1 **ACGME Program Requirements for Graduate Medical Education**
2 **in Geriatric Psychiatry**

3
4 **Common Program Requirements (One-Year Fellowship) are in BOLD**

5
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.
9

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (One-Year Fellowship) are intended to explain the differences.

10
11 **Introduction**

12
13 **Int.A.** *Fellowship is advanced graduate medical education beyond a core*
14 *residency program for physicians who desire to enter more specialized*
15 *practice. Fellowship-trained physicians serve the public by providing*
16 *subspecialty care, which may also include core medical care, acting as a*
17 *community resource for expertise in their field, creating and integrating*
18 *new knowledge into practice, and educating future generations of*
19 *physicians. Graduate medical education values the strength that a diverse*
20 *group of physicians brings to medical care.*

21
22 *Fellows who have completed residency are able to practice independently*
23 *in their core specialty. The prior medical experience and expertise of*
24 *fellows distinguish them from physicians entering into residency training.*
25 *The fellow's care of patients within the subspecialty is undertaken with*
26 *appropriate faculty supervision and conditional independence. Faculty*
27 *members serve as role models of excellence, compassion,*
28 *professionalism, and scholarship. The fellow develops deep medical*
29 *knowledge, patient care skills, and expertise applicable to their focused*
30 *area of practice. Fellowship is an intensive program of subspecialty clinical*
31 *and didactic education that focuses on the multidisciplinary care of*
32 *patients. Fellowship education is often physically, emotionally, and*
33 *intellectually demanding, and occurs in a variety of clinical learning*
34 *environments committed to graduate medical education and the well-being*
35 *of patients, residents, fellows, faculty members, students, and all members*
36 *of the health care team.*

37
38 *In addition to clinical education, many fellowship programs advance*
39 *fellows' skills as physician-scientists. While the ability to create new*
40 *knowledge within medicine is not exclusive to fellowship-educated*
41 *physicians, the fellowship experience expands a physician's abilities to*
42 *pursue hypothesis-driven scientific inquiry that results in contributions to*
43 *the medical literature and patient care. Beyond the clinical subspecialty*
44 *expertise achieved, fellows develop mentored relationships built on an*
45 *infrastructure that promotes collaborative research.*

46
47 **Int.B.** **Definition of Subspecialty**

48 Geriatric psychiatry focuses on prevention, diagnosis, evaluation, and treatment
49 of psychiatric mental disorders, and signs and symptoms seen in older adult
50 patients. An educational program in geriatric psychiatry must be organized to
51 provide professional knowledge, skills, and opportunities to develop
52 competency through a well-supervised clinical experience.
53

54
55 **Int.C. Length of Educational Program**

56
57 The educational program in geriatric psychiatry must be 12 months in length.
58 (Core)*

59
60 **I. Oversight**

61
62 **I.A. Sponsoring Institution**

63
64 *The Sponsoring Institution is the organization or entity that assumes the*
65 *ultimate financial and academic responsibility for a program of graduate*
66 *medical education consistent with the ACGME Institutional Requirements.*

67
68 *When the Sponsoring Institution is not a rotation site for the program, the*
69 *most commonly utilized site of clinical activity for the program is the*
70 *primary clinical site.*
71

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, a federally qualified health center, a surgery center, an academic and private single-specialty clinic, or an educational foundation.

72
73 **I.A.1. The program must be sponsored by one ACGME-accredited**
74 **Sponsoring Institution. (Core)**

75
76 **I.B. Participating Sites**

77
78 *A participating site is an organization providing educational experiences or*
79 *educational assignments/rotations for fellows.*

80
81 **I.B.1. The program, with approval of its Sponsoring Institution, must**
82 **designate a primary clinical site. (Core)**

83
84 **I.B.1.a) The Sponsoring Institution must also sponsor an Accreditation**
85 **Council for Graduate Medical Education (ACGME)-accredited**
86 **program in psychiatry. (Core)**
87
88

- 89 I.B.1.b) Within at least one of the participating sites, there should be an
90 ACGME-accredited program in at least one of the following non-
91 psychiatric specialties: family medicine; geriatric medicine; internal
92 medicine; neurology; or physical medicine and rehabilitation. ^(Core)
93
- 94 **I.B.2.** **There must be a program letter of agreement (PLA) between the**
95 **program and each participating site that governs the relationship**
96 **between the program and the participating site providing a required**
97 **assignment.** ^(Core)
98
- 99 **I.B.2.a)** **The PLA must:**
- 100
- 101 **I.B.2.a).(1)** **be renewed at least every 10 years; and,** ^(Core)
102
- 103 **I.B.2.a).(2)** **be approved by the designated institutional official**
104 **(DIO).** ^(Core)
105
- 106 **I.B.3.** **The program must monitor the clinical learning and working**
107 **environment at all participating sites.** ^(Core)
108
- 109 **I.B.3.a)** **At each participating site there must be one faculty member,**
110 **designated by the program director, who is accountable for**
111 **fellow education for that site, in collaboration with the**
112 **program director.** ^(Core)
113

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- **Identifying the faculty members who will assume educational and supervisory responsibility for fellows**
- **Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows**
- **Specifying the duration and content of the educational experience**
- **Stating the policies and procedures that will govern fellow education during the assignment**

- 114
- 115 **I.B.4.** **The program director must submit any additions or deletions of**
116 **participating sites routinely providing an educational experience,**
117 **required for all fellows, of one month full time equivalent (FTE) or**
118 **more through the ACGME's Accreditation Data System (ADS).** ^(Core)

- 119
 120 I.B.4.a) Each participating site must have a designated site director who is
 121 responsible for the day-to-day activities of the program at that site
 122 with overall coordination by the program director. ^(Core)
 123
 124 I.B.4.b) The number of and distance between participating sites must
 125 allow for fellows' full participation in all organized educational
 126 aspects of the program. ^{(Detail)†}
 127
 128 **I.C. The program, in partnership with its Sponsoring Institution, must engage in**
 129 **practices that focus on mission-driven, ongoing, systematic recruitment**
 130 **and retention of a diverse and inclusive workforce of residents (if present),**
 131 **fellows, faculty members, senior administrative staff members, and other**
 132 **relevant members of its academic community.** ^(Core)
 133

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

- 134
 135 **I.D. Resources**
 136
 137 **I.D.1. The program, in partnership with its Sponsoring Institution, must**
 138 **ensure the availability of adequate resources for fellow education.**
 139 ^(Core)
 140
 141 I.D.1.a) The psychiatry department of the Sponsoring Institution must be a
 142 part of or affiliated with at least one acute care general hospital.
 143 ^(Core)
 144
 145 I.D.1.a).(1) The acute care hospital must have a full range of services,
 146 including both medical and surgical services, intensive
 147 care units, an emergency department, a diagnostic
 148 laboratory and imaging services, and a pathology
 149 department. ^(Core)
 150
 151 I.D.1.b) There must be at least one long-term care facility. ^(Core)
 152
 153 I.D.1.b).(1) Such facilities should be either discrete institutions
 154 separate from an acute care hospital or formally
 155 designated units or services within an acute care hospital.
 156 ^(Detail)
 157
 158 I.D.1.c) There must be an ambulatory care service that provides care in a
 159 multidisciplinary environment. ^(Core)
 160
 161 I.D.1.d) Each participating site must provide teaching facilities and office
 162 space. ^(Core)
 163

164 I.D.1.e) There must be patients available of ~~all genders each sex~~ and
165 spanning the spectrum of psychiatric diagnoses in late life, and
166 from diverse socioeconomic, educational, and cultural
167 backgrounds. ^(Core)
168

169 **I.D.2. The program, in partnership with its Sponsoring Institution, must**
170 **ensure healthy and safe learning and working environments that**
171 **promote fellow well-being and provide for:** ^(Core)
172

173 **I.D.2.a) access to food while on duty;** ^(Core)
174

175 **I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available**
176 **and accessible for fellows with proximity appropriate for safe**
177 **patient care, if the fellows are assigned in-house call;** ^(Core)
178

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

179
180 **I.D.2.c) clean and private facilities for lactation that have refrigeration**
181 **capabilities, with proximity appropriate for safe patient care;**
182 ^(Core)
183

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

184
185 **I.D.2.d) security and safety measures appropriate to the participating**
186 **site; and,** ^(Core)
187

188 **I.D.2.e) accommodations for fellows with disabilities consistent with**
189 **the Sponsoring Institution's policy.** ^(Core)
190

191 **I.D.3. Fellows must have ready access to subspecialty-specific and other**
192 **appropriate reference material in print or electronic format. This**
193 **must include access to electronic medical literature databases with**
194 **full text capabilities.** ^(Core)
195

196 **I.D.4. The program's educational and clinical resources must be adequate**
197 **to support the number of fellows appointed to the program.** ^(Core)
198

199 I.E. ***A fellowship program usually occurs in the context of many learners and***
200 ***other care providers and limited clinical resources. It should be structured***
201 ***to optimize education for all learners present.***

202
203 I.E.1. **Fellows should contribute to the education of residents in core**
204 **programs, if present. ^(Core)**
205

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

206
207 **II. Personnel**

208
209 **II.A. Program Director**

210
211 **II.A.1. There must be one faculty member appointed as program director**
212 **with authority and accountability for the overall program, including**
213 **compliance with all applicable program requirements. ^(Core)**

214
215 **II.A.1.a) The Sponsoring Institution's Graduate Medical Education**
216 **Committee (GMEC) must approve a change in program**
217 **director. ^(Core)**

218
219 **II.A.1.b) Final approval of the program director resides with the**
220 **Review Committee. ^(Core)**
221

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual's responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director's nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

222
223 **II.A.2. The program director must be provided with support adequate for**
224 **administration of the program based upon its size and configuration.**
225 **^(Core)**

226
227 **II.A.2.a) At a minimum, the program director must be provided with the**
228 **salary support required to devote 25 percent FTE of non-clinical**
229 **time to the administration of the program. Additional support must**
230 **be provided based on program size as follows: ^(Core)**
231

<u>Number of Approved Fellow Positions</u>	<u>Minimum FTE</u>
<u>1-2</u>	<u>0.25</u>

<u>3 or more</u>	<u>0.375</u>
------------------	--------------

232
233 II.A.2.b) ~~The program director must devote on average (over one month) at~~
234 ~~least 10 hours per week to the program with one to two fellows, or,~~
235 ~~15 hours per week, to the program with three or more fellows. (Core)~~
236

Background and Intent: Twenty five percent FTE is defined as one and one quarter (1.25) days per week.

“Administrative time” is defined as non-clinical time spent meeting the responsibilities of the program director as detailed in requirements II.A.4.-II.A.4.a).(16).

The requirement does not address the source of funding required to provide the specified salary support.

237
238 **II.A.3. Qualifications of the program director:**

239
240 **II.A.3.a) must include subspecialty expertise and qualifications**
241 **acceptable to the Review Committee; (Core)**

242
243 **II.A.3.b) must include current certification in the subspecialty for**
244 **which they are the program director by the American Board**
245 **of Psychiatry and Neurology (ABPN) or by the American**
246 **Osteopathic Board of Neurology and Psychiatry, or**
247 **subspecialty qualifications that are acceptable to the Review**
248 **Committee; (Core)**

249
250 **II.A.3.c) must include current medical licensure and appropriate medical**
251 **staff appointment; and, (Core)**

252
253 **II.A.3.d) must include ongoing clinical activity. (Core)**

254
255 **II.A.4. Program Director Responsibilities**

256
257 **The program director must have responsibility, authority, and**
258 **accountability for: administration and operations; teaching and**
259 **scholarly activity; fellow recruitment and selection, evaluation, and**
260 **promotion of fellows, and disciplinary action; supervision of fellows;**
261 **and fellow education in the context of patient care. (Core)**

262
263 **II.A.4.a) The program director must:**

264
265 **II.A.4.a).(1) be a role model of professionalism; (Core)**

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program

director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

267
268
269
270
271
272

- II.A.4.a).(2) design and conduct the program in a fashion consistent with the needs of the community, the mission(s) of the Sponsoring Institution, and the mission(s) of the program; ^(Core)

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

273
274
275
276
277

- II.A.4.a).(3) administer and maintain a learning environment conducive to educating the fellows in each of the ACGME Competency domains; ^(Core)

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

278
279
280
281
282
283
284
285
286
287
288
289
290
291
292
293
294
295

- II.A.4.a).(4) develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the fellowship program education and at least annually thereafter, as outlined in V.B.; ^(Core)

- II.A.4.a).(5) have the authority to approve program faculty members for participation in the fellowship program education at all sites; ^(Core)

- II.A.4.a).(6) have the authority to remove program faculty members from participation in the fellowship program education at all sites; ^(Core)

- II.A.4.a).(7) have the authority to remove fellows from supervising interactions and/or learning environments that do not meet the standards of the program; ^(Core)

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

- 296
297 **II.A.4.a).(8)** submit accurate and complete information required
298 and requested by the DIO, GMEC, and ACGME; ^(Core)
299
300 **II.A.4.a).(9)** provide applicants who are offered an interview with
301 information related to the applicant's eligibility for the
302 relevant subspecialty board examination(s); ^(Core)
303
304 **II.A.4.a).(10)** provide a learning and working environment in which
305 fellows have the opportunity to raise concerns and
306 provide feedback in a confidential manner as
307 appropriate, without fear of intimidation or retaliation;
308 ^(Core)
309
310 **II.A.4.a).(11)** ensure the program's compliance with the Sponsoring
311 Institution's policies and procedures related to
312 grievances and due process; ^(Core)
313
314 **II.A.4.a).(12)** ensure the program's compliance with the Sponsoring
315 Institution's policies and procedures for due process
316 when action is taken to suspend or dismiss, not to
317 promote, or not to renew the appointment of a fellow;
318 ^(Core)
319

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

- 320
321 **II.A.4.a).(13)** ensure the program's compliance with the Sponsoring
322 Institution's policies and procedures on employment
323 and non-discrimination; ^(Core)
324
325 **II.A.4.a).(13).(a)** **Fellows must not be required to sign a non-**
326 **competition guarantee or restrictive covenant.**
327 ^(Core)
328
329 **II.A.4.a).(14)** document verification of program completion for all
330 graduating fellows within 30 days; ^(Core)
331
332 **II.A.4.a).(15)** provide verification of an individual fellow's
333 completion upon the fellow's request, within 30 days;
334 and, ^(Core)
335

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

336

337 II.A.4.a).(16) obtain review and approval of the Sponsoring
338 Institution’s DIO before submitting information or
339 requests to the ACGME, as required in the Institutional
340 Requirements and outlined in the ACGME Program
341 Director’s Guide to the Common Program
342 Requirements. ^(Core)
343

344 II.B. Faculty
345

346 *Faculty members are a foundational element of graduate medical education*
347 *– faculty members teach fellows how to care for patients. Faculty members*
348 *provide an important bridge allowing fellows to grow and become practice*
349 *ready, ensuring that patients receive the highest quality of care. They are*
350 *role models for future generations of physicians by demonstrating*
351 *compassion, commitment to excellence in teaching and patient care,*
352 *professionalism, and a dedication to lifelong learning. Faculty members*
353 *experience the pride and joy of fostering the growth and development of*
354 *future colleagues. The care they provide is enhanced by the opportunity to*
355 *teach. By employing a scholarly approach to patient care, faculty members,*
356 *through the graduate medical education system, improve the health of the*
357 *individual and the population.*

358
359 *Faculty members ensure that patients receive the level of care expected*
360 *from a specialist in the field. They recognize and respond to the needs of*
361 *the patients, fellows, community, and institution. Faculty members provide*
362 *appropriate levels of supervision to promote patient safety. Faculty*
363 *members create an effective learning environment by acting in a*
364 *professional manner and attending to the well-being of the fellows and*
365 *themselves.*
366

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment or salary support.

367
368 II.B.1. For each participating site, there must be a sufficient number of
369 faculty members with competence to instruct and supervise all
370 fellows at that location. ^(Core)
371

372 II.B.2. Faculty members must:

373
374 II.B.2.a) be role models of professionalism; ^(Core)
375

376 II.B.2.b) demonstrate commitment to the delivery of safe, quality,
377 cost-effective, patient-centered care; ^(Core)
378

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

379

- 380 **II.B.2.c)** demonstrate a strong interest in the education of fellows; ^(Core)
381
382 **II.B.2.d)** devote sufficient time to the educational program to fulfill
383 their supervisory and teaching responsibilities; ^(Core)
384
385 **II.B.2.e)** administer and maintain an educational environment
386 conducive to educating fellows; and, ^(Core)
387
388 **II.B.2.f)** pursue faculty development designed to enhance their skills.
389 ^(Core)
390
391 **II.B.3. Faculty Qualifications**
392
393 **II.B.3.a)** Faculty members must have appropriate qualifications in
394 their field and hold appropriate institutional appointments.
395 ^(Core)
396
397 **II.B.3.b)** Subspecialty physician faculty members must:
398
399 **II.B.3.b).(1)** have current certification in the subspecialty by the
400 **American Board of Psychiatry and Neurology or the**
401 **American Osteopathic Board of Neurology and**
402 **Psychiatry, or possess qualifications judged acceptable**
403 **to the Review Committee.** ^(Core)
404
405 **II.B.3.c)** Any non-physician faculty members who participate in
406 fellowship program education must be approved by the
407 program director. ^(Core)
408

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

- 409
410 **II.B.3.d)** Any other specialty physician faculty members must have
411 current certification in their specialty by the appropriate
412 **American Board of Medical Specialties (ABMS) member**
413 **board or American Osteopathic Association (AOA) certifying**
414 **board, or possess qualifications judged acceptable to the**
415 **Review Committee.** ^(Core)
416
417 **II.B.4. Core Faculty**
418
419 **Core faculty members must have a significant role in the education**
420 **and supervision of fellows and must devote a significant portion of**
421 **their entire effort to fellow education and/or administration, and**

422 must, as a component of their activities, teach, evaluate, and provide
423 formative feedback to fellows. ^(Core)
424

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.

425
426 **II.B.4.a) Core faculty members must be designated by the program**
427 **director.** ^(Core)
428

429 **II.B.4.b) Core faculty members must complete the annual ACGME**
430 **Faculty Survey.** ^(Core)
431

432 **II.B.4.c)** In addition to the program director, there must be at least one core
433 faculty member certified in the subspecialty by the ABPN or
434 AOBPN ~~in the subspecialty.~~ ^(Core)
435

436 **II.C. Program Coordinator**

437
438 **II.C.1. There must be administrative support for program coordination.** ^(Core)
439

440 **II.C.1.a)** ~~There must be a designated program coordinator.~~ ^(Core)
441

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

442
443 **II.D. Other Program Personnel**
444

445 **The program, in partnership with its Sponsoring Institution, must jointly**
446 **ensure the availability of necessary personnel for the effective**
447 **administration of the program.** ^(Core)
448

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

449
450 **II.D.1. Geriatric Care Team**
451

452 **II.D.1.a)** The geriatric care team should include representatives from
453 related clinical disciplines, including psychology, neuropsychology,
454 social work, psychiatric nursing, activity or occupational therapy,
455 physical therapy, pharmacy, and nutrition. ^(Core)
456

457 **II.D.1.b)** Qualified clinicians from disciplines within medicine, including one
458 or more of the following: family medicine, internal medicine

459 (including geriatric medicine), hospice and palliative medicine,
460 neurology, and physical medicine and rehabilitation, should be
461 available for participation on the geriatric care team for
462 consultation. ^(Core)
463

464 II.D.1.c) Fellows should have access to professionals representing allied
465 disciplines, including ethics, law, and pastoral care. ^(Detail)
466

467 III. Fellow Appointments

468 III.A. Eligibility Criteria

469 III.A.1. Eligibility Requirements – Fellowship Programs

470
471 **All required clinical education for entry into ACGME-accredited**
472 **fellowship programs must be completed in an ACGME-accredited**
473 **residency program, an AOA-approved residency program, a**
474 **program with ACGME International (ACGME-I) Advanced Specialty**
475 **Accreditation, or a Royal College of Physicians and Surgeons of**
476 **Canada (RCPSC)-accredited or College of Family Physicians of**
477 **Canada (CFPC)-accredited residency program located in Canada.**
478
479 ^(Core)
480
481

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

482
483 III.A.1.a) **Fellowship programs must receive verification of each**
484 **entering fellow’s level of competence in the required field,**
485 **upon matriculation, using ACGME, ACGME-I, or CanMEDS**
486 **Milestones evaluations from the core residency program.** ^(Core)
487

488 III.A.1.b) Prior to appointment in the program, fellows must have
489 satisfactorily completed a general psychiatry program that
490 satisfies the requirements in III.A.1. ^(Core)
491

492 III.A.1.c) **Fellow Eligibility Exception**

493
494 **The Review Committee for Psychiatry will allow the following**
495 **exception to the fellowship eligibility requirements:**
496

497 III.A.1.c).(1) **An ACGME-accredited fellowship program may accept**
498 **an exceptionally qualified international graduate**
499 **applicant who does not satisfy the eligibility**
500 **requirements listed in III.A.1., but who does meet all of**
501 **the following additional qualifications and conditions:**
502 ^(Core)
503

504 III.A.1.c).(1).(a) **evaluation by the program director and**
505 **fellowship selection committee of the**
506 **applicant’s suitability to enter the program,**

- 507 based on prior training and review of the
508 summative evaluations of training in the core
509 specialty; and, ^(Core)
510
511 **III.A.1.c).(1).(b)** review and approval of the applicant’s
512 exceptional qualifications by the GMEC; and,
513 ^(Core)
514
515 **III.A.1.c).(1).(c)** verification of Educational Commission for
516 Foreign Medical Graduates (ECFMG)
517 certification. ^(Core)
518
519 **III.A.1.c).(2)** Applicants accepted through this exception must have
520 an evaluation of their performance by the Clinical
521 Competency Committee within 12 weeks of
522 matriculation. ^(Core)
523

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

- 524
525 **III.B.** The program director must not appoint more fellows than approved by the
526 Review Committee. ^(Core)
527

- 528 **III.B.1.** All complement increases must be approved by the Review
529 Committee. ^(Core)
530

531 **IV. Educational Program**
532

533 *The ACGME accreditation system is designed to encourage excellence and*
534 *innovation in graduate medical education regardless of the organizational*
535 *affiliation, size, or location of the program.*
536

537 *The educational program must support the development of knowledgeable, skillful*
538 *physicians who provide compassionate care.*
539

540 *In addition, the program is expected to define its specific program aims consistent*
541 *with the overall mission of its Sponsoring Institution, the needs of the community*

542 *it serves and that its graduates will serve, and the distinctive capabilities of*
543 *physicians it intends to graduate. While programs must demonstrate substantial*
544 *compliance with the Common and subspecialty-specific Program Requirements, it*
545 *is recognized that within this framework, programs may place different emphasis*
546 *on research, leadership, public health, etc. It is expected that the program aims*
547 *will reflect the nuanced program-specific goals for it and its graduates; for*
548 *example, it is expected that a program aiming to prepare physician-scientists will*
549 *have a different curriculum from one focusing on community health.*

550
551 **IV.A.** The curriculum must contain the following educational components: ^(Core)

552
553 **IV.A.1.** a set of program aims consistent with the Sponsoring Institution's
554 mission, the needs of the community it serves, and the desired
555 distinctive capabilities of its graduates; ^(Core)

556
557 **IV.A.1.a)** The program's aims must be made available to program
558 applicants, fellows, and faculty members. ^(Core)

559
560 **IV.A.2.** competency-based goals and objectives for each educational
561 experience designed to promote progress on a trajectory to
562 autonomous practice in their subspecialty. These must be
563 distributed, reviewed, and available to fellows and faculty members;
564 ^(Core)

565
566 **IV.A.3.** delineation of fellow responsibilities for patient care, progressive
567 responsibility for patient management, and graded supervision in
568 their subspecialty; ^(Core)

569
Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

570
571 **IV.A.4.** structured educational activities beyond direct patient care; and,
572 ^(Core)

573
Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

574
575 **IV.A.5.** advancement of fellows' knowledge of ethical principles
576 foundational to medical professionalism. ^(Core)

577
578 **IV.B.** ACGME Competencies

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

580
581
582
583
584
585
586
587
588
589
590

IV.B.1. The program must integrate the following ACGME Competencies into the curriculum: ^(Core)

IV.B.1.a) Professionalism

Fellows must demonstrate a commitment to professionalism and an adherence to ethical principles. ^(Core)

IV.B.1.b) Patient Care and Procedural Skills

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality*. *Health Affairs*. 2008; 27(3):759-769.) In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

609
610
611
612

IV.B.1.b).(1) Fellows must be able to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health. ^(Core)

IV.B.1.b).(1).(a) Fellows must demonstrate ~~proficiency~~ competence in diagnosis and treatment of all major psychiatric disorders seen in elderly patients, including adjustment disorders, affective disorders, anxiety disorders, delirium, dementias/neurocognitive disorders, iatrogenesis, late-onset psychoses, medical presentations of psychiatric disorders, personality disorders, sexual disorders, sleep disorders, substance-related disorders, and continuation of psychiatric illnesses that began earlier in life. ^(Core)

IV.B.1.b).(1).(b) Fellows must demonstrate ~~proficiency~~ competence in performing the mental status examination that takes into account the special needs of elderly patients, including structured cognitive assessment,

613		community and environmental assessment, family
614		and caregiver assessment, medical assessment,
615		and functional assessment. ^(Core)
616		
617	IV.B.1.b).(1).(c)	Fellows must demonstrate proficiency <u>competence</u>
618		in short-term and long-term diagnostic and
619		treatment planning by using the appropriate
620		synthesis of clinical findings and historical as well
621		as current information acquired from the patient
622		and/or relevant others, including family members,
623		caregivers, and/or other health care professionals.
624		^(Core)
625		
626	IV.B.1.b).(1).(d)	Fellows must demonstrate proficiency <u>competence</u>
627		in the selection and use of clinical laboratory tests,
628		radiologic and other imaging procedures, and
629		polysomnographic, electrophysiologic, and
630		neuropsychologic tests. ^(Core)
631		
632	IV.B.1.b).(1).(e)	Fellows must demonstrate proficiency <u>competence</u>
633		in recognizing and managing psychiatric co-morbid
634		disorders, including dementia/ <u>neurocognitive</u>
635		<u>disorders</u> , and depression, as well as agitation,
636		wandering, changes in sleep patterns, and
637		aggressiveness. ^(Core)
638		
639	IV.B.1.b).(1).(e).(i)	This must include <u>demonstration of</u>
640		competence in the ongoing monitoring of
641		changes in mental and physical health
642		status and medical regimens. ^(Core)
643		
644	IV.B.1.b).(1).(f)	Fellows must demonstrate proficiency <u>competence</u>
645		in recognizing the stressful impact of psychiatric
646		illness on caregivers, assessing their emotional
647		state and ability to function, and providing guidance
648		and protection to caregivers. ^(Core)
649		
650	IV.B.1.b).(1).(g)	Fellows must demonstrate competence in
651		recognizing and assessing elder abuse, and
652		providing appropriate interventions. ^(Core)
653		
654	IV.B.1.b).(1).(h)	Fellows must demonstrate proficiency <u>competence</u>
655		in managing the care of elderly patients with
656		emotional or behavioral disorders, using age-
657		appropriate modifications in techniques and goals
658		in applying the various psychotherapies (with
659		individual, group, and family focuses) and
660		behavioral strategies. ^(Core)
661		

662	IV.B.1.b).(2)	Fellows must be able to perform all medical, diagnostic, and surgical procedures considered essential for the area of practice. (Core)
663		
664		
665		
666	IV.B.1.c)	Medical Knowledge
667		
668		Fellows must demonstrate knowledge of established and evolving biomedical, clinical, epidemiological and social-behavioral sciences, as well as the application of this knowledge to patient care. (Core)
669		
670		
671		
672		
673	IV.B.1.c).(1)	Fellows must demonstrate proficiency <u>competence</u> in their knowledge of the following content and skills areas:
674		
675		
676	IV.B.1.c).(1).(a)	biological and psychosocial aspects of normal aging, psychiatric impact of acute and chronic physical illnesses, and biological and psychosocial aspects of the pathology of primary psychiatric disturbances beginning in or continuing into older age; (Core)
677		
678		
679		
680		
681		
682		
683	IV.B.1.c).(1).(b)	current scientific understanding of aging and longevity, including theories of aging, epidemiology and natural history of aging, and diseases of elderly patients, to include: (Core)
684		
685		
686		
687		
688	IV.B.1.c).(1).(b).(i)	effects of biologic aging on human physiology with emphasis on altered pharmacokinetics, pharmacodynamics, and sensory acuity in elderly patients; (Core)
689		
690		
691		
692		
693	IV.B.1.c).(1).(b).(ii)	differences and gradations between normal and abnormal age-related changes with particular reference to memory and cognition, affective stability, personality and behavioral patterns, sleep, and sexuality; and, (Core)
694		
695		
696		
697		
698		
699		
700	IV.B.1.c).(1).(b).(iii)	successful and maladaptive responses to stressors frequently encountered in elderly patients, including retirement, death of a spouse, role changes, interpersonal and health status losses, financial difficulties, environmental relocations, and increased dependency. (Core)
701		
702		
703		
704		
705		
706		
707		
708	IV.B.1.c).(1).(c)	relevance of cultural and ethnic differences, and the special problems of disadvantaged minority groups, as these relate to mental illness in elderly patients; (Core)
709		
710		
711		
712		

713	IV.B.1.c).(1).(d)	epidemiology, diagnosis, and treatment of all major psychiatric disorders seen in elderly patients; ^(Core)
714		
715		
716	IV.B.1.c).(1).(e)	American culture and subcultures, including immigrant populations, particularly those found in the patient community associated with the educational program, with specific focus on the cultural elements of the relationship between the fellow and the patient including the dynamics of differences in cultural identity, values and preferences, and power; ^(Core)
717		
718		
719		
720		
721		
722		
723		
724		
725	IV.B.1.c).(1).(f)	indications, side effects, and therapeutic limitations of psychoactive drugs and the pharmacologic alterations associated with aging, including: ^(Core)
726		
727		
728		
729	IV.B.1.c).(1).(f).(i)	changes in pharmacokinetics, pharmacodynamics, and drug interactions; ^(Core)
730		
731

739		
740	IV.B.1.c).(1).(g)	applications and limitations of behavioral therapeutic strategies, and physical restraints; ^(Core)
741		
742		
743	IV.B.1.c).(1).(h)	appropriate use and application of electroconvulsive therapy and other non-pharmacological somatic therapies in elderly patients; ^(Core)
744		
745		
746		
747		
748	IV.B.1.c).(1).(i)	appropriate use of psychodynamic understanding of developmental problems, conflict, and adjustment difficulties in elderly patients which may complicate the clinical presentation and influence the physician-patient relationship or treatment planning; ^(Core)
749		
750		
751		
752		
753		
754		
755	IV.B.1.c).(1).(j)	appropriate use of psychotherapies as applied to elderly patients, including individual, group, and family therapies; ^(Core)
756		
757		
758		
759	IV.B.1.c).(1).(k)	psychosocial impact of institutionalization; ^(Core)
760		
761	IV.B.1.c).(1).(l)	family dynamics in the context of aging, including intergenerational issues; ^(Core)
762		
763		

- 764 IV.B.1.c).(1).(m) ethical and legal issues especially pertinent to
 765 geriatric psychiatry, including competence,
 766 capacity, guardianship, right to refuse treatment,
 767 wills, advance directives, informed consent, elder
 768 abuse, the withholding of medical treatments, and
 769 federal legislative guidelines governing
 770 psychotropic drug prescription in nursing homes
 771 and other settings; ^(Core)
 772
- 773 IV.B.1.c).(1).(n) current economic aspects of supporting services
 774 and practice management, including Title III of the
 775 Older Americans Act, Medicare, Medicaid, and cost
 776 containment; and, ^(Core)
 777
- 778 IV.B.1.c).(1).(o) research methodologies related to geriatric
 779 psychiatry, including biostatistics, clinical
 780 epidemiology, medical information sciences,
 781 decision analysis, critical literature review, and
 782 research design (including cross-sectional and
 783 longitudinal methods). ^(Core)
 784

IV.B.1.d)

Practice-based Learning and Improvement

Fellows must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. ^(Core)

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

- 792
- 793 **IV.B.1.e) Interpersonal and Communication Skills**
- 794
- 795 **Fellows must demonstrate interpersonal and communication**
 796 **skills that result in the effective exchange of information and**
 797 **collaboration with patients, their families, and health**
 798 **professionals. ^(Core)**

IV.B.1.f)

Systems-based Practice

Fellows must demonstrate an awareness of and responsiveness to the larger context and system of health care, including the social determinants of health, as well as the ability to call effectively on other resources to provide optimal health care. ^(Core)

- 807
808 **IV.C. Curriculum Organization and Fellow Experiences**
809
810
811 **IV.C.1. The curriculum must be structured to optimize fellow educational**
812 **experiences, the length of these experiences, and supervisory**
813 **continuity.** (Core)
814
815 IV.C.1.a) Curriculum design must be consistent with the program’s aims
816 (IV.A.1.), and must demonstrate a systematic approach, with
817 attention to evidence-based principles and scientific literature,
818 standards of the profession, and developmental appropriateness
819 for learners. (Core)
820
821 IV.C.1.b) The assignment of rotations must be structured to minimize the
822 frequency of rotational transitions. (Core)
823
824 **IV.C.2. The program must provide instruction and experience in pain**
825 **management if applicable for the subspecialty, including recognition**
826 **of the signs of addiction.** (Core)
827
828 IV.C.3. The 12-month program must be completed within no more than a two-
829 year period. (Core)
830
831 IV.C.4. Conferences in geriatric psychiatry, including grand rounds, case
832 conferences, seminars, and journal club should be specifically designed
833 to augment the clinical experiences. (Core)
834
835 IV.C.4.a) Fellows must attend at least 70 percent of all required didactic
836 components of the program. Attendance by fellows and faculty
837 members should be documented. (Detail)
838
839 IV.C.5. The curriculum must include didactic instruction and clinical experiences
840 to enable fellows to achieve all required competency-based outcomes.
841 (Core)
842
843 IV.C.6. As part of their longitudinal care experience, fellows must be assigned to
844 follow and treat patients requiring continuing care. (Core)
845
846 IV.C.7. Fellows should have clinical experience in geriatric psychopharmacology,
847 electroconvulsive therapy (ECT), and using individual and group
848 psychotherapies. (Core)
849
850 IV.C.8. Fellows must have patient care experiences as part of an interdisciplinary
851 geriatric care team. (Core)
852
853 IV.C.9. Fellows must have geriatric psychiatry consultation experience. (Core)
854
855 IV.C.9.a) Consultation experiences should be formally available on the non-
856 psychiatric services of an acute care hospital. (Detail)
857

- 858 IV.C.9.b) Experience should include consultation to inpatient, outpatient,
 859 and emergency services, as well as consultative experience in
 860 chronic care facilities. ^(Detail)
 861
- 862 IV.C.10. Fellows should have experiences that enable them to become familiar
 863 with the organizational and administrative aspects of home health care
 864 services, outreach services, and crisis intervention services in both
 865 community and home settings. ^(Core)
 866
- 867 IV.C.11. Each fellow must have a minimum of two hours of faculty preceptorship
 868 weekly, one of which must be one-to-one preceptorship and one of which
 869 may be group preceptorship. ^(Core)
 870
- 871 IV.C.12. Each fellow must maintain a patient log documenting all clinical
 872 experiences. ^(Detail)
 873

874 **IV.D. Scholarship**

875
 876 ***Medicine is both an art and a science. The physician is a humanistic***
 877 ***scientist who cares for patients. This requires the ability to think critically,***
 878 ***evaluate the literature, appropriately assimilate new knowledge, and***
 879 ***practice lifelong learning. The program and faculty must create an***
 880 ***environment that fosters the acquisition of such skills through fellow***
 881 ***participation in scholarly activities as defined in the subspecialty-specific***

 893

894 **IV.D.1. Program Responsibilities**

- 895
 896 **IV.D.1.a) The program must demonstrate evidence of scholarly**
 897 **activities, consistent with its mission(s) and aims. ^(Core)**
 898

899 **IV.D.2. Faculty Scholarly Activity**

- 900
 901 IV.D.2.a) Faculty members must participate in scholarly activities
 902 appropriate to the subspecialty, including local, regional, and
 903 national specialty societies, research, presentations, or
 904 publications. ^(Detail)
 905
- 906 IV.D.2.b) Faculty members must regularly participate in organized clinical
 907 discussions, rounds, journal clubs, and conferences. ^(Detail)
 908

909 **IV.D.3. Fellow Scholarly Activity**
910
911 IV.D.3.a) Fellows must participate in developing new knowledge or
912 evaluating research findings. ^(Core)
913

914 **V. Evaluation**

915
916 **V.A. Fellow Evaluation**

917
918 **V.A.1. Feedback and Evaluation**
919

Background and Intent: Feedback is ongoing information provided regarding aspects of one’s performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- **fellows identify their strengths and weaknesses and target areas that need work**
- **program directors and faculty members recognize where fellows are struggling and address problems immediately**

Summative evaluation is *evaluating a fellow’s learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

920
921 **V.A.1.a) Faculty members must directly observe, evaluate, and**
922 **frequently provide feedback on fellow performance during**
923 **each rotation or similar educational assignment. ^(Core)**
924

925 V.A.1.a).(1) The evaluation must include review and discussion with
926 each fellow of ~~his or her~~ the fellow’s educational record
927 documenting completion of all required components at the
928 time of the evaluation, of the program, evaluations of
929 clinical and didactic performance by supervisors and
930 teachers, and patient log documenting all clinical
931 experiences. ^(Detail)
932

933 V.A.1.a).(2) Assessment should include quarterly written evaluations of
934 all fellows by all supervisors and directors of clinical
935 components of the program. (Detail)
936

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

937
938 V.A.1.b) Evaluation must be documented at the completion of the
939 assignment. (Core)
940

941 V.A.1.b).(1) Evaluations must be completed at least every three
942 months. (Core)
943

944 V.A.1.c) The program must provide an objective performance
945 evaluation based on the Competencies and the subspecialty-
946 specific Milestones, and must: (Core)
947

948 V.A.1.c).(1) use multiple evaluators (e.g., faculty members, peers,
949 patients, self, and other professional staff members);
950 and, (Core)
951

952 V.A.1.c).(2) provide that information to the Clinical Competency
953 Committee for its synthesis of progressive fellow
954 performance and improvement toward unsupervised
955 practice. (Core)
956

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

957
958 V.A.1.d) The program director or their designee, with input from the
959 Clinical Competency Committee, must:
960

961 V.A.1.d).(1) meet with and review with each fellow their
962 documented semi-annual evaluation of performance,
963 including progress along the subspecialty-specific
964 Milestones. (Core)
965

966 V.A.1.d).(2) develop plans for fellows failing to progress, following
967 institutional policies and procedures. (Core)

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

- 969
970 **V.A.1.e)** The evaluations of a fellow's performance must be accessible
971 for review by the fellow. ^(Core)
972
- 973 **V.A.2.** Final Evaluation
974
- 975 **V.A.2.a)** The program director must provide a final evaluation for each
976 fellow upon completion of the program. ^(Core)
977
- 978 **V.A.2.a).(1)** The subspecialty-specific Milestones, and when
979 applicable the subspecialty-specific Case Logs, must
980 be used as tools to ensure fellows are able to engage
981 in autonomous practice upon completion of the
982 program. ^(Core)
983
- 984 **V.A.2.a).(2)** The final evaluation must:
985
- 986 **V.A.2.a).(2).(a)** become part of the fellow's permanent record
987 maintained by the institution, and must be
988 accessible for review by the fellow in
989 accordance with institutional policy; ^(Core)
990
- 991 **V.A.2.a).(2).(b)** verify that the fellow has demonstrated the
992 knowledge, skills, and behaviors necessary to
993 enter autonomous practice; ^(Core)
994
- 995 **V.A.2.a).(2).(c)** consider recommendations from the Clinical
996 Competency Committee; and, ^(Core)
997
- 998 **V.A.2.a).(2).(d)** be shared with the fellow upon completion of
999 the program. ^(Core)
1000

- 1001 **V.A.3. A Clinical Competency Committee must be appointed by the**
 1002 **program director. (Core)**
 1003
- 1004 **V.A.3.a) At a minimum the Clinical Competency Committee must**
 1005 **include three members, at least one of whom is a core faculty**
 1006 **member. Members must be faculty members from the same**
 1007 **program or other programs, or other health professionals**
 1008 **who have extensive contact and experience with the**
 1009 **program’s fellows. (Core)**
 1010
- 1011 **V.A.3.b) The Clinical Competency Committee must:**
 1012
- 1013 **V.A.3.b).(1) review all fellow evaluations at least semi-annually;**
 1014 **(Core)**
 1015
- 1016 **V.A.3.b).(2) determine each fellow’s progress on achievement of**
 1017 **the subspecialty-specific Milestones; and, (Core)**
 1018
- 1019 **V.A.3.b).(3) meet prior to the fellows’ semi-annual evaluations and**
 1020 **advise the program director regarding each fellow’s**
 1021 **progress. (Core)**
 1022
- 1023 **V.B. Faculty Evaluation**
 1024
- 1025 **V.B.1. The program must have a process to evaluate each faculty**
 1026 **member’s performance as it relates to the educational program at**
 1027 **least annually. (Core)**
 1028

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program’s faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 1029
- 1030 **V.B.1.a) This evaluation must include a review of the faculty member’s**
 1031 **clinical teaching abilities, engagement with the educational**
 1032 **program, participation in faculty development related to their**

- 1033 skills as an educator, clinical performance, professionalism,
1034 and scholarly activities. ^(Core)
1035
1036 **V.B.1.b)** This evaluation must include written, confidential evaluations
1037 by the fellows. ^(Core)
1038
1039 **V.B.2.** Faculty members must receive feedback on their evaluations at least
1040 annually. ^(Core)
1041

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

- 1042
1043 **V.C. Program Evaluation and Improvement**
1044
1045 **V.C.1.** The program director must appoint the Program Evaluation
1046 Committee to conduct and document the Annual Program
1047 Evaluation as part of the program's continuous improvement
1048 process. ^(Core)
1049
1050 **V.C.1.a)** The Program Evaluation Committee must be composed of at
1051 least two program faculty members, at least one of whom is a
1052 core faculty member, and at least one fellow. ^(Core)
1053
1054 **V.C.1.b)** Program Evaluation Committee responsibilities must include:
1055
1056 **V.C.1.b).(1)** acting as an advisor to the program director, through
1057 program oversight; ^(Core)
1058
1059 **V.C.1.b).(2)** review of the program's self-determined goals and
1060 progress toward meeting them; ^(Core)
1061
1062 **V.C.1.b).(3)** guiding ongoing program improvement, including
1063 development of new goals, based upon outcomes;
1064 and, ^(Core)
1065
1066 **V.C.1.b).(4)** review of the current operating environment to identify
1067 strengths, challenges, opportunities, and threats as
1068 related to the program's mission and aims. ^(Core)
1069

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.

1070

- 1071 V.C.1.c) The Program Evaluation Committee should consider the
 1072 following elements in its assessment of the program:
 1073
 1074 V.C.1.c).(1) fellow performance; ^(Core)
 1075
 1076 V.C.1.c).(2) faculty development; and, ^(Core)
 1077
 1078 V.C.1.c).(3) progress on the previous year’s action plan(s). ^(Core)
 1079
 1080 V.C.1.d) The Program Evaluation Committee must evaluate the
 1081 program’s mission and aims, strengths, areas for
 1082 improvement, and threats. ^(Core)
 1083
 1084 V.C.1.e) The annual review, including the action plan, must:
 1085
 1086 V.C.1.e).(1) be distributed to and discussed with the members of
 1087 the teaching faculty and the fellows; and, ^(Core)
 1088
 1089 V.C.1.e).(2) be submitted to the DIO. ^(Core)
 1090
 1091 V.C.2. The program must participate in a Self-Study prior to its 10-Year
 1092 Accreditation Site Visit. ^(Core)
 1093
 1094 V.C.2.a) A summary of the Self-Study must be submitted to the DIO.
 1095 ^(Core)
 1096

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

- 1097
 1098 V.C.3. *One goal of ACGME-accredited education is to educate physicians*
 1099 *who seek and achieve board certification. One measure of the*
 1100 *effectiveness of the educational program is the ultimate pass rate.*
 1101
 1102 *The program director should encourage all eligible program*
 1103 *graduates to take the certifying examination offered by the*
 1104 *applicable American Board of Medical Specialties (ABMS) member*
 1105 *board or American Osteopathic Association (AOA) certifying board.*
 1106
 1107 V.C.3.a) For subspecialties in which the ABMS member board and/or
 1108 AOA certifying board offer(s) an annual written exam, in the
 1109 preceding three years, the program’s aggregate pass rate of
 1110 those taking the examination for the first time must be higher

- 1111 than the bottom fifth percentile of programs in that
 1112 subspecialty. ^{(Outcome)‡}
 1113
 1114 **V.C.3.b)** For subspecialties in which the ABMS member board and/or
 1115 AOA certifying board offer(s) a biennial written exam, in the
 1116 preceding six years, the program’s aggregate pass rate of
 1117 those taking the examination for the first time must be higher
 1118 than the bottom fifth percentile of programs in that
 1119 subspecialty. ^(Outcome)
 1120
 1121 **V.C.3.c)** For subspecialties in which the ABMS member board and/or
 1122 AOA certifying board offer(s) an annual oral exam, in the
 1123 preceding three years, the program’s aggregate pass rate of
 1124 those taking the examination for the first time must be higher
 1125 than the bottom fifth percentile of programs in that
 1126 subspecialty. ^(Outcome)
 1127
 1128 **V.C.3.d)** For subspecialties in which the ABMS member board and/or
 1129 AOA certifying board offer(s) a biennial oral exam, in the
 1130 preceding six years, the program’s aggregate pass rate of
 1131 those taking the examination for the first time must be higher
 1132 than the bottom fifth percentile of programs in that
 1133 subspecialty. ^(Outcome)
 1134
 1135 **V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program
 1136 whose graduates over the time period specified in the
 1137 requirement have achieved an 80 percent pass rate will have
 1138 met this requirement, no matter the percentile rank of the
 1139 program for pass rate in that subspecialty. ^(Outcome)
 1140

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

- 1141
 1142 **V.C.3.f)** Programs must report, in ADS, board certification status
 1143 annually for the cohort of board-eligible fellows that
 1144 graduated seven years earlier. ^(Core)
 1145

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME

will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

VI. The Learning and Working Environment

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

- *Excellence in the safety and quality of care rendered to patients by fellows today*
- *Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice*
- *Excellence in professionalism through faculty modeling of:*
 - *the effacement of self-interest in a humanistic environment that supports the professional development of physicians*
 - *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
- *Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team*

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and

fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating fellows will apply these skills to critique their future unsupervised practice and effect quality improvement measures.

It is necessary for fellows and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.

VI.A.1.a) Patient Safety

VI.A.1.a).(1) Culture of Safety

A culture of safety requires continuous identification of vulnerabilities and a willingness to transparently deal with them. An effective organization has formal mechanisms to assess the knowledge, skills, and attitudes of its personnel toward safety in order to identify areas for improvement.

VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows must actively participate in patient safety systems and contribute to a culture of safety. (Core)

VI.A.1.a).(1).(b) The program must have a structure that promotes safe, interprofessional, team-based care. (Core)

VI.A.1.a).(2) Education on Patient Safety

1215
1216
1217
1218

Programs must provide formal educational activities that promote patient safety-related goals, tools, and techniques. ^(Core)

Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.

1262

VI.A.1.a).(3)

Patient Safety Events

Reporting, investigation, and follow-up of adverse events, near misses, and unsafe conditions are pivotal mechanisms for improving patient safety, and are essential for the success of any patient safety program. Feedback and experiential learning are essential to developing true competence in the ability to identify causes and institute sustainable systems-based changes to ameliorate patient safety vulnerabilities.

VI.A.1.a).(3).(a)

Residents, fellows, faculty members, and other clinical staff members must:

VI.A.1.a).(3).(a).(i)

know their responsibilities in reporting patient safety events at the clinical site; ^(Core)

VI.A.1.a).(3).(a).(ii)

know how to report patient safety events, including near misses, at the clinical site; and, ^(Core)

VI.A.1.a).(3).(a).(iii)

be provided with summary information of their institution's patient safety reports. ^(Core)

VI.A.1.a).(3).(b)

Fellows must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions. ^(Core)

VI.A.1.a).(4)

Fellow Education and Experience in Disclosure of Adverse Events

Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for fellows to develop and apply.

1263	VI.A.1.a).(4).(a)	All fellows must receive training in how to disclose adverse events to patients and families. ^(Core)
1264		
1265		
1266

1304	VI.A.1.b).(3).(a).(i)	This should include activities aimed at reducing health care disparities. ^(Detail)
1305		
1306		
1307	VI.A.2.	Supervision and Accountability
1308		
1309	VI.A.2.a)	<i>Although the attending physician is ultimately responsible for the care of the patient, every physician shares in the responsibility and accountability for their efforts in the provision of care. Effective programs, in partnership with their Sponsoring Institutions, define, widely communicate,</i>
1310		
1311		
1312		
1313		

1314 *and monitor a structured chain of responsibility and*
1315 *accountability as it relates to the supervision of all patient*
1316 *care.*

1317
1318 *Supervision in the setting of graduate medical education*
1319 *provides safe and effective care to patients; ensures each*
1320 *fellow's development of the skills, knowledge, and attitudes*
1321 *required to enter the unsupervised practice of medicine; and*
1322 *establishes a foundation for continued professional growth.*

1323
1324 **VI.A.2.a).(1)** Each patient must have an identifiable and
1325 appropriately-credentialed and privileged attending
1326 physician (or licensed independent practitioner as
1327 specified by the applicable Review Committee) who is
1328 responsible and accountable for the patient's care.
1329 (Core)

1330
1331 **VI.A.2.a).(1).(a)** This information must be available to fellows,
1332 faculty members, other members of the health
1333 care team, and patients. (Core)

1334
1335 **VI.A.2.a).(1).(b)** Fellows and faculty members must inform each
1336 patient of their respective roles in that patient's
1337 care when providing direct patient care. (Core)

1338
1339 **VI.A.2.b)** *Supervision may be exercised through a variety of methods.*
1340 *For many aspects of patient care, the supervising physician*
1341 *may be a more advanced fellow. Other portions of care*
1342 *provided by the fellow can be adequately supervised by the*
1343 *appropriate availability of the supervising faculty member or*
1344 *fellow, either on site or by means of telecommunication*
1345 *technology. Some activities require the physical presence of*
1346 *the supervising faculty member. In some circumstances,*
1347 *supervision may include post-hoc review of fellow-delivered*
1348 *care with feedback.*

Background and Intent: There are circumstances where direct supervision without physical presence does not fulfill the requirements of the specific Review Committee. Review Committees will further specify what is meant by direct supervision without physical presence in specialties where allowed. "Physically present" is defined as follows: The teaching physician is located in the same room (or partitioned or curtained area, if the room is subdivided to accommodate multiple patients) as the patient and/or performs a face-to-face service.

1350
1351 **VI.A.2.b).(1)** The program must demonstrate that the appropriate
1352 level of supervision in place for all fellows is based on
1353 each fellow's level of training and ability, as well as
1354 patient complexity and acuity. Supervision may be
1355 exercised through a variety of methods, as appropriate
1356 to the situation. (Core)

1358	VI.A.2.b).(1).(a)	Only licensed independent practitioners as
1359		consistent with state regulations and medical staff
1360		bylaws may have primary responsibility for a
1361		patient. ^(Detail) [Moved from VI.A.2.b).(2)]
1362		
1363	VI.A.2.b).(2)	The program must define when physical presence of a
1364		supervising physician is required. ^(Core)
1365		
1366	VI.A.2.c)	Levels of Supervision
1367		
1368		To promote appropriate fellow supervision while providing
1369		for graded authority and responsibility, the program must use
1370		the following classification of supervision: ^(Core)
1371		
1372	VI.A.2.c).(1)	Direct Supervision:
1373		
1374	VI.A.2.c).(1).(a)	the supervising physician is physically present
1375		with the fellow during the key portions of the
1376		patient interaction. ^(Core)
1377		
1378	VI.A.2.c).(2)	Indirect Supervision: the supervising physician is not
1379		providing physical or concurrent visual or audio
1380		supervision but is immediately available to the fellow
1381		for guidance and is available to provide appropriate
1382		direct supervision. ^(Core)
1383		
1384	VI.A.2.c).(3)	Oversight – the supervising physician is available to
1385		provide review of procedures/encounters with
1386		feedback provided after care is delivered. ^(Core)
1387		
1388	VI.A.2.d)	The privilege of progressive authority and responsibility,
1389		conditional independence, and a supervisory role in patient
1390		care delegated to each fellow must be assigned by the
1391		program director and faculty members. ^(Core)
1392		
1393	VI.A.2.d).(1)	The program director must evaluate each fellow’s
1394		abilities based on specific criteria, guided by the
1395		Milestones. ^(Core)
1396		
1397	VI.A.2.d).(2)	Faculty members functioning as supervising
1398		physicians must delegate portions of care to fellows
1399		based on the needs of the patient and the skills of
1400		each fellow. ^(Core)
1401		
1402	VI.A.2.d).(3)	Fellows should serve in a supervisory role to junior
1403		fellows and residents in recognition of their progress
1404		toward independence, based on the needs of each
1405		patient and the skills of the individual resident or
1406		fellow. ^(Detail)
1407		

1408 VI.A.2.e) Programs must set guidelines for circumstances and events
1409 in which fellows must communicate with the supervising
1410 faculty member(s). ^(Core)

1411
1412 VI.A.2.e).(1) Each fellow must know the limits of their scope of
1413 authority, and the circumstances under which the
1414 fellow is permitted to act with conditional
1415 independence. ^(Outcome)
1416

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

1417
1418 VI.A.2.f) Faculty supervision assignments must be of sufficient
1419 duration to assess the knowledge and skills of each fellow
1420 and to delegate to the fellow the appropriate level of patient
1421 care authority and responsibility. ^(Core)
1422

1423 VI.B. Professionalism

1424
1425 VI.B.1. Programs, in partnership with their Sponsoring Institutions, must
1426 educate fellows and faculty members concerning the professional
1427 responsibilities of physicians, including their obligation to be
1428 appropriately rested and fit to provide the care required by their
1429 patients. ^(Core)
1430

1431 VI.B.2. The learning objectives of the program must:

1432
1433 VI.B.2.a) be accomplished through an appropriate blend of supervised
1434 patient care responsibilities, clinical teaching, and didactic
1435 educational events; ^(Core)
1436

1437 VI.B.2.b) be accomplished without excessive reliance on fellows to
1438 fulfill non-physician obligations; and, ^(Core)
1439

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1440
1441 VI.B.2.c) ensure manageable patient care responsibilities. ^(Core)
1442

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY

level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

 - VI.B.4.d) commitment to lifelong learning; ^(Outcome)
 - VI.B.4.e) monitoring of their patient care performance improvement indicators; and, ^(Outcome)
 - VI.B.4.f) accurate reporting of clinical and educational work hours, patient outcomes, and clinical experience data. ^(Outcome)
 - VI.B.5. All fellows and faculty members must demonstrate responsiveness to patient needs that supersedes self-interest. This includes the recognition that under certain circumstances, the best interests of

1479 the patient may be served by transitioning that patient's care to
1480 another qualified and rested provider. (Outcome)

1481
1482 **VI.B.6.** Programs, in partnership with their Sponsoring Institutions, must
1483 provide a professional, equitable, respectful, and civil environment
1484 that is free from discrimination, sexual and other forms of
1485 harassment, mistreatment, abuse, or coercion of students, fellows,
1486 faculty, and staff. (Core)

1487
1488 **VI.B.7.** Programs, in partnership with their Sponsoring Institutions, should
1489 have a process for education of fellows and faculty regarding
1490 unprofessional behavior and a confidential process for reporting,
1491 investigating, and addressing such concerns. (Core)

1492
1493 **VI.C.** Well-Being

1494
1495 *Psychological, emotional, and physical well-being are critical in the*
1496 *development of the competent, caring, and resilient physician and require*
1497 *proactive attention to life inside and outside of medicine. Well-being*
1498 *requires that physicians retain the joy in medicine while managing their*
1499 *own real life stresses. Self-care and responsibility to support other*
1500 *members of the health care team are important components of*
1501 *professionalism; they are also skills that must be modeled, learned, and*
1502 *nurtured in the context of other aspects of fellowship training.*

1503
1504 *Fellows and faculty members are at risk for burnout and depression.*
1505 *Programs, in partnership with their Sponsoring Institutions, have the same*
1506 *responsibility to address well-being as other aspects of resident*

1508 *responsibility for the well-being of each other. For example, a culture which*
1509 *encourages covering for colleagues after an illness without the expectation*
1510 *of reciprocity reflects the ideal of professionalism. A positive culture in a*
1511 *clinical learning environment models constructive behaviors, and prepares*
1512 *fellows with the skills and attitudes needed to thrive throughout their*
1513 *careers.*

1514
Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

1515

1516 VI.C.1. The responsibility of the program, in partnership with the
1517 Sponsoring Institution, to address well-being must include:

1518
1519 VI.C.1.a) efforts to enhance the meaning that each fellow finds in the
1520 experience of being a physician, including protecting time
1521 with patients, minimizing non-physician obligations,
1522 providing administrative support, promoting progressive
1523 autonomy and flexibility, and enhancing professional
1524 relationships; (Core)

1525
1526 VI.C.1.b) attention to scheduling, work intensity, and work
1527 compression that impacts fellow well-being; (Core)

1528
1529 VI.C.1.c) evaluating workplace safety data and addressing the safety of
1530 fellows and faculty members; (Core)

1531

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

1532
1533 VI.C.1.d) policies and programs that encourage optimal fellow and
1534 faculty member well-being; and, (Core)

1535

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

1536
1537 VI.C.1.d).(1) Fellows must be given the opportunity to attend
1538 medical, mental health, and dental care appointments,
1539 including those scheduled during their working hours.
1540 (Core)

1541

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

1542
1543 VI.C.1.e) attention to fellow and faculty member burnout, depression,
1544 and substance abuse. The program, in partnership with its
1545 Sponsoring Institution, must educate faculty members and
1546 fellows in identification of the symptoms of burnout,
1547 depression, and substance abuse, including means to assist
1548 those who experience these conditions. Fellows and faculty
1549 members must also be educated to recognize those
1550 symptoms in themselves and how to seek appropriate care.

1551
1552
1553

The program, in partnership with its Sponsoring Institution, must: ^(Core)

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance abuse. Materials and more information are available on the Physician Well-being section of the ACGME website (<http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being>).

1554
1555
1556
1557
1558
1559
1560
1561

VI.C.1.e).(1) encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another fellow, resident, or faculty member may be displaying signs of burnout, depression, substance abuse, suicidal ideation, or potential for violence; ^(Core)

Background and Intent: Individuals experiencing burnout, depression, substance abuse, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

1562
1563
1564
1565
1566
1567
1568
1569
1570

VI.C.1.e).(2) provide access to appropriate tools for self-screening; and, ^(Core)

VI.C.1.e).(3) provide access to confidential, affordable mental health assessment, counseling, and treatment, including access to urgent and emergent care 24 hours a day, seven days a week. ^(Core)

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

1571

1572 VI.C.2. There are circumstances in which fellows may be unable to attend
1573 work, including but not limited to fatigue, illness, family
1574 emergencies, and parental leave. Each program must allow an
1575 appropriate length of absence for fellows unable to perform their
1576 patient care responsibilities. ^(Core)
1577

1578 VI.C.2.a) The program must have policies and procedures in place to
1579 ensure coverage of patient care. ^(Core)
1580

1581 VI.C.2.b) These policies must be implemented without fear of negative
1582 consequences for the fellow who is or was unable to provide
1583 the clinical work. ^(Core)
1584

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

1585
1586 VI.D. Fatigue Mitigation
1587

1588 VI.D.1. Programs must:

1589
1590 VI.D.1.a) educate all faculty members and fellows to recognize the
1591 signs of fatigue and sleep deprivation; ^(Core)
1592

1593 VI.D.1.b) educate all faculty members and fellows in alertness
1594 management and fatigue mitigation processes; and, ^(Core)
1595

1596 VI.D.1.c) encourage fellows to use fatigue mitigation processes to
1597 manage the potential negative effects of fatigue on patient
1598 care and learning. ^(Detail)
1599

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

1600
1601 VI.D.2. Each program must ensure continuity of patient care, consistent
1602 with the program's policies and procedures referenced in VI.C.2–

1603 VI.C.2.b), in the event that a fellow may be unable to perform their
1604 patient care responsibilities due to excessive fatigue. ^(Core)

1605
1606 VI.D.3. The program, in partnership with its Sponsoring Institution, must
1607 ensure adequate sleep facilities and safe transportation options for
1608 fellows who may be too fatigued to safely return home. ^(Core)

1609
1610 VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care

1611
1612 VI.E.1. Clinical Responsibilities

1613
1614 The clinical responsibilities for each fellow must be based on PGY
1615 level, patient safety, fellow ability, severity and complexity of patient
1616 illness/condition, and available support services. ^(Core)

1617

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

1618
1619 VI.E.2. Teamwork

1620
1621 Fellows must care for patients in an environment that maximizes
1622 communication. This must include the opportunity to work as a
1623 member of effective interprofessional teams that are appropriate to
1624 the delivery of care in the subspecialty and larger health system.
1625 ^(Core)

1626
1627 VI.E.2.a) Contributors to effective interprofessional teams include consulting
1628 physicians, psychologists, psychiatric nurses, social workers, and
1629 other professional and paraprofessional mental health personnel
1630 involved in the evaluation and treatment of patients. ^(Detail)

1631
1632 VI.E.3. Transitions of Care

1633
1634 VI.E.3.a) Programs must design clinical assignments to optimize
1635 transitions in patient care, including their safety, frequency,
1636 and structure. ^(Core)

1637
1638 VI.E.3.b) Programs, in partnership with their Sponsoring Institutions,
1639 must ensure and monitor effective, structured hand-over
1640 processes to facilitate both continuity of care and patient
1641 safety. ^(Core)

1642
1643 VI.E.3.c) Programs must ensure that fellows are competent in
1644 communicating with team members in the hand-over process.
1645 ^(Outcome)

1646
1647 VI.E.3.d) Programs and clinical sites must maintain and communicate
1648 schedules of attending physicians and fellows currently
1649 responsible for care. ^(Core)

1650
1651 VI.E.3.e) Each program must ensure continuity of patient care,
1652 consistent with the program’s policies and procedures
1653 referenced in VI.C.2-VI.C.2.b), in the event that a fellow may
1654 be unable to perform their patient care responsibilities due to
1655 excessive fatigue or illness, or family emergency. ^(Core)

1656
1657 VI.F. Clinical Experience and Education

1658
1659 *Programs, in partnership with their Sponsoring Institutions, must design*
1660 *an effective program structure that is configured to provide fellows with*
1661 *educational and clinical experience opportunities, as well as reasonable*
1662 *opportunities for rest and personal activities.*

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

1664
1665 VI.F.1. Maximum Hours of Clinical and Educational Work per Week

1666
1667 Clinical and educational work hours must be limited to no more than
1668 80 hours per week, averaged over a four-week period, inclusive of all
1669 in-house clinical and educational activities, clinical work done from
1670 home, and all moonlighting. ^(Core)

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

VI.F.2. Mandatory Time Free of Clinical Work and Education

- VI.F.2.a) The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. ^(Core)**

1679
1680 **VI.F.2.b) Fellows should have eight hours off between scheduled**
1681 **clinical work and education periods.** (Detail)

1682
1683 **VI.F.2.b).(1) There may be circumstances when fellows choose to**
1684 **stay to care for their patients or return to the hospital**
1685 **with fewer than eight hours free of clinical experience**
1686 **and education. This must occur within the context of**
1687 **the 80-hour and the one-day-off-in-seven**
1688 **requirements.** (Detail)
1689

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1690
1691 **VI.F.2.c) Fellows must have at least 14 hours free of clinical work and**
1692 **education after 24 hours of in-house call.** (Core)
1693

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1694
1695 **VI.F.2.d) Fellows must be scheduled for a minimum of one day in**
1696 **seven free of clinical work and required education (when**
1697 **averaged over four weeks). At-home call cannot be assigned**
1698 **on these free days.** (Core)
1699

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

1700
1701 **VI.F.3. Maximum Clinical Work and Education Period Length**
1702

- 1703 VI.F.3.a) Clinical and educational work periods for fellows must not
 1704 exceed 24 hours of continuous scheduled clinical
 1705 assignments. ^(Core)
 1706
 1707 VI.F.3.a).(1) Up to four hours of additional time may be used for
 1708 activities related to patient safety, such as providing
 1709 effective transitions of care, and/or fellow education.
 1710 ^(Core)
 1711
 1712 VI.F.3.a).(1).(a) Additional patient care responsibilities must not
 1713 be assigned to a fellow during this time. ^(Core)
 1714

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

- 1715
 1716 VI.F.4. Clinical and Educational Work Hour Exceptions
 1717
 1718 VI.F.4.a) In rare circumstances, after handing off all other
 1719 responsibilities, a fellow, on their own initiative, may elect to
 1720 remain or return to the clinical site in the following
 1721 circumstances:
 1722
 1723 VI.F.4.a).(1) to continue to provide care to a single severely ill or
 1724 unstable patient; ^(Detail)
 1725
 1726 VI.F.4.a).(2) humanistic attention to the needs of a patient or
 1727 family; or, ^(Detail)
 1728
 1729 VI.F.4.a).(3) to attend unique educational events. ^(Detail)
 1730
 1731 VI.F.4.b) These additional hours of care or education will be counted
 1732 toward the 80-hour weekly limit. ^(Detail)
 1733

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

- 1734
 1735 VI.F.4.c) A Review Committee may grant rotation-specific exceptions
 1736 for up to 10 percent or a maximum of 88 clinical and

1737 educational work hours to individual programs based on a
1738 sound educational rationale.

1739
1740 The Review Committee for Psychiatry will not consider requests
1741 for exceptions to the 80-hour limit to the residents' work week.
1742

1743 **VI.F.4.c).(1)** In preparing a request for an exception, the program
1744 director must follow the clinical and educational work
1745 hour exception policy from the *ACGME Manual of*
1746 *Policies and Procedures.* (Core)

1747
1748 **VI.F.4.c).(2)** Prior to submitting the request to the Review
1749 Committee, the program director must obtain approval
1750 from the Sponsoring Institution's GMEC and DIO. (Core)
1751

Background and Intent: The provision for exceptions for up to 88 hours per week has been modified to specify that exceptions may be granted for specific rotations if the program can justify the increase based on criteria specified by the Review Committee. As in the past, Review Committees may opt not to permit exceptions. The underlying philosophy for this requirement is that while it is expected that all fellows should be able to train within an 80-hour work week, it is recognized that some programs may include rotations with alternate structures based on the nature of the specialty. DIO/GMEC approval is required before the request will be considered by the Review Committee.

1752
1753 **VI.F.5. Moonlighting**

1754
1755 **VI.F.5.a)** Moonlighting must not interfere with the ability of the fellow
1756 to achieve the goals and objectives of the educational
1757 program, and must not interfere with the fellow's fitness for
1758 work nor compromise patient safety. (Core)

1759
1760 **VI.F.5.b)** Time spent by fellows in internal and external moonlighting
1761 (as defined in the ACGME Glossary of Terms) must be
1762 counted toward the 80-hour maximum weekly limit. (Core)
1763

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

1764
1765 **VI.F.6. In-House Night Float**

1766
1767 Night float must occur within the context of the 80-hour and one-
1768 day-off-in-seven requirements. (Core)
1769

Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

1770
1771 **VI.F.7. Maximum In-House On-Call Frequency**
1772

1773		Fellows must be scheduled for in-house call no more frequently than every third night (when averaged over a four-week period). (Core)
1774		
1775		
1776	VI.F.8.	At-Home Call
1777		
1778	VI.F.8.a)	Time spent on patient care activities by fellows on at-home call must count toward the 80-hour maximum weekly limit. The frequency of at-home call is not subject to the every-third-night limitation, but must satisfy the requirement for one day in seven free of clinical work and education, when averaged over four weeks. (Core)
1779		
1780		
1781		
1782		
1783		
1784		
1785	VI.F.8.a).(1)	At-home call must not be so frequent or taxing as to preclude rest or reasonable personal time for each fellow. (Core)
1786		
1787		
1788		
1789	VI.F.8.b)	Fellows are permitted to return to the hospital while on at-home call to provide direct care for new or established patients. These hours of inpatient patient care must be included in the 80-hour maximum weekly limit. (Detail)
1790		
1791		
1792		
1793		

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
