2011-2012
AMA National Health Care Policy Agenda

The AMA believes that all Americans are worthy of a fair and affordable health system. Today, Americans are faced with a fragmented health system. Millions don’t visit a physician until their illness reaches a serious stage. As a nation, we can and should do better.

At the center of the AMA’s vision is the concept that every American, regardless of means, has health insurance. And every patient maintains the freedom to choose his or her own physicians and/or health care professionals and health plans, and maintains control over his or her own care. For a senior, this includes having ready access to physicians and/or health care professionals in the Medicare program. For a pregnant woman, it means finding a physician and/or health care professional who hasn’t been forced out of business by high liability insurance rates. And for everyone, it means receiving the best care possible. Specifically:

- The AMA urges lawmakers to implement a system of tax credits to enable individuals to buy health insurance. We have a detailed proposal for this system.
- Under current law, Medicare will make deep cuts in payments to physicians and/or health care professionals every year until 2015. This policy erodes patient access to care and is a barrier to practice innovations. Congress and the Administration need to permanently replace the flawed payment formula.
- Medical lawsuits are driving up health costs for everyone and making it hard for many to find a physician. The AMA seeks reasonable limits on the noneconomic damages juries can award so that physicians and/or health care professionals aren’t forced to move, cut services, or go out of business.

Physicians and health care professionals must work with government and private payers on strategies to restrain rising health care costs while maintaining quality of care. Medical science and technology have moved forward at a lightning pace. Patients are ready for the American health system to follow suit. The AMA is committed to:

- Finding new ways to enable physicians and/or health care professionals to use promising new technology
- Pioneering new methods to measure and improve the quality of care
- Preventing errors by studying ones that have happened, without the threat of lawsuits
- Directing more resources and effort toward disease prevention
- Helping Americans lead more healthful lifestyles
- Eliminating gaps in care, particularly for racial and ethnic minority patients, the elderly, and low-income families
- Preparing better for large-scale health care emergencies

Our nation needs a well-trained medical work force, and more physicians in primary care. We must make sure our medical education stays the best in the world, and make paying for it less burdensome. So too must we address the barriers that threaten the viability of many physician and/or health care professional practices, such as:

- Payments that do not reflect the true cost of providing care
- Potentially improper business practices of health insurers
- Antitrust rules that restrict physicians from negotiating with health insurance companies

As physicians and medical students, we see firsthand every day how urgently our patients need a better health system. Together, we can shape one that Americans truly deserve. Visit www.ama-assn.org/go/advocacy to learn more.
AMA Medical Education Publications and Products

Graduate Medical Education Directory
Includes contact information for more than 9,200 ACGME-accredited and combined specialty programs and more than 3,400 GME teaching institutions. Also included are medical specialty board certification requirements, a list of US medical schools, and a GME glossary.
OP416711 $83 ($63 for AMA members)

Graduate Medical Education Library on CD-ROM
Combines all information from the text version of the Directory with advanced search functions to help you find the program or institution you're looking for. Its Web browser interface allows for quick, easy access to all program and institution data and links to program Web sites; XML format allows for quick data sorts and program comparison. Also includes copies of each Directory since 1996-1997.
OP420011 $115 ($85 for AMA members)

Electronic State-level GME Data
Aggregate statistics for each state on all resident physicians, in Adobe Acrobat format. Specific information available by state and specialty includes the number of resident physicians according to gender, race/ethnicity, and type of medical school attended. In addition, readers can determine the number of resident physicians training in the same state where they attended medical school.
Call (312) 464-4659 to order $20 to $50

FREIDA Online
www.ama-assn.org/go/freida
Internet database offers free access to residency/fellowship program information. Users can search by specialty/subspecialty or state/region, among other criteria. Listings include program contact information as well as data on compensation and other benefits, resident-to-faculty ratio, work schedule, policies, and educational environment.

Guidebook for GME Directors and Coordinators
www.ama-assn.org/go/gmeguidebook
Available online, this free guidebook provides pertinent and valuable information to directors/coordinators on all facets of AMA involvement in GME, as well as contact information for the ACGME, ABMS specialty boards, FSMB, state medical boards, and specialty societies that are part of the AMA Federation.

Medical Education Bulletin
Published twice a year, this free newsletter covers issues of interest to the undergraduate and graduate medical education community, including updates on AMA actions related to medical education at the annual and interim meetings of the AMA House of Delegates. To be put on the mailing list for the bulletin, contact Sylvia I. Etzel, Editor, (312) 464-4693, sylvia.etzel@ama-assn.org.

State Medical Licensure Requirements and Statistics
Key state-by-state data on licensing requirements, fees, license renewal, continuing medical education requirements, and exam pass/fail percentages; intended for credentialing agents, physicians, recruiters, employers, and consultants who need complete information in one source.
OP399011 $90 ($65 for AMA members)

Continuing Professional Development of Physicians: From Research to Practice
Continuing Professional Development (CPD) of physicians, formerly known as continuing medical education, greatly expands what physicians can do with the help of educational experts to provide optimal patient care. This book takes the concept of CPD and turns it from theory into practice, as an agent for positive physician performance change, embracing a broad view of lifelong learning for physicians.
OP230503 $79 ($60 for AMA members)

Health Care Careers Directory
Provides information on 8,600 educational programs and 2,800 educational institutions in 82 different professions, including radiographer, physician assistant, medical assistant, music therapist, and more.
OP417511 $70 ($55 for AMA members)

Subscribe to the free GME e-Letter!
To help stay up-to-date on news and information in the world of graduate medical education, subscribe to the AMA's GME e-Letter, a free monthly electronic newsletter.

Here’s what our readers are saying:
• “Clear, concise, and relevant”
• “Very useful since it is focused, brief and contains information of importance to program directors.”
• “Loved the e-Letter. Thought it was well-written, informative and appropriately succinct.”
• “A great resource and the best way to share cutting-edge news re: GME.”

Preface

The Graduate Medical Education Directory (96th edition), published by the American Medical Association (AMA), lists programs accredited by the Accreditation Council for Graduate Medical Education (ACGME).

The Directory provides medical students with a list of accredited graduate medical education (GME) programs in the United States, which aids them in making important professional decisions. State licensing boards, specialty societies, and hospitals refer to the Directory to verify the authenticity of programs presented by physicians who wish to qualify for licensure, certification, or hospital privileges. The Directory provides a unique historical record of accredited GME programs and background information about the ACGME accreditation process.

Contents of the Directory

Section I—Graduate Medical Education Information—provides descriptions of various organizations involved in GME, including the ACGME, National Resident Matching Program (NRMP), Electronic Residency Application Service (ERAS), and Educational Commission for Foreign Medical Graduates (ECFMG), as well as information on AMA products, projects, and initiatives relevant to medical students, residents/fellows, program directors, and academic physicians.

Section II—Specialty/Subspecialty Information and Programs—provides descriptions of and data for all specialties/subspecialties with ACGME-accredited residency/fellowship programs and/or ACGME Program Requirements in effect. Also included are subspecialties for which a member board of the American Board of Medical Specialties (ABMS) offers certification.

In addition, a list of accredited GME programs is included in this section. The data published in this edition were transferred from the ACGME to the AMA on January 19, 2011. Programs with accreditation status as of December 31, 2010, or earlier are listed. If specialty programs standing alone, and shorter than all of its subspecialty programs are separately accredited by the ACGME through its respective specialty review committee. The duration of combined training is longer than any one of its component specialty programs standing alone, and shorter than all of its component specialty programs together.

Appendix A—Combined Specialty Programs—provides information on programs that offer combined specialty training. Combined training consists of a coherent educational experience in two or more closely related specialty or subspecialty programs. The educational plan for combined training is approved by the specialty board of each of the specialties to assure that resident physicians completing combined training are eligible for board certification in each of the component specialties. Each specialty or subspecialty program is separately accredited by the ACGME through its respective specialty review committee. The duration of combined training is longer than any one of its component specialty programs together.

Appendix B—Medical Specialty Board Certification Requirements—contains information about the American Board of Medical Specialties (ABMS) and the certification requirements for each of the 24 member boards of the ABMS. Certification is the process by which a medical specialty board grants recognition to a physician who has met certain predetermined qualifications, as specified by the board. Certification requirements are also published and available from each medical specialty board. Questions concerning certification requirements should be directed to the particular specialty board office listed in Appendix B.

Appendix C—Medical Schools in the United States—contains a list of US medical schools accredited by the Liaison Committee on Medical Education (LCME), including the identification number, name, and location of each LCME-accredited medical school.

Appendix D—Graduate Medical Education Glossary—defines various terms commonly used in GME.

Appendix E—Listings of Subspecialty and Fellowship Programs—provides information on subspecialty and fellowship programs outside the purview of the ACGME accreditation process.

Appendix F—Medical Licensure Information—contains an article on the basics of medical licensure, in addition to information on GME-related licensure policies of state medical boards, as published in the AMA's State Medical Licensure Requirements and Statistics 2011.

Production of the Directory

The work of the ACGME’s review committees, which review and evaluate programs and sponsoring institutions, provide the basis for program and institutional information included in Sections II through IV of the Directory. The ACGME shares its data on accreditation actions and program changes with the AMA quarterly for the exclusive purpose of maintaining an accurate database to benefit programs, residents, applicants, and the public. The AMA, in turn, shares with the ACGME information collected through its annual survey of GME programs, but program directors are reminded that most review committees require prompt notification in writing of changes in the program’s leadership. Providing information on program director changes through the National GME Census does not meet this requirement. In addition, most review committees require a current copy of the curriculum vitae for new program directors.

The Directory, as the official list of ACGME-accredited programs, generally reflects accreditation actions completed by December of the previous year. The data published in this edition were transferred from the ACGME to the AMA in January 2011. Readers are reminded that accreditation actions and related changes can alter the ACGME program population on a daily basis, and that the Directory serves only as a “snapshot” of this population at a given
moment. For the most current information on ACGME-accredited programs, consult the ACGME web site: www.acgme.org.

The data for combined programs listed in Appendix A were obtained via the National GME Census (see Section I for more information).

Disclaimer
It is the AMA’s understanding that all institutions listed in the Graduate Medical Education Directory are required by law to include the phrase “EEO, M/F/D/V” (Equal Employment Opportunity, Minority/Female/Disabled/Veteran) on any information distributed for public view.

Back Issues of the Directory
Copies of previous editions of the Directory are available for purchase at $25 per copy. For more information or to order, please call (312) 464-4635. In addition, the CD-ROM version of the Directory contains PDFs of editions from 1996-1997 to the present.

Special Acknowledgment to the ACGME
The AMA gratefully acknowledges the cooperation of the Accreditation Council for Graduate Medical Education (ACGME) in supplying the list of programs accredited by the ACGME and sponsoring/participating institutions and relevant information about the ACGME and its accreditation process. The AMA thanks all RRC executive directors and accreditation administrators as well as ACGME staff Jeanne Heard, MD, PhD, Ingrid Philibert, John Nylen, MBA, Rebecca Miller, MS, and Julie Jacob for their many ongoing contributions to the Directory.

Acknowledgments
Many people contributed to the publication of this edition of the Graduate Medical Education Directory. In addition to collaborative efforts with the ACGME (see “Special Acknowledgment,” above), the ABMS and staff of the member boards of the ABMS provided requirements for certification in each of the medical specialties and subspecialties. Special acknowledgment is also given to the following groups and individuals:

- **AMA Department of Data Collection**, for data collection and information resources management: Chris Mathews, Patrick Cook, John Wals, and Tammy Stockton.
- **Association of American Medical Colleges**, for its collaboration with the AMA in collecting data on residency programs via the National GME Census: Gwen Garrison and Fesum Kebede.
- **AMA Books and Products Group** (listed on p ii).
- **AMA Medical Education Group**, for data cleaning, QA, and editorial advising and assistance: Sarah Brotherton, PhD, Sylvia Etzel, Jacqueline Drake, Barbara Barzansky, PhD, Jeanette Harmon, and Jacqueline Edwards.

In addition, we would like to acknowledge the many contributions of the following individuals/or organizations for assistance with the indicated sections/appendices of this book:

**Section I**

- **Careers in Medicine**—George V Richard, PhD
- **Choosing a Medical Specialty**—Rebecca Gierhahn, AMA Medical Student Section
- **Succeeding from Medical School to Practice**—Jon Fanning, Anu Gupta, AMA Resident and Fellow Section
- **Electronic Residency Application Service**—Renee Overton
- **Find a Residency or Fellowship**—Jon Fanning, Anu Gupta, AMA Resident and Fellow Section
- **National Resident Matching Program**—Mona Signer

**Section II**

- **American Board of Medical Specialties**—Lori Boukas, Sylvia McGreal
- **Modern Healthcare**—Dave Burda, Rebecca Mielcarski

We would also like to recognize the many contributions of Rod Hill of North Coast Associates, the typesetter of this publication.

Fred Donini-Lenhoff, MA, Editor
Paul H Rockey, MD, MPH, Director, Division of Graduate Medical Education
## A. Residency Application and Career Planning Resources

### Match Timeline

<table>
<thead>
<tr>
<th>Class Year</th>
<th>Period</th>
<th>Suggested Activities and Tasks</th>
</tr>
</thead>
</table>
| **Year 3** | October - March    | • Begin working on your curriculum vitae (CV). Crafting a high quality CV can take 8-10 hours. Information for the CV can be used in the ERAS application and provided to those writing your letters of recommendation  
• Review the AAMC/NRMP Charting Outcomes in the Match report to assess qualifications and competitiveness for different specialties |
|            | February - June    | • Review residency programs and physician workforce data through the AAMC Careers in Medicine Specialty Pages and FREIDA Online  
• Depending on your school’s schedule, make an appointment with your Associate Dean to discuss the Medical School Performance Evaluation (MSPE) process (at some schools this may occur later in the year)  
• Write your personal statement and have your advisor review it |
|            | Summer             | • Obtain your ERAS token (a special code) from your advisor or the Student Affairs dean’s office  
• Register for early Match, if applicable |
| **Year 4** | July - September   | • Complete the ERAS application using the MyERAS site (https://www.aamc.org/medicalstudents/eras), including the designation of programs where your application is to be transmitted  
• Identify additional faculty for writing letters of recommendation |
|            | September - October| • Begin preparing for residency interviews  
• Register with the National Resident Matching Program (NRMP) for the Main Residency Match  
• If you haven’t taken the USMLE Step 2, consider using this time to prepare  
• Download residency program data from FREIDA Online (AMA members) |
|            | October - January  | • MSPE released November 1  
• Residency interviews  
• Early Match deadlines usually occur in early or mid-January |
|            | January - February | • Begin entering your Rank Order List for the NRMP Match |
|            | March              | • Un-Matched students eligible for SOAP apply through ERAS to unfilled programs early Match week.  
• Match Day—the third Friday in March; results are formally announced at 12:00pm EDT at medical school Match Day ceremonies and released at 1:00 p.m. EDT on the Web |
|            | April - June       | • Sign the contract with your residency program  
• Graduate and prepare to begin residency – Congratulations!  
• Begin preparations for moving |
|            | June - July        | • Residency begins |

Fellowship and Residency Electronic Interactive Database Access (FREIDA) Online

FREIDA Online is a free Internet database of approximately 8,900 graduate medical education programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) or approved by member boards of the American Board of Medical Specialties.

Users of FREIDA Online can search the database by specialty/subspecialty or state/region, among other criteria. The SearchPlus feature also allows users to compare programs by features of importance, such as number of first-year positions, salary, and program setting. In addition, FREIDA Online also displays aggregate statistics for each specialty and subspecialty, providing averages and percents, for example, on the average number of faculty per program in the specialty, or the average number of hours on-duty.

AMA student and resident members can save their favorite programs in an electronic folder, download select FREIDA Online data fields for their own use, and print their own mailing labels to contact programs.

GME programs update data for FREIDA Online via the National GME Census, an annual survey conducted by the AMA and Association of American Medical Colleges. The survey instrument, GME Census, is available online at www.ama-assn.org/gmemcensus.

Programs: Modifying Your FREIDA Online Listing

In addition to providing data via the National GME Census, as explained above, program directors and staff can also modify the basic information that appears on FREIDA Online throughout the year by accessing www.ama-assn.org/go/freida.

For example, if there is a new program director or a new contact person, you can make these changes on FREIDA Online directly. Changes are reviewed by FREIDA staff before the data are updated; changes are generally made within a few days. Program personnel can also email changes to freida@ama-assn.org.

FREIDA Online Listings: Basic and Expanded

All programs listed in FREIDA include the following Basic Listing:
- Program name
- Program identifier (eg, 120-36-21-000)
- Specialty/subspecialty (eg, family medicine)
- Program director (name, mailing address, phone, fax, e-mail, Web address)
- Person to contact for more information about the program (name, mailing address, phone, fax, e-mail)
- Accredited length; required length
- Accepting applications
- Program start date
- Participates in ERAS
- Affiliated with US government
- Institution list (sponsor and participant[s])

In addition, programs that select the Expanded Detailed Listing option (as the majority of programs do) provide the following information to students and residents:

General information
- Comments (used to highlight special qualities about the program, such as special features or description of surrounding hospital setting)
- Total program size (by year)
- Primary teaching site (eg, City University Hospital)
- Primary teaching site uses electronic medical records
- Program best described as (eg, community-based hospital)
- Previous GME required
- Preliminary positions offered
- Information on USMLE Step 2-CS
- Participation in National Resident Matching Program (NRMP); code(s)
- Participation in San Francisco Match
- Participation in another matching program
- Number of interviews conducted last year for first-year positions
- Required letters of recommendation
- Earliest date for applications; latest date for applications; interview period
- Citizenship/visa status expectations for IMGs

Program faculty
- Number of faculty (physician and nonphysician)
- Full-time and part-time physicians and nonphysicians
- Percentage of full-time equivalent female physician faculty
- Ratio of full-time equivalent paid faculty to positions

Work schedule
- Average hours/week on duty during first year (excluding beeper call)
- Maximum consecutive hours on duty during first year (excluding beeper call)
- Average number of 24-hour off-duty periods per week during first year
- Moonlighting allowed by program
- Night float system (residents do/do not participate during first year)
- Management of resident fatigue
- Call schedule (by year)
- Most taxing schedule and frequency per year
- Beeper or home call (weeks/year)

Educational environment

Educational setting
- Average hours/week of regularly scheduled lectures/conferences
- Percent training at hospital outpatient clinics
- Percent training in ambulatory non-hospital community-based settings, eg, physician offices, community clinics

Educational benefits
- Physician impairment prevention curriculum
- Program to assess/enhance medical professionalism
- Debt management/financial counseling
- Formal program to develop teaching skills
- Formal program to foster interdisciplinary teamwork
- Formal mentoring program
- Continuous quality improvement training
- International experience
- Resident/fellow retreats
- Off-campus electives
- Hospice/home care experience
- Cultural competence awareness
- Instruction in medical Spanish or other non-English language
- Alternative/complementary medicine curriculum
- Training in identifying and reporting of domestic violence/abuse
- MPH/MBA or PhD training
- Research rotation

Educational features
- Offers additional training or educational experience beyond accredited length
- Offers a primary care track, rural track, women’s health track, hospitalist track, research track/nonaccredited fellowship, and/or another special track

Resident Evaluation
- Yearly specialty in-service examination required
- Patient surveys
• Portfolio system
• 360-degree evaluations
• Objective structured clinical examinations (OSCE)

Program evaluation
• Program graduation rates
• Board certification rates
• In-training examination scores
• Performance-based assessment scores (eg, OSCE)

Employment policies and benefits
• Part-time/shared positions
• On-site child care; subsidized child care
• Allowance/stipend for professional expenses
• Leave for educational meetings/conferences
• Moving allowance
• Housing stipend
• On-call meal allowance
• Parking
• PDAs available
• Job placement assistance
• Cross coverage in case of illness/disability

Compensation and leave (by year)
• Salary compensation
• Vacation weeks
• Sick days

Leave availability
• Maximum number of paid and unpaid days for family/medical leave

Major medical benefits
• Major medical insurance for residents and dependents
• Outpatient/inpatient mental health insurance
• Group life insurance
• Dental insurance
• Disability insurance
• Disability insurance for occupationally acquired HIV

When medical insurance coverage begins

Pricing for Expanded Detailed Listing in FREIDA Online
• $90 Subspecialty program
• $160 Specialty program

Note: As an added bonus for those programs that choose an expanded listing in FREIDA Online, the CD-ROM includes a link to those programs’ FREIDA Online listing, under “Other Information.”

Program Information
• Program name
• Program setting
• Accredited length (years)
• Years required
• Program size
• Graduate Year 1 (GY1) positions
• Requires prior GME (years)

Work Schedule
• Average hours/week duty
• Maximum hours consecutive duty
• Most taxing call schedule
• Duration
• Moonlighting allowed
• Employment policies/benefits
• Salary, program year one
• On-site child care
• Part-time/shared positions
• Multiple start dates

Educational Curriculum
• Continuous quality improvement
• International experience
• Resident/fellow retreats
• Off-campus electives
• Hospice/home care experience
• Cultural competence awareness
• Non-English language instruction
• Alternative/complementary medicine
• Research rotation/duration

Additional Training
• MPH/MBA training or PhD training
• Offers additional training
• Requires additional training
• Additional training length

Other Information
• FREIDA listing
• Plastic surgery integrated model
• Preventive medicine specialty area
• Military
• Subspecialty code(s)
• Sponsoring specialty

Contact Information
• Sponsoring institution
• Major participating institution(s)
• Program director and program codirector
• Address
• Phone/fax/e-mail

GME Library on CD-ROM
The Graduate Medical Education Library on CD-ROM combines all information from the text version of the Directory with advanced search functions to help users find the program or institution they’re seeking. Its Web browser interface—no installation required—allows for quick, easy access to all program and institution data and many clickable links, including hyperlinks to program Web sites.

The CD-ROM also includes archive copies of each year’s Directory since 1996-1997. The CD’s XML capabilities allow for quick data sorts and program comparison by a large number of data variables, including the majority of those listed below. These data are derived from the National GME Census, as are the data for FREIDA Online.

Note: As an added bonus for those programs that choose an expanded listing in FREIDA Online, the CD-ROM includes a link to those programs’ FREIDA Online listing, under “Other Information.”

Careers in Medicine
Careers in Medicine is a comprehensive, four-phase career planning and development program sponsored by the Association of American Medical Colleges (AAMC). Designed to equip medical students with the skills and information needed to make informed career decisions, it focuses on helping students understand their medical career options, select their specialty, and apply to a residency program that fits their career goals. The program is offered in conjunction with medical school staff, and can also be accessed via the Internet at www.aamc.org/careersinmedicine.

As students work through the program they engage in a process of self-understanding, career exploration, decision-making, and career planning. They can assess their career interests, values, personality, and skills online and view results at any time through their private Personal Profile. Of special interest to students exploring specialty options are the Careers in Medicine Specialty Pages, which provide comprehensive information for 128 specialty and subspecialty areas, including nature of the work, personal characteristics, residency/fellowship training requirements, Match results, workforce statistics, physician compensation, and links to over 1,000 specialty associations, journals, and newsletters.

Careers in Medicine offers guidance and interactive decision-making tools for making these important career decisions. Students can cycle through the program several times during medical school as they develop increasingly more refined views of their preferred career paths. The program is currently available to all AAMC-member US and Canadian medical schools. It is also available to medical students in osteopathic medical schools that have completed licensing agreements with the AAMC. Staffs in medical schools offer workshops using the Careers in Medicine model throughout all 4 years of medical school.

To obtain information about the program and to find out more about accessing the password-protected Web site, students should contact their Careers in Medicine Liaison, or the student affairs dean, in their medical school. Residents should contact the Careers in Medicine Office at careersinmedicine@aamc.org.

Choosing a Medical Specialty
Since 1994, the AMA Medical Student Section has maintained Choosing a Medical Specialty, a bibliography of current sources for information on the medical and surgical specialties for students preparing to enter into the residency selection process. This online publication directs students to numerous resources available to help them make informed career choices.

ERAS
ERAS®—the Electronic Residency Application Service, provided by the AAMC—has been working together with applicants, medical schools, and training programs to streamline the application process for 15 years. Using the ERAS service, applicants to residency and fellowship programs transmit applications and supporting documents to training programs over the Internet. Each year, the ERAS system transmits more than 25 million documents, bypassing the laborious paper process and the US Postal Service.

Specialties using ERAS 2012 (residency positions begin July 2013) include:
• Anesthesiology (most positions begin July 2013)
• Dermatology (most positions begin July 2013)
• Diagnostic Radiology (positions begin July 2013)
• Emergency Medicine
• Family Medicine
• Family Medicine/Physical Medicine and Rehabilitation combined programs
• Internal Medicine (preliminary and categorical)
• Internal Medicine/Dermatology combined programs
• Internal Medicine/Emergency Medicine combined programs
• Internal Medicine/Family Medicine combined programs
• Internal Medicine/Medical Genetics combined programs
• Internal Medicine/Pediatrics combined programs
• Internal Medicine/Physical Medicine and Rehabilitation combined programs
• Internal Medicine/Psychiatry combined programs
• Neurological Surgery
• Neurology
• Nuclear Medicine
• Obstetrics/Gynecology
• Orthopaedic Surgery
• Otolaryngology
• Pathology
• Pediatrics
• Pediatrics/Emergency Medicine combined programs
• Pediatrics/Medical Genetics combined programs
• Pediatrics/Physical Medicine and Rehabilitation combined programs
• Pediatrics/Psychiatry/Child Psychiatry Triple Board programs
• Physical Medicine and Rehabilitation (most positions begin July 2013)
• Plastic Surgery Integrated Programs offering PGY1 positions
• Preventive Medicine
• Psychiatry
• Psychiatry/Neurology
• Radiation Oncology
• Surgery (General)
• Thoracic Surgery - Integrated
• Transitional Year
• Urology
• Vascular Surgery - Integrated
• All US Army/Navy programs offering PGY1 positions

Having successfully implemented ERAS in residency specialties, the service focused its attention on offering fellowship applicants and programs the same benefits available to residency participants. ERAS Fellowships, introduced in 2003, offers two cycles for fellowship applications. The July application cycle has fellowship programs receiving applications in July for positions that commence 12 months later. The December application cycle has programs receiving applications in December for positions that begin 18 months later. Fellowship specialties using ERAS 2012 include:
July Application Cycle Specialties
(Apply July 2011; Positions begin July 2012)
• Adolescent Medicine (Pediatrics)*
• Colon and Rectal Surgery
• Geriatric Medicine (Family Practice and Internal Medicine)
• Medical Genetics
• Pediatric Critical Care
• Pediatric Rheumatology
• Pediatric Emergency Medicine (Emergency Medicine and Pediatrics)

December Application Cycle Specialties
(Apply December 2010; Positions begin July 2013)
• Asthma, Allergy and Immunology
• Cardiovascular Disease
• Endocrinology, Diabetes and Metabolism
• Female Pelvic Medicine and Reconstructive Surgery
• Gastroenterology
• Gynecologic Oncology
• Hospice and Palliative Medicine
• Hematology and Oncology
• Infectious Diseases
• Interventional Cardiology
• Maternal-Fetal Medicine
• Neonatal-Perinatal Medicine
• Nephrology
• Pediatric Cardiology
• Pediatric Endocrinology
• Pediatric Gastroenterology
• Pediatric Hematology-Oncology
• Pediatric Infectious Diseases
• Pediatric Nephrology
• Pediatric Pulmonary Disease
• Pediatric Surgery
• Pulmonary Disease and Critical Care Medicine
• Rheumatology
• Sleep Medicine*
• Thoracic Surgery
• Vascular Surgery
* Specialties debuting in ERAS 2012

Residency students and graduates of US medical schools should contact the student affairs office at their medical schools of graduation for information about ERAS. Students and graduates of foreign medical schools should contact the Educational Commission for Foreign Medical Graduates (ECFMG). All fellowship applicants, including US and international graduates, should contact the ERAS Fellowships Document Office (EFDO). General information about ERAS, including EFDO contact information and participating programs, is available at www.aamc.org/eras.

Succeeding from Medical School to Practice
Succeeding from Medical School to Practice (www.ama-assn.org/go/succeeding) is a comprehensive resource that helps medical students, residents, fellows, and young physicians prepare for a successful career in medicine and confront the many nonclinical demands of training and the practice environment. Developed by your physician colleagues, this easy-to-navigate resource features tips, links, and streaming video organized into three sections.

Medical school and residency
• How to prepare for the match
• What are the duty hour standards and how to deal with violations
• What are the requirements for board certification
• How is medical education funded
• How to take advantage of foreign residency rotations
• How to budget and manage personal finances

Preparing for practice
• How to get credentialed and obtain hospital privileges
• Weighing your options—medical practice start-up, purchase or buy-in
• What to look for in medical liability and disability insurance policies
• What does physician profiling mean to you
• What to consider in selecting a practice setting and geographical location

Joining, purchasing, or starting a practice
• How to negotiate an employment contract
• How to value a medical practice for purchase or buy-in
• How to write a business plan, estimate costs and set up a practice
• How to build a practice through marketing
• How to deal with the challenges of managed care and claims management

Transitioning to Residency: What Medical Students Need to Know
The AMA’s Minority Affairs Consortium (MAC) has developed this online resource for medical students transitioning into residency training programs. The information is meant to provide an overview of the planning, application, and selection process from the personal viewpoints of MAC members who have successfully gone through the process themselves.

Sections include the following:
• Getting Ready: Medical School Years 1-3
• The Residency Application: Information & Procedures
• The Application Process: A Timetable for Success
• Writing Your Personal Statement
• Selecting Your Residency Programs
• The Residency Interview: Making the Most of It
• Not Matched? The Decision to Reapply
• Making the Most of Your Residency
• Residency Programs: An Inside Look
• General Residency Questions

Visit the MAC web site: www.ama-assn.org/go/mac
AMA Minority Affairs Consortium

E-mail: mps@ama-assn.org

The Residency Interview: A Guide for Medical Students
This online resource guide, available to AMA members, is published by the AMA Women Physicians Congress (AMA WPC), a special in-
This resource addresses the following topics:

- Handling gender-based questions
- Couples match
- Shared and part-time residencies
- Preparing for your interview
- Interview questions to ask
- Common and uncommon questions that will be asked of you
- What to bring with you

Both men and women medical students report anxiety and confusion when faced with interviews for residency placement. Women medical students reported that they had difficulty with their residency training interviews when asked questions dealing with gender. Some women reported that they were never asked gender-based questions, but others reported being asked questions about their marriages and plans for childbearing. Men and women respondents alike said they were often asked questions which they found to be vague or provocative.

The interview process is stressful for all medical students, and medical schools seldom coach their students in how to approach residency placement. In publishing this guide, the AMA Women Physician Congress (WPC) Governing Council felt that it would meet the needs of all medical students and would include a special section for women on gender-based questions.

This guide is not intended to help students pick a specialty or how to interview specifically in the different specialties, nor does it suggest how to plan electives. Rather, it is an overview of the interviewing process, intended as a guide to start students’ thinking about what they will encounter.

**Find a Residency or Fellowship**

In response to many requests from medical school graduates seeking unfilled positions in residency programs, the AMA Resident and Fellow Section (AMA-RFS) offers a Web-based list of open residency and fellowship positions, available at www.ama-assn.org/go/rfs.

Postings on the “Find a Residency or Fellowship” Web site include a short description of the position and the program, as provided by program officials, as well as contact information. The site also provides links to specialty societies that offer information on residency vacancies.

Programs that wish to list a vacant position can enter the required data at www.ama-assn.org/go/rfs.

For information on positions in a given specialty, applicants for positions may also wish to contact the appropriate specialty society, as shown in Section II.

**AMA Alliance: Supporting Physicians-in-Training and Their Spouses**

Helping medical students and resident/fellow physicians make it through medical training while balancing family and education is a priority of the American Medical Association Alliance, a nationwide network of physician spouses.

Alliance members across the country keep in touch socially to enjoy common interests and share the challenges they face as physicians and physician spouses. On a larger scale, Alliance members are strong and vocal grass-roots advocates for health care and access to care. They organize fundraisers for medical student scholarships, coordinate Internet safety programs and violence prevention education in local grade schools, and conduct health education campaigns for their communities.

The AMA Alliance provides many benefits aimed at supporting its members during the training years:

- Physician-In-Training Host Program—offers shelter and advice for one or two nights to fourth-year medical students being interviewed for residency away from home. Alliance members open their homes to help reduce the cost of interviewing for residency.
- Membership that travels with you—Many physician couples and families relocate following medical school, residency, or fellowship training. Alliance membership travels with each member, to help connect and transition them to their new community.
- Waived registration fee—for resident physician and medical student spouses who attend the Alliance’s Leadership Development Conference.
- Financial Assistance—As the cost of medical education continues to increase, financial assistance for medical students is more important than ever. To alleviate these pressures, the AMA Foundation and the AMA Alliance have a long history of supporting young men and women who aspire to become physicians.

B. Information on Matching Programs

Most US medical students and other applicants to US GME programs secure positions through a “matching program.” The National Resident Matching Program (NRMP) is the largest matching program; other residency matching programs include the San Francisco Matching Program and the matching programs sponsored by the American Urology Association (AUA) and the American Osteopathic Association (AOA). In addition, the various US Armed Services select applicants participating in military programs at US medical schools for Armed Forces-sponsored GME programs. Finally, the Canadian Resident Matching Service (CaRMS) administers four residency matches annually—the main first-year residency match and three advanced residency matches. These matches are primarily available to Canadian medical school students and residents, international medical graduates, and Canadians studying medicine abroad.

National Resident Matching Program

The National Resident Matching Program (NRMP) has been matching the preferences of applicants and programs for residency positions since 1952. The program was created to provide both applicants and residency program directors a fair opportunity to consider their options for appointment, to make reasoned decisions, and to have their decisions announced at a specified time. Participants in the NRMP agree to honor the commitment to offer or to accept an appointment if a match results.

In 2010, in addition to 16,427 US allopathic medical school students, another 21,129 “independent” applicants competed for 22,809 graduate year one (GY1) positions and 2,711 graduate year two positions offered in the NRMP. Independent applicants include prior graduates of US allopathic medical schools and eligible students/graduates of osteopathic, Canadian, and international medical schools, and Fifth Pathway programs. The numbers of US medical students, independent applicants, and programs participating in the 2010 Match increased slightly from the previous year.

Since July 2001, all NRMP services have been Web-based. Participants register for the Match, pay their registration fees, submit rank order lists, and receive Match results via the NRMP Web site at www.nrmp.org.

The NRMP is not a centralized application service. Applicants apply through ERAS or directly to residency programs, and the programs administer their own selection process, including requests for interviews. Programs that participate in the NRMP require applicants to register with the NRMP. In January and February, after interviewing has been completed, applicants and programs submit to the NRMP via the Web rank order lists indicating their choices in order of preference. The system is in real time with up-to-the-minute information on applicants and programs participating in the Match.

Both applicants and programs must agree that neither will ask the other to make a commitment before Match Day, although a high level of interest may be expressed. Verbal or written contracts prior to Match Day should not be made and are violations of the NRMP Match Participation Agreement signed by all participants. The final preferences of program directors and applicants as reflected on the submitted rank order lists will determine the offering of positions and the placement of applicants.

Through the NRMP process, each applicant and program submits a list of preferences in rank order. The matching algorithm places an applicant into a program he or she prefers that 1) has ranked the applicant and 2) has not been filled with other applicants who also prefer the program and are ranked higher on the program’s list. Match results are announced in mid-March and are available on the NRMP Web site to participants. Applicants who fail to obtain a position and programs that do not fill all their offered positions are informed four days before the general announcement so that they may contact one another to secure appointments. The majority of appointments to residency programs begin on or about July 1.

Positions Offered Through the NRMP

The positions offered by programs participating in the NRMP are typically those sought by US medical school seniors; that is, positions that provide the first year of graduate medical education. In addition, specialties that start their training at graduate year two offer positions in the NRMP so that applicants may link their first and second years of training on their rank order lists.

- **Categorical positions** are offered by programs that expect applicants who enter in graduate year one to continue until completion of training required for specialty certification, provided their performance is satisfactory (normally 3 to 4 years).
- **Preliminary positions** provide 1 or 2 years of prerequisite training for entry into advanced programs that require 1 or more years of clinical training. Internal medicine, surgery, and transitional year programs commonly offer preliminary positions.
- **Advanced positions** at graduate year two, which do not commence until a year after the Match, are in specialty programs that require completion of 1 or more years of preliminary training. Applicants without prior graduate medical education may apply for these positions while also applying for preliminary positions that are compatible with their plans.
- **Resident positions** at graduate year two that begin in July of the year of the Match are reserved for physicians who have had prior graduate medical education. These positions are not available to senior US medical students.

Couples and Shared Residency Positions

Applicants who are members of a couple may link their program choices together. In creating pairs of program choices, couples can mix specialties, program types, and geographic locations.

Some programs offer shared residency positions. In a shared residency, two residents share one position, usually alternating months on clinical rotations with time off to devote to family, research, or other interests. Obtaining a shared residency position through the NRMP requires that two applicants who have enrolled separately in the NRMP become partners to be matched together in a single position.

Specialties Matching Service

In addition to conducting the Main Residency Match for graduate year one and graduate year two residency positions, the NRMP conducts matches for advanced residency or fellowship positions through the Specialties Matching Service. These specialty matches occur throughout the year, and each requires its own registration with the NRMP.

Specialty matches currently include the following:

- Combined Musculoskeletal Matching Program (participating subspecialties of orthopaedic surgery)
- Abdominal transplant surgery
- Allergy and immunology
- Child and adolescent psychiatry
- Colon and rectal surgery
- Female pelvic and reconstructive surgery
- Laryngology
- Medical genomics
B. INFORMATION ON MATCHING PROGRAMS

- Medical Specialties Matching Program (participating subspecialties of internal medicine)
- Neonatal-perinatal medicine
- Obstetrics-Gynecology Fellowship Match (participating subspecialties of obstetrics and gynecology)
- Ophthalmic plastic and reconstructive surgery
- Pediatric Specialties Spring Match (anesthesiology, cardiology, gastroenterology, nephrology, and pulmonology)
- Pediatric specialties Fall Match (critical care medicine, emergency medicine, rheumatology, and developmental and behavioral pediatrics)
- Pediatric hematology/oncology
- Pediatric surgery
- Primary care sports medicine
- Radiology (participating subspecialties in radiology)
- Sleep medicine
- Surgical critical care
- Thoracic surgery
- Vascular surgery

Important Dates

September 1  
Registration opens for applicants, institutions, and programs participating in the Main Residency Match.

November 30  
Deadline for applicant registration. Registration after November 30 requires an additional $50 late registration fee.

January 15  
The submission of rank order lists begins on the Web at www.nrmp.org.

February  
The ranking process culminates with the closing of rank order lists in the third week of February.

March  
Applicants and institutions receive the Match results the third week of March. At noon eastern time on Monday, applicants are notified whether they matched, and unfilled positions are posted to the Web.

July 1  
Most appointments to residency programs begin.

Information and Inquiries

The National Resident Matching Program is sponsored by the Council of Medical Specialty Societies, American Board of Medical Specialties, American Hospital Association, American Medical Association, and Association of American Medical Colleges. The NRMP is managed and operated by the Association of American Medical Colleges.

Inquiries regarding the NRMP should be directed to:
National Resident Matching Program
2450 N St., NW
Washington, DC 20037-1127
(202) 828-0566
E-mail: nrmp@aamc.org
www.nrmp.org

San Francisco Matching Program

For 2008, the San Francisco Matching Program offered residency positions in specialties that do not participate in the National Resident Matching Program (NRMP), including child neurology, ophthalmology, orthopedic trauma, and the plastic surgery independent track. It currently offers fellowship positions in several subspecialties, including Mohs micrographic surgery, ophthalmology fellowships, rhinology, pediatric otolaryngology, facial plastic surgery, and craniofacial surgery, orthopaedic sports medicine, neurocritical care, pediatric dermatology and additional specialties.

Urology Match

The American Urological Association (AUA) monitors a match for residency positions in urology only. Each year, about 350 applicants compete for approximately 235 positions, virtually all of which are filled through the AUA Match. AUA Match statistics, as well as general information about the AUA matching process, can be found on the AUA Residency Match Web site at www.auanet.org/content/residency/residency-match.cfm. Applicants are advised to review this Web site information carefully.

The prerequisite training for a prospective urology resident is 1 or 2 years, preferably in a general surgery program. Because the Urology Match does not offer GY1 positions, applicants obtain their preliminary positions outside of the AUA Match. Some programs have designated preliminary positions in the same institution for applicants who match through the Urology Match; therefore, those applicants do not have to go through a matching program to obtain a GY1 position. Other programs require applicants to participate in the NRMP Main Residency Match to obtain a position for preliminary training. Preliminary positions for US allopathic medical school seniors must be offered through the NRMP Main Residency Match.
The registration form and fee for the AUA Match are submitted using an online form that can be accessed on the AUA Web site. The Web site also lists participating programs and indicates whether each uses ERAS or another method for receipt of applications. It is important to note that registration for the AUA Match does not register an applicant with ERAS, or vice versa.

The AUA Match ranking function is Web-based. Preference lists must be submitted to the AUA Match by the first week in January, and they cannot be changed after the deadline date. As with the NRMP, the AUA Match uses an “applicant-proposing algorithm,” and the AUA Match outcome is determined by applicants’ and programs’ preference lists. All matches are binding commitments.

Applicants can register for the AUA Match as early as the spring of the year prior to the AUA Match; the final registration deadline is the third week of December. The period for submitting rank order lists is December through the first week of January, and Match Day is in the third week in January. Vacancies available after the AUA Match may be listed on the AUA Web site. Unmatched applicants may make individual arrangements with programs that have vacant positions.

Canadian Resident Matching Service
CaRMS is a national, not-for-profit organization that provides a unique electronic matching service for graduate medical education training in Canada. CaRMS provides an orderly and transparent process for applicants to decide where they wish to train in Canada and for programs to indicate which applicants they wish to enroll in graduate medical training.

CaRMS administers four matches annually: the Main Residency Match (R-1) and three advanced residency matches. These include the:
- Family Medicine/Emergency Medicine Match (FM/EM)
- Medicine Subspecialty Match (MSSM)
- Pediatric Subspecialty Match (PSM)

CaRMS also administers the process for Canadian applicants to access the US electronic application system for graduate medical training (Electronic Residency Application Service, or ERAS).

The R-1 Main Residency Match is open to final-year medical students in all 17 Canadian medical schools, as well as graduates from Canada and the US who meet basic eligibility criteria. The R-1 match is also open to international medical graduates and Canadians studying medicine abroad from recognized international medical schools who also meet eligibility requirements.

The R-1 match is offered in two iterations. To be eligible in the first iteration, graduates must not have had prior graduate training in Canada or the United States. The second iteration is for applicants who were not matched in the first iteration, as well as applicants who have had previous Canadian/US graduate training (at recognized institutions) and who wish to apply for an R-1 position in Canada.

Eligibility requirements and processes vary across the three advanced residency matches. Detailed information on all four of the matches are available at www.carms.ca.

Military Matches
Positions in US military residency training programs are open only to applicants who are graduates of the Uniformed Services University of the Health Sciences (USUHS), medical students with an individual military commitment through the Health Professions Scholarship Programs (HPSP), and participants in the Reserve Officers Training Corps (ROTC). Although applicants and programs submit rank order lists, and applicants to Army and Navy programs apply through the Electronic Residency Application Service (ERAS) as their civilian counterparts do, only the Army uses a computerized matching process similar to the NRMP matching process to select residents. The Navy and the Air Force employ a scoring board, using applicant and program rank order lists to make their selections. Decisions are made in early December, and results are sent to the NRMP so that applicants who registered for the NRMP Main Residency Match, but who obtained a military residency training position, can be withdrawn from the NRMP. Applicants who have been notified by the military in early December that they are authorized to seek civilian deferred residency training can participate in the NRMP or another appropriate civilian matching program.

Couple’s Matching
Some matching programs, including the NRMP and CaRMS, offer the opportunity for two partners to link their rank order lists so that both residency applicants can match to programs suited to their needs. The partners enroll individually in the match and indicate that they want to be in the match as a couple. They form pairs of choices on their rank order lists, which are then considered in rank order in the match. The couple matches to the most preferred pair of programs on the rank order lists for which each partner has been offered a position.

No matching program has access to information from another matching program. Applicants, therefore, should not accept advice to try to find out about another match under the guise of creating a “couple’s match,” since that attempt would represent a match violation. More specifically, a matching program may advise an applicant that it offers a couple’s match when a couple’s match is not possible. When two partners participate in different matching programs, they cannot link rank order lists between matches. If one matching program requests that an applicant’s partner contact a residency program that participates in another match in order to inquire about the likelihood of matching, the partner is being asked to violate the terms of that match. Almost every match contract prohibits applicants and programs from inquiring about how one plans to rank the other. Consequently, when partners participate in different
matches, the only way to ensure that both partners will match to programs in the same geographic region is for the partner participating in the later match to rank only programs in the same geographic area in which the partner in the earlier match obtained a position.

**Match Outcomes**

**1. A Binding Commitment**

It is the policy of every matching program that a match between an applicant and a program is a binding commitment. Failure to honor that commitment is a violation of the contract signed during the registration process. Penalties for violations vary among the matches. Some matches permit applicants to seek a waiver of their match commitment, either by mutual agreement of the applicant and program or by contacting the matching program’s Web site. The applicable rules are available on each match program’s Web site.

**2. The “Early Matches”**

Applicants participating in some early matches—the San Francisco Match and the AUA Urology Match—receive their match results in January or early February. In some cases, a preliminary position will be “held” by the same institution to which the applicant matched. In other cases, applicants who obtained positions through the early matches will be required to register for the NRMP Main Residency Match to secure a position for their preliminary training. (In all cases, US allopathic medical school seniors must participate in the NRMP for their preliminary positions.)

**3. Unmatched “Early Match” Applicants**

Applicants who do not match in one of the early matches may seek positions after the match concludes, using the list of available positions that is typically posted on the relevant matching program’s Web site.

The San Francisco Matching Program uses a Vacancy Information System that lists vacant post-Match positions, as well as positions that become available throughout the year. Applicants must complete the “Applying to Post Match Vacancies” form that is posted on the San Francisco Match Web site (www.sfmatch.org).

The AUA Urology Match posts vacancies in urology on its Web site (www.auanet.org/residents/resmatch.cfm) after the AUA Match concludes and throughout the year. Applicants must contact programs directly.

The NRMP begins to release the results of the Main Residency Match on at 11:30 a.m. eastern time on Wednesday. At Noon eastern time on Wednesday, the NRMP R3 System (www.nrmp.org), and applicants begin applying for those positions using ERAS. The directors of unfilled programs create preference lists of applicants, which must be finalized by 11:30 a.m. eastern time on Wednesday. At Noon eastern time, the NRMP uses those preference lists to extend electronic offers to unmatched applicants, who must accept or reject an offer within a specified time period. Offers are extended on Wednesday, Thursday, and Friday. The List of Unfilled Programs remains on the NRMP Web site until May 1.

After May 1, services such as FindAResident (www.name.org/findaresident) provide a continuously updated list of residency vacancies.

**C. GME Information for IMGs**

### Educational Commission for Foreign Medical Graduates (ECFMG) Certification

**Note:** The following information is provided by the Educational Commission for Foreign Medical Graduates.

The Educational Commission for Foreign Medical Graduates (ECFMG), through its program of certification, assesses whether international medical graduates (IMGs) are ready to enter US residency or fellowship programs that are accredited by the Accreditation Council for Graduate Medical Education (ACGME). ECFMG Certification is a requirement for IMGs who wish to enter such programs.

ECFMG and its organizational members define an IMG as a physician who received his/her basic medical degree or qualification from a medical school located outside the United States and Canada. For IMGs seeking ECFMG Certification, the physician’s medical school and graduation year must be listed in the International Medical Education Directory (IMED) of the Foundation for Advancement of International Medical Education and Research (FAIMER®). US citizens who have completed their medical education in schools outside the United States and Canada are considered IMGs; non-US citizens who have graduated from medical schools in the United States and Canada are not considered IMGs.

ECFMG Certification provides assurance to the directors of ACGME-accredited residency and fellowship programs, and to the people of the United States, that IMGs have met minimum standards of eligibility to enter such programs. ECFMG Certification is one of the eligibility requirements for IMGs to take Step 3 of the United States Medical Licensing Examination (USMLE), and is required of IMGs to obtain an unrestricted license to practice medicine in the United States.

To be eligible for certification by ECFMG, applicants must meet the requirements outlined below.

**Application for ECFMG Certification**

IMGs must submit an Application for ECFMG Certification before they can apply to ECFMG for an examination. The Application for ECFMG Certification consists of questions that require applicants to confirm their identity, contact information, and graduation from, or enrollment in a medical school that is listed in IMED. As part of the application, IMGs must also confirm their understanding of the purpose of ECFMG Certification and consent to a release of legal claims.

For more information on the Application for ECFMG Certification requirement for ECFMG Certification, refer to the ECFMG Information Booklet, available on the ECFMG web site at www.ecfmg.org.

**Medical Education Credential Requirements**

1. Applicants must have been awarded credit for at least 4 credit years (academic years for which credit has been given towards completion of the medical curriculum) by a medical school listed in IMED. There are restrictions on credits transferred to the medical school that awards an applicant’s medical degree that can be used to meet this requirement. The physician’s graduation year must be included in the medical school’s IMED listing. The information available through IMED is derived from current and historical data collected by ECFMG through-
out its history of evaluating the medical education credentials of IMGs. A medical school is added to IMED after FAIMER receives confirmation from the Ministry of Health or other appropriate agency that the Ministry or agency has recognized that school. FAIMER also updates IMED as new information is received from appropriate government agencies and from officials of the medical schools. FAIMER is not an accrediting agency. Listing of a medical school in IMED does not denote recognition, accreditation, or endorsement by FAIMER.)

2. Applicants must document the completion of all requirements for, and receipt of, the final medical diploma. ECFMG verifies every applicant’s medical diploma with the appropriate officials of the medical school that issued the diploma. When ECFMG sends an applicant’s medical diploma to the medical school for verification, ECFMG requests that the medical school include the applicant’s final medical school transcript when the school returns the verification of the medical diploma to ECFMG. Verification by ECFMG with the issuing school may also be required for transcripts that are submitted by applicants to document transferred credits. ECFMG medical education credential requirements are not fulfilled until ECFMG receives and accepts verification of the final medical diploma, final medical school transcript, and, if required, transfer credit transcript(s) directly from the issuing school(s).

For more information on the medical education credential requirements for ECFMG Certification, refer to the ECFMG Information Booklet, available on the ECFMG Web site.

Examination Requirements

The current examination requirements for ECFMG Certification include passing Step 1 and Step 2 of the USMLE. The Step 2 exam has two separately administered components, the Clinical Knowledge (CK) component and the Clinical Skills (CS) component. Step 1, Step 2 CK, and Step 2 CS are the same exams taken by graduates of US and Canadian medical schools. Detailed information on the USMLE is available on the USMLE Web site at www.usmle.org.

To meet the examination requirements for ECFMG Certification, applicants must:

1. Satisfy the medical science examination requirement. Step 1 and Step 2 CK of the USMLE are the exams currently administered to satisfy this requirement. Some of these former examinations have been recognized by the US Secretary of Health and Human Services as meeting the medical science examination requirement to obtain a visa to enter the United States, while others have not. For more information, refer to the ECFMG Information Booklet, available on the ECFMG Web site.

2. Satisfy the clinical skills requirement. Step 2 CS of the USMLE is the exam currently administered to satisfy the clinical skills requirement for ECFMG Certification. Applicants who have both passed the former ECFMG Clinical Skills Assessment (CSA®) and achieved a score acceptable to ECFMG on an English language proficiency test (such as the Test of English as a Foreign Language [TOEFL] exam or the former ECFMG English Test) can use these passing performances to satisfy the clinical skills requirement.

There are specific time requirements for completing the exams for ECFMG Certification. These requirements are described in the ECFMG Information Booklet, available on the ECFMG Web site.

Standard ECFMG Certificate

The Standard ECFMG Certificate is issued to applicants who fulfill all requirements for ECFMG Certification and clear their financial accounts with the ECFMG. The Standard ECFMG Certificate may be used for entry into accredited GME programs in the United States. For further information on ECFMG Certification, including exam eligibility, fees, applying for examination, scheduling, test centers, preparation, orientation and practice materials, and the validity of certain exams for entry to GME, refer to the ECFMG Information Booklet or contact:

Entry of Foreign-Born Medical Graduates to the United States

Note: The following information is provided by the Educational Commission for Foreign Medical Graduates and the International Personnel Office, Mayo Clinic.

International medical graduates (IMGs), regardless of country of citizenship, must be ECFMG-certified in order to train or practice medicine in the United States. All foreign national physicians, both IMGs and graduates of Canadian or US medical schools, must obtain an appropriate visa to participate in US programs of graduate medical education (GME).

The typical pathway for foreign national physicians to enter US programs of GME involves the following steps:

- Completion of all ECFMG Certification requirements, IMGs only
- Application to US residency programs, which may involve travel to the United States for personal interviews at teaching hospitals
- Securing a contract for a residency training position
- Satisfying state medical licensure requirements
- Securing an appropriate immigration status that will permit US GME training

Understanding and complying with immigration guidelines is critical for teaching hospitals and foreign national physicians who pursue US residency training positions. The following sections outline the immigration guidelines and visa options available to foreign national physicians for US training.

Table 1.
Roles of Department of Homeland Security (DHS) and Department of State (DOS) in Visa Oversight

Immigration and GME

US immigration law is governed by specific federal regulations and defined in the US Immigration and National Act (INA), as amended. Various agencies of the US Department of Homeland Security (DHS) and the Department of State (DOS) are responsible for overseeing particular aspects of the US visa and immigration process, as shown in Table 1.

In reviewing the immigration process as it relates to foreign national physicians, it is important to be familiar with the following basic terms:

- **Visa**—A “nonimmigrant” (temporary) visa is a document issued at a US embassy or consulate and stamped or affixed into the visa application form, which allows the individual to seek entry into the United States for specific temporary purposes. The individual may seek entry only during the validity period shown on the visa. Note that the visa is only an entry permit and does not control how long the person may stay in the United States.

- **Visa Status**—This term refers to the specific visa classification in which the foreign national is formally admitted into the United States. It also confirms the duration of approved stay. Visa status is conferred by Customs and Border Protection (CBP) at the port-of-entry for initial admission to the country, or through a US Citizenship and Immigration Services (USCIS) Regional Service Center for individuals who seek a change of status while in the United States. All foreign nationals must abide by the terms and dates of the visa status as noted on the I-94 card, Arrival/Departure Record or Notice of Action.

**Visa Options for US GME**

A foreign national physician who secures a contract for a US GME position must obtain an appropriate visa prior to beginning the training program. There are various temporary, nonimmigrant visas available for GME training. The most common include the J-1 “Exchange Visitor” and the H-1B “Temporary Worker in a Specialty Occupation” visas. Foreign national physicians may also qualify to train as medical residents/fellows with valid employment authorization documents (EADs). USCIS grants work authorization in conjunction with a variety of immigrant and nonimmigrant petition types.

- **J-1 Sponsorship for Residency Training**

Historically, the J-1 has been the most common visa classification used for foreign national physicians in residency training. The J-1 is a nonimmigrant visa reserved for participants in the Exchange Visitor Program. As a public diplomacy initiative of DOS, the Exchange Visitor Program was established to enhance international exchange and mutual understanding between the people of the United States and other nations. In keeping with the J-1 program’s goals of educational exchange, J-1 physicians are required to return home upon completion of training.

- **DOS designated ECFMG as the sole visa sponsor for all J-1 physicians who participate in clinical training programs in the mid-1970s. ECFMG administers its sponsorship program in accordance with the provisions set forth in a Memorandum of Understanding between ECFMG and the DOS and the federal regulations established to implement the Mutual Educational and Cultural Exchange Act of 1961. ECFMG is responsible for ensuring that J-1 physicians and teaching institutions meet the federal requirements for participation. ECFMG does not sponsor physicians for other US visa types.**

Foreign national physicians who seek J-1 sponsorship to enroll in GME programs must fulfill a number of general requirements as detailed in the application materials provided by ECFMG. At a minimum, J-1 physician applicants must have:

- **Competent prior education/training and English competency**
- **Statement of Need from the home country’s Ministry of Health**
- **Contract for a residency position**

J-1 physician applicants must demonstrate “adequate prior education and training to participate satisfactorily in the program for which they are coming to the United States” [22 CFR §62.27(b)(1)] and have “competency in oral and written English” [22 CFR §62.27(b)(4)]. Possession of a valid Standard ECFMG Certificate ensures that these educational prerequisites have been met. For information on the requirements for ECFMG Certification, refer to “Educational Commission for Foreign Medical Graduates (ECFMG®) Certification,” above. (Graduates of LCME- and AOA-accredited U.S. and Canadian medical schools/programs are not required to be ECFMG-certified.)

J-1 physician applicants must provide ECFMG with a Statement of Need from the central office of the Ministry of Health of the country of most recent legal permanent residence [22 CFR §62.27(g)(2)]; a Statement of Need from the home country’s Ministry of Health [22 CFR §62.27(g)(3)]; and other documentation. As stipulated in the regulations, the home residency requirement mandates that J-1 physicians and accompanying J-2 dependents reside in the home country for at least 2 years before being eligible for certain changes in visa status in the United States [INA §212(e)(iii); 22 CFR §62.27(g)(3)]. Various legal options have evolved to allow J-1 physicians to waive the return home obligation following training, including employment in a US Medically Underserved Area (MUA) or Health Professional Shortage Area (HPSA).

J-1 sponsorship for residency training is dependent on a contract or official letter of offer for a GME position [22 CFR §62.27(7)]. The J-1 physician applicant must secure the training contract prior to applying to ECFMG for visa sponsorship. ECFMG is authorized to sponsor physicians for training in base residencies and subspecialty fellowships that are ACGME-accredited as well as for advanced, “non-standard” fellowships for which accreditation is not available.
J-1 sponsorship is generally issued in increments of 1 year corresponding with the GME academic year of July 1 through June 30. Specific instructions and materials for each application type can be found on the ECFMG Web site at www.ecfmg.org/esvp.

Once a physician has been approved for J-1 sponsorship, ECFMG creates an electronic record for the physician in the Student and Exchange Visitor Information System (SEVIS) and issues Form DS-2019, “Certificate of Eligibility for Exchange Visitor (J-1) Status.” Through an interagency partnership between DOS and DHS, SEVIS tracks and monitors the activities of all J-1, F-1, and M visa holders [22 CFR §62.70(a)(6)]. The foreign national physician with an active SEVIS record and an original Form DS-2019 may apply for J-1 visa and/or visa status from agencies of the U.S. government.

ECFMG validates the arrival of J-1 physicians in SEVIS upon notification from the teaching hospital and confirms ongoing program participation through direct communication with designated hospital representatives.

J-1 physicians may request ECFMG sponsorship for dependent spouse and children. The J-2 spouse may seek employment authorization through USCIS to work in any position for which he/she is qualified, including residency training. The duration of stay for the J-2 is limited to the approved timeline for the J-1 principal and cannot be extended independently of the primary visa holder.

Federal regulations define the scope, pathway, and duration of J-1 program participation. J-1 physicians must predetermine their educational objectives and may be eligible to pursue progressive training beginning at the base residency level through advanced subspecialty fellowships. ECFMG’s sponsorship approval is based on a specific training contract, which reflects the current program location, specialty, level, status, and contract dates. J-1 physicians are permitted to change specialty once within the first 2 years of sponsorship. A request to change medical specialty requires reestablishing eligibility for sponsorship, including confirmation that the proposed training can be completed within the maximum duration of participation. J-1 physicians are eligible for a maximum of 7 years of training, provided that they are advancing through an approved GME track. The duration of sponsorship is linked directly to the assessment board certification requirements as established by the member boards of the American Board of Medical Specialties (ABMS) and/or the ACGME-accredited length of the program. In select cases, a request for an exceptional extension beyond 7 years for training can be requested from the DOS through ECFMG. J-1 sponsorship can also be briefly extended to allow a J-1 physician to sit for an ABMS member board certification exam. For a comprehensive outline of pertinent regulations related to the J-1 sponsorship of foreign national physicians, refer to the Exchange Visitor Sponsorship Program Reference Guide, available on the ECFMG Web site at www.ecfmg.org/esvp.

To ensure strict regulatory compliance, the J-1 visa sponsorship process requires close coordination between the teaching institution, the physician applicant, and ECFMG. Each academic institution designates a Training Program Liaison (TPL) to serve as the official representative to communicate with ECFMG regarding all J-1 matters. Physicians must establish contact with the TPL at each program in which they enroll and maintain contact throughout the duration of their J-1 sponsorship.

H-1B Visa for Residency Training

The H-1B visa is reserved for temporary workers in professional or “specialty” occupations. Today, the option of H-1B visa sponsorship is offered by many institutions for residency training. In addition to a medical degree and a valid Standard ECFMG Certificate, foreign national physicians who are interested in obtaining an H-1B visa must pass USMLE Step 2 CS and qualify for the appropriate medical license in the state where the training will take place. (Most states offer some form of “resident permit,” a provisional/temporary medical license for physicians practicing under supervision in a GME program.) Competency in English is also required for the H-1B. Passing USMLE Step 2 CS satisfies the language requirement as this exam includes an assessment of spoken English.

H-1B status is employer-specific and requires visa sponsorship directly through the teaching hospital. To sponsor a qualified foreign national physician for a residency position on an H-1B visa, the teaching hospital must file a preliminary “labor condition application” with the US Department of Labor (DOL) and an H-1B petition with USCIS. These filings require detailed information about the position being offered, including program dates, location and wage rate, and evidence of the physician’s credentials. Additionally, the hospital must confirm that the foreign national physician will be paid the appropriate salary for the position. An appropriate salary is defined as the higher of either the “actual wage” as paid by the hospital to a US citizen holding the same position, or the “prevailing wage,” which is the average wage paid for the same position by all employers in the geographic area. As the prospective employer, the teaching hospital must pay applicable government fees associated with filing all H-1B petitions and must agree to cover the return home transportation costs in the event it should dismiss the physician from the training program before the end of the H-1B visa classification validity date.

H-1B petitions are approved based on the length of the training program, not to exceed 3 years at one time. An approved H-1B petition is valid only for work with the specific sponsoring institution, program, and position. The H-1B physician may seek to change positions or transfer to a different hospital/employer, but only if the new institution first files an H-1B petition for the physician. An individual pursuing continuous stay in H-1B status is subject to the maximum duration of 6 years.

The H-1B physician’s dependent spouse and children may accompany the principal H-1B to the United States in H-4 status. Unlike J-2 dependents, H-4s are not eligible to obtain independent work authorization. However, they may participate in educational studies. In contrast to the J-1, the H-1B visa does not impose a mandatory home residency requirement upon completion of training. Therefore, foreign national physicians who train on H-1B visas may be eligible, in some cases, to pursue direct steps toward permanent resident status after training.

GME Following a J-1 Program of Nonclinical Observation, Consultation, Teaching, and Research

Foreign national physicians frequently enter the United States as J-1 research scholars or professors for nonclinical activities involving observation, consultation, teaching, or research. Many physicians choose to pursue GME as an extension of their original J-1 program. The federal regulations stipulate, however, that an individual in J-1 status may not, as a matter of course, change from one J-1 category to another. Physicians seeking to change from J-1 research to J-1 clinical to enter a GME program must obtain pre-approval from DOS through ECFMG. For information on the requirements for a change of J-1 category, please contact ECFMG. J-1 research scholars or professors may qualify for an H-1B for GME, provided they meet the credential requirements and are not subject to the home residency requirement [INA 212(e)].

Other Possible Immigration Options for GME Trainees

F-1 Student - Optional Practical Training

Individuals in F-1 status who are graduating from a US medical school may be eligible to extend their student status for up to 12 months of optional practical training (OPT). OPT requires an Employment Authorization Document (EAD) issued by USCIS and can be used for the first year of residency training. F-1 students are ad-

Unlawful Permanent Resident (LPR, Immigrant, or "Green Card") Status
Persons who hold lawful permanent resident status are permitted to remain in the United States permanently and to accept employment in the same way as a US citizen. Physicians in LPR status who are IMGs or Canadian medical graduates are required to meet certain credential and state licensure requirements in order to train or practice medicine in this country.

Initial Visa Application Process
Generally, all nonimmigrant visa applicants seeking a visa for initial entry to the United States must appear for a personal interview at a US embassy or consulate, usually in the home country. Scheduling the visa interview and waiting for mandatory security clearances can take up to several months. Therefore, advance preparation and planning are essential. Foreign national physicians should check the DOS web site at [http://travel.state.gov/visa/embassy/embassy_4825.html](http://travel.state.gov/visa/embassy/embassy_4825.html) to identify the appropriate US embassy or consulate and better determine scheduling times and specific application requirements (including Form DS-100 “Online Nonimmigrant Visa Application,” biometric finger printing, fees, name check, and security clearance procedures, etc).

Maintaining Visa Status
In addition to meeting the academic standards required to progress through residency, foreign national physicians must maintain valid visa status in order to continue to train at a US teaching hospital. Maintaining status requires, but is not limited to, the following:

- Active participation in approved training program: specific site, salary, dates, etc.
- J-1 physicians must maintain full-time status in the program
  - Unauthorized employment is considered a violation of status
    - Possession of required documents/records confirming visa status
      - For J-1: DS-2019; for H-1B: I-797 with valid dates
      - I-94 record with “Duration of Status” (D/S) or future end date
      - Valid passport
      - Compliance with all reporting requirements
        - Reporting US residential address to US government (Form AR-11) within 10 days of any move
        - Notification to appropriate offices (ie, ECFMG, TPL, program director, GME office, or US government) of proposed changes in location or course of training, leaves of absence, terminations, extensions, etc
        - Complying with any special registration requirement as instructed by US government official at port-of-entry, etc
      - Strict adherence to all applicable US laws and regulations

International Travel and Visas
Foreign national physicians who travel outside the United States during the course of residency training can experience problems and delays. Most critically, individuals must possess a currently valid visa in order to reenter the United States.

As a general rule, it is not advisable for foreign national physicians with expired visas and/or those who changed visa status to travel outside the United States. Any such individuals will need to apply for a new visa for reentry, and the current US visa application process can involve long waits for consular appointments and security clearances. At present, there is no expedited processing available for background checks for anyone; therefore, it is impossible to guarantee timely return to the training program.

Foreign national physicians who must travel outside the United States are advised to review the dates and purpose of their travel with the residency program director(s) and administrative staff prior to finalizing their plans. A discussion about potential delays and contract provisions to make up lost time should take place before departure. Physicians should also contact the specific US embassy or consulate where they intend to apply for the visa to inquire about application procedures, documentation, requirements, and timeframes. It is critical for the foreign national physician (and dependents) to be aware of the documents that will be required for reentry to the United States.

Additional information on travel is available on the ECFMG Web site at [www.ecfmg.org/ecvp](http://www.ecfmg.org/ecvp).
The Implications of Personal and Professional Difficulties During Residency

In general, foreign national physicians enrolled in residency training face similar personal and professional challenges as their US citizen counterparts. Health, family, or academic issues can result in an interruption or change in a resident’s contract. Foreign national physicians whose visa status is based on enrollment in medical residencies must understand clearly the immigration implications of diverting from the preapproved activities and timelines. US immigration regulations and labor laws are complex, and teaching hospitals and foreign national physicians must be careful to maintain continuous training and immigration records.

Requests for program transfers, leaves of absence, change to part-time status, resignations from training, etc., must be preapproved by the visa sponsor (ECFMG for J-1s, teaching hospitals for H-1Bs, etc.) No change should be made without first verifying permissibility of altering the approved educational plan and then clarifying the necessary steps to return to training or depart the United States. Teaching hospitals and physicians should contact the visa sponsor or an immigration attorney to consult on specific questions and regulations.

Conclusions

Foreign national physicians and US teaching hospitals are encouraged to thoroughly research the visa options available for GME. Policies, procedures, budgets, and deadlines vary widely among teaching hospitals and even among programs within the same institution. Ultimately, foreign national physicians and teaching hospitals must understand and comply fully with all US immigration laws and regulatory guidelines.

AMA International Medical Graduates Section

The International Medical Graduates Section (IMGs) of the AMA advocates for IMG physicians by enhancing their participation in organized medicine, increasing AMA communication and interchange among IMGs, and studying issues of concern to IMGs such as the impact of IMGs on the physician workforce. An IMG member of the AMA is automatically a member of the IMG Section and can participate in the Section’s annual elections and Caucus activities.

The IMG Section is dedicated to improving opportunities for IMGs in the areas of licensure, training, and practicing medicine in the US.

Note: Portions of this section were previously published in The International Medical Graduate’s Guide to US Medicine & Residency Training, Chapter 4, Transitioning to the United States, pages 51-66, copyright 2008, American College of Physicians, Philadelphia.

AMA Council on Medical Education

Recognizing the relationship between quality medical education and quality health care, the AMA established the Council on Medical Education in 1904 to formulate and implement policy. After studying and evaluating medical education across the continuum, the current Council recommends educational policies and standards to the AMA House of Delegates (HOD) and to the medical education community. The Council also prepares numerous reports responding to AMA HOD actions and initiates relevant studies in areas of high concern to the educational community. For example, recent initiatives have focused on:

• The need for workforce policy that supports an adequate continuing supply of well-qualified physicians to meet the medical needs of the public
• Medical student debt and its possible influence on the decision to apply to medical school and on the career choices of graduates
• Resident working conditions, duty hours and the impact of sleep deprivation and fatigue on medical student and resident education and patient safety

The Council also reviews and recommends nominees to the AMA Board of Trustees for appointment or nomination to accrediting bodies (including the ACGME residency review committees), medical specialty certification boards, and other national organizations.

Key Dates in the History of the Council on Medical Education and GME

1847 American Medical Association organized; Committee on Medical Education appointed
1901 First publication of the Annual Medical Education issue of the Journal of the American Medical Association
1904 Formation of the Council on Medical Education
1910 Publication of “Flexner Report” evaluating medical schools
1914 First publication of what was to become the GME Directory, as the Provisional List of Hospitals Furnishing Acceptable Internships for Medical Graduates (15 cents per copy)
1919 Establishment of the Essentials for Approved Internships
1927 Beginning of approval of residency programs in hospitals; publication of Hospitals Approved for Residencies in Specialties, with 270 hospitals in 14 different specialties
1928 Establishment of Essentials for registered hospitals and for approved residencies and fellowships
1934 Approval of examining boards for the certification of specialists; establishment of standards for the formation of American boards in the specialties
1948 Establishment of the Liaison Committee for Specialty Boards between the AMA Council on Medical Education and Advisory Board for Medical Specialties (since reorganized as the American Board of Medical Specialties)
1949 Conference Committee on Internal Medicine, established in 1939, reactivated
1950 Conference Committee on Graduate Training in Surgery established
1951 First operation of the National Intern Matching Program
1956 Educational Commission for Foreign Medical Graduates established
1958 Two-year integrated training program for family practice approved by the AMA House of Delegates
1966 Report of the Citizens Commission on Graduate Medical Education (Millis Report) published
1970 Advisory Board for Medical Specialties reorganized as American Board of Medical Specialties
1972 Liaison Committee on Graduate Medical Education (LCGME) established
1975 LCGME formally began to accredit programs
1981 Accreditation Council for Graduate Medical Education replaces LCGME
1982 CME Report B, Recommendations for “Future Directions for Medical Education,” adopted by AMA House of Delegates
1991 AMA Fellowship and Residency Electronic Interactive Data Access (FREIDA) System established
1992 ACGME declares 1-year moratorium on considering accreditation requirements for new subspecialties
1996 AMA FREIDA becomes FREIDA Online
1996 First CD-ROM version of the GME Directory published
2000 ACGME becomes incorporated
2000 In collaboration with the Association of American Medical Colleges (AAMC), AMA develops online survey, the National GME Census
2004 Council celebrates its 100th anniversary
2005 Council begins its Initiative to Transform Medical Education (ITME)
2005 AMA and AAMC sign Statement of Cooperation

National GME Census
The National GME Census is a joint survey effort of the AMA and the Association of American Medical Colleges (AAMC). Every summer, all programs accredited by the ACGME and combined specialty programs approved by their respective boards are asked to complete this online census, available at www.aamc.org/gmetrack.

The census collects data on program characteristics, such as program size, work hours, program evaluation, educational characteristics, and health benefits. GME program directors also confirm or edit information about individual residents and provide information on new residents, if necessary. These data are stored in the AMA Physician Masterfile and are used to verify the education and training credentials of physicians. Program data are used to update listings in FREIDA Online and Appendix A of the Graduate Medical Education Directory.

During the 2010 survey cycle, 90% of programs completed the census as of January 31, 2011.

E-mail: gmetrack@aamc.org

Medical Education Issue of JAMA
Every September, the Journal of the American Medical Association (JAMA) publishes a special issue on medical education.

The GME tables in the appendix are based on data collected through the National GME Census. Program directors, specialty societies, and health workforce researchers and planners at national and state levels all rely on the data published in this issue of JAMA. The contributions of program directors to the Census are very important to the provision of accurate and timely data to the GME.
community. Program directors’ early and complete participation in the Census is thus strongly encouraged and appreciated; without the information they provide, such reporting on GME data would be difficult, if not impossible.

The September 15, 2010 issue included:
• Relationship Between Burnout and Professional Conduct and Attitudes Among US Medical Students
• Depression, Stigma, and Suicidal Ideation in Medical Students
• An Educational Intervention for Contextualizing Patient Care and Medical Students’ Abilities to Probe for Contextual Issues in Simulated Patients
• Effect of Availability Bias and Reflective Reasoning on Diagnostic Accuracy Among Internal Medicine Residents
• Effect of Reminders of Personal Sacrifice and Suggested Rationalizations on Residents’ Self-Reported Willingness to Accept Gifts: A Randomized Trial
• Prematriculation Variables Associated with Suboptimal Outcomes for the 1994-1999 Cohort of US Medical School Matriculants
• Association of Third-Year Medical Students’ First Clerkship with Overall Clerkship Performance and Examination Scores
• Biomedical Informatics in the Education of Physicians
• Incorporating Economic Reality into Medical Education
• Understanding Depression and Distress Among Medical Students
• How (Should) Physicians Think?: A Journey from Behavioral Economics to the Bedside
• Are You Sure This Is Right?: Insights into the Ways Trainees Act, Feel, and Reason
• Presenteeism Among Resident Physicians
• Graduating US Medical Students Who Do Not Obtain a PGY-1 Training Position
• Association of Institutional Financial Support of a Core Teaching Faculty with Educational Productivity Information

www.jama.com

Medical Education Data Service, Mailing Labels
The AMA Medical Education Data Service provides published information, existing tables, custom tables, and electronic data to students, educational institutions, researchers, professional associations, government agencies, foundations, and others interested in collecting, analyzing and disseminating medical education data. Written requests for data are screened for merit and must include the purpose of the project, specific data service requested, expected due date for data, and name, address, phone and fax number of the project contact. When requests require staff contribution or organizational overhead, a fee is assessed; program directors requesting data receive a substantial discount.

Electronic State-level GME Data
The AMA offers aggregate statistics for each state on all resident physicians, in Adobe Acrobat format. There are six different tables for each state, including Puerto Rico and the District of Columbia, as well as a set of six tables for the United States:
• Total Number of Resident Physicians and Program Year 1 Resident Physicians in GME Programs
• Resident Physicians by Type of Medical School Attended
• Resident Physicians by Gender and Race/Ethnicity
• Resident Physicians Without Prior US GME in GY1 Positions by Type of Medical School Attended
• Resident Physicians Who Completed a Graduate Medical Education Program or Completed a Preliminary Year
• Plans of Resident Physicians Completing a Program

Information
For more information on these tables, or for inquiries about other GME data, contact
AMA Data Acquisition Services
(312) 464-4487

Price for state-level GME data is $20 to $50 (based on number of states ordered). To order, contact:
Jackie Edwards
(312) 464-4650
E-mail: jacqueline.edwards@ama-assn.org
www.ama-assn.org/ama/pub/education-careers/graduate-medical-education/freida-online/gme-resources-links.shtml

GME e-Letter
The GME e-Letter, a free monthly e-mail newsletter from the AMA, is a popular source of news and information for the GME community. Comments from subscribers include:
• “Clear, concise, and relevant!”
• “Very useful since it is focused, brief and contains information of importance to program directors.”
• “Loved the e-letter. Thought it was well-written, informative and appropriately succinct.”
• “A great resource and the best way to share cutting-edge news re: GME.”

Since its debut in May 2001, the GME e-Letter has grown to encompass more than 13,000 subscribers, including:
• Program directors and staff of residency and fellowship programs
• Hospital administrators
• Professional associations
• Certifying/licensing boards
• Physician recruiters
• Governmental and regulatory organizations

The e-Letter covers a wide range of issues affecting GME—everything from resident work hours to updates on accreditation activities and development of new subspecialties. The publication also references peer-reviewed studies and articles in the medical literature that are related to GME.

18 Graduate Medical Education Directory 2011-2012
GME Articles from American Medical News

American Medical News (AMNews) is a weekly newspaper for physicians, published by the AMA, that covers professional, educational, social, economic, and policy issues in medicine. AMNews frequently covers key issues in medical education; recent articles, for example, include:

- Teaching hospitals, residencies win reprieve on Medicaid cuts
- AMA meeting: Resident work hours stir passionate debate
- AMA meeting: Delegates respond to rising student debt
- IMGs, other visa holders in Michigan free to drive again
- Medical schools on target to reach enrollment goals
- New rule excludes medical graduates from federal loan deferment plan
- Gearing up for a graying generation: Training more doctors in geriatrics skills
- Shortage of general surgeons is straining some facilities

Links to these and other articles of specific interest to academic physicians, program directors, medical students, and physicians in training are available free of charge at http://www.ama-assn.org/ama/pub/education-careers/graduate-medical-education/articles-gme.shtml.

Medical Education Bulletin

The Medical Education Bulletin is a newsletter published twice a year by the AMA Medical Education Group. It covers issues of interest to the undergraduate and graduate medical education community, including updates on AMA actions related to medical education at the annual and interim meetings of the AMA House of Delegates.

The Bulletin has wide readership, including GME program directors, medical education directors at teaching hospitals, members of the Section on Medical Schools, medical school deans, and the AMA appointees to the Residency Review Committees.

To subscribe to this free publication and read the current issue, see: www.ama-assn.org/go/ipm.

Guidebook for GME Directors and Coordinators

Published by the AMA Division of Graduate Medical Education, this 87-page guidebook provides residency/fellowship program directors, program coordinators, institution officials, and others information about AMA services, products, and activities related to GME. Also included are descriptions of and contact information for a number of organizations involved in GME, including American Board of Medical Specialties (ABMS) certification boards and medical licensing boards.

AMA Introduction to the Practice of Medicine Educational Series

The AMA Introduction to the Practice of Medicine (IPM) program is a web-based educational series developed through collaboration with the Ohio State Medical Association and The Ohio State University Medical Center. The series is designed to help meet the dual challenges of educating residents in ACGME general competency requirements and supplementing their education in a variety of nontraditional curricular topics. IPM features include:

- 24/7 accessibility, so residents can complete the modules and post-assessments at their own convenience.
- Easy navigation, with quick and easy access to learning modules, assessments, reports and a host of other features.
- Administrative training and technical support.
- Comprehensive library of more than 20 learning modules, assembled by experts from across the country, covering such topics as Health Care Quality, Physician Employment Contracts, and Sleep Deprivation, with more modules under construction. Each module includes a formal lecture, post-assessment, evaluation, and course certificate of completion.
- Extensive reporting features, making it simple to track and document progress. The IPM features easy-to-use tools and reports for GME departments to seamlessly track how their institution—and residents—are using the program through online and offline courses. Administrators can view aggregate evaluation scores to measure performance at the resident, program, and institution level. These documentation capabilities present a real-time picture of an institution’s overall progress toward fulfilling competency requirements.

AMA Continuing Medical Education

Advances in biomedical science and changes in the other facets of the US health care delivery environment engage physicians in a continuous process of professional development. To ensure that they provide patients with the most current and appropriate treatment, services, and information, physicians keep learning through participation in a wide array of conferences and other educational experiences, as well as through independent study of published materials. The AMA supports these physician efforts by:

- Administering the only nonspecialty-specific credit system that recognizes physician completion of continuing medical education (CME) activities
- Offering CME publications and programs (both live conferences, Webinars, phone conferences, and enduring materials, such as online and print activities)
- Establishing and improving new learning modalities (performance improvement and Internet point of care) appropriate for physician professional development
- Developing international opportunities for physicians to earn AMA PRA Category 1 Credit™.
The AMA Physician’s Recognition Award
In 1968, the AMA House of Delegates established the AMA Physician’s Recognition Award (PRA) to both encourage physicians to participate in CME and acknowledge when individual physicians complete CME activities. Activities that meet education standards established by the AMA can be designated for AMA PRA Category 1 Credit™ by educational institutions accredited by the Accreditation Council for Continuing Medical Education (ACCME) or a recognized state medical society to provide CME to physicians. These typically include state medical societies, medical specialty societies, medical schools, and hospitals. Other activities, usually independent or physician directed learning, may be reported for AMA PRA Category 2 Credit™. AMA Physician Recognition Awards are earned for 1, 2, or 3 years.

The AMA also offers the AMA PRA with Commendation, awarded to physicians who exceed the credit required to earn the standard PRA. For more information, visit www.ama-assn.org/go/ppra.

Through partnership arrangements, the AMA will also award the AMA PRA certificate if the CME requirements of other organizations are met. In addition, 39 states accept the AMA PRA or the AMA-approved APA application as evidence that physicians have met the CME requirements for license recredentialing.

The AMA sends information about applying for the AMA PRA to physicians who have had a valid AMA PRA certificate within the past 3 years and physicians whose current certificate is expiring within 3 months.

Information
The AMA PRA application form and the Physician’s Recognition Award and Credit System Information Booklet (2006 revision) are available via:

AMA PRA Rules for Performance Improvement CME and Internet Point of Care (PoC) CME
In 2004, the AMA Council on Medical Education approved new rules governing how Performance Improvement (PI) CME activities could be conducted for AMA PRA Category 1 Credit. Performance improvement CME activities describe structured, long-term processes by which a physician or group of physicians can learn about specific performance measures, retrospectively assess their practice using these measures, apply the measures prospectively over a useful interval, and reevaluate their performance.

Similarly, in 2005, the Council approved new rules governing how Internet PoC activities could be conducted for AMA PRA Category 1 Credit™. Internet PoC CME describes a process developed by accredited CME providers that provides structured, self-directed, online learning by physicians on topics relevant to their clinical practice. Learning for this activity is driven by a reflective process in which physicians must document their clinical question, the sources consulted, and the application to practice for the accredited CME provider.

For more information on these new formats, visit www.ama-assn.org/go/prabooklet.

AMA CME Program
As an ACCME-accredited provider, the AMA offers CME activities in a variety of formats for physicians’ professional development. All activities must be congruent with the mission of the AMA and are planned and implemented to meet AMAs rigorous CME standards.

Enduring CME activities
The AMA offers a number of enduring CME activities that provide physician self-assessment. Available in print, CD-ROM, and Internet formats, these enduring CME activities are intended to provide physicians with clinical and nonclinical information that will meet their professional development needs.

A list of activities is available at www.ama-assn.org/go/cme, or e-mail cme@ama-assn.org for more information.

Journal CME
The AMA offers online journal CME activities in the Journal of the American Medical Association and the six AMA Archives journals. Physicians can earn AMA PRA Category 1 Credit™ by reading the designated articles online and completing a post-test.

AMA-sponsored conferences and live events
The AMA sponsors multiple conferences and live events designated for AMA PRA Category 1 Credit™. Physicians receive education on topics of interest to all disciplines and specialties. Recently, AMA-sponsored conferences and live events have included Basic and Advanced Disaster Life Support programs, the Congress on Health System Readiness, the CPT/RBRVS Symposium and the Federation of State Physician Health Programs.

CPPD Report
Published three times a year, this newsletter provides information and updates to more than 4,500 subscribers.

International CME
The International Conference Recognition Program began in 1990 by an act of the AMA House of Delegates. The AMA recognized that international congresses present opportunities for physicians to participate in quality educational programs and provide opportunities for US physicians to collaborate with colleagues overseas. The AMA recognizes a small number of events each year and provides American physicians with an opportunity to earn AMA PRA Category 1 Credit™ at these approved events. For more information, visit www.ama-assn.org/go/internationalcme.

Gifts to Physicians from Industry
Starting in 2001, the AMA led this initiative to create awareness among physicians and physicians-in-training about the ethical implications of receiving gifts from industry.

The initiative consists of a series of four free online educational modules available at www.ama-assn.org/go/ethicalgifts. Each module presents important general concepts, then uses gifts as the context to illustrate the idea. Every module is rich with case examples.
The educational modules will also help satisfy the requirements from the Accreditation Council for Graduate Medical Education (ACGME) for education on professionalism as one of the six competencies expected of residents in training.

The four educational modules cover these topics:
- An overview of ethical, professional, and legal issues for physicians' relationships with industry
- Physicians' expectations from industry and sales personnel
- Professionalism, including the issues of gifts to physicians from industry
- The AMA guidelines on gifts to physicians from industry

Using the Internet, each module is available in two formats at no cost and with 24-hour access:
- Downloadable resource materials for instructors, at any level of medical education, to use to build 1-hour learning experiences. Materials include a presenter’s guide, PowerPoint slides, and a participant’s handout. CME providers can adapt these resources for use in their local sites.
- Online self-study modules designed for individual learners.

The material in the educational modules is based on the 1990 AMA Council on Ethical and Judicial Affairs (CEJA) Opinion 8.061, “Gifts to Physicians from Industry,” which is part of the AMA Code of Medical Ethics. There are no new policies or guidelines in the modules.

The modules also refer to the Pharmaceutical Research and Manufacturers of America (PhRMA) guidelines, as well as those developed by other medical, industry, and government groups, as appropriate, to give a broad-based understanding of the issues involved in the ethics of gift giving. The PhRMA code and others are very similar in spirit and substance to the AMA Ethical Opinion. The recent guidance to pharmaceutical and device companies by the Office of the Inspector General is provided as a reference.

Virtual Mentor

Virtual Mentor is the AMA's online ethics journal. Published since 1999, Virtual Mentor (VM) explores the ethical issues and challenges that students, residents, and other physicians are likely to confront in their training and daily practice. For this reason, the journal is a valuable teaching resource for medical educators at all levels as well as for doctors and doctors-to-be. Each monthly issue of VM contains original articles and commentary on a given theme—e.g., access to care, quality of life considerations in clinical decision making, public roles of physicians, ethical issues in endocrinology, conflict of values in the clinic.

Virtual Mentor is student- and resident-driven. Theme issue editors are selected each year through a competitive process from among medical students and residents who seek to broaden and deepen their education by taking the time to examine medicine’s ever-increasing ethical challenges. The issue editors meet annually with VM editorial staff, based in Chicago, where we discuss potential topics for the upcoming year. Each editor identifies a theme and month of publication for his or her issue and then solicits articles and case commentary from experienced physicians and other experts in the field who can help VM readers think productively about the topic under discussion. The application process for theme issue editors is announced in VM each September. In 2008, VM was accepted by the National Library of Medicine for indexing in MEDLINE. MEDLINE indexing will make VM’s articles readily accessible to anyone who searches PubMed online.

Virtual Mentor is also home to the John Conley Ethics Essay Contest, publishing the winning student essay in an appropriately themed issue of VM. Announcement of the annual Conley Contest topic and instructions for entering appear in the February VM. Themes for upcoming issues of VM are listed at the bottom of each month’s home page. If you have expertise in a field or topic that will be a VM focus in the future and you would like to contribute to the journal, contact VM at virtualmentor@ama-assn.org.

E. GME-related Organizations

Accreditation Council for Graduate Medical Education (ACGME)
The ACGME Board comprises four members from each of the ACGME’s five member organizations:
- American Board of Medical Specialties
- American Hospital Association
- American Medical Association
- Association of American Medical Colleges
- Council of Medical Specialty Societies
The member organizations nominate the directors, who are elected by the Board. The Board also includes the chair of the Council of Review Committee Chairs, the chair of the Council of Review Committee Residents, a resident appointed by the AMA’s Resident and Fellow Section, three public members, one to four directors-at-large, and two nonvoting federal government representatives.

The mission of the ACGME is to improve health care by assessing and advancing the quality of resident physicians’ education through exemplary accreditation.

Under the aegis of the ACGME, the accreditation of more than 8,900 allopathic graduate medical education programs and the institutions that sponsor them is carried out by 27 residency review committees and an institutional review committee. These committees have been delegated accreditation authority by the ACGME. A Residency Review Committee (RRC) consists of representatives appointed by the American Medical Association, the appropriate specialty board, and, in some cases, a national specialty organization (see Table 4).

The Transitional Year Review Committee is composed of ten members who are appointed by the chair of the ACGME in conjunction with the Executive Committee. The term “review committee” is used to denote a Residency Review Committee, the Transitional Year Review Committee, and the Institutional Review Committee. The Institutional Review Committee (IRC) is composed of ten members appointed by the Chair of the ACGME in conjunction with the Executive Committee. The Institutional Review Committee assumes the responsibility for accrediting institutions which sponsor multiple programs. It evaluates institutions for substantial compliance with the Institutional Requirements.

GME programs are accredited when they are judged to be in substantial compliance with the institutional, common, and specialty program requirements. The requirements are developed and periodically revised by a review committee for its area(s) of competence, and are approved by the ACGME. The activities of the ACGME extend to programs and institutions within the jurisdiction of the United States of America.

ACGME institutional and program requirements are posted on the ACGME Web site: www.acgme.org. The institutional and program requirements describe curricular content for GME programs and may also address program resources and personnel, program length and other issues. Accredited programs and institutions are judged to be in substantial compliance with ACGME institutional, common, and specialty-program-specific requirements.

Also available on the ACGME Web site are the ACGME Policies and Procedures, Bylaws, and Glossary. The Policies and Procedures provide information on the review process, definitions of accreditation statuses, and other useful information. A list of programs accredited by the ACGME, including detailed information about each program, is published by the AMA annually in the Directory (see Section II) using information provided by the ACGME. The ACGME lists accredited programs and institutions on its Web site: www.acgme.org. Click on “Search Programs/Institutions” in the left-hand navigation bar to look up the accreditation status of a program or institution. In addition, the Web site contains comprehensive information about accreditation of graduate medical education programs and sponsoring institutions.

Parker J. Palmer Courage to Teach Award

In February 2001, the ACGME established the Parker J. Palmer Courage to Teach Award to recognize outstanding GME program directors. Criteria for selection include a demonstrated commitment to education with evidence of successful mentoring, program development, and improvement. The ACGME recognizes ten outstanding program directors each year with the award. The winners of the Parker J. Palmer award from 2002 to 2011 are listed below:

2002
- Robert W. Block, MD, University of Oklahoma, Tulsa (Pediatrics)
- Virginia L. Collier, MD, Christiana Care Health Services (Internal Medicine)
- George C. Curry, MD, University of Texas Southwestern Medical Center (Diagnostic Radiology)
- Alfred D. Fleming, MD, Creighton University (Obstetrics-Gynecology/Maternal Fetal Medicine)
- William H. Hester, MD, McLeod Family Medicine Center (Family Medicine)
- Earl D. Kemp, MD, Sioux Falls Family Medicine Residency (Family Medicine)
- Gail A. McGuinness, MD, University of Iowa (Pediatrics)
- Claude H. Organ, Jr, MD, University of California-San Francisco-East Bay (General Surgery)
- Keith D. Wrenn, MD, Vanderbilt University Medical Center (Emergency Medicine)
- Nikitas J. Zervanos, MD, Lancaster General Hospital (Family Medicine)

2003
- C. Bruce Alexander, MD, University of Alabama, Birmingham (Pathology)
- Keith B. Armitage, MD, University Hospitals of Cleveland (Internal Medicine)
- Eugene V. Beresin, MD, Massachusetts General Hospital (Child-Adolescent Psychiatry)
- Frank J. Elsomont, MD, Jackson Memorial Hospital/Jackson Health System (Orthopaedic Surgery)
- Steven K. Feske, MD, Brigham and Women’s Hospital (Neurology)
- Joseph T. Gilhooley, MD, Oregon Health & Sciences University (Pediatrics)
- Harold L. Johnston, MD, Alaska Family Medicine/Providence Hospital (Family Medicine)
- Henry J. Schultz, MD, Mayo Clinic (Retired, Internal Medicine)
- John L. Tarpley, MD, Vanderbilt University (General Surgery)
- Bennett S. Vogelman, MD, University of Wisconsin-Madison (Internal Medicine)
- Kathleen V. Watson, MD, University of Minnesota (Internal Medicine)

2004
- William L. Bocknek, MD, Charlotte Institute of Rehabilitation (Physical Medicine and Rehabilitation)
- Carol Carraccio, MD, University of Maryland Medical System (Pediatrics)
- Carlyle H. Chan, MD, Medical College of Wisconsin (Psychiatry)
- Paul H. Gerst, MD, Bronx-Lebanon Hospital Center, (General Surgery)
- DuPont Guerry, IV, MD, University of Pennsylvania (Hematology-Oncology)
- J. Peter Harris, MD, Golisano Children’s Hospital at Strong University of Rochester (Pediatrics)
- John B. Jeffers, MD, Wills Eye Hospital (Ophthalmology)
- Catherine K. Lineberger, MD, Duke University Medical Center (Anesthesiology)
- Gordon E. Schutze, MD, University of Arkansas for Medical Sciences/Arkansas Children’s Hospital (Pediatrics)
- Eric Walsh, MD, Oregon Health & Science University (Family Medicine)

2005
- Patricia L. Blanchette, MD, University of Hawaii (Geriatric Medicine)
- Francis L. Counselman, MD, Eastern Virginia Medical School (Emergency Medicine)
- Daniel Dedrick, MD, Brigham and Women’s Hospital (Anesthesiology)
- Richard W. Dow, MD, Dartmouth-Hitchcock Medical Center (General Surgery)
- David L. George, MD, Reading Hospital and Medical Center (Transitional Year)
- Mark S. Juzycz, MD, Kresge Eye Institute (Ophthalmology)
- Teresa L. Massagli, MD, University of Washington (Physical Medicine & Rehabilitation)
- Anthony A. Meyer, MD, PhD, University of North Carolina, Chapel Hill (General Surgery)
- Glenn C. Newell, MD, UMDNJ-Robert Wood Johnson (Internal Medicine)
- Eric Scher, MD, Henry Ford Hospital (Internal Medicine)

2006
- Steven R. Cohen, MD, MPH, Mount Sinai School of Medicine (Dermatology)
E. GME-RELATED ORGANIZATIONS

- Deborah S. Cowley, MD, University of Washington School of Medicine (Psychiatry)
- Karen E. Deveney, MD, Oregon Health and Sciences University (General Surgery)
- Jehan El-Bayoumi, MD, George Washington University (Internal Medicine)
- Ralph S. Greco, MD, Stanford University School of Medicine (General Surgery)
- Kirk A. Keegan, Jr, MD, University of California, Orange (Orthopaedic Surgery)
- Dorothy S. Lane, MD, Stony Brook University (Preventive Medicine)
- Shahla Masood, MD, University of Florida, Jacksonville (Pathology)
- Kemuel L. Philbrick, MD, Mayo Clinic (Psychiatry)
- Volknner K. H. Sonntag, MD, Barrow Institute for Neurological Institute (Neurosurgery)

2007
- David Allen, MD, University of Wisconsin Children’s Hospital, Madison (Pediatrics)
- Hassan Bazari, MD, Massachusetts General Hospital, Boston (Internal Medicine)
- Carey Chisholm, MD, Indiana University School of Medicine, Indianapolis (Emergency Medicine)
- Gary Clark, MD, MetroHealth Rehabilitation Institute, Cleveland (Physical Medicine and Rehabilitation)
- Javier Alfonso Gonzalez del Rey, MD, Cincinnati Children’s Hospital, Ohio (Pediatric Emergency Medicine)
- Robert Heros, MD, University of Miami (Neurology)
- Neil Mitnick, DO, Albany Medical College, New York (Family Medicine)
- Humberto Quintana, MD, Louisiana State University Health Sciences Center, New Orleans (Child and Adolescent Psychiatry)
- Allen Silbergleit, MD, St. Joseph Mercy Oakland, Pontiac, Michigan (General Surgery)
- Jeffrey Wiese, MD, Tulane University School of Medicine, New Orleans (Internal Medicine)

2008
- Robert Brown, MD, Beth Israel Deaconess Medical Center, Boston (Neurology)
- Steve Galetta, MD, University of Pennsylvania, Philadelphia (Neurology)
- Kalpalatha Guntupalli, MD, Baylor College of Medicine, Houston (Pulmonary/Critical Care)
- Karen Horvath, MD, University of Washington, Seattle (General Surgery)
- Richard Lackman, MD, University of Pennsylvania, Philadelphia (Orthopaedic Surgery)
- John Jane, MD, University of Virginia, Charlottesville (Neurological Surgery)
- Mukta Panda, MD, University of Tennessee, Knoxville (Internal Medicine)
- Susan Prames, MD, Duke University, Durham (Emergency Medicine)
- Richard Shugarman, MD, University of Washington (Pediatrics)
- William Sonis, MD, Drexel University College of Medicine, Friends Hospital, Philadelphia (Child and Adolescent Psychiatry)

2009
- Michael S. Beeson, MD, Summa Health System, Akron, Ohio (Emergency Medicine)
- James Burks, MD, Texas Tech University, Lubbock (Internal Medicine)
- Peter Carek, MD, Medical University of South Carolina, Charleston (Family Medicine)
- Edmund Cibas, MD, Brigham and Women’s Hospital, Boston, Massachusetts (Cytopathology)
- Nancy Gaba, MD, George Washington University, Washington, DC (Obstetrics and Gynecology)
- Sheela Kapre, MD, San Joaquin General Hospital, French Camp, California (Internal Medicine)
- Gail Manos, MD, Naval Medical Center, Portsmouth, Virginia (Psychiatry)
- D. Karl Montague, MD, Cleveland Clinic, Ohio (Urology)
- Lori Schuh, MD, Henry Ford Hospital, Detroit, Michigan (Neurology)
- James Valentine, MD, University of Texas Southwestern Medical School, Dallas (Surgery)
- James Welling, MD, Good Samaritan Hospital, Cincinnati, Ohio (Surgery)

2010
- Ramesh Ayyala, MD, Tulane University (Ophthalmology)
- John Frohna, MD, University of Wisconsin Hospitals and Clinics (Pediatrics)
- Michael Hart, MD, Swedish Medical Center (Surgery)
- Ronald Maier, MD, Harborview Medical Center (Surgical Critical Care)
- Eileen Reynolds, MD, Beth Israel Deaconess Medical Center (Internal Medicine)
- Michael Rhodes, MD, Utah Valley Regional Medical Center (Family Medicine)
- Gregory Rouan, MD, University of Cincinnati College of Medicine (Internal Medicine)
- Philip Shayne, MD, Emory University (Emergency Medicine)
- Prathibha Varkey, MD, Mayo Clinic (Preventive Medicine)
- Diane Wayne, MD, McGaw Medical Center of Northwestern University (Internal Medicine)

2011
- Maria Aaron, MD, Emory University, Atlanta, Georgia (Ophthalmology)
- Stanley Ashley, MD, Brigham and Women’s Hospital, Boston, Massachusetts (General Surgery)
- Mark Bugnitz, MD, University of Tennessee Health Science Center, Memphis (Pediatrics)
- Christian de Virgilio, MD, Los Angeles County-Harbor-UCLA Medical Center, Torrance, California (General Surgery)
- Byron Joyner, MD, MPA, University of Washington, Seattle (Urology)
- Gregory Kane, MD, Thomas Jefferson University, Philadelphia, Pennsylvania (Internal Medicine)
- Tsveti Markova, MD, FAAPP, Wayne State University/Crittenton, Rochester, Michigan
- Vijay Rajput, MD, UMDNJ Robert Wood Johnson Medical School (Camden)/Cooper University Hospital, Camden, New Jersey (Internal Medicine)
- Karen Souter, MBBS, FRCA, University of Washington, Seattle (Anesthesiology)
- Ann Van Heest, MD, University of Minnesota, Minneapolis (Orthopaedic Surgery)

Parker J. Palmer, educator and author of *The Courage to Teach*, promotes the concept of “living divided no more,” which has proven relevant to teaching in academic health centers.
ACGME Staff
The following list is updated as of December 2010.
Main Office: (312) 755-5000

Office of the Executive Director
Thomas J. Nasca, MD, MACP, chief executive officer
(312) 755-7492
tnasca@acgme.org
Marsha A. Miller, associate vice president, Office of Resident Services
(312) 755-5041
mmiller@acgme.org
Rose Cross, executive secretary
(312) 755-5008
rmc@acgme.org

Department of Accreditation Committees
Jeanne K. Heard, MD, PhD, senior vice president
(312) 755-5040
jkh@acgme.org
Mary Cleveland, executive assistant
(312) 755-5010
mcleveland@acgme.org
Caroline Fischer, MBA, executive director, Accreditation Standards
(312) 755-5044
cfischer@acgme.org

Residency Review Committees (RRCs) for
Allergy and Immunology
Linda Thorsen, MA, executive director
(312) 755-5029
lmt@acgme.org

Anesthesiology
Patricia M. Surdyk, PhD, executive director
(312) 755-5005
psurdyk@acgme.org

Colon and Rectal Surgery
Linda King, executive director
(312) 755-5498
lking@acgme.org

Dermatology
Patricia Levenberg, PhD, executive director
(312) 755-5048
plevenberg@acgme.org

Emergency Medicine
Lynne Meyer, PhD, MPH, executive director
(312) 755-5006
lmeyer@acgme.org

Family Medicine
Lynne Meyer, PhD, MPH, executive director
(312) 755-5006
lmeyer@acgme.org

Internal Medicine
Jerry Vasillas, PhD, executive director
(312) 755-7477
jvasillas@acgme.org

Medical Genetics
Pamela Derstine, PhD, executive director
(312) 755-5083
pderstine@acgme.org

Neurological Surgery
Pamela Derstine, PhD, executive director
(312) 755-5083

rmiller@acgme.org
The AAMC has a number of programs and initiatives aimed at improving the health of Americans by fostering innovations in medical education. The AAMC seeks to enhance competence along the health education continuum (MedEdPORTAL). Through innovative technical solutions, the CLI will link medical education curricula, training innovations, administrative tools, teaching tools, and assessment resources across the entire physician-education continuum (from pre-medical to the practicing physician). Building on the success of MedEdPORTAL, the CLI will expand the scope of MedEdPORTAL to introduce a suite of new portals, including:

- **Works In Progress**
  - This portal is intended to highlight, share, and focus on creating networks of communities around medical education works in progress and programs identified as “exemplary” during the LCME accreditation peer review process. This portal will enable educators to submit and locate ideas that are new, policies that work, and approaches that are in the early stages of adoption. In addition, the new portal will utilize social networking tools in an effort to promote and facilitate conversations about the ideas and works presented.

- **Curriculum Inventory Portal**
  - This portal is focused on gathering and analyzing curricular information from existing curriculum management systems used by the majority of AAMC-member institutions. It will allow for review and comparison of medical school curricula on a national level while also identifying and monitoring trends across medical education. The Curriculum Inventory Portal will replace the existing AAMC Curriculum Management Information Tool (CurrMIT).

- **Performance Improvement Portal**
  - This portal is focused on providing educational, research, quality improvement, logistical and other resources to the academic CME community, using social networking tools to promote conversations about the ideas and works presented.

### Association of American Medical Colleges (AAMC)

The Association of American Medical Colleges is a not-for-profit association representing all 133 accredited US and 17 accredited Canadian medical schools; nearly 400 major teaching hospitals and health systems, including 62 Department of Veterans Affairs medical centers; and nearly 90 academic and scientific societies. Through these institutions and organizations, the AAMC represents 128,000 faculty members, 75,000 medical students, and 110,000 resident physicians. The AAMC seeks to improve the nation’s health by enhancing the effectiveness of academic medicine. The AAMC assists academic medicine’s institutions, organizations, and individuals in the three main mission areas of medical education, medical research, and patient care.

In GME, the AAMC represents and supports members in improving educational quality, strengthening institutional GME leadership and institutional accountability for GME, developing faculty, and setting a national agenda for the support of GME. It carries out this work through a variety of activities.

#### Compact Between Resident Physicians and Their Teachers

[https://www.aamc.org/initiatives/residentcompact](https://www.aamc.org/initiatives/residentcompact)

Contact: Lesley Ward

E-mail: lward@aamc.org

The Compact is a declaration of the fundamental principles of GME and the major commitments of both residents and faculty to the educational process, to each other, and to the patients they serve. The Compact’s purpose is to provide institutional GME sponsors, program directors, and residents with a model statement that will foster more open communication, clarify expectations, and re-energize the commitment to the primary educational mission of training tomorrow’s doctors.

#### Medical Education Initiatives

[www.aamc.org/meded/tiime](www.aamc.org/meded/tiime)

Contact: John Prescott, MD

E-mail: jprescott@aamc.org

The AAMC has a number of programs and initiatives aimed at improving the health of Americans by fostering innovations in medical education to better align the knowledge, skills, and professionalism of medical students, residents, and practicing physicians with the needs and expectations of the public. Employing expert panels, convening special topic colloquia, and collaborating with external funding partners to administer school-based curriculum improvement grants, the AAMC strives to highlight creative and dynamic approaches employed by medical educators to develop enriching learning experiences and teaching models.
E. GME-RELATED ORGANIZATIONS

CurrMIT
www.aamc.org/currmit
Contact: Terri Cameron
E-mail: helpcurrmit@aamc.org
The Curriculum Management & Information Tool (CurrMIT) is an online database designed to allow medical schools throughout the US and Canada to document, manage, and share information related to medical school curriculum activities and content. CurrMIT allows each medical school to better understand and administer its own curriculum as well as learn from curricula at other institutions.

Project Medical Education (PME)
www.aamc.org/members/pme
Contact: Sallyann Bergh
E-mail: sbergh@aamc.org
Project Medical Education (PME) helps educate policymakers and others about the missions of medical schools and teaching hospitals. During visits to medical schools and teaching hospitals, policymakers assume the roles of medical residents, students, and faculty physicians in a 1- to 2-day program that shows them first-hand how medical education benefits all Americans. More than 900 legislators and staff members have participated in at least one PME program, held in conjunction with over 70 AAMC member institutions in 28 states since the program’s inception in 1999.

Organization of Resident Representatives (ORR)
www.aamc.org/members/orr
Contact: Alexis L. Ruffin
E-mail: alruffin@aamc.org
The mission of the AAMC’s Organization of Resident Representatives (ORR) is to improve resident physician education and training, and the quality of health care, by providing a venue for resident voices and offering leadership development to resident physicians pursuing careers in academic medicine. ORR members are appointed through the AAMC Council of Academic Societies, representing program directors or department chairs.

Group on Education Affairs (GEA)
www.aamc.org/members/gea
Contact: M. Brownell (Brownie) Anderson
E-mail: mbaver@aanm.org
The group’s purpose is to promote excellence in the education of physicians throughout their professional lives and, thereby, to contribute to improving the health of the public. Reflecting the continuum of medical education, the GEA is organized by four sections, including the Graduate Medical Education Section, which focuses on supporting the development and continued improvement of GME programs. The Research in Medical Education (RIME) Conference, held in conjunction with the AAMC Annual Meeting, includes research papers, symposia, and abstract sessions. The Innovations in Medical Education Exhibits (IME) also are held during the Annual Meeting.

Group on Resident Affairs (GRA)
www.aamc.org/members/grab
Contact: Sunny Yoder
E-mail: syoder@aamc.org
The GRA develops leaders who are responsible for GME oversight, financing, and quality in their respective medical schools and teaching hospitals. The Group offers a GME Leadership Development Course that explores the institutional GME leader’s responsibilities, from leading a sponsoring institution successfully through an accreditation review to improving the GME enterprise and developing advanced leadership skills. The foundation of the course is the GRA document, “Core Competencies of Institutional GME Leaders/DOI’s,” available on the GRA Web site at www.aamc.org/members/gra/corecompetencies08.pdf.

Other AAMC Activities
The AAMC also helps students make career decisions and enter residency programs. It assists residents in managing their medical education loans. In collaboration with the AMA, it tracks residents from entry to residency through completion and beyond. The AAMC also offers GME-related online publications.

Careers in MedicineSM
www.aamc.org/careersinmedicine
Contact: George V. Richard, PhD
E-mail: grichard@aamc.org
This program helps students choose a medical specialty and select and apply to residency programs (see listing under “Residency Application and Career Planning Resources” for more information).

Visiting Student Application Service (VSAS®)
www.aamc.org/vsas
Contact: Melissa Donner
E-mail: mdonner@aamc.org
The Visiting Student Application Service (VSAS) is an AAMC program designed to make it easier for medical students to apply for senior electives at other US LCME medical schools and independent academic medical centers that are members of the Council of Teaching Hospitals and Health Systems (COTH). Launched as a 10-school pilot program in April 2008, VSAS has experienced enthusiastic growth since and currently serves 94 medical “host” institutions, 126 medical “home” schools, and almost 7,100 applicants.

Electronic Resident Application Service (ERAS®)
www.aamc.org/eras
Contact: B. Renee Overton, MBA
E-mail: browerton@aamc.org
ERAS—the Electronic Resident Application Service—works with applicants, designated dean’s offices, and training programs to streamline the residency and fellowship application process for all involved. ERAS users transmit application materials and supporting credentials to training programs using the Internet. ERAS serves almost 48,000 residency and fellowship applicants, 163 medical schools and designated dean’s offices, and almost 6,000 training programs annually (see listing under “Residency Application and Career Planning Resources” for more information).

FindAResident®(FAR)
www.aamc.org/findaresident
Contact: B. Renee Overton, MBA
E-mail: browerton@aamc.org
FindAResident is a Web-based service designed to provide a direct and efficient way for program administrators to connect with residency and fellowship candidates. Residency and fellowship programs can share information about their programs as well as open positions with applicants. Applicants can post their resume and contact information for programs to review. FindAResident is a supplement to ERAS— the Electronic Residency Application Service, providing services not fulfilled by ERAS.

FIRST for Medical Education
www.aamc.org/first
Contact: Nancy-Pat Weaver
E-mail: nweaver@aamc.org
FIRSTfor Medical Education is designed to help members of the academic medicine community navigate the complexities of student debt. FIRST offers a full range of resources to help medical school borrowers expand their financial literacy, make smart decisions about student loans, and manage their student debt wisely. Interactive resources include financial literacy modules and the Med-loans® Organizer and Calculator, designed for medical students to organize their student loans and calculate repayment options.

GME Track
https://www.aamc.org/services/gmetrack/
Contact: Gwen Garrison
E-mail: gmetrack@aamc.org

GME Track is a Web-based application designed to assist with the collection and management of GME data. GME Track contains the National GME Census, jointly conducted by the AAMC and AMA, which collects detailed information on residents/fellows and training programs. Data collected in the National GME Census are used for national GME statistics and workforce studies as well updating FREIDA Online. Programs, institutions, and medical schools have the ability to download their data and create customized data files on current or previous residents/graduates.

Center for Workforce Studies
https://www.aamc.org/initiatives/workforce/cfws/
Contact: Clese Erikson
E-mail: cerikson@aamc.org

In light of the need to increase medical school and GME capacity to meet the needs of the nation in 2015 and beyond, the Center for Workforce Studies works to:
- Develop the capacity to effectively document and study physician workforce issues related to physician supply, demand, utilization, and distribution across specialty and geographic region
- Support informed decision-making by the medical education community (medical schools, teaching hospitals, faculty, medical students and residents) and policy makers
- Support AAMC policy goals that related to physician workforce, such as increasing underrepresented minorities in medicine

AAMC Publications

The following publications are available via the AAMC Web site at www.aamc.org/publications:
- Medical Educational Costs and Student Debt
- Roadmap to Residency: From Application to the Match and Beyond
- AAMC Survey of Resident/Fellow Stipends and Benefits (https://www.aamc.org/data/stipend/)
- Washington Highlights (https://www.aamc.org/advocacy/washhigh/) (weekly)
- Diversity in the Physician Workforce: Facts & Figures 2010

Association for Hospital Medical Education (AHME)
The Association for Hospital Medical Education (AHME), founded in 1956, is a national, nonprofit professional organization involved in the continuum of hospital-based medical education—undergraduate, graduate, and continuing medical education. AHME’s more than 600 members represent hundreds of teaching hospitals, academic medical centers, and consortia nationwide.

The mission of AHME is to:
- Promote improvement in medical education to meet health care needs
- Serve as a forum and resource for medical education information
- Develop professionals in the field of medical education
- Advocate the value of medical education in health care

AHME offers training and current information for medical education professionals; mentoring and training from national experts on GME institutional administration; and collaboration with accreditation, regulatory, governmental, and other professional organizations in medical education.

AHME celebrated its 50th anniversary in Chicago, Illinois, in May 2006. To commemorate this occasion, AHME published the “50th Anniversary Celebration: 1956-2006” book to describe AHME’s history of service and honor AHME’s leaders, friends, and supporters.

Publications
AHME News
www.ahme.org/publications/news.html

AHME News, published as a paper copy once per year, with quarterly “electronic” versions, offers news about the Association’s divisions, committees, and councils in addition to updates on governmental and accreditation issues affecting medical education.

Guide to Medical Education in the Teaching Hospital
www.ahme.org/publications/guide.html

A practical guide to help navigate the constantly changing landscape of GME. Originally published in 1994, the third edition is now available online in a special section of the AHME Web site, with new chapters added periodically and existing chapters updated as they are completed.

Organization of Program Directors Associations (OPDA)
The Organization of Program Directors Associations (OPDA), a component group of the Council of Medical Specialty Societies (CMSS), works to promote the role of the residency director and residency program director societies in achieving excellence in GME.

Created in 2000, OPDA is a leadership consortium of residency program director (or chair) societies in each of the 27 medical and surgical specialties that correspond to 27 ACGME Residency Review Committees. Consisting of one liaison representative from each pro-
gram director society, OPDA meets regularly to provide peer interaction, information sharing, and collaborative problem solving. In addition, OPDA sponsors periodic symposia and meetings on timely GME issues, provides a forum for communication with leaders in GME, and monitors and promotes GME excellence in the activities of the AAMC, ACGME, NRMP, NBME, ECFMG, and other organizations that regulate and impact GME.

Recently, OPDA was invited to appoint representatives to two key organizations in medical education (ie, the NRMP and the ACGME) to represent OPDA and program director interests in matters of relevance to GME.

The following societies of program directors (or chairs) are currently represented on OPDA:

**Allergy and immunology**
Allergy/Immunology Training Program Directors (A/ITPD)

**Council of Medical Specialty Societies**
As noted above, OPDA is a component group of the Council of Medical Specialty Societies (CMSS), founded in 1965 to provide an independent forum for the discussion by medical specialists of issues of national interest and mutual concern. CMSS serves to represent the views of specialist physicians in influencing policy, medical education, and accreditation from a broad, cross-specialty perspective.
Training Administrators of Graduate Medical Education (TAGME)

The National Board for Certification of Training Administrators of Graduate Medical Education (TAGME) programs was created in 2003 to establish standards for the profession, acknowledge the expertise needed to successfully manage GME programs, and recognize those training program administrators who have achieved competence in all fields related to their profession.

Criteria for Certification

• Years of on-the-job experience: at least 3 continuous years in the same clinical specialty
• National meeting attendance: at least one GME-related meeting within the past 3 years
• Site visit/internal review: participation in at least one site visit or internal review within the past 3 years
• Personal professional development within the past 3 years (2 activities):
  o Oral/poster presentations
  o Abstracts and/or publications
  o Participation and/or leadership in national organizations within the profession
  o Participation and/or leadership in sponsoring institutional/GME committees
  o Departmental presentations, such as orientation or in-service training sessions on program procedures for attendings and/or residents
• Successful completion of the Assessment Tools
• Certification is valid for 5 years

Criteria for Maintenance of Certification

• Five years between certification periods
• National meeting attendance: at least two GME-related meetings within the 5-year period
• Institution/Department Committee participation: at least one committee per year
• Personal professional development activities (3 activities within the 5-year period)
• Oral or poster presentations
• GME-related workshop attendance
• Abstracts and/or publications
• Committee leadership
• Participation on a national or regional level committee
• Continued education coursework to enhance professional development (eg, online professional education modules, such as SoftSkills or institutional-based learning courses)
• Higher education coursework
• Successful completion of the Maintenance of Certification Tool

ACGME GME Program Coordinator Excellence Award

• In 2010, the Accreditation Council for Graduate Medical Education (ACGME) chose five program coordinators to receive the first annual GME Program Coordinator Excellence Award. TAGME certification was held by a number of the winners.
  • Sherry Berka, internal medicine, University of Colorado
  • Anne Hoffmann, emergency medicine, New York Presbyterian Hospital
  • Vicky Huebner, internal medicine, Mayo Clinic
  • Mary Liberty, psychiatry, Maine Medical Center
  • Jeri Whitten, pediatrics, West Virginia University

Section II

Specialty/ Subspecialty
Information and Programs

Introduction

Included in Section II are descriptions of the specialties/subspecialties with residency/fellowship programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) and/or ACGME Program Requirements in effect. Also included are subspecialties for which a member board of the American Board of Medical Specialties (ABMS) offers certification. Subspecialties are listed alphabetically under each specialty.

In addition, this section of the Directory contains a list of graduate medical education (GME) programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) (listed in Section III in previous editions). Programs are listed by specialty under the state and city of the sponsoring institution (refer to sample, below). Listed under the program name is the institution that sponsors the residency program, followed by the major participating institution(s), if any, which are recognized by at least one ACGME Residency Review Committee (RRC) as providing a major portion of required GME. Hospitals and other institutions that provide rotations of less than one-sixth of the program length or less than a total of 6 months are not listed in the Directory.

Listings contain the program director's name and program address, telephone and fax numbers, and e-mail address. Newly appointed program directors since the publication of last year's Directory are noted with an asterisk. Additional information on each program includes the ACGME-accredited length of the program and number of ACGME approved/offered positions. (Note: The published program length reflects the length approved by the RRC. The program may require or offer additional years; these data are included in FREIDA Online, at www.ama-assn.org/go/freida, and the GME Library on CD-ROM.) The program identification number appears at the bottom of each listing: the first three digits of this number indicate the specialty/subspecialty code (see “Specialties/Subspecialties with ACGME Program Requirements,” p 39), and the next two digits indicate the state code.

Sample Listing

Title of the Program
Sponsor: The program's sponsoring institution
The program's major participating institution(s) (if any)
Program Director: Name (* = new director since publication of last Directory)
Address
City, state, zip code
Telephone number, fax number
E-mail address
Length: Program length ACGME Approved/Offered Positions:
Program ID: 000-00-00-000

The Role of the ACGME

The population of programs listed in this section is set by the ACGME, which shares with the AMA information about accreditation actions and other changes through regular electronic data transfers.

The Directory, as the official list of ACGME-accredited programs, generally reflects accreditation actions completed by December of the previous year. The data published in this edition were transferred from the ACGME to the AMA on January 19, 2011. Programs with withdrawal dates after this date are included in Section III. Readers are reminded that accreditation actions and related changes can alter the ACGME program population on a daily basis and that the Directory serves only as a "snapshot" of this population at a given moment. For updated information on ACGME-accredited programs, consult the ACGME web site at www.acgme.org.
Preventive Medicine Programs

The preventive medicine programs listed include programs that offer areas of specialization in aerospace medicine, general preventive medicine, occupational medicine, and public health and general preventive medicine.

Transitional Year Programs

Transitional Year programs are available for physicians seeking broad clinical experience before entering GME in their chosen field or for physicians who have not yet decided on a medical specialty.

Combined Specialty Programs

Combined training consists of a coherent educational experience in two or more closely related specialty or subspecialty programs. The educational plan for combined training is approved by the specialty board of each of the specialties to assure that resident physicians completing combined training are eligible for board certification in each of the component specialties. Each specialty or subspecialty program is separately accredited by the ACGME through its respective Residency Review Committee (RRC). The duration of combined training is longer than any one of its component specialty programs standing alone, and shorter than all of its component specialty programs together. Applicants to combined specialty programs, listed in Appendix A, are encouraged to review requirements for admission to the certification process of each board (see Appendix B).

Restricted-entry GME Programs

Centers for Disease Control and Prevention Programs

GME programs at the Centers for Disease Control and Prevention (CDC) are usually open only to CDC physicians.

US Uniformed Services Programs

US Uniformed Services (Army, Navy, Air Force, Public Health Service) first-year GME positions are filled by graduates of accredited schools of medicine and osteopathic medicine. Only those individuals who have graduated or are currently in medical school are eligible to apply for these first-year GME positions. The majority of the Uniformed Services’ first-year GME positions are filled by individuals with an existing active duty service obligation. In most cases, only those individuals already serving in the Uniformed Services are eligible for appointment to military graduate year-2 and beyond residency programs. Graduates of non-US or non-Canadian medical schools are eligible to apply for graduate year-2 positions if they possess the standard ECFMG Certificate and have completed 1 year of GME training at an ACGME-accredited program.

It is important to note that an individual seeking to be trained in a Uniformed Services medical treatment facility must be qualified for appointment as a commissioned officer in the Uniformed Services. An active duty service obligation is required for participation in Uniformed Services GME training. Acceptance of GME applicants is based on the status of the applicant’s current accreditation status.

Sources for Additional Information

FREIDA Online (Fellowship and Residency Electronic Interactive Database Access), an Internet database available through the AMA web site at www.ama-assn.org/go/freida, offers additional information on GME programs. In addition, the GME e-Letter, a free monthly publication available via e-mail, offers news and updates on all facets of GME. See www.ama-assn.org/go/gmenews.

Sources for this Section

Sources for the information and data in this section include:

- Guide to Physician Specialties, ABMS. (Note: Unless otherwise indicated, all text in the “Professional Description” section of each specialty/subspecialty is taken from this document.)
- ACGME, Number and Percent of New Program Directors, July 1, 2009-June 30, 2010 academic year, www.acgme.org/adspublic/ (Note: Overall program director turnover rate was 1,050 out of 8,813 ACGME-accredited programs, or 11.9%)
- “Slow Growing,” Modern Healthcare, August 9, 2010

Note: Generally, data are shown for specialties/subspecialties in which at least one third of programs in that specialty/subspecialty selected an expanded listing in FREIDA Online.

Allergy and Immunology

Professional Description

An allergist-immunologist is trained in evaluation, physical and laboratory diagnosis, and management of disorders involving the immune system. Selected examples of such conditions include asthma, anaphylaxis, rhinitis, eczema, and adverse reactions to drugs, foods, and insect stings as well as immune deficiency diseases (both acquired and congenital), defects in host defense, and problems related to autoimmune disease, organ transplantation or malignancies of the immune system. As our understanding of the immune system develops, the scope of this specialty is widening.

Training programs are available at some medical centers to provide individuals with expertise in both allergy/immunology and adult rheumatology, or in both allergy/immunology and pediatric pulmonology. Such individuals are candidates for dual certification.

Source: American Board of Medical Specialties, Guide to Physician Specialties

A certified specialist in allergy and immunology is a physician who previously has passed the certification examination of the American Board of Internal Medicine (ABIM) and/or the American Board of Pediatrics (ABP) with additional certification by the American Board of Allergy and Immunology (ABAI), a Joint Board of the ABIM and the ABP. Diplomates of the ABAI have detailed knowledge of the underlying pathophysiology and the diagnosis, treatment, and prevention of allergic diseases such as allergic rhinitis, allergic asthma, urticaria, anaphylaxis, hypersensitivity pneumonitis, atopic and contact dermatitis, and allergic gastrointestinal disorders, as well as comparable clinical problems without an apparent allergic etiology or component such as vasomotor rhinitis, nonallergic asthma, and idiopathic and/or hereditary forms of urticaria and/or angioedema. Diplomates also have expertise in the management of pulmonary complications of certain of these diseases.

Diplomates of the ABAI also possess advanced understanding of the biology of inflammation, immunochimistry, immunobiology, and pharmacology and experience in the application of this knowledge to the diagnosis, management, and therapy of immunologic diseases. This includes inborn or acquired defects of host resistance, autoimmune diseases, bone marrow and solid organ transplantation, gene replacement therapy, adverse drug reactions, and related conditions. Diplomates have demonstrated to the satisfaction of their peers that they possess the general qualifications specified and are ethical and humanistic practitioners of medicine.

Source: American Board of Allergy and Immunology

Prerequisites; Length of Training

Prior completion of internal medicine or pediatrics program; length of accredited programs is 2 years.

Subspecialties

No subspecialty programs accredited by the Accreditation Council for Graduate Medical Education; no subspecialty certificates offered by the ABAI. The ABAI, however, does offer formal special pathways for physicians seeking dual certification in allergy/immunology and pediatric pulmonology; allergy/immunology and pediatric rheumatology; and allergy/immunology and adult rheumatology. Additional information regarding special pathways is available upon request to the ABAI.

Data

Unless otherwise noted, all data are for 2010.

**Resident Evaluation**
- Yearly specialty in-service examination required: 95.7%
- Patient surveys: 78.3%
- Portfolio system: 82.6%
- 360-degree evaluations: 95.7%
- Objective structured clinical examinations (OSCE): 21.7%

**Program Evaluation**
- Program graduation rates: 73.9%
- Board certification rates: 100.0%
- In-training examinations: 91.3%
- Performance-based assessments: 52.2%

**Employment Policies and Benefits**
- Part-time/shared positions: 4.3%
- On-site child care: 39.1%
- Subsidized child care: 4.3%
- Allowance/stipend for professional expenses: 73.9%
- Leave for educational meetings/conferences: 78.6%
- Moving allowance: 8.7%
- Housing stipend: 4.3%
- On-call meal allowance: 34.8%
- Free parking: 47.8%
- PDAs: 21.7%
- Placement assistance upon completion of program: 21.7%
- Cross coverage in case of illness/disability: 65.2%

**Compensation and Leave (Graduate Year 1)**
- Average resident/fellow compensation: $53,649
- Average number weeks of vacation: 8.1
- Sick days (paid): 19.8
- Maximum number of paid days for family/medical leave: 37
- Maximum number of unpaid days for family/medical leave: 55

**Major Medical Benefits**
- Major medical insurance for residents: 100.0%
- Major medical insurance for dependents: 87.0%
- Outpatient mental health insurance: 87.0%
- Inpatient mental health insurance: 82.6%
- Group life insurance: 82.6%
- Dental insurance: 82.6%
- Disability insurance: 78.3%
- Disability insurance for occupationally acquired HIV: 65.2%
- Medical insurance coverage begins when starting program: 82.6%

Anesthesiology

Professional Description
An anesthesiologist is trained to provide pain relief and maintenance, or restoration, of a stable condition during and immediately following an operation or an obstetric or diagnostic procedure. The anesthesiologist assesses the risk of the patient undergoing surgery and optimizes the patient’s condition prior to, during, and after surgery. In addition to these management responsibilities, the anesthesiologist provides medical management and consultation in pain management and critical care medicine.

Anesthesiologists
- Diagnose and treat acute, long-standing and cancer pain problems
- Diagnose and treat patients with critical illnesses or severe injuries
- Direct resuscitation in the care of patients with cardiac or respiratory emergencies, including the need for artificial ventilation
- Supervise post-anesthesia recovery

Prerequisites; Length of Training
Length of accredited programs is 3 or 4 years (the latter includes the clinical base year).

Subspecialties
Subspecialty programs accredited by the ACGME
- Adult cardiothoracic anesthesiology
- Critical care medicine
- Pain medicine*
- Pediatric anesthesiology

*In 2007, ACGME-accredited pain medicine programs under anesthesiology, neurology, physical medicine and rehabilitation, and psychiatry were combined into a multidisciplinary pain medicine subspecialty.

Subspecialty certificates offered by the American Board of Anesthesiology
- Critical care medicine
- Hospice and palliative medicine
- Pain medicine

Data
Unless otherwise noted, all data are for 2010.

† Preferred means the number of applicants for whom the specialty was the only or first choice.

Adult Cardiotoracic Anesthesiology

Professional Description
Adult cardiothoracic anesthesiology is “devoted to the preoperative, intraoperative, and postoperative care of adult patients undergoing cardiothoracic surgery and related invasive procedures.”

Fellows “should be proficient in providing anesthesia care for patients undergoing cardiac surgery with and without extracorporeal circulation, and thoracic surgery including operations on the lung, esophagus, and thoracic aorta. The curriculum should also include experience with patients undergoing nonoperative diagnostic and interventional cardiac, thoracic, and electrophysiological procedures. In addition, the cardiothoracic anesthesiology fellow should develop skills in the conduct of preoperative patient evaluation and interpretation of cardiovascular and pulmonary diagnostic test data, hemodynamic and respiratory monitoring, advanced-level perioperative transesophageal echocardiography (TEE), management of cardiopulmonary bypass (CPB), pharmacological and mechanical hemodynamic support, perioperative critical care, including ventilatory support and perioperative pain management.”

Source: Adult Cardiothoracic Anesthesiology Program Requirements, ACGME

Critical Care Medicine

Professional Description
An anesthesiologist who specializes in critical care medicine diagnoses, treats and supports patients with multiple organ dysfunction. This specialist may have administrative responsibilities for intensive care units and may also facilitate and coordinate patient care among the primary physician, the critical care staff, and other specialists.

Prerequisites; Length of Training
Completion of an anesthesiology residency is required; length of accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2010.

Pediatric Anesthesiology

Professional Description
A pediatric anesthesiologist is a fully trained anesthesiologist who has completed at least 1 year of specialized training in anesthesia care of infants and children. Most pediatric surgeons deliver care to children in the operating room along with a pediatric anesthesiologist. Many children who need surgery have very complex medical problems that affect many parts of the body. The pediatric anesthesiologist is best qualified to evaluate these complex problems and plan a safe anesthetic for each child.

Pediatric anesthesiologists treat children from the newborn period through the teenage years. They choose to make pediatric care the core of their medical practice, and the unique nature of medical and surgical care of children is learned from advanced training and experience in practice. Pediatric anesthesiologists are responsible for the general anesthetic and surgical care of children and young adults. They choose to make pediatric care their career.

Pediatric anesthesiologists generally provide the following services:
- Evaluation of complex medical problems in infants and children when surgery is needed
- Planning and care for before and after surgery
- A nonthreatening environment for children in the operating room
- Pain control, if needed after surgery, either with intravenous (IV) medications or other anesthetic techniques
- Anesthesia and sedation for many procedures out of the operating room
- Medications or other anesthetic techniques
- Medications or other anesthetic techniques
- Medications or other anesthetic techniques

Pain control, if needed after surgery, either with intravenous (IV) medications or other anesthetic techniques

A nonthreatening environment for children in the operating room such as MRI, CT scan, and radiation therapy

Prerequisites; Length of Training
Completion of an anesthesia residency is required; length of accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2010.

Colon and Rectal Surgery

Professional Description
A colon and rectal surgeon is trained to diagnose and treat various diseases of the intestinal tract, colon, rectum, anal canal, and perianal area by medical and surgical means. This specialist also deals with other organs and tissues (such as the liver, urinary, and female reproductive system) involved with primary intestinal disease.

Colon and rectal surgeons have the expertise to diagnose and often manage anorectal conditions such as hemorrhoids, fissures (painful tears in the anal lining), abscesses, and fistulae (infections located around the anus and rectum) in the office setting.

They also treat problems of the intestine and colon and perform endoscopic procedures to evaluate and treat problems such as cancer, polyps (precancerous growths), and inflammatory conditions.

Prerequisites; Length of Training
Prior completion a minimum of 5 years of a general surgery program; length of accredited programs is 1 year.

Subspecialties
No subspecialty programs accredited by the Accreditation Council for Graduate Medical Education; no subspecialty certificates offered by the American Board of Colon and Rectal Surgery.

Data
Unless otherwise noted, all data are for 2010.

Table 1. Colon and Rectal Surgery Programs

<table>
<thead>
<tr>
<th>Number of accredited programs</th>
<th>52</th>
</tr>
</thead>
</table>

Program Data
Length of accredited training 1
Minimum number of prior years of GME required 5
Offers graduate year 1 positions, available immediately upon medical school completion No
Average number of interviews for program year 1 positions 20.9
Percent new program directors, 2009-2010 academic year (Source: ACGME) 8.2%

Residents/Fellows
Total number of active residents/fellows 76
Average number of residents/fellows per program 0.0
Average percent female 32.9%
Average percent international medical graduate (IMG) 19.7%

Program Faculty
Average number of full-time physician faculty 6.1
Average number of part-time physician faculty 0.8
Average percent female full-time physician faculty 20.0%
Average ratio of full-time physician faculty to resident/fellow 1.6

Table 2. Data for Colon and Rectal Surgery Programs Listed in FREIDA

<table>
<thead>
<tr>
<th>Number of programs providing data</th>
<th>32</th>
</tr>
</thead>
</table>

Work Schedule (Program Year 1)
Average hours on duty per week 60.7
Average maximum consecutive hours on duty 19.1
Average days off duty per week 1.4
Moonlighting allowed within institution 91.1%
Night float system 12.1%
Offers awareness and management of fatigue in residents/fellows 90.9%

Educational Setting (Program Year 1)
Average hours/week of regularly scheduled lectures/conferences 3.8

Average percent of training in hospital outpatient clinics 28.2%
Average percent of training in nonhospital ambulatory care community settings 24.2%

Educational Benefits
Program to assess/enhance medical professionalism 66.7%
Debt management/financial counseling 33.3%
Formal program to develop teaching skills 72.7%
Formal mentoring program 57.6%
Formal program to foster interdisciplinary teamwork 33.3%
Continuous quality improvement training 93.9%
International experience 3.0%
Resident/fellow retreats 18.2%
Off-campus electives 30.3%
Hospice/home care experience 6.1%
Cultural competence awareness 69.7%
Instruction in medical Spanish or other non-English language 12.1%
Alternative/complementary medicine curriculum 9.1%
Training in identifying and reporting of domestic violence/abuse 33.3%
MPH/MBA or PhD training 15.2%
Research rotation 9.1%

Educational Features
Offers additional training or educational experience beyond accredited length 8.9%
Offers a primary care track 6.1%
Offers a rural track 0.0%
Offers a women’s health track 0.0%
Offers a hospitalist track 0.0%
Offers a research track/nonaccredited fellowship 15.2%
Offers an other track 6.1%

Resident Evaluation
Yearly specialty in-service examination required 63.6%
Patient surveys 54.5%
Portfolio system 27.3%
360-degree evaluations 87.9%
Objective structured clinical examinations (OSCE) 3.0%

Program Evaluation
Program graduation rates 75.8%
Board certification rates 100.0%
In-training examinations 63.6%
Performance-based assessments 24.2%

Employment Policies and Benefits
Part-time/shared positions 3.0%
On-site child care 27.3%
Subsidized child care 3.0%
Allowance/stipend for professional expenses 87.9%
Leave for educational meetings/conferences 64.5%

Moving allowance 6.1%
Housing stipend 0.0%
On-call meal allowance 69.7%
Free parking 78.8%
PDAs 3.0%
Placement assistance upon completion of program 30.3%
Cross coverage in case of illness/disability 57.6%

Compensation and Leave (Graduate Year 1)
Average resident/fellow compensation $38,609
Average number weeks of vacation 3.3
Sick days (paid) 21.2

Dermatology

Professional Description
A dermatologist is trained to diagnose and treat pediatric and adult patients with benign and malignant disorders of the skin, mouth, external genitalia, hair, and nails, and those with a number of sexually transmitted diseases. The dermatologist has had additional training and experience in the diagnosis and treatment of skin cancer, melanomas, moles, and other tumors of the skin, and in the recognition of the skin manifestations of systemic (including internal malignancy) and infectious diseases. Dermatologists have special training in dermatopathology and in the surgical techniques used in dermatology. They also have expertise in the management of cosmetic disorders of the skin, such as hair loss and scars, and the skin changes associated with aging.

Source: American Board of Medical Specialties, Guide to Physician Specialties

Dermatologists perform many specialized diagnostic procedures including microscopic examination of skin biopsy specimens, cytological smears, patch tests, photo tests, potassium hydroxide (KOH) preparations, fungus cultures, and other microbiologic examination of skin scrapings and secretions. Treatment methods used by dermatologists include externally applied, injected, and internal medications, selected x-ray and ultraviolet light therapy, and a range of dermatologic surgical procedures. The training and experience of dermatologists in dermatologic surgery include electrosurgery, cryosurgery with the use of freezing surgical units, laser surgery, nail surgery, biopsies techniques, and excisional surgery with appropriate closures, including flaps and grafts. Among some of the techniques used by dermatologists for the correction of cosmetic defects are dermabrasion, chemical face peels, hair transplants, injections of materials into the skin for scar revision, sclerosis of veins, and laser surgery of vascular lesions of the skin, including certain birth marks. Patients seeking a dermatologist may come directly or may be referred by another physician. A certified specialist in dermatology may subspecialize and become certified for Special Qualification.

Source: American Academy of Dermatology

Prerequisites; Length of Training
No prerequisites required when entering programs with an accredited length of 4 years. A broad-based clinical year of training in an ACGME-accredited program is required when entering a 3-year program.

Subspecialties
Subspecialty programs accredited by the ACGME
- Dermatopathology
- Procedural dermatology

American Board of Dermatology subspecialty certificates:
- Dermatopathology
- Pediatric dermatology

Data
Unless otherwise noted, all data are for 2010.

Table 1. Dermatology Programs
Number of accredited programs 114

Table 2. Data for Dermatology Programs Listed in FREIDA
Number of programs providing data 45

Educational Setting (Program Year 1)
Average hours/week of regularly scheduled lectures/conferences 7.8
Average percent of training in hospital outpatient clinics 77.0%
Average percent of training in nonhospital ambulatory care community settings 21.1%

Educational Benefits
Program to assess/enhance medical professionalism 75.6%
Debt management/financial counseling 40.0%
Formal program to develop teaching skills 64.4%
Formal mentoring program 51.1%
Formal program to foster interdisciplinary teamwork 24.4%
Continuous quality improvement training 71.1%
International experience 20.0%
Resident/fellow retreats 35.6%
Off-campus electives 80.0%
Hospice/home care experience 2.2%
Cultural competence awareness 64.4%
Instruction in medical Spanish or other non-English language 15.6%
Alternative/complementary medicine curriculum 13.3%
Training in identifying and reporting of domestic violence/abuse 44.4%
MPH/MBA or PhD training 15.6%
Research rotation 11.1%

Educational Features
Offers additional training or educational experience beyond accredited length 16.9%
Offers a primary care track 2.2%
Offers a rural track 0.0%
Offers a women’s health track 0.0%
Offers a hospitalist track 2.2%
DERMATOLOGY

Offers a research track/nonaccredited fellowship 24.4%
Offers an other track 8.9%

Resident Evaluation
Yearly specialty in-service examination required 99.2%
Patient surveys 71.1%
Portfolio system 60.0%
360-degree evaluations 88.9%
Objective structured clinical examinations (OSCE) 13.3%

Program Evaluation
Program graduation rates 84.4%
Board certification rates 100.0%
In-training examinations 100.0%
Performance-based assessments 40.0%

Employment Policies and Benefits
Part-time/shared positions 0.0%
On-site child care 37.8%
Subsidized child care 4.4%
Allowance/stipend for professional expenses 88.9%
Leave for educational meetings/conferences 88.8%
Moving allowance 6.7%
Housing stipend 2.2%
On-call meal allowance 48.9%
Free parking 57.8%
PDAs 11.1%
Placement assistance upon completion of program 8.9%
Cross coverage in case of illness/disability 84.4%

Compensation and Leave (Graduate Year 1)
Average resident/fellow compensation $49,133
Average number weeks of vacation 3.3
Sick days (paid) 23.0
Maximum number of paid days for family/medical leave 39
Maximum number of unpaid days for family/medical leave 47

Major Medical Benefits
Major medical insurance for residents 100.0%
Major medical insurance for dependents 95.6%
Outpatient mental health insurance 84.4%
Inpatient mental health insurance 82.2%
Group life insurance 86.7%
Dental insurance 82.2%
Disability insurance 93.3%
Disability insurance for occupationally acquired HIV 77.8%
Medical insurance coverage begins when starting program 93.3%

Dermatopathology

Professional Description
A dermatopathologist has the expertise to diagnose and monitor diseases of the skin including infectious, immunologic, degenerative, and neoplastic diseases. This entails the examination and interpretation of specially prepared tissue sections, cellular scrapings, and smears of skin lesions by means of routine and special (electron and fluorescent) microscopes.
Prerequisites; Length of Training
Completion of an dermatology residency is required; length of accredited programs is 1 year.

Pediatric Dermatology
Professional Description
A pediatric dermatologist has, through additional special training, developed expertise in the treatment of specific skin disease categories with emphasis on those diseases which predominate in infants, children, and adolescents.

Prerequisites; Length of Training
Completion of an dermatology residency is required; length of accredited programs is 1 or 2 years.

Emergency Medicine

Professional Description
An emergency physician focuses on the immediate decision making and action necessary to prevent death or any further disability both in the pre-hospital setting by directing emergency medical technicians and in the emergency department. The emergency physician provides immediate recognition, evaluation, care, stabilization, and disposition of a generally diversified population of adult and pediatric patients in response to acute illness and injury.

Prerequisites; Length of Training
No prerequisites required when entering programs with an accredited length of 4 years. A broad-based clinical year of training in an ACGME-accredited program is required when entering a 3-year program.

Subspecialties
Subspecialty programs accredited by the ACGME
- Hospice and palliative medicine
- Medical toxicology
- Pediatric emergency medicine
- Sports medicine
- Undersea and hyperbaric medicine

American Board of Emergency Medicine subspecialty certificates
- Emergency medical services
- Hospice and palliative medicine
- Medical toxicology
- Pediatric emergency medicine
- Sports medicine
- Undersea and hyperbaric medicine

Data
Unless otherwise noted, all data are for 2010.

Table 1. Emergency Medicine Programs
| Number of accredited programs | 155 |

Program Data
Length of accredited training 3/4
Minimum number of prior years of GME required 1/0
Offers graduate year 1 positions, available immediately upon medical school completion Some
Average number of interviews for program year 1 positions 120.6
Percent new program directors, 2009-2010 academic year 16.1%

Residents/Fellows
Total number of active residents/fellows 4,755
Average number of residents/fellows per program 0.0
Average percent female 40.2%
Average percent international medical graduate (IMG) 7.0%

Program Faculty
Average number of full-time physician faculty 28.6
Average number of part-time physician faculty 5.6
Average percent female full-time physician faculty 28.2%
Average ratio of full-time physician faculty to resident/fellow 0.6

Table 2. Data for Emergency Medicine Programs Listed in FREIDA
| Number of programs providing data | 108 |

Work Schedule (Program Year 1)
Average hours on duty per week 56.4
Average maximum consecutive hours on duty 21.5
Average days off duty per week 1.6
Moonlighting allowed within institution 75.9%
Night float system 18.5%
Offers awareness and management of fatigue in residents/fellows 100.0%

Educational Setting (Program Year 1)
Average hours/week of regularly scheduled lectures/conferences 5.0
Average percent of training in hospital outpatient clinics 9.6%
Average percent of training in nonhospital ambulatory care community settings 6.2%

Educational Benefits
Program to assess/enhance medical professionalism 93.5%
Debt management/financial counseling 83.3%
Formal program to develop teaching skills 94.4%
Formal mentoring program 88.9%
Formal program to foster interdisciplinary teamwork 47.2%
Continuous quality improvement training 100.0%
International experience 75.9%
Resident/fellow retreats 90.7%
Off-campus electives 91.7%
Hospice/home care experience 5.6%
Cultural competence awareness 89.8%
Instruction in medical Spanish or other non-English language 28.9%
Alternative/complementary medicine curriculum 28.9%
Training in identifying and reporting of domestic violence/abuse 99.1%
MPH/MBA or PhD training 13.0%
Research rotation 42.6%

Educational Features
Offers additional training or educational experience beyond accredited length 6.3%
Offers a primary care track 3.7%
Offers a rural track 4.6%
Offers a women’s health track 0.9%
Offers a hospitalist track 1.9%
Offers a research track/nonaccredited fellowship 25.0%
Offers an other track 19.4%

Resident Evaluation
Yearly specialty in-service examination required 99.4%
Patient surveys 58.3%
Portfolio system 75.0%
360-degree evaluations 88.9%
Objective structured clinical examinations (OSCE) 50.0%

Program Evaluation
Program graduation rates 88.1%
Board certification rates 97.2%
In-training examinations 100.0%
Performance-based assessments 87.0%

Employment Policies and Benefits
Part-time/shared positions 1.9%
On-site child care 34.3%
Subsidized child care 9.3%
Allowance/stipend for professional expenses 99.1%
Leave for educational meetings/conferences 88.1%
Moving allowance 13.9%

Emergency Medical Services
Professional Description
The Emergency Medical Services subspecialty was developed (and approved by the ABMS as a recognized subspecialty of emergency medicine in 2010) to standardize physician training and qualifications for the delivery of medical care in the pre-hospital setting. EMS care includes the initial patient treatment and transportation in specially equipped ambulances and medical helicopters. The initial care for conditions such as heart attack or stroke may occur in patient homes, public places, and wilderness settings. These medical specialists perform life-saving procedures outside the hospital setting, sometimes when people are still trapped in cars or buildings.

For more information

Hospice and Palliative Medicine
See page 180.

Medical Toxicology
Professional Description
An emergency physician who has special knowledge about the evaluation and management of patients with accidental or purposeful poisoning through exposure to prescription and nonprescription medications, drugs of abuse, household or industrial toxins, and environmental toxins.

Areas of medical toxicology include acute pediatric and adult drug ingestion; drug abuse, addiction, and withdrawal; chemical poisoning exposure and toxicity; hazardous materials exposure and toxicity; and occupational toxicology.

Prerequisites; Length of Training
Completion of an ACGME-accredited residency is required; length of accredited programs is 2 years.

Pediatric Emergency Medicine

Professional Description
An emergency physician who has special qualifications to manage emergencies in infants and children.

Prerequisites; Length of Training
Completion of an ACGME-accredited emergency medicine residency is required; length of accredited programs is 2 years (3 years for those planning to seek certification from the American Board of Pediatrics).

Data
Unless otherwise noted, all data are for 2010.

Table 1. Pediatric Emergency Medicine Programs

| Number of accredited programs | 21 |

Sports Medicine

Professional Description
An emergency physician with special knowledge in sports medicine is responsible for continuous care in the field of sports medicine, not only for the enhancement of health and fitness, but also for the prevention and management of injury and illness. A sports medicine physician has knowledge and experience in the promotion of wellness and the role of exercise in promoting a healthy lifestyle. Knowledge of exercise physiology, biomechanics, nutrition, psychology, physical rehabilitation, and epidemiology is essential to the practice of sports medicine.

Prerequisites; Length of Training
Completion of an ACGME-accredited residency is required; length of accredited programs is 1 year.

Data
Unless otherwise noted, all data are for 2010.

Undersea and Hyperbaric Medicine

Professional Description
An emergency medicine physician who, with additional and specialized training, has expertise in the treatment of decompression illness and diving accident cases and uses hyperbaric oxygen therapy treatment for conditions such as carbon monoxide poisoning, gas gangrene, non-healing wounds, tissue damage from radiation and burns, and bone infections. This specialist also serves as consultant to other physicians in all aspects of hyperbaric chamber operations, and assesses risks and applies appropriate standards to prevent disease and disability in divers and other persons working in altered atmospheric conditions.

Family Medicine

Professional Description
A family physician is concerned with the total health care of the individual and the family, and is trained to diagnose and treat a wide variety of ailments in patients of all ages. The family physician receives a broad range of training that includes internal medicine, pediatrics, obstetrics and gynecology, psychiatry, and geriatrics. Special emphasis is placed on prevention and the primary care of entire families, utilizing consultations and community resources when appropriate.

Source: American Board of Medical Specialties, Guide to Physician Specialties

Family medicine is the medical specialty which is concerned with the total health care of the individual and the family. It is the specialty in breadth which integrates the biological, clinical, and behavioral sciences. The scope of family medicine is not limited by age, sex, organ system, or disease entity.

Source: American Board of Family Medicine

Prerequisites; Length of Training
No prerequisites required; ACGME-accredited programs are 3 years.

Subspecialties
Subspecialty programs accredited by the ACGME
- Geriatric medicine
- Hospice and palliative medicine
- Sleep medicine
- Sports medicine

American Board of Family Medicine subspecialty certificates
- Adolescent medicine
- Geriatric medicine
- Hospice and palliative medicine
- Sleep medicine
- Sports medicine

Data
Unless otherwise noted, all data are for 2010.

Table 1. Family Medicine Programs Listed in FREIDA
Number of accredited programs 451
Program Data
Length of accredited training 3
Minimum number of prior years of GME required 0
Offers graduate year 1 positions, available immediately upon medical school completion Yes
Average number of interviews for program year 1 positions 57.9
Percent new program directors, 2009-2010 academic year (Source: ACGME) 14.0%
Residents/Fellows
Total number of active residents/fellows 9,285
Average number of residents/fellows per program 0.0
Average percent female 54.9%
Average percent international medical graduate (IMG) 38.4%
Program Faculty
Average number of full-time physician faculty 10.9
Average number of part-time physician faculty 5.7
Average percent female full-time physician faculty 35.6%
Average ratio of full-time physician faculty to resident/fellow 0.4

Table 2. Data for Family Medicine Programs Listed in FREIDA
Number of programs providing data 378
Work Schedule (Program Year 1)
Average hours on duty per week 62.7
Average maximum consecutive hours on duty 28.2
Average days off duty per week 1.3
Moonlighting allowed within institution 88.2%
Night float system 58.7%
Offers awareness and management of fatigue in residents/fellows 99.5%
Educational Setting (Program Year 1)
Average hours/week of regularly scheduled lectures/conferences 5.3
Average percent of training in hospital outpatient clinics 19.4%
Average percent of training in nonhospital ambulatory care community settings 16.6%
Educational Benefits
- Program to assess/enhance medical professionalism 88.9%
- Debt management/financial counseling 84.4%
- Formal program to develop teaching skills 87.3%
- Formal mentoring program 80.4%
- Formal program to foster interdisciplinary teamwork 57.1%
- Continuous quality improvement training 97.6%
- International experience 69.8%
- Resident/fellow retreats 88.6%
- Off-campus electives 97.4%
- Hospice/home care experience 99.2%
- Cultural competence awareness 97.1%
- Instruction in medical Spanish or other non-English language 32.3%
- Alternative/complementary medicine curriculum 60.1%
- Training in identifying and reporting of domestic violence/abuse 96.3%
- MPH/MBA or PhD training 17.5%
- Research rotation 22.8%
Educational Features
- Offers additional training or educational experience beyond accredited length 15.3%
- Offers a primary care track 48.4%
- Offers a rural track 23.3%
- Offers a women’s health track 21.3%
- Offers a hospitalist track 10.8%
- Offers a research track/nonaccredited fellowship 9.5%
- Offers an other track 30.4%
Resident Evaluation
Yearly specialty in-service examination required 98.7%
Patient surveys 91.9%
Portfolio system 68.0%
360-degree evaluations 92.3%
Objective structured clinical examinations (OSCE) 47.1%
Program Evaluation
Program graduation rates 90.5%
Board certification rates 100.0%
In-training examinations 99.5%
Performance-based assessments 58.7%
Employment Policies and Benefits
Part-time/shared positions 7.1%
On-site child care 28.6%
Subsidized child care 9.0%
Allowance/stipend for professional expenses 96.1%
Leave for educational meetings/conferences 90.5%
Moving allowance 49.2%
Housing stipend 10.3%
On-call meal allowance 98.1%
Free parking 89.7%
PDAs 59.0%
Placement assistance upon completion of program 48.7%
Cross coverage in case of illness/disability 96.6%

Compensation and Leave (Graduate Year 1)
Average resident/fellow compensation $47,399
Average number weeks of vacation 3.5
Sick days (paid) 10.9
Maximum number of paid days for family/medical leave 30
Maximum number of unpaid days for family/medical leave 71

Major Medical Benefits
Major medical insurance for residents 100.0%
Major medical insurance for dependents 95.2%
Outpatient mental health insurance 95.2%
Inpatient mental health insurance 94.7%
Group life insurance 96.6%
Dental insurance 91.0%
Disability insurance 93.1%
Disability insurance for occupationally acquired HIV 75.9%
Medical insurance coverage begins when starting program 86.8%

Sports Medicine
Professional Description
A family physician who is trained to be responsible for continuous care in the field of sports medicine, not only for the enhancement of health and fitness, but also for the prevention of injury and illness. A sports medicine physician must have knowledge and experience in the promotion of wellness and the prevention of injury. Knowledge about special areas of medicine such as exercise physiology, biomechanics, nutrition, psychology, physical rehabilitation, epidemiology, physical evaluation, injuries (treatment and prevention and referral practice), and the role of exercise in promoting a healthy lifestyle are essential to the practice of sports medicine. The sports medicine physician requires special education to provide the knowledge to improve the health care of the individual engaged in physical exercise (sports) whether as an individual or in team participation.
Prerequisites; Length of Training
Completion of an ACGME-accredited residency is required; ACGME-accredited programs are 1 year.

Data
Unless otherwise noted, all data are for 2010.

Specialties/Programs

FAMILY MEDICINE

Sports Medicine
Hospice and Palliative Medicine

Professional Description
The subspecialty of hospice and palliative medicine represents the medical component of the broad therapeutic model known as palliative care. Subspecialists in this field reduce the burden of life-threatening conditions by supporting the best quality of life throughout the course of an illness and by managing factors that contribute to the suffering of the patient and the patient’s family.

1. Palliative care addresses physical, psychological, social, and spiritual needs of patients and their families, and provides assistance with medical decision-making.

2. The major clinical skills central to the subspecialty are the prevention (when possible), assessment, and management of physical, psychological, and spiritual suffering faced by patients with life-limiting conditions and their families.

3. Hospice and palliative medicine is distinguished from other disciplines by:
   - A high level of expertise in addressing the multidimensional needs of patients with life-threatening illnesses, including a practical skill set in symptom control interventions
   - A high level of expertise in both clinical and nonclinical issues related to advanced illness, the dying process, and bereavement
   - A commitment to an interdisciplinary team approach
   - A strong focus on the patient and family as the unit of care

www.acgme.org/acWebsite/downloads/RRC_progReq/540_hospice_and_palliative_medicine_02122008.pdf

Prerequisites; Length of Training
Completion is required of an ACGME-accredited program in anesthesiology, emergency medicine, family medicine, internal medicine, neurology, obstetrics and gynecology, pediatrics, physical medicine and rehabilitation, psychiatry, radiation oncology, or surgery; length of accredited programs is 1 year.

Note: The RRC for Family Medicine reviews and accredits all hospice and palliative medicine programs regardless of the sponsoring specialty of the individual program.

Internal Medicine

Professional Description
Internal medicine is the largest primary care specialty in the United States and is an ever-changing and rapidly advancing discipline. Doctors of internal medicine are known as “internists” or “general internists,” and should not be confused with “interns” who are doctors in their first year of training after medical school. Internists are not the same as “general practitioners” (GPs) or “family physicians” (FPs) whose practices may include surgery, obstetrics, and pediatrics and whose training is not solely concentrated on adults.

Because internal medicine is expansive, internists must continually update their knowledge in many areas including allergy, arthritis, blood diseases, cancer, diabetes, digestive diseases, illness in the elderly, diseases of the heart and blood vessels, hormonal disorders, infections, intensive care, kidney diseases, and respiratory disorders.

The practice of internal medicine also incorporates an understanding of wellness (disease prevention and health promotion), women’s health, substance abuse, mental health, and medical ethics, as well as effective treatment of common problems of the eyes, ears, skin, nervous system, and reproductive organs.

Prerequisites; Length of Training
No prerequisites; length of accredited programs is 3 years.

Subspecialties
Subspecialty programs accredited by the ACGME
- Advanced heart failure and transplant cardiology
- Cardiovascular disease
- Clinical cardiac electrophysiology
- Critical care medicine
- Endocrinology, diabetes, and metabolism
- Gastroenterology
- Geriatric medicine
- Hematology
- Hematology and oncology
- Hospice and palliative medicine
- Infectious disease
- Interventional cardiology
- Nephrology
- Oncology
- Pulmonary disease
- Pulmonary disease and critical care medicine
- Rheumatology
- Sleep medicine
- Transplant hepatology

American Board of Internal Medicine subspecialty certificates
- Adolescent medicine
- Advanced heart failure and transplant cardiology
- Cardiovascular disease
- Clinical cardiac electrophysiology
- Critical care medicine
- Endocrinology, diabetes, and metabolism
- Gastroenterology
- Geriatric medicine
- Hematology
- Hospice and palliative medicine
- Infectious disease
- Interventional cardiology
- Medical oncology
- Nephrology
- Pulmonary disease
- Rheumatology
- Sleep medicine
- Sports medicine

Critical Care Medicine

Professional Description
An internist who diagnoses, treats, and supports patients with multiple organ dysfunction. This specialist may have administrative responsibilities for intensive care units and may also facilitate and coordinate patient care among the primary physician, the critical care staff, and other specialists.

Prerequisites; Length of Training
Completion of a 3-year ACGME-accredited residency program in internal medicine is required; ACGME-accredited programs in critical care medicine are 2 years.

Data
Unless otherwise noted, all data are for 2010.

Endocrinology, Diabetes, and Metabolism

Professional Description
An internist who concentrates on disorders of the internal (endocrine) glands, such as the thyroid and adrenal glands. This specialist also deals with disorders such as diabetes, metabolic and nutritional disorders, obesity, pituitary diseases, and menstrual and sexual problems.

Prerequisites; Length of Training
Completion of a 3-year ACGME-accredited residency program in internal medicine is required; ACGME-accredited programs in endocrinology, diabetes, and metabolism are 2 years.

Data
Unless otherwise noted, all data are for 2010.

| Table 1. Endocrinology, Diabetes, and Metabolism Programs |
|-----------------|-----------------|
| Number of accredited programs | 127 |
| Program Data |
| Length of accredited training | 3 |
| Minimum number of prior years of GME required | 3 |
| Offers graduate year 1 positions, available immediately upon medical school completion | No |
| Average number of interviews for program year 1 positions | 14.3 |

Gastroenterology

Professional Description

An internist who specializes in diagnosis and treatment of diseases of the digestive organs, including the stomach, bowels, liver, and gallbladder. This specialist treats conditions such as abdominal pain, ulcers, diarrhea, cancer, and jaundice, and performs complex diagnostic and therapeutic procedures using endoscopes to visualize internal organs.

Prerequisites; Length of Training

Completion of a 3-year ACGME-accredited residency program in internal medicine is required; ACGME-accredited programs in gastroenterology are 3 years.

Data

Unless otherwise noted, all data are for 2010.

Table 1. Gastroenterology Programs

| Number of accredited programs | 155 |

Program Data

| Length of accredited training | 3 |
| Minimum number of prior years of GME required | 3 |
| Offers graduate year 1 positions, available immediately upon medical school completion | No |
| Average number of interviews for program year 1 positions | 22.3 |
| Percent new program directors, 2008-2010 academic year (Source: ACGME) | 12.2% |
| Residents/fellows total number of active residents/fellows | 1,320 |

Average number of residents/fellows per program: 0.0
Average percent female: 31.8%
Average percent international medical graduate (IMG): 28.9%

Program Faculty

- Average number of full-time physician faculty: 13.6
- Average number of part-time physician faculty: 1.4
- Average percent female full-time physician faculty: 19.2%
- Average ratio of full-time physician faculty to resident/fellow: 1.1

Table 2. Data for Gastroenterology Programs Listed in FREIDA

| Number of programs providing data | 66 |

Work Schedule (Program Year 1)

| Average hours on duty per week | 51.8 |
| Average maximum consecutive hours on duty | 15.5 |
| Average days off duty per week | 1.6 |
| Moonlighting allowed within institution | 77.3% |

Hematology

Professional Description
An internist with additional training who specializes in blood diseases. This specialist treats diseases such as anemia, hemophilia, and sickle cell disease as well as cancers such as leukemia, lymphoma, and multiple myeloma.

Source: American Society of Hematology

Prerequisites; Length of Training
Completion of a 3-year ACGME-accredited residency program in internal medicine is required; ACGME-accredited programs in hematology are 2 years.

Data
Unless otherwise noted, all data are for 2010.

Infectious Disease
Professional Description
An internist who deals with infectious diseases of all types and in all organ systems. Conditions requiring selective use of antibiotics call for this special skill. This physician often diagnoses and treats AIDS patients and patients who have fevers that have not been explained. Infectious disease specialists may also have expertise in preventive medicine and travel medicine.

Prerequisites; Length of Training
Completion of a 3-year ACGME-accredited residency program in internal medicine is required; ACGME-accredited programs in infectious disease are 2 years.

Data
Unless otherwise noted, all data are for 2010.

Table 1. Infectious Disease Programs

### Interventional Cardiology
#### Professional Description
An area of medicine within the subspecialty of cardiology, which uses specialized imaging and other diagnostic techniques to evaluate blood flow and pressure in the coronary arteries and chambers of the heart, as well as technical procedures and medications to treat abnormalities that impair the function of the cardiovascular system.

#### Prerequisites; Length of Training
Completion of a 3-year ACGME-accredited residency program in cardiovascular disease is required; ACGME-accredited programs in interventional cardiology are 1 year.

#### Data
Unless otherwise noted, all data are for 2010.

Pulmonary Disease and Critical Care Medicine

Professional Description
See descriptions of each component subspecialty elsewhere in this section.

Prerequisites; Length of Training
Completion of a 3-year ACGME-accredited residency program in internal medicine is required; ACGME-accredited programs in pulmonary disease and critical care medicine are 3 years.

Data
Unless otherwise noted, all data are for 2010.

Table 1. Pulmonary Disease and Critical Care Medicine Programs
Number of accredited programs 134

Program Data
Length of accredited training 3
Minimum number of prior years of GME required 3
Offers graduate year 1 positions, available immediately upon medical school completion No
Average number of interviews for program year 1 positions 27.6
Percent new program directors, 2009-2010 academic year (Source: ACGME) 12.6%
Residents/Fellows
Total number of active residents/fellows 1,277
Average number of residents/fellows per program 0.0
Average percent female 31.9%
Average percent international medical graduate (IMG) 41.0%
Program Faculty
Average number of full-time physician faculty 17.9
Average number of part-time physician faculty 1.2
Average percent female full-time physician faculty 22.3%
Average ratio of full-time physician faculty to resident/fellow 1.3
Table 2. Data for Pulmonary Disease and Critical Care Medicine Programs Listed in FREIDA
Number of programs providing data 70
Work Schedule (Program Year 1)
Average hours on duty per week 54.5
Average maximum consecutive hours on duty 21.0
Average days off duty per week 1.5
Moonlighting allowed within institution 91.4%
Night float system 20.0%
Offers awareness and management of fatigue in residents/fellows 97.1%
Educational Setting (Program Year 1)
Average hours/week of regularly scheduled lectures/conferences 4.7
Average percent of training in hospital outpatient clinics 16.1%
Average percent of training in nonhospital ambulatory care community settings 6.4%
Educational Benefits
Program to assess/enhance medical professionalism 85.7%
Debt management/financial counseling 51.4%
Formal program to develop teaching skills 90.0%
Formal mentoring program 81.4%
Formal program to foster interdisciplinary teamwork 44.3%
Continuous quality improvement training 94.3%
International experience 17.1%
Resident/fellow retreats 37.1%
Off-campus electives 80.0%
Hospice/home care experience 34.3%

Sports Medicine

Professional Description

An internist trained to be responsible for continuous care in the field of sports medicine, not only for the enhancement of health and fitness, but also for the prevention of injury and illness.
sports medicine physician must have knowledge and experience in the promotion of wellness and the prevention of injury. Knowledge about special areas of medicine such as exercise physiology, biomechanics, nutrition, psychology, physical rehabilitation, epidemiology, physical evaluation, injuries (treatment and prevention and referral practice), and the role of exercise in promoting a healthy lifestyle are essential to the practice of sports medicine. The sports medicine physician requires special education to provide the knowledge to improve the health care of the individual engaged in physical exercise (sports) whether as an individual or in team participation.

**Prerequisites; Length of Training**
As of June 2006, programs in sports medicine as a subspecialty of internal medicine were no longer accredited by the ACGME.

---

Transplant Hepatology

**Professional Description**
An internist with special knowledge and the skill required of a gastroenterologist to care for patients prior to and following hepatic transplantation that spans all phases of liver transplantation. Selection of appropriate recipients requires assessment by a team having experience in evaluating the severity and prognosis of patients with liver disease.

**Prerequisites; Length of Training**
Completion of a 3-year ACGME-accredited gastroenterology program is required; programs are 1 year.

Internal Medicine/Pediatrics

Description
Internal medicine/pediatrics is a combined specialty program that allows physicians to meet eligibility requirements for dual certification by the American Board of Internal Medicine and American Board of Pediatrics. Internal medicine/pediatrics programs were formerly jointly approved (not accredited) by the two boards, but are now fully accredited through the ACGME (Program Requirements effective June 26, 2006).

Prerequisites; Length of Training
No prerequisites; length of accredited programs is 4 years.

Data
Unless otherwise noted, all data are for 2010.

Table 1. Internal Medicine/Pediatrics Programs

<table>
<thead>
<tr>

Medical Genetics

Professional Description
A specialist trained in diagnostic and therapeutic procedures for patients with genetically linked diseases. This specialist uses modern cytogenetic, radiologic, and biochemical testing to assist in specialized genetic counseling, implements needed therapeutic interventions, and provides prevention through prenatal diagnosis.

A medical geneticist plans and coordinates large-scale screening programs for inborn errors of metabolism, hemoglobinopathies, chromosome abnormalities, and neural tube defects.

Prerequisites; Length of Training
No prerequisites are required when entering a 4-year program; 2 years of ACGME-accredited GME are required when entering a 2-year program. Length of accredited programs is 2 years or 4 years.

Subspecialties
Subspecialty programs accredited by the ACGME
• Molecular genetic pathology
• Medical biochemical genetics
Note: Molecular genetic pathology programs are jointly accredited by the Residency Review Committees for Medical Genetics and Pathology.

American Board of Medical Genetics specialty certificates
• Clinical biochemical genetics
• Clinical cytogenetics
• Clinical genetics
• Clinical molecular genetics
• Molecular genetic pathology (subspecialty)
Note: Molecular genetic pathology certification is jointly offered by the American Board of Medical Genetics and American Board of Pathology.

Data
Unless otherwise noted, all data are for 2010.

Residents/Fellows
| Total number of active residents/fellows | 83 |
| Average number of residents/fellows per program | 0.0 |
| Average percent female | 59.0% |
| Average percent international medical graduate (IMG) | 38.6% |

Program Faculty
| Average number of full-time physician faculty | 9.9 |
| Average number of part-time physician faculty | 1.4 |
| Average percent female full-time physician faculty | 35.7% |
| Average ratio of full-time physician faculty to resident/fellow | 3.2 |

Table 2. Data for Medical Genetics Programs Listed in FREIDA
| Number of programs providing data | 22 |

Work Schedule (Program Year 1)
| Average hours on duty per week | 46.9 |
| Average maximum consecutive hours on duty | 14.7 |
| Average days off duty per week | 1.7 |
| Moonlighting allowed within institution | 63.6% |
| Night float system | 0.0% |
| Offers awareness and management of fatigue in residents/fellows | 81.8% |

Educational Setting (Program Year 1)
| Average hours/week of regularly scheduled lectures/conferences | 5.7 |
| Average percent of training in hospital outpatient clinics | 67.8% |
| Average percent of training in nonhospital ambulatory care community settings | 11.0% |

Educational Benefits
| Program to assess/enhance medical professionalism | 77.3% |
| Debt management/financial counseling | 22.7% |
| Formal program to develop teaching skills | 72.7% |
| Formal mentoring program | 68.2% |
| Formal program to foster interdisciplinary teamwork | 27.3% |
| Continuous quality improvement training | 59.1% |
| International experience | 4.5% |
| Resident/fellow retreats | 63.6% |
| Off-campus electives | 77.3% |
| Hospice/home care experience | 9.1% |
| Cultural competence awareness | 77.3% |
| Instruction in medical Spanish or other non-English language | 27.3% |
| Alternative/complementary medicine curriculum | 12.6% |
| Training in identifying and reporting of domestic violence/abuse | 31.8% |
| MPH/MBA or PhD training | 27.3% |
| Research rotation | 77.3% |

Educational Features
| Offers additional training or educational experience beyond accredited length | 67.3% |
| Offers a primary care track | 9.1% |
| Offers a rural track | 0.0% |
| Offers a women’s health track | 0.0% |
| Offers a hospitalist track | 0.0% |
| Offers a research track/nonaccredited fellowship | 36.4% |
| Offers an other track | 13.6% |

Resident Evaluation
| Yearly specialty in-service examination required | 56.9% |
| Patient surveys | 40.9% |
| Portfolio system | 36.4% |
| 360-degree evaluations | 86.4% |
| Objective structured clinical examinations (OSCE) | 13.6% |

Program Evaluation
| Program graduation rates | 77.3% |
| Board certification rates | 95.5% |
| In-training examinations | 68.2% |
| Performance-based assessments | 40.9% |

Employment Policies and Benefits
| Part-time/shared positions | 18.2% |
| On-site child care | 50.0% |
| Subsidized child care | 18.2% |
| Allowance/stipend for professional expenses | 81.8% |
| Leave for educational meetings/conferences | 88.3% |
| Moving allowance | 18.2% |
| Housing stipend | 0.0% |
On-call meal allowance 36.4%
Free parking 63.6%
PDAs 4.5%
Placement assistance upon completion of program 38.4%
Cross coverage in case of illness/disability 68.2%

Compensation and Leave (Graduate Year 1)
Average resident/fellow compensation $51,341
Average number weeks of vacation 8.0
Sick days (paid) 27.4
Maximum number of paid days for family/medical leave 35
Maximum number of unpaid days for family/medical leave 59

Major Medical Benefits
Major medical insurance for residents 95.5%
Major medical insurance for dependents 88.4%
Outpatient mental health insurance 88.4%
Inpatient mental health insurance 88.4%
Group life insurance 88.4%
Dental insurance 88.4%
Disability insurance 81.8%
Disability insurance for occupationally acquired HIV 68.2%
Medical insurance coverage begins when starting program 90.9%

Clinical Biochemical Genetics
Professional Description
A clinical biochemical geneticist is an individual with a US- or Canadian-earned, or the equivalent of an earned, doctoral degree (MD, DO, PhD) who can correctly perform and interpret biochemical analyses relevant to the diagnosis and management of human genetic diseases and who acts as a consultant regarding laboratory diagnosis of a broad range of biochemical genetic disorders.

These requirements imply that the individual possesses:
- The ability to supervise and direct the operations of a clinical biochemical genetics diagnostic laboratory, including technical expertise and knowledge in quality control and quality assessment procedures
- Broad knowledge of (1) basic biochemistry and genetics, (2) the application of biochemical techniques to the diagnosis and management of genetic diseases, and (3) the etiology, pathogenesis, clinical manifestations, and management of human inherited biochemical disorders
- An understanding of the heterogeneity, variability, and natural history of biochemical genetic disorders
- Diagnostic and interpretive skills in a wide range of biochemical genetic problems
- The ability to communicate biochemical laboratory results in the capacity of consultant to medical genetics professionals and other clinicians and directly to patients in concert with other professional staff

Source: American Board of Medical Genetics

Prerequisites; Length of Training
A US-earned doctoral degree (MD, DO, PhD, or the equivalent) is required. Length of ABMG-accredited programs is 2 years.

Clinical Cytogenetics
Professional Description
A clinical cytogeneticist is an individual with a US- or Canadian-earned, or the equivalent of an earned, doctoral degree (MD, DO, PhD), who can correctly perform and interpret cytogenetic analyses relevant to the diagnosis and management of human genetic diseases, and who acts as a consultant regarding laboratory diagnosis
for a broad range of cytogenetic disorders, including inherited and acquired conditions.

These requirements imply that the individual possesses:

• The ability to supervise and direct the operations of a clinical cytogenetic diagnostic laboratory, including technical expertise and knowledge in quality control and quality assessment procedures.

• Broad knowledge in human cytogenetics, including prenatal and postnatal cytogenetic diagnosis, infertility and pregnancy loss, cancer, and leukemia.

• An understanding of the heterogeneity, variability, and natural history of cytogenetic disorders.

• Diagnostic and interpretive skills in a wide range of cytogenetic problems.

• The ability to communicate cytogenetic laboratory results in the capacity of consultant to medical genetics professionals and other clinicians and directly to patients in concert with other professional staff.

Clinical Molecular Genetics

Professional Description

A clinical molecular geneticist is an individual who holds a US- or Canadian-earned, or the equivalent of an earned, MD or DO degree, who can correctly perform and interpret molecular analyses relevant to the diagnosis and management of human genetic diseases, and who can act as a consultant regarding laboratory diagnosis of a broad range of molecular genetic disorders.

These requirements imply that the individual possesses:

• The ability to supervise and direct the operations of a clinical molecular genetics diagnostic laboratory, including technical expertise and knowledge in quality control and quality assessment procedures.

• The ability to perform a variety of molecular diagnostic assays.

• An understanding of the heterogeneity, variability, and natural history of molecular genetic disorders.

• A broad knowledge of (1) basic molecular biology and genetics; (2) the application of recombinant DNA techniques and linkage analysis to the diagnosis of genetic diseases; and (3) the etiology, pathogenesis, clinical manifestations, and management of human genetic disorders.

• Diagnostic and interpretive skills in a wide range of clinical molecular genetics problems.

• The ability to communicate molecular diagnostic laboratory results in the capacity of a consultant to medical genetics professionals and other clinicians and directly to patients in concert with other professional staff.

Medical Biochemical Genetics

Professional Description
Medical biochemical geneticists provide comprehensive diagnostic, management, and genetic counseling services for patients with inborn errors of metabolism. They focus on the treatment of genetic disorders of intermediary metabolism, lysosomal storage diseases, disorders of energy metabolism, and related disorders.

Source: Medical biochemical genetics’ program requirements, ACGME

Prerequisites; Length of Training
Completion of a medical genetics residency program is required. Length of ACGME-accredited programs is 1 year.

Medical Genetic Pathology

Professional Description
A molecular genetic pathologist is an expert in the principles, theory, and technologies of molecular biology and molecular genetics. This expertise is used to make or confirm diagnoses of Mendelian genetic disorders, of human development, infectious diseases and malignancies, and to assess the natural history of those disorders. A molecular genetic pathologist provides information about gene structure, function, and alteration and applies laboratory techniques for diagnosis, treatment, and prognosis for individuals with related disorders.

Source: American Board of Medical Genetics

Prerequisites; Length of Training
Completion of a 4-year ACGME-accredited program in pathology or medical genetics is required. Length of ACGME-accredited molecular genetic pathology programs is 1 year.

Neurological Surgery

Professional Description
Neurological surgery is a medical and surgical specialty that provides operative and nonoperative management (ie, prevention, diagnosis, evaluation, treatment, critical care, and rehabilitation) of disorders of the central, peripheral, and autonomic nervous systems, including their supporting structures and vascular supply; the evaluation and treatment of pathological processes that modify the function or activity of the nervous system, including the hypophysis; and the operative and nonoperative management of pain. As such, neurological surgery encompasses the surgical, nonsurgical, and stereotactic radiosurgical treatment of adult and pediatric patients with disorders of the nervous system: disorders of the brain, meninges, skull, and skull base, and their blood supply, including the surgical and endovascular treatment of disorders of the intracranial and extracranial vasculature supplying the brain and spinal cord; disorders of the pituitary gland; disorders of the spinal cord, meninges, and vertebral column, including those that may require treatment by fusion, instrumentation, or endovascular techniques; and disorders of the cranial, peripheral, and spinal nerves throughout their distribution.

Source: American Board of Neurological Surgery

Prerequisites; Length of Training
Length of accredited programs is 6 years (effective July 1, 2009).

Subspecialties
Subspecialty programs accredited by the ACGME
- Endovascular surgical neuroradiology

American Board of Neurological Surgery subspecialty certificates
None

Data
Unless otherwise noted, all data are for 2010.

Educational Setting (Program Year 1)
| Average hours/week of regularly scheduled lectures/conferences | 5.5 |
| Average percent of training in hospital outpatient clinics | 14.4% |
| Average percent of training in nonhospital ambulatory care community settings | 5.0% |

Educational Benefits
- Program to assess/enhance medical professionalism 76.6%
- Debt management/financial counseling 63.8%
- Formal program to develop teaching skills 76.6%
- Formal mentoring program 68.1%
- Formal program to foster interdisciplinary teamwork 34.0%
- Continuous quality improvement training 95.7%
- International experience 19.1%
- Resident/fellow retreats 51.1%
- Off-campus electives 59.6%
- Hospice/home care experience 8.5%
- Cultural competence awareness 68.1%
- Instruction in medical Spanish or other non-English language 14.9%
- Alternative/complementary medicine curriculum 4.3%
- Training in identifying and reporting of domestic violence/abuse 46.8%
- MPH/MBA or PhD training 29.8%
- Research rotation 91.5%

Educational Features
- Offers additional training or educational experience beyond accredited length 18.8%
- Offers a primary care track 2.1%
- Offers a rural track 0.0%
- Offers a women’s health track 0.0%
- Offers a hospitalist track 2.1%
- Offers a research track/nonaccredited fellowship 36.2%
- Offers an other track 4.3%

Resident Evaluation
- Yearly specialty in-service examination required 86.0%
- Patient surveys 55.3%
- Portfolio system 63.8%
- 360-degree evaluations 97.9%
- Objective structured clinical examinations (OSCE) 14.9%

Program Evaluation
- Program graduation rates 93.6%
- Board certification rates 96.7%
- In-training examinations 89.4%
- Performance-based assessments 29.8%

Employment Policies and Benefits
- Part-time/shared positions 2.1%
- On-site child care 42.6%
- Subsidized child care 0.0%
- Allowance/stipend for professional expenses 97.9%
- Leave for educational meetings/conferences 91.7%
- Moving allowance 2.1%
- Housing stipend 6.4%

Endovascular Surgical Neuroradiology

Professional Description
Endovascular surgical neuroradiology is a subspecialty that uses catheter technology, radiologic imaging, and clinical expertise to diagnose and treat diseases of the central nervous system. Practitioners have training and experience in:

- Signs and symptoms of disorders amenable to diagnosis and treatment by endovascular surgical neuroradiology techniques
- Neurological examinations to evaluate patients with neurological disorders
- Indications and contraindications to endovascular surgical neuroradiology procedures
- Clinical and technical aspects of endovascular surgical neuroradiology procedures
- Medical and surgical alternatives
- Preoperative and postoperative management of endovascular patients
- Neurointensive care management
- Fundamentals of imaging physics and radiation biology
- Interpretation of radiographic studies pertinent to the practice

Neurology

Professional Description
A neurologist specializes in the diagnosis and treatment of all types of disease or impaired function of the brain, spinal cord, peripheral nerves, muscles, and autonomic nervous system, as well as the blood vessels that relate to these structures. A child neurologist has special skills in the diagnosis and management of neurologic disorders of the neonatal period, infancy, early childhood, and adolescence.

Prerequisites; Length of Training
Programs are either 3 years or 4 years. Residents entering a 3-year program must have completed 1 year in an accredited program in the US or Canada.

Subspecialties
Subspecialty programs accredited by the ACGME
- Child neurology
- Clinical neurophysiology
- Endovascular surgical neuroradiology
- Hospice and palliative medicine
- Neurodevelopmental disabilities
- Neuromuscular medicine
- Pain medicine*
- Sleep medicine
- Vascular neurology

* In 2007, ACGME-accredited pain medicine programs under anesthesiology, neurology, physical medicine and rehabilitation, and psychiatry were combined into a multidisciplinary pain medicine subspecialty.

American Board of Psychiatry and Neurology subspecialty certificates
- Child neurology (special certification)
- Clinical neurophysiology
- Epilepsy
- Hospice and palliative medicine
- Neurodevelopmental disabilities
- Pain medicine
- Sleep medicine
- Vascular neurology

Data
Unless otherwise noted, all data are for 2010.

Table 1. Neurology Programs
Number of accredited programs 126
Length of accredited training 3/4
Minimum number of prior years of GME required 1/0
Offers graduate year 1 positions, available immediately upon medical school completion Some
Average number of interviews for program year 1 positions 47.2
Percent new program directors, 2009-2010 academic year (Source: ACGME) 11.9%
Residents/Fellows
Total number of active residents/fellows 1,878
Average number of residents/fellows per program 0.0
Average percent female 44.9%
Average percent international medical graduate (IMG) 36.3%
Program Faculty
Average number of full-time physician faculty 29.8
Average number of part-time physician faculty 2.7
Average percent female full-time physician faculty 24.3%
Average ratio of full-time physician faculty to resident/fellow 1.4

Table 2. Data for Neurology Programs Listed in FREIDA
Number of programs providing data 72
Work Schedule (Program Year 1)
Average hours on duty per week 64.0
Average maximum consecutive hours on duty 26.1
Average days off duty per week 1.3
Moonlighting allowed within institution 51.4%
Night float system 40.3%
Offers awareness and management of fatigue in residents/fellows 93.1%

Educational Setting (Program Year 1)
Average hours/week of regularly scheduled lectures/conferences 6.9
Average percent of training in hospital outpatient clinics 22.5%
Average percent of training in nonhospital ambulatory care community settings 12.7%

Educational Benefits
- Program to assess/enhance medical professionalism 78.2%
- Debt management/financial counseling 63.9%
- Formal program to develop teaching skills 80.6%
- Formal mentoring program 80.6%
- Formal program to foster interdisciplinary teamwork 29.2%
- Continuous quality improvement training 86.1%
- International experience 18.1%
- Resident/fellow retreats 37.5%
- Off-campus electives 75.0%
- Hospice/home care experience 22.2%
- Cultural competence awareness 70.8%
- Instruction in medical Spanish or other non-English language 23.6%
- Alternative/complementary medicine curriculum 28.4%
- Training in identifying and reporting of domestic violence/abuse 59.7%
- MPH/MBA or PhD training 25.0%
- Research rotation 23.6%

Educational Features
- Offers additional training or educational experience beyond accredited length 20.9%
- Offers a primary care track 8.3%
- Offers a rural track 0.0%
- Offers a women’s health track 2.8%
- Offers a hospitalist track 8.6%
- Offers a research track/nonaccredited fellowship 22.2%
- Offers an other track 6.9%

Resident Evaluation
Yearly specialty in-service examination required 98.6%
Patient surveys 72.2%
Portfolio system 58.3%
360-degree evaluations 94.4%
Objective structured clinical examinations (OSCE) 61.1%

Program Evaluation
Program graduation rates 90.3%
Board certification rates 100.0%
In-training examinations 100.0%
Performance-based assessments 79.2%

Employment Policies and Benefits
Part-time/shared positions 2.8%
On-site child care 36.1%
Subsidized child care 12.5%
Allowance/stipend for professional expenses 98.6%
Leave for educational meetings/conferences 85.9%
Moving allowance 2.8%
Housing stipend 5.6%
On-call meal allowance 93.1%
Free parking 59.7%
PDAs 25.0%
Placement assistance upon completion of program 23.6%
Cross coverage in case of illness/disability 91.7%

Compensation and Leave (Graduate Year 1)
Average resident/fellow compensation $48,826
Average number weeks of vacation 3.5
Sick days (paid) 21.3
Maximum number of paid days for family/medical leave 46
Maximum number of unpaid days for family/medical leave 66

Major Medical Benefits
Major medical insurance for residents 100.0%
Major medical insurance for dependents 93.1%
Outpatient mental health insurance 93.1%
Inpatient mental health insurance 91.7%
Group life insurance 95.8%
Dental insurance 90.3%
Disability insurance 91.7%
Disability insurance for occupationally acquired HIV 72.2%
Medical insurance coverage begins when starting program 88.1%

Child Neurology
Professional Description
A child neurologist has special skills in the diagnosis and management of neurologic disorders of the neonatal period, infancy, early childhood, and adolescence.

Prerequisites; Length of Training
The three options for prerequisite training are 2 years of pediatrics training in the US or Canada; 1 year of internal medicine and 1 year of pediatrics; or 1 year of pediatrics and 1 year of basic neuroscience training. Length of ACGME-accredited programs is 3 years.

Data
Unless otherwise noted, all data are for 2010.

Clinical Neurophysiology

Professional Description

A neurologist who specializes in the diagnosis and management of central, peripheral, and autonomic nervous system disorders using a combination of clinical evaluation and electrophysiologic testing, such as electroencephalography (EEG), electromyography (EMG), and nerve conduction studies (NCS), among others.

Prerequisites; Length of Training

Completion of an accredited neurology, child neurology, or psychiatry program in the US or Canada is required. Length of ACGME-accredited programs is 1 year.

Data

Unless otherwise noted, all data are for 2010.

| Table 1. Clinical Neurophysiology Programs |

Endovascular Surgical Neuroradiology
See description under Neurological Surgery.

Epilepsy
Professional Description
Physicians who receive subspecialty certification in epilepsy must be knowledgeable of the pathophysiology, genetics, pathology, diagnosis, and treatment of seizure disorders at a level that is significantly beyond the training and knowledge received by a general or child neurologist. About 3 million Americans live with epilepsy. Physicians trained and certified in epilepsy are qualified to provide the latest treatment options, including medications, surgery, vagus nerve stimulation, investigational electronic devices and ketogenic diet.

Hospice and Palliative Medicine
See page 180.

Neurodevelopmental Disabilities
Professional Description
A pediatrician or neurologist who specializes in the diagnosis and management of chronic conditions that affect the developing and
mature nervous system, such as cerebral palsy, mental retardation, and chronic behavioral syndromes or neurologic conditions.

**Prerequisites; Length of Training**
Completion of 2 years of an accredited pediatrics program in the US or Canada is required. Length of ACGME-accredited programs is 4 years.

**For more information**

---

**Neuromuscular Medicine**

**Professional Description**
A neurologist or child neurologist specializing in the diagnosis and management of disorders of nerve, muscle, or neuromuscular junction, including amyotrophic lateral sclerosis, peripheral neuropathies (eg, diabetic and immune mediated neuropathies), various muscular dystrophies, congenital and acquired myopathies, inflammatory myopathies (eg, polymyositis, inclusion body myositis), and neuromuscular transmission disorders (eg, myasthenia gravis, Lambert-Eaton myasthenic syndrome).

*Source: American Board of Psychiatry and Neurology*

**Prerequisites; Length of Training**
Successfully completion of an ACGME- or RCPSC-accredited residency program in either adult or pediatric neurology or physical medicine and rehabilitation is required. Length of ACGME-accredited programs is 1 year.

**For more information**
