1 ACGME Program Requirements for Graduate Medical Education
2 in Clinical Informatics

3
4 **Common Program Requirements (Fellowship) are in BOLD**

5
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.
9

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

10
11 **Introduction**

12
13 **Int.A.** *Fellowship is advanced graduate medical education beyond a core
14 residency program for physicians who desire to enter more specialized
15 practice. Fellowship-trained physicians serve the public by providing
16 subspecialty care, which may also include core medical care, acting as a
17 community resource for expertise in their field, creating and integrating
18 new knowledge into practice, and educating future generations of
19 physicians. Graduate medical education values the strength that a diverse
20 group of physicians brings to medical care.*

21
22 *Fellows who have completed residency are able to practice independently
23 in their core specialty. The prior medical experience and expertise of
24 fellows distinguish them from physicians entering into residency training.
25 The fellow's care of patients within the subspecialty is undertaken with
26 appropriate faculty supervision and conditional independence. Faculty
27 members serve as role models of excellence, compassion,
28 professionalism, and scholarship. The fellow develops deep medical
29 knowledge, patient care skills, and expertise applicable to their focused
30 area of practice. Fellowship is an intensive program of subspecialty clinical
31 and didactic education that focuses on the multidisciplinary care of
32 patients. Fellowship education is often physically, emotionally, and
33 intellectually demanding, and occurs in a variety of clinical learning
34 environments committed to graduate medical education and the well-being
35 of patients, residents, fellows, faculty members, students, and all members
36 of the health care team.*

37
38 *In addition to clinical education, many fellowship programs advance
39 fellows' skills as physician-scientists. While the ability to create new
40 knowledge within medicine is not exclusive to fellowship-educated
41 physicians, the fellowship experience expands a physician's abilities to
42 pursue hypothesis-driven scientific inquiry that results in contributions to
43 the medical literature and patient care. Beyond the clinical subspecialty
44 expertise achieved, fellows develop mentored relationships built on an
45 infrastructure that promotes collaborative research.*

46
47 **Int.B.** **Definition of Subspecialty**

48
49 Clinical informatics is the subspecialty of all medical specialties that transforms
50 health care by analyzing, designing, implementing, and evaluating information
51 and communication systems to improve patient care, enhance access to care,
52 advance individual and population health outcomes, and strengthen the clinician-
53 patient relationship.

54
55 Physicians who practice clinical informatics draw from the broader field of
56 biomedical and health information technology (IT) as they apply informatics
57 methods, concepts, and tools to the practice of medicine. Thus, they must
58 understand the culture, boundaries, and complexities of the field. Further, the
59 stakeholders, structures, and processes that constitute the health system affect
60 the information and knowledge needs of health care professionals and influence
61 the selection and implementation of clinical information processes and systems.

62
63 Physicians who practice clinical informatics collaborate with other health care
64 and IT professionals and provide consultative services that use their knowledge
65 of patient care combined with their understanding of informatics concepts,
66 methods, and health IT tools to improve clinical practice by:

67
68 Int.B.1. leading initiatives designed to enhance health care quality and access by
69 supporting and facilitating care coordination and transitions of care
70 through the procurement, customization, development, implementation,
71 management, evaluation, and continuous improvement of clinical
72 information systems;

73
74 Int.B.2. securing the legal and ethical use of clinical information;

75
76 Int.B.3. assessing information and knowledge needs of health care professionals
77 and patients;

78
79 Int.B.4. characterizing, evaluating, and refining clinical processes;

80
81 Int.B.5. analyzing, developing, implementing, and refining clinical decision
82 support systems; and,

83
84 Int.B.6. participating in projects designed to use technology to promote patient
85 care that is safe, efficient, effective, timely, patient-centered, and
86 equitable.

87
88 **Int.C. Length of Educational Program**

89
90 The educational program in clinical informatics (CI) must be 24 months in length.
91 (Core)*

92
93 Int.C.1. Fellows must complete the program within 48 months of matriculation.
94 (Core)

95
96 **I. Oversight**

97
98 **I.A. Sponsoring Institution**

99
100
101
102
103
104
105
106
107

The Sponsoring Institution is the organization or entity that assumes the ultimate financial and academic responsibility for a program of graduate medical education consistent with the ACGME Institutional Requirements.

When the Sponsoring Institution is not a rotation site for the program, the most commonly utilized site of clinical activity for the program is the primary clinical site.

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

131
132
133
134
135
136
137
138
139

I.A.1. The program must be sponsored by one ACGME-accredited Sponsoring Institution. ^(Core)

I.B. Participating Sites

A participating site is an organization providing educational experiences or educational assignments/rotations for fellows.

I.B.1. The program, with approval of its Sponsoring Institution, must designate a primary clinical site. ^(Core)

I.B.1.a) A clinical informatics fellowship must function as an integral part of an Accreditation Council for Graduate Medical Education (ACGME)-accredited residency program in anesthesiology, diagnostic radiology, emergency medicine, family medicine, internal medicine, medical genetics and genomics, pathology, pediatrics, or preventive medicine. ^(Core) [Moved from I.A.1.]

I.B.1.b) There must be an institutional policy governing the educational resources committed to the fellowship that ensures collaboration among the multiple disciplines and professions involved in educating fellows. ^(Core) [Moved from I.A.2.]

I.B.1.c) There may be only one ACGME-accredited clinical informatics program within a sponsoring institution. ^{(Detail)†} [Moved from I.A.3.]

I.B.1.d) The program structure should include participation of an academic informatics department. ^(Detail) [Moved from I.A.4.]

I.B.2. There must be a program letter of agreement (PLA) between the program and each participating site that governs the relationship

140 between the program and the participating site providing a required
141 assignment. ^(Core)

142
143 **I.B.2.a) The PLA must:**

144
145 **I.B.2.a).(1) be renewed at least every 10 years; and, ^(Core)**

146
147 **I.B.2.a).(2) be approved by the designated institutional official**
148 **(DIO). ^(Core)**

149
150 **I.B.3. The program must monitor the clinical learning and working**
151 **environment at all participating sites. ^(Core)**

152
153 **I.B.3.a) At each participating site there must be one faculty member,**
154 **designated by the program director, who is accountable for**
155 **fellow education for that site, in collaboration with the**
156 **program director. ^(Core)**

157

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- **Identifying the faculty members who will assume educational and supervisory responsibility for fellows**
- **Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows**
- **Specifying the duration and content of the educational experience**
- **Stating the policies and procedures that will govern fellow education during the assignment**

158
159 **I.B.4. The program director must submit any additions or deletions of**
160 **participating sites routinely providing an educational experience,**
161 **required for all fellows, of one month full time equivalent (FTE) or**
162 **more through the ACGME's Accreditation Data System (ADS). ^(Core)**

163
164 **I.C. The program, in partnership with its Sponsoring Institution, must engage in**
165 **practices that focus on mission-driven, ongoing, systematic recruitment**
166 **and retention of a diverse and inclusive workforce of residents (if present),**
167 **fellows, faculty members, senior administrative staff members, and other**
168 **relevant members of its academic community. ^(Core)**

169

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

200
201
202
203
- I.D. Resources**
 - I.D.1. The program, in partnership with its Sponsoring Institution, must ensure the availability of adequate resources for fellow education.**
(Core)
 - I.D.1.a) There must be space and equipment for the educational program, including meeting rooms, classrooms, computers, Internet access, visual and other educational aids, and work/study space. (Core)
[Moved from II.D.1.]
 - I.D.1.b) The primary clinical site must operate a clinical information system that is able to: (Core) [Moved from II.D.2.]
 - I.D.1.b).(1) collect, store, retrieve, and manage health and wellness data and information; (Core) [Moved from II.D.2.a)]
 - I.D.1.b).(2) provide clinical decision support; and, (Core) [Moved from II.D.2.b)]
 - I.D.1.b).(3) support ambulatory, inpatient, and remote care settings, as needed. (Core) [Moved from II.D.2.c)]
 - I.D.2. The program, in partnership with its Sponsoring Institution, must ensure healthy and safe learning and working environments that promote fellow well-being and provide for:** (Core)
 - I.D.2.a) access to food while on duty;** (Core)
 - I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available and accessible for fellows with proximity appropriate for safe patient care;** (Core)

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

204

205 I.D.2.c) clean and private facilities for lactation that have refrigeration
206 capabilities, with proximity appropriate for safe patient care;
207 (Core)
208

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

209
210 I.D.2.d) security and safety measures appropriate to the participating
211 site; and, (Core)
212

213 I.D.2.e) accommodations for fellows with disabilities consistent with
214 the Sponsoring Institution's policy. (Core)
215

216 I.D.3. Fellows must have ready access to subspecialty-specific and other
217 appropriate reference material in print or electronic format. This
218 must include access to electronic medical literature databases with
219 full text capabilities. (Core)
220

221 I.D.4. The program's educational and clinical resources must be adequate
222 to support the number of fellows appointed to the program. (Core)
223

224 I.E. *A fellowship program usually occurs in the context of many learners and
225 other care providers and limited clinical resources. It should be structured
226 to optimize education for all learners present.*
227

228 I.E.1. Fellows should contribute to the education of residents in core
229 programs, if present. (Core)
230

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

231
232 II. Personnel
233

234 II.A. Program Director
235

236 II.A.1. There must be one faculty member appointed as program director
237 with authority and accountability for the overall program, including
238 compliance with all applicable program requirements. (Core)
239

240 II.A.1.a) The Sponsoring Institution's Graduate Medical Education
241 Committee (GMEC) must approve a change in program
242 director. ^(Core)
243

244 II.A.1.b) Final approval of the program director resides with the
245 Review Committee. ^(Core)
246

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual's responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director's nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

247
248 II.A.2. The program director must be provided with support adequate for
249 administration of the program based upon its size and configuration.
250 ^(Core)

[The Review Committee must further specify]

[The Review Committee's specification will be included in an upcoming focused revision to the Clinical Informatics Program Requirements]

256
257 II.A.3. Qualifications of the program director:

258
259 II.A.3.a) must include subspecialty expertise and qualifications
260 acceptable to the Review Committee; and, ^(Core)
261

262 II.A.3.b) must include current certification in the subspecialty for
263 which they are the program director by a member board of the
264 American Board of Medical Specialties or by a certifying board of
265 the American Osteopathic Association, or subspecialty
266 qualifications that are acceptable to the Review Committee.
267 ^(Core)
268

269 II.A.3.c) must include at least three years of experience in clinical
270 informatics; and, ^(Core) [Moved from II.A.3.d)]
271

272 II.A.3.d) must include experience in clinical informatics education. ^(Core)
273 [Moved from II.A.3.e)]
274

275 II.A.4. Program Director Responsibilities

276
277 The program director must have responsibility, authority, and
278 accountability for: administration and operations; teaching and
279 scholarly activity; fellow recruitment and selection, evaluation, and
280 promotion of fellows, and disciplinary action; supervision of fellows;
281 and fellow education in the context of patient care. ^(Core)
282

283 II.A.4.a) The program director must:

284
285
286

II.A.4.a).(1) be a role model of professionalism; (Core)

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

287
288
289
290
291
292

II.A.4.a).(2) design and conduct the program in a fashion consistent with the needs of the community, the mission(s) of the Sponsoring Institution, and the mission(s) of the program; (Core)

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

293
294
295
296
297

II.A.4.a).(3) administer and maintain a learning environment conducive to educating the fellows in each of the ACGME Competency domains; (Core)

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

298
299
300
301
302
303
304
305
306
307
308
309
310
311
312
313
314

II.A.4.a).(4) develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the fellowship program education and at least annually thereafter, as outlined in V.B.; (Core)

II.A.4.a).(5) have the authority to approve program faculty members for participation in the fellowship program education at all sites; (Core)

II.A.4.a).(6) have the authority to remove program faculty members from participation in the fellowship program education at all sites; (Core)

II.A.4.a).(7) have the authority to remove fellows from supervising interactions and/or learning environments that do not meet the standards of the program; (Core)

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

- 316
317
318
319

332
333
334
335
336
337
338
339
- II.A.4.a).(8)** submit accurate and complete information required and requested by the DIO, GMEC, and ACGME; ^(Core)
- II.A.4.a).(9)** provide applicants who are offered an interview with information related to the applicant's eligibility for the relevant subspecialty board examination(s); ^(Core)
- II.A.4.a).(10)** provide a learning and working environment in which fellows have the opportunity to raise concerns and provide feedback in a confidential manner as appropriate, without fear of intimidation or retaliation; ^(Core)
- II.A.4.a).(11)** ensure the program's compliance with the Sponsoring Institution's policies and procedures related to grievances and due process; ^(Core)
- II.A.4.a).(12)** ensure the program's compliance with the Sponsoring Institution's policies and procedures for due process when action is taken to suspend or dismiss, not to promote, or not to renew the appointment of a fellow; ^(Core)

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

- 340
341
342
343
344
345
346
347
348
349
350
351
- II.A.4.a).(13)** ensure the program's compliance with the Sponsoring Institution's policies and procedures on employment and non-discrimination; ^(Core)
- II.A.4.a).(13).(a)** Fellows must not be required to sign a non-competition guarantee or restrictive covenant. ^(Core)
- II.A.4.a).(14)** document verification of program completion for all graduating fellows within 30 days; ^(Core)

352 II.A.4.a).(15) provide verification of an individual fellow's
353 completion upon the fellow's request, within 30 days;
354 and, ^(Core)
355

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

356
357 II.A.4.a).(16) obtain review and approval of the Sponsoring
358 Institution's DIO before submitting information or
359 requests to the ACGME, as required in the Institutional
360 Requirements and outlined in the ACGME Program
361 Director's Guide to the Common Program
362 Requirements. ^(Core)
363

364 II.A.4.a).(17) ensure that each fellow's individualized learning plan
365 includes documentation of Milestone evaluation; and, ^(Core)
366 [Moved from II.A.4.p)]
367

368 II.A.4.a).(18) devote at least 20 percent of his or her professional effort
369 to the academic, educational, and administrative (non-
370 clinical) aspects of the fellowship program. ^(Core) [Moved
371 from II.A.4.q)]
372

373 **II.B. Faculty**

374
375 *Faculty members are a foundational element of graduate medical education*
376 *– faculty members teach fellows how to care for patients. Faculty members*
377 *provide an important bridge allowing fellows to grow and become practice*
378 *ready, ensuring that patients receive the highest quality of care. They are*
379 *role models for future generations of physicians by demonstrating*
380 *compassion, commitment to excellence in teaching and patient care,*
381 *professionalism, and a dedication to lifelong learning. Faculty members*
382 *experience the pride and joy of fostering the growth and development of*
383 *future colleagues. The care they provide is enhanced by the opportunity to*
384 *teach. By employing a scholarly approach to patient care, faculty members,*
385 *through the graduate medical education system, improve the health of the*
386 *individual and the population.*
387

388 *Faculty members ensure that patients receive the level of care expected*
389 *from a specialist in the field. They recognize and respond to the needs of*
390 *the patients, fellows, community, and institution. Faculty members provide*
391 *appropriate levels of supervision to promote patient safety. Faculty*
392 *members create an effective learning environment by acting in a*
393 *professional manner and attending to the well-being of the fellows and*
394 *themselves.*
395

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment or salary support.

- 396
397 **II.B.1.** For each participating site, there must be a sufficient number of
398 faculty members with competence to instruct and supervise all
399 fellows at that location. ^(Core)
400
401 II.B.1.a) In addition to the program director, there must be at least two
402 faculty members. ^(Core) [Moved from II.B.6.]
403
404 II.B.1.a).(1) The faculty members and program director should equal at
405 least two FTE. ^(Detail) [Moved from II.B.6.a)]
406
407 **II.B.2.** Faculty members must:
408
409 **II.B.2.a)** be role models of professionalism; ^(Core)
410
411 **II.B.2.b)** demonstrate commitment to the delivery of safe, quality,
412 cost-effective, patient-centered care; ^(Core)
413

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

- 414
415 **II.B.2.c)** demonstrate a strong interest in the education of fellows; ^(Core)
416
417 **II.B.2.d)** devote sufficient time to the educational program to fulfill
418 their supervisory and teaching responsibilities; ^(Core)
419
420 **II.B.2.e)** administer and maintain an educational environment
421 conducive to educating fellows; ^(Core)
422
423 **II.B.2.f)** regularly participate in organized clinical discussions,
424 rounds, journal clubs, and conferences; and, ^(Core)
425
426 **II.B.2.g)** pursue faculty development designed to enhance their skills
427 at least annually. ^(Core)
428

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

- 429
430 **II.B.3.** Faculty Qualifications

431
432 **II.B.3.a) Faculty members must have appropriate qualifications in**
433 **their field and hold appropriate institutional appointments.**
434 **(Core)**

435
436 **II.B.3.b) Subspecialty physician faculty members must:**
437

438 **II.B.3.b).(1) have current certification in the subspecialty by a**
439 **member board of the American Board of Medical**
440 **Specialties or by a certifying board of the American**
441 **Osteopathic Association, or possess qualifications**
442 **judged acceptable to the Review Committee.** **(Core)**
443

444 **II.B.3.b).(2) ~~Physician faculty members should~~ have at least two years**
445 **of experience in clinical informatics.** **(Detail)** [Moved from
446 **II.B.2.a)]**
447

448 **II.B.3.c) Any non-physician faculty members who participate in**
449 **fellowship program education must be approved by the**
450 **program director.** **(Core)**
451

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

452
453 **II.B.3.d) Any other specialty physician faculty members must have**
454 **current certification in their specialty by the appropriate**
455 **American Board of Medical Specialties (ABMS) member**
456 **board or American Osteopathic Association (AOA) certifying**
457 **board, or possess qualifications judged acceptable to the**
458 **Review Committee.** **(Core)**
459

460 **II.B.4. Core Faculty**

461
462 **Core faculty members must have a significant role in the education**
463 **and supervision of fellows and must devote a significant portion of**
464 **their entire effort to fellow education and/or administration, and**
465 **must, as a component of their activities, teach, evaluate, and provide**
466 **formative feedback to fellows.** **(Core)**
467

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.

468
469 **II.B.4.a)** **Core faculty members must be designated by the program**
470 **director.** ^(Core)

471
472 **II.B.4.b)** **Core faculty members must complete the annual ACGME**
473 **Faculty Survey.** ^(Core)

474
475 **[The Review Committee must specify the minimum number of core**
476 **faculty and/or the core faculty-fellow ratio]**

477
478 **[The Review Committee’s specification will be included in an upcoming**
479 **focused revision to the Clinical Informatics Program Requirements]**

480
481 **II.C. Program Coordinator**

482
483 **II.C.1.** **There must be a program coordinator.** ^(Core)

484
485 **II.C.2.** **The program coordinator must be provided with support adequate**
486 **for administration of the program based upon its size and**
487 **configuration.** ^(Core)

488
489 **II.C.2.a)** ~~Administrative support must include a program coordinator to~~
490 ~~provide adequate administrative and technological support to the~~
491 ~~fellowship.~~ ^(Core) ~~[Moved from II.C.1.]~~

492

Background and Intent: Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge of the ACGME and Program Requirements, policies, and procedures. Program coordinators assist the program director in accreditation efforts, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

493
494 **II.D. Other Program Personnel**

495
496 **The program, in partnership with its Sponsoring Institution, must jointly**
497 **ensure the availability of necessary personnel for the effective**
498 **administration of the program.** ^(Core)

499

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers,

education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

III. Fellow Appointments

III.A. Eligibility Criteria

III.A.1. Eligibility Requirements – Fellowship Programs

All required clinical education for entry into ACGME-accredited fellowship programs must be completed in an ACGME-accredited residency program, an AOA-approved residency program, a program with ACGME International (ACGME-I) Advanced Specialty Accreditation, or a Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of Canada (CFPC)-accredited residency program located in Canada.
(Core)

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

516
517
518
519
520
521
522
523

534
535
536
537
538
539
540
541
542
543
544

III.A.1.a) Fellowship programs must receive verification of each entering fellow's level of competence in the required field, upon matriculation, using ACGME, ACGME-I, or CanMEDS Milestones evaluations from the core residency program. (Core)

III.A.1.b) Prior to appointment in the program, each fellow must have completed a residency program that satisfies the requirements in III.A.1. ~~an ACGME-accredited residency or a RCPSC- or CFPC-accredited residency program located in Canada.~~ (Core) [Moved from III.A.2.]

III.A.1.c) Fellow Eligibility Exception

The Review Committees for Anesthesiology, Emergency Medicine, Family Medicine, Internal Medicine, Medical Genetics and Genomics, Pathology, Pediatrics, Preventive Medicine, and Radiology will allow the following exception to the fellowship eligibility requirements:

III.A.1.c).(1) An ACGME-accredited fellowship program may accept an exceptionally qualified international graduate applicant who does not satisfy the eligibility requirements listed in III.A.1., but who does meet all of the following additional qualifications and conditions:
(Core)

III.A.1.c).(1).(a) evaluation by the program director and fellowship selection committee of the

- 545 applicant's suitability to enter the program,
 546 based on prior training and review of the
 547 summative evaluations of training in the core
 548 specialty; and, ^(Core)
 549
 550 **III.A.1.c).(1).(b)** review and approval of the applicant's
 551 exceptional qualifications by the GMEC; and,
 552 ^(Core)
 553
 554 **III.A.1.c).(1).(c)** verification of Educational Commission for
 555 Foreign Medical Graduates (ECFMG)
 556 certification. ^(Core)
 557
 558 **III.A.1.c).(2)** Applicants accepted through this exception must have
 559 an evaluation of their performance by the Clinical
 560 Competency Committee within 12 weeks of
 561 matriculation. ^(Core)
 562

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

- 563
 564 **III.B.** The program director must not appoint more fellows than approved by the
 565 Review Committee. ^(Core)
 566
 567 **III.B.1.** All complement increases must be approved by the Review
 568 Committee. ^(Core)
 569
 570 **III.C.** Fellow Transfers
 571
 572 The program must obtain verification of previous educational experiences
 573 and a summative competency-based performance evaluation prior to
 574 acceptance of a transferring fellow, and Milestones evaluations upon
 575 matriculation. ^(Core)
 576
 577 **IV. Educational Program**
 578

579 ***The ACGME accreditation system is designed to encourage excellence and***
580 ***innovation in graduate medical education regardless of the organizational***
581 ***affiliation, size, or location of the program.***

582
583 ***The educational program must support the development of knowledgeable, skillful***
584 ***physicians who provide compassionate care.***

585
586 ***In addition, the program is expected to define its specific program aims consistent***
587 ***with the overall mission of its Sponsoring Institution, the needs of the community***
588 ***it serves and that its graduates will serve, and the distinctive capabilities of***
589 ***physicians it intends to graduate. While programs must demonstrate substantial***
590 ***compliance with the Common and subspecialty-specific Program Requirements, it***
591 ***is recognized that within this framework, programs may place different emphasis***
592 ***on research, leadership, public health, etc. It is expected that the program aims***
593 ***will reflect the nuanced program-specific goals for it and its graduates; for***
594 ***example, it is expected that a program aiming to prepare physician-scientists will***
595 ***have a different curriculum from one focusing on community health.***
596

597 **IV.A. The curriculum must contain the following educational components:** (Core)

598
599 **IV.A.1. a set of program aims consistent with the Sponsoring Institution’s**
600 **mission, the needs of the community it serves, and the desired**
601 **distinctive capabilities of its graduates;** (Core)

602
603 **IV.A.1.a) The program’s aims must be made available to program**
604 **applicants, fellows, and faculty members.** (Core)

605
606 **IV.A.2. competency-based goals and objectives for each educational**
607 **experience designed to promote progress on a trajectory to**
608 **autonomous practice in their subspecialty. These must be**
609 **distributed, reviewed, and available to fellows and faculty members;**
610 **(Core)**

611
612 **IV.A.3. delineation of fellow responsibilities for patient care, progressive**
613 **responsibility for patient management, and graded supervision in**
614 **their subspecialty;** (Core)

615
Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

616
617 **IV.A.4. structured educational activities beyond direct patient care; and,**
618 **(Core)**

619
Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which

fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

620
621
622
623
624
625

IV.A.5. advancement of fellows' knowledge of ethical principles foundational to medical professionalism. ^(Core)

IV.B. ACGME Competencies

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

642
643
644
645
646
647

IV.B.1. The program must integrate the following ACGME Competencies into the curriculum: ^(Core)

IV.B.1.a) Professionalism

Fellows must demonstrate a commitment to professionalism and an adherence to ethical principles. ^(Core)

IV.B.1.a).(1) ~~Fellows must demonstrate the ability to recognize the causes and prevention of security breaches and their consequences to the individual, the system, the organization, and society at large.~~ ^(Outcome) [Moved from IV.A.5.e).(4).(a)]

IV.B.1.a).(2) ~~sensitivity to the impact information system changes have on practice patterns, and on physician-patient relations and physician work-life balance.~~ ^(Outcome) [Moved from IV.A.5.e).(6)]

IV.B.1.b) Patient Care and Procedural Skills

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality*. *Health Affairs*. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

648

- 787
- 788 IV.B.1.c).(1).(k) risk management and mitigation related to patient
789 safety and privacy. ~~(Core)(Outcome)~~ [Moved from
790 IV.A.5.b).(11)]
- 791

IV.B.1.d)

Practice-based Learning and Improvement

Fellows must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. ^(Core)

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and

evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

799		
800	IV.B.1.e)	Interpersonal and Communication Skills
801		
802		Fellows must demonstrate interpersonal and communication
803		skills that result in the effective exchange of information and
804		collaboration with patients, their families, and health
805		professionals. ^(Core)
806		
807	IV.B.1.e).(1)	Fellows must demonstrate the ability to serve as a liaison
808		among IT professionals, administrators, and clinicians.
809		^(Outcome) [Moved from IV.A.5.d).(2).(a)]
810		
811	IV.B.1.f)	Systems-based Practice
812		
813		Fellows must demonstrate an awareness of and
814		responsiveness to the larger context and system of health
815		care, including the social determinants of health, as well as
816		the ability to call effectively on other resources to provide
817		optimal health care. ^(Core)
818		
819	IV.B.1.f).(1)	Each fellow must demonstrate the ability to recognize
820		one's own role and the role of systems in prevention and
821		disclosure of medical error. ^(Outcome) [Moved from
822		IV.A.5.f).(6).(a)]
823		
824	IV.B.1.f).(2)	identify, evaluate, and implement systems improvement
825		based on clinical practice or patient and family satisfaction
826		data in personal practice, in team practice, and within
827		institutional settings. ^(Outcome) [Moved from IV.A.5.f).(7)]
828		
829	IV.B.1.f).(3)	demonstrate knowledge of the various settings and related
830		structures for organizing, regulating, and financing care for
831		patients. ^(Outcome) [Moved from IV.A.5.f).(8)]
832		
833	IV.B.1.f).(4)	analyze the impact of business strategies on health
834		information technology. ^(Outcome) [Moved from IV.A.5.f).(9)]
835		
836	IV.B.1.f).(5)	analyze patient care workflow and processes. ^(Outcome)
837		[Moved from IV.A.5.f).(10)]
838		
839	IV.B.1.f).(6)	identify information system features that will support
840		improved quality, efficiency, effectiveness, and safety of
841		clinical services. ^(Outcome) [Moved from IV.A.5.f).(11)]
842		
843	IV.B.1.f).(7)	identify potential unintended consequences of new system

844 and process implementation, as well as changes to
 845 existing systems and processes; ^(Outcome) [Moved from
 846 IV.A.5.f).(12)]

946 nurses, other health care professionals, administrators,
947 and information technology/system personnel. ^(Detail)
948 [Moved from IV.A.6.g).(1).(b)]
949

950 IV.C.11. During the educational program, fellows should maintain their primary
951 specialty certification. ^(Detail) [Moved from IV.A.6.h)]
952

953 **IV.D. Scholarship**

954
955 ***Medicine is both an art and a science. The physician is a humanistic***
956 ***scientist who cares for patients. This requires the ability to think critically,***
957 ***evaluate the literature, appropriately assimilate new knowledge, and***
958 ***practice lifelong learning. The program and faculty must create an***
959 ***environment that fosters the acquisition of such skills through fellow***
960 ***participation in scholarly activities as defined in the subspecialty-specific***
961 ***Program Requirements. Scholarly activities may include discovery,***
962 ***integration, application, and teaching.***
963

964 ***The ACGME recognizes the diversity of fellowships and anticipates that***
965 ***programs prepare physicians for a variety of roles, including clinicians,***
966 ***scientists, and educators. It is expected that the program’s scholarship will***
967 ***reflect its mission(s) and aims, and the needs of the community it serves.***
968 ***For example, some programs may concentrate their scholarly activity on***
969 ***quality improvement, population health, and/or teaching, while other***
970 ***programs might choose to utilize more classic forms of biomedical***
971 ***research as the focus for scholarship.***
972

973 **IV.D.1. Program Responsibilities**

974
975 **IV.D.1.a) The program must demonstrate evidence of scholarly**
976 **activities, consistent with its mission(s) and aims. ^(Core)**
977

978 **IV.D.1.b) The program in partnership with its Sponsoring Institution,**
979 **must allocate adequate resources to facilitate fellow and**
980 **faculty involvement in scholarly activities. ^(Core)**
981

982 **IV.D.2. Faculty Scholarly Activity**

983
984 **IV.D.2.a) Among their scholarly activity, programs must demonstrate**
985 **accomplishments in at least three of the following domains:**
986 **^(Core)**
987

- 988 • **Research in basic science, education, translational**
- 989 **science, patient care, or population health**
- 990 • **Peer-reviewed grants**
- 991 • **Quality improvement and/or patient safety initiatives**
- 992 • **Systematic reviews, meta-analyses, review articles,**
- 993 **chapters in medical textbooks, or case reports**

- 994 • Creation of curricula, evaluation tools, didactic
- 995 educational activities, or electronic educational
- 996 materials
- 997 • Contribution to professional committees, educational
- 998 organizations, or editorial boards
- 999 • Innovations in education

1000
 1001 **IV.D.2.b)** The program must demonstrate dissemination of scholarly
 1002 activity within and external to the program by the following
 1003 methods:
 1004

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the fellows’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

1005
 1006 **IV.D.2.b).(1)** faculty participation in grand rounds, posters,
 1007 workshops, quality improvement presentations,
 1008 podium presentations, grant leadership, non-peer-
 1009 reviewed print/electronic resources, articles or
 1010 publications, book chapters, textbooks, webinars,
 1011 service on professional committees, or serving as a
 1012 journal reviewer, journal editorial board member, or
 1013 editor; ^{(Outcome)‡}

1014
 1015 **IV.D.2.b).(2)** peer-reviewed publication. ^(Outcome)
 1016

1017 **IV.D.3. Fellow Scholarly Activity**

1018
 1019 **IV.D.3.a)** Scholarly activity should include at least one of the following:
 1020 [Moved from IV.B.2.a)]

1021
 1022 **IV.D.3.a).(1)** peer-reviewed funding and research; ^(Detail) [Moved from
 1023 IV.B.2.a).(1)]

1024
 1025 **IV.D.3.a).(2)** publication of original research or review articles; or, ^(Detail)
 1026 [Moved from IV.B.2.a).(2)]

1027
 1028 **IV.D.3.a).(3)** presentations at local, regional, or national professional
 1029 and scientific society meetings. ^(Detail) [Moved from
 1030 IV.B.2.a).(3)]

1031
 1032 **IV.E.** [The Review Committees’ proposal to allow the independent practice option will
 1033 be included in the focused revision and is subject to public comment to permit

1034 interested parties to comment. If approved, this requirement will be effective July
1035 1, 2020.]

1036
1037 **V. Evaluation**

1038
1039 **V.A. Fellow Evaluation**

1040
1041 **V.A.1. Feedback and Evaluation**

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- fellows identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

1043
1044 **V.A.1.a) Faculty members must directly observe, evaluate, and**
1045 **frequently provide feedback on fellow performance during**
1046 **each rotation or similar educational assignment. (Core)**
1047

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

1048
1049 **V.A.1.b) Evaluation must be documented at the completion of the**
1050 **assignment. (Core)**

- 1051
1052 **V.A.1.b).(1)** **For block rotations of greater than three months in**
1053 **duration, evaluation must be documented at least**
1054 **every three months.** ^(Core)
1055
1056 **V.A.1.b).(2)** **Longitudinal experiences such as continuity clinic in**
1057 **the context of other clinical responsibilities must be**
1058 **evaluated at least every three months and at**
1059 **completion.** ^(Core)
1060
1061 **V.A.1.c)** **The program must provide an objective performance**
1062 **evaluation based on the Competencies and the subspecialty-**
1063 **specific Milestones, and must:** ^(Core)
1064
1065 **V.A.1.c).(1)** **use multiple evaluators (e.g., faculty members, peers,**
1066 **patients, self, and other professional staff members);**
1067 **and,** ^(Core)
1068
1069 **V.A.1.c).(2)** **provide that information to the Clinical Competency**
1070 **Committee for its synthesis of progressive fellow**
1071 **performance and improvement toward unsupervised**
1072 **practice.** ^(Core)
1073

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

- 1074
1075 **V.A.1.d)** **The program director or their designee, with input from the**
1076 **Clinical Competency Committee, must:**
1077
1078 **V.A.1.d).(1)** **meet with and review with each fellow their**
1079 **documented semi-annual evaluation of performance,**
1080 **including progress along the subspecialty-specific**
1081 **Milestones.** ^(Core)
1082
1083 **V.A.1.d).(1).(a)** **The semiannual evaluation should include review of**
1084 **an individualized learning e-portfolio, which may**
1085 **include IT applications used, projects participated**
1086 **in, presentations given, team/committee work,**
1087 **courses taken, externships, or other educational**
1088 **products.** ^(Detail) **[Moved from V.A.2.b).(4).(a)]**
1089

- 1090 V.A.1.d).(2) assist fellows in developing individualized learning
 1091 plans to capitalize on their strengths and identify areas
 1092 for growth; and, (Core)
 1093
 1094 V.A.1.d).(3) develop plans for fellows failing to progress, following
 1095 institutional policies and procedures. (Core)
 1096

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

- 1097
 1098 V.A.1.e) At least annually, there must be a summative evaluation of
 1099 each fellow that includes their readiness to progress to the
 1100 next year of the program, if applicable. (Core)
 1101
 1102 V.A.1.f) The evaluations of a fellow's performance must be accessible
 1103 for review by the fellow. (Core)
 1104
 1105 V.A.2. Final Evaluation
 1106
 1107 V.A.2.a) The program director must provide a final evaluation for each
 1108 fellow upon completion of the program. (Core)
 1109
 1110 V.A.2.a).(1) The subspecialty-specific Milestones, and when
 1111 applicable the subspecialty-specific Case Logs, must
 1112 be used as tools to ensure fellows are able to engage
 1113 in autonomous practice upon completion of the
 1114 program. (Core)
 1115
 1116 V.A.2.a).(2) The final evaluation must:
 1117
 1118 V.A.2.a).(2).(a) become part of the fellow's permanent record
 1119 maintained by the institution, and must be
 1120 accessible for review by the fellow in
 1121 accordance with institutional policy; (Core)
 1122

- 1123 V.A.2.a).(2).(b) verify that the fellow has demonstrated the
 1124 knowledge, skills, and behaviors necessary to
 1125 enter autonomous practice; ^(Core)
 1126
- 1127 V.A.2.a).(2).(c) consider recommendations from the Clinical
 1128 Competency Committee; and, ^(Core)
 1129
- 1130 V.A.2.a).(2).(d) be shared with the fellow upon completion of
 1131 the program. ^(Core)
 1132
- 1133 V.A.3. A Clinical Competency Committee must be appointed by the
 1134 program director. ^(Core)
 1135
- 1136 V.A.3.a) At a minimum the Clinical Competency Committee must
 1137 include three members, at least one of whom is a core faculty
 1138 member. Members must be faculty members from the same
 1139 program or other programs, or other health professionals
 1140 who have extensive contact and experience with the
 1141 program's fellows. ^(Core)
 1142
- 1143 V.A.3.b) The Clinical Competency Committee must:
 1144
- 1145 V.A.3.b).(1) review all fellow evaluations at least semi-annually;
 1146 ^(Core)
 1147
- 1148 V.A.3.b).(2) determine each fellow's progress on achievement of
 1149 the subspecialty-specific Milestones; and, ^(Core)
 1150
- 1151 V.A.3.b).(3) meet prior to the fellows' semi-annual evaluations and
 1152 advise the program director regarding each fellow's
 1153 progress. ^(Core)
 1154
- 1155 V.B. Faculty Evaluation
 1156
- 1157 V.B.1. The program must have a process to evaluate each faculty
 1158 member's performance as it relates to the educational program at
 1159 least annually. ^(Core)
 1160

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should

have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 1161
1162 **V.B.1.a)** This evaluation must include a review of the faculty member's
1163 clinical teaching abilities, engagement with the educational
1164 program, participation in faculty development related to their
1165 skills as an educator, clinical performance, professionalism,
1166 and scholarly activities. (Core)
1167
1168 **V.B.1.b)** This evaluation must include written, confidential evaluations
1169 by the fellows. (Core)
1170
1171 **V.B.2.** Faculty members must receive feedback on their evaluations at least
1172 annually. (Core)
1173
1174 **V.B.3.** Results of the faculty educational evaluations should be
1175 incorporated into program-wide faculty development plans. (Core)
1176

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

- 1177
1178 **V.C. Program Evaluation and Improvement**
1179
1180 **V.C.1.** The program director must appoint the Program Evaluation
1181 Committee to conduct and document the Annual Program
1182 Evaluation as part of the program's continuous improvement
1183 process. (Core)
1184
1185 **V.C.1.a)** The Program Evaluation Committee must be composed of at
1186 least two program faculty members, at least one of whom is a
1187 core faculty member, and at least one fellow. (Core)
1188
1189 **V.C.1.b)** Program Evaluation Committee responsibilities must include:
1190
1191 **V.C.1.b).(1)** acting as an advisor to the program director, through
1192 program oversight; (Core)
1193
1194 **V.C.1.b).(2)** review of the program's self-determined goals and
1195 progress toward meeting them; (Core)
1196
1197 **V.C.1.b).(3)** guiding ongoing program improvement, including
1198 development of new goals, based upon outcomes;
1199 and, (Core)

1200
1201 **V.C.1.b).(4)** review of the current operating environment to identify
1202 strengths, challenges, opportunities, and threats as
1203 related to the program’s mission and aims. ^(Core)
1204

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program’s progress toward achievement of its goals and aims.

1205
1206 **V.C.1.c)** The Program Evaluation Committee should consider the
1207 following elements in its assessment of the program:
1208
1209 **V.C.1.c).(1)** curriculum; ^(Core)
1210
1211 **V.C.1.c).(2)** outcomes from prior Annual Program Evaluation(s);
1212 ^(Core)
1213
1214 **V.C.1.c).(3)** ACGME letters of notification, including citations,
1215 Areas for Improvement, and comments; ^(Core)
1216
1217 **V.C.1.c).(4)** quality and safety of patient care; ^(Core)
1218
1219 **V.C.1.c).(5)** aggregate fellow and faculty:
1220
1221 **V.C.1.c).(5).(a)** well-being; ^(Core)
1222
1223 **V.C.1.c).(5).(b)** recruitment and retention; ^(Core)
1224
1225 **V.C.1.c).(5).(c)** workforce diversity; ^(Core)
1226
1227 **V.C.1.c).(5).(d)** engagement in quality improvement and patient
1228 safety; ^(Core)
1229
1230 **V.C.1.c).(5).(e)** scholarly activity; ^(Core)
1231
1232 **V.C.1.c).(5).(f)** ACGME Resident/Fellow and Faculty Surveys
1233 (where applicable); and, ^(Core)
1234
1235 **V.C.1.c).(5).(g)** written evaluations of the program. ^(Core)
1236
1237 **V.C.1.c).(6)** aggregate fellow:
1238
1239 **V.C.1.c).(6).(a)** achievement of the Milestones; ^(Core)
1240
1241 **V.C.1.c).(6).(b)** in-training examinations (where applicable);
1242 ^(Core)
1243
1244 **V.C.1.c).(6).(c)** board pass and certification rates; and, ^(Core)

- 1245
 1246 V.C.1.c).(6).(d) graduate performance. (Core)
 1247
 1248 V.C.1.c).(7) aggregate faculty:
 1249
 1250 V.C.1.c).(7).(a) evaluation; and, (Core)
 1251
 1252 V.C.1.c).(7).(b) professional development (Core)
 1253
 1254 V.C.1.d) The Program Evaluation Committee must evaluate the
 1255 program's mission and aims, strengths, areas for
 1256 improvement, and threats. (Core)
 1257
 1258 V.C.1.e) The annual review, including the action plan, must:
 1259
 1260 V.C.1.e).(1) be distributed to and discussed with the members of
 1261 the teaching faculty and the fellows; and, (Core)
 1262
 1263 V.C.1.e).(2) be submitted to the DIO. (Core)
 1264
 1265 V.C.2. The program must participate in a Self-Study prior to its 10-Year
 1266 Accreditation Site Visit. (Core)
 1267
 1268 V.C.2.a) A summary of the Self-Study must be submitted to the DIO.
 1269 (Core)
 1270

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

- 1271
 1272 V.C.3. *One goal of ACGME-accredited education is to educate physicians*
 1273 *who seek and achieve board certification. One measure of the*
 1274 *effectiveness of the educational program is the ultimate pass rate.*
 1275
 1276 *The program director should encourage all eligible program*
 1277 *graduates to take the certifying examination offered by the*
 1278 *applicable American Board of Medical Specialties (ABMS) member*
 1279 *board or American Osteopathic Association (AOA) certifying board.*
 1280
 1281 V.C.3.a) For subspecialties in which the ABMS member board and/or
 1282 AOA certifying board offer(s) an annual written exam, in the
 1283 preceding three years, the program's aggregate pass rate of
 1284 those taking the examination for the first time must be higher

- 1285 than the bottom fifth percentile of programs in that
 1286 subspecialty. ^(Outcome)
 1287
 1288 **V.C.3.b)** For subspecialties in which the ABMS member board and/or
 1289 AOA certifying board offer(s) a biennial written exam, in the
 1290 preceding six years, the program’s aggregate pass rate of
 1291 those taking the examination for the first time must be higher
 1292 than the bottom fifth percentile of programs in that
 1293 subspecialty. ^(Outcome)
 1294
 1295 **V.C.3.c)** For subspecialties in which the ABMS member board and/or
 1296 AOA certifying board offer(s) an annual oral exam, in the
 1297 preceding three years, the program’s aggregate pass rate of
 1298 those taking the examination for the first time must be higher
 1299 than the bottom fifth percentile of programs in that
 1300 subspecialty. ^(Outcome)
 1301
 1302 **V.C.3.d)** For subspecialties in which the ABMS member board and/or
 1303 AOA certifying board offer(s) a biennial oral exam, in the
 1304 preceding six years, the program’s aggregate pass rate of
 1305 those taking the examination for the first time must be higher
 1306 than the bottom fifth percentile of programs in that
 1307 subspecialty. ^(Outcome)
 1308
 1309 **V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program
 1310 whose graduates over the time period specified in the
 1311 requirement have achieved an 80 percent pass rate will have
 1312 met this requirement, no matter the percentile rank of the
 1313 program for pass rate in that subspecialty. ^(Outcome)
 1314

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

- 1315
 1316 **V.C.3.f)** Programs must report, in ADS, board certification status
 1317 annually for the cohort of board-eligible fellows that
 1318 graduated seven years earlier. ^(Core)
 1319

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME

will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

VI. The Learning and Working Environment

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

- *Excellence in the safety and quality of care rendered to patients by fellows today*
- *Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice*
- *Excellence in professionalism through faculty modeling of:*
 - *the effacement of self-interest in a humanistic environment that supports the professional development of physicians*
 - *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
- *Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team*

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and

fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating fellows will apply these skills to critique their future unsupervised practice and effect quality improvement measures.

It is necessary for fellows and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.

VI.A.1.a) Patient Safety

VI.A.1.a).(1) Culture of Safety

A culture of safety requires continuous identification of vulnerabilities and a willingness to transparently deal with them. An effective organization has formal mechanisms to assess the knowledge, skills, and attitudes of its personnel toward safety in order to identify areas for improvement.

VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows must actively participate in patient safety systems and contribute to a culture of safety. (Core)

VI.A.1.a).(1).(b) The program must have a structure that promotes safe, interprofessional, team-based care. (Core)

VI.A.1.a).(2) Education on Patient Safety

1389
1390
1391
1392

Programs must provide formal educational activities that promote patient safety-related goals, tools, and techniques. ^(Core)

Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.

1434
1435
1436

VI.A.1.a).(3)

Patient Safety Events

Reporting, investigation, and follow-up of adverse events, near misses, and unsafe conditions are pivotal mechanisms for improving patient safety, and are essential for the success of any patient safety program. Feedback and experiential learning are essential to developing true competence in the ability to identify causes and institute sustainable systems-based changes to ameliorate patient safety vulnerabilities.

VI.A.1.a).(3).(a)

Residents, fellows, faculty members, and other clinical staff members must:

VI.A.1.a).(3).(a).(i)

know their responsibilities in reporting patient safety events at the clinical site; ^(Core)

VI.A.1.a).(3).(a).(ii)

know how to report patient safety events, including near misses, at the clinical site; and, ^(Core)

VI.A.1.a).(3).(a).(iii)

be provided with summary information of their institution's patient safety reports. ^(Core)

VI.A.1.a).(3).(b)

Fellows must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions. ^(Core)

VI.A.1.a).(4)

Fellow Education and Experience in Disclosure of Adverse Events

Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for fellows to develop and apply.

1437	VI.A.1.a).(4).(a)	All fellows must receive training in how to disclose adverse events to patients and families. ^(Core)
1438

1504
1505 **VI.A.2.a).(1).(a)** **This information must be available to fellows,**
1506 **faculty members, other members of the health**
1507 **care team, and patients. (Core)**

1508
1509 **VI.A.2.a).(1).(b)** **Fellows and faculty members must inform each**
1510 **patient of their respective roles in that patient's**
1511 **care when providing direct patient care. (Core)**

1512
1513 **VI.A.2.b)** **Supervision may be exercised through a variety of methods.**
1514 **For many aspects of patient care, the supervising physician**
1515 **may be a more advanced fellow. Other portions of care**
1516 **provided by the fellow can be adequately supervised by the**
1517 **immediate availability of the supervising faculty member or**
1518 **fellow, either on site or by means of telephonic and/or**
1519 **electronic modalities. Some activities require the physical**
1520 **presence of the supervising faculty member. In some**
1521 **circumstances, supervision may include post-hoc review of**
1522 **fellow-delivered care with feedback.**

1523
1524 **VI.A.2.b).(1)** **The program must demonstrate that the appropriate**
1525 **level of supervision in place for all fellows is based on**
1526 **each fellow's level of training and ability, as well as**
1527 **patient complexity and acuity. Supervision may be**
1528 **exercised through a variety of methods, as appropriate**
1529 **to the situation. (Core)**

1530
1531 **VI.A.2.c)** **Levels of Supervision**

1532
1533 **To promote oversight of fellow supervision while providing**
1534 **for graded authority and responsibility, the program must use**
1535 **the following classification of supervision: (Core)**

1536
1537 **VI.A.2.c).(1)** **Direct Supervision – the supervising physician is**
1538 **physically present with the fellow and patient. (Core)**

1539		
1540	VI.A.2.c).(2)	Indirect Supervision:
1541		
1542	VI.A.2.c).(2).(a)	with Direct Supervision immediately available –
1543		the supervising physician is physically within
1544		the hospital or other site of patient care, and is
1545		immediately available to provide Direct
1546		Supervision. ^(Core)
1547		
1548	VI.A.2.c).(2).(b)	with Direct Supervision available – the
1549		supervising physician is not physically present
1550		within the hospital or other site of patient care,
1551		but is immediately available by means of
1552		telephonic and/or electronic modalities, and is
1553		available to provide Direct Supervision. ^(Core)
1554		
1555	VI.A.2.c).(3)	Oversight – the supervising physician is available to
1556		provide review of procedures/encounters with
1557		feedback provided after care is delivered. ^(Core)
1558		
1559	VI.A.2.d)	The privilege of progressive authority and responsibility,
1560		conditional independence, and a supervisory role in patient
1561		care delegated to each fellow must be assigned by the
1562		program director and faculty members. ^(Core)
1563		
1564	VI.A.2.d).(1)	The program director must evaluate each fellow’s
1565		abilities based on specific criteria, guided by the
1566		Milestones. ^(Core)
1567		
1568	VI.A.2.d).(2)	Faculty members functioning as supervising
1569		physicians must delegate portions of care to fellows
1570		based on the needs of the patient and the skills of
1571		each fellow. ^(Core)
1572		
1573	VI.A.2.d).(3)	Fellows should serve in a supervisory role to junior
1574		fellows and residents in recognition of their progress
1575		toward independence, based on the needs of each
1576		patient and the skills of the individual resident or
1577		fellow. ^(Detail)
1578		
1579	VI.A.2.e)	Programs must set guidelines for circumstances and events
1580		in which fellows must communicate with the supervising
1581		faculty member(s). ^(Core)
1582		
1583	VI.A.2.e).(1)	Each fellow must know the limits of their scope of
1584		authority, and the circumstances under which the
1585		fellow is permitted to act with conditional
1586		independence. ^(Outcome)
1587		

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

1610

VI.A.2.f) Faculty supervision assignments must be of sufficient duration to assess the knowledge and skills of each fellow and to delegate to the fellow the appropriate level of patient care authority and responsibility. (Core)

VI.B. Professionalism

VI.B.1. Programs, in partnership with their Sponsoring Institutions, must educate fellows and faculty members concerning the professional responsibilities of physicians, including their obligation to be appropriately rested and fit to provide the care required by their patients. (Core)

VI.B.2. The learning objectives of the program must:

VI.B.2.a) be accomplished through an appropriate blend of supervised patient care responsibilities, clinical teaching, and didactic educational events; (Core)

VI.B.2.b) be accomplished without excessive reliance on fellows to fulfill non-physician obligations; and, (Core)

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1611
1612
1613

VI.B.2.c) ensure manageable patient care responsibilities. (Core)

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1614
1615
1616
1617

VI.B.3. The program director, in partnership with the Sponsoring Institution, must provide a culture of professionalism that supports patient safety and personal responsibility. (Core)

 1625 **including the ability to report unsafe conditions and adverse**
 1626 **events;** (Outcome)
 1627

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

- 1628
 1629 **VI.B.4.c)** **assurance of their fitness for work, including:** (Outcome)
 1630

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

- 1631
 1632 **VI.B.4.c).(1)** **management of their time before, during, and after**
 1633 **clinical assignments; and,** (Outcome)
 1634
 1635 **VI.B.4.c).(2)** **recognition of impairment, including from illness,**
 1636 **fatigue, and substance use, in themselves, their peers,**
 1637 **and other members of the health care team.** (Outcome)
 1638
 1639 **VI.B.4.d)** **commitment to lifelong learning;** (Outcome)
 1640
 1641 **VI.B.4.e)** **monitoring of their patient care performance improvement**
 1642 **indicators; and,** (Outcome)
 1643
 1644 **VI.B.4.f)** **accurate reporting of clinical and educational work hours,**
 1645 **patient outcomes, and clinical experience data.** (Outcome)
 1646
 1647 **VI.B.5.** **All fellows and faculty members must demonstrate responsiveness**
 1648 **to patient needs that supersedes self-interest. This includes the**
 1649 **recognition that under certain circumstances, the best interests of**
 1650 **the patient may be served by transitioning that patient's care to**
 1651 **another qualified and rested provider.** (Outcome)
 1652
 1653 **VI.B.6.** **Programs, in partnership with their Sponsoring Institutions, must**
 1654 **provide a professional, equitable, respectful, and civil environment**
 1655 **that is free from discrimination, sexual and other forms of**
 1656 **harassment, mistreatment, abuse, or coercion of students, fellows,**
 1657 **faculty, and staff.** (Core)
 1658

1659 VI.B.7. Programs, in partnership with their Sponsoring Institutions, should
1660 have a process for education of fellows and faculty regarding
1661 unprofessional behavior and a confidential process for reporting,
1662 investigating, and addressing such concerns. ^(Core)
1663

1664 VI.C. Well-Being
1665

1666 *Psychological, emotional, and physical well-being are critical in the*
1667 *development of the competent, caring, and resilient physician and require*

1683 *fellows with the skills and attitudes needed to thrive throughout their*
1684 *careers.*
1685

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

1686
1687 VI.C.1. The responsibility of the program, in partnership with the
1688 Sponsoring Institution, to address well-being must include:
1689

1690 VI.C.1.a) efforts to enhance the meaning that each fellow finds in the
1691 experience of being a physician, including protecting time
1692 with patients, minimizing non-physician obligations,
1693 providing administrative support, promoting progressive
1694 autonomy and flexibility, and enhancing professional
1695 relationships; ^(Core)

- 1696
1697 VI.C.1.b) attention to scheduling, work intensity, and work
1698 compression that impacts fellow well-being; (Core)
1699
1700 VI.C.1.c) evaluating workplace safety data and addressing the safety of
1701 fellows and faculty members; (Core)
1702

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

- 1703
1704 VI.C.1.d) policies and programs that encourage optimal fellow and
1705 faculty member well-being; and, (Core)
1706

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

- 1707
1708 VI.C.1.d).(1) Fellows must be given the opportunity to attend
1709 medical, mental health, and dental care appointments,
1710 including those scheduled during their working hours.
1711 (Core)
1712

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

- 1713
1714 VI.C.1.e) attention to fellow and faculty member burnout, depression,
1715 and substance abuse. The program, in partnership with its
1716 Sponsoring Institution, must educate faculty members and
1717 fellows in identification of the symptoms of burnout,
1718 depression, and substance abuse, including means to assist
1719 those who experience these conditions. Fellows and faculty
1720 members must also be educated to recognize those
1721 symptoms in themselves and how to seek appropriate care.
1722 The program, in partnership with its Sponsoring Institution,
1723 must: (Core)
1724

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance abuse. Materials and more information are available on the Physician Well-being section of the ACGME website (<http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being>).

1725

1726 VI.C.1.e).(1) encourage fellows and faculty members to alert the
1727 program director or other designated personnel or
1728 programs when they are concerned that another
1729 fellow, resident, or faculty member may be displaying
1730 signs of burnout, depression, substance abuse,
1731 suicidal ideation, or potential for violence; (Core)
1732

Background and Intent: Individuals experiencing burnout, depression, substance abuse, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

1733
1734 VI.C.1.e).(2) provide access to appropriate tools for self-screening;
1735 and, (Core)
1736

1737 VI.C.1.e).(3) provide access to confidential, affordable mental
1738 health assessment, counseling, and treatment,
1739 including access to urgent and emergent care 24
1740 hours a day, seven days a week. (Core)
1741

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

1742
1743 VI.C.2. There are circumstances in which fellows may be unable to attend
1744 work, including but not limited to fatigue, illness, family
1745 emergencies, and parental leave. Each program must allow an
1746 appropriate length of absence for fellows unable to perform their
1747 patient care responsibilities. (Core)
1748

1749 VI.C.2.a) The program must have policies and procedures in place to
1750 ensure coverage of patient care. (Core)
1751

1752 VI.C.2.b) These policies must be implemented without fear of negative
1753 consequences for the fellow who is or was unable to provide
1754 the clinical work. ^(Core)
1755

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

1756
1757 VI.D. Fatigue Mitigation
1758

1759 VI.D.1. Programs must:

1760
1761 VI.D.1.a) educate all faculty members and fellows to recognize the
1762 signs of fatigue and sleep deprivation; ^(Core)
1763

1764 VI.D.1.b) educate all faculty members and fellows in alertness
1765 management and fatigue mitigation processes; and, ^(Core)
1766

1767 VI.D.1.c) encourage fellows to use fatigue mitigation processes to
1768 manage the potential negative effects of fatigue on patient
1769 care and learning. ^(Detail)
1770

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

1771
1772 VI.D.2. Each program must ensure continuity of patient care, consistent
1773 with the program's policies and procedures referenced in VI.C.2–
1774 VI.C.2.b), in the event that a fellow may be unable to perform their
1775 patient care responsibilities due to excessive fatigue. ^(Core)
1776

1777 VI.D.3. The program, in partnership with its Sponsoring Institution, must
1778 ensure adequate sleep facilities and safe transportation options for
1779 fellows who may be too fatigued to safely return home. ^(Core)
1780

1781 VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care

1782
1783 VI.E.1. Clinical Responsibilities

1784
1785
1786
1787
1788

The clinical responsibilities for each fellow must be based on PGY level, patient safety, fellow ability, severity and complexity of patient illness/condition, and available support services. ^(Core)

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

VI.E.2. Teamwork

Fellows must care for patients in an environment that maximizes communication. This must include the opportunity to work as a member of effective interprofessional teams that are appropriate to the delivery of care in the subspecialty and larger health system. ^(Core)

VI.E.3. Transitions of Care

VI.E.3.a) Programs must design clinical assignments to optimize transitions in patient care, including their safety, frequency, and structure. ^(Core)

VI.E.3.b) Programs, in partnership with their Sponsoring Institutions, must ensure and monitor effective, structured hand-over processes to facilitate both continuity of care and patient safety. ^(Core)

VI.E.3.c) Programs must ensure that fellows are competent in communicating with team members in the hand-over process. ^(Outcome)

VI.E.3.d) Programs and clinical sites must maintain and communicate schedules of attending physicians and fellows currently responsible for care. ^(Core)

VI.E.3.e) Each program must ensure continuity of patient care, consistent with the program's policies and procedures referenced in VI.C.2-VI.C.2.b), in the event that a fellow may be unable to perform their patient care responsibilities due to excessive fatigue or illness, or family emergency. ^(Core)

VI.F. Clinical Experience and Education

Programs, in partnership with their Sponsoring Institutions, must design an effective program structure that is configured to provide fellows with

1827
1828
1829

educational and clinical experience opportunities, as well as reasonable opportunities for rest and personal activities.

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

1832
1833
1834
1835
1836
1837

VI.F.1. Maximum Hours of Clinical and Educational Work per Week

Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting. ^(Core)

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements

acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

VI.F.2. Mandatory Time Free of Clinical Work and Education

VI.F.2.a) The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. ^(Core)

VI.F.2.b) Fellows should have eight hours off between scheduled clinical work and education periods. ^(Detail)

VI.F.2.b).(1) There may be circumstances when fellows choose to stay to care for their patients or return to the hospital with fewer than eight hours free of clinical experience and education. This must occur within the context of the 80-hour and the one-day-off-in-seven requirements. ^(Detail)

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their

scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1856
1857
1858
1859

VI.F.2.c) Fellows must have at least 14 hours free of clinical work and education after 24 hours of in-house call. (Core)

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1860
1861
1862
1863
1864
1865

VI.F.2.d) Fellows must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. (Core)

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

VI.F.3. Maximum Clinical Work and Education Period Length

VI.F.3.a) Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical assignments. (Core)

VI.F.3.a).(1) Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or fellow education. (Core)

VI.F.3.a).(1).(a) Additional patient care responsibilities must not be assigned to a fellow during this time. (Core)

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a

member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

- VI.F.4. Clinical and Educational Work Hour Exceptions**
- VI.F.4.a) In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:**
- VI.F.4.a).(1) to continue to provide care to a single severely ill or unstable patient; ^(Detail)**
- VI.F.4.a).(2) humanistic attention to the needs of a patient or family; or, ^(Detail)**
- VI.F.4.a).(3) to attend unique educational events. ^(Detail)**
- VI.F.4.b) These additional hours of care or education will be counted toward the 80-hour weekly limit. ^(Detail)**

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

- VI.F.4.c) A Review Committee may grant rotation-specific exceptions for up to 10 percent or a maximum of 88 clinical and educational work hours to individual programs based on a sound educational rationale.**
- VI.F.4.c).(1) In preparing a request for an exception, the program director must follow the clinical and educational work hour exception policy from the *ACGME Manual of Policies and Procedures*. ^(Core)**
- VI.F.4.c).(2) Prior to submitting the request to the Review Committee, the program director must obtain approval from the Sponsoring Institution's GMEC and DIO. ^(Core)**

Background and Intent: The provision for exceptions for up to 88 hours per week has been modified to specify that exceptions may be granted for specific rotations if the program can justify the increase based on criteria specified by the Review Committee.

As in the past, Review Committees may opt not to permit exceptions. The underlying philosophy for this requirement is that while it is expected that all fellows should be able to train within an 80-hour work week, it is recognized that some programs may include rotations with alternate structures based on the nature of the specialty. DIO/GMEC approval is required before the request will be considered by the Review Committee.

- VI.F.7. Maximum In-House On-Call Frequency**
- Fellows must be scheduled for in-house call no more frequently than every third night (when averaged over a four-week period). (Core)**
- VI.F.8. At-Home Call**
- VI.F.8.a) Time spent on patient care activities by fellows on at-home call must count toward the 80-hour maximum weekly limit. The frequency of at-home call is not subject to the every-third-night limitation, but must satisfy the requirement for one day in seven free of clinical work and education, when averaged over four weeks. (Core)**
- VI.F.8.a).(1) At-home call must not be so frequent or taxing as to preclude rest or reasonable personal time for each fellow. (Core)**
- VI.F.8.b) Fellows are permitted to return to the hospital while on at-home call to provide direct care for new or established**

1954
1955
1956

patients. These hours of inpatient patient care must be included in the 80-hour maximum weekly limit. ^(Detail)

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
