Thoracic Surgery

Professional Description
A thoracic surgeon provides the operative, perioperative, and critical care of patients with pathologic conditions within the chest. Included is the surgical care of coronary artery disease; cancers of the lung, esophagus, and chest wall; abnormalities of the trachea; abnormalities of the great vessels and heart valves; congenital anomalies; tumors of the mediastinum; and diseases of the diaphragm. Management of the airway and injuries of the chest is within the scope of the specialty.

Thoracic surgeons have the knowledge, experience, and technical skills to accurately diagnose, operate upon safely, and effectively manage patients with thoracic diseases of the chest. This requires substantial knowledge of cardiorespiratory physiology and oncology, as well as capability in the use of heart assist devices, management of abnormal heart rhythms and drainage of the chest cavity, respiratory support systems, endoscopy, and invasive and noninvasive diagnostic techniques.

Prerequisites; Length of Training
Education in thoracic surgery must be provided in one of three formats:
• Independent Program (traditional format): Two or 3 years of thoracic surgery education, preceded by successful completion of an ACGME- or RCPSC-accredited surgery program.
• Joint Surgery/Thoracic Surgery Program (4+3 program): All 7 years of the program must be completed in the same institution, and all of the years must be accredited by the ACGME. Assuming successful completion of the programs, this format provides the graduate with the ability to apply for certification in both surgery and thoracic surgery.
• Integrated Program: Six years of thoracic surgery education (completed in one institution) following completion of medical school.

Subspecialties
Subspeciality programs accredited by the ACGME
• Congenital cardiac surgery

American Board of Thoracic Surgery certificate of added qualifications
• Congenital cardiac surgery

Data
Unless otherwise noted, all data are for 2010.

Employment Policies and Benefits

- Part-time/shared positions: 2.6%
- On-site child care: 34.2%
- Subsidized child care: 7.9%
- Allowance/stipend for professional expenses: 100.0%
- Leave for educational meetings/conferences: 92.2%
- Moving allowance: 2.6%
- Housing stipend: 10.5%
- On-call meal allowance: 84.2%
- Free parking: 39.5%
- PDAs: 26.3%
- Placement assistance upon completion of program: 52.6%
- Cross coverage in case of illness/disability: 76.3%

Compensation and Leave (Graduate Year 1)

- Average resident/fellow compensation: $57,633
- Average number of weeks of vacation: 3.3
- Sick days (paid): 21.7
- Maximum number of paid days for family/medical leave: 38
- Maximum number of unpaid days for family/medical leave: 88

Major Medical Benefits

- Major medical insurance for residents: 97.4%
- Major medical insurance for dependents: 97.4%
- Outpatient mental health insurance: 97.4%
- Inpatient mental health insurance: 97.4%
- Group life insurance: 94.7%
- Dental insurance: 92.1%
- Disability insurance: 92.1%
- Disability insurance for occupationally acquired HIV: 81.6%
- Medical insurance coverage begins when starting program: 89.5%

Congenital Cardiac Surgery

Professional Description
"Educational programs in congenital cardiac surgery must provide the educational resources appropriate for the development of proficiency in the diagnosis and treatment of diseases of congenital arterial, venous, and lymphatic circulatory systems, including those components intrinsic to the heart."

In addition, “[f]ellows must be provided with education with special diagnostic techniques for the management of congenital cardiac lesions; the methods and techniques of cardiac catheterization, and competence in the interpretation of such findings; and experience with the application, interpretation, and limitations of echocardiography and other imaging techniques.”

Prerequisites; Length of Training
Satisfactory completion of a thoracic surgery program accredited by the ACGME or Royal College of Physicians and Surgeons of Canada is required. Length of ACGME-accredited programs is 1 year.

Transitional Year

Description
The objective of the transitional year is to provide a well-balanced program of GME in multiple clinical disciplines to facilitate the choice of and/or preparation for a specific specialty. The transitional year is not meant to be a complete graduate education program in preparation for the practice of medicine. (Source: Transitional Year Program Requirements, ACGME)

Prerequisites; Length of Training
No prior GME is required. ACGME-accredited programs are 1 year.

Data
Unless otherwise noted, all data are for 2010.

Table 1. Transitional Year Programs
| Number of accredited programs | 113 |

Program Data
| Length of accredited training | 1 |
| Minimum number of prior years of GME required | 0 |
| Offers graduate year 1 positions, available immediately upon medical school completion | Yes |
| Average number of interviews for program year 1 positions | 75.0 |
| Percent new program directors, 2009-2010 academic year (Source: ACGME) | 12.9% |

Residents/fellows
| Total number of active residents/fellows | 1,079 |
| Average number of residents/fellows per program | 0.0 |
| Average percent female | 36.3% |
| Average percent international medical graduate (IMG) | 8.6% |

Program Faculty
| Average number of full-time physician faculty | 59.8 |
| Average number of part-time physician faculty | 17.8 |
| Average percent female full-time physician faculty | 21.0% |
| Average ratio of full-time physician faculty to resident/fellow | 3.0 |

Table 2. Data for Transitional Year Programs Listed in FREIDA
| Number of programs providing data | 76 |

Work Schedule (Program Year 1)
| Average hours on duty per week | 60.7 |
| Average maximum consecutive hours on duty | 28.3 |
| Average days off duty per week | 1.3 |
| Moonlighting allowed within institution | 5.3% |
| Night float system | 51.3% |
| Offers awareness and management of fatigue in residents/fellows | 98.7% |

Educational Setting (Program Year 1)
| Average hours/week of regularly scheduled lectures/conferences | 7.0 |
| Average percent of training in hospital outpatient clinics | 16.8% |
| Average percent of training in nonhospital ambulatory care community settings | 13.3% |

Educational Benefits
| Program to assess/enhance medical professionalism | 88.8% |
| Debt management/financial counseling | 69.7% |
| Formal program to develop teaching skills | 65.8% |
| Formal mentoring program | 48.7% |
| Formal program to foster interdisciplinary teamwork | 47.4% |
| Continuous quality improvement training | 93.4% |
| International experience | 29.9% |
| Resident/fellow retreats | 53.9% |
| Off-campus electives | 88.8% |

Hospice/home care experience | 57.9% |
Cultural competence awareness | 86.8% |
Instruction in medical Spanish or other non-English language | 25.0% |
Alternative/complementary medicine curriculum | 39.5% |
Training in identifying and reporting of domestic violence/abuse | 78.9% |
MPH/MBA or PhD training | 1.3% |
Research rotation | 3.8% |

Educational Features
| Offers additional training or educational experience beyond accredited length | 0.7% |
| Offers a primary care track | 17.1% |
| Offers a rural track | 0.0% |
| Offers a women’s health track | 2.6% |
| Offers a hospitalist track | 6.6% |
| Offers a research track/nonaccredited fellowship | 2.6% |
| Offers an other track | 1.3% |

Resident Evaluation
| Yearly specialty in-service examination required | 23.3% |
| Patient surveys | 65.8% |
| Portfolio system | 65.8% |
| 360-degree evaluations | 97.4% |
| Objective structured clinical examinations (OSCE) | 36.8% |

Program Evaluation
| Program graduation rates | 94.7% |
| Board certification rates | 19.7% |
| In-training examinations | 26.3% |
| Performance-based assessments | 61.8% |

Employment Policies and Benefits
| Part-time/shared positions | 3.9% |
| On-site child care | 42.1% |
| Subsidized child care | 6.6% |
| Allowance/stipend for professional expenses | 84.2% |
| Leave for educational meetings/conferences | 32.3% |
| Moving allowance | 31.6% |
| Housing stipend | 6.6% |
| On-call meal allowance | 97.4% |
| Free parking | 97.4% |
| PDAs | 36.8% |
| Placement assistance upon completion of program | 22.4% |
| Cross coverage in case of illness/disability | 89.5% |

Compensation and Leave (Graduate Year 1)
| Average resident/fellow compensation | $47,052 |
| Average number weeks of vacation | 3.1 |
| Sick days (paid) | 21.2 |
| Maximum number of paid days for family/medical leave | 37 |
| Maximum number of unpaid days for family/medical leave | 66 |

Major Medical Benefits
| Major medical insurance for residents | 100.0% |
| Major medical insurance for dependents | 100.0% |
| Outpatient mental health insurance | 94.7% |
| Inpatient mental health insurance | 94.7% |
| Group life insurance | 93.4% |
| Dental insurance | 93.4% |
| Disability insurance | 89.5% |
| Disability insurance for occupationally acquired HIV | 72.4% |
| Medical insurance coverage begins when starting program | 96.1% |

Urology

Professional Description
A urologist manages benign and malignant medical and surgical disorders of the genitourinary system and the adrenal gland. This specialist has comprehensive knowledge of, and skills in, endoscopic, percutaneous, and open surgery of congenital and acquired conditions of the urinary and reproductive systems and their contiguous structures.

Prerequisites; Length of Training
Satisfactory completion of 1 year of an ACGME-accredited general surgery residency is required. ACGME-accredited urology programs are 3 years or 4 years.

Subspecialties
Subspecialty programs accredited by the ACGME
• Pediatric urology

Data
Unless otherwise noted, all data are for 2010.

Table 1. Urology Programs
<table>
<thead>
<tr>
<th>Number of accredited programs</th>
<th>122</th>
</tr>
</thead>
</table>

Program Data
| Length of accredited training | 4/3 |
| Minimum number of prior years of GME required | 1/2 |
| Offers graduate year 1 positions, available immediately upon medical school completion | No |
| Average number of interviews for program year 1 positions | 32.8 |
| Percent new program directors, 2009-2010 academic year | 7.5% |

Residents/Fellows
| Total number of active residents/fellows | 1,047 |
| Average number of residents/fellows per program | 0.0 |
| Average percent female | 22.9% |
| Average percent international medical graduate (IMG) | 3.5% |

Program Faculty
| Average number of full-time physician faculty | 10.7 |
| Average number of part-time physician faculty | 1.7 |
| Average percent female full-time physician faculty | 8.8% |
| Average ratio of full-time physician faculty to resident/fellow | 0.9 |

Table 2. Data for Urology Programs Listed in FREIDA
| Number of programs providing data | 54 |

Work Schedule (Program Year 1)
| Average hours on duty per week | 66.4 |
| Average maximum consecutive hours on duty | 22.6 |
| Average days off duty per week | 1.4 |
| Night float system | 2.7% |
| Offers awareness and management of fatigue in residents/fellows | 94.4% |

Educational Setting (Program Year 1)
| Average hours/week of regularly scheduled lectures/conferences | 4.7 |
| Average percent of training in hospital outpatient clinics | 28.4% |
| Average percent of training in nonhospital ambulatory care community settings | 8.6% |

Educational Benefits
| Program to assess/enhance medical professionalism | 78.6% |
| Debt management/financial counseling | 66.7% |
| Formal program to develop teaching skills | 81.5% |
| Formal mentoring program | 59.3% |
| Formal program to foster interdisciplinary teamwork | 22.2% |
| Continuous quality improvement training | 87.0% |
| International experience | 29.6% |
| Resident/fellow retreats | 48.1% |
| Off-campus electives | 27.8% |
| Hospice/home care experience | 7.4% |
| Cultural competence awareness | 75.9% |
| Instruction in medical Spanish or other non-English language | 14.8% |
| Alternative/complementary medicine curriculum | 27.8% |
| Training in identifying and reporting of domestic violence/abuse | 46.3% |
| MPH/MBA or PhD training | 25.9% |
| Research rotation | 55.6% |

Educational Features
| Offers additional training or educational experience beyond accredited length | 20.0% |
| Offers a primary care track | 1.9% |
| Offers a rural track | 1.9% |
| Offers a women’s health track | 5.6% |
| Offers a hospitalist track | 5.6% |
| Offers a research track/nonaccredited fellowship | 25.9% |
| Offers an other track | 7.4% |

Resident Evaluation
| Yearly specialty in-service examination required | 98.4% |
| Patient surveys | 53.7% |
| Portfolio system | 61.1% |
| 360-degree evaluations | 92.6% |
| Objective structured clinical examinations (OSCE) | 11.1% |

Program Evaluation
| Program graduation rates | 87.0% |
| Board certification rates | 98.1% |
| In-training examinations | 100.0% |
| Performance-based assessments | 46.3% |

Employment Policies and Benefits
| Part-time/shared positions | 0.0% |
| On-site child care | 33.3% |
| Subsidized child care | 7.4% |
| Allowance/stipend for professional expenses | 94.4% |
| Leave for educational meetings/conferences | 92.4% |
| Moving allowance | 1.9% |
| Housing stipend | 7.4% |
| On-call meal allowance | 96.3% |
| Free parking | 59.3% |
| PDAs | 24.1% |
| Placement assistance upon completion of program | 20.4% |
| Cross coverage in case of illness/disability | 85.2% |

Compensation and Leave (Graduate Year 1)
| Average resident/fellow compensation | $49,644 |
| Average number weeks of vacation | 3.7 |
| Sick days (paid) | 27.1 |
| Maximum number of paid days for family/medical leave | 41 |
| Maximum number of unpaid days for family/medical leave | 58 |

Major Medical Benefits
| Major medical insurance for residents | 96.3% |
| Major medical insurance for dependents | 92.6% |
| Outpatient mental health insurance | 90.7% |

Slow growing

Annual physician compensation survey shows most specialties saw increases less than the rate of inflation

While the healthcare reform debate heated up the nation’s airwaves and cyberspace in 2009, physician salaries saw some significant cooling, according to Modern Healthcare’s 17th annual Physician Compensation Survey.

Of the 23 specialties tracked in this year’s survey, only five finished with average pay increases that topped the year’s 2.7% inflation rate as calculated by the Consumer Price Index. Those specialties were dermatology, with a 5.3% increase; pediatrics, up 4.5%; neurology and pathology, both at 3.3%; and hospital medicine, 2.8%. In last year’s survey, 10 specialties had compensation increases above 2008’s 3.8% inflation rate.

Eight specialties saw slight decreases in their averages in the current survey: Plastic surgery, down 3.3% to $376,849 from $389,727; gastroenterology, down 2.8% to $409,628 from $421,227; intensive medicine, down 1.7% to $257,797 from $262,155; radiation oncology, down 1.7% to $420,661 from $427,865; urology, down 1.4% to $391,406 from $396,778; emergency medicine, down 1.1% to $266,826 from $269,659; invasive cardiology, down 0.9% to $450,016 from $454,253; and noninvasive cardiology, also down 0.9% to $393,135 from $396,397.

By comparison, in last year’s survey, three specialties saw a decrease in average pay: plastic surgery, where the average compensation went down 7.7%, followed by anesthesiaology, which fell 1.5%; and radiation oncology, down less than 1%.

“Clearly, there had to be some impact from the economy,” says William Jessee, president and CEO of the Medical Group Management Association, one of 15 medical associations or search firms participating in the survey. “Actually, I was pleased the numbers were as good as they were given the recession. Certainly, it showed a comeback in the second half of 2009.”

Like last year’s survey, orthopedic surgeons topped the 2009 list based on total pay. Ortho’s compensation ranged from $397,879 to $600,000 and their average compensation rose 1.9% to $485,297 from $476,149.

Another second-year-in-a-row statistic was that no specialty saw a double-digit increase in average compensation. Also, for the second consecutive year—with a 5.3% increase—dermatologists saw the highest increase in average compensation to $371,281. (In last year’s survey, dermatologists saw a 6.7% increase.) The specialty’s pay ranged from $313,100 to $480,088 in the current survey.

Although pediatricians had the second-highest pay increase—4.5%—they were still second from the bottom based on total pay among the specialties tracked. Pediatrician compensation averaged $193,135 and ranged from $160,111 to $228,750. Only family physicians, whose pay averaged $187,821 and ranged from $175,000 to $220,196, were lower on the list—even with a 2.6% bump up in compensation.

Psychiatrists—with average compensation of $205,934—finished above pediatricians, and just behind internists, who saw a 2.2% increase in average pay to $205,671. Internists’ pay ranged from $184,200 to $231,691.

Jessee says that, totaled together, primary-care physicians saw their pay increase 2.8% in the MGMA survey. He says this indicates that efforts to boost pay for primary-care doctors—which some hope will attract more medical school graduates to choose primary care as a specialty—may be working.

Still, Jessee, a pediatrician himself, cautions against an overexuberant reaction to this statistic. “Keep in mind the increase is not anything to write home about—2.8% is not a windfall,” he says, adding that it’s unknown how factors such as healthcare reform and the trend toward physician employment will affect primary-care compensation.

Psychiatrist compensation always seems somewhat volatile: up 10.9% in 2006; down 5.6% in 2007; up 3.1% in 2008; and now up only 0.8% for 2009 to an average of $205,934 compared with $204,406 last year. Although the pay range was rather small—between $182,724 and $235,101—the range of average increases and decreases among survey participants is huge. The Atlanta-based physician placement firm Pinnacle Health Group reported a 13.2% drop in psychiatrist compensation while Irving, Texas-based Martin, Fletcher reported a 14.4% increase.

For Merritt, Hawkins & Associates, another Irving-based recruiter, a 4.5% increase was reported for psychiatrist compensation, but Travis Singleton, the firm’s senior vice president, notes that the company fielded 179 requests for psychiatrists, which is an increase of 47% from the previous year and 121% from three years ago.

“Psychiatry searches were across the board, coast to coast,” Singleton says. “It’s not a surprise that demand went up—but it was surprise that it went up so much and so universally.”

He adds that the need for inpatient and adolescent psychiatrists has and will continue to increase, and he also links the demand for psychiatrists to high unemployment rates and the nation being involved in two extended wars. “It’s not necessarily so much military personnel driving demand, Singleton explains. “It’s their families.”

Salary data charts for the physician specialties begin on p. 917. Information on the firms supplying the compensation data can be found on p. 921. The full chart is also available at ModernHealthcare.com.

Source: Modern Healthcare’s 2010 Physician Compensation Survey
Special Feature

Data trackers

Fifteen firms provided compensation data on wide variety of specialties

American Medical Group Association
The Alexandria, Va.-based trade group surveyed 49,700 physicians and 248 medical groups for its 2010 Medical Group Compensation and Financial Survey. The survey, which was conducted in partnership with RSM McGladrey, covers 125 positions/specialties and costs $590 for nonmembers. For more information contact Brad Vaudrey at 612-376-9530. Data submitted by the AMGA are preliminary and subject to change.

Cejka Search
The St. Louis-based physician and healthcare executive search firm surveyed 101 organizations and 193 physicians in 2009 covering 21 positions/specialties. Data submitted are a sample based on Cejka’s proprietary database of completed searches in 2009. Trend information by specialty and region is available on request. For more information contact Christina Cruz at 770-643-5559.

Daniel Stern & Associates
The Pittsburgh-based physician-recruiting and consulting firm heard from 984 physicians for its 2010 Emergency Medicine Compensation & Benefit Survey. The complete survey results cost $295 with additional regional and state-specific information available upon request. For more information contact Daniel Stern at 800-438-2476.

Delta Physician Placement
The Dallas-based physician-staffing firm surveyed 183 organizations and 597 physicians in 2009 for its annual Physician Recruiting Standard report. For more information about the company’s free survey contact Mike Gianas at 800-521-5060, ext. 4113.

Hay Group
The Philadelphia-based consulting firm surveyed 169 organizations and some 25,000 physicians in 128 positions/specialties from May to July 2009. For more information on the firm’s Physician Compensation Survey contact Angela Wolnatski at 800-716-4429.

Hospital & Healthcare Compensation Service

Jackson & Coker
The Alpharetta, Ga.-based physician-recruitment firm gathered data from an outside company that compiled averages from multiple compensation reports. For more information, contact Edward McEachern at 800-272-2707.

LocumTenens.com
The Alpharetta, Ga.-based physician-recruiting agency surveyed 1,703 physicians in 48 positions/specialties during April and May. Results from its 2010 Compensation and Employment Survey are available free of charge. For more information call Christina Cruz at 770-643-5559.

Martin, Fletcher
The Irving, Texas-based healthcare staffing firm surveyed 270 organizations and 3,510 physicians from April 2009 to March 2010 for its 2010 Physician Compensation and Benefits Report. Survey findings are available free of charge. For more information contact Dana Bucher at 800-668-8822.

Medical Group Management Association
The Englewood, Colo.-based professional membership association surveyed 2,348 organizations and 57,791 physicians in 109 positions/specialties from January to March. The full report, to be published this month, can be ordered at mgma.com/physcomp. Data submitted by the MGMA are preliminary median figures and subject to change.

Medicus Firm
The Dallas-based physician search firm surveyed 2,875 physicians in 19 positions/specialties in its 2010 Physician Compensation Survey from April to May 2010. Findings from the survey are available free of charge. For more information contact Jeff Katon at 888-260-4242, ext. 236.

Merritt, Hawkins & Associates
The Irving, Texas-based physician-recruitment firm surveyed 1,000 organizations and 2,900 physicians in 20 positions/specialties for its 2010 Review of Physician Recruiting Incentives report. Survey results are available free of charge. For more information contact Falon Mitchell at 800-876-0500. Data submitted are preliminary and subject to change.

Pacific Companies
The Costa Mesa, Calif.-based healthcare staffing firm surveyed 3,267 organizations and 68,543 physicians in 46 positions/specialties from April 2009 to March 2010. A copy of its Salary and Benefits Survey findings costs $850. For more information contact Michael Moore at 800-741-7629.

Pinnacle Health Group
The Atlanta-based physician-recruitment firm surveyed 109 organizations and 256 physicians in 42 positions/specialties from May 2008 to January 2010 with results based on actual placements and physician searches for calendar years 2008 and 2009. For more information about the company’s free survey contact John Andrew Estalibio or Mike Broxterman at 800-492-7771.

Sullivan, Cotter and Associates
The Detroit-based compensation and human resource management firm collected information for its Physician Compensation and Productivity Survey from March to May. For more information contact Elaine Tocco at 313-285-1491. Data submitted are preliminary and subject to change.
New Programs
The following programs were accredited by the Accreditation Council for Graduate Medical Education with an effective date between January 1 and December 31, 2010.

Addiction Psychiatry (Psychiatry)
University of Utah Program
Salt Lake City, UT
Effective date: 7/1/2010
Program ID: 401-49-31-068

Adolescent Medicine (Pediatrics)
Nationwide Children's Hospital/Ohio State University Program
Columbus, OH
Effective date: 7/1/2010
Program ID: 214-38-12-035

Adult Cardiothoracic Anesthesiology (Anesthesiology)
Oregon Health & Science University Program
Portland, OR
Effective date: 7/1/2010
Program ID: 041-40-21-054

Penn State University/Milton S. Hershey Medical Center Program
Hershey, PA
Effective date: 7/1/2010
Program ID: 041-40-12-053

Allegheny General Hospital-Western Pennsylvania Hospital Program
Pittsburgh, PA
Effective date: 7/1/2010
Program ID: 041-41-31-052

UPMC Medical Education Program
Pittsburgh, PA
Effective date: 7/1/2010

University of Washington Program
Seattle, WA
Effective date: 7/1/2010
Program ID: 451-54-12-006
# Withdrawn Programs

The accreditation of the following programs was withdrawn or voluntarily withdrawn with an effective date between January 1 and December 31, 2010.

## Abdominal Radiology
Albert Einstein College of Medicine at Beth Israel Medical Center Program  
New York, NY  
Program ID: 421-35-11-007

## Addiction Psychiatry
Creighton University/University of Nebraska Program  
Omaha, NE  
Program ID: 401-30-31-055

## Adolescent Medicine
Case Western Reserve University (MetroHealth) Program  
Cleveland, OH  
Program ID: 321-38-13-032

## Anesthesiology
New York Medical College at St Vincent’s Hospital and Medical Center of New York Program  
New York, NY  
Program ID: 040-35-12-109

## Blood Banking/Transfusion Medicine
Baystate Medical Center/Tufts University School of Medicine Program  
Springfield, MA  
Program ID: 305-24-21-072

## Cardiothoracic Radiology
Brigham and Women’s Hospital Program  
Boston, MA  
Program ID: 429-24-13-002

## Developmental-Behavioral Pediatrics
University of Hawaii Program  
Honolulu, HI  
Program ID: 336-14-21-034

## Critical Care Medicine
New York Medical College at St Vincent’s Hospital and Medical Center of New York Program  
New York, NY  
Program ID: 142-35-11-058

## Endocrinology, Diabetes, and Metabolism
New York Medical College at St Vincent’s Hospital and Medical Center of New York Program  
New York, NY  
Program ID: 143-35-11-029

## Gastroenterology
New York Medical College at St Vincent’s Hospital and Medical Center of New York Program  
New York, NY  
Program ID: 144-35-11-029

## Geriatric Medicine
Arrowhead Regional Medical Center Program  
Colton, CA  
Program ID: 125-05-21-033

## Geriatric Psychiatry
New York University School of Medicine Program  
New York, NY  
Program ID: 407-35-23-027

## Gerontological Medicine
New York Medical College at St Vincent’s Hospital and Medical Center of New York Program  
New York, NY  
Program ID: 151-35-21-090

Section IV

Graduate Medical Education Teaching Institutions

Section IV lists hospitals and organizations that sponsor graduate medical education (GME) programs or participate in GME. Sponsoring institutions assume final responsibility for a GME program. Most GME programs are sponsored by specific clinical departments within a hospital, another health care institution such as a medical school, or an educational consortium. Major participating institutions include hospitals or other sites recognized by at least one residency review committee as providing a major portion of required GME. Hospitals and other institutions that provide rotations of less than one-sixth of the program length or less than a total of 6 months are not listed in the Directory.

All institutions that sponsor GME programs or participate in GME are listed in alphabetical order by state and city. Each listing includes the institution name, address, and identification code. Also provided are codes of medical schools affiliated with each institution (where applicable) and abbreviations for the specialty and subspecialty programs affiliated with each institution. (A key for specialty and subspecialty abbreviation codes is provided on the inside back cover of this Directory).

Candidates seeking a residency should refer to the list of programs in Section II. Applications for a residency position should be addressed to the program director rather than to an institution.

Relationships Between Hospitals and Medical Schools (Medical School Affiliation)

Hospitals that sponsor an accredited program are not required to have a formal relationship with a medical school. Where such a relationship exists, the affiliation is identified by the dean of the medical school as M (major), G (graduate only), or L (limited). The medical school associated with the code number in this listing is identified in Appendix D.

Major affiliation (M) signifies that an institution is an important part of the teaching program of the medical school and is a major unit in the clinical clerkship program. Major teaching institutions provide clerkship experience in two or more of the major specialties: internal medicine, surgery, pediatrics, and obstetrics-gynecology. An institution responsible for most of the teaching in a single specialty, such as psychiatry or pediatrics, may also be considered a major affiliation. In a major teaching institution, medical students serve clinical clerkships regularly on inpatient services, under the direct supervision of medical school faculty. A major teaching institution may or may not be used for medical school residencies.

Graduate affiliation (G) indicates that the institution is affiliated with the medical school only for its graduate programs and that one or more of the following arrangements is in effect:

1. House staff of the GME programs are selected by officials of a medical school department or by a joint committee of the institution teaching staff and medical school faculty.
2. Medical school faculty (other than the institution’s attending staff) are regularly scheduled to participate in the teaching programs of the institution. No graduate affiliation is indicated if medical school faculty participation at the institution is limited to an occasional lecture or consultation visit, or if the institution’s residents attend medical school teaching conferences only as visitors.
3. A contractual arrangement (with or without financial commitment) specifies the medical school participation in the organization and supervision of the GME program in the institution.
4. There is some degree of exchange of residents between this institution and the principal teaching institution of the medical school.

Limited affiliation (L) signifies that the institution is affiliated with the medical school’s teaching program only for brief and/or unique rotations of students or residents.

Appendix A

Combined Specialty Programs

Combined training consists of a coherent educational experience in two or more closely related specialty or subspecialty programs. The educational plan for combined training is approved by the board of each of the specialties to assure that resident physicians completing combined training are eligible for board certification in each of the component specialties. Each specialty or subspecialty program is separately accredited by the Accreditation Council for Graduate Medical Education (ACGME) through its respective Residency Review Committee (RRC). The duration of combined training is longer than any one of its component specialty programs standing alone, and shorter than all of its component specialty programs together.

Applicants to combined specialty programs are encouraged to review requirements for admission to the certification process of each board (see Appendix B).

Note on Combined Internal Medicine/Pediatrics Programs

The American Board of Internal Medicine and American Board of Pediatrics have developed policies regarding board eligibility of residents in programs that are not accredited. Combined internal medicine/pediatrics training initiated June 1, 2007, or after must be undertaken in combined internal medicine/pediatrics programs accredited by the ACGME.

Residents contracted to programs for July 1, 2007 through the NRMP in programs that do not seek or achieve accreditation will be allowed to finish that academic year in the unaccredited program and still have the training count toward the requirements for certification. After the 1 year of training, they must transfer to an accredited program in order to be eligible for certification.

Residents who have entered board-approved internal medicine/pediatrics programs prior to June 1, 2007 will be allowed to complete their training in the approved program and will be eligible for admission to the certification examination in internal medicine and pediatrics, even if the program chooses not to seek accreditation or is unsuccessful in achieving accreditation. The boards will continue to monitor those programs in order to assure compliance with the curricular content required by the ACGME. ACGME-accredited programs in internal medicine/pediatrics are listed in Section II.

Diagnostic Radiology/Nuclear Medicine/Nuclear Radiology

The American Board of Radiology and the American Board of Nuclear Medicine offer dual certification for candidates who have satisfactorily completed a combined total of 6 years of suitable accredited training in programs approved by both boards and successfully passed the certifying examination of both boards.

To be eligible for dual certification, a resident must obtain residency training in diagnostic radiology and nuclear medicine that must include a) a preparatory clinical year in an ACGME-accredited program and b) 4 years of education in an ACGME-accredited diagnostic radiology program that includes 6 months of nuclear medicine training, followed by c) 1 year of education in a combined nuclear medicine and nuclear radiology program. Certifying examinations of each board cannot be taken until all required years of training in both specialties are satisfactorily completed. Emergency Medicine/Family Medicine

The American Board of Emergency Medicine and the American Board of Family Medicine offer dual certification for candidates.
COMBINED SPECIALTY PROGRAMS

Emergency Medicine/Family Medicine
The American Board of Emergency Medicine and the American Board of Family Medicine offer dual certification for candidates (eligible for certification by each Board) who enter and successfully complete the curriculum of the 5-year program.

Internal Medicine/Dermatology
The American Board of Internal Medicine and the American Board of Dermatology offer dual certification for candidates who fulfill the requirements of both boards by completing joint training in 5 years. All 5 years should be completed in the same combined program; exceptions must be approved in advance by both boards. Applicants may not take the certifying examinations until all required years in both specialties have been completed.

Internal Medicine/Emergency Medicine

The American Board of Internal Medicine and the American Board of Emergency Medicine offer dual certification for candidates who have completed at least 2½ years of suitable accredited training in each specialty. A combined residency consists of 5 years of balanced education in the two disciplines. It is strongly recommended that the participating residencies be in the same academic health center.

To be eligible for dual certification, the resident must satisfactorily complete 60 months of combined education, which must be verified by the directors of both programs. The certifying examinations cannot be taken until all 5 years are completed.

Internal Medicine/Emergency Medicine/Critical Care Medicine

The American Board of Internal Medicine and the American Board of Emergency Medicine offer triple certification for candidates who complete a 6-year (72-month) integrated, coherent program of combined training in internal medicine, emergency medicine, and critical care medicine, approved by both boards.

Upon successful completion and verification of the first 5 years of this program, candidates may apply to take the certification examinations in internal medicine and emergency medicine. To meet eligibility for certification in critical care medicine, the candidate must: (1) have satisfactorily completed the 6-year combined program; (2) be certified by the American Board of Internal Medicine; and (3) have met the certification requirements of the American Board of Emergency Medicine.

Internal Medicine/Family Medicine

The American Board of Internal Medicine and the American Board of Family Medicine offer dual certification for candidates who have satisfactorily completed 4 years of combined training in programs approved by both boards.

To be eligible for dual certification, combined residency training in internal medicine and family medicine must include at least 48 months of balanced education in the two disciplines and be verified by the training director(s) of the program. The written certifying examinations cannot be taken until all required years in both specialties are completed.

Data

Unless otherwise noted, all data are for 2010.
Internal Medicine/Medical Genetics

The American Board of Internal Medicine and the American Board of Medical Genetics have approved a pathway leading to admissibility to the certification processes in internal medicine and medical genetics to candidates who have satisfactorily completed 5 years of combined training in internal medicine and medical genetics in an approved training track, beginning with a GY1 in internal medicine. Such training, which must be verified by the program directors of both specialties, is intended to provide educational and practical experiences in each discipline that are equivalent to those in the training programs of the parent specialties.

This combined residency training must be conducted in the same institution and its affiliated hospitals. There should be no interruption in training.

Internal Medicine/Neurology

The American Board of Internal Medicine and the American Board of Psychiatry and Neurology offer dual certification for candidates who have completed 5 years of combined training suitable to both specialties. A combined residency in internal medicine and neurology who have completed 5 years of combined training suitable to both specialties, is intended to provide educational and practical experiences in each discipline that are equivalent to those in the training programs of the parent specialties.

Internal Medicine/Preventive Medicine

The American Board of Internal Medicine (ABIM) and the American Board of Preventive Medicine (ABPM) offer dual certification for candidates who have completed a minimum of 4 years of accredited training in combined internal medicine/preventive medicine programs that meet the Guidelines for Combined Internal Medicine - Preventive Medicine Residency Training Programs approved by ABPM and ABIM. In addition to satisfactory completion of the combined training programs, applicants for the ABPM certifying examination must have completed the required year of preventive medicine practice to qualify.

Internal Medicine/Nuclear Medicine

The American Board of Internal Medicine and the American Board of Nuclear Medicine offer a training pathway for candidates who have completed 4 years of combined accredited training in internal medicine and nuclear medicine leading to admissibility to certification in both specialties. To meet eligibility for dual certification, the resident must satisfactorily complete 48 months of combined training that is verified by the directors of both training programs. It is strongly recommended that combined training occur in the same institution. Residents will be eligible for admission to the written certifying examination in internal medicine after successfully completing the R-3 year of training and for the nuclear medicine examination after the R-4 year.

Internal Medicine/Physical Medicine and Rehabilitation

The American Board of Internal Medicine and the American Board of Physical Medicine and Rehabilitation offer dual certification for candidates who have completed at least 2½ years of suitable accredited training in each specialty. A combined residency must include at least 5 years of coherent training integral to residencies in the two disciplines. It is strongly recommended that the participating residencies be in the same institution.

To meet eligibility requirements for dual certification, the resident must satisfactorily complete 60 months of combined education, which must be verified by the directors of both programs. The written certifying examinations cannot be taken until required training in a specialty has been satisfactorily completed. The certifying examination in internal medicine cannot be taken prior to the fall of the fifth year in the combined program.

Graduate Medical Education Directory 2011-2012
Neurology/Diagnostic Radiology/Neuroradiology

The American Board of Psychiatry and Neurology and the American Board of Radiology offer certification in neurology, diagnostic radiology, and neuroradiology. The combined residency must include at least 7 years of coherent training integral to all three residencies. It is recommended that the participating residencies be in the same academic health center.

To meet eligibility requirements for triple certification, the resident must satisfactorily complete 84 months of combined training, which must be verified by the directors of each program. Lacking verification of acceptable clinical competence in the combined program, the resident must satisfactorily complete the standard length of residency training and all other requirements before each certifying examination may be taken. Applicants may not take the certifying examination until all required years of training have been completed. In order to be eligible for the neuroradiology exam, a resident must have completed certification in both diagnostic radiology and neurology.

Pediatrics/Dermatology

The American Board of Pediatrics and the American Board of Dermatology offer dual certification for candidates who fulfill the requirements of both boards by completing joint training in 5 years. All 5 years should be completed in the same combined program; exceptions must be approved in advance by both boards. Applicants may not take the certifying examinations until all required years in both specialties have been completed.

Pediatrics/Emergency Medicine

The American Board of Pediatrics and the American Board of Emergency Medicine offer dual certification for candidates who fulfill the requirements of both boards by completing joint training in 5 years. All 5 years should be completed in the same combined program; exceptions must be approved in advance by both boards. Applicants may not take the certifying examinations until all required years in both specialties have been completed.

Research rotation: 0.0%

Educational Features
Offers additional training or educational experience beyond accredited length: 0.0%
Offers a primary care track: 16.7%
Offers a rural track: 0.0%
Offers a women’s health track: 0.0%
Offers a hospitalist track: 0.0%
Offers a research track/nonaccredited fellowship: 33.3%

Resident Evaluation
Yearly specialty in-service examination required: 92.9%
Patient surveys: 66.7%
Portfolio system: 50.0%
360-degree evaluations: 100.0%
Objective structured clinical examinations (OSCE): 66.7%

Program Evaluation
Program graduation rates: 100.0%
Board certification rates: 100.0%
In-training examinations: 100.0%
Performance-based assessments: 83.3%

Employment Policies and Benefits
Part-time/shared positions: 33.3%
On-site child care: 33.3%
Subsidized child care: 16.7%
Allowance/stipend for professional expenses: 100.0%
Leave for educational meetings/conferences: 60.0%
Moving allowance: 33.3%
Housing stipend: 0.0%
On-call meal allowance: 100.0%
Free parking: 50.0%
PDAs: 66.7%
Placement assistance upon completion of program: 66.7%
Cross coverage in case of illness/disability: 83.3%

Compensation and Leave (Graduate Year 1)
Average resident/fellow compensation: $43,930
Average number weeks of vacation: 3.5
Sick days (paid): 12.4
Maximum number of paid days for family/medical leave: 20
Maximum number of unpaid days for family/medical leave: 20

Major Medical Benefits
Major medical insurance for residents: 100.0%
Major medical insurance for dependents: 83.3%
Outpatient mental health insurance: 100.0%
Inpatient mental health insurance: 100.0%
Group life insurance: 83.3%
Dental insurance: 83.3%
Disability insurance: 66.7%
Disability insurance for occupationally acquired HIV: 50.0%
Medical insurance coverage begins when starting program: 100.0%

Psychiatry/Neurology
The American Board of Psychiatry and Neurology has established guidelines for combined training in psychiatry and neurology. A combined residency must include one postgraduate year (PGY1) of training that is acceptable to neurology plus a minimum of 5 years of combined residency training. The 5 years of residency training are usually taken at one approved institution but may be taken at no more than two approved institutions.

Data
Unless otherwise noted, all data are for 2010.

Table 1. Psychiatry/Neurology Programs
Number of accredited programs: 10

Program Data
Length of accredited training: 5/6
Minimum number of prior years of GME required: 0
Offers graduate year 1 positions, available immediately upon medical school completion Yes
Average number of interviews for program year 1 positions 3.8
Percent new program directors, 2009-2010 academic year (Source: ACGME)

Residents/Fellows
Total number of active residents/fellows 14
Average number of residents/fellows per program 1.4
Average percent female 14.3%
Average percent international medical graduate (IMG) 7.1%

Program Faculty
Average number of full-time physician faculty 107.2
Average number of part-time physician faculty 71.7
Average percent female full-time physician faculty 33.1%
Average ratio of full-time physician faculty to resident/fellow 42.0

Table 2. Data for Psychiatry/Neurology Programs Listed in FREIDA
Number of programs providing data 5

Work Schedule (Program Year 1)
Average hours on duty per week 57.4
Average maximum consecutive hours on duty 28.5
Average days off duty per week 1.5
Moonlighting allowed within institution 100.0%
Night float system 60.0%
Offers awareness and management of fatigue in residents/fellows 80.0%

Educational Setting (Program Year 1)
Average hours/week of regularly scheduled lectures/conferences 5.8
Average percent of training in hospital outpatient clinics 13.0%
Average percent of training in nonhospital ambulatory care community settings 0.0%

Educational Benefits
Program to assess/enhance medical professionalism 60.0%
Debt management/financial counseling 60.0%
Formal program to develop teaching skills 100.0%
Formal mentoring program 80.0%
Formal program to foster interdisciplinary teamwork 0.0%
Continuous quality improvement training 100.0%
International experience 20.0%
Resident/fellow retreats 100.0%
Off-campus electives 100.0%
Hospice/home care experience 20.0%
Cultural competence awareness 100.0%
Instruction in medical Spanish or other non-English language 40.0%
Alternative/complementary medicine curriculum 60.0%
Training in identifying and reporting of domestic violence/abuse 60.0%
MPH/MBA or PhD training 40.0%
Research rotation 0.0%

Educational Features
Offers additional training or educational experience beyond accredited length 18.2%
Offers a primary care track 0.0%
Offers a rural track 0.0%
Offers a women’s health track 0.0%
Offers a hospitalist track 0.0%
Offers a research track/nonaccredited fellowship 20.0%
Offers an other track 0.0%

Resident Evaluation
Yearly specialty in-service examination required 91.7%
Patient surveys 80.0%

Appendix B

Medical Specialty Board Certification Requirements

This section provides general information about the American Board of Medical Specialties (ABMS®), its member boards, board certification, and maintenance of certification, as well as a brief summary of board certification requirements for each member board. It was developed to address some of the most common issues in board certification, such as:

- The steps of the certification process
- The difference between certification and licensure
- Policy on maternity/paternity leave and vacations
- The impact of absences during residency/fellowship on board certification
- Required training/expertise beyond residency/fellowship training
- Availability of certification with added qualifications
- Frequency of board examinations
- Application deadlines for the certification process
- The impact of a history of substance abuse on board certification
- Testing accommodations for applicants with disabilities
- The cost of board certification process (application and examination fees)
- Other costs associated with certification and maintenance of certification
- What is the impact of choosing not to become board certified?
- Requirements for maintenance of certification?

Applicants for certification should contact the respective ABMS member board(s) to confirm the current, official policy and requirements. Inquiries should be directed to the particular member board executive offices listed in Table 1.

The American Board of Medical Specialties (ABMS) and Board Certification

American Board of Medical Specialties
222 North LaSalle Street, Suite 1500
Chicago, IL 60601
(312) 436-2600
(312) 436-2700
www.abms.org

Established in 1933, the American Board of Medical Specialties (ABMS) is an not-for profit organization of 24 medical specialty boards (member boards) and nine associate members with shared goals related to the education and board certification of medical specialists. ABMS does not itself certify physicians, but works in collaboration with the member boards to develop and implement professional standards, custom-tailored to each specialty, for Board Certification and the ABMS Maintenance of Certification® (ABMS MOC®) program.

The vast majority of medical specialties are represented by the 24 ABMS member boards. A few member boards also certify some non-physician specialists, such as in the areas of radiology and medical genetics. Today, the member boards issue more than 145 specialty and subspecialty certificates (see Table 2).

ABMS and the member boards are all independent organizations and establish their processes and standards free of any professional or governmental body. The primary function of each board is to evaluate candidates who voluntarily apply for certification in a specialty or related subspecialty area and to certify those qualified as a “diplomate” of their board. Once certified, the diplomates participate in an ongoing professional development program called the ABMS MOC program. The ABMS MOC program is an active career-long process that continually assesses physicians’ medical knowledge, judgment, professionalism, clinical techniques and communication skills. It is designed to ensure that Board-certified physicians remain highly qualified to provide the best possible care.

Through the LCSB, the following list of ABMS member boards has been approved by ABMS and the AMA Council on Medical Education (AMA CME) through the Liaison Committee for Specialty Boards (LCSB) to oversee the certification process for their particular specialty.

The American Board of:
- Allergy and Immunology
- Anesthesiology
- Colon and Rectal Surgery
- Dermatology
- Emergency Medicine
- Family Medicine
- Internal Medicine
- Medical Genetics
- Neurological Surgery
- Nuclear Medicine
- Obstetrics and Gynecology
- Ophthalmology
- Orthopaedic Surgery
- Otolaryngology
- Pathology
- Pediatrics
- Physical Medicine and Rehabilitation
- Plastic Surgery
- Preventive Medicine
- Psychiatry and Neurology
- Radiology
- Surgery
- Thoracic Surgery
- Urology

The nine associate members of ABMS are:
- Accreditation Council for Continuing Medical Education (ACCME)
- Accreditation Council for Graduate Medical Education (ACGME)
- American Hospital Association (AHA)
- American Medical Association (AMA)
- Association of American Medical Colleges (AAMC)
- Council of Medical Specialty Societies (CMSS)
- Educational Commission for Foreign Medical Graduates (ECFMG)
- Federation of State Medical Boards of the United States (FSMB)
- National Board of Medical Examiners (NBME)

The Difference Between Board Certification and State Licensure

While a medical license is legally required in order to treat patients, board certification implies a higher level of clinical expertise in a particular specialty and/or subspecialty of medical practice. Board certification lets the public know that a physician has demonstrated the medical knowledge, judgment, professionalism, and clinical and communications skills required to provide quality care. It is often needed for a physician to obtain hospital privileges and to contract with insurance companies. Many professional societies require board certification for membership.

Other key differences between state licensing and board certification include:

- State licensing is not specialty-specific; it sets only minimum competence requirements to diagnose and treat patients. Board certification represents a physician’s commitment to become more knowledgeable about a specific area of medicine.
- Physicians are licensed by the medical board of the state, territory, or Canadian province in which they practice medicine. They must have a license for each state in which they practice. Board certification is a nationwide credential supported by the ABMS member boards. Physicians can be certified by more than one member board and hold certifications in one or more subspecialties.
- To obtain a medical license, a physician must complete medical school and graduate medical education and pass an examination. Once licensed, a physician’s competence and professional conduct is monitored by the state medical board, which also typically requires participation in continuing medical education (CME). The CME credits can be earned in a number of ways, such as attending a lecture or reading or listening to CME-designated material and then taking a test.
- Board certification is awarded to the physician in an individual specialty or subspecialty; those who want to be board certified in multiple specialties must undergo the process for each of them. It is granted by independent boards—not government-regulated boards—and is not connected to the state or territory where the physician practices. Once certified, physicians participate in a program of continuous professional development linked to maintaining certification involving education, evaluation, and improvement activities that allow them to demonstrate their understanding of current treatments and technologies and their ability to apply these concepts to provide quality patient care in a particular specialty.

Licensure Requirements

In most cases, applicants for certification, as well as current diplomates participating in the ABMS MOC program, must hold a full, valid, current, and unrestricted license to practice medicine in the United States, its territories, or Canada. If licenses are held in more than one jurisdiction, all licenses held must meet this requirement. Applicants and diplomates are also required to inform their respective board of any and all restrictions placed on their licenses.

Note: This chart lists the current specialty and subspecialty certificates offered by ABMS Member Boards. For the most current list, visit the ABMS web site at www.abms.org.

CERTIFICATION BY AN ABMS MEMBER BOARD INDICATES THAT THE PHYSICIAN HAS:

1. Earned a medical degree (MD, DO, or other approved credential approved by the member board) which includes:
   - Graduation from a medical school in the United States accredited by the Liaison Committee for Medical Education (LCME), sponsored by the AMA and the Association of American Medical Colleges
   - Graduation from a medical school in Canada accredited by the Committee on Accreditation of Canadian Medical Schools (CACMS), with which the LCME collaborates
   - Graduation from an osteopathic school in the United States accredited by the American Osteopathic Association
   - Graduation from a foreign medical school plus a certificate from the Educational Commission for Foreign Medical Graduates (ECFMG)
2. Completed the required accredited education and training; the amount of graduate medical education and training required varies by ABMS member board (see Table 3); similarly, leave of absence policies, for parental or family leave or illness, vary from one board to the next (Table 4).
3. Provided letters of attestation from the program director and/or faculty stating whether an individual is qualified to pursue certification (if required by the board)
4. Fulfilled residency requirements
5. Been licensed to practice medicine in at least one US state, territory or Canada
6. Passed rigorous tests administered by an ABMS member board
7. Met other ABMS member board-specific qualifications

Many physicians have a general specialty certification as well as one or more subspecialty certifications. For instance, a physician might hold a general certification in psychiatry as well as two subspecialty certifications, in addiction psychiatry and child and adolescent psychiatry. In addition, a physician can be certified by more than one member board; for example, a doctor can be certified by the American Board of Pediatrics as well as the American Board of Allergy and Immunology.

Subspecialty certification is awarded by one or more member boards in a component of a specialty or subspecialty to which a practicing physician may devote a significant proportion of time.
Certification in a subspecialty requires specialized training during or after residency in addition to that required for general certification, as well as clinical practice in some cases.

Depending on the board, certification is valid for six to 10 years. In order to recertify, physicians participate in another process, ABMS Maintenance of Certification® (ABMS MOC), which is described below.

Maintaining Certification and the Commitment to Lifelong Learning

The ABMS Maintenance of Certification® (ABMS MOC®) program is the most recent advance in the board certification process. Like medicine and science, certification is evolving. Originally, the physician passed a rigorous one-time exam and was considered board certified for life. Beginning in the 1970s, individual ABMS Member Boards began implementing time-limited recertification; physicians had to pass the certification test every 6 to 10 years (depending on the board) to become recertified. In 2000, the ABMS member boards agreed to a standard process for recertification called the ABMS MOC program, a professional development program for specialists who are certified by one of the 24 ABMS member boards.

MOC involves a comprehensive evaluation and an ongoing process throughout a specialist’s career. Program standards are set by ABMS and independently implemented by the member boards. MOC promotes continuous lifelong learning and self-assessment to better meet patient, provider, and payer expectations for quality care. It aligns with the movement toward competency-based certification, the increasing evidence that competency degrades over time, the call for enhanced public accountability, and the potential linkages with periodic maintenance of licensure requirements.

MOC uses evidence-based guidelines, national clinical and quality standards, and best practices in combination with customized continuing education, self-assessment, patient assessment, and performance feedback to create a professional culture of lifelong learning. Through the MOC process, board-certified specialists continue to develop six core competencies adopted by ABMS and the Accreditation Council for Graduate Medical Education (ACGME) for quality patient care in a medical specialty:

- **Professionalism** – Physicians must demonstrate a commitment to carrying out professional responsibilities and an adherence to ethical principles.
- **Patient Care and Procedural Skills** – Physicians must demonstrate the ability to provide patient care, including the safe and effective use of procedures, which is compassionate, appropriate and effective for the treatment of health problems and the promotion of health.
- **Medical Knowledge** – Physicians must demonstrate knowledge of established and evolving biomedical, clinical, epidemiological and social-behavioral sciences, as well as the application of this knowledge to patient care.
- **Practice-based Learning and Improvement** – Physicians must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.
- **Interpersonal and Communication Skills** – Physicians must demonstrate interpersonal and communication skills that result in the effective exchange of information and collaboration with patients, their families and health professionals.
- **Systems-based Practice** – Doctors must demonstrate an awareness of and responsiveness to the larger context and system of health care, as well as the ability to call effectively on other resources in the system to provide optimal health care.

Specialists from each member board create and implement the particular MOC activities for their board while staying true to the overall standards agreed upon by all the member boards. The activities help doctors continue to progress in the core competencies through examination in broad developmental areas:

- **Professional Standing.** Physicians must hold and maintain a valid, unrestricted medical license to practice in at least one state or jurisdiction in the U.S., its territories in Canada
- **Lifelong Learning and Self-Assessment.** Physicians must regularly participate in educational and self-assessment programs that meet specialty-specific standards set by the member board.
- **Practice Performance Assessment.** Physicians must periodically evaluate their clinical practice to assess the quality of care they provide compared to that of their peers as well as national benchmarks, then apply best evidence or consensus recommendations to improve care.

For more information on the MOC process and requirements, refer to each board’s listing in the following pages.

Use of the Term “Board Eligible”

Because certification is a process of advancement through several individual steps, including examination, the completion of any one step, such as the minimal educational requirements, should not imply that a candidate is now possessed of some special qualification that is more or less equivalent to certification. For this reason, the majority of ABMS boards do not use or sanction the use of the terms “board eligible” or “board qualified.” The status of an applicant with a given board is determined by and varies with the current status of his/her credentials.

Exceptions: The American Board of Orthopaedic Surgery recognizes candidates who have successfully completed its Part I examination and are waiting to take Part II as being “board eligible.” The American Board of Physical Medicine and Rehabilitation (ABPMR), although it does not accept any use of “board eligible,” uses the term “board admissible” to define the status of an applicant who has been accepted by the ABPMR as a candidate to take the examination for which he or she has applied.

Providing Board Certification Information to the Public

Information about a physician’s certification status has always been available through the ABMS or an ABMS member board to assure the public of a physician’s qualifications. This was one of the original purposes for the organization and remains just as important today.

ABMS collects information from the member boards and certified physicians, maintains a centralized database, and circulates the information through its licensees for professional use. Plus, many consumers have checked their physician’s board certification through the ABMS web site or have called the ABMS toll-free number.

Board certification information provided by ABMS is relied upon by the majority of health care and credentials verification organizations for privileging and staffing purposes. Insurance companies, law firms, recruiters, and research organizations also reference these data for their purposes. In addition, the public refers to ABMS information to verify certification or locate a specialist in a particular field or geographic region.

Because this information is heavily relied upon, it is essential that data on certified physicians be kept accurate and current. With an increasing number of hospitals, surgicenters, managed care...
organizations, and insurance carriers requiring board certification, physician information that is inaccurate, dated, or unavailable could cause difficulties during the credentialing, licensure, or hospital privileging processes.

Applicants with a History of Chemical Dependency or Substance Abuse

(Note: The following is general information about board policies in this regard. Each board may have specific policies that differ from these general guidelines.)

The Americans with Disabilities Act (ADA) protects individuals with a history of chemical dependency or substance abuse who are not currently abusing alcohol or using drugs illegally. Candidates with a history of chemical dependency or abuse of a controlled substance will not be admitted to board examinations unless they present evidence satisfactory to the board that they have successfully completed the program of treatment prescribed for their condition, and the board is satisfied that they are currently free of such substance abuse or chemical dependency and do not currently pose a direct threat to the health and safety of others. A board may also require attestations from the responsible program administrators and physicians that the applicant has been free of chemical dependency for a period sufficient to establish that the applicant is not currently exhibiting chemical dependency and/or that substance abuse is not an ongoing problem.

Notes

Dermatology—A confirmatory letter from a licensed physician within 1 month of the examination stating that the disorder no longer exists or is currently controlled is also necessary.

Internal Medicine—Documentation of at least 1 year of continuous sobriety from a reliable monitoring source must be submitted to the board for admission to an examination or to receive a certificate.

Applicants with Disabilities

(Note: The following is general information about board policies in this regard. Each board may have specific policies that differ from these general guidelines.)

For candidates who are already in the examination process and develop a chemical dependency as reported to the board, the process will be suspended until the candidate can provide documentation suitable to the board that the condition has been under control for a period of 2 years. At that time, the candidate will be readmitted to the examination process. The requirement to be accepted for examination within 5 years of completion of an approved thoracic surgery residency will not be waived.

Applicants with Disabilities

The following is general information about board policies in this regard. Each board may have specific policies that differ from these general guidelines.

The ABMS member boards support the intent of the Americans with Disabilities Act (ADA). Accordingly, the boards will attempt to make reasonable accommodations for applicants with disabilities, and may provide or allow the use of necessary auxiliary aids, services, or testing conditions that do not fundamentally alter the measurement of the skills or knowledge the examination is intended to test. Candidates are required to notify the respective board of the need for special testing circumstances when applying for the certification.

Table 4. Residency/Fellowship Leave of Absence Policies of ABMS Certification Boards

<table>
<thead>
<tr>
<th>American Board of</th>
<th>Absences may not exceed</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Allergy and Immunology</td>
<td>2 months over the 24-month allergy/immunology program</td>
<td>Absences should be made up. Program directors who believe that an absence of more than 2 months is justified should send a letter of explanation to the ABAI for review and approval.</td>
</tr>
<tr>
<td>Anesthesiology</td>
<td>60 working days (12 weeks) during the Clinical Anesthesia (CA) 1-3 years of training</td>
<td>If a resident’s absence exceeds the prescribed limits, the total training time will be lengthened to make up for the additional absence. In the event of an absence of 6 months or longer, the board shall determine the number of months of training the resident will have to complete after resuming the residency program to satisfy the training required for admission to the ABAI examination system.</td>
</tr>
<tr>
<td>Colon and Rectal Surgery</td>
<td>–</td>
<td>–</td>
</tr>
<tr>
<td>Dermatology</td>
<td>6 weeks in any 1 academic year, or a total of 14 weeks over 3 years</td>
<td>Any absence(s) exceeding these limits, including vacation, should be approved only under truly exceptional circumstances. In addition, any resident approved to sit for the certifying examination despite such an absence should have completed each year of training in an above average or excellent manner as recorded on the residency evaluation forms.</td>
</tr>
<tr>
<td>Emergency Medicine</td>
<td>6 weeks in an academic year</td>
<td>Leaves of absence, vacation time, sick time, etc, that exceed 6 weeks in an academic year require extension of the residency program. Such leave time cannot be accrued from year to year. Therefore, the Board defines an acceptable year of training as a minimum of 46 weeks.</td>
</tr>
<tr>
<td>American Board of Medical Specialties</td>
<td>Absences may not exceed</td>
<td>Notes</td>
</tr>
<tr>
<td>--------------------------------------</td>
<td>-------------------------</td>
<td>-------</td>
</tr>
<tr>
<td>Family Medicine</td>
<td>1 month per academic year</td>
<td>Vacation periods may not accumulate from one year to another. Annual vacations must be taken in the year of the service for which the vacation is granted. No two vacation periods may be concurrent. Absence from residency education, in excess of 1 month within the academic year, must be made up before the resident advances to the next training level, and the time must be added to the projected date of completion of the required 36 months of training.</td>
</tr>
<tr>
<td>Internal Medicine</td>
<td>1 month per year</td>
<td>Up to 1 month per academic year is permitted for time away from training, which includes vacation, illness, parental or family leave, or pregnancy-related disabilities. Training must be extended to make up any absences exceeding 1 month per year of training. Vacation leave is essential and should not be forfeited or postponed in any year of training and cannot be used to reduce the total required training period. ABIM recognizes that leave policies vary from institution to institution and expects the program director to apply local requirements within these guidelines to ensure trainees have completed the requisite period of training. For deficits of less than one month in required training time, ABIM will defer to the judgment of the program director and promotions or competency committee in determining the need for additional training. With program director attestation to ABIM that the trainee has achieved required competence, additional training time will not be required. Trainees cannot make a request to ABIM on their own behalf.</td>
</tr>
<tr>
<td>Medical Genetics</td>
<td>1 month per year</td>
<td>Residents/fellows may take up to 1 month per year of training for vacation, parental or family leave, or illness. Training must be extended to make up any absences exceeding 1 month per year of training. Vacation leave is essential and cannot be forfeited.</td>
</tr>
<tr>
<td>Neurological Surgery</td>
<td></td>
<td>Leaves of Absence are left to the program director’s discretion and applicable state regulations, as long as ABNS training requirements for certification are met. Note: Enfolded fellowships outside of the residency program must receive prospectively written approval from the ABNS for elective credit to be accepted toward completion of ABNS training requirements.</td>
</tr>
<tr>
<td>Nuclear Medicine</td>
<td>6 weeks per year</td>
<td>A resident may have a total of 6 weeks per year leave of absence for any cause, including vacation and pregnancy. Any more time must be made up for the resident to be accepted to take the certifying examination.</td>
</tr>
<tr>
<td>Obstetrics and Gynecology</td>
<td>8 weeks in any of the first 3 years of GME, or 6 weeks during the fourth year of GME, or a total of 20 weeks over the 4 years of residency</td>
<td>If a resident’s absence exceeds the prescribed limits, the total training time will be lengthened to make up for the additional absence.</td>
</tr>
<tr>
<td>Ophthalmology</td>
<td></td>
<td>Left to the program director’s discretion and state regulations, as long as ABO training requirements for certification are met.</td>
</tr>
<tr>
<td>Orthopaedic Surgery</td>
<td>6 weeks per year</td>
<td>If a resident’s absence exceeds the 6-week per year limit, the program director must submit a plan to the ABO to for approval on how the training will be made up, which may require an extension of the residency. If a longer leave of absence is granted in any year, the required period of GME may be extended accordingly.</td>
</tr>
<tr>
<td>Otolaryngology</td>
<td>6 weeks per year</td>
<td>One year of approved training credit toward ABP certification must be 52 weeks in duration, and the resident must document an average of 48 weeks per year of full-time pathology training over the course of the training program. Any additional leave must be made up.</td>
</tr>
<tr>
<td>Pathology</td>
<td>4 weeks per year</td>
<td></td>
</tr>
</tbody>
</table>

Graduate Medical Education Directory 2011-2012 1097
<table>
<thead>
<tr>
<th>American Board of</th>
<th>Absences may not exceed</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pediatrics</td>
<td>1 month per year (3 months during 3 years of training)</td>
<td>Standard training for residency and fellowship is 36 months. For general pediatrics, 33 months of clinical training are required. Absences greater than 3 months during the 3 years of training should be made up by additional periods of training. A program director who believes that the candidate is well qualified and has met all the training requirements may submit a petition to the ABP requesting an exemption to the policy. For interruptions greater than 24 continuous months in general pediatrics or 12 months in a subspecialty, a petition by candidate or program director is required. Residents in combined training may not take more than 1 month of leave per year.</td>
</tr>
<tr>
<td>Physical Medicine and Rehabilitation</td>
<td>6 weeks (30 working days) per year</td>
<td>Leave time beyond 6 weeks would need to be made up by arrangement with the program director.</td>
</tr>
<tr>
<td>Plastic Surgery</td>
<td>4 weeks per year</td>
<td>The minimum acceptable residency year must include at least 48 weeks of full-time clinical training experience. A leave of absence during training will not be included toward completion of the 48-week requirement. This includes military leave and maternity/paternity leave.</td>
</tr>
<tr>
<td>Preventive Medicine</td>
<td></td>
<td>A training or experience year must consist of a minimum of 48 weeks of active service. In the event of maternity leave, an additional 2-week absence from a training year is permissible. Longer authorized interruptions in training periods, with documentation of conformance with approved policies on parental leave, are accepted as determined on an individual case basis provided the combined time to be credited includes at least 48 weeks of on-duty training within an overall period of 2 years.</td>
</tr>
<tr>
<td>Psychiatry and Neurology</td>
<td></td>
<td>Training may be completed on a part-time basis, provided that it is no less than half time. Programs may schedule individual leave or vacation time for residents in accordance with the overall institutional policy. Leave or vacation time may not be used to reduce the total amount of required residency training or to make up deficiencies in training. The 36 months of full-time, specialized residency training must be completed in no more than two blocks. If completed in two blocks, the blocks must not be more than 10 years apart.</td>
</tr>
<tr>
<td>Radiology</td>
<td>Diagnostic radiology and radiation oncology: 6 calendar weeks (30 working days) per year</td>
<td>If a longer leave of absence is granted, the required period of graduate medical education must be extended accordingly. The ABR leave policy is based on educational needs and is not affected by other institutional, state, or federal policies.</td>
</tr>
<tr>
<td>Surgery</td>
<td>6 weeks for documented medical problems or maternity leave (see Notes)</td>
<td>For documented medical problems or maternity leave, the ABS will accept 46 weeks of surgical training in 1 of the first 3 years of residency and 46 weeks of training in 1 of the last 2 years, for a total of 142 weeks in the first 3 years and 94 weeks in the last 2 years. Unused vacation or leave time may be applied only with written permission from the ABS. Programs also have the option, with advance approval of the ABS, of allowing residents to complete their five years of training over six years. All training must be full-time and completed at a single program, with no block of training shorter than one month.</td>
</tr>
<tr>
<td>Thoracic Surgery</td>
<td></td>
<td>Left to the program director’s and the medical institution’s discretion and state regulations, as long as ABTS training requirements for certification are met.</td>
</tr>
<tr>
<td>Urology</td>
<td>6 weeks per year</td>
<td>Each program may provide sick leave and vacation leave for the resident in accordance with institutional policy. Residents must work a minimum of 46 weeks each year of residency; that is, one year of credit must include at least 46 weeks of full-time urologic education. Vacation or leave time may not be accumulated to reduce the total training requirement. If a circumstance occurs in which a resident does not work the required 46 weeks minimum in one year, the program director must submit a plan to the ABU for approval on how the training will be made up, which may require an extension of the residency.</td>
</tr>

* Exceptions: Advanced Heart Failure and Transplant Cardiology, Transplant Hepatology, Interventional Cardiology, and Clinical Cardiac Electrophysiology, which are $2,650, and Cardiovascular Disease, which is $2,195.
† For physicians who have held or currently hold a subspecialty certification. Focused Practice in Hospital Medicine MOC fee is $1,850.
examination. This deadline allows the board to request the necessary documentation, review the records, and verify the disability, if necessary. All special arrangements must be made and agreed upon in advance; special arrangements cannot be made at the time the examination is given. Therefore, early notification of the need for special testing circumstances is encouraged.

If necessary, some boards may undertake an independent assessment, at the expense of the board. Documentation and other evidence substantiating the disability may include:

- A report diagnosing the applicant’s disability written by a professional appropriately qualified to evaluate the disability
- A history of the disability, including previous settings in which accommodations have been granted
- Diagnostic information about the specified disability using standard nomenclature from sources such as the International Classification of Diseases (ICD) and the Diagnostic and Statistical Manual of Mental Disorders
- Specific recommended accommodations with a rationale for why each accommodation is needed.

Cheating and Irregular or Unethical Behavior on Examinations

(Note: The following is general information about board policies in this regard. Each board may have specific policies that differ from these general guidelines.)

Cheating and irregular or unethical behavior by a candidate before, during, or after a written or oral examination may include:

- Giving or obtaining information or aid
- Looking at others’ test material
- Removing examination materials from the test center and/or reproducing these materials or distributing them to others
- Reconstructing examination questions and answers and transferring this information to others after the examination
- Taking notes
- Bringing electronic devices (beepers, pagers, cell phones, etc) into the examination
- Failing to comply with time limits or instructions
- Talking or other disruptive behavior
- Making telephone calls
- Offering any benefit to an agent of the board in return for any right, privilege, or benefit that is not usually granted by the board to other similarly situated candidates or persons

Any irregular or improper behavior that is observed, made apparent by statistical analysis, or uncovered by other means will be considered a subversion of the certification process and may be sufficient to bar a person from qualification, terminate participation in an examination, invalidate the results of a candidate’s examination, cause the withholding or revocation of scores or certificates, or merit other appropriate actions, up to and including legal prosecution. In addition, the candidate may be barred from retaking the examination in the future for a period determined by the board (the orthopaedic surgery board, for example, requires a 3-year hiatus, the psychiatry/neurology board up to 5 years), and the board may inform program director(s), licensing bodies, state and national medical associations and specialty societies, impaired physicians advocacy groups, or law enforcement agencies of these actions.

The materials comprising all board examinations are confidential and are the sole property of the respective board. Any unauthorized reproduction, distribution, or use of any of these materials is prohibited. Boards will prosecute copyright violations to the full extent provided by law and seek monetary damages for any loss of examination materials.

</table>
| Professional Standing                                | Maintain an unrestricted medical license  
Maintain current and accurate demographic and contact information  
Remit annual MOC fee                                     |
| Lifelong Learning and Self-Assessment                | Submit proof of 25 allergy/immunology CME credits from accredited organizations each year (averaged over two years)  
Complete the Recent Advances module (sponsored by ABAI) every five years.  
Complete a Communication module (sponsored by ABIM) every ten years.  
Complete a Patient Safety module (sponsored by ABMS) every ten years. |
| Cognitive Expertise                                  | MOC candidates must attain an absolute minimum score on the Final Examination. The exam, administered annually via computer at test centers across the nation, focuses on clinical science items that can be answered correctly based on clinical experience, without reference to textbooks or journals. |
| Practice Performance Assessment                      | Complete a practice improvement module every five years; accepted modules are listed on the ABAI web site. |

Maintenance of Certification

CME requirement
350 CME credits: At least 250 credits must be ACCME-approved Category 1 credits; the ABA will grant at most 70 credits for CME programs and activities completed in the same calendar year.

All newly certified diplomates and non-time limited diplomates who enter the MOCA program after January 1, 2008, are required to complete 80 Category 1 credits of either the American Society of Anesthesiologists’ (ASA) Self-Education and Evaluation (SEE) program and/or the ASA’s Anesthesiology Continuing Education (ACE) program during their 10-year MOCA cycle.

All newly certified diplomates and non-time limited diplomates who enter the MOCA program after January 1, 2008, are required to complete 20 Category 1 credits of Patient Safety CME during their 10-year MOCA cycle.

Lifelong learning and self-assessment (LLSA) requirements
The ABA will grant at most 70 LLSA credits for all CME activities completed in a single calendar year. Thus, MOCA candidates will have to complete some LLSA activity in at least five years of each 10-year MOCA cycle.

Cognitive expertise/examination requirements
Candidates may satisfy the examination requirement no earlier than the 7th year of their 10-year MOC cycle. To be eligible for examination, completion of at least 200 LLSA credits and one of the two required Practice Performance Assessments and Improvement Activities is required.

Practice performance assessment
Diplomates should be continually engaged in a self-directed program of practice performance assessment and improvement (PPAI). For diplomates certified in 2010 or later, the PPAI process consists of one case evaluation and one simulation education course.

Diplomates must complete the two PPAI activities over their 10-year MOCA cycle. Diplomates must complete at least one of the two activities in each of the following segments of their MOCA cycle: Years 1-5 and 6-10. Each activity must be completed at least once in the diplomate’s 10-year cycle.

Notes
MOC program began in 2004; recertification program ended in 2009.

Taylor, MI 48180
(734) 282-9400
(734) 282-9402 Fax
E-mail: admin@abcrs.org
www.abcrs.org

Application for Examination
Each candidate for examination must complete and submit an Application for Examination, which may be accessed on the ABCRS Web site at www.abcrs.org.

As part of the application process, residents must submit a list of all operative procedures performed during their training period. Case log reporting is completed using the electronic software provided by the Accreditation Council for Graduate Medical Education (ACGME). Login instructions and deadline dates are accessible through the ACGME web site at www.acgme.org. The American Board of Colon and Rectal Surgery will obtain the information directly from the ACGME.

Examination Schedule
Applications for the 2012 certification process must be completed and returned at the conclusion of training according to the schedule below:

Maintenance of Certification

<table>
<thead>
<tr>
<th>CME requirement</th>
<th>Lifelong learning and self-assessment</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>The Lifelong Learning and Self-Assessment (LLSA) component includes an annual set of readings to guide participants in self study of recent emergency medicine literature. Each year, ABEM will offer an open-book, unproctored LLSA test to help reinforce what physicians learn from the readings. LLSA tests prior to 2009 consist of 32 to 40 test questions based on the annual readings. Beginning in 2009, LLSA tests consist of 20 to 30 questions.</td>
</tr>
</tbody>
</table>

| Cognitive expertise | The Continuous Certification (ConCert) examination, a secure examination administered at testing centers in the United States and Canada, takes approximately 5 1/2 hours to complete and focuses on what the practicing emergency physician needs to know when treating patients. |

| Practice performance assessment | Diplomates who are clinically active will be required to attest to ABEM twice during a 10-year certification period that they have participated in an acceptable patient care practice improvement (PI) program at a national, regional, or local level and at least once that they have participated in a communication/professionalism (CP) feedback program. Diplomates will be required to attest that their own clinical practice data and patient feedback data are included in their APP activities. Data reported back at either an individual or a group level will be appropriate. |

| Notes | MOC program began in 2004. |

Maintenance of Certification

<table>
<thead>
<tr>
<th>CME requirement</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lifelong learning and self-assessment</td>
<td>Diplomates must earn at least 20 of the required 100 self-assessment points for Maintenance of Certification in the Self-Evaluation of Medical Knowledge category by completing ABIM medical knowledge modules. These open-book modules test clinical and practical knowledge in a particular field.</td>
</tr>
<tr>
<td>Practice performance assessment</td>
<td>Diplomates must earn at least 20 of the required 100 self-assessment points for Maintenance of Certification in the Self-Evaluation of Practice Performance category. ABIM offers a Web-based tool to fulfill this requirement—the ABIM PIM Practice Improvement Module—which enables physicians to conduct a confidential self-evaluation of the medical care that they provide. PIMs help physicians gain knowledge about their practices through analysis of practice data and the development and implementation of a plan to target areas for improvement.</td>
</tr>
</tbody>
</table>

Notes
ABIM's current MOC program began in 2006.
All ABIM certificates issued in 1990 (1987 for critical care medicine and 1988 for geriatric medicine) and thereafter are valid for 10 years.

Note: Applicants will be notified of the receipt of an application via e-mail.

Maintenance of Certification

| CME requirement | 250 Category 1 CME credits over the 10-year period; at least 50% of the credits must be in genetics. Credits will be audited in years 4-5 and 8-9. |
| Lifelong learning and self-assessment | Web-based, open-book, and non-proctored literature modules will be more concise versions of the current literature review. A pre-reading and post-reading test are required to help diplomates assess their acquisition of knowledge. Only the post-reading test will count, and can be taken as often as necessary to pass. A message rather than a score is recorded when diplomates pass the post-reading test. Participation in three of five offered modules must take place during the 10-year cycle. Each module will be accessible for only a 3-year period of time. |
| Cognitive expertise | The specialty-only certification-type examination will be computerized and proctored at a testing center; it must be passed only once during years 8 to 10 of the 10-year cycle. The examination may be taken again, if necessary, to achieve a passing score. The examination will be available once a year. |
| Practice performance assessment | Practice improvement activities will assist diplomates in evaluating their practice, identifying areas that may need improvement, and documenting any improvements. Activities are not graded, but participation in three activities during the 10-year cycle is mandatory. |

</tr>
</tbody>
</table>

Maintenance of Certification

| CME requirement | 150 CME credits every 3 years, including a minimum of 60 verified Category 1 credits. The remaining 90 may be additional Category 1 or other non-verified, self-reported credits. |
| Lifelong learning and self-assessment | Every 3 years: Web-based educational Self-Assessment in Neurological Surgery (SANS) examination developed and administered by the Congress of Neurological Surgeons. |
| Cognitive expertise | Secure, proctored, web-based examination given each March at neurosurgical residency programs: 200 clinically oriented questions; 150 items are General Neurosurgery and the remaining 50 are chosen from one of three modules: (1) More general neurosurgery, (2) Complex spine surgery, (3) Pediatric neurosurgery. Taken once each 10 years. SANS (see above) |
| Practice performance assessment | • Log data on 10 consecutive, recent patients into a Key Case module. |
| Professionalism | • Chief of Staff Questionnaire covering professionalism, communication skills, and participation in systems-based practice. |
| | • Unrestricted license |
| | • Hospital privileges unrestricted for neurosurgery |

## American Board of Pathology

**PO Box 25915**  
Tampa, FL 33622-5015  
(813) 286-2444  
(813) 289-5279 Fax  
www.abpath.org

### Examination Dates

All examinations are computer based and are administered at the ABP Examination Center in Tampa, Florida.

**Anatomic Pathology and Clinical Pathology Examinations**

The Spring 2011 primary examinations will begin on Monday, May 16 and will continue until all qualified, registered candidates have been examined. Individuals applying for the Spring primary certification examinations must complete their training by July 1 of the year of application.

The Fall 2011 primary examinations will begin on Monday, October 10, and will continue until all qualified, registered candidates have been examined. Individuals applying for the Fall primary certification examinations must complete their training by November 1 of the year of application.

**Subspecialty Examinations**

Beginning in 2011, all subspecialty exams will be given every year. Individuals applying for subspecialty examinations must complete their training by October 1 of the year of application.

### Examination Dates

<table>
<thead>
<tr>
<th>Examination Type</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Blood Banking/Transfusion Medicine</td>
<td>September 14</td>
</tr>
<tr>
<td>Chemical Pathology</td>
<td>September 14</td>
</tr>
<tr>
<td>Cytopathology</td>
<td>September 19-21</td>
</tr>
<tr>
<td>Dermatopathology</td>
<td>September 12-13</td>
</tr>
<tr>
<td>Forensic Pathology</td>
<td>September 1</td>
</tr>
<tr>
<td>Hematology</td>
<td>September 26-28</td>
</tr>
<tr>

</tr>
<tr>
<td>Molecular Genetic Pathology</td>
<td>September 8</td>
</tr>
<tr>
<td>Neuropathology</td>
<td>September 7</td>
</tr>
<tr>
<td>Pediatric Pathology</td>
<td>September 7</td>
</tr>
</tbody>
</table>

Depending on the number of candidates, it may be necessary to give certain subspecialty examinations on multiple days. In that case, each candidate will be notified of his or her examination date at least 6 weeks prior to the examination date listed.

### Final Filing and Cutoff Dates

The final filing dates for receipt of applications or registrations are as follows:

<table>
<thead>
<tr>
<th>Date</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>January 15</td>
<td>Spring primary examinations</td>
</tr>
<tr>
<td>May 1</td>
<td>Fall primary examinations for initial applicants</td>
</tr>
<tr>
<td>August 15</td>
<td>Fall primary examinations for those who have been declared qualified by ABP</td>
</tr>
<tr>
<td>May 1</td>
<td>Subspecialty examinations</td>
</tr>
</tbody>
</table>

If the candidate cancels an appearance for the examination after these dates or does not appear for the examination, the entire application-examination fee is forfeited with the following exceptions:
1. Personal illness at the time of the examinations, validated by the candidate's personal physician. In this case, consideration will be given to transferring a major portion of the examination fee to the following examination.

2. Inability to accept the date assignment (primary certification applicants only). Once examination date assignments are mailed, candidates for the primary certification examination have 4 weeks from notification of their assignment to accept. These candidates may request a transfer to a future examination, in which case the examination fee, minus a $500 transfer fee, will be applied to that examination. There will be an additional $500 fee assessed for any additional transfer of examination dates. There is no opportunity to change the assignment within a given examination period. If the ABP is not notified within the 4-week period, the assignment will stand.

Note: The ABP has instituted a late registration period for AP/CP and subspecialty exams that will extend from January 15 – February 15 for the spring examination and from May 1 – June 1 for the fall and subspecialty examinations. No late registration period is available for the August 15 deadline.

It is the candidate's responsibility to notify the ABP in writing of any change that may affect a scheduled examination.

Maintenance of Certification

<table>
<thead>
<tr>
<th>CME requirement</th>
<th>Seventy Category 1 CME credits for each two-year period in the MOC cycle; at least 10 of these credits must be obtained from completion of self-assessment modules (SAMs), and 80% of the CME must be directly related to the diplomate's practice. The remainder may be in relevant areas, such as administration or ethics.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lifelong learning and self-assessment</td>
<td>—</td>
</tr>
<tr>
<td>Cognitive expertise</td>
<td>The examination will be a closed-book assessment based on knowledge that a competent practitioner would be expected to possess without access to reference material. Initially, the examination will be given in the ABP Examination Center in Tampa; if future technology permits assurance of examination security, the ABP anticipates administering its computer-based examinations in regional computer testing centers.</td>
</tr>
<tr>
<td>Practice performance assessment</td>
<td>At the beginning of the fourth and eighth years of each certification period, diplomates must supply four references who can attest to their ability and effectiveness in practice. In addition, each pathologist must document (1) the participation of his/her laboratory in inter-laboratory performance improvement and assessment activities and (2) individual participation in at least one practice improvement and quality assurance activity or program per year. Documentation of both laboratory and individual participation in practice improvement and quality assurance activities must be provided at the end of each 2-year period of the MOC cycle.</td>
</tr>
<tr>
<td>Notes</td>
<td>Participation in an ACGME-accredited fellowship during 1 full year of any 2-year period will cover all MOC Part II and Part IV requirements for that period.</td>
</tr>
</tbody>
</table>

American Board of Pediatrics

111 Silver Cedar Court

(919) 929-9255 Fax
E-mail: abpedse@abpeds.org
www.abp.org

2011 Examinations Schedule

The fees for certification in general pediatrics and the pediatric subspecialties are payable only in US dollars. Application payment for both first-time applicants and re-registrants is required using a credit card. The American Board of Pediatrics (ABP) reserves the right to make changes in its fees, policies, and procedures at any time and will make every effort to give advance notice when such changes are made. It is the applicant's responsibility to be aware of and to meet all deadlines. All applications must be submitted online.

Certification in the Pediatric Subspecialties

The ABP issues a certificate of special qualifications in the following subspecialties:
- Adolescent medicine
- Child abuse pediatrics
- Pediatric cardiology
- Pediatric critical care medicine
- Developmental-behavioral pediatrics
- Pediatric emergency medicine
- Pediatric endocrinology
- Pediatric gastroenterology
- Pediatric hematology-oncology
- Pediatric infectious diseases
- Neonatal-perinatal medicine
- Pediatric nephrology
- Pediatric pulmonology
- Pediatric rheumatology

The ABP, in collaboration with other ABMS boards, also offers a certificate of added qualifications in the following fields: (Note: Physicians must submit an application to the board through which they are certified.)
- Hospice and palliative medicine
- Medical toxicology
- Neurodevelopmental disabilities (re-registrants only)
- Pediatric transplant hepatology
- Sleep medicine
- Sports medicine
### Examinations/Registration Dates: 2011 - Spring 2012

#### General Pediatrics In-training Examination
Tuesday, July 12, 2011 (credit card payments are not accepted)

- **General Pediatrics**
  - Monday, October 10, 2011

#### December 2, 2010 – February 24, 2011
- New applicants’ regular registration: $2,105

#### February 25 – May 5, 2011
- New applicants’ late registration: $2,430

#### February 15 – May 5, 2011
- Reregistrants’ regular registration: $2,105

#### May 6 – May 26, 2011
- E-registrants’ late registration: $2,430

#### Subspecialty In-training Examination
March 21-26, 2011
- Subspecialty In-training Examination: $145 per fellow

#### Developmental-Behavioral Pediatrics, Pediatric Emergency Medicine, Pediatric Hematology-Oncology, Pediatric Rheumatology
Monday, March 28, 2011

- **Sports Medicine**
  - July 9, July 11-15, July 18-22, 2011

- **Neurodevelopmental-Disabilities (re-registrants only)**
  - August 15-19, 2011

- **Sleep Medicine**
  - Thursday, November 10, 2011

- **Child Abuse Pediatrics**
  - Monday, November 14, 2011

- **PEDIATRIC INFECTIOUS DISEASES**
  - Wednesday, November 16, 2011

- **PEDIATRIC ENDOCRINOLOGY**
  - Thursday, November 17, 2011

#### Maintenance of Certification

- **CME requirement**
- **Lifelong learning and self-assessment** Those with General Pediatric certifications carrying an expiration date are required to complete one self-assessment activity prior to the certificate expiration date. Subspecialty certifications carrying an expiration date are required to complete one self-assessment activity prior to the certificate expiration date. Those with ABP certifications issued after 1/1/2010 are required to earn 40 Part 2 Self-assessment points (and 20 Part 2 Self-assessment or Part 4 Practice Performance elective points) in every five-year cycle.

- **Cognitive expertise** Part 3 of MOC consists of a secure examination administered at testing centers throughout the US and elsewhere. Approximately 200 questions are included in this half-day, closed-book examination. Successful completion of this examination is required every 10 years.

- **Practice performance assessment** Those with ABP certifications carrying an expiration date are required to complete one Practice Performance activity prior to certificate expiration. Those with ABP certifications issued after 1/1/2010 are required to complete one Patient Survey activity and earn 40 Part 4 Practice Performance points (and 20 Part 2 Self-assessment or Part 4 Practice Performance elective points) in every five-year cycle.

- **Notes** Diplomates are not required to maintain their general pediatric certificates to maintain certification in a subspecialty.
American Board of Physical Medicine and Rehabilitation

3015 Allegro Park Lane SW
Rochester, MN 55902-4139
(507) 282-1776
(507) 282-9242 Fax
E-mail: office@abpmr.org
www.abpmr.org

Deadlines
The appropriate fees must be postmarked and mailed and the completed application materials for admissibility must be submitted online by January 31 (Part I) or November 15 (Part II) preceding the scheduled examination. This applies to initial applications or reapplications.

An additional $500 nonrefundable late fee will be required for consideration of applications postmarked between February 1 and February 28 (Part I) or November 16 and December 15 (Part II). Applications submitted after February 28 (Part I) or December 16 (Part II) will not be accepted. The postmark applied by the United States Postal Service (or the appropriate national postal service for non-US citizens) is the date of mailing and takes precedence over postmarks applied by in-house mailing equipment.

Fees
Refer to the Booklet of Information at the ABPMR web site for the current fees.

Part I
$1,395, $600 of which is an application processing fee and is not refundable.

Part II
$1,910, $600 of which is an application processing fee and is not refundable.

Late Fee
An additional nonrefundable $500 is required after the January 31 deadline for Part I and after the November 15 deadline for Part II.

Reapplication
Physicians who have initially applied for and failed or did not take either Part I or Part II can apply for admissibility for re-examination or examination during any subsequent examination period. The same requirements will be in effect for reapplication as for initial admissibility. Currently, there is no limit to the number of times a physician may reapply for examinations.

Refunds and Forfeiture of Fees
Except as hereafter provided, no fees paid will be refunded. The board will return the refundable portion of the fee only in the event that
• an applicant withdraws the application prior to the meeting of the board to act thereon, or
• an applicant is declared not admissible to the examination.

Once an applicant has been declared admissible and is a candidate, the fees will be forfeited if the candidate withdraws for any reason, or does not appear for the scheduled examination for which he or she applied.

Dual Specialty Certification
Residents may elect to pursue integrated training in physical medicine and rehabilitation (PM&R) and another specialty by enrolling in a combined training program. The ABPMR currently approves two types of combined training:
• Pediatrics and PM&R
• Internal medicine and PM&R

Both programs require completion of at least 36 months of accredited training in general comprehensive PM&R.

Subspecialty Certification

Hospice and Palliative Medicine
Applications are available on the ABPMR web site after December 1, and completed applications are due by February 15, of the year the examination will be given.

Neuromuscular Medicine
Applications are available on the ABPMR web site after December 1, and completed applications are due by February 15, of the year the examination will be given.

Pain Medicine
Applications are available on the ABPMR web site after January 1, and completed applications are due by February 15, of the year the examination will be given.

Pediatric Rehabilitation Medicine
Applications are available on the ABPMR web site after February 1, and completed applications are due by March 15, of the year in which the exam will be taken.

Spinal Cord Injury (SCI) Medicine
Applications are available on the ABPMR web site after February 1, and completed applications are due by March 15, of the year the examination will be given.

Sports Medicine
Applications are available on the ABPMR web site after December 1, and completed applications are due by February 15, of the year the examination will be given.

</tbody>
</table>

All fees must be submitted in United States currency by check or money order. Foreign currencies, including Canadian, are unacceptable. Credit Cards are required for all online processes. Fees are subject to change by the board. Most fees are nonrefundable.

Diplomate Annual Dues (Lifetime Certificate Holders): $200

An annual dues fee was initiated in 1999. The board office sends out announcements annually. Retired diplomates are excluded from the annual dues request.

Refunds

For the written examination, a refund of the examination fee (less a processing charge of $725) will be granted provided the candidate submits a written request for withdrawal received in the board office at least 30 calendar days prior to the date of the examination.

For the oral examination, a refund of the examination fee (less a processing charge of $725) will be granted provided the candidate submits a written request for withdrawal received in the board office at least 30 calendar days prior to the date of the examination.

For either the written or oral examination, candidates who notify the board office in writing less than 30 calendar days prior to the examination date of their intent to withdraw, or who fail to appear for examination, will forfeit the entire examination fee. The board may waive this rule only if the circumstances warrant.

Fees

A nonrefundable application fee of $410 is required if the applicant holds an MPH or equivalent masters or doctoral post-graduate degree and has completed an ACGME-accredited residency in the specialty area of preventive medicine in which certification is sought.

A nonrefundable application fee of $505 is required if the applicant is applying through the alternative pathway to certification.

A nonrefundable application fee of $890 is required if the applicant is applying through the special pathway for ABPM diplomates.

A late fee will be charged to all applications received after June 1. A list of late fee charges is available on the ABPM Web site at www.theabpm.org.

A nonrefundable re-review fee of $190 is required to reactivate an application within 2 years of the original review.

The examination fee of $1,950 is due with the application fee.

Fees for the Subspecialty of Medical Toxicology

The next offering of Medical Toxicology will be in 2012. Fees are to be determined.

Fees for the Subspecialty of Undersea and Hyperbaric Medicine

A nonrefundable fellowship pathway application fee of $385 is required.

The examination fee of $1,750 is due with the application fee.

Note: All fees are reviewed annually and are subject to change at the direction of the board. Please contact the board office for the current fee schedule.

</tbody>
</table>
Special Requirements in Aerospace Medicine, Occupational Medicine, and Public Health and General Preventive Medicine

A period of not less than 2 years of supervised training and instruction, accredited by the ACGME in the specialty area for which certification is being sought, is required.

Subspecialties

Medical Toxicology

Every 2 years, the ABPM offers subspecialty certification in medical toxicology to ABPM diplomates who meet the appropriate requirements for medical toxicology. Applications for the 2012 examination cycle will be available from the board office beginning in January 2012 and will be accepted with postmark dates through May 1.

Undersea and Hyperbaric Medicine

ABPM offers subspecialty certification in undersea and hyperbaric medicine in late fall each year to physicians who hold current certification by one of the ABMS member boards and meet the appropriate requirements in undersea and hyperbaric medicine. The American Board of Emergency Medicine (ABEM) also offers subspecialty certification in undersea and hyperbaric medicine. Those physicians certified only by the ABEM must apply through that board.

2011 and 2012 Examination Schedule and Fees

Visit www.abpn.com for the most current information on examination schedules, fees, and Information for Applicants publications, including specific training requirements, applications for examinations, and examinations’ content outlines. Most documents are available as .pdf files that can be downloaded and printed.

Maintenance of Certification

CME requirement

Completion of an average of 30 specialty or subspecialty Category 1 CME credits per year over the 10-year MOC cycle. Each credit must be relevant to the specialty in which the diplomate is certified. Diplomates certified in more than one area need only accrue an average of 30 CME credits per year, as the same CME credits can be used to satisfy the MOC requirements for multiple specialties and subspecialties. Completion of 180 specialty- or subspecialty-specific Category 1 CME credits in each of the two 5-year blocks of the 10-year MOC cycle, for a total of 300 CME credits. An average of at least 8 of the CME credits per year (average over 2-5 years) should involve self-assessment.

Lifelong learning and self-assessment

Participation in at least two major, broad-based self-assessment programs during the 10-year MOC cycle, to be completed in years 1-3 of the first 5-year block of the cycle and years 6-8 of the second 5-year block. The self-assessment activities must cover new knowledge and/or current best practices in one or more of the competency areas and provide feedback to the diplomate that can be used as the basis for focused CME, lifelong learning, and/or career development. That feedback must include the correct answer and recommended literature resources for each question and comparative performance to peers.

Cognitive expertise

Multiple-choice, computer-based examinations administered at testing centers nationwide. MOC cognitive examinations differ from the initial certification examinations in that they are practice-relevant and focus on the clinical applications of knowledge. To prepare for the examinations, a diplomate should keep current with research and developments in the respective field, read specialty-specific journals and practice guidelines, and attend relevant CME programs.

Practice performance assessment

The Performance in Practice (PIP) component is a quality improvement program designed to evaluate whether physicians have shown practice improvement over the 10-year MOC cycle by chart review and second-party external review. Diplomates will be required to complete three PIP Units consisting of both modules in years 1-3, 4-6, and 7-9 of the 10-year cycle.
Diplomates with certificates in addiction psychiatry, clinical neurophysiology, epilepsy (2011), forensic psychiatry, geriatric psychiatry, hospice and palliative medicine, neuromuscular medicine, pain medicine, psychosomatic medicine, sleep medicine, or vascular neurology must also maintain certification in their specialty to apply for MOC in the area of subspecialization. Diplomates in neurodevelopmental disabilities must maintain certification in neurology with special qualification in child neurology. If certification in the specialty lapses, certification in the subspecialty is no longer valid. Diplomates in child and adolescent psychiatry do not need to maintain current certification in general psychiatry for their subspecialty certification to remain valid and to maintain certification in child and adolescent psychiatry.

American Board of Radiology
5441 E Williams Circle, Suite 200
Tucson, AZ 85711
(520) 790-2900
(520) 790-3200 Fax
E-mail: information@theabr.org
Note: Refer to the American Board of Radiology web site (www.theabr.org) for more details or changes.

Registration Form Deadlines and Exam Information

Key Dates for Initial Certification: Radiation Oncology (RO), Medical Physics (MP), and Diagnostic Radiology (DR)

Oral Examinations, Louisville, KY | May 22-25, 2011
---|---
Submission of Registration Forms (to be eligible for Initial Qualification Exam for the following year) | July 1 – September 30, 2011
Initial Qualification Exams administered at Pearson VUE testing centers | July 7-8, 2011 (Radiation Oncology)
| August 29-30, 2011 (Medical Physics)
| September 8-9, 2011 (Diagnostic Radiology)

Key Dates for Initial Certification: Diagnostic Radiology Subspecialties

Oral Examinations for neuroradiology, nuclear radiology, and vascular and interventional radiology, Louisville, KY | November 6-7, 2011
Pediatric radiology computer-based exam | December 1, 2011 (RSNA)
Submission of Registration Forms | February 1 - April 30, 2011

Note: Subspecialties include hospice and palliative medicine, neuroradiology, nuclear radiology, pediatric radiology, and vascular and interventional radiology. The exam for hospice and palliative medicine is administered every other year. The next exam will be given in October 2012 (exact date TBA). Registration is March 1 – May 1, 2012.
## Maintenance of Certification

<table>
<thead>
<tr>
<th>Professional Standing</th>
<th>Maintain active, current, valid, and unrestricted licenses relevant to all locations of practice</th>
</tr>
</thead>
<tbody>
<tr>
<td>CME requirement</td>
<td>A minimum of 250 ACCME-accredited Category 1 CME credits over the 10-year cycle</td>
</tr>
<tr>
<td>Lifelong learning and self-assessment</td>
<td>Self-assessment modules (SAMs) are educational venues (e.g., refresher courses, workshops, reading assignments, online offerings), usually offered by the societies that have been ABR-qualified. All SAMs are also qualified as Category 1 CME and can serve to fill that requirement as well.</td>
</tr>
<tr>
<td>Cognitive expertise</td>
<td>Completion of a computer-based examination within the last 3 years of the 10-year MOC cycle</td>
</tr>
<tr>
<td>Practice performance assessment</td>
<td>All diplomates must participate in Practice Quality Improvement (PQI) initiatives on an ongoing basis. PQI initiatives should (1) be relevant to your practice; (2) be achievable in your practice setting; (3) produce results that are suited to repeat measurement during your MOC cycle; and (4) be reasonably expected to bring about quality improvement.</td>
</tr>
<tr>
<td>Notes</td>
<td>The ABR certifies diplomates in diagnostic radiology, radiation oncology, and medical physics. Despite having a common structure, requirements vary for the three disciplines. For more information, see <a href="http://www.theabr.org">www.theabr.org</a>.</td>

### American Board of Surgery

1617 John F Kennedy Boulevard, Suite 860  
Philadelphia, PA 19103-1847  
(215) 568-4000  
(215) 563-5718 Fax  
www.absurgery.org

Certification is offered in:  
- Surgery (general surgery)  
- Vascular surgery  
- Hospice and palliative medicine  
- Pediatric surgery  
- Surgical critical care  
- Surgery of the hand

#### 2011 General Surgery Qualifying Examination

- May 2, 2011 Application deadline  
- June 1, 2011 Late application deadline  
- August 2011 Examination

#### 2011 Vascular Surgery and Pediatric Qualifying, Surgical Critical Care Certifying Examinations

- July 1, 2011 Application deadline  
- July 15, 2011 Late application deadline  
- Fall 2011 Examination

See [www.absurgery.org](http://www.absurgery.org) for additional dates as well as for eligibility requirements, application instructions and examination fees.

### Maintenance of Certification

<table>
<thead>
<tr>
<th>Professional standing</th>
<th>In addition to a full and unrestricted medical license, a diplomate must maintain hospital admitting and operating privileges in the specialty and periodically submit hospital references—contact information for the chief of surgery and chair of credentialing at the institution where most work is performed.</th>
</tr>
</thead>
<tbody>
<tr>
<td>CME requirement</td>
<td>Completion of at least 30 credits of Category 1 CME and 50 CME credits overall annually</td>
</tr>
<tr>
<td>Lifelong learning and self-assessment</td>
<td>Over the course of 3 years, one third of Category 1 CME must include a self-assessment activity (written question-and-answer exercise).</td>
</tr>
<tr>
<td>Cognitive expertise</td>
<td>Successful completion of a secure examination at 10-year intervals; diplomates may take the examination starting 3 years prior to certificate expiration. An application and 12-month operative log are required. For diplomates who hold more than one certificate, this is the only requirement which must be repeated for each specialty.</td>
</tr>
<tr>
<td>Practice performance assessment</td>
<td>Participation in a national, regional, or local surgical outcomes database or quality assessment program. Periodic communication skills assessment based on patient feedback is also planned, but is not yet finalized.</td>
</tr>
<tr>
<td>Notes</td>
<td>MOC takes effect the July 1 following certification. Diplomates report on their MOC activities every 3 years.</td>
</tr>

Graduate Medical Education (GME) Glossary

Note: Some of the terms and definitions used below are derived from the ACGME Glossary of Terms, available at: www.acgme.org/acWebsite/about/ab_ACGMEglossary.pdf.

Academic appointment—An appointment to a faculty category (eg, professor, associate professor, adjunct clinical instructor, etc.) of a degree-granting (eg, BS, BA, MA, MD, DO, PhD, etc.) school, college, or university.

Accreditation—A voluntary process of evaluation and review based on published standards and following a prescribed process, performed by a non-governmental agency of peers.

Accreditation Council for Graduate Medical Education (ACGME)—An accrediting agency with the mission of improving health care by assessing and advancing the quality of resident physicians’ education through accreditation. The ACGME establishes national standards for graduate medical education by which it approves and continually assesses educational programs under its aegis. The ACGME accredits GME programs through its 28 review committees (26 Residency Review Committees, or RRCs, the Transitional Year Review Committee, and the Institutional Review Committee). The ACGME has five member organizations:

• American Board of Medical Specialties
• American Hospital Association
• American Medical Association
• Association of American Medical Colleges
• Council of Medical Specialty Societies

Each member organization nominates four individuals to the ACGME’s Board of Directors. In addition, the Board of Directors includes three public representatives, two resident representatives, and the chair of the Council of Review Committee Chairs. A representative for the federal government also serves on the Board in a non-voting capacity.

Affiliated institution (see “Major participating institution”)—Term no longer in use by the AMA or ACGME; it has been replaced by “major participating institution.”

American Board of Medical Specialties (ABMS) (see also “Certification”)—The umbrella organization for the 24 approved medical specialty boards in the United States. Established in 1933, the ABMS serves to coordinate the activities of its Member Boards and to provide information to the public, the government, the profession, and its members concerning issues of specialization and certification in medicine. The mission of the ABMS is to maintain and improve the quality of medical care in the United States by assisting the member Boards in their efforts to develop and utilize professional and educational standards for the evaluation and certification of physician specialists. See Appendix B for more information.

Annual Survey of Graduate Medical Education Programs—see “National GME Census.”

At-home call—A call taken from outside the assigned site.

Attending—see “Teaching staff.”

Categorical positions (see also “Graduate Year 1” and “Preliminary Positions”)—Positions for residents who remain in a given program or specialty until completion of the total year(s) required for admission to specialty board examination.

Certification (see also “American Board of Medical Specialties”)—A voluntary process intended to assure the public that a certified medical specialist has successfully completed an approved educational program and an evaluation including an examination process designed to assess the knowledge, experience, and skills requisite to the provision of high-quality patient care in that specialty. Medical specialty boards determine whether candidates have received
appropriate preparation in approved residency training programs in accordance with established educational standards, evaluate candidates with comprehensive examinations, and certify those candidates who have satisfied the board requirements. Physicians who are successful in achieving certification are called diplomates of the respective specialty board. The boards also offer a Maintenance of Certification® program for qualified diplomates at intervals of 7 to 10 years. See Appendix B for more information.

Chief resident—A position in the final year of the residency (eg, surgery) or in the year after the residency is completed (eg, internal medicine and pediatrics); the individual in this position plays a significant administrative and teaching role in guiding new residents.

Combined specialty programs—Combined training consists of a coherent educational experience in two or more closely related specialties or subspecialty programs (listed below; see Appendix A for more information). The educational plan for combined training is approved by the specialty board of each of the specialties to assure that resident physicians completing combined training are eligible for board certification in each of the component specialties. Each specialty or subspecialty program is separately accredited by the Accreditation Council for Graduate Medical Education (ACGME) through its respective Residency Review Committee (RRC). The duration of combined training is longer than any one of its component specialty programs standing alone, and shorter than all of its component specialty programs together. Current combined specialties are:

- Diagnostic radiology/nuclear medicine/nuclear radiology
- Emergency medicine/family medicine
- Family medicine/preventive medicine
- Internal medicine/dermatology
- Internal medicine/emergency medicine
- Internal medicine/emergency medicine/critical care medicine
- Internal medicine/family medicine
- Internal medicine/medical genetics
- Internal medicine/neurology
- Internal medicine/nuclear medicine
- Internal medicine/physical medicine and rehabilitation
- Internal medicine/preventive medicine
- Internal medicine/psychiatry
- Neurology/diagnostic radiology/neuroradiology
- Neurology/nuclear medicine
- Pediatrics/dermatology
- Pediatrics/emergency medicine
- Pediatrics/medical genetics
- Pediatrics/physical medicine and rehabilitation
- Pediatrics/psychiatry/child and adolescent psychiatry
- Psychiatry/family medicine
- Psychiatry/neurology

Note: Combined internal medicine/pediatrics training initiated June 1, 2007 or after, must be undertaken in combined medicine/pediatrics programs accredited by the ACGME, which are listed in Section II.

Competencies—Specific knowledge, skills, behaviors and attitudes and the appropriate educational experiences required of residents to complete GME programs.

Complement—The maximum number of residents or fellows approved by a Residency Review Committee per year and/or per program based upon availability of adequate resources.

Consortium—A group of healthcare organizations established to pursue joint objectives in patient care, education, research, or other areas. If a consortium is formally established as an ongoing organizational entity with a commitment to graduate medical education, it may serve as a sponsoring institution of one or more GME programs.

Core discipline program—See “General specialty program”

Council on Medical Education—This AMA council formulates policy on medical education by recommending educational policies to the AMA House of Delegates, through the AMA Board of Trustees. The Council is also responsible for recommending the appointments of more than 100 representatives to accrediting bodies and other national organizations.

Designated institutional official (DIO)—An individual at an institution sponsoring or participating in one or more GME programs who has the authority and responsibility for the oversight and administration of GME programs.

Didactic—A type of systematic instruction by means of planned learning experiences, such as conferences or grand rounds.

Duty hours—All clinical and academic activities related to the residency/fellowship program, eg, patient care (both inpatient and outpatient), administrative duties related to patient care, providing for transfer of patient care, time spent in-house during call activities, and scheduled academic assignments such as conferences.

Educational Commission for Foreign Medical Graduates (ECFMG)—A nonprofit organization that assesses the readiness of graduates of foreign medical schools to enter graduate medical education in the United States. ECFMG certification provides assurance to GME program directors, and to the people of the United States, that graduates of foreign medical schools have met minimum standards of eligibility required to enter such programs. Almost all graduates of foreign medical schools must have an ECFMG certificate to participate in GME in the US. This certification does not guarantee that such graduates will be accepted into GME programs in the United States. (For more information on the ECFMG, see Section I.)

Electronic Residency Application Service (ERAS)—A service for medical students/residents through which residency/fellowship applications, letters of recommendation, Medical Student Performance Evaluations (MSPEs), transcripts, and other supporting credentials are transmitted via the Internet from medical schools to residency program directors. For more information about ERAS, a service of the Association of American Medical Colleges (AAMC), consult www.aamc.org/eras or see Section I.

Faculty—Any individuals who have received a formal assignment to teach resident/fellow physicians. At some sites appointment to the medical staff of the hospital constitutes appointment to the faculty.

Fellow (also see “Resident or resident physician” and “Intern”)—A physician in an ACGME-accredited program that is beyond the requirements for eligibility for first board certification in the discipline. Such physicians may also be termed “residents.” The term “fellow” may require modifiers for precision and clarity, eg, “research fellow.”

Fifth Pathway—Discontinued in June 30, 2009, the Fifth Pathway was one of several ways that individuals who obtained their undergraduate medical education abroad were able to enter GME in the United States. The Fifth Pathway was a period of supervised clinical training for students who obtained their premedical education in countries that do not grant the MD degree until the completion of 1 year of national service after medical school, and passed Step 1 of the United States Medical Licensing Examination. After these students successfully completed a year of clinical training sponsored
by an LCME-accredited US medical school and passed USMLE Step 2, they became eligible for an ACGME-accredited residency.

**FREIDA Online® (Fellowship and Residency Electronic Interactive Database Access)**—An online information resource, available through the AMA Web site at www.ama-assn.org/go/freida, that assists medical students and residents in selecting GME programs. It includes information on all ACGME-accredited residency programs and combined specialty programs, the majority with expanded listings that provide such information as program benefits (including compensation), resident-to-faculty ratio, work schedule, policies, and educational environment.

**General specialty program**—A primary specialty (eg, anesthesiology, family medicine, internal medicine) that provides resident physicians, under supervision, with the knowledge and skills needed to be practitioners in a specified area of medical practice; sometimes referred to as a “core discipline program.” General specialty programs function within an institution and are subject to all ACGME accreditation actions, policies, and procedures. Completing an ACGME-accredited residency in a general specialty program is one of the requirements of certification by a specialty board and is a prerequisite to subspecialty training.

**GME Track** (see also “National GME Census”)—Available at www.aamc.org/gmetrack, this secure web-based application of the Association of American Medical Colleges includes, among other services, the National GME Census. Through GME Track, residency information is collected for both the AAMC and the AMA.

**Graduate medical education (GME)** (see also “Postgraduate medical education”)—As the second of three major phases of medical education in the US, graduate medical education (GME) prepares physicians for the independent practice of medicine in a medical specialty. GME focuses on the development of clinical skills and professional competencies and on the acquisition of detailed factual knowledge in a medical specialty. GME programs are based in hospitals or other health care institutions and, in most specialties, utilize both inpatient and ambulatory settings. GME programs, including Transitional Year programs, are usually called “residency programs” and the physicians educated in them “residents.”

**Graduate Medical Education Directory**—Annual publication that lists residency/fellowship programs accredited by the ACGME. Known informally as the “Green Book,” the Directory lists all ACGME-accredited programs, Board-approved combined programs, and the certification requirements of 24 medical specialty boards.

**Graduate Year (GY)** (see also “Program year” and “Postgraduate year”—Refers to an individual’s current year of accredited GME; this may or may not correspond to the program year. For example, a fellow in pediatric cardiology could be in the first program year of the pediatric cardiology program but in his/her fourth graduate year of GME (including the 3 prior years of pediatrics). The AMA does not use the term “postgraduate year” (PGY).

**Graduate Year 1 (GY1)**—Used in connection with residents and with residency positions to indicate the first year of training after medical school. Individuals in GY1 positions who plan to complete the entire program are counted as enrolled in Graduate Year 1 (GY1). Categorical. Individuals in GY1 positions who are using their first year in a residency program as a prerequisite to enter another specialty or subspecialty program are counted as enrolled in Graduate Year 1 (GY1). Preliminary. Not all specialties offer GY1 positions, and in those specialties with approved GY1 positions, some programs do not offer them. Furthermore, although by definition residents in GY1 positions are not required to have prior GME, some residents who fill such positions may have had previous training.

**In-house call**—Duty hours beyond the normal work day when residents are required to be immediately available in the assigned institution.

**Institution**—A sponsoring institution is the institution (eg, a university, medical school, hospital, school of public health, health department, public health agency, organized health care delivery system, medical examiner’s office, consortium, or educational foundation) that assumes the ultimate responsibility for a GME program. ACGME-accredited GME programs must operate under the authority and control of a sponsoring institution, which must be appropriately organized for the conduct of GME in a scholarly environment and committed to excellence in both medical education and patient care. A sponsoring institution must be in substantial compliance with the ACGME Institutional Requirements and must ensure that its ACGME-accredited programs are in substantial compliance with the Institutional, Common, and specialty-specific Program Requirements.

**A major participating institution** is an institution to which residents rotate for a required experience of long duration and/or those that require explicit approval by the appropriate RRC prior to utilization. Major participating institutions are listed as part of an accredited program in the Graduate Medical Education Directory.

**Note:** Hospitals and other institutions that provide rotations of less than one sixth of the program length or less than a total of 6 months are not listed in the Directory.

**Intern** (see “Resident or resident physician” and “Fellow”)—No longer used by the AMA or ACGME. Historically, “intern” was used to designate individuals in the first post-MD year of hospital training; less commonly, it designated individuals in the first year of any residency program. Since 1975, the Graduate Medical Education Directory and the ACGME have used “resident,” “resident physician,” or “fellow” to designate all individuals in ACGME-accredited programs.

**International medical graduate (IMG)**—A graduate from a medical school outside the US and Canada.

**In-training examination** (also known as “in-service examination”)—Examinations to gauge residents’ progress toward meeting a residency program’s educational objectives. Certification boards of the American Board of Medical Specialties (ABMS) or medical specialty societies offer in-training examinations on a periodic basis.

**Liaison Committee for Specialty Boards (LCSB)**—The body that reviews and recommends approval of new examining boards in medical specialties to the ABMS and AMA, which are the sponsors of the LCSB.

**Liaison Committee on Medical Education (LCME)**—The body that accredits allopathic medicine educational programs in the US and Canada leading to the MD degree. The American Osteopathic Association (AOA) accredits educational programs leading to the doctor of osteopathic medicine (DO) degree.

**Licensure**—The process by which a state or jurisdiction of the United States admits physicians to the practice of medicine. Licensure is intended to ensure that practicing physicians have appropriate education and training and that they abide by recognized standards of professional conduct while serving their patients. Candidates for first licensure must complete a rigorous examination sequence (the United States Medical Licensing Examination, or USMLE) designed to assess a physician’s ability to apply knowledge, concepts, and principles that are important in health and disease and that constitute the basis of safe and effective patient care. All applicants must submit proof of medical education and training and provide details about their work history. Finally, applicants must reveal information regarding past medical history (including the use
of habit-forming drugs and emotional or mental illness), arrests, and convictions. For more information, see State Medical Licensure Requirements and Statistics, published by the AMA, or visit www.ama-assn.org/go/licensure.

Major participating institution—See “Institution.”

Match—See “National Resident Matching Program.”

Medical school affiliation—Institutions sponsoring an accredited GME program may have a formal relationship with a medical school. Where such a relationship exists, the affiliation is identified by the dean of the medical school as major (M), graduate only (G), or limited (L). Major affiliation signifies that an institution is an important part of the teaching program of the medical school and plays a significant role in the clinical clerkship program. Graduate only affiliation indicates that the institution is affiliated with the medical school only for its graduate programs. Limited affiliation signifies that the institution is affiliated with the medical school’s teaching program only for brief, occasional, and/or unique rotations of students or residents.

Medical school number—Unique 5-digit identifier for each medical school. See Appendix C for a list of LCME-accredited medical schools and medical school numbers.

Medical Student Section (MSS)—A section of the AMA, the AMA-MSS comprises nearly 50,000 members representing students from accredited allopathic and osteopathic schools in the US. For more information, see www.ama-assn.org/go/mss.

Moonlighting—Patient care activities external to the educational program that residents/fellows engage in at sites used by the educational program (internal moonlighting) and other health care sites.

National GME Census—Beginning in 2000, the AMA’s Annual Survey of Graduate Medical Education Programs was replaced by the National GME Census, a joint effort of the AMA and the Association of American Medical Colleges (AAMC). All programs accredited by the ACGME and combined specialty programs approved by their respective boards are asked to complete this online census, available at www.aamc.org/gmetrack. The census collects data on program characteristics such as clinical and research facilities and the work and learning environment residents can expect, as well as biographical data on residents in the programs. Data collected from the census are used in the following AMA publications and products:

- Graduate Medical Education Directory
- Graduate Medical Education Library on CD-ROM
- FREIDA Online® (Fellowship and Residency Electronic Interactive Database Access)
- Medical Education issue of the Journal of the American Medical Association
- State-level Data for Accredited Graduate Medical Education Programs in the US
- AMA Physician Masterfile
- AMA Physician Select

National Resident Matching Program (NRMP)—Informally referred to as the “Match,” this process matches GME programs and applicants to those programs. Managed by the Association of American Medical Colleges (AAMC), the NRMP system was developed to provide both applicants and residency program directors an opportunity to consider their options for accepting and offering appointments to residency programs, respectively, and to have their decisions announced at a specific time. For more information, consult www.nrmp.org or see Section I.

Night float—Rotation or educational experience designed to either eliminate in-house call or assist other residents during the night.

Residents assigned to night float are assigned on-site duty during evening/night shifts and are responsible for admitting or cross-covering patients until morning and do not have daytime assignments. Night float rotations must have an educational focus.

Pager call—See “At-home call.”

Participating institution—See “Institution.”

Postgraduate medical education (see “Graduate medical education”)—The AMA does not use the term “postgraduate medical education” to refer to any stage of physician education. The term is sometimes used in the United Kingdom and Canada to refer to graduate medical education.

Postgraduate year (PGY) (see also “Graduate year”)—The AMA does not use this term to describe any part of graduate medical education. The preferred term is graduate year (GY).

Preliminary positions (see also “Graduate Year 1”)—Positions for residents who are obtaining training required to enter another program or specialty. Some residents in preliminary positions may move into permanent positions in the second year. Preliminary positions are usually 1 year in length and usually offered for Graduate Year 1. Internal medicine, surgery, and transitional year programs commonly offer preliminary positions.

Program—The unit of GME residency/fellowship training, comprising a series of learning experiences within a GME specialty/subspecialty, which is evaluated for accreditation.

Program director—The individual responsible for maintaining the quality of a specific GME program so that it meets ACGME accreditation standards. Other duties of the program director include preparing a written statement outlining the program’s educational goals; providing an accurate statistical and narrative description of the program as requested by the Residency Review Committee (RRC); and providing for the selection, supervision, and evaluation of residents for appointment to and completion of the program.

Program letter of agreement (PLA)—A written document that addresses GME responsibilities between an individual accredited program and a site other than the sponsoring institution at which residents receive a required part of their education.

Program year (see also “Graduate Year”)—Refers to the current year of training within a specific program; this may or may not correspond to the graduate year. For example, a fellow in pediatric cardiology could be in the first program year of the pediatric cardiology program, but is in his/her fourth graduate year of GME (including the 3 prior years of pediatrics).

Resident and Fellow Section (RFS)—A section of the AMA formed in 1974, the AMA-RFS is the largest organization of residents in the United States. For more information, see www.ama-assn.org/go/rfs.

Residency Review Committees (RRCs)—The 28 review committees within the ACGME system (including the Transitional Year Review Committee) that meet periodically to review programs within their specialty and/or subspecialty, propose Program Requirements for new specialties/subspecialties, and revise requirements for existing specialties/subspecialties.

Resident or resident physician (see also “Fellow”)—Any individual at any level in an ACGME-accredited GME program, including subspecialty programs. Local usage might refer to these individuals as interns, house officers, housestaff, trainees, fellows, junior faculty, or other comparable terminology. Beginning in 2000, the ACGME has used the term “fellow” to denote physicians in subspecialty programs (versus residents in specialty programs) or in

1132 Graduate Medical Education Directory 2011-2012
GME programs that are beyond the requirements for eligibility for first board certification in the discipline.

**Rotation**—An educational experience of planned activities in selected settings, over a specific time period, developed to meet goals and objectives of the program.

**Scholarly activity**—An opportunity for residents/fellows and faculty to participate in research as well as organized clinical discussions, rounds, journal clubs, and conferences. In addition, some members of the faculty should also demonstrate scholarship through one or more of the following: peer-reviewed funding; publication of original research or review articles in peer-reviewed journals or chapters in textbooks; publication or presentation of case reports or clinical series at local, regional, or national professional and scientific society meetings; or participation in national committees or educational organizations.

**Section on Medical Schools (SMS)**—A section of the AMA House of Delegates with representation from deans and faculty of accredited US medical and osteopathic schools. For more information, see [www.ama-assn.org/go/sms](http://www.ama-assn.org/go/sms).

**Short call**—Responsibility for admitting patients to the teaching service during the early part of the day. Residents begin call in the morning, admit patients until some designated time in the afternoon or late morning, and do not stay in the hospital overnight.

**Sponsoring institution**—See “Institution.”

**Subspecialty program**—Provides advanced GME in a highly specialized field of study within a specialty, eg, gastroenterology within the field of internal medicine. Many subspecialty programs are subject to ACGME accreditation actions, policies, and procedures. Completing an ACGME-accredited residency/fellowship in a particular subspecialty program may qualify the physician to seek certification by the related subspecialty board. Some subspecialty programs are accredited independently of the related general specialty program and are not dependent on a general specialty program. Other subspecialty programs function only in conjunction with an accredited general specialty program, and the subspecialty program’s accreditation status is related to the status of the accredited general specialty program.

**Teaching staff**—Any individual who has received a formal assignment to teach resident physicians. In some institutions appointment to the medical staff of the hospital constitutes appointment to its teaching staff.

**Transitional year program** (see also “Preliminary positions”)—Broad-based clinical training in an ACGME-accredited graduate year 1 (GY1) residency program that provides a balanced curriculum in multiple clinical disciplines. Developed for the year between medical school graduation and a specialty residency program, the transitional year is designed to facilitate the choice of and/or preparation for a specific specialty; it is not meant to prepare participants for the independent practice of medicine. To sponsor a transitional year program, an institution and its affiliate must conduct two or more ACGME-accredited programs that participate in the transitional year.

**United States Medical Licensing Examination (USMLE)**—A three-step examination that is required for licensure of all practicing physicians in the US. For more information, see [www.usmle.org](http://www.usmle.org) or refer to [State Medical Licensure Requirements and Statistics](http://www.usmle.org), published annually by the AMA.

**Web ADS**—The Web Accreditation Data System (ADS) of the ACGME. This Internet-based data collection system contains the current data on file with the ACGME for all sponsoring institutions and programs, which are required to verify and update general information annually via this secure online system. In addition, programs are required to verify the accredited training of all residents and to communicate organizational changes as they occur. See [www.acgme.org/ADS](http://www.acgme.org/ADS) for more information.
Appendix E
Listings of Subspecialty and Fellowship Programs

Introduction
In addition to the residency/fellowship programs accredited by the Accreditation Council for Graduate Medical Education (ACGME), a number of medical specialty societies maintain lists of subspecialty and fellowship programs outside the purview of the ACGME accreditation process. Note: Inclusion on this list does not reflect AMA approval or recognition of these practice areas.

To propose an additional list of subspecialties/fellowships for this section, contact Fred Donini-Lenhoff at fred.lenhoff@ama-assn.org.

Abdominal Transplant Surgery Fellowships
www.asts.org/FellowshipTraining
The American Society of Transplant Surgeons (ASTS) accredits abdominal transplant surgery programs, through which fellows develop proficiency in the surgical and medical management of patients with end-stage organ diseases amenable to transplantation. Candidates for such training must have satisfactorily completed a residency that satisfies the educational requirements for certification by the American Board of Surgery or the American Board of Urology (or foreign equivalency).

The ASTS is composed of over 1,200 transplant surgeons, physicians, scientists, and allied health professionals dedicated to excellence in transplantation surgery through education and research with respect to all aspects of organ donation and transplantation. Abdominal transplant surgery fellowships in the United States and Canada are listed on the ASTS web site.

Information
American Society of Transplant Surgeons
2461 South Clark Street, Suite 640
Arlington, VA 22202

Electrodiagnostic Medicine Fellowships
www.aanem.org/education/training/fellowship_listing.cfm

The Listing of Fellowships in Electrodiagnostic Medicine from the American Association of Neuromuscular & Electrodiagnostic Medicine (AANEM) is an informational service assembled from data submitted voluntarily by various institutions. The AANEM does not review, evaluate, or provide input regarding the listing. This listing is not necessarily complete, and inclusion of a program does not imply sponsorship or endorsement by the AANEM. This listing is not affiliated with or endorsed by the American Board of Electrodiagnostic Medicine (ABEM) in any way. Completion of any of the listed fellowships does not guarantee satisfaction of the ABEM eligibility requirement of completion of a preceptorship in electrodiagnostic medicine. Any statement included in this listing that completion of the fellowship will enable a candidate to qualify for examination by a particular board should be investigated by the individual applying for the fellowship. Candidates should contact the individual boards for determination of eligibility requirements.

Fellowships in many areas are listed, including:
• Clinical electrodiagnostic medicine
• EMG/neuromuscular
• Electrodiagnostic medicine and electrophysiology of movement disorders
• Epilepsy, neuromuscular disorders
• Neuromuscular diseases
• Spine/neuromuscular

Information
American Association of Neuromuscular & Electrodiagnostic Medicine

Dermatology Fellowships
www.aad.org/fellowshipdirectory/

The American Academy of Dermatology (AAD) is a professional association for physicians in dermatology. The online Fellowship Directory of the AAD, which is intended for reference by medical students, residents, and dermatologists, includes dermatology fellowships in the following disciplines or areas:
• Bullous
• Burn
• Clinical dermatology
• Clinical research
• Clinician educator
• Cosmetic
• Dermatopathology
• Dermatopharmacology and epidermolysis
• HIV
• Immunodermatology
• Laser
• Laser and cosmetic
• Laser and surgery
• Medical dermatology
• Melanoma translational research
• Mohs surgery
• Oncology/melanoma
• Pediatric dermatology
• Pharmacology
• Phototherapy
• Research

Gynecologic Endoscopy (Advanced) Fellowships
www.aagl.org/fellowships

The Fellowship in Gynecologic Endoscopy, an affiliate of the AAGL and the Society of Reproductive Surgeons (SRS), sponsors fellowships in advanced gynecologic endoscopy. These fellowships were created to produce a standardized training program with a research requirement. The fellowship provides an opportunity for gynecologists who have completed their residency to acquire additional skills in minimally invasive gynecologic surgery.

Educational objectives focus on evidence-based medicine, anatomical principles, instrumentation, operative laparoscopy, and operative hysteroscopy. The fellowship offers in-depth experience using state-of-the-art techniques to treat abnormal uterine bleeding, pelvic pain, myomata, endometriosis, adhesive disease, and pelvic relaxation.

This fellowship also aims to further research in the field of minimally invasive gynecology. Fellows are required to complete a scholarly contribution to be presented at the annual meetings of the AAGL and the American Society for Reproductive Medicine.

The Fellowship in Gynecologic Endoscopy actively encourages applications from postgraduate physicians aspiring to develop their surgical skills in minimally invasive gynecology.

Hospitalist and Hospital Medicine Programs
www.hospitalmedicine.org

Hospitalists are physicians whose primary professional focus is the general medical care of hospitalized patients. Their activities include patient care, teaching, research, and leadership related to hospital care.

The term “hospitalist” refers to physicians whose practice emphasizes providing care for hospitalized patients. The term was coined by Drs. Robert Wachter and Lee Goldman in a New England Journal of Medicine article in August 1996 (Wachter RM, Goldman L. The emerging role of “hospitalists” in the American health care system. N Engl J Med 1996;335:514-7). A review in the Journal of the American Medical Association (Wachter, RM, Goldman L: The Hospitalist Movement: 5 Years Later, JAMA 287;487-494, Jan 23/30, 2002) further defines the field of hospital medicine. While some doctors have emphasized inpatient care for many years, there has been an explosive growth of such doctors since 1994. There are now more than 12,000 hospitalists in the US according to a study by the American Hospital Association. There are more new jobs available for hospitalists than in any aspect of internal medicine. Hospital medicine is a significant career path option for those trained in general internal medicine, general pediatrics, family practice, and obstetrics.

The majority (85%) of practicing hospitalists are trained in internal medicine, and some (5%) have completed subspecialty fellowships, pulmonary disease and critical care medicine being the most common. Recognizing that many medical students and residents are interested in this field, academic centers have recently begun to develop hospitalist residency and fellowship programs in hospital medicine. Hospitalist tracks are generally part of an internal medicine residency program, but offer additional exposure to the broad range of issues confronting hospital-based physicians, such as end-of-life care, quality improvement, and medical consultation. Fellowship programs tend to emphasize research training, teaching skills, and additional clinical experience.

Fellowships are listed on the Society of Hospital Medicine’s web site in the areas of internal medicine, family medicine, pediatrics, and psychiatry.

Information

Minimally Invasive and GI Surgery Fellowships

www.fellowshipcouncil.org/directory/index2.php

The Fellowship Council (FC) is an association of minimally invasive and GI surgical fellowship directors formed to address the unique needs of these programs. Programs include minimally invasive surgery, bariatrics, flexible surgical endoscopy, and hepato-biliary/pancreatic and colorectal specialties. The FC is an independent entity that is sponsored by the following surgical societies:

- Society of American Gastrointestinal and Endoscopic Surgeons
- Society for Surgery of the Alimentary Tract
- American Society for Metabolic and Bariatric Surgery
- American Hepato-Pancreato-Biliary Association

It provides a communication forum for disseminating information about fellowship programs, discussing fellowship issues, and communicating the Council’s positions to other organizations. It administers a secure electronic match to ensure fair placement of residents into quality programs. The Council has a rigorous accreditation process according to published guidelines for high-quality training. It is also charged with creating training curricula in conjunction with the American Board of Surgery.

Neurology Fellowship Programs

www.aan.com/education/fellowships/

The online Directory for Fellowship Positions is provided through the efforts of the American Academy of Neurology’s Graduate Education Subcommittee (GES), the Association of University Professors of Neurology (AUPN), and the American Neurological Association (ANA). The goals of the GES are to provide opportunities for resident involvement in the Academy, encourage attendance at the annual meeting, and provide information to residents on fellowships.

The mission of the AUPN is to support academic departments of neurology in attracting, educating, and developing the cadre of physicians and physician-scientists needed to diagnose, understand, and treat disorders of the nervous system. Members of the AUPN include heads or chairs of divisions or departments of neurology, directors of residency training programs, directors of clerkship programs, or directors of research programs in accredited medical schools in the United States (or similar medical schools in Canada which take part in the United States Neurology Resident Matching Program).

The American Neurological Association is a professional society of academic neurologists and neuroscientists devoted to advancing the goals of academic neurology, training and educating neurologists and other physicians in the neurologic sciences; and expanding both our understanding of diseases of the nervous system and our ability to treat them.

Child neurology residency positions or fellowships are not listed in the Directory since these positions are residency training that leads to certification by the ABPN with special competence in child neurology, and therefore are not post-residency training. All listings of child neurology programs are available on the ACGME web site and in the AMA’s Graduate Education Directory (“Green Book”).

The Directory lists fellowships that have been submitted by programs covering the following disciplines:

- Advanced clinical neurology
- AIDS
- Alzheimer’s disease
- Basic research
- Behavioral neurology
- Cerebrovascular disease/stroke
- Clinical neurophysiology
- Dementia
- EEG
- EMG
- Epilepsy
- Geriatric neurology
- Headache
- Interventional neurology
- Movement disorders
- Multiple sclerosis
- Neuroepidemiology
- Neurogenetics
- Neuroimaging
- Neuroimmunology
- Neurolologic critical care
- Neuromuscular disorders
- Neuro-oncology
- Neuro-ophthalmology
- Neuro-otology
- Neuropathology
- Neuropharmacology
- Neurorehabilitation
- Neuropathology
- Pain
- Sleep disorders
- Spine
Obstetrics-Gynecology Subspecialty Programs

www.abog.org/downloads.asp

The American Board of Obstetrics and Gynecology (ABOG) approves GME fellowship programs in the following subspecialties of obstetrics and gynecology:
- Female pelvic medicine and reconstructive surgery
- Gynecologic oncology
- Maternal-fetal medicine
- Maternal-fetal medicine and genetics
- Reproductive endocrinology/infertility

An educational program in these fields must (with rare exceptions) be affiliated with a medical school and be an integral part of a department of obstetrics and gynecology that also conducts an accredited residency program in obstetrics and gynecology. It must function with the approval, but not necessarily under the direction, of the chair of the department. A subspecialty program requires special facilities, services, and personnel, and the activities of the subspecialty fellows and the residents in the core program must be clearly and separately identified.

Institutions may apply for approval of education programs of 3 years’ duration. Refer to the General and Special Requirements for Graduate Medical Education for detailed guidelines.

Subspecialty Certification

Fellows who enter a 3-year fellowship program must satisfactorily complete 3 years of training to be admissible to the subspecialty division’s written examination. The certification process for all candidates will be identical. Program directors and candidates must be aware that in order to become certified in any subspecialty, the candidate must pass both the written and oral examinations of the principal Board.

It is recommended that continued contact with the broad aspects of obstetrics and gynecology be continued throughout the fellowship, including such mechanisms as participation in lectures, conferences, or night and weekend call. The extent of these activities, however, must not significantly alter the training program as proposed by the program director and approved by the division.

Ophthalmology Fellowship Programs

www.aupofcc.org/fellowships.html

Formed in 2005, the Association of University Professors of Ophthalmology Fellowship Compliance Committee (AUPO FCC) is a non-profit organization committed to the establishment of program requirements for ophthalmology fellowship programs. The AUPO FCC offers a voluntary compliance system focused on uniform educational requirements, protection of the public, protection of institutions, protection of trainees, accountability, and enforcement.

The compliance process is voluntary and financed by participating fellowship programs, subspecialty societies, and the AUPO. All subspecialties in ophthalmology are encouraged to participate in the AUPO FCC.

The AUPO FCC web site includes listings of fellowships in AUPO-FCC compliant programs in the following ophthalmic subspecialty areas:
- Cornea
- Glaucoma
- Neuro-ophthalmology
- Ophthalmic pathology
- Pediatric ophthalmology & strabismus
- Surgical retina & vitreous
- Uveitis

Pathology Fellowship Programs

www.pathologytraining.org

The Intersociety Council for Pathology Information (ICPI) is a non-profit educational organization sponsored by national pathology societies to serve as a central source of information about pathology in the practice of medicine and in medical research and education. It publishes annually the Directory of Pathology Training Programs in the US and Canada, which includes specialty and subspecialty programs in US and Canada. Other features of the Directory include listings of post-sophomore fellowships for medical students and information about careers in pathology, as well as a description of the principal pathology societies. A searchable web-based Directory is available at www.pathologytraining.org.

Listings of programs in pathology subspecialties include the following:
- Anatomic pathology
- Blood banking/transfusion medicine
- Breast pathology
- Cardiovascular respiratory pathology
- Chemical pathology/clinical chemistry
- Clinical microbiology
- Coagulation
Physician-Scientist Training Programs
www.physicianscientists.org/careers/training/residency

The American Physician Scientists Association web site offers a list of Physician-Scientist Development Training Programs and links to each program’s Web site. These are research residency programs that have short-tracked the clinical years to allow for a more intensive research post-doctoral/fellowship period.

Pediatric Dermatology Programs
www91.pair.com/spd/fellowship.php

The web site for the Society for Pediatric Dermatology lists pediatric dermatology fellowship programs. (Note: The American Academy of Dermatology web site also lists fellowship programs in this field.)

Those pursuing training in this specialty must complete a residency in dermatology followed by a pediatric dermatology fellowship of 1 to 2 years. (Note: Recently, combined programs in pediatrics and dermatology have been approved; see Appendix A for more information.)

The American Association for the Surgery of Trauma (AAST) has compiled lists of trauma and trauma-related fellowships arranged according to compliance with AAST-published guidelines. The AAST web site lists institutions supporting trauma-related fellowships, lectureships, and research positions in trauma surgery, orthopaedic trauma, trauma anesthesia, critical care, injury control, and burns.

Another resource is trauma.org, which lists institutions offering trauma-related fellowships, lectureships, and research positions in the following:

- Trauma surgery
- Trauma surgery and critical care
- Trauma, critical care and acute care surgery
- Trauma surgery and injury control
- Surgical critical care
- Orthopaedic trauma
- Burn and plastics trauma
- Trauma anaesthesia
- Trauma radiology
- Trauma research

Appendix F
Medical Licensure Information

This section contains an article on the basics of medical licensure, in addition to information on the licensure policies of state medical boards, published in the 2011 edition of State Medical Licensure Requirements and Statistics.

To order your copy of the licensure book, call the AMA at (800) 621-8335 or visit www.ama-assn.org/go/licensure.

Obtaining a Medical License: The Basics

By the Federation of State Medical Boards
[Reprinted from Licensing and Credentialing: What Physicians Need to Know]

Increasing public demand for protection, coupled with the growth in the number and sophistication of fraudulent practitioners over the past 2 decades, has resulted in stronger and more complex licensing boards and licensing statutes throughout the country. As might be expected, the rate of change differs widely among the states’ licensing boards, depending on each jurisdiction’s resources and Medical Practice Act, as well as on legislative, media, and public expectations. All medical boards have continued to improve licensure processes, and a trend toward uniformity among licensing boards exists to enhance both the initial licensure process and licensure portability.

Many states have expanded what is considered to be the practice of medicine to address new trends in the medical field that need to be regulated by medical boards. For example, a number of states have passed legislation in recent years that empower medical boards to have jurisdiction over the practice of medicine across state boundaries or treatment decisions made by medical directors of managed care organizations.

Within this context, a physician seeking initial licensure or subsequently applying for a license in other states should anticipate the possibility of delays due to the necessary investigation of credentials and past practice, as well as the need to comply with necessary licensing standards. To assist a physician in the quest for licensure, this article attempts to provide some ground rules. These suggestions will not apply in all cases but generally will help most physicians applying for licensure as well as benefit the licensing board of the state in which the physician wishes to practice.

When contacting a licensing board for the first time, ask for a copy of its current licensing requirements and the average time it takes to process applications. This will provide the physician with a solid idea of when to consider closing an existing practice and/or plan a move as well as with information about the potential problem areas to be addressed in completing an application. While initial licensure requirements for domestic and international medical graduates differ somewhat among states, all states will require proof of prior education and training and proof of the completion of a licensure examination approved by the board. Specifically, all physicians must submit proof of successful completion of all three steps of the United States Medical Licensing Examination (USMLE).

However, because some medical students and physicians had completed portions of the National Board of Medical Examiners and Federation Licensing Examination (PLEX) sequences before the implementation of USMLE in 1994, certain combinations of examinations may be considered by medical licensing authorities as comparable to the USMLE.
To send a USMLE or FLEX transcript to state medical boards, visit www.fsmb.org or contact:

OBTAINING A MEDICAL LICENSE: THE BASICS

Physicians informed about the process and working cooperatively with the licensing board need not find licensing an unpleasant experience. Members of the medical profession should always remember that the business of medical licensing boards is to protect the public from unqualified and unfit physicians. However, licensing boards also strive to ensure a process that protects the legal rights and privileges of physicians. While maintaining this balance often appears bureaucratic and cumbersome, the end result is improved health care for the people of the United States.

A physician who is actively involved in the licensing process can often shorten the length of time it takes to obtain a license. Personally contacting and following up with the medical schools, training programs, and appropriate hospitals will motivate these institutions to verify credentials more expeditiously. Following up with the licensing boards in other states where the physician holds or has held a license also may assist in shortening the time for licensure. It is important to note a difference between follow-up and excessive use of phone contact, which often delays the processing of requested verification materials, since the physician’s application or request may need to be pulled from the “stack” to answer an inquiry. A short note to the organization processing the request for verification materials, since the physician’s application or use of phone contact, which often delays the processing of requests, can be forwarded, at the physician’s request, to any entity that wants and needs licensure to begin practicing, and state employees with school-age children often take their earned vacation time during this period. Finally, it is important to remember that hospital credentialing and qualification for medical malpractice insurance are based on possession of full and unrestricted licensure. This too may mean additional time before a physician can actually begin practicing.

A wise physician will exercise patience and courtesy in the licensing process. It may be a better course to follow than frequent phone contact.

Another option for physicians applying for licensure is the Federation Credentials Verification Service (FCVS). The FCVS was created in 1996 by the Federation of State Medical Boards of the United States to provide a centralized, uniform process for state medical boards—as well as private, governmental and commercial entities—to obtain a verified, primary source record of a physician’s core credentials. The FCVS repository of information allows a physician to establish a confidential, lifetime professional portfolio that can be forwarded, at the physician’s request, to any entity that has established an agreement with FCVS. Currently, the majority of licensing authorities accept FCVS-verified documents for licensure.

For more information on FCVS, call 888 ASK-FCVS (275-3287).

A wise physician will exercise patience and courtesy in the licensing process. State licensing boards and their staff, in most cases, do the best job possible to protect the public with the resources provided them. This requires taking the necessary time to fairly evaluate each application for licensure. In that same context, all actively practicing physicians should be cognizant of state laws;
State Medical Licensure Requirements and Statistics: Contents

State Medical Licensure Requirements and Statistics, 2011 edition, includes the information shown below. On the following pages are selected tables that are relevant to GME.

To order your copy, call the AMA at (800) 621-8335 or visit www.ama-assn.org/go/licensure.

Section I: Licensure Policies and Regulations of State Medical Boards
- Administration of the United States Medical Licensing Examination Steps 1 and 2
- Administration of the United States Medical Licensing Examination Step 3
- Endorsement Policies for Physicians Holding an Initial License
- Additional Requirements for Endorsement of Licenses Held by International Medical Graduates (IMGs)
- Policies About the Special Purpose Examination (SPEX) and Comprehensive Osteopathic Medical Variable-Purpose Examination (COMVEX)
- Initial Licensure of US Medical/Osteopathic School Graduates
- Initial Licensure of Canadian Citizens Who Are Graduates of Accredited Canadian Medical Schools
- Initial Licensure of International Medical Graduates (IMGs)
- Medical Student Clerkship Regulations
- Additional Policies Concerning International Medical Graduates (IMGs) and Doctors of Osteopathic Medicine (DOs)
- Accredited Subspecialties and Nonaccredited Fellowships That Satisfy Graduate Medical Education Requirements for Licensure
- Licensure Requirement Exemptions for Eminent Physicians and Medical School Faculty
- Teaching (Visiting Professor) Licenses
- Licensure and Reregistration Fees, Intervals, and Requirements
- Continuing Medical Education for Licensure Reregistration
- Resident/Fellow Physician Licenses
- Resident/Fellow Physician Licenses: Documentation and Verification
- Noneeducational Temporary or Limited Licenses, Permits, Certificates, and Registration
- Physician Reentry
- Regulations on the Practice of Telemedicine and Out-of-state Consulting Physicians
- Regulations Related to Violations of Ethical Standards

Section II: Statistics of State Medical Licensing Boards
- Licenses Issued to Physicians by State Medical Boards, 1975–present
- Full Unrestricted Licenses (Whether Physician’s Initial or Subsequent) Issued to MDs and DOs by State Medical Boards
- Initial Licenses Issued to MDs and DOs by State Medical Boards
- Initial Licenses Issued to MDs and DOs by State Medical Boards, 1950–present
- Initial Licenses Issued to International Medical Graduates by State Medical Boards, 1975–present

Section III: Medical Licensing Examinations and Organizations
- The United States Medical Licensing Examination (USMLE)
- The Federation of State Medical Boards (FSMB) of the United States, Inc
- National Board of Medical Examiners (NBME)
- National Board of Osteopathic Medical Examiners (NBOME)

Section IV: Information for International Medical Graduates

Section VI: Other Organizations and Programs
- American Board of Medical Specialties
- Accreditation Council for Graduate Medical Education
- Accreditation Council for Continuing Medical Education
- American Medical Association Survey and Data Resources
- American Medical Association Continuing Medical Education
- The Joint Commission
- National Association Medical Staff Services
- National Committee for Quality Assurance
- Administrators in Medicine

Appendices
- Boards of Medical Examiners in the United States and Possessions
- Boards of Osteopathic Medical Examiners in the United States and Possessions
- Member Boards of the Federation of Medical Licensing Authorities of Canada
- Glossary of Medical Licensure Terms and List of Common Abbreviations
- AMA Policy on Medical Licensure
Administration of the United States Medical Licensing Examination Step 3

In 1990, the Federation of State Medical Boards (FSMB) and the National Board of Medical Examiners (NBME) established the United States Medical Licensing Examination (USMLE), a single examination for assessment of US and international medical school students or graduates seeking initial licensure by US licensing jurisdictions. The USMLE replaced the Federation Licensing Examination (FLEX) and the certification examination of the NBME, as well as the Foreign Medical Graduate Examination in the Medical Sciences (FMGEC), which was formerly used by the Educational Commission for Foreign Medical Graduates (ECFMG) for certification purposes.

The USMLE is a single examination program with three steps. Each step is complementary to the others; no step can stand alone in the assessment of readiness for medical licensure.

Many states require US or Canadian medical school graduates to have from 6 to 12 months of accredited US or Canadian GME to take USMLE Step 3. In some states, graduates of foreign medical schools are required to have completed more GME (as much as 3 years in several states). A number of states do not require completion of GME to take Step 3 or require only that a physician taking the examination be enrolled in a GME program. Nearly all medical licensing authorities require completion of Steps 1, 2, and 3 within a 7-year period, or 10 years for those in MD/PhD or similar dual-degree programs, although 22 states may make exceptions in the event of extenuating circumstances. The 7-year period begins when the medical student or graduate first passes Step 1 or Step 2. Thirteen states allow 10 years for completion of all three steps, and eight states do not impose a time limit for completion. Many states limit the number of attempts allowed to pass each step (particularly Step 3) and require additional education, training, or experience after a given number of failed attempts.

For 2011, the fee for the Step 3 examination is $740.

Additional Notes for Specific Licensing Jurisdictions

**Alabama**—If an applicant fails to achieve a passing score on Step 3 in three administrations, the Board may approve one additional attempt to pass Step 3 after demonstration by the applicant of additional education, experience, or training acceptable to the Board. In addition, Steps 1, 2, and 3 must be passed within a total of ten attempts.

Applicants who are “dual degree candidates” (see definition, below) must achieve a passing score on Step 3 in not more than three administrations and complete Steps 1, 2, and 3 within a 10-year period, beginning when the applicant initially passes his or her first step. (Note: The board may approve, at its discretion, an additional 5 years of eligibility for dual-degree candidates.) The Board does not accept scores from a retaking of a previously passed step of the USMLE.

For purposes of the USMLE, dual degree candidates are defined as the following:

The applicant is pursuing the MD or DO degree and the PhD degree in an institution or program accredited by the LCME and a regional university accrediting body; and

The applicant is a student in good standing, enrolled in the institution or program; and

The PhD studies are in a field of biological sciences tested in the USMLE Step 1 content, including, but not limited to, anatomy, biochemistry, physiology, microbiology, pharmacology, pathology, genetics, neuroscience, and molecular biology.

**Arizona**—No time limit for USMLE Step 3 for applicants who hold a license in another jurisdiction (licensure by endorsement); for initial licensure, the 7-year limit applies.

**Ohio**—The applicant shall have passed all three steps within a 10-year period and achieved a recognized passing performance by the USMLE program on each step. No applicant shall have failed any step more than three times.

Any applicant having failed a step more than three times shall do the following to be eligible for licensure:

1) Successfully complete an additional year of GME in addition to that required for licensure. Such education shall be completed subsequent to the final step that has been failed more than three times; and 2) Retake the testing sequence.

Any applicant who has not completed the required steps within the 10-year time period, and has not failed any step more than three times, shall 1) Retake the appropriate steps to bring the testing sequence within the required 10-year time period; or 2) Demonstrate good cause, as determined by the board, for not having passed all three steps within the 10-year period.

**Oregon**—A waiver is allowed of the three attempt limit for USMLE Step 3 (1 year approved GME after third failed attempt before fourth and final attempt) for applicants who are ABMS certified.

A waiver of the 7-year time limit for completion of USMLE Steps 1, 2, and 3 is allowed for applicants who are ABMS certified, have participated in a combined MD/PhD or DO/PhD program, suffered from a documented significant health condition that by its severity would necessarily cause delay to an applicant’s medical study, or have completed continuous GME equivalent to an MD/PhD or DO/PhD program.

**Tennessee**—The board may grant an extension of the 7-year limit for completing the USMLE to an applicant who is licensed in good standing in at least three other jurisdictions and who has otherwise met the requirements for licensure.

**Texas**—All candidates, except MD/PhD graduates, must pass all examination steps within 7 years. MD/PhD graduates must pass all steps within 2 years of completing the GME required for licensure in Texas. Both of these time limits may be expanded to 10 years if the applicant 1) is ABMS or AOA Bureau of Osteopathic Specialists board certified, or 2) has been issued a faculty temporary license in Texas, has practiced under that permit for at least 12 months, and has been recommended for licensure by the institution at which the faculty temporary license was used.

In addition, although any of the three steps must be passed within three attempts, a fourth attempt is allowed on one step only, and a fifth or sixth attempt is allowed on one step only, if the applicant becomes ABMS or AOA board-certified and completes, in Texas, an additional 2 years of GME beyond what is required.

**Virgin Islands**—The USMLE is not administered; the Special Purpose Examination (SPEX) is used to evaluate physicians’ knowledge.

**Washington**—All applicants who graduated from medical school after 1993, whether within the United States or internationally, are required to pass the USMLE to qualify for licensure.

**West Virginia**—Must appear before licensure committee after three failed attempts on any step of the USMLE.

**Abbreviations**

ABMS—American Board of Medical Specialties  
ACGME—Accreditation Council for Graduate Medical Education  
AOA—American Osteopathic Association  
USMLE—United States Medical Licensing Examination  
GME—graduate medical education

* Refer to introductory text to this table for more information on this state’s regulations.

**Note:** All information should be verified with the licensing board; medical licenses are granted to those physicians meeting all state requirements—at the discretion of the board.
Initial Licensure of US Medical/Osteopathic School Graduates (Table 3)

All states require a written examination for initial licensure: generally, for MDs, the three-step United States Medical Licensing Examination (USMLE), which has replaced the Federation Licensing Examination (FLEX) and the national board examination of the National Board of Medical Examiners (NBME). Osteopathic physicians take the three-level Comprehensive Osteopathic Medical Licensing Examination (COMLEX) of the National Board of Osteopathic Medical Examiners (NBOME).

To be eligible to take USMLE Step 3, more than half of the state medical boards require graduates of US medical schools to have completed at least 1 year of graduate medical education (GME). Twenty-four boards do not require completion of any GME to take USMLE Step 3 (although in some cases a candidate must be enrolled in a GME program).

To be eligible to take COMLEX Level 3, osteopathic physicians must be currently participating in and in good standing with an AOA-accredited internship or ACGME-accredited GME program or must have successfully completed such an internship or program.

All medical and osteopathic boards require completion of at least 1 year of GME before issuing a full, unrestricted license.

Additional Notes for Specific Licensing Jurisdictions

West Virginia DO—In addition to the requirement for completion of an AOA- or ACGME-accredited program, 40 AOA hours of Osteopathic Manipulative Management and Treatment are required.

**Abbreviations**

ACGME—Accreditation Council for Graduate Medical Education
AOA—American Osteopathic Association
CFPC—College of Family Physicians of Canada
COMLEX—Comprehensive Osteopathic Medical Licensing Examination
GME—graduate medical education
RCPSC—Royal College of Physicians and Surgeons of Canada
USMLE—United States Medical Licensing Examination

**Note:** All information should be verified with the licensing board; medical licenses are granted to those physicians meeting all state requirements—at the discretion of the board.
Initial Licensure of Canadian Citizens Who Are Graduates of Accredited Canadian Medical Schools (Table 4)

When considering applications for licensure, all state medical boards consider Canadian citizens who have graduated from an accredited Canadian medical school on the same basis as graduates of accredited US medical schools.

Forty-six licensing boards endorse the Licentiate of the Medical Council of Canada (LMCC) as evidence of passing an acceptable licensing examination (applicants must also pass all other board requirements for licensure).

With the exception of Guam and the Virgin Islands, all licensing boards accept Canadian graduate medical education (GME) as equivalent to GME in a US program accredited by the Accreditation Council for Graduate Medical Education (ACGME). These rules do not uniformly apply to international medical graduates, who should refer to Table 5.

**Abbreviations**

ACGME: Accreditation Council for Graduate Medical Education  
GME: graduate medical education  
LMCC: certification by the Licensure of the Medical Council of Canada

**Note:** All information should be verified with the licensing board; licenses based on endorsement are granted to those physicians meeting all state requirements.
Initial Licensure of International Medical Graduates (IMGs) (Table 5)

All international medical graduates (IMGs) must hold a certificate from the Educational Commission for Foreign Medical Graduates (ECFMG) examination before taking Step 3 of the United States Medical Licensing Examination (USMLE).

Twenty-one boards maintain and/or use a list of approved/unapproved foreign medical schools for initial licensure decisions; several states use the list of schools from the California board (Table 9). In addition, about half of the boards require IMG candidates for endorsement of licensure to have graduated from a state-approved foreign medical school.

Thirty-nine states will endorse for licensure the Licentiate of the Medical Council of Canada (LMCC) when held by an IMG.

Nineteen state boards allow IMGs to take USMLE Step 3 before they have had GME in a US or Canadian hospital or community medical center (although some of these states require that a candidate profit program). All states, however, require at least 1 year of GME for licensure, and 28 states require 3 years. Candidates are not awarded a license until they undertake the required GME in the United States and meet other board requirements (e.g., an ECFMG certificate, personal interview, payment of fees).

Fifth Pathway

In 1971, the AMA established the Fifth Pathway, a program for US citizens studying abroad at foreign medical schools. The program requires that participants have

1. Completed, in an accredited US college or university, undergraduate premedical work of a quality acceptable for matriculation in an accredited US medical school, evaluated by measures such as college grade point average and scores on the Medical College Admission Test

2. Studied medicine in a foreign medical school located outside the United States, including Puerto Rico, and Canada that is listed in the International Medical Education Directory, available on the ECFMG Web site at www.ecfmg.org and developed and maintained by the Foundation for Advancement of International Medical Education and Research (FAIMERSM), a nonprofit foundation of the ECFMG

3. Completed all formal requirements for a diploma of the foreign medical school except internship and/or social service (Those who have completed all the formal graduation requirements of the foreign medical school, including internship and/or social service, and are consequently eligible to apply for ECFMG certification, are not eligible for the Fifth Pathway program.)

If the aforementioned criteria are met, the candidate may substitute the Fifth Pathway program for internship and/or social service in the foreign country. After receiving a Fifth Pathway certificate from an accredited US medical school, these US citizens are eligible to enter the first year of GME in the United States.

In 52 jurisdictions (exceptions are Guam and the Virgin Islands), individuals who hold Fifth Pathway certificates (but not the ECFMG certificate) are eligible for licensure. Fifth Pathway certificate holders must pass Steps 1 and 2 of the USMLE before entering a GME program accredited by the Accreditation Council for Graduate Medical Education (ACGME).  

Note: As of June 30, 2009, through action of the AMA Council on Medical Education, the Fifth Pathway has been discontinued. The Council no longer supports the Fifth Pathway as a mechanism for eligibility to enter the first year of ACGME-accredited graduate medical education programs. The AMA will continue to maintain record of former graduates of Fifth Pathway programs, but will no longer add records of individuals completing a year of supervised clinical education at an LCME-accredited medical school in the United States after July 1, 2009, although entrants beginning in January 2009 will be included.

Additional Notes for Specific Licensing Jurisdictions

California—The state maintains lists of both recognized and disapproved schools, available at:

www.mbc.ca.gov/applicant/schools_recognized.html
www.mbc.ca.gov/applicant/schools_unapproved.html

Neither education completed at nor diplomas issued by the 10 schools currently on the disapproved list will be accepted toward meeting the requirements for training and/or licensure in the state. The following list shows the name of medical school and date disapproved.

1. CETUC University, Santo Domingo (closed) May 19, 1983
2. CIFAS University, Santo Domingo (closed) November 16, 1984
3. UTESA University, Santo Domingo July 13, 1985 (disapproval reaffirmed 02-07-97)
4. World University, Santo Domingo (closed) December 1, 1989
5. Spartan Health Sciences University, St. Lucia June 13, 1985
6. University of Health Sciences Antigua, St. John's July 28, 1995
7. Universidad Eugenio Maria de Hostos (UNIREMHOST), Dominican Republic November 1, 1996
9. St. Matthew's University, Grand Cayman February 18, 2005
10. Kiigezi International School of Medicine, Cambridge, England and Uganda November 2, 2007

Florida—ECFMG certificate required for licensure if a candidate is not a graduate of a foreign medical school approved by the Florida Board of Medicine (none has yet been approved).

Idaho—No list of approved foreign medical schools is maintained, but for IMGs applying for licensure, such schools must have been in existence for at least 15 years prior to the date of application for Idaho licensure.

Kansas—Licensure applicants must have graduated from a school approved by the Board. If the school has not been approved by the Board, the applicant may still be eligible for a license if the school has not been disapproved and has been in operation (date instruction started) for not less than 15 years.

Schools approved by the Board are:

1. All schools accredited by the Liaison Committee for Medical Education (LCME)
2. Universidad Autonoma de Guadalajara, Mexico
3. Aga Khan, Pakistan
4. American University of the Caribbean, Montserrat
5. SABA University, Netherlands (for graduates who matriculated at the school from and after January 1, 2002)
6. Ziauddin Medical School (temporarily approved from 7-1-08 through 6-30-11 for postgraduate permits only)
7. Kamineni Institute of Medical Sciences (temporarily approved from 7-1-08 through 6-30-12 for postgraduate permits only)
Schools neither approved nor disapproved by the Board are:
1. SABA University, Netherlands (for graduates who matriculated at the school before 2002)

Applicants from any school disapproved by the Board are not eligible for licensure. The schools are:
1. UTESA University, Santo Domingo
2. Universidad Eugenio María de Hostos (UNIREMHOST), Dominican Republic
3. St. Matthew’s University, Grand Cayman

For more information, see:
www.ksbha.org/medicalschoolsapprovedunapproved.html

Maine—GME taken in Canada or the British Isles (accredited by a national body deemed equivalent to ACGME) may be considered qualifying on an individual basis.

Maryland—In addition to 2 years of ACGME- or Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited GME required for licensure, 1 year of GME required if a candidate failed any part of an examination three times; no more than three failures permitted.

Mississippi—ABMS board certification required for candidates who completed the Fifth Pathway.

Nevada—A formal list of approved/unapproved medical schools is not maintained; the board does, however, have an internal list of questionable medical schools.

New Jersey—An individual’s educational experience must meet certain eligibility requirements.

North Carolina—Less than 3 years of GME may be accepted if applicant is certified by an ABMS or AOA specialty board or holds the CFPC, FRCP, or FRCS.

North Dakota—Three years of US or Canadian GME is required for licensure; if a candidate has not completed 3 years of GME but has met all other licensing requirements and has completed 1 year of GME in the United States or Canada in a board-approved program, and if the board finds that the candidate has other professional experience and training substantially equivalent to the second and third years of GME, the candidate may be deemed eligible for licensure (upon passing SPEX or ABMS board certification).

Oregon—IMG candidates for licensure must have completed at least 3 years of progressive GME in not more than two specialties in not more than two US or Canadian hospitals accredited for such training.

Pennsylvania—The board will grant unrestricted license by endorsement to a candidate who does not meet standard requirements if the candidate has achieved cumulative qualifications that are endorsed by the board as being equivalent to the standard license requirements.

South Carolina—ABMS/AOA board certification required for candidates who completed the Fifth Pathway.

South Dakota—No list of approved/unapproved foreign medical schools is maintained; decisions made on a case-by-case basis.

Texas—Canadian graduates of LCME-accredited schools are considered equivalent to US graduates for educational and post-graduate training requirements.

**Note:** All information should be verified with the licensing board; licenses are granted to those physicians meeting all state requirements—at the discretion of the board.
Medical Student Clerkship Regulations

(Table 6)

For purposes of this publication, a clerkship is defined as clinical education provided to medical students. Ten states evaluate clinical clerkships in connection with an application for licensure. In most states, clerkships for US medical students must take place in hospitals affiliated with medical schools accredited by the Liaison Committee on Medical Education (LCME).

A number of states have special rules that apply to students of non-LCME-accredited medical schools in the Caribbean, the majority of which complete their clinical clerkships in US hospitals and teaching institutions.

For example, Texas (as noted below) requires that the clerkship(s) must be performed in a hospital or teaching institution sponsoring or participating in a graduate medical education (GME) program accredited, at the time the applicant performed the clerkship, by the Accreditation Council for Graduate Medical Education (ACGME), American Osteopathic Association (AOA), or the board in the same subject (e.g., the exact same specialty or subspecialty). Required core (or fundamental) clinical clerkships are:

- Internal medicine
- Obstetrics-gynecology
- Pediatrics
- Psychiatry
- Family medicine
- Surgery

Eight boards regulate clerkships provided in their states to students of foreign medical schools (including US citizens studying medicine in foreign schools). For purposes of licensure, eight states accept only those clerkships completed in hospital departments with ACGME-accredited programs.

Additional Notes for Specific Licensing Jurisdictions

**Florida**—Rules on clinical clerkships for international medical graduates adopted by the Florida Board before October 1986 do not apply to any graduate who had already completed a clinical clerkship or who had begun a clinical clerkship, as long as the clerkship was completed within 3 years.

A foreign medical school must be registered with the Florida Department of Education for its students to perform clinical clerkships in Florida.

**Illinois**—Students who complete a core clerkship rotation in a clinical teaching facility that was formally affiliated or under contract with the medical college which conferred their degree must submit a copy of each affiliation agreement between the medical college and each clinical teaching facility. Further, the affiliation agreement must be substantiated by submission of an evaluation form completed by the supervising physician for each core clerkship rotation completed.

**Michigan**—The medical education program must have included clinical science rotations in internal medicine, general surgery, pediatrics, obstetrics-gynecology, and psychiatry, all completed in a teaching hospital (defined as a hospital that offers a residency program in the same content area of the clerkship).

**New Jersey**—For students from foreign medical schools who complete clinical clerkships in the US, the core clerkships (internal medicine, obstetrics-gynecology, pediatrics, psychiatry, and surgery) must be completed (minimum of 4 weeks in each) at facilities with an ACGME- or AOA-accredited residency program in the specific specialty.

**Texas**—All 72 weeks of rotations must be performed 1) as a student in an accredited medical or osteopathic school, or 2) in a hospital or teaching institution sponsoring or participating in a GME program accredited by the ACGME, the AOA, or the board in the same specialty or subspecialty as the medical or osteopathic medical education. The only exception is for applicants who are American Board of Medical Specialties (ABMS) or AOA Bureau of Osteopathic Specialists specialty board certified.

</tbody>
</table>

Clerkships must total at least 72 weeks, with at least 40 weeks of instruction in core clinical courses of surgery (minimum of 8 weeks of instruction), medicine (8 weeks), pediatrics (6 weeks), obstetrics-gynecology (6 weeks), family medicine (4 weeks), and psychiatry (4 weeks). Clinical study in the US must be in hospitals with ACGME-accredited programs in the area of the clinical study. Applicants who completed one or more clinical clerkships in a country other than where their medical school is located must complete Form 2CC, “Certification of Approved Clinical Clerkship.”

**Abbreviations**

ACGME—Accreditation Council for Graduate Medical Education

AOA—American Osteopathic Association

CMA—Canadian Medical Association

RCPSC—Royal College of Physicians and Surgeons of Canada

**Note:** All information should be verified with the licensing board; medical licenses are granted to those physicians meeting all state requirements—at the discretion of the board.
Additional Policies Concerning International Medical Graduates (IMGs) and Doctors of Osteopathic Medicine (DOs) (Table 7)

A number of state medical boards have additional graduate medical education (GME) and specialty certificate policies for international medical graduates (IMGs). Fourteen states have requirements for appointment to GME programs other than requiring an Educational Commission for Foreign Medical Graduates (ECFMG) certificate or a limited license.

Seven boards—Connecticut, Maine, Nebraska, Ohio, Oklahoma, Rhode Island, and Texas—indicated that GME completed in foreign countries other than Canada may be considered for credit toward a license. Specialty certificates of foreign boards, such as the Royal College of Physicians in the United Kingdom, may be accepted for credit toward a license in 10 states.

Thirty-nine medical boards accept GME accredited by the Accreditation Council for Graduate Medical Education (ACGME) for licensure of osteopathic medical graduates.

Additional Notes for Specific Licensing Jurisdictions

**Maine**—The board may accept GME completed in England, Scotland, and Ireland for credit toward a license, if it is accepted by the specialty board as meeting board eligibility in the United States and notified via certified letter.

**Pennsylvania**—IMGs seeking appointment to a GME program need a passing score on United States Medical Licensing Examination (USMLE) Steps 1 and 2, or National Board of Medical Examiners (NBME) Parts I and II or Federation Licensing Examination (FLEX) Component 1, for graduate year 2 medical education; for graduate year 3 and beyond, all parts of USMLE (or NBME or FLEX) are required.

**Texas**—Licensure applicant may use 1 year of GME completed outside US/Canada toward 3-year requirement if that year was approved for advanced standing by an ABMS specialty board.

**Wisconsin**—Temporary educational permit is required of IMGs for a second year of GME (and beyond), unless IMG has a permanent license. Board may accept training in lieu of GME by waiver.

- NBME—certificate of the National Board of Medical Examiners
- RCPSC—Royal College of Physicians and Surgeons of Canada
- USMLE—United States Medical Licensing Examination

* Refer to introductory text to this table for more information on this state’s regulations.

**Note:** All information should be verified with the licensing board; medical licenses are granted to those physicians meeting all state requirements—at the discretion of the board.
Both the AMA and the Accreditation Council for Graduate Medical Education (ACGME) define a residency as graduate medical education (GME) that takes place in any of the medical specialties with ACGME Program Requirements (e.g., internal medicine, pediatrics, surgery). Beginning in 2000, the ACGME has used the term fellowship to denote GME in ACGME-accredited subspecialty programs (e.g., cardiovascular disease, hand surgery, rheumatology) that is beyond the requirements for eligibility for first board certification in the discipline.

All state medical boards accept residency education in specialty programs accredited by the ACGME as satisfying their GME requirements for licensure. Fifty-four jurisdictions—all except Arkansas, Michigan (DO), and Puerto Rico—accept residency education in subspecialty programs accredited by ACGME as satisfying their GME requirements for licensure.

Ten boards accept clinical fellowships not accredited by ACGME, and three boards—Hawaii, New York, and North Carolina—may accept research fellowships not accredited by ACGME to satisfy the GME requirement for licensure.

**Note:** All information should be verified with licensing board; medical licenses are granted to those physicians meeting all state requirements—at the discretion of the board.
Licensure Requirement Exemptions for Eminent Physicians and Medical School Faculty (Table 9)

Seventeen boards license physicians through recognition of eminence in medical education or medical practice. For example, Maryland, one of the jurisdictions that licenses physicians through this mechanism, defines “Conceded eminence and authority in the profession” as “significant teaching, research, and achievement in a field of medicine recognized by the Board” (see www.mbp.state.md.us/forms/concede.pdf).

In Maryland, applicants seeking licensure by eminence must meet at least three of the following qualifications:

1. Within 10 years before the application, have published original results of clinical research in a medical journal listed in the Index Medicus or in an equivalent scholarly publication, and have submitted these articles to the Board in English or in a foreign language with verifiable, certified translations in English;

2. Have held an appointment at a medical school approved by the LCME or at any medical school listed in the World Health Organization directory at the level of associate or full professor, or its equivalent, for at least 5 years;

3. Within 10 years before the application, have developed a treatment modality, surgical technique, or other verified original contribution to the field of medicine, which is attested to by the dean of a school of medicine in the state or by the director of the National Institutes of Health;

4. Have actively practiced medicine cumulatively for 15 years, which may include up to 5 years sabbatical during which the applicant was involved in research; and

5. Be a member in good standing of a board of the American Board of Medical Specialties or other equivalent specialty board.

Physicians appointed to a medical school faculty are excused from the graduate medical education (GME) requirement for limited licensure in 21 states and from the examination requirement for limited licensure or teaching certification in 20 states. These faculty appointees would, however, receive a limited license or similar credential.

- USMLE—United States Medical Licensing Examination

**Note:** All information should be verified with the licensing board; medical licenses are granted to those physicians meeting all state requirements—at the discretion of the board.
Teaching (Visiting Professor) Licenses (Table 10)

Forty jurisdictions issue teaching (visiting professor) licenses, with fees ranging from $0 to $400.

These permits are granted for various periods of time; for example, Arizona (both the MD and DO boards) offer a teaching license valid for 1 year, which may be renewed for up to 4 years; California awards renewable certificates of registration for 1 to 3 years; Illinois offers visiting professor permits valid for up to 2 years; Oregon offers a 1-year limited license for either visiting professors or medical faculty that can be renewed for 1 additional year or 3 additional years, respectively.

Awarding of these licenses may be contingent on certain requirements, depending on the given jurisdiction.

For example, Washington state requires 1) a letter of nomination by the dean of the University of Washington medical school or CEO of a hospital or other appropriate health care facility and 2) proof of current licensure in another state or country.

**Abbreviations**

CME—continuing medical education  
GME—graduate medical education

**Note:** All information should be verified with licensing board; medical licenses are granted to those physicians meeting all state requirements—at the discretion of the board.
Resident/Fellow Physician Licenses (Table 11)

Sixty-six boards issue educational licenses, permits, certificates, or registration to resident/fellow physicians in graduate medical education (GME) programs, with fees ranging from $0 to $425 per year. (The GME program director generally provides a list of residents/fellows and any other required information directly to the licensing jurisdiction.) For 39 of those boards, residents/fellows must obtain a new permit/license when changing residency/fellowship programs within the state.

Medical boards in 15 states require that prospective residents have passed United States Medical Licensing Examination (USMLE) Step 1 to receive a permit/license. California, Mississippi, North Dakota, Oklahoma, and Utah require passage of Steps 1 and 2.

Seventeen states require that resident/fellow physicians obtain full licensure (not limited or training licenses) at some point in their training (usually after having completed a certain number of years of GME).

Additional Notes for Specific Licensing Jurisdictions

California—Permits are awarded on an individual basis for a maximum of 5 years to noncitizen physicians for postgraduate work in a California medical school.

International medical graduates (IMGs) must submit an application to determine that all core requirements have been met before they may begin training in California.

Illinois—Limited temporary licenses (valid for 6 months) are awarded to persons in non-Illinois residency programs who are accepted for a specific period of time to perform a portion of that program at a clinical residency program in Illinois due to the lack of adequate facilities in their state.

Visiting Resident Permits are issued for 180 days to persons who have been invited or appointed for a specific period of time to perform a portion of that clinical residency program under the supervision of an Illinois-licensed physician in an Illinois patient care clinic or facility affiliated with the out-of-state GME program.

Massachusetts—Limited registration is issued to physicians enrolled in accredited residency programs and physicians enrolled in fellowships at hospitals with accredited residency programs in the area of the applicant’s specialty.

Mississippi—Institutional license is issued to first-year residents and IMGs providing health care in state institutions. Applicants are not required to meet all requirements for permanent unrestricted licensure.

Restricted temporary license is issued to physicians enrolled in first year of GME at the University of Mississippi School of Medicine for practice limited to that school.

Addictionology Fellowship License is issued to physicians admitted for treatment in a board-approved drug and/or alcohol addiction treatment program or to physicians enrolled in fellowship of addictionology of the Mississippi State Medical Association Impaired Professionals Program.

Oregon—Limited license granted to fellows for 1 year and renewed for 1 additional year. Limited license for graduate training granted annually until training is completed.

Pennsylvania—Interim limited license (up to 12 consecutive months) is issued to physicians providing medical service other than at the training location of the licensee's accredited GME program.

Graduate license allows for participation for up to 12 consecutive months in GME within the complex of the hospital to which the licensee is assigned and any satellite facility or other training location used in the program.

South Dakota—Resident physicians practicing within the confines of their residency program are required to obtain a resident training permit from the board.

A resident physician who wishes to practice on an irregular basis outside their program may apply for a resident certificate if they have completed at least 1 year of GME and remain enrolled in good standing in their program until successful completion. To apply for this certificate, they must meet South Dakota’s examination requirements for completion of the entire USMLE within a 7-year period and passing of each step within three attempts. The fee for this certificate is $50.

2011 Membership Application

Activate your AMA membership today.

Call: (800) 262-3211
Fax: (800) 262-3221
Mail: American Medical Association
PO Box 4198
Carol Stream, IL 60197-9788
Online: www.ama-assn.org

Membership categories and dues rates

Physician
- $420 Regular medical practice
- $315 Second year in medical practice
- $210 First year in medical practice
- $280 Military/government service
  (If military, please indicate the branch of service above)
- $210 Semi-retired
  (65 and over, working 1–20 hours a week)
- $84 Fully retired
  (Age not withstanding—working 0 hours)

Intern/resident/fellow
- $45 One-year membership
  Up to 12.5% multi-year discount available online

Medical student
- $20 One-year membership
  Up to 17% multi-year discount available online

A physician or medical student who applies for direct membership in the AMA is encouraged to also join his/her state and local medical societies.

Applying for AMA membership: Membership is contingent upon the American Medical Association’s (AMA) acceptance of the membership application. The endorsement, deposit or negotiation of an applicant’s check does not guarantee admission into or acceptance of membership by the AMA. Checks received will routinely be deposited without a determination of the propriety of the payment or the applicability of the amount. Applicants who are not admitted to membership will receive a refund from the AMA for the amount submitted.

AMA dues are not deductible as a charitable contribution for federal income tax purposes, but may be partially deducted as a business expense. AMA estimates that 65% of your membership dues are allocable to lobbying activities of the AMA, and therefore are not deductible for income tax purposes.

The AMA provides timely news, information about AMA products and services, and other communications targeted to meet the needs of physicians. To receive these communications, please add or update your e-mail address below.

My e-mail address is: ____________________________

First name (please print) _________________________ Middle initial _______ Last name _______________________

Preferred professional mailing address (Home  Office  Both)

City ______________________ State ______ ZIP _______

Office phone ______________________ Fax _______

Date of birth (to aid in tracking/identification) _______

Military branch of service ___________________________

Outreach recruiter name (if applicable) ________________________

International medical student graduates*

(See below for important information.)

Method of payment (see rate chart on left)

☐ Check (Please make your check payable to: American Medical Association)
☐ Please charge my:  ☐ Visa  ☐ MasterCard  ☐ American Express

Signature __________________________

Credit card number __________________________ Expiration date __________

Credit card holders are eligible for print copies of JAMA and American Medical News. For the 2011 membership year, the allocated costs of $34 for JAMA and $14 for American Medical News are included in, and not deductible from AMA membership dues. All members receive free online access to JAMA, American Medical News, and the Archives journals. In addition, all members are eligible to receive AMA Morning Rounds.

Conditions of AMA membership and application:

As part of a physician organization committed to strengthening the ethics of medicine, every member pledges to uphold the Principles of Medical Ethics as interpreted in the Code of Medical Ethics, and to comply with the Bylaws of the American Medical Association and the Rules of the AMA Council of Ethical and Judicial Affairs.

- The AMA Principles and the Code of Medical Ethics may be viewed online at: www.ama-assn.org/go/codeofmedicalethics
- The AMAs Bylaws and Rules of the Council on Ethical and Judicial Affairs are accessible at: www.ama-assn.org/go/ecja

Applicants and members are required to disclose to the AMA Office of General Counsel any violations of the Principles of Medical Ethics or illegal conduct. Additionally, the Health Care Quality Improvement Act requires professional societies (such as the AMA) to report certain professional review actions, including denial of membership, to the National Practitioner Data Bank.

International medical student graduates are eligible for AMA membership upon receiving ECFMG certification (have graduated from an international or U.S. medical school and have taken and passed the USMLE Step 1 and Step 2.) Visit online at: www.ama-assn.org/go/ecfmg

Questions regarding membership can be directed to AMA Member Relations at (800) 262-3211. Representatives are available 24 hours a day, 7 days a week.
