Otolaryngology

Professional Description
An otolaryngologist-head and neck surgeon provides comprehensive medical and surgical care for patients with diseases and disorders, and which affect the ears, nose, throat, respiratory, and upper alimentary systems, and related structures of the head and neck. An otolaryngologist diagnoses and provides medical and/or surgical therapy or prevention of diseases, allergies, neoplasms, deformities, disorders, and/or injuries of the ears, nose, sinuses, throat, respiratory and upper alimentary systems, face, jaws, and the other head and neck systems. Head and neck oncology, facial plastic and reconstructive surgery, and the treatment of disorders of hearing and voice are fundamental areas of expertise.

Prerequisites; Length of Training
No previous GME is required; length of accredited programs is 5 years.

Subspecialties

Subspecialty programs accredited by the ACGME
- Neurotology
- Pediatric otolaryngology
- Sleep medicine

American Board of Otolaryngology subspecialty certificates
- Neurotology
- Pediatric otolaryngology
- Plastic surgery within the head and neck
- Sleep medicine

Data
Unless otherwise noted, all data are for 2009.

* Includes all positions offered in a specialty, except preliminary positions.
† Preferred means the number of applicants for whom the specialty was the only or first choice.

Neurotology

Professional Description
An otolaryngologist who treats diseases of the ear and temporal bone, including disorders of hearing and balance. The additional training in otology and neurotology emphasizes the study of embryology, anatomy, physiology, epidemiology, pathophysiology, pathology, genetics, immunology, microbiology, and the etiology of diseases of the ear and temporal bone.

The neurotologist should have command of the core knowledge and understanding of:

- The basic medical sciences relevant to the temporal bone, lateral skull base, and related structures; the communication sciences, including knowledge of audiology, endocrinology, and neurology as they relate to the temporal bone, lateral skull base, and related structures
- Advanced diagnostic expertise and advanced medical and surgical management skills for the care of diseases and disorders of the petrous apex, infratemporal fossa, internal auditory canals, cranial nerves, and lateral skull base (including the occipital bone, sphenoid bone, temporal bone, mesial aspect of the dura and intradural management), in conjunction with neurological surgery

A neurotologist has acquired expertise in the medical and surgical management of diseases and disorders of the temporal bone, lateral skull base, and related structures beyond that inherent to the practice of otolaryngology-head and neck surgery.

Source: American Board of Otolaryngology

Prerequisites; Length of Training
Completion of an accredited otolaryngology residency is required. Length of ACGME-accredited programs is 2 years.

American Neurotology Society
www.otology-neurotology.org/ANS/ans-main.html

Pediatric Otolaryngology

Professional Description
A pediatric otolaryngologist specializes in the management of infants and children with disorders that include congenital and acquired conditions involving the aerodigestive tract, nose and
paranasal sinuses, the ear, and other areas of the head and neck. The pediatric otolaryngologist has special skills in diagnosing, treating, and managing childhood disorders of voice, speech, language, and hearing.

**Prerequisites; Length of Training**

Completion of an accredited otolaryngology residency is required. Length of ACGME-accredited programs is 1 year (as of July 1, 2006).

**Data**

Unless otherwise noted, all data are for 2009.

Plastic Surgery within the Head and Neck

Professional Description

An otorhynologist with additional training in plastic and reconstructive procedures within the head, face, neck, and associated structures, including cutaneous head and neck oncology and reconstruction, management of maxillofacial trauma, soft tissue repair, and neural surgery.

The field is diverse and involves a wide age range of patients, from the newborn to the aged. While both cosmetic and reconstructive surgery are practiced, there are many additional procedures which interface with them.

Pain Medicine

Note: In 2007, ACGME-accredited pain medicine programs under anesthesiology, neurology, physical medicine and rehabilitation, and psychiatry were combined into a multidisciplinary pain medicine subspecialty.

Professional Description
A psychiatrist who provides a high level of care, either as a primary physician or consultant, for patients experiencing problems with acute, chronic, or cancer pain in both hospital and ambulatory settings. Patient care needs may also be coordinated with other specialists.

Prerequisites; Length of Training
A minimum of 4 years of prior GME is required. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2009.

Table 1. Pain Medicine Programs
Number of accredited programs 92

Program Data
Length of accredited training 1
Minimum number of prior years of GME required 3/4
Offers graduate year 1 positions, available immediately upon medical school completion No
Average number of interviews for program year 1 positions 14.3
Percent new program directors, 2008-2009 academic year (Source: ACGME) 24.2%

Residents/Fellows
Total number of active residents/fellows 211
Average number of residents/fellows per program 2.3
Average percent female 20.4%
Average percent international medical graduate (IMG) 22.3%

Program Faculty
Average number of full-time physician faculty
Average number of part-time physician faculty
Average percent female full-time physician faculty
Average ratio of full-time physician faculty to resident/fellow

Table 2. Data for Pain Medicine Listed in FREIDA
Number of programs providing data 38

Work Schedule (Program Year 1)
Average hours on duty per week 45.1
Average maximum consecutive hours on duty 16.4
Average days off duty per week 1.8
Moonlighting allowed within institution 52.3%
Night float system 2.3%
Offers awareness and management of fatigue in residents/fellows 88.6%

Educational Setting (Program Year 1)
Average hours/week of regularly scheduled lectures/conferences 3.5
Average percent of training in hospital outpatient clinics 77.0%
Average percent of training in nonhospital ambulatory care community settings 6.8%

Educational Benefits
Program to assess/enhance medical professionalism 88.4%
Debt management/financial counseling 47.7%
Formal program to develop teaching skills 70.5%
Formal mentoring program 63.6%
Formal program to foster interdisciplinary teamwork 43.2%
Continuous quality improvement training 93.2%
International experience 15.9%
Resident/fellow retreats 34.1%
Off-campus electives 43.2%
Hospice/home care experience 38.6%
Cultural competence awareness 68.2%
Instruction in medical Spanish or other non-English language 18.2%
Alternative/complementary medicine curriculum 68.2%
Training in identifying and reporting of domestic violence/abuse 34.1%
MPH/MBA or PhD training 9.1%
Research rotation 6.8%

Educational Features
Offers additional training or educational experience beyond accredited length 11.9%
Offers a primary care track 0.0%
Offers a rural track 0.0%
Offers a women's health track 0.0%
Offers a hospitalist track 2.3%
Offers a research track/nonaccredited fellowship 4.5%
Offers an other track 4.5%

Resident Evaluation
Yearly specialty in-service examination required 27.3%
Patient surveys 61.4%
Portfolio system 45.5%
360-degree evaluations 88.6%
Objective structured clinical examinations (OSCE) 20.5%

Program Evaluation
Program graduation rates 86.4%
Board certification rates 90.9%
In-training examinations 25.0%
Performance-based assessments 34.1%

Employment Policies and Benefits
Part-time/shared positions 4.5%
On-site child care 34.1%
Subsidized child care 4.5%
Allowance/stipend for professional expenses 95.5%
Leave for educational meetings/conferences 89.1%
Moving allowance 4.5%
Housing stipend 0.0%
On-call meal allowance 61.4%
Free parking 54.5%
PDAs 11.4%
Placement assistance upon completion of program 22.7%
Cross coverage in case of illness/disability 77.3%

Compensation and Leave (Graduate Year 1)
Average resident/fellow compensation $50,995
Average number weeks of vacation 3.5
Sick days (paid) 27.9
Maximum number of paid days for family/medical leave 41
Maximum number of unpaid days for family/medical leave 49

Pathology

Professional Description
A pathologist deals with the causes and nature of disease and contributes to diagnosis, prognosis, and treatment through knowledge gained by the laboratory application of the biologic, chemical, and physical sciences.

A pathologist uses information gathered from microscopic examination of tissue specimens, cells, and body fluids, and from clinical laboratory tests on body fluids and secretions to diagnose, exclude, and monitor the causes, processes, and/or nature of diseases.

Prerequisites; Length of Training
No previous GME is required; length of accredited programs is either 3 years or 4 years.

Subspecialties
Subspecialty programs accredited by the ACGME
- Selective pathology
- Blood banking/transfusion medicine
- Chemical pathology
- Cytopathology
- Dermatopathology
- Forensic pathology
- Hematology
- Medical microbiology
- Molecular genetic pathology
- Neuropathology
- Pediatric pathology

American Board of Pathology subspecialty certificates
- Blood banking/transfusion medicine
- Chemical pathology
- Cytopathology
- Dermatopathology
- Forensic pathology
- Hematology
- Medical microbiology
- Molecular genetic pathology
- Neuropathology
- Pediatric pathology

Employment Policies and Benefits

- Part-time/shared positions: 2.0%
- On-site child care: 45.1%
- Subsidized child care: 7.8%
- Allowance/stipend for professional expenses: 99.0%
- Leave for educational meetings/conferences: 81.2%
- Moving allowance: 10.8%
- Housing stipend: 8.8%
- On-call meal allowance: 71.6%
- Free parking: 60.8%
- PDAs: 12.7%
- Placement assistance upon completion of program: 28.4%
- Cross coverage in case of illness/disability: 80.4%

Compensation and Leave (Graduate Year 1)

- Average resident/fellow compensation: $43,872
- Average number weeks of vacation: 4.3
- Sick days (paid): 17.8
- Maximum number of paid days for family/medical leave: 46
- Maximum number of unpaid days for family/medical leave: 58

Major Medical Benefits

- Major medical insurance for residents: 99.0%
- Major medical insurance for dependents: 95.1%
- Outpatient mental health insurance: 91.2%
- Inpatient mental health insurance: 91.2%
- Group life insurance: 92.2%
- Dental insurance: 88.2%
- Disability insurance: 91.2%
- Disability insurance for occupationally acquired HIV: 76.5%
- Medical insurance coverage begins when starting program: 87.3%

Blood Banking/Transfusion Medicine

Professional Description

A physician who specializes in blood banking/transfusion medicine, and is responsible for the maintenance of an adequate blood supply, blood donor and patient-recipient safety, and appropriate blood utilization. Pretransfusion compatibility testing and antibody testing assure that blood transfusions, when indicated, are as safe as possible. This physician directs the preparation and safe use of specially prepared blood components, including red blood cells, white blood cells, platelets, plasma constituents, and marrow or stem cells for transplantation.

Prerequisites; Length of Training

A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 1 year.

Data

Unless otherwise noted, all data are for 2009.

Chemical Pathology

Professional Description
A chemical pathologist is an expert in the biochemistry of the human body in relation to the understanding of the cause and progress of disease. This physician functions as a clinical consultant in the diagnosis and treatment of human disease. Chemical pathology entails the application of biochemical data to the detection, confirmation, or monitoring of disease.

Prerequisites; Length of Training
Completion of an ACGME-accredited residency in anatomic pathology and clinical pathology, anatomic pathology, or clinical pathology is required. Length of ACGME-accredited programs is 1 year.

Cytopathology

Professional Description
A cytopathologist is an anatomic pathologist trained in the diagnosis of human disease by means of the study of cells obtained from body secretions and fluids, by scraping, washing, or sponging the surface of a lesion, or by the aspiration of a tumor mass or body organ with a fine needle. A major aspect of a cytopathologist’s practice is the interpretation of Papanicolaou-stained smears of cells from the female reproductive systems, the Pap test. However, the cytopathologist’s expertise is applied to the diagnosis of cells from
all systems and areas of the body. He/she is a consultant to all medical specialists.

**Prerequisites; Length of Training**
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 1 year.

**Data**
Unless otherwise noted, all data are for 2009.

Graduate Medical Education Directory 2010-2011 465
Dermatopathology

Professional Description
A dermatopathologist is expert in diagnosing and monitoring diseases of the skin, including infectious, immunologic, degenerative, and neoplastic diseases. This entails the examination and interpretation of specially prepared tissue sections, cellular scrapings, and smears of skin lesions by means of light microscopy, electron microscopy, and fluorescence microscopy.

Prerequisites; Length of Training
Completion of an dermatology or pathology residency is required; length of accredited programs is 1 year.

Forensic Pathology

Professional Description
A forensic pathologist is expert in investigating and evaluating cases of sudden, unexpected, suspicious, and violent death as well as other specific classes of death defined by law. The forensic pathologist serves the public as coroner or medical examiner, or by performing medicolegal autopsies for such officials.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 1 year.

Medical Microbiology

Professional Description
A medical microbiologist is an expert in the isolation and identification of microbial agents that cause infectious disease. Viruses, bacteria, and fungi, as well as parasites, are identified, and where possible, tested for susceptibility to appropriate antimicrobial agents.
Molecular Genetic Pathology

Professional Description
A molecular genetic pathologist is expert in the principles, theory, and technologies of molecular biology and molecular genetics. This expertise is used to make or confirm diagnoses of Mendelian genetic disorders, disorders of human development, and infectious diseases and malignancies, and to assess the natural history of those disorders. A molecular genetic pathologist provides information about gene structure, function, and alteration and applies laboratory techniques for diagnosis, treatment, and prognosis for individuals with related disorders.

Prerequisites; Length of Training
Completion of a 4-year ACGME-accredited program in pathology or medical genetics is required. Length of ACGME-accredited molecular genetic pathology programs is 1 year.

Neuropathology

Professional Description
A neuropathologist is expert in the diagnosis of diseases of the nervous system and skeletal muscles and functions as a consultant primarily to neurologists and neurosurgeons. The neuropathologist is knowledgeable in the infirmities of humans as they affect the nervous and neuromuscular systems, be they degenerative, infectious, metabolic, immunologic, neoplastic, vascular, or physical in nature.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 2 years.

Data
Unless otherwise noted, all data are for 2009.

Pediatric Pathology

Professional Description
A pediatric pathologist is an expert in the laboratory diagnosis of diseases that occur during fetal growth, infancy, and child development. The practice requires a strong foundation in general pathology and substantial understanding of normal growth and development, along with extensive knowledge of pediatric medicine.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 2 years.

Pediatrics

Professional Description
Pediatrics is a specialty that focuses on the physical, emotional, and social health of children from birth to young adulthood. Pediatric care encompasses a broad spectrum of health services ranging from preventive health care to the diagnosis and treatment of acute and chronic diseases.

Pediatrics is a discipline that deals with biological, social, and environmental influences on the developing child and with the impact of disease and dysfunction on development. Children differ anatomically, physiologically, immunologically, psychologically, developmentally, and metabolically from adults.

The pediatrician understands the constantly changing functional status of his or her patients incident to growth and development and the consequent changing standards of “normal” for age. A pediatrician is a medical specialist, who is primarily concerned with the health, welfare, and development of children, and is uniquely qualified for these endeavors by virtue of interest and initial training. Maintenance of these competencies is achieved through experience, training, continuous education, self-assessment, and practice improvement.

A pediatrician is able to define accurately the child’s health status as well as to serve as a consultant and to make use of other specialists as consultants. Because the child’s welfare is heavily dependent on the home and family, the pediatrician supports efforts to create a nurturing environment. Such support includes education about healthful living and anticipatory guidance for both patient and parents.

A pediatrician participates at the community level in preventing or solving problems in child health care and publicly advocates the causes of children.

Prerequisites; Length of Training
No previous GME is required; length of accredited programs is 3 years.

Subspecialties
Subspecialty programs accredited by the ACGME
- Adolescent medicine
- Developmental-behavioral pediatrics
- Hospice and palliative medicine
- Neonatal-perinatal medicine
- Pediatric cardiology
- Pediatric critical care medicine
- Pediatric emergency medicine
- Pediatric endocrinology
- Pediatric gastroenterology
- Pediatric hematology/oncology
- Pediatric infectious diseases
- Pediatric nephrology
- Pediatric pulmonology
- Pediatric rheumatology
- Pediatric sports medicine
- Pediatric transplant hepatology
- Sleep medicine

American Board of Pediatrics subspecialty certificates/certificates of added qualifications
- Adolescent medicine
- Developmental-behavioral pediatrics
- Hospice and palliative medicine
- Medical toxicology
- Neonatal-perinatal medicine
- Neurodevelopmental disabilities
- Pediatric cardiology
- Pediatric critical care medicine
- Pediatric emergency medicine
- Pediatric endocrinology
- Pediatric gastroenterology
- Pediatric hematology/oncology
- Pediatric infectious diseases
- Pediatric nephrology
- Pediatric pulmonology
- Pediatric rheumatology
- Pediatric sports medicine
- Pediatric transplant hepatology
- Sleep medicine

Developmental-Behavioral Pediatrics

Professional Description
A developmental-behavioral pediatrician is specially trained to foster understanding and promotion of optimal development of children and families through research, education, clinical care, and advocacy efforts. This assists in the prevention, diagnosis, and management of developmental difficulties and problematic behaviors in children, and in family dysfunctions that compromise children's development.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

Hospice and Palliative Medicine
See page 156.

Medical Toxicology

Professional Description
A pediatrician who focuses on the evaluation and management of patients with accidental or intentional poisoning through exposure to prescription and non-prescription medications, drugs of abuse, household or industrial toxins, and environmental toxins. Important areas of medical toxicology include acute pediatric and adult drug ingestion; drug abuse, addiction, and withdrawal; chemical poisoning exposure and toxicity; hazardous materials exposure and toxicity; and occupational toxicology.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited medical toxicology programs is 2 years.

Neonatal-Perinatal Medicine

Professional Description
A pediatrician who is the principal care provider for sick newborn infants. Clinical expertise is used for direct patient care and consulting with obstetrical colleagues to plan for the care of mothers who have high-risk pregnancies.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

Data
Unless otherwise noted, all data are for 2009.

Neurodevelopmental Disabilities

Professional Description
A pediatrician who treats children having developmental delays or learning disorders, including those associated with visual and hearing impairment, mental retardation, cerebral palsy, spina bifida, autism, and other chronic neurologic conditions. This specialist provides medical consultation and education and assumes leadership in the interdisciplinary management of children with neurodevelopmental disorders. They may also focus on the early identification and diagnosis of neurodevelopmental disabilities in infants and young children, as well as on changes that occur as the child with developmental disabilities grows.

Prerequisites; Length of Training
Completion of 2 years of an accredited pediatrics program in the US or Canada is required. Length of ACGME-accredited programs is 4 years.

Pediatric Critical Care Medicine

Professional Description
A pediatrician whose expertise is in advanced life support for children from the term or near-term neonate to the adolescent. This competence extends to the critical care management of life-threatening organ system failure from any cause in both medical and surgical patients and to the support of vital physiological functions. This specialist may have administrative responsibilities for intensive care units and also facilitate patient care among other specialists.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

Data
Unless otherwise noted, all data are for 2009.

Pediatric Endocrinology

Professional Description
A pediatrician who provides expert care to infants, children and adolescents who have diseases that result from an abnormality in the endocrine glands (glands that secrete hormones). These diseases include diabetes mellitus, growth failure, unusual size for age, early or late pubertal development, birth defects, the genital region, and disorders of the thyroid, adrenal, and pituitary glands.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

Data
Unless otherwise noted, all data are for 2009.

Pediatric Gastroenterology

Professional Description
A pediatrician who specializes in the diagnosis and treatment of diseases of the digestive systems of infants, children, and adolescents. This specialist treats conditions such as abdominal pain, ulcers, diarrhea, cancer, and jaundice and performs complex diagnostic and therapeutic procedures using lighted scopes to see internal organs.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

Data
Unless otherwise noted, all data are for 2009.

Pediatric Pulmonology

Professional Description
A pediatrician dedicated to the prevention and treatment of all respiratory diseases affecting infants, children, and young adults. This specialist is knowledgeable about the growth and development of the lung, assessment of respiratory function in infants and children, and experienced in a variety of invasive and noninvasive diagnostic techniques.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

Data
Unless otherwise noted, all data are for 2009.

Table 1. Pediatric Pulmonology Programs
Number of accredited programs 47

Program Data
Length of accredited training 3
Minimum number of prior years of GME required 3
Offers graduate year 1 positions, available immediately upon medical school completion No
Average number of interviews for program year 1 positions 3.5
Percent new program directors, 2008-2009 academic year (Source: ACGME) 11.6%

Residents/Fellows
Total number of active residents/fellows 118
Average number of residents/fellows per program 2.6
Average percent female 44.9%
Average percent international medical graduate (IMG) 37.3%
### Pediatric Sports Medicine

#### Professional Description
A pediatrician responsible for continuous care in the field of sports medicine, not only for the enhancement of health and fitness, but also for the prevention of injury and illness. A sports medicine physician must have knowledge and experience in the promotion of wellness and the prevention of injury. Knowledge about special areas of medicine such as exercise physiology, biomechanics, nutrition, psychology, physical rehabilitation, epidemiology, physical evaluation, injuries (treatment and prevention and referral practice), and the role of exercise in promoting a healthy lifestyle are essential to the practice of sports medicine. The sports medicine physician requires special education to provide the knowledge to improve the health care of the individual engaged in physical exercise (sports) whether as an individual or as part of a team.

#### Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 1 year.

### Pediatric Transplant Hepatology

#### Professional Description
A pediatrician with expertise in transplant hepatology encompasses the special knowledge and skill required of pediatric gastroenterologists to care for patients prior to and following hepatic transplantation; it spans all phases of liver transplantation.

#### Prerequisites; Length of Training
A minimum of 3 years of prior GME is required. Length of ACGME-accredited programs is 3 years.

Physical Medicine and Rehabilitation

Professional Description
A physician certified in physical medicine and rehabilitation is often called a physiatrist. The primary goal of the physiatrist for his patients is to achieve maximal restoration of physical, psychological, social, and vocational function through comprehensive rehabilitation. Pain management is often an important part of the role of the physiatrist. For diagnosis and evaluation, a physiatrist may include electromyography to supplement the standard history, physical, X-ray, and laboratory examinations. The physiatrist has expertise in the appropriate use of therapeutic exercise, prosthetics (artificial limbs), orthotics, and mechanical and electrical devices.

Prerequisites; Length of Training
No previous GME is required when entering an accredited 4-year program that includes 12 months of fundamental clinical skills in areas other than physical medicine and rehabilitation; 1 year of previous GME (eg, Transitional Year) is required when entering a 3-year program.

Subspecialties
Subspecialty programs accredited by the ACGME
- Hospice and palliative medicine
- Neuromuscular medicine
- Pain medicine
- Pediatric rehabilitation medicine
- Spinal cord injury medicine
- Sports medicine
- 
  * In 2007, ACGME-accredited pain medicine programs under anesthesiology, neurology, physical medicine and rehabilitation, and psychiatry were combined into a multidisciplinary pain medicine subspecialty.

American Board of Physical Medicine and Rehabilitation subspecialty certificates
- Hospice and palliative medicine
- Neuromuscular medicine
- Pain medicine
- Pediatric rehabilitation medicine
- Spinal cord injury medicine
- Sports medicine

Data
Unless otherwise noted, all data are for 2009.

Table 1. Physical Medicine and Rehabilitation Programs

| Number of accredited programs | 79 |

| Program Data |

| Length of accredited training | 3/4 |
| Minimum number of prior years of GME required | 0/0 |
| Offers graduate year 1 positions, available immediately upon medical school completion | Some |
| Average number of interviews for program year 1 positions | 45.5 |
| Percent new program directors, 2008-2009 academic year (Source: ACGME) | 8.9% |

| Residents/fellows |

| Total number of active residents/fellows | 1,174 |
| Average number of residents/fellows per program | 14.9 |
| Average percent female | 38.7% |
| Average percent international medical graduate (IMG) | 16.1% |

Program Faculty

| Average number of full-time physician faculty | 14.8 |
| Average number of part-time physician faculty | 2.5 |
| Average percent female full-time physician faculty | 34.2% |
| Average ratio of full-time physician faculty to resident/fellow | 0.7 |

Table 2. Data for Physical Medicine and Rehabilitation Listed in FREIDA

| Number of programs providing data | 55 |

Work Schedule (Program Year 1)

| Average hours on duty per week | 52.6 |
| Average maximum consecutive hours on duty | 21.7 |
| Average days off duty per week | 1.6 |
| Moonlighting allowed within institution | 57.7% |
| Night float system | 9.6% |
| Offers awareness and management of fatigue in residents/fellows | 100.0% |

Educational Setting (Program Year 1)

| Average hours/week of regularly scheduled lectures/conferences | 5.7 |
| Average percent of training in hospital outpatient clinics | 24.4% |
| Average percent of training in nonhospital ambulatory care community settings | 5.3% |

Educational Benefits

- Program to assess/enhance medical professionalism | 82.7% |
- Debt management/financial counseling | 61.5% |
- Formal program to develop teaching skills | 73.1% |
- Formal mentoring program | 63.5% |
- Formal program to foster interdisciplinary teamwork | 48.1% |
- Continuous quality improvement training | 90.4% |
- International experience | 13.5% |
- Resident/fellow retreats | 53.8% |
- Off-campus electives | 90.4% |
- Hospice/home care experience | 38.5% |
- Cultural competence awareness | 84.6% |
- Instruction in medical Spanish or other non-English language | 25.0% |
- Alternative/complementary medicine curriculum | 65.4% |
- Training in identifying and reporting of domestic violence/abuse | 38.5% |
- MPh/MBA or PhD training | 13.5% |
- Research rotation | 25.0% |

Educational Features

- Offers additional training or educational experience beyond accredited length | 8.6% |
- Offers a primary care track | 1.9% |
- Offers a rural track | 0.0% |
- Offers a women's health track | 3.8% |
- Offers a hospitalist track | 1.9% |
- Offers a research track/nonaccredited fellowship | 15.4% |
- Offers an other track | 5.8% |

Resident Evaluation

| Yearly specialty in-service examination required | 97.6% |
| Patient surveys | 67.3% |
| Portfolio system | 65.4% |
| 360-degree evaluations | 96.2% |
| Objective structured clinical examinations (OSCE) | 32.7% |

Program Evaluation

| Program graduation rates | 88.5% |
| Board certification rates | 100.0% |
| In-training examinations | 100.0% |
| Performance-based assessments | 55.8% |
Neuromuscular Medicine

Professional Description
A physiatrist, who specializes in neuromuscular medicine, possesses specialized knowledge in the science, clinical evaluation, and management of these disorders. This encompasses the knowledge of the pathology, diagnosis, and treatment of these disorders at a level that is significantly beyond the training and knowledge expected of a general physiatrist.

Neuromuscular medicine includes the evaluation and treatment of a wide range of diseases, including motor neuron disease, myopathy/neuromuscular transmission disorders, peripheral neuropathy, cranial/spinal single and multiple mononeuropathies, polyneuropathy (infectious/inflammatory), inherited neuropathy, polyneuropathy (ischemia/physical agents/toxins), and polyneuropathy/systemic disease.

Prerequisites; Length of Training
Successful completion of an ACGME-accredited program in either adult or pediatric neurology or physical medicine and rehabilitation; programs accredited by the Royal College of Physicians and Surgeons (Canada) are also accepted. Length of ACGME-accredited programs is 1 year.

For more information

Pediatric Rehabilitation Medicine

Professional Description
A physiatrist who utilizes an interdisciplinary approach and addresses the prevention, diagnosis, treatment, and management of congenital and childhood onset physical impairments including related or secondary medical, physical, functional, psychosocial, and vocational limitations or conditions, with an understanding of the life course of disability.

This physician is trained in the identification of functional capabilities and selection of the best of rehabilitation intervention strategies, with an understanding of the continuum of care.

Prerequisites; Length of Training
A minimum of 4 years of prior GME is required. Length of ACGME-accredited programs is 2 years (or 1 year for trainees who have completed ACGME-approved combined or consecutive programs in both physical medicine and rehabilitation and pediatrics).

Hospice and Palliative Medicine

See page 156.
Spinal Cord Injury Medicine

Professional Description
A physician who addresses the prevention, diagnosis, treatment, and management of traumatic spinal cord injury and nontraumatic etiologies of spinal cord dysfunction by working in an interdisciplinary manner. Care is provided to patients of all ages on a lifelong basis and covers related medical, physical, psychological, and vocational disabilities and complications.

Prerequisites; Length of Training
A minimum of 3 years of prior GME is required in a specialty relevant to spinal cord injury medicine, such as anesthesiology, emergency medicine, family medicine, internal medicine, neurological surgery, neurology, orthopaedic surgery, pediatrics, physical medicine and rehabilitation, plastic surgery, surgery, or urology. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2009.

| Maximum number of unpaid days for family/medical leave | 47 |

Major Medical Benefits

- Major medical insurance for residents | 100.0% |
- Major medical insurance for dependents | 90.9% |
### Sports Medicine

**Professional Description**
A physiatrist with special knowledge in sports medicine is responsible for continuous care in the field of sports medicine, not only for the enhancement of health and fitness, but also for the prevention and management of injury and illness. A sports medicine physician has knowledge and experience in the promotion of wellness and the role of exercise in promoting a healthy lifestyle. Knowledge of exercise physiology, biomechanics, nutrition, psychology, physical rehabilitation, and epidemiology is essential to the practice of sports medicine.

#### Prerequisites; Length of Training
Completion of an ACGME-accredited residency is required; length of accredited programs is 1 year.

Plastic Surgery

Professional Description
Plastic surgery deals with the repair, reconstruction, or replacement of physical defects of form or function involving the skin, musculoskeletal system, craniofacial structures, hand, extremities, breast and trunk, external genitalia or cosmetic enhancement of these areas of the body. Cosmetic surgery is an essential component of plastic surgery. The plastic surgeon uses cosmetic surgical principles both to improve overall appearance and to optimize the outcome of reconstructive procedures.

Special knowledge and skill in the design and surgery of grafts, flaps, free tissue transfer and replantation is necessary. Competence in the management of complex wounds, the use of implantable materials, and in tumor surgery is required. Plastic surgeons have been prominent in the development of innovative techniques such as microvascular and craniofacial surgery, liposuction, and tissue transfer. Anatomy, physiology, pathology, and other basic sciences are fundamental to the specialty.

Competency in plastic surgery implies an amalgam of basic medical and surgical knowledge, operative judgment, technical expertise, ethical behavior, and interpersonal skills to achieve problem resolution and patient satisfaction.

Source: American Board of Plastic Surgery

Prerequisites; Length of Training
Accredited plastic surgery programs are either independent (3 years length) or integrated (6 years). Prerequisites for the independent programs are 1) a minimum of 3 years clinical education with progressive responsibility in a general surgery program; 2) completion of a neurological surgery, orthopaedic surgery, otolaryngology, or urology residency; or 3) completion of an educational program in oral and maxillofacial surgery approved by the American Dental Association (for individuals holding the DMD/MD or DDS/MD degree).

Subspecialties
Subspeciality programs accredited by the ACGME
- Craniofacial surgery
- Hand surgery

American Board of Plastic Surgery subspecialty certificates
- Plastic surgery within the head and neck
- Surgery of the hand

Craniofacial Surgery (Plastic Surgery within the Head and Neck)

Professional Description
A plastic surgeon with additional training in plastic and reconstructive procedures within the head, face, neck, and associated structures, including cutaneous head and neck oncology and
reconstruction, management of maxillofacial trauma, soft tissue repair, and neural surgery. The field is diverse and involves a wide age range of patients, from the newborn to the aged. While both cosmetic and reconstructive surgery are practiced, there are many additional procedures that interface with them. Cosmetic procedures include otoplasty; surgery of the aging face (brow lift, blepharoplasty, face lift); rhinoplasty; facial implants (cheek, nasal, and chin); facial resurfacing; and liposuction/lipoplasty. Reconstructive procedures performed include maxillofacial trauma; skin grafts and flaps; repair of congenital facial defects (hemangioma, cleft lip and palate, nasal abnormalities); reconstruction of the jaws and other facial bones; reanimation/rehabilitation of the paralyzed face; nerve repair; periorbital surgery; and biomedical implant insertion. Areas of research in this field include materials biocompatibility; wound healing adjuncts; skin repair/regeneration; and bone reconstruction.

Prerequisites; Length of Training
Completion of a 6-year plastic surgery program or other appropriate surgery training is required. Length of ACGME-accredited programs is 1 year.

Hand Surgery
Professional Description
A plastic surgeon with additional training in the investigation, preservation, and restoration—using medical, surgical, and rehabilitative means—of all structures of the upper extremity directly affecting the form and function of the hand and wrist.

Prerequisites; Length of Training
Completion of an ACGME-accredited general surgery, orthopaedic surgery, or plastic surgery program is required. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2009.

Preventive Medicine

Professional Description
A preventive medicine specialist focuses on the health of individuals and defined populations to protect, promote, and maintain health and well-being and to prevent disease, disability, and premature death. The distinctive components of preventive medicine include:

- Biostatistics and the application of biostatistical principles and methodology
- Epidemiology and its application to population-based medicine and research
- Health services management and administration, including developing, assessing, and assuring health policies; planning, implementing, directing, budgeting, and evaluating population health and disease management programs; and utilizing legislative and regulatory processes to enhance health
- Control of environmental factors that may adversely affect health
- Control and prevention of occupational factors that may adversely affect health safety
- Clinical preventive medicine activities, including measures to promote health and prevent the occurrence, progression, and disabling effects of disease and injury
- Assessment of social, cultural, and behavioral influences on health

A preventive medicine physician may be a specialist in general preventive medicine, public health, occupational medicine, or aerospace medicine. This specialist works with large population groups as well as with individual patients to promote health and understand the risks of disease, injury, disability, and death, seeking to modify and eliminate these risks.

Prerequisites; Length of Training
Accredited programs are either 1, 2, or 3 years in length.

Specialty Areas
Programs in specialty areas accredited by the ACGME
- Aerospace medicine
- Occupational medicine
- Public health and general preventive medicine

American Board of Preventive Medicine specialty area certificates
- Aerospace medicine
- Occupational medicine
- Public health and general preventive medicine

Subspecialties
Subspecialty programs accredited by the ACGME
- Medical toxicology
- Undersea and hyperbaric medicine

American Board of Preventive Medicine subspecialty certificates
- Medical toxicology
- Undersea and hyperbaric medicine

Data
Unless otherwise noted, all data are for 2009.

Residents/Fellows
- Total number of active residents/fellows: 249
- Average number of residents/fellows per program: 3.5
- Average percent female: 46.2%
- Average percent international medical graduate (IMG): 14.1%

Program Faculty
- Average number of full-time physician faculty: 8.9
- Average number of part-time physician faculty: 4.3
- Average percent female full-time physician faculty: 33.7%
- Average ratio of full-time physician faculty to resident/fellow: 1.3

Table 2. Data for Preventive Medicine Listed in FREIDA

| Number of programs providing data | 21    |

Work Schedule (Program Year 1)
- Average hours on duty per week: 41.4
- Average maximum consecutive hours on duty: 12.3
- Average days off duty per week: 2.0
- Moonlighting allowed within institution: 68.2%
- Night float system: 4.5%
- Offers awareness and management of fatigue in residents/fellows: 86.4%

Educational Setting (Program Year 1)
- Average hours/week of regularly scheduled lectures/conferences: 8.7
- Average percent of training in hospital outpatient clinics: 12.4%
- Average percent of training in nonhospital ambulatory care community settings: 28.0%

Educational Benefits
- Program to assess/enhance medical professionalism: 86.4%
- Debt management/financial counseling: 40.9%
- Formal program to develop teaching skills: 59.1%
- Formal mentoring program: 50.0%

**Aerospace Medicine**

**Professional Description**

The focus of aerospace medicine is on the determination and maintenance of the health, safety, and performance of persons involved in air and space travel. Aerospace medicine, as a broad field of endeavor, offers dynamic challenges and opportunities for physicians, nurses, physiologists, bioenvironmental engineers, industrial hygienists, environmental health practitioners, human factors specialists, psychologists, and other professionals. Those in the field are dedicated to enhancing health, promoting safety, and improving performance of individuals who work or travel in unusual environments. The environments of space and aviation provide significant challenges, such as microgravity, radiation exposure, G-forces, emergency ejection injuries, and hypoxic conditions, for those embarking in their exploration. Areas of interest range from space and atmospheric flight to underwater activities, and the environments that are studied cover a wide spectrum, extending from the "microenvironments" of space or diving suits to those of "Spaceship Earth."

**Occupational Medicine**

**Professional Description**

Occupational and environmental medicine is perhaps the most wide ranging of all medical specialties. It is the medical specialty devoted to the prevention and management of occupational and environmental injury, illness and disability, and promotion of health and productivity of workers, their families, and communities. Occupational medicine was previously identified as “industrial medicine.” This term was used when heavy industry (e.g., lumbering, automobile manufacturing, mining, railroads, steel manufacturers,
etc.) employed physicians to provide acute medical and surgical care for employees. By 1945, medical programs had spread to business organizations with a predominance of clerical and service employees. Large banks, insurance companies, mercantile establishments, etc., could not be described as industrial. Therefore, the broader designation of “occupational medicine” came into common use.

Today, the complexity and pervasiveness of modern industrial processes afford occupational and environmental medicine physicians the opportunity to address work site and environmental concerns and such community health and policy issues as atmospheric pollution, product safety, health promotion, and benefits value management. The term “environmental medicine” has also recently been used to describe this growing, challenging, modern medical specialty. Environmental medicine has been defined as the branch of medical science that addresses the impact of chemical and physical stressors on individuals and groups. Both occupational and environmental medicine use similar skills and focus on the recognition and prevention of hazardous exposures.

Public Health and General Preventive Medicine

Professional Description
A public health physician helps guide a community, agency, health organization, medical office, or program in pursuit of group or community health goals. This includes physicians who plan, provide, and administer public health and preventive medicine services in public, private, or voluntary settings.

The public health practitioner:
- Performs epidemiological investigations of acute and chronic diseases and injuries
- Uses appropriate statistical techniques in the design of studies and interpretation of findings relative to disease interventions performed on individuals and in monitoring and experimental protocols
- Plans, administers, and evaluates programs to promote health and prevent disease in medical practice settings and in public health agencies
- Designs, performs, and evaluates clinical trials
- Applies clinical interventions in the general population
- Assesses health risk factors in individual persons and groups and prescribes appropriate interventions
- Assesses and ameliorates the impact of environmental and occupational risk factors on individual persons and on groups
- Assesses the clinical and public health program needs of populations, eg, workers, communities, and military groups

Medical Toxicology

Professional Description
A specialist who is an expert in evaluating and managing patients with accidental or intentional poisoning through exposure to prescription and nonprescription medications, drugs of abuse, household or industrial toxins, and environmental toxins.

Important areas of medical toxicology include acute pediatric and adult drug ingestion; drug abuse, addiction, and withdrawal; chemical poisoning exposure and toxicity; hazardous materials exposure and toxicity; and occupational toxicology.

Prerequisites; Length of Training
Completion of an ACGME-accredited residency is required; length of accredited programs is 2 years.

For more information
American College of Medical Toxicology

Undersea and Hyperbaric Medicine

Professional Description
A specialist who treats decompression illness and diving accident cases and uses hyperbaric oxygen therapy to treat conditions such as carbon monoxide poisoning, gas gangrene, nonhealing wounds, tissue damage from radiation and burns, and bone infections. This specialist also serves as consultant to other physicians in all aspects of hyperbaric chamber operations, and assesses risks and applies appropriate standards to prevent disease and disability in divers and other persons working in altered atmospheric conditions.

Prerequisites; Length of Training
Completion of an ACGME-accredited residency is required; length of accredited programs is 1 year.

Psychiatry

Professional Description
A psychiatrist specializes in the prevention, diagnosis, and treatment of mental, addictive, and emotional disorders such as schizophrenia and other psychotic disorders, mood disorders, anxiety disorders, substance-related disorders, sexual and gender identity disorders, and adjustment disorders. The psychiatrist is able to understand the biologic, psychologic, and social components of illness, and therefore is uniquely prepared to treat the whole person. A psychiatrist is qualified to order diagnostic laboratory tests and to prescribe medications, evaluate and treat psychologic and interpersonal problems, and intervene with families who are coping with stress, crises, and other problems in living.

Prerequisites; Length of Training
No previous GME is required. ACGME-accredited programs are 4 years.
Physicians may also enter programs at the GY2 level only after successfully completing one of the following:
- One clinical year of training in an ACGME-accredited internal medicine, family medicine, or pediatrics program
- An ACGME-accredited transitional year program
- One year of an ACGME-accredited residency in a clinical specialty requiring comprehensive and continuous patient care

For physicians entering at the GY2 level, the GY1 year may be credited toward the 48-month requirement.

Subspecialties
Subspecialty programs accredited by the ACGME
- Addiction psychiatry
- Child and adolescent psychiatry
- Forensic psychiatry
- Geriatric psychiatry
- Hospice and palliative medicine
- Pain medicine
- Psychosomatic medicine
- Sleep medicine

American Board of Psychiatry and Neurology subspecialty certificates
- Addiction psychiatry
- Child and adolescent psychiatry
- Forensic psychiatry
- Geriatric psychiatry
- Hospice and palliative medicine
- Pain medicine
- Psychosomatic medicine
- Sleep medicine

Geriatric Psychiatry

### Professional Description

A psychiatrist with expertise in the prevention, evaluation, diagnosis, and treatment of mental and emotional disorders in the elderly. The geriatric psychiatrist seeks to improve the psychiatric care of the elderly both in health and in disease.

### Prerequisites; Length of Training

A minimum of 4 years of prior GME is required. Length of ACGME-accredited programs is 1 year.
Data
Unless otherwise noted, all data are for 2009.

Residents/Fellows

| Total number of active residents/fellows | 59 |
| Average number of residents/fellows per program | 1.0 |
| Average percent female | 49.2% |
| Average percent international medical graduate (IMG) | 62.7% |

Program Faculty

| Average number of full-time physician faculty | 8.8 |
| Average number of part-time physician faculty | 1.8 |
| Average percent female full-time physician faculty | 28.2% |
| Average ratio of full-time physician faculty to resident/fellow | 2.8 |

Table 2. Data for Geriatric Psychiatry Listed in FREIDA

| Number of programs providing data | 28 |

Work Schedule (Program Year 1)

| Average hours on duty per week | 39.1 |
| Average maximum consecutive hours on duty | 12.6 |
| Average days off duty per week | 1.8 |
| Moonlighting allowed within institution | 72.2% |
| Night float system | 2.8% |
| Offers awareness and management of fatigue in residents/fellows | 77.8% |

Educational Setting (Program Year 1)

| Average hours/week of regularly scheduled lectures/conferences | 4.3 |
| Average percent of training in hospital outpatient clinics | 38.2% |
| Average percent of training in nonhospital ambulatory care community settings | 12.6% |

Educational Benefits

| Program to assess/enhance medical professionalism | 80.6% |
| Debt management/financial counseling | 36.1% |
| Formal program to develop teaching skills | 91.7% |
| Formal mentoring program | 63.9% |
| Formal program to foster interdisciplinary teamwork | 36.1% |
| Continuous quality improvement training | 72.2% |
| International experience | 2.8% |
| Resident/fellow retreats | 44.4% |
| Off-campus electives | 61.1% |
| Hospice/home care experience | 77.8% |
| Cultural competence awareness | 97.2% |
| Instruction in medical Spanish or other non-English language | 13.9% |
| Alternative/complementary medicine curriculum | 11.1% |
| Training in identifying and reporting of domestic violence/abuse | 72.2% |
| MPH/MBA or PhD training | 25.6% |
| Research rotation | 33.3% |

Educational Features

| Offers additional training or educational experience beyond accredited length | 19.7% |
| Offers a primary care track | 5.6% |
| Offers a rural track | 5.6% |
| Offers a women's health track | 0.0% |
| Offers a hospitalist track | 0.0% |
| Offers a research track/nonaccredited fellowship | 36.1% |

Offers an other track | 13.9% |

Resident Evaluation

| Yearly specialty in-service examination required | 45.5% |
| Patient surveys | 52.8% |
| Portfolio system | 47.2% |
| 360-degree evaluations | 88.9% |
| Objective structured clinical examinations (OSCE) | 8.3% |

Program Evaluation

| Program graduation rates | 83.3% |
| Board certification rates | 86.1% |
| In-training examinations | 38.9% |
| Performance-based assessments | 38.9% |

Employment Policies and Benefits

| Part-time/shared positions | 30.6% |
| On-site child care | 33.3% |
| Subsidized child care | 11.1% |
| Allowance/stipend for professional expenses | 75.0% |
| Leave for educational meetings/conferences | 75.0% |
| Moving allowance | 5.6% |
| Housing stipend | 5.6% |
| On-call meal allowance | 25.0% |
| Free parking | 69.4% |
| PDAs | 8.3% |
| Placement assistance upon completion of program | 22.2% |

Compensation and Leave (Graduate Year 1)

| Average resident/fellow compensation | $52,921 |
| Average number weeks of vacation | 3.5 |
| Sick days (paid) | 29.2 |
| Maximum number of paid days for family/medical leave | 37 |
| Maximum number of unpaid days for family/medical leave | 58 |

Major Medical Benefits

| Major medical insurance for residents | 97.2% |
| Major medical insurance for dependents | 97.2% |
| Outpatient mental health insurance | 97.2% |
| Inpatient mental health insurance | 97.2% |
| Group life insurance | 86.1% |
| Dental insurance | 86.1% |
| Disability insurance | 88.9% |
| Disability insurance for occupationally acquired HIV | 75.0% |

Medical insurance coverage begins when starting program | 91.7% |

Psychosomatic Medicine

Professional Description
A psychiatrist who specializes in the diagnosis and treatment of psychiatric disorders and symptoms in complex medically ill patients. This subspecialty includes treatment of patients with acute or chronic medical, neurological, obstetrical, or surgical illness in which psychiatric illness affects their medical care and/or quality of life. Examples are HIV infection, organ transplantation, heart disease, renal failure, cancer, stroke, traumatic brain injury, high-risk pregnancy, and chronic obstructive pulmonary disease, among others. Patients also may be those who have a psychiatric disorder that is the direct consequence of a primary medical condition, or a somatoform disorder or psychological factors affecting a general medical condition. Psychiatrists specializing in psychosomatic medicine provide consultation-liaison services in general medical hospitals, attend on medical psychiatry inpatient units, and provide collaborative care in primary care and other outpatient settings.

Radiation Oncology

Professional Description
A radiologist who deals with the therapeutic applications of radiant energy and its modifiers and the study and management of disease, especially malignant tumors.

Prerequisites; Length of Training
Resident education in radiation oncology includes 5 years of accredited, clinically oriented GME, of which 4 years must be in radiation oncology. GY1 training must be spent in internal medicine, family medicine, obstetrics/gynecology, surgery or surgical specialties, pediatrics, a year of categorical radiation oncology, or a transitional year program. ACGME-accredited programs in radiation oncology are 4 years.

Subspecialties
Subspecialty programs accredited by the ACGME
- Hospice and palliative medicine

American Board of Radiology subspecialty certificates
- Hospice and palliative medicine

Data
Unless otherwise noted, all data are for 2009.

Table 2. Data for Radiation Oncology Listed in FREIDA
| Number of programs providing data | 36    |
| Work Schedule (Program Year 1) |       |
| Average hours on duty per week | 49.1  |
| Average maximum consecutive hours on duty | 13.7  |
| Average days off duty per week | 1.9   |
| Moonlighting allowed within institution | 30.6% |
| Night float system | 2.8%  |
| Offers awareness and management of fatigue in residents/fellows | 88.9% |

| Educational Setting (Program Year 1) |       |
| Average hours/week of regularly scheduled lectures/conferences | 8.9   |
| Average percent of training in hospital outpatient clinics | 83.9% |
| Average percent of training in nonhospital ambulatory care community settings | 1.5%  |

Educational Benefits
Program to assess/enhance medical professionalism | 63.9% |
Debt management/financial counseling | 38.9% |
Formal program to develop teaching skills | 66.7% |
Formal mentoring program | 41.7% |
Formal program to foster interdisciplinary teamwork | 27.8% |
Continuous quality improvement training | 83.3% |
International experience | 16.7% |
Resident/fellow retreats | 33.3% |
Off-campus electives | 75.0% |
Hospice/home care experience | 13.9% |
Cultural competence awareness | 75.0% |
Instruction in medical Spanish or other non-English language | 13.9% |
Alternative/complementary medicine curriculum | 16.7% |
Training in identifying and reporting of domestic violence/abuse | 33.3% |
MPH/MBA or PhD training | 25.0% |
Research rotation | 63.9% |

Educational Features
Offers additional training or educational experience beyond accredited length | 7.1% |
Offers a primary care track | 2.8% |
Offers a rural track | 5.6% |
Offers a women's health track | 2.8% |
Offers a hospitalist track | 2.8% |
Offers a research track/nonaccredited fellowship | 22.2% |
Offers an other track | 13.9% |

Resident Evaluation
Yearly specialty in-service examination required | 98.9% |
Patient surveys | 38.9% |
Portfolio system | 33.3% |
360-degree evaluations | 94.4% |
Objective structured clinical examinations (OSCE) | 8.3% |

Program Evaluation
Program graduation rates | 88.9% |
Board certification rates | 97.2% |
In-training examinations | 94.4% |
Performance-based assessments | 30.6% |

Employment Policies and Benefits
Part-time/shared positions | 0.0% |
On-site child care | 27.8% |
Subsidized child care | 8.3% |
Allowance/stipend for professional expenses | 97.2% |
Leave for educational meetings/conferences | 82.8% |
Moving allowance | 2.8% |
Housing stipend | 2.8% |
On-call meal allowance | 47.2% |
Free parking | 41.7% |
PAs | 22.2% |
Placement assistance upon completion of program | 13.9% |
Cross coverage in case of illness/disability | 83.3% |

Compensation and Leave (Graduate Year 1)
Average resident/fellow compensation | $44,897 |
Average number weeks of vacation | 6.3 |
Sick days (paid) | 25.2 |
Maximum number of paid days for family/medical leave | 39 |
Maximum number of unpaid days for family/medical leave | 55 |
Major Medical Benefits

- Major medical insurance for residents: 100.0%
- Major medical insurance for dependents: 97.2%
- Outpatient mental health insurance: 94.4%
- Inpatient mental health insurance: 91.7%
- Group life insurance: 88.9%
- Dental insurance: 91.7%
- Disability insurance: 91.7%
- Disability insurance for occupationally acquired HIV: 83.3%
- Medical insurance coverage begins when starting program: 91.7%

Radiology-Diagnostic

Professional Description
A radiologist utilizes radiologic methodologies to diagnose and treat disease. Physicians practicing in the field of radiology most often specialize in radiology, diagnostic radiology, radiation oncology, or radiologic physics.

A diagnostic radiologist utilizes X-ray, radionuclides, ultrasound, and electromagnetic radiation to diagnose and treat disease.

Prerequisites; Length of Training
Resident education in diagnostic radiology includes 5 years of clinically oriented GME, of which 4 years must be in diagnostic radiology. The clinical year must consist of ACGME, RCPSC, or equivalent accredited training in internal medicine, pediatrics, surgery or surgical specialties, obstetrics and gynecology, neurology, family medicine, or any combination of these, or an ACGME- or equivalent accredited transitional year. ACGME-accredited programs in diagnostic radiology are 4 years.

Subspecialties
Subspecialty programs accredited by the ACGME
- Abdominal radiology
- Cardiothoracic radiology
- Endovascular surgical neuroradiology
- Musculoskeletal radiology
- Neuroradiology
- Nuclear radiology
- Pediatric radiology
- Vascular and interventional radiology

American Board of Radiology subspecialty certificates
- Hospice and palliative medicine
- Neuroradiology
- Nuclear radiology
- Pediatric radiology
- Vascular and interventional radiology

Data
Unless otherwise noted, all data are for 2009.

Table 1. Radiology-Diagnostic Programs
<table>
<thead>
<tr>
<th>Number of accredited programs</th>
<th>188</th>
</tr>
</thead>
</table>

Program Data
- Length of accredited training: 4
- Minimum number of prior years of GME required: 1/0
- Offers graduate year 1 positions, available immediately upon medical school completion: Some
- Average number of interviews for program year 1 positions: 67.9
- Percent new program directors, 2008-2009 academic year (Source: ACGME): 17.0%

Residents/Fellows
- Total number of active residents/fellows: 4,396
- Average number of residents/fellows per program: 23.5
- Average percent female: 27.7%
- Average percent international medical graduate (IMG): 7.1%

Program Faculty
- Average number of full-time physician faculty: 31.5
- Average number of part-time physician faculty: 6.1
- Average percent female full-time physician faculty: 23.7%
- Average ratio of full-time physician faculty to resident/fellow: 1.0

Table 2. Data for Radiology-Diagnostic Listed in FREIDA
<table>
<thead>

</thead>
</table>

Work Schedule (Program Year 1)
- Average hours on duty per week: 52.4
- Average maximum consecutive hours on duty: 20.4
- Average days off duty per week: 1.7
- Moonlighting allowed within institution: 58.0%
- Night float system: 71.8%
- Offers awareness and management of fatigue in residents/fellows: 95.4%

Educational Setting (Program Year 1)
- Average hours/week of regularly scheduled lectures/conferences: 9.5
- Average percent of training in hospital outpatient clinics: 16.1%
- Average percent of training in nonhospital ambulatory care community settings: 1.5%

Educational Benefits
- Program to assess/enhance medical professionalism: 73.3%
- Debt management/financial counseling: 54.2%
- Formal program to develop teaching skills: 65.6%
- Formal mentoring program: 45.8%
- Formal program to foster interdisciplinary teamwork: 13.0%
- Continuous quality improvement training: 90.8%
- International experience: 6.9%
- Resident/fellow retreats: 23.7%
- Off-campus electives: 60.3%
- Hospice/home care experience: 1.5%
- Cultural competence awareness: 65.6%
- Instruction in medical Spanish or other non-English language: 11.5%
- Alternative/complementary medicine curriculum: 7.6%
- Training in identifying and reporting of domestic violence/abuse: 36.6%
- MPH/MBA or PhD training: 9.9%
- Research rotation: 30.5%

Educational Features
- Offers additional training or educational experience beyond accredited length: 14.8%
- Offers a primary care track: 3.1%
- Offers a rural track: 0.0%
- Offers a women’s health track: 3.8%
- Offers a hospitalist track: 1.5%
- Offers a research track/nonaccredited fellowship: 8.4%
- Offers an other track: 7.6%

Resident Evaluation
- Yearly specialty in-service examination required: 99.0%
- Patient surveys: 32.1%
- Portfolio system: 88.5%
- 360-degree evaluations: 96.9%
- Objective structured clinical examinations (OSCE): 20.8%

Program Evaluation
- Program graduation rates: 89.3%
- Board certification rates: 100.0%
- In-training examinations: 96.2%
- Performance-based assessments: 37.4%

Employment Policies and Benefits
- Part-time/shared positions: 0.8%
- On-site child care: 32.8%
- Subsidized child care: 5.3%
- Allowance/stipend for professional expenses: 98.5%
- Leave for educational meetings/conferences: 88.5%
Moving allowance 6.1%
Housing stipend 10.7%
On-call meal allowance 96.2%
Free parking 64.8%
PDAs 14.5%
Placement assistance upon completion of program 22.9%
Cross coverage in case of illness/disability 73.3%

Compensation and Leave (Graduate Year 1)
Average resident/fellow compensation $46,319
Average number weeks of vacation 4.9
Sick days (paid) 17.6
Maximum number of paid days for family/medical leave 44
Maximum number of unpaid days for family/medical leave 60

Major Medical Benefits
Major medical insurance for residents 98.5%
Major medical insurance for dependents 93.1%
Outpatient mental health insurance 88.5%
Inpatient mental health insurance 89.3%
Group life insurance 89.3%
Dental insurance 87.8%
Disability insurance 87.8%
Disability insurance for occupationally acquired HIV 66.4%
Medical insurance coverage begins when starting program 87.8%

Abdominal Radiology

Professional Description
Abdominal radiology constitutes the application and interpretation of conventional radiology, computed tomography, ultrasonography, magnetic resonance (MR) imaging, nuclear medicine, fluoroscopy, and interventional methods customarily included within the specialty of diagnostic radiology as they apply to diseases involving the gastrointestinal tract, genitourinary tract, and the intraperitoneal and extra peritoneal abdominal organs.

Prerequisites; Length of Training
Satisfactory completion of an ACGME- or RCPSC-accredited diagnostic radiology residency, or other training judged suitable by the program director, is required. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2009.

Cardiothoracic Radiology

Professional Description
The cardiothoracic radiologist works as a diagnostic and therapeutic consultant and practitioner in the application and interpretation of imaging examinations and interventional procedures related to the lungs, pleura, mediastinum, chest wall, heart, pericardium, and the thoracic vascular system in the adult. The imaging methods and procedures include, but are not necessarily limited to, routine radiography, fluoroscopy, computed tomography (CT), magnetic resonance (MR) imaging, ultrasound, and interventional techniques.

Source: Cardiothoracic Radiology Program Requirements, ACGME
www.acgme.org/acWebsite/downloads/RRC_progReq/429pr602.pdf

Prerequisites; Length of Training
Satisfactory completion of an ACGME-accredited diagnostic radiology residency or its equivalent is required. Length of ACGME-accredited programs is 1 year.

Note: ACGME accreditation of cardiothoracic radiology programs will be discontinued after June 30, 2010.

Musculoskeletal Radiology

Professional Description
Musculoskeletal radiologists use imaging examinations and procedures to analyze disorders of the musculoskeletal system, including bones, joints, and soft tissues. The imaging methods and procedures include, but are not necessarily limited to, routine radiography, computed tomography, ultrasonography, radionuclide scintigraphy, magnetic resonance, arthrography, and image-guided percutaneous biopsy techniques.

Prerequisites; Length of Training
Satisfactory completion of an ACGME- or RCPSC-accredited diagnostic radiology residency, or other training judged suitable by the program director, is required. Length of ACGME-accredited programs is 1 year.

### Neuroradiology

#### Professional Description

A radiologist who diagnoses and treats diseases utilizing imaging procedures as they relate to the brain, spine and spinal cord, head, neck, and organs of special sense in adults and children.

#### Prerequisites; Length of Training

Satisfactory completion of an ACGME- or RCPSC-accredited diagnostic radiology residency, or other training judged suitable by the program director, is required. Length of ACGME-accredited programs is 1 year.

#### Data

Unless otherwise noted, all data are for 2009.

### Table 1. Neuroradiology Programs

| Number of accredited programs | 86 |

#### Program Data

- Length of accredited training: 1
- Minimum number of prior years of GME required: 4
- Offers graduate year 1 positions, available immediately upon medical school completion: No
- Average number of interviews for program year 1 positions: 10.3
- Percent new program directors, 2008-2009 academic year (Source: ACGME): 8.2%

#### Residents/Fellows

- Total number of active residents/fellows: 236
- Average number of residents/fellows per program: 2.7
- Average percent female: 19.9%
- Average percent international medical graduate (IMG): 17.6%

#### Program Faculty

- Average number of full-time physician faculty: 7.8
- Average number of part-time physician faculty: 0.8
Average percent female full-time physician faculty 18.9%
Average ratio of full-time physician faculty to resident/fellow 1.3

Table 2. Data for Neuroradiology Listed in FREIDA
Number of programs providing data 51

Work Schedule (Program Year 1)
Average hours on duty per week 47.0
Average maximum consecutive hours on duty 17.2
Average days off duty per week 1.8
Moonlighting allowed within institution 52.1%
Night float system 12.5%
Offers awareness and management of fatigue in residents/fellows 85.4%

Educational Setting (Program Year 1)
Average hours/week of regularly scheduled lectures/conferences 5.0
Average percent of training in hospital outpatient clinics 22.2%
Average percent of training in nonhospital ambulatory care community settings 0.4%

Educational Benefits
Program to assess/enhance medical professionalism 58.3%
Debt management/financial counseling 31.3%
Formal program to develop teaching skills 68.8%
Formal mentoring program 41.7%
Formal program to foster interdisciplinary teamwork 20.8%
Continuous quality improvement training 77.1%
International experience 8.3%
Resident/fellow retreats 12.5%
Offers awareness and management of fatigue in residents/fellows 85.4%

Educational Features
Offers additional training or educational experience beyond accredited length 60.7%
Offers a primary care track 4.2%
Offers a rural track 0.0%
Offers a women's health track 0.0%
Offers a hospitallist track 0.0%
Offers a research track/nonaccredited fellowship 8.3%
Offers an other track 2.1%

Resident Evaluation
Yearly specialty in-service examination required 4.2%
Patient surveys 22.9%
Portfolio system 45.6%
360-degree evaluations 91.7%
Objective structured clinical examinations (OSCE) 4.3%

Program Evaluation
Program graduation rates 72.9%
Board certification rates 77.1%
In-training examinations 8.3%
Performance-based assessments 29.2%

Employment Policies and Benefits
Part-time/shared positions 0.0%
On-site child care 33.3%
Subsidized child care 8.3%
Allowance/stipend for professional expenses 87.5%
Leave for educational meetings/conferences 81.0%
Moving allowance 2.1%
Housing stipend 2.1%
On-call meal allowance 52.1%
Free parking 54.2%
PDAs 14.6%
Placement assistance upon completion of program 20.8%
Cross coverage in case of illness/disability 62.5%

Compensation and Leave (Graduate Year 1)
Average resident/fellow compensation $54,412
Average number weeks of vacation 3.5
Sick days (paid) 18.9
Maximum number of paid days for family/medical leave 47
Maximum number of unpaid days for family/medical leave 45

Major Medical Benefits
Major medical insurance for residents 100.0%
Major medical insurance for dependents 95.6%
Outpatient mental health insurance 89.6%
Inpatient mental health insurance 87.5%
Group life insurance 85.4%
Dental insurance 85.4%
Disability insurance 85.4%
Disability insurance for occupationally acquired HIV 68.8%
Medical insurance coverage begins when starting program 87.5%

Nuclear Radiology

Professional Description
A radiologist involved in the analysis and imaging of radionuclides and radiolabeled substances in vitro and in vivo for diagnosis, and the administration of radionuclides and radiolabeled substances for the treatment of disease.

Prerequisites; Length of Training
Satisfactory completion of an ACGME- or RCPSC-accredited diagnostic radiology residency, or other training judged suitable by the program director, is required. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2009.

Table 1. Nuclear Radiology Programs
Number of accredited programs 22

Program Data
Length of accredited training 1
Minimum number of prior years of GME required 4
Offers graduate year 1 positions, available immediately upon medical school completion No
Average number of interviews for program year 1 positions 3.4

Pediatric Radiology

Professional Description
A pediatric radiologist is proficient in all forms of diagnostic imaging as it pertains to treating diseases in the newborn, infant, child, and adolescent. This specialist has knowledge of both imaging and interventional procedures related to the care and management of diseases of children. A pediatric radiologist must be highly knowledgeable of all organ systems as they relate to growth and development, congenital malformations, diseases peculiar to infants and children, and diseases that begin in childhood but cause substantial residual impairment in adulthood.

Prerequisites; Length of Training
Satisfactory completion of an ACGME- or RCPSC-accredited diagnostic radiology residency, or other training judged suitable by the program director, is required. Length of ACGME-accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2009.

Table 1. Pediatric Radiology Programs

Sleep Medicine

Professional Description
Sleep medicine is a multidisciplinary subspecialty of family medicine, internal medicine, psychiatry, pediatrics, neurology, and otolaryngology.

Sleep medicine is a discipline of medical practice in which sleep disorders are assessed, monitored, treated, and prevented by using a combination of techniques (clinical evaluation, physiologic testing, imaging, and intervention) and medication. Specialists in sleep medicine are expected to:

- Participate in an interdisciplinary care of patients of all ages that incorporates aspects of psychiatry, neurology, internal medicine, epidemiology, surgery, pediatrics and basic science.
- Acquire detailed knowledge of the sleep and respiratory control centers, physiology, and neurobiology underlying sleep and wakefulness.
- Diagnose and manage sleep disorder patients in outpatient and inpatient settings.

Surgery-General

Professional Description

1. The scope of general surgery

   General surgery is a discipline that requires knowledge of and familiarity with a broad spectrum of diseases that may require surgical treatment. By necessity, the breadth and depth of this knowledge will vary by disease category. In most areas, the surgeon will be expected to be competent in diagnosing and treating the full spectrum of disease. However, there are some types of disease in which comprehensive knowledge and experience is not gained in the course of a standard surgical residency. In these areas, the surgeon will be able to recognize and treat a select group of conditions within a disease category.

2. The required residency experience for initial certification in general surgery

   Residency training in general surgery requires experience in all of the following content areas:
   - Alimentary tract
   - Abdomen and its contents
   - Breast, skin and soft tissue
   - Endocrine system
   - Organ transplantation
   - Pediatric surgery
   - Surgical critical care
   - Surgical oncology (including head and neck surgery)
   - Trauma/burns and acute care surgery
   - Vascular surgery

   General surgery as a field comprises, but is not limited to, the performance of operations. Additional expected knowledge and experience in the above areas includes:
   - Clinical knowledge, including epidemiology, anatomy, physiology, clinical presentation, and pathology (including neoplasia).
   - Knowledge of the scientific foundations, including wound healing; infection; fluid management; shock and resuscitation; immunology; antibiotic usage; metabolism; and use of enteral and parenteral nutrition.
   - Experience and skill in the clinical evaluation and management, or stabilization and referral of patients with surgical diseases. This includes appropriate use and interpretation of radiologic imaging; indications for surgery and non-surgical treatment; preoperative, operative and postoperative care; and the management of comorbidities and complications.

3. The following disciplines have training programs related to, but separate from, general surgery. As the primary surgical practitioner in many circumstances, the certified general surgeon is required to be familiar with diseases and operative techniques in these areas. The certified general surgeon will have experience during training that will allow for diagnosis and management of a select group of conditions in these areas. However, comprehensive knowledge and management of conditions in these areas generally requires additional training.
   - Organ Transplantation
   - Pediatric Surgery
   - Thoracic Surgery
   - Vascular Surgery

4. In addition, the certified general surgeon is expected to be able to recognize and provide early management and appropriate referral for urgent and emergent problems in the surgical fields of:
   - Gynecology
   - Urology

   - Neurosurgery
   - Orthopaedics and Hand Surgery

5. The certified general surgeon is also expected to have knowledge and skills in the management and team-based interdisciplinary care of the following specific patient groups:
   - Terminally ill patients, to include palliative care and the management of pain, weight loss and cachexia in patients with malignant and chronic conditions.
   - Morbidly obese patients, to include metabolic derangements, weight-loss surgery and the counseling of patients and families.
   - Geriatric surgical patients, to include operative and nonoperative care, management of comorbid chronic diseases, and the counseling of patients and families.
   - Culturally diverse groups of patients.

Source: American Board of Surgery

Prerequisites; Length of Training

No prior GME is required. ACGME-accredited programs in general surgery are 5 years.

Subspecialties

Subspecialty programs accredited by the ACGME

- Hand surgery
- Hospice and palliative medicine
- Pediatric surgery
- Surgical critical care
- Vascular surgery

Other American Board of Surgery specialty certificates

- Vascular surgery

American Board of Surgery subspecialty certificates

- Hospice and palliative medicine
- Pediatric surgery
- Surgery of the hand
- Surgical critical care

Surgery residency performance data for board certification examinations

The American Board of Surgery has posted online the 5-year average pass rate of first-time examinees for all ACGME-accredited surgery residency programs on the Surgery Qualifying and Surgery Certifying Examinations, as well as a combined first-time pass rate for both examinations. These data are intended for medical students who are interested in surgical residencies, as one factor that may be relevant in choosing which programs to pursue.

Data

Unless otherwise noted, all data are for 2009.

Offers additional training or educational experience beyond accredited length 53.3%
Offers a primary care track 3.3%
Offers a rural track 7.1%
Offers a women’s health track 4.9%
Offers a hospitalist track 0.5%
Offers a research track/nonaccredited fellowship 31.5%
Offers an other track 5.4%

Resident Evaluation
Yearly specialty in-service examination required 99.6%
Patient surveys 48.9%
Portfolio system 57.6%
360-degree evaluations 88.6%
Objective structured clinical examinations (OSCE) 28.8%

Program Evaluation
Program graduation rates 85.3%
Board certification rates 98.9%
Hand Surgery

Professional Description
A surgeon with expertise in the investigation, preservation, and restoration by medical, surgical, and rehabilitative means of all structures of the upper extremity directly affecting the form and function of the hand and wrist.

Prerequisites; Length of Training
Satisfactory completion of an ACGME- or RCPSC-accredited general surgery, orthopaedic surgery, or plastic surgery residency program is required. Length of ACGME-accredited programs is 1 year.

For more information
American Society for Surgery of the Hand

Hospice and Palliative Medicine
See page 156.

Pediatric Surgery

Professional Description
Pediatric surgery is defined as the diagnostic, preoperative, operative, and postoperative surgical management of congenital and acquired abnormalities and diseases, be they developmental, inflammatory, neoplastic, or traumatic, in the neonatal and pediatric age groups. The scope of this discipline is considered to be essentially the same as general surgery, focused especially in infancy, but to include older children with those conditions customarily treated in children’s hospitals and pediatric surgical divisions of large general hospitals.

Prerequisites; Length of Training
Satisfactory completion of an ACGME- or RCPSC-accredited general surgery residency is required. Length of ACGME-accredited programs is 2 years.

Data
Unless otherwise noted, all data are for 2009.

### Placement Assistance
- Average resident/fellow compensation: $53,029  
- Average number weeks of vacation: 3.2  
- Maximum number of paid days for family/medical leave: 47  
- Maximum number of unpaid days for family/medical leave: 74

### Surgical Critical Care

#### Professional Description
Surgical critical care is a specialty of surgery and a primary component of general surgery related to the care of patients with acute, life-threatening, or potentially life-threatening surgical conditions. Surgical critical care not only incorporates knowledge and skills of nonoperative techniques for supportive care for critically ill patients but also a broad understanding of the relationship between critical surgical illness and surgical procedures. Although much of this knowledge and skills is common to critical care specialists from a variety of medical disciplines, the diplomate in surgical critical care has specialized expertise relating both to the physiologic responses to tissue injury from trauma, burns, operation, infections, acute inflammation, or ischemia and to the ways these responses interact with other disease processes. Specialists in surgical critical care possess advanced knowledge and skills that enable them to provide comprehensive care to critically ill patients from all surgical specialties and in all age groups. Care for the critically ill surgical patient may take place in a variety of settings, eg, prehospital situations, the emergency department, the operating room, and intensive care units. Because the care of such patients involves skill in a number of disciplines, as well as an understanding of surgery, the specialist in surgical critical care must have a broad knowledge base and expertise concerning the biology of the critically ill surgical patient and the support of organ system function.
Prerequisites; Length of Training
Satisfactory completion of an ACGME- or RCPSC-accredited general surgery residency is required. Length of ACGME-accredited programs is 1 year, and may be completed while in residency.

Data
Unless otherwise noted, all data are for 2009.

Vascular Surgery

Professional Description
Vascular surgery encompasses the diagnosis and management of disorders of the arterial, venous, and lymphatic systems, exclusive of the intracranial vessels and the heart. In addition to experience
with dissection and control of blood vessels that general surgery trainees gain, diplomates in vascular surgery, by virtue of additional training, should have significant experience with all aspects of treating patients with all types of vascular disease, including diagnosis, medical treatment, and reconstructive vascular surgical and endovascular techniques. Specialists in vascular surgery should possess the advanced knowledge and skills to provide comprehensive care to patients with vascular disease, understand the needs of these patients, teach this information to others, provide leadership within their organizations, conduct or participate in research in vascular disorders, and demonstrate self-assessment of their outcomes.

The vascular surgeon must have advanced knowledge and experience with the management of vascular problems, including:
1. All elements of clinical evaluation; noninvasive testing including plethysmography, duplex ultrasonography, magnetic resonance imaging, CT scans, angiography, and other diagnostic tests as they are utilized in the diagnosis of vascular disease.
3. Indications and techniques relating to open operative treatment of vascular disorders, to include the entire spectrum of interventions used to treat vascular disorders including endovascular, anatomic, and inflammatory disease involving the arteries and veins of the body except the intracranial vessels and vessels intrinsic to the heart. This includes the cerebrovascular system including intrathoracic arch branches but exclusive of the intracranial vessels, and also includes the entire descending thoracic and abdominal aorta, the venous system of the chest and abdomen, the visceral and renal arteries, and the arteries and veins of the pelvis and upper and lower extremities.
4. Indications and techniques relating to endovascular interventions including balloon angioplasty and/or stenting of all vessels (excluding the intracranial and coronary arteries), aortic and peripheral artery endovascular stent graft placement, thrombolysis, and other adjuncts for vascular reconstructions.
5. The perioperative critical care of the vascular surgery patient.

Prerequisites; Length of Training
Satisfactory completion of an ACGME- or BCSC-accredited general surgery program is required to enter ACGME-accredited programs of 2 years. For the integrated model, which incorporates the core surgical education, the length is 5 years.

Data
Unless otherwise noted, all data are for 2009.

Thoracic Surgery

Professional Description
A thoracic surgeon provides the operative, perioperative, and critical care of patients with pathologic conditions within the chest. Included is the surgical care of coronary artery disease; cancers of the lung, esophagus, and chest wall; abnormalities of the trachea; abnormalities of the great vessels and heart valves; congenital anomalies; tumors of the mediastinum; and diseases of the diaphragm. Management of the airway and injuries of the chest is within the scope of the specialty.

Thoracic surgeons have the knowledge, experience, and technical skills to accurately diagnose, operate upon safely, and effectively manage patients with thoracic diseases of the chest. This requires substantial knowledge of cardiopulmonary physiology and oncology, as well as capability in the use of heart assist devices, management of abnormal heart rhythms and drainage of the chest cavity, respiratory support systems, endoscopy, and invasive and noninvasive diagnostic techniques.

Prerequisites; Length of Training
Education in thoracic surgery must be provided in one of three formats:

- Independent Program (traditional format): Two or 3 years of thoracic surgery education, preceded by successful completion of an ACGME- or RCPS-accredited surgery program.
- Joint Surgery/Thoracic Surgery Program (4+3 program): All 7 years of the program must be completed in the same institution, and all of the years must be accredited by the ACGME. Assuming successful completion of the programs, this format provides the graduate with the ability to apply for certification in both surgery and thoracic surgery.
- Integrated Program: Six years of thoracic surgery education (completed in one institution) following completion of medical school.

Subspecialties
Subspecialty programs accredited by the ACGME
- Congenital cardiac surgery

American Board of Thoracic Surgery certificate of added qualifications
- Congenital cardiac surgery

Data
Unless otherwise noted, all data are for 2009.

Table 1. Thoracic Surgery Programs
Number of accredited programs | 79

Program Data
Length of accredited training | 2/3
Minimum number of prior years of GME required | 5
Offers graduate year 1 positions, available immediately upon medical school completion | No
Average number of interviews for program year 1 positions | 14.2
Percent new program directors, 2008-2009 academic year (Source: ACGME) | 11.8%

Residents/Fellows
Total number of active residents/fellows | 257
Average number of residents/fellows per program | 3.3
Average percent female | 14.8%

Average percent international medical graduate (IMG) | 25.3%

Program Faculty
Average number of full-time physician faculty | 9.2
Average number of part-time physician faculty | 0.4
Average percent female full-time physician faculty | 4.7%
Average ratio of full-time physician faculty to resident/fellow | 1.9

Table 2. Data for Thoracic Surgery Listed in FREIDA
Number of programs providing data | 46

Work Schedule (Program Year 1)
Average hours on duty per week | 73.0
Average maximum consecutive hours on duty | 28.0
Average days off duty per week | 1.2
Moonlighting allowed within institution | 2.6%
Night float system | 12.8%
Offers awareness and management of fatigue in residents/fellows | 92.3%

Educational Setting (Program Year 1)
Average hours/week of regularly scheduled lectures/conferences | 5.2
Average percent of training in hospital outpatient clinics | 14.9%
Average percent of training in nonhospital ambulatory care community settings | 0.6%

Educational Benefits
Program to assess/enhance medical professionalism | 71.8%
Debt management/financial counseling | 51.3%
Formal program to develop teaching skills | 66.7%
Formal mentoring program | 56.4%
Formal program to foster interdisciplinary teamwork | 17.9%
Continuous quality improvement training | 89.7%
International experience | 7.7%
Resident/fellow retreats | 28.2%
Off-campus electives | 25.6%
Hospice/home care experience | 2.6%
Cultural competence awareness | 64.1%
Instruction in medical Spanish or other non-English language | 17.9%
Alternative/complementary medicine curriculum | 10.3%
Training in identifying and reporting of domestic violence/abuse | 25.6%
MPH/MA or PhD training | 7.7%
Research rotation | 0.0%

Educational Features
Offers additional training or educational experience beyond accredited length | 16.8%
Offers a primary care track | 7.7%
Offers a rural track | 2.6%
Offers a women’s health track | 2.6%
Offers a hospitalist track | 2.6%
Offers a research track/nonaccredited fellowship | 12.8%
Offers an other track | 10.3%

Resident Evaluation
Yearly specialty in-service examination required | 100.0%
Patient surveys | 23.1%
Portfolio system | 25.6%
360-degree evaluations | 76.9%
Objective structured clinical examinations (OSCE) | 5.1%

Program Evaluation
Program graduation rates | 87.2%
Board certification rates | 97.4%
In-training examinations | 100.0%
Performance-based assessments | 25.6%
Employment Policies and Benefits

- Part-time/shared positions: 0.0%
- On-site child care: 35.9%
- Subsidized child care: 2.6%
- Allowance/stipend for professional expenses: 97.4%
- Leave for educational meetings/conferences: 91.0%
- Moving allowance: 5.1%
- Housing stipend: 15.4%
- On-call meal allowance: 92.3%
- Free parking: 41.0%
- PDAs: 28.2%
- Placement assistance upon completion of program: 46.2%
- Cross coverage in case of illness/disability: 74.4%

Compensation and Leave (Graduate Year 1)

- Average resident/fellow compensation: $53,578
- Average number weeks of vacation: 5.5
- Sick days (paid): 23.5
- Maximum number of paid days for family/medical leave: 40
- Maximum number of unpaid days for family/medical leave: 80

Major Medical Benefits

- Major medical insurance for residents: 97.4%
- Major medical insurance for dependents: 97.4%
- Outpatient mental health insurance: 94.9%
- Inpatient mental health insurance: 94.9%
- Group life insurance: 92.3%
- Dental insurance: 89.7%
- Disability insurance: 89.7%
- Disability insurance for occupationally acquired HIV: 82.1%
- Medical insurance coverage begins when starting program: 92.3%

Congenital Cardiac Surgery

Professional Description

“Educational programs in congenital cardiac surgery must provide the educational resources appropriate for the development of proficiency in the diagnosis and treatment of diseases of congenital arterial, venous, and lymphatic circulatory systems, including those components intrinsic to the heart.”

In addition, “If fellows must be provided with education with special diagnostic techniques for the management of congenital cardiac lesions; the methods and techniques of cardiac catheterization, and competence in the interpretation of such findings; and experience with the application, interpretation, and limitations of echocardiography and other imaging techniques.”

Prerequisites; Length of Training

Satisfactory completion of a thoracic surgery program accredited by the ACGME or Royal College of Physicians and Surgeons of Canada is required. Length of ACGME-accredited programs is 1 year.

Transitional Year

Description
The objective of the transitional year is to provide a well-balanced program of GME in multiple clinical disciplines to facilitate the choice of and/or preparation for a specific specialty. The transitional year is not meant to be a complete graduate education program in preparation for the practice of medicine.

Source: Transitional Year Program Requirements, ACGME

Prerequisites; Length of Training
No prior GME is required. ACGME-accredited programs are 1 year.

Data
Unless otherwise noted, all data are for 2009.

Table 1. Transitional Year Programs
Number of accredited programs 124

Program Data
Length of accredited training 1
Minimum number of prior years of GME required 0
Offers graduate year 1 positions, available immediately upon medical school completion Yes
Average number of interviews for program year 1 positions 72.0
Percent new program directors, 2008-2009 academic year (Source: ACGME) 17.8%

Residents/fellows
Total number of active residents/fellows 1,139
Average number of residents/fellows per program 9.2
Average percent female 35.3%
Average percent international medical graduate (IMG) 6.4%

Program Faculty
Average number of full-time physician faculty 69.6
Average number of part-time physician faculty 14.9
Average percent female full-time physician faculty 22.7%
Average ratio of full-time physician faculty to resident/fellow 3.5

Table 2. Data for Transitional Year Listed in FREIDA
Number of programs providing data 85

Work Schedule (Program Year 1)
Average hours on duty per week 60.9
Average maximum consecutive hours on duty 28.4
Average days off duty per week 1.3
Moonlighting allowed within institution 11.7%
Night float system 50.6%
Offers awareness and management of fatigue in residents/fellows 98.7%

Educational Setting (Program Year 1)
Average hours/week of regularly scheduled lectures/conferences 7.0
Average percent of training in hospital outpatient clinics 15.0%
Average percent of training in nonhospital ambulatory care community settings 9.7%

Educational Benefits
Program to assess/enhance medical professionalism 83.1%
Debt management/financial counseling 70.1%
Formal program to develop teaching skills 68.8%
Formal mentoring program 51.9%
Formal program to foster interdisciplinary teamwork 41.6%
Continuous quality improvement training 92.2%
International experience 29.9%
Resident/fellow retreats 49.4%
Off-campus electives 87.6%
Hospice/home care experience 59.7%
Cultural competence awareness 88.3%
Instruction in medical Spanish or other non-English language 23.4%
Alternative/complementary medicine curriculum 42.9%
Training in identifying and reporting of domestic violence/abuse 77.9%
MPH/MBA or PhD training 2.6%
Research rotation 5.2%

Educational Features
Offers additional training or educational experience beyond accredited length 0.0%
Offers a primary care track 11.7%
Offers a rural track 0.0%
Offers a women’s health track 1.3%
Offers a hospitalist track 3.9%
Offers a research track/nonaccredited fellowship 1.3%
Offers an other track 2.6%

Resident Evaluation
Yearly specialty in-service examination required 20.8%
Patient surveys 58.4%
Portfolio system 61.0%
360-degree evaluations 93.5%
Objective structured clinical examinations (OSCE) 31.2%

Program Evaluation
Program graduation rates 94.8%
Board certification rates 16.9%
In-training examinations 26.0%
Performance-based assessments 57.1%

Employment Policies and Benefits
Part-time/shared positions 3.9%
On-site child care 39.0%
Subsidized child care 7.8%
Allowance/stipend for professional expenses 84.4%
Leave for educational meetings/conferences 36.2%
Moving allowance 29.9%
Housing stipend 10.4%
On-call meal allowance 97.4%
Free parking 96.1%
PDAs 32.5%
Placement assistance upon completion of program 22.1%
Cross coverage in case of illness/disability 87.0%

Compensation and Leave (Graduate Year 1)
Average resident/fellow compensation $43,712
Average number weeks of vacation 3.1
Sick days (paid) 20.8
Maximum number of paid days for family/medical leave 39
Maximum number of unpaid days for family/medical leave 65

Major Medical Benefits
Major medical insurance for residents 100.0%
Major medical insurance for dependents 100.0%
Outpatient mental health insurance 94.8%
Inpatient mental health insurance 94.8%
Group life insurance 93.5%
Dental insurance 93.5%
Disability insurance 89.6%
Disability insurance for occupationally acquired HIV 71.4%
Medical insurance coverage begins when starting program 96.1%

Urology

Professional Description
A urologist manages benign and malignant medical and surgical disorders of the genitourinary system and the adrenal gland. This specialist has comprehensive knowledge of, and skills in, endoscopic, percutaneous, and open surgery of congenital and acquired conditions of the urinary and reproductive systems and their contiguous structures.

Prerequisites; Length of Training
Satisfactory completion of 1 year of an ACGME-accredited general surgery residency is required. ACGME-accredited urology programs are 3 years or 4 years.

Subspecialties
Subspecialty programs accredited by the ACGME
• Pediatric urology

Data
Unless otherwise noted, all data are for 2009.

Feeling the pain

Physicians see smaller pay gains, with many failing to keep up with inflation

I ntense competition for physician services, failing economic conditions, crushing medical school debt, and myriad other positive and negative forces are having a curious side effect: More young doctors are considering rural areas for their first place to practice.

But the biggest news relating to how doctors are being paid is that compensation for 11 of the specialties tracked in the 16th annual Modern Healthcare Physician Compensation Survey are not keeping up with the rate of inflation—calculated at 3.8% for 2008. Unlike other recent years, no specialty saw a double-digit percentage increase in pay. Other significant trends are playing out as well and, with cash being in short supply, hospitals and physician practices are being forced to get “creative.”

This creativity has manifested itself with increasing physician employment to go with growing use of compensation packages that include guaranteed income, signing bonuses, training stipends, education debt forgiveness, and even temporary housing while former homes sit in a stagnant real estate market.

“I think one of the biggest prevailing themes that we see is the continued push with hospital-employed models (for physicians)—that has been an increasingly significant volume of work we’re doing,” says Tommy Bohannon, senior director of recruiting and development training with Irving, Texas-based Merritt Hawkins & Associates.

He notes how, in a 2005-06 survey, 23% of his company’s searches for physicians and certified registered nurse anesthetists involved hospital employment. For the period from April 1, 2008, to March 31, 2009, that figure was 45%.

“They’re seeking shelter with the employed model, so they can do what they’ve been trained to do—practice medicine,” Bohannon says.

Also, while this year’s compensation figures may seem depressed, Brad Vaudrey, a director at BSM McGladrey, in the Minneapolis office of the Bloomington, Minn.-based firm that conducted the compensation survey for the American Medical Group Association, says that the short-term future offers anything but relief. “I think it will be interesting to see what happens because the economic hit came so quickly at the end of the year, surveys may not have captured its effects,” Vaudrey says. “Next year, we’ll probably see lower than inflation increases for the most part.”

The Modern Healthcare survey tracked physician compensation in 23 specialties using information from 14 healthcare search firms and medical organizations. New this year are data on compensation for intensivists and neonatologists, who are making an average of $279,853 and $260,829, respectively.

Of the 21 other specialties tracked by the Modern Healthcare survey, 10 saw average increases in compensation over the rate of inflation, while 11 were below. This included three specialties that saw decreases in average compensation: Plastic surgery compensation was down 7.7% to $384,490 from $416,361; anesthesiology was down 1.5% to $357,162 from $362,719; and radiology oncology fell less than 1% to $420,006 from $422,269.

Last year, obstetrics/gynecology and psychiatry saw decreases. The average pay rebounded somewhat for these physicians, with compensation for OB/GYNs increasing 4.4% to $277,269 from $265,618; and compensation for psychiatrists rising 3.1% to $203,160 from $197,038.

In the 2007 survey, three specialties saw double-digit compensation increases (oncology, 13.9%; pathology, 12.7%; and psychiatry, 10.9%). Last year, only one specialty registered a double-digit increase: plastic surgery, whose compensation rose 10.9%. But this year, all increases were kept in single digits.

Dermatologists saw the biggest percentage increase, with their average compensation rising 6.7% to $353,695 from $331,567. They were followed by orthopedic surgeons, whose pay increased 6.5% to $465,785 from $437,336. Orthos topped the list as the highest-paid specialists. According to the survey, their pay ranged from $363,600 to $615,637. Invasive cardiologists were next, with an average pay of $452,842 (up 2.4% from last year), and a range from $387,600 to $496,068.

Radiologists had the third-highest compensation, with the average pay being $436,500 (up less than 0.2% from last year), and a range in compensation from $391,000 to $483,000.

Despite growing attention to the need to strengthen the delivery of primary care, primary-care docs finished on the bottom of the compensation ladder. Family medicine specialists had the lowest pay with an average of $181,536 (up 4.5% from last year), and ranged from $166,848 to $212,032. Second-lowest were pediatricians, whose average compensation was $183,834 (up 6.5%), and their pay ranged from $150,000 to $217,000. They were followed by internists who had an average compensation of $196,495 (up 5.7%), and whose pay ranged from $179,958 to $222,377.

“Rural areas and smaller cities—depending on the impact the economy is having on them—they are being extremely creative” in their recruiting, says Kathy Murray, senior
director of key accounts at St. Louis-based Cejka Search, adding that this is especially true for specialists such as orthopedic surgeons whose procedures are major cash generators. “They are bringing in significant amounts of revenue into a hospital system, and they are going to do whatever it takes to get them there.”

Murray says that this includes recruiting doctors earlier in their training and keeping the physicians’ families happy. “If it’s a two-income family, I’ve seen organizations help the spouse look for a position,” Murray says. “A physician can generally practice any place. Their family, though, has to be happy or it becomes a retention issue.”

Quality of life and work-life balance also come into play, and one area where this becomes a heated point of compensation negotiations is payment for on-call services. “It’s a very contentious issue,” Murray says. “Some organizations simply are not going to pay for call. Others, especially if they have a Level 2 trauma center, they have to have those trauma surgeons on call to maintain that designation.”

According to a survey done by Dallas-based recruiter the Medicus Firm, while only about 5% of physicians in general would prefer to live and work in a small town or rural community, almost 40% of doctors-in-training would prefer such an environment. “Maybe the perception is they can go there and make more money,” says Jim Stone, a managing partner with Medicus. “In general, residents and fellows are more concerned with immediate financial requirements because they have loans to pay back.”

Vaudrey says that these young physicians may not be off-base. “One thing we see is the higher-compensation areas are not necessarily the highest cost-of-living areas,” Vaudrey says. “Your traditional cost-of-living index is not the best measure of compensation.”

Lauren Hughes, president of the American Medical Student Association and a recent graduate of University of Iowa’s Carver College of Medicine, says that she’s looking forward to practicing in a rural area and was surprised to hear 40% of her peers may also be looking to do so. “That strikes me as quite high—not that I question its accuracy—but it’s higher than what I’ve experienced anecdotally,” Hughes says. “If that’s the case, however, that’s exceptionally encouraging that 40% are interested in rural practice.”

Bohannon says debt-forgiveness incentives are commonly used by rural facilities. “That remains the best way for a rural hospital to attract young physicians,” he says.

But Hughes says that attracting physicians to rural areas with signing bonuses and debt forgiveness is only half the battle. “The challenge is to get them to stay after the payback period.”

A native Iowan, Hughes says that challenges rural healthcare organizations face include a lack of continuing medical education, nursing and information technology support structures, and often a lack of quality schools or employment opportunities for a physician’s spouse. “There are quite a few significant disincentives for practicing in rural areas,” Hughes says. Despite these disincentives, Hughes says that a rural practice is in her future, and she’s not discouraged that her chosen specialty—family medicine—is compensated at a lower level. “I wouldn’t be happy doing anything else but this particular field,” Hughes says. “At the end of the day, I’ll still make an excellent living, and I’ll be in the upper bracket of wage-earning in American society.”

**Source:** Modern Healthcare’s 2009 Physician Compensation Survey
Data trackers

Fourteen firms provided data on compensation trends for up to 23 specialties

American Medical Group Association
The Alexandria, Va.-based trade group surveyed 42,501 physicians and 231 medical groups for its 2009 Medical Group Compensation and Financial Survey. The survey, which was conducted in partnership with RSM McGladrey, covers 148 positions/specialties and costs $550 for nonmembers. For more information contact Brad Vaudrey at 612-376-9530. Data submitted by the AMGA are preliminary and subject to change.

Cejka Search
The St. Louis-based physician and healthcare executive search firm surveyed 110 organizations and 279 physicians in 2008 covering 21 positions/specialties. Data submitted are a sample based on Cejka’s proprietary database of completed searches from January to December 2008. Trend information by specialty and region is available on request. For more information, contact Nancy Burns at 314-236-4461.

Daniel Stern & Associates
The Pittsburgh-based physician-recruiting and consulting firm heard from 1,009 physicians for its 2009 Emergency Medicine Compensation & Benefit Survey. The complete survey results cost $295 with additional regional and state-specific information available upon request for a fee. For more information contact Daniel Stern at 800-438-2476.

Delta Physician Placement
The Dallas-based physician-staffing firm surveyed 477 organizations and 950 physicians from April 2008 to March 2009 for its annual Physician Recruiting Standard. For more information about the company’s free survey, contact Mike Gianas at 800-521-5060, ext. 4113.

Hay Group

Hospital & Healthcare Compensation Service

Jackson & Coker
The Alpharetta, Ga.-based physician-recruitment firm gathered data from an outside company that compiled averages from multiple compensation reports. Survey findings are free of charge. For more information on the firm’s 2009 Physician Compensation Report, contact Edward McCaffern at 800-272-2707.

LocumTenens.com
The Alpharetta, Ga.-based physician-recruiting agency surveyed 3,158 physicians in 51 positions/specialties during April 2009. Results from its 2009 Compensation & Employment Survey are available free of charge. For more information, call Christina Cruz at 770-643-5559.

Martin, Fletcher
The Irving, Texas-based healthcare staffing firm surveyed 612 organizations and 2,730 physicians from April 2008 to March 2009 for its 2009 Physician Compensation and Benefits Report. Survey findings are available free of charge. For more information, contact Christy Jones at 800-668-8822.

Medical Group Management Association
The Englewood, Colo.-based professional membership association surveyed 2,246 organizations and 50,405 physicians in 109 positions/specialties from January to March. The full report, to be published this month, can be ordered at mgma.com/physcomp. The nonmember price is $515. Data submitted are median figures.

Medicus Firm
Physician search firms Medicus Partners, Dallas, and the MD Firm, Atlanta, merged and now operate as the Medicus Firm. The Dallas-based firm surveyed 4,651 physicians in 19 positions/specialties in its sixth annual Physician Compensation Survey conducted April through May. Only in-practice physician compensation data are included. Findings from the survey are available free of charge. For more information, contact Jeff Katon at 888-260-4242, ext. 236.

Merritt, Hawkins & Associates
The Irving, Texas-based physician-recruitment firm surveyed 1,000 organizations and 3,506 physicians in 20 positions/specialties for its 2009 Review of Physician Recruiting Incentives report. The survey was conducted April 2008 through March 2009. Results are available free of charge. For more information, contact Falon Mitchell at 800-876-0500. Data submitted are preliminary and subject to change.

Pacific Companies
The Costa Mesa, Calif.-based healthcare staffing firm surveyed 966 organizations and 35,422 physicians in 34 positions/specialties for its annual Salary and Benefits Survey. The survey was conducted from January to December 2008. Copies are available for $750. For more information or to order a copy, contact Michael Moore at 800-741-7629.

Sullivan, Cotter and Associates
The Detroit-based compensation and human resources management firm surveyed 275 organizations and 45,000 physicians in 115 positions/specialties for its Physician Compensation and Productivity Survey. For more information contact Elaine Tocco at 313-285-1491. Data submitted are preliminary and subject to change.
New Programs

The following programs were accredited by the Accreditation Council for Graduate Medical Education with an effective date between January 1 and December 31, 2009.

Abdominal Radiology (Radiology-Diagnostic)
University of Massachusetts Program
Worcester, MA
Effective date: 7/1/2009
Program ID: 421-24-31-013

Addiction Psychiatry (Psychiatry)
Carilion Clinic-Virginia Tech Carilion School of Medicine Program
Roanoke, VA
Effective date: 7/1/2009
Program ID: 401-51-12-065

Medical College of Wisconsin Affiliated Hospitals Program
Milwaukee, WI
Effective date: 7/1/2009
Program ID: 401-56-21-066

Adult Cardiothoracic Anesthesiology (Anesthesiology)
Cedars-Sinai Medical Center Program
Los Angeles, CA
Effective date: 7/1/2009
Program ID: 041-05-12-049

University Hospital/University of Cincinnati College of Medicine Program
Cincinnati, OH
Effective date: 7/1/2009
Program ID: 041-38-31-048

Texas A&M College of Medicine-Scott and White Program
Temple, TX
Effective date: 7/1/2009
Program ID: 041-48-21-050

Adult Reconstructive Orthopaedics (Orthopaedic Surgery)
College of Medicine, Mayo Clinic (Arizona) Program
Phoenix, AZ
Effective date: 7/1/2009
Program ID: 261-03-21-041

University of Arkansas for Medical Sciences
Little Rock, AR
Effective date: 7/1/2009
Program ID: 261-04-13-042

William Beaumont Hospital Program A
Royal Oak, MI
Effective date: 7/1/2009
Program ID: 261-25-31-039

Baylor College of Medicine Program
Houston, TX
Effective date: 7/1/2009
Program ID: 261-48-12-040

Anesthesiology
William Beaumont Hospital Program
Royal Oak, MI
Effective date: 7/1/2009
Program ID: 040-25-13-202

Blood Banking/Transfusion Medicine (Pathology)
Jackson Memorial Hospital/Jackson Health System Program
Miami, FL
Effective date: 7/1/2009
Program ID: 305-11-21-009

Cardiovascular Disease (Internal Medicine)
University of Southern California/LAC-USC Medical Center Program
Los Angeles, CA
Effective date: 7/1/2009
Program ID: 141-05-31-289

Guthrie/Robert Packard Hospital Program
Sayre, PA
Effective date: 7/1/2009
Program ID: 141-41-21-287

Child and Adolescent Psychiatry (Psychiatry)
Georgetown University Hospital/Adventist Behavioral Health Program
Washington, DC
Effective date: 7/1/2009
Program ID: 405-10-12-196

Clinical Cardiac Electrophysiology (Internal Medicine)
Newark Beth Israel Medical Center Program
Newark, NJ
Effective date: 7/1/2009
Program ID: 154-33-13-126

SUNY at Stony Brook
Stony Brook, NY
Effective date: 7/1/2009
Program ID: 154-35-21-129

Clinical Neurophysiology (Neurology)
University of South Florida Program
Tampa, FL
Effective date: 7/1/2009
Program ID: 187-11-13-122

Jackson Memorial Hospital/Jackson Health System Program
Miami, FL
Effective date: 7/1/2009
Program ID: 187-11-21-121

Colon and Rectal Surgery
Florida Hospital Medical Center Program
Orlando, FL
Effective date: 7/1/2009
Program ID: 060-11-12-007
NEW PROGRAMS

Brigham and Women’s Hospital Program
Boston, MA
Effective date: 7/1/2009
Program ID: 060-24-13-069

University Hospitals Case Medical Center Program
Cleveland, OH
Effective date: 7/1/2009
Program ID: 060-38-31-070

Congenital Cardiac Surgery (Thoracic Surgery)
Children’s Hospital/Massachusetts General Hospital Program
Boston, MA
Effective date: 7/1/2009
Program ID: 466-24-21-010

Dermatopathology (Dermatology)
National Capital Consortium Program
Bethesda, MD
Effective date: 7/1/2009
Program ID: 100-23-12-092

Developmental-Behavioral Pediatrics (Pediatrics)
UMDNJ-Robert Wood Johnson Medical School Program
New Brunswick, NJ
Effective date: 7/1/2009
Program ID: 336-33-21-046

Emergency Medicine
University of Arizona/UPHK Graduate Medical Education Consortium Program
Tucson, AZ
Effective date: 7/1/2009
Program ID: 110-03-21-203

Southern Illinois University School of Medicine Program
Springfield, IL
Effective date: 7/1/2009
Program ID: 110-16-13-204

University of Kansas School of Medicine Program
Kansas City, KS
Effective date: 7/1/2009
Program ID: 110-19-13-182

UMDNJ-Robert Wood Johnson Medical School Program
New Brunswick, NJ
Effective date: 7/1/2009
Program ID: 110-03-21-205

John Peter Smith Hospital (Tarrant County Hospital District) Program
Fort Worth, TX
Effective date: 7/1/2009
Program ID: 110-48-12-202

Family Medicine
Family Medicine Residency of Idaho (Magic Valley) Rural Program
Boise, ID
Effective date: 7/1/2009
Program ID: 120-15-13-698

St Mary Mercy Hospital Program
Livonia, MI
Effective date: 7/1/2009
Program ID: 120-25-31-700

Mike O’Callaghan Federal Hospital/Nellis Air Force Base Program
Nellis AFB, NV
Effective date: 7/1/2009
Program ID: 120-31-13-069

Forensic Psychiatry (Psychiatry)
University of California (San Diego) Program
La Jolla, CA
Effective date: 7/1/2009
Program ID: 406-05-31-062

University of Pennsylvania Program
Philadelphia, PA
Effective date: 7/1/2009
Program ID: 406-41-12-059

Gastroenterology (Internal Medicine)
Carolina Medical Center Program
Charlotte, NC
Effective date: 7/1/2009
Program ID: 144-36-21-236

Geriatric Medicine (Family Medicine)
Banner Good Samaritan Medical Center Program
Sun City, AZ
Effective date: 7/1/2009
Program ID: 125-03-31-076

St Luke’s Hospital Program
Maumee, OH
Effective date: 7/1/2009
Program ID: 125-38-12-073

Texas Tech University (Lubbock) Program
Lubbock, TX
Effective date: 7/1/2009
Program ID: 125-48-13-075

Geriatric Medicine (Internal Medicine)
Bridgeport Hospital Program
Stratford, CT
Effective date: 7/1/2009
Program ID: 151-08-13-161

Louisiana State University Program
New Orleans, LA
Effective date: 7/1/2009
Program ID: 151-21-13-165

University of Massachusetts Program
Worcester, MA
Effective date: 7/1/2009
Program ID: 151-24-21-164

Massachusetts General Hospital Program
Boston, MA
Effective date: 7/1/2009
Program ID: 151-24-21-166

University of Mississippi Medical Center Program
Jackson, MS
Effective date: 7/1/2009
Program ID: 151-27-12-163

University of Missouri Kansas City Program
Kansas City, MO
Effective date: 7/1/2009
Program ID: 151-34-21-170

University of Tennessee Program
Memphis, TN
Effective date: 7/1/2009
Program ID: 311-47-21-108
New Programs

Baylor University Medical Center Program
Dallas, TX
Effective date: 7/1/2009
Program ID: 311-48-31-110

Hematology and Oncology (Internal Medicine)

Howard University Program
Washington, DC
Effective date: 7/1/2009
Program ID: 155-10-15-157

Louisiana State University Program
New Orleans, LA
Effective date: 7/1/2009
Program ID: 155-21-15-158

William Beaumont Hospital Program
Royal Oak, MI
Effective date: 7/1/2009
Program ID: 155-21-53-156

Gundersen Lutheran Medical Foundation Program
La Crosse, WI
Effective date: 7/1/2009
Program ID: 155-55-31-160

Hospice and Palliative Medicine

University of Alabama Hospital Program
Birmingham, AL
Effective date: 7/1/2009
Program ID: 540-01-14-027

Providence Hospital Program
Anchorage, AK
Effective date: 7/1/2009
Program ID: 540-02-12-007

University of Arkansas College of Medicine Program
Little Rock, AR
Effective date: 7/1/2009
Program ID: 540-00-14-009

Kaiser Permanent Southern California Program
Los Angeles, CA
Effective date: 7/1/2009
Program ID: 540-00-12-062

Mercer University School of Medicine Program
Macon, GA
Effective date: 7/1/2009
Program ID: 540-00-15-073

Clinical Center at the National Institutes of Health Program
Bethesda, MD
Effective date: 7/1/2009
Program ID: 540-23-19-031

University of Nevada School of Medicine Program
Reno, NV
Effective date: 7/1/2009
Program ID: 540-31-14-006

Jamaica Hospital Medical Center Program
Jamaica, NY
Effective date: 7/1/2009
Program ID: 540-35-12-020

New York Medical College Program
Valhalla, NY
Effective date: 7/1/2009
Program ID: 540-35-14-055

Mount Sinai School of Medicine Program
New York, NY
Effective date: 7/1/2009
Program ID: 540-35-14-074

North Shore-Long Island Jewish Health System Program
Manhasset, NY
Effective date: 7/1/2009
Program ID: 540-35-14-083

Memorial Sloan-Kettering Cancer Center Program
New York, NY
Effective date: 7/1/2009
Program ID: 540-35-14-089

Ohio State University Hospital Program
Columbus, OH
Effective date: 7/1/2009
Program ID: 540-35-14-090

University of Texas Southwestern Medical School Program
Dallas, TX
Effective date: 7/1/2009
Program ID: 540-35-14-091

University of Utah Medical Center Program
Salt Lake City, UT
Effective date: 7/1/2009
Program ID: 540-35-14-092

University of Vermont Medical Center Program
Burlington, VT
Effective date: 7/1/2009
Program ID: 540-35-14-093

Cedars-Sinai Medical Center Program
Los Angeles, CA
Effective date: 7/1/2009
Program ID: 540-35-14-094

Medical Genetics

University of Minnesota Program
Minneapolis, MN
Effective date: 7/1/2009
Program ID: 540-35-14-095

University of Utah Medical Center Program
Salt Lake City, UT
Effective date: 7/1/2009
Program ID: 540-35-14-096

University of Washington Program
Seattle, WA
Effective date: 7/1/2009
Program ID: 540-35-14-097

Infectious Disease (Internal Medicine)

St Joseph Mercy Hospital Program
Ann Arbor, MI
Effective date: 7/1/2009
Program ID: 146-23-11-213

Carilion Clinic Program-Virginia Tech Carilion School of Medicine Program
Roanoke, VA
Effective date: 7/1/2009
Program ID: 146-23-11-214

Internal Medicine

St Mary Mercy Hospital Program
Livonia, MI
Effective date: 7/1/2009
Program ID: 146-23-12-540

Medical Genetics (Medical Genetics)

University of California (San Francisco) Program
San Francisco, CA
Effective date: 7/1/2009
Program ID: 130-05-12-075

University of Nebraska Medical College of Medicine Program
Omaha, NE
Effective date: 7/1/2009
Program ID: 130-30-21-076

Molecular Genetic Pathology (Medical Genetics and Pathology)

UCLA Medical Center Program
Los Angeles, CA
Effective date: 7/1/2009
Program ID: 190-05-12-029

Musculoskeletal Radiology (Radiology-Diagnostic)

Hospital for Special Surgery Program
New York, NY
Effective date: 7/1/2009
Program ID: 426-35-13-016

Neurodevelopmental Disabilities (Neurology)

Indiana University School of Medicine Program
Indianapolis, IN
Effective date: 7/1/2009
Program ID: 186-17-23-010

Neuromuscular Medicine (Neurology)

University of Alabama Medical Center Program
Birmingham, AL
Effective date: 7/1/2009
Program ID: 183-01-31-024

UCLA Medical Center Program
Los Angeles, CA
Effective date: 7/1/2009
Program ID: 183-05-12-022
Neuroradiology (Radiology-Diagnostic)  
University of California (Irvine) Program  
Orange, CA  
Effective date: 7/1/2009  
Program ID: 423-11-04-011

Texas A&M College of Medicine-Scott and White Program  
Temple, TX  
Effective date: 7/1/2009  
Program ID: 425-04-31-110

Orthopaedic Surgery of the Spine (Orthopaedic Surgery)  
St Joseph Mercy Hospital/ Michigan  
Brain & Spine Institute Program  
Ypsilanti, MI  
Effective date: 7/1/2009  
Program ID: 267-25-12-031

Orthopaedic Trauma (Orthopaedic Surgery)  
Jackson Memorial Hospital/Jackson  
Health System Program  
Miami, FL  
Effective date: 7/1/2009  
Program ID: 269-11-12-016

Pain Medicine  
Naval Medical Center (San Diego)  
Program  
San Diego, CA  
Effective date: 7/1/2009  
Program ID: 530-05-04-004

Yale-New Haven Medical Center  
Program  
New Haven, CT  
Effective date: 7/1/2009  
Program ID: 530-08-04-006

Pediatric Anesthesiology (Anesthesiology)  
University of Texas at Houston Program  
Houston, TX  
Effective date: 7/1/2009  
Program ID: 042-48-13-062

Pediatric Cardiology (Pediatrics)  
Cleveland Clinic Foundation Program  
Cleveland, OH  
Effective date: 7/1/2009  
Program ID: 325-58-13-084

Pediatric Emergency Medicine (Pediatrics)  
University of Oklahoma Health Sciences  
Center Program  
Oklahoma City, OK  
Effective date: 7/1/2009  
Program ID: 324-39-21-058

Pediatric Gastroenterology (Pediatrics)  
University of Oklahoma Health Sciences  
Center Program  
Oklahoma City, OK  
Effective date: 7/1/2009  
Program ID: 332-38-09-12-074

University of Utah Program  
Salt Lake City, UT  
Effective date: 7/1/2009  
Program ID: 332-49-21-075

Pediatric Hematology/Oncology (Pediatrics)  
Jackson Memorial Hospital/Jackson  
Health System Program  
Miami, FL  
Effective date: 7/1/2009  
Program ID: 327-11-13-089

University of Illinois College of Medicine  
at Chicago Program  
Chicago, IL  
Effective date: 7/1/2009  
Program ID: 337-18-21-088

Pediatric Infectious Diseases (Pediatrics)  
Indiana University School of Medicine  
Program  
Indianapolis, IN  
Effective date: 7/1/2009  
Program ID: 335-17-31-073

Pediatric Nephrology (Pediatrics)  
Tulane University Program  
New Orleans, LA  
Effective date: 7/1/2009  
Program ID: 328-21-13-078

Medical College of Wisconsin Affiliated  
Hospitals Program  
Milwaukee, WI  
Effective date: 7/1/2009  
Program ID: 340-56-12-080

Pediatric Orthopaedics (Orthopaedic Surgery)  
University of Colorado Denver Program  
Aurora, CO  
Effective date: 7/1/2009  
Program ID: 265-07-21-048

Pediatric Otolaryngology (Otolaryngology)  
Massachusetts Eye and Ear  
Infirmary/Harvard Medical School  
Program  
Boston, MA  
Effective date: 7/1/2009  
Program ID: 288-24-21-009

Pediatric Radiology (Radiology-Diagnostic)  
Phoenix Children's Hospital Program  
Phoenix, AZ  
Effective date: 7/1/2009  
Program ID: 424-03-31-066

Yale-New Haven Medical Center  
Program  
New Haven, CT  
Effective date: 7/1/2009  
Program ID: 424-08-21-068

University of Tennessee/Methodist  
Health Care Program  
Memphis, TN  
Effective date: 7/1/2009  
Program ID: 424-47-12-067
Pediatric Rehabilitation Medicine (Physical Medicine and Rehabilitation)
University of Texas Southwestern Medical School Program
Dallas, TX
Effective date: 7/1/2009
Program ID: 845-12-13-014

Pediatric Rheumatology (Pediatrics)
University of Minnesota Program
Minneapolis, MN
Effective date: 7/1/2009
Program ID: 331-28-13-014

Pediatric Surgery (General Surgery)
University of Nebraska Medical Center College of Medicine Program
Omaha, NE
Effective date: 7/1/2009
Program ID: 445-30-21-050

Pediatric Transplant Hepatology (Pediatrics)
McCaw Medical Center of Northwestern University Program
Chicago, IL
Effective date: 7/1/2009
Program ID: 388-16-32-003

Pediatric Urology (Urology)
Miami Children’s Hospital/Jackson Memorial Hospital Program
Miami, FL
Effective date: 7/1/2009
Program ID: 485-11-13-031

Washington University/B-JH/SLCH Consortium Program
St Louis, MO
Effective date: 7/1/2009
Program ID: 485-28-21-030

Pediatrics
Our Lady of The Lake Program
Baton Rouge, LA
Effective date: 7/1/2009
Program ID: 320-21-46-122

Preventive Medicine: General Preventive Medicine
University of Kentucky College of Medicine Program
Lexington, KY
Effective date: 7/1/2009
Program ID: 388-20-13-129

Madigan Army Medical Center Program
Tacoma, WA
Effective date: 7/1/2009
Program ID: 388-54-31-128

Procedural Dermatology (Dermatology)
Arkansas Skin Cancer Center Program
Little Rock, AR
Effective date: 7/1/2009
Program ID: 081-04-21-044

Methodist Hospital (Houston) Program
Houston, TX
Effective date: 7/1/2009
Program ID: 081-48-12-043

Psychosomatic Medicine (Psychiatry)
UCLA-San Fernando Valley/VA Greater Los Angeles Program
Sylmar, CA
Effective date: 7/1/2009
Program ID: 409-00-21-046

McGaw Medical Center of Northwestern University Program
Chicago, IL
Effective date: 7/1/2009
Program ID: 409-16-12-049

Pulmonary Disease (Internal Medicine)
Carilion Clinic Program-Virginia Tech Carilion School of Medicine Program
Roanoke, VA
Effective date: 7/1/2009
Program ID: 149-11-21-123

Selective Pathology (Pathology)
Cedars-Sinai Medical Center Program
Los Angeles, CA
Effective date: 7/1/2009
Program ID: 301-12-13-079

College of Medicine, Mayo Clinic (Rochester) Program D
Rochester, MN
Effective date: 7/1/2009
Program ID: 301-26-13-077

University of Minnesota Program
Minneapolis, MN
Effective date: 7/1/2009
Program ID: 301-26-13-081

Sleep Medicine
Indiana University School of Medicine Program
Indianapolis, IN
Effective date: 7/1/2009
Program ID: 520-17-14-087

Tufts-New England Medical Center Program
Boston, MA
Effective date: 7/1/2009
Program ID: 520-24-14-109

Children’s Hospital Program
Boston, MA
Effective date: 7/1/2009
Program ID: 520-24-21-111

Sports Medicine (Family Medicine)
University of South Florida (Morton Plant Mease Health Care) Program
Clearwater, FL
Effective date: 7/1/2009
Program ID: 127-11-22-134

Oregon Health & Science University Program
Portland, OR
Effective date: 7/1/2009
Program ID: 127-40-21-131

Penn State University/Good Samaritan Hospital Program
University Park, PA
Effective date: 7/1/2009
Program ID: 127-41-13-133

West Virginia University Program
Morgantown, WV
Effective date: 7/1/2009
Program ID: 127-55-13-132

Sports Medicine (Physical Medicine and Rehabilitation)
University of California (Davis) Health System Program
Sacramento, CA
Effective date: 7/1/2009
Program ID: 342-05-21-002

Emory University Program
Atlanta, GA
Effective date: 7/1/2009
Program ID: 342-12-12-005

Washington University/BJH/SLCH/ Consortium Program
St Louis, MO
Effective date: 7/1/2009
Program ID: 342-28-12-003

Medical College of Wisconsin Affiliated Hospitals Program
Milwaukee, WI
Effective date: 7/1/2009
Program ID: 342-56-21-004

Surgical Critical Care (General Surgery)
University of Florida Program
Gainesville, FL
Effective date: 7/1/2009
Program ID: 442-11-13-125

Thoracic Surgery-Integrated
University of Maryland Program
Baltimore, MD
Effective date: 7/1/2009
Program ID: 461-23-11-038

Mount Sinai School of Medicine Program
New York, NY
Effective date: 7/1/2009
Program ID: 461-35-11-041

University of North Carolina at Chapel Hill Program
Chapel Hill, NC
Effective date: 7/1/2009
Program ID: 461-36-11-049
Medical University of South Carolina Program
Charleston, SC
Effective date: 7/1/2009
Program ID: 461-45-21-087

University of Washington Program
Seattle, WA
Effective date: 7/1/2009
Program ID: 461-54-13-072

Medical College of Wisconsin Affiliated Hospitals Program
Milwaukee, WI
Effective date: 7/1/2009
Program ID: 461-56-21-101

Transplant Hepatology (Internal Medicine)
Emory University School of Medicine Program
Atlanta, GA
Effective date: 7/1/2009
Program ID: 158-12-14-047

Johns Hopkins University School of Medicine Program
Baltimore, MD
Effective date: 7/1/2009
Program ID: 158-23-14-039

Urology
Maine Medical Center Program
South Portland, ME
Effective date: 7/1/2009
Program ID: 480-22-13-187

Vascular Neurology (Neurology)
Seton Hall University School of Health and Medical Sciences Program
Edison, NJ
Effective date: 7/1/2009
Program ID: 188-33-12-071

Albert Einstein College of Medicine Program
Bronx, NY
Effective date: 7/1/2009
Program ID: 188-35-31-070

Vascular Surgery (General Surgery)
College of Medicine, Mayo Clinic (Arizona) Program
Phoenix, AZ
Effective date: 7/1/2009
Program ID: 450-03-21-117

UMDNJ-Robert Wood Johnson Medical School (Camden) Program
Camden, NJ
Effective date: 7/1/2009
Program ID: 450-03-21-119

Methodist Hospital (Houston) Program
Houston, TX
Effective date: 7/1/2009
Program ID: 450-48-13-118

Charleston Area Medical Center/West Virginia University (Charleston) Program
Charleston, WV
Effective date: 7/1/2009
Program ID: 450-55-12-110

Vascular Surgery-Integrated
University of Arkansas for Medical Sciences Program
Little Rock, AR
Effective date: 7/1/2009
Program ID: 451-04-21-055

Yale-New Haven Medical Center Program
New Haven, CT
Effective date: 7/1/2009
Program ID: 451-08-21-084

McGaw Medical Center of Northwestern University Program
Chicago, IL
Effective date: 7/1/2009
Program ID: 451-16-21-001

Southern Illinois University Program
Springfield, IL
Effective date: 7/1/2009
Program ID: 451-16-21-034

Lenox Hill Hospital Program
New York, NY
Effective date: 7/1/2009
Program ID: 451-35-12-002

University at Buffalo School of Medicine Program
Buffalo, NY
Effective date: 7/1/2009
Program ID: 451-35-13-004

Cleveland Clinic Foundation Program
Cleveland, OH
Effective date: 7/1/2009
Program ID: 451-38-22-046

Trinity (Good Samaritan Hospital) Program
Cincinnati, OH
Effective date: 7/1/2009
Program ID: 451-38-31-070

University Hospital/University of Cincinnati College of Medicine Program
Cincinnati, OH
Effective date: 7/1/2009
Program ID: 451-38-31-078

Withdrawn Programs
The accreditation of the following programs was withdrawn or voluntarily withdrawn with an effective date between January 1 and December 31, 2009.

Abdominal Radiology
College of Medicine, Mayo Clinic (Rochester) Program
Rochester, MN
Program ID: 421-36-31-004

SUNY at Stony Brook Program
Stony Brook, NY
Program ID: 421-35-21-009

Addiction Psychiatry
Creighton University/University of Nebraska Program
Omaha, NE
Program ID: 401-30-31-055

Vanderbilt University Program
Nashville, TN
Program ID: 401-47-21-015

Allergy and Immunology
Long Island College Hospital Program
Brooklyn, NY
Program ID: 020-35-11-041

Rutgers University Program
Newark, NJ
Program ID: 020-35-13-121

Blood Banking/Transfusion Medicine
Indiana University School of Medicine Program
Indianapolis, IN
Program ID: 020-35-21-058

SUNY at Stony Brook Program
Stony Brook, NY
Program ID: 020-35-21-051

Cardiovascular Disease
University of Southern California/LAC+USC Medical Center Program
Los Angeles, CA
Program ID: 141-05-21-061

UCLA-VA Greater Los Angeles Program
Los Angeles, CA
Program ID: 141-05-31-073

Allegheny General Hospital-Western Pennsylvania Hospital Medical Education Consortium
Pittsburgh, PA
Program ID: 141-41-11-083

Clinical Neurophysiology
Temple University Hospital Program
Philadelphia, PA
Program ID: 187-41-31-049
Critical Care Medicine
University of Illinois College of Medicine at Chicago Program
Chicago, IL
Program ID: 045-16-21-076

Dermatology
National Institutes of Health Clinical Center Program
Bethesda, MD
Program ID: 968-23-12-008

Dermatopathology
University Hospitals Case Medical Center Program
Cleveland, OH
Program ID: 100-38-31-069

Developmental-Behavioral Pediatrics
University of Maryland Program
Baltimore, MD
Program ID: 336-23-31-004

Emergency Medicine
University of Texas Medical Branch Hospitals Program
Galveston, TX
Program ID: 110-48-21-191

Family Medicine
University of Iowa Hospitals and Clinics Rural (Pella) Program
Iowa City, IA
Program ID: 120-18-31-066

National Capital Consortium Program
Andrews AFB, MD
Program ID: 120-23-21-002

New York Medical College (Brooklyn-Queens) Program
Brooklyn, NY
Program ID: 125-35-22-267

Forensic Pathology
Texas Tech University (Lubbock) Program
Lubbock, TX
Program ID: 310-48-13-091

Forensic Psychiatry
University of South Florida Program
Tampa, FL
Program ID: 406-11-12-055

University of Texas Southwestern Medical School Program
Dallas, TX
Program ID: 406-48-31-042

Geriatric Medicine
St Joseph’s Hospital and Medical Center Program
Sun City, AZ
Program ID: 125-03-21-029

Mercy Medical Center (Des Moines) Program
Des Moines, IA
Program ID: 125-18-13-056

University of California (Davis) Health System Program
Sacramento, CA
Program ID: 151-05-21-006

New York Medical College (Brooklyn-Queens) Program
Brooklyn, NY
Program ID: 151-35-31-124

Hematology
Howard University Program
Washington, DC
Program ID: 145-10-21-114

Infectious Disease
New York Medical College (Brooklyn-Queens) Program
Brooklyn, NY
Program ID: 146-35-23-041

Internal Medicine
UCLA-VA Greater Los Angeles Program
Los Angeles, CA
Program ID: 140-05-31-048

New York Medical College (Brooklyn-Queens) Program
Brooklyn, NY
Program ID: 140-35-22-267

Interventional Cardiology
Allegheny General Hospital-Western Pennsylvania Hospital Medical Education Consortium
Pittsburgh, PA
Program ID: 152-41-21-062

Medical College of Wisconsin Affiliated Hospitals (Racine) Program
Racine, WI
Program ID: 120-56-21-488

Brown University Program A
Providence, RI
Program ID: 152-43-21-063

Medical Microbiology
University of Texas Medical Branch Hospitals Program
Galveston, TX
Program ID: 314-48-21-010

Medical Toxicology
University Hospital/University of Cincinnati College of Medicine Program
Cincinnati, OH
Program ID: 406-11-12-055

Children’s Hospital of Philadelphia Program
Philadelphia, PA

Section IV

Graduate Medical Education Teaching Institutions

Section IV lists hospitals and organizations that sponsor graduate medical education (GME) programs or participate in GME. Sponsoring institutions assume final responsibility for a GME program. Most GME programs are sponsored by specific clinical departments within a hospital, another health care institution such as a medical school, or an educational consortium. Major participating institutions include hospitals or other sites recognized by at least one residency review committee as providing a major portion of required GME. Hospitals and other institutions that provide rotations of less than one-sixth of the program length or less than a total of 6 months are not listed in the Directory.

All institutions that sponsor GME programs or participate in GME are listed in alphabetical order by state and city. Each listing includes the institution name, address, and identification code. Also provided are codes of medical schools affiliated with each institution (where applicable) and abbreviations for the specialty and subspecialty programs affiliated with each institution. (A key for specialty and subspecialty abbreviation codes is provided on the inside back cover of this Directory).

Candidates seeking a residency should refer to the list of programs in Section II. Applications for a residency position should be addressed to the program director rather than to an institution.

Relationships Between Hospitals and Medical Schools (Medical School Affiliation)

Hospitals that sponsor an accredited program are not required to have a formal relationship with a medical school. Where such a relationship exists, the affiliation is identified by the dean of the medical school as M (major), G (graduate only), or L (limited). The medical school associated with the code number in this listing is identified in Appendix D.

Major affiliation (M) signifies that an institution is an important part of the teaching program of the medical school and is a major unit in the clinical clerkship program. Major teaching institutions provide clerkship experience in two or more of the major specialties: internal medicine, surgery, pediatrics, and obstetrics-gynecology. An institution responsible for most of the teaching in a single specialty, such as psychiatry or pediatrics, may also be considered a major affiliation. In a major teaching institution, medical students serve clinical clerkships regularly on inpatient services, under the direct supervision of medical school faculty. A major teaching institution may or may not be used for medical school residencies.

Graduate affiliation (G) indicates that the institution is affiliated with the medical school only for its graduate programs and that one or more of the following arrangements is in effect:
1. House staff of the GME programs are selected by officials of a medical school department or by a joint committee of the institution teaching staff and medical school faculty.
2. Medical school faculty (other than the institution’s attending staff) are regularly scheduled to participate in the teaching programs of the institution. No graduate affiliation is indicated if medical school faculty participation at the institution is limited to an occasional lecture or consultation visit, or if the institution’s residents attend medical school teaching conferences only as visitors.
3. A contractual arrangement (with or without financial commitment) specifies the medical school participation in the organization and supervision of the GME program in the institution.
4. There is some degree of exchange of residents between this institution and the principal teaching institution of the medical school.

Limited affiliation (L) signifies that the institution is affiliated with the medical school’s teaching program only for brief and/or unique rotations of students or residents.

Appendix A

Combined Specialty Programs

Combined training consists of a coherent educational experience in two or more closely related specialty or subspecialty programs. The educational plan for combined training is approved by the board of each of the specialties to assure that resident physicians completing combined training are eligible for board certification in each of the component specialties. Each specialty or subspecialty program is separately accredited by the Accreditation Council for Graduate Medical Education (ACGME) through its respective Residency Review Committee (RRC). The duration of combined training is longer than any one of its component specialty programs standing alone, and shorter than all of its component specialty programs together.

Applicants to combined specialty programs are encouraged to review requirements for admission to the certification process of each board (see Appendix B).

Note on Combined Internal Medicine/Pediatrics Programs

The American Board of Internal Medicine and American Board of Pediatrics have developed policies regarding board eligibility of residents in programs that are not accredited. Combined internal medicine/pediatrics training initiated June 1, 2007, or after must be undertaken in combined internal medicine/pediatrics programs accredited by the ACGME.

Residents contracted to programs for July 1, 2007 through the NRMP in programs that do not seek or achieve accreditation will be allowed to finish that academic year in the unaccredited program and still have the training count toward the requirements for certification. After the 1 year of training, they must transfer to an accredited program in order to be eligible for certification.

Residents who have entered board-approved internal medicine/pediatrics programs prior to June 1, 2007 will be allowed to complete their training in the approved program and will be eligible for admission to the certification examination in internal medicine and pediatrics, even if the program chooses not to seek accreditation or is unsuccessful in achieving accreditation. The boards will continue to monitor those programs in order to assure compliance with the curricular content required by the ACGME.

ACGME-accredited programs in internal medicine/pediatrics are listed in Section II.

Diagnostic Radiology/Nuclear Medicine/Nuclear Radiology

The American Board of Radiology and the American Board of Nuclear Medicine offer dual certification for candidates who have satisfactorily completed a combined total of 6 years of suitable accredited training in programs approved by both boards and successfully passed the certifying examination of both boards.

To be eligible for dual certification, a resident must obtain residency training in diagnostic radiology and nuclear medicine that must include a) a preparatory clinical year in an ACGME-accredited program and b) 4 years of education in an ACGME-accredited diagnostic radiology program that includes 6 months of nuclear medicine training, followed by c) 1 year of education in a combined nuclear medicine and nuclear radiology program. Certifying examinations of each board cannot be taken until all required years of training in both specialties are satisfactorily completed. Emergency Medicine/Family Medicine

The American Board of Emergency Medicine and the American Board of Family Medicine offer dual certification for candidates
Emergency Medicine/Family Medicine

The American Board of Emergency Medicine and the American Board of Family Medicine offer dual certification for candidates (eligible for certification by each Board) who enter and successfully complete the curriculum of the 5-year program.

Internal Medicine/Dermatology

The American Board of Internal Medicine and the American Board of Dermatology offer dual certification for candidates who fulfill the requirements of both boards by completing joint training in 5 years. All 5 years should be completed in the same combined program; exceptions must be approved in advance by both boards. Applicants may not take the certifying examinations until all required years in both specialties have been completed.

Data

Unless otherwise noted, all data are for 2009.

COMBINED SPECIALTY PROGRAMS

(eligible for certification by each Board) who enter and successfully complete the curriculum of the 5-year program.
Internal Medicine/Emergency Medicine

The American Board of Internal Medicine and the American Board of Emergency Medicine offer dual certification for candidates who have completed at least 2½ years of suitable accredited training in each specialty. A combined residency consists of 5 years of balanced education in the two disciplines. It is strongly recommended that the participating residencies be in the same academic health center.

To be eligible for dual certification, the resident must satisfactorily complete 60 months of combined education, which must be verified by the directors of both programs. The certifying examinations cannot be taken until all 5 years are completed.

INTERNAL MEDICINE/FAMILY MEDICINE

The American Board of Internal Medicine and the American Board of Family Medicine offer dual certification for candidates who have satisfactorily completed 4 years of combined training in programs approved by both boards.

To be eligible for dual certification, combined residency training in internal medicine and family medicine must include at least 48 months of balanced education in the two disciplines and be verified by the training director(s) of the program. The written certifying examinations cannot be taken until all required years in both specialties are completed.

COMBINED SPECIALTY PROGRAMS

INTERNAL MEDICINE/EMERGENCY MEDICINE/Critical Care Medicine

The American Board of Internal Medicine and the American Board of Emergency Medicine offer triple certification for candidates who complete a 6-year (72-month) integrated, coherent program of combined training in internal medicine, emergency medicine, and critical care medicine, approved by both boards.

Upon successful completion and verification of the first 5 years of this program, candidates may apply to take the certification examinations in internal medicine and emergency medicine. To meet eligibility for certification in critical care medicine, the candidate must: (1) have satisfactorily completed the 6-year combined program; (2) be certified by the American Board of Internal Medicine; and (3) have met the certification requirements of the American Board of Emergency Medicine.

INTERNATIONAL MEDICINE/FAMILY MEDICINE

The American Board of Internal Medicine and the American Board of Family Medicine offer dual certification for candidates who have satisfactorily completed 4 years of combined training in programs approved by both boards.

To be eligible for dual certification, combined residency training in internal medicine and family medicine must include at least 48 months of balanced education in the two disciplines and be verified by the training director(s) of the program. The written certifying examinations cannot be taken until all required years in both specialties are completed.

Data

Unless otherwise noted, all data are for 2009.

COMBINED SPECIALTY PROGRAMS

Internal Medicine/Medical Genetics

The American Board of Internal Medicine and the American Board of Medical Genetics have approved a pathway leading to admissibility to the certification processes in internal medicine and medical genetics to candidates who have satisfactorily completed 5 years of combined training in internal medicine and medical genetics in an approved training track, beginning with a GY1 in internal medicine. Such training, which must be verified by the program directors of both specialties, is intended to provide educational and practical experiences in each discipline that are equivalent to those in the training programs of the parent specialties.

This combined residency training must be conducted in the same institution and its affiliated hospitals. There should be no interruption in training.

Internal Medicine/Neurology

The American Board of Internal Medicine and the American Board of Psychiatry and Neurology offer dual certification for candidates who have completed 5 years of combined training suitable to both boards. A combined residency in internal medicine and neurology must include at least 5 years of coherent education integral to residencies in the two disciplines. It is strongly recommended that the participating residencies be in the same institution.

To meet eligibility for dual certification, the resident must satisfactorily complete 60 months of training, which must be verified by the directors of both programs. The written certifying examinations cannot be taken until all required years in both specialties are satisfactorily completed.

Internal Medicine/Preventive Medicine

The American Board of Internal Medicine (ABIM) and the American Board of Preventive Medicine (ABPM) offer dual certification for candidates who have completed a minimum of 4 years of accredited training in combined internal medicine/preventive medicine programs that meet the Guidelines for Combined Internal Medicine - Preventive Medicine Residency Training Programs approved by ABPM and ABIM. In addition to satisfactory completion of the combined training programs, applicants for the ABPM certifying examination must have completed the required year of preventive medicine practice to qualify.

Internal Medicine/Nuclear Medicine

The American Board of Internal Medicine and the American Board of Nuclear Medicine offer a training pathway for candidates who have completed 4 years of combined accredited training in internal medicine and nuclear medicine leading to admissibility to certification in both specialties. To meet eligibility for dual certification, the resident must satisfactorily complete 48 months of combined training that is verified by the directors of both training programs. It is strongly recommended that combined training occur in the same institution. Residents will be eligible for admission to the written certifying examination in internal medicine after successfully completing the R-3 year of training and for the nuclear medicine examination after the R-4 year.

Internal Medicine/Physical Medicine and Rehabilitation

The American Board of Internal Medicine and the American Board of Physical Medicine and Rehabilitation offer dual certification for candidates who have completed at least 3½ years of suitable accredited training in each specialty. A combined residency must include at least 5 years of coherent training integral to residencies in the two disciplines. It is strongly recommended that the participating residencies be in the same institution.

To meet eligibility requirements for dual certification, the resident must satisfactorily complete 60 months of combined education, which must be verified by the directors of both programs. The written certifying examinations cannot be taken until required training in a specialty has been satisfactorily completed. The certifying examination in internal medicine cannot be taken prior to the fall of the fifth year in the combined program.

Graduate Medical Education Directory 2010-2011
Neurology/Diagnostic Radiology/Neuroradiology

The American Board of Psychiatry and Neurology and the American Board of Radiology offer certification in neurology, diagnostic radiology, and neuroradiology. The combined residency must include at least 7 years of coherent training integral to all three specialties. It is recommended that the participating residencies be in the same academic health center.

To meet eligibility requirements for triple certification, the resident must satisfactorily complete 84 months of combined training, which must be verified by the directors of each program. Lacking verification of acceptable clinical competence in the combined program, the resident must satisfactorily complete the standard length of residency training and all other requirements before each certifying examination may be taken. Applicants may not take the certifying examination until all required years of training have been completed. In order to be eligible for the neuroradiology exam, a resident must have completed certification in both diagnostic radiology and neurology.

Pediatrics/Dermatology

The American Board of Pediatrics and the American Board of Dermatology offer dual certification for candidates who fulfill the requirements of both boards by completing joint training in 5 years. All 5 years should be completed in the same combined program; exceptions must be approved in advance by both boards. Applicants may not take the certifying examinations until all required years in both specialties have been completed.

Pediatrics/Emergency Medicine

The American Board of Pediatrics and the American Board of Emergency Medicine offer dual certification for candidates who fulfill the requirements of both boards by completing joint training in 5 years. All 5 years should be completed in the same combined program; exceptions must be approved in advance by both boards. Applicants may not take the certifying examinations until all required years in both specialties have been completed.

- MPH/MBA or PhD training: 18.7%
- Research rotation: 0.0%

Educational Features
- Offers additional training or educational experience beyond training length: 0.0%
- Offers a primary care track: 16.7%
- Offers a rural track: 0.0%
- Offers a women's health track: 0.0%
- Offers a hospitalist track: 0.0%
- Offers a research track/nonaccredited fellowship: 33.3%
- Offers an other track: 16.7%

Resident Evaluation
- Yearly specialty in-service examination required: 92.9%
- Patient surveys: 66.7%
- Portfolio system: 50.0%
- 360-degree evaluations: 100.0%
- Objective structured clinical examinations (OSCE): 66.7%

Program Evaluation
- Program graduation rates: 100.0%
- Board certification rates: 100.0%
- In-training examinations: 100.0%
- Performance-based assessments: 83.3%

Employment Policies and Benefits
- Part-time/shared positions: 33.3%
- On-site child care: 33.3%
- Subsidized child care: 16.7%
- Allowance/stipend for professional expenses: 100.0%
- Leave for educational meetings/conferences: 60.0%
- Moving allowance: 33.3%
- Housing stipend: 0.0%
- On-call meal allowance: 100.0%
- Free parking: 50.0%
- PDAs: 66.7%
- Placement assistance upon completion of program: 66.7%
- Cross coverage in case of illness/disability: 83.3%

Compensation and Leave (Graduate Year 1)
- Average resident/fellow compensation: $43,930
- Average number weeks of vacation: 3.5
- Sick days (paid): 12.4
- Maximum number of paid days for family/medical leave: 20
- Maximum number of unpaid days for family/medical leave: 20

Major Medical Benefits
- Major medical insurance for residents: 100.0%
- Major medical insurance for dependents: 83.3%
- Outpatient mental health insurance: 100.0%
- Inpatient mental health insurance: 100.0%
- Group life insurance: 83.3%
- Dental insurance: 83.3%
- Disability insurance: 66.7%
- Disability insurance for occupationally acquired HIV: 50.0%
- Medical insurance coverage begins when starting program: 100.0%

Psychiatry/Neurology

The American Board of Psychiatry and Neurology has established guidelines for combined training in psychiatry and neurology. A combined residency must include one postgraduate year (PGY1) of training that is acceptable to neurology plus a minimum of 5 years of combined residency training. The 5 years of residency training are usually taken at one approved institution but may be taken at no more than two approved institutions.

Data
- Unless otherwise noted, all data are for 2009.

Table 1. Psychiatry/Neurology Programs
- Number of training programs: 10

Program Data
- Length of training: 5/6
- Minimum number of prior years of GME required: 0
- Offers graduate year 1 positions, available immediately upon medical school completion: Yes
- Average number of interviews for program year 1 positions: 3.8
- Percent new program directors, 2008-2009 academic year (Source: ACGME): 33.3%

Residents/Fellows
- Total number of active residents/fellows: 14
- Average number of residents/fellows per program: 1.4
- Average percent female: 14.3%
- Average percent international medical graduate (IMG): 7.1%

Program Faculty
- Average number of full-time physician faculty: 107.2
- Average number of part-time physician faculty: 71.7
Average percent female full-time physician faculty: 33.1%
Average ratio of full-time physician faculty to resident/fellow: 42.0

Table 2 Data for Psychiatry/Neurology Listed in FREIDA
Number of programs providing data: 5

Work Schedule (Program Year 1)
Average hours on duty per week: 57.4
Average maximum consecutive hours on duty: 26.5
Average days off duty per week: 1.5
Moonlighting allowed within institution: 100.0%
Night float system: 60.0%
Offers awareness and management of fatigue in residents/fellows: 80.0%

Educational Setting (Program Year 1)
Average hours/week of regularly scheduled lectures/conferences: 5.8
Average percent of training in hospital outpatient clinics: 13.0%
Average percent of training in nonhospital ambulatory care community settings: 0.0%

Educational Benefits
Program to assess/enhance medical professionalism: 60.0%
Debt management/financial counseling: 60.0%
Formal program to develop teaching skills: 100.0%
Formal mentoring program: 80.0%
Formal program to foster interdisciplinary teamwork: 0.0%
Continuous quality improvement training: 100.0%
International experience: 20.0%
Resident/fellow retreats: 100.0%
Off-campus electives: 100.0%
Hospice/home care experience: 20.0%
Cultural competence awareness: 100.0%
Instruction in medical Spanish or other non-English language: 40.0%
Alternative/complementary medicine curriculum: 60.0%
Training in identifying and reporting of domestic violence/abuse: 60.0%
MPH/MBA or PhD training: 40.0%
Formal mentoring program: 100.0%
Continuous quality improvement training: 100.0%

Educational Features
Offers additional training or educational experience beyond training length: 18.2%
Offers a primary care track: 0.0%
Offers a rural track: 0.0%
Offers a women's health track: 0.0%
Offers a hospitalist track: 0.0%
Offers a research track/nonaccredited fellowship: 20.0%
Offers an other track: 0.0%

Resident Evaluation
Yearly specialty in-service examination required: 91.7%
Patient surveys: 80.0%
Portfolio system: 40.0%

Appendix B

Medical Specialty Board Certification Requirements

This section provides general information about the American Board of Medical Specialties (ABMS®), its member boards, board certification, and maintenance of certification, as well as a brief summary of board certification requirements for each member board. It was developed to address some of the most common issues in board certification, such as:

- The steps of the certification process
- The difference between certification and licensure
- Policy on maternity/paternity leave and vacations
- The impact of absences during residency/fellowship on board certification
- Required training/expertise beyond residency/fellowship training
- Availability of certification with added qualifications
- Frequency of board examinations
- Application deadlines for the certification process
- The impact of a history of substance abuse on board certification
- Testing accommodations for applicants with disabilities
- The cost of board certification process (application and examination fees)
- Other costs associated with certification and maintenance of certification
- What is the impact of choosing not to become board certified?
- Requirements for maintenance of certification?

Applicants for certification should contact the respective ABMS member board(s) to confirm the current, official policy and requirements. Inquiries should be directed to the particular member board executive offices listed in Table 1.

*Note: The above list is not exhaustive and only includes the member boards of the American Board of Medical Specialties.*
The American Board of Medical Specialties (ABMS) and Board Certification

Established in 1933, the American Board of Medical Specialties (ABMS) is an organization of 24 medical specialty boards (member boards) and nine associate members with shared goals related to the education and board certification of medical specialists. ABMS does not itself certify physicians, but works with the ABMS member boards and the ABMS associate members to maintain and improve the quality of medical care by creating and utilizing educational and professional standards for graduate medical education and continuous learning activities of medical specialists. This agenda progresses outward through ABMS’ relationships with various health care quality and educational organizations that share similar goals.

The vast majority of medical specialties are represented by the 24 ABMS member boards. A few member boards also certify some nonphysician specialists, such as in the areas of radiology and medical genetics. Today, the member boards issue more than 145 specialty and subspecialty certificates (see Table 2).

ABMS and the member boards are all independent nonprofit organizations and establish their processes and standards free of any professional or governmental body. The primary function of each board is to evaluate candidates who voluntarily apply for certification in a specialty or related subspecialty area and to certify those qualified as a “diplomate” of their board. Once certified, the diplomates participate in an ongoing professional development program called ABMS Maintenance of Certification® (MOC).

Through the LCSB, the following list of ABMS member boards has been approved by ABMS and the AMA Council on Medical Education (AMA CME) through the Liaison Committee for Specialty Boards (LCSB) to oversee the certification process for their particular specialty.

The American Board of:
- Allergy and Immunology
- Anesthesiology
- Colon and Rectal Surgery
- Dermatology
- Emergency Medicine
- Family Medicine
- Internal Medicine
- Medical Genetics
- Neurological Surgery
- Nuclear Medicine
- Obstetrics and Gynecology
- Ophthalmology
- Orthopaedic Surgery
- Otolaryngology
- Pathology
- Pediatrics
- Physical Medicine and Rehabilitation
- Plastic Surgery
- Preventive Medicine
- Psychiatry and Neurology
- Radiology
- Surgery
- Thoracic Surgery
- Urology

The nine associate members of the ABMS are:
- Accreditation Council for Continuing Medical Education (ACCME)
- Accreditation Council for Graduate Medical Education (ACGME)
- American Hospital Association (AHA)
- American Medical Association (AMA)

The Difference Between Board Certification and State Licensure

While a medical license is legally required in order to treat patients, board certification implies a higher level of clinical expertise in a particular specialty and/or subspecialty of medical practice. Board certification lets the public know that a physician has demonstrated the medical knowledge, judgment, professionalism, and clinical and communications skills required to provide quality care. It is often needed for a physician to obtain hospital privileges and to contract with insurance companies. Many professional societies require board certification for membership.

Other key differences between state licensing and board certification include:

- State licensing is not specialty-specific; it sets only minimum competence requirements to diagnose and treat patients. Board certification represents a physician’s commitment to become more knowledgeable about a specific area of medicine.
- Physicians are licensed by the medical board of the state, territory, or Canadian province in which they practice medicine. They must hold a license for each state in which they practice. Board certification is a nationwide credential supported by the ABMS member boards. Physicians can be certified by more than one member board and hold certifications in one or more subspecialties.
- To obtain a medical license, a physician must complete medical school and graduate medical education and pass an examination. Once licensed, a physician’s competence and professional conduct is monitored by the state medical board, which also typically requires participation in continuing medical education (CME). The CME credits can be earned in a number of ways, such as attending a lecture or reading or listening to CME-designated material and then taking a test.
- Board certification is awarded to the physician in an individual specialty or specialties; those who want to be board certified in multiple specialties must undergo the process for each of them. It is granted by independent boards—not government-regulated boards—and is not connected to the state or territory where the physician practices. Once certified, physicians participate in a program of continuous professional development linked to maintaining certification involving education, evaluation, and improvement activities that allow them to demonstrate their understanding of current treatments and technologies and their ability to apply these concepts to provide quality patient care in a particular specialty.

Licensure Requirements

In most cases, applicants for certification and maintenance of certification, as well as current diplomates, must hold a full, valid, current, and unrestricted license to practice medicine in the United States, its territories, or Canada. If licenses are held in more than
one jurisdiction, all licenses held must meet this requirement. Applicants and diplomates are also required to inform their respective boards of any and all restrictions placed on their licenses.

Some boards (American Board of Emergency Medicine, American Board of Nuclear Medicine [ABNM], American Board of Obstetrics and Gynecology, and American Board of Psychiatry and Neurology [ABPN]) allow for exceptions for those applicants who do not yet have an unrestricted medical license because they are still in training; in these cases, an educational or institutional license is sufficient, provided that proof of the full, unrestricted medical license is provided to the board within the specified time frame. The ABNM also requires confirmation from the training program the resident is still enrolled at the time of the examination. The ABPN allows consideration of the following exceptions for licensure: Restriction of a physician’s medical license does not include medical licenses that, when issued, are limited to a geographic area within a jurisdiction (eg, practice limited to underserved areas), as long as such licenses are not in any way limited due to, because of, or by virtue of a disciplinary, legal, or administrative action against the license holder. At its sole discretion, the ABPN may review instances of licensure restrictions to determine whether such restrictions constitute a violation of the ABPN’s licensure requirements.

The American Board of Dermatology requires that candidates hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in the candidate’s state or province of residence in either the United States or Canada.

**Steps in Achieving Certification**

Certification involves a comprehensive and multifaceted process of testing, along with other forms of assessment, that is designed and administered by specialists in a specific area of medicine. Initial or general certification is awarded to approved candidates who meet the requirements for certification set by the member board. It recognizes special knowledge and ability demonstrated during medical residency training and on examinations which are typically taken following the completion of a residency program. For initial certification, doctors are evaluated according to the standards set by the ABMS member board.

Certification by an ABMS member board indicates that the physician has:

1. Earned a medical degree (MD, DO, or other approved credential approved by the member board) which includes:
   - Graduation from a medical school in the United States accredited by the Liaison Committee for Medical Education (LCME), sponsored by the AMA and the Association of American Medical Colleges
   - Graduation from a medical school in Canada accredited by the Committee on Accreditation of Canadian Medical Schools (CACMS), with which the LCME collaborates
   - Graduation from an osteopathic school in the United States accredited by the American Osteopathic Association
   - Graduation from a foreign medical school plus a certificate from the Educational Commission for Foreign Medical Graduates (ECFMG)

2. Completed the required accredited education and training; the amount of graduate medical education and training required varies by ABMS member board (see Table 3); similarly, leave of absence policies, for parental or family leave or illness, vary from one board to the next (Table 4).

3. Provided letters of attestation from the program director and/or faculty stating whether an individual is qualified to pursue certification (if required by the board)

4. Met other ABMS member board-specific qualifications

Many physicians have a general specialty certification as well as one or more subspecialty certifications. For instance, a physician might hold a general certification in psychiatry as well as two subspecialty certifications, in addiction psychiatry and child and

adolescent psychiatry. In addition, a physician can be certified by more than one member board; for example, a doctor can be certified by the American Board of Pediatrics as well as the American Board of Allergy and Immunology.

Subspecialty certification is awarded by one or more member boards in a component of a specialty or subspecialty to which a practicing physician may devote a significant proportion of time. Certification in a subspecialty requires specialized training during

*Two pathways for certification may be pursued. Candidates may either complete five years of prerequisite training (General Surgery) and two years of Thoracic Surgery, or six years of an integrated Thoracic Surgery program with no prerequisite training. The American Board of Thoracic Surgery will accept a Vascular Surgery residency in lieu of a General Surgery residency as long as the Vascular Surgery training leads to primary certification.
or after residency in addition to that required for general certification, as well as clinical practice in some cases. Depending on the board, certification is valid for six to 10 years. In order to recertify, physicians participate in another process, ABMS Maintenance of Certification® (MOC), which is described below.

**Maintaining Certification and the Commitment to Lifelong Learning**

ABMS MOC is the most recent advance in the board certification process. Like medicine and science, certification is evolving. Originally, the physician passed a rigorous one-time exam and was considered board certified for life. Beginning in the 1970s, individual ABMS Member Boards began implementing time-limited recertification; physicians had to pass the certification test every 6 to 10 years (depending on the board) to become recertified. In 2000, the ABMS member boards agreed to a standard process for recertification called ABMS Maintenance of Certification (MOC), a professional development program for specialists who are certified by one of the 24 ABMS member boards.

MOC involves a comprehensive evaluation and an ongoing process throughout a specialist's career. Program standards are set by ABMS and independently implemented by the member boards.

MOC promotes continuous lifelong learning and self-assessment to better meet patient, provider, and payer expectations for quality care. It aligns with the movement toward competency-based certification, the increasing evidence that competency degrades over time, the call for enhanced public accountability, and the potential linkages with periodic maintenance of licensure requirements.

MOC uses evidence-based guidelines, national clinical and quality standards, and best practices in combination with customized continuing education, self-assessment, patient assessment, and performance feedback to create a professional culture of lifelong learning. Through the MOC process, board-certified specialists continue to develop six core competencies adopted by ABMS and the Accreditation Council for Graduate Medical Education (ACGME) for quality patient care in a medical specialty:

- **Patient Care** — Providing care that is compassionate, appropriate, and effective for the treatment of health problems and to promote health
- **Medical Knowledge** — Demonstrating knowledge about established and evolving biomedical, clinical, and cognitive sciences and their application to patient care
- **Practice-based Learning and Improvement** — Ability to investigate and evaluate patient care practices, appraise and assimilate scientific evidence, and improve one's practice of medicine
- **Interpersonal and Communication Skills** — Demonstrating skills that result in effective information exchange and learning with patients, their families, and professional associates (eg, fostering a therapeutic relationship that is ethically sound; using effective listening skills, with nonverbal and verbal communication; working as both a team member and at times as a leader)
- **Professionalism** — Demonstrating a commitment to carrying out professional responsibilities, adherence to ethical principles, and sensitivity to diverse patient populations
- **Systems-based Practice** — Demonstrating awareness of and responsiveness to the larger context and systems of health care, and the ability to call on system resources to provide optimal care (eg, coordinating care across sites or serving as the primary case manager when the case involves multiple specialties, professions, or sites)

The MOC process for continuous learning incorporates the above competencies into the four components or areas of assessment, which include:

- **Part I** — Licensure and Professional Standing. Holding a valid, unrestricted medical license to practice in at least one US state or territory or in Canada
- **Part II** — Lifelong Learning and Self-Assessment. Completing education and self-assessment programs that meet specialty-specific standards set by the member boards. This can include everything from rigorous take-home tests to continuing medical education, which provide specific information about new treatments and standards of care.
- **Part III** — Cognitive Expertise. Proving medical and practice-related knowledge through regular, formal examination.
- **Part IV** — Practice Performance Assessment. Evaluating clinical practice to assess quality care provided compared to peers and national benchmarks, implementing a quality improvement intervention to address areas of weakness, and remeasuring to assess improvement. This can be achieved through peer and patient surveys, patient chart reviews by objective sources, etc.

For more information on the MOC process and requirements, refer to each board’s listing in the following pages.

**Use of the Term “Board Eligible”**

Because certification is a process of advancement through several individual steps, including examination, the completion of any one step, such as the minimal educational requirements, should not imply that a candidate is now possessed of some special qualification that is more or less equivalent to certification. For this reason, the majority of ABMS boards do not use or sanction the use of the terms “board eligible” or “board qualified.” The status of an applicant with a given board is determined by and varies with the current status of his/her credentials.

Exceptions: The American Board of Orthopaedic Surgery recognizes candidates who have successfully completed its Part I examination and are waiting to take Part II as being “board eligible.” The American Board of Physical Medicine and Rehabilitation (ABPMR), although it does not accept any use of “board eligible,” uses the term “board admissible” to define the status of an applicant who has been accepted by the ABPMR as a candidate to take the examination for which he or she has applied.

**Providing Board Certification Information to the Public**

Information about a physician’s certification status has always been available through the ABMS or an ABMS member board to assure the public of a physician’s qualifications. This was one of the original purposes for the organization and remains just as important today.

ABMS collects information from the member boards and certified physicians, maintains a centralized database, and circulates the information through its licensees for professional use. Plus, many consumers have checked their physician’s board certification through the ABMS web site or have called the ABMS toll-free number.

Board certification information provided by ABMS is relied upon by the majority of health care and credentials verification organizations for privileging and staffing purposes. Insurance companies, law firms, recruiters, and research organizations also reference these data for their purposes. In addition, the public refers to ABMS information to verify certification or locate a specialist in a particular field or geographic region.

Because this information is heavily relied upon, it is essential that data on certified physicians be kept accurate and current. With an increasing number of hospitals, surgeon centers, managed care organizations, and insurance carriers requiring board certification, physician information that is inaccurate, dated, or unavailable
could cause difficulties during the credentialing, licensure, or hospital privileging processes.

**Applicants with a History of Chemical Dependency or Substance Abuse**

*(Note: The following is general information about board policies in this regard. Each board may have specific policies that differ from these general guidelines.)*

The Americans with Disabilities Act (ADA) protects individuals with a history of chemical dependency or substance abuse who are not currently abusing alcohol or using drugs illegally. Candidates with a history of chemical dependency or abuse of a controlled substance will not be admitted to board examinations unless they present evidence satisfactory to the board that they have successfully completed the program of treatment prescribed for their condition, and the board is satisfied that they are currently free of such substance abuse or chemical dependency and do not currently pose a direct threat to the health and safety of others. A board may also require attestations from the responsible program administrators and physicians that the applicant has been free of chemical dependency for a period sufficient to establish that the applicant is not currently exhibiting chemical dependency and/or that substance abuse is not an ongoing problem.

**Notes**

- Dermatology—A confirmatory letter from a licensed physician within 1 month of the examination stating that the disorder no longer exists or is currently controlled is also necessary.
- Internal Medicine—Documentation of at least 1 year of continuous sobriety from a reliable monitoring source must be submitted to the board for admission to an examination or to receive a certificate.
- Psychiatry and Neurology—Restriction of a physician’s medical license does not include voluntary participation in an impaired physicians’ program or other appropriate, monitored alcohol or chemical substance-abuse recovery program if the physician has not been reported to either the National Practitioner Data Bank or the Data Bank of the Federation of State Medical Boards.
- Thoracic Surgery—Documentation of at least 2 years of continuous sobriety from a reliable monitoring source must be submitted to the board for admission to an examination. For candidates who are already in the examination process and develop a chemical dependency as reported to the board, the process will be suspended until the candidate can provide documentation satisfactory to the board that the condition has been under control for a period of 2 years. At that time, the candidate will be readmitted to the examination process. The requirement to be accepted for examination within 5 years of completion of an approved thoracic surgery residency will not be waived.

**Applicants with Disabilities**

*(Note: The following is general information about board policies in this regard. Each board may have specific policies that differ from these general guidelines.)*

The ABMS certification boards support the intent of the Americans with Disabilities Act (ADA). Accordingly, the boards will attempt to make reasonable accommodations for applicants with disabilities, and may provide or allow the use of necessary auxiliary aids, services, or testing conditions that do not fundamentally alter the measurement of the skills or knowledge the examination is intended to test.

Candidates are required to notify the respective board of the need for special testing circumstances when applying for examination. This deadline allows the board to request the necessary documentation, review the records, and verify the disability, if necessary. All special arrangements must be made and agreed upon in advance; special arrangements cannot be made at the time the examination is given. Therefore, early notification of the need for special testing circumstances is encouraged.

If necessary, some boards may undertake an independent assessment, at the expense of the board. Documentation and other evidence substantiating the disability may include:

- A report diagnosing the applicant’s disability written by a professionally qualified evaluator
- A history of the disability, including previous settings in which accommodations have been granted
- Diagnostic information about the specified disability using standard nomenclature from sources such as the *International Classification of Diseases* (ICD) and the *Diagnostic and Statistical Manual of Mental Disorders*
- Specific recommended accommodations with a rationale for why each accommodation is needed.

**Cheating and Irregular or Unethical Behavior on Examinations**

*(Note: The following is general information about board policies in this regard. Each board may have specific policies that differ from these general guidelines.)*

Cheating and irregular or unethical behavior by a candidate before, during, or after a written or oral examination may include:

- Giving or obtaining information or aid
- Looking at others’ test material
- Removing examination materials from the test center and/or reproducing these materials or distributing them to others
- Reconstructing examination questions and answers and transferring this information to others after the examination
- Taking notes
- Bringing electronic devices (beepers, pagers, cell phones, etc) into the examination
- Failing to comply with time limits or instructions
- Talking or other disruptive behavior
- Making telephone calls
- Offering any benefit to an agent of the board in return for any right, privilege, or benefit that is not usually granted by the board to other similarly situated candidates or persons

Any irregular or improper behavior that is observed, made apparent by statistical analysis, or uncovered by other means will be considered a violation of the certification process and may be sufficient to bar a person from qualification, terminate participation in an examination, invalidate the results of a candidate’s examination, cause the withholding or revocation of scores or certificates, or merit other appropriate actions, up to and including legal prosecution. In addition, the candidate may be barred from retaking the examination in the future for a period determined by the board (the orthopaedic surgery board, for example, requires a 5-year hiatus, the psychiatry/neurology board up to 5 years), and the board may inform program director(s), licensing bodies, state and national medical associations and specialty societies, impaired physicians advocacy groups, or law enforcement agencies of these actions.

The materials comprising all board examinations are confidential and are the sole property of the respective board. Any unauthorized reproduction, distribution, or use of any of these materials is prohibited. Boards will prosecute copyright violations to the full extent provided by law and seek monetary damages for any loss of examination materials.

A board may withhold a candidate’s scores and require that the candidate retake one or more portions of an examination if presented with sufficient evidence that the security of the examination has been compromised, notwithstanding the absence of any evidence of the candidate’s personal involvement in such activities.
## Table 4. Residency/Fellowship Leave of Absence Policies of ABMS Certification Boards

<table>
<thead>
<tr>
<th>American Board of</th>
<th>Absences may not exceed</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Allergy and Immunology</td>
<td>2 months over the 24-month allergy/immunology program</td>
<td>Absences should be made up. Program directors who believe that an absence of more than 2 months is justified should send a letter of explanation to the ABAI for review and approval.</td>
</tr>
<tr>
<td>Anesthesiology</td>
<td>60 working days (12 weeks) during the Clinical Anesthesia (CA) 1-3 years of training</td>
<td>If a resident’s absence exceeds the prescribed limits, the total training time will be lengthened to make up for the additional absence. In the event of an absence of 6 months or longer, the board shall determine the number of months of training the resident will have to complete after resuming the residency program to satisfy the training required for admission to the ABA examination system.</td>
</tr>
<tr>
<td>Colon and Rectal Surgery</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Dermatology</td>
<td>6 weeks in any 1 academic year, or a total of 14 weeks over 3 years</td>
<td>Any absence(s) exceeding these limits, including vacation, should be approved only under truly exceptional circumstances. In addition, any resident approved to sit for the certifying examination despite such an absence should have completed each year of training in an above average or excellent manner as recorded on the residency evaluation forms.</td>
</tr>
<tr>
<td>Emergency Medicine</td>
<td>6 weeks in an academic year</td>
<td>Leaves of absence, vacation time, sick time, etc, that exceed 6 weeks in an academic year require extension of the residency program. Such leave time cannot be accrued from year to year. Therefore, the Board defines an acceptable year of training as a minimum of 46 weeks.</td>
</tr>
<tr>
<td>Family Medicine</td>
<td>1 month per academic year</td>
<td>Vacation periods may not accumulate from one year to another. Annual vacations must be taken in the year of the service for which the vacation is granted. No two vacation periods may be concurrent. Absence from residency education, in excess of 1 month within the academic year, must be made up before the resident advances to the next training level and the time must be added to the projected date of completion of the required 36 months of training.</td>
</tr>
<tr>
<td>Internal Medicine</td>
<td>1 month per year</td>
<td>Up to 1 month per academic year is permitted for time away from training, which includes vacation, illness, parental or family leave, or pregnancy-related disabilities. Training must be extended to make up any absences exceeding 1 month per year of training. Vacation leave is essential and should not be forfeited or postponed in any year of training and cannot be used to reduce the total required training period. The ABIM recognizes that leave policies vary from institution to institution and expects the program director to apply local requirements within these guidelines to ensure trainees have completed the requisite period of training.</td>
</tr>
<tr>
<td>Medical Genetics</td>
<td>1 month per year</td>
<td>Residents/fellows may take up to 1 month per year of training for vacation, parental or family leave, or illness (including pregnancy-related disabilities). Training must be extended to make up any absences exceeding 1 month per year of training. Vacation leave is essential and cannot be forfeited.</td>
</tr>
<tr>
<td>Neurological Surgery</td>
<td></td>
<td>Left to the program director’s discretion and state regulations, as long as ABNS training requirements for certification are met.</td>
</tr>
<tr>
<td>Nuclear Medicine</td>
<td>6 weeks per year</td>
<td>A resident may have a total of 6 weeks per year leave of absence for any cause, including vacation and pregnancy. Any more time must be made up for the resident to be accepted to take the certifying examination.</td>
</tr>
<tr>
<td>Obstetrics and Gynecology</td>
<td>8 weeks in any of the first 3 years of GME, or 6 weeks during the fourth year of GME, or a total of 20 weeks over the 4 years of residency</td>
<td>If a resident’s absence exceeds the prescribed limits, the total training time will be lengthened to make up for the additional absence.</td>
</tr>
<tr>
<td>Ophthalmology</td>
<td></td>
<td>Left to the program director’s discretion and state regulations, as long as ABO training requirements for certification are met.</td>
</tr>
<tr>
<td>Orthopaedic Surgery</td>
<td>6 weeks per year</td>
<td></td>
</tr>
<tr>
<td>Otolaryngology</td>
<td>6 weeks per year</td>
<td>If a resident’s absence exceeds the 6-week per year limit, the program director must submit a plan to the ABOto for approval on how the training will be made up, which may require an extension of the residency. If a longer leave of absence is granted in any year, the required period of GME may be extended accordingly.</td>
</tr>
<tr>
<td>American Board of</td>
<td>Absences may not exceed</td>
<td>Notes</td>
</tr>
<tr>
<td>------------------</td>
<td>------------------------</td>
<td>-------</td>
</tr>
<tr>
<td>Pathology</td>
<td>4 weeks per year</td>
<td>One year of approved training credit toward ABP certification must be 52 weeks in duration, and the resident must document an average of 48 weeks per year of full-time pathology training over the course of the training program. Any additional leave must be made up.</td>
</tr>
<tr>
<td>Pediatrics</td>
<td>1 month per year (3 months during 3 years of training)</td>
<td>Standard training for residency and fellowship is 36 months. For general pediatrics, 33 months of clinical training are required. Absences greater than 3 months during the 3 years of training should be made up by additional periods of training. A program director who believes that the candidate is well qualified and has met all the training requirements may submit a petition to the ABP requesting an exemption to the policy. For interruptions greater than 24 continuous months in general pediatrics or 12 months in a subspecialty, a petition by candidate or program director is required. Residents in combined training may not take more than 1 month of leave per year.</td>
</tr>
<tr>
<td>Physical Medicine and Rehabilitation</td>
<td>6 weeks (30 working days) per year</td>
<td>Leave time beyond 6 weeks would need to be made up by arrangement with the program director.</td>
</tr>
<tr>
<td>Plastic Surgery</td>
<td>4 weeks per year</td>
<td>The minimum acceptable residency year must include at least 48 weeks of full-time clinical training experience. A leave of absence during training will not be included toward completion of the 48-week requirement. This includes military leave and maternity/paternity leave.</td>
</tr>
<tr>
<td>Preventive Medicine</td>
<td>A training or experience year must consist of a minimum of 48 weeks of active service. In the event of maternity leave, an additional 2-week absence from a training year is permissible. Longer authorized interruptions in training periods, with documentation of conformance with approved policies on parental leave, are accepted as determined on an individual case basis provided the combined time to be credited includes at least 48 weeks of on-duty training within an overall period of 2 years.</td>
<td></td>
</tr>
<tr>
<td>Psychiatry and Neurology</td>
<td>Training may be completed on a part-time basis, provided that it is no less than half time. Programs may schedule individual leave or vacation time for residents in accordance with the overall institutional policy. Leave or vacation time may not be used to reduce the total amount of required residency training or to make up deficiencies in training. The 36 months of full-time, specialized residency training must be completed in no more than two blocks. If completed in two blocks, the blocks must not be more than 10 years apart.</td>
<td></td>
</tr>
<tr>
<td>Radiology</td>
<td>Diagnostic radiology: 6 calendar weeks (30 working days) per year</td>
<td>For documented medical problems or maternity leave, the ABS will accept 46 weeks of surgical training in 1 of the first 3 years of residency and 46 weeks of training in 1 of the last 2 years, for a total of 142 weeks in the first 3 years and 94 weeks in the last 2 years. Unused vacation or leave time may be applied only with written permission from the ABS. Programs also have the option, with advance approval of the ABS, of allowing residents to complete their five years of training over six years. All training must be full-time and completed at a single program, with no block of training shorter than one month.</td>
</tr>
<tr>
<td>Surgery</td>
<td>8 weeks for documented medical problems or maternity leave (see Notes)</td>
<td>Left to the program director’s and the medical institution’s discretion and state regulations, as long as ABTS training requirements for certification are met.</td>
</tr>
<tr>
<td>Thoracic Surgery</td>
<td>Left to the program director’s and the medical institution’s discretion and state regulations, as long as ABTS training requirements for certification are met.</td>
<td></td>
</tr>
<tr>
<td>Urology</td>
<td>6 weeks per year</td>
<td>Each program may provide sick leave and vacation leave for the resident in accordance with institutional policy. Residents must work 46 weeks each year of residency; that is, one year of credit must include at least 46 weeks of full-time urologic education. Vacation or leave time may not be accumulated to reduce the total training requirement. If a circumstance occurs in which a resident does not work the required 46 weeks in one year, the program director must submit a plan to the ABU for approval on how the training will be made up, which may require an extension of the residency.</td>

No applications will be accepted 30 days after the close of registration.

#### Maintenance of Certification

- **Professional Standing**
  - Maintain an unrestricted medical license
  - Maintain current and accurate demographic and contact information
  - Remit annual MOC fee

- **Lifelong Learning and Self-Assessment**
  - Submit proof of 25 allergy/immunology CME credits from accredited organizations each year
  - Complete the Recent Advances module (sponsored by ABAI) every five years.
  - Complete a Communication module (sponsored by ABIM) every ten years.
  - Complete a Patient Safety module (sponsored by ABMS) every ten years.

- **Cognitive Expertise**
  - MOC candidates must attain an absolute minimum score on the Final Examination. The exam, administered annually via computer at test centers across the nation, focuses on clinical science items that can be answered correctly based on clinical experience, without reference to textbooks or journals.

- **Practice Improvement**
  - Complete a practice improvement module every five years; accepted modules are listed on the ABAI web site.

- October 29 – November 12, 2011: CCM Recertification Examination date
- October 29 – November 12, 2011: PM Recertification Examination date

### Hospice and Palliative Medicine Certification Examination

**2010 Examination**
- February 1, 2010: Application cycle begins
- March 31, 2010: Standard application deadline
- April 15, 2010: Late application deadline
- May 15, 2010: Decision deadline

### Maintenance of Certification

**CME requirement**
- 350 CME credits: At least 250 credits must be ACCME-approved Category 1 credits; the ABA will grant at most 70 credits for CME programs and activities completed in the same calendar year.

All newly certified diplomates and non-time limited diplomates who enter the MOCA program after January 1, 2008, are required to complete 80 Category 1 credits of either the American Society of Anesthesiologists’ (ASA) Self-Education and Evaluation (SEE) program and/or the ASA’s Anesthesiology Continuing Education (ACE) program during their 10-year MOCA cycle.

All newly certified diplomates and non-time limited diplomates who enter the MOCA program after January 1, 2010, are required to complete 90 Category 1 credits of the ASA’s SEE and/or ACE program during their 10-year MOCA cycle.

All newly certified diplomates and non-time limited diplomates who enter the MOCA program after January 1, 2008, are required to complete 20 Category 1 credits of Patient Safety CME during their 18-year MOCA cycle.

**Lifelong learning and self-assessment requirements**
- The ABA will grant at most 70 LLSA credits for all CME activities completed in a single calendar year. Thus, MOCA candidates will have to complete some LLSA activity in at least five years of each 10-year MOCA cycle.

**Cognitive expertise/examination requirements**
- Candidates may satisfy the examination requirement no earlier than the 7th year of their 10-year MOC cycle. To be eligible for examination, completion of at least 200 LLSA credits and one of the two required Practice Performance Assessments and Improvement Activities is required.

**Practice performance assessment**
- Diplomates should be continually engaged in a self-directed program of practice performance assessment and improvement (PPAI). For MOC, the PPAI process consists of case evaluation and simulation education.

Diplomates must complete the two PPAI activities over their 10-year MOCA cycle. Diplomates must complete at least one of the two activities in each of the following segments of their MOCA cycle: Years 1-5 and 6-10. Each activity must be completed at least once in the diplomate’s 10-year cycle.

**Notes**
- MOC program began in 2004; recertification program ended in 2009.
American Board of Colon and Rectal Surgery
20600 Eureka Rd, Suite 600
Taylor, MI 48180
(734) 282-9400
(734) 282-9402 Fax
E-mail: admin@abcrs.org
www.abcrs.org

Application for Examination
Each candidate for examination must complete and submit an Application for Examination, which may be accessed on the ABCRS Web site at www.abcrs.org.

As part of the application process, residents must submit a list of all operative procedures performed during their training period. Case log reporting is completed using the electronic software provided by the Accreditation Council for Graduate Medical Education (ACGME). Login instructions and deadline dates are accessible through the ACGME web site at www.acgme.org. The American Board of Colon and Rectal Surgery will obtain the information directly from the ACGME.

Examination Schedule
Applications for the 2011 certification process must be completed and returned at the conclusion of training according to the schedule below:

Maintenance of Certification

CME requirement

| Lifelong learning and self-assessment requirements | The Lifelong Learning and Self-Assessment (LLSA) component includes an annual set of readings to guide participants in self study of recent emergency medicine literature. Each year, the ABEM will offer an open-book, unproctored LLSA test to help reinforce what physicians learn from the readings. LLSA tests prior to 2009 consist of 32 to 40 test questions based on the annual readings. Beginning in 2009, LLSA tests consist of 20 to 30 questions. |
| Cognitive expertise/examination requirements | The Continuous Certification (ConCert) examination, a secure examination administered at testing centers in the United States and Canada, takes approximately 5 hours to complete and focuses on what the practicing emergency physician needs to know when treating patients. |
| Practice performance assessment | Diplomates who are clinically active will be required to attest to ABEM twice during a 10-year certification period that they have participated in an acceptable patient care practice improvement (PI) program at a national, regional, or local level and once that they have participated in a communication/professionalism feedback program. Diplomates will be required to attest that their own clinical practice data and patient feedback data are included in their APP activities. Data that is reported back at either an individual or a group level will be appropriate. |
| Notes | MOC program began in 2004. |

<td></td>
</tr>
</tbody>
</table>

| Cognitive expertise/examination requirements | Diplomates must earn at least 20 of the required 100 self-assessment points for Maintenance of Certification in the Self-Evaluation of Practice Performance category. ABIM offers a Web-based tool to fulfill this requirement—the ABIM PIM Practice Improvement Module®️, which enables physicians to conduct a confidential self-evaluation of the medical care that they provide. PIMs help physicians gain knowledge about their practices through analysis of practice data and the development and implementation of a plan to target areas for improvement. |

| Practice performance assessment | The ABIM secure exam is a computer-based multiple choice examination (single best answer format) which takes approximately 8 hours to complete. The exam stresses clinical decision-making, using patient-based case scenarios. |

| Notes | MOC program began in 2006. All ABIM certificates issued in 1990 (1987 for critical care medicine and 1988 for geriatric medicine) and thereafter are valid for 10 years. |
## American Board of Neurological Surgery

</thead>
<tbody>
<tr>
<td>March 13</td>
<td>March 12</td>
</tr>
</tbody>
</table>
| MOC Cognitive Examination at all residency programs  
| November 9-12 | November 8-11 |
| Oral examination (Houston, Texas)  
| May 18-21   | May 3-6    |
| Primary Examination at all residency programs  
| May 18-21   | May 3-6    |
| Oral examination (Houston, Texas)  
| March 13   | March 12   |

### Maintenance of Certification

- **CME requirement**: 150 CME credits every 3 years, including a minimum of 60 Category 1 ACCME-approved neurosurgical credits. The remaining 90 may be Category 1 or other; 30 of those may be nonneurosurgical.

- **Lifelong learning and self-assessment requirements**
  - Every 3 years, take the Web-based educational Self-Assessment in Neurological Surgery (SANS) examination developed and administered by the Congress of Neurological Surgeons.
  - CME credits (see above)

- **Knowledge: Cognitive expertise/examination requirements**
  - Secure, proctored, Web-based examination given each March at neurosurgical residency programs. Consists of 200 clinically oriented questions; 150 items are General Neurosurgery; three different modules are offered for the other 50: (1) More general neurosurgery, (2) Complex spine surgery, (3) Pediatric neurosurgery. Taken once each 10 years.

- **Practice performance assessment**
  - Select a Key Case from the ABNS list of procedures covering the subspecialties, and log the details of 10 consecutive patients with their problem.
  - Assessment of physician/patient communication (not yet available).
  - SANS (see above)
  - All three repeated every 3 years.

- **Professionalism**
  - Chief of Staff Questionnaire covering professionalism, communication skills, and participation in systems-based practice.
  - Unrestricted license
  - Hospital privileges

## American Board of Nuclear Medicine

### Address
4555 Forest Park Boulevard, Suite 119  
St Louis, MO 63108  
(314) 367-2225  
E-mail: abnm@abnm.org

### 2010 Certification and Maintenance of Certification Exams

#### Important Dates and Deadlines

- **October 4-8, 2009**: Examination dates  
- **April 1 – May 31, 2010**: Application period  
- **May 31**: Deadline for completing and submitting online application, receipt of supporting documents, and payment of processing fee  
- **May 31**: No applications accepted after midnight (EST)  
- **July 15**: Deadline for paying balance of all fees

#### Late fees:
- Payments received after **July 15** will be assessed a late fee  
- Applications not paid in full by **July 31, 2010**, will be rejected, and no fees (including late fees) will be refunded

### Maintenance of Certification

- **CME requirement**: 50 CME credits every year, of which 25 must be Category 1 (including 8 Category 1 CME credits from ABNM-approved self-assessment modules); 70% of Category 1 credit must be in nuclear medicine (17.5 credits)

- **Lifelong learning and self-assessment requirements**
  - Each diplomate must obtain a minimum of eight self-assessment credits per year.

- **Cognitive expertise/examination requirements**
  - The examination contains questions on fundamental knowledge, up-to-date practice-related knowledge, and issues such as patient safety.

- **Practice performance assessment**
  - Applicants must demonstrate evidence of evaluation of performance in practice. The focus of these evaluations includes (1) patient safety, (2) accuracy of interpretation, (3) report turnaround time, (4) practice guidelines and technical standards, and (5) referring physician surveys.

### Notes
- MOC program began in 2007.

II. Practice

A. First year of practice
   - No board activities necessary

B. Second year of practice
   - July 1 – June 30
     - Patient case list
   - February to March
     - Apply for general oral examination

C. Third year of practice
   - August
     - Deadline for submission of patient list
   - November, December, or January
     - Take general oral examination

III. Fellowship in Subspecialty

A. First year (fellowship) (July 1-June 30)
   - No board activities

B. Second year (fellowship) (July 1-June 30)
   - No general board activities

C. Third year (fellowship) (July 1-June 30)
   - September to November
     - Apply for subspecialty written examination
   - June
     - Take subspecialty written examination

D. Fourth year—First year of practice (July 1-June 30)
   - February to March
     - Patient case list
   - Apply for the general oral examination

E. Fifth year—Second year of practice (July 1-June 30)
   - August
     - Deadline for submission of patient list for general oral examination
   - November, December, or January
     - Take general oral examination
   - May
     - Apply for subspecialty oral examination

Maintenance of Certification

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CME requirement</td>
<td>An average of 30 ACCME-approved Category 1 CME credits per year as of the date of certification and throughout the 10-year MOC cycle, with 3 CME credits in ethics.</td>
</tr>
<tr>
<td>Lifelong learning and self-assessment requirements</td>
<td>The Periodic Ophthalmic Review Tests (PORT) are a series of 50-item, online self-review tests in core ophthalmic knowledge and 10 Practice Emphasis Areas (PEAs). Two PORTs are required: one in core knowledge and one in a PEA of choice.</td>
</tr>
<tr>
<td>Cognitive expertise/examination requirements</td>
<td>The Demonstration of Ophthalmic Cognitive Knowledge (DOCK) Examination is required for completion of MOC. DOCK is a secure, proctored, 150-item computer-based examination administered at approximately 250 test centers for a period of 1 month each September; it consists of three 50-item modules, one in core ophthalmic knowledge and two in Practice Emphasis Areas (PEAs) of choice.</td>
</tr>
<tr>
<td>Practice performance assessment</td>
<td>The Office Record Review (ORR) is an online self-review of clinical practice in which a diplomate reviews 15 current patient charts; it consists of over 35 ophthalmic diagnoses with specific criteria. The self-review of patient charts via ORR modules is meant to assess the quality of practice through verification of the documentation of appropriate measurements, diagnosis, management, treatment, and follow-up.</td>

### Notes

- MOC program began in 2002.
American Board of Pathology
PO Box 25915
Tampa, FL 33622-5915
(813) 286-2444
(813) 286-5279 Fax
www.abpath.org

Examination Dates
All examinations are computer based and are administered at the ABP Examination Center in Tampa, Florida.

Anatomic Pathology and Clinical Pathology Examinations
The Spring 2010 primary examinations will begin on Monday, May 17, and will continue until all qualified, registered candidates have been examined. Individuals applying for the Spring primary certification examinations must complete their training by November 1 of the year of application.

The Fall 2010 primary examinations will begin on Monday, October 1, and will continue until all qualified, registered candidates have been examined. Individuals applying for the Fall primary certification examinations must complete their training by July 1 of the year of application.

Subspecialty Examinations
The subspecialty examinations in chemical pathology, medical microbiology, molecular genetic pathology, neuropathology, and pediatric pathology are given every 2 years. Individuals applying for the Fall primary certification examinations must complete their training by October 1 of the year of application.

Blood Banking/Transfusion Medicine September 7
Cytopathology September 13-15
Dermatopathology September 1-2
Forensic Pathology September 16
Hematology September 20-22

Depending on the number of candidates, it may be necessary to give certain subspecialty examinations on multiple days. In that case, each candidate will be notified of his or her examination date at least 6 weeks prior to the examination date listed.

Final Filing and Cutoff Dates
The final filing dates for receipt of applications or registrations are as follows:

<table>
<thead>
<tr>
<th>Date</th>
<th>Event Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>January 15</td>
<td>Spring primary examinations</td>
</tr>
<tr>
<td>May 1</td>
<td>Fall primary examinations for initial applicants</td>
</tr>
<tr>
<td>August 15</td>
<td>Fall primary examinations for those who have been declared qualified by ABP</td>
</tr>
<tr>
<td>May 1</td>
<td>Subspecialty examinations</td>
</tr>
</tbody>
</table>

Notes
Inability to accept the date assignment (primary certification applicants only). Once examination date assignments are mailed, candidates for the primary certification examination have 4 weeks from notification of their assignment to accept. These candidates may request a transfer to a future examination, in which case the examination fee, minus a $500 transfer fee, will be applied to that examination. There will be an additional $500 fee assessed for any additional transfer of examination dates. There is no opportunity to change the assignment within a given examination period. If the ABP is not notified within the 4-week period, the assignment will stand.

It is the candidate’s responsibility to notify the ABP in writing of any change that may affect a scheduled examination.

Maintenance of Certification

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>CME requirement</td>
<td>An average of 35 Category 1 CME credits per year for each two-year period in the MOC cycle; ten of these credits must be obtained from completion of self-assessment modules (SAMs), and 80% of the CME must be directly related to the diplomate’s practice. The remainder may be in relevant areas, such as administration or ethics.</td>
</tr>
<tr>
<td>Lifetime learning and self-assessment requirements</td>
<td>—</td>
</tr>
<tr>
<td>Cognitive expertise/examination requirements</td>
<td>The examination will be a closed-book assessment based on knowledge that a competent practitioner would be expected to possess without access to reference material. Initially, the examination will be given in the ABP Examination Center in Tampa; if future technology permits assurance of examination security, the ABP anticipates administering its computer-based examinations in regional computer testing centers.</td>
</tr>
<tr>
<td>Practice performance assessment</td>
<td>At the beginning of the fourth and eighth years of each certification period, diplomates must supply four references who can attest to their ability and effectiveness in practice. In addition, each diplomate must document (1) the participation of his/her laboratory in inter-laboratory performance improvement and assessment activities and (2) individual participation in at least one practice improvement and quality assurance activity or program per year. Documentation of both laboratory and individual participation in practice improvement and quality assurance activities must be provided at the end of each 2-year period of the MOC cycle.</td>
</tr>
<tr>
<td>Notes</td>
<td>Participation in an ACGME-accredited fellowship during 1 full year of any 2-year period will cover all MOC Part II and Part IV requirements for that period.</td>
</tr>

2010 Examinations Schedule
The fees for certification in general pediatrics and the pediatric subspecialties are payable only in US dollars. Application payment for both first-time applicants and re-registrants is required using either a VISA or MasterCard credit card. The American Board of Pediatrics (ABP) reserves the right to make changes in its fees, policies, and procedures at any time and will make every effort to give advance notice when such changes are made. It is the applicant’s responsibility to be aware of and to meet all deadlines. All applications must be submitted online.

Certification in the Pediatric Subspecialties
The ABP issues a certificate of special qualifications in the following subspecialties:
- Adolescent medicine
- Child abuse pediatrics
- Pediatric cardiology
- Pediatric critical care medicine
- Developmental-behavioral pediatrics
- Pediatric emergency medicine
- Pediatric endocrinology
- Pediatric gastrointestinal
- Pediatric hematology-oncology
- Pediatric infectious diseases
- Neonatal-perinatal medicine
- Pediatric nephrology
- Pediatric pulmonology
- Pediatric rheumatology
- The ABP, in collaboration with other ABMS boards, also offers a certificate of added qualifications in the following fields: (Note: Physicians must submit an application to the board through which they are certified.)
  - Hospice and palliative medicine
  - Medical toxicology
  - Neurodevelopmental disabilities
  - Pediatric transplant hepatology
  - Sleep medicine
  - Sports medicine

</thead>
<tbody>
<tr>
<td>Lifelong learning and self-assessment requirements</td>
<td>Those with General Pediatric certifications carrying an expiration date are required to complete two self-assessment activities prior to the certificate expiration date. Subspecialty certifications carrying an expiration date are required to complete one self-assessment activity prior to the certificate expiration date. Those with ABP certifications issued after 1/1/2010 are required to earn 40 Part 2 Self-assessment points (and 20 Part 2 Self-assessment or Part 4 Practice Performance elective points) in every five-year cycle.</td>
</tr>
<tr>
<td>Cognitive expertise/examination requirements</td>
<td>Part 3 of MOC consists of a secure examination administered at testing centers throughout the US and elsewhere. Approximately 200 questions are included in this half-day, closed-book examination. Successful completion of this examination is required every 10 years.</td>
</tr>
<tr>
<td>Practice performance assessment</td>
<td>Those with ABP certifications carrying an expiration date are required to complete one Patient Survey activity and one Practice Performance activity prior to certificate expiration. Those with ABP certifications issued after 1/1/2010 are required to complete one Patient Survey activity and earn 40 Part 4 Practice Performance points (and 20 Part 2 Self-assessment or Part 4 Practice Performance elective points) in every five-year cycle.</td>
</tr>
</tbody>
</table>

### Notes
Diplomates are not required to maintain their general pediatric certificates to maintain certification in a subspecialty.

---

**American Board of Physical Medicine and Rehabilitation**

3015 Allegro Park Lane SW
Rochester, MN 55902-4139
(507) 282-1776
Fax: (507) 282-9242
E-mail: office@abpmr.org
www.abpmr.org

### Deadlines
The appropriate fees must be postmarked and mailed and the completed application materials for admissibility must be submitted online by January 31 (Part I) or November 15 (Part II) preceding the scheduled examination. This applies to initial applications or reapplications.

An additional $500 nonrefundable late fee will be required for consideration of applications postmarked between February 1 and February 28 (Part I) or November 16 and December 15 (Part II). Applications submitted after February 28 (Part I) or December 16 (Part II) will not be accepted. The postmark applied by the United States Postal Service (or the appropriate national postal service for non-US citizens) is the date of mailing and takes precedence over postmarks applied by in-house mailing equipment.

### Fees
Refer to the Booklet of Information at the ABPMR web site for the current fees.

<table>
<thead>
<tr>
<th>Part</th>
<th>Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>$1,375, $600 of which is an application processing fee and is not refundable.</td>
</tr>
<tr>
<td>II</td>
<td>$1,870, $600 of which is an application processing fee and is not refundable.</td>
</tr>
</tbody>
</table>

**Late Fee**
An additional nonrefundable $500 is required after the January 31 deadline for Part I and after the November 15 deadline for Part II.

**Reapplication**
Physicians who have initially applied for and failed or did not take either Part I or Part II can apply for admissibility for re-examination or examination during any subsequent examination period. The same requirements will be in effect for reapplication as for initial admissibility. Currently, there is no limit to the number of times a physician may reapply for examinations.

### Refunds and Forfeiture of Fees
Except as hereafter provided, no fees paid will be refunded. The board will return the refundable portion of the fee only in the event that:
- an applicant withdraws the application prior to the meeting of the board to act thereon, or
- an applicant is declared not admissible to the examination.

Once an applicant has been declared admissible and is a candidate, the fees will be forfeited if the candidate withdraws for any reason, or does not appear for the scheduled examination for which he or she applied.

### Dual Specialty Certification
Residents may elect to pursue integrated training in physical medicine and rehabilitation (PM&R) and another specialty by enrolling...
in a combined training program. The ABPMR currently approves two types of combined training:
- Pediatrics and PM&R
- Internal medicine and PM&R
All three programs require completion of at least 36 months of accredited training in general comprehensive PM&R.

Subspecialty Certification

Hospice and Palliative Medicine
Applications are available on the ABPMR web site after December 1, and completed applications are due by February 15, of the year the examination will be given.

Neuromuscular Medicine
Applications are available on the ABPMR web site after December 1, and completed applications are due by February 15, of the year the examination will be given.

Pain Medicine
Applications are available on the ABPMR web site after January 1, and completed applications are due by February 15, of the year the examination will be given.

Pediatric Rehabilitation Medicine
Applications are available on the ABPMR web site after February 1, and completed applications are due by March 15, of the year in which the exam will be taken.

Spinal Cord Injury (SCI) Medicine
Applications are available on the ABPMR web site after February 1, and completed applications are due by March 15, of the year the examination will be given.

Sports Medicine
Applications are available on the ABPMR web site after December 1, and completed applications are due by February 15, of the year the examination will be given.

</tbody>
</table>
All fees must be submitted in United States currency by check or money order. Foreign currencies, including Canadian, are unacceptable. Credit Cards are required for all online processes. Fees are subject to change by the board. Most fees are nonrefundable.

**Diplomate Annual Dues (Lifetime Certificate Holders): $200**

An annual dues fee was initiated in 1999. The board office sends out announcements annually. Retired diplomates are excluded from the annual dues request.

**Refunds**

For the written examination, a refund of the examination fee (less a processing charge of $700) will be granted provided the candidate submits a written request for withdrawal received in the board office at least 30 calendar days prior to the date of the examination.

For the oral examination, a refund of the examination fee (less a processing charge of $700) will be granted provided the candidate submits a written request for withdrawal received in the board office at least 30 calendar days prior to the date of the examination. For either the written or oral examination, candidates who notify the board office in writing less than 30 calendar days prior to the examination date of their intent to withdraw, or who fail to appear for examination, will forfeit the entire examination fee. The board may waive this rule only if the circumstances warrant.

Fees
A nonrefundable application fee of $410 is required if the applicant holds an MPH or equivalent masters or doctoral post-graduate degree and has completed an ACGME-accredited residency in the specialty area of preventive medicine in which certification is sought.
A nonrefundable application fee of $590 is required if the applicant is applying through the special pathway for ABPM diplomates.
A late fee will be charged to all applications received after June 1. A list of late fee charges is available on the ABPM Web site at www.theabpm.org.
A nonrefundable re-review fee of $190 is required to reactivate an application within 2 years of the original review.
The examination fee of $1,750 is due with the application fee.

Fees for the Subspecialty of Medical Toxicology
The next offering of Medical Toxicology will be in 2010. Fees are to be determined.

Fees for the Subspecialty of Undersea and Hyperbaric Medicine
A nonrefundable application fee of $385 is required if the applicant is applying through the fellowship pathway ($855 if applying through the practice pathway).
The examination fee of $1,750 is due with the application fee.

Note: All fees are reviewed annually and are subject to change at the direction of the board. Please contact the board office for the current fee schedule.

Important Dates

| June 1 | Deadline for completed application forms, application fees, and reapplication requests to be received in the board office for the examination |
| June 1 | Deadline for receipt of re-review requests and fees |
| July 15 | Deadline for receipt of additional information not included with the June 1 application |
| August 1 | Deadline for completion of all requirements for alternative and special pathway applicants to sit for the examination |
| August | Meeting of the board to determine admissibility of applicants to the examination. Letters of notification of admissibility for the examination are sent by email to candidates after the August board meeting. Notification is not given by telephone. |

Special Requirements in Aerospace Medicine, Occupational Medicine, and Public Health and General Preventive Medicine
A period of not less than 2 years of supervised training and instruction, accredited by the ACGME in the specialty area for which certification is being sought, is required.

Subspecialties
Medical Toxicology
Every 2 years, the ABPM offers subspecialty certification in medical toxicology to ABPM diplomates who meet the appropriate requirements for medical toxicology. Applications for the 2010 examination cycle will be available from the board office beginning in January 2010 and will be accepted with postmark dates through May 1.
Undersea and Hyperbaric Medicine
ABPM offers subspecialty certification in undersea and hyperbaric medicine in late fall each year to physicians who hold current certification by one of the ABMS member boards and meet the appropriate requirements in undersea and hyperbaric medicine. The American Board of Emergency Medicine (ABEM) also offers subspecialty certification in undersea and hyperbaric medicine. Those physicians certified only by the ABEM must apply through that board.

Maintenance of Certification

| CME requirement | 45 hours of Category 1 ACCME-approved CME every 3 years |
| Lifelong learning and self-assessment requirements | 30 hours of ABPM-approved LLSA activities every 3 years |
| Cognitive expertise/examination requirements | Diplomates may begin taking the multiple-choice, proctored examination 7 years after receiving initial certification and may repeat the examination if necessary to pass it prior to expiration of their certificate. |
| Practice performance assessment | This component employs a quality improvement model with opportunities for assessing practice performance and improvement activities available in clinical practice, teaching, research, and administration. |

Notes
MOC program is Enhancing Professional Improvement and Quality (EPIQ).

Most documents are available as .pdf files that can be downloaded and printed.

### Maintenance of Certification

#### CME requirement
Completion of an average of 30 specialty or subspecialty Category 1 CME credits per year over the 10-year MOC cycle; further, credits must be relevant to the specialty in which the diplomate is certified. Diplomates certified in more than one area need only accrue an average of 30 CME credits per year, as the same CME credits can be used to satisfy the MOC requirements for multiple specialties and subspecialties. Completion of 150 specialty- or subspecialty-specific Category 1 CME credits in each of the two 5-year blocks of the 10-year MOC cycle, for a total of 300 CME credits. An average of at least 8 of the CME credits per year (averaged over 2-5 years) should involve self-assessment.

#### Lifelong learning and self-assessment requirements
Participation in at least two major, broad-based self-assessment programs during the 10-year MOC cycle, to be completed in years 1-3 of the first 5-year block of the cycle and years 6-8 of the second 5-year block. The self-assessment activities must cover new knowledge and/or current best practices in one or more of the competency areas and provide feedback to the diplomat that can be used as the basis for focused CME, lifelong learning, and/or career development. That feedback must include the correct answer and recommended literature resources for each question and comparative performance to peers.

#### Cognitive expertise/examination requirements
Multiple-choice, computer-based examinations administered at testing centers nationwide. MOC cognitive examinations differ from the initial certification examinations in that they are practice-relevant and focus on the clinical applications of knowledge. To prepare for the examinations, a diplomate should keep current with research and developments in the respective field, read specialty-specific journals and practice guidelines, and attend relevant CME programs.

#### Practice performance assessment
The Performance in Practice (PIP) component is a quality improvement program designed to evaluate whether physicians have shown practice improvement over the 10-year MOC cycle by chart review and second-party external review. Diplomates will be required to complete three PIP Units consisting of both modules in years 1-3, 4-6, and 7-9 of the 10-year cycle.

### Notes
Diplomates with certificates in addiction psychiatry, clinical neurophysiology, epilepsy (2011), forensic psychiatry, geriatric psychiatry, hospice and palliative medicine, neuromuscular medicine, pain medicine, psychosomatic medicine, sleep medicine, or vascular neurology must also maintain certification in their specialty to apply for MOC in the area of subspecialization. Diplomates in neurodevelopmental disabilities must maintain certification in neurology with special qualification in child neurology. If certification in the specialty lapses, certification in the subspecialty is no longer valid. Diplomates in child and adolescent psychiatry do not need to maintain current certification in general psychiatry for their subspecialty certification to remain valid and to maintain certification in child and adolescent psychiatry.

Diplomates in neurodevelopmental disabilities must maintain certification in neurology with special qualification in child neurology. If certification in the specialty lapses, certification in the subspecialty is no longer valid. Diplomates in child and adolescent psychiatry do not need to maintain current certification in general psychiatry for their subspecialty certification to remain valid and to maintain certification in child and adolescent psychiatry.

Diplomates in child and adolescent psychiatry do not need to maintain current certification in general psychiatry for their subspecialty certification to remain valid and to maintain certification in child and adolescent psychiatry.
American Board of Radiology
5441 E Williams Circle, Suite 200
Tucson, AZ 85711
(520) 790-2900
(520) 790-3200 Fax
E-mail: information@theabr.org

Note: Refer to the American Board of Radiology web site (www.theabr.org) for more details or changes.

Registration Form Deadlines and Exam Information

Key Dates for Initial Certification: Radiation Oncology, Radiologic Physics, and Diagnostic Radiology

Oral Examinations, Louisville, KY May 23-26, 2010
Submission of Registration Forms (to be eligible for Initial Qualification Exam for the following year) July 1 – September 30, 2010
Initial Qualification Exams administered at Pearson VUE testing centers July 8-9, 2010 (Radiation Oncology)
August 30-31, 2010 (Radiologic Physics)
September 9-10, 2010 (Diagnostic Radiology)

Diagnostic Radiology Subspecialties: Key Dates for Initial Certification

Oral Examinations, Louisville, KY November 7-8, 2010
Submission of Registration Forms February 1 - April 30, 2010

Note: Diagnostic radiology subspecialties include hospice and palliative medicine, neuroradiology, nuclear radiology, pediatric radiology, and vascular and interventional radiology.

The exam for hospice and palliative medicine is administered every other year. The next exam will be given in October 2010 (exact date TBA). Registration is March 1 – May 1, 2010.

Maintenance of Certification

| CME requirement | A minimum of 250 ACCME-accredited Category 1 CME credits over the 10-year cycle |
| Lifelong learning and self-assessment requirements | Self-assessment modules (SAMs) are educational venues (eg, refresher courses, workshops, reading assignments, online offerings), usually offered by the societies that have been ABR-qualified. All SAMs are also qualified as Category 1 CME and can serve to fill that requirement as well. |
| Cognitive expertise/examination requirements | Completion of a computer-based examination within the last 3 years of the 10-year MOC cycle. |
| Practice performance assessment | All diplomates must participate in Practice Quality Improvement (PQI) initiatives on an ongoing basis. PQI initiatives should (1) be relevant to your practice; (2) be achievable in your practice setting; (3) produce results that are suited to repeat measurement during your MOC cycle; and (4) be reasonably expected to bring about quality improvement. |

Notes: The ABR certifies diplomates in diagnostic radiology, radiation oncology, and radiologic physics. Despite having a common structure, requirements vary for the three disciplines. For more information, see www.theabr.org.
American Board of Surgery
1617 John F Kennedy Boulevard, Suite 860
Philadelphia, PA 19103-1847

Maintenance of Certification

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Professional standing</td>
<td>In addition to a full and unrestricted medical license, a diplomate must maintain hospital admitting and operating privileges in the specialty and periodically submit the name of hospital references—the chief of surgery and chair of credentialing/privileges committee at the institution where most work is performed.</td>
</tr>
<tr>
<td>CME requirement</td>
<td>A minimum of 30 credits of Category 1 and 50 credits overall of CME, to be performed yearly</td>
</tr>
<tr>
<td>Lifelong learning and self-assessment requirements</td>
<td>Over the course of 3 years, one third of Category 1 CME must include a self-assessment activity (written question-and-answer exercise).</td>
</tr>
<tr>
<td>Cognitive expertise/examination requirements</td>
<td>Successful completion of a secure examination at 10-year intervals; diplomates may take the examination starting 3 years prior to certificate expiration. An application and 12-month operative log are required. For diplomates who hold more than one certificate, this is the only requirement which must be repeated for each specialty.</td>
</tr>
<tr>
<td>Practice performance assessment</td>
<td>Participation is required in a national, regional, or local surgical outcomes database or quality assessment program (the CMS Physician Quality Reporting Initiative [PQRI] or ACS case log system meets this requirement). Periodic communication skills assessment based on patient feedback will also be required, but this is not yet finalized.</td>
</tr>
<tr>
<td>Notes</td>
<td>MOC takes effect the July 1 following certification or recertification. Diplomates report on their MOC activities every 3 years.</td>
</tr>

<td>$1,500</td>
</tr>
<tr>
<td>Part II reexamination fee</td>
<td>$1,500</td>
</tr>
</tbody>
</table>

Candidates who do not appear for their scheduled examination (Part I or Part II) or who cancel less than 6 weeks prior to either examination, may forfeit their examination fee.
## Maintenance of Certification

<table>
<thead>
<tr>
<th>CME requirement</th>
<th>150 credits of Category 1 CME in the broad category of cardiothoracic surgery over each 5 year period (an average of 30 credits per year)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lifelong learning and self-assessment requirements</td>
<td>Each diplomate must complete the standard self-assessment exercise (SESATS) 5 years after initial certification and every 10 years thereafter.</td>
</tr>
<tr>
<td>Cognitive expertise/examination requirements</td>
<td>During each 10-year MOC cycle, the diplomate must pass a secure, comprehensive written examination of fundamental and practice-related knowledge. Exam content will be derived from recent editions of SESATS and will include all areas of thoracic surgery.</td>
</tr>
</tbody>
</table>
| Practice performance assessment | • Reference letters—Letters of reference on behalf of the diplomate documenting licensing, hospital privileges, level of clinical activity, and stature within the surgical community will be solicited from responsible members of the staff of the diplomate’s principal hospital.  
• Peer (and patient) evaluation—Once during each 10-year MOC cycle each diplomate will be required to submit the names of at least four physicians familiar with his/her practice who may serve as peer evaluators.  
Outcome data—Diplomate must participate in a national, regional, or state-wide outcomes database. |

| Notes | MOC program began in 2007. |

## American Board of Urology

### Examination Dates for 2010-2011

#### Qualifying (Part 1) Examination

- July 29-30, 2010  
- July 28-29, 2011

#### Certifying (Part 2) Examination

- February 19-20, 2010  
- February 25-26, 2011

All examination dates are subject to change.

## Maintenance of Certification

<table>
<thead>
<tr>
<th>CME requirement</th>
<th>90 CME credits in years 4 and 8-9 of the 10-year cycle</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lifelong learning and self-assessment requirements</td>
<td>Completion of a Practice Assessment Protocol (PAP) is required in years 2, 4, 6, and 8-9 of the 10-year cycle in the diplomate’s area of practice. The PAPs, non-graded learning tools based on current clinical guidelines, involve self-review of a small number of sequential cases in a specific area (eg, evaluation of hematuria, treatment of superficial bladder cancer, etc); a comparison of the diplomate’s evaluation and management of these cases to accepted practice guidelines; and the successful answering of a short series of questions regarding the clinical guidelines.</td>
</tr>
<tr>
<td>Cognitive expertise/examination requirements</td>
<td>Successful completion of a computer-based closed book examination will be required within the 2-year period prior to expiration of the candidate’s certification.</td>
</tr>
<tr>
<td>Practice performance assessment</td>
<td>Completion of a 6-month electronic practice log is required in years 8-9 of the 10-year cycle.</td>
</tr>
<tr>
<td>Notes</td>
<td>MOC program began in 2007.</td>
</tr>

Academic appointment — An appointment to a faculty category (e.g., professor, associate professor, adjunct clinical instructor, etc.) of a degree-granting (e.g., BS, BA, MA, MD, DO, PhD, etc.) school, college, or university.

Accreditation — A voluntary process of evaluation and review based on published standards and following a prescribed process, performed by a non-governmental agency of peers.

Accreditation Council for Graduate Medical Education (ACGME) — An accrediting agency with the mission of improving health care by assessing and advancing the quality of resident physicians' education through accreditation. The ACGME establishes national standards for graduate medical education by which it approves and continually assesses educational programs under its aegis. The ACGME accredits GME programs through its 28 review committees (26 Residency Review Committees, or RRCs, the Transitional Year Review Committee, and the Institutional Review Committee). The ACGME has five member organizations:

- American Board of Medical Specialties
- American Hospital Association
- American Medical Association
- Association of American Medical Colleges
- Council of Medical Specialty Societies

Each member organization nominates four individuals to the ACGME’s Board of Directors. In addition, the Board of Directors includes three public representatives, two resident representatives, and the chair of the Council of Review Committee Chairs. A representative for the federal government also serves on the Board in a non-voting capacity.

Affiliated institution — Term no longer in use by the AMA or ACGME; it has been replaced by “major participating institution.”

American Board of Medical Specialties (ABMS) — The umbrella organization for the 24 approved medical specialty boards in the United States. Established in 1933, the ABMS serves to coordinate the activities of its Member Boards and to provide information to the public, the government, the profession, and its members concerning issues of specialization and certification in medicine. The mission of the ABMS is to maintain and improve the quality of medical care in the United States by assisting the member Boards in their efforts to develop and utilize professional and educational standards for the evaluation and certification of physician specialists. See Appendix B for more information.

Annual Survey of Graduate Medical Education Programs — see “National GME Census.”

At-home call — A call taken from outside the assigned site.

Attending — see “Teaching staff.”

Categorical positions — Positions for residents who remain in a given program or specialty until completion of the total year(s) required for admission to specialty board examination.

Certification — A voluntary process intended to assure the public that a certified medical specialist has successfully completed an approved educational program and an evaluation including an examination process designed to assess the knowledge, experience, and skills requisite to the provision of high-quality patient care in that specialty. Medical specialty boards determine whether candidates have received certification.
appropriate preparation in approved residency training programs in accordance with established educational standards, evaluate candidates with comprehensive examinations, and certify those candidates who have satisfied the board requirements. Physicians who are successful in achieving certification are called diplomates of the respective specialty board. The boards also offer a Maintenance of Certification program for qualified diplomates at intervals of 7 to 10 years. See Appendix B for more information.

Chief resident—A position in the final year of the residency (e.g., surgery) or in the year after the residency is completed (e.g., internal medicine and pediatrics); the individual in this position plays a significant administrative and teaching role in guiding new residents.

Combined specialty programs—Combined training consists of a coherent educational experience in two or more closely related specialties or subspecialty programs (listed below; see Appendix A for more information). The educational plan for combined training is approved by the specialty board of each of the specialties to assure that residents completing combined training are eligible for board certification in each of the component specialties. Each specialty or subspecialty program is separately accredited by the Accreditation Council for Graduate Medical Education (ACGME) through its respective Residency Review Committee (RRC). The duration of combined training is longer than any one of its component specialty programs standing alone, and shorter than all of its component specialty programs together. Current combined specialties are:
- Diagnostic radiology/nuclear medicine/nuclear radiology
- Emergency medicine/family medicine
- Family medicine/preventive medicine
- Internal medicine/dermatology
- Internal medicine/emergency medicine
- Internal medicine/emergency medicine/critical care medicine
- Internal medicine/family medicine
- Internal medicine/medical genetics
- Internal medicine/neurology
- Internal medicine/nuclear medicine
- Internal medicine/physical medicine and rehabilitation
- Internal medicine/preventive medicine
- Internal medicine/psychiatry
- Neurology/diagnostic radiology/neuroradiology
- Neurology/nuclear medicine
- Pediatrics/dermatology
- Pediatrics/emergency medicine
- Pediatrics/medical genetics
- Pediatrics/physical medicine and rehabilitation
- Pediatrics/psychiatry/child and adolescent psychiatry
- Psychiatry/family medicine
- Psychiatry/neurology

Note: Combined internal medicine/pediatrics training initiated June 1, 2007 or after, must be undertaken in combined medicine/pediatrics programs accredited by the ACGME, which are listed in Section III.

Competencies—Specific knowledge, skills, behaviors and attitudes and the appropriate educational experiences required of residents to complete GME programs.

Complement—The maximum number of residents or fellows approved by a Residency Review Committee per year and/or per program based upon availability of adequate resources.

Consortium—A group of healthcare organizations established to pursue joint objectives in patient care, education, research, or other areas. If a consortium is formally established as an ongoing organizational entity with a commitment to graduate medical education, it may serve as a sponsoring institution of one or more GME programs.

Core discipline program—See “General specialty program”

Council on Medical Education—This AMA council formulates policy on medical education by recommending educational policies to the AMA House of Delegates, through the AMA Board of Trustees. The Council is also responsible for recommending the appointment of more than 100 representatives to accrediting bodies and other national organizations.

Designated institutional official (DIO)—An individual at an institution sponsoring or participating in one or more GME programs who has the authority and responsibility for the oversight and administration of GME programs.

Didactic—A type of systematic instruction by means of planned learning experiences, such as conferences or grand rounds.

Duty hours—All clinical and academic activities related to the residency/fellowship program, eg, patient care (both inpatient and outpatient), administrative duties related to patient care, providing for transfer of patient care, time spent in-house during call activities, and scheduled academic assignments such as conferences.

Educational Commission for Foreign Medical Graduates (ECFMG)—A nonprofit organization that assesses the readiness of graduates of foreign medical schools to enter graduate medical education in the United States. ECFMG certification provides assurance to GME program directors, and to the people of the United States, that graduates of foreign medical schools have met minimum standards of eligibility required to enter such programs. Almost all graduates of foreign medical schools must have an ECFMG certificate to participate in GME in the US. This certification does not guarantee that such graduates will be accepted into GME programs in the United States. (For more information on the ECFMG, see Section I.)

Electronic Residency Application Service (ERAS)—A service for medical students/residents through which residency/fellowship applications, letters of recommendation, Medical Student Performance Evaluations (MSPEs), transcripts, and other supporting credentials are transmitted via the Internet from medical schools to residency program directors. For more information about ERAS, a service of the Association of American Medical Colleges (AAMC), consult www.aamc.org/eras or see Section I.

Faculty—Any individuals who have received a formal assignment to teach resident/fellow physicians. At some sites appointment to the medical staff of the hospital constitutes appointment to the faculty.

Fellow (also see “Resident or resident physician” and “Intern”)—A physician in an ACGME-accredited program that is beyond the requirements for eligibility for first board certification in the discipline. Such physicians may also be termed “residents.” The term “fellow” may require modifiers for precision and clarity, eg, “research fellow.”

Fifth Pathway—Discontinued in June 30, 2009, the Fifth Pathway was one of several ways that individuals who obtained their undergraduate medical education abroad were able to enter GME in the United States. The Fifth Pathway was a period of supervised clinical training for students who obtained their premedical education in the United States, received undergraduate medical education in countries that do not grant the MD degree until the completion of 1 year of national service after medical school, and passed Step 1 of the United States Medical Licensing Examination. After these students successfully completed a year of clinical training sponsored
GRADUATE MEDICAL EDUCATION (GME) GLOSSARY

by an LCME-accredited US medical school and passed USMLE Step 2, they became eligible for an ACGME-accredited residency.

FREIDA Online® (Fellowship and Residency Electronic Interactive Database Access)—An online information resource, available through the AMA Web site at www.ama-assn.org/go/freida, that assists medical students and residents in selecting GME programs. It includes information on all ACGME-accredited residency programs and combined specialty programs, the majority with expanded listings that provide such information as program benefits (including compensation), resident-to-faculty ratio, work schedule, policies, and educational environment.

General specialty program—A primary specialty (eg, anesthesiology, family medicine, internal medicine) that provides resident physicians, under supervision, with the knowledge and skills needed to be practitioners in a specified area of medical practice; sometimes referred to as a “core discipline program.” General specialty programs function within an institution and are subject to all ACGME accreditation actions, policies, and procedures. Completing an ACGME-accredited residency in a general specialty program is one of the requirements of certification by a specialty board and is a prerequisite to subspecialty training.

GME Track (see also “National GME Census”—Available at www.aamc.org/gmetrack, this secure web-based application of the Association of American Medical Colleges includes, among other services, the National GME Census. Through GME Track, residency information is collected for both the AAMC and the AMA.

Graduate medical education (GME) (see also “Postgraduate medical education”)—As the second of three major phases of medical education in the US, graduate medical education (GME) prepares physicians for the independent practice of medicine in a medical specialty. GME focuses on the development of clinical skills and professional competencies and on the acquisition of detailed factual knowledge in a medical specialty. GME programs are based in hospitals or other health care institutions and, in most specialties, utilize both inpatient and ambulatory settings. GME programs, including Transitional Year programs, are usually called “residency programs” and the physicians educated in them “residents.”

Graduate Medical Education Directory—Annual publication that lists residency/fellowship programs accredited by the ACGME. Known informally as the “Green Book,” the Directory lists all ACGME-accredited programs, Board-approved combined programs, and the certification requirements of 24 medical specialty boards.

Graduate Year (GY) (see also “Program year” and “Postgraduate year”)—Refers to an individual’s current year of accredited GME; this may or may not correspond to the program year. For example, a fellow in pediatric cardiology could be in the first program year of the pediatric cardiology program but in his/her fourth graduate year of GME (including the 3 prior years of pediatrics). The AMA does not use the term “postgraduate year” (PGY).

Graduate Year 1 (GY1)—Used in connection with residents and with residency positions to indicate the first year of training after medical school. Individuals in GY1 positions who plan to complete the entire program are counted as enrolled in Graduate Year 1 (GY1), Categorical. Individuals in GY1 positions who are using their first year in a residency program as a prerequisite to enter another specialty or subspecialty program are counted as enrolled in Graduate Year 1 (GY1). Preliminary. Not all specialties offer GY1 positions, and in those specialties with approved GY1 positions, some programs do not offer them. Furthermore, although by definition residents in GY1 positions are not required to have prior GME, some residents who fill such positions may have had previous training.

In-house call—Duty hours beyond the normal work day when residents are required to be immediately available in the assigned institution.

Institution—A sponsoring institution is the institution (eg, a university, medical school, hospital, school of public health, health department, public health agency, organized health care delivery system, medical examiner’s office, consortium, or educational foundation) that assumes the ultimate responsibility for a GME program. ACGME-accredited GME programs must operate under the authority and control of a sponsoring institution, which must be appropriately organized for the conduct of GME in a scholarly environment and committed to excellence in both medical education and patient care. A sponsoring institution must be in substantial compliance with the ACGME Institutional Requirements and must ensure that its ACGME-accredited programs are in substantial compliance with the Institutional, Common, and specialty-specific Program Requirements.

A major participating institution is an institution to which residents rotate for a required experience of long duration and/or those that require explicit approval by the appropriate RRC prior to utilization. Major participating institutions are listed as part of an accredited program in the Graduate Medical Education Directory. Note: Hospitals and other institutions that provide rotations of less than one sixth of the program length or less than a total of 6 months are not listed in the Directory.

Intern (see “Resident or resident physician” and “Fellow”)—No longer used by the AMA or ACGME. Historically, “intern” was used to designate individuals in the first post-MD year of hospital training; less commonly, it designated individuals in the first year of any residency program. Since 1975, the Graduate Medical Education Directory and the ACGME have used “resident,” “resident physician,” or “fellow” to designate all individuals in ACGME-accredited programs.

International medical graduate (IMG)—A graduate from a medical school outside the US and Canada.

In-training examination (also known as “in-service examination”)—Examinations to gauge residents’ progress toward meeting a residency program’s educational objectives. Certification boards of the American Board of Medical Specialties (ABMS) or medical specialty societies offer in-training examinations on a periodic basis.

Liaison Committee for Specialty Boards (LCSB)—The body that reviews and recommends approval of new examining boards in medical specialties to the ABMS and AMA, which are the sponsors of the LCSB.

Liaison Committee on Medical Education (LCME)—The body that accredits allopathic medicine educational programs in the US and Canada leading to the MD degree. The American Osteopathic Association (AOA) accredits educational programs leading to the doctor of osteopathic medicine (DO) degree.

Licensure—The process by which a state or jurisdiction of the United States admits physicians to the practice of medicine. Licensure is intended to ensure that practicing physicians have appropriate education and training and that they abide by recognized standards of professional conduct while serving their patients. Candidates for first licensure must complete a rigorous examination sequence (the United States Medical Licensing Examination, or USMLE) designed to assess a physician’s ability to apply knowledge, concepts, and principles that are important in health and disease and that constitute the basis of safe and effective patient care. All applicants must submit proof of medical education and training and provide details about their work history. Finally, applicants must reveal information regarding past medical history (including the use
of habit-forming drugs and emotional or mental illness), arrests, and convictions. For more information, see State Medical Licensure Requirements and Statistics, published by the AMA, or visit www.ama-assn.org/go/licensure.

Major participating institution—See "Institution."

Match—See “National Resident Matching Program.”

Medical school affiliation—Institutions sponsoring an accredited GME program may have a formal relationship with a medical school. Where such a relationship exists, the affiliation is identified by the dean of the medical school as major (M), graduate only (G), or limited (L). Major affiliation signifies that an institution is an important part of the teaching program of the medical school and plays a significant role in the clinical clerkship program. Graduate only affiliation indicates that the institution is affiliated with the medical school only for its graduate programs. Limited affiliation signifies that the institution is affiliated with the medical school’s teaching program only for brief, occasional, and/or unique rotations of students or residents.

Medical school number—Unique 5-digit identifier for each medical school. See Appendix C for a list of LCME-accredited medical schools and medical school numbers.

Medical Student Section (MSS)—A section of the AMA, the AMA-MSS comprises nearly 50,000 members representing students from accredited allopathic and osteopathic schools in the US. For more information, see www.ama-assn.org/go/mss.

Moonlighting—Patient care activities external to the educational program that residents/fellows engage in at sites used by the educational program (internal moonlighting) and other health care sites.

National GME Census—Beginning in 2000, the AMA’s Annual Survey of Graduate Medical Education Programs was replaced by the National GME Census, a joint effort of the AMA and the Association of American Medical Colleges (AAMC). All programs accredited by the ACGME and combined specialty programs approved by their respective boards are asked to complete this online census, available at www.aamc.org/gmetrack. The census collects data on program characteristics such as clinical and research facilities and the work and learning environment residents can expect, as well as biographical data on residents in the programs. Data collected from the census are used in the following AMA publications and products:

- Graduate Medical Education Directory
- Graduate Medical Education Library on CD-ROM
- FREIDA Online® (Fellowship and Residency Electronic Interactive Database Access)
- Medical Education issue of the Journal of the American Medical Association
- State-level Data for Accredited Graduate Medical Education Programs in the US
- AMA Physician Masterfile
- AMA Physician Select

National Resident Matching Program (NRMP)—Informally referred to as the “Match,” this process matches GME programs and applicants to those programs. Managed by the Association of American Medical Colleges (AAMC), the NRMP system was developed to provide both applicants and residency program directors an opportunity to consider their options for accepting and offering appointments to residency programs, respectively, and to have their decisions announced at a specific time. For more information, consult www.nrmp.org or see Section I.

Night float—Rotation or educational experience designed to either eliminate in-house call or assist other residents during the night.

Residents assigned to night float are assigned on-site duty during evening/night shifts and are responsible for admitting or cross-covering patients until morning and do not have daytime assignments. Night float rotations must have an educational focus.

Pager call—See "At-home call."

Participating institution—See “Institution.”

Postgraduate medical education (see “Graduate medical education”—The AMA does not use the term “postgraduate medical education” to refer to any stage of physician education. The term is sometimes used in the United Kingdom and Canada to refer to graduate medical education.

Postgraduate year (PGY) (see also “Graduate year”)—The AMA does not use this term to describe any part of graduate medical education. The preferred term is graduate year (GY).

Preliminary positions (see also “Graduate Year 1”—Positions for residents who are obtaining training required to enter another program or specialty. Some residents in preliminary positions may move into permanent positions in the second year. Preliminary positions are usually 1 year in length and usually offered for Graduate Year 1. Internal medicine, surgery, and transitional year programs commonly offer preliminary positions.

Program—The unit of GME residency/fellowship training, comprising a series of learning experiences within a GME specialty/subspecialty, which is evaluated for accreditation.

Program director—The individual responsible for maintaining the quality of a specific GME program so that it meets ACGME accreditation standards. Other duties of the program director include preparing a written statement outlining the program’s educational goals; providing an accurate statistical and narrative description of the program as requested by the Residency Review Committee (RRC); and providing for the selection, supervision, and evaluation of residents for appointment to and completion of the program.

Program letter of agreement (PLA)—A written document that addresses GME responsibilities between an individual accredited program and a site other than the sponsoring institution at which residents receive a required part of their education.

Program year (see also “Graduate Year”)—Refers to the current year of training within a specific program; this may or may not correspond to the graduate year. For example, a fellow in pediatric cardiology could be in the first program year of the pediatric cardiology program, but is in his/her fourth graduate year of GME (including the 3 prior years of pediatrics).

Resident and Fellow Section (RFS)—A section of the AMA formed in 1974, the AMA-RFS is the largest organization of residents in the United States. For more information, see www.ama-assn.org/go/rfs.

Residency Review Committees (RRCs)—The 28 review committees within the ACGME system (including the Transitional Year Review Committee) that meet periodically to review programs within their specialty and/or subspecialty, propose Program Requirements for new specialties/subspecialties, and revise requirements for existing specialties/subspecialties.

Resident or resident physician (see also “Fellow”)—Any individual at any level in an ACGME-accredited GME program, including subspecialty programs. Local usage might refer to these individuals as interns, house officers, housestaff, trainees, fellows, junior faculty, or other comparable terminology. Beginning in 2000, the ACGME has used the term “fellow” to denote physicians in subspecialty programs (versus residents in specialty programs) or in
GME programs that are beyond the requirements for eligibility for first board certification in the discipline.

**Rotation**—An educational experience of planned activities in selected settings, over a specific time period, developed to meet goals and objectives of the program.

**Scholarly activity**—An opportunity for residents/fellows and faculty to participate in research as well as organized clinical discussions, rounds, journal clubs, and conferences. In addition, some members of the faculty should also demonstrate scholarship through one or more of the following: peer-reviewed funding; publication of original research or review articles in peer-reviewed journals or chapters in textbooks; publication or presentation of case reports or clinical series at local, regional, or national professional and scientific society meetings; or participation in national committees or educational organizations.

**Section on Medical Schools (SMS)**—A section of the AMA House of Delegates with representation from deans and faculty of accredited US medical and osteopathic schools. For more information, see [www.ama-assn.org/go/sms](http://www.ama-assn.org/go/sms).

**Short call**—Responsibility for admitting patients to the teaching service during the early part of the day. Residents begin call in the morning, admit patients until some designated time in the afternoon or late morning, and do not stay in the hospital overnight.

**Sponsoring institution**—See “Institution.”

**Subspecialty program**—Provides advanced GME in a highly specialized field of study within a specialty, eg, gastroenterology within the field of internal medicine. Many subspecialty programs are subject to ACGME accreditation actions, policies, and procedures. Completing an ACGME-accredited residency/fellowship in a particular subspecialty program may qualify the physician to seek certification by the related subspecialty board. Some subspecialty programs are accredited independently of the related general specialty program and are not dependent on a general specialty program. Other subspecialty programs function only in conjunction with an accredited general specialty program, and the subspecialty program's accreditation status is related to the status of the accredited general specialty program.

**Teaching staff**—Any individual who has received a formal assignment to teach resident physicians. In some institutions appointment to the medical staff of the hospital constitutes appointment to its teaching staff.

**Transitional year program** (see also “Preliminary positions”)—Broad-based clinical training in an ACGME-accredited graduate year 1 (GY1) residency program that provides a balanced curriculum in multiple clinical disciplines. Developed for the year between medical school graduation and a specialty residency program, the transitional year is designed to facilitate the choice of and/or preparation for a specific specialty; it is not meant to prepare participants for the independent practice of medicine. To sponsor a transitional year program, an institution and its affiliate must conduct two or more ACGME-accredited programs that participate in the transitional year.

**United States Medical Licensing Examination (USMLE)**—A three-step examination that is required for licensure of all practicing physicians in the US. For more information, see [www.usmle.org](http://www.usmle.org) or refer to [State Medical Licensure Requirements and Statistics](http://www.usmle.org), published annually by the AMA.

**Web ADS**—The Web Accreditation Data System (ADS) of the ACGME. This Internet-based data collection system contains the current data on file with the ACGME for all sponsoring institutions and programs, which are required to verify and update general information annually via this secure online system. In addition, programs are required to verify the accredited training of all residents and to communicate organizational changes as they occur. See [www.acgme.org/ADS](http://www.acgme.org/ADS) for more information.
Appendix E
Listings of Subspecialty and Fellowship Programs

Introduction
In addition to the residency/fellowship programs accredited by the Accreditation Council for Graduate Medical Education (ACGME), a number of medical specialty societies maintain lists of subspecialty and fellowship programs outside the purview of the ACGME accreditation process. Note: Inclusion on this list does not reflect AMA approval or recognition of these practice areas.

To propose an additional list of subspecialties/fellowships for this section, contact Fred Donini-Lenhoff at fred[lenhoff@ama-assn.org].

Abdominal Transplant Surgery Fellowships

www.astso.org/FellowshipTraining

The American Society of Transplant Surgeons (ASTS) accredits abdominal transplant surgery programs, through which fellows develop proficiency in the surgical and medical management of patients with end-stage organ diseases amenable to transplantation. Candidates for such training must have satisfactorily completed a residency that satisfies the educational requirements for certification by the American Board of Surgery or the American Board of Urology (or foreign equivalency).

The ASTS is composed of over 1,200 transplant surgeons, physicians, scientists, and allied health professionals dedicated to excellence in transplantation surgery through education and research with respect to all aspects of organ donation and transplantation. Abdominal transplant surgery fellowships in the United States and Canada are listed on the ASTS web site.

Breast Fellowships
www.surgonc.org/default.aspx?id=66

The Society of Surgical Oncology (SSO) reviews and approves breast fellowship and general surgical oncology training programs on an ongoing basis. Each fall the Society conducts a Matching Program to match qualified candidates with positions in SSO-approved training programs.

In January 2010, 32 breast fellowships were listed on the SSO’s web site.

Electrodiagnostic Medicine Fellowships
www.aanem.org/education/training/fellowship_listing.cfm

The Listing of Fellowships in Electrodiagnostic Medicine from the American Association of Neuromuscular & Electrodiagnostic Medicine (AANEM) is an informational service assembled from data submitted voluntarily by various institutions. The AANEM does not review, evaluate, or provide input regarding the listing. This listing is not necessarily complete, and inclusion of a program does not imply sponsorship or endorsement by the AANEM. This listing is not affiliated with or endorsed by the American Board of Electrodiagnostic Medicine (ABEM) in any way. Completion of any of the listed fellowships does not guarantee satisfaction of the ABEM eligibility requirement of completion of a preceptorship in electrodiagnostic medicine. Any statement included in this listing that completion of the fellowship will enable a candidate to qualify for examination by a particular board should be investigated by the individual applying for the fellowship. Candidates should contact the individual boards for determination of eligibility requirements.

Fellowships in many areas are listed, including:
- Clinical electrodiagnostic medicine
- EMG/neuromuscular
- Electrodiagnostic medicine and electrophysiology of movement disorders
- Epilepsy, neuromuscular disorders
- Neuromuscular diseases
- Spine/neuromuscular

Information
American Association of Neuromuscular & Electrodiagnostic Medicine

Dermatology Fellowships
www.aad.org/fellowshipdirectory/

The American Academy of Dermatology (AAD) is a professional association for physicians in dermatology. The online Fellowship Directory of the AAD, which is intended for reference by medical students, residents, and dermatologists, includes dermatology fellowships in the following disciplines or areas:
- Bullous
- Burn
- Clinical dermatology
- Clinical research
- Clinician educator
- Cosmetic
- Dermatopathology
- Dermatopharmacology and epidermolysis
- HIV
- Immunodermatology
- Laser
- Laser and cosmetic
- Laser and surgery
- Medical dermatology
- Melanoma translational research
- Mohs surgery
- Oncology/melanoma
- Pediatric dermatology
- Pharmacology
- Phototherapy
- Research

Information

Gynecologic Endoscopy (Advanced) Fellowships
www.aagl.org/fellowships

The Fellowship in Gynecologic Endoscopy, an affiliate of the AAGL and the Society of Reproductive Surgeons (SRS), sponsors fellowships in advanced gynecologic endoscopy. These fellowships were created to produce a standardized training program with a research requirement. The fellowship provides an opportunity for gynecologists who have completed their residency to acquire additional skills in minimally invasive gynecologic surgery.

Educational objectives focus on evidence-based medicine, anatomical principles, instrumentation, operative laparoscopy, and operative hysteroscopy. The fellowship offers in-depth experience using state-of-the-art techniques to treat abnormal uterine bleeding, pelvic pain, myomata, endometriosis, adhesive disease, and pelvic relaxation.

This fellowship also aims to further research in the field of minimally invasive gynecology. Fellows are required to complete a scholarly contribution to be presented at the annual meetings of the AAGL and the American Society for Reproductive Medicine.

The Fellowship in Gynecologic Endoscopy actively encourages applications from postgraduate physicians aspiring to develop their surgical skills in minimally invasive gynecology.

Hospitalist and Hospital Medicine Programs
www.hospitalmedicine.org

Hospitalists are physicians whose primary professional focus is the general medical care of hospitalized patients. Their activities include patient care, teaching, research, and leadership related to hospital care.

The term “hospitalist” refers to physicians whose practice emphasizes providing care for hospitalized patients. The term was coined by Drs. Robert Wachter and Lee Goldman in a New England Journal of Medicine article in August 1996 (Wachter RM, Goldman L. The emerging role of “hospitalists” in the American health care system. N Engl J Med 1996;335:514-7). A review in the Journal of the American Medical Association (Wachter, RM, Goldman L: The Hospitalist Movement: 5 Years Later, JAMA 287;487-494, Jan 23/30, 2002) further defines the field of hospital medicine. While some doctors have emphasized inpatient care for many years, there has been an explosive growth of such doctors since 1994. There are now more than 12,000 hospitalists in the US according to a study by the American Hospital Association. There are more new jobs available for hospitalists than in any aspect of internal medicine. Hospital medicine is a significant career path option for those trained in general internal medicine, general pediatrics, family practice, and obstetrics.

The majority (85%) of practicing hospitalists are trained in internal medicine, and some (5%) have completed subspecialty fellowships, pulmonary disease and critical care medicine being the most common. Recognizing that many medical students and residents are interested in this field, academic centers have recently begun to develop hospitalist residency and fellowship programs in hospital medicine. Hospitalist tracks are generally part of an internal medicine residency program, but offer additional exposure to the broad range of issues confronting hospital-based physicians, such as end-of-life care, quality improvement, and medical consultation. Fellowship programs tend to emphasize research training, teaching skills, and additional clinical experience.

As of January 2010, 36 fellowships were listed on the Society of Hospital Medicine’s web site (20 internal medicine, seven family medicine, eight pediatrics, and one psychiatry).

Minimally Invasive and GI Surgery Fellowships

The Fellowship Council (FC) is an association of minimally invasive and GI surgical fellowship directors formed to address the unique needs of these programs. Programs include minimally invasive surgery, bariatrics, flexible surgical endoscopy, and hepato-biliary/pancreatic and colorectal specialties. The FC is an independent entity that is sponsored by the following surgical societies:

- Society of American Gastrointestinal and Endoscopic Surgeons
- Society for Surgery of the Alimentary Tract
- American Society for Metabolic and Bariatric Surgery
- American Hepato-Pancreato-Biliary Association

It provides a communication forum for disseminating information about fellowship programs, discussing fellowship issues, and communicating the Council’s positions to other organizations. It administers a secure electronic match to ensure fair placement of residents into quality programs. The Council has a rigorous accreditation process according to published guidelines for high-quality training. It is also charged with creating training curricula in conjunction with the American Board of Surgery.

As of January 2010, 116 fellowships were listed on the Council’s web site.

Neurology Fellowship Programs

The online Directory for Fellowship Positions is provided through the efforts of the American Academy of Neurology’s Graduate Education Subcommittee (GES), the Association of University Professors of Neurology (AUPN), and the American Neurological Association (ANA). The goals of the GES are to provide opportunities for resident involvement in the Academy, encourage attendance at the annual meeting, and provide information to residents on fellowships.

The mission of the AUPN is to support academic departments of neurology in attracting, educating, and developing the cadre of physicians and physician-scientists needed to diagnose, understand, and treat disorders of the nervous system. Members of the AUPN include heads or chairs of divisions or departments of neurology, directors of residency training programs, directors of clerkship programs, or directors of research programs in accredited medical schools in the United States (or similar medical schools in Canada which take part in the United States Neurology Resident Matching Program).

The American Neurological Association is a professional society of academic neurologists and neuroscientists devoted to advancing the goals of academic neurology; training and educating neurologists and other physicians in the neurologic sciences; and expanding both our understanding of diseases of the nervous system and our ability to treat them.

Child neurology residency positions or fellowships are not listed in the Directory since these positions are residency training that leads to certification by the ABPN with special competence in child neurology, and therefore are not post-residency training. All listings of child neurology programs are available on the ACGME web site and in the AMA’s Graduate Medical Education Directory ("Green Book").

The Directory lists fellowships that have been submitted by programs covering the following disciplines:

- Advanced clinical neurology
- AIDS
- Alzheimer’s disease
- Basic research
- Behavioral neurology
- Cerebrovascular disease/stroke
- Clinical neurophysiology
- Dementia
- EEG
- EMG
- Epilepsy
- Geriatric neurology
- Headache
- Interventional neurology
- Movement disorders
- Multiple sclerosis
- Neuroepidemiology
- Neurogenetics
- Neuromaging
- Neuroimmunology
- Neurologic critical care
- Neuromuscular disorders
- Neuro- oncology
- Neuro-ophtalmology
- Neuro- otology
- Neuropathology
- Neuropathology
- Neuropharmacology
- Neurorehabilitation
- Neurosurgery
- Pain
- Sleep disorders
- Spine

Obstetrics-Gynecology Subspecialty Programs

The American Board of Obstetrics and Gynecology (ABOG) approves GME fellowship programs in the following subspecialties of obstetrics and gynecology:

- Female pelvic medicine and reconstructive surgery (38 programs)
- Gynecologic oncology (43 programs)
- Maternal-fetal medicine (74 programs)
- Maternal-fetal medicine and genetics (10 programs)
- Reproductive endocrinology/infertility (42 programs)

An educational program in these fields must (with rare exceptions) be affiliated with a medical school and be an integral part of a department of obstetrics and gynecology that also conducts an accredited residency program in obstetrics and gynecology. It must function with the approval, but not necessarily under the direction, of the chair of the department. A subspecialty program requires special facilities, services, and personnel, and the activities of the subspecialty fellows and the residents in the core program must be clearly and separately identified.

Institutions may apply for approval of education programs of 3 years’ duration. Refer to the General and Special Requirements for Graduate Medical Education for detailed guidelines.

Subspecialty Certification

Fellows who enter a 3-year fellowship program must satisfactorily complete 3 years of training to be admissible to the subspecialty division’s written examination. The certification process for all candidates will be identical. Program directors and candidates must be aware that in order to become certified in any subspecialty, the candidate must pass both the written and oral examinations of the principal Board.

It is recommended that continued contact with the broad aspects of obstetrics and gynecology be continued throughout the fellowship, including such mechanisms as participation in lectures, conferences, or night and weekend call. The extent of these activities, however, must not significantly alter the training program as proposed by the program director and approved by the division.

Ophthalmology Fellowship Programs

Formed in 2005, the Association of University Professors of Ophthalmology Fellowship Compliance Committee (AUPO FCC) is a non-profit organization committed to the establishment of program requirements for ophthalmology fellowship programs. The AUPO FCC offers a voluntary compliance system focused on uniform educational requirements, protection of the public, protection of institutions, protection of trainees, accountability, and enforcement.

The compliance process is voluntary and financed by participating fellowship programs, subspecialty societies, and the AUPO. All subspecialties in ophthalmology are encouraged to participate in the AUPO FCC.

The AUPO FCC web site includes listings of fellowships in AUPO-FCC compliant programs in the following ophthalmic subspecialty areas:

- Cornea
- Glaucoma
- Neuro-ophthalmology
- Ophthalmic pathology
- Pediatric ophthalmology & strabismus
- Surgical retina & vitreous
- Uveitis

Pathology Fellowship Programs

The Intersociety Council for Pathology Information (ICPI) is a non-profit educational organization sponsored by national pathology societies to serve as a central source of information about pathology in the practice of medicine and in medical research and education. It publishes annually the Directory of Pathology Training Programs in the US and Canada, which includes specialty and subspecialty programs in US and Canada. Other features of the Directory include listings of post-sophomore fellowships for medical students and information about careers in pathology, as well as a description of the principal pathology societies. A searchable web-based Directory is available at www.pathologytraining.org.

Listings of programs in pathology subspecialties include the following:

- Anatomic pathology
- Blood banking/transfusion medicine
- Breast pathology
- Cardiovascular respiratory pathology
- Chemical pathology/clinical chemistry
- Clinical microbiology
- Coagulation
Physician-Scientist Training Programs

www.physicianscientists.org/careers/training/residency

The American Physician Scientists Association web site offers a list of Physician-Scientist Development Training Programs and links to each program’s Web site. These are research residency programs that have short-tracked the clinical years to allow for a more intensive research post-doctoral/fellowship period.

Pediatric Dermatology Programs

www91.pair.com/spd/fellowship.php

In January 2010, 16 programs in this field were listed on the Society web site. (Note: The American Academy of Dermatology web site also lists pediatric dermatology fellowship programs.)

Those pursuing training in this specialty must complete a residency in dermatology followed by a pediatric dermatology fellowship of 1 to 2 years. (Note: Recently, combined programs in pediatrics and dermatology have been approved; see Appendix A for more information.)

Trauma Fellowships

The American Association for the Surgery of Trauma (AAST) has compiled lists of trauma and trauma-related fellowships arranged according to compliance with AAST-published guidelines. As of January 2010, the AAST website listed more than 90 institutions supporting trauma-related fellowships, lectureships, and research positions in trauma surgery, orthopaedic trauma, trauma anesthesia, critical care, injury control, and burns.

Another resource is trauma.org, which lists institutions offering trauma-related fellowships, lectureships, and research positions in the following:
- Trauma surgery
- Trauma surgery and critical care
- Trauma, critical care and acute care surgery
- Trauma surgery and injury control
- Surgical critical care
- Orthopaedic trauma
- Burn and plastics trauma
- Trauma anaesthesia
- Trauma radiology
- Trauma research

Appendix F
Medical Licensure Information

This section contains an article on the basics of medical licensure, in addition to information on the licensure policies of state medical boards, published in the 2010 edition of State Medical Licensure Requirements and Statistics.

To order your copy of the licensure book, call the AMA at (800) 621-8335 or visit www.ama-assn.org/go/licensure.

Obtaining a Medical License: The Basics

By the Federation of State Medical Boards

[Reprinted from Licensing and Credentialing: What Physicians Need to Know]

Increasing public demand for protection, coupled with the growth in the number and sophistication of fraudulent practitioners over the past 2 decades, has resulted in stronger and more complex licensing boards and licensing statutes throughout the country. As might be expected, the rate of change differs widely among the states’ licensing boards, depending on each jurisdiction’s resources and Medical Practice Act, as well as on legislative, media, and public expectations. All medical boards have continued to improve licensure processes, and a trend toward uniformity among licensing boards exists to enhance both the initial licensure process and licensure portability.

Many states have expanded what is considered to be the practice of medicine to address new trends in the medical field that need to be regulated by medical boards. For example, a number of states have passed legislation in recent years that empower medical boards to have jurisdiction over the practice of medicine across state boundaries or treatment decisions made by medical directors of managed care organizations.

Within this context, a physician seeking initial licensure or subsequently applying for a license in other states should anticipate the possibility of delays due to the necessary investigation of credentials and past practice, as well as the need to comply with necessary licensing standards. To assist a physician in the quest for licensure, this article attempts to provide some ground rules. These suggestions will not apply in all cases but generally will help most physicians applying for licensure as well as benefit the licensing board of the state in which the physician wishes to practice.

When contacting a licensing board for the first time, ask for a copy of its current licensing requirements and the average time it takes to process applications. This will provide the physician with a solid idea of when to consider closing an existing practice and/or plan a move as well as with information about the potential problem areas to be addressed in completing an application. While initial licensure requirements for domestic and international medical graduates differ somewhat among states, all states will require proof of prior education and training and proof of the completion of a licensure examination approved by the board. Specifically, all physicians must submit proof of successful completion of all three steps of the United States Medical Licensing Examination (USMLE). However, because some medical students and physicians had completed portions of the National Board of Medical Examiners and Federation Licensing Examination (FLEX) sequences before the implementation of USMLE in 1994, certain combinations of examinations may be considered by medical licensing authorities as comparable to the USMLE.
OBTAING A MEDICAL LICENSE: THE BASICS

To send a USMLE or PLEX transcript to state medical boards, visit www.fsmb.org or contact:

Federation of State Medical Boards
PO Box 619850
Dallas, TX 75261-9850
817 888-4000
www.fsmb.org

For info on the USMLE, visit www.usmle.org or contact:

USMLE Office of the Secretariat
3750 Market St
Philadelphia, PA 19104-3910
215 590-9700
www.usmle.org

At the initial contact, the physician should provide the licensing board with a resume or curriculum vitae. This will allow a licensing board to evaluate potential problem areas early in the process. In short, the initial contact should be used to develop a set of reasonable expectations about the duration and complexity of the licensing process in a state to avoid frustration about the time required to obtain licensure. Unreasonable expectations can result in financial jeopardy due to the premature closing of a practice or failure to meet a starting date with an employer in the new state.

A physician should never try to hide derogatory information from a licensing board. It is much better to come forward with the information, assist the board in obtaining records and other necessary data, and provide information about mitigating circumstances that would prevent license denial. Full and frank disclosure of all information requested is by far the best approach to successful licensure. A physician should remember that in most states, making a false statement on an application for licensure is grounds for denial. Physicians informed about the process and working cooperatively with the licensing board need not find licensing an unpleasant experience. Members of the medical profession should always remember that the business of medical licensing boards is to protect the public from unqualified and unfit physicians. However, licensing boards also strive to ensure a process that protects the legal rights and privileges of physicians. While maintaining this balance often appears bureaucratic and cumbersome, the end result is improved health care for the people of the United States.

A wise physician will exercise patience and courtesy in the licensing process. State licensing boards and their staff, in most cases, do the best job possible to protect the public with the resources provided them. This requires taking the necessary time to fairly evaluate each application for licensure. In that same context, all actively practicing physicians should be cognizant of state laws; they may be providing care or performing acts that might not, until recently, have required them to hold a license.

For more information on FCVS, call 888 ASK-FCVS (275-3287).

Licensing authorities accept FCVS-verified documents for licensure. The Federation of State Medical Boards, as well as private, governmental and commercial entities—to obtain a verified, primary source record of a physician’s core credentials. The FCVS repository of information allows a physician to establish a confidential, lifetime professional portfolio that can be forwarded, at the physician’s request, to any entity that has established an agreement with FCVS. Currently, the majority of licensing authorities accept FCVS-verified documents for licensure.

Another option for physicians applying for licensure is the Federation Credentials Verification Service (PCVS). The PCVS was created in 1996 by the Federation of State Medical Boards of the United States to provide a centralized, uniform process for state medical boards—as well as private, governmental and commercial entities—to obtain a verified, primary source record of a physician’s core credentials. The PCVS repository of information allows a physician to establish a confidential, lifetime professional portfolio that can be forwarded, at the physician’s request, to any entity that has established an agreement with FCVS. Currently, the majority of licensing authorities accept PCVS-verified documents for licensure.

For more information on PCVS, call 888 ASK-FCVS (275-3287).

A wise physician will exercise patience and courtesy in the licensing process. State licensing boards and their staff, in most cases, do the best job possible to protect the public with the resources provided them. This requires taking the necessary time to fairly evaluate each application for licensure. In that same context, all actively practicing physicians should be cognizant of state laws;
State Medical Licensure Requirements and Statistics: Contents

*State Medical Licensure Requirements and Statistics, 2010 edition,* includes the information shown below. On the following pages are selected tables that are relevant to GME. To order your copy, call the AMA at (800) 621-8335 or visit www.ama-assn.org/go/licensure.

Administration of the United States Medical Licensing Examination Step 3

In 1990, the Federation of State Medical Boards (FSMB) and the National Board of Medical Examiners (NBME) established the United States Medical Licensing Examination (USMLE), a single examination for assessment of US and international medical school students or graduates seeking initial licensure by US licensing jurisdictions. The USMLE replaced the Federation Licensing Examination (PLEX) and the certification examination of the NBME, as well as the Foreign Medical Graduate Examination in the Medical Sciences (FMGEMS), which was formerly used by the Educational Commission for Foreign Medical Graduates (ECFMG) for certification purposes.

The USMLE is a single examination program with three steps. Each step is complementary to the others; no step can stand alone in the assessment of readiness for medical licensure.

Many states require US or Canadian medical school graduates to have from 6 to 12 months of accredited US or Canadian GME to take USMLE Step 3. In some states, graduates of foreign medical schools are required to have completed more GME (as much as 3 years in several states). A number of states do not require completion of GME to take Step 3 or require only that a physician taking the examination be enrolled in a GME program.

Nearly all medical licensing authorities require completion of Steps 1, 2, and 3 within a 7-year period, or 10 years for those in MD/PhD or similar dual-degree programs (although 21 states may make exceptions in the event of extenuating circumstances). The 7-year period begins when the medical student or graduate first passes Step 1 or Step 2. Thirteen states allow 10 years for completion of all three steps, and eight states do not impose a time limit for completion. Many states limit the number of attempts allowed to pass each step (particularly Step 3) and require additional education, training, or experience after a given number of failed attempts.

Additional Notes for Specific Licensing Jurisdictions

Alabama—If an applicant fails to achieve a passing score on Step 3 in three administrations, the Board may approve one additional attempt to pass Step 3 after demonstration by the applicant of additional education, experience, or training acceptable to the Board.

Applicants who are “dual degree candidates” (see definition, below) must achieve a passing score on Step 3 in not more than three administrations and complete Steps 1, 2, and 3 within a 10-year period, beginning when the applicant initially passes his or her first step. The Board does not accept scores from a retaking of a previously passed step of the USMLE.

For purposes of the USMLE, dual degree candidates are defined as follows:

- The applicant is pursuing the MD or DO degree and the PhD degree in an institution or program accredited by the LCME and a regional university accrediting body; and
- The applicant is a student in good standing, enrolled in the institution or program; and
- The PhD studies are in a field of biological sciences tested in the USMLE Step 1 content, including, but not limited to, anatomy, biochemistry, physiology, microbiology, pharmacology, pathology, genetics, neuroscience, and molecular biology.

Arizona—No time limit for USMLE Step 3 for applicants who hold a license in another jurisdiction (licensure by endorsement); for initial licensure, the 7-year limit applies.

Ohio—The applicant shall have passed all three steps within a 10-year period and achieved a recognized passing performance by the USMLE program on each step. No applicant shall have failed any step more than three times.

Any applicant having failed a step more than three times shall do the following to be eligible for licensure:

1) Successfully complete an additional year of GME in addition to that required for licensure. Such education shall be completed subsequent to the final step that has been failed more than three times; and 2) Retake the testing sequence.

Any applicant who has not completed the required steps within the 10-year time period, and has not failed any step more than three times, shall 1) Retake the appropriate steps to bring the testing sequence within the required 10-year time period; or 2) Demonstrate good cause, as determined by the board, for not having passed all three steps within the 10-year period.

Oregon—A waiver is allowed of the three-attempt limit for USMLE Step 3 (1 year approved GME after third failed attempt before fourth and final attempt) for applicants who are ABMS-certified.

A waiver of the 7-year time limit for completion of USMLE Steps 1, 2, and 3 is allowed for applicants who are ABMS-certified, who have participated in a combined MD/PhD or DO/PhD program, suffered from a documented significant health condition that by its severity would necessarily cause delay to an applicant’s medical study, or have completed continuous GME equivalent to an MD/PhD or DO/PhD program.

Texas—All candidates, except MD/PhD graduates, must pass all examination steps within 7 years. MD/PhD graduates must pass all steps within 2 years of completing the GME required for licensure in Texas. Both of these time limits may be expanded to 10 years if the applicant 1) is ABMS or AOA Bureau of Osteopathic Specialists specialty board certified, or 2) has been issued a faculty temporary license in Texas, has practiced under that permit for at least 12 months, and has been recommended for licensure by the institution at which the faculty temporary license was used.

In addition, although any of the three steps must be passed within three attempts, a fourth attempt is allowed on one step only, and a fifth or sixth attempt is allowed on one step only, if the applicant becomes ABMS- or AOA board-certified and completes, in Texas, an additional 2 years of GME beyond what is required.

Virgin Islands—The USMLE is not administered; SPEX is used to evaluate physicians’ knowledge.

Washington—All applicants who graduated from medical school after 1993, whether within the US or internationally, are required to pass the USMLE to qualify for licensure.

West Virginia—Must appear before licensure committee after 3 failed attempts on any step of the USMLE.

**Abbreviations**
- ABMS—American Board of Medical Specialties
- ACGME—Accreditation Council for Graduate Medical Education
- AOA—American Osteopathic Association
- USMLE—United States Medical Licensing Examination
- GME—graduate medical education

* Refer to introductory text to this table for more information on this state’s regulations.

**Note:** All information should be verified with the licensing board; medical licenses are granted to those physicians meeting all state requirements—at the discretion of the board.
Initial Licensure of US Medical/Osteopathic School Graduates

All states require a written examination for initial licensure: generally, for MDs, the three-step United States Medical Licensing Examination (USMLE), which has replaced the Federation Licensing Examination (FLEX) and the national board examination of the National Board of Medical Examiners (NBME). Osteopathic physicians take the three-level Comprehensive Osteopathic Medical Licensing Examination (COMLEX-USA) of the National Board of Osteopathic Medical Examiners (NBOME).

To be eligible to take USMLE Step 3, more than half of the state medical boards require graduates of US medical schools to have completed at least 1 year of graduate medical education (GME). Twenty-four boards do not require completion of any GME to take USMLE Step 3 (although in some cases a candidate must be enrolled in a GME program).

To be eligible to take Level 3 of the Comprehensive Osteopathic Medical Licensing Examination (COMLEX), osteopathic physicians must be currently participating in and in good standing with an AOA-accredited internship or ACGME-accredited GME program or must have successfully completed such an internship or program.

All medical and osteopathic boards require completion of at least 1 year of GME before issuing a full, unrestricted license.

Abbreviations
- ACGME—Accreditation Council for Graduate Medical Education
- AOA—American Osteopathic Association
- CFPC—College of Family Physicians of Canada
- COMLEX—Comprehensive Osteopathic Medical Licensing Examination
- GME—Graduate medical education
- RCPSC—Royal College of Physicians and Surgeons of Canada
- USMLE—United States Medical Licensing Examination

Note: All information should be verified with the licensing board; medical licenses are granted to those physicians meeting all state requirements—at the discretion of the board.
Initial Licensure of Canadian Citizens Who Are Graduates of Accredited Canadian Medical Schools

When considering applications for licensure, all state medical boards consider Canadian citizens who have graduated from an accredited Canadian medical school on the same basis as graduates of accredited US medical schools (Table 3).

Forty-six licensing boards endorse the Licentiate of the Medical Council of Canada (LMCC) as evidence of passing an acceptable licensing examination (applicants must also pass all other board requirements for licensure).

With the exception of Guam and the Virgin Islands, all licensing boards accept Canadian graduate medical education (GME) as equivalent to GME in a US program accredited by the Accreditation Council for Graduate Medical Education (ACGME). These rules do not uniformly apply to international medical graduates, who should refer to Table 5.

**Abbreviations**

ACGME—Accreditation Council for Graduate Medical Education  
GME—graduate medical education  
LMCC—certification by the Licensiate of the Medical Council of Canada

**Note:** All information should be verified with the licensing board; licenses based on endorsement are granted to those physicians meeting all state requirements.
**Initial Licensure of International Medical Graduates (IMGs)**

All international medical graduates (IMGs) must hold a certificate from the Educational Commission for Foreign Medical Graduates (ECFMG) examination before taking Step 3 of the United States Medical Licensing Examination (USMLE).

Twenty-two boards maintain and/or use a list of approved/unapproved foreign medical schools for initial licensure decisions; several states use the list of schools from the California board. In addition, about half of the boards require IMG candidates for endorsement of licensure to have graduated from a state-approved foreign medical school.

Thirty-nine states will endorse for licensure the Licentiate of the Medical Council of Canada (LMCC) when held by an IMG. Twenty-three state boards allow IMGs to take USMLE Step 3 before they have had GME in a US or Canadian hospital (although some of these states require that a candidate be enrolled in a GME program). All states, however, require at least 1 year of GME for licensure, and 28 states require 3 years. Candidates are not awarded a license until they undertake the required GME in the United States and meet other board requirements (eg, an ECFMG certificate, personal interview, payment of fees).

**Fifth Pathway**

In 1971, the AMA established the Fifth Pathway, a program for US citizens studying abroad at foreign medical schools. The program requires that participants have

1. Completed, in an accredited US college or university, undergraduate premedical work of a quality acceptable for matriculation in an accredited US medical school, evaluated by measures such as college grade point average and scores on the Medical College Admission Test

2. Studied medicine in a foreign medical school located outside the United States, including Puerto Rico, and Canada that is listed in the *International Medical Education Directory*, available on the ECFMG Web site at www.ecfmg.org and developed and maintained by the Foundation for Advancement of International Medical Education and Research (FAIMERS®), a non-profit foundation of the ECFMG

3. Completed all formal requirements for a diploma of the foreign medical school except internship and/or social service (Those who have completed all the formal graduation requirements of the foreign medical school, including internship and/or social service, and are consequently eligible to apply for ECFMG certification, are not eligible for the Fifth Pathway program.)

If the aforementioned criteria are met, the candidate may substitute the Fifth Pathway program for internship and/or social service in the foreign country. After receiving a Fifth Pathway certificate from an accredited US medical school, these US citizens are eligible to enter the first year of GME in the United States.

In 52 jurisdictions (exceptions are Guam and the Virgin Islands), individuals who hold Fifth Pathway certificates (but not the ECFMG certificate) are eligible for licensure. Fifth Pathway certificate holders must pass Steps 1 and 2 of the USMLE before entering a GME program accredited by the Accreditation Council for Graduate Medical Education (ACGME).

**Note:** As of June 30, 2009, through action of the AMA Council on Medical Education, the Fifth Pathway has been discontinued. The Council no longer supports the Fifth Pathway as a mechanism for eligibility to enter the first year of ACGME-accredited graduate medical education programs. The AMA will continue to maintain records of former graduates of Fifth Pathway programs, but will no longer add records of individuals completing a year of supervised clinical education at an LCME-accredited medical school in the United States after July 1, 2000, although entrants beginning in January 2000 will be included.

**Additional Notes for Specific Licensing Jurisdictions**

**California**—The state maintains lists of both recognized and disapproved schools, available at: www.mbc.ca.gov/applicant/schools_recognized.html www.mbc.ca.gov/applicant/schools_unapproved.html

Neither education completed at nor diplomas issued by the 10 schools currently on the disapproved list will be accepted toward meeting the requirements for training and/or licensure in the state. The following list shows the name of medical school and date disapproved.

1. CETEC University, Santo Domingo (closed) May 19, 1983
2. CIFAS University, Santo Domingo (closed) November 18, 1984
3. UTESA University, Santo Domingo July 13, 1985 (disapproval reaffirmed 02-07-97)
4. World University, Santo Domingo (closed) December 1, 1989
5. Spartan Health Sciences University, St. Lucia June 13, 1995
6. University of Health Sciences Antigua, St. John’s July 28, 1995
7. Universidad Eugenio Maria de Hostos (UNIREMHIOS), Dominican Republic November 1, 1996
9. St. Matthew’s University, Grand Cayman February 18, 2005
10. Kigali International School of Medicine, Cambridge, England and Uganda November 2, 2007

**Florida**—ECFMG certificate required for licensure if a candidate is not a graduate of a foreign medical school approved by the Florida Board of Medicine (none has yet been approved).

**Idaho**—No list of approved foreign medical schools is maintained, but for IMGs applying for licensure, such schools must have been in existence for at least 15 years from the date of application for Idaho licensure.

**Kansas**—Licensure applicants must have graduated from a school approved by the Board. If the school has not been approved by the Board, an applicant may still be eligible for a license if the school has not been disapproved and has been in operation (date instruction started) for not less than 15 years.

**Schools approved by the Board are:**

1. All schools accredited by the Liaison Committee for Medical Education (LCME)
2. Universidad Autonoma de Guadalajara, Mexico
3. Aga Khan, Pakistan
4. American University of the Caribbean, Montserrat
5. SABA University, Netherlands (for graduates who matriculated at the school from and after January 1, 2002)
6. Ziauddin Medical School (temporarily approved from 7-1-08 through 6-30-11 for postgraduate permits only)
7. Kamini Institute of Medical Sciences (temporarily approved from 7-1-08 through 6-30-12 for postgraduate permits only)

School unapproved (neither approved nor disapproved) by the Board is:
INITIAL LICENSURE OF INTERNATIONAL MEDICAL GRADUATES (IMGs)

1. SABA University, Netherlands (for graduates who matriculated at the school before 2002)
   Applicants from any school disapproved by the Board are ineligible for licensure and these schools are:
   1. UTESA University, Santo Domingo
   2. Universidad Eugenio Maria de Hostos (UNIREMHOS), Dominican Republic
   3. St. Matthew's University, Grand Cayman
   For more information, see: www.ksbha.org/medicalschoolsapprovedunapproved.html

Maine—GME taken in Canada or the British Isles (accredited by a national body deemed equivalent to ACGME) may be considered qualifying on an individual basis.

Maryland—In addition to 2 years of ACGME- or RCPSC-accredited GME required for licensure, 1 year of GME required if a candidate failed any part of an examination three times; no more than three failures permitted.

Mississippi—ABMS board certification required for candidates who completed the Fifth Pathway.

Nevada—A formal list of approved/unapproved medical schools is not maintained, but the board does have an internal list of questionable medical schools.

New Jersey—An individual's educational experience must meet certain eligibility requirements.

North Carolina—Less than 3 years of GME may be accepted if applicant has completed at least 1 year of approved GME and is certified by an ABMS or AOA specialty board.

North Dakota—Three years of US or Canadian GME is required for licensure; if a candidate has not completed 3 years of GME but has met all other licensing requirements and has completed 1 year of GME in the United States or Canada in a board-approved program, and if the board finds that the candidate has other professional experience and training substantially equivalent to the second and third years of GME, the candidate may be deemed eligible for licensure (upon passing SPEX or ABMS board certification).

Oregon—IMG candidates for licensure must have completed at least 3 years of progressive GME in not more than two specialties in not more than two US or Canadian hospitals accredited for such training.

Pennsylvania—The board will grant unrestricted license by endorsement to a candidate who does not meet standard requirements if the candidate has achieved cumulative qualifications that are endorsed by the board as being equivalent to the standard license requirements.

South Carolina—ABMS/AOA board certification required for candidates who completed the Fifth Pathway.

South Dakota—No list of approved/unapproved foreign medical schools is maintained; decisions made on a case-by-case basis.

Texas—Canadian graduates of LCME-accredited schools are considered equivalent to US graduates for educational and post-graduate training requirements.

- **WHO**—World Health Organization

* Refer to introductory text to this table for more information on this state’s regulations.

**Note:** All information should be verified with the licensing board; licenses are granted to those physicians meeting all state requirements—at the discretion of the board.
Medical Student Clerkship Regulations

For purposes of this publication, a clerkship is defined as clinical education provided to medical students. Twenty states evaluate the quality of clinical clerkships in connection with an application for licensure. In most states, clerkships for US medical students must take place in hospitals affiliated with medical schools accredited by the Liaison Committee on Medical Education (LCME). Eleven of these 20 states have additional and/or more specific bases for evaluation, which are particularly relevant for students of non-LCME-accredited medical schools in the Caribbean, the majority of which complete their clinical clerkships in US hospitals and teaching institutions.

For example, Texas (as noted below) requires that the clerkship(s) must be performed in a hospital or teaching institution sponsoring or participating in a graduate medical education (GME) program accredited, at the time the applicant performed the clerkship, by the ACGME, AOA, or the board in the same subject (eg, the exact same specialty or subspecialty). Required core (or fundamental) clinical clerkships are:

- Internal medicine
- Obstetrics-gynecology
- Pediatrics
- Psychiatry
- Family medicine
- Surgery

Thirteen boards regulate clerkships provided in their states to students of foreign medical schools (including US citizens studying medicine in foreign schools). Of these, Maryland, Pennsylvania, and Puerto Rico forbid such clerkships. For purposes of licensure, 21 states accept only those clerkships completed in hospital departments with ACGME-accredited programs. Nine states have additional regulations.

Additional Notes for Specific Licensing Jurisdictions

California—Students of foreign medical schools may complete up to 18 of 72 required weeks in nonapproved clerkships outside of California.

Florida—Rules on clinical clerkships for international medical graduates adopted by the Florida Board before October 1986 do not apply to any graduate who had already completed a clinical clerkship or who had begun a clinical clerkship, as long as the clerkship was completed within 3 years.

A foreign medical school must be registered with the Florida Department of Education for its students to perform clinical clerkships in Florida.

Michigan—Specific clerkships are required (only for MDs).

New Jersey—For students from foreign medical schools (i.e., non-LCME or AOA-accredited) who complete clinical clerkships in the US, the core clerkships (internal medicine, obstetrics-gynecology, pediatrics, psychiatry, and surgery) must be completed (minimum of 4 weeks in each) at facilities that maintain an ACGME- or AOA-accredited residency program in the specific specialty.

Pennsylvania—Students of foreign medical schools are not permitted to engage in clinical clerkships within Pennsylvania.

Texas—Clerkships must be performed 1) as a student in an accredited medical or osteopathic school, or 2) in a hospital or teaching institution sponsoring or participating in a GME program accredited by the ACGME, the AOA, or the board in the same specialty or subspecialty as the medical or osteopathic medical education. The only exception is for applicants who are ABMS or AOA Bureau of Osteopathic Specialists specialty board certified.

**Abbreviation**

ACGME—Accreditation Council for Graduate Medical Education

* Refer to introductory text to this table for more information on this state’s regulations.

† In many cases, clerkships must take place in hospitals affiliated with LCME-accredited medical schools or ACGME-accredited residency programs. These states require additional and/or more specific criteria for evaluation.

Note: All information should be verified with the licensing board; medical licenses are granted to those physicians meeting all state requirements—at the discretion of the board.
Additional Policies Concerning International Medical Graduates (IMGs) and Doctors of Osteopathic Medicine (DOs)

A number of state medical boards have additional GME and specialty certificate policies for IMGs. Fourteen states have requirements for appointment to GME programs other than requiring an ECFMG certificate or a limited license.

Seven boards—Connecticut, Maine, Nebraska, Ohio, Oklahoma, Rhode Island, and Texas—indicated that GME completed in foreign countries other than Canada may be considered for credit toward a license. Specialty certificates of foreign boards, such as the Royal College of Physicians in the United Kingdom, may be accepted for credit toward a license in 11 states.

Thirty-nine medical boards accept GME accredited by the ACGME for licensure of osteopathic medical graduates.

Additional Notes for Specific Licensing Jurisdictions

**Maine**—The board may accept GME completed in England, Scotland, and Ireland for credit toward a license, if it is accepted by the specialty board as meeting board eligibility in the United States and notified via certified letter.

**Pennsylvania**—IMGs seeking appointment to a GME program need a passing score on United States Medical Licensing Examination (USMLE) Steps 1 and 2 (or National Board of Medical Examiners [NBME] Parts I and II or Federation Licensing Examination [FLEX] Component 1) for graduate year 2 medical education; for graduate year 3 and beyond, all parts of USMLE (or NBME or FLEX) are required.

**Wisconsin**—Temporary educational permit is required of IMGs for a second year of GME (and beyond), unless IMG has a permanent license. Board may accept training in lieu of graduate medical education by waiver.

* Refer to introductory text to this table for more information on this state’s regulations.

**Note:** All information should be verified with the licensing board; medical licenses are granted to those physicians meeting all state requirements—at the discretion of the board.
Accredited Subspecialties and Nonaccredited Fellowships That Satisfy Graduate Medical Education Requirements for Licensure

Both the AMA and the ACGME define a residency as GME that takes place in any of the medical specialties with ACGME Program Requirements (eg, internal medicine, pediatrics, surgery). Beginning in 2000, the ACGME has used the term fellowship to denote GME in ACGME-accredited subspecialty programs (eg, cardiovascular disease, hand surgery, rheumatology) that is beyond the requirements for eligibility for first board certification in the discipline.

All state medical boards accept residency education in specialty programs accredited by the ACGME as satisfying their GME requirements for licensure. Fifty-one jurisdictions—all except Arkansas, Michigan (DO), and Puerto Rico—accept residency education in subspecialty programs accredited by ACGME as satisfying their GME requirements for licensure.

Ten boards accept clinical fellowships not accredited by ACGME, and three boards—Hawaii, New York, and North Carolina—may accept research fellowships not accredited by ACGME to satisfy the GME requirement for licensure.

* Refer to introductory text to this table for more information on this state’s regulations.

**Note:** All information should be verified with licensing board; medical licenses are granted to those physicians meeting all state requirements—at the discretion of the board.
Licensure Requirement Exemptions for Eminent Physicians and Medical School Faculty

Eighteen boards license physicians through recognition of eminence in medical education or medical practice. For example, Maryland, one of the jurisdictions that licenses physicians through this mechanism, defines “Conceded eminence and authority in the profession” as “significant teaching, research, and achievement in a field of medicine recognized by the Board” (see www.mbp.state.md.us/forms/concede.pdf).

In Maryland, applicants seeking licensure by eminence must meet at least three of the following qualifications:

1. Within 10 years before the application, have published original results of clinical research in a medical journal listed in the Index Medicus or in an equivalent scholarly publication, and have submitted these articles to the Board in English or in a foreign language with verifiable, certified translations in English;

2. Have held an appointment at a medical school approved by the LCME or at any medical school listed in the World Health Organization directory at the level of associate or full professor, or its equivalent, for at least 5 years;

3. Within 10 years before the application, have developed a treatment modality, surgical technique, or other verified original contribution to the field of medicine, which is attested to by the dean of a school of medicine in the State or by the director of the National Institutes of Health;

4. Have actively practiced medicine cumulatively for 15 years, which may include up to 5 years sabbatical during which the applicant was involved in research; and

5. Be a member in good standing of a board of the American Board of Medical Specialties or other equivalent specialty board.

Physicians appointed to a medical school faculty are excused from the GME requirement for limited licensure in 21 states and from the examination requirement for limited licensure or teaching certification in 20 states. These faculty appointees would, however, receive a limited license or similar credential.

**Note:** All information should be verified with licensing board; medical licenses are granted to those physicians meeting all state requirements—at the discretion of the board.
Teaching (Visiting Professor) Licenses

Forty jurisdictions issue teaching (visiting professor) licenses, with fees ranging from $0 to $400.

These permits are granted for various periods of time; for example, Arizona (both the MD and DO boards) offer a teaching license valid for 1 year, which may be renewed for up to 4 years; California awards renewable certificates of registration for 1 to 3 years; Illinois offers visiting professor permits valid for up to 2 years; Oregon offers a 1-year limited license for either visiting professors or medical faculty that can be renewed for 1 additional year or 3 additional years, respectively.

Awarding of these licenses may be contingent on certain requirements, depending on the given jurisdiction. For example, Washington state requires 1) a letter of nomination by the dean of the University of Washington medical school or CEO of a hospital or other appropriate health care facility and 2) proof of current licensure in another state or country.

### Abbreviations
- **CME**: continuing medical education
- **GME**: graduate medical education

Note: All information should be verified with licensing board; medical licenses are granted to those physicians meeting all state requirements—at the discretion of the board.
Resident/Fellow Physician Licenses

Sixty-five jurisdictions issue educational licenses, permits, certificates, or registration to resident/fellow physicians in GME programs, with fees ranging from $0 to $425 per year. (The GME program director generally provides a list of residents/fellows and any other required information directly to the licensing jurisdiction.) In 39 of those jurisdictions, residents/fellows must obtain a new permit/license when changing residency/fellowship programs within the state.

Medical boards in 13 states require that prospective residents have passed United States Medical Licensing Examination (USMLE) Step 1 to receive a permit/license. California, Mississippi, North Dakota, Oklahoma, and Utah require passage of Steps 1 and 2.

Eighteen states require that resident/fellow physicians obtain full licensure (not limited or training licenses) at some point in their training (usually after having completed a certain number of years of GME).

Additional Notes for Specific Licensing Jurisdictions

California—Permits are awarded on an individual basis for a maximum of 5 years to noncitizen physicians for postgraduate work in a California medical school.

International medical graduates (IMGs) must submit an application to determine that all core requirements have been met before they may begin training in California.

Illinois—Limited temporary licenses (valid for 6 months) are awarded to persons in non-Illinois residency programs who are accepted for a specific period of time to perform a portion of that program at a clinical residency program in Illinois due to the lack of adequate facilities in their state.

Visiting Resident Permits are issued for 180 days to persons who have been invited or appointed for a specific period of time to perform a portion of that clinical residency program under the supervision of an Illinois-licensed physician in an Illinois patient care clinic or facility affiliated with the out-of-state GME program.

Massachusetts—Limited registration is issued to physicians enrolled in accredited residency programs and physicians enrolled in fellowships at hospitals with accredited residency programs in the area of the applicant’s specialty.

Mississippi—Institutional license is issued to first-year residents and IMGs providing health care in state institutions. Applicants are not required to meet all requirements for permanent unrestricted licensure.

Restricted temporary license is issued to physicians enrolled in first year of GME at the University of Mississippi School of Medicine for practice limited to that school.

Addictionology Fellowship License is issued to physicians admitted for treatment in a board-approved drug and/or alcohol addiction treatment program or to physicians enrolled in fellowship of addictionology of the Mississippi State Medical Association Impaired Professionals Program.

Oregon—Limited license granted to fellows for 1 year and renewed for 1 additional year. Limited license for graduate training granted annually until training is completed.

Pennsylvania—Interim limited license (up to 12 consecutive months) is issued to physicians providing medical service other than at the training location of the licensee’s accredited GME program.

Graduate license allows for participation for up to 12 consecutive months in GME within the complex of the hospital to which the licensee is assigned and any satellite facility or other training location used in the program.

South Dakota—Resident physicians practicing within the confines of their residency program are not required to obtain a certificate from the board.

A resident physician who wishes to practice on an irregular basis outside their program may apply for a resident certificate if they have completed at least 1 year of GME and remain enrolled in good standing in their program until successful completion. To apply for this certificate, they must meet South Dakota’s examination requirements for completion of the entire USMLE within a 7-year period and passing of each step within three attempts. The fee for this certificate is $50.

The essential reference for a career in health care

Health Care Careers Directory 2010-2011

The 2010–2011 edition of the Health Care Careers Directory, published by the American Medical Association (AMA), provides detailed information on more than 8,600 educational programs at 2,700 institutions encompassing 81 different health care occupations. It also lists key data from health professions accrediting agencies, making it the most authoritative resource for anyone pursuing a career in health care today.

All program data are presented in charts to help users compare various programs and find the one that is the best fit. Professional descriptions include history of profession, general duties, employment characteristics and outlook, salary ranges, educational program descriptions, and information on licensure, certification and registration.

Softbound, 8-1/2" x 11"
The single authoritative source for complete, state-by-state medical licensure requirements

**State Medical Licensure Requirements and Statistics**

As change continues to reshape the health care industry, more and more physicians need to relocate, accept a job-related transfer, or seek licensure in several states. The *State Medical Licensure Requirements and Statistics*—updated annually by the American Medical Association—presents up-to-date information on medical licensure requirements and statistics in the United States for allopathic and osteopathic physicians, recruiters, employers, and consultants who need complete, authoritative, state-by-state licensure information in one convenient volume.

All data in this invaluable resource are compiled from information received from primary sources—state boards of medical and osteopathic examiners—so there's no need to look any further to find the facts and figures you need.

Order today!
Visit [www.amabookstore.com](http://www.amabookstore.com) or call (800) 621-8335.
# 2010 Membership Application

**Yes.**

I accept your invitation for a full-year membership in the American Medical Association (AMA).

A physician or medical student who applies for direct membership in the AMA is encouraged to also join his/her state and local medical societies.

### Activate your AMA membership today.

Three easy ways:
- **Call:** (800) 262-3211
- **Fax:** (800) 262-3221
- **Mail:**
  - American Medical Association
  - Remittance Control
  - 12th floor
  - 515 N State Street
  - Chicago, IL 60654

**Let us remember for you—choose automatic renewal.**

Select automatic renewal and your membership will be reactivated yearly. No more paper dues notices will be sent to you.

Select option 1 or 2

---

<table>
<thead>
<tr>

---

**Applying for AMA membership**  
Membership is contingent upon the American Medical Association’s (AMA) acceptance of the membership application. The endorsement, deposit or registration of an applicant’s check does not guarantee admission into or acceptance of membership by the AMA. Checks received will routinely be deposited without a determination of the propriety of the payment or the applicability of the amount. Applicants who are not admitted to membership will receive a refund from the AMA for the amount submitted.

**Conditions of AMA membership and application**  
As part of a physician organization committed to strengthening the ethics of medicine, every member pledges to uphold the Principles of Medical Ethics as interpreted in the Code of Medical Ethics, and to comply with the Bylaws of the American Medical Association and the Rules of the AMA Council of Ethical and Judicial Affairs.

- **The AMA Principles and the Code of Medical Ethics may be viewed online at:**
  [www.ama-assn.org/go/codeofmedicalethics](www.ama-assn.org/go/codeofmedicalethics)
- **The AMA’s Bylaws and Rules of the Council on Ethical and Judicial Affairs are accessible at:**
  [www.ama-assn.org/policies](www.ama-assn.org/policies)

Applicants and members are required to disclose to the AMA Office of General Counsel any violations of the Principles of Medical Ethics or illegal conduct. Additionally, the Health Care Quality Improvement Act require professional societies (such as the AMA) to report certain professional review actions, including delinquency of membership, to the National Practitioner Data Bank.

*Credit card payment options*  
Changes for automatic renewal will be made each year as follows. Single payment option (1) the full fee will be charged in one lump sum in January. Installment payment option (2) 1/12 of the annual fee will be charged each month beginning in January.

Alphabetical List of Specialty Codes

<table>
<thead>
<tr>
<th>Code</th>
<th>Specialty</th>
</tr>
</thead>
<tbody>
<tr>
<td>AGC</td>
<td>Adult Cardiothoracic Anesthesiology (Anesthesiology)</td>
</tr>
<tr>
<td>ADL</td>
<td>Adolescent Medicine (Pediatrics)</td>
</tr>
<tr>
<td>ADP</td>
<td>Addiction Psychiatry (Psychiatry)</td>
</tr>
<tr>
<td>AL</td>
<td>Allergy and Immunology</td>
</tr>
<tr>
<td>AN</td>
<td>Anesthesiology</td>
</tr>
<tr>
<td>AR</td>
<td>Abdominal Radiology (Radiology-Diagnostic)</td>
</tr>
<tr>
<td>BBR</td>
<td>Blood Banking/Transfusion Medicine (Pathology)</td>
</tr>
<tr>
<td>CAP</td>
<td>Child Abuse Pediatrics (Pediatrics)</td>
</tr>
<tr>
<td>CCA</td>
<td>Critical Care Medicine (Anesthesiology)</td>
</tr>
<tr>
<td>CCM</td>
<td>Critical Care Medicine (Internal Medicine)</td>
</tr>
<tr>
<td>CCP</td>
<td>Pediatric Critical Care Medicine (Pediatrics)</td>
</tr>
<tr>
<td>CCS</td>
<td>Surgical Critical Care (General Surgery)</td>
</tr>
<tr>
<td>CD</td>
<td>Cardiovascular Disease (Internal Medicine)</td>
</tr>
<tr>
<td>CFS</td>
<td>Cranial-Spinal Surgery (Plastic Surgery)</td>
</tr>
<tr>
<td>CHN</td>
<td>Child Neurology</td>
</tr>
<tr>
<td>CHP</td>
<td>Child and Adolescent Psychiatry (Psychiatry)</td>
</tr>
<tr>
<td>CHS</td>
<td>Congenital Cardiac Surgery (Thoracic Surgery)</td>
</tr>
<tr>
<td>CN</td>
<td>Clinical Neurophysiology (Neurology)</td>
</tr>
<tr>
<td>CFP</td>
<td>Pediatrics/Psychiatry/Child and Adolescent Psychiatry</td>
</tr>
<tr>
<td>CRS</td>
<td>Colon and Rectal Surgery</td>
</tr>
<tr>
<td>CTR</td>
<td>Cardiopulmonary Radiology (Radiology-Diagnostic)</td>
</tr>
<tr>
<td>D</td>
<td>Dermatology</td>
</tr>
<tr>
<td>DDP</td>
<td>Developmental-Behavioral Pediatrics (Pediatrics)</td>
</tr>
<tr>
<td>DMP</td>
<td>Dermatopathology</td>
</tr>
<tr>
<td>DNN</td>
<td>Diagnostic Radiology/Nuclear Medicine (Nuclear Radiology)</td>
</tr>
<tr>
<td>DR</td>
<td>Radiology Diagnostic</td>
</tr>
<tr>
<td>ERM</td>
<td>Emergency Medicine/Family Medicine</td>
</tr>
<tr>
<td>EM</td>
<td>Emergency Medicine</td>
</tr>
<tr>
<td>EMP</td>
<td>Pediatrics/Emergency Medicine</td>
</tr>
<tr>
<td>EN</td>
<td>Endocrinology, Diabetes, and Metabolism</td>
</tr>
<tr>
<td>ENR</td>
<td>Endovascular Surgical Neuroradiology (Neurology)</td>
</tr>
<tr>
<td>ESM</td>
<td>Sports Medicine (Emergency Medicine)</td>
</tr>
<tr>
<td>ESN</td>
<td>Endovascular Surgical Neuroradiology (Radiology)</td>
</tr>
<tr>
<td>ETX</td>
<td>Medical Toxicology (Emergency Medicine)</td>
</tr>
<tr>
<td>FMP</td>
<td>Family Medicine/Preventive Medicine</td>
</tr>
<tr>
<td>FOP</td>
<td>Forensic Pathology (Pathology)</td>
</tr>
<tr>
<td>FP</td>
<td>Family Medicine</td>
</tr>
<tr>
<td>FPP</td>
<td>Geriatric Medicine (Family Medicine)</td>
</tr>
<tr>
<td>FPP</td>
<td>Geriatric Medicine (Family Medicine)</td>
</tr>
<tr>
<td>FPM</td>
<td>Geriatric Medicine (Pathology)</td>
</tr>
<tr>
<td>FSM</td>
<td>Sports Medicine (Family Medicine)</td>
</tr>
<tr>
<td>GE</td>
<td>Gastroenterology (Internal Medicine)</td>
</tr>
<tr>
<td>HEM</td>
<td>Hematology (Internal Medicine)</td>
</tr>
<tr>
<td>HMP</td>
<td>Hematology (Pathology)</td>
</tr>
<tr>
<td>HO</td>
<td>Hematology and Oncology (Internal Medicine)</td>
</tr>
<tr>
<td>RPM</td>
<td>Hospice and Palliative Medicine</td>
</tr>
<tr>
<td>HSP</td>
<td>Hand Surgery (Orthopaedic Surgery)</td>
</tr>
<tr>
<td>HSS</td>
<td>Hand Surgery (Plastic Surgery)</td>
</tr>
<tr>
<td>IC</td>
<td>Interventional Cardiology (Internal Medicine)</td>
</tr>
<tr>
<td>IEC</td>
<td>Internal Medicine/Emergency Medicine/Critical Care Medicine</td>
</tr>
<tr>
<td>IFP</td>
<td>Internal Medicine/Family Medicine</td>
</tr>
<tr>
<td>IM</td>
<td>Internal Medicine</td>
</tr>
<tr>
<td>IMD</td>
<td>Internal Medicine/Dermatology</td>
</tr>
<tr>
<td>IMG</td>
<td>Geriatric Medicine (Internal Medicine)</td>
</tr>
<tr>
<td>INM</td>
<td>Internal Medicine/Nuclear Medicine</td>
</tr>
<tr>
<td>IPM</td>
<td>Internal Medicine/Preventive Medicine</td>
</tr>
<tr>
<td>MBG</td>
<td>Medical Biochemical Genetics (Medical Genetics)</td>
</tr>
<tr>
<td>MDG</td>
<td>Internal Medicine/Medical Genetics</td>
</tr>
<tr>
<td>MEM</td>
<td>Internal Medicine/Emergency Medicine</td>
</tr>
<tr>
<td>MG</td>
<td>Medical Genetics</td>
</tr>
<tr>
<td>MGP</td>
<td>Molecular Genetic Pathology (Medical Genetics)</td>
</tr>
<tr>
<td>MM</td>
<td>Medical Microbiology (Pathology)</td>
</tr>
<tr>
<td>MN</td>
<td>Neurology</td>
</tr>
<tr>
<td>NDD</td>
<td>Neurodevelopmental Disabilities (Neurology)</td>
</tr>
<tr>
<td>NFP</td>
<td>Nephrology (Internal Medicine)</td>
</tr>
<tr>
<td>NM</td>
<td>Nuclear Medicine</td>
</tr>
<tr>
<td>NNM</td>
<td>Neuromuscular Neurology (Neurology)</td>
</tr>
<tr>
<td>NMP</td>
<td>Neuromuscular Medicine (Neurology)</td>
</tr>
<tr>
<td>NPM</td>
<td>Neurological Medicine (Neurology)</td>
</tr>
<tr>
<td>NRD</td>
<td>Nuclear Radiology (Radiology-Diagnostic)</td>
</tr>
<tr>
<td>NRR</td>
<td>Nuclear Radiology (Pathology)</td>
</tr>
<tr>
<td>NNN</td>
<td>Nuclear Radiology (Neurology)</td>
</tr>
<tr>
<td>NS</td>
<td>Neurological Surgery</td>
</tr>
<tr>
<td>OAR</td>
<td>Adult Reconstructive Orthopaedics (Orthopaedic Surgery)</td>
</tr>
<tr>
<td>OBG</td>
<td>Obstetrics and Gynecology</td>
</tr>
<tr>
<td>OPA</td>
<td>Foot and Ankle Orthopaedics (Orthopaedic Surgery)</td>
</tr>
<tr>
<td>OPM</td>
<td>Musculoskeletal Oncology (Orthopaedic Surgery)</td>
</tr>
<tr>
<td>ON</td>
<td>Oncology (Internal Medicine)</td>
</tr>
<tr>
<td>OP</td>
<td>Pediatric Orthopedics (Orthopaedic Surgery)</td>
</tr>
<tr>
<td>OPH</td>
<td>Ophthalmology</td>
</tr>
<tr>
<td>OR</td>
<td>Orthopaedic Trauma (Orthopaedic Surgery)</td>
</tr>
<tr>
<td>P</td>
<td>Psychiatry</td>
</tr>
<tr>
<td>PAN</td>
<td>Pediatric Anesthesiology (Anesthesiology)</td>
</tr>
<tr>
<td>PVC</td>
<td>Pulmonary Disease and Critical Care Medicine (Internal Medicine)</td>
</tr>
<tr>
<td>PCH</td>
<td>Chemical Pathology (Pathology)</td>
</tr>
<tr>
<td>PCP</td>
<td>Cytopathology (Pathology)</td>
</tr>
<tr>
<td>PD</td>
<td>Pediatrics</td>
</tr>
<tr>
<td>PDC</td>
<td>Pediatric Cardiology (Pediatrics)</td>
</tr>
<tr>
<td>PED</td>
<td>Pediatric Endocrinology (Endocrinology)</td>
</tr>
<tr>
<td>PDI</td>
<td>Pediatric Infectious Diseases (Pediatrics)</td>
</tr>
<tr>
<td>PDM</td>
<td>Pediatrics/Dermatology</td>
</tr>
<tr>
<td>PDP</td>
<td>Pediatric Otolaryngology (Otolaryngology)</td>
</tr>
<tr>
<td>PDR</td>
<td>Pediatric Pulmonology (Pulmonology)</td>
</tr>
<tr>
<td>PDF</td>
<td>Pediatric Radiology (Radiology-Diagnostic)</td>
</tr>
<tr>
<td>PDS</td>
<td>Pediatric Pulmonology (Pulmonology)</td>
</tr>
<tr>
<td>PEM</td>
<td>Pediatric Emergency Medicine (Emergency Medicine)</td>
</tr>
<tr>
<td>PFF</td>
<td>Pediatric Forensic Pathology (Psychiatry)</td>
