1 **ACGME Program Requirements for Graduate Medical Education**
2 **in Pediatric Critical Care Medicine**

3
4 **Common Program Requirements (Fellowship) are in BOLD**

5
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.
9

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

10
11 **Introduction**

12
13 **Int.A.** *Fellowship is advanced graduate medical education beyond a core*
14 *residency program for physicians who desire to enter more specialized*
15 *practice. Fellowship-trained physicians serve the public by providing*
16 *subspecialty care, which may also include core medical care, acting as a*
17 *community resource for expertise in their field, creating and integrating*
18 *new knowledge into practice, and educating future generations of*
19 *physicians. Graduate medical education values the strength that a diverse*
20 *group of physicians brings to medical care.*

21
22 *Fellows who have completed residency are able to practice independently*
23 *in their core specialty. The prior medical experience and expertise of*
24 *fellows distinguish them from physicians entering into residency training.*
25 *The fellow's care of patients within the subspecialty is undertaken with*
26 *appropriate faculty supervision and conditional independence. Faculty*
27 *members serve as role models of excellence, compassion,*
28 *professionalism, and scholarship. The fellow develops deep medical*
29 *knowledge, patient care skills, and expertise applicable to their focused*
30 *area of practice. Fellowship is an intensive program of subspecialty clinical*
31 *and didactic education that focuses on the multidisciplinary care of*
32 *patients. Fellowship education is often physically, emotionally, and*
33 *intellectually demanding, and occurs in a variety of clinical learning*
34 *environments committed to graduate medical education and the well-being*
35 *of patients, residents, fellows, faculty members, students, and all members*
36 *of the health care team.*

37
38 *In addition to clinical education, many fellowship programs advance*
39 *fellows' skills as physician-scientists. While the ability to create new*
40 *knowledge within medicine is not exclusive to fellowship-educated*
41 *physicians, the fellowship experience expands a physician's abilities to*
42 *pursue hypothesis-driven scientific inquiry that results in contributions to*
43 *the medical literature and patient care. Beyond the clinical subspecialty*
44 *expertise achieved, fellows develop mentored relationships built on an*
45 *infrastructure that promotes collaborative research.*

46
47 **Int.B.** **Definition of Subspecialty**

71

Pediatric critical care medicine programs provide fellows with an understanding of the biology of acute, life-threatening disease and injury and providing end-of-life care, as well as the necessary cognitive and technical skills to prepare them to serve as skilled clinicians, competent educators, and scholars who contribute to scientific advances in the field.

Int.C. Length of Educational Program

The educational program must be 36 months in length. ^(Core)

I. Oversight

I.A. Sponsoring Institution

The Sponsoring Institution is the organization or entity that assumes the ultimate financial and academic responsibility for a program of graduate medical education consistent with the ACGME Institutional Requirements.

When the Sponsoring Institution is not a rotation site for the program, the most commonly utilized site of clinical activity for the program is the primary clinical site.

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

78
79
80
81
82
83
84
85
86
87
88

I.A.1. The program must be sponsored by one ACGME-accredited Sponsoring Institution. ^{(Core)*}

I.B. Participating Sites

A participating site is an organization providing educational experiences or educational assignments/rotations for fellows.

I.B.1. The program, with approval of its Sponsoring Institution, must designate a primary clinical site. ^(Core)

I.B.1.a) An accredited pediatric critical care program must be an integral part of a core pediatric residency program, and should be sponsored by the same ACGME-accredited Sponsoring Institution. ^(Core)

- 89 I.B.1.a).(1) The pediatric critical care program should be
90 geographically proximate to the core pediatric residency
91 program. ^(Detail)
92
- 93 **I.B.2. There must be a program letter of agreement (PLA) between the**
94 **program and each participating site that governs the relationship**
95 **between the program and the participating site providing a required**
96 **assignment. ^(Core)**
97
- 98 **I.B.2.a) The PLA must:**
99
- 100 **I.B.2.a).(1) be renewed at least every 10 years; and, ^(Core)**
101
- 102 **I.B.2.a).(2) be approved by the designated institutional official**
103 **(DIO). ^(Core)**
104
- 105 **I.B.3. The program must monitor the clinical learning and working**
106 **environment at all participating sites. ^(Core)**
107
- 108 **I.B.3.a) At each participating site there must be one faculty member,**
109 **designated by the program director, who is accountable for**
110 **fellow education for that site, in collaboration with the**
111 **program director. ^(Core)**
112

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- **Identifying the faculty members who will assume educational and supervisory responsibility for fellows**
- **Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows**
- **Specifying the duration and content of the educational experience**
- **Stating the policies and procedures that will govern fellow education during the assignment**

- 113
- 114 **I.B.4. The program director must submit any additions or deletions of**
115 **participating sites routinely providing an educational experience,**
116 **required for all fellows, of one month full time equivalent (FTE) or**
117 **more through the ACGME's Accreditation Data System (ADS). ^(Core)**
118

119 **I.C. The program, in partnership with its Sponsoring Institution, must engage in**
120 **practices that focus on mission-driven, ongoing, systematic recruitment**
121 **and retention of a diverse and inclusive workforce of residents (if present),**
122 **fellows, faculty members, senior administrative staff members, and other**
123 **relevant members of its academic community.** ^(Core)
124

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution’s mission and aims. The program’s annual evaluation must include an assessment of the program’s efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

125
126 **I.D. Resources**
127

128 **I.D.1. The program, in partnership with its Sponsoring Institution, must**
129 **ensure the availability of adequate resources for fellow education.**
130 ^(Core)
131

132 I.D.1.a) The program must be based in a specifically designed pediatric
133 intensive care unit (PICU) at the primary clinical site. ^(Core)
134

135 I.D.1.b) Facilities and equipment in and related to that unit must be those
136 of a modern PICU available on a 24-hour-a-day basis, and
137 appropriately staffed and equipped to meet the educational needs
138 of the program including, but not limited to: ^(Core)
139

140 I.D.1.b).(1) pediatric cardiac catheterization facility; ^(Core)
141

142 I.D.1.b).(2) availability of continuous renal replacement therapy and
143 acute hemodialysis; ^(Core)
144

145 I.D.1.b).(3) laboratories that provide complete and prompt evaluation
146 and support; and, ^(Core)
147

148 I.D.1.b).(4) timely bedside pediatric imaging and EEG services for
149 patients. ^(Core)
150

151 I.D.1.c) Facilities and services, including a comprehensive laboratory,
152 pathology and imaging, must be available. ^(Core)
153

154 I.D.1.d) The program must have access to laboratories in order to perform
155 testing specific to pediatric critical care medicine. ^(Core)
156

157 I.D.1.e) An adequate number and variety of PICU patients, ranging in age
158 from newborn through young adulthood, must be available to
159 ensure fellows develop competence in the management of such
160 patients, including those requiring pre and post-operative care.
161 ^(Core)
162

- 163 I.D.1.e).(1) There should be a minimum of 700 admissions annually to
 164 the PICU at the primary clinical site. (Core)
 165
 166 I.D.1.e).(1).(a) A program having fewer admissions must
 167 specifically demonstrate that it is able to provide the
 168 breadth of experience required for the number of
 169 fellows in the program. (Core)
 170
 171 I.D.1.e).(2) The number of patients requiring mechanical ventilation,
 172 and with single or multi-system organ failure, severe
 173 trauma, and major neurologic or neurosurgical problems,
 174 must be sufficient to provide each fellow with adequate
 175 opportunity to become skilled in their management. (Core)
 176
 177 I.D.1.e).(3) There must be sufficient exposure to the use of invasive
 178 and non-invasive hemodynamic and intracranial monitoring
 179 to ensure fellows' understanding of their uses and
 180 limitations. (Core)
 181
 182 I.D.1.e).(4) There must be an affiliated pediatric cardiac surgical
 183 program with a volume of at least 100 cases per year. (Core)
 184

Specialty-Specific Background and Intent: Pediatric cardiac surgery patients will not necessarily all be present in the PICU since, in some sites, care for post-operative cardiac surgery patients may be provided in a separate pediatric cardiac surgical ICU. In such cases, therefore, provision must be made for fellows to have substantial patient care experience in the pediatric cardiac surgical ICU, and such rotations should be considered mandatory rather than elective experiences.

- 185
 186 I.D.1.e).(5) Pediatric patients available to the fellows should include
 187 those with solid organ transplantations. (Detail)
 188
 189 **I.D.2. The program, in partnership with its Sponsoring Institution, must**
 190 **ensure healthy and safe learning and working environments that**
 191 **promote fellow well-being and provide for:** (Core)
 192
 193 **I.D.2.a) access to food while on duty;** (Core)
 194
 195 **I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available**
 196 **and accessible for fellows with proximity appropriate for safe**
 197 **patient care;** (Core)
 198

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

199
200 I.D.2.c) clean and private facilities for lactation that have refrigeration
201 capabilities, with proximity appropriate for safe patient care;
202 (Core)
203

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

204
205 I.D.2.d) security and safety measures appropriate to the participating
206 site; and, (Core)
207

208 I.D.2.e) accommodations for fellows with disabilities consistent with
209 the Sponsoring Institution's policy. (Core)
210

211 I.D.3. Fellows must have ready access to subspecialty-specific and other
212 appropriate reference material in print or electronic format. This
213 must include access to electronic medical literature databases with
214 full text capabilities. (Core)
215

216 I.D.4. The program's educational and clinical resources must be adequate
217 to support the number of fellows appointed to the program. (Core)
218

219 I.E. *A fellowship program usually occurs in the context of many learners and
220 other care providers and limited clinical resources. It should be structured
221 to optimize education for all learners present.*
222

223 I.E.1. Fellows should contribute to the education of residents in core
224 programs, if present. (Core)
225

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

226
227 II. Personnel
228

229 II.A. Program Director
230

231 II.A.1. There must be one faculty member appointed as program director
232 with authority and accountability for the overall program, including
233 compliance with all applicable program requirements. (Core)
234

235 II.A.1.a) The Sponsoring Institution’s Graduate Medical Education
236 Committee (GMEC) must approve a change in program
237 director. ^(Core)
238

239 II.A.1.b) Final approval of the program director resides with the
240 Review Committee. ^(Core)
241

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual’s responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director’s nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

242
243 II.A.2. The program director must be provided with support adequate for
244 administration of the program based upon its size and configuration.
245 ^(Core)
246

247 II.A.2.a) At a minimum, the program director must be provided with the
248 salary support required to devote 20 percent FTE of non-clinical
249 time to the administration of the program. Additional support for
250 the program director and the associate program director(s) must
251 be provided based on program size as follows: ^(Core)
252

Number of Approved Fellow Positions	Minimum Aggregate Program Director/Associate Program Director FTE
1-3	0.2
4-6	0.25
7-9	0.3
≥10	0.35

253
Background and Intent: Twenty percent FTE is defined as one day per week.
“Administrative time” is defined as non-clinical time spent meeting the responsibilities of the program director as detailed in requirements II.A.4.-II.A.4.a).(16).
The requirement does not address the source of funding required to provide the specified salary support.

254
255 II.A.3. Qualifications of the program director:
256

257 II.A.3.a) must include subspecialty expertise and qualifications
258 acceptable to the Review Committee; ^(Core)
259

260 II.A.3.b) must include current certification in the subspecialty for
261 which they are the program director by the American Board
262 of Pediatrics or subspecialty qualifications that are acceptable
263 to the Review Committee; and, ^(Core)

264
265
266
267
268
269

[Note that while the Common Program Requirements deem certification by a certifying board of the American Osteopathic Association (AOA) acceptable, there is no AOA board that offers certification in this subspecialty]

Specialty-Specific Background and Intent: Qualifications other than pediatric critical care medicine certification by the American Board of Pediatrics (ABP) will be considered only in exceptional circumstances. For a program director without pediatric critical care medicine certification from the ABP, the Review Committee will consider the following criteria in determining whether alternate qualifications are acceptable:

- completion of a pediatric critical care medicine fellowship program
- scholarship within the field of pediatric critical care medicine; specifically, evidence of on-going scholarship documented by contributions to the peer-reviewed literature in pediatric critical care medicine, and pediatric critical care medicine presentations at national meetings
- leadership and/or participation on committees in national pediatric subspecialty organizations
- current clinical activity in pediatric critical care medicine

Years of practice are not an equivalent to specialty board certification, and the Review Committee does not accept the phrase "board eligible."

270
271
272
273
274
275
276
277
278
279
280
281
282
283
284
285

II.A.3.c) must include a record of ongoing involvement in scholarly activities ^(Core)

II.A.4. Program Director Responsibilities

The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and promotion of fellows, and disciplinary action; supervision of fellows; and fellow education in the context of patient care. ^(Core)

II.A.4.a) The program director must:

II.A.4.a).(1) be a role model of professionalism; ^(Core)

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

286
287
288

II.A.4.a).(2) design and conduct the program in a fashion consistent with the needs of the community, the

289
290
291

mission(s) of the Sponsoring Institution, and the
mission(s) of the program; ^(Core)

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

292
293
294
295
296

II.A.4.a).(3) administer and maintain a learning environment conducive to educating the fellows in each of the ACGME Competency domains; ^(Core)

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

297
298
299
300
301
302
303
304
305
306
307
308
309
310
311
312
313
314

II.A.4.a).(4) develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the fellowship program education and at least annually thereafter, as outlined in V.B.; ^(Core)

II.A.4.a).(5) have the authority to approve program faculty members for participation in the fellowship program education at all sites; ^(Core)

II.A.4.a).(6) have the authority to remove program faculty members from participation in the fellowship program education at all sites; ^(Core)

II.A.4.a).(7) have the authority to remove fellows from supervising interactions and/or learning environments that do not meet the standards of the program; ^(Core)

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

315
316
317
318

II.A.4.a).(8) submit accurate and complete information required and requested by the DIO, GMEC, and ACGME; ^(Core)

- 319 **II.A.4.a).(9)** provide applicants who are offered an interview with
 320 information related to the applicant’s eligibility for the
 321 relevant subspecialty board examination(s); ^(Core)
 322
- 323 **II.A.4.a).(10)** provide a learning and working environment in which
 324 fellows have the opportunity to raise concerns and
 325 provide feedback in a confidential manner as
 326 appropriate, without fear of intimidation or retaliation;
 327 ^(Core)
 328
- 329 **II.A.4.a).(11)** ensure the program’s compliance with the Sponsoring
 330 Institution’s policies and procedures related to
 331 grievances and due process; ^(Core)
 332
- 333 **II.A.4.a).(12)** ensure the program’s compliance with the Sponsoring
 334 Institution’s policies and procedures for due process
 335 when action is taken to suspend or dismiss, not to
 336 promote, or not to renew the appointment of a fellow;
 337 ^(Core)
 338

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution’s policies and procedures, and will ensure they are followed by the program’s leadership, faculty members, support personnel, and fellows.

- 339
- 340 **II.A.4.a).(13)** ensure the program’s compliance with the Sponsoring
 341 Institution’s policies and procedures on employment
 342 and non-discrimination; ^(Core)
 343
- 344 **II.A.4.a).(13).(a)** **Fellows must not be required to sign a non-**
 345 **competition guarantee or restrictive covenant.**
 346 ^(Core)
 347
- 348 **II.A.4.a).(14)** document verification of program completion for all
 349 graduating fellows within 30 days; ^(Core)
 350
- 351 **II.A.4.a).(15)** provide verification of an individual fellow’s
 352 completion upon the fellow’s request, within 30 days;
 353 and, ^(Core)
 354

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

- 355
- 356 **II.A.4.a).(16)** obtain review and approval of the Sponsoring
 357 Institution’s DIO before submitting information or
 358 requests to the ACGME, as required in the Institutional
 359 Requirements and outlined in the ACGME Program

360 Director's Guide to the Common Program
361 Requirements. (Core)
362

363 **II.B. Faculty**
364

365 *Faculty members are a foundational element of graduate medical education*
366 *– faculty members teach fellows how to care for patients. Faculty members*
367 *provide an important bridge allowing fellows to grow and become practice*
368 *ready, ensuring that patients receive the highest quality of care. They are*
369 *role models for future generations of physicians by demonstrating*
370 *compassion, commitment to excellence in teaching and patient care,*
371 *professionalism, and a dedication to lifelong learning. Faculty members*
372 *experience the pride and joy of fostering the growth and development of*
373 *future colleagues. The care they provide is enhanced by the opportunity to*
374 *teach. By employing a scholarly approach to patient care, faculty members,*
375 *through the graduate medical education system, improve the health of the*
376 *individual and the population.*

377
378 *Faculty members ensure that patients receive the level of care expected*
379 *from a specialist in the field. They recognize and respond to the needs of*
380 *the patients, fellows, community, and institution. Faculty members provide*
381 *appropriate levels of supervision to promote patient safety. Faculty*
382 *members create an effective learning environment by acting in a*
383 *professional manner and attending to the well-being of the fellows and*
384 *themselves.*
385

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment or salary support.

386
387 **II.B.1. For each participating site, there must be a sufficient number of**
388 **faculty members with competence to instruct and supervise all**
389 **fellows at that location. (Core)**
390

391 **II.B.2. Faculty members must:**
392

393 **II.B.2.a) be role models of professionalism; (Core)**
394

395 **II.B.2.b) demonstrate commitment to the delivery of safe, quality,**
396 **cost-effective, patient-centered care; (Core)**
397

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

398
399 **II.B.2.c) demonstrate a strong interest in the education of fellows; (Core)**
400

401 **II.B.2.d) devote sufficient time to the educational program to fulfill**
402 **their supervisory and teaching responsibilities; (Core)**

- 403
 404 **II.B.2.e)** administer and maintain an educational environment
 405 conducive to educating fellows; ^(Core)
 406
 407 **II.B.2.f)** regularly participate in organized clinical discussions,
 408 rounds, journal clubs, and conferences; ^(Core)
 409
 410 **II.B.2.g)** pursue faculty development designed to enhance their skills
 411 at least annually; and, ^(Core)
 412

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

- 413
 414 **II.B.2.h)** mentor fellows in the application of scientific principles,
 415 epidemiology, biostatistics, and evidence-based medicine to the
 416 clinical care of patients. ^(Core)
 417

418 **II.B.3. Faculty Qualifications**

- 419
 420 **II.B.3.a)** Faculty members must have appropriate qualifications in
 421 their field and hold appropriate institutional appointments.
 422 ^(Core)
 423

424 **II.B.3.b) Subspecialty physician faculty members must:**

- 425
 426 **II.B.3.b).(1)** have current certification in the subspecialty by the
 427 American Board of Pediatrics or possess qualifications
 428 judged acceptable to the Review Committee. ^(Core)
 429

430 [Note that while the Common Program Requirements
 431 deem certification by a certifying board of the American
 432 Osteopathic Association (AOA) acceptable, there is no
 433 AOA board that offers certification in this subspecialty]
 434

Specialty-Specific Background and Intent: For a faculty member without pediatric critical care medicine certification from the ABP, the Review Committee will consider the following criteria in determining whether alternate qualifications are acceptable:

- completion of a pediatric critical care medicine fellowship program
- scholarship within the field of pediatric critical care medicine; specifically, evidence of on-going scholarship documented by contributions to the peer-reviewed literature in pediatric critical care medicine, and pediatric critical care medicine presentations at national meetings
- leadership and/or participation on committees in national pediatric subspecialty organizations

- current clinical activity in pediatric critical care medicine

If a faculty member is a recent graduate of a pediatric critical care medicine program, the Review Committee expects that individual to take and pass the next eligible ABP subspecialty certifying examination. If the faculty member is unable to take the next administration of the certifying examination, an explanation should be provided.

Years of practice are not an equivalent to specialty board certification, and the Review Committee does not accept the phrase "board eligible."

Provision of documentation of alternate qualifications is the responsibility of the program director.

435
436
437
438
439

II.B.3.c) Any non-physician faculty members who participate in fellowship program education must be approved by the program director. ^(Core)

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

465

II.B.3.d) Any other specialty physician faculty members must have current certification in their specialty by the appropriate American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board, or possess qualifications judged acceptable to the Review Committee. ^(Core)

II.B.3.d).(1) In addition to the pediatric critical care medicine faculty members, ABP- or AOBP-certified faculty members and consultants in the following subspecialties must be available:

II.B.3.d).(1).(a) neonatal-perinatal medicine; ^(Core)

II.B.3.d).(1).(b) pediatric cardiology; ^(Core)

II.B.3.d).(1).(c) pediatric endocrinology; ^(Core)

II.B.3.d).(1).(d) pediatric emergency medicine; ^(Core)

II.B.3.d).(1).(e) pediatric gastroenterology; ^(Core)

II.B.3.d).(1).(f) pediatric hematology-oncology; ^(Core)

II.B.3.d).(1).(g) pediatric infectious diseases; and, ^(Core)

466		
467	II.B.3.d).(1).(h)	pediatric nephrology. (Core)
468		
469	II.B.3.d).(2)	The faculty should also include the following specialists
470		with substantial experience with pediatric problems:
471		
472	II.B.3.d).(2).(a)	allergist and immunologist(s); (Core)
473		
474	II.B.3.d).(2).(b)	anesthesiologist(s); (Core)
475		
476	II.B.3.d).(2).(c)	child abuse pediatrician(s); (Core)
477		
478	II.B.3.d).(2).(d)	child and adolescent psychiatrist(s); (Core)
479		
480	II.B.3.d).(2).(e)	child neurologist(s); (Core)
481		
482	II.B.3.d).(2).(f)	congenital cardiac surgeon(s); (Detail)
483		
484	II.B.3.d).(2).(g)	medical geneticist(s); (Detail)
485		
486	II.B.3.d).(2).(h)	neurological surgeon(s); (Core)
487		
488	II.B.3.d).(2).(i)	neuroradiologist(s); (Detail)
489		
490	II.B.3.d).(2).(j)	orthopaedic surgeon(s); (Detail)
491		
492	II.B.3.d).(2).(k)	otolaryngologist(s); (Core)
493		
494	II.B.3.d).(2).(l)	pathologist(s); (Detail)
495		
496	II.B.3.d).(2).(m)	pediatric surgeon(s); (Core)
497		
498	II.B.3.d).(2).(n)	physiatrist(s); (Detail)
499		
500	II.B.3.d).(2).(o)	radiologist(s); and, (Core)
501		
502	II.B.3.d).(2).(p)	trauma surgeon(s). (Detail)
503		

Specialty-Specific Background and Intent: The Review Committee recognizes that some programs may not have access to board certified pediatric subspecialists in some disciplines and will allow adult subspecialists with pediatric expertise. However, it is expected that faculty members have pediatric subspecialty certification, in those subspecialties where pediatric subspecialty board certification is available, whenever possible. Adult subspecialists should not be appointed as faculty members or consultants if pediatric subspecialists are available.

504
505 **II.B.4. Core Faculty**
506
507 **Core faculty members must have a significant role in the education**
508 **and supervision of fellows and must devote a significant portion of**
509 **their entire effort to fellow education and/or administration, and**

510
511
512

must, as a component of their activities, teach, evaluate, and provide formative feedback to fellows. ^(Core)

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.

530
531
532
533
534
535

II.B.4.a) Core faculty members must be designated by the program director. ^(Core)

II.B.4.b) Core faculty members must complete the annual ACGME Faculty Survey. ^(Core)

II.B.4.b).(1) To ensure the quality of the educational and scholarly activity of the program, and to provide adequate supervision of fellows, there must be at least four core faculty members, inclusive of the program director, who are certified in pediatric critical care medicine by the ABP, or who have other qualifications acceptable to the Review Committee. ^(Core)

II.C. Program Coordinator

II.C.1. There must be a program coordinator. ^(Core)

II.C.2. The program coordinator must be provided with support adequate for administration of the program based upon its size and configuration. ^(Core)

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge of the ACGME and Program Requirements, policies, and procedures. Program coordinators assist the program director in accreditation efforts, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities

for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

537
538
539
540
541
542

II.D. Other Program Personnel

The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. ^(Core)

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

II.D.1. In order to enhance fellows' understanding of the multidisciplinary nature of pediatric intensive care, the following personnel with pediatric focus and experience should be available:

- II.D.1.a) child life therapist(s); ^(Detail)
- II.D.1.b) dietician(s); ^(Detail)
- II.D.1.c) hospice and palliative medicine professional(s); ^(Detail)
- II.D.1.d) critical care nurse(s); ^(Core)
- II.D.1.e) pharmacist(s); ^(Core)
- II.D.1.f) respiratory therapist(s), ^(Core)
- II.D.1.g) physical and occupational therapist(s); ^(Detail)
- II.D.1.h) social worker(s); and, ^(Core)
- II.D.1.i) speech and language therapist(s). ^(Detail)

III. Fellow Appointments

III.A. Eligibility Criteria

III.A.1. Eligibility Requirements – Fellowship Programs

All required clinical education for entry into ACGME-accredited fellowship programs must be completed in an ACGME-accredited residency program, an AOA-approved residency program, a program with ACGME International (ACGME-I) Advanced Specialty Accreditation, or a Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of Canada (CFPC)-accredited residency program located in Canada. ^(Core)

622
623

III.A.1.a) Fellowship programs must receive verification of each entering fellow’s level of competence in the required field, upon matriculation, using ACGME, ACGME-I, or CanMEDS Milestones evaluations from the core residency program. (Core)

III.A.1.b) Prerequisite education for entry into a pediatric critical care medicine program must include the satisfactory completion of a pediatrics or combined internal medicine-pediatrics residency program that satisfies the requirements listed in III.A.1. (Core)

III.A.1.c) Fellow Eligibility Exception
The Review Committee for Pediatrics will allow the following exception to the fellowship eligibility requirements:

III.A.1.c).(1) An ACGME-accredited fellowship program may accept an exceptionally qualified international graduate applicant who does not satisfy the eligibility requirements listed in III.A.1., but who does meet all of the following additional qualifications and conditions: (Core)

III.A.1.c).(1).(a) evaluation by the program director and fellowship selection committee of the applicant’s suitability to enter the program, based on prior training and review of the summative evaluations of training in the core specialty; and, (Core)

III.A.1.c).(1).(b) review and approval of the applicant’s exceptional qualifications by the GMEC; and, (Core)

III.A.1.c).(1).(c) verification of Educational Commission for Foreign Medical Graduates (ECFMG) certification. (Core)

III.A.1.c).(2) Applicants accepted through this exception must have an evaluation of their performance by the Clinical Competency Committee within 12 weeks of matriculation. (Core)

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSOC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training.

Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

624
625 **III.B. The program director must not appoint more fellows than approved by the**
626 **Review Committee. (Core)**
627

628 **III.B.1. All complement increases must be approved by the Review**
629 **Committee. (Core)**
630

631 **III.C. Fellow Transfers**
632

633 **The program must obtain verification of previous educational experiences**
634 **and a summative competency-based performance evaluation prior to**
635 **acceptance of a transferring fellow, and Milestones evaluations upon**
636 **matriculation. (Core)**
637

638 **IV. Educational Program**
639

640 ***The ACGME accreditation system is designed to encourage excellence and***
641 ***innovation in graduate medical education regardless of the organizational***
642 ***affiliation, size, or location of the program.***
643

644 ***The educational program must support the development of knowledgeable, skillful***
645 ***physicians who provide compassionate care.***
646

647 ***In addition, the program is expected to define its specific program aims consistent***
648 ***with the overall mission of its Sponsoring Institution, the needs of the community***
649 ***it serves and that its graduates will serve, and the distinctive capabilities of***
650 ***physicians it intends to graduate. While programs must demonstrate substantial***
651 ***compliance with the Common and subspecialty-specific Program Requirements, it***
652 ***is recognized that within this framework, programs may place different emphasis***
653 ***on research, leadership, public health, etc. It is expected that the program aims***
654 ***will reflect the nuanced program-specific goals for it and its graduates; for***
655 ***example, it is expected that a program aiming to prepare physician-scientists will***
656 ***have a different curriculum from one focusing on community health.***
657

658 **IV.A. The curriculum must contain the following educational components: (Core)**
659

660 **IV.A.1. a set of program aims consistent with the Sponsoring Institution's**
661 **mission, the needs of the community it serves, and the desired**
662 **distinctive capabilities of its graduates; (Core)**

663
664 **IV.A.1.a) The program's aims must be made available to program**
665 **applicants, fellows, and faculty members.** (Core)

666
667 **IV.A.2. competency-based goals and objectives for each educational**
668 **experience designed to promote progress on a trajectory to**
669 **autonomous practice in their subspecialty. These must be**
670 **distributed, reviewed, and available to fellows and faculty members;**
671 (Core)

672
673 **IV.A.3. delineation of fellow responsibilities for patient care, progressive**
674 **responsibility for patient management, and graded supervision in**
675 **their subspecialty;** (Core)

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

677
678 **IV.A.4. structured educational activities beyond direct patient care; and,**
679 (Core)
680

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

681
682 **IV.A.5. advancement of fellows' knowledge of ethical principles**
683 **foundational to medical professionalism.** (Core)

684
685 **IV.B. ACGME Competencies**

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

687
688 **IV.B.1. The program must integrate the following ACGME Competencies**
689 **into the curriculum:** (Core)

690
691 **IV.B.1.a) Professionalism**

692

693 Fellows must demonstrate a commitment to professionalism
694 and an adherence to ethical principles. ^(Core)

695
696 **IV.B.1.b) Patient Care and Procedural Skills**
697

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality*. *Health Affairs*. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

698
699 **IV.B.1.b).(1) Fellows must be able to provide patient care that is**
700 **compassionate, appropriate, and effective for the**
701 **treatment of health problems and the promotion of**
702 **health.** ^(Core)

703
704 IV.B.1.b).(1).(a) Fellows must develop competence in the clinical
705 skills needed in pediatric critical care medicine;^(Core)

706
707 IV.B.1.b).(1).(b) Fellows must demonstrate the ability to provide
708 consultation, perform a history and physical
709 examination, make informed diagnostic and
710 therapeutic decisions that result in optimal clinical
711 judgement, and develop and carry out management
712 plans. ^(Core)

713
714 IV.B.1.b).(1).(c) Fellows must demonstrate the ability to provide
715 transfer of care that ensures seamless transitions,
716 ^(Core)

717
718 IV.B.1.b).(1).(d) In order to promote emotional resilience in children,
719 adolescents, and their families, fellows must:

720
721 IV.B.1.b).(1).(d).(i) provide care that is sensitive to the
722 developmental stage of the patient with
723 common behavioral and mental health
724 issues, and the cultural context of the
725 patient and family; and, ^(Core)

726
727 IV.B.1.b).(1).(d).(ii) demonstrate the ability to refer and/or co-
728 manage patients with common behavioral
729 and mental health issues along with
730 appropriate specialists when indicated. ^(Core)
731

732	IV.B.1.b).(1).(e)	Fellows must demonstrate competence in providing or coordinating care with a medical home for patients with complex and chronic diseases. ^(Core)
733		
734		
735		
736	IV.B.1.b).(1).(f)	Fellows must competently use and interpret laboratory tests, imaging, and other diagnostic procedures. ^(Core)
737		
738		
739		
740	IV.B.1.b).(1).(g)	Fellows must demonstrate the ability to diagnose and manage patients with acute, life-threatening problems. ^(Core)
741		
742		
743		
744	IV.B.1.b).(1).(h)	Fellows must demonstrate the ability to provide compassionate end-of-life care and be able to perform an accurate brain death examination. ^(Core)
745		
746		
747		
748	IV.B.1.b).(1).(i)	Fellows must have the knowledge and skills to safely direct transport of a critically-ill patient. ^(Core)
749		
750		
751	IV.B.1.b).(1).(j)	Fellows must demonstrate competence and effective participation in team-based care of critically-ill patients whose primary problem is surgical. ^(Core)
752		
753		
754		
755		
756	IV.B.1.b).(1).(j).(i)	To meet these objectives, there must be coordination of care and collegial relationships among pediatric surgeons, neonatologists, and critical care intensivists concerning the management of medical problems in these complex critically-ill patients. ^(Detail)
757		
758		
759		
760		
761		
762		
763		
764	IV.B.1.b).(1).(k)	Fellows must demonstrate leadership skills to enhance team function, the learning environment, and/or the health care delivery system/environment with the ultimate intent of improving care of patients. ^(Core)
765		
766		
767		
768		
769		
770	IV.B.1.b).(2)	Fellows must be able to perform all medical, diagnostic, and surgical procedures considered essential for the area of practice. ^(Core)
771		
772		
773		
774	IV.B.1.b).(2).(a)	Fellows must demonstrate the necessary procedural skills and develop an understanding of the indications, risks, and limitations. ^(Core)
775		
776		
777		
778	IV.B.1.b).(2).(a).(i)	These procedures include peripheral arterial and venous catheterization, central venous catheterization, endotracheal intubation, thoracostomy tube placement, and resuscitation and procedural sedation. ^(Core)
779		
780		
781		
782		

783
784 **IV.B.1.c) Medical Knowledge**
785
786 **Fellows must demonstrate knowledge of established and**
787 **evolving biomedical, clinical, epidemiological and social-**
788 **behavioral sciences, as well as the application of this**
789 **knowledge to patient care.** (Core)

790
791 IV.B.1.c).(1) Fellows must demonstrate knowledge of biostatistics,
792 clinical and laboratory research methodology, study
793 design, preparation of applications for funding and/or
794 approval of clinical research protocols, critical literature
795 review, principles of evidence-based medicine, ethical
796 principles involving clinical research, and teaching
797 methods. (Core)

798
799 IV.B.1.c).(2) Fellows must demonstrate competence in their knowledge
800 of physiologic and pharmacologic principles, and their
801 ability to apply these principles to the critically-ill patient.
802 (Core)

803
804 IV.B.1.c).(3) Fellows must demonstrate their knowledge of life-
805 sustaining therapies. (Core)

806
807 **IV.B.1.d) Practice-based Learning and Improvement**

808
809 **Fellows must demonstrate the ability to investigate and**
810 **evaluate their care of patients, to appraise and assimilate**
811 **scientific evidence, and to continuously improve patient care**
812 **based on constant self-evaluation and lifelong learning.** (Core)
813

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

814
815 **IV.B.1.e) Interpersonal and Communication Skills**

816
817 **Fellows must demonstrate interpersonal and communication**
818 **skills that result in the effective exchange of information and**
819 **collaboration with patients, their families, and health**
820 **professionals.** (Core)

821
822 **IV.B.1.f) Systems-based Practice**

823
824 **Fellows must demonstrate an awareness of and**
825 **responsiveness to the larger context and system of health**

826 care, including the social determinants of health, as well as
827 the ability to call effectively on other resources to provide
828 optimal health care. ^(Core)
829

830 **IV.C. Curriculum Organization and Fellow Experiences**

831
832 **IV.C.1. The curriculum must be structured to optimize fellow educational**
833 **experiences, the length of these experiences, and supervisory**
834 **continuity.** ^(Core)
835

836 IV.C.1.a) Assignment of rotations must be structured to minimize the
837 frequency of rotational transitions, and rotations must be of
838 sufficient length to provide a quality educational experience,
839 defined by continuity of patient care, ongoing supervision,
840 longitudinal relationships with faculty members, and meaningful
841 assessment and feedback. ^(Core)
842

843 IV.C.1.b) Clinical experiences should be structured to facilitate learning in a
844 manner that allows fellows to function as part of an effective
845 interprofessional team that works together longitudinally with
846 shared goals of patient safety and quality improvement. ^(Core)
847

848 **IV.C.2. The program must provide instruction and experience in pain**
849 **management if applicable for the subspecialty, including recognition**
850 **of the signs of addiction.** ^(Core)
851

852 IV.C.3. Fellows must have a minimum of 12 months of clinical experience in an
853 ICU in which they have primary responsibility for providing patient care.
854 ^(Core)
855

856 IV.C.3.a) Fellows must have a minimum of eight months of critical care
857 experience in the PICU. ^(Core)
858

859 IV.C.3.b) Fellows' clinical experience in critical care settings other than the
860 PICU, ~~such as a~~ including burn, medical, or neonatal ICUs, must
861 be no more than four months; ~~except when all of the post-~~
862 ~~operative cardiovascular care is provided for in~~ however, if there is
863 a pediatric cardiac surgical ICU separate from the PICU, two
864 additional months may be spent in the pediatric cardiac ICU for a
865 total of six months of rotations in critical care settings outside of
866 the PICU. ^(Core)
867

868 IV.C.3.b).(1) ~~—————~~ If there is a separate pediatric cardiac ICU, no more than
869 six months must be spent on rotations other than the PICU
870 over the 36 months of the educational program. ^(Core)
871

<p><u>Specialty-Specific Background and Intent: ICU rotations in critical care environments other than in the PICU may provide different educational experiences. However, these rotations cannot completely replace those in the PICU. Experiences in which a fellow consults or solely performs procedures on the care of the critically-ill patient, rather than provides primary</u></p>
--

responsibility for all facets of patient care, are not included in the limit. The operating room is also not considered a critical care environment.

- 872
873 IV.C.4. Fellow education must include experience in serving as a role model and
874 providing supervision to residents and/or medical students; ^(Core)
875
- 876 IV.C.5. Fellows must have a formally structured educational program in the
877 clinical and basic sciences related to pediatric critical care medicine. ^(Core)
878
- 879 IV.C.5.a) The program must utilize didactic and clinical experience for fellow
880 education. ^(Core)
881
- 882 IV.C.5.b) Pediatric critical care medicine conferences must occur regularly,
883 and must involve active fellow participation in planning and
884 implementation. ^(Core)
885
- 886 IV.C.5.c) Fellow education must include instruction in:
887
- 888 IV.C.5.c).(1) basic and fundamental disciplines, as appropriate to
889 pediatric critical care medicine, such as anatomy,
890 physiology, biochemistry, embryology, pathology,
891 microbiology, pharmacology, immunology, genetics, and
892 nutrition/metabolism; ^(Core)
893
- 894 IV.C.5.c).(2) pathophysiology of disease, reviews of recent advances in
895 clinical medicine and biomedical research, conferences
896 dealing with complications and death, as well as the
897 scientific, ethical, and legal implications of confidentiality
898 and informed consent; ^(Core)
899
- 900 IV.C.5.c).(3) bioethics; and, ^(Core)
901
- 902 IV.C.5.c).(3).(a) This should include attention to physician-patient,
903 physician-family, physician-physician/allied health
904 professional, and physician-society relationships.
905 ^(Detail)
906
- 907 IV.C.5.c).(4) the economics of health care and current health care
908 management issues, such as cost-effective patient care,
909 practice management, preventive care, population health,
910 quality improvement, resource allocation, and clinical
911 outcomes. ^(Core)

Program Requirements. Scholarly activities may include discovery, integration, application, and teaching.

The ACGME recognizes the diversity of fellowships and anticipates that programs prepare physicians for a variety of roles, including clinicians, scientists, and educators. It is expected that the program’s scholarship will reflect its mission(s) and aims, and the needs of the community it serves. For example, some programs may concentrate their scholarly activity on quality improvement, population health, and/or teaching, while other programs might choose to utilize more classic forms of biomedical research as the focus for scholarship.

IV.D.1. Program Responsibilities

IV.D.1.a) The program must demonstrate evidence of scholarly activities, consistent with its mission(s) and aims. ^(Core)

IV.D.1.b) The program in partnership with its Sponsoring Institution, must allocate adequate resources to facilitate fellow and faculty involvement in scholarly activities. ^(Core)

IV.D.2. Faculty Scholarly Activity

IV.D.2.a) Among their scholarly activity, programs must demonstrate accomplishments in at least three of the following domains: ^(Core)

- Research in basic science, education, translational science, patient care, or population health
- Peer-reviewed grants
- Quality improvement and/or patient safety initiatives
- Systematic reviews, meta-analyses, review articles, chapters in medical textbooks, or case reports
- Creation of curricula, evaluation tools, didactic educational activities, or electronic educational materials
- Contribution to professional committees, educational organizations, or editorial boards
- Innovations in education

IV.D.2.b) The program must demonstrate dissemination of scholarly activity within and external to the program by the following methods:

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the fellows’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the

creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

- 965
966 **IV.D.2.b).(1)** faculty participation in grand rounds, posters,
967 workshops, quality improvement presentations,
968 podium presentations, grant leadership, non-peer-
969 reviewed print/electronic resources, articles or
970 publications, book chapters, textbooks, webinars,
971 service on professional committees, or serving as a
972 journal reviewer, journal editorial board member, or
973 editor; (Outcome)‡
974
- 975 IV.D.2.b).(1).(a) Scholarly activity must be in a field such as basic
976 science, clinical care, health services, health policy,
977 quality improvement, or education, as it relates to
978 pediatric critical care medicine. (Core)
979
- 980 **IV.D.2.b).(2)** peer-reviewed publication. (Outcome)
981
- 982 **IV.D.3. Fellow Scholarly Activity**
983
- 984 IV.D.3.a) Where appropriate, the core curriculum in scholarly activity should
985 be a collaborative effort involving all of the pediatric subspecialty
986 programs at the institution. (Detail)
987
- 988 IV.D.3.b) Each fellow must design and conduct a scholarly project under the
989 guidance of the program director and a designated mentor. (Core)
990
- 991 IV.D.3.c) The program must provide a scholarship oversight committee for
992 each fellow to oversee and evaluate their progress as related to
993 the scholarly project. (Core)
994
- 995 IV.D.3.c).(1) Where applicable, the process of establishing fellow
996 scholarship oversight committees should be a collaborative
997 effort involving other pediatric subspecialty programs or
998 other experts. (Detail)
999
- 1000 IV.D.3.d) The scholarly experience must begin in the first year and continue
1001 throughout the duration of the educational program. (Core)
1002
- 1003 IV.D.3.d).(1) Fellows must have a minimum of 12 months dedicated to
1004 research and scholarly activity including the development
1005 of requisite skills, project completion, and presentation of
1006 results to the scholarship oversight committee. (Core)
1007
- 1008 **V. Evaluation**
1009
- 1010 **V.A. Fellow Evaluation**
1011
- 1012 **V.A.1. Feedback and Evaluation**

1013

Background and Intent: Feedback is ongoing information provided regarding aspects of one’s performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- fellows identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is *evaluating a fellow’s learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

1014
1015
1016
1017
1018

V.A.1.a) Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. ^(Core)

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

1019
1020
1021
1022
1023
1024
1025
1026
1027
1028

V.A.1.b) Evaluation must be documented at the completion of the assignment. ^(Core)

V.A.1.b).(1) For block rotations of greater than three months in duration, evaluation must be documented at least every three months. ^(Core)

V.A.1.b).(2) Longitudinal experiences such as continuity clinic in the context of other clinical responsibilities must be

- 1029 evaluated at least every three months and at
 1030 completion. ^(Core)
- 1031
- 1032 **V.A.1.c)** The program must provide an objective performance
 1033 evaluation based on the Competencies and the subspecialty-
 1034 specific Milestones, and must: ^(Core)
- 1035
- 1036 **V.A.1.c).(1)** use multiple evaluators (e.g., faculty members, peers,
 1037 patients, self, and other professional staff members);
 1038 and, ^(Core)
- 1039
- 1040 **V.A.1.c).(2)** provide that information to the Clinical Competency
 1041 Committee for its synthesis of progressive fellow
 1042 performance and improvement toward unsupervised
 1043 practice. ^(Core)
- 1044

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

- 1045
- 1046 **V.A.1.d)** The program director or their designee, with input from the
 1047 Clinical Competency Committee, must:
- 1048
- 1049 **V.A.1.d).(1)** meet with and review with each fellow their
 1050 documented semi-annual evaluation of performance,
 1051 including progress along the subspecialty-specific
 1052 Milestones. ^(Core)
- 1053
- 1054 **V.A.1.d).(2)** assist fellows in developing individualized learning
 1055 plans to capitalize on their strengths and identify areas
 1056 for growth; and, ^(Core)
- 1057
- 1058 **V.A.1.d).(3)** develop plans for fellows failing to progress, following
 1059 institutional policies and procedures. ^(Core)
- 1060

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

- 1061
 1062 **V.A.1.e)** **At least annually, there must be a summative evaluation of**
 1063 **each fellow that includes their readiness to progress to the**
 1064 **next year of the program, if applicable. (Core)**
 1065
 1066 **V.A.1.f)** **The evaluations of a fellow’s performance must be accessible**
 1067 **for review by the fellow. (Core)**
 1068
 1069 **V.A.2.** **Final Evaluation**
 1070
 1071 **V.A.2.a)** **The program director must provide a final evaluation for each**
 1072 **fellow upon completion of the program. (Core)**
 1073
 1074 **V.A.2.a).(1)** **The subspecialty-specific Milestones, and when**
 1075 **applicable the subspecialty-specific Case Logs, must**
 1076 **be used as tools to ensure fellows are able to engage**
 1077 **in autonomous practice upon completion of the**
 1078 **program. (Core)**
 1079
 1080 **V.A.2.a).(2)** **The final evaluation must:**
 1081
 1082 **V.A.2.a).(2).(a)** **become part of the fellow’s permanent record**
 1083 **maintained by the institution, and must be**
 1084 **accessible for review by the fellow in**
 1085 **accordance with institutional policy; (Core)**
 1086
 1087 **V.A.2.a).(2).(b)** **verify that the fellow has demonstrated the**
 1088 **knowledge, skills, and behaviors necessary to**
 1089 **enter autonomous practice; (Core)**
 1090
 1091 **V.A.2.a).(2).(c)** **consider recommendations from the Clinical**
 1092 **Competency Committee; and, (Core)**
 1093
 1094 **V.A.2.a).(2).(d)** **be shared with the fellow upon completion of**
 1095 **the program. (Core)**
 1096
 1097 **V.A.3.** **A Clinical Competency Committee must be appointed by the**
 1098 **program director. (Core)**
 1099
 1100 **V.A.3.a)** **At a minimum the Clinical Competency Committee must**
 1101 **include three members, at least one of whom is a core faculty**
 1102 **member. Members must be faculty members from the same**
 1103 **program or other programs, or other health professionals**

- 1104 who have extensive contact and experience with the
 1105 program's fellows. ^(Core)
 1106
 1107 **V.A.3.b)** The Clinical Competency Committee must:
 1108
 1109 **V.A.3.b).(1)** review all fellow evaluations at least semi-annually;
 1110 ^(Core)
 1111
 1112 **V.A.3.b).(2)** determine each fellow's progress on achievement of
 1113 the subspecialty-specific Milestones; and, ^(Core)
 1114
 1115 **V.A.3.b).(3)** meet prior to the fellows' semi-annual evaluations and
 1116 advise the program director regarding each fellow's
 1117 progress. ^(Core)
 1118
 1119 **V.B. Faculty Evaluation**
 1120
 1121 **V.B.1.** The program must have a process to evaluate each faculty
 1122 member's performance as it relates to the educational program at
 1123 least annually. ^(Core)
 1124

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 1125
 1126 **V.B.1.a)** This evaluation must include a review of the faculty member's
 1127 clinical teaching abilities, engagement with the educational
 1128 program, participation in faculty development related to their
 1129 skills as an educator, clinical performance, professionalism,
 1130 and scholarly activities. ^(Core)
 1131
 1132 **V.B.1.b)** This evaluation must include written, confidential evaluations
 1133 by the fellows. ^(Core)
 1134

- 1135 **V.B.2. Faculty members must receive feedback on their evaluations at least**
 1136 **annually.** (Core)
 1137
 1138 **V.B.3. Results of the faculty educational evaluations should be**
 1139 **incorporated into program-wide faculty development plans.** (Core)
 1140

Background and Intent: The quality of the faculty’s teaching and clinical care is a determinant of the quality of the program and the quality of the fellows’ future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members’ teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program’s faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

- 1141
 1142 **V.C. Program Evaluation and Improvement**
 1143
 1144 **V.C.1. The program director must appoint the Program Evaluation**
 1145 **Committee to conduct and document the Annual Program**
 1146 **Evaluation as part of the program’s continuous improvement**
 1147 **process.** (Core)
 1148
 1149 **V.C.1.a) The Program Evaluation Committee must be composed of at**
 1150 **least two program faculty members, at least one of whom is a**
 1151 **core faculty member, and at least one fellow.** (Core)
 1152
 1153 **V.C.1.b) Program Evaluation Committee responsibilities must include:**
 1154
 1155 **V.C.1.b).(1) acting as an advisor to the program director, through**
 1156 **program oversight;** (Core)
 1157
 1158 **V.C.1.b).(2) review of the program’s self-determined goals and**
 1159 **progress toward meeting them;** (Core)
 1160
 1161 **V.C.1.b).(3) guiding ongoing program improvement, including**
 1162 **development of new goals, based upon outcomes;**
 1163 **and,** (Core)
 1164
 1165 **V.C.1.b).(4) review of the current operating environment to identify**
 1166 **strengths, challenges, opportunities, and threats as**
 1167 **related to the program’s mission and aims.** (Core)
 1168

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program’s progress toward achievement of its goals and aims.

- 1169
 1170 **V.C.1.c) The Program Evaluation Committee should consider the**
 1171 **following elements in its assessment of the program:**
 1172
 1173 **V.C.1.c).(1) curriculum;** (Core)

1174		
1175	V.C.1.c).(2)	outcomes from prior Annual Program Evaluation(s);
1176		<small>(Core)</small>
1177

1185	V.C.1.c).(5).(a)	well-being; <small>(Core)</small>
1186		
1187	V.C.1.c).(5).(b)	recruitment and retention; <small>(Core)</small>
1188		
1189	V.C.1.c).(5).(c)	workforce diversity; <small>(Core)</small>
1190		
1191	V.C.1.c).(5).(d)	engagement in quality improvement and patient
1192		safety; <small>(Core)</small>
1193		
1194	V.C.1.c).(5).(e)	scholarly activity; <small>(Core)</small>
1195		
1196	V.C.1.c).(5).(f)	ACGME Resident/Fellow and Faculty Surveys
1197		(where applicable); and, <small>(Core)</small>
1198		
1199	V.C.1.c).(5).(g)	written evaluations of the program. <small>(Core)</small>
1200		
1201	V.C.1.c).(6)	aggregate fellow:
1202		
1203	V.C.1.c).(6).(a)	achievement of the Milestones; <small>(Core)</small>
1204		
1205	V.C.1.c).(6).(b)	in-training examinations (where applicable);
1206		<small>(Core)</small>
1207		
1208	V.C.1.c).(6).(c)	board pass and certification rates; and, <small>(Core)</small>
1209		
1210	V.C.1.c).(6).(d)	graduate performance. <small>(Core)</small>
1211		
1212	V.C.1.c).(7)	aggregate faculty:
1213		
1214	V.C.1.c).(7).(a)	evaluation; and, <small>(Core)</small>
1215		
1216	V.C.1.c).(7).(b)	professional development <small>(Core)</small>
1217		
1218	V.C.1.d)	The Program Evaluation Committee must evaluate the
1219		program’s mission and aims, strengths, areas for
1220		improvement, and threats. <small>(Core)</small>
1221		
1222	V.C.1.e)	The annual review, including the action plan, must:
1223		

- 1224 V.C.1.e).(1) be distributed to and discussed with the members of
 1225 the teaching faculty and the fellows; and, ^(Core)
 1226
 1227 V.C.1.e).(2) be submitted to the DIO. ^(Core)
 1228
 1229 V.C.2. The program must participate in a Self-Study prior to its 10-Year
 1230 Accreditation Site Visit. ^(Core)
 1231
 1232 V.C.2.a) A summary of the Self-Study must be submitted to the DIO.
 1233 ^(Core)
 1234

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

- 1235
 1236 V.C.3. *One goal of ACGME-accredited education is to educate physicians
 1237 who seek and achieve board certification. One measure of the
 1238 effectiveness of the educational program is the ultimate pass rate.*
 1239
 1240 *The program director should encourage all eligible program
 1241 graduates to take the certifying examination offered by the
 1242 applicable American Board of Medical Specialties (ABMS) member
 1243 board or American Osteopathic Association (AOA) certifying board.*
 1244
 1245 V.C.3.a) For subspecialties in which the ABMS member board and/or
 1246 AOA certifying board offer(s) an annual written exam, in the
 1247 preceding three years, the program’s aggregate pass rate of
 1248 those taking the examination for the first time must be higher
 1249 than the bottom fifth percentile of programs in that
 1250 subspecialty. ^(Outcome)
 1251
 1252 V.C.3.b) For subspecialties in which the ABMS member board and/or
 1253 AOA certifying board offer(s) a biennial written exam, in the
 1254 preceding six years, the program’s aggregate pass rate of
 1255 those taking the examination for the first time must be higher
 1256 than the bottom fifth percentile of programs in that
 1257 subspecialty. ^(Outcome)
 1258
 1259 V.C.3.c) For subspecialties in which the ABMS member board and/or
 1260 AOA certifying board offer(s) an annual oral exam, in the
 1261 preceding three years, the program’s aggregate pass rate of
 1262 those taking the examination for the first time must be higher

- 1263 than the bottom fifth percentile of programs in that
 1264 subspecialty. ^(Outcome)
 1265
 1266 **V.C.3.d)** For subspecialties in which the ABMS member board and/or
 1267 AOA certifying board offer(s) a biennial oral exam, in the
 1268 preceding six years, the program’s aggregate pass rate of
 1269 those taking the examination for the first time must be higher
 1270 than the bottom fifth percentile of programs in that
 1271 subspecialty. ^(Outcome)
 1272
 1273 **V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program
 1274 whose graduates over the time period specified in the
 1275 requirement have achieved an 80 percent pass rate will have
 1276 met this requirement, no matter the percentile rank of the
 1277 program for pass rate in that subspecialty. ^(Outcome)
 1278

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

- 1279
 1280 **V.C.3.f)** Programs must report, in ADS, board certification status
 1281 annually for the cohort of board-eligible fellows that
 1282 graduated seven years earlier. ^(Core)
 1283

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates’ performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

- 1284
 1285 **VI. The Learning and Working Environment**
 1286

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

- 1290 • ***Excellence in the safety and quality of care rendered to patients by fellows***
- 1291 ***today***
- 1292
- 1293 • ***Excellence in the safety and quality of care rendered to patients by today’s***
- 1294 ***fellows in their future practice***
- 1295
- 1296 • ***Excellence in professionalism through faculty modeling of:***
- 1297
- 1298 ○ ***the effacement of self-interest in a humanistic environment that supports***
- 1299 ***the professional development of physicians***
- 1300
- 1301 ○ ***the joy of curiosity, problem-solving, intellectual rigor, and discovery***
- 1302
- 1303 • ***Commitment to the well-being of the students, residents, fellows, faculty***
- 1304 ***members, and all members of the health care team***
- 1305

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program’s accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

VI.A.1.a).(3).(a)

Residents, fellows, faculty members, and other clinical staff members must:

VI.A.1.a).(3).(a).(i)

know their responsibilities in reporting patient safety events at the clinical site;
(Core)

VI.A.1.a).(3).(a).(ii)

know how to report patient safety events, including near misses, at the clinical site; and, (Core)

VI.A.1.a).(3).(a).(iii)

be provided with summary information of their institution's patient safety reports. (Core)

VI.A.1.a).(3).(b)

Fellows must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions. (Core)

VI.A.1.a).(4)

Fellow Education and Experience in Disclosure of Adverse Events

Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for fellows to develop and apply.

VI.A.1.a).(4).(a)

All fellows must receive training in how to disclose adverse events to patients and families. (Core)

VI.A.1.a).(4).(b)

Fellows should have the opportunity to participate in the disclosure of patient safety events, real or simulated. (Detail)†

VI.A.1.b)

Quality Improvement

VI.A.1.b).(1)

Education in Quality Improvement

A cohesive model of health care includes quality-related goals, tools, and techniques that are necessary in order for health care professionals to achieve quality improvement goals.

1417		
1418	VI.A.1.b).(1).(a)	Fellows must receive training and experience in quality improvement processes, including an understanding of health care disparities. ^(Core)
1419		
1420		
1421		
1422	VI.A.1.b).(2)	Quality Metrics
1423		
1424		<i>Access to data is essential to prioritizing activities for care improvement and evaluating success of improvement efforts.</i>
1425		
1426		
1427		
1428	VI.A.1.b).(2).(a)	Fellows and faculty members must receive data on quality metrics and benchmarks related to their patient populations. ^(Core)

1450		
1451		
1452		
1453		
1454		
1455		
1456		<i>Supervision in the setting of graduate medical education provides safe and effective care to patients; ensures each fellow's development of the skills, knowledge, and attitudes required to enter the unsupervised practice of medicine; and establishes a foundation for continued professional growth.</i>
1457		
1458		
1459		
1460		
1461		
1462	VI.A.2.a).(1)	Each patient must have an identifiable and appropriately-credentialed and privileged attending physician (or licensed independent practitioner as specified by the applicable Review Committee) who is responsible and accountable for the patient's care. ^(Core)
1463		
1464		
1465		
1466		
1467		

1468

Specialty-Specific Background and Intent: Licensed independent professionals may include, but are not limited to: nurse practitioners, physician assistants, psychologists, physical and occupational therapists, speech and language therapists, dietitians, counselors, and audiologists, as appropriate.

1469

1470

VI.A.2.a).(1).(a)

This information must be available to fellows, faculty members, other members of the health care team, and patients. (Core)

1471

1472

1473

1474

VI.A.2.a).(1).(b)

Fellows and faculty members must inform each patient of their respective roles in that patient's care when providing direct patient care. (Core)

1475

1476

1477

1478

VI.A.2.b)

Supervision may be exercised through a variety of methods. For many aspects of patient care, the supervising physician may be a more advanced fellow. Other portions of care provided by the fellow can be adequately supervised by the appropriate availability of the supervising faculty member or fellow, either on site or by means of telecommunication technology. Some activities require the physical presence of the supervising faculty member. In some circumstances, supervision may include post-hoc review of fellow-delivered care with feedback.

1479

1480

1481

1482

1483

1484

1485

1486

1487

1488

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

1489

1490

VI.A.2.b).(1)

The program must demonstrate that the appropriate level of supervision in place for all fellows is based on each fellow's level of training and ability, as well as patient complexity and acuity. Supervision may be exercised through a variety of methods, as appropriate to the situation. (Core)

1491

1492

1493

1494

1495

1496

1497

VI.A.2.b).(2)

The program must define when physical presence of a supervising physician is required. (Core)

1498

1499

1500

VI.A.2.c)

Levels of Supervision

1501

1502

To promote appropriate fellow supervision while providing for graded authority and responsibility, the program must use the following classification of supervision: (Core)

1503

1504

1505

- 1506 VI.A.2.c).(1) **Direct Supervision:**
 1507
 1508 VI.A.2.c).(1).(a) **the supervising physician is physically present**
 1509 **with the fellow during the key portions of the**
 1510 **patient interaction.** ^(Core)
 1511
 1512 VI.A.2.c).(2) **Indirect Supervision: the supervising physician is not**
 1513 **providing physical or concurrent visual or audio**
 1514 **supervision but is immediately available to the fellow**
 1515 **for guidance and is available to provide appropriate**
 1516 **direct supervision.** ^(Core)
 1517
 1518 VI.A.2.c).(3) **Oversight – the supervising physician is available to**
 1519 **provide review of procedures/encounters with**
 1520 **feedback provided after care is delivered.** ^(Core)
 1521
 1522 VI.A.2.d) **The privilege of progressive authority and responsibility,**
 1523 **conditional independence, and a supervisory role in patient**
 1524 **care delegated to each fellow must be assigned by the**
 1525 **program director and faculty members.** ^(Core)
 1526
 1527 VI.A.2.d).(1) **The program director must evaluate each fellow’s**
 1528 **abilities based on specific criteria, guided by the**
 1529 **Milestones.** ^(Core)
 1530
 1531 VI.A.2.d).(2) **Faculty members functioning as supervising**
 1532 **physicians must delegate portions of care to fellows**
 1533 **based on the needs of the patient and the skills of**
 1534 **each fellow.** ^(Core)
 1535
 1536 VI.A.2.d).(3) **Fellows should serve in a supervisory role to junior**
 1537 **fellows and residents in recognition of their progress**
 1538 **toward independence, based on the needs of each**
 1539 **patient and the skills of the individual resident or**
 1540 **fellow.** ^(Detail)
 1541
 1542 VI.A.2.e) **Programs must set guidelines for circumstances and events**
 1543 **in which fellows must communicate with the supervising**
 1544 **faculty member(s).** ^(Core)
 1545
 1546 VI.A.2.e).(1) **Each fellow must know the limits of their scope of**
 1547 **authority, and the circumstances under which the**
 1548 **fellow is permitted to act with conditional**
 1549 **independence.** ^(Outcome)
 1550

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

- 1551
 1552 VI.A.2.f) **Faculty supervision assignments must be of sufficient**
 1553 **duration to assess the knowledge and skills of each fellow**

1554 and to delegate to the fellow the appropriate level of patient
1555 care authority and responsibility. ^(Core)

1556
1557 **VI.B. Professionalism**

1558
1559 **VI.B.1. Programs, in partnership with their Sponsoring Institutions, must**
1560 **educate fellows and faculty members concerning the professional**
1561 **responsibilities of physicians, including their obligation to be**
1562 **appropriately rested and fit to provide the care required by their**
1563 **patients. ^(Core)**

1564
1565 **VI.B.2. The learning objectives of the program must:**

1566
1567 **VI.B.2.a) be accomplished through an appropriate blend of supervised**
1568 **patient care responsibilities, clinical teaching, and didactic**
1569 **educational events; ^(Core)**

1570
1571 **VI.B.2.b) be accomplished without excessive reliance on fellows to**
1572 **fulfill non-physician obligations; and, ^(Core)**

1573

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1574
1575 **VI.B.2.c) ensure manageable patient care responsibilities. ^(Core)**

1576

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1577
1578 **VI.B.3. The program director, in partnership with the Sponsoring Institution,**
1579 **must provide a culture of professionalism that supports patient**
1580 **safety and personal responsibility. ^(Core)**

1581
1582 **VI.B.4. Fellows and faculty members must demonstrate an understanding**
1583 **of their personal role in the:**

1584
1585 **VI.B.4.a) provision of patient- and family-centered care; ^(Outcome)**

1586

1587 VI.B.4.b) safety and welfare of patients entrusted to their care,
1588 including the ability to report unsafe conditions and adverse
1589 events; (Outcome)
1590

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

1591 VI.B.4.c) assurance of their fitness for work, including: (Outcome)
1592
1593

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

1594 VI.B.4.c).(1) management of their time before, during, and after
1595 clinical assignments; and, (Outcome)
1596
1597

1598 VI.B.4.c).(2) recognition of impairment, including from illness,
1599 fatigue, and substance use, in themselves, their peers,
1600 and other members of the health care team. (Outcome)
1601

1602 VI.B.4.d) commitment to lifelong learning; (Outcome)
1603

1604 VI.B.4.e) monitoring of their patient care performance improvement
1605 indicators; and, (Outcome)
1606

1607 VI.B.4.f) accurate reporting of clinical and educational work hours,
1608 patient outcomes, and clinical experience data. (Outcome)
1609

1610 VI.B.5. All fellows and faculty members must demonstrate responsiveness
1611 to patient needs that supersedes self-interest. This includes the
1612 recognition that under certain circumstances, the best interests of
1613 the patient may be served by transitioning that patient's care to
1614 another qualified and rested provider. (Outcome)
1615

1616 VI.B.6. Programs, in partnership with their Sponsoring Institutions, must
1617 provide a professional, equitable, respectful, and civil environment
1618 that is free from discrimination, sexual and other forms of
1619 harassment, mistreatment, abuse, or coercion of students, fellows,
1620 faculty, and staff. (Core)
1621

1622 VI.B.7. Programs, in partnership with their Sponsoring Institutions, should
1623 have a process for education of fellows and faculty regarding
1624 unprofessional behavior and a confidential process for reporting,
1625 investigating, and addressing such concerns. (Core)
1626

1627 VI.C. Well-Being

1644
1645
1646
1647
1648

Psychological, emotional, and physical well-being are critical in the development of the competent, caring, and resilient physician and require proactive attention to life inside and outside of medicine. Well-being requires that physicians retain the joy in medicine while managing their own real life stresses. Self-care and responsibility to support other members of the health care team are important components of professionalism; they are also skills that must be modeled, learned, and nurtured in the context of other aspects of fellowship training.

Fellows and faculty members are at risk for burnout and depression. Programs, in partnership with their Sponsoring Institutions, have the same responsibility to address well-being as other aspects of resident competence. Physicians and all members of the health care team share responsibility for the well-being of each other. For example, a culture which encourages covering for colleagues after an illness without the expectation of reciprocity reflects the ideal of professionalism. A positive culture in a clinical learning environment models constructive behaviors, and prepares fellows with the skills and attitudes needed to thrive throughout their careers.

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

- VI.C.1. The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:**
- VI.C.1.a) efforts to enhance the meaning that each fellow finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; (Core)**
- VI.C.1.b) attention to scheduling, work intensity, and work compression that impacts fellow well-being; (Core)**
- VI.C.1.c) evaluating workplace safety data and addressing the safety of fellows and faculty members; (Core)**

1665

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

1666

1667

VI.C.1.d) policies and programs that encourage optimal fellow and faculty member well-being; and, ^(Core)

1668

1669

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one’s own health, including adequate rest, healthy diet, and regular exercise.

1670

1671

VI.C.1.d).(1) Fellows must be given the opportunity to attend medical, mental health, and dental care appointments, including those scheduled during their working hours. ^(Core)

1672

1673

1674

1675

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

1676

1677

VI.C.1.e) attention to fellow and faculty member burnout, depression, and substance abuse. The program, in partnership with its Sponsoring Institution, must educate faculty members and fellows in identification of the symptoms of burnout, depression, and substance abuse, including means to assist those who experience these conditions. Fellows and faculty members must also be educated to recognize those symptoms in themselves and how to seek appropriate care. The program, in partnership with its Sponsoring Institution, must: ^(Core)

1688

1689

VI.C.1.e).(1) encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another fellow, resident, or faculty member may be displaying signs of burnout, depression, substance abuse, suicidal ideation, or potential for violence; ^(Core)

1690

1691

1692

1693

1694

1695

Background and Intent: Individuals experiencing burnout, depression, substance abuse, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

- VI.C.1.e).(2) provide access to appropriate tools for self-screening; and, (Core)
- VI.C.1.e).(3) provide access to confidential, affordable mental health assessment, counseling, and treatment, including access to urgent and emergent care 24 hours a day, seven days a week. (Core)

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

- VI.C.2. There are circumstances in which fellows may be unable to attend work, including but not limited to fatigue, illness, family emergencies, and parental leave. Each program must allow an appropriate length of absence for fellows unable to perform their patient care responsibilities. (Core)
- VI.C.2.a) The program must have policies and procedures in place to ensure coverage of patient care. (Core)
- VI.C.2.b) These policies must be implemented without fear of negative consequences for the fellow who is or was unable to provide the clinical work. (Core)

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

- 1719
1720 **VI.D. Fatigue Mitigation**
1721
1722 **VI.D.1. Programs must:**
1723
1724 **VI.D.1.a) educate all faculty members and fellows to recognize the**
1725 **signs of fatigue and sleep deprivation; ^(Core)**
1726
1727 **VI.D.1.b) educate all faculty members and fellows in alertness**
1728 **management and fatigue mitigation processes; and, ^(Core)**
1729
1730 **VI.D.1.c) encourage fellows to use fatigue mitigation processes to**
1731 **manage the potential negative effects of fatigue on patient**
1732 **care and learning. ^(Detail)**
1733

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

- 1734
1735 **VI.D.2. Each program must ensure continuity of patient care, consistent**
1736 **with the program’s policies and procedures referenced in VI.C.2–**
1737 **VI.C.2.b), in the event that a fellow may be unable to perform their**
1738 **patient care responsibilities due to excessive fatigue. ^(Core)**
1739
1740 **VI.D.3. The program, in partnership with its Sponsoring Institution, must**
1741 **ensure adequate sleep facilities and safe transportation options for**
1742 **fellows who may be too fatigued to safely return home. ^(Core)**

1744 **VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care**
1745
1746 **VI.E.1. Clinical Responsibilities**
1747
1748 **The clinical responsibilities for each fellow must be based on PGY**
1749 **level, patient safety, fellow ability, severity and complexity of patient**
1750 **illness/condition, and available support services. ^(Core)**
1751

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty

members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

1752
1753 VI.E.1.a) The program director must have the authority and responsibility to
1754 set and adjust the clinical responsibilities and ensure that fellows
1755 have appropriate clinical responsibilities and an appropriate
1756 patient load. (Core)
1757

Specialty-Specific Background and Intent: Insufficient patient experiences do not meet educational needs; an excessive patient load suggests an inappropriate reliance on fellows for service obligations, which may jeopardize the educational experience.

1758
1759 VI.E.1.a).(1) This must include progressive clinical, technical, and
1760 consultative experiences that will enable each fellow to
1761 develop expertise as a pediatric critical care medicine
1762 consultant. (Core)
1763

1764 VI.E.1.a).(2) Lines of responsibility for the fellows must be clearly
1765 defined. (Core)
1766

1767 **VI.E.2. Teamwork**

1768
1769 **Fellows must care for patients in an environment that maximizes**
1770 **communication. This must include the opportunity to work as a**
1771 **member of effective interprofessional teams that are appropriate to**
1772 **the delivery of care in the subspecialty and larger health system.**
1773 (Core)
1774

Specialty-Specific Background and Intent: Nurses, physician assistants, advanced practice providers, pharmacists, social workers, child-life specialists, physical and occupational therapists, speech and language therapists, audiologists, respiratory therapists, psychologists, and dieticians are examples of professional personnel who may be part of the interprofessional teams.

1775
1776 **VI.E.3. Transitions of Care**

1777
1778 **VI.E.3.a) Programs must design clinical assignments to optimize**
1779 **transitions in patient care, including their safety, frequency,**
1780 **and structure. (Core)**
1781

1782 **VI.E.3.b) Programs, in partnership with their Sponsoring Institutions,**
1783 **must ensure and monitor effective, structured hand-over**
1784 **processes to facilitate both continuity of care and patient**
1785 **safety. (Core)**
1786

- 1787 VI.E.3.c) Programs must ensure that fellows are competent in
 1788 communicating with team members in the hand-over process.
 1789 (Outcome)
 1790
- 1791 VI.E.3.d) Programs and clinical sites must maintain and communicate
 1792 schedules of attending physicians and fellows currently
 1793 responsible for care. (Core)
 1794
- 1795 VI.E.3.e) Each program must ensure continuity of patient care,
 1796 consistent with the program’s policies and procedures
 1797 referenced in VI.C.2-VI.C.2.b), in the event that a fellow may
 1798 be unable to perform their patient care responsibilities due to
 1799 excessive fatigue or illness, or family emergency. (Core)
 1800
- 1801 VI.F. Clinical Experience and Education
 1802
- 1803 *Programs, in partnership with their Sponsoring Institutions, must design*
 1804 *an effective program structure that is configured to provide fellows with*
 1805 *educational and clinical experience opportunities, as well as reasonable*
 1806 *opportunities for rest and personal activities.*
 1807

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

- 1808
- 1809 VI.F.1. Maximum Hours of Clinical and Educational Work per Week
 1810
- 1811 Clinical and educational work hours must be limited to no more than
 1812 80 hours per week, averaged over a four-week period, inclusive of all
 1813 in-house clinical and educational activities, clinical work done from
 1814 home, and all moonlighting. (Core)
 1815

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling
 While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their

scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

1816
1817
1818

VI.F.2. Mandatory Time Free of Clinical Work and Education

1819 VI.F.2.a) The program must design an effective program structure that
1820 is configured to provide fellows with educational
1821 opportunities, as well as reasonable opportunities for rest
1822 and personal well-being. ^(Core)

1823
1824 VI.F.2.b) Fellows should have eight hours off between scheduled
1825 clinical work and education periods. ^(Detail)

1826
1827 VI.F.2.b).(1) There may be circumstances when fellows choose to
1828 stay to care for their patients or return to the hospital
1829 with fewer than eight hours free of clinical experience
1830 and education. This must occur within the context of
1831 the 80-hour and the one-day-off-in-seven
1832 requirements. ^(Detail)

1833
Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1834
1835 VI.F.2.c) Fellows must have at least 14 hours free of clinical work and
1836 education after 24 hours of in-house call. ^(Core)

1837
Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1838
1839 VI.F.2.d) Fellows must be scheduled for a minimum of one day in
1840 seven free of clinical work and required education (when
1841 averaged over four weeks). At-home call cannot be assigned
1842 on these free days. ^(Core)

1843
Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is

defined in the ACGME Glossary of Terms as “one (1) continuous 24-hour period free from all administrative, clinical, and educational activities.”

VI.F.3. Maximum Clinical Work and Education Period Length

VI.F.3.a) Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical assignments. ^(Core)

VI.F.3.a).(1) Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or fellow education. ^(Core)

VI.F.3.a).(1).(a) Additional patient care responsibilities must not be assigned to a fellow during this time. ^(Core)

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

VI.F.4. Clinical and Educational Work Hour Exceptions

VI.F.4.a) In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:

VI.F.4.a).(1) to continue to provide care to a single severely ill or unstable patient; ^(Detail)

VI.F.4.a).(2) humanistic attention to the needs of a patient or family; or, ^(Detail)

VI.F.4.a).(3) to attend unique educational events. ^(Detail)

VI.F.4.b) These additional hours of care or education will be counted toward the 80-hour weekly limit. ^(Detail)

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and

that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

VI.F.4.c) A Review Committee may grant rotation-specific exceptions for up to 10 percent or a maximum of 88 clinical and educational work hours to individual programs based on a sound educational rationale.

The Review Committee for Pediatrics will not consider requests for exceptions to the 80-hour limit to the fellows' work week.

VI.F.4.c).(1) In preparing a request for an exception, the program director must follow the clinical and educational work hour exception policy from the *ACGME Manual of Policies and Procedures*. (Core)

VI.F.4.c).(2) Prior to submitting the request to the Review Committee, the program director must obtain approval from the Sponsoring Institution's GMEC and DIO. (Core)

Background and Intent: The provision for exceptions for up to 88 hours per week has been modified to specify that exceptions may be granted for specific rotations if the program can justify the increase based on criteria specified by the Review Committee. As in the past, Review Committees may opt not to permit exceptions. The underlying philosophy for this requirement is that while it is expected that all fellows should be able to train within an 80-hour work week, it is recognized that some programs may include rotations with alternate structures based on the nature of the specialty. DIO/GMEC approval is required before the request will be considered by the Review Committee.

- VI.F.7. Maximum In-House On-Call Frequency**
- Fellows must be scheduled for in-house call no more frequently than every third night (when averaged over a four-week period). ^(Core)
- VI.F.8. At-Home Call**
- VI.F.8.a) Time spent on patient care activities by fellows on at-home call must count toward the 80-hour maximum weekly limit. The frequency of at-home call is not subject to the every-third-night limitation, but must satisfy the requirement for one day in seven free of clinical work and education, when averaged over four weeks. ^(Core)**
- VI.F.8.a).(1) At-home call must not be so frequent or taxing as to preclude rest or reasonable personal time for each fellow. ^(Core)**
- VI.F.8.b) Fellows are permitted to return to the hospital while on at-home call to provide direct care for new or established patients. These hours of inpatient patient care must be included in the 80-hour maximum weekly limit. ^(Detail)**

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
