VI.F. Clinical Experience and Education	46

1 **ACGME Program Requirements for Graduate Medical Education**
2 **in Child and Adolescent Psychiatry**

3
4 **Common Program Requirements (Fellowship) are in BOLD**

5
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.
9

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

10
11 **Introduction**

12
13 **Int.A.** *Fellowship is advanced graduate medical education beyond a core*
14 *residency program for physicians who desire to enter more specialized*
15 *practice. Fellowship-trained physicians serve the public by providing*
16 *subspecialty care, which may also include core medical care, acting as a*
17 *community resource for expertise in their field, creating and integrating*
18 *new knowledge into practice, and educating future generations of*
19 *physicians. Graduate medical education values the strength that a diverse*
20 *group of physicians brings to medical care.*

21
22 *Fellows who have completed residency are able to practice independently*
23 *in their core specialty. The prior medical experience and expertise of*
24 *fellows distinguish them from physicians entering into residency training.*
25 *The fellow's care of patients within the subspecialty is undertaken with*
26 *appropriate faculty supervision and conditional independence. Faculty*
27 *members serve as role models of excellence, compassion,*
28 *professionalism, and scholarship. The fellow develops deep medical*
29 *knowledge, patient care skills, and expertise applicable to their focused*
30 *area of practice. Fellowship is an intensive program of subspecialty clinical*
31 *and didactic education that focuses on the multidisciplinary care of*
32 *patients. Fellowship education is often physically, emotionally, and*
33 *intellectually demanding, and occurs in a variety of clinical learning*
34 *environments committed to graduate medical education and the well-being*
35 *of patients, residents, fellows, faculty members, students, and all members*
36 *of the health care team.*

37
38 *In addition to clinical education, many fellowship programs advance*
39 *fellows' skills as physician-scientists. While the ability to create new*
40 *knowledge within medicine is not exclusive to fellowship-educated*
41 *physicians, the fellowship experience expands a physician's abilities to*
42 *pursue hypothesis-driven scientific inquiry that results in contributions to*
43 *the medical literature and patient care. Beyond the clinical subspecialty*
44 *expertise achieved, fellows develop mentored relationships built on an*
45 *infrastructure that promotes collaborative research.*

46
47 **Int.B.** **Definition of Subspecialty**

48
49 Child and adolescent psychiatry is a medical specialty focused on the prevention,
50 diagnosis, and treatment of disorders of thinking, feeling, and behavior affecting
51 children, adolescents, and their families.

52
53 **Int.C. Length of Educational Program**

54
55 The educational program in child and adolescent psychiatry must be 24 months
56 in length. ^{(Core)*}

57
58 **I. Oversight**

59
60 **I.A. Sponsoring Institution**

61
62 *The Sponsoring Institution is the organization or entity that assumes the*
63 *ultimate financial and academic responsibility for a program of graduate*
64 *medical education consistent with the ACGME Institutional Requirements.*

65
66 *When the Sponsoring Institution is not a rotation site for the program, the*
67 *most commonly utilized site of clinical activity for the program is the*
68 *primary clinical site.*

69

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

70
71 **I.A.1. The program must be sponsored by one ACGME-accredited**
72 **Sponsoring Institution. ^(Core)**

73
74 **I.B. Participating Sites**
75
76 *A participating site is an organization providing educational experiences or*
77 *educational assignments/rotations for fellows.*

78
79 **I.B.1. The program, with approval of its Sponsoring Institution, must**
80 **designate a primary clinical site. ^(Core)**

81
82 **I.B.1.a) The Sponsoring Institution must also sponsor an Accreditation**
83 **Council for Graduate Medical Education (ACGME)-accredited**
84 **program in psychiatry. ^(Core)**

85
86 **I.B.2. There must be a program letter of agreement (PLA) between the**
87 **program and each participating site that governs the relationship**
88 **between the program and the participating site providing a required**
89 **assignment. ^(Core)**

- 90
- 91 **I.B.2.a) The PLA must:**
- 92
- 93 **I.B.2.a).(1) be renewed at least every 10 years; and, (Core)**
- 94
- 95 **I.B.2.a).(2) be approved by the designated institutional official**
- 96 **(DIO). (Core)**
- 97
- 98 **I.B.3. The program must monitor the clinical learning and working**
- 99 **environment at all participating sites. (Core)**
- 100
- 101 **I.B.3.a) At each participating site there must be one faculty member,**
- 102 **designated by the program director, who is accountable for**
- 103 **fellow education for that site, in collaboration with the**
- 104 **program director. (Core)**
- 105

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for fellows**
- Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows**
- Specifying the duration and content of the educational experience**
- Stating the policies and procedures that will govern fellow education during the assignment**

- 106
- 107 **I.B.4. The program director must submit any additions or deletions of**
- 108 **participating sites routinely providing an educational experience,**
- 109 **required for all fellows, of one month full time equivalent (FTE) or**
- 110 **more through the ACGME's Accreditation Data System (ADS). (Core)**
- 111
- 112 **I.B.4.a) The number of and distance between participating sites must**
- 113 **allow for full participation by the fellows in all organized**
- 114 **educational aspects of the program. (Core)**
- 115
- 116 **I.C. The program, in partnership with its Sponsoring Institution, must engage in**
- 117 **practices that focus on mission-driven, ongoing, systematic recruitment**
- 118 **and retention of a diverse and inclusive workforce of residents (if present),**

119
120
121

fellows, faculty members, senior administrative staff members, and other relevant members of its academic community. ^(Core)

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution’s mission and aims. The program’s annual evaluation must include an assessment of the program’s efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

147
148
149
150

I.D. Resources

I.D.1. The program, in partnership with its Sponsoring Institution, must ensure the availability of adequate resources for fellow education. ^(Core)

I.D.1.a) There must be office space available for each fellow to see patients. ^(Core)

I.D.1.b) There must be space for physical and neurological examinations and access to laboratory testing. ^(Core)

I.D.1.c) There must be equipment with the capacity for recording and viewing clinical encounters available to fellows. ^(Core)

I.D.1.d) There should be space and equipment specifically designated for seminars, lectures, and other educational activities. ^{(Detail)†}

I.D.2. The program, in partnership with its Sponsoring Institution, must ensure healthy and safe learning and working environments that promote fellow well-being and provide for: ^(Core)

I.D.2.a) access to food while on duty; ^(Core)

I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available and accessible for fellows with proximity appropriate for safe patient care; ^(Core)

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

151
152
153
154

I.D.2.c) clean and private facilities for lactation that have refrigeration capabilities, with proximity appropriate for safe patient care; ^(Core)

155

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

156

157 **I.D.2.d) security and safety measures appropriate to the participating**
158 **site; and, (Core)**

159
160 **I.D.2.e) accommodations for fellows with disabilities consistent with**
161 **the Sponsoring Institution's policy. (Core)**

162
163 **I.D.3. Fellows must have ready access to subspecialty-specific and other**
164 **appropriate reference material in print or electronic format. This**
165 **must include access to electronic medical literature databases with**
166 **full text capabilities. (Core)**

167
168 **I.D.4. The program's educational and clinical resources must be adequate**
169 **to support the number of fellows appointed to the program. (Core)**

170
171 **I.E. *A fellowship program usually occurs in the context of many learners and***
172 ***other care providers and limited clinical resources. It should be structured***
173 ***to optimize education for all learners present.***

174
175 **I.E.1. Fellows should contribute to the education of residents in core**
176 **programs, if present. (Core)**

177

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

178

179 **II. Personnel**

180

181 **II.A. Program Director**

182

183 **II.A.1. There must be one faculty member appointed as program director**
184 **with authority and accountability for the overall program, including**
185 **compliance with all applicable program requirements. (Core)**

186

187 **II.A.1.a) The Sponsoring Institution's Graduate Medical Education**
188 **Committee (GMEC) must approve a change in program**
189 **director. (Core)**

190

191 **II.A.1.b) Final approval of the program director resides with the**
192 **Review Committee.** (Core)
193

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual's responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director's nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

194
195 **II.A.2. The program director must be provided with support adequate for**
196 **administration of the program based upon its size and configuration.**
197 (Core)
198

199 **II.A.2.a) At a minimum, the program director must be provided with the**
200 **salary support required to devote 50 percent FTE of non-clinical**
201 **time to the administration of the program.** (Core) ~~The sponsoring~~
202 ~~institution must provide at least 50 percent salary support, and~~
203 ~~protected time of 50 percent FTE (at least 20 hours per week) for~~
204 ~~the program director dedicated to program administration.~~ (Core)
205

206 **II.A.2.b) Additional dedicated time and salary support must be provided for**
207 **the program director or for associate program directors based on**
208 **program size.** (Core) ~~Programs with an approved fellow complement~~
209 ~~of 20 or more require 30 hours per week effort and/or the~~
210 ~~appointment of an associate program director.~~ (Core)
211

Background and Intent: Fifty percent FTE is defined as two and one half days per week.

“Administrative time” is defined as non-clinical time spent meeting the responsibilities of the program director as detailed in requirements II.A.4.-II.A.4.a).(16).

The requirement does not address the source of funding required to provide the specified salary support.

212
213 **II.A.3. Qualifications of the program director:**
214

215 **II.A.3.a) must include subspecialty expertise and qualifications**
216 **acceptable to the Review Committee; and,** (Core)
217

218 **II.A.3.b) must include current certification in the subspecialty for**
219 **which they are the program director by the American Board**
220 **of Psychiatry and Neurology (ABPN) or by the American**
221 **Osteopathic Board of Neurology and Psychiatry, or**
222 **subspecialty qualifications that are acceptable to the Review**
223 **Committee.** (Core)
224

225 **II.A.4. Program Director Responsibilities**
226

227 The program director must have responsibility, authority, and
228 accountability for: administration and operations; teaching and
229 scholarly activity; fellow recruitment and selection, evaluation, and
230 promotion of fellows, and disciplinary action; supervision of fellows;
231 and fellow education in the context of patient care. ^(Core)
232

233 **II.A.4.a) The program director must:**

234 **II.A.4.a).(1) be a role model of professionalism;** ^(Core)
235
236

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

237
238 **II.A.4.a).(2) design and conduct the program in a fashion**
239 **consistent with the needs of the community, the**
240 **mission(s) of the Sponsoring Institution, and the**
241 **mission(s) of the program;** ^(Core)
242

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

243
244 **II.A.4.a).(3) administer and maintain a learning environment**
245 **conducive to educating the fellows in each of the**
246 **ACGME Competency domains;** ^(Core)
247

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

248
249 **II.A.4.a).(4) develop and oversee a process to evaluate candidates**
250 **prior to approval as program faculty members for**
251 **participation in the fellowship program education and**
252 **at least annually thereafter, as outlined in V.B.;** ^(Core)
253

254 **II.A.4.a).(5) have the authority to approve program faculty**
255 **members for participation in the fellowship program**
256 **education at all sites;** ^(Core)
257

- 258 II.A.4.a).(6) have the authority to remove program faculty
 259 members from participation in the fellowship program
 260 education at all sites; ^(Core)
 261
 262 II.A.4.a).(7) have the authority to remove fellows from supervising
 263 interactions and/or learning environments that do not
 264 meet the standards of the program; ^(Core)
 265

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

- 266
 267 II.A.4.a).(8) submit accurate and complete information required
 268 and requested by the DIO, GMEC, and ACGME; ^(Core)
 269
 270 II.A.4.a).(9) provide applicants who are offered an interview with
 271 information related to the applicant's eligibility for the
 272 relevant subspecialty board examination(s); ^(Core)
 273
 274 II.A.4.a).(10) provide a learning and working environment in which
 275 fellows have the opportunity to raise concerns and
 276 provide feedback in a confidential manner as
 277 appropriate, without fear of intimidation or retaliation;
 278 ^(Core)
 279
 280 II.A.4.a).(11) ensure the program's compliance with the Sponsoring
 281 Institution's policies and procedures related to
 282 grievances and due process; ^(Core)
 283
 284 II.A.4.a).(12) ensure the program's compliance with the Sponsoring
 285 Institution's policies and procedures for due process
 286 when action is taken to suspend or dismiss, not to
 287 promote, or not to renew the appointment of a fellow;
 288 ^(Core)
 289

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

- 290
 291 II.A.4.a).(13) ensure the program's compliance with the Sponsoring
 292 Institution's policies and procedures on employment
 293 and non-discrimination; ^(Core)
 294

- 295 II.A.4.a).(13).(a) Fellows must not be required to sign a non-
 296 competition guarantee or restrictive covenant.
 297 (Core)
 298
 299 II.A.4.a).(14) document verification of program completion for all
 300 graduating fellows within 30 days; (Core)
 301
 302 II.A.4.a).(15) provide verification of an individual fellow’s
 303 completion upon the fellow’s request, within 30 days;
 304 and, (Core)
 305

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

- 306
 307 II.A.4.a).(16) obtain review and approval of the Sponsoring
 308 Institution’s DIO before submitting information or
 309 requests to the ACGME, as required in the Institutional
 310 Requirements and outlined in the ACGME Program
 311 Director’s Guide to the Common Program
 312 Requirements. (Core)
 313

314 **II.B. Faculty**

Faculty members are a foundational element of graduate medical education – faculty members teach fellows how to care for patients. Faculty members provide an important bridge allowing fellows to grow and become practice ready, ensuring that patients receive the highest quality of care. They are role models for future generations of physicians by demonstrating compassion, commitment to excellence in teaching and patient care, professionalism, and a dedication to lifelong learning. Faculty members experience the pride and joy of fostering the growth and development of future colleagues. The care they provide is enhanced by the opportunity to teach. By employing a scholarly approach to patient care, faculty members, through the graduate medical education system, improve the health of the individual and the population.

Faculty members ensure that patients receive the level of care expected from a specialist in the field. They recognize and respond to the needs of the patients, fellows, community, and institution. Faculty members provide appropriate levels of supervision to promote patient safety. Faculty members create an effective learning environment by acting in a professional manner and attending to the well-being of the fellows and themselves.

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment or salary support.

337
338 **II.B.1.** For each participating site, there must be a sufficient number of
339 faculty members with competence to instruct and supervise all
340 fellows at that location. ^(Core)

341
342 **II.B.2.** Faculty members must:

343
344 **II.B.2.a)** be role models of professionalism; ^(Core)

345
346 **II.B.2.b)** demonstrate commitment to the delivery of safe, quality,
347 cost-effective, patient-centered care; ^(Core)

348

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

349
350 **II.B.2.c)** demonstrate a strong interest in the education of fellows; ^(Core)

351
352 **II.B.2.d)** devote sufficient time to the educational program to fulfill
353 their supervisory and teaching responsibilities; ^(Core)

354
355 **II.B.2.e)** administer and maintain an educational environment
356 conducive to educating fellows; ^(Core)

357
358 **II.B.2.f)** regularly participate in organized clinical discussions,
359 rounds, journal clubs, and conferences; and, ^(Core)

360
361 **II.B.2.g)** pursue faculty development designed to enhance their skills
362 at least annually. ^(Core)

363

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

364
365 **II.B.3.** Faculty Qualifications

366
367 **II.B.3.a)** Faculty members must have appropriate qualifications in
368 their field and hold appropriate institutional appointments.
369 ^(Core)

370
371 **II.B.3.b)** Subspecialty physician faculty members must:

372
373 **II.B.3.b).(1)** have current certification in the subspecialty by the
374 American Board of Psychiatry and Neurology or the
375 American Osteopathic Board of Neurology and

376 Psychiatry, or possess qualifications judged acceptable
377 to the Review Committee. ^(Core)

378
379 **II.B.3.c) Any non-physician faculty members who participate in**
380 **fellowship program education must be approved by the**
381 **program director. ^(Core)**
382

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

383
384 **II.B.3.d) Any other specialty physician faculty members must have**
385 **current certification in their specialty by the appropriate**
386 **American Board of Medical Specialties (ABMS) member**
387 **board or American Osteopathic Association (AOA) certifying**
388 **board, or possess qualifications judged acceptable to the**
389 **Review Committee. ^(Core)**

390
391 **II.B.4. Core Faculty**
392
393 **Core faculty members must have a significant role in the education**
394 **and supervision of fellows and must devote a significant portion of**
395 **their entire effort to fellow education and/or administration, and**
396 **must, as a component of their activities, teach, evaluate, and provide**
397 **formative feedback to fellows. ^(Core)**
398

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.

399
400 **II.B.4.a) Core faculty members must be designated by the program**
401 **director. ^(Core)**

402
403 **II.B.4.b) Core faculty members must complete the annual ACGME**
404 **Faculty Survey. ^(Core)**

405
406 **II.B.4.c) In addition to the program director, there must be two core faculty**
407 **members with current ABPN certification in child and adolescent**
408 **psychiatry. ^(Core)**

409
410 **II.C. Program Coordinator**

411
412 **II.C.1. There must be a program coordinator. ^(Core)**

413
414 **II.C.2. The program coordinator must be provided with support adequate**
415 **for administration of the program based upon its size and**
416 **configuration. ^(Core)**

417
418 **II.C.2.a) ~~There must be a designated program coordinator to support the~~**
419 **~~fellowship. ^(Core)~~**
420

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge of the ACGME and Program Requirements, policies, and procedures. Program coordinators assist the program director in accreditation efforts, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

421
422 **II.D. Other Program Personnel**

423
424 **The program, in partnership with its Sponsoring Institution, must jointly**
425 **ensure the availability of necessary personnel for the effective**
426 **administration of the program. ^(Core)**
427

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

**III.A.1.a) Fellowship programs must receive verification of each
entering fellow’s level of competence in the required field,
upon matriculation, using ACGME, ACGME-I, or CanMEDS
Milestones evaluations from the core residency program.** (Core)

III.A.1.b) To be eligible for appointment, applicants should have completed
the first year of a psychiatry residency program or a program in
another primary care specialty, and that program must satisfy the
requirements in III.A.1. (Core)

~~**III.A.1.b).(1)** Prior to appointment, applicants must demonstrate
sufficient command of English to permit accurate and
unimpeded communication.~~ (Core)

III.A.1.c) Fellow Eligibility Exception

**The Review Committee for Psychiatry will allow the following
exception to the fellowship eligibility requirements:**

III.A.1.c).(1) **An ACGME-accredited fellowship program may accept
an exceptionally qualified international graduate
applicant who does not satisfy the eligibility
requirements listed in III.A.1., but who does meet all of
the following additional qualifications and conditions:**
(Core)

III.A.1.c).(1).(a) **evaluation by the program director and
fellowship selection committee of the
applicant’s suitability to enter the program,
based on prior training and review of the
summative evaluations of training in the core
specialty; and,** (Core)

III.A.1.c).(1).(b) **review and approval of the applicant’s
exceptional qualifications by the GMEC; and,**
(Core)

III.A.1.c).(1).(c) **verification of Educational Commission for
Foreign Medical Graduates (ECFMG)
certification.** (Core)

III.A.1.c).(2) **Applicants accepted through this exception must have
an evaluation of their performance by the Clinical**

488
489
490

Competency Committee within 12 weeks of matriculation. ^(Core)

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

III.B. The program director must not appoint more fellows than approved by the Review Committee. ^(Core)

III.B.1. All complement increases must be approved by the Review Committee. ^(Core)

III.B.2. There should be at least two fellows appointed at each level of education at all times in the two-year FTE program. ^(Detail)

III.C. Fellow Transfers

The program must obtain verification of previous educational experiences and a summative competency-based performance evaluation prior to acceptance of a transferring fellow, and Milestones evaluations upon matriculation. ^(Core)

IV. Educational Program

The ACGME accreditation system is designed to encourage excellence and innovation in graduate medical education regardless of the organizational affiliation, size, or location of the program.

The educational program must support the development of knowledgeable, skillful physicians who provide compassionate care.

In addition, the program is expected to define its specific program aims consistent with the overall mission of its Sponsoring Institution, the needs of the community it serves and that its graduates will serve, and the distinctive capabilities of physicians it intends to graduate. While programs must demonstrate substantial compliance with the Common and subspecialty-specific Program Requirements, it is recognized that within this framework, programs may place different emphasis

523 *on research, leadership, public health, etc. It is expected that the program aims*
524 *will reflect the nuanced program-specific goals for it and its graduates; for*
525 *example, it is expected that a program aiming to prepare physician-scientists will*
526 *have a different curriculum from one focusing on community health.*

527
528 **IV.A. The curriculum must contain the following educational components:** ^(Core)

529
530 **IV.A.1. a set of program aims consistent with the Sponsoring Institution's**
531 **mission, the needs of the community it serves, and the desired**
532 **distinctive capabilities of its graduates;** ^(Core)

533
534 **IV.A.1.a) The program's aims must be made available to program**
535 **applicants, fellows, and faculty members.** ^(Core)

536
537 **IV.A.2. competency-based goals and objectives for each educational**
538 **experience designed to promote progress on a trajectory to**
539 **autonomous practice in their subspecialty. These must be**
540 **distributed, reviewed, and available to fellows and faculty members;**
541 ^(Core)

542
543 **IV.A.3. delineation of fellow responsibilities for patient care, progressive**
544 **responsibility for patient management, and graded supervision in**
545 **their subspecialty;** ^(Core)

546

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

547
548 **IV.A.4. structured educational activities beyond direct patient care; and,**
549 ^(Core)

550

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

551

552 **IV.A.5. advancement of fellows' knowledge of ethical principles**
553 **foundational to medical professionalism.** ^(Core)

554

555 **IV.B. ACGME Competencies**

556

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the

Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

557
558 **IV.B.1. The program must integrate the following ACGME Competencies**
559 **into the curriculum: (Core)**
560

561 **IV.B.1.a) Professionalism**
562
563 **Fellows must demonstrate a commitment to professionalism**
564 **and an adherence to ethical principles. (Core)**
565

566 **IV.B.1.b) Patient Care and Procedural Skills**
567

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs*. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

568
569 **IV.B.1.b).(1) Fellows must be able to provide patient care that is**
570 **compassionate, appropriate, and effective for the**
571 **treatment of health problems and the promotion of**
572 **health. (Core)**
573

574 **IV.B.1.b).(1).(a) Fellows must demonstrate competence in:**
575

576 **IV.B.1.b).(1).(a).(i) evaluation and treatment of patients**
577 **representing the full spectrum of psychiatric**
578 **illnesses in children and adolescents,**
579 **including developmental and substance use**
580 **disorders; (Core)**
581

582 **IV.B.1.b).(1).(a).(ii) treatment of children and adolescents for**
583 **the development of conceptual**
584 **understanding and beginning clinical skills**
585 **in major treatment modalities, including brief**
586 **and long-term individual therapy, family**
587 **therapy, group therapy, crisis intervention,**
588 **supportive therapy, psychodynamic**
589 **psychotherapy, cognitive-behavioral**
590 **therapy, and pharmacotherapy; (Core)**
591

592 **IV.B.1.b).(1).(a).(iii) evaluation and treatment of patients from**
593 **diverse cultural backgrounds and varied**

594		socioeconomic levels; and, ^(Core)
595		
596	IV.B.1.b).(1).(a).(iv)	performance and documentation of an
597		adequate individual and family history;
598		mental status; physical and neurological
599		examinations when appropriate;
600		supplementary medical and psychological
601		data, and integration of these data into a
602		formulation; differential diagnosis; and a
603		comprehensive treatment plan. ^(Core)
604		
605	IV.B.1.b).(2)	Fellows must be able to perform all medical,
606		diagnostic, and surgical procedures considered
607		essential for the area of practice. ^(Core)
608		
609	IV.B.1.c)	Medical Knowledge
610		
611		Fellows must demonstrate knowledge of established and
612		evolving biomedical, clinical, epidemiological and social-
613		behavioral sciences, as well as the application of this
614		knowledge to patient care. ^(Core)
615		
616	IV.B.1.c).(1)	Fellows must demonstrate <u>competence in their</u> knowledge
617		of:
618		
619	IV.B.1.c).(1).(a)	basic neurobiological, psychological, and clinical
620		sciences relevant to psychiatry and the application
621		of developmental, psychological, and sociocultural
622		theories relevant to the understanding of
623		psychopathology; ^(Core)
624		
625	IV.B.1.c).(1).(b)	the full range of psychopathology in children and
626		adolescents, including the etiology, epidemiology,
627		diagnosis, treatment, and prevention of the major
628		psychiatric conditions that affect children and
629		adolescents; ^(Core)
630		
631	IV.B.1.c).(1).(c)	recognition and management of domestic and
632		community violence, including physical and sexual
633		abuse, as well as neglect, as it affects children and
634		adolescents; ^(Core)
635		
636	IV.B.1.c).(1).(d)	diversity and cultural issues pertinent to children,
637		adolescents, and their families; and, ^(Core)
638		
639	IV.B.1.c).(1).(e)	the appropriate uses and limitations of
640		psychological tests. ^(Core)
641		
642	IV.B.1.d)	Practice-based Learning and Improvement
643		

644
645
646
647
648

Fellows must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. ^(Core)

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

684
685
686

IV.B.1.e) Interpersonal and Communication Skills

Fellows must demonstrate interpersonal and communication skills that result in the effective exchange of information and collaboration with patients, their families, and health professionals. ^(Core)

IV.B.1.f) Systems-based Practice

Fellows must demonstrate an awareness of and responsiveness to the larger context and system of health care, including the social determinants of health, as well as the ability to call effectively on other resources to provide optimal health care. ^(Core)

IV.C. Curriculum Organization and Fellow Experiences

IV.C.1. The curriculum must be structured to optimize fellow educational experiences, the length of these experiences, and supervisory continuity. ^(Core)

IV.C.1.a) Curriculum design must be consistent with the program's aims (IV.A.1.), and must demonstrate a systematic approach, with attention to evidence-based principles and scientific literature, standards of the psychiatric profession, and developmental appropriateness for learners. ^(Core)

IV.C.1.b) The assignment of rotations must be structured to minimize the frequency of rotational transitions. ^(Core)

IV.C.2. The program must provide instruction and experience in pain management if applicable for the subspecialty, including recognition of the signs of addiction. ^(Core)

IV.C.2.a) There must be instruction and experience in pain management. ^(Core)

- 687 IV.C.3. Didactic instruction should include lectures, seminars, and assigned
688 readings that are coordinated with concurrent clinical experiences and
689 that are specific to each fellow's level of education. ^(Detail)
690
- 691 IV.C.4. Each fellow should attend a minimum of 70 percent of regularly
692 scheduled didactic sessions. ^(Detail)
693
- 694 IV.C.5. There must be interdisciplinary clinical conferences and didactic seminars
695 for fellows, at which faculty psychiatrists collaborate in teaching with
696 colleagues from other medical specialties and mental health disciplines.
697 ^(Core)
698
- 699 IV.C.6. Didactic and clinical experiences must be of sufficient breadth and depth
700 to provide fellows with a thorough, well-balanced presentation of the
701 generally-accepted observations and theories, as well as the major
702 diagnostic, therapeutic, and preventive procedures in child and
703 adolescent psychiatry. ^(Core)
704
- 705 IV.C.7. In addition to the PGY-1 required for eligibility, a minimum of two
706 additional years of accredited education in general psychiatry and two
707 additional years of accredited education in a child and adolescent
708 psychiatry program must be provided within an ACGME-accredited
709 program. ^(Core)
710
- 711 IV.C.8. In general, education in child and adolescent psychiatry obtained as part
712 of the curriculum for general psychiatry may not count toward education
713 in child and adolescent psychiatry. However, certain clinical experiences
714 with children, adolescents, and families taken during the period when
715 he/she is designated as a child and adolescent psychiatry fellow may be
716 counted toward a fourth year in general psychiatry, as well as toward the
717 child and adolescent psychiatry program requirements, thereby fulfilling
718 program requirements in general psychiatry and child and adolescent
719 psychiatry at the same time. For these experiences to be given credit for
720 both child and adolescent psychiatry and general psychiatry, the
721 experiences must: ^(Core)
722
- 723 IV.C.8.a) be limited to child and adolescent psychiatry patients; ^(Core)
724
- 725 IV.C.8.b) be limited to a maximum of 12 months that can be double-
726 counted; ^(Core)
727
- 728 IV.C.8.c) be documented by the program director in all areas for which
729 credit is given in both programs; ^(Core)
730
- 731 IV.C.8.d) result in no reduction in total length of time devoted to education in
732 child and adolescent psychiatry, which must remain at two years
733 FTE; and, ^(Core)
734
- 735 IV.C.8.e) be limited to the following experiences: ^(Core)
736
- 737 IV.C.8.e).(1) one month FTE of child neurology; ^(Core)

738		
739	IV.C.8.e).(2)	one month FTE of pediatric consultation/liaison; (Core)
740		
741	IV.C.8.e).(3)	one month FTE of addiction psychiatry; (Core)
742		
743	IV.C.8.e).(4)	forensic psychiatry experience; (Core)
744		
745	IV.C.8.e).(5)	community psychiatry experience; and, (Core)
746		
747	IV.C.8.e).(6)	no more than 20 percent of outpatient experience, as
748		described in the ACGME Program Requirements for
749		Graduate Medical Education in Psychiatry. (Core)
750		
751	IV.C.9.	Electives must have written goals and objectives, be well constructed and
752		supervised, and lead to effective learning experiences. (Core)
753		
754	IV.C.9.a)	The choice of electives must be made with the advice and
755		approval of the program director and the appropriate preceptor.
756		(Core)
757		
758	IV.C.10.	Fellows must have an organized educational clinical experience in each
759		of the following:
760		
761	IV.C.10.a)	pediatric neurology; (Core)
762		
763	IV.C.10.b)	intellectual disability (intellectual development disorder), and other
764		developmental disorders; (Core)
765		
766	IV.C.10.c)	initial management of psychiatric emergencies in children and
767		adolescents; (Core)
768		
769	IV.C.10.d)	caring for acutely- and severely-disturbed children and
770		adolescents, with the fellows actively involved in diagnostic
771		assessment and treatment planning; and, (Core)
772		
773	IV.C.10.d).(1)	This experience must occur in settings with an organized
774		treatment program, such as inpatient units, residential
775		treatment facilities, partial hospitalization programs, and/or
776		day treatment programs. (Core)
777		
778	IV.C.10.d).(2)	This experience must be the FTE of no fewer than four
779		months and no more than 10 months. (Core)
780		
781	IV.C.10.e)	consultation experiences during which fellows do not primarily
782		engage in treatment, but use their specialized knowledge and
783		skills to assist others to function better in their roles. (Core)
784		
785	IV.C.10.e).(1)	Exposure and experience in consultation to facilities
786		serving children, adolescents, and their families must
787		include supervised: (Core)
788		

- 789 IV.C.10.e).(1).(a) consultation experience with an adequate number
790 of pediatric patients in outpatient and/or inpatient
791 non-psychiatric medical facilities; ^(Core)
792
- 793 IV.C.10.e).(1).(b) formal observation and/or consultation experiences
794 in schools; and, ^(Core)
795
- 796 IV.C.10.e).(1).(c) experience in legal issues relevant to child and
797 adolescent psychiatry, which may include forensic
798 consultation, court testimony, and/or interaction
799 with a juvenile justice system. ^(Core)
800
- 801 IV.C.11. Fellows should have experience consulting to community systems of
802 care. ^(Detail)
803
- 804 IV.C.12. Fellows must be provided sufficient supervision from child and adolescent
805 psychiatrists to enable each fellow to establish working relationships that
806 foster identification in the role of a child and adolescent psychiatrist. ^(Core)
807
- 808 IV.C.13. Fellows must have at least two hours of faculty preceptorship weekly, one
809 hour of which must be individual. ^(Core)
810
- 811 IV.C.14. Fellows must have instruction in normal development, including
812 observation of and interaction with normal preschoolers, school-aged
813 children, and adolescents. ^(Core)
814
- 815 IV.C.15. Fellows must have instruction in the integration of neurobiological,
816 phenomenological, psychological, and sociocultural issues into a
817 comprehensive formulation of clinical problems. ^(Core)
818
- 819 IV.C.16. Care for outpatients must include work with some child and adolescent
820 patients from each developmental age group, continuously over time, and
821 whenever possible, for one year's duration or more. ^(Core)
822

853
854 **IV.D.2.a) Among their scholarly activity, programs must demonstrate**
855 **accomplishments in at least three of the following domains:**
856 **^(Core)**

- 857
858
 - 859 • Research in basic science, education, translational
 - 860 science, patient care, or population health
 - 861 • Peer-reviewed grants
 - 862 • Quality improvement and/or patient safety initiatives
 - 863 • Systematic reviews, meta-analyses, review articles,
 - 864 chapters in medical textbooks, or case reports
 - 865 • Creation of curricula, evaluation tools, didactic
 - 866 educational activities, or electronic educational
 - 867 materials
 - 868 • Contribution to professional committees, educational
 - 869 organizations, or editorial boards
 - 870 • Innovations in education

871 **IV.D.2.b) The program must demonstrate dissemination of scholarly**
872 **activity within and external to the program by the following**
873 **methods:**

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the fellows’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

875
876 **IV.D.2.b).(1) faculty participation in grand rounds, posters,**
877 **workshops, quality improvement presentations,**
878 **podium presentations, grant leadership, non-peer-**
879 **reviewed print/electronic resources, articles or**
880 **publications, book chapters, textbooks, webinars,**

881 service on professional committees, or serving as a
882 journal reviewer, journal editorial board member, or
883 editor; (Outcome)‡

884
885 IV.D.2.b).(2) peer-reviewed publication. (Outcome)
886

887 IV.D.3. Fellow Scholarly Activity

888
889 IV.D.3.a) All fellows must be educated in research literacy and in the
890 concepts and process of evidenced-based clinical practice to
891 develop skills in question formulation, information searching,
892 critical appraisal, and medical decision-making. (Core)
893

894 IV.D.3.b) The program must provide opportunities for research and
895 development of research skills for fellows interested in conducting
896 research in psychiatry or related fields. (Core)
897

898 IV.D.3.c) The program must provide interested fellows access to and the
899 opportunity to participate actively in ongoing research under a
900 mentor. (Core)
901

902 IV.D.3.d) The program must ensure the participation of fellows and faculty
903 members in journal clubs, research conferences, didactics, and/or
904 other activities that address critical appraisal of the literature and
905 understanding of the research process. (Core)
906

907 V. Evaluation

908
909 V.A. Fellow Evaluation

910
911 V.A.1. Feedback and Evaluation
912

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- fellows identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

913
914
915
916
917

V.A.1.a) Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. ^(Core)

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

918

919

V.A.1.a).(1) The program must maintain records of all evaluations required in this section, and these must be made available on review of the program. ^(Core)

920

921

922

923

V.A.1.a).(2) In addition to periodic assessments, there must be an annual evaluation procedure, which must include a written examination of the knowledge base, as well as a formal documented clinical skills examination. ^(Core)

924

925

926

927

928

V.A.1.a).(3) Fellows' teaching abilities should be documented by evaluations from faculty members and/or learners. ^(Detail)

929

930

931

V.A.1.b) Evaluation must be documented at the completion of the assignment. ^(Core)

932

933

934

V.A.1.b).(1) For block rotations of greater than three months in duration, evaluation must be documented at least every three months. ^(Core)

935

936

937

938

V.A.1.b).(2) Longitudinal experiences such as continuity clinic in the context of other clinical responsibilities must be evaluated at least every three months and at completion. ^(Core)

939

940

941

942

943

V.A.1.c) The program must provide an objective performance evaluation based on the Competencies and the subspecialty-specific Milestones, and must: ^(Core)

944

945

946

947

V.A.1.c).(1) use multiple evaluators (e.g., faculty members, peers, patients, self, and other professional staff members); and, ^(Core)

948

949

950
951 V.A.1.c).(2) provide that information to the Clinical Competency
952 Committee for its synthesis of progressive fellow
953 performance and improvement toward unsupervised
954 practice. (Core)
955

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

956
957 V.A.1.d) The program director or their designee, with input from the
958 Clinical Competency Committee, must:

959
960 V.A.1.d).(1) meet with and review with each fellow their
961 documented semi-annual evaluation of performance,
962 including progress along the subspecialty-specific
963 Milestones. (Core)
964

965 V.A.1.d).(2) assist fellows in developing individualized learning
966 plans to capitalize on their strengths and identify areas
967 for growth; and, (Core)
968

969 V.A.1.d).(3) develop plans for fellows failing to progress, following
970 institutional policies and procedures. (Core)
971

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

972

973	V.A.1.e)	At least annually, there must be a summative evaluation of each fellow that includes their readiness to progress to the next year of the program, if applicable. (Core)
974		
975		
976		
977	V.A.1.f)	The evaluations of a fellow's performance must be accessible for review by the fellow. (Core)
978		
979		
980	V.A.2.	Final Evaluation
981		
982	V.A.2.a)	The program director must provide a final evaluation for each fellow upon completion of the program. (Core)
983		
984		
985	V.A.2.a).(1)	The subspecialty-specific Milestones, and when applicable the subspecialty-specific Case Logs, must be used as tools to ensure fellows are able to engage in autonomous practice upon completion of the program. (Core)
986		
987		
988		
989		
990		
991	V.A.2.a).(2)	The final evaluation must:
992		
993	V.A.2.a).(2).(a)	become part of the fellow's permanent record maintained by the institution, and must be accessible for review by the fellow in accordance with institutional policy; (Core)
994		
995		
996		
997		
998	V.A.2.a).(2).(b)	verify that the fellow has demonstrated the knowledge, skills, and behaviors necessary to enter autonomous practice; (Core)
999		
1000		
1001		
1002	V.A.2.a).(2).(c)	consider recommendations from the Clinical Competency Committee; and, (Core)
1003		
1004		
1005	V.A.2.a).(2).(d)	be shared with the fellow upon completion of the program. (Core)
1006		
1007		
1008	V.A.3.	A Clinical Competency Committee must be appointed by the program director. (Core)
1009		
1010		
1011	V.A.3.a)	At a minimum the Clinical Competency Committee must include three members, at least one of whom is a core faculty member. Members must be faculty members from the same program or other programs, or other health professionals who have extensive contact and experience with the program's fellows. (Core)
1012		
1013		
1014		
1015		
1016		
1017		
1018	V.A.3.b)	The Clinical Competency Committee must:
1019		
1020	V.A.3.b).(1)	review all fellow evaluations at least semi-annually; (Core)
1021		
1022		

- 1023 V.A.3.b).(2) determine each fellow’s progress on achievement of
 1024 the subspecialty-specific Milestones; and, (Core)
 1025
 1026 V.A.3.b).(3) meet prior to the fellows’ semi-annual evaluations and
 1027 advise the program director regarding each fellow’s
 1028 progress. (Core)
 1029
 1030 V.B. Faculty Evaluation
 1031
 1032 V.B.1. The program must have a process to evaluate each faculty
 1033 member’s performance as it relates to the educational program at
 1034 least annually. (Core)
 1035

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program’s faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 1036
 1037 V.B.1.a) This evaluation must include a review of the faculty member’s
 1038 clinical teaching abilities, engagement with the educational
 1039 program, participation in faculty development related to their
 1040 skills as an educator, clinical performance, professionalism,
 1041 and scholarly activities. (Core)
 1042
 1043 V.B.1.b) This evaluation must include written, confidential evaluations
 1044 by the fellows. (Core)
 1045
 1046 V.B.2. Faculty members must receive feedback on their evaluations at least
 1047 annually. (Core)
 1048
 1049 V.B.3. Results of the faculty educational evaluations should be
 1050 incorporated into program-wide faculty development plans. (Core)
 1051

Background and Intent: The quality of the faculty’s teaching and clinical care is a determinant of the quality of the program and the quality of the fellows’ future clinical care. Therefore, the program has the responsibility to evaluate and improve the

program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

- 1052
1053 **V.C. Program Evaluation and Improvement**
1054
1055 **V.C.1. The program director must appoint the Program Evaluation**
1056 **Committee to conduct and document the Annual Program**
1057 **Evaluation as part of the program's continuous improvement**
1058 **process. (Core)**
1059
1060 **V.C.1.a) The Program Evaluation Committee must be composed of at**
1061 **least two program faculty members, at least one of whom is a**
1062 **core faculty member, and at least one fellow. (Core)**
1063
1064 **V.C.1.b) Program Evaluation Committee responsibilities must include:**
1065
1066 **V.C.1.b).(1) acting as an advisor to the program director, through**
1067 **program oversight; (Core)**
1068
1069 **V.C.1.b).(2) review of the program's self-determined goals and**
1070 **progress toward meeting them; (Core)**
1071
1072 **V.C.1.b).(3) guiding ongoing program improvement, including**
1073 **development of new goals, based upon outcomes;**
1074 **and, (Core)**
1075
1076 **V.C.1.b).(4) review of the current operating environment to identify**
1077 **strengths, challenges, opportunities, and threats as**
1078 **related to the program's mission and aims. (Core)**
1079

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.

- 1080
1081 **V.C.1.c) The Program Evaluation Committee should consider the**
1082 **following elements in its assessment of the program:**
1083
1084 **V.C.1.c).(1) curriculum; (Core)**
1085
1086 **V.C.1.c).(2) outcomes from prior Annual Program Evaluation(s);**
1087 **(Core)**
1088
1089 **V.C.1.c).(3) ACGME letters of notification, including citations,**
1090 **Areas for Improvement, and comments; (Core)**
1091
1092 **V.C.1.c).(4) quality and safety of patient care; (Core)**
1093

1094	V.C.1.c).(5)	aggregate fellow and faculty:
1095		
1096	V.C.1.c).(5).(a)	well-being; ^(Core)
1097		
1098	V.C.1.c).(5).(b)	recruitment and retention; ^(Core)
1099		
1100	V.C.1.c).(5).(c)	workforce diversity; ^(Core)
1101		
1102	V.C.1.c).(5).(d)	engagement in quality improvement and patient safety; ^(Core)
1103		
1104		
1105	V.C.1.c).(5).(e)	scholarly activity; ^(Core)
1106		
1107	V.C.1.c).(5).(f)	ACGME Resident/Fellow and Faculty Surveys (where applicable); and, ^(Core)
1108		
1109		
1110	V.C.1.c).(5).(g)	written evaluations of the program. ^(Core)
1111		
1112	V.C.1.c).(6)	aggregate fellow:
1113		
1114	V.C.1.c).(6).(a)	achievement of the Milestones; ^(Core)
1115		
1116	V.C.1.c).(6).(b)	in-training examinations (where applicable); ^(Core)
1117		
1118		
1119	V.C.1.c).(6).(c)	board pass and certification rates; and, ^(Core)
1120		
1121	V.C.1.c).(6).(d)	graduate performance. ^(Core)
1122		
1123	V.C.1.c).(7)	aggregate faculty:
1124		
1125	V.C.1.c).(7).(a)	evaluation; and, ^(Core)
1126		
1127	V.C.1.c).(7).(b)	professional development ^(Core)
1128		
1129	V.C.1.d)	The Program Evaluation Committee must evaluate the program's mission and aims, strengths, areas for improvement, and threats. ^(Core)
1130		
1131		
1132		
1133	V.C.1.e)	The annual review, including the action plan, must:
1134		
1135	V.C.1.e).(1)	be distributed to and discussed with the members of the teaching faculty and the fellows; and, ^(Core)
1136		
1137		
1138	V.C.1.e).(2)	be submitted to the DIO. ^(Core)
1139		
1140	V.C.2.	The program must participate in a Self-Study prior to its 10-Year Accreditation Site Visit. ^(Core)
1141		
1142		
1143	V.C.2.a)	A summary of the Self-Study must be submitted to the DIO. ^(Core)
1144		

1145

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

1146

1147

V.C.3. *One goal of ACGME-accredited education is to educate physicians who seek and achieve board certification. One measure of the effectiveness of the educational program is the ultimate pass rate.*

1148

1149

1150

1151

The program director should encourage all eligible program graduates to take the certifying examination offered by the applicable American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board.

1152

1153

1154

1155

1156 **V.C.3.a)**

For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) an annual written exam, in the preceding three years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)

1157

1158

1159

1160

1161

1162

1163 **V.C.3.b)**

For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial written exam, in the preceding six years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)

1164

1165

1166

1167

1168

1169

1170 **V.C.3.c)**

For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) an annual oral exam, in the preceding three years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)

1171

1172

1173

1174

1175

1176

1177 **V.C.3.d)**

For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial oral exam, in the preceding six years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)

1178

1179

1180

1181

1182

1183

1184 V.C.3.e) For each of the exams referenced in V.C.3.a)-d), any program
1185 whose graduates over the time period specified in the
1186 requirement have achieved an 80 percent pass rate will have
1187 met this requirement, no matter the percentile rank of the
1188 program for pass rate in that subspecialty. ^(Outcome)
1189

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

1190 V.C.3.f) Programs must report, in ADS, board certification status
1191 annually for the cohort of board-eligible fellows that
1192 graduated seven years earlier. ^(Core)
1193
1194

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

1195 VI. The Learning and Working Environment
1196

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

- 1201 • *Excellence in the safety and quality of care rendered to patients by fellows today*
- 1202
- 1203
- 1204 • *Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice*
- 1205
- 1206
- 1207 • *Excellence in professionalism through faculty modeling of:*
- 1208

- 1209 ○ *the effacement of self-interest in a humanistic environment that supports*
- 1210 *the professional development of physicians*
- 1211
- 1212 ○ *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
- 1213
- 1214 • *Commitment to the well-being of the students, residents, fellows, faculty*
- 1215 *members, and all members of the health care team*
- 1216

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program’s accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

- 1217
- 1218 VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability
- 1219
- 1220 VI.A.1. Patient Safety and Quality Improvement
- 1221
- 1222 *All physicians share responsibility for promoting patient safety and*
- 1223 *enhancing quality of patient care. Graduate medical education must*
- 1224 *prepare fellows to provide the highest level of clinical care with*
- 1225 *continuous focus on the safety, individual needs, and humanity of*
- 1226 *their patients. It is the right of each patient to be cared for by fellows*
- 1227 *who are appropriately supervised; possess the requisite knowledge,*
- 1228 *skills, and abilities; understand the limits of their knowledge and*
- 1229 *experience; and seek assistance as required to provide optimal*
- 1230 *patient care.*
- 1231
- 1232 *Fellows must demonstrate the ability to analyze the care they*
- 1233 *provide, understand their roles within health care teams, and play an*
- 1234 *active role in system improvement processes. Graduating fellows*

1235 *will apply these skills to critique their future unsupervised practice*
1236 *and effect quality improvement measures.*

1237
1238 *It is necessary for fellows and faculty members to consistently work*
1239 *in a well-coordinated manner with other health care professionals to*
1240 *achieve organizational patient safety goals.*

1241
1242 **VI.A.1.a) Patient Safety**

1243
1244 **VI.A.1.a).(1) Culture of Safety**

1245
1246 *A culture of safety requires continuous identification*
1247 *of vulnerabilities and a willingness to transparently*
1248 *deal with them. An effective organization has formal*
1249 *mechanisms to assess the knowledge, skills, and*
1250 *attitudes of its personnel toward safety in order to*
1251 *identify areas for improvement.*

1252
1253 **VI.A.1.a).(1).(a)** The program, its faculty, residents, and fellows
1254 must actively participate in patient safety
1255 systems and contribute to a culture of safety.
1256 (Core)

1257
1258 **VI.A.1.a).(1).(b)** The program must have a structure that
1259 promotes safe, interprofessional, team-based
1260 care. (Core)

1261
1262 **VI.A.1.a).(2) Education on Patient Safety**

1263
1264 Programs must provide formal educational activities
1265 that promote patient safety-related goals, tools, and
1266 techniques. (Core)

1267

Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.

1268
1269 **VI.A.1.a).(3) Patient Safety Events**

1270
1271 *Reporting, investigation, and follow-up of adverse*
1272 *events, near misses, and unsafe conditions are pivotal*
1273 *mechanisms for improving patient safety, and are*
1274 *essential for the success of any patient safety*
1275 *program. Feedback and experiential learning are*
1276 *essential to developing true competence in the ability*
1277 *to identify causes and institute sustainable systems-*
1278 *based changes to ameliorate patient safety*
1279 *vulnerabilities.*

1280
1281 **VI.A.1.a).(3).(a)** Residents, fellows, faculty members, and other
1282 clinical staff members must:

1283

1284	VI.A.1.a).(3).(a).(i)	know their responsibilities in reporting patient safety events at the clinical site; (Core)
1285		
1286		
1287		
1288	VI.A.1.a).(3).(a).(ii)	know how to report patient safety events, including near misses, at the clinical site; and, (Core)
1289		
1290		
1291		
1292	VI.A.1.a).(3).(a).(iii)	be provided with summary information of their institution's patient safety reports. (Core)
1293		
1294		
1295		
1296	VI.A.1.a).(3).(b)	Fellows must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions. (Core)
1297		
1298		
1299		
1300		
1301		
1302		
1303	VI.A.1.a).(4)	Fellow Education and Experience in Disclosure of Adverse Events
1304		
1305		
1306		
1307		<i>Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for fellows to develop and apply.</i>
1308		
1309		
1310		
1311		
1312	VI.A.1.a).(4).(a)	All fellows must receive training in how to disclose adverse events to patients and families. (Core)
1313		
1314		
1315		
1316	VI.A.1.a).(4).(b)	Fellows should have the opportunity to participate in the disclosure of patient safety events, real or simulated. (Detail)
1317		
1318		
1319		
1320	VI.A.1.b)	Quality Improvement
1321		
1322	VI.A.1.b).(1)	Education in Quality Improvement
1323		
1324		<i>A cohesive model of health care includes quality-related goals, tools, and techniques that are necessary in order for health care professionals to achieve quality improvement goals.</i>
1325		
1326		
1327		
1328		
1329	VI.A.1.b).(1).(a)	Fellows must receive training and experience in quality improvement processes, including an understanding of health care disparities. (Core)
1330		
1331		
1332		
1333	VI.A.1.b).(2)	Quality Metrics
1334		

1335		<i>Access to data is essential to prioritizing activities for care improvement and evaluating success of improvement efforts.</i>
1336		
1337		
1338		
1339	VI.A.1.b).(2).(a)	Fellows and faculty members must receive data on quality metrics and benchmarks related to their patient populations. ^(Core)
1340		
1341		
1342		
1343	VI.A.1.b).(3)	Engagement in Quality Improvement Activities
1344		
1345		<i>Experiential learning is essential to developing the ability to identify and institute sustainable systems-based changes to improve patient care.</i>
1346		
1347		
1348		
1349	VI.A.1.b).(3).(a)	Fellows must have the opportunity to participate in interprofessional quality improvement activities. ^(Core)
1350		
1351		
1352		
1353	VI.A.1.b).(3).(a).(i)	This should include activities aimed at reducing health care disparities. ^(Detail)
1354		
1355		
1356	VI.A.2.	Supervision and Accountability
1357		
1358	VI.A.2.a)	<i>Although the attending physician is ultimately responsible for the care of the patient, every physician shares in the responsibility and accountability for their efforts in the provision of care. Effective programs, in partnership with their Sponsoring Institutions, define, widely communicate, and monitor a structured chain of responsibility and accountability as it relates to the supervision of all patient care.</i>
1359		
1360		
1361		
1362		
1363		
1364		
1365		
1366		
1367		<i>Supervision in the setting of graduate medical education provides safe and effective care to patients; ensures each fellow's development of the skills, knowledge, and attitudes required to enter the unsupervised practice of medicine; and establishes a foundation for continued professional growth.</i>
1368		
1369		
1370		
1371		
1372		
1373	VI.A.2.a).(1)	Each patient must have an identifiable and appropriately-credentialed and privileged attending physician (or licensed independent practitioner as specified by the applicable Review Committee) who is responsible and accountable for the patient's care. ^(Core)
1374		
1375		
1376		
1377		
1378		
1379		
1380	VI.A.2.a).(1).(a)	This information must be available to fellows, faculty members, other members of the health care team, and patients. ^(Core)
1381		
1382		
1383		

1384 VI.A.2.a).(1).(b) Fellows and faculty members must inform each
1385 patient of their respective roles in that patient's
1386 care when providing direct patient care. ^(Core)
1387

1388 VI.A.2.b) *Supervision may be exercised through a variety of methods.*
1389 *For many aspects of patient care, the supervising physician*
1390 *may be a more advanced fellow. Other portions of care*
1391 *provided by the fellow can be adequately supervised by the*
1392 *appropriate availability of the supervising faculty member or*
1393 *fellow, either on site or by means of telecommunication*
1394 *technology. Some activities require the physical presence of*
1395 *the supervising faculty member. In some circumstances,*
1396 *supervision may include post-hoc review of fellow-delivered*
1397 *care with feedback.*
1398

Background and Intent: There are circumstances where direct supervision without physical presence does not fulfill the requirements of the specific Review Committee. Review Committees will further specify what is meant by direct supervision without physical presence in specialties where allowed. "Physically present" is defined as follows: The teaching physician is located in the same room (or partitioned or curtained area, if the room is subdivided to accommodate multiple patients) as the patient and/or performs a face-to-face service.

1399
1400 VI.A.2.b).(1) The program must demonstrate that the appropriate
1401 level of supervision in place for all fellows is based on
1402 each fellow's level of training and ability, as well as
1403 patient complexity and acuity. Supervision may be
1404 exercised through a variety of methods, as appropriate
1405 to the situation. ^(Core)
1406

1407 VI.A.2.b).(2) The program must define when physical presence of a
1408 supervising physician is required. ^(Core)
1409

1410 VI.A.2.c) Levels of Supervision

1411
1412 To promote appropriate fellow supervision while providing
1413 for graded authority and responsibility, the program must use
1414 the following classification of supervision: ^(Core)
1415

1416 VI.A.2.c).(1) Direct Supervision:

1417
1418 VI.A.2.c).(1).(a) the supervising physician is physically present
1419 with the fellow during the key portions of the
1420 patient interaction. ^(Core)
1421

1422 VI.A.2.c).(2) Indirect Supervision: the supervising physician is not
1423 providing physical or concurrent visual or audio
1424 supervision but is immediately available to the fellow
1425 for guidance and is available to provide appropriate
1426 direct supervision. ^(Core)
1427

- 1428 VI.A.2.c).(3) Oversight – the supervising physician is available to
 1429 provide review of procedures/encounters with
 1430 feedback provided after care is delivered. ^(Core)
 1431
- 1432 VI.A.2.d) The privilege of progressive authority and responsibility,
 1433 conditional independence, and a supervisory role in patient
 1434 care delegated to each fellow must be assigned by the
 1435 program director and faculty members. ^(Core)
 1436
- 1437 VI.A.2.d).(1) The program director must evaluate each fellow’s
 1438 abilities based on specific criteria, guided by the
 1439 Milestones. ^(Core)
 1440
- 1441 VI.A.2.d).(2) Faculty members functioning as supervising
 1442 physicians must delegate portions of care to fellows
 1443 based on the needs of the patient and the skills of
 1444 each fellow. ^(Core)
 1445
- 1446 VI.A.2.d).(3) Fellows should serve in a supervisory role to junior
 1447 fellows and residents in recognition of their progress
 1448 toward independence, based on the needs of each
 1449 patient and the skills of the individual resident or
 1450 fellow. ^(Detail)
 1451
- 1452 VI.A.2.e) Programs must set guidelines for circumstances and events
 1453 in which fellows must communicate with the supervising
 1454 faculty member(s). ^(Core)
 1455
- 1456 VI.A.2.e).(1) Each fellow must know the limits of their scope of
 1457 authority, and the circumstances under which the
 1458 fellow is permitted to act with conditional
 1459 independence. ^(Outcome)
 1460

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

- 1461
- 1462 VI.A.2.f) Faculty supervision assignments must be of sufficient
 1463 duration to assess the knowledge and skills of each fellow
 1464 and to delegate to the fellow the appropriate level of patient
 1465 care authority and responsibility. ^(Core)
 1466
- 1467 VI.B. Professionalism
- 1468
- 1469 VI.B.1. Programs, in partnership with their Sponsoring Institutions, must
 1470 educate fellows and faculty members concerning the professional
 1471 responsibilities of physicians, including their obligation to be
 1472 appropriately rested and fit to provide the care required by their
 1473 patients. ^(Core)
 1474
- 1475 VI.B.2. The learning objectives of the program must:

- 1476
1477 **VI.B.2.a)** be accomplished through an appropriate blend of supervised
1478 patient care responsibilities, clinical teaching, and didactic
1479 educational events; ^(Core)
1480
1481 **VI.B.2.b)** be accomplished without excessive reliance on fellows to
1482 fulfill non-physician obligations; and, ^(Core)
1483

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

- 1484
1485 **VI.B.2.c)** ensure manageable patient care responsibilities. ^(Core)
1486
1487 **VI.B.2.c).(1)** The number of patients for whom fellows have primary
1488 responsibility at any one time must permit them to provide
1489 each patient with appropriate treatment, as well as to have
1490 sufficient time for other aspects of their educational
1491 program. ^(Core)
1492

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

- 1493
1494 **VI.B.3.** The program director, in partnership with the Sponsoring Institution,
1495 must provide a culture of professionalism that supports patient
1496 safety and personal responsibility. ^(Core)
1497
1498 **VI.B.4.** Fellows and faculty members must demonstrate an understanding
1499 of their personal role in the:
1500
1501 **VI.B.4.a)** provision of patient- and family-centered care; ^(Outcome)
1502
1503 **VI.B.4.b)** safety and welfare of patients entrusted to their care,
1504 including the ability to report unsafe conditions and adverse
1505 events; ^(Outcome)
1506

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

1507
1508
1509

VI.B.4.c) assurance of their fitness for work, including: (Outcome)

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

1510

1511 **VI.B.4.c).(1)**

management of their time before, during, and after clinical assignments; and, (Outcome)

1512

1513

1514 **VI.B.4.c).(2)**

recognition of impairment, including from illness, fatigue, and substance use, in themselves, their peers, and other members of the health care team. (Outcome)

1515

1516

1517

1518 **VI.B.4.d)**

commitment to lifelong learning; (Outcome)

1519

1520 **VI.B.4.e)**

monitoring of their patient care performance improvement indicators; and, (Outcome)

1521

1522

1523 **VI.B.4.f)**

accurate reporting of clinical and educational work hours, patient outcomes, and clinical experience data. (Outcome)

1524

1525

1526 **VI.B.5.**

All fellows and faculty members must demonstrate responsiveness to patient needs that supersedes self-interest. This includes the recognition that under certain circumstances, the best interests of the patient may be served by transitioning that patient's care to another qualified and rested provider. (Outcome)

1527

1528

1529

1530

1531

1532 **VI.B.6.**

Programs, in partnership with their Sponsoring Institutions, must provide a professional, equitable, respectful, and civil environment that is free from discrimination, sexual and other forms of harassment, mistreatment, abuse, or coercion of students, fellows, faculty, and staff. (Core)

1533

1534

1535

1536

1537

1538 **VI.B.7.**

Programs, in partnership with their Sponsoring Institutions, should have a process for education of fellows and faculty regarding unprofessional behavior and a confidential process for reporting, investigating, and addressing such concerns. (Core)

1539

1540

1541

1542

1543 **VI.C.**

Well-Being

1544

1545

1546

1547

Psychological, emotional, and physical well-being are critical in the development of the competent, caring, and resilient physician and require proactive attention to life inside and outside of medicine. Well-being

1548 *requires that physicians retain the joy in medicine while managing their*
1549 *own real life stresses. Self-care and responsibility to support other*
1550 *members of the health care team are important components of*
1551 *professionalism; they are also skills that must be modeled, learned, and*
1552 *nurtured in the context of other aspects of fellowship training.*

1553
1554 *Fellows and faculty members are at risk for burnout and depression.*
1555 *Programs, in partnership with their Sponsoring Institutions, have the same*
1556 *responsibility to address well-being as other aspects of resident*
1557 *competence. Physicians and all members of the health care team share*
1558 *responsibility for the well-being of each other. For example, a culture which*
1559 *encourages covering for colleagues after an illness without the expectation*
1560 *of reciprocity reflects the ideal of professionalism. A positive culture in a*
1561 *clinical learning environment models constructive behaviors, and prepares*
1562 *fellows with the skills and attitudes needed to thrive throughout their*
1563 *careers.*

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

- 1565
1566 **VI.C.1. The responsibility of the program, in partnership with the**
1567 **Sponsoring Institution, to address well-being must include:**
1568
1569 **VI.C.1.a) efforts to enhance the meaning that each fellow finds in the**
1570 **experience of being a physician, including protecting time**
1571 **with patients, minimizing non-physician obligations,**
1572 **providing administrative support, promoting progressive**
1573 **autonomy and flexibility, and enhancing professional**
1574 **relationships; (Core)**
1575
1576 **VI.C.1.b) attention to scheduling, work intensity, and work**
1577 **compression that impacts fellow well-being; (Core)**
1578
1579 **VI.C.1.c) evaluating workplace safety data and addressing the safety of**
1580 **fellows and faculty members; (Core)**
1581

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that

monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

1582
1583
1584
1585

VI.C.1.d) policies and programs that encourage optimal fellow and faculty member well-being; and, ^(Core)

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

1586
1587
1588
1589
1590
1591

VI.C.1.d).(1) Fellows must be given the opportunity to attend medical, mental health, and dental care appointments, including those scheduled during their working hours. ^(Core)

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

1592
1593
1594
1595
1596
1597
1598
1599
1600
1601
1602
1603

VI.C.1.e) attention to fellow and faculty member burnout, depression, and substance abuse. The program, in partnership with its Sponsoring Institution, must educate faculty members and fellows in identification of the symptoms of burnout, depression, and substance abuse, including means to assist those who experience these conditions. Fellows and faculty members must also be educated to recognize those symptoms in themselves and how to seek appropriate care. The program, in partnership with its Sponsoring Institution, must: ^(Core)

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance abuse. Materials and more information are available on the Physician Well-being section of the ACGME website (<http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being>).

1604
1605
1606
1607
1608
1609
1610
1611

VI.C.1.e).(1) encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another fellow, resident, or faculty member may be displaying signs of burnout, depression, substance abuse, suicidal ideation, or potential for violence; ^(Core)

Background and Intent: Individuals experiencing burnout, depression, substance abuse, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a

negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

- 1612
1613 VI.C.1.e).(2) provide access to appropriate tools for self-screening;
1614 and, ^(Core)
1615
1616 VI.C.1.e).(3) provide access to confidential, affordable mental
1617 health assessment, counseling, and treatment,
1618 including access to urgent and emergent care 24
1619 hours a day, seven days a week. ^(Core)
1620

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

- 1621
1622 VI.C.2. There are circumstances in which fellows may be unable to attend
1623 work, including but not limited to fatigue, illness, family
1624 emergencies, and parental leave. Each program must allow an
1625 appropriate length of absence for fellows unable to perform their
1626 patient care responsibilities. ^(Core)
1627
1628 VI.C.2.a) The program must have policies and procedures in place to
1629 ensure coverage of patient care. ^(Core)
1630
1631 VI.C.2.b) These policies must be implemented without fear of negative
1632 consequences for the fellow who is or was unable to provide
1633 the clinical work. ^(Core)
1634

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

- 1635
1636 VI.D. Fatigue Mitigation
1637

- 1638 VI.D.1. Programs must:
- 1639
- 1640 VI.D.1.a) educate all faculty members and fellows to recognize the
- 1641 signs of fatigue and sleep deprivation; ^(Core)
- 1642
- 1643 VI.D.1.b) educate all faculty members and fellows in alertness
- 1644 management and fatigue mitigation processes; and, ^(Core)
- 1645
- 1646 VI.D.1.c) encourage fellows to use fatigue mitigation processes to
- 1647 manage the potential negative effects of fatigue on patient
- 1648 care and learning. ^(Detail)
- 1649

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

- 1650
- 1651 VI.D.2. Each program must ensure continuity of patient care, consistent
- 1652 with the program's policies and procedures referenced in VI.C.2–
- 1653 VI.C.2.b), in the event that a fellow may be unable to perform their
- 1654 patient care responsibilities due to excessive fatigue. ^(Core)
- 1655
- 1656 VI.D.3. The program, in partnership with its Sponsoring Institution, must

- 1661
- 1662 VI.E.1. Clinical Responsibilities
- 1663
- 1664 The clinical responsibilities for each fellow must be based on PGY
- 1665 level, patient safety, fellow ability, severity and complexity of patient
- 1666 illness/condition, and available support services. ^(Core)
- 1667

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential

responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

VI.E.2. Teamwork

Fellows must care for patients in an environment that maximizes communication. This must include the opportunity to work as a member of effective interprofessional teams that are appropriate to the delivery of care in the subspecialty and larger health system.
(Core)

VI.E.2.a) Contributors to effective interprofessional teams should include consulting physicians, psychologists, psychiatric nurses, social workers, other professional and paraprofessional mental health personnel, pediatricians, teachers, and other school personnel involved in the evaluation and treatment of patients. (Detail)

VI.E.3. Transitions of Care

VI.E.3.a) **Programs must design clinical assignments to optimize transitions in patient care, including their safety, frequency, and structure.** (Core)

VI.E.3.b) **Programs, in partnership with their Sponsoring Institutions, must ensure and monitor effective, structured hand-over processes to facilitate both continuity of care and patient safety.** (Core)

VI.E.3.c) **Programs must ensure that fellows are competent in communicating with team members in the hand-over process.**
(Outcome)

VI.E.3.d) **Programs and clinical sites must maintain and communicate schedules of attending physicians and fellows currently responsible for care.** (Core)

VI.E.3.e) **Each program must ensure continuity of patient care, consistent with the program's policies and procedures referenced in VI.C.2-VI.C.2.b), in the event that a fellow may be unable to perform their patient care responsibilities due to excessive fatigue or illness, or family emergency.** (Core)

VI.F. Clinical Experience and Education

Programs, in partnership with their Sponsoring Institutions, must design an effective program structure that is configured to provide fellows with educational and clinical experience opportunities, as well as reasonable opportunities for rest and personal activities.

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

1722

VI.F.1. Maximum Hours of Clinical and Educational Work per Week

Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting. ^(Core)

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent

by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

- VI.F.2. Mandatory Time Free of Clinical Work and Education**
- VI.F.2.a) The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. ^(Core)**
- VI.F.2.b) Fellows should have eight hours off between scheduled clinical work and education periods. ^(Detail)**
- VI.F.2.b).(1) There may be circumstances when fellows choose to stay to care for their patients or return to the hospital with fewer than eight hours free of clinical experience and education. This must occur within the context of the 80-hour and the one-day-off-in-seven requirements. ^(Detail)**

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for

scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1741
1742
1743
1744

VI.F.2.c) Fellows must have at least 14 hours free of clinical work and education after 24 hours of in-house call. *(Core)*

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1745
1746
1747
1748
1749
1750

VI.F.2.d) Fellows must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. *(Core)*

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

VI.F.3. Maximum Clinical Work and Education Period Length

VI.F.3.a) Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical assignments. *(Core)*

VI.F.3.a).(1) Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or fellow education. *(Core)*

VI.F.3.a).(1).(a) Additional patient care responsibilities must not be assigned to a fellow during this time. *(Core)*

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and

up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

- VI.F.4. Clinical and Educational Work Hour Exceptions**
- VI.F.4.a) In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:**
- VI.F.4.a).(1) to continue to provide care to a single severely ill or unstable patient; ^(Detail)**
- VI.F.4.a).(2) humanistic attention to the needs of a patient or family; or, ^(Detail)**
- VI.F.4.a).(3) to attend unique educational events. ^(Detail)**
- VI.F.4.b) These additional hours of care or education will be counted toward the 80-hour weekly limit. ^(Detail)**

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

- VI.F.4.c) A Review Committee may grant rotation-specific exceptions for up to 10 percent or a maximum of 88 clinical and educational work hours to individual programs based on a sound educational rationale.**
- The Review Committee for Psychiatry will not consider requests for exceptions to the 80-hour limit to the fellows' work week.
- VI.F.4.c).(1) In preparing a request for an exception, the program director must follow the clinical and educational work hour exception policy from the *ACGME Manual of Policies and Procedures*. ^(Core)**
- VI.F.4.c).(2) Prior to submitting the request to the Review Committee, the program director must obtain approval from the Sponsoring Institution's GMEC and DIO. ^(Core)**

Background and Intent: The provision for exceptions for up to 88 hours per week has been modified to specify that exceptions may be granted for specific rotations if the

program can justify the increase based on criteria specified by the Review Committee. As in the past, Review Committees may opt not to permit exceptions. The underlying philosophy for this requirement is that while it is expected that all fellows should be able to train within an 80-hour work week, it is recognized that some programs may include rotations with alternate structures based on the nature of the specialty. DIO/GMEC approval is required before the request will be considered by the Review Committee.

1838
1839

VI.F.7. Maximum In-House On-Call Frequency

Fellows must be scheduled for in-house call no more frequently than every third night (when averaged over a four-week period). (Core)

VI.F.8. At-Home Call

VI.F.8.a) Time spent on patient care activities by fellows on at-home call must count toward the 80-hour maximum weekly limit. The frequency of at-home call is not subject to the every-third-night limitation, but must satisfy the requirement for one day in seven free of clinical work and education, when averaged over four weeks. (Core)

VI.F.8.a).(1) At-home call must not be so frequent or taxing as to preclude rest or reasonable personal time for each fellow. (Core)

1840 VI.F.8.b) Fellows are permitted to return to the hospital while on at-
1841 home call to provide direct care for new or established
1842 patients. These hours of inpatient patient care must be
1843 included in the 80-hour maximum weekly limit. ^(Detail)
1844

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
