### Accredited Programs in Geriatric Psychiatry

The Accredited Programs in Geriatric Psychiatry (Psychiatry) directory includes information on programs located throughout the United States that are approved and offered through various medical schools and hospitals. These programs are designed to provide comprehensive training in geriatric psychiatry, focusing on the treatment of psychiatric disorders in older adults. Each program has its own specific length, program director, and contact information, along with details on the number of ACGME approved and offered positions available. The programs vary in location, from major cities like New York, Chicago, and Los Angeles to smaller towns and rural areas across the country. The directory is a valuable resource for medical students and professionals interested in specializing in geriatric psychiatry.
