VI.F. Clinical Experience and Education .....	52

52 **Int.C. Length of Educational Program**

53  
54 The educational program in child neurology must be 36 months in length. <sup>(Core)\*</sup>

55  
56 **I. Oversight**

57  
58 **I.A. Sponsoring Institution**

59  
60 *The Sponsoring Institution is the organization or entity that assumes the*  
61 *ultimate financial and academic responsibility for a program of graduate*  
62 *medical education, consistent with the ACGME Institutional Requirements.*

63  
64 *When the Sponsoring Institution is not a rotation site for the program, the*  
65 *most commonly utilized site of clinical activity for the program is the*  
66 *primary clinical site.*

67

**Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the residents. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.**

68

69 **I.A.1. The program must be sponsored by one ACGME-accredited**  
70 **Sponsoring Institution. <sup>(Core)</sup>**

71

72 **I.B. Participating Sites**

73

74 *A participating site is an organization providing educational experiences or*  
75 *educational assignments/rotations for residents.*

76

77 **I.B.1. The program, with approval of its Sponsoring Institution, must**  
78 **designate a primary clinical site. <sup>(Core)</sup>**

79

80 I.B.1.a) The Sponsoring Institution or participating sites must also sponsor  
81 Accreditation Council for Graduate Medical Education (ACGME)-  
82 accredited residency programs in pediatrics and neurology. <sup>(Core)</sup>  
83 [Moved from I.A.1.]

84

85 I.B.1.b) Child neurology education must be conducted in centers where  
86 there is active ongoing research in both clinical and basic  
87 neuroscience fields. <sup>(Detail)†</sup> [Moved from IV.B.8]

88

89 **I.B.2. There must be a program letter of agreement (PLA) between the**  
90 **program and each participating site that governs the relationship**  
91 **between the program and the participating site providing a required**  
92 **assignment. <sup>(Core)</sup>**

93

94 I.B.2.a) The PLA must:  
95  
96 I.B.2.a).(1) be renewed at least every 10 years; and, (Core)  
97  
98 I.B.2.a).(2) be approved by the designated institutional official  
99 (DIO). (Core)

100  
101 I.B.3. The program must monitor the clinical learning and working  
102 environment at all participating sites. (Core)

103  
104 I.B.3.a) At each participating site there must be one faculty member,  
105 designated by the program director as the site director, who  
106 is accountable for resident education at that site, in  
107 collaboration with the program director. (Core)  
108

**Background and Intent: While all residency programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites the program must ensure the quality of the educational experience. The requirements under I.B.3. are intended to ensure that this will be the case.**

**Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:**

- Identifying the faculty members who will assume educational and supervisory responsibility for residents
- Specifying the responsibilities for teaching, supervision, and formal evaluation of residents
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern resident education during the assignment

109  
110 I.B.4. The program director must submit any additions or deletions of  
111 participating sites routinely providing an educational experience,  
112 required for all residents, of one month full time equivalent (FTE) or  
113 more through the ACGME's Accreditation Data System (ADS). (Core)  
114

115 I.C. The program, in partnership with its Sponsoring Institution, must engage in  
116 practices that focus on mission-driven, ongoing, systematic recruitment  
117 and retention of a diverse and inclusive workforce of residents, fellows (if  
118 present), faculty members, senior administrative staff members, and other  
119 relevant members of its academic community. (Core)  
120

**Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must**

**include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).**

- 121  
122 **I.D. Resources**  
123  
124 **I.D.1. The program, in partnership with its Sponsoring Institution, must**  
125 **ensure the availability of adequate resources for resident education.**  
126 **(Core)**  
127  
128 I.D.1.a) Facilities [Moved from II.D.2.]  
129  
130 I.D.1.a).(1) There must be adequate inpatient and outpatient facilities,  
131 examining areas, chart and record-keeping systems for  
132 use in patient treatment, conference rooms, and research  
133 laboratories. **(Core)** [Moved from II.D.2.a)]  
134  
135 I.D.1.a).(2) There must be adequate space for faculty offices. **(Core)**  
136 [Moved from II.D.2.b)]  
137  
138 I.D.1.a).(3) There must be space for study, chart work, and dictation.  
139 **(Core)** [Moved from II.D.2.c)]  
140  
141 I.D.1.a).(4) There must be state-of-the-art clinical laboratory facilities  
142 that report rapidly the results of necessary laboratory  
143 evaluations, including clinical-pathological,  
144 electrophysiological, imaging, and other studies needed by  
145 neurological services. **(Core)** [Moved from II.D.2.d)]  
146  
147 **I.D.2. The program, in partnership with its Sponsoring Institution, must**  
148 **ensure healthy and safe learning and working environments that**  
149 **promote resident well-being and provide for:** **(Core)**  
150  
151 **I.D.2.a) access to food while on duty;** **(Core)**  
152  
153 **I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available**  
154 **and accessible for residents with proximity appropriate for**  
155 **safe patient care;** **(Core)**  
156

**Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that residents function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while residents are working. Residents should have access to refrigeration where food may be stored. Food should be available when residents are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued resident.**

- 157  
158 **I.D.2.c) clean and private facilities for lactation that have refrigeration**  
159 **capabilities, with proximity appropriate for safe patient care;**  
160 **(Core)**

161

**Background and Intent: Sites must provide private and clean locations where residents may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the resident with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the resident and the resident's family, as outlined in VI.C.1.d).(1).**

162

163 **I.D.2.d) security and safety measures appropriate to the participating**  
164 **site; and, <sup>(Core)</sup>**

165

166 **I.D.2.e) accommodations for residents with disabilities consistent**  
167 **with the Sponsoring Institution's policy. <sup>(Core)</sup>**

168

169 **I.D.3. Residents must have ready access to specialty-specific and other**  
170 **appropriate reference material in print or electronic format. This**  
171 **must include access to electronic medical literature databases with**  
172 **full text capabilities. <sup>(Core)</sup>**

173

174 **I.D.4. The program's educational and clinical resources must be adequate**  
175 **to support the number of residents appointed to the program. <sup>(Core)</sup>**

176

177 **I.D.4.a) The number and type of patients must be appropriate to support**  
178 **resident education. <sup>(Core)</sup> [Moved from II.D.1.]**

179

180 **I.D.4.a).(1) The patient population must be diversified as to age and**  
181 **sex, short- and long-term neurologic problems, and**  
182 **inpatients and outpatients. <sup>(Core)</sup> [Moved from II.D.1.a)]**

183

184 **I.D.4.b) The number of residents appointed to the program must be**  
185 **commensurate with the educational resources specifically**  
186 **available to the residents in terms of faculty, the number and**  
187 **variety of patient diagnoses, and the availability of basic science**  
188 **and research education. <sup>(Detail)</sup> [Moved from III.B.2.]**

189

190 **I.E. The presence of other learners and other care providers, including, but not**  
191 **limited to, residents from other programs, subspecialty fellows, and**  
192 **advanced practice providers, must enrich the appointed residents'**  
193 **education. <sup>(Core)</sup>**

194

195 **I.E.1. The program must report circumstances when the presence of other**  
196 **learners has interfered with the residents' education to the DIO and**  
197 **Graduate Medical Education Committee (GMEC). <sup>(Core)</sup>**

198

**Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor**

the learning environment to ensure that residents' education is not compromised by the presence of other providers and learners.

209  
210  
211  
212  
213

**II. Personnel**

**II.A. Program Director**

**II.A.1. There must be one faculty member appointed as program director with authority and accountability for the overall program, including compliance with all applicable program requirements. (Core)**

**II.A.1.a) The Sponsoring Institution's GMEC must approve a change in program director. (Core)**

**II.A.1.b) Final approval of the program director resides with the Review Committee. (Core)**

**Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a residency, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the residency, and it is this individual's responsibility to communicate with the residents, faculty members, DIO, GMEC, and the ACGME. The program director's nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.**

214  
215  
216  
217  
218

**II.A.1.c) The program must demonstrate retention of the program director for a length of time adequate to maintain continuity of leadership and program stability. (Core)**

**Background and Intent: The success of residency programs is generally enhanced by continuity in the program director position. The professional activities required of a program director are unique and complex and take time to master. All programs are encouraged to undertake succession planning to facilitate program stability when there is necessary turnover in the program director position.**

219  
220  
221  
222  
223  
224  
225  
226  
227  
228  
229  
230  
231  
232

**II.A.2. At a minimum, the program director must be provided with the salary support required to devote 20 percent FTE (at least eight hours per week) of non-clinical time to the administration of the program. (Core)**

**II.A.2.a) ~~At a minimum, the Sponsoring Institution must provide at least 20 percent full-time equivalent (FTE) time and funding support for~~ The program director must be provided with an additional one percent per resident FTE for each resident in the program. (Core)  
[Moved from I.A.2.]**

**II.A.3. Qualifications of the program director:**

233 II.A.3.a) must include specialty expertise and at least three years of  
234 documented educational and/or administrative experience, or  
235 qualifications acceptable to the Review Committee; <sup>(Core)</sup>  
236

**Background and Intent:** Leading a program requires knowledge and skills that are established during residency and subsequently further developed. The time period from completion of residency until assuming the role of program director allows the individual to cultivate leadership abilities while becoming professionally established. The three-year period is intended for the individual's professional maturation.

The broad allowance for educational and/or administrative experience recognizes that strong leaders arise through diverse pathways. These areas of expertise are important when identifying and appointing a program director. The choice of a program director should be informed by the mission of the program and the needs of the community.

In certain circumstances, the program and Sponsoring Institution may propose and the Review Committee may accept a candidate for program director who fulfills these goals but does not meet the three-year minimum.

237  
238 II.A.3.b) must include current certification in the specialty for which  
239 they are the program director by the American Board of  
240 Neurology and Psychiatry or by the American Osteopathic  
241 Board of Neurology and Psychiatry, or specialty qualifications  
242 that are acceptable to the Review Committee; <sup>(Core)</sup>  
243

244 II.A.3.c) must include current medical licensure and appropriate  
245 medical staff appointment; and, <sup>(Core)</sup>  
246

247 II.A.3.d) must include ongoing clinical activity. <sup>(Core)</sup>  
248

**Background and Intent:** A program director is a role model for faculty members and residents. The program director must participate in clinical activity consistent with the specialty. This activity will allow the program director to role model the Core Competencies for the faculty members and residents.

249  
250 II.A.4. Program Director Responsibilities  
251

252 The program director must have responsibility, authority, and  
253 accountability for: administration and operations; teaching and  
254 scholarly activity; resident recruitment and selection, evaluation,  
255 and promotion of residents, and disciplinary action; supervision of  
256 residents; and resident education in the context of patient care. <sup>(Core)</sup>  
257

258 II.A.4.a) The program director must:

259  
260 II.A.4.a).(1) be a role model of professionalism; <sup>(Core)</sup>  
261

**Background and Intent:** The program director, as the leader of the program, must serve as a role model to residents in addition to fulfilling the technical aspects of the role. As residents are expected to demonstrate compassion, integrity, and respect for

others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

262  
263  
264  
265  
266  
267

- II.A.4.a).(2) design and conduct the program in a fashion consistent with the needs of the community, the mission(s) of the Sponsoring Institution, and the mission(s) of the program; <sup>(Core)</sup>

**Background and Intent:** The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

268  
269  
270  
271  
272

- II.A.4.a).(3) administer and maintain a learning environment conducive to educating the residents in each of the ACGME Competency domains; <sup>(Core)</sup>

**Background and Intent:** The program director may establish a leadership team to assist in the accomplishment of program goals. Residency programs can be highly complex. In a complex organization, the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

273

284  
285  
286  
287  
288  
289  
290

- II.A.4.a).(4) develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the residency program education and at least annually thereafter, as outlined in V.B.; <sup>(Core)</sup>

- II.A.4.a).(5) have the authority to approve program faculty members for participation in the residency program education at all sites; <sup>(Core)</sup>

- II.A.4.a).(6) have the authority to remove program faculty members from participation in the residency program education at all sites; <sup>(Core)</sup>

- II.A.4.a).(7) have the authority to remove residents from supervising interactions and/or learning environments that do not meet the standards of the program; <sup>(Core)</sup>

**Background and Intent:** The program director has the responsibility to ensure that all who educate residents effectively role model the Core Competencies. Working with a resident is a privilege that is earned through effective teaching and professional role

modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

308  
309  
310  
311  
312  
313  
314
- II.A.4.a).(8) submit accurate and complete information required and requested by the DIO, GMEC, and ACGME; <sup>(Core)</sup>
  - II.A.4.a).(9) provide applicants who are offered an interview with information related to the applicant’s eligibility for the relevant specialty board examination(s); <sup>(Core)</sup>
  - II.A.4.a).(10) provide a learning and working environment in which residents have the opportunity to raise concerns and provide feedback in a confidential manner as appropriate, without fear of intimidation or retaliation; <sup>(Core)</sup>
  - II.A.4.a).(11) ensure the program’s compliance with the Sponsoring Institution’s policies and procedures related to grievances and due process; <sup>(Core)</sup>
  - II.A.4.a).(12) ensure the program’s compliance with the Sponsoring Institution’s policies and procedures for due process when action is taken to suspend or dismiss, not to promote, or not to renew the appointment of a resident; <sup>(Core)</sup>

**Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution’s policies and procedures, and will ensure they are followed by the program’s leadership, faculty members, support personnel, and residents.**

- 315  
316  
317  
318  
319  
320  
321  
322  
323  
324  
325  
326  
327  
328  
329  
330
- II.A.4.a).(13) ensure the program’s compliance with the Sponsoring Institution’s policies and procedures on employment and non-discrimination; <sup>(Core)</sup>
  - II.A.4.a).(13).(a) Residents must not be required to sign a non-competition guarantee or restrictive covenant. <sup>(Core)</sup>
  - II.A.4.a).(14) document verification of program completion for all graduating residents within 30 days; <sup>(Core)</sup>
  - II.A.4.a).(15) provide verification of an individual resident’s completion upon the resident’s request, within 30 days; and, <sup>(Core)</sup>

**Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of residents who have previously completed the program. Residents who leave the program prior to completion also require timely documentation of their summative evaluation.**

- 331  
 332 **II.A.4.a).(16)** obtain review and approval of the Sponsoring  
 333 Institution’s DIO before submitting information or  
 334 requests to the ACGME, as required in the Institutional  
 335 Requirements and outlined in the ACGME Program  
 336 Director’s Guide to the Common Program  
 337 Requirements. <sup>(Core)</sup>  
 338  
 339 ~~II.A.4.a).(17)~~ ensure supervision of residents through explicit written  
 340 descriptions of supervisory lines of responsibility for patient  
 341 care; <sup>(Core)</sup> [Moved from II.A.4.p)]  
 342  
 343 ~~II.A.4.a).(17).(a)~~ Such guidelines must be communicated to all  
 344 members of the program staff. <sup>(Core)</sup> [Moved from  
 345 II.A.4.p).(1)]  
 346  
 347 ~~II.A.4.a).(17).(b)~~ Residents must be provided with prompt, reliable  
 348 systems for communication and interaction with  
 349 supervisory physicians. <sup>(Core)</sup> [Moved from  
 350 II.A.4.p).(2)]  
 351  
 352 ~~II.A.4.a).(18)~~ develop criteria to use in assessing whether the program’s  
 353 goals and objectives are met; <sup>(Detail)</sup> [Moved from II.A.4.q)]  
 354  
 355 ~~II.A.4.a).(19)~~ monitor resident stress, including mental or emotional  
 356 conditions inhibiting performance of learning, and drug or  
 357 alcohol-related dysfunction; and, <sup>(Core)</sup> [Moved from II.A.4.r)]  
 358  
 359 ~~II.A.4.a).(19).(a)~~ Situations that demand excess service or that  
 360 consistently produce undesirable stress on  
 361 residents must be recognized and resolved. <sup>(Core)</sup>  
 362 [Moved from II.A.4.r).(1)]  
 363  
 364 ~~II.A.4.a).(20)~~ approve the 12 months of adult neurology education. <sup>(Detail)</sup>  
 365 [Moved from II.A.4.s)]  
 366  
 367 **II.A.4.b)** The program director should attend at least one national program  
 368 director meeting per year. <sup>(Detail)</sup> [Moved from II.A.5.]  
 369  
 370 **II.B. Faculty**  
 371  
 372 ***Faculty members are a foundational element of graduate medical education***  
 373 ***– faculty members teach residents how to care for patients. Faculty***  
 374 ***members provide an important bridge allowing residents to grow and***  
 375 ***become practice-ready, ensuring that patients receive the highest quality of***

376 *care. They are role models for future generations of physicians by*  
377 *demonstrating compassion, commitment to excellence in teaching and*  
378 *patient care, professionalism, and a dedication to lifelong learning. Faculty*  
379 *members experience the pride and joy of fostering the growth and*  
380 *development of future colleagues. The care they provide is enhanced by*  
381 *the opportunity to teach. By employing a scholarly approach to patient*  
382 *care, faculty members, through the graduate medical education system,*  
383 *improve the health of the individual and the population.*

384  
385 *Faculty members ensure that patients receive the level of care expected*  
386 *from a specialist in the field. They recognize and respond to the needs of*  
387 *the patients, residents, community, and institution. Faculty members*  
388 *provide appropriate levels of supervision to promote patient safety. Faculty*  
389 *members create an effective learning environment by acting in a*  
390 *professional manner and attending to the well-being of the residents and*  
391 *themselves.*  
392

**Background and Intent: “Faculty” refers to the entire teaching force responsible for educating residents. The term “faculty,” including “core faculty,” does not imply or require an academic appointment or salary support.**

393  
394 **II.B.1. At each participating site, there must be a sufficient number of**  
395 **faculty members with competence to instruct and supervise all**  
396 **residents at that location. (Core)**  
397

398 **II.B.2. Faculty members must:**  
399

400 **II.B.2.a) be role models of professionalism; (Core)**  
401

402 **II.B.2.b) demonstrate commitment to the delivery of safe, quality,**  
403 **cost-effective, patient-centered care; (Core)**  
404

**Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.**

405  
406 **II.B.2.c) demonstrate a strong interest in the education of residents;**  
407 **(Core)**  
408

409 **II.B.2.d) devote sufficient time to the educational program to fulfill**  
410 **their supervisory and teaching responsibilities; (Core)**  
411

412 **II.B.2.e) administer and maintain an educational environment**  
413 **conducive to educating residents; (Core)**  
414

415 **II.B.2.f) regularly participate in organized clinical discussions,**  
416 **rounds, journal clubs, and conferences; and, (Core)**  
417

418 **II.B.2.g)** pursue faculty development designed to enhance their skills  
419 at least annually: <sup>(Core)</sup>  
420

**Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the residency program faculty in the aggregate.**

- 421  
422 **II.B.2.g).(1)** as educators; <sup>(Core)</sup>  
423  
424 **II.B.2.g).(2)** in quality improvement and patient safety; <sup>(Core)</sup>  
425  
426 **II.B.2.g).(3)** in fostering their own and their residents' well-being;  
427 and, <sup>(Core)</sup>  
428  
429 **II.B.2.g).(4)** in patient care based on their practice-based learning  
430 and improvement efforts. <sup>(Core)</sup>  
431

**Background and Intent: Practice-based learning serves as the foundation for the practice of medicine. Through a systematic analysis of one's practice and review of the literature, one is able to make adjustments that improve patient outcomes and care. Thoughtful consideration to practice-based analysis improves quality of care, as well as patient safety. This allows faculty members to serve as role models for residents in practice-based learning.**

- 432  
433 **II.B.2.h)** ~~Physician faculty members must participate regularly in~~  
434 ~~conferences in a manner that promotes a spirit of inquiry and~~  
435 ~~scholarship, including mentoring residents in scholarly activity.~~  
436 <sup>(Core)</sup> [Moved from II.B.6.]  
437  
438 **II.B.2.h).(1)** ~~While not all members of the faculty must be investigators,~~  
439 ~~the staff as a whole must demonstrate broad involvement~~  
440 ~~in scholarly activity, and child neurology education must be~~  
441 ~~conducted in centers where there is research in the~~  
442 ~~subspecialty.~~ <sup>(Detail)</sup> [Moved from II.B.6.a)]  
443  
444 **II.B.3. Faculty Qualifications**  
445  
446 **II.B.3.a)** Faculty members must have appropriate qualifications in  
447 their field and hold appropriate institutional appointments.  
448 <sup>(Core)</sup>  
449  
450 **II.B.3.b)** Physician faculty members must:  
451  
452 **II.B.3.b).(1)** have current certification in the specialty by the  
453 American Board of Neurology and Psychiatry or the  
454 American Osteopathic Board of Neurology and

455 Psychiatry, or possess qualifications judged acceptable  
456 to the Review Committee. <sup>(Core)</sup>

457  
458 II.B.3.b).(2) Faculty members with special expertise in the disciplines  
459 related to child neurology and neurology, including  
460 cognitive development, neuro-ophthalmology,  
461 neuromuscular disorders, critical care, clinical  
462 neurophysiology, neuroimmunology, infectious disease,  
463 neonatal neurology, neuroimaging, neurogenetics, neuro-  
464 oncology, pain management, and child and adolescent  
465 psychiatry must be available for the education of residents.  
466 <sup>(Detail)</sup> [Moved from II.B.2.b)]

467  
468 II.B.3.c) **Any non-physician faculty members who participate in**  
469 **residency program education must be approved by the**  
470 **program director.** <sup>(Core)</sup>  
471

**Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of residents by non-physician educators enables the resident to better manage patient care and provides valuable advancement of the residents' knowledge. Furthermore, other individuals contribute to the education of the resident in the basic science of the specialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the residents, the program director may designate the individual as a program faculty member or a program core faculty member.**

472  
473 II.B.4. **Core Faculty**

474  
475 **Core faculty members must have a significant role in the education**  
476 **and supervision of residents and must devote a significant portion**  
477 **of their entire effort to resident education and/or administration, and**  
478 **must, as a component of their activities, teach, evaluate, and**  
479 **provide formative feedback to residents.** <sup>(Core)</sup>  
480

**Background and Intent: Core faculty members are critical to the success of resident education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing residents' progress toward achievement of competence in the specialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.**

481  
482 II.B.4.a) **Core faculty members must be designated by the program**  
483 **director.** <sup>(Core)</sup>

484  
485 II.B.4.b) **Core faculty members must complete the annual ACGME**  
486 **Faculty Survey.** <sup>(Core)</sup>

487  
488 II.B.4.c) There must be at least two core child neurology faculty members.  
489 <sup>(Core)</sup> [Moved from II.B.2.a)]

490  
491 II.B.4.c).(1) In programs with two or more residents, a core faculty-to-

492 resident ratio of at least 1:1 must be maintained within the  
493 section of child neurology. The program director may be  
494 counted as one of the faculty members in determining the  
495 ratio. <sup>(Core)</sup> [Moved from II.B.2.a).(1)]  
496

497 **II.C. Program Coordinator**

498  
499 **II.C.1. There must be a program coordinator.** <sup>(Core)</sup>

500  
501 **II.C.2. At a minimum, the program coordinator must be supported at 50**  
502 **percent FTE (at least 20 hours per week) for administrative time.** <sup>(Core)</sup>

503  
504 **II.C.2.a) ~~The Sponsoring Institution must provide financial support for a~~**  
505 **~~program coordinator to assist the program director in the~~**  
506 **~~administration of the program.~~** <sup>(Core)</sup> [Moved from I.A.3.]  
507

**Background and Intent: Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.**

**The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge of the ACGME and Program Requirements, policies, and procedures. Program coordinators assist the program director in accreditation efforts, educational programming, and support of residents.**

**Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer residents may not require a full-time coordinator; one coordinator may support more than one program.**

508  
509 **II.D. Other Program Personnel**

510  
511 **The program, in partnership with its Sponsoring Institution, must jointly**  
512 **ensure the availability of necessary personnel for the effective**  
513 **administration of the program.** <sup>(Core)</sup>  
514

**Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.**

515  
516 **III. Resident Appointments**

517  
518 **III.A. Eligibility Requirements**

- 519  
520 **III.A.1. An applicant must meet one of the following qualifications to be**  
521 **eligible for appointment to an ACGME-accredited program:** <sup>(Core)</sup>  
522
- 523 **III.A.1.a) graduation from a medical school in the United States or**  
524 **Canada, accredited by the Liaison Committee on Medical**  
525 **Education (LCME) or graduation from a college of**  
526 **osteopathic medicine in the United States, accredited by the**  
527 **American Osteopathic Association Commission on**  
528 **Osteopathic College Accreditation (AOACOCA); or,** <sup>(Core)</sup>  
529
- 530 **III.A.1.b) graduation from a medical school outside of the United**  
531 **States or Canada, and meeting one of the following additional**  
532 **qualifications:** <sup>(Core)</sup>  
533
- 534 **III.A.1.b).(1) holding a currently valid certificate from the**  
535 **Educational Commission for Foreign Medical**  
536 **Graduates (ECFMG) prior to appointment; or,** <sup>(Core)</sup>  
537
- 538 **III.A.1.b).(2) holding a full and unrestricted license to practice**  
539 **medicine in the United States licensing jurisdiction in**  
540 **which the ACGME-accredited program is located.** <sup>(Core)</sup>  
541
- 542 **III.A.2. All prerequisite post-graduate clinical education required for initial**  
543 **entry or transfer into ACGME-accredited residency programs must**  
544 **be completed in ACGME-accredited residency programs, AOA-**  
545 **approved residency programs, Royal College of Physicians and**  
546 **Surgeons of Canada (RCPSC)-accredited or College of Family**  
547 **Physicians of Canada (CFPC)-accredited residency programs**  
548 **located in Canada, or in residency programs with ACGME**  
549 **International (ACGME-I) Advanced Specialty Accreditation.** <sup>(Core)</sup>  
550
- 551 **III.A.2.a) Residency programs must receive verification of each**  
552 **resident's level of competency in the required clinical field**  
553 **using ACGME, CanMEDS, or ACGME-I Milestones evaluations**  
554 **from the prior training program upon matriculation.** <sup>(Core)</sup>  
555

**Background and Intent: Programs with ACGME-I Foundational Accreditation or from institutions with ACGME-I accreditation do not qualify unless the program has also achieved ACGME-I Advanced Specialty Accreditation. To ensure entrants into ACGME-accredited programs from ACGME-I programs have attained the prerequisite milestones for this training, they must be from programs that have ACGME-I Advanced Specialty Accreditation.**

- 556  
557 **III.A.2.b) Prior to appointment in the program, residents must have**  
558 **successfully completed one of the following in a program(s) that**  
559 **satisfies the requirement in III.A.2.: two years of ~~ACGME-~~**  
560 **~~accredited~~ education in pediatrics; or, one year of ~~ACGME-~~**  
561 **~~accredited~~ education in pediatrics and one year of ~~ACGME-~~**  
562 **~~accredited~~ education in family medicine or internal medicine; or,**  
563 **one year of ~~ACGME-accredited~~ education in pediatrics and one**

564 year of neuroscience research approved by the program director  
565 or such a program located in Canada and accredited by the  
566 RCPSC or CFPC. <sup>(Core)</sup> [Moved from III.A.2.]  
567

568 **III.A.3.** A physician who has completed a residency program that was not  
569 accredited by ACGME, AOA, RCPSC, CFPC, or ACGME-I (with  
570 Advanced Specialty Accreditation) may enter an ACGME-accredited  
571 residency program in the same specialty at the PGY-1 level and, at  
572 the discretion of the program director of the ACGME-accredited  
573 program and with approval by the GMEC, may be advanced to the  
574 PGY-2 level based on ACGME Milestones evaluations at the ACGME-  
575 accredited program. This provision applies only to entry into  
576 residency in those specialties for which an initial clinical year is not  
577 required for entry. <sup>(Core)</sup>  
578

579 **III.B.** The program director must not appoint more residents than approved by  
580 the Review Committee. <sup>(Core)</sup>  
581

582 **III.B.1.** All complement increases must be approved by the Review  
583 Committee. <sup>(Core)</sup>  
584

585 **III.C.** Resident Transfers

586  
587 The program must obtain verification of previous educational experiences  
588 and a summative competency-based performance evaluation prior to  
589 acceptance of a transferring resident, and Milestones evaluations upon  
590 matriculation. <sup>(Core)</sup>  
591

592 **IV.** Educational Program

593  
594 *The ACGME accreditation system is designed to encourage excellence and*  
595 *innovation in graduate medical education regardless of the organizational*  
596 *affiliation, size, or location of the program.*  
597

598 *The educational program must support the development of knowledgeable, skillful*  
599 *physicians who provide compassionate care.*  
600

601 *In addition, the program is expected to define its specific program aims consistent*  
602 *with the overall mission of its Sponsoring Institution, the needs of the community*  
603 *it serves and that its graduates will serve, and the distinctive capabilities of*  
604 *physicians it intends to graduate. While programs must demonstrate substantial*  
605 *compliance with the Common and specialty-specific Program Requirements, it is*  
606 *recognized that within this framework, programs may place different emphasis on*  
607 *research, leadership, public health, etc. It is expected that the program aims will*  
608 *reflect the nuanced program-specific goals for it and its graduates; for example, it*  
609 *is expected that a program aiming to prepare physician-scientists will have a*  
610 *different curriculum from one focusing on community health.*  
611

612 **IV.A.** The curriculum must contain the following educational components: <sup>(Core)</sup>  
613

614 **IV.A.1.** a set of program aims consistent with the Sponsoring Institution’s  
615 mission, the needs of the community it serves, and the desired  
616 distinctive capabilities of its graduates; <sup>(Core)</sup>

617  
618 **IV.A.1.a)** The program’s aims must be made available to program  
619 applicants, residents, and faculty members. <sup>(Core)</sup>

620  
621 **IV.A.2.** competency-based goals and objectives for each educational  
622 experience designed to promote progress on a trajectory to  
623 autonomous practice. These must be distributed, reviewed, and  
624 available to residents and faculty members; <sup>(Core)</sup>

**Background and Intent:** The trajectory to autonomous practice is documented by Milestones evaluation. The Milestones detail the progress of a resident in attaining skill in each competency domain. They are developed by each specialty group and allow evaluation based on observable behaviors. Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific resident.

626  
627 **IV.A.3.** delineation of resident responsibilities for patient care, progressive  
628 responsibility for patient management, and graded supervision; <sup>(Core)</sup>

**Background and Intent:** These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

630  
631 **IV.A.4.** a broad range of structured didactic activities; <sup>(Core)</sup>

632  
633 **IV.A.4.a)** Residents must be provided with protected time to participate  
634 in core didactic activities. <sup>(Core)</sup>

**Background and Intent:** It is intended that residents will participate in structured didactic activities. It is recognized that there may be circumstances in which this is not possible. Programs should define core didactic activities for which time is protected and the circumstances in which residents may be excused from these didactic activities. Didactic activities may include, but are not limited to, lectures, conferences, courses, labs, asynchronous learning, simulations, drills, case discussions, grand rounds, didactic teaching, and education in critical appraisal of medical evidence.

636  
637 **IV.A.5.** advancement of residents’ knowledge of ethical principles  
638 foundational to medical professionalism; and, <sup>(Core)</sup>

639  
640 **IV.A.6.** advancement in the residents’ knowledge of the basic principles of  
641 scientific inquiry, including how research is designed, conducted,  
642 evaluated, explained to patients, and applied to patient care. <sup>(Core)</sup>

643  
644 IV.A.6.a) The curriculum must advance residents' knowledge of the basic  
645 principles of evidence-based medicine and research, including  
646 how research is conducted, evaluated, explained to patients, and  
647 applied to patient care. <sup>(Core)</sup> [Moved from IV.B.4.]  
648

649 **IV.B. ACGME Competencies**  
650

**Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each specialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each specialty.**

651  
652 **IV.B.1. The program must integrate the following ACGME Competencies**  
653 **into the curriculum: <sup>(Core)</sup>**  
654

655 **IV.B.1.a) Professionalism**  
656

657 **Residents must demonstrate a commitment to**  
658 **professionalism and an adherence to ethical principles. <sup>(Core)</sup>**  
659

660 **IV.B.1.a).(1) Residents must demonstrate competence in:**  
661

662 **IV.B.1.a).(1).(a) compassion, integrity, and respect for others;**  
663 **<sup>(Core)</sup>**

664  
665 **IV.B.1.a).(1).(b) responsiveness to patient needs that**  
666 **supersedes self-interest; <sup>(Core)</sup>**  
667

**Background and Intent: This includes the recognition that under certain circumstances, the interests of the patient may be best served by transitioning care to another provider. Examples include fatigue, conflict or duality of interest, not connecting well with a patient, or when another physician would be better for the situation based on skill set or knowledge base.**

668  
669 **IV.B.1.a).(1).(c) respect for patient privacy and autonomy; <sup>(Core)</sup>**  
670

671 **IV.B.1.a).(1).(d) accountability to patients, society, and the**  
672 **profession; <sup>(Core)</sup>**  
673

674 **IV.B.1.a).(1).(e) respect and responsiveness to diverse patient**  
675 **populations, including but not limited to**  
676 **diversity in gender, age, culture, race, religion,**  
677 **disabilities, national origin, socioeconomic**  
678 **status, and sexual orientation; <sup>(Core)</sup>**  
679

680 **IV.B.1.a).(1).(f) ability to recognize and develop a plan for one's**  
681 **own personal and professional well-being; and,**  
682 **<sup>(Core)</sup>**  
683

684 IV.B.1.a).(1).(g) appropriately disclosing and addressing  
685 conflict or duality of interest. <sup>(Core)</sup>

686  
687 IV.B.1.b) Patient Care and Procedural Skills  
688

**Background and Intent:** Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]’s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs. 2008; 27(3):759-769.*) In addition, there should be a focus on improving the clinician’s well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

**These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.**

689  
690 IV.B.1.b).(1) Residents must be able to provide patient care that is  
691 compassionate, appropriate, and effective for the  
692 treatment of health problems and the promotion of  
693 health. <sup>(Core)</sup>  
694

695 IV.B.1.b).(1).(a) Residents must demonstrate competence in  
696 obtaining an orderly and detailed history from the  
697 patient, in conducting a thorough general and  
698 neurological examination, and in organizing and  
699 recording data; <sup>(Outcome)-(Core)</sup> [Moved from  
700 IV.A.5.a).(1).(a)]  
701

702 IV.B.1.b).(1).(a).(i) This must include the indications for  
703 neurodiagnostic tests and their  
704 interpretation. <sup>(Outcome) (Core)</sup> [Moved from  
705 IV.A.5.a).(1).(a).(i)]  
706

707 IV.B.1.b).(1).(b) Residents must demonstrate recognition of  
708 psychiatric disorders in children and adolescents,  
709 and must utilize the consultation and referral of  
710 mental health providers; <sup>(Outcome)-(Core)</sup> [Moved from  
711 IV.A.5.a).(1).(b)]  
712

713 IV.B.1.b).(1).(c) Residents must demonstrate competence in  
714 management of neurological disorders interacting  
715 with psychiatric disorders; <sup>(Outcome)</sup> [Moved from  
716 IV.A.5.a).(1).(c)]  
717

718 IV.B.1.b).(1).(d) Residents must demonstrate competence in the  
719 management of pediatric patients with acute  
720 neurological disorders in an intensive care unit and  
721 an emergency department; <sup>(Outcome) (Core)</sup> [Moved

722		from IV.A.5.a).(1).(d)]
723		
724	IV.B.1.b).(1).(e)	<u>Residents</u> must demonstrate competence in formulating a differential diagnosis and management plan; <del>(Outcome)</del> <u>(Core)</u> [Moved from IV.A.5.a).(1).(e)]
725		
726		
727		
728		
729	IV.B.1.b).(1).(f)	<u>Residents</u> must demonstrate competence in the management of infants, children, and adolescents with neurologic disorders; <del>(Outcome)</del> <u>(Core)</u> [Moved from IV.A.5.a).(1).(f)]
730		
731		
732		
733		
734	IV.B.1.b).(1).(g)	<u>Residents</u> must demonstrate competence in diagnosing and managing common and complex neurologic problems, including headaches, epilepsy, pediatric stroke, and neurometabolic and neurogenetics problems; and, <del>(Outcome)</del> <u>(Core)</u> [Moved from IV.A.5.a).(1).(g)]
735		
736		
737		
738		
739		
740		
741	IV.B.1.b).(1).(h)	<u>Residents</u> must demonstrate competence in the use of appropriate and compassionate methods of terminal palliative care, including adequate pain relief. <del>(Outcome)</del> <u>(Core)</u> [Moved from IV.A.5.a).(1).(h)]
742		
743		
744		
745		
746	<b>IV.B.1.b).(2)</b>	<b>Residents must be able to perform all medical, diagnostic, and surgical procedures considered essential for the area of practice. <sup>(Core)</sup></b>
747		
748		
749		
750	<b>IV.B.1.c)</b>	<b>Medical Knowledge</b>
751		
752		<b>Residents must demonstrate knowledge of established and evolving biomedical, clinical, epidemiological and social-behavioral sciences, as well as the application of this knowledge to patient care. <sup>(Core)</sup></b>
753		
754		
755		
756		
757	IV.B.1.c).(1)	<u>Residents</u> must demonstrate competence in their knowledge of the psychological aspects of the patient-physician relationship, and the importance of personal, social, and cultural factors in disease processes and their clinical expression; <del>(Outcome)</del> <u>(Core)</u> [Moved from IV.A.5.b).(1)]
758		
759		
760		
761		
762		
763	IV.B.1.c).(2)	<u>Residents</u> must demonstrate knowledge of the basic principles of psychopathology, common psychiatric diagnosis and therapies, and the indications for and common complications of psychiatry drugs; <del>(Outcome)</del> <u>(Core)</u> [Moved from IV.A.5.b).(2)]
764		
765		
766		
767		
768		
769	IV.B.1.c).(3)	<u>Residents</u> must demonstrate competence in their knowledge of basic principles of rehabilitation for neurological disorders, including pediatric neurological disorders; <del>(Outcome)</del> <u>(Core)</u> [Moved from IV.A.5.b).(3)]
770		
771		
772		

773  
 774 IV.B.1.c).(4) Residents must demonstrate competence in the use of  
 775 principles of bioethics and in the provision of appropriate  
 776 and cost-effective evaluation and treatment for children  
 777 with neurologic disorders; and, <sup>(Outcome)</sup> (Core) [Moved from

 797

**IV.B.1.d)**

**Practice-based Learning and Improvement**

**Residents must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.** <sup>(Core)</sup>

**Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.**

**The intention of this Competency is to help a physician develop the habits of mind required to continuously pursue quality improvement, well past the completion of residency.**

805  
 806 **IV.B.1.d).(1) Residents must demonstrate competence in:**  
 807  
 808 **IV.B.1.d).(1).(a) identifying strengths, deficiencies, and limits in**  
 809 **one’s knowledge and expertise;** <sup>(Core)</sup>  
 810  
 811 **IV.B.1.d).(1).(b) setting learning and improvement goals;** <sup>(Core)</sup>

865		<b>(Core)</b>

866  
867 **IV.B.1.e).(2)** **Residents must learn to communicate with patients**  
868 **and families to partner with them to assess their care**  
869 **goals, including, when appropriate, end-of-life goals.**  
870 **(Core)**

871  
872 **IV.B.1.e).(3)** **Residents are expected to provide psychosocial support**  
873 **and counseling for patients and family members about**  
874 **terminal palliative care. (Outcome) (Core) [Moved from**  
875 **IV.A.5.d).(6)]**  
876

**Background and Intent: When there are no more medications or interventions that can achieve a patient's goals or provide meaningful improvements in quality or length of life, a discussion about the patient's goals, values, and choices surrounding the end of life is one of the most important conversations that can occur. Residents must learn to participate effectively and compassionately in these meaningful human interactions, for the sake of their patients and themselves.**

**Programs may teach this skill through direct clinical experience, simulation, or other means of active learning.**

877  
878 **IV.B.1.f)** **Systems-based Practice**  
879  
880 **Residents must demonstrate an awareness of and**  
881 **responsiveness to the larger context and system of health**  
882 **care, including the social determinants of health, as well as**  
883 **the ability to call effectively on other resources to provide**  
884 **optimal health care. (Core)**  
885

886 **IV.B.1.f).(1)** **Residents must demonstrate competence in:**

887  
888 **IV.B.1.f).(1).(a)** **working effectively in various health care**  
889 **delivery settings and systems relevant to their**  
890 **clinical specialty; (Core)**  
891

**Background and Intent: Medical practice occurs in the context of an increasingly complex clinical care environment where optimal patient care requires attention to compliance with external and internal administrative and regulatory requirements.**

892  
893 **IV.B.1.f).(1).(b)** **coordinating patient care across the health care**  
894 **continuum and beyond as relevant to their**  
895 **clinical specialty; (Core)**  
896

**Background and Intent: Every patient deserves to be treated as a whole person. Therefore it is recognized that any one component of the health care system does not meet the totality of the patient's needs. An appropriate transition plan requires coordination and forethought by an interdisciplinary team. The patient benefits from proper care and the system benefits from proper use of resources.**

897

- 898 **IV.B.1.f).(1).(c)** **advocating for quality patient care and optimal**  
 899 **patient care systems;** <sup>(Core)</sup>  
 900

 914 **impact on individual patients' health decisions.**  
 915 <sup>(Core)</sup>

916  
 917 **IV.B.1.f).(2)** **Residents must learn to advocate for patients within**  
 918 **the health care system to achieve the patient's and**  
 919 **family's care goals, including, when appropriate, end-**  
 920 **of-life goals.** <sup>(Core)</sup>

921  
 922 **IV.C. Curriculum Organization and Resident Experiences**

923  
 924 **IV.C.1. The curriculum must be structured to optimize resident educational**  
 925 **experiences, the length of these experiences, and supervisory**  
 926 **continuity.** <sup>(Core)</sup>

927  
 928 **[The Review Committee must further specify]**

929  
 930 [The Review Committee's specification will be included in an upcoming  
 931 focused revision to the Child Neurology Program Requirements]  
 932

**Background and Intent: In some specialties, frequent rotational transitions, inadequate continuity of faculty member supervision, and dispersed patient locations within the hospital have adversely affected optimal resident education and effective team-based care. The need for patient care continuity varies from specialty to specialty and by clinical situation, and may be addressed by the individual Review Committee.**

933  
 934 **IV.C.2. The program must provide instruction and experience in pain**  
 935 **management if applicable for the specialty, including recognition of**  
 936 **the signs of addiction.** <sup>(Core)</sup>  
 937

938 **IV.C.3. The program director must, with assistance from the faculty, develop and**  
 939 **implement the academic and clinical program of resident education by:**  
 940 <sup>(Detail)</sup> **[Moved from IV.A.6.a)]**

941  
 942 **IV.C.3.a) preparing and implementing a comprehensive, well-organized,**

943 and effective curriculum that includes the presentation of core  
944 subspecialty knowledge supplemented by the addition of current  
945 information; and, <sup>(Detail)</sup> [Moved from IV.A.6.a).(1)]  
946  
947 IV.C.3.b) providing residents with direct experience in progressive  
948 responsibility for patient management. <sup>(Detail)</sup> [Moved from  
949 IV.A.6.a).(2)]  
950  
951 IV.C.4. The curriculum must be organized to provide the following: [Moved from  
952 IV.A.6.b)]  
953  
954 IV.C.4.a) at least 12 FTE months of adult neurology under the supervision  
955 of faculty members certified by the ABPN or AOBPN in neurology,  
956 that do not need to be contiguous, including: <sup>(Core)</sup> [Moved from  
957 IV.A.6.b).(1)]  
958  
959 IV.C.4.a).(1) six months on inpatient rotations (an inpatient rotation is  
960 defined as one that requires more than 50 percent of time  
961 spent managing patients admitted to an inpatient service  
962 requiring neurologic care); <sup>(Detail)</sup> [Moved from  
963 IV.A.6.b).(1).(a)]  
964  
965 IV.C.4.a).(2) three months of outpatient clinical adult neurology (an  
966 outpatient rotation is defined as any rotation that requires  
967 more than 50 percent of time spent managing patients in  
968 an outpatient clinic setting); and, <sup>(Core)</sup> [Moved from  
969 IV.A.6.b).(1).(b)]  
970  
971 IV.C.4.a).(3) three months of elective adult neurology clinical  
972 experiences. Rotations on subspecialty areas of  
973 neurology, including neuroradiology, neuropathology, and  
974 neurophysiology, may be counted toward this requirement.  
975 <sup>(Detail)</sup> [Moved from IV.A.6.b).(1).(c)]  
976  
977 IV.C.4.b) at least 12 FTE months of clinical child neurology; <sup>(Core)</sup> [Moved  
978 from IV.A.6.b).(2)]  
979  
980 IV.C.4.b).(1) This must include at least four FTE months of outpatient  
981 experience. <sup>(Core)</sup> [Moved from IV.A.6.b).(2).(a)]  
982  
983 IV.C.4.c) at least a one-month FTE experience under the supervision of a  
984 qualified child and adolescent psychiatrist; <sup>(Core)</sup> [Moved from  
985 IV.A.6.b).(3)]  
986  
987 IV.C.4.d) a minimum of three months elective time with assignments that  
988 accommodate individual resident interests and previous  
989 education; <sup>(Detail)</sup> [Moved from IV.A.6.b).(4)]  
990  
991 IV.C.4.e) management responsibility for hospitalized patients with  
992 neurological disorders, including pediatric patients with acute  
993 neurological disorders, in an intensive care unit and in an

994		emergency department; <sup>(Detail)</sup> [Moved from IV.A.6.b).(5)]
995		
996	IV.C.4.f)	experience in the evaluation and management of patients with disorders of the nervous system requiring surgical management;
997		
998		and, <sup>(Detail)</sup> [Moved from IV.A.6.b).(6)]
999		
1000	IV.C.4.g)	assignment on a consultation service to the medical, surgical, and
1001		psychiatric services. <sup>(Detail)</sup> [Moved from IV.A.6.b).(7)]
1002		
1003	IV.C.5.	Residents must attend a longitudinal/continuity clinic at least one half-day
1004		weekly throughout the duration of the program. <sup>(Core)</sup> [Moved from
1005		IV.A.6.c)]
1006		
1007	IV.C.6.	A three-year curriculum should include teaching in the following
1008		disciplines: cerebrovascular disease, clinical neurophysiology, cognitive
1009		and behavioral development, critical care, epilepsy, ethics, general and
1010		child neurology, infectious disease, movement disorders, neurogenetics,
1011		neuroimaging, neuroimmunology, neurometabolism, neuromuscular
1012		disease, neuro-oncology, neuro-ophthalmology, neuro-otology,
1013		neuropathology, neuroradiology, and, pain management. <sup>(Detail)</sup> [Moved
1014		from IV.A.3.a)]
1015		
1016	IV.C.7.	There must be gross and microscopic pathology conferences and clinical
1017		pathological conferences. <sup>(Detail)</sup> [Moved from IV.A.3.b)]
1018		
1019	IV.C.8.	There must be periodic seminars, journal clubs, lectures, and didactic
1020		courses that address the major developments in both the basic and
1021		clinical sciences related to child neurology. <sup>(Detail)</sup> [Moved from IV.A.3.c)]
1022		
1023	IV.C.9.	There must be patient-based teaching which must include clinical
1024		teaching rounds. <sup>(Detail)</sup> [Moved from IV.A.3.d)]
1025		
1026	IV.C.9.a)	Child neurology faculty members must supervise and direct
1027		clinical teaching rounds. <sup>(Detail)</sup> [Moved from IV.A.3.d).(1)]
1028		
1029	IV.C.9.b)	Clinical teaching rounds must occur at least five days per week.
1030		<sup>(Detail)</sup> [Moved from IV.A.3.d).(2)]
1031		
1032	<b>IV.D.</b>	<b>Scholarship</b>
1033		
1034		<b><i>Medicine is both an art and a science. The physician is a humanistic</i></b>
1035		<b><i>scientist who cares for patients. This requires the ability to think critically,</i></b>
1036		<b><i>evaluate the literature, appropriately assimilate new knowledge, and</i></b>
1037		<b><i>practice lifelong learning. The program and faculty must create an</i></b>
1038		<b><i>environment that fosters the acquisition of such skills through resident</i></b>
1039		<b><i>participation in scholarly activities. Scholarly activities may include</i></b>
1040		<b><i>discovery, integration, application, and teaching.</i></b>
1041		
1042		<b><i>The ACGME recognizes the diversity of residencies and anticipates that</i></b>
1043		<b><i>programs prepare physicians for a variety of roles, including clinicians,</i></b>
1044		<b><i>scientists, and educators. It is expected that the program's scholarship will</i></b>

1045 *reflect its mission(s) and aims, and the needs of the community it serves.*  
1046 *For example, some programs may concentrate their scholarly activity on*  
1047 *quality improvement, population health, and/or teaching, while other*  
1048 *programs might choose to utilize more classic forms of biomedical*  
1049 *research as the focus for scholarship.*

1051 **IV.D.1. Program Responsibilities**

1052  
1053 **IV.D.1.a) The program must demonstrate evidence of scholarly**  
1054 **activities consistent with its mission(s) and aims. <sup>(Core)</sup>**

1055  
1056 **IV.D.1.b) The program, in partnership with its Sponsoring Institution,**  
1057 **must allocate adequate resources to facilitate resident and**  
1058 **faculty involvement in scholarly activities. <sup>(Core)</sup>**

1059  
1060 **IV.D.1.b).(1)** Residents should receive support to attend one regional,  
1061 national, or international professional conference during  
1062 the program. <sup>(Detail)</sup> [Moved from IV.B.7.]

1063  
1064 **IV.D.1.b).(2)** ~~The sponsoring institution and program should allocate~~  
1065 ~~adequate educational resources to facilitate resident~~  
1066 ~~involvement in scholarly activities. <sup>(Core)</sup>~~ [Moved from  
1067 IV.B.6.]

1068  
1069 **IV.D.1.c) The program must advance residents' knowledge and**  
1070 **practice of the scholarly approach to evidence-based patient**  
1071 **care. <sup>(Core)</sup>**

**Background and Intent: The scholarly approach can be defined as a synthesis of teaching, learning, and research with the aim of encouraging curiosity and critical thinking based on an understanding of physiology, pathophysiology, differential diagnosis, treatments, treatment alternatives, efficiency of care, and patient safety. While some faculty members are responsible for fulfilling the traditional elements of scholarship through research, integration, and teaching, all faculty members are responsible for advancing residents' scholarly approach to patient care.**

**Elements of a scholarly approach to patient care include:**

- **Asking meaningful questions to stimulate residents to utilize learning resources to create a differential diagnosis, a diagnostic algorithm, and treatment plan**
- **Challenging the evidence that the residents use to reach their medical decisions so that they understand the benefits and limits of the medical literature**
- **When appropriate, dissemination of scholarly learning in a peer-reviewed manner (publication or presentation)**
- **Improving resident learning by encouraging them to teach using a scholarly approach**

**The scholarly approach to patient care begins with curiosity, is grounded in the principles of evidence-based medicine, expands the knowledge base through dissemination, and develops the habits of lifelong learning by encouraging residents to be scholarly teachers.**

- 1073  
1074 **IV.D.2. Faculty Scholarly Activity**  
1075  
1076 **IV.D.2.a) Among their scholarly activity, programs must demonstrate**  
1077 **accomplishments in at least three of the following domains:**  
1078 **(Core)**  
1079  
1080
  - **Research in basic science, education, translational**
  - **science, patient care, or population health**
  - **Peer-reviewed grants**
  - **Quality improvement and/or patient safety initiatives**
  - **Systematic reviews, meta-analyses, review articles,**
  - **chapters in medical textbooks, or case reports**
  - **Creation of curricula, evaluation tools, didactic**
  - **educational activities, or electronic educational**
  - **materials**
  - **Contribution to professional committees, educational**
  - **organizations, or editorial boards**
  - **Innovations in education**  
1081  
1082  
1083  
1084  
1085  
1086  
1087  
1088  
1089  
1090  
1091  
1092  
1093 **IV.D.2.b) The program must demonstrate dissemination of scholarly**  
1094 **activity within and external to the program by the following**  
1095 **methods:**  
1096

**Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the residents’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.**

- 1097  
1098 **IV.D.2.b).(1) faculty participation in grand rounds, posters,**  
1099 **workshops, quality improvement presentations,**  
1100 **podium presentations, grant leadership, non-peer-**  
1101 **reviewed print/electronic resources, articles or**  
1102 **publications, book chapters, textbooks, webinars,**  
1103 **service on professional committees, or serving as a**  
1104 **journal reviewer, journal editorial board member, or**  
1105 **editor; (Outcome)‡**  
1106  
1107 **IV.D.2.b).(2) peer-reviewed publication. (Outcome)**  
1108  
1109 **IV.D.3. Resident Scholarly Activity**  
1110  
1111 **IV.D.3.a) Residents must participate in scholarship. (Core)**  
1112  
1113 **IV.D.3.b) Residents should participate in scholarly activity under the**

1114 ~~mentorship of program faculty members.~~<sup>(Core)</sup> [Moved from IV.B.5.]

1115

1116 **V. Evaluation**

1117

1118 **V.A. Resident Evaluation**

1119

1120 **V.A.1. Feedback and Evaluation**

1121

**Background and Intent:** Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower residents to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring resident learning* and providing ongoing feedback that can be used by residents to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- residents identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where residents are struggling and address problems immediately

Summative evaluation is *evaluating a resident's learning* by comparing the residents against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when residents or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the residency program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a neophyte physician to one with growing expertise.

1122

1123 **V.A.1.a) Faculty members must directly observe, evaluate, and**  
1124 **frequently provide feedback on resident performance during**  
1125 **each rotation or similar educational assignment.** <sup>(Core)</sup>

1126

**Background and Intent:** Faculty members should provide feedback frequently throughout the course of each rotation. Residents require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for residents who have deficiencies that may result in a poor final rotation evaluation.

1127

1128 **V.A.1.b) Evaluation must be documented at the completion of the**  
1129 **assignment.** <sup>(Core)</sup>

1130		
1131	<b>V.A.1.b).(1)</b>	<b>For block rotations of greater than three months in duration, evaluation must be documented at least every three months.</b> <sup>(Core)</sup>

1169		
1170		

**Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a resident's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Residents should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, residents should develop an individualized learning plan.**

**Residents who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the resident, will take a variety of forms based on the specific learning needs of the resident. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of resident progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.**

- 1171  
1172 **V.A.1.e)** **At least annually, there must be a summative evaluation of**  
1173 **each resident that includes their readiness to progress to the**  
1174 **next year of the program, if applicable.** <sup>(Core)</sup>  
1175  
1176 **V.A.1.f)** **The evaluations of a resident’s performance must be**  
1177 **accessible for review by the resident.** <sup>(Core)</sup>  
1178  
1179 **V.A.1.g)** **Evaluations must include five first-patient encounter clinical**  
1180 **examinations by each resident under direct observation during the**

1184 **age, should represent the following: neuromuscular,**  
1185 **neurocritical care, neurodegenerative, outpatient**  
1186 **(headache, seizure), adult neurologic disorders.** <sup>(Detail)</sup>  
1187 **[Moved from V.A.2.d).(1)]**  
1188  
1189 **V.A.1.h)** **Each resident must complete at least two of the required clinical**  
1190 **examinations by the end of the R2 year, and all prior to the final**  
1191 **month of education.** <sup>(Detail)</sup> [Moved from V.A.2.e)]  
1192  
1193 **V.A.2. Final Evaluation**  
1194  
1195 **V.A.2.a)** **The program director must provide a final evaluation for each**  
1196 **resident upon completion of the program.** <sup>(Core)</sup>  
1197  
1198 **V.A.2.a).(1)** **The specialty-specific Milestones, and when applicable**  
1199 **the specialty-specific Case Logs, must be used as**  
1200 **tools to ensure residents are able to engage in**  
1201 **autonomous practice upon completion of the program.**  
1202 <sup>(Core)</sup>  
1203  
1204 **V.A.2.a).(2)** **The final evaluation must:**  
1205  
1206 **V.A.2.a).(2).(a)** **become part of the resident’s permanent record**  
1207 **maintained by the institution, and must be**  
1208 **accessible for review by the resident in**  
1209 **accordance with institutional policy;** <sup>(Core)</sup>  
1210  
1211 **V.A.2.a).(2).(b)** **verify that the resident has demonstrated the**  
1212 **knowledge, skills, and behaviors necessary to**  
1213 **enter autonomous practice;** <sup>(Core)</sup>

- 1214  
 1215 **V.A.2.a).(2).(c)** consider recommendations from the Clinical  
 1216 Competency Committee; and, <sup>(Core)</sup>  
 1217  
 1218 **V.A.2.a).(2).(d)** be shared with the resident upon completion of  
 1219 the program. <sup>(Core)</sup>  
 1220  
 1221 **V.A.3.** **A Clinical Competency Committee must be appointed by the**  
 1222 **program director.** <sup>(Core)</sup>  
 1223  
 1224 **V.A.3.a)** **At a minimum, the Clinical Competency Committee must**  
 1225 **include three members of the program faculty, at least one of**  
 1226 **whom is a core faculty member.** <sup>(Core)</sup>  
 1227  
 1228 **V.A.3.a).(1)** **Additional members must be faculty members from**  
 1229 **the same program or other programs, or other health**  
 1230 **professionals who have extensive contact and**  
 1231 **experience with the program’s residents.** <sup>(Core)</sup>  
 1232

**Background and Intent: The requirements regarding the Clinical Competency Committee do not preclude or limit a program director’s participation on the Clinical Competency Committee. The intent is to leave flexibility for each program to decide the best structure for its own circumstances, but a program should consider: its program director’s other roles as resident advocate, advisor, and confidante; the impact of the program director’s presence on the other Clinical Competency Committee members’ discussions and decisions; the size of the program faculty; and other program-relevant factors. The program director has final responsibility for resident evaluation and promotion decisions.**

**Program faculty may include more than the physician faculty members, such as other physicians and non-physicians who teach and evaluate the program’s residents. There may be additional members of the Clinical Competency Committee. Chief residents who have completed core residency programs in their specialty may be members of the Clinical Competency Committee.**

- 1233  
 1234 **V.A.3.b)** **The Clinical Competency Committee must:**  
 1235  
 1236 **V.A.3.b).(1)** **review all resident evaluations at least semi-annually;**  
 1237 <sup>(Core)</sup>  
 1238  
 1239 **V.A.3.b).(2)** **determine each resident’s progress on achievement of**  
 1240 **the specialty-specific Milestones; and,** <sup>(Core)</sup>  
 1241  
 1242 **V.A.3.b).(3)** **meet prior to the residents’ semi-annual evaluations**  
 1243 **and advise the program director regarding each**  
 1244 **resident’s progress.** <sup>(Core)</sup>  
 1245  
 1246 **V.B.** **Faculty Evaluation**  
 1247

1248 V.B.1. The program must have a process to evaluate each faculty  
1249 member's performance as it relates to the educational program at  
1250 least annually. (Core)  
1251

**Background and Intent:** The program director is responsible for the education program and for whom delivers it. While the term "faculty" may be applied to physicians within a given institution for other reasons, it is applied to residency program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the resident and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with residents desire feedback on their education, clinical care, and research. If a faculty member does not interact with residents, feedback is not required. With regard to the diverse operating environments and configurations, the residency program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the residents in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

1252  
1253 V.B.1.a) This evaluation must include a review of the faculty member's  
1254 clinical teaching abilities, engagement with the educational  
1255 program, participation in faculty development related to their  
1256 skills as an educator, clinical performance, professionalism,  
1257 and scholarly activities. (Core)  
1258

1259 V.B.1.b) This evaluation must include written, anonymous, and  
1260 confidential evaluations by the residents. (Core)  
1261

1262 V.B.2. Faculty members must receive feedback on their evaluations at least  
1263 annually. (Core)  
1264

1265 V.B.3. Results of the faculty educational evaluations should be  
1266 incorporated into program-wide faculty development plans. (Core)  
1267

**Background and Intent:** The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the residents' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

1268  
1269 V.C. Program Evaluation and Improvement  
1270

1271 V.C.1. The program director must appoint the Program Evaluation  
1272 Committee to conduct and document the Annual Program

- 1273 **Evaluation as part of the program’s continuous improvement**  
 1274 **process.** (Core)  
 1275  
 1276 **V.C.1.a)** **The Program Evaluation Committee must be composed of at**  
 1277 **least two program faculty members, at least one of whom is a**  
 1278 **core faculty member, and at least one resident.** (Core)  
 1279  
 1280 **V.C.1.b)** **Program Evaluation Committee responsibilities must include:**  
 1281  
 1282 **V.C.1.b).(1)** **acting as an advisor to the program director, through**  
 1283 **program oversight;** (Core)  
 1284  
 1285 **V.C.1.b).(2)** **review of the program’s self-determined goals and**  
 1286 **progress toward meeting them;** (Core)  
 1287  
 1288 **V.C.1.b).(3)** **guiding ongoing program improvement, including**  
 1289 **development of new goals, based upon outcomes;**  
 1290 **and,** (Core)  
 1291  
 1292 **V.C.1.b).(4)** **review of the current operating environment to identify**  
 1293 **strengths, challenges, opportunities, and threats as**  
 1294 **related to the program’s mission and aims.** (Core)  
 1295

**Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of residents and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program’s progress toward achievement of its goals and aims.**

- 1296  
 1297 **V.C.1.c)** **The Program Evaluation Committee should consider the**  
 1298 **following elements in its assessment of the program:**  
 1299  
 1300 **V.C.1.c).(1)** **curriculum;** (Core)  
 1301  
 1302 **V.C.1.c).(2)** **outcomes from prior Annual Program Evaluation(s);**  
 1303 (Core)  
 1304  
 1305 **V.C.1.c).(3)** **ACGME letters of notification, including citations,**  
 1306 **Areas for Improvement, and comments;** (Core)  
 1307  
 1308 **V.C.1.c).(4)** **quality and safety of patient care;** (Core)  
 1309  
 1310 **V.C.1.c).(5)** **aggregate resident and faculty:**  
 1311  
 1312 **V.C.1.c).(5).(a)** **well-being;** (Core)  
 1313  
 1314 **V.C.1.c).(5).(b)** **recruitment and retention;** (Core)  
 1315  
 1316 **V.C.1.c).(5).(c)** **workforce diversity;** (Core)

1366		<sup>(Core)</sup>
1367		

**Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the residency program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.**

- 1405  
1406  
1407
- V.C.3.e)                    For each of the exams referenced in V.C.3.a)-d), any program whose graduates over the time period specified in the requirement have achieved an 80 percent pass rate will have**

1408  
1409  
1410

met this requirement, no matter the percentile rank of the program for pass rate in that specialty. <sup>(Outcome)</sup>

**Background and Intent: Setting a single standard for pass rate that works across specialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.**

**There are specialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.**

1411  
1412  
1413  
1414  
1415

**V.C.3.f) Programs must report, in ADS, board certification status annually for the cohort of board-eligible residents that graduated seven years earlier. <sup>(Core)</sup>**

**Background and Intent: It is essential that residency programs demonstrate knowledge and skill transfer to their residents. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from residency graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.**

**The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.**

**In the future, the ACGME may establish parameters related to ultimate board certification rates.**

1434

**VI. The Learning and Working Environment**

***Residency education must occur in the context of a learning and working environment that emphasizes the following principles:***

- 1435
- 1436 • ***Excellence in the safety and quality of care rendered to patients by residents***
- 1437 ***today***
- 1438
- 1439 • ***Excellence in the safety and quality of care rendered to patients by today’s***
- 1440 ***residents in their future practice***
- 1441
- 1442 • ***Excellence in professionalism through faculty modeling of:***
- 1443
- 1444 ○ ***the effacement of self-interest in a humanistic environment that supports***
- 1445 ***the professional development of physicians***
- 1446
- 1447 ○ ***the joy of curiosity, problem-solving, intellectual rigor, and discovery***
- 1448
- 1449 • ***Commitment to the well-being of the students, residents, faculty members, and***
- 1450 ***all members of the health care team***
- 1451

**Background and Intent:** The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and residents more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and residents to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, resident education, and resident well-being. The requirements are intended to support the development of a sense of professionalism by encouraging residents to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program’s accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for residents to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and resident and faculty member well-being. The requirements are intended to support programs and residents as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and residents. With this flexibility comes a responsibility for residents and faculty members to recognize the need to hand off care of a patient to another provider when a resident is too fatigued to provide safe, high quality care and for programs to ensure that residents remain within the 80-hour maximum weekly limit.

1481 *of vulnerabilities and a willingness to transparently*  
1482 *deal with them. An effective organization has formal*  
1483 *mechanisms to assess the knowledge, skills, and*  
1484 *attitudes of its personnel toward safety in order to*  
1485 *identify areas for improvement.*

1486  
1487  
1488 **VI.A.1.a).(1).(a)** The program, its faculty, residents, and fellows  
1489 must actively participate in patient safety  
1490 systems and contribute to a culture of safety.  
1491 (Core)

1492  
1493 **VI.A.1.a).(1).(b)** The program must have a structure that  
1494 promotes safe, interprofessional, team-based  
1495 care. (Core)

1496  
1497 **VI.A.1.a).(2) Education on Patient Safety**

1498 Programs must provide formal educational activities  
1499 that promote patient safety-related goals, tools, and  
1500 techniques. (Core)

1501  
1502 **Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.**

1503  
1504 **VI.A.1.a).(3) Patient Safety Events**

1505 *Reporting, investigation, and follow-up of adverse*  
1506 *events, near misses, and unsafe conditions are pivotal*  
1507 *mechanisms for improving patient safety, and are*  
1508 *essential for the success of any patient safety*  
1509

1510 ***program. Feedback and experiential learning are***  
1511 ***essential to developing true competence in the ability***  
1512 ***to identify causes and institute sustainable systems-***  
1513 ***based changes to ameliorate patient safety***  
1514 ***vulnerabilities.***

1515  
1516 **VI.A.1.a).(3).(a)** Residents, fellows, faculty members, and other  
1517 clinical staff members must:

1518  
1519 **VI.A.1.a).(3).(a).(i)** know their responsibilities in reporting  
1520 patient safety events at the clinical site;  
1521 (Core)

1522  
1523 **VI.A.1.a).(3).(a).(ii)** know how to report patient safety  
1524 events, including near misses, at the  
1525 clinical site; and, (Core)

1526  
1527 **VI.A.1.a).(3).(a).(iii)** be provided with summary information  
1528 of their institution's patient safety  
1529 reports. (Core)

1530  
1531 **VI.A.1.a).(3).(b)** Residents must participate as team members in  
1532 real and/or simulated interprofessional clinical  
1533 patient safety activities, such as root cause  
1534 analyses or other activities that include  
1535 analysis, as well as formulation and  
1536 implementation of actions. (Core)

1537  
1538 **VI.A.1.a).(4)** Resident Education and Experience in Disclosure of  
1539 Adverse Events

1540 ***Patient-centered care requires patients, and when***  
1541 ***appropriate families, to be apprised of clinical***  
1542 ***situations that affect them, including adverse events.***  
1543 ***This is an important skill for faculty physicians to***  
1544 ***model, and for residents to develop and apply.***

1545  
1546  
1547 **VI.A.1.a).(4).(a)** All residents must receive training in how to  
1548 disclose adverse events to patients and  
1549 families. (Core)

1550  
1551 **VI.A.1.a).(4).(b)** Residents should have the opportunity to  
1552 participate in the disclosure of patient safety  
1553 events, real or simulated. (Detail)

1554  
1555 **VI.A.1.b)** Quality Improvement

1556  
1557 **VI.A.1.b).(1)** Education in Quality Improvement

1558  
1559 ***A cohesive model of health care includes quality-***  
1560 ***related goals, tools, and techniques that are necessary***

1561		<i>in order for health care professionals to achieve</i>
1562		<i>quality improvement goals.</i>
1563		
1564	VI.A.1.b).(1).(a)	Residents must receive training and experience
1565		in quality improvement processes, including an
1566		understanding of health care disparities. <sup>(Core)</sup>
1567		
1568	VI.A.1.b).(2)	Quality Metrics
1569		
1570		<i>Access to data is essential to prioritizing activities for</i>
1571		<i>care improvement and evaluating success of</i>
1572		<i>improvement efforts.</i>
1573		
1574	VI.A.1.b).(2).(a)	Residents and faculty members must receive
1575		data on quality metrics and benchmarks related
1576		to their patient populations. <sup>(Core)</sup>
1577		
1578	VI.A.1.b).(3)	Engagement in Quality Improvement Activities
1579		
1580		<i>Experiential learning is essential to developing the</i>
1581		<i>ability to identify and institute sustainable systems-</i>
1582		<i>based changes to improve patient care.</i>
1583		
1584	VI.A.1.b).(3).(a)	Residents must have the opportunity to
1585		participate in interprofessional quality
1586		improvement activities. <sup>(Core)</sup>
1587		
1588	VI.A.1.b).(3).(a).(i)	This should include activities aimed at
1589		reducing health care disparities. <sup>(Detail)</sup>
1590		
1591	VI.A.2.	Supervision and Accountability
1592		
1593	VI.A.2.a)	<i>Although the attending physician is ultimately responsible for</i>
1594		<i>the care of the patient, every physician shares in the</i>
1595		<i>responsibility and accountability for their efforts in the</i>
1596		<i>provision of care. Effective programs, in partnership with</i>
1597		<i>their Sponsoring Institutions, define, widely communicate,</i>
1598		<i>and monitor a structured chain of responsibility and</i>
1599		<i>accountability as it relates to the supervision of all patient</i>
1600		<i>care.</i>
1601		
1602		<i>Supervision in the setting of graduate medical education</i>
1603		<i>provides safe and effective care to patients; ensures each</i>
1604		<i>resident's development of the skills, knowledge, and attitudes</i>
1605		<i>required to enter the unsupervised practice of medicine; and</i>
1606		<i>establishes a foundation for continued professional growth.</i>
1607		
1608	VI.A.2.a).(1)	Each patient must have an identifiable and
1609		appropriately-credentialed and privileged attending
1610		physician (or licensed independent practitioner as
1611		specified by the applicable Review Committee) who is

1612 responsible and accountable for the patient's care.  
1613 (Core)

1614  
1615 VI.A.2.a).(1).(a) This information must be available to residents,  
1616 faculty members, other members of the health  
1617 care team, and patients. (Core)

1618  
1619 VI.A.2.a).(1).(b) Residents and faculty members must inform  
1620 each patient of their respective roles in that  
1621 patient's care when providing direct patient  
1622 care. (Core)

1623  
1624 VI.A.2.b) *Supervision may be exercised through a variety of methods.  
1625 For many aspects of patient care, the supervising physician  
1626 may be a more advanced resident or fellow. Other portions of  
1627 care provided by the resident can be adequately supervised  
1628 by the immediate availability of the supervising faculty  
1629 member, fellow, or senior resident physician, either on site or  
1630 by means of telephonic and/or electronic modalities. Some  
1631 activities require the physical presence of the supervising  
1632 faculty member. In some circumstances, supervision may  
1633 include post-hoc review of resident-delivered care with  
1634 feedback.*

1635  
1636 VI.A.2.b).(1) The program must demonstrate that the appropriate  
1637 level of supervision in place for all residents is based  
1638 on each resident's level of training and ability, as well  
1639 as patient complexity and acuity. Supervision may be  
1640 exercised through a variety of methods, as appropriate  
1641 to the situation. (Core)

1642  
1643 VI.A.2.c) Levels of Supervision

1644  
1645 To promote oversight of resident supervision while providing  
1646 for graded authority and responsibility, the program must use  
1647 the following classification of supervision: (Core)

1648  
1649 VI.A.2.c).(1) Direct Supervision – the supervising physician is  
1650 physically present with the resident and patient. (Core)

1651  
1652 VI.A.2.c).(2) Indirect Supervision:

1653  
1654 VI.A.2.c).(2).(a) with Direct Supervision immediately available –  
1655 the supervising physician is physically within  
1656 the hospital or other site of patient care, and is  
1657 immediately available to provide Direct  
1658 Supervision. (Core)

1659  
1660 VI.A.2.c).(2).(b) with Direct Supervision available – the  
1661 supervising physician is not physically present  
1662 within the hospital or other site of patient care,

1663 but is immediately available by means of  
1664 telephonic and/or electronic modalities, and is  
1665 available to provide Direct Supervision. <sup>(Core)</sup>  
1666

1667 VI.A.2.c).(3) Oversight – the supervising physician is available to  
1668 provide review of procedures/encounters with  
1669 feedback provided after care is delivered. <sup>(Core)</sup>  
1670

1671 VI.A.2.d) The privilege of progressive authority and responsibility,  
1672 conditional independence, and a supervisory role in patient  
1673 care delegated to each resident must be assigned by the  
1674 program director and faculty members. <sup>(Core)</sup>  
1675

1676 VI.A.2.d).(1) The program director must evaluate each resident’s  
1677 abilities based on specific criteria, guided by the  
1678 Milestones. <sup>(Core)</sup>  
1679

1680 VI.A.2.d).(2) Faculty members functioning as supervising  
1681 physicians must delegate portions of care to residents  
1682 based on the needs of the patient and the skills of  
1683 each resident. <sup>(Core)</sup>  
1684

1685 VI.A.2.d).(3) Senior residents or fellows should serve in a  
1686 supervisory role to junior residents in recognition of  
1687 their progress toward independence, based on the  
1688 needs of each patient and the skills of the individual  
1689 resident or fellow. <sup>(Detail)</sup>  
1690

1691 VI.A.2.e) Programs must set guidelines for circumstances and events  
1692 in which residents must communicate with the supervising  
1693 faculty member(s). <sup>(Core)</sup>  
1694

1695 VI.A.2.e).(1) Each resident must know the limits of their scope of  
1696 authority, and the circumstances under which the  
1697 resident is permitted to act with conditional  
1698 independence. <sup>(Outcome)</sup>  
1699

**Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.**

1700  
1701 VI.A.2.e).(1).(a) Initially, PGY-1 residents must be supervised  
1702 either directly, or indirectly with direct  
1703 supervision immediately available. <sup>(Core)</sup>  
1704

1705 VI.A.2.f) Faculty supervision assignments must be of sufficient  
1706 duration to assess the knowledge and skills of each resident  
1707 and to delegate to the resident the appropriate level of patient  
1708 care authority and responsibility. <sup>(Core)</sup>  
1709

1710 VI.B. Professionalism

- 1711  
 1712 **VI.B.1.** **Programs, in partnership with their Sponsoring Institutions, must**  
 1713 **educate residents and faculty members concerning the professional**  
 1714 **responsibilities of physicians, including their obligation to be**  
 1715 **appropriately rested and fit to provide the care required by their**  
 1716 **patients. (Core)**  
 1717  
 1718 **VI.B.2.** **The learning objectives of the program must:**  
 1719  
 1720 **VI.B.2.a)** **be accomplished through an appropriate blend of supervised**  
 1721 **patient care responsibilities, clinical teaching, and didactic**  
 1722 **educational events; (Core)**  
 1723  
 1724 **VI.B.2.b)** **be accomplished without excessive reliance on residents to**  
 1725 **fulfill non-physician obligations; and, (Core)**  
 1726

**Background and Intent: Routine reliance on residents to fulfill non-physician obligations increases work compression for residents and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that residents may be expected to do any of these things on occasion when the need arises, these activities should not be performed by residents routinely and must be kept to a minimum to optimize resident education.**

- 1727  
 1728 **VI.B.2.c)** **ensure manageable patient care responsibilities. (Core)**  
 1729

**Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression, especially at the PGY-1 level.**

- 1730  
 1731 **VI.B.3.** **The program director, in partnership with the Sponsoring Institution,**  
 1732 **must provide a culture of professionalism that supports patient**  
 1733 **safety and personal responsibility. (Core)**  
 1734  
 1735 **VI.B.4.** **Residents and faculty members must demonstrate an understanding**  
 1736 **of their personal role in the:**  
 1737  
 1738 **VI.B.4.a)** **provision of patient- and family-centered care; (Outcome)**  
 1739  
 1740 **VI.B.4.b)** **safety and welfare of patients entrusted to their care,**  
 1741 **including the ability to report unsafe conditions and adverse**  
 1742 **events; (Outcome)**  
 1743

**Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the resident.**

1744  
1745  
1746

**VI.B.4.c) assurance of their fitness for work, including: (Outcome)**

**Background and Intent: This requirement emphasizes the professional responsibility of faculty members and residents to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, residents, and other members of the care team to be observant, to intervene, and/or to escalate their concern about resident and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.**

1747

**VI.B.4.c).(1) management of their time before, during, and after clinical assignments; and, (Outcome)**

1749

1750

**VI.B.4.c).(2) recognition of impairment, including from illness, fatigue, and substance use, in themselves, their peers, and other members of the health care team. (Outcome)**

1752

1753

1754

**VI.B.4.d) commitment to lifelong learning; (Outcome)**

1755

1756

**VI.B.4.e) monitoring of their patient care performance improvement indicators; and, (Outcome)**

1757

1758

1759

**VI.B.4.f) accurate reporting of clinical and educational work hours, patient outcomes, and clinical experience data. (Outcome)**

1760

1761

1762

**VI.B.5. All residents and faculty members must demonstrate responsiveness to patient needs that supersedes self-interest. This includes the recognition that under certain circumstances, the best interests of the patient may be served by transitioning that patient's care to another qualified and rested provider. (Outcome)**

1763

1764

1765

1766

1767

1768

**VI.B.6. Programs, in partnership with their Sponsoring Institutions, must provide a professional, equitable, respectful, and civil environment that is free from discrimination, sexual and other forms of harassment, mistreatment, abuse, or coercion of students, residents, faculty, and staff. (Core)**

1769

1770

1771

1772

1773

1774

**VI.B.7. Programs, in partnership with their Sponsoring Institutions, should have a process for education of residents and faculty regarding unprofessional behavior and a confidential process for reporting, investigating, and addressing such concerns. (Core)**

1775

1776

1777

1778

1779

**VI.C. Well-Being**

1780

1781

***Psychological, emotional, and physical well-being are critical in the development of the competent, caring, and resilient physician and require proactive attention to life inside and outside of medicine. Well-being***

1782

*requires that physicians retain the joy in medicine while managing their own real-life stresses. Self-care and responsibility to support other members of the health care team are important components of professionalism; they are also skills that must be modeled, learned, and nurtured in the context of other aspects of residency training.*

*Residents and faculty members are at risk for burnout and depression. Programs, in partnership with their Sponsoring Institutions, have the same responsibility to address well-being as other aspects of resident competence. Physicians and all members of the health care team share responsibility for the well-being of each other. For example, a culture which encourages covering for colleagues after an illness without the expectation of reciprocity reflects the ideal of professionalism. A positive culture in a clinical learning environment models constructive behaviors, and prepares residents with the skills and attitudes needed to thrive throughout their careers.*

**Background and Intent:** The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

1817  
1818

- VI.C.1.** The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:
- VI.C.1.a)** efforts to enhance the meaning that each resident finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; <sup>(Core)</sup>
- VI.C.1.b)** attention to scheduling, work intensity, and work compression that impacts resident well-being; <sup>(Core)</sup>
- VI.C.1.c)** evaluating workplace safety data and addressing the safety of residents and faculty members; <sup>(Core)</sup>

**Background and Intent:** This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that

monitor and enhance resident and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

1819  
1820  
1821  
1822

VI.C.1.d) policies and programs that encourage optimal resident and faculty member well-being; and, <sup>(Core)</sup>

**Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.**

1823  
1824  
1825  
1826  
1827  
1828

VI.C.1.d).(1) Residents must be given the opportunity to attend medical, mental health, and dental care appointments, including those scheduled during their working hours. <sup>(Core)</sup>

**Background and Intent: The intent of this requirement is to ensure that residents have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Residents must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.**

1829  
1830  
1831

1838  
1839  
1840

VI.C.1.e) attention to resident and faculty member burnout, depression, and substance abuse. The program, in partnership with its Sponsoring Institution, must educate faculty members and residents in identification of the symptoms of burnout, depression, and substance abuse, including means to assist those who experience these conditions. Residents and faculty members must also be educated to recognize those symptoms in themselves and how to seek appropriate care. The program, in partnership with its Sponsoring Institution, must: <sup>(Core)</sup>

**Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance abuse. Materials and more information are available on the Physician Well-being section of the ACGME website (<http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being>).**

1841  
1842  
1843  
1844  
1845  
1846  
1847  
1848

VI.C.1.e).(1) encourage residents and faculty members to alert the program director or other designated personnel or programs when they are concerned that another resident, fellow, or faculty member may be displaying signs of burnout, depression, substance abuse, suicidal ideation, or potential for violence; <sup>(Core)</sup>

**Background and Intent: Individuals experiencing burnout, depression, substance abuse, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a**

negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that residents and faculty members are able to report their concerns when another resident or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Residents and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

- 1849  
1850 VI.C.1.e).(2) provide access to appropriate tools for self-screening;  
1851 and, (Core)  
1852  
1853 VI.C.1.e).(3) provide access to confidential, affordable mental  
1854 health assessment, counseling, and treatment,  
1855 including access to urgent and emergent care 24  
1856 hours a day, seven days a week. (Core)  
1857

**Background and Intent:** The intent of this requirement is to ensure that residents have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

- 1858  
1859 VI.C.2. There are circumstances in which residents may be unable to attend  
1860 work, including but not limited to fatigue, illness, family  
1861 emergencies, and parental leave. Each program must allow an  
1862 appropriate length of absence for residents unable to perform their  
1863 patient care responsibilities. (Core)  
1864  
1865 VI.C.2.a) The program must have policies and procedures in place to  
1866 ensure coverage of patient care. (Core)  
1867  
1868 VI.C.2.b) These policies must be implemented without fear of negative  
1869 consequences for the resident who is or was unable to  
1870 provide the clinical work. (Core)  
1871

**Background and Intent:** Residents may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

1872

- 1873 **VI.D. Fatigue Mitigation**
- 1874
- 1875 **VI.D.1. Programs must:**
- 1876
- 1877 **VI.D.1.a) educate all faculty members and residents to recognize the**
- 1878 **signs of fatigue and sleep deprivation;** <sup>(Core)</sup>
- 1879
- 1880 **VI.D.1.b) educate all faculty members and residents in alertness**
- 1881 **management and fatigue mitigation processes; and,** <sup>(Core)</sup>
- 1882
- 1883 **VI.D.1.c) encourage residents to use fatigue mitigation processes to**
- 1884 **manage the potential negative effects of fatigue on patient**
- 1885 **care and learning.** <sup>(Detail)</sup>
- 1886

**Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares residents for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.**

**This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.**

- 1908

**Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on residents. Faculty members and program directors need to make sure residents function in an environment that has safe patient care and a sense of resident well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor resident workload. Workload should be distributed among the resident team and interdisciplinary teams to minimize work compression.**

- VI.E.2. Teamwork**
- Residents must care for patients in an environment that maximizes communication. This must include the opportunity to work as a member of effective interprofessional teams that are appropriate to the delivery of care in the specialty and larger health system. <sup>(Core)</sup>**
- VI.E.3. Transitions of Care**
- VI.E.3.a) Programs must design clinical assignments to optimize transitions in patient care, including their safety, frequency, and structure. <sup>(Core)</sup>**
- VI.E.3.b) Programs, in partnership with their Sponsoring Institutions, must ensure and monitor effective, structured hand-over processes to facilitate both continuity of care and patient safety. <sup>(Core)</sup>**
- VI.E.3.c) Programs must ensure that residents are competent in communicating with team members in the hand-over process. <sup>(Outcome)</sup>**
- VI.E.3.d) Programs and clinical sites must maintain and communicate schedules of attending physicians and residents currently responsible for care. <sup>(Core)</sup>**
- VI.E.3.e) Each program must ensure continuity of patient care, consistent with the program’s policies and procedures referenced in VI.C.2-VI.C.2.b), in the event that a resident may be unable to perform their patient care responsibilities due to excessive fatigue or illness, or family emergency. <sup>(Core)</sup>**
- VI.F. Clinical Experience and Education**
- Programs, in partnership with their Sponsoring Institutions, must design an effective program structure that is configured to provide residents with educational and clinical experience opportunities, as well as reasonable opportunities for rest and personal activities.***

**Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours”**

replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that residents’ duty to “clock out” on time superseded their duty to their patients.

1952  
1953  
1954  
1955  
1956

**VI.F.1. Maximum Hours of Clinical and Educational Work per Week**

Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting. <sup>(Core)</sup>

**Background and Intent:** Programs and residents have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing residents to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

***Scheduling***

While the ACGME acknowledges that, on rare occasions, a resident may work in excess of 80 hours in a given week, all programs and residents utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule residents to work 80 hours per week and still permit residents to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that residents are scheduled to work fewer than 80 hours per week, which would allow residents to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

***Oversight***

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for residents to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

***Work from Home***

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that residents are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work residents choose to do from home. The requirement provides flexibility for residents to do this while ensuring that the time spent by residents completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an

electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Resident decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the resident's supervisor. In such circumstances, residents should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a resident spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the resident need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by residents. The new requirements are not an attempt to micromanage this process. Residents are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual resident. Programs will need to factor in time residents are spending on clinical work at home when schedules are developed to ensure that residents are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that residents report their time from home and that schedules are structured to ensure that residents are not working in excess of 80 hours per week, averaged over four weeks.

***PGY-1 and PGY-2 Residents***

PGY-1 and PGY-2 residents may not have the experience to make decisions about when it is appropriate to utilize flexibility or may feel pressured to use it when unnecessary. Programs are responsible for ensuring that residents are provided with manageable workloads that can be accomplished during scheduled work hours. This includes ensuring that a resident's assigned direct patient load is manageable, that residents have appropriate support from their clinical teams, and that residents are not overburdened with clerical work and/or other non-physician duties.

1972		
1973		
1974		

**Background and Intent:** While it is expected that resident schedules will be structured to ensure that residents are provided with a minimum of eight hours off between scheduled work periods, it is recognized that residents may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for residents to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1975  
1976  
1977  
1978

**VI.F.2.c) Residents must have at least 14 hours free of clinical work and education after 24 hours of in-house call. (Core)**

**Background and Intent:** Residents have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, residents are encouraged to prioritize sleep over other discretionary activities.

1979  
1980  
1981  
1982  
1983  
1984

**VI.F.2.d) Residents must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. (Core)**

**Background and Intent:** The requirement provides flexibility for programs to distribute days off in a manner that meets program and resident needs. It is strongly recommended that residents' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some residents may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide residents with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes resident well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

1990  
1991

**VI.F.3. Maximum Clinical Work and Education Period Length**

**VI.F.3.a) Clinical and educational work periods for residents must not exceed 24 hours of continuous scheduled clinical assignments. (Core)**

**Background and Intent:** The Task Force examined the question of "consecutive time on task." It examined the research supporting the current limit of 16 consecutive hours of time on task for PGY-1 residents; the range of often conflicting impacts of this requirement on patient safety, clinical care, and continuity of care by resident teams; and resident learning found in the literature. Finally, it heard a uniform request by the specialty societies, certifying boards, membership societies and organizations, and senior residents to repeal this requirement. It heard conflicting perspectives from

resident unions, a medical student association, and a number of public advocacy groups, some arguing for continuation of the requirement, others arguing for extension of the requirement to all residents.

Of greatest concern to the Task Force were the observations of disruption of team care and patient care continuity brought about with residents beyond the PGY-1 level adhering to differing requirements. The graduate medical education community uniformly requested that the Task Force remove this requirement. The most frequently-cited reason for this request was the complete disruption of the team, separating the PGY-1 from supervisory faculty members and residents who were best able to judge the ability of the resident and customize the supervision of patient care for each PGY-1. Cited nearly as frequently was the separation of the PGY-1 from the team, delaying maturation of clinical skills, and threatening to create a “shift” mentality in disciplines where overnight availability to patients is essential in delivery of care.

The Task Force examined the impact of the request to consider 16-consecutive-hour limits for all residents, and rejected the proposition. It found that model incompatible with the actual practice of medicine and surgery in many specialties, excessively limiting in configuration of clinical services in many disciplines, and potentially disruptive of the inculcation of responsibility and professional commitment to altruism and placing the needs of patients above those of the physician.

After careful consideration of the information available, the testimony and position of all parties submitting information, and presentations to the Task Force, the Task Force removed the 16-hour-consecutive-time-on-task requirement for PGY-1 residents. It remains crucial that programs ensure that PGY-1 residents are supervised in compliance with the applicable Program Requirements, and that resident well-being is prioritized as described in Section VI.C. of these requirements.

VI.F.3.a).(1)

Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or resident education.  
(Core)

VI.F.3.a).(1).(a)

Additional patient care responsibilities must not be assigned to a resident during this time. (Core)

**Background and Intent:** The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the resident continue to function as a member of the team in an environment where other members of the team can assess resident fatigue, and that supervision for post-call residents is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

VI.F.4.

Clinical and Educational Work Hour Exceptions

VI.F.4.a)

In rare circumstances, after handing off all other responsibilities, a resident, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:

2008		
2009	VI.F.4.a).(1)	to continue to provide care to a single severely ill or unstable patient; <sup>(Detail)</sup>
2010		
2011		
2012	VI.F.4.a).(2)	humanistic attention to the needs of a patient or family; or, <sup>(Detail)</sup>
2013		
2014		
2015	VI.F.4.a).(3)	to attend unique educational events. <sup>(Detail)</sup>
2016		
2017	VI.F.4.b)	These additional hours of care or education will be counted toward the 80-hour weekly limit. <sup>(Detail)</sup>
2018		
2019		

**Background and Intent:** This requirement is intended to provide residents with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a resident may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Residents must not be required to stay. Programs allowing residents to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the resident and that residents are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

2020		
2021	VI.F.4.c)	A Review Committee may grant rotation-specific exceptions for up to 10 percent or a maximum of 88 clinical and educational work hours to individual programs based on a sound educational rationale.
2022		
2023		
2024		
2025		
2026		The Review Committee for Neurology will not consider requests for exceptions to the 80-hour limit to the residents' work week.
2027		
2028		
2029	VI.F.4.c).(1)	In preparing a request for an exception, the program director must follow the clinical and educational work hour exception policy from the <i>ACGME Manual of Policies and Procedures</i> . <sup>(Core)</sup>
2030		
2031		
2032		
2033		
2034	VI.F.4.c).(2)	Prior to submitting the request to the Review Committee, the program director must obtain approval from the Sponsoring Institution's GMEC and DIO. <sup>(Core)</sup>
2035		
2036		
2037		

**Background and Intent:** The provision for exceptions for up to 88 hours per week has been modified to specify that exceptions may be granted for specific rotations if the program can justify the increase based on criteria specified by the Review Committee. As in the past, Review Committees may opt not to permit exceptions. The underlying philosophy for this requirement is that while it is expected that all residents should be able to train within an 80-hour work week, it is recognized that some programs may include rotations with alternate structures based on the nature of the specialty. DIO/GMEC approval is required before the request will be considered by the Review Committee.

2038

2078 **preclude rest or reasonable personal time for each**  
2079 **resident.** (Core)  
2080  
2081 **VI.F.8.b)** **Residents are permitted to return to the hospital while on at-**  
2082 **home call to provide direct care for new or established**  
2083 **patients. These hours of inpatient patient care must be**  
2084 **included in the 80-hour maximum weekly limit.** (Detail)

2085

**Background and Intent:** This requirement has been modified to specify that clinical work done from home when a resident is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time residents devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in residents routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

**In their evaluation of residency/fellowship programs, Review Committees will look at the overall impact of at-home call on resident/fellow rest and personal time.**
