

## Accreditation Council for Graduate Medical Education

### Plastic Surgery - Independent Case Logs

#### National Data Report

**Prepared by:** Department of Applications and Data Analysis

- I. National Resident Statistics Main Table
  - A. This main table provides a national picture of educational experiences. The report is ideal for establishing and assessing national policy related to resident practical experiences. Data is broken out by resident role.
  - B. Descriptive statistics have been carefully chosen to provide the most useful information for judging performance at that national level.
    - i. "Natl Res AVE" - The national average describes the mean number of procedures performed per resident in the nation.
    - ii. "Natl Res STD" - The standard deviation indicates how tightly the scores are clustered around the mean in the set of data.
    - iii. "Natl Res MED" - The median value among procedure counts in the nation.
    - iv. "Natl Res MODE" - The most commonly occurring value among procedure counts in the nation.
    - v. "Natl Res MIN" - The minimum value among procedure counts in the nation.
    - vi. "Natl Res MAX" - The maximum value seen among procedure counts in the nation.
    - vii. "Natl Res SUM" - This statistics represents the sum of all procedure counts in the nation.
- II. National Benchmark Table for Resident Statistics

The table displays selected percentile benchmarks of program averages. For example, a score at the 10th percentile indicates that 10% of residents achieved less than the value while the remaining 90% achieved more than the value.
