ACGME Program Requirements for Graduate Medical Education in Craniofacial Plastic Surgery

Common Program Requirements (Fellowship) are in BOLD

Where applicable, text in italics describes the underlying philosophy of the requirements in that section. These philosophic statements are not program requirements and are therefore not citable.

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

Introduction

Int.A.

Fellowship is advanced graduate medical education beyond a core residency program for physicians who desire to enter more specialized practice.-Fellowship-trained physicians serve the public by providing subspecialty care, which may also include core medical care, acting as a community resource for expertise in their field, creating and integrating new knowledge into practice, and educating future generations of physicians. Graduate medical education values the strength that a diverse group of physicians brings to medical care.

Fellows who have completed residency are able to practice independently in their core specialty. The prior medical experience and expertise of fellows distinguish them from physicians entering into residency training. The fellow's care of patients within the subspecialty is undertaken with appropriate faculty supervision and conditional independence. Faculty members serve as role models of excellence, compassion, professionalism, and scholarship. The fellow develops deep medical knowledge, patient care skills, and expertise applicable to their focused area of practice. Fellowship is an intensive program of subspecialty clinical and didactic education that focuses on the multidisciplinary care of patients. Fellowship education is often physically, emotionally, and intellectually demanding, and occurs in a variety of clinical learning environments committed to graduate medical education and the well-being of patients, residents, fellows, faculty members, students, and all members of the health care team.

In addition to clinical education, many fellowship programs advance fellows' skills as physician-scientists. While the ability to create new knowledge within medicine is not exclusive to fellowship-educated physicians, the fellowship experience expands a physician's abilities to pursue hypothesis-driven scientific inquiry that results in contributions to the medical literature and patient care. Beyond the clinical subspecialty expertise achieved, fellows develop mentored relationships built on an infrastructure that promotes collaborative research.

Int.B. Definition of Subspecialty

Craniofacial surgery is a subspecialty of plastic surgery that includes the in-depth study and reconstructive treatment of disorders of the soft and hard tissues of the face and cranial areas, such as congenital anomalies and post-traumatic and other acquired conditions. Although craniofacial surgery includes combined intracranial and extracranial surgery, the broad scope of the subspecialty is applicable to other procedures in the craniofacial region. Craniofacial surgeons should be able to manage any hard- or soft-tissue reconstruction problem of the craniofacial region.

Int.C. Length of Educational Program

The length of the educational program in craniofacial surgery is 12 months. (Detail)†

I. Oversight

I.A. Sponsoring Institution

The Sponsoring Institution is the organization or entity that assumes the ultimate financial and academic responsibility for a program of graduate medical education consistent with the ACGME Institutional Requirements.

When the Sponsoring Institution is not a rotation site for the program, the most commonly utilized site of clinical activity for the program is the primary clinical site.

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

I.A.1. The program must be sponsored by one ACGME-accredited Sponsoring Institution. (Core)*

I.B. Participating Sites

A participating site is an organization providing educational experiences or educational assignments/rotations for fellows.

- I.B.1. The program, with approval of its Sponsoring Institution, must designate a primary clinical site. (Core)
- I.B.2. There must be a program letter of agreement (PLA) between the program and each participating site that governs the relationship between the program and the participating site providing a required assignment. (Core)

30		
91	I.B.2.a)	The PLA must:
92		
93	I.B.2.a).(1)	be renewed at least every 10 years; and, (Core)
94		
95	I.B.2.a).(2)	be approved by the designated institutional official
96		(DIO). (Core)
97		
98	I.B.3.	The program must monitor the clinical learning and working
99		environment at all participating sites. (Core)
100		
101	I.B.3.a)	At each participating site there must be one faculty member,
102		designated by the program director, who is accountable for
103		fellow education for that site, in collaboration with the
104		program director. ^(Core)
105		

90

106 107

108

109

110111112

113

114

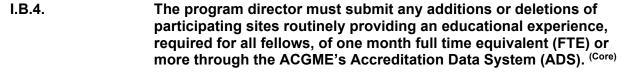

115116

117

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for fellows
- Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern fellow education during the assignment

I.C. The program, in partnership with its Sponsoring Institution, must engage in practices that focus on mission-driven, ongoing, systematic recruitment and retention of a diverse and inclusive workforce of residents (if present), fellows, faculty members, senior administrative staff members, and other relevant members of its academic community. (Core)

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities

underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

	.D.	Resources
	.D.1.	The program, in partnership with its Sponsoring Institution, must ensure the availability of adequate resources for fellow education.
I.	.D.1.a)	These resources must include:
	.D.1.a).(1)	inpatient facilities with a sufficient number of beds, support staff members, and operating suites with technologically current equipment; (Core)
	.D.1.a).(2)	outpatient facilities, with support staff members and operating suites; and, (Core)
	.D.1.a).(3)	clinic and office space for fellows' participation in the pre- operative evaluation, treatment, and post-operative follow- up of patients for whom they have responsibility. (Core)
	.D.2.	The program, in partnership with its Sponsoring Institution, must ensure healthy and safe learning and working environments that promote fellow well-being and provide for: (Core)
	.D.2.a)	access to food while on duty; (Core)
	.D.2.b)	safe, quiet, clean, and private sleep/rest facilities available and accessible for fellows with proximity appropriate for safe patient care; (Core)

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

148
 149 I.D.2.c) clean and private facilities for lactation that have refrigeration
 150 capabilities, with proximity appropriate for safe patient care;
 (Core) (Core)

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close

proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

153			
154	I.D.2.d)	security and safety measures appropriate to the participating	
155		site; and, ^(Core)	
156			
157	I.D.2.e)	accommodations for fellows with disabilities consistent with	
158		the Sponsoring Institution's policy. (Core)	
159			
160	I.D.3.	Fellows must have ready access to subspecialty-specific and other	
161		appropriate reference material in print or electronic format. This	
162		must include access to electronic medical literature databases with	
163		full text capabilities. ^(Core)	
164			
165	I.D.4.	The program's educational and clinical resources must be adequate	
166		to support the number of fellows appointed to the program. (Core)	
167			
168	I.E.	A fellowship program usually occurs in the context of many learners and	
169		other care providers and limited clinical resources. It should be structured	
170		to optimize education for all learners present.	
171			
172	I.E.1.	Fellows should contribute to the education of residents in core	
173		programs, if present. (Core)	

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

1/6	II.	Personnel
177		
178	II.A.	Program Director
179		
180	II.A.1.	There must be one faculty member appointed as program director
181		with authority and accountability for the overall program, including
182		compliance with all applicable program requirements. (Core)
183		
184	II.A.1.a	The Sponsoring Institution's Graduate Medical Education
185		Committee (GMEC) must approve a change in program
186		director. (Core)

II.A.1.b) Final approval of the program director resides with the Review Committee. (Core)

174

175

187 188

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual's responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director's nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

191 192

II.A.2. The program director must be provided with support adequate for administration of the program based upon its size and configuration.

194 195 196

193

II.A.2.a) At a minimum, the program director must be provided with the dedicated time and support specified below for administration of the program: (Core)

198 199

197

Number of Approved	Minimum Support
Fellow Positions	Required (FTE)
1-4	<u>0.1</u>
<u>5 or more</u>	0.2

200

Background and Intent: Twenty percent FTE is defined as one day per week.

"Administrative time" is defined as non-clinical time spent meeting the responsibilities of the program director as detailed in requirements II.A.4.-II.A.4.a).(16).

The requirement does not address the source of funding required to provide the specified salary support.

201 202

II.A.3. Qualifications of the program director:

203 204

II.A.3.a) must include subspecialty expertise and qualifications acceptable to the Review Committee; and, (Core)

205206207

208

209

II.A.3.b)

must include current certification in the subspecialty for
which they are the program director by the American Board
of Plastic Surgery or subspecialty qualifications that are
acceptable to the Review Committee. (Core)

210211212

213

[Note that while the Common Program Requirements deem certification by a certifying board of the American Osteopathic Association (AOA) acceptable, there is no AOA board that offers certification in this subspecialty]

214215216

must include requisite clinical experience in craniofacial surgery acceptable to the Review Committee. (Detail)

217218

II.A.3.c)

II.A.4.

Program Director Responsibilities

219 220

222 The program director must have responsibility, authority, and accountability for: administration and operations; teaching and 223 scholarly activity; fellow recruitment and selection, evaluation, and 224 225 promotion of fellows, and disciplinary action; supervision of fellows; and fellow education in the context of patient care. (Core) 226 227 228 II.A.4.a) The program director must: 229 230 be a role model of professionalism; (Core) II.A.4.a).(1) 231 Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience. 232 233 II.A.4.a).(2) design and conduct the program in a fashion 234 consistent with the needs of the community, the 235 mission(s) of the Sponsoring Institution, and the 236 mission(s) of the program; (Core) 237 Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities. 238 239 II.A.4.a).(3) administer and maintain a learning environment conducive to educating the fellows in each of the 240 **ACGME Competency domains**; (Core) 241 242 Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and nonphysician personnel with varying levels of education, training, and experience. 243 244 II.A.4.a).(4) develop and oversee a process to evaluate candidates 245 prior to approval as program faculty members for 246 participation in the fellowship program education and at least annually thereafter, as outlined in V.B.; (Core) 247 248 249 II.A.4.a).(5) have the authority to approve program faculty 250 members for participation in the fellowship program education at all sites; (Core) 251 252

253	II.A.4.a).(6)	have the authority to remove program faculty
254		members from participation in the fellowship program
255		education at all sites; (Core)
256		
257	II.A.4.a).(7)	have the authority to remove fellows from supervising
258		interactions and/or learning environments that do not
259		meet the standards of the program; (Core)
260		

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

261

285 286

287

288 289

262 263 264	II.A.4.a).(8)	submit accurate and complete information required and requested by the DIO, GMEC, and ACGME; (Core)
265 266 267 268	II.A.4.a).(9)	provide applicants who are offered an interview with information related to the applicant's eligibility for the relevant subspecialty board examination(s); (Core)
269 270 271 272 273 274	II.A.4.a).(10)	provide a learning and working environment in which fellows have the opportunity to raise concerns and provide feedback in a confidential manner as appropriate, without fear of intimidation or retaliation; (Core)
275 276 277 278	II.A.4.a).(11)	ensure the program's compliance with the Sponsoring Institution's policies and procedures related to grievances and due process; (Core)
279 280 281 282 283 284	II.A.4.a).(12)	ensure the program's compliance with the Sponsoring Institution's policies and procedures for due process when action is taken to suspend or dismiss, not to promote, or not to renew the appointment of a fellow; (Core)

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

II.A.4.a).(13)

ensure the program's compliance with the Sponsoring Institution's policies and procedures on employment and non-discrimination; (Core)

290 291	II.A.4.a).(13).(a)	Fellows must not be required to sign a non- competition guarantee or restrictive covenant.
292		(Core)
293		
294	II.A.4.a).(14)	document verification of program completion for all
295		graduating fellows within 30 days; ^(Core)
296		
297	II.A.4.a).(15)	provide verification of an individual fellow's
298		completion upon the fellow's request, within 30 days;
299		and, ^(Core)
300		

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

II.A.4.a).(16)

obtain review and approval of the Sponsoring Institution's DIO before submitting information or requests to the ACGME, as required in the Institutional Requirements and outlined in the ACGME Program Director's Guide to the Common Program Requirements. (Core)

II.B. Faculty

Faculty members are a foundational element of graduate medical education – faculty members teach fellows how to care for patients. Faculty members provide an important bridge allowing fellows to grow and become practice ready, ensuring that patients receive the highest quality of care. They are role models for future generations of physicians by demonstrating compassion, commitment to excellence in teaching and patient care, professionalism, and a dedication to lifelong learning. Faculty members experience the pride and joy of fostering the growth and development of future colleagues. The care they provide is enhanced by the opportunity to teach. By employing a scholarly approach to patient care, faculty members, through the graduate medical education system, improve the health of the individual and the population.

Faculty members ensure that patients receive the level of care expected from a specialist in the field. They recognize and respond to the needs of the patients, fellows, community, and institution. Faculty members provide appropriate levels of supervision to promote patient safety. Faculty members create an effective learning environment by acting in a professional manner and attending to the well-being of the fellows and themselves.

Background and Intent: "Faculty" refers to the entire teaching force responsible for educating fellows. The term "faculty," including "core faculty," does not imply or require an academic appointment or salary support.

332		
333	II.B.1.	For each participating site, there must be a sufficient number of
334		faculty members with competence to instruct and supervise all
335		fellows at that location. (Core)
336		
337	II.B.2.	Faculty members must:
338		•
339	II.B.2.a)	be role models of professionalism; (Core)
340		
341	II.B.2.b)	demonstrate commitment to the delivery of safe, quality,
342		cost-effective, patient-centered care; (Core)
343		

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

\mathcal{I}^{++}		
345	II.B.2.c)	demonstrate a strong interest in the education of fellows; (Core)
346		
347	II.B.2.d)	devote sufficient time to the educational program to fulfill
348		their supervisory and teaching responsibilities; (Core)
349		
350	II.B.2.e)	administer and maintain an educational environment
351		conducive to educating fellows; (Core)
352		
353	II.B.2.f)	regularly participate in organized clinical discussions,
354		rounds, journal clubs, and conferences; and, ^(Core)
355		
356	II.B.2.g)	pursue faculty development designed to enhance their skills
357		at least annually. (Core)

344

358

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

II.B.3.	Faculty Qualifications
II.B.3.a)	Faculty members must have appropriate qualifications in their field and hold appropriate institutional appointments.
	(Core)
II.B.3.b)	Subspecialty physician faculty members must:
II.B.3.b).(1)	have current certification in the subspecialty by the American Board of Plastic Surgery or possess

370 qualifications judged acceptable to the Review Committee. (Core) 371 372 373 [Note that while the Common Program Requirements deem certification by a certifying board of the American 374 Osteopathic Association (AOA) acceptable, there is no 375 376 AOA board that offers certification in this subspecialty] 377 378 II.B.3.c) Any non-physician faculty members who participate in fellowship program education must be approved by the 379 program director. (Core) 380 381 Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member. 382 383 II.B.3.d) Any other specialty physician faculty members must have current certification in their specialty by the appropriate 384 385 American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying 386 board, or possess qualifications judged acceptable to the 387 Review Committee. (Core) 388 389 390 II.B.4. **Core Faculty** 391 392 Core faculty members must have a significant role in the education 393 and supervision of fellows and must devote a significant portion of 394 their entire effort to fellow education and/or administration, and 395 must, as a component of their activities, teach, evaluate, and provide formative feedback to fellows. (Core) 396 397 Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey. 398

399 400	II.B.4.a)	Core faculty members must be designated by the program director. (Core)
401 402 403	II.B.4.b)	Core faculty members must complete the annual ACGME Faculty Survey. (Core)
404 405 406	II.B.4.c)	The core faculty-to-fellow ratio must be 1:1. (Core)

407	II.C.	Program Coordinator
408		
409	II.C.1.	There must be a program coordinator. (Core)
410		
411	II.C.2.	The program coordinator must be provided with support adequate
412		for administration of the program based upon its size and
413		configuration. (Core)
414		•

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge of the ACGME and Program Requirements, policies, and procedures. Program coordinators assist the program director in accreditation efforts, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

415 416 II.D. Other Program Personnel

417 418

419

420 421 422

423

424 425

426 427

428 429

430 431

432

The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. (Core)

II.D.1. In addition to plastic surgery faculty members, the craniofacial team should include specialists in dentistry, neurological surgery, ophthalmology, otolaryngology, oral surgery, and orthodontics. (Detail)

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

III. Fellow Appointments

III.A. Eligibility Criteria

III.A.1. Eligibility Requirements – Fellowship Programs

433 434 435 436 437 438 439 440 441	fellov resid progr Accre Cana (Core)	equired clinical education for entry into ACGME-accredited wiship programs must be completed in an ACGME-accredited ency program, an AOA-approved residency program, a ram with ACGME International (ACGME-I) Advanced Specialty editation, or a Royal College of Physicians and Surgeons of Ida (RCPSC)-accredited or College of Family Physicians of Ida (CFPC)-accredited residency program located in Canada.	
	Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).		
442 443 444 445 446 447 448 449 450 451 452 453 454 455 456 457 458 460 461 462 463 464 465 466 467 470 471 472 473 474 475 476 477 478 479 480 480 480 480 480 480 480 480 480 480	III.A.1.a)	Fellowship programs must receive verification of each entering fellow's level of competence in the required field, upon matriculation, using ACGME, ACGME-I, or CanMEDS Milestones evaluations from the core residency program. (Core)	
	III.A.1.b)	Admission to a craniofacial surgery educational program is open to those who have satisfactorily completed a plastic surgery residency program that satisfies the requirements in III.A.1. (Detail)	
	III.A.1.c)	Fellow Eligibility Exception	
		The Review Committee for Plastic Surgery will allow the following exception to the fellowship eligibility requirements:	
	III.A.1.c).(1)	An ACGME-accredited fellowship program may accept an exceptionally qualified international graduate applicant who does not satisfy the eligibility requirements listed in III.A.1., but who does meet all of the following additional qualifications and conditions: (Core)	
	III.A.1.c).(1).(a)	evaluation by the program director and fellowship selection committee of the applicant's suitability to enter the program, based on prior training and review of the summative evaluations of training in the core specialty; and, (Core)	
	III.A.1.c).(1).(b)	review and approval of the applicant's exceptional qualifications by the GMEC; and, (Core)	
	III.A.1.c).(1).(c)	verification of Educational Commission for Foreign Medical Graduates (ECFMG) certification. (Core)	
	III.A.1.c).(2)	Applicants accepted through this exception must have an evaluation of their performance by the Clinical	

Competency Committee within 12 weeks of matriculation. (Core)

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

III.B. The program director must not appoint more fellows than approved by the Review Committee. (Core)

III.B.1. All complement increases must be approved by the Review Committee. (Core)

III.C. Fellow Transfers

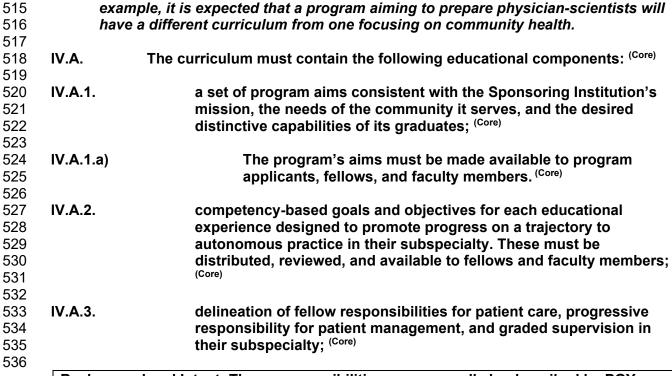

The program must obtain verification of previous educational experiences and a summative competency-based performance evaluation prior to acceptance of a transferring fellow, and Milestones evaluations upon matriculation. (Core)

IV. Educational Program

 The ACGME accreditation system is designed to encourage excellence and innovation in graduate medical education regardless of the organizational affiliation, size, or location of the program.

 The educational program must support the development of knowledgeable, skillful physicians who provide compassionate care.

In addition, the program is expected to define its specific program aims consistent with the overall mission of its Sponsoring Institution, the needs of the community it serves and that its graduates will serve, and the distinctive capabilities of physicians it intends to graduate. While programs must demonstrate substantial compliance with the Common and subspecialty-specific Program Requirements, it is recognized that within this framework, programs may place different emphasis on research, leadership, public health, etc. It is expected that the program aims will reflect the nuanced program-specific goals for it and its graduates; for

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

IV.A.4. structured educational activities beyond direct patient care; and,

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

IV.A.5. advancement of fellows' knowledge of ethical principles foundational to medical professionalism. (Core)

IV.B. ACGME Competencies

537 538

539 540

541 542

543544545

546

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus

in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

547 The program must integrate the following ACGME Competencies 548 IV.B.1. into the curriculum: (Core) 549 550 551 IV.B.1.a) **Professionalism** 552 553 Fellows must demonstrate a commitment to professionalism and an adherence to ethical principles. (Core) 554 555 556 IV.B.1.b) **Patient Care and Procedural Skills** 557

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs.* 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

220		
559 560 561 562	IV.B.1.b).(1)	Fellows must be able to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health. (Core)
563		
564 565	IV.B.1.b).(2)	Fellows must demonstrate competence in: (Core)
566 567 568 569	IV.B.1.b).(2).(a)	the surgical methods of craniofacial surgery, including rigid fixation of skull facial bones and training in the fabrication of dental splints; (Core)
570 571 572 573	IV.B.1.b).(2).(b)	pre-operative assessment and decision making regarding methods and timing of intervention in craniofacial disorders; (Core)
574 575 576 577	IV.B.1.b).(2).(c)	management of craniofacial patients from the pre- operative through the post-operative stages; and, (Core)
578 579 580	IV.B.1.b).(2).(d)	knowledge of critical care in the post-operative management of craniofacial patients. (Core)
581 582 583 584	IV.B.1.b).(3)	Fellows must be able to perform all medical, diagnostic, and surgical procedures considered essential for the area of practice. (Core)

585 586 587 588 589	IV.B.1.b).(3).(a)	essen evalua exper	vs must demonstrate competence in the four stial phases of total patient care: pre-operative ation, therapeutic decision making, operative ience, and post-operative management., ling: (Core)
590 591 592	IV.B.1.b).(3).(a).(i)		craniosynostosis; (Core)
592 593 594 595 596 597	IV.B.1.b).(3).(a).(ii)		congenital and developmental deformities of the face that may be related to craniosynostosis, including midface hypoplasia and facial asymmetries; (Core)
598 599 600 601	IV.B.1.b).(3).(a).(iii)		syndromal malformations of the face, such as Treacher Collins, hemifacial microsomia; (Core)
602 603 604 605	IV.B.1.b).(3).(a).(iv)		congenital orbital dysmorphologies, including orbitofacial clefts and hypertelorism; (Core)
606 607	IV.B.1.b).(3).(a).(v)		facial cleft deformities; (Core)
608 609 610	IV.B.1.b).(3).(a).(vi)		atrophic and hypertrophic disorders, such as Romberg's disease, bone dysplasia; (Core)
611 612 613 614 615	IV.B.1.b).(3).(a).(vii)		craniofacial manifestations of systemic disorders, such as neurofibromatosis and vascular malformations and lymphatic disorders; (Core)
616 617 618	IV.B.1.b).(3).(a).(viii)		post-traumatic complex skull and facial deformities; (Core)
619 620 621 622	IV.B.1.b).(3).(a).(ix)		congenital and acquired disorders of the facial skeleton and occlusal relationships; and, (Core)
623 624 625 626	IV.B.1.b).(3).(a).(x)		craniofacial concepts in the exposure and/or reconstruction in cranial base oncologic surgery. (Core)
627 628	IV.B.1.c)	Medical Knowledge	
629 630 631 632 633		evolving biomedica	onstrate knowledge of established and al, clinical, epidemiological and socials, as well as the application of this nt care. (Core)
634 635	IV.B.1.c).(1)		demonstrate competency in the knowledge es of embryology, anatomy, physiology, and

636 pathology as these relate to the diagnosis and treatment of diseases of the craniofacial areas, to include knowledge of 637 638 the diagnosis and management of disease and deformity involving the jaws, teeth, and occlusion. (Core) 639 640 641 IV.B.1.d) **Practice-based Learning and Improvement** 642 643 Fellows must demonstrate the ability to investigate and 644 evaluate their care of patients, to appraise and assimilate 645 scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. (Core) 646 647 Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship. 648 649 IV.B.1.e) **Interpersonal and Communication Skills** 650 651 Fellows must demonstrate interpersonal and communication skills that result in the effective exchange of information and 652 653 collaboration with patients, their families, and health professionals. (Core) 654 655 656 IV.B.1.f) **Systems-based Practice** 657 658 Fellows must demonstrate an awareness of and responsiveness to the larger context and system of health 659 660 care, including the social determinants of health, as well as 661 the ability to call effectively on other resources to provide optimal health care. (Core) 662 663 IV.C. 664 **Curriculum Organization and Fellow Experiences** 665 666 IV.C.1. The curriculum must be structured to optimize fellow educational 667 experiences, the length of these experiences, and supervisory 668 continuity. (Core) 669 670 Fellows must continue to provide care for their own post-operative IV.C.1.a) patients until discharge or until the patients' post-operative 671 conditions are stable and the episode of care is concluded. (Core) 672 673 IV.C.2. 674 The program must provide instruction and experience in pain management if applicable for the subspecialty, including recognition 675 of the signs of addiction. (Core) 676 677

Fellows must participate in clinical, basic science, and research

IV.C.3.

679 680		conferences; monthly morbidity and mortality sessions; other conferences focused specifically on craniofacial surgery. (Core)
681 682 683 684	IV.C.3.a)	Conferences must be conducted regularly and as scheduled, and the topics of each must be linked to the goals and objectives for the course of study. (Detail)
685 686 687	IV.C.4.	Basic science components to the curriculum must include:
688 689 690 691 692	IV.C.4.a)	normal and abnormal embryology and fetal development of the head and neck, with special emphasis on the development of the cranium, the maxillary and mandibular complex, the mechanisms of clefting, and the development of the temporomandibular joint and surrounding musculature; (Detail)
693 694 695 696 697 698	IV.C.4.b)	normal growth, development, and anatomy of the cranium and face, with special attention to dental development and occlusion and to the consequences of congenital anomalies, trauma, surgery, and radiation; (Detail)
699 700 701	IV.C.4.c)	interpretation of dental radiographs, cephalometric analysis, and study models; $^{\!(\text{Detail})}$
702 703 704 705 706 707 708 709 710 711 712 713 714 715 716 717 718 719 720 721 722 723 724 725 726 727 728 729	IV.C.4.d)	construction of splints and their use in craniofacial and maxillofacial surgery; (Detail)
	IV.C.4.e)	interpretation of sophisticated diagnostic imaging modalities used in craniofacial surgery, such as computed tomography, magnetic resonance imaging, and arteriography; (Detail)
	IV.C.4.f)	standards of beauty and normalcy as they relate to the face, and an understanding of the relationship of cephalometric values to soft-tissue features; (Detail)
	IV.C.4.g)	bone healing, including primary healing, malunion, nonunion, osteomyelitis, and the physiology and methods of bone grafting; (Detail)
	IV.C.4.h)	use of alloplastic materials used for reconstruction; and, (Detail)
	IV.C.4.i)	congenital, developmental, and secondary deformities of the head and face, including the embryology, pathogenesis, anatomy, natural history, and the course of disease following treatment.
	IV.C.5.	The curriculum should include education and experience in the following areas: $^{\text{(Outcome)}\ddagger}$
	IV.C.5.a)	diagnostic methods and treatment techniques of temporomandibular joint disorders; (Outcome)

730 731 732	IV.C.5.b)	aesthetic contour deformities, such as masseteric hypertrophy and frontal cranial remodeling; (Outcome)
733 734	IV.C.5.c)	elective orthognathic surgery for orthodontic problems; (Outcome)
735 736 737 738	IV.C.5.d)	surgical correction of congenital clefts of the lip and palate, with emphasis on both primary and late repairs and revisions; and, (Outcome)
739 740 741 742	IV.C.5.e)	reconstructive management of defects after ablative surgery for malignancy about the maxillofacial region, including pedicle and free flap surgery and bone grafting techniques. (Outcome)
743 744 745 746 747	IV.C.6.	Programs in craniofacial surgery must provide a sufficient number and variety of surgical experiences to ensure that fellows receive sufficient exposure to a wide range of diseases and injuries to the soft and hard tissues of the craniofacial region. (Core)
748 749 750 751	IV.C.7.	Fellows must actively participate in an integrated craniofacial team with sufficient patient volume to provide an exposure to diverse craniofacial problems. (Core)
752 753 754 755 756	IV.C.8.	Fellows should not act on a regular basis as teaching assistants to the chief resident in plastic surgery. If the craniofacial surgery fellow and the plastic surgery resident each contribute significantly to a complex case, then both may receive credit as surgeon for the experience. (Core)
757 758	IV.D.	Scholarship
759 760 761 762 763 764 765 766 767		Medicine is both an art and a science. The physician is a humanistic scientist who cares for patients. This requires the ability to think critically, evaluate the literature, appropriately assimilate new knowledge, and practice lifelong learning. The program and faculty must create an environment that fosters the acquisition of such skills through fellow participation in scholarly activities as defined in the subspecialty-specific Program Requirements. Scholarly activities may include discovery, integration, application, and teaching.
768 769 770 771 772 773 774 775 776		The ACGME recognizes the diversity of fellowships and anticipates that programs prepare physicians for a variety of roles, including clinicians, scientists, and educators. It is expected that the program's scholarship will reflect its mission(s) and aims, and the needs of the community it serves. For example, some programs may concentrate their scholarly activity on quality improvement, population health, and/or teaching, while other programs might choose to utilize more classic forms of biomedical research as the focus for scholarship.
777 778	IV.D.1.	Program Responsibilities
779 780	IV.D.1.a)	The program must demonstrate evidence of scholarly activities, consistent with its mission(s) and aims. (Core)

781		
782	IV.D.1.b)	The program in partnership with its Sponsoring Institution,
783		must allocate adequate resources to facilitate fellow and
784		faculty involvement in scholarly activities. (Core)
785		
786	IV.D.2.	Faculty Scholarly Activity
787		
788	IV.D.2.a)	Among their scholarly activity, programs must demonstrate
789		accomplishments in at least three of the following domains:
790		(Core)
791		
792		 Research in basic science, education, translational
793		science, patient care, or population health
794		Peer-reviewed grants
795		 Quality improvement and/or patient safety initiatives
796		 Systematic reviews, meta-analyses, review articles,
797		chapters in medical textbooks, or case reports
798		 Creation of curricula, evaluation tools, didactic
799		educational activities, or electronic educational
800		materials ,
801		 Contribution to professional committees, educational
802		organizations, or editorial boards
803		Innovations in education
804		
805	IV.D.2.b)	The program must demonstrate dissemination of scholarly
806	,	activity within and external to the program by the following
807		methods:
808		

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program's effectiveness in the creation of an environment of inquiry that advances the fellows' scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

IV.D.2.b).(1)	faculty participation in grand rounds, posters,
	workshops, quality improvement presentations,
	podium presentations, grant leadership, non-peer-
	reviewed print/electronic resources, articles or
	publications, book chapters, textbooks, webinars,
	service on professional committees, or serving as a
	journal reviewer, journal editorial board member, or
	editor; (Outcome)
IV.D.2.b).(2)	peer-reviewed publication. (Outcome)

Background and Intent: Fellows who have previously completed residency programs have demonstrated sufficient competence to enter autonomous practice within their core specialty. This option is designed to enhance fellows' maturation and competence in their core specialty. This enables fellows to occupy a dual role in the health system: as learners in their subspecialty, and as credentialed practitioners in their core specialty. Hours worked in independent practice during fellowship still fall under the clinical and educational work hour limits. See Program Director Guide for more details.

821 822

IV.E. <u>Fellowship programs may assign fellows to engage in the independent</u> practice of their core specialty during their fellowship program.

823 824 825

IV.E.1.

If programs permit their fellows to utilize the independent practice option, it must not exceed 20 percent of their time per week or 10 weeks of an academic year. (Core)

827 828

826

Background and Intent: Fellows who have previously completed residency programs have demonstrated sufficient competence to enter autonomous practice within their core specialty. This option is designed to enhance fellows' maturation and competence in their core specialty. This enables fellows to occupy a dual role in the health system: as learners in their subspecialty, and as credentialed practitioners in their core specialty. 829 830

V. Evaluation

831 832

V.A. Fellow Evaluation

833 834

V.A.1. Feedback and Evaluation

835

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- fellows identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is evaluating a fellow's learning by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when

fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

836 837

838

839 840 V.A.1.a) Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. (Core)

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

841

841		
842	V.A.1.b)	Evaluation must be documented at the completion of the
843		assignment. ^(Core)
844		
845	V.A.1.b).(1)	For block rotations of greater than three months in
846		duration, evaluation must be documented at least
847		every three months. (Core)
848		
849	V.A.1.b).(2)	Longitudinal experiences such as continuity clinic in
850		the context of other clinical responsibilities must be
851		evaluated at least every three months and at
852		completion. (Core)
853		oompronom
854	V.A.1.c)	The program must provide an objective performance
855	V.A.1.C)	
		evaluation based on the Competencies and the subspecialty-
856		specific Milestones, and must: (Core)
857		
858	V.A.1.c).(1)	use multiple evaluators (e.g., faculty members, peers,
859		patients, self, and other professional staff members);
860		and, ^(Core)
		= · - 1

861

V.A.1.c).(2)

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are

practice. (Core)

provide that information to the Clinical Competency

Committee for its synthesis of progressive fellow performance and improvement toward unsupervised

considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

867		
868	V.A.1.d)	The program director or their designee, with input from the
869		Clinical Competency Committee, must:
870		
871	V.A.1.d).(1)	meet with and review with each fellow their
872		documented semi-annual evaluation of performance,
873		including progress along the subspecialty-specific
874		Milestones. (Core)
875		
876	V.A.1.d).(2)	assist fellows in developing individualized learning
877	, ()	plans to capitalize on their strengths and identify areas
878		for growth; and, (Core)
879		3 ,
880	V.A.1.d).(3)	develop plans for fellows failing to progress, following
881		institutional policies and procedures. (Core)
882		montational policios una procoduros.

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

	motitudional po	
883		
884	V.A.1.e)	At least annually, there must be a summative evaluation of
885		each fellow that includes their readiness to progress to the
886		next year of the program, if applicable. (Core)
887		
888	V.A.1.f)	The evaluations of a fellow's performance must be accessible

904 905 906 907 908	V.A.2.a).(2).(a)	become part of the fellow's permanent record maintained by the institution, and must be accessible for review by the fellow in accordance with institutional policy; (Core)
909 910 911 912	V.A.2.a).(2).(b)	verify that the fellow has demonstrated the knowledge, skills, and behaviors necessary to enter autonomous practice; (Core)
913 914 915	V.A.2.a).(2).(c)	consider recommendations from the Clinical Competency Committee; and, (Core)
916 917 918	V.A.2.a).(2).(d)	be shared with the fellow upon completion of the program. (Core)
919 920 921	V.A.3.	A Clinical Competency Committee must be appointed by the program director. (Core)
922 923 924 925 926 927 928	V.A.3.a)	At a minimum the Clinical Competency Committee must include three members, at least one of whom is a core faculty member. Members must be faculty members from the same program or other programs, or other health professionals who have extensive contact and experience with the program's fellows. (Core)
929 930	V.A.3.b)	The Clinical Competency Committee must:
931 932 933	V.A.3.b).(1)	review all fellow evaluations at least semi-annually;
934 935 936	V.A.3.b).(2)	determine each fellow's progress on achievement of the subspecialty-specific Milestones; and, (Core)
937 938 939 940	V.A.3.b).(3)	meet prior to the fellows' semi-annual evaluations and advise the program director regarding each fellow's progress. (Core)
941 942	V.B.	Faculty Evaluation
943 944 945 946	V.B.1.	The program must have a process to evaluate each faculty member's performance as it relates to the educational program at least annually. (Core)

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a

given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

V.B.1.a)	This evaluation must include a review of the faculty member's
•	clinical teaching abilities, engagement with the educational
	program, participation in faculty development related to their
	skills as an educator, clinical performance, professionalism,
	and scholarly activities. (Core)
	•
V.B.1.b)	This evaluation must include written, confidential evaluations
,	by the fellows. (Core)
	•
V.B.2.	Faculty members must receive feedback on their evaluations at least
	annually. ^(Core)
	·
V.B.3.	Results of the faculty educational evaluations should be
	incorporated into program-wide faculty development plans. (Core)
	V.B.1.b) V.B.2.

963

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

964	V.C.	Program Evaluation and Improvement
965		
966	V.C.1.	The program director must appoint the Program Evaluation
967		Committee to conduct and document the Annual Program
968		Evaluation as part of the program's continuous improvement
969		process. (Core)
970		•
971	V.C.1.a)	The Program Evaluation Committee must be composed of at
972	,	least two program faculty members, at least one of whom is a
973		core faculty member, and at least one fellow. (Core)
974		,

975	V.C.1.b)	Program Evaluation Committee responsibilities must include:
976		
977	V.C.1.b).(1)	acting as an advisor to the program director, through
978	, , ,	program oversight; (Core)
979		p. 19
980	V.C.1.b).(2)	review of the program's self-determined goals and
981	V.O.1.D).(2)	progress toward meeting them; (Core)
982		progress toward meeting them,
	V C 4 b) (2)	and disconnection and a second control in the second control in th
983	V.C.1.b).(3)	guiding ongoing program improvement, including
984		development of new goals, based upon outcomes;
985		and, ^(Core)
986		
987	V.C.1.b).(4)	review of the current operating environment to identify
988		strengths, challenges, opportunities, and threats as
989		related to the program's mission and aims. (Core)
990		

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.

991		
992 993	V.C.1.c)	The Program Evaluation Committee should consider the following elements in its assessment of the program:
994

1038 1039	V.C.1.c).(7).(b)	professional development (Core)
1040 1041 1042	V.C.1.d)	The Program Evaluation Committee must evaluate the program's mission and aims, strengths, areas for improvement, and threats. (Core)
1043 1044	V.C.1.e)	The annual review, including the action plan, must:
1045	V.O.1.0)	The difficult review, moldaling the detion plan, mast.
1046 1047	V.C.1.e).(1)	be distributed to and discussed with the members of the teaching faculty and the fellows; and, (Core)
1048 1049 1050	V.C.1.e).(2)	be submitted to the DIO. (Core)
1051 1052	V.C.2.	The program must participate in a Self-Study prior to its 10-Year Accreditation Site Visit. (Core)
1053 1054 1055	V.C.2.a)	A summary of the Self-Study must be submitted to the DIO.

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the ACGME Manual of Policies and Procedures. Additionally, a description of the Self-Study process, as well as information on how to prepare for the 10-Year Accreditation Site Visit, is available on the ACGME website.

1058 1059 1060 1061 1062 1063 1064 1065 1066	V.C.3.	One goal of ACGME-accredited education is to educate physicians who seek and achieve board certification. One measure of the effectiveness of the educational program is the ultimate pass rate. The program director should encourage all eligible program graduates to take the certifying examination offered by the applicable American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board.
1067 1068 1069 1070 1071 1072 1073	V.C.3.a)	For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) an annual written exam, in the preceding three years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)
1074 1075 1076 1077 1078 1079 1080	V.C.3.b)	For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial written exam, in the preceding six years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)
1081 1082 1083 1084 1085 1086	V.C.3.c)	For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) an annual oral exam, in the preceding three years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)
1088 1089 1090 1091 1092 1093 1094	V.C.3.d)	For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial oral exam, in the preceding six years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)
1095 1096 1097 1098 1099 1100	V.C.3.e)	For each of the exams referenced in V.C.3.a)-d), any program whose graduates over the time period specified in the requirement have achieved an 80 percent pass rate will have met this requirement, no matter the percentile rank of the program for pass rate in that subspecialty. (Outcome)

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable

performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

1101 1102 1103

1105

1104

V.C.3.f)

Programs must report, in ADS, board certification status annually for the cohort of board-eligible fellows that graduated seven years earlier. (Core)

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

1106 1107

1108

VI. The Learning and Working Environment

1109 1110 1111 Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

1112 1113

Excellence in the safety and quality of care rendered to patients by fellows today

1114 1115 1116

• Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice

1117 1118 1119

Excellence in professionalism through faculty modeling of:

1120 1121 1122 o the effacement of self-interest in a humanistic environment that supports the professional development of physicians

1123 1124 1125 the joy of curiosity, problem-solving, intellectual rigor, and discovery

1126 1127

 Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow wellbeing. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating fellows will apply these skills to critique their future unsupervised practice and effect quality improvement measures.

It is necessary for fellows and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.

VI.A.1.a)

Patient Safety

VI.A.1.a).(1)

Culture of Safety

A culture of safety requires continuous identification of vulnerabilities and a willingness to transparently deal with them. An effective organization has formal mechanisms to assess the knowledge, skills, and attitudes of its personnel toward safety in order to identify areas for improvement.

1163 1164 1165 1166 1167 1168	VI.A.1.a).(1).(a)	The program, its faculty, residents, and fellows must actively participate in patient safety systems and contribute to a culture of safety.
1169 1170 1171 1172	VI.A.1.a).(1).(b)	The program must have a structure that promotes safe, interprofessional, team-based care. (Core)
1173	VI.A.1.a).(2)	Education on Patient Safety
1174 1175 1176 1177 1178		Programs must provide formal educational activities that promote patient safety-related goals, tools, and techniques. (Core)
4470	Background and Intent: Optimal interprofessional learning and w	patient safety occurs in the setting of a coordinated orking environment.
1179 1180 1181	VI.A.1.a).(3)	Patient Safety Events
1182 1183 1184 1185 1186 1187 1188 1189 1190		Reporting, investigation, and follow-up of adverse events, near misses, and unsafe conditions are pivotal mechanisms for improving patient safety, and are essential for the success of any patient safety program. Feedback and experiential learning are essential to developing true competence in the ability to identify causes and institute sustainable systems-based changes to ameliorate patient safety vulnerabilities.
1192 1193 1194	VI.A.1.a).(3).(a)	Residents, fellows, faculty members, and other clinical staff members must:
1195 1196 1197 1198	VI.A.1.a).(3).(a).(i)	know their responsibilities in reporting patient safety events at the clinical site; (Core)
1199 1200 1201 1202	VI.A.1.a).(3).(a).(ii)	know how to report patient safety events, including near misses, at the clinical site; and, (Core)
1203 1204 1205 1206	VI.A.1.a).(3).(a).(iii)	be provided with summary information of their institution's patient safety reports. (Core)
1207 1208 1209 1210	VI.A.1.a).(3).(b)	Fellows must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include

1211 1212 1213		analysis, as well as formulation and implementation of actions. (Core)
1214 1215 1216	VI.A.1.a).(4)	Fellow Education and Experience in Disclosure of Adverse Events
1217 1218 1219 1220 1221 1222		Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for fellows to develop and apply.
1223 1224 1225 1226	VI.A.1.a).(4).(a)	All fellows must receive training in how to disclose adverse events to patients and families. (Core)
1227 1228 1229 1230	VI.A.1.a).(4).(b)	Fellows should have the opportunity to participate in the disclosure of patient safety events, real or simulated. (Detail)
1231 1232	VI.A.1.b)	Quality Improvement
1233 1234	VI.A.1.b).(1)	Education in Quality Improvement
1235 1236 1237 1238 1239		A cohesive model of health care includes quality- related goals, tools, and techniques that are necessary in order for health care professionals to achieve quality improvement goals.
1240 1241 1242 1243	VI.A.1.b).(1).(a)	Fellows must receive training and experience in quality improvement processes, including an understanding of health care disparities. (Core)
1244 1245	VI.A.1.b).(2)	Quality Metrics
1246 1247 1248 1249		Access to data is essential to prioritizing activities for care improvement and evaluating success of improvement efforts.
1250 1251 1252 1253	VI.A.1.b).(2).(a)	Fellows and faculty members must receive data on quality metrics and benchmarks related to their patient populations. (Core)
1254 1255	VI.A.1.b).(3)	Engagement in Quality Improvement Activities
1256 1257 1258 1259		Experiential learning is essential to developing the ability to identify and institute sustainable systemsbased changes to improve patient care.

1260 1261 1262 1263	VI.A.1.b).(3).(a)	Fellows must have the opportunity to participate in interprofessional quality improvement activities. (Core)
1264 1265 1266	VI.A.1.b).(3).(a).(i)	This should include activities aimed at reducing health care disparities. (Detail)
1267 1268	VI.A.2.	Supervision and Accountability
1269 1270 1271 1272 1273 1274 1275 1276 1277	VI.A.2.a)	Although the attending physician is ultimately responsible for the care of the patient, every physician shares in the responsibility and accountability for their efforts in the provision of care. Effective programs, in partnership with their Sponsoring Institutions, define, widely communicate, and monitor a structured chain of responsibility and accountability as it relates to the supervision of all patient care.
1277 1278 1279 1280 1281 1282 1283		Supervision in the setting of graduate medical education provides safe and effective care to patients; ensures each fellow's development of the skills, knowledge, and attitudes required to enter the unsupervised practice of medicine; and establishes a foundation for continued professional growth.
1284 1285 1286 1287 1288 1289 1290	VI.A.2.a).(1)	Each patient must have an identifiable and appropriately-credentialed and privileged attending physician (or licensed independent practitioner as specified by the applicable Review Committee) who is responsible and accountable for the patient's care. (Core)
1290 1291 1292 1293 1294	VI.A.2.a).(1).(a)	This information must be available to fellows, faculty members, other members of the health care team, and patients. (Core)
1295 1296 1297 1298	VI.A.2.a).(1).(b)	Fellows and faculty members must inform each patient of their respective roles in that patient's care when providing direct patient care. (Core)
1299 1300 1301 1302 1303 1304 1305 1306 1307 1308 1309	VI.A.2.b)	Supervision may be exercised through a variety of methods. For many aspects of patient care, the supervising physician may be a more advanced fellow. Other portions of care provided by the fellow can be adequately supervised by the appropriate availability of the supervising faculty member or fellow, either on site or by means of telecommunication technology. Some activities require the physical presence of the supervising faculty member. In some circumstances, supervision may include post-hoc review of fellow-delivered care with feedback.

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

1310 1311 VI.A.2.b).(1) The program must demonstrate that the appropriate level of supervision in place for all fellows is based of each fellow's level of training and ability, as well as patient complexity and acuity. Supervision may be exercised through a variety of methods, as appropriate level of supervision in place for all fellows is based of each fellow's level of training and ability, as well as patient complexity and acuity. Supervision may be exercised through a variety of methods, as appropriate level of supervision may be exercised through a variety of methods, as appropriate level of supervision may be exercised through a variety of methods, as appropriate level of supervision may be exercised through a variety of methods, as appropriate level of supervision may be exercised through a variety of methods, as appropriate level of supervision may be exercised through a variety of methods, as appropriate level of supervision may be exercised through a variety of methods, as appropriate level of supervision may be exercised through a variety of methods, as appropriate level of supervision may be exercised through a variety of methods, as appropriate level of supervision may be exercised through a variety of methods, as appropriate level of supervision may be exercised through a variety of methods, as appropriate level of supervision may be exercised through a variety of methods, as appropriate level of supervision may be exercised through a variety of methods, as appropriate level of supervision may be exercised through a variety of methods, as appropriate level of supervision may be exercised through a variety of methods, as appropriate level of supervision may be exercised through a variety of methods and supervision may be exercised through a variety of methods and supervision may be exercised through a variety of methods and supervision may be exercised through a variety of methods and supervision may be exercised through a variety of methods and supervision may be exercised through a variety of me

1350 conditional independence, and a supervisory role in patient	it

1351 1352 1353		care delegated to each fellow must be assigned by the program director and faculty members. (Core)
1354 1355 1356 1357 1358 1359 1360 1361 1362	VI.A.2.d).(1)	The program director must evaluate each fellow's abilities based on specific criteria, guided by the Milestones. (Core)
	VI.A.2.d).(2)	Faculty members functioning as supervising physicians must delegate portions of care to fellows based on the needs of the patient and the skills of each fellow. (Core)
1363 1364 1365 1366 1367 1368	VI.A.2.d).(3)	Fellows should serve in a supervisory role to junior fellows and residents in recognition of their progress toward independence, based on the needs of each patient and the skills of the individual resident or fellow. (Detail)
1369 1370 1371 1372	VI.A.2.e)	Programs must set guidelines for circumstances and events in which fellows must communicate with the supervising faculty member(s). (Core)
1373 1374 1375 1376 1377	VI.A.2.e).(1)	Each fellow must know the limits of their scope of authority, and the circumstances under which the fellow is permitted to act with conditional independence. (Outcome)
		d and Intent: The ACGME Glossary of Terms defines conditional ce as: Graded, progressive responsibility for patient care with defined
1378 1379 1380 1381 1382 1383	VI.A.2.f)	Faculty supervision assignments must be of sufficient duration to assess the knowledge and skills of each fellow and to delegate to the fellow the appropriate level of patient care authority and responsibility. (Core)
1384 1385	VI.B.	Professionalism
1386 1387 1388 1389 1390 1391	VI.B.1.	Programs, in partnership with their Sponsoring Institutions, must educate fellows and faculty members concerning the professional responsibilities of physicians, including their obligation to be appropriately rested and fit to provide the care required by their patients. (Core)
1392 1393	VI.B.2.	The learning objectives of the program must:
1394 1395 1396 1397	VI.B.2.a)	be accomplished through an appropriate blend of supervised patient care responsibilities, clinical teaching, and didactic educational events; (Core)

1398 VI.B.2.b) be accomplished without excessive reliance on fellows to fulfill non-physician obligations; and, (Core)

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

VI.B.2.c) ensure manageable patient care responsibilities. (Core)

Background and Intent: The Common Program Requirements do not define "manageable patient care responsibilities" as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1404 1405 VI.B.3. The program director, in partnership with the Sponsoring Institution, 1406 must provide a culture of professionalism that supports patient safety and personal responsibility. (Core) 1407 1408 1409 VI.B.4. Fellows and faculty members must demonstrate an understanding 1410 of their personal role in the: 1411 provision of patient- and family-centered care; (Outcome) 1412 VI.B.4.a) 1413 1414 safety and welfare of patients entrusted to their care, VI.B.4.b) 1415 including the ability to report unsafe conditions and adverse events: (Outcome) 1416 1417

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

VI.B.4.c) assurance of their fitness for work, including: (Outcome)

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

1453		W II B I
1454	VI.C.	Well-Being
1455		
1456		Psychological, emotional, and physical well-being are critical in the
1457		development of the competent, caring, and resilient physician and require
1458		proactive attention to life inside and outside of medicine. Well-being
1459		requires that physicians retain the joy in medicine while managing their
1460		own real life stresses. Self-care and responsibility to support other
1461		members of the health care team are important components of
1462		professionalism; they are also skills that must be modeled, learned, and
1463		nurtured in the context of other aspects of fellowship training.
1464		
1465		Fellows and faculty members are at risk for burnout and depression.
1466		Programs, in partnership with their Sponsoring Institutions, have the same
1467		responsibility to address well-being as other aspects of resident
1468		competence. Physicians and all members of the health care team share
1469		responsibility for the well-being of each other. For example, a culture which
1470		encourages covering for colleagues after an illness without the expectation
1471		of reciprocity reflects the ideal of professionalism. A positive culture in a
1472		clinical learning environment models constructive behaviors, and prepares
1712		omnour rearning environment moders constructive benaviors, and prepares

 fellows with the skills and attitudes needed to thrive throughout their careers.

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

VI.C.1. The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:

VI.C.1.a) efforts to enhance the meaning that each fellow finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships: (Core)

VI.C.1.b) attention to scheduling, work intensity, and work compression that impacts fellow well-being; (Core)

VI.C.1.c) evaluating workplace safety data and addressing the safety of fellows and faculty members; (Core)

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

VI.C.1.d) policies and programs that encourage optimal fellow and faculty member well-being; and, (Core)

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

VI.C.1.d).(1) Fellows must be given the opportunity to attend medical, mental health, and dental care appointments,

1500 1501 1502 including those scheduled during their working hours. (Core)

1503

1504 1505

1513 1514 VI.C.1.e)

scheduled during their working hours.

attention to fellow and faculty member burnout, depression, and substance use disorder. The program, in partnership with its Sponsoring Institution, must educate faculty members and fellows in identification of the symptoms of burnout, depression, and substance use disorder, including means to assist those who experience these conditions. Fellows and faculty members must also be educated to recognize those symptoms in themselves and how to seek appropriate care. The program, in partnership with its Sponsoring Institution, must: (Core)

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance use disorder. Materials and more information are available on the Physician Well-being section of the ACGME website (http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being).

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with

time away from the program as needed to access care, including appointments

1515 1516

1517 1518

VI.C.1.e).(1)

encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another fellow, resident, or faculty member may be displaying signs of burnout, depression, a substance use disorder, suicidal ideation, or potential for violence:

Background and Intent: Individuals experiencing burnout, depression, substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility: those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

1524

1525 1526	VI.C.1.e).(2)	provide access to appropriate tools for self-screening; and, ^(Core)
1527		·
1528	VI.C.1.e).(3)	provide access to confidential, affordable mental
1529		health assessment, counseling, and treatment,
1530		including access to urgent and emergent care 24
1531		hours a day, seven days a week. (Core)
1532		

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

.000		
1534	VI.C.2.	There are circumstances in which fellows may be unable to attend
1535		work, including but not limited to fatigue, illness, family
1536		emergencies, and parental leave. Each program must allow an
1537		appropriate length of absence for fellows unable to perform their
1538		patient care responsibilities. (Core)
1539		·
1540	VI.C.2.a)	The program must have policies and procedures in place to
1541	•	ensure coverage of patient care. (Core)
1542		·
1543	VI.C.2.b)	These policies must be implemented without fear of negative
1544	,	consequences for the fellow who is or was unable to provide
1545		the clinical work. (Core)
1546		

1533

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

1547		
1548	VI.D.	Fatigue Mitigation
1549		
1550	VI.D.1.	Programs must:
1551		•
1552	VI.D.1.a)	educate all faculty members and fellows to recognize the
1553	•	signs of fatigue and sleep deprivation; (Core)
1554		
1555	VI.D.1.b)	educate all faculty members and fellows in alertness
1556	,	management and fatigue mitigation processes; and, (Core)
1557		
1558	VI.D.1.c)	encourage fellows to use fatigue mitigation processes to
1559	-	manage the potential negative effects of fatigue on patient
1560		care and learning. (Detail)
1561		-

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

	<u> </u>
VI.D.2.	Each program must ensure continuity of patient care, consistent
VI.D.Z.	with the program's policies and procedures referenced in VI.C.2–
	VI.C.2.b), in the event that a fellow may be unable to perform their
	patient care responsibilities due to excessive fatigue. (Core)
	patient care responsibilities due to excessive latigue.
VI.D.3.	The program, in partnership with its Sponsoring Institution, must
VI.D.3.	ensure adequate sleep facilities and safe transportation options for
	fellows who may be too fatigued to safely return home. (Core)
	renows who may be too ratigued to safety return nome.
VI.E.	Clinical Beananaihilities Teamwork and Transitions of Care
VI.E.	Clinical Responsibilities, Teamwork, and Transitions of Care
\/I = 4	Clinical Degrapaihilities
VI.E.1.	Clinical Responsibilities
	The eliminal warmanaihilities for each follow would be based on DOV
	The clinical responsibilities for each fellow must be based on PGY
	level, patient safety, fellow ability, severity and complexity of patient
	illness/condition, and available support services. (Core)
\	
VI.E.1.a)	Lines of authority should be defined by programs, and all fellows
	must have a working knowledge of these expected reporting
	relationships to maximize quality care and patient safety. (Detail)
	-
VI.E.1.b)	There must be written lines of responsibility describing the clinical
	responsibilities of and relationship between craniofacial surgery
	fellows and plastic surgery residents, and these must be supplied
	to the Review Committee at the time of a program's review. (Core)

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

1589		
1590	VI.E.2.	Teamwork
1591 1592		Fellows must care for patients in an environment that maximizes
1593		communication. This must include the opportunity to work as a
1594		member of effective interprofessional teams that are appropriate to
1595		the delivery of care in the subspecialty and larger health system.
1596	\" = 0 \	(Core)
1597	VI.E.2.a)	Effective surgical practices entail the involvement of
1598 1599		interdisciplinary team members with a mix of complementary skills. (Outcome)
1600		SKIIIO.
1601	VI.E.2.b)	Fellows must collaborate with fellow surgical residents, and
1602	,	especially with faculty members, other physicians outside of the
1603		specialty, and non-physician health care providers, to best
1604		formulate treatment plans for an increasingly diverse patient
1605 1606		population. ^(Detail)
1607	VI.E.2.c)	Fellows must assume personal responsibility to complete all tasks

VI.F. Clinical Experience and Education

Programs, in partnership with their Sponsoring Institutions, must design an effective program structure that is configured to provide fellows with educational and clinical experience opportunities, as well as reasonable opportunities for rest and personal activities.

Background and Intent: In the new requirements, the terms "clinical experience and education," "clinical and educational work," and "clinical and educational work hours" replace the terms "duty hours," "duty periods," and "duty." These changes have been made in response to concerns that the previous use of the term "duty" in reference to number of hours worked may have led some to conclude that fellows' duty to "clock out" on time superseded their duty to their patients.

VI.F.1. Maximum Hours of Clinical and Educational Work per Week

Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting. (Core)

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

1640

1641 1642

1643 1644

1645 1646

1647 1648

1649 1650

1651

1652

1653 1654

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

1655		
1656	VI.F.2.	Mandatory Time Free of Clinical Work and Education
1657		
1658	VI.F.2.a)	The program must design an effective program structure that
1659		is configured to provide fellows with educational
1660		opportunities, as well as reasonable opportunities for rest
1661		and personal well-being. (Core)
1662		
1663	VI.F.2.b)	Fellows should have eight hours off between scheduled
1664		clinical work and education periods. (Detail)
1665		
1666	VI.F.2.b).(1)	There may be circumstances when fellows choose to
1667		stay to care for their patients or return to the hospital
1668		with fewer than eight hours free of clinical experience
1669		and education. This must occur within the context of
1670		the 80-hour and the one-day-off-in-seven
1671		requirements. (Detail)
1672		

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1673 1674

VI.F.2.c) Fellows must have at least 14 hours free of clinical work and education after 24 hours of in-house call. (Core)

1675 1676

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1677 1678

VI.F.2.d)

Fellows must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. (Core)

1679 1680 1681

1682

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

1683

1684 VI.F.3. **Maximum Clinical Work and Education Period Length** 1685 1686 VI.F.3.a) Clinical and educational work periods for fellows must not 1687 exceed 24 hours of continuous scheduled clinical assignments. (Core) 1688 1689 1690 VI.F.3.a).(1) Up to four hours of additional time may be used for 1691 activities related to patient safety, such as providing effective transitions of care, and/or fellow education. 1692 1693 1694 1695 VI.F.3.a).(1).(a) Additional patient care responsibilities must not be assigned to a fellow during this time. (Core) 1696

1697

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

\/I = 4	Clinical and Educational Work Hour Evacations
VI.F.4.	Clinical and Educational Work Hour Exceptions
VI.F.4.a)	In rare circumstances, after handing off all other
	responsibilities, a fellow, on their own initiative, may elect to
	remain or return to the clinical site in the following
	circumstances:
VI.F.4.a).(1)	to continue to provide care to a single severely ill or
, , ,	unstable patient; (Detail)
	•
VI.F.4.a).(2)	humanistic attention to the needs of a patient or
, , ,	family; or, ^(Detail)
	••
VI.F.4.a).(3)	to attend unique educational events. (Detail)
, , ,	•
VI.F.4.b)	These additional hours of care or education will be counted
,	toward the 80-hour weekly limit. (Detail)
	·

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

1717 1718 VI.F.4.c) A Review Committee may grant rotation-specific exceptions 1719 for up to 10 percent or a maximum of 88 clinical and 1720 educational work hours to individual programs based on a 1721 sound educational rationale. 1722 1723 VI.F.5. Moonlighting 1724 1725 Moonlighting must not interfere with the ability of the fellow VI.F.5.a) 1726 to achieve the goals and objectives of the educational 1727 program, and must not interfere with the fellow's fitness for work nor compromise patient safety. (Core) 1728 1729

VI.F.5.b)	Time spent by fellows in internal and external moonlighting (as defined in the ACGME Glossary of Terms) must be counted toward the 80-hour maximum weekly limit. (Core)
moonlighting,	and Intent: For additional clarification of the expectations related to please refer to the Common Program Requirement FAQs (available at tigme.org/What-We-Do/Accreditation/Common-Program-Requirements).
VI.F.6.	In-House Night Float
	Night float must occur within the context of the 80-hour and one-day-off-in-seven requirements. (Core)
	and Intent: The requirement for no more than six consecutive nights of s removed to provide programs with increased flexibility in scheduling.
VI.F.7.	Maximum In-House On-Call Frequency
	Fellows must be scheduled for in-house call no more frequently that every third night (when averaged over a four-week period). (Core)
VI.F.8.	At-Home Call
VI.F.8.a)	Time spent on patient care activities by fellows on at-home call must count toward the 80-hour maximum weekly limit. The frequency of at-home call is not subject to the everythird-night limitation, but must satisfy the requirement for or day in seven free of clinical work and education, when averaged over four weeks. (Core)
VI.F.8.a).(1)	At-home call must not be so frequent or taxing as to preclude rest or reasonable personal time for each fellow. (Core)
VI.F.8.b)	Fellows are permitted to return to the hospital while on athome call to provide direct care for new or established patients. These hours of inpatient patient care must be included in the 80-hour maximum weekly limit. (Detail)

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

1763

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.

1765 1766 *Core Requirements: Statements that define structure, resource, or process elements 1767 essential to every graduate medical educational program. 1768 1769 **Detail Requirements:** Statements that describe a specific structure, resource, or process, for achieving compliance with a Core Requirement. Programs and sponsoring institutions in 1770 1771 substantial compliance with the Outcome Requirements may utilize alternative or innovative approaches to meet Core Requirements. 1772 1773 1774 *Outcome Requirements: Statements that specify expected measurable or observable attributes (knowledge, abilities, skills, or attitudes) of residents or fellows at key stages of their 1775 1776 graduate medical education. 1777 1778

1764

1779 For programs with or applying for Osteopathic Recognition, the Osteopathic Recognition 1780 Requirements also apply (www.acgme.org/OsteopathicRecognition).
