ACGME Program Requirements for Graduate Medical Education in Surgical Critical Care

Common Program Requirements (One-Year Fellowship) are in BOLD

Where applicable, text in italics describes the underlying philosophy of the requirements in that section. These philosophic statements are not program requirements and are therefore not citable.

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (One-Year Fellowship) are intended to explain the differences.

Introduction

Int.A.

Fellowship is advanced graduate medical education beyond a core residency program for physicians who desire to enter more specialized practice. Fellowship-trained physicians serve the public by providing subspecialty care, which may also include core medical care, acting as a community resource for expertise in their field, creating and integrating new knowledge into practice, and educating future generations of physicians. Graduate medical education values the strength that a diverse group of physicians brings to medical care.

Fellows who have completed residency are able to practice independently in their core specialty. The prior medical experience and expertise of fellows distinguish them from physicians entering into residency training. The fellow's care of patients within the subspecialty is undertaken with appropriate faculty supervision and conditional independence. Faculty members serve as role models of excellence, compassion, professionalism, and scholarship. The fellow develops deep medical knowledge, patient care skills, and expertise applicable to their focused area of practice. Fellowship is an intensive program of subspecialty clinical and didactic education that focuses on the multidisciplinary care of patients. Fellowship education is often physically, emotionally, and intellectually demanding, and occurs in a variety of clinical learning environments committed to graduate medical education and the well-being of patients, residents, fellows, faculty members, students, and all members of the health care team.

In addition to clinical education, many fellowship programs advance fellows' skills as physician-scientists. While the ability to create new knowledge within medicine is not exclusive to fellowship-educated physicians, the fellowship experience expands a physician's abilities to pursue hypothesis-driven scientific inquiry that results in contributions to the medical literature and patient care. Beyond the clinical subspecialty expertise achieved, fellows develop mentored relationships built on an infrastructure that promotes collaborative research.

83

Int.B.1. Surgical critical care is a subspecialty of surgery that manages complex surgical and medical problems in critically-ill surgical patients. Graduate educational programs in surgical critical care provide the educational, clinical, and administrative resources to allow fellows to develop advanced proficiency in the management of critically-ill surgical patients, to develop the qualifications necessary to supervise surgical critical care

units, and to conduct scholarly activities in surgical critical care.

Int.B.2.

The goal of a surgical critical care fellowship program is to prepare the fellow to function as a qualified practitioner at the advanced level of performance expected of a Board-certified subspecialist. The education of surgeons in the practice of surgical critical care encompasses didactic instruction in the basic and clinical sciences of surgical diseases and conditions, as well as education in procedural skills and techniques used in the intensive care settings. This educational process leads to the acquisition of an appropriate fund of knowledge and technical skills, the ability to integrate the acquired knowledge into the clinical situation, and the development of judgment.

Int.C. **Length of Educational Program**

The educational program in surgical critical care must be 12 months in length. (Core)*

I. Oversight

I.A. **Sponsoring Institution**

The Sponsoring Institution is the organization or entity that assumes the ultimate financial and academic responsibility for a program of graduate medical education consistent with the ACGME Institutional Requirements.

When the Sponsoring Institution is not a rotation site for the program, the most commonly utilized site of clinical activity for the program is the primary clinical site.

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, a federally qualified health center, a surgery center, an academic and private single-specialty clinic, or an educational foundation.

84 85

86 87 88 I.A.1. The program must be sponsored by one ACGME-accredited **Sponsoring Institution.** (Core)

I.B. **Participating Sites**

89		
90		A participating site is an organization providing educational experiences or
91		educational assignments/rotations for fellows.
92		
93	I.B.1.	The program, with approval of its Sponsoring Institution, must
94		designate a primary clinical site. (Core)
95		
96	I.B.2.	There must be a program letter of agreement (PLA) between the
97		program and each participating site that governs the relationship
98		between the program and the participating site providing a required
99		assignment. (Core)
100		
101	I.B.2.a)	The PLA must:
102	,	
103	I.B.2.a).(1)	be renewed at least every 10 years; and, (Core)
104	, , ,	
105	I.B.2.a).(2)	be approved by the designated institutional official
106	, , ,	(DIO). (Core)
107		,
108	I.B.3.	The program must monitor the clinical learning and working
109		environment at all participating sites. (Core)
110		
111	I.B.3.a)	At each participating site there must be one faculty member,
112	,	designated by the program director, who is accountable for
113		fellow education for that site, in collaboration with the
114		program director. (Core)
115		

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for fellows
- Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern fellow education during the assignment

116 117

118

I.B.4. The program director must submit any additions or deletions of participating sites routinely providing an educational experience,

119		required for all fellows, of one month full time equivalent (FTE) or
120		more through the ACGME's Accreditation Data System (ADS). (Core)
121		
122	I.B.4.a)	Fellows must have at least six months of clinical education at the
123		primary clinical site. (Core)
124		
125	I.B.4.b)	Clinical assignments to participating sites at which core faculty
126	·	members consistently provide patient care must be approved prior
127		to fellows' rotating to the sites, and must not be more than exceed
128		three months in length duration. (Detail Core)
129		<u> </u>
130	I.B.4.c)	Clinical assignments to participating sites at which core faculty
131	,	members do not consistently provide patient care must be
132		approved in advance by the Review Committee and must not
133		exceed three months in duration. (Core)
134		
135	I.C.	The program, in partnership with its Sponsoring Institution, must engage in
136		practices that focus on mission-driven, ongoing, systematic recruitment
137		and retention of a diverse and inclusive workforce of residents (if present),
138		fellows, faculty members, senior administrative staff members, and other
139		relevant members of its academic community. (Core)
140		

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

141		
142	I.D.	Resources
143		
144	I.D.1.	The program, in partnership with its Sponsoring Institution, must
145		ensure the availability of adequate resources for fellow education.
146		(Core)
147		
148	I.D.1.a)	Resources should include a simulation and skills laboratory. (Detail)
149		
150	I.D.1.b)	Resources must include:
151		
152	I.D.1.b).(1)	a critical care unit located in a designated area within the
153		institution, constructed and designed specifically for the
154		care of critically-ill patients; (Core)
155		
156	I.D.1.b).(2)	a common office space for fellows that includes a sufficient
157		number of computers and adequate workspace at the
158		primary clinical site; (Core)
159		
160	I.D.1.b).(3)	online radiographic and laboratory systems at the primary
161		clinical site and participating sites; and, (Core)
162		
163	I.D.1.b).(4)	software resources for production of presentations,

164		manuscripts, and portfolios. ^(Detail)
165		
166	I.D.1.c)	The education must take place in care settings for critically-ill adult
167		and/or pediatric surgical patients. (Core)
168		
169	I.D.2.	The program, in partnership with its Sponsoring Institution, must
170		ensure healthy and safe learning and working environments that
171		promote fellow well-being and provide for: (Core)
172		
173	I.D.2.a)	access to food while on duty; (Core)
174	-	
175	I.D.2.b)	safe, quiet, clean, and private sleep/rest facilities available
176	•	and accessible for fellows with proximity appropriate for safe
177		patient care, if the fellows are assigned in-house call; (Core)
178		

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

179 180

181

I.D.2.c) clean and private facilities for lactation that have refrigeration capabilities, with proximity appropriate for safe patient care; (Core)

182 183

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

184

197 198

I.D.2.d)	security and safety measures appropriate to the participating site; and, ^(Core)
	,,
I.D.2.e)	accommodations for fellows with disabilities consistent with
,	the Sponsoring Institution's policy. (Core)
	- F 3-9
I.D.3.	Fellows must have ready access to subspecialty-specific and other
	appropriate reference material in print or electronic format. This
	must include access to electronic medical literature databases with
	full text capabilities. (Core)
	·
I.D.4.	The program's educational and clinical resources must be adequate
	I.D.2.e) I.D.3.

to support the number of fellows appointed to the program. (Core)

I.D.4.a)	Programs must have an average daily census of at least 10 patients in each intensive care/critical care unit to which a fellow is assigned, providing for a fellow-to-patient ratio of one to 10. (Core)
I.D.4.b)	Programs must have an average daily census of at least 10 patients in each intensive care unit to which a fellow is assigned.; and, (Detail)
I.D.4.c)	Programs must demonstrate an average daily census for each critical care unit to which fellows are assigned that ensures a fellow-to-patient ratio of 1:10. (Core)
I.E.	A fellowship program usually occurs in the context of many learners and other care providers and limited clinical resources. It should be structured to optimize education for all learners present.
I.E.1.	Fellows should contribute to the education of residents in core programs, if present. (Core)
I.E.2.	Any institution that sponsors more than one critical care program must coordinate interdisciplinary requirements to ensure that fellows meet the specific criteria of their primary specialties. (Detail Core)
I.E.3.	The presence of other learners, including residents from other specialties, subspecialty fellows, PhD students, and nurse practitioners, in the program must not interfere with the appointed fellows' education. The program director must report the presence of other learners to the DIO and <u>Graduate Medical Education Committee (GMEC)</u> in accordance with sponsoring institution guidelines. (Core)
	I.D.4.c) I.E. I.E.1. I.E.2.

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

II. Personnel

229 230

231232

233234

235

236237238

239

240241

II.A. Program Director

- II.A.1. There must be one faculty member appointed as program director with authority and accountability for the overall program, including compliance with all applicable program requirements. (Core)
- II.A.1.a) The Sponsoring Institution's Graduate Medical Education Committee (GMEC) must approve a change in program director. (Core)

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual's responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director's nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

245 246

247

II.A.2. The program director must be provided with support adequate for administration of the program based upon its size and configuration.

248249250

II.A.2.a)

251252253

254 255

256 257 At a minimum, the program director must be provided with the salary support required to devote 10 percent FTE of non-clinical time to the administration of the program. Additional support must be provided based on program size as follows: (Core) The program director must be provided with a minimum of 10% protected time or direct salary support or indirect salary support, such as release

 Number of Approved Fellow Positions
 Minimum FTE

 1-4
 0.1

 5-9
 0.15

 10 or more
 0.2

258

Background and Intent: Ten percent FTE is defined as one half day per week.

from clinical activities.

"Administrative time" is defined as non-clinical time spent meeting the responsibilities of the program director as detailed in requirements II.A.4.-II.A.4.a).(16).

The requirement does not address the source of funding required to provide the specified salary support.

259 260

II.A.3. Qualifications of the program director:

261 262

263

II.A.3.c)

must include subspecialty expertise and qualifications acceptable to the Review Committee; (Core) must include current certification in the subspecialty for

which they are the program director by the American Board of Surgery or by the American Osteopathic Board of Surgery, or subspecialty qualifications that are acceptable to the Review Committee; (Core)

must include unrestricted credentials <u>and licensure to practice</u> medicine at the primary clinical site; and, ^(Core)

273		
274	II.A.3.d)	should include licensure to practice medicine in the state where
275		the primary clinical site is located. (Core)
276		
277	II.A.3.e)	faculty appointment in good standing at the primary clinical site.
278		(Detail)
279		
280	II.A.3.f)	must include responsibility to direct or co-direct one or more of the
281		critical care units in which the clinical aspects of the educational
282		program take place, and personally supervise and teach surgery
283		and surgical critical care fellows in that unit. (Core)
284		
285	II.A.4.	Program Director Responsibilities
286	II.A.4.	·
286 287	II.A.4.	The program director must have responsibility, authority, and
286 287 288	II.A.4.	The program director must have responsibility, authority, and accountability for: administration and operations; teaching and
286 287 288 289	II.A.4.	The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and
286 287 288 289 290	II.A.4.	The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and promotion of fellows, and disciplinary action; supervision of fellows;
286 287 288 289 290 291	II.A.4.	The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and
286 287 288 289 290 291 292		The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and promotion of fellows, and disciplinary action; supervision of fellows; and fellow education in the context of patient care. (Core)
286 287 288 289 290 291 292 293	II.A.4. II.A.4.a)	The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and promotion of fellows, and disciplinary action; supervision of fellows;
286 287 288 289 290 291 292 293 294	II.A.4.a)	The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and promotion of fellows, and disciplinary action; supervision of fellows; and fellow education in the context of patient care. (Core) The program director must:
286 287 288 289 290 291 292 293		The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and promotion of fellows, and disciplinary action; supervision of fellows; and fellow education in the context of patient care. (Core)

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

297 298

II.A.4.a).(2)

300 301 302

299

design and conduct the program in a fashion consistent with the needs of the community, the mission(s) of the Sponsoring Institution, and the mission(s) of the program; (Core)

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

303

306

307

304 **II.A.4.a).(3)** 305

administer and maintain a learning environment conducive to educating the fellows in each of the ACGME Competency domains; (Core)

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

308		
309	II.A.4.a).(4)	develop and oversee a process to evaluate candidates
310		prior to approval as program faculty members for
311		participation in the fellowship program education and
312		at least annually thereafter, as outlined in V.B.; (Core)
313		at load alliadily thoroalter, as satisfied in Tibi,
	II A 4 -> /5>	have the cuthents to comment one many faculty.
314	II.A.4.a).(5)	have the authority to approve program faculty
315		members for participation in the fellowship program
316		education at all sites; (Core)
317		
318	II.A.4.a).(6)	have the authority to remove program faculty
319		members from participation in the fellowship program
320		education at all sites; (Core)
		education at all sites, very
321		
322	II.A.4.a).(7)	have the authority to remove fellows from supervising
323		interactions and/or learning environments that do not
324		meet the standards of the program; (Core)
325		, p. -9 ,
525		

200

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

326		
327	II.A.4.a).(8)	submit accurate and complete information required
328		and requested by the DIO, GMEC, and ACGME; (Core)
329		
330	II.A.4.a).(9)	provide applicants who are offered an interview with
331		information related to the applicant's eligibility for the
332		relevant subspecialty board examination(s); (Core)
333		
334	II.A.4.a).(10)	provide a learning and working environment in which
335		fellows have the opportunity to raise concerns and
336		provide feedback in a confidential manner as
337		appropriate, without fear of intimidation or retaliation;
338		(Core)
339		
340	II.A.4.a).(11)	ensure the program's compliance with the Sponsoring
341		Institution's policies and procedures related to
342		grievances and due process; (Core)
343		

344 345 346 347 348	II.A.4.a).(12)	ensure the program's compliance with the Sponsoring Institution's policies and procedures for due process when action is taken to suspend or dismiss, not to promote, or not to renew the appointment of a fellow; (Core)
349	Institution. Institution	d and Intent: A program does not operate independently of its Sponsoring It is expected that the program director will be aware of the Sponsoring s policies and procedures, and will ensure they are followed by the leadership, faculty members, support personnel, and fellows.
350 351 352 353 354 355 356 357	II.A.4.a).(13)	ensure the program's compliance with the Sponsoring Institution's policies and procedures on employment and non-discrimination; (Core)
	II.A.4.a).(13).	(a) Fellows must not be required to sign a non-competition guarantee or restrictive covenant.
358 359 360	II.A.4.a).(14)	document verification of program completion for all graduating fellows within 30 days; (Core)
361 362 363 364 365	II.A.4.a).(15)	provide verification of an individual fellow's completion upon the fellow's request, within 30 days; and, (Core)
	important t verification for record r have previous	d and Intent: Primary verification of graduate medical education is o credentialing of physicians for further training and practice. Such must be accurate and timely. Sponsoring Institution and program policies retention are important to facilitate timely documentation of fellows who busly completed the program. Fellows who leave the program prior to also require timely documentation of their summative evaluation.
366 367 368 369 370 371 372	II.A.4.a).(16)	obtain review and approval of the Sponsoring Institution's DIO before submitting information or requests to the ACGME, as required in the Institutional Requirements and outlined in the ACGME Program Director's Guide to the Common Program Requirements. (Core)
373 374	II.B.	Faculty
375 376 377 378 379 380 381 382 383 384		Faculty members are a foundational element of graduate medical education – faculty members teach fellows how to care for patients. Faculty members provide an important bridge allowing fellows to grow and become practice ready, ensuring that patients receive the highest quality of care. They are role models for future generations of physicians by demonstrating compassion, commitment to excellence in teaching and patient care, professionalism, and a dedication to lifelong learning. Faculty members experience the pride and joy of fostering the growth and development of future colleagues. The care they provide is enhanced by the opportunity to

385 teach. By employing a scholarly approach to patient care, faculty members, 386 through the graduate medical education system, improve the health of the 387 individual and the population. 388 389 Faculty members ensure that patients receive the level of care expected from a specialist in the field. They recognize and respond to the needs of 390 391 the patients, fellows, community, and institution. Faculty members provide 392 appropriate levels of supervision to promote patient safety. Faculty 393 members create an effective learning environment by acting in a professional manner and attending to the well-being of the fellows and 394 themselves. 395 396 Background and Intent: "Faculty" refers to the entire teaching force responsible for educating fellows. The term "faculty," including "core faculty," does not imply or require an academic appointment or salary support. 397 398 II.B.1. For each participating site, there must be a sufficient number of 399 faculty members with competence to instruct and supervise all 400 fellows at that location. (Core) 401 402 II.B.1.a) In addition to the program director, at least one surgeon certified 403 in surgical critical care must be appointed to the faculty for every critical care fellow enrolled in the program. (Core) 404 405 406 II.B.2. **Faculty members must:** 407 408 be role models of professionalism; (Core) II.B.2.a) 409 demonstrate commitment to the delivery of safe, quality, 410 II.B.2.b) cost-effective, patient-centered care; (Core) 411 412 Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve. 413 demonstrate a strong interest in the education of fellows; (Core) 414 II.B.2.c) 415 416 II.B.2.d) devote sufficient time to the educational program to fulfill their supervisory and teaching responsibilities; (Core) 417 418 419 II.B.2.e) administer and maintain an educational environment conducive to educating fellows: (Core) 420 421 422 II.B.2.f) pursue faculty development designed to enhance their skills; and. (Core) 423 424 425 regularly participate in organized clinical discussions, rounds, II.B.2.g) iournal clubs, and conferences. (Core) 426

427

428	II.B.3.	Faculty Qualifications
429		
430	II.B.3.a)	Faculty members must have appropriate qualifications in
431	•	their field and hold appropriate institutional appointments.
432		(Core)
433	II.B.3.b)	Subspecialty physician faculty members must:
434	·	
435	II.B.3.b).(1)	have current certification in the subspecialty by the
436	, , ,	American Board of Surgery or the American
437		Osteopathic Board of Surgery, or possess
438		qualifications judged acceptable to the Review
439		Committee. (Core)
440		
441	II.B.3.c)	Any non-physician faculty members who participate in
442	-	fellowship program education must be approved by the
443		program director. (Core)
444		

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

445
446 II.B.3.d)
Any other specialty physician faculty members must have
447 current certification in their specialty by the appropriate
448 American Board of Medical Specialties (ABMS) member
449 board or American Osteopathic Association (AOA) certifying
450 board, or possess qualifications judged acceptable to the
451 Review Committee. (Core)

Non-surgical physician faculty members must be certified in critical care in their specialty area or possess alternative qualifications judged to be acceptable by the Review Committee. (Core)

II.B.4. Core Faculty

454

455

456 457 458

459 460

461 462

463

464 465 II.B.3.d).(1)

Core faculty members must have a significant role in the education and supervision of fellows and must devote a significant portion of their entire effort to fellow education and/or administration, and must, as a component of their activities, teach, evaluate, and provide formative feedback to fellows. (Core)

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their

400		vledge of and involvement in the program, permitting them to effectively e program, including completion of the annual ACGME Faculty Survey.
466 467 468 469	II.B.4.a)	Core faculty members must be designated by the program director. (Core)
470 471 472	II.B.4.b)	Core faculty members must complete the annual ACGME Faculty Survey. (Core)
473 474 475 476 477	II.B.4.c)	In addition to the program director, there must be at least one core faculty member certified in surgical critical care by the American Board of Surgery or the American Osteopathic Board of Surgery for each critical care fellow enrolled in the program. (Core)
478 479	II.C.	Program Coordinator
480 481	II.C.1.	There must be administrative support for program coordination. (Core)
482 483 484 485	II.C.2.	The program coordinator(s) must be provided with support adequate for administration of the program based upon its size and configuration. (Core)
486 487 488 489	II.C.2.a)	At a minimum, the program coordinator must be supported at 25 percent FTE for the administration of the program. Additional support must be provided based on program size as follows: Number of Approved Minimum FTE Fellow Positions Required 0-4 .25 .
491 492 493	II.C.2.b)	Coordinators overseeing a total of 20 or more residents/fellows must have additional administrative assistance. (Core)
	days (1.25)	
40.4	-	ement does not address the source of funding required to provide the alary support.
494 495 496	II.D.	Other Program Personnel
497 498 499 500		The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. (Core)
501 502 503	II.D.1.	Staff members must include specially-specialty-trained nurses and technicians skilled in critical care instrumentation, respiratory function, and laboratory medicine. (Core)

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

All required clinical education for entry into ACGME-accredited

residency program, an AOA-approved residency program, a

fellowship programs must be completed in an ACGME-accredited

program with ACGME International (ACGME-I) Advanced Specialty

Accreditation, or a Royal College of Physicians and Surgeons of

Canada (RCPSC)-accredited or College of Family Physicians of Canada (CFPC)-accredited residency program located in Canada.

545

546

541

Fellowship programs must receive verification of each entering fellow's level of competence in the required field, upon matriculation, using ACGME, ACGME-I, or CanMEDS Milestones evaluations from the core residency program. (Core)

III.A.1.b)

Prior to appointment in the program, fellows must have completed at least three clinical years in an ACGME-accredited or AOAaccredited graduate medical education a residency program that satisfies the requirements in III.A.1. in one of the following specialties: anesthesiology, emergency medicine, neurological surgery, obstetrics and gynecology, orthopaedic surgery, otolaryngology, plastic surgery, surgery, thoracic surgery, vascular surgery, or urology. (Core)

III.A.1.b).(1)

Fellows who have completed an emergency medicine residency must also complete one preparatory year as an advanced preliminary resident in surgery at the institution where they will enroll in the surgical critical care fellowship. The content of this year should-must be defined jointly by the program directors of the surgery program and the surgical critical care program. It must include clinical experience in the foundations of surgery and the management of complex surgical conditions. At a minimum, this preparatory year of education must include supervised clinical experience in: (Core)

547		
548 549 550	III.A.1.b).(1).(a)	pre-operative evaluation, including respiratory, cardiovascular, and nutritional evaluation; (Core)
551 552 553	III.A.1.b).(1).(b)	pre-operative and post-operative care of surgical patients, including outpatient follow-up care; (Core)
554 555	III.A.1.b).(1).(c)	advanced care of injured patients; (Core)
556 557 558 559	III.A.1.b).(1).(d)	care of patients requiring abdominal, breast, head and neck, endocrine, transplant, cardiac, thoracic, vascular, and neurosurgical operations; (Core)
560 561	III.A.1.b).(1).(e)	management of complex wounds; and, (Core)
562 563 564 565	III.A.1.b).(1).(f)	minor operative procedures related to critical care, such as venous access, tube thoracostomy, and tracheostomy. (Core)

III.B. The program director must not appoint more fellows than approved by the Review Committee. (Core)

III.B.1. All complement increases must be approved by the Review Committee. (Core)

IV. Educational Program

The ACGME accreditation system is designed to encourage excellence and innovation in graduate medical education regardless of the organizational affiliation, size, or location of the program.

The educational program must support the development of knowledgeable, skillful physicians who provide compassionate care.

In addition, the program is expected to define its specific program aims consistent with the overall mission of its Sponsoring Institution, the needs of the community it serves and that its graduates will serve, and the distinctive capabilities of physicians it intends to graduate. While programs must demonstrate substantial compliance with the Common and subspecialty-specific Program Requirements, it is recognized that within this framework, programs may place different emphasis on research, leadership, public health, etc. It is expected that the program aims will reflect the nuanced program-specific goals for it and its graduates; for example, it is expected that a program aiming to prepare physician-scientists will have a different curriculum from one focusing on community health.

- IV.A. The curriculum must contain the following educational components: (Core)
- IV.A.1. a set of program aims consistent with the Sponsoring Institution's mission, the needs of the community it serves, and the desired distinctive capabilities of its graduates; (Core)

598 IV.A.1.a) The program's aims must be made available to program applicants, fellows, and faculty members. (Core) 599 600 601 IV.A.2. competency-based goals and objectives for each educational experience designed to promote progress on a trajectory to 602 603 autonomous practice in their subspecialty. These must be 604 distributed, reviewed, and available to fellows and faculty members; 605 606 607 IV.A.3. delineation of fellow responsibilities for patient care, progressive 608 responsibility for patient management, and graded supervision in 609 their subspecialty: (Core) 610

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

IV.A.4. structured educational activities beyond direct patient care; and, (Core)

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

IV.A.5. advancement of fellows' knowledge of ethical principles foundational to medical professionalism. (Core)

IV.B. ACGME Competencies

611 612

613 614

615 616

617 618

619 620

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

621
622 IV.B.1. The program must integrate the following ACGME Competencies
623 into the curriculum: (Core)
624
625 IV.B.1.a) Professionalism
626
627 Fellows must demonstrate a commitment to professionalism
628 and an adherence to ethical principles. (Core)

Background and Intent: Quality patient care is safe, effective, timely, efficient, patientcentered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s Crossing the Quality Chasm: A New Health System for the 21st Century, 2001 and Berwick D, Nolan T, Whittington J. The Triple Aim: care, cost, and quality. Health Affairs. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

632 633

634

635

IV.B.1.b).(1) Fellows must be able to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health. (Core)

636 637 638

639

IV.B.1.b).(1).(a) Fellows must have supervised training that will enable them to demonstrate competence in the

640 641 642

643 644 IV.B.1.b).(1).(a).(i)

645 646 647

648 649 650

651

following critical care skills: (Core)

circulatory: performance of invasive and non-invasive monitoring techniques, and the use of vasoactive agents and management of hypotension and shock; application of trans-esophageal and transthoracic cardiac ultrasound; and application of transvenous pacemakers; dysrhythmia diagnosis and treatment; and the management of cardiac assist devices; (Core)

Specialty-Specific Background and Intent: The Review Committee recognizes that fellows may be able to achieve competence in the management of cardiac assist devices through direct, hands-on experience with cardiac assist devices, or through didactic instruction on the appropriate indications for use, the principles of insertion, troubleshooting, and adjustment of these devices. Each program will be expected to document how this competence is achieved by its fellows.

652

653 IV.B.1.b).(1).(a).(ii) endocrine: performance of the diagnosis 654 and management of acute endocrine disorders, including those of the pancreas, 655 thyroid, adrenals, and pituitary; (Core) 656 657 658 IV.B.1.b).(1).(a).(iii) gastrointestinal: performance of utilization of 659 gastrointestinal intubation and endoscopic 660 techniques in the management of the 661 critically-ill patient; and management of stomas, fistulas, and percutaneous catheter 662

663 664		devices; (Core)
665 666 667 668	IV.B.1.b).(1).(a).(iv)	hematologic: performance of assessment of coagulation status, and appropriate use of component therapy; (Core)
669 670 671 672 673 674 675 676	IV.B.1.b).(1).(a).(v)	infectious disease: performance of classification of infections and application of isolation techniques, pharmacokinetics, drug interactions, and management of antibiotic therapy during organ failure; nosocomial infections; and management of sepsis and septic shock; (Core)
677 678 679 680	IV.B.1.b).(1).(a).(vi)	monitoring/bioengineering: performance of the use and calibration of transducers and other medical devices; (Core)

789 790	IV.B.1.d)	Practice-based Learning and Improvement
791 792 793 794 795		Fellows must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. (Core)
195		

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

	to continuous.	y parede quanty improvement, tren paet the completion or length of
796		
797	IV.B.1.e)	Interpersonal and Communication Skills
798

954 955	V.	Evalua	ation		
956	V.A.		Fellow Evalu	ion	
957	v ./٦.		. Chow Eval		
551					

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- fellows identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is evaluating a fellow's learning by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

V.A.1.a)	Faculty members must directly observe, evaluate, and
	frequently provide feedback on fellow performance during
	each rotation or similar educational assignment. (Core)
V.A.1.a).(1)	Fellows' performance evaluations must be documented at
	least every two months. (Core)
V.A.1.a).(2)	Rotations exceeding two months in duration must have a
	mid-rotation evaluation. (Core)
V.A.1.a).(3)	Semiannual assessment must include a review of case
	volume, breadth, and complexity, and must ensure that
	fellows are maintaining the required written records. (Core)
	V.A.1.a).(1) V.A.1.a).(2)

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

975		
976	V.A.1.b)	Evaluation must be documented at the completion of the
977		assignment. ^(Core)
978		
979	V.A.1.b).(1)	Evaluations must be completed at least every three
980		months. (Core)
981		
982	V.A.1.c)	The program must provide an objective performance
983	•	evaluation based on the Competencies and the subspecialty-
984		specific Milestones, and must: (Core)
985		
986	V.A.1.c).(1)	use multiple evaluators (e.g., faculty members, peers,
987	V.A.1.0).(1)	patients, self, and other professional staff members);
988		and, (Core)
		aliu, `
989	W 4 4 3 (0)	
990	V.A.1.c).(2)	provide that information to the Clinical Competency
991		Committee for its synthesis of progressive fellow
992		performance and improvement toward unsupervised
993		practice. (Core)
994		L
001		

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

995		
996	V.A.1.d)	The program director or their designee, with input from the
997		Clinical Competency Committee, must:
998		
999	V.A.1.d).(1)	meet with and review with each fellow their
1000		documented semi-annual evaluation of performance,
1001		including progress along the subspecialty-specific
1002		Milestones. (Core)
1003		
1004	V.A.1.d).(2)	develop plans for fellows failing to progress, following
1005	, , ,	institutional policies and procedures. (Core)
1006		

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

1007 1008 1009	V.A.1.e)	The evaluations of a fellow's performance must be accessible for review by the fellow. (Core)
1010	V.A.2.	Final Evaluation
1012 1013 1014 1015	V.A.2.a)	The program director must provide a final evaluation for each fellow upon completion of the program. (Core)
1016 1017 1018 1019 1020 1021	V.A.2.a).(1)	The subspecialty-specific Milestones, and when applicable the subspecialty-specific Case Logs, must be used as tools to ensure fellows are able to engage in autonomous practice upon completion of the program. (Core)
1022 1023	V.A.2.a).(2)	The final evaluation must:
1024 1025 1026 1027 1028	V.A.2.a).(2).(a)	become part of the fellow's permanent record maintained by the institution, and must be accessible for review by the fellow in accordance with institutional policy; (Core)
1028 1029 1030 1031 1032	V.A.2.a).(2).(b)	verify that the fellow has demonstrated the knowledge, skills, and behaviors necessary to enter autonomous practice; (Core)
1033 1034 1035	V.A.2.a).(2).(c)	consider recommendations from the Clinical Competency Committee; and, (Core)
1036 1037 1038	V.A.2.a).(2).(d)	be shared with the fellow upon completion of the program. (Core)
1038 1039 1040 1041	V.A.3.	A Clinical Competency Committee must be appointed by the program director. (Core)
1042 1043 1044 1045 1046 1047 1048	V.A.3.a)	At a minimum the Clinical Competency Committee must include three members, at least one of whom is a core faculty member. Members must be faculty members from the same program or other programs, or other health professionals who have extensive contact and experience with the program's fellows. (Core)
1048	V.A.3.b)	The Clinical Competency Committee must:

1050			
1051	V.A.3.b).(1)		review all fellow evaluations at least semi-annually;
1052			(Core)
1053			
1054	V.A.3.b).(2)		determine each fellow's progress on achievement of
1055			the subspecialty-specific Milestones; and, (Core)
1056			
1057	V.A.3.b).(3)		meet prior to the fellows' semi-annual evaluations and
1058			advise the program director regarding each fellow's
1059			progress. (Core)
1060			
1061	V.B.	Faculty Evaluation	
1062			
1063	V.B.1.	The program	must have a process to evaluate each faculty
1064		member's pe	erformance as it relates to the educational program at
1065		least annuall	y. ^(Core)
1066			

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

1001		
1068	V.B.1.a)	This evaluation must include a review of the faculty member's
1069		clinical teaching abilities, engagement with the educational
1070		program, participation in faculty development related to their
1071		skills as an educator, clinical performance, professionalism,
1072		and scholarly activities. (Core)
1073		-
1074	V.B.1.b)	This evaluation must include written, confidential evaluations
1075		by the fellows. (Core)
1076		
1077	V.B.2.	Faculty members must receive feedback on their evaluations at least
1078		annually. ^(Core)
1079		·

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical

1067

care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

	pa. pooc, a	na can be asea as inpat into the Annaar Fogram Evaluation.
1080		
1081	V.C.	Program Evaluation and Improvement
1082		
1083	V.C.1.	The program director must appoint the Program Evaluation
1084		Committee to conduct and document the Annual Program
1085		Evaluation as part of the program's continuous improvement
1086		process. (Core)
1087		
1088	V.C.1.a)	The Program Evaluation Committee must be composed of at
1089		least two program faculty members, at least one of whom is a
1090		core faculty member, and at least one fellow. (Core)
1091		
1092	V.C.1.b)	Program Evaluation Committee responsibilities must include:
1093		
1094	V.C.1.b).(1)	acting as an advisor to the program director, through
1095		program oversight; (Core)
1096		
1097	V.C.1.b).(2)	review of the program's self-determined goals and
1098		progress toward meeting them; (Core)
1099		
1100	V.C.1.b).(3)	guiding ongoing program improvement, including
1101		development of new goals, based upon outcomes;
1102		and, ^(Core)
1103		
1104	V.C.1.b).(4)	review of the current operating environment to identify
1105		strengths, challenges, opportunities, and threats as
1106		related to the program's mission and aims. (Core)
1107		

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.

1108		
1109	V.C.1.c)	The Program Evaluation Committee should consider the
1110	·	following elements in its assessment of the program:
1111		
1112	V.C.1.c).(1)	fellow performance; (Core)
1113	, , ,	•
1114	V.C.1.c).(2)	faculty development; and, (Core)
1115	, , ,	
1116	V.C.1.c).(3)	progress on the previous year's action plan(s). (Core)
1117	, , ,	
1118	V.C.1.d)	The Program Evaluation Committee must evaluate the
1119	·	program's mission and aims, strengths, areas for
1120		improvement, and threats. (Core)

V.C.1.e)	The annual review, including the action plan, must:
V.C.1.e).(1)	be distributed to and discussed with the members of
	the teaching faculty and the fellows; and, (Core)
V.C.1.e).(2)	be submitted to the DIO. (Core)
V.C.2.	The program must participate in a Self-Study prior to its 10-Year
	Accreditation Site Visit. (Core)
V.C.2.a)	A summary of the Self-Study must be submitted to the DIO.
	(Core)
	V.C.1.e).(1) V.C.1.e).(2) V.C.2.

1134

1135

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the ACGME Manual of Policies and Procedures. Additionally, a description of the Self-Study process, as well as information on how to prepare for the 10-Year Accreditation Site Visit, is available on the ACGME website.

V.C.3.	One goal of ACGME-accredited education is to educate physicians
	who seek and achieve board certification. One measure of the
	effectiveness of the educational program is the ultimate pass rate.
	The program director should encourage all eligible program
	graduates to take the certifying examination offered by the
	applicable American Board of Medical Specialties (ABMS) member
	board or American Osteopathic Association (AOA) certifying board.
	, , , , ,
V.C.3.a)	For subspecialties in which the ABMS member board and/or
	AOA certifying board offer(s) an annual written exam, in the
	preceding three years, the program's aggregate pass rate of
	those taking the examination for the first time must be higher
	than the bottom fifth percentile of programs in that
	subspecialty. (Outcome)
	• •
V.C.3.b)	For subspecialties in which the ABMS member board and/or
,	AOA certifying board offer(s) a biennial written exam, in the
	preceding six years, the program's aggregate pass rate of
	those taking the examination for the first time must be higher
	than the bottom fifth percentile of programs in that
	subspecialty. (Outcome)
	outopoolalty.
V C 3 c)	For subspecialties in which the ABMS member board and/or
¥.0.0.0)	AOA certifying board offer(s) an annual oral exam, in the
	ACA certifying board offer(5) an affilial of at exam, in the

1161 1162 1163 1164		preceding three years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)
1165		
1166	V.C.3.d)	For subspecialties in which the ABMS member board and/or
1167		AOA certifying board offer(s) a biennial oral exam, in the
1168		preceding six years, the program's aggregate pass rate of
1169		those taking the examination for the first time must be higher
1170		than the bottom fifth percentile of programs in that
1171		subspecialty. (Outcome)
1172		•
1173	V.C.3.e)	For each of the exams referenced in V.C.3.a)-d), any program
1174	·	whose graduates over the time period specified in the
1175		requirement have achieved an 80 percent pass rate will have
1176		met this requirement, no matter the percentile rank of the
1177		program for pass rate in that subspecialty. (Outcome)
1178		, 5

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

1179

V.C.3.f)

Programs must report, in ADS, board certification status annually for the cohort of board-eligible fellows that graduated seven years earlier. (Core)

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

1184 1185

VI. The Learning and Working Environment

1186

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

- Excellence in the safety and quality of care rendered to patients by fellows today
- Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice
- Excellence in professionalism through faculty modeling of:
 - the effacement of self-interest in a humanistic environment that supports the professional development of physicians
 - o the joy of curiosity, problem-solving, intellectual rigor, and discovery
- Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

1206 1207

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

1208 1209

VI.A.1. Patient Safety and Quality Improvement

1210 1211

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with

1214 1215 1216 1217 1218 1219 1220 1221 1222 1223 1224 1225		continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care. Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating fellows will apply these skills to critique their future unsupervised practice and effect quality improvement measures.
1226 1227 1228 1229 1230		It is necessary for fellows and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.
1231 1232	VI.A.1.a)	Patient Safety
1233 1234	VI.A.1.a).(1)	Culture of Safety
1235 1236 1237 1238 1239 1240 1241		A culture of safety requires continuous identification of vulnerabilities and a willingness to transparently deal with them. An effective organization has formal mechanisms to assess the knowledge, skills, and attitudes of its personnel toward safety in order to identify areas for improvement.
1242 1243 1244 1245 1246	VI.A.1.a).(1).(a)	The program, its faculty, residents, and fellows must actively participate in patient safety systems and contribute to a culture of safety. (Core)
1247 1248 1249 1250	VI.A.1.a).(1).(b)	The program must have a structure that promotes safe, interprofessional, team-based care. (Core)
1251 1252	VI.A.1.a).(2)	Education on Patient Safety
1252 1253 1254 1255 1256		Programs must provide formal educational activities that promote patient safety-related goals, tools, and techniques. (Core)
		ntent: Optimal patient safety occurs in the setting of a coordinated earning and working environment.
1257 1258	VI.A.1.a).(3)	Patient Safety Events
1259 1260 1261 1262		Reporting, investigation, and follow-up of adverse events, near misses, and unsafe conditions are pivotal mechanisms for improving patient safety, and are

1263 1264 1265 1266 1267 1268 1269		essential for the success of any patient safety program. Feedback and experiential learning are essential to developing true competence in the ability to identify causes and institute sustainable systemsbased changes to ameliorate patient safety vulnerabilities.
1270 1270 1271 1272	VI.A.1.a).(3).(a)	Residents, fellows, faculty members, and other clinical staff members must:
1272 1273 1274 1275 1276	VI.A.1.a).(3).(a).(i)	know their responsibilities in reporting patient safety events at the clinical site; (Core)
1277 1277 1278 1279 1280	VI.A.1.a).(3).(a).(ii)	know how to report patient safety events, including near misses, at the clinical site; and, (Core)
1281 1282 1283 1284	VI.A.1.a).(3).(a).(iii)	be provided with summary information of their institution's patient safety reports. (Core)
1285 1286 1287 1288 1289 1290	VI.A.1.a).(3).(b)	Fellows must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions. (Core)
1291 1292 1293 1294	VI.A.1.a).(4)	Fellow Education and Experience in Disclosure of Adverse Events
1294 1295 1296 1297 1298 1299 1300		Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for fellows to develop and apply.
1301 1302 1303	VI.A.1.a).(4).(a)	All fellows must receive training in how to disclose adverse events to patients and families. (Core)
1304 1305 1306 1307	VI.A.1.a).(4).(b)	Fellows should have the opportunity to participate in the disclosure of patient safety events, real or simulated. (Detail)
1308 1309	VI.A.1.b)	Quality Improvement
1310 1311 1312	VI.A.1.b).(1)	Education in Quality Improvement

1313 1314 1315 1316 1317		A cohesive model of health care includes quality-related goals, tools, and techniques that are necessary in order for health care professionals to achieve quality improvement goals.
1318 1319 1320 1321	VI.A.1.b).(1).(a)	Fellows must receive training and experience in quality improvement processes, including an understanding of health care disparities. (Core)
1322 1323	VI.A.1.b).(2)	Quality Metrics
1324 1325 1326 1327		Access to data is essential to prioritizing activities for care improvement and evaluating success of improvement efforts.
1328 1329 1330 1331	VI.A.1.b).(2).(a)	Fellows and faculty members must receive data on quality metrics and benchmarks related to their patient populations. (Core)
1332 1333	VI.A.1.b).(3)	Engagement in Quality Improvement Activities
1334 1335 1336 1337		Experiential learning is essential to developing the ability to identify and institute sustainable systemsbased changes to improve patient care.
1338 1339 1340 1341	VI.A.1.b).(3).(a)	Fellows must have the opportunity to participate in interprofessional quality improvement activities. (Core)
1342 1343 1344	VI.A.1.b).(3).(a).(i)	This should include activities aimed at reducing health care disparities. (Detail)
1345 1346	VI.A.2.	Supervision and Accountability
1347 1348 1349 1350 1351 1352 1353 1354 1355	VI.A.2.a)	Although the attending physician is ultimately responsible for the care of the patient, every physician shares in the responsibility and accountability for their efforts in the provision of care. Effective programs, in partnership with their Sponsoring Institutions, define, widely communicate, and monitor a structured chain of responsibility and accountability as it relates to the supervision of all patient care.
1356 1357 1358 1359 1360 1361		Supervision in the setting of graduate medical education provides safe and effective care to patients; ensures each fellow's development of the skills, knowledge, and attitudes required to enter the unsupervised practice of medicine; and establishes a foundation for continued professional growth.
1362 1363	VI.A.2.a).(1)	Each patient must have an identifiable and appropriately-credentialed and privileged attending

1364 physician (or licensed independent practitioner as specified by the applicable Review Committee) who is 1365 1366 responsible and accountable for the patient's care. 1367 1368 Specialty-Specific Background and Intent: Appropriately credentialed and privileged attending physicians in the surgical clinical environment include appropriately-credentialed ABMS or AOA board-certified surgeons (e.g., thoracic surgeries would be supervised by thoracic surgeons). In the critical care clinical environment, procedures must be supervised by appropriately credentialed ABMS or AOA board-certified critical care physicians (e.g., anesthesia critical care physicians, critical care medicine physicians, critical care pediatric physicians). 1369 1370 This information must be available to fellows, VI.A.2.a).(1).(a) faculty members, other members of the health 1371 care team, and patients. (Core) 1372 1373 1374 Fellows and faculty members must inform each VI.A.2.a).(1).(b) patient of their respective roles in that patient's 1375 care when providing direct patient care. (Core) 1376 1377 1378 VI.A.2.b) Supervision may be exercised through a variety of methods. For many aspects of patient care, the supervising physician 1379 may be a more advanced fellow. Other portions of care 1380 provided by the fellow can be adequately supervised by the 1381 appropriate availability of the supervising faculty member or 1382 1383 fellow, either on site or by means of telecommunication technology. Some activities require the physical presence of 1384 the supervising faculty member. In some circumstances, 1385 supervision may include post-hoc review of fellow-delivered 1386 1387 care with feedback. 1388 Background and Intent: There are circumstances where direct supervision without physical presence does not fulfill the requirements of the specific Review Committee. Review Committees will further specify what is meant by direct supervision without physical presence in specialties where allowed. "Physically present" is defined as follows: The teaching physician is located in the same room (or partitioned or curtained area, if the room is subdivided to accommodate multiple patients) as the patient and/or performs a face-to-face service. 1389 1390 VI.A.2.b).(1) The program must demonstrate that the appropriate 1391 level of supervision in place for all fellows is based on 1392 each fellow's level of training and ability, as well as patient complexity and acuity. Supervision may be 1393 exercised through a variety of methods, as appropriate 1394 to the situation. (Core) 1395 1396 1397 VI.A.2.b).(2) The program must define when physical presence of a

supervising physician is required. (Core)

Levels of Supervision

1398 1399 1400

VI.A.2.c)

1.401		
1401 1402		To promote appropriate follow cupervision while providing
1402		To promote appropriate fellow supervision while providing
		for graded authority and responsibility, the program must use
1404		the following classification of supervision: (Core)
1405	\/I A Q =\ /4\	Direct Companisions
1406	VI.A.2.c).(1)	Direct Supervision:
1407	VII A G () () ()	
1408	VI.A.2.c).(1).(a)	the supervising physician is physically present
1409		with the fellow during the key portions of the
1410		patient interaction. (Core)
1411		
1412	VI.A.2.c).(2)	Indirect Supervision: the supervising physician is not
1413		providing physical or concurrent visual or audio
1414		supervision but is immediately available to the fellow
1415		for guidance and is available to provide appropriate
1416		direct supervision. ^(Core)
1417		
1418	VI.A.2.c).(3)	Oversight – the supervising physician is available to
1419		provide review of procedures/encounters with
1420		feedback provided after care is delivered. (Core)
1421		
1422	VI.A.2.d)	The privilege of progressive authority and responsibility,
1423	•	conditional independence, and a supervisory role in patient
1424		care delegated to each fellow must be assigned by the
1425		program director and faculty members. (Core)
1426		,
1427	VI.A.2.d).(1)	The program director must evaluate each fellow's
1428	, ()	abilities based on specific criteria, guided by the
1429		Milestones. (Core)
1430		
1431	VI.A.2.d).(2)	Faculty members functioning as supervising
1432		physicians must delegate portions of care to fellows
1433		based on the needs of the patient and the skills of
1434		each fellow. (Core)
1435		
1436	VI.A.2.d).(3)	Fellows should serve in a supervisory role to junior
1437	VII.A.2.a).(0)	fellows and residents in recognition of their progress
1438		toward independence, based on the needs of each
1439		patient and the skills of the individual resident or
1440		fellow. (Detail)
1441		iciiow.
1441	VI.A.2.e)	Programs must set guidelines for circumstances and events
1442	VI.A.Z.C)	in which fellows must communicate with the supervising
1443		
		faculty member(s). (Core)
1445	VI A 2 a\ /4\	Each fallow must know the limite of their seems of
1446	VI.A.2.e).(1)	Each fellow must know the limits of their scope of
1447		authority, and the circumstances under which the
1448		fellow is permitted to act with conditional
1449		independence. (Outcome)
1450		

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

1451 1452 VI.A.2.f) Faculty supervision assignments must be of sufficient duration to assess the knowledge and skills of each fellow 1453 and to delegate to the fellow the appropriate level of patient 1454 care authority and responsibility. (Core) 1455 1456 VI.B. **Professionalism** 1457 1458 1459 VI.B.1. Programs, in partnership with their Sponsoring Institutions, must 1460 educate fellows and faculty members concerning the professional responsibilities of physicians, including their obligation to be 1461 appropriately rested and fit to provide the care required by their 1462 patients. (Core) 1463 1464 1465 VI.B.2. The learning objectives of the program must: 1466 1467 VI.B.2.a) be accomplished through an appropriate blend of supervised 1468 patient care responsibilities, clinical teaching, and didactic educational events: (Core) 1469 1470 1471 VI.B.2.b) be accomplished without excessive reliance on fellows to fulfill non-physician obligations; and, (Core) 1472

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

VI.B.2.c) ensure manageable patient care responsibilities. (Core)

Background and Intent: The Common Program Requirements do not define "manageable patient care responsibilities" as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1477
 1478 VI.B.3. The program director, in partnership with the Sponsoring Institution, must provide a culture of professionalism that supports patient safety and personal responsibility. (Core)

1473

1474

1475

1476

1481		
1482	VI.B.4.	Fellows and faculty members must demonstrate an understanding
1483		of their personal role in the:
1484		
1485	VI.B.4.a)	provision of patient- and family-centered care; (Outcome)
1486		
1487	VI.B.4.b)	safety and welfare of patients entrusted to their care,
1488		including the ability to report unsafe conditions and adverse
1489		events; (Outcome)
1490		
	Background a	nd Intent: This requirement emphasizes that responsibility for reporting

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

1491 1492

VI.B.4.c) assurance of their fitness for work, including: (Outcome)

1493

1519

1520 1521 Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

1494 1495 VI.B.4.c).(1) management of their time before, during, and after 1496 clinical assignments; and, (Outcome) 1497 1498 VI.B.4.c).(2) recognition of impairment, including from illness, fatigue, and substance use, in themselves, their peers, 1499 and other members of the health care team. (Outcome) 1500 1501 commitment to lifelong learning; (Outcome) 1502 VI.B.4.d) 1503 1504 VI.B.4.e) monitoring of their patient care performance improvement indicators; and, (Outcome) 1505 1506 1507 VI.B.4.f) accurate reporting of clinical and educational work hours, patient outcomes, and clinical experience data. (Outcome) 1508 1509 VI.B.5. All fellows and faculty members must demonstrate responsiveness 1510 1511 to patient needs that supersedes self-interest. This includes the 1512 recognition that under certain circumstances, the best interests of 1513 the patient may be served by transitioning that patient's care to another qualified and rested provider. (Outcome) 1514 1515 VI.B.6. 1516 Programs, in partnership with their Sponsoring Institutions, must 1517 provide a professional, equitable, respectful, and civil environment 1518 that is free from discrimination, sexual and other forms of

harassment, mistreatment, abuse, or coercion of students, fellows.

faculty, and staff. (Core)

VI.B.7. Programs, in partnership with their Sponsoring Institutions, should have a process for education of fellows and faculty regarding unprofessional behavior and a confidential process for reporting, investigating, and addressing such concerns. (Core)

VI.C. Well-Being

Psychological, emotional, and physical well-being are critical in the development of the competent, caring, and resilient physician and require proactive attention to life inside and outside of medicine. Well-being requires that physicians retain the joy in medicine while managing their own real life stresses. Self-care and responsibility to support other members of the health care team are important components of professionalism; they are also skills that must be modeled, learned, and nurtured in the context of other aspects of fellowship training.

Fellows and faculty members are at risk for burnout and depression. Programs, in partnership with their Sponsoring Institutions, have the same responsibility to address well-being as other aspects of resident competence. Physicians and all members of the health care team share responsibility for the well-being of each other. For example, a culture which encourages covering for colleagues after an illness without the expectation of reciprocity reflects the ideal of professionalism. A positive culture in a clinical learning environment models constructive behaviors, and prepares fellows with the skills and attitudes needed to thrive throughout their careers.

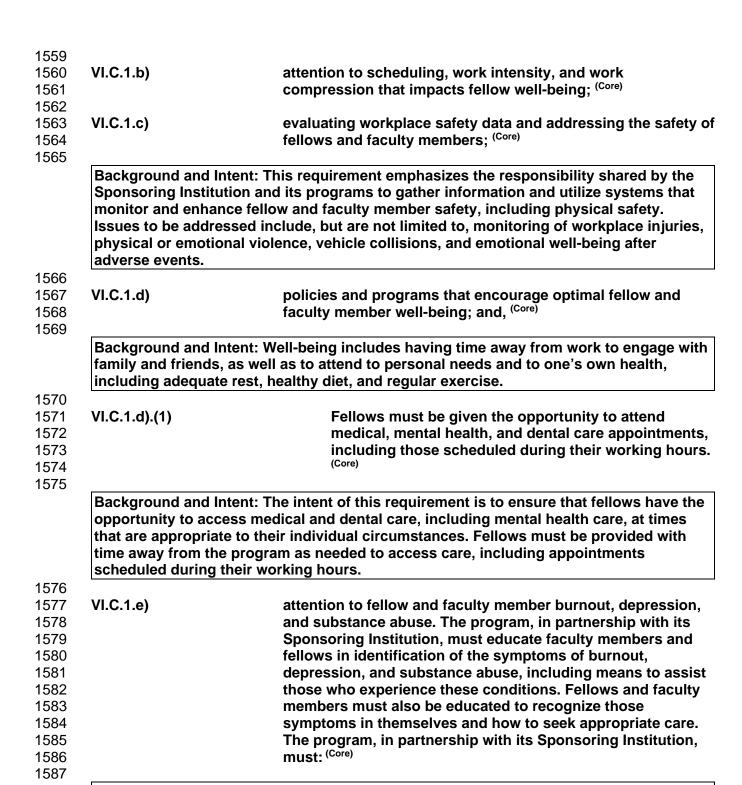

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

VI.C.1. The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:

VI.C.1.a)

efforts to enhance the meaning that each fellow finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; (Core)

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance abuse. Materials and more information are available on the Physician Wellbeing section of the ACGME website (http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being).

1588

1589	VI.C.1.e).(1)	encourage fellows and faculty members to alert the
1590		program director or other designated personnel or
1591		programs when they are concerned that another
1592		fellow, resident, or faculty member may be displaying
1593		signs of burnout, depression, substance abuse,
1594		suicidal ideation, or potential for violence; (Core)
1595		

Background and Intent: Individuals experiencing burnout, depression, substance abuse, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

1596		
1597	VI.C.1.e).(2)	provide access to appropriate tools for self-screening;
1598		and, ^(Core)
1599		
1600	VI.C.1.e).(3)	provide access to confidential, affordable mental
1601		health assessment, counseling, and treatment,
1602		including access to urgent and emergent care 24
1603		hours a day, seven days a week. ^(Core)
1604		

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

1605		
1606	VI.C.2.	There are circumstances in which fellows may be unable to attend
1607		work, including but not limited to fatigue, illness, family
1608		emergencies, and parental leave. Each program must allow an
1609		appropriate length of absence for fellows unable to perform their
1610		patient care responsibilities. (Core)
1611		
1612	VI.C.2.a)	The program must have policies and procedures in place to
1613		ensure coverage of patient care. (Core)
1614		

1615	VI.C.2.b)	These policies must be implemented without fear of negative
1616	•	consequences for the fellow who is or was unable to provide
1617		the clinical work. ^(Core)
1618		

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

1620 1621	VI.D.	Fatigue Mitigation
1622	VI.D.1.	Programs must:
1623	_	
1624	VI.D.1.a)	educate all faculty members and fellows to recognize the
1625		signs of fatigue and sleep deprivation; (Core)
1626		
1627	VI.D.1.b)	educate all faculty members and fellows in alertness
1628	,	management and fatigue mitigation processes; and, (Core)
1629		
1630	VI.D.1.c)	encourage fellows to use fatigue mitigation processes to
1631	,	manage the potential negative effects of fatigue on patient
1632		care and learning. (Detail)

1619

1633

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

VI.D.2.	Each program must ensure continuity of patient care, consistent
	with the program's policies and procedures referenced in VI.C.2-
	VI.C.2.b), in the event that a fellow may be unable to perform their
	patient care responsibilities due to excessive fatigue. (Core)
	•
VI.D.3.	The program, in partnership with its Sponsoring Institution, must
	ensure adequate sleep facilities and safe transportation options for
	fellows who may be too fatigued to safely return home. (Core)
VI.E.	Clinical Responsibilities, Teamwork, and Transitions of Care
VI.E.1.	Clinical Responsibilities

1647 1648 1649		The clinical responsibilities for each fellow must be based on PGY level, patient safety, fellow ability, severity and complexity of patient
1650		illness/condition, and available support services. (Core)
1651		, 11
1652	VI.E.1.a)	The work of the caregiver team must-should be assigned to team
1653		members based on each member's level of education,
1654		experience, and competence. (Detail Core)
1655		
1656	VI.E.1.b)	As fellows progress through levels of increasing competence and
1657		responsibility, it is expected that work assignments will must keep
1658 1659		pace with their advancement. (DetailCore)
1660	VI.E.1.c)	The program should ensure that the workload associated with
1661	VI.L.1.0)	optimal clinical care of surgical patients is a continuum from the
1662		moment of admission to the point of discharge. (Detail)
1663		3
1664	VI.E.1.d)	During the residency education process, surgical teams should be
1665		made up of attending surgeons, residents at various PG levels,
1666		medical students (when appropriate), and other health care
1667		providers. (Detail)
1668		

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

1669		
1670	VI.E.2.	Teamwork
1671		
1672		Fellows must care for patients in an environment that maximizes
1673		communication. This must include the opportunity to work as a
1674		member of effective interprofessional teams that are appropriate to
1675		the delivery of care in the subspecialty and larger health system.
1676		(Core)
1677		
1678	VI.E.2.a)	As a member of an interprofessional team, Effective surgical
1679		practices entail the involvement of members with a mix of
1680		complementary skills and attributes (physicians, nurses, and other
1681		staff). fellows should demonstrate Success requires both an
1682		unwavering mutual respect for those the respective skills and
1683		contributions of team members, and a shared commitment to the
1684		process of patient care. (Detail)
1685		
1686	VI.E.2.b)	Fellows should must collaborate with fellow surgical residents, and
1687		especially with faculty, other physicians outside of their specialty,
1688		and non-traditional health care providers, to best formulate
1689		treatment plans for an increasingly diverse patient population.

1690 1691		(Detail)
1692 1693 1694 1695 1696 1697 1698 1699	VI.E.2.c)	Fellows must assume personal responsibility to complete all tasks to which they are assigned (or which they voluntarily assume) in a timely fashion. These tasks must be completed in the hours assigned, or, if that is not possible, fellows must learn and utilize the established methods for handing off remaining tasks to another member of the fellow team so that patient care is not compromised. (DetailCore)
1700 1701 1702 1703 1704	VI.E.2.d)	Lines of authority <u>must-should</u> be defined by programs, and all fellows must have a working knowledge of these expected reporting relationships to maximize quality care and patient safety. (Detail Core)
1705	VI.E.3.	Transitions of Care
1706 1707 1708 1709 1710	VI.E.3.a)	Programs must design clinical assignments to optimize transitions in patient care, including their safety, frequency, and structure. (Core)
1711 1712 1713 1714 1715	VI.E.3.b)	Programs, in partnership with their Sponsoring Institutions, must ensure and monitor effective, structured hand-over processes to facilitate both continuity of care and patient safety. (Core)
1716 1717 1718 1719	VI.E.3.c)	Programs must ensure that fellows are competent in communicating with team members in the hand-over process.
1719 1720 1721 1722 1723	VI.E.3.d)	Programs and clinical sites must maintain and communicate schedules of attending physicians and fellows currently responsible for care. (Core)
1724 1725 1726 1727 1728 1729	VI.E.3.e)	Each program must ensure continuity of patient care, consistent with the program's policies and procedures referenced in VI.C.2-VI.C.2.b), in the event that a fellow may be unable to perform their patient care responsibilities due to excessive fatigue or illness, or family emergency. (Core)
1730	VI.F.	Clinical Experience and Education
1731 1732 1733 1734 1735 1736		Programs, in partnership with their Sponsoring Institutions, must design an effective program structure that is configured to provide fellows with educational and clinical experience opportunities, as well as reasonable opportunities for rest and personal activities.

Background and Intent: In the new requirements, the terms "clinical experience and education," "clinical and educational work," and "clinical and educational work hours" replace the terms "duty hours," "duty periods," and "duty." These changes have been made in response to concerns that the previous use of the term "duty" in reference to

number of hours worked may have led some to conclude that fellows' duty to "clock out" on time superseded their duty to their patients.

1742

1743 1744 VI.F.1. Maximum Hours of Clinical and Educational Work per Week

Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting. (Core)

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the

80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

1745		
1746	VI.F.2.	Mandatory Time Free of Clinical Work and Education
1747		
1748	VI.F.2.a)	The program must design an effective program structure that
1749		is configured to provide fellows with educational
1750		opportunities, as well as reasonable opportunities for rest
1751		and personal well-being. (Core)
1752		
1753	VI.F.2.b)	Fellows should have eight hours off between scheduled
1754		clinical work and education periods. (Detail)
1755		
1756	VI.F.2.b).(1)	There may be circumstances when fellows choose to
1757		stay to care for their patients or return to the hospital
1758		with fewer than eight hours free of clinical experience
1759		and education. This must occur within the context of
1760		the 80-hour and the one-day-off-in-seven
1761		requirements. (Detail)

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1762

1764 VI.F.2.c) Fellows must have at least 14 hours free of clinical work and education after 24 hours of in-house call. (Core)

1767 1768

1769 1770

1771 1772

1787

1788

1789

1790

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

VI.F.2.d)

Fellows must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. (Core)

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

1773 1774 VI.F.3. **Maximum Clinical Work and Education Period Length** 1775 1776 VI.F.3.a) Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical 1777 assignments. (Core) 1778 1779 1780 Up to four hours of additional time may be used for VI.F.3.a).(1) activities related to patient safety, such as providing 1781 effective transitions of care, and/or fellow education. 1782 1783 1784 1785 Additional patient care responsibilities must not VI.F.3.a).(1).(a) 1786 be assigned to a fellow during this time. (Core)

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

VI.F.4. Clinical and Educational Work Hour Exceptions

1791 1792	VI.F.4.a)	In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to
1793		remain or return to the clinical site in the following
1794		circumstances:
1795		
1796	VI.F.4.a).(1)	to continue to provide care to a single severely ill or
1797		unstable patient; ^(Detail)
1798		
1799	VI.F.4.a).(2)	humanistic attention to the needs of a patient or
1800		family; or, ^(Detail)
1801		
1802	VI.F.4.a).(3)	to attend unique educational events. (Detail)
1803	, , ,	·
1804	VI.F.4.b)	These additional hours of care or education will be counted
1805	•	toward the 80-hour weekly limit. (Detail)
1806		·

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

	-
VI.F.4.c)	A Review Committee may grant rotation-specific exceptions for up to 10 percent or a maximum of 88 clinical and educational work hours to individual programs based on a sound educational rationale.
	The Review Committee for General Surgery will not consider
	requests for exceptions to the 80-hour limit to the fellows' work
	week.
VI.F.4.c).(1)	In preparing a request for an exception, the program director must follow the clinical and educational work
	hour exception policy from the ACGME Manual of
	Policies and Procedures. (Core)
VI.F.4.c).(2)	Prior to submitting the request to the Review
	Committee, the program director must obtain approval from the Sponsoring Institution's GMEC and DIO. (Core)

Background and Intent: The provision for exceptions for up to 88 hours per week has been modified to specify that exceptions may be granted for specific rotations if the program can justify the increase based on criteria specified by the Review Committee. As in the past, Review Committees may opt not to permit exceptions. The underlying philosophy for this requirement is that while it is expected that all fellows should be able to train within an 80-hour work week, it is recognized that some programs may

include rotations with alternate structures based on the nature of the specialty. DIO/GMEC approval is required before the request will be considered by the Review Committee.

VI.F.5.	Moonlighting
VI.F.5.a)	Moonlighting must not interfere with the ability of the felloto achieve the goals and objectives of the educational program, and must not interfere with the fellow's fitness for work nor compromise patient safety. (Core)
VI.F.5.b)	Time spent by fellows in internal and external moonlighting (as defined in the ACGME Glossary of Terms) must be counted toward the 80-hour maximum weekly limit. (Core)
moonlighting,	and Intent: For additional clarification of the expectations related to please refer to the Common Program Requirement FAQs (available at gme.org/What-We-Do/Accreditation/Common-Program-Requirements).
VI.F.6.	In-House Night Float
	Night float must occur within the context of the 80-hour and one-day-off-in-seven requirements. (Core)
VI.F.6.a)	Any rotation that requires fellows to work nights in succession is considered a night float rotation, and the total time on nights is must be counted toward the maximum hours of clinical and educational work per week allowable time for each fellow. (Core)
VI.F.6.b)	Night float rotations must not exceed two months in succession three months in succession for rotations with night shifts alternating with day shifts. (Core)
VI.F.6.c)	There can be no more than four months of night float per year. (Core)
VI.F.6.d)	There must be at least two months between each night float rotation. (Core)
	and Intent: The requirement for no more than six consecutive nights of s removed to provide programs with increased flexibility in scheduling.
VI.F.7.	Maximum In-House On-Call Frequency
	Fellows must be scheduled for in-house call no more frequently the every third night (when averaged over a four-week period). (Core)
	At-Home Call

1867 1868 1869 1870 1871 1872 1873	VI.F.8.a)	Time spent on patient care activities by fellows on at-home call must count toward the 80-hour maximum weekly limit. The frequency of at-home call is not subject to the everythird-night limitation, but must satisfy the requirement for one day in seven free of clinical work and education, when averaged over four weeks. (Core)
1874 1875 1876 1877	VI.F.8.a).(1)	At-home call must not be so frequent or taxing as to preclude rest or reasonable personal time for each fellow. (Core)
1878 1879 1880 1881 1882	VI.F.8.b)	Fellows are permitted to return to the hospital while on athome call to provide direct care for new or established patients. These hours of inpatient patient care must be included in the 80-hour maximum weekly limit. (Detail)

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.

*Core Requirements: Statements that define structure, resource, or process elements essential to every graduate medical educational program.

[†]**Detail Requirements:** Statements that describe a specific structure, resource, or process, for achieving compliance with a Core Requirement. Programs and sponsoring institutions in substantial compliance with the Outcome Requirements may utilize alternative or innovative approaches to meet Core Requirements.

[‡]Outcome Requirements: Statements that specify expected measurable or observable attributes (knowledge, abilities, skills, or attitudes) of residents or fellows at key stages of their graduate medical education.

Osteopathic Recognition

For programs with or applying for Osteopathic Recognition, the Osteopathic Recognition Requirements also apply (www.acgme.org/OsteopathicRecognition).
