Pediatric Surgery Case Logs

National Data Report

Prepared by: Department of Applications and Data Analysis

- I. National Resident Statistics Main Table
 - A. This main table provides a national picture of educational experiences. The report is ideal for establishing and assessing national policy related to resident practical experiences. Data is broken out by resident role.
 - B. Descriptive statistics have been carefully chosen to provide the most useful information for judging performance at that national level.
 - i. "Natl Res AVE" — The national average describes the mean number of procedures performed per resident in the nation.
 - ii. "Natl Res STD" — The standard deviation indicates how tightly the scores are clustered around the mean in the set of data.
 - iii. "Natl Res MED" — The median value among procedure counts in the nation.
 - iv. "Natl Res MODE" — The most commonly occurring value among procedure counts in the nation.
 - v. "Natl Res MIN" — The minimum value among procedure counts in the nation.
 - vi. "Natl Res MAX" — The maximum value seen among procedure counts in the nation.
 - vii. "Natl Res SUM" — This statistics represents the sum of all procedure counts in the nation.
