relate to sports specific injuries and competition. Knowledge in understanding the principles and techniques of rehabilitation, athletic equipment, and orthotic devices enables the specialist to prevent and manage athletic injuries.

Prerequisites; Length of Training
Completion of an accredited residency is required. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2004.

Pediatric Orthopaedics

Professional Description
Pediatric orthopaedics is the medical specialty that includes the study and prevention of musculoskeletal diseases, disorders, and injuries and their treatment by medical, surgical, and physical methods in patients aged 16 years and younger.

Source: Pediatric Orthopaedics Program Requirements, ACGME
www.acgme.org/acWebsite/downloads/RRC_progReq/265pr702_u704.pdf

Prerequisites; Length of Training
Completion of an accredited residency is required. Length of ACGME-accredited programs is 1 year.
Otolaryngology

Professional Description
An otolaryngologist-head and neck surgeon provides comprehensive medical and surgical care for patients with diseases and disorders that affect the ears, nose, throat, respiratory and upper alimentary systems, and related structures of the head and neck.

An otolaryngologist diagnoses and provides medical and/or surgical therapy or prevention of diseases, allergies, neoplasms, deformities, disorders, and/or injuries of the ears, nose, sinuses, throat, respiratory and upper alimentary systems, face, jaws, and the other head and neck systems. Head and neck oncology, facial plastic and reconstructive surgery, and the treatment of disorders of hearing and voice are fundamental areas of expertise.

Prerequisites; Length of Training
No previous GME is required; length of accredited programs is 5 years.

Subspecialties
Subspecialty programs accredited by the ACGME
- Neurotology
- Pediatric otolaryngology
- Sleep medicine

American Board of Otolaryngology subspecialty certificates
- Neurotology
- Pediatric otolaryngology
- Plastic surgery within the head and neck
- Sleep medicine

Data
Unless otherwise noted, all data are for 2004.

Neurotology

Professional Description
An otolaryngologist who treats diseases of the ear and temporal bone, including disorders of hearing and balance. The additional training in otology and neurotology emphasizes the study of embryology, anatomy, physiology, epidemiology, pathophysiology, pathology, genetics, immunology, microbiology, and the etiology of diseases of the ear and temporal bone.

Prerequisites; Length of Training
Completion of an accredited otolaryngology residency is required. Length of ACGME-accredited programs is 2 years.

For more information
American Neurotology Society
www.otology-neurotology.org/ANS/ans-main.html

Pediatric Otolaryngology

Professional Description
A pediatric otolaryngologist has special expertise in the management of infants and children with disorders that include congenital and acquired conditions involving the aerodigestive tract, nose and paranasal sinuses, the ear, and other areas of the head and neck. The pediatric otolaryngologist has special skills in diagnosing, treating, and managing childhood disorders of voice, speech, language, and hearing.

Prerequisites; Length of Training
Completion of an accredited otolaryngology residency is required. Length of ACGME-accredited programs is 1 year (as of July 1, 2006).

Data
Unless otherwise noted, all data are for 2004.

Plastic Surgery within the Head and Neck

Professional Description
An otolaryngologist with additional training in plastic and reconstructive procedures within the head, face, neck, and associated structures, including cutaneuous head and neck oncology and reconstruction, management of maxillofacial trauma, soft tissue repair, and neural surgery.

The field is diverse and involves a wide age range of patients, from the newborn to the aged. While both cosmetic and reconstructive surgery are practiced, there are many additional procedures which interface with them.

Specialty/Subspecialty Information for Otolaryngology

Sleep Medicine

Professional Description
Sleep medicine is a discipline of medical practice in which sleep disorders are assessed, monitored, treated, and prevented by using a combination of techniques (clinical evaluation, physiologic testing, imaging, and intervention) and medication. Specialists in sleep medicine are expected to:
1. participate in an interdisciplinary care of patients of all ages that incorporates aspects of psychiatry, neurology, internal medicine, epidemiology, surgery, pediatrics and basic science;
2. acquire detailed knowledge of the sleep and respiratory control centers, physiology, and neurobiology underlying sleep and wakefulness;
3. diagnose and manage sleep disorder patients in outpatient and inpatient settings.

Source: Sleep Medicine Program Requirements, ACGME
www.acgme.org/acWebsite/downloads/RRC_progReq/520pr604_u605.pdf

Prerequisites; Length of Training
Completion of an ACGME-accredited residency program in internal medicine, psychiatry, pediatrics, neurology, or otolaryngology is required; ACGME-accredited programs in sleep medicine are 1 year.

Pathology

Professional Description
A pathologist deals with the causes and nature of disease and contributes to diagnosis, prognosis, and treatment through knowledge gained by the laboratory application of the biological, chemical, and physical sciences. A pathologist uses information gathered from the microscopic examination of tissue specimens, cells, and body fluids, and from clinical laboratory tests on body fluids and secretions, for the diagnosis, exclusion, and monitoring of disease.

Prerequisites; Length of Training
No previous GME is required; length of accredited programs is either 3 years or 4 years.

Subspecialties
Subspecialty programs accredited by the ACGME
- Selective pathology
- Blood banking/transfusion medicine
- Chemical pathology
- Cytopathology
- Dermatopathology
- Forensic pathology
- Hematology
- Medical microbiology
- Molecular genetic pathology
- Neuropathology
- Pediatric pathology

Blood Banking/Transfusion Medicine

Professional Description
A physician who specializes in blood banking/transfusion medicine is responsible for the maintenance of an adequate blood supply, blood donor and patient-recipient safety, and appropriate blood utilization. Pretransfusion compatibility testing and antibody testing assure that blood transfusions, when indicated, are as safe as possible. This physician directs the preparation and safe use of specially prepared blood components, including red blood cells, white blood cells, platelets, plasma constituents, and marrow or stem cells for transplantation.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2004.

Chemical Pathology

Professional Description

A chemical pathologist has expertise in the biochemistry of the human body as it applies to the understanding of the cause and progress of disease. This physician functions as a clinical consultant in the diagnosis and treatment of human disease. Chemical pathology entails the application of biochemical data to the detection, confirmation, or monitoring of disease.

Prerequisites; Length of Training

Completion of an ACGME-accredited residency in anatomic pathology and clinical pathology, anatomic pathology, or clinical pathology is required. Length of ACGME-accredited programs is 1 year.

**Medical Microbiology**

**Professional Description**
A medical microbiologist is expert in the isolation and identification of microbial agents that cause infectious disease. Viruses, bacteria, and fungi, as well as parasites, are identified and, where possible, tested for susceptibility to appropriate antimicrobial agents.

**Prerequisites; Length of Training**
Required prerequisites are completion of an ACGME-accredited residency in anatomic pathology and clinical pathology, anatomic
pathology, or clinical pathology, or completion of an ACGME-accredited residency in another primary medical specialty and completion of an ACGME-accredited fellowship in infectious disease. Length of ACGME-accredited programs is 1 year.

**Data**

Unless otherwise noted, all data are for 2004.

Molecular Genetic Pathology

Professional Description
A molecular genetic pathologist is expert in the principles, theory, and technologies of molecular biology and molecular genetics. This expertise is used to make or confirm diagnoses of Mendelian genetic disorders, disorders of human development, and infectious diseases and malignancies, and to assess the natural history of those disorders. A molecular genetic pathologist provides information about gene structure, function, and alteration and applies laboratory techniques for diagnosis, treatment, and prognosis for individuals with related disorders.

Prerequisites; Length of Training
Completion of a 4-year ACGME-accredited program in pathology or medical genetics is required. Length of ACGME-accredited molecular genetic pathology programs is 1 year.

Neuropathology

Professional Description
A neuropathologist is expert in the diagnosis of diseases of the nervous system and skeletal muscles and functions as a consultant primarily to neurologists and neurosurgeons. The neuropathologist is knowledgeable in the infirmities of humans as they affect the nervous and neuromuscular systems, be they degenerative, infectious, metabolic, immunologic, neoplastic, vascular, or physical in nature.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 2 years.

Data
Unless otherwise noted, all data are for 2004.

Pediatric Pathology

Professional Description
A pediatric pathologist is expert in the laboratory diagnosis of diseases that occur during fetal growth, infancy, and child development. The practice requires a strong foundation in general pathology and substantial understanding of normal growth and development, along with extensive knowledge of pediatric medicine.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 2 years.

Pediatrics

Professional Description
A pediatrician is concerned with the physical, emotional, and social health of children from birth to young adulthood. Care encompasses a broad spectrum of health services ranging from preventive health care to the diagnosis and treatment of acute and chronic diseases.
A pediatrician deals with biological, social, and environmental influences on the developing child, and with the impact of disease and dysfunction on development.

Prerequisites; Length of Training
No previous GME is required; length of accredited programs is 3 years.

Subspecialties
Subspecialty programs accredited by the ACGME
- Adolescent medicine
- Developmental-behavioral pediatrics
- Neonatal-perinatal medicine
- Pediatric cardiology
- Pediatric critical care medicine
- Pediatric emergency medicine
- Pediatric endocrinology
- Pediatric gastroenterology
- Pediatric hematology/oncology
- Pediatric infectious diseases
- Pediatric nephrology
- Pediatric pulmonology
- Pediatric rheumatology
- Pediatric sports medicine
- Sleep medicine

Adolescent Medicine

Professional Description
A pediatrician who specializes in adolescent medicine is a multi-disciplinary health care specialist trained in the unique physical, psychological, and social characteristics of adolescents and their health care problems and needs.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

Developmental-Behavioral Pediatrics

Professional Description
A developmental-behavioral specialist is a pediatrician with special training and experience who aims to foster understanding and promotion of optimal development of children and families through research, education, clinical care, and advocacy efforts. This physician assists in the prevention, diagnosis, and management of developmental difficulties and problematic behaviors in children, and in the family dysfunctions that compromise children's development.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

Society for Developmental and Behavioral Pediatrics
15000 Commerce Parkway, Ste C
Mt Laurel, NJ 08054

Medicai Toxicology

Professional Description
A pediatrician who focuses on the evaluation and management of patients with accidental or intentional poisoning through exposure to prescription and non-prescription medications, drugs of abuse, household or industrial toxins, and environmental toxins. Important areas of medical toxicology include acute pediatric and adult drug ingestion; drug abuse, addiction, and withdrawal; chemical poisoning exposure and toxicity; hazardous materials exposure and toxicity; and occupational toxicology.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited medical toxicology programs is 2 years.

Neonatal-Perinatal Medicine

Professional Description
A pediatrician who is the principal care provider for sick newborn infants. Clinical expertise is used for direct patient care and for consulting with obstetrical colleagues to plan for the care of mothers who have high-risk pregnancies.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

Data
Unless otherwise noted, all data are for 2004.

Residents/Fellows
Total number of active residents/fellows | 504 |
Average number of residents/fellows per program | 5.2 |
Average percent female | 56.0% |
Average percent international medical graduate

Program Faculty
- Average number of full-time physician faculty: 14.5
- Average number of part-time physician faculty: 0.7
- Average percent female full-time physician faculty: 43.5%
- Average ratio of full-time physician faculty to resident/fellow: 1.8

Work Schedule (Program Year 1)
- Average hours on duty per week: 59.1
- Average maximum consecutive hours on duty: 27.4
- Average days off duty per week: 1.5
- Night float system: 6.3%

Educational Setting (Program Year 1)
- Average hours/week of regularly scheduled lectures/conferences: 4.8
- Average percent of training in hospital outpatient clinics: 6.8%
- Average percent of training in nonhospital ambulatory care community settings: 0.5%

Educational Benefits
- Program to assess/enhance medical professionalism: 56.3%
- Debt management/financial counseling: 31.2%
- Formal program to develop teaching skills: 87.5%
- Formal mentoring program: 79.2%
- Continuous quality improvement training: 79.2%
- International experience: 10.4%
- Resident/fellow retreats: 39.6%
- Off-campus electives: 45.6%
- Hospice/home care experience: 12.5%
- Cultural competence awareness: 56.3%
- Instruction in medical Spanish or other non-English language: 16.7%
- Alternative/complementary medicine curriculum: 14.6%
- Training in identifying and reporting of domestic violence/abuse: 22.9%
- MPH/MBA training: 50.0%
- PhD training: 22.9%
- Research rotation: 97.9%

Educational Features
- Offers additional training or educational experience beyond accredited length: 93.8%
- Residents supervise medical students: 6.3%
- Offers a primary care track: 6.3%
- Offers a rural track: 0.0%
- Offers a women's health track: 0.0%
- Offers a hospitalist track: 8.3%
- Offers a research track/nonaccredited fellowship: 14.6%
- Offers an other track: 8.3%

Evaluation
- Yearly specialty in-service examination required: 85.4%
- Approximate program completion rate: 85.4%

Program Uses the Following to Evaluate Program Quality
- Program graduation rates: 85.4%
- Board certification rates: 100.0%
- In-training examinations: 75.0%
- Performance-based assessments: 37.5%

Employment Policies and Benefits
- On-site child care: 43.9%
- Subsidized child care: 4.2%
- Allowance/stipend for professional expenses: 93.8%
- Leave for educational meetings/conferences: 93.8%
- Moving allowance: 4.2%
- Housing stipend: 4.2%

On-call meal allowance: 79.2%
Free parking: 47.9%
PDAs: 20.8%
Placement assistance upon completion of program: 35.4%
Cross coverage in case of illness/disability: 75.0%

Compensation and Leave (Graduate Year 1)
- Average resident/fellow compensation: $46,592
- Average number of weeks of vacation: 3.5
- Sick days (paid): 21.6

Leave Availability
- Maternity leave for birth: 95.8%
- Paternity leave for birth: 95.8%
- Maternity leave for adoption: 83.3%
- Paternity leave for adoption: 79.2%
- Family leave: 95.8%
- Medical leave: 95.8%

Major Medical Benefits
- Major medical insurance for residents: 100.0%
- Major medical insurance for dependents: 97.9%
- Outpatient mental health insurance: 33.3%
- Inpatient mental health insurance: 83.3%
- Group life insurance: 89.6%
- Dental insurance: 87.5%
- Disability insurance: 87.5%
- Disability insurance for occupationally acquired HIV: 60.4%

Neurodevelopmental Disabilities

Professional Description
A pediatrician who treats children having developmental delays, or learning disorders, including those associated with visual and hearing impairment, mental retardation, cerebral palsy, spina bifida, autism, and other chronic neurologic conditions. This specialist provides medical consultation and education and assumes leadership in the interdisciplinary management of children with neurodevelopmental disorders. They may also focus on the early identification and diagnosis of neurodevelopmental disabilities in infants and young children as well as on changes that occur as the child with developmental disabilities grows.

Prerequisites; Length of Training
Completion of 2 yrs of an accredited pediatrics program in the US or Canada is required. Length of ACGME-accredited programs is 4 years.

Pediatric Cardiology

**Professional Description**
A pediatric cardiologist provides comprehensive care to patients with cardiovascular problems. This specialist is skilled in selecting, performing, and evaluating the structural and functional assessment of the heart and blood vessels and in the clinical evaluation of cardiovascular disease.

**Prerequisites: Length of Training**
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

**Data**
Unless otherwise noted, all data are for 2004.

Pediatric Critical Care Medicine

Professional Description
A pediatrician expert in advanced life support for children from the term or near-term neonate to the adolescent. This competence extends to the critical care management of life-threatening organ system failure from any cause in both medical and surgical patients and to the support of vital physiological functions.

This specialist may have administrative responsibilities for intensive care units and also facilitate patient care among other specialists.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

Data
Unless otherwise noted, all data are for 2004.

Pediatric Endocrinology

Professional Description
A pediatrician who provides expert care to infants, children and adolescents who have diseases that result from an abnormality in the endocrine glands (glands that secrete hormones). These diseases include diabetes mellitus, growth failure, unusual size for age, early or late pubertal development, birth defects, the genital region, and disorders of the thyroid, adrenal, and pituitary glands.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

Data
Unless otherwise noted, all data are for 2004.

Programs
Table 1. Pediatric Endocrinology Programs

| Number of accredited programs | 67 |
| Number of programs providing data | 20 |
| Length of accreditation | 3 |
| Minimum number of prior years of GME required | 3 |
| Offers graduate year 1 positions, available immediately upon medical school completion | No |
| Average number of interviews for program year 1 positions | 5.1 |
| Percent new program directors, 2004-2005 academic year (source: ACGME) | 9.1% |

Residents/Fellows

| Total number of active residents/fellows | 173 |
| Average number of residents/fellows per program | 2.6 |
| Average percent female | 61.8% |
| Average percent international medical graduate | 28.9% |

Program Faculty

| Average number of full-time physician faculty | 5.9 |
| Average number of part-time physician faculty | 0.7 |

**Pediatric Gastroenterology**

**Professional Description:**
A pediatrician who specializes in the diagnosis and treatment of diseases of the digestive systems of infants, children, and adolescents. This specialist treats conditions such as abdominal pain, ulcers, diarrhea, cancer, and jaundice and performs complex diagnostic and therapeutic procedures using lighted scopes to see internal organs.

**Prerequisites; Length of Training**
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

**Data**
Unless otherwise noted, all data are for 2004.

**Residents/Fellows**
- Total number of active residents/fellows: 158
- Average number of residents/fellows per program: 3.2

**Average percent female**: 45.6%
**Average percent international medical graduate**: 35.4%

**Program Faculty**
- **Average number of full-time physician faculty**: 8.8
- **Average number of part-time physician faculty**: 0.8
- **Average percent female full-time physician faculty**: 33.3%
- **Average ratio of full-time physician faculty to resident/fellow**: 1.2

**Work Schedule (Program Year 1)**
- **Average hours on duty per week**: 50.2
- **Average maximum consecutive hours on duty**: 18.2
- **Average days off duty per week**: 1.5
- **Moonlighting allowed within institution**: 57.1%
- **Night float system**: 7.1%
- **Offers awareness and management of fatigue in residents/fellows**: 57.1%

**Educational Setting (Program Year 1)**
- **Average hours/week of regularly scheduled lectures/conferences**: 4.8
- **Average percent of training in hospital outpatient clinics**: 24.3%
- **Average percent of training in nonhospital ambulatory care community settings**: 1.3%

**Educational Benefits**
- Program to assess/enhance medical professionalism: 78.8%
- Debt management/financial counseling: 35.7%
- Formal program to develop teaching skills: 92.9%
- Formal mentoring program: 71.4%
- Continuous quality improvement training: 64.3%
- International experience: 21.4%
- Resident/fellow retreats: 50.0%
- Off-campus electives: 64.2%
- Hospice/home care experience: 7.1%
- Cultural competence awareness: 71.4%
- Instruction in medical Spanish or other non-English language: 35.7%
- Alternative/complementary medicine curriculum: 14.3%
- Training in identifying and reporting of domestic violence/abuse: 21.4%
- MPH/MBA training: 50.0%
- PhD training: 14.3%
- Research rotation: 160.0%

**Educational Features**
- Offers additional training or educational experience beyond accredited length: 100.0%
- Residents supervise medical students: 14.3%
- Offers a primary care track: 14.3%
- Offers a rural track: 0.0%
- Offers a women's health track: 0.0%
- Offers a hospitalist track: 7.1%
- Offers a research track/nonaccredited fellowship: 21.4%
- Offers an other track: 0.0%

**Evaluation**
- Yearly specialty in-service examination required (Advancement is not based on exam results): 84.3%
- Approximate program completion rate: 71.4%

**Program Uses the Following to Evaluate Program Quality**
- Program graduation rates: 71.4%
- Board certification rates: 85.7%
- In-training examinations: 50.0%
- Performance-based assessments: 35.7%

**Employment Policies and Benefits**
- On-site child care: 57.1%
- Subsidized child care: 7.1%
- Allowance/stipend for professional expenses: 85.7%
- Leave for educational meetings/conferences: 85.7%
- Moving allowance: 0.0%
Pediatric Hematology/Oncology

Professional Description
A pediatrician trained in pediatrics, hematology, and oncology who can diagnose and treat blood diseases such as leukemia and sickle cell disease.

Source: American Society of Hematology

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

Data
Unless otherwise noted, all data are for 2004.
Specialty/Subspecialty Information for Pediatrics

Evaluation
Yearly specialty in-service examination required
(Advancement is not based on exam results.) 64.5%
Approximate program completion rate 80.6%

Program Uses the Following to Evaluate Program Quality
Program graduation rates 80.6%
Board certification rates 96.8%
In-training examinations 61.3%
Performance-based assessments 19.4%

Employment Policies and Benefits
On-site child care 41.9%
Subsidized child care 6.5%
Allowance/stipend for professional expenses 87.1%
Leave for educational meetings/conferences 90.3%
Moving allowance 6.5%
Housing stipend 3.2%
On-call meal allowance 32.3%
Free parking 41.9%
PDAs 9.7%
Placement assistance upon completion of program 38.7%
Cross coverage in case of illness/disability 64.5%

Compensation and Leave (Graduate Year 1)
Average resident/fellow compensation $45,745
Average number of weeks of vacation 4.2
Sick days (paid) 25.5

Leave Availability
Maternity leave for birth 96.8%
Paternity leave for birth 83.9%
Maternity leave for adoption 74.2%
Paternity leave for adoption 67.7%
Family leave 90.3%
Medical leave 90.3%

Major Medical Benefits
Major medical insurance for residents 96.8%
Major medical insurance for dependents 93.5%
Outpatient mental health insurance 41.9%
Inpatient mental health insurance 77.4%
Group life insurance 83.9%
Dental insurance 80.6%
Disability insurance 87.1%
Disability insurance for occupationally acquired HIV 54.8%

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

Data
Unless otherwise noted, all data are for 2004.

Pediatric Infectious Diseases

Professional Description
A pediatrician trained to care for children in the diagnosis, treatment and prevention of infectious diseases. This specialist can apply specific knowledge to affect a better outcome for pediatric infections with complicated courses, underlying diseases that predispose to unusual or severe infections, unclear diagnoses, uncommon diseases, and complex or investigational treatments.
Pediatric Nephrology

Professional Description
A pediatrician who deals with the normal and abnormal development and maturation of the kidney and urinary tract, the mechanisms by which the kidney can be damaged, the evaluation and treatment of renal diseases, fluid and electrolyte abnormalities, hypertension, and renal replacement therapy.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

Data
Unless otherwise noted, all data are for 2004.

**Pediatric Rheumatology**

**Professional Description**
A pediatrician who treats diseases of joints, muscle, bones, and tendons. A pediatric rheumatologist diagnoses and treats arthritis, back pain, muscle strains, common athletic injuries, and "collagen" diseases.

**Prerequisites; Length of Training**
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

**For more information**
American College of Rheumatology
1800 Century Place, Ste 250
Atlanta, GA 30345-4300
404 633-3777
404 633-1870 Fax
www.rheumatology.org

**Pediatric Sports Medicine**

**Professional Description**
A pediatrician responsible for continuous care in the field of sports medicine, not only for the enhancement of health and fitness, but also for the prevention of injury and illness. A sports medicine physician must have knowledge and experience in the promotion of wellness and the prevention of injury. Knowledge about special areas of medicine such as exercise physiology, biomechanics, nutrition, psychology, physical rehabilitation, epidemiology, physical evaluation, injuries (treatment and prevention and referral practice), and the role of exercise in promoting a healthy lifestyle are essential to the practice of sports medicine. The sports medicine physician requires special education to provide the knowledge to improve the health care of the individual engaged in physical exercise (sports) whether as an individual or as part of a team.

**Prerequisites; Length of Training**
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 1 year.
Pediatric Transplant Hepatology

Professional Description
A pediatrician with expertise in transplant hepatology encompasses the special knowledge and skill required of pediatric gastroenterologists to care for patients prior to and following hepatic transplantation; it spans all phases of liver transplantation.

Prerequisites; Length of Training
A minimum of 6 years of prior GME is required. For certification, the ABP requires 1 year in a transplant hepatology program that is associated with a pediatric gastroenterology program accredited by the ACGME or RCPSC.

For more information
North American Society for Pediatric Gastroenterology, Hepatology, and Nutrition
PO Box 6
Flourtown, PA 19031
215 233-0808
215 233-3918 Fax
E-mail: naspgphan@naspgphan.org
www.naspgphan.org

Sleep Medicine

Professional Description
A pediatrician with expertise in the diagnosis and management of clinical conditions that occur during sleep, that disturb sleep, or that are affected by disturbances in the wake-sleep cycle. Pediatricians practicing sleep medicine must acquire not only the understanding of sleep and its disorders but also the ability to perform and interpret the myriad of many testing procedures to make adequate diagnoses and initiate treatment.

Prerequisites; Length of Training
Completion of an ACGME-accredited residency program in internal medicine, pulmonology, psychiatry, pediatrics, neurology, or otolaryngology is required; ACGME-accredited programs in sleep medicine are 1 year.
Physical Medicine and Rehabilitation

Professional Description
A physician certified in physical medicine and rehabilitation is often called a physiatrist. The primary goal of the physiatrist is to achieve maximal restoration of physical, psychological, social, and vocational function through comprehensive rehabilitation. Pain management is often an important part of the role of the physiatrist. For diagnosis and evaluation, a physiatrist may include the techniques of electromyography to supplement the standard history, physical, X-ray, and laboratory examinations. The physiatrist has expertise in the appropriate use of therapeutic exercise, prosthetics (artificial limbs), orthotics, and mechanical and electrical devices.

Prerequisites; Length of Training
No previous GME is required when entering an accredited 4-year program that includes 12 months of fundamental clinical skills in areas other than physical medicine and rehabilitation; 1 year of previous GME (eg, Transitional Year) is required when entering a 3-year program.

Subspecialties
Subspecialty programs accredited by the ACGME
- Pain medicine
- Pediatric rehabilitation medicine
- Spinal cord injury medicine

American Board of Physical Medicine and Rehabilitation subspecialty certificates
- Neuromuscular medicine
- Pain medicine
- Pediatric rehabilitation medicine
- Spinal cord injury medicine

Data
Unless otherwise noted, all data are for 2004.

Neuromuscular Medicine

Professional Description
A physiatrist who specializes in neuromuscular medicine possess specialized knowledge in the science, clinical evaluation, and management of these disorders. This encompasses the knowledge of the pathology, diagnosis, and treatment of these disorders at a level that is significantly beyond the training and knowledge expected of a general physiatrist.

Neuromuscular medicine includes the evaluation and treatment of a wide range of diseases, including motor neuron disease, myopathy/neuromuscular transmission disorders, peripheral neuropathy, cranial/spinal single and multiple mononeuropathies, polyneuropathy (infectious/inflammatory), inherited neuropathy, polyneuropathy (ischemia/physical agents/toxins), and polyneuropathy/systemic disease.

Pain Medicine

Professional Description
A physician who provides a high level of care, either as a primary physician or consultant, for patients experiencing problems with acute, chronic, or cancer pain in both hospital and ambulatory settings.

Prerequisites; Length of Training
A minimum of 4 years of prior GME is required. Length of ACGME-accredited programs is 1 year.

Pediatric Rehabilitation Medicine

Professional Description
A physiatrist who utilizes an interdisciplinary approach and addresses the prevention, diagnosis, treatment, and management of congenital and childhood onset physical impairments including related or secondary medical, physical, functional, psychosocial, and vocational limitations or conditions, with an understanding of the life course of disability.

This physician is trained in the identification of functional capabilities and selection of the best of rehabilitation intervention strategies, with an understanding of the continuum of care.

Prerequisites; Length of Training
A minimum of 4 years of prior GME is required. Length of ACGME-accredited programs is 2 years (or 1 year for trainees who have completed ACGME-approved combined or consecutive programs in both physical medicine and rehabilitation and pediatrics).

Spinal Cord Injury Medicine

Professional Description
A physician who addresses the prevention, diagnosis, treatment, and management of traumatic spinal cord injury and nontraumatic etiologies of spinal cord dysfunction by working in an interdisciplinary manner. Care is provided to patients of all ages on a lifelong basis and covers related medical, physical, psychological, and vocational disabilities and complications.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required in a specialty relevant to spinal cord injury medicine, such as anesthesiology, emergency medicine, family medicine, internal medicine, neurological surgery, neurology, orthopaedic surgery, pediatrics, physical medicine and rehabilitation, plastic surgery, surgery, or urology. Length of ACGME-accredited programs is 1 year.

Residents/Fellows
- Total number of active residents/fellows: 8
- Average number of residents/fellows per program: 0.4

Employment Policies and Benefits
On-site child care: 16.7%
Subsidized child care: 8.3%
Plastic Surgery

Professional Description
Plastic surgery deals with the repair, reconstruction, or replacement of physical defects of form or function involving the skin, musculoskeletal system, craniofacial structures, hand, extremities, breast and trunk, external genitalia or cosmetic enhancement of these areas of the body. Cosmetic surgery is an essential component of plastic surgery. The plastic surgeon uses cosmetic surgical principles both to improve overall appearance and to optimize the outcome of reconstructive procedures.

Special knowledge and skill in the design and surgery of grafts, flaps, free tissue transfer and replantation is necessary. Competence in the management of complex wounds, the use of implantable materials, and in tumor surgery is required. Plastic surgeons have been prominent in the development of innovative techniques such as microvascular and craniofacial surgery, liposuction, and tissue transfer. Anatomy, physiology, pathology, and other basic sciences are fundamental to the specialty.

Competency in plastic surgery implies an amalgam of basic medical and surgical knowledge, operative judgment, technical expertise, ethical behavior, and interpersonal skills to achieve problem resolution and patient satisfaction.

Source: American Board of Plastic Surgery

Prerequisites; Length of Training
Accredited plastic surgery programs are either independent (2 to 3 years length) or integrated (5 to 6 years). Prerequisites for the independent programs are 1) a minimum of 3 years clinical education with progressive responsibility in a general surgery program; 2) completion of a neurological surgery, orthopaedic surgery, otolaryngology, or urology residency; or 3) completion of an educational program in oral and maxillofacial surgery approved by the American Dental Association (for individuals holding the DMD/MD or DDS/MD degree).

Subspecialties
Subspecialty programs accredited by the ACGME
- Craniofacial surgery
- Hand surgery

American Board of Plastic Surgery subspecialty certificates
- Plastic surgery within the head and neck
- Surgery of the hand

Data
Unless otherwise noted, all data are for 2004.

American Academy of Facial Plastic and Reconstructive Surgery· 310 S Henry Street, Alexandria, VA 22314 703 299-9291 E-mail: info@aafprs.com www.facial-plastic-surgery.org

American Association of Plastic Surgeons
900 Cummings Center, Suite 221-U
A plastic surgeon with additional training in plastic and reconstructive surgery would have expertise in a wide range of procedures and techniques, including:

- Craniofacial abnormalities: reconstruction of the jaws and other facial bones; skin grafts; management of maxillofacial trauma; and biomedical implant insertion. Areas of research in this field include materials biocompatibility; wound healing adjuncts; skin repair/regeneration; and bone reconstruction.

**Prerequisites; Length of Training**

Completion of a 6-year plastic surgery program or other appropriate surgery training is required. Length of ACGME-accredited programs is 1 year.

**Hand Surgery**

**Professional Description**

A plastic surgeon with additional training in the investigation, preservation, and restoration—by medical, surgical, and rehabilitative means—of all structures of the upper extremity directly affecting the form and function of the hand and wrist.

**Prerequisites; Length of Training**

Completion of an ACGME-accredited general surgery, orthopaedic surgery, or plastic surgery program is required. Length of ACGME-accredited programs is 1 year.

**Data**

Unless otherwise noted, all data are for 2004.

Preventive Medicine

Professional Description
A preventive medicine specialist focuses on the health of individuals and defined populations to protect, promote, and maintain health and well-being and to prevent disease, disability, and premature death. The distinctive components of preventive medicine include:

- Biostatistics and the application of biostatistical principles and methodology
- Epidemiology and its application to population-based medicine and research
- Health services management and administration, including developing, assessing, and assuring health policies; planning, implementing, directing, budgeting, and evaluating population health and disease management programs; and utilizing legislative and regulatory processes to enhance health
- Control of environmental factors that may adversely affect health
- Control and prevention of occupational factors that may adversely affect health safety
- Clinical preventive medicine activities, including measures to promote health and prevent the occurrence, progression, and disabling effects of disease and injury
- Assessment of social, cultural, and behavioral influences on health

A preventive medicine physician may be a specialist in general preventive medicine, public health, occupational medicine, or aerospace medicine. This specialist works with large population groups as well as with individual patients to promote health and understand the risks of disease, injury, disability, and death, seeking to modify and eliminate these risks.

Prerequisites; Length of Training
Accredited programs are either 1, 2, or 3 years in length.

Specialty Areas

Programs in specialty areas accredited by the ACGME
- Aerospace medicine
- Occupational medicine
- Public health and general preventive medicine

American Board of Preventive Medicine specialty area certificates
- Aerospace medicine

### Aerospace medicine

**Professional Description**

Aerospace medicine is a branch of medicine that focuses on the health, safety, and performance of individuals involved in air and space travel. Aerospace medicine, as a broad field of endeavor, offers dynamic challenges and opportunities for physicians, nurses, psychologists, bioenvironmental engineers, industrial hygienists, environmental health practitioners, human factors specialists, psychologists, and other professionals. Those in the field are dedicated to enhancing health, promoting safety, and improving performance of individuals who work or travel in unusual environments. The environments of space and aviation provide significant challenges, such as microgravity, radiation exposure, G-forces, emergency ejection injuries, and hypoxic conditions, for those embarking in their exploration. Areas of interest range from space and atmospheric flight to undersea activities, and the environments that are studied cover a wide spectrum, extending from the "microenvironments" of space or diving suits to those of "Spaceship Earth."

Occupational medicine

Professional Description

Occupational and environmental medicine is perhaps the most wide ranging of all medical specialties. It is the medical specialty devoted to prevention and management of occupational and environmental injury, illness and disability, and promotion of health and productivity of workers, their families, and communities.

Occupational medicine was previously identified as "industrial medicine." This term was used when heavy industry (e.g., lumbering, automobile manufacturing, mining, railroads, steel manufacturers, etc.) employed physicians to provide acute medical and surgical care for employees. By 1945, medical programs had spread to businesses organizations with a predominance of clerical and service employees. Large banks, insurance companies, mercantile establishments, etc., could not be described as industrial; therefore, the broader designation of "occupational medicine" came into common use.

Today, the complexity and pervasiveness of modern industrial processes afford occupational and environmental medicine physicians the opportunity to address work site and environmental concerns and such community health and policy issues as atmospheric pollution, product safety, health promotion, and benefits value management. The term "environmental medicine" has also recently been used to describe this growing, challenging, modern medical specialty. Environmental medicine has been defined as the branch of medical science that addresses the impact of chemical and physical stressors on individuals and groups. Both occupational and environmental medicine use similar skills and focus on the recognition and prevention of hazardous exposures.

Medical toxicology

Professional Description

A specialist who is expert in evaluating and managing patients with accidental or intentional poisoning through exposure to prescription and nonprescription medications, drugs of abuse, household or industrial toxins, and environmental toxins.

Important areas of medical toxicology include acute pediatric and adult drug ingestion; drug abuse, addiction, and withdrawal; chemical poisoning exposure and toxicity; hazardous materials exposure and toxicity; and occupational toxicology.

Prerequisites; Length of Training

Completion of an ACGME-accredited residency is required; length of accredited programs is 2 years.

For more information

Public health and general preventive medicine

Professional Description

A public health physician helps guide a community, agency, health organization, medical office, or program in pursuit of group or community health goals. This includes physicians who plan, provide, and administer public health and preventive medicine services in public, private, or voluntary settings.

The public health practitioner:
- Performs epidemiological investigations of acute and chronic diseases and injuries
- Uses appropriate statistical techniques in the design of studies and interpretation of findings relative to disease interventions performed on individuals and in monitoring and experimental protocols
- Plans, administers, and evaluates programs to promote health and prevent disease in medical practice settings and in public health agencies
- Designs, performs, and evaluates clinical trials
- Applies clinical interventions in the general population
- Sees health risk factors in individual persons and groups and prescribes appropriate interventions
- Sees and ameliorates the impact of environmental and occupational risk factors on individual persons and on groups
- Sees the clinical and public health program needs of populations, eg, workers, communities, and military groups

Undersea and hyperbaric medicine

Professional Description

A specialist who treats decompression illness and diving accident cases and uses hyperbaric oxygen therapy to treat such conditions as carbon monoxide poisoning, gas gangrene, nonhealing wounds, tissue damage from radiation and burns, and bone infections. This specialist also serves as consultant to other physicians in all aspects of hyperbaric chamber operations, and assesses risks and applies appropriate standards to prevent disease and disability in divers and other persons working in altered atmospheric conditions.

Prerequisites; Length of Training

Completion of an ACGME-accredited residency is required; length of accredited programs is 1 year.
Psychiatry

Professional Description
A psychiatrist specializes in the prevention, diagnosis, and treatment of mental, addictive, and emotional disorders such as schizophrenia and other psychotic disorders, mood disorders, anxiety disorders, substance-related disorders, sexual and gender identity disorders, and adjustment disorders. The psychiatrist is able to understand the biologic, psychologic, and social components of illness, and therefore is uniquely prepared to treat the whole person. A psychiatrist is qualified to order diagnostic laboratory tests and to prescribe medications, evaluate and treat psychologic and interpersonal problems, and intervene with families who are coping with stress, crises, and other problems in living.

Prerequisites; Length of Training
No previous GME is required. ACGME-accredited programs are 4 years.
Physicians may also enter programs at the GY2 level only after successfully completing one of the following:
- One clinical year of training in an ACGME-accredited internal medicine, family medicine, or pediatrics program
- An ACGME-accredited transitional year program
- One year of an ACGME-accredited residency in a clinical specialty requiring comprehensive and continuous patient care

For physicians entering at the GY2 level, the GY1 year may be credited toward the 48-month requirement.

Subspecialties
Subspecialty programs accredited by the ACGME
- Addiction psychiatry
- Child and adolescent psychiatry
- Forensic psychiatry
- Geriatric psychiatry
- Pain medicine
- Psychosomatic medicine
- Sleep medicine

American Board of Psychiatry subspecialty certificates
- Addiction psychiatry
- Child and adolescent psychiatry
- Forensic psychiatry
- Geriatric psychiatry
- Pain medicine
- Psychosomatic medicine
- Sleep medicine

Specialty/Subspecialty Information for Psychiatry

Pain Medicine
Professional Description
A psychiatrist who provides a high level of care, either as a primary physician or consultant, for patients experiencing problems with acute, chronic, or cancer pain in both hospital and ambulatory settings. Patient care needs may also be coordinated with other specialists.

Prerequisites; Length of Training
A minimum of 4 years of prior GME is required. Length of ACGME-accredited programs is 1 year.

For more information
American Academy of Pain Medicine
4700 W Lake
Glenview, IL 60025
847 875-4731
877 734-8750 Fax
E-mail: aapm@amctec.com
www.painmed.org

Psychosomatic Medicine
Professional Description
A psychiatrist who specializes in the diagnosis and treatment of psychiatric disorders and symptoms in complex medically ill patients. This subspecialty includes treatment of patients with acute or chronic medical, neurological, obstetrical, or surgical illness in which psychiatric illness is affecting their medical care and/or quality of life; such as HIV infection, organ transplantation, heart disease, renal failure, cancer, stroke, traumatic brain injury, high-risk pregnancy, and chronic obstructive pulmonary disease, among others. Patients also may be those who have a psychiatric disorder that is the direct consequence of a primary medical condition, or a somatoform disorder or psychological factors affecting a general medical condition. Psychiatrists specializing in psychosomatic medicine provide consultation-liaison services in general medical hospitals, attend on medical psychiatry inpatient units, and provide collaborative care in primary care and other outpatient settings.

Source: American Board of Psychiatry and Neurology

Prerequisites; Length of Training
A minimum of 4 years of prior GME is required. Length of ACGME-accredited programs is 1 year.

Sleep Medicine

Professional Description
A neurologist, child neurologist, or psychiatrist who specializes in the diagnosis and management of sleep-related clinical conditions, including circadian rhythm disorders. This subspecialty includes the clinical assessment, polysomnographic evaluation, and treatment of sleep disorders including insomnia, disorders of excessive sleepiness (eg, narcolepsy), sleep-related breathing disorders (such as obstructive sleep apnea), parasomnias, circadian rhythm disorders, sleep related movement disorders, and other conditions pertaining to the sleep-wake cycle.

Source: American Board of Psychiatry and Neurology

Prerequisites; Length of Training
Completion of an ACGME-accredited residency program in internal medicine, psychiatry, pediatrics, neurology, or otolaryngology is required; ACGME-accredited programs in sleep medicine are 1 year.

For more information

Radiation Oncology

Professional Description
A radiologist who deals with the therapeutic applications of radiant energy and its modifiers and the study and management of disease, especially malignant tumors.

Prerequisites; Length of Training
Resident education in radiation oncology includes 5 years of accredited, clinically oriented GME, of which 4 years must be in radiation oncology. GY1 training must be spent in internal medicine, family medicine, obstetrics/gynecology, surgery or surgical specialties, pediatrics, a year of categorical radiation oncology, or a transitional year program. ACGME-accredited programs in radiation oncology are 4 years.

Subspecialties
No subspecialty programs accredited by the Accreditation Council for Graduate Medical Education; no subspecialty certificates offered by the American Board of Radiology.

Data
Unless otherwise noted, all data are for 2004.

Specialty/Subspecialty Information for Radiation Oncology

Graduate Medical Education Directory 2006-2007 137
Radiology-Diagnostic

Professional Description
A radiologist utilizes radiologic methodologies to diagnose and treat disease. Physicians practicing in the field of radiology most often specialize in radiology, diagnostic radiology, radiation oncology, or radiologic physics.

A diagnostic radiologist utilizes x-ray, radionuclides, ultrasound, and electromagnetic radiation to diagnose and treat disease.

Prerequisites; Length of Training
Resident education in diagnostic radiology includes 5 years of clinically oriented GME, of which 4 years must be in diagnostic radiology. The clinical year must consist of ACGME, RCPSC, or equivalent accredited training in internal medicine, pediatrics, surgery or surgical specialties, obstetrics and gynecology, neurology, family medicine, emergency medicine, or any combination of these, or an ACGME- or equivalent accredited transitional year. ACGME-accredited programs in diagnostic radiology are 4 years.

Subspecialties
Subspecialty programs accredited by the ACGME
- Abdominal radiology
- Cardiothoracic radiology
- Endovascular surgical neuroradiology
- Musculoskeletal radiology
- Neuroradiology
- Nuclear radiology
- Pediatric radiology
- Vascular and interventional radiology

American Board of Radiology subspecialty certificates
- Neuroradiology
- Nuclear radiology
- Pediatric radiology
- Vascular and interventional radiology

Data
Unless otherwise noted, all data are for 2004.

Residents/Fellows
Total number of active residents/fellows | 4,160 |
Average number of residents/fellows per program | 22.0 |
Average percent female | 27.5% |
Average percent international medical graduate | 8.4% |

Program Faculty
Average number of full-time physician faculty | 30.6 |
Average number of part-time physician faculty | 5.6 |
Average percent female full-time physician faculty | 22.3% |
Average ratio of full-time physician faculty to resident/fellow | 1.1 |

Work Schedule (Program Year 1)
- Average hours on duty per week | 52.8 |
- Average maximum consecutive hours on duty | 21.2 |
- Average days off duty per week | 1.7 |
- Moonlighting allowed within institution | 56.5% |
- Night float system | 61.8% |
- Offers awareness and management of fatigue in residents/fellows | 77.1% |

Educational Setting (Program Year 1)
- Average hours/week of regularly scheduled lectures/conferences | 9.5 |
- Average percent of training in hospital outpatient clinics | 13.3% |
- Average percent of training in nonhospital ambulatory care community settings | 1.0% |

Educational Benefits
- Program to assess/enhance medical professionalism | 55.7% |
- Debt management/financial counseling | 55.0% |
- Formal program to develop teaching skills | 61.1% |
- Formal mentoring program | 32.8% |
- Continuous quality improvement training | 83.2% |
- International experience | 5.3% |
- Resident/fellow retreats | 22.1% |
- Off-campus electives | 55.7% |
- Hospice/home care experience | 0.8% |
- Cultural competence awareness | 51.9% |
- Instruction in medical Spanish or other non-English language | 8.4% |
- Alternative/complementary medicine curriculum | 11.5% |
- Training in identifying and reporting of domestic violence/abuse | 24.4% |
- MPH/MBA training | 6.9% |
- PhD training | 1.5% |
- Research rotation | 20.6% |

Educational Features
- Offers additional training or educational experience beyond accredited length | 71.0% |
- Residents supervise medical students | 1.5% |
- Offers a primary care track | 1.5% |
- Offers a rural track | 0.8% |
- Offers a women's health track | 3.1% |
- Offers a hospitalist track | 0.8% |
- Offers a research track/nonaccredited fellowship | 6.9% |
- Offers an other track | 5.3% |

Evaluation
Yearly specialty in-service examination required (Advancement is not based on exam results.) | 98.5% |
Approximate program completion rate | 84.7% |

Program Uses the Following to Evaluate Program Quality
Program graduation rates | 84.7% |
Board certification rates | 99.2% |
In-training examinations | 91.6% |
Performance-based assessments | 48.1% |

Employment Policies and Benefits
On-site child care | 36.6% |
Subsidized child care | 3.8% |
Allowance/stipend for professional expenses | 96.2% |
Leave for educational meetings/conferences | 93.1% |
Moving allowance | 4.6% |
Housing stipend | 11.5% |
On-call meal allowance | 93.9% |
Free parking | 62.6% |
PDAs | 22.9% |
Placement assistance upon completion of program | 19.8% |
Cross coverage in case of illness/disability | 75.6% |
Compensation and Leave (Graduate Year 1)
- Average resident/fellow compensation: $43,213
- Average number weeks of vacation: 3.5
- Sick days (paid): 17.5

Leave Availability
- Maternity leave for birth: 97.7%
- Paternity leave for birth: 90.1%
- Maternity leave for adoption: 84.0%
- Paternity leave for adoption: 80.2%
- Family leave: 95.4%
- Medical leave: 97.7%

Major Medical Benefits
- Major medical insurance for residents: 98.5%
- Major medical insurance for dependents: 93.1%
- Outpatient mental health insurance: 36.6%
- Inpatient mental health insurance: 87.8%
- Group life insurance: 92.4%
- Dental insurance: 85.5%
- Disability insurance: 87.8%
- Disability insurance for occupationally acquired HIV: 64.9%

Abdominal Radiology

Professional Description
Abdominal radiology constitutes the application and interpretation of conventional radiology, computed tomography, ultrasonography, magnetic resonance (MR) imaging, nuclear medicine, fluoroscopy, and interventional methods customarily included within the specialty of diagnostic radiology as they apply to diseases involving the gastrointestinal tract, genitourinary tract, and the intraperitoneal and extra peritoneal abdominal organs.

Source: Abdominal Radiology Program Requirements, ACGME. www.acgme.org/acWebsite/downloads/RRC_progReq/42lpr602.pdf

Prerequisites; Length of Training
Satisfactory completion of an ACGME- or RCPSC-accredited diagnostic radiology residency, or other training judged suitable by the program director, is required. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2004.

Endovascular Surgical Neuroradiology

Professional Description
Endovascular surgical neuroradiology is a subspecialty that uses catheter technology, radiologic imaging, and clinical expertise to diagnose and treat diseases of the central nervous system. Practitioners have training and experience in:

- Signs and symptoms of disorders amenable to diagnosis and treatment by endovascular neuroradiology techniques
- Neurological examinations to evaluate patients with neurological disorders
- Pathophysiology and natural history of these disorders
- Indications and contraindications to endovascular neuroradiology procedures
- Clinical and technical aspects of endovascular surgical neuroradiology procedures
- Medical and surgical alternatives
- Preoperative and postoperative management of endovascular patients
- Neurointensive care management
- Fundamentals of imaging physics and radiation biology

- Interpretation of radiographic studies pertinent to the practice

Musculoskeletal radiology

Professional Description
Musculoskeletal radiologists use imaging examinations and procedures to analyze disorders of the musculoskeletal system, including bones, joints, and soft tissues. The imaging methods and procedures include, but are not necessarily limited to, routine radiography, computed tomography, ultrasonography, radionuclide scintigraphy, magnetic resonance, arthrography, and image-guided percutaneous biopsy techniques.

Neuroradiology

Professional Description

A radiologist who diagnoses and treats diseases utilizing imaging procedures as they relate to the brain, spine and spinal cord, head, neck, and organs of special sense in adults and children.

Prerequisites; Length of Training

Satisfactory completion of an ACGME- or RCPSC-accredited diagnostic radiology residency, or other training judged suitable by the program director, is required. Length of ACGME-accredited programs is 1 year.

Data

Unless otherwise noted, all data are for 2004.

Table 1. Neuroradiology (Radiology-Diagnostic) Programs

| Number of accredited programs | 87       |
| Number of programs providing data | 46   |
| Length of accredited training | 1 year  |

Nuclear radiology

Professional Description
A radiologist involved in the analysis and imaging of radionuclides and radiolabeled substances in vitro and in vivo for diagnosis, and the administration of radionuclides and radiolabeled substances for the treatment of disease.

Prerequisites; Length of Training
Satisfactory completion of an ACGME- or RCPSC-accredited diagnostic radiology residency, or other training judged suitable by the program director, is required. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2004.

Pediatric Radiology

Professional Description

A pediatric radiologist is proficient in all forms of diagnostic imaging as it pertains to treating diseases in the newborn, infant, child, and adolescent. This specialist has knowledge of both imaging and interventional procedures related to the care and management of diseases of children. A pediatric radiologist must be highly knowledgeable of all organ systems as they relate to growth and development, congenital malformations, diseases peculiar to infants and children, and diseases that begin in childhood but cause substantial residual impairment in adulthood.

Prerequisites; Length of Training

Satisfactory completion of an ACGME- or RCPSC-accredited diagnostic radiology residency, or other training judged suitable by the program director, is required. Length of ACGME-accredited programs is 1 year.

Data

Unless otherwise noted, all data are for 2004.

Surgery-General

Professional Description
The discipline of general surgery has a central core of knowledge embracing anatomy, physiology, metabolism, immunology, nutrition, pathology, wound healing, shock and resuscitation, intensive care, and neoplasia within the essential content areas outlined below. Surgeons certified by the American Board of Surgery (ABS) have through their training acquired knowledge and experience related to the diagnosis and preoperative, operative, and postoperative management, including the management of complications, in the essential content areas listed below.

- Alimentary tract
- Abdomen and its contents
- Breast, skin, and soft tissue
- Endocrine system
- Head and neck surgery
- Pediatric surgery
- Surgical critical care
- Surgical oncology
- Trauma/burns
- Vascular surgery

The certified general surgeon is also expected to have:
- Preoperative, operative, and postoperative experience in transplantation surgery, plastic surgery (including familiarity with the role of breast reconstruction after mastectomy), and cardiothoracic surgery
- Significant experience in performing minimally invasive surgical procedures, including basic and advanced laparoscopic procedures
- Experience with endoscopic techniques, particularly proctosigmoidoscopy, colonoscopy, esophagogastroduodenoscopy, laryngoscopy, and bronchoscopy
- Experience with sentinel lymph node mapping for breast cancer and melanoma
- Experience with diagnostic ultrasonography, particularly of the following areas:
  - head and neck;
  - breast;
  - abdomen, including intraoperative and laparoscopic ultrasound; and
  - endorectal.
- Knowledge and skills in palliative care and management of pain, weight loss, and cachexia in patients with malignant and chronic conditions
- Familiarity with diagnostic and therapeutic techniques related to:
  - fine needle aspiration techniques for cytologic biopsy;
  - investigation and manipulation of the distal common bile duct (including sphincterotomy);
  - physiologic testing and evaluation of the gastrointestinal tract; and
  - noninvasive diagnostic evaluation of the vascular system and invasive vascular interventional techniques.
- Familiarity with the special requirements of bariatric and geriatric surgical patients, including operative care and counseling of patients and families
- An understanding of the administration of anesthetic agents, airway intubation, and conscious sedation
- An understanding of the diagnosis and management of urgent and emergent problems in gynecologic, neurological, orthopaedic, and urologic surgery
- Source: American Board of Surgery

Prerequisites; Length of Training
No prior GME is required. ACGME-accredited programs in general surgery are 5 years.

Subspecialties
Subspecialty programs accredited by the ACGME
- Hand surgery
- Pediatric surgery
- Surgical critical care
- Vascular surgery

American Board of Surgery subspecialty certificates
- Pediatric surgery
- Surgery of the hand
- Surgical critical care
- Vascular surgery (general certificate)

Data
Unless otherwise noted, all data are for 2004.

Surgical Critical Care

Professional Description
A surgeon with expertise in managing the critically ill and postoperative patient, particularly the trauma victim, and specializing in critical care medicine diagnoses and treating and supporting patients with multiple organ dysfunction. This specialist may have administrative responsibilities for intensive care units and may also facilitate and coordinate patient care among the primary physician, the critical care staff, and other specialists.

Prerequisites; Length of Training
A minimum of 5 years of prior GME is required. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2004.

Thoracic Surgery

Professional Description
A thoracic surgeon provides the operative, perioperative, and critical care of patients with pathologic conditions within the chest. Included is the surgical care of coronary artery disease; cancers of the lung, esophagus, and chest wall; abnormalities of the trachea; abnormalities of the great vessels and heart valves; congenital anomalies; tumors of the mediastinum; and diseases of the diaphragm. Management of the airway and injuries of the chest is within the scope of the specialty.

Thoracic surgeons have the knowledge, experience, and technical skills to accurately diagnose, operate upon safely, and effectively manage patients with thoracic diseases of the chest. This requires substantial knowledge of cardiorespiratory physiology and oncology, as well as capability in the use of heart assist devices, management of abnormal heart rhythms and drainage of the chest cavity, respiratory support systems, endoscopy, and invasive and noninvasive diagnostic techniques.

Prerequisites; Length of Training
Satisfactory completion of an ACGME- or RCPSC-accredited general surgery residency program is required. Length of ACGME-accredited programs is 2 years or 3 years.

Subspecialties
No subspecialty programs accredited by the Accreditation Council for Graduate Medical Education; no subspecialty certificates offered by the American Board of Thoracic Surgery.

Data
Unless otherwise noted, all data are for 2004.

Transitional Year

Description
The objective of the transitional year is to provide a well-balanced program of GME in multiple clinical disciplines to facilitate the choice of and/or preparation for a specific specialty. The transitional year is not meant to be a complete graduate education program in preparation for the practice of medicine.

Source: Transitional Year Program Requirements, ACGME

Prerequisites; Length of Training
No prior GME is required. ACGME-accredited programs are 1 year.

Data
Unless otherwise noted, all data are for 2004.

Urology

Professional Description
A urologist manages benign and malignant medical and surgical disorders of the genitourinary system and the adrenal gland. This specialist has comprehensive knowledge of, and skills in, endoscopic, percutaneous, and open surgery of congenital and acquired conditions of the urinary and reproductive systems and their contiguous structures.

Prerequisites; Length of Training
Satisfactory completion of 1 year of an ACGME-accredited general surgery residency is required. ACGME-accredited urology programs are 3 years or 4 years.

Subspecialties
- Subspecialty programs accredited by the ACGME
  - Pediatric urology

Data
Unless otherwise noted, all data are for 2004.

Table 1. Urology Programs

HOLDING STEADY

Specialists are still seeing biggest paychecks, but raises are flat, and some generalists are gaining ground, Physician Compensation Survey shows

For America’s doctors, it’s pretty much the status quo for salaries. Continuing a trend that has spanned the past several years, physicians are working longer and harder to maintain mostly modest annual salary increases that do little more than match the rate of inflation. But as usual, the rich keep getting richer—specialists continue to bring home the biggest bucks—while the interns and other generalists are left to play catch-up.

Noninvasive cardiologists, for instance, are averaging about $344,400 this year, an 8% increase from 2004 and one of the steepest annual increases of any of the 15 categories surveyed nationwide. General surgeons were averaging about $281,000 as they enjoyed a 5% across-the-board pay increase, according to Modern Healthcare’s annual compendium of doctors’ salaries. Meanwhile, pediatricians ranked as the lowest paid in the survey, taking home an average of about $158,900, or a 4% raise from the previous year.

“In terms of physician compensation, just about everything is going up,” says Michael Broxterman, chief operating officer of physician recruiter Pinnacle Health Group and immediate past president of the National Association of Physician Recruiters. “Certain specialties, including urologists, cardiologists and neurosurgeons, are especially in demand. In general, salaries are increasing but at a slightly slower rate.”

Even the salaries for such supposedly hot specialists as neurologists and obstetrician-gynecologists were flat this year. Neurologists edged up 2% this year for an average salary of about $214,000, according to survey respondents, while salaries for OB/GYNs averaged about $255,000, also an increase of 2%.

“Doctors remain under a lot of pressure, salarywise,” Broxterman says. “Reimbursements have been stagnant or have decreased. But doctors still earn in the top 1% of (all professions in) the country. They obviously get a lot of press about decreasing salaries, but they’re doing OK.”

Now in its 12th year, Modern Healthcare’s Physician Compensation Survey tracks the average total compensation by specialty as reported by various independent organizations, including trade groups such as the Medical Group Management Association and the American Medical Group Association and physician-recruitment firms such as Delta Medical Consulting. This year’s results are based on surveys by 16 firms, up from 15 in last year’s report.

The MGMA, whose 19,500 members work in organizations that employ more than 240,000 physicians, found that specialists’ salaries were either flat or slightly higher than last year, while generalists are still struggling to keep pace.

“It seems that compensation is beginning to stabilize,” says Dan Stech, director of survey operations at the MGMA. “I’m looking at leading specialties and not seeing a lot of movement in average salaries. In primary care, there are some increases, but we’re seeing increases a little bit less than what the specialists are getting. Still, it’s consistent with what we’ve seen over the last three years or so.”

Average salaries for anesthesiologists fell 1% in the MGMA’s survey to an average of about $338,700. Noninvasive cardiologists registered a 3% increase to about $373,700, and salaries for OB/GYNs increased about 4%, to approximately $272,400. One of the biggest changes in the MGMA survey was for neurologists, whose compensation rose 9%, to about $239,500.

As usual, based on overall survey findings, family practitioners and Internists—the profession’s generalists—remained at the low end of the salary survey with raises to match. Family practitioners averaged about $162,200, an increase of 3% from 2004, eclipsing the average increase for OB/GYNs by a slight margin; interns were paid an average of about $170,600, or about 2%
Salaries for generalists edged up slightly over past years and matched or exceeded the average increases for some specialists, according to the Hospital & Healthcare Compensation Service. Rosanne Cioffe, a spokeswoman for the firm, says the average increase cited by participants in her survey for all physicians was about 4.7%—or nearly 2 percentage points higher than expected. Physicians have generally received about a 3% increase in recent years, she says.

"Primary care went up, but some of the specialists did not go up significantly," she says. "What we did see was a big increase in emergency medicine, which we attribute to the increase in ER use due to a lack of health insurance."

Indeed, salaries in emergency medicine averaged a 6% increase, with compensation ranging from a low of about $188,000 to a high of about $257,000. The emergency room doctors were among the big winners in this year's salary survey, along with cardiologists and hospitalists, whose average salary increase of 11% was the highest of any of the 15 specialties in this year's survey. No specialties saw an across-the-board drop in average compensation.

Still, this year's figures were varied. Compensation for oncologists, for instance, ranged from a low of about $223,000 to a high of about $372,500. The list of salaries for radiologists, meanwhile, ranged from about $209,400 to almost $421,000. Pinnacle's survey showed a 10% decrease in salary for this specialty, while the Hay Group's survey reported a 21% increase. Urologists seesawed from about $261,000 to slightly more than $428,000, with one survey firm reporting a 21% increase and another finding a 26% decrease for the specialty.

The significant variances in some of the salary figures are attributable to several factors, including differing methodologies and the sizes of the samples used by these organizations. In addition, some firms track different pools of physicians from year to year, another reason for the sometimes dramatic percentage changes in compensation. «

Salary Information Supplement from Modern Healthcare

Data trackers
The groups providing salary survey information

American Medical Group Association
The Alexandria, Va.-based trade group’s Medical Group Compensation and Financial Survey was conducted in December 2004 in partnership with the Minneapolis-based accounting and consulting firm RSM McGladrey. The survey includes salary and productivity data from 32,000 member physicians in 172 specialties. The survey costs $195 for AMGA members and $395 for nonmembers. For more information, call Brad Vaudrey at 612-376-9530. Data submitted by the AMGA for Modern Healthcare’s Physician Compensation Survey are preliminary and subject to change.

CareerStaff Unlimited
In April 2005, CareerStaff Unlimited, a wholly owned staffing subsidiary of Sun Healthcare Group, acquired the operations of Goodland Healthcare Consulting. During spring 2005, the Irving, Texas-based company compiled salaries for 3,000 physicians in 25 specialties employed by 1,000 healthcare organizations such as hospitals, group practices and managed-care or insurance plans. The survey is free and can be obtained by contacting Neina Belfm at 417-425-1300.

Cejka Search
The St. Louis-based executive recruiting firm has provided services exclusively to the healthcare industry for more than 20 years. Data reported were compiled from Cejka’s proprietary database from January to December 2004 and salaries were calculated based on placements made by the company. The compensation includes salaries, bonuses and estimated benefits for 190 physicians in 15 specialties. For more information or to purchase the survey, contact Leslie Roberton at 314-726-1803.

Delta Medical Consulting
The Irving, Texas-based physician-staffing firm’s survey was conducted from May 2004 through May 2005 and is based on the surveys of 257 physician positions in 14 specialties at 112 organizations, including hospitals (25% of the sample), group practices (48%), solo practices (17%) and academic settings (10%). For more information on this year’s survey, call Jamie Watson at 800-521-5060, ext. 209.

HayGroup
The Philadelphia-based consulting firm surveyed 98 organizations in May 2004. Included in the survey are salaries for 112 physician specialties, such as 37 pediatric specialties and 26 allied health specialties. For more information or to purchase the survey, contact Dilek Karabucak at 215-661-2419.

Hospital & Healthcare Compensation Service
The Oakland, N.J.-based consulting firm’s survey of employed physicians is published each March. This year’s survey, conducted in January, includes 273 organizations and more than 17,550 physicians in 44 specialties. Organizations surveyed were hospitals (88% of the sample), group practices (11%) and managed-care or insurance plans (1%). The report costs $295 plus $10 for shipping and handling. To obtain a copy, call Rosanne Cioffe at 201-405-6075.

Jackson & Harris
The national, full-service physician-recruitment firm is based in Alpharetta, Ga. It combines individual experience with its exclusive Web recruitment via online job board partnerships. In May, the firm surveyed 25,000 physicians in 14 specialties. Compensation figures include base incentives and/or production within each specialty. For more information call Tim Shelley at 866-284-3328, ext. 5554.

Martin, Fletcher & Associates
The Irving, Texas-based healthcare staffing firm surveyed 12,800 physicians at 4,300 hospitals (65% of the sample) and group practices (35%). The annual Physician Compensation and Benefits Report was completed in May and includes 14 specialties. For more information about the free report, call Dana Bucher at 972-257-7039.

MD Network
The Irving, Texas-based healthcare staffing firm’s annual Physician Compensation, Incentives and Benefits Survey reports salaries, guarantees, incentives and benefits offered to physicians. The report was completed during 2004 and represents data from 4,750 physicians and 1,270 senior-level administrative personnel representing hospitals, group practices and other healthcare organizations. The cost is $250 for healthcare organizations. For more information, please email Jay Savage at jsavage@md-network.com.

Medical Group Management Association
The Englewood, Colo.-based trade group represents some 240,000 physicians nationwide and conducts an annual compensation survey of member and nonmember practices. This year’s report will be published later this summer. Results will be based on salary data for fiscal 2004. The cost of the report is $270 for MGMA members and $480 for nonmembers. To order, call 877-275-6462, ext. 1888. Data submitted by the MGMA for Modern Healthcare’s Physician Compensation Survey are preliminary and subject to change based on further validation by the MGMA.

Medicus Partners
From June to September 2004, the Dallas-based physician search firm conducted a telephone survey of doctors across the country. The survey focused on 2,392 individual physicians practicing 16 specialties and represents data from 650 organizations including hospitals (64% of the sample) and group practices (36%). For more information, contact Jeff Katon at 988-260-4242, ext. 236.

Merritt, Hawkins & Associates
The Irving, Texas-based physician consulting and search firm conducted its survey of 724 organizations in April. The compensation figures provided are based on income offers made to recruit 2,587 physicians in 15 specialties. To receive a free copy of this survey, call Tracy Fletcher at 469-524-1400.

PacifiCoas
Costa Mesa, Calif.-based Pacific Cos. surveyed 21,100 organizations from March 2004 to March 2005. The organizations represented include hospitals (25% of the sample), group practices (50%) and solo-practice physicians (25%). Data represent 780 physicians in 28 specialties. For more information, call Michael Moore at 800-741-7629.

Pinnacle Health Group
In 2004, the Atlanta-based physician recruitment firm surveyed 230 physicians practicing 48 specialties. Almost 90% of the hospitals included were looking for physicians on behalf of affiliated group practices, so only 10% of participating hospitals placed physicians in hospital settings. For a copy of the free survey, call Wendy Abdo at 800-492-7771.

Sullivans, Cotter and Associates
More than 225 organizations took part in the Detroit-based company’s survey, including hospitals (66% of the sample) and group practices (33%). The preliminary data represent 23,000 physicians in more than 100 specialties. The cost is $300 for survey participants, $1,200 for nonparticipating healthcare organizations and $2,500 for non-healthcare providers. For more information, contact Janis D’Aurizio at 313-872-1760.

Warren Surveys
The Rockford, Ill.-based company’s survey is based on responses from more than 7,000 individual physicians practicing in 32 medical specialties. The participating organizations included hospitals (25% of the sample), group practices (21%), managed-care or insurance plans (15%) and university-based community and ambulatory-care centers (35%). For a copy of the survey, call Barbara Hempy at 615-677-8794.

To order extra copies of this issue, contact customer service at 888-446-1422. For reprints of this article, contact Cathy Bosco at 312-649-5297 or at cbosco@crain.com.

*Note: The table above shows compensation ranges and median values for different specialties across various regions.*
Section III
Accredited Graduate Medical Education Programs

Introduction
This section of the Directory contains a list of graduate medical education (GME) programs accredited by the Accreditation Council for Graduate Medical Education (ACGME).

Programs are listed by specialty under the state and city of the sponsoring institution (refer to sample, below). Listed under the program name is the institution that sponsors the residency program, followed by the major participating institution(s), if any, which are recognized by at least one ACGME Residency Review Committee (RRC) as providing a major portion of required GME. Hospitals and other institutions that provide rotations of less than one-sixth of the program length or less than a total of 6 months are not listed in the Directory.

Listings contain the program director's name and program address, telephone and fax numbers, and e-mail address. Newly appointed program directors since the publication of last year's Directory are noted with an asterisk. Additional information on each program includes the ACGME-accredited length of the program and number of ACGME approved/offered positions. (Note: The published program length reflects the length approved by the RRC. The program may require or offer additional years; these data are included in FREIDA Online, at www.ama-assn.org/go/freida, and the GME Library on CD-ROM.) The program identification number appears at the bottom of each listing; the first three digits of this number indicate the specialty/subspecialty code (see "Specialties/Subspecialties with ACGME Program Requirements," p 165) and the next two the state code.

Sample Listing
Title of the Program
Sponsor: The program's sponsoring institution
The program's major participating institution(s) (if any)
Prgrm Director: Name (* = new director since publication of last Directory)
Address
City, state, zip code
Telephone number, fax number
E-mail address
Length: Program length.
ACGME Approved/Offered Positions: 
Program ID: 000-00-00-000

The Role of the ACGME
The population of programs listed in Section III is set by the ACGME, which shares with the AMA information about accreditation actions and other changes through regular electronic data transfers.

The Directory, as the official list of ACGME-accredited programs, generally reflects accreditation actions completed by December of the previous year. The data published in this edition were transferred from the ACGME to the AMA on January 16, 2006. Programs with withdrawal dates after this date are included in Section III.

Readers are reminded that accreditation actions and related changes can alter the ACGME program population on a daily basis and that the Directory serves only as a "snapshot" of this population at a given moment. For updated information on ACGME-accredited programs, consult the ACGME Web site at www.acgme.org.

Preventive Medicine Programs
The preventive medicine programs listed in Section III include programs that offer areas of specialization in aerospace medicine, general preventive medicine, occupational medicine, and public health and general preventive medicine.
Introduction

Transitional Year Programs
Transitional Year programs are available for physicians seeking broad clinical experience before entering GME in their chosen field or for physicians who have not yet decided on a medical specialty.

Combined Specialty Programs
Combined training consists of a coherent educational experience in two or more closely related specialty or subspecialty programs. The educational plan for combined training is approved by the specialty board of each of the specialties to assure that resident physicians completing combined training are eligible for board certification in each of the component specialties. Each specialty or subspecialty program is separately accredited by the Accreditation Council for Graduate Medical Education (ACGME) through its respective Residency Review Committee (RRC). The duration of combined training is longer than any one of its component specialty programs standing alone, and shorter than all of its component specialty programs together. Applicants to combined specialty programs, listed in Appendix A, are encouraged to review requirements for admission to the certification process of each board (see Appendix B).

Restricted-entry GME Programs
Centers for Disease Control and Prevention Programs
GME programs at the Centers for Disease Control and Prevention (CDC) are usually open only to CDC physicians.

US Uniformed Services Programs
US Uniformed Services (Army, Navy, Air Force, Public Health Service) first-year GME positions are filled by graduates of accredited schools of medicine and osteopathic medicine. Only those individuals who have graduated from accredited US medical schools are eligible to apply for these first-year GME positions. The majority of the Uniformed Services' first-year GME positions are filled by individuals with an existing active duty service obligation. In most cases, only those individuals already serving in the Uniformed Services are eligible for appointment to military postgraduate year 2 and beyond residency positions. Graduates of non-US or non-Canadian medical schools are eligible to apply for postgraduate year 2 positions if they possess the standard ECFMG Certificate and have completed 1 year of GME training at an ACGME-accredited program.

It is important to note that an individual seeking to be trained in a Uniformed Services medical treatment facility must be qualified for appointment as a commissioned officer in the Uniformed Services. An active duty service obligation is required for participation in Uniformed Services GME training. Acceptance of GME applications from civilian applicants may vary among the four services. Selection priorities for Uniformed Services positions for year 2 and beyond are given to officers on active duty. For more information, interested individuals should contact their local Uniformed Services recruiting office.

In Section III, US Uniformed Services programs are identified with the text US Uniformed Services Program.

Programs on Probation
The Directory may include programs on probation. To check a program's current accreditation status, go to the ACGME Web site, www.acgme.org, click on "public," then click on "Search Through Accredited Programs and Sponsors" to look up information about programs and sponsors, including current accreditation status.

Disclaimer
It is the AMA's understanding that all institutions listed in the Graduate Medical Education Directory are required by law to include the phrase "EEO, M/F/D/V" on any information distributed for public view.

Sources for Additional Information
FREIDA Online (Fellowship and Residency Electronic Interactive Database Access), an Internet database available through the AMA home page at www.ama-assn.org/go/freida, offers additional information on GME programs. In addition, the Graduate Medical Education E-letter, a free monthly publication available via e-mail, offers news and updates on all facets of GME. Current/archive issues are available at www.ama-assn.org/go/gmenews.
