1 **ACGME Program Requirements for Graduate Medical Education**
2 **in Infectious Disease**

3
4 **Common Program Requirements (Fellowship) are in BOLD**

5
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.
9

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

10
11 **Introduction**

12
13 **Int.A.** *Fellowship is advanced graduate medical education beyond a core*
14 *residency program for physicians who desire to enter more specialized*
15 *practice. Fellowship-trained physicians serve the public by providing*
16 *subspecialty care, which may also include core medical care, acting as a*
17 *community resource for expertise in their field, creating and integrating*
18 *new knowledge into practice, and educating future generations of*
19 *physicians. Graduate medical education values the strength that a diverse*
20 *group of physicians brings to medical care.*

21
22 *Fellows who have completed residency are able to practice independently*
23 *in their core specialty. The prior medical experience and expertise of*
24 *fellows distinguish them from physicians entering into residency training.*
25 *The fellow's care of patients within the subspecialty is undertaken with*
26 *appropriate faculty supervision and conditional independence. Faculty*
27 *members serve as role models of excellence, compassion,*
28 *professionalism, and scholarship. The fellow develops deep medical*
29 *knowledge, patient care skills, and expertise applicable to their focused*
30 *area of practice. Fellowship is an intensive program of subspecialty clinical*
31 *and didactic education that focuses on the multidisciplinary care of*
32 *patients. Fellowship education is often physically, emotionally, and*
33 *intellectually demanding, and occurs in a variety of clinical learning*
34 *environments committed to graduate medical education and the well-being*
35 *of patients, residents, fellows, faculty members, students, and all members*
36 *of the health care team.*

37
38 *In addition to clinical education, many fellowship programs advance*
39 *fellows' skills as physician-scientists. While the ability to create new*
40 *knowledge within medicine is not exclusive to fellowship-educated*
41 *physicians, the fellowship experience expands a physician's abilities to*
42 *pursue hypothesis-driven scientific inquiry that results in contributions to*
43 *the medical literature and patient care. Beyond the clinical subspecialty*
44 *expertise achieved, fellows develop mentored relationships built on an*
45 *infrastructure that promotes collaborative research.*

46
47 **Int.B.** **Definition of Subspecialty**

48
49 Infectious disease medicine is the subspecialty of internal medicine that focuses
50 on diagnosing and managing infections. ~~Infectious disease medicine is the~~
51 ~~subspecialty of internal medicine that focuses on diagnosing and managing~~
52 ~~infections.~~

53
54 **Int.C. Length of Educational Program**

55
56 The educational program in infectious disease must be 24 months in length. (Core)*

57
58 **I. Oversight**

59
60 **I.A. Sponsoring Institution**

61
62 *The Sponsoring Institution is the organization or entity that assumes the*
63 *ultimate financial and academic responsibility for a program of graduate*
64 *medical education consistent with the ACGME Institutional Requirements.*

65
66 *When the Sponsoring Institution is not a rotation site for the program, the*
67 *most commonly utilized site of clinical activity for the program is the*
68 *primary clinical site.*

69
70
71 **Background and Intent: Participating sites will reflect the health care needs of the**
72 **community and the educational needs of the fellows. A wide variety of organizations**
73 **may provide a robust educational experience and, thus, Sponsoring Institutions and**
74 **participating sites may encompass inpatient and outpatient settings including, but not**
75 **limited to a university, a medical school, a teaching hospital, a nursing home, a**
76 **school of public health, a health department, a public health agency, an organized**
77 **health care delivery system, a medical examiner's office, an educational consortium, a**
78 **teaching health center, a physician group practice, federally qualified health center, or**
79 **an educational foundation.**

80
81
82 **I.A.1. The program must be sponsored by one ACGME-accredited**
83 **Sponsoring Institution. (Core)***

84
85 **I.B. Participating Sites**

86
87 *A participating site is an organization providing educational experiences or*
88 *educational assignments/rotations for fellows.*

89
90
91 **I.B.1. The program, with approval of its Sponsoring Institution, must**
92 **designate a primary clinical site. (Core)**

93
94 **I.B.1.a)** An infectious disease fellowship must function as an integral part
95 of an ACGME-accredited program in internal medicine. (Core)

96
97 **I.B.1.b)** The Sponsoring Institution must establish the infectious disease
98 fellowship within a department of internal medicine or an
99 administrative unit whose primary mission is the advancement of
100 internal medicine subspecialty education and patient care. (Detail)

- 90 I.B.1.c) The Sponsoring Institution must ensure that there is a reporting
91 relationship with the program director of the internal medicine
92 residency program to ensure compliance with the ACGME
93 accreditation requirements. ^(Core)
94
- 95 **I.B.2. There must be a program letter of agreement (PLA) between the
96 program and each participating site that governs the relationship
97 between the program and the participating site providing a required
98 assignment. ^(Core)**
99
- 100 **I.B.2.a) The PLA must:**
- 101
- 102 **I.B.2.a).(1) be renewed at least every 10 years; and, ^(Core)**
- 103
- 104 **I.B.2.a).(2) be approved by the designated institutional official
105 (DIO). ^(Core)**
106
- 107 **I.B.3. The program must monitor the clinical learning and working
108 environment at all participating sites. ^(Core)**
109
- 110 **I.B.3.a) At each participating site there must be one faculty member,
111 designated by the program director, who is accountable for
112 fellow education for that site, in collaboration with the
113 program director. ^(Core)**
114

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- **Identifying the faculty members who will assume educational and supervisory responsibility for fellows**
- **Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows**
- **Specifying the duration and content of the educational experience**
- **Stating the policies and procedures that will govern fellow education during the assignment**

- 115
- 116 **I.B.4. The program director must submit any additions or deletions of
117 participating sites routinely providing an educational experience,
118 required for all fellows, of one month full time equivalent (FTE) or
119 more through the ACGME's Accreditation Data System (ADS). ^(Core)**

120
121 **I.C. The program, in partnership with its Sponsoring Institution, must engage in**
122 **practices that focus on mission-driven, ongoing, systematic recruitment**
123 **and retention of a diverse and inclusive workforce of residents (if present),**
124 **fellows, faculty members, senior administrative staff members, and other**
125 **relevant members of its academic community.** ^(Core)
126

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

127
128 **I.D. Resources**

129
130 **I.D.1. The program, in partnership with its Sponsoring Institution, must**
131 **ensure the availability of adequate resources for fellow education.**
132 ^(Core)

133
134 I.D.1.a) Space and Equipment

135
136 There must be space and equipment for the program, including
137 meeting rooms, examination rooms, computers, visual and other
138 educational aids, and work/study space. ^(Core)

139
140 I.D.1.b) Facilities

141
142 I.D.1.b).(1) Inpatient and outpatient systems must be in place to
143 prevent fellows from performing routine clerical functions,
144 such as scheduling tests and appointments, and retrieving
145 records and letters. ^(Detail)

146
147 I.D.1.b).(2) The Sponsoring Institution must provide the broad range of
148 facilities and clinical support services required to provide
149 comprehensive care of adult patients. ^(Core)

150
151 I.D.1.b).(3) Fellows must have access to a lounge facility during
152 assigned duty hours. ^(Detail)

153
154 I.D.1.b).(4) When fellows are in the hospital, assigned night duty, or
155 called in from home, they must be provided with a secure
156 space for their belongings. ^(Detail)

157
158 I.D.1.b).(5) Fellows must have convenient access to a laboratory for
159 clinical microbiology, such that direct and frequent
160 interaction with microbiology laboratory personnel is readily
161 available. ^(Core)

162
163 I.D.1.b).(6) Facilities for the isolation of patients with infectious
164 diseases must be available. ^(Core)

165
166 I.D.1.c) Other Support Services
167
168 It is suggested that clinical education be conducted in settings that
169 also have ACGME-accredited programs in general surgery,
170 obstetrics and gynecology, pediatrics, and other medical and
171 surgical subspecialties. ^(Detail)

172
173 I.D.1.d) Medical Records
174
175 Access to an electronic health record should be provided. In the
176 absence of an existing electronic health record, institutions must
177 demonstrate institutional commitment to its development and
178 progress toward its implementation. ^(Core)

179
180 **I.D.2. The program, in partnership with its Sponsoring Institution, must**
181 **ensure healthy and safe learning and working environments that**
182 **promote fellow well-being and provide for:** ^(Core)

183
184 **I.D.2.a) access to food while on duty;** ^(Core)

185
186 **I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available**
187 **and accessible for fellows with proximity appropriate for safe**
188 **patient care;** ^(Core)

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

190
191 **I.D.2.c) clean and private facilities for lactation that have refrigeration**
192 **capabilities, with proximity appropriate for safe patient care;**
193 ^(Core)

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

194
195
196 **I.D.2.d) security and safety measures appropriate to the participating**
197 **site; and,** ^(Core)

199 **I.D.2.e)** accommodations for fellows with disabilities consistent with
200 the Sponsoring Institution’s policy. ^(Core)

201
202 **I.D.3.** Fellows must have ready access to subspecialty-specific and other
203 appropriate reference material in print or electronic format. This
204 must include access to electronic medical literature databases with
205 full text capabilities. ^(Core)

206
207 **I.D.4.** The program’s educational and clinical resources must be adequate
208 to support the number of fellows appointed to the program. ^(Core)

209
210 **I.D.4.a)** Patient Population

211
212 **I.D.4.a).(1)** The patient population must have a variety of clinical
213 problems and stages of diseases. ^(Core)

214
215 **I.D.4.a).(2)** There must be patients of each gender, with a broad age
216 range, including geriatric patients. ^(Core)

217
218 **I.D.4.a).(3)** A sufficient number of patients must be available to enable
219 each fellow to achieve the required educational outcomes.
220 ^(Core)

221
222 **I.E.** *A fellowship program usually occurs in the context of many learners and*
223 *other care providers and limited clinical resources. It should be structured*
224 *to optimize education for all learners present.*

225
226 **I.E.1.** Fellows should contribute to the education of residents in core
227 programs, if present. ^(Core)

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows’ education is not compromised by the presence of other providers and learners, and that fellows’ education does not compromise core residents’ education.

228
229
230 **II. Personnel**

231
232 **II.A. Program Director**

233
234 **II.A.1.** There must be one faculty member appointed as program director
235 with authority and accountability for the overall program, including
236 compliance with all applicable program requirements. ^(Core)

237
238 **II.A.1.a)** The Sponsoring Institution’s Graduate Medical Education
239 Committee (GMEC) must approve a change in program
240 director. ^(Core)

241

242 **II.A.1.b) Final approval of the program director resides with the**
243 **Review Committee.** (Core)
244

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual's responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director's nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

245
246 **II.A.2. The program director must be provided with support adequate for**
247 **administration of the program based upon its size and configuration.**
248 (Core)
249

250 **II.A.2.a) At a minimum, the program director must be provided with the**
251 **salary support required to devote 20-50 percent FTE of non-**
252 **clinical time to the administration of the program.** (Core)
253

254 **II.A.2.b) ~~The program director must not be required to generate clinical or~~**
255 **~~other income to provide this administrative support.~~** (Core)
256

257 **II.A.2.c) This support should be 25 to 50 percent of the program director's**
258 **salary, or protected time, depending on the size of the program.**
259 (Detail)
260

Background and Intent: Twenty percent FTE is defined as one day per week.

"Administrative time" is defined as non-clinical time spent meeting the responsibilities of the program director as detailed in requirements II.A.4.-II.A.4.a).(16).

The requirement does not address the source of funding required to provide the specified salary support.

261
262 **II.A.3. Qualifications of the program director:**
263

264 **II.A.3.a) must include subspecialty expertise and qualifications**
265 **acceptable to the Review Committee; and,** (Core)
266

267 **II.A.3.a).(1) The program director must have administrative experience**
268 **and at least five three years of participation as an active**
269 **faculty member in an ACGME-accredited internal medicine**
270 **residency or infectious disease fellowship.** (Detail Core)
271

272 **II.A.3.b) must include current certification in the subspecialty for**
273 **which they are the program director by the American Board**
274 **of Internal Medicine (ABIM) or by the American Osteopathic**
275 **Board of Internal Medicine (AOBIM), or subspecialty**
276 **qualifications that are acceptable to the Review Committee.**
277 (Core)
278

279 II.A.3.b).(1) The Review Committee only accepts current ABIM or
280 AOBIM certification in infectious disease. ^(Core)

281
282 **II.A.4. Program Director Responsibilities**

283
284 **The program director must have responsibility, authority, and**
285 **accountability for: administration and operations; teaching and**
286 **scholarly activity; fellow recruitment and selection, evaluation, and**
287 **promotion of fellows, and disciplinary action; supervision of fellows;**
288 **and fellow education in the context of patient care.** ^(Core)

289
290 **II.A.4.a) The program director must:**

291
292 **II.A.4.a).(1) be a role model of professionalism;** ^(Core)

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

294
295 **II.A.4.a).(2) design and conduct the program in a fashion**
296 **consistent with the needs of the community, the**
297 **mission(s) of the Sponsoring Institution, and the**
298 **mission(s) of the program;** ^(Core)

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

300
301 **II.A.4.a).(3) administer and maintain a learning environment**
302 **conducive to educating the fellows in each of the**
303 **ACGME Competency domains;** ^(Core)

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

305
306 **II.A.4.a).(4) develop and oversee a process to evaluate candidates**
307 **prior to approval as program faculty members for**
308 **participation in the fellowship program education and**
309 **at least annually thereafter, as outlined in V.B.;** ^(Core)

- 310
 311 **II.A.4.a).(5)** have the authority to approve program faculty
 312 members for participation in the fellowship program
 313 education at all sites; ^(Core)
 314
 315 **II.A.4.a).(6)** have the authority to remove program faculty
 316 members from participation in the fellowship program
 317 education at all sites; ^(Core)
 318
 319 **II.A.4.a).(7)** have the authority to remove fellows from supervising
 320 interactions and/or learning environments that do not
 321 meet the standards of the program; ^(Core)
 322

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

- 323
 324 **II.A.4.a).(8)** submit accurate and complete information required
 325 and requested by the DIO, GMEC, and ACGME; ^(Core)
 326
 327 **II.A.4.a).(9)** provide applicants who are offered an interview with
 328 information related to the applicant's eligibility for the
 329 relevant subspecialty board examination(s); ^(Core)
 330
 331 **II.A.4.a).(10)** provide a learning and working environment in which
 332 fellows have the opportunity to raise concerns and
 333 provide feedback in a confidential manner as
 334 appropriate, without fear of intimidation or retaliation;
 335 ^(Core)
 336
 337 **II.A.4.a).(11)** ensure the program's compliance with the Sponsoring
 338 Institution's policies and procedures related to
 339 grievances and due process; ^(Core)
 340
 341 **II.A.4.a).(12)** ensure the program's compliance with the Sponsoring
 342 Institution's policies and procedures for due process
 343 when action is taken to suspend or dismiss, not to
 344 promote, or not to renew the appointment of a fellow;
 345 ^(Core)
 346

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

347

- 348 **II.A.4.a).(13)** ensure the program’s compliance with the Sponsoring
349 **Institution’s policies and procedures on employment**
350 **and non-discrimination;** *(Core)*
351
352 **II.A.4.a).(13).(a)** **Fellows must not be required to sign a non-**
353 **competition guarantee or restrictive covenant.**
354 *(Core)*
355
356 **II.A.4.a).(14)** **document verification of program completion for all**
357 **graduating fellows within 30 days;** *(Core)*
358
359 **II.A.4.a).(15)** **provide verification of an individual fellow’s**
360 **completion upon the fellow’s request, within 30 days;**
361 **and,** *(Core)*
362

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

- 363
364 **II.A.4.a).(16)** **obtain review and approval of the Sponsoring**
365 **Institution’s DIO before submitting information or**
366 **requests to the ACGME, as required in the Institutional**
367 **Requirements and outlined in the ACGME Program**
368 **Director’s Guide to the Common Program**
369 **Requirements.** *(Core)*
370

371 **II.B. Faculty**

372
373 ***Faculty members are a foundational element of graduate medical education***
374 ***– faculty members teach fellows how to care for patients. Faculty members***
375 ***provide an important bridge allowing fellows to grow and become practice***
376 ***ready, ensuring that patients receive the highest quality of care. They are***
377 ***role models for future generations of physicians by demonstrating***
378 ***compassion, commitment to excellence in teaching and patient care,***
379 ***professionalism, and a dedication to lifelong learning. Faculty members***
380 ***experience the pride and joy of fostering the growth and development of***
381 ***future colleagues. The care they provide is enhanced by the opportunity to***
382 ***teach. By employing a scholarly approach to patient care, faculty members,***
383 ***through the graduate medical education system, improve the health of the***
384 ***individual and the population.***

385
386 ***Faculty members ensure that patients receive the level of care expected***
387 ***from a specialist in the field. They recognize and respond to the needs of***
388 ***the patients, fellows, community, and institution. Faculty members provide***
389 ***appropriate levels of supervision to promote patient safety. Faculty***
390 ***members create an effective learning environment by acting in a***
391 ***professional manner and attending to the well-being of the fellows and***
392 ***themselves.***

393

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment or salary support.

394

395

II.B.1. For each participating site, there must be a sufficient number of faculty members with competence to instruct and supervise all fellows at that location. ^(Core)

396

397

398

399

II.B.2. Faculty members must:

400

401

II.B.2.a) be role models of professionalism; ^(Core)

402

403

II.B.2.b) demonstrate commitment to the delivery of safe, quality, cost-effective, patient-centered care; ^(Core)

404

405

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

406

407

II.B.2.c) demonstrate a strong interest in the education of fellows; ^(Core)

408

409

II.B.2.d) devote sufficient time to the educational program to fulfill their supervisory and teaching responsibilities; ^(Core)

410

411

412

II.B.2.e) administer and maintain an educational environment conducive to educating fellows; ^(Core)

413

414

415

II.B.2.f) regularly participate in organized clinical discussions, rounds, journal clubs, and conferences; and, ^(Core)

416

417

418

II.B.2.g) pursue faculty development designed to enhance their skills at least annually. ^(Core)

419

420

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

421

422

II.B.3. Faculty Qualifications

423

424

II.B.3.a) Faculty members must have appropriate qualifications in their field and hold appropriate institutional appointments. ^(Core)

425

426

427

428 **II.B.3.b) Subspecialty physician faculty members must:**
429
430 **II.B.3.b).(1) have current certification in the subspecialty by the**
431 **American Board of Internal Medicine or the American**
432 **Osteopathic Board of Internal Medicine, or possess**
433 **qualifications judged acceptable to the Review**
434 **Committee. (Core)**
435

436 **II.B.3.c) Any non-physician faculty members who participate in**
437 **fellowship program education must be approved by the**
438 **program director. (Core)**
439

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

440
441 **II.B.3.d) Any other specialty physician faculty members must have**
442 **current certification in their specialty by the appropriate**
443 **American Board of Medical Specialties (ABMS) member**
444 **board or American Osteopathic Association (AOA) certifying**
445 **board, or possess qualifications judged acceptable to the**
446 **Review Committee. (Core)**
447

448 **II.B.4. Core Faculty**
449
450 **Core faculty members must have a significant role in the education**
451 **and supervision of fellows and must devote a significant portion of**
452 **their entire effort to fellow education and/or administration, and**
453 **must, as a component of their activities, teach, evaluate, and provide**
454 **formative feedback to fellows. (Core)**
455

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.

456
457 **II.B.4.a) Core faculty members must be designated by the program**
458 **director. (Core)**
459

460 **II.B.4.b) Core faculty members must complete the annual ACGME**
461 **Faculty Survey. (Core)**
462

- 463 II.B.4.c) In addition to the program director, there must be at least one core
464 faculty member certified in infectious disease by the ABIM or the
465 AOBIM. ^(Core)
466
467 II.B.4.d) In programs approved for more than three fellows, there must be
468 at least one core faculty member certified in infectious disease by
469 the ABIM or the AOBIM for every 1.5 fellows. ^(Core)
470

Specialty Background and Intent: The program must have a minimum number of ABIM- or AOBIM-certified infectious disease faculty members who devote significant time to teaching, supervising, and advising residents, and working closely with the program director. One way the infectious disease-certified faculty members can demonstrate they are devoting a significant portion of their effort to resident education is by dedicating an average of 10 hours per week to the program.

- 471
472 **II.C. Program Coordinator**
473
474 **II.C.1. There must be a program coordinator.** ^(Core)
475
476 **II.C.2. The program coordinator must be provided with support adequate**
477 **for administration of the program based upon its size and**
478 **configuration.** ^(Core)
479

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge of the ACGME and Program Requirements, policies, and procedures. Program coordinators assist the program director in accreditation efforts, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

- 480
481 **II.D. Other Program Personnel**
482
483 **The program, in partnership with its Sponsoring Institution, must jointly**
484 **ensure the availability of necessary personnel for the effective**
485 **administration of the program.** ^(Core)
486

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

487
488 II.D.1. There must be services available from other health care professionals,
489 including dietitians, language interpreters, nurses, occupational
490 therapists, physical therapists, and social workers. ^(Detail)
491

492 II.D.2. There must be appropriate and timely consultation from other specialties.
493 ^(Detail)
494

495 III. Fellow Appointments

496 III.A. Eligibility Criteria

497 III.A.1. Eligibility Requirements – Fellowship Programs

498 **All required clinical education for entry into ACGME-accredited**
499 **fellowship programs must be completed in an ACGME-accredited**
500 **residency program, an AOA-approved residency program, a**
501 **program with ACGME International (ACGME-I) Advanced Specialty**
502 **Accreditation, or a Royal College of Physicians and Surgeons of**
503 **Canada (RCPSC)-accredited or College of Family Physicians of**
504 **Canada (CFPC)-accredited residency program located in Canada.**
505 ^(Core)
506
507
508
509

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

510
511 III.A.1.a) **Fellowship programs must receive verification of each**
512 **entering fellow’s level of competence in the required field,**
513 **upon matriculation, using ACGME, ACGME-I, or CanMEDS**
514 **Milestones evaluations from the core residency program.** ^(Core)
515

516 III.A.1.b) Prior to appointment in the fellowship, fellows should have
517 completed an internal medicine program that satisfies the
518 requirements in III.A.1. ^(Core)
519

520 III.A.1.b).(1) Fellows who did not complete an internal medicine
521 program that satisfies the requirements in III.A.1. must
522 have completed at least three years of internal medicine
523 education prior to starting the fellowship as well as met all
524 of the criteria in the “Fellow Eligibility Exception” section
525 below. ^(Core)
526

527 III.A.1.c) **Fellow Eligibility Exception**

528

529 **The Review Committee for Internal Medicine will allow the**
530 **following exception to the fellowship eligibility requirements:**

531
532 **III.A.1.c).(1)** **An ACGME-accredited fellowship program may accept**
533 **an exceptionally qualified international graduate**
534 **applicant who does not satisfy the eligibility**
535 **requirements listed in III.A.1., but who does meet all of**
536 **the following additional qualifications and conditions:**
537 **(Core)**

538
539 **III.A.1.c).(1).(a)** **evaluation by the program director and**
540 **fellowship selection committee of the**
541 **applicant's suitability to enter the program,**
542 **based on prior training and review of the**
543 **summative evaluations of training in the core**
544 **specialty; and, (Core)**

545
546 **III.A.1.c).(1).(b)** **review and approval of the applicant's**
547 **exceptional qualifications by the GMEC; and,**
548 **(Core)**

549
550 **III.A.1.c).(1).(c)** **verification of Educational Commission for**
551 **Foreign Medical Graduates (ECFMG)**
552 **certification. (Core)**

553
554 **III.A.1.c).(2)** **Applicants accepted through this exception must have**
555 **an evaluation of their performance by the Clinical**
556 **Competency Committee within 12 weeks of**
557 **matriculation. (Core)**

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

559
560 **III.B.** **The program director must not appoint more fellows than approved by the**
561 **Review Committee. (Core)**

562

- 563 **III.B.1.** **All complement increases must be approved by the Review**
564 **Committee.** *(Core)*
565
- 566 **III.B.2.** **The number of available fellow positions in the program must be at least**
567 **one per year.** *(Detail)*
568
- 569 **III.C.** **Fellow Transfers**
570
571 **The program must obtain verification of previous educational experiences**
572 **and a summative competency-based performance evaluation prior to**
573 **acceptance of a transferring fellow, and Milestones evaluations upon**
574 **matriculation.** *(Core)*
575
- 576 **IV. Educational Program**
577
578 ***The ACGME accreditation system is designed to encourage excellence and***
579 ***innovation in graduate medical education regardless of the organizational***
580 ***affiliation, size, or location of the program.***
581
582 ***The educational program must support the development of knowledgeable, skillful***
583 ***physicians who provide compassionate care.***
584
585 ***In addition, the program is expected to define its specific program aims consistent***
586 ***with the overall mission of its Sponsoring Institution, the needs of the community***
587 ***it serves and that its graduates will serve, and the distinctive capabilities of***
588 ***physicians it intends to graduate. While programs must demonstrate substantial***
589 ***compliance with the Common and subspecialty-specific Program Requirements, it***
590 ***is recognized that within this framework, programs may place different emphasis***
591 ***on research, leadership, public health, etc. It is expected that the program aims***
592 ***will reflect the nuanced program-specific goals for it and its graduates; for***
593 ***example, it is expected that a program aiming to prepare physician-scientists will***
594 ***have a different curriculum from one focusing on community health.***
595
- 596 **IV.A.** **The curriculum must contain the following educational components:** *(Core)*
597
- 598 **IV.A.1.** **a set of program aims consistent with the Sponsoring Institution’s**
599 **mission, the needs of the community it serves, and the desired**
600 **distinctive capabilities of its graduates;** *(Core)*
601
- 602 **IV.A.1.a)** **The program’s aims must be made available to program**
603 **applicants, fellows, and faculty members.** *(Core)*
604
- 605 **IV.A.2.** **competency-based goals and objectives for each educational**
606 **experience designed to promote progress on a trajectory to**
607 **autonomous practice in their subspecialty. These must be**
608 **distributed, reviewed, and available to fellows and faculty members;**
609 *(Core)*
610
- 611 **IV.A.3.** **delineation of fellow responsibilities for patient care, progressive**
612 **responsibility for patient management, and graded supervision in**
613 **their subspecialty;** *(Core)*

614

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

615
616
617
618

IV.A.4. structured educational activities beyond direct patient care; and,
(Core)

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

619
620
621
622
623
624

IV.A.5. advancement of fellows' knowledge of ethical principles
foundational to medical professionalism. (Core)

IV.B. ACGME Competencies

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

625
626
627
628
629
630
631
632
633
634
635

IV.B.1. The program must integrate the following ACGME Competencies into the curriculum: (Core)

IV.B.1.a) Professionalism

Fellows must demonstrate a commitment to professionalism and an adherence to ethical principles. (Core)

IV.B.1.b) Patient Care and Procedural Skills

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs.* 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

636		
637	IV.B.1.b).(1)	Fellows must be able to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health. ^(Core)
638		
639		
640		
641		
642	IV.B.1.b).(1).(a)	Fellows must demonstrate competence in the practice of health promotion, disease prevention, diagnosis, care, and treatment of patients of each gender from adolescence to old age, during health and all stages of illness; and, ^(Core)
643		
644		
645		
646		
647		
648	IV.B.1.b).(1).(b)	Fellows must demonstrate competence in the diagnosis and management of the following infectious disease areas:
649		
650		
651		
652	IV.B.1.b).(1).(b).(i)	bacterial infections; ^(Core)
653		
654	IV.B.1.b).(1).(b).(ii)	fungal infections; ^(Core)
655		
656	IV.B.1.b).(1).(b).(iii)	health care-associated infections; ^(Core)
657		
658	IV.B.1.b).(1).(b).(iv)	HIV/AIDS; ^(Core)
659		
660	IV.B.1.b).(1).(b).(v)	infections in patients in intensive care units; ^(Core)
661		
662		
663	IV.B.1.b).(1).(b).(vi)	infections in patients with impaired host defenses; ^(Core)
664		
665		
666	IV.B.1.b).(1).(b).(vii)	infections in surgical patients; ^(Core)
667		
668	IV.B.1.b).(1).(b).(viii)	infections in travelers; ^(Core)
669		
670	IV.B.1.b).(1).(b).(ix)	parasitic infections; ^(Core)
671		
672	IV.B.1.b).(1).(b).(x)	prosthetic device infections; ^(Core)
673		
674	IV.B.1.b).(1).(b).(xi)	sepsis syndromes; ^(Core)
675		
676	IV.B.1.b).(1).(b).(xii)	sexually transmitted infections; and, ^(Core)
677		
678	IV.B.1.b).(1).(b).(xiii)	viral infections. ^(Core)
679		
680	IV.B.1.b).(2)	Fellows must be able to perform all medical, diagnostic, and surgical procedures considered essential for the area of practice. ^(Core)
681		
682		
683		

684	IV.B.1.c)	Medical Knowledge
685		
686		Fellows must demonstrate knowledge of established and
687		evolving biomedical, clinical, epidemiological and social-
688		behavioral sciences, as well as the application of this
689		knowledge to patient care. ^(Core)
690		
691	IV.B.1.c).(1)	Fellows must demonstrate knowledge of the scientific
692		method of problem solving and evidence-based decision
693		making; ^(Core)
694		
695	IV.B.1.c).(2)	Fellows must demonstrate knowledge of indications,
696		contraindications, limitations, complications, techniques,
697		and interpretation of results of those diagnostic and
698		therapeutic procedures integral to the discipline, including
699		the appropriate indications for and use of screening
700		tests/procedures; ^(Core)
701		
702	IV.B.1.c).(3)	Fellows must demonstrate knowledge of:
703		
704	IV.B.1.c).(3).(a)	the mechanisms of action and adverse reactions of
705		antimicrobial agents, antimicrobial and antiviral
706		resistance, drug-drug interactions between
707		antimicrobial agents and other compounds; ^(Core)
708		
709	IV.B.1.c).(3).(b)	the appropriate use and management of
710		antimicrobial agents in a variety of clinical settings,
711		including the hospital, ambulatory practice, non-
712		acute-care units, and the home; ^(Core)
713		
714	IV.B.1.c).(3).(c)	the appropriate procedures for specimen collection
715		relevant to infectious disease, including but not
716		limited to bronchoscopy, thoracentesis,
717		arthrocentesis, lumbar puncture, and aspiration of
718		abscess cavities; ^(Core)
719		
720	IV.B.1.c).(3).(d)	the principles of prophylaxis and
721		immunoprophylaxis to enhance resistance to
722		infection; ^(Core)
723		
724	IV.B.1.c).(3).(e)	the characteristics, use, and complications of
725		antiretroviral agents, mechanisms and clinical
726		significance of viral resistance to antiretroviral
727		agents, and recognition and management of
728		opportunistic infections in patients with HIV/AIDS;
729		and, ^(Core)
730		
731	IV.B.1.c).(3).(f)	the fundamentals of host defense and mechanisms
732		of microorganism pathogenesis. ^(Core)
733		
734	IV.B.1.c).(4)	Fellows must demonstrate knowledge of the development

735 of appropriate antibiotic utilizations and restriction policies;
736 and, ^(Core)

737
738 IV.B.1.c).(5) Fellows must demonstrate knowledge of infection control
739 and hospital epidemiology. ^(Core)

740
741 **IV.B.1.d) Practice-based Learning and Improvement**

742
743 **Fellows must demonstrate the ability to investigate and**
744 **evaluate their care of patients, to appraise and assimilate**
745 **scientific evidence, and to continuously improve patient care**
746 **based on constant self-evaluation and lifelong learning.** ^(Core)
747

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

748
749 **IV.B.1.e) Interpersonal and Communication Skills**

750
751 **Fellows must demonstrate interpersonal and communication**
752 **skills that result in the effective exchange of information and**
753 **collaboration with patients, their families, and health**
754 **professionals.** ^(Core)

755
756 **IV.B.1.f) Systems-based Practice**

757
758 **Fellows must demonstrate an awareness of and**
759 **responsiveness to the larger context and system of health**
760 **care, including the social determinants of health, as well as**
761 **the ability to call effectively on other resources to provide**
762 **optimal health care.** ^(Core)

763
764 **IV.C. Curriculum Organization and Fellow Experiences**

765
766 **IV.C.1. The curriculum must be structured to optimize fellow educational**
767 **experiences, the length of these experiences, and supervisory**
768 **continuity.** ^(Core)

769
770 IV.C.1.a) Assignment of rotations must be structured to minimize the
771 frequency of rotational transitions, and rotations must be of
772 sufficient length to provide a quality educational experience,
773 defined by continuity of patient care, ongoing supervision,
774 longitudinal relationships with faculty members, and meaningful
775 assessment and feedback. ^(Core)
776

- 777 IV.C.1.b) Clinical experiences should be structured to facilitate learning in a
778 manner that allows fellows to function as part of an effective
779 interprofessional team that works together towards the shared
780 goals of patient safety and quality improvement. ^(Core)
781
- 782 **IV.C.2. The program must provide instruction and experience in pain**
783 **management if applicable for the subspecialty, including recognition**
784 **of the signs of addiction.** ^(Core)
785
- 786 IV.C.3. A minimum of 12 months must be devoted to clinical experience. ^(Core)
787
- 788 IV.C.4. Fellows must participate in the management of outpatient antibiotic
789 therapy, including interaction with pharmacy, nursing, and other home
790 care services. ^(Core)
791
- 792 IV.C.5. Fellows must participate in training using simulation. ^(Detail)
793
- 794 IV.C.6. Experience with Continuity Ambulatory Patients
795
- 796 IV.C.6.a) Fellows must have continuity ambulatory clinic experience that
797 exposes them fellows to the breadth and depth of the
798 subspecialty. ^(Core)
799
- 800 IV.C.6.b) This experience should average one half-day each week. ^(Detail)
801
- 802 IV.C.6.c) This experience must include an appropriate distribution of
803 patients of each gender and a diversity of ages; ^(Core)
804
- 805 This should be accomplished through either:
806
- 807 IV.C.6.c).(1) a continuity clinic which provides fellows the opportunity to
808 learn the course of disease; or, ^(Detail)
809
- 810 IV.C.6.c).(2) selected blocks of at least six months which address
811 specific areas of infectious disease. ^(Detail)
812
- 813 IV.C.6.d) Ambulatory experience must include the longitudinal care of
814 patients with HIV infection under the supervision of a physician
815 experienced in the management of HIV infection. ^(Core)
816
- 817 IV.C.6.d).(1) Fellows must be assigned to an HIV clinic for a period of at
818 least 12 months. ^(Detail)
819
- 820 IV.C.6.e) Each fellow should, on average, be responsible for four to eight
821 patients during each half-day session. ^(Detail)
822
- 823 IV.C.6.f) The continuity patient care experience should not be interrupted
824 by more than one month, excluding a fellow's vacation. ^(Detail)
825
- 826 IV.C.6.g) Fellows should be informed of the status of their continuity
827 patients when such patients are hospitalized, as clinically

- 828 appropriate. ^(Detail)
- 829
- 830 IV.C.7. Consultations
- 831
- 832 IV.C.7.a) Each fellow must provide patient care consultations or directly
833 oversee students or residents performing consultations totaling at
834 least 250 new patient consults with infectious disease problems.
835 ^(Core)
- 836
- 837 IV.C.7.b) Experience with pediatric infectious diseases is suggested. ^(Detail)
- 838
- 839 IV.C.8. The core curriculum must include a didactic program based upon the core
840 knowledge content in the subspecialty area. ^(Core)
- 841

918
919 **IV.D.2.b) The program must demonstrate dissemination of scholarly**
920 **activity within and external to the program by the following**
921 **methods:**

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program's effectiveness in the creation of an environment of inquiry that advances the fellows' scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the

creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

- 923
924 **IV.D.2.b).(1)** faculty participation in grand rounds, posters,
925 workshops, quality improvement presentations,
926 podium presentations, grant leadership, non-peer-
927 reviewed print/electronic resources, articles or
928 publications, book chapters, textbooks, webinars,

966
- 967 **V. Evaluation**
968
- 969 **V.A. Fellow Evaluation**
970

971
972

V.A.1. Feedback and Evaluation

Background and Intent: Feedback is ongoing information provided regarding aspects of one’s performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- fellows identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is *evaluating a fellow’s learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

973
974
975
976
977
978
979
980
981
982
983
984

V.A.1.a) Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. ^(Core)

V.A.1.a).(1) The faculty must discuss this evaluation with each fellow at the completion of each assignment. ^(Core)

V.A.1.a).(2) Assessment of procedural competence should include a formal evaluation process and not be based solely on a minimum number of procedures performed. ^(Detail)

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

985
986
987

V.A.1.b) Evaluation must be documented at the completion of the assignment. ^(Core)

- 988
989 **V.A.1.b).(1)** For block rotations of greater than three months in
990 duration, evaluation must be documented at least
991 every three months. ^(Core)
992
- 993 **V.A.1.b).(2)** Longitudinal experiences such as continuity clinic in
994 the context of other clinical responsibilities must be
995 evaluated at least every three months and at
996 completion. ^(Core)
997
- 998 **V.A.1.c)** The program must provide an objective performance
999 evaluation based on the Competencies and the subspecialty-
1000 specific Milestones, and must: ^(Core)
1001
- 1002 **V.A.1.c).(1)** use multiple evaluators (e.g., faculty members, peers,
1003 patients, self, and other professional staff members);
1004 and, ^(Core)
1005
- 1006 **V.A.1.c).(2)** provide that information to the Clinical Competency
1007 Committee for its synthesis of progressive fellow
1008 performance and improvement toward unsupervised
1009 practice. ^(Core)
1010

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

- 1011
1012 **V.A.1.d)** The program director or their designee, with input from the
1013 Clinical Competency Committee, must:
1014
- 1015 **V.A.1.d).(1)** meet with and review with each fellow their
1016 documented semi-annual evaluation of performance,
1017 including progress along the subspecialty-specific
1018 Milestones. ^(Core)
1019
- 1020 **V.A.1.d).(2)** assist fellows in developing individualized learning
1021 plans to capitalize on their strengths and identify areas
1022 for growth; and, ^(Core)
1023
- 1024 **V.A.1.d).(3)** develop plans for fellows failing to progress, following
1025 institutional policies and procedures. ^(Core)
1026

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at

the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

1027		
1028	V.A.1.e)	At least annually, there must be a summative evaluation of
1029		each fellow that includes their readiness to progress to the
1030		next year of the program, if applicable. (Core)
1031		
1032	V.A.1.f)	The evaluations of a fellow's performance must be accessible
1033		for review by the fellow. (Core)
1034		
1035	V.A.2.	Final Evaluation
1036		
1037	V.A.2.a)	The program director must provide a final evaluation for each
1038		fellow upon completion of the program. (Core)
1039		
1040	V.A.2.a).(1)	The subspecialty-specific Milestones, and when
1041		applicable the subspecialty-specific Case Logs, must
1042		be used as tools to ensure fellows are able to engage
1043		in autonomous practice upon completion of the
1044		program. (Core)
1045		
1046	V.A.2.a).(2)	The final evaluation must:
1047		
1048	V.A.2.a).(2).(a)	become part of the fellow's permanent record
1049		maintained by the institution, and must be
1050		accessible for review by the fellow in
1051		accordance with institutional policy; (Core)
1052		
1053	V.A.2.a).(2).(b)	verify that the fellow has demonstrated the
1054		knowledge, skills, and behaviors necessary to
1055		enter autonomous practice; (Core)
1056		
1057	V.A.2.a).(2).(c)	consider recommendations from the Clinical
1058		Competency Committee; and, (Core)
1059		
1060	V.A.2.a).(2).(d)	be shared with the fellow upon completion of
1061		the program. (Core)
1062		

- 1063 **V.A.3. A Clinical Competency Committee must be appointed by the**
 1064 **program director. (Core)**
 1065
 1066 **V.A.3.a) At a minimum the Clinical Competency Committee must**
 1067 **include three members, at least one of whom is a core faculty**
 1068 **member. Members must be faculty members from the same**
 1069 **program or other programs, or other health professionals**
 1070 **who have extensive contact and experience with the**
 1071 **program’s fellows. (Core)**
 1072
 1073 **V.A.3.b) The Clinical Competency Committee must:**
 1074
 1075 **V.A.3.b).(1) review all fellow evaluations at least semi-annually;**
 1076 **(Core)**
 1077
 1078 **V.A.3.b).(2) determine each fellow’s progress on achievement of**
 1079 **the subspecialty-specific Milestones; and, (Core)**
 1080
 1081 **V.A.3.b).(3) meet prior to the fellows’ semi-annual evaluations and**
 1082 **advise the program director regarding each fellow’s**
 1083 **progress. (Core)**
 1084
 1085 **V.B. Faculty Evaluation**
 1086
 1087 **V.B.1. The program must have a process to evaluate each faculty**
 1088 **member’s performance as it relates to the educational program at**
 1089 **least annually. (Core)**
 1090

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program’s faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 1091
 1092 **V.B.1.a) This evaluation must include a review of the faculty member’s**
 1093 **clinical teaching abilities, engagement with the educational**
 1094 **program, participation in faculty development related to their**

- 1095 skills as an educator, clinical performance, professionalism,
 1096 and scholarly activities. ^(Core)
 1097
 1098 **V.B.1.b)** This evaluation must include written, confidential evaluations
 1099 by the fellows. ^(Core)
 1100
 1101 **V.B.2.** Faculty members must receive feedback on their evaluations at least
 1102 annually. ^(Core)
 1103
 1104 **V.B.3.** Results of the faculty educational evaluations should be
 1105 incorporated into program-wide faculty development plans. ^(Core)
 1106

Background and Intent: The quality of the faculty’s teaching and clinical care is a determinant of the quality of the program and the quality of the fellows’ future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members’ teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program’s faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

- 1107
 1108 **V.C. Program Evaluation and Improvement**
 1109
 1110 **V.C.1.** The program director must appoint the Program Evaluation
 1111 Committee to conduct and document the Annual Program
 1112 Evaluation as part of the program’s continuous improvement
 1113 process. ^(Core)
 1114
 1115 **V.C.1.a)** The Program Evaluation Committee must be composed of at
 1116 least two program faculty members, at least one of whom is a
 1117 core faculty member, and at least one fellow. ^(Core)
 1118
 1119 **V.C.1.b)** Program Evaluation Committee responsibilities must include:
 1120
 1121 **V.C.1.b).(1)** acting as an advisor to the program director, through
 1122 program oversight; ^(Core)
 1123
 1124 **V.C.1.b).(2)** review of the program’s self-determined goals and
 1125 progress toward meeting them; ^(Core)
 1126
 1127 **V.C.1.b).(3)** guiding ongoing program improvement, including
 1128 development of new goals, based upon outcomes;
 1129 and, ^(Core)
 1130
 1131 **V.C.1.b).(4)** review of the current operating environment to identify
 1132 strengths, challenges, opportunities, and threats as
 1133 related to the program’s mission and aims. ^(Core)
 1134

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for

itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.

- 1135
1136 **V.C.1.c)** **The Program Evaluation Committee should consider the**
1137 **following elements in its assessment of the program:**
1138
1139 **V.C.1.c).(1)** **curriculum;** ^(Core)
1140
1141 **V.C.1.c).(2)** **outcomes from prior Annual Program Evaluation(s);**
1142 ^(Core)
1143
1144 **V.C.1.c).(3)** **ACGME letters of notification, including citations,**
1145 **Areas for Improvement, and comments;** ^(Core)
1146
1147 **V.C.1.c).(4)** **quality and safety of patient care;** ^(Core)
1148
1149 **V.C.1.c).(5)** **aggregate fellow and faculty:**
1150
1151 **V.C.1.c).(5).(a)** **well-being;** ^(Core)
1152
1153 **V.C.1.c).(5).(b)** **recruitment and retention;** ^(Core)
1154
1155 **V.C.1.c).(5).(c)** **workforce diversity;** ^(Core)
1156
1157 **V.C.1.c).(5).(d)** **engagement in quality improvement and patient**
1158 **safety;** ^(Core)
1159
1160 **V.C.1.c).(5).(e)** **scholarly activity;** ^(Core)
1161
1162 **V.C.1.c).(5).(f)** **ACGME Resident/Fellow and Faculty Surveys**
1163 **(where applicable); and,** ^(Core)
1164
1165 **V.C.1.c).(5).(g)** **written evaluations of the program.** ^(Core)
1166
1167 **V.C.1.c).(6)** **aggregate fellow:**
1168
1169 **V.C.1.c).(6).(a)** **achievement of the Milestones;** ^(Core)
1170
1171 **V.C.1.c).(6).(b)** **in-training examinations (where applicable);**
1172 ^(Core)
1173
1174 **V.C.1.c).(6).(c)** **board pass and certification rates; and,** ^(Core)
1175
1176 **V.C.1.c).(6).(d)** **graduate performance.** ^(Core)
1177
1178 **V.C.1.c).(7)** **aggregate faculty:**
1179
1180 **V.C.1.c).(7).(a)** **evaluation; and,** ^(Core)
1181
1182 **V.C.1.c).(7).(b)** **professional development** ^(Core)
1183

- 1184 V.C.1.d) The Program Evaluation Committee must evaluate the
 1185 program's mission and aims, strengths, areas for
 1186 improvement, and threats. ^(Core)
 1187
 1188 V.C.1.e) The annual review, including the action plan, must:
 1189
 1190 V.C.1.e).(1) be distributed to and discussed with the members of
 1191 the teaching faculty and the fellows; and, ^(Core)
 1192
 1193 V.C.1.e).(2) be submitted to the DIO. ^(Core)
 1194
 1195 V.C.2. The program must participate in a Self-Study prior to its 10-Year
 1196 Accreditation Site Visit. ^(Core)
 1197
 1198 V.C.2.a) A summary of the Self-Study must be submitted to the DIO.
 1199 ^(Core)
 1200

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

- 1201
 1202 V.C.3. *One goal of ACGME-accredited education is to educate physicians*
 1203 *who seek and achieve board certification. One measure of the*
 1204 *effectiveness of the educational program is the ultimate pass rate.*
 1205
 1206 *The program director should encourage all eligible program*
 1207 *graduates to take the certifying examination offered by the*
 1208 *applicable American Board of Medical Specialties (ABMS) member*
 1209 *board or American Osteopathic Association (AOA) certifying board.*
 1210
 1211 V.C.3.a) For subspecialties in which the ABMS member board and/or
 1212 AOA certifying board offer(s) an annual written exam, in the
 1213 preceding three years, the program's aggregate pass rate of
 1214 those taking the examination for the first time must be higher
 1215 than the bottom fifth percentile of programs in that
 1216 subspecialty. ^(Outcome)
 1217
 1218 V.C.3.b) For subspecialties in which the ABMS member board and/or
 1219 AOA certifying board offer(s) a biennial written exam, in the
 1220 preceding six years, the program's aggregate pass rate of
 1221 those taking the examination for the first time must be higher
 1222 than the bottom fifth percentile of programs in that
 1223 subspecialty. ^(Outcome)

- 1224
1225 **V.C.3.c)** For subspecialties in which the ABMS member board and/or
1226 AOA certifying board offer(s) an annual oral exam, in the
1227 preceding three years, the program’s aggregate pass rate of
1228 those taking the examination for the first time must be higher
1229 than the bottom fifth percentile of programs in that
1230 subspecialty. *(Outcome)*
1231
- 1232 **V.C.3.d)** For subspecialties in which the ABMS member board and/or
1233 AOA certifying board offer(s) a biennial oral exam, in the
1234 preceding six years, the program’s aggregate pass rate of
1235 those taking the examination for the first time must be higher
1236 than the bottom fifth percentile of programs in that
1237 subspecialty. *(Outcome)*
1238
- 1239 **V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program
1240 whose graduates over the time period specified in the
1241 requirement have achieved an 80 percent pass rate will have
1242 met this requirement, no matter the percentile rank of the
1243 program for pass rate in that subspecialty. *(Outcome)*
1244

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

- 1245
1246 **V.C.3.f)** Programs must report, in ADS, board certification status
1247 annually for the cohort of board-eligible fellows that
1248 graduated seven years earlier. *(Core)*
1249

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates’ performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

1250

1251 VI. The Learning and Working Environment

1252
1253
1254
1255
1256
1257
1258
1259
1260
1261
1262
1263
1264
1265
1266
1267
1268
1269
1270
1271

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

- *Excellence in the safety and quality of care rendered to patients by fellows today*
- *Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice*
- *Excellence in professionalism through faculty modeling of:*
 - *the effacement of self-interest in a humanistic environment that supports the professional development of physicians*
 - *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
- *Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team*

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

1272
1273
1274
1275
1276

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

1277 **All physicians share responsibility for promoting patient safety and**
1278 **enhancing quality of patient care. Graduate medical education must**
1279 **prepare fellows to provide the highest level of clinical care with**
1280 **continuous focus on the safety, individual needs, and humanity of**
1281 **their patients. It is the right of each patient to be cared for by fellows**
1282 **who are appropriately supervised; possess the requisite knowledge,**
1283 **skills, and abilities; understand the limits of their knowledge and**
1284 **experience; and seek assistance as required to provide optimal**
1285 **patient care.**

1286
1287 **Fellows must demonstrate the ability to analyze the care they**
1288 **provide, understand their roles within health care teams, and play an**
1289 **active role in system improvement processes. Graduating fellows**
1290 **will apply these skills to critique their future unsupervised practice**
1291 **and effect quality improvement measures.**

1292
1293 **It is necessary for fellows and faculty members to consistently work**
1294 **in a well-coordinated manner with other health care professionals to**
1295 **achieve organizational patient safety goals.**

1296
1297 **VI.A.1.a) Patient Safety**

1298
1299 **VI.A.1.a).(1) Culture of Safety**

1300 **A culture of safety requires continuous identification**
1301 **of vulnerabilities and a willingness to transparently**
1302 **deal with them. An effective organization has formal**
1303 **mechanisms to assess the knowledge, skills, and**
1304 **attitudes of its personnel toward safety in order to**
1305 **identify areas for improvement.**

1306
1307
1308 **VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows**
1309 **must actively participate in patient safety**
1310 **systems and contribute to a culture of safety.**
1311 **(Core)**

1312
1313 **VI.A.1.a).(1).(b) The program must have a structure that**
1314 **promotes safe, interprofessional, team-based**
1315 **care. (Core)**

1316
1317 **VI.A.1.a).(2) Education on Patient Safety**

1318 **Programs must provide formal educational activities**
1319 **that promote patient safety-related goals, tools, and**
1320 **techniques. (Core)**

1321
1322 **Background and Intent: Optimal patient safety occurs in the setting of a coordinated**
interprofessional learning and working environment.

1323
1324 **VI.A.1.a).(3) Patient Safety Events**

1325

1326 **Reporting, investigation, and follow-up of adverse**
1327 **events, near misses, and unsafe conditions are pivotal**
1328 **mechanisms for improving patient safety, and are**
1329 **essential for the success of any patient safety**
1330 **program. Feedback and experiential learning are**
1331 **essential to developing true competence in the ability**
1332 **to identify causes and institute sustainable systems-**
1333 **based changes to ameliorate patient safety**
1334 **vulnerabilities.**

1335
1336 **VI.A.1.a).(3).(a)** Residents, fellows, faculty members, and other
1337 clinical staff members must:

1338
1339 **VI.A.1.a).(3).(a).(i)** know their responsibilities in reporting
1340 patient safety events at the clinical site;
1341 (Core)

1342
1343 **VI.A.1.a).(3).(a).(ii)** know how to report patient safety
1344 events, including near misses, at the
1345 clinical site; and, (Core)

1346
1347 **VI.A.1.a).(3).(a).(iii)** be provided with summary information
1348 of their institution's patient safety
1349 reports. (Core)

1350
1351 **VI.A.1.a).(3).(b)** Fellows must participate as team members in
1352 real and/or simulated interprofessional clinical
1353 patient safety activities, such as root cause
1354 analyses or other activities that include
1355 analysis, as well as formulation and
1356 implementation of actions. (Core)

1357
1358 **VI.A.1.a).(4)** Fellow Education and Experience in Disclosure of
1359 Adverse Events

1360
1361 **Patient-centered care requires patients, and when**
1362 **appropriate families, to be apprised of clinical**
1363 **situations that affect them, including adverse events.**
1364 **This is an important skill for faculty physicians to**
1365 **model, and for fellows to develop and apply.**

1366
1367 **VI.A.1.a).(4).(a)** All fellows must receive training in how to
1368 disclose adverse events to patients and
1369 families. (Core)

1370
1371 **VI.A.1.a).(4).(b)** Fellows should have the opportunity to
1372 participate in the disclosure of patient safety
1373 events, real or simulated. (Detail)†

1374
1375 **VI.A.1.b)** Quality Improvement

1377	VI.A.1.b).(1)	Education in Quality Improvement
1378		
1379		<i>A cohesive model of health care includes quality-</i>
1380		<i>related goals, tools, and techniques that are necessary</i>
1381		<i>in order for health care professionals to achieve</i>
1382		<i>quality improvement goals.</i>
1383		
1384	VI.A.1.b).(1).(a)	Fellows must receive training and experience in
1385		quality improvement processes, including an
1386		understanding of health care disparities. ^(Core)
1387		
1388	VI.A.1.b).(2)	Quality Metrics
1389		
1390		<i>Access to data is essential to prioritizing activities for</i>
1391		<i>care improvement and evaluating success of</i>
1392		<i>improvement efforts.</i>
1393		
1394	VI.A.1.b).(2).(a)	Fellows and faculty members must receive data
1395		on quality metrics and benchmarks related to
1396		their patient populations. ^(Core)
1397		
1398	VI.A.1.b).(3)	Engagement in Quality Improvement Activities
1399		
1400		<i>Experiential learning is essential to developing the</i>
1401		<i>ability to identify and institute sustainable systems-</i>
1402		<i>based changes to improve patient care.</i>
1403		
1404	VI.A.1.b).(3).(a)	Fellows must have the opportunity to
1405		participate in interprofessional quality
1406		improvement activities. ^(Core)
1407		
1408	VI.A.1.b).(3).(a).(i)	This should include activities aimed at
1409		reducing health care disparities. ^(Detail)
1410		
1411	VI.A.2.	Supervision and Accountability
1412		
1413	VI.A.2.a)	<i>Although the attending physician is ultimately responsible for</i>
1414		<i>the care of the patient, every physician shares in the</i>
1415		<i>responsibility and accountability for their efforts in the</i>
1416		<i>provision of care. Effective programs, in partnership with</i>
1417		<i>their Sponsoring Institutions, define, widely communicate,</i>
1418		<i>and monitor a structured chain of responsibility and</i>
1419		<i>accountability as it relates to the supervision of all patient</i>
1420		<i>care.</i>
1421		
1422		<i>Supervision in the setting of graduate medical education</i>
1423		<i>provides safe and effective care to patients; ensures each</i>
1424		<i>fellow's development of the skills, knowledge, and attitudes</i>
1425		<i>required to enter the unsupervised practice of medicine; and</i>
1426		<i>establishes a foundation for continued professional growth.</i>
1427		

1428 VI.A.2.a).(1) Each patient must have an identifiable and
1429 appropriately-credentialed and privileged attending
1430 physician (or licensed independent practitioner as
1431 specified by the applicable Review Committee) who is
1432 responsible and accountable for the patient’s care.
1433 (Core)

1434
1435 VI.A.2.a).(1).(a) This information must be available to fellows,
1436 faculty members, other members of the health
1437 care team, and patients. (Core)

1438
1439 VI.A.2.a).(1).(b) Fellows and faculty members must inform each
1440 patient of their respective roles in that patient’s
1441 care when providing direct patient care. (Core)

1442
1443 VI.A.2.b) *Supervision may be exercised through a variety of methods.*
1444 *For many aspects of patient care, the supervising physician*
1445 *may be a more advanced fellow. Other portions of care*
1446 *provided by the fellow can be adequately supervised by the*
1447 *appropriate availability of the supervising faculty member or*
1448 *fellow, either on site or by means of telecommunication*
1449 *technology. Some activities require the physical presence of*
1450 *the supervising faculty member. In some circumstances,*
1451 *supervision may include post-hoc review of fellow-delivered*
1452 *care with feedback.*

Background and Intent: There are circumstances where direct supervision without physical presence does not fulfill the requirements of the specific Review Committee. Review Committees will further specify what is meant by direct supervision without physical presence in specialties where allowed. “Physically present” is defined as follows: The teaching physician is located in the same room (or partitioned or curtained area, if the room is subdivided to accommodate multiple patients) as the patient and/or performs a face-to-face service.

1454
1455 VI.A.2.b).(1) The program must demonstrate that the appropriate
1456 level of supervision in place for all fellows is based on
1457 each fellow’s level of training and ability, as well as
1458 patient complexity and acuity. Supervision may be
1459 exercised through a variety of methods, as appropriate
1460 to the situation. (Core)

1461
1462 VI.A.2.b).(2) The program must define when physical presence of a
1463 supervising physician is required. (Core)

1464
1465 VI.A.2.c) Levels of Supervision

1466
1467 To promote appropriate fellow supervision while providing
1468 for graded authority and responsibility, the program must use
1469 the following classification of supervision: (Core)

1470
1471 VI.A.2.c).(1) Direct Supervision:

- 1472
1473 **VI.A.2.c).(1).(a)** the supervising physician is physically present
1474 with the fellow during the key portions of the
1475 patient interaction. ^(Core)
1476
- 1477 **VI.A.2.c).(2)** Indirect Supervision: the supervising physician is not
1478 providing physical or concurrent visual or audio
1479 supervision but is immediately available to the fellow
1480 for guidance and is available to provide appropriate
1481 direct supervision. ^(Core)
1482
- 1483 **VI.A.2.c).(3)** Oversight – the supervising physician is available to
1484 provide review of procedures/encounters with
1485 feedback provided after care is delivered. ^(Core)
1486
- 1487 **VI.A.2.d)** The privilege of progressive authority and responsibility,
1488 conditional independence, and a supervisory role in patient
1489 care delegated to each fellow must be assigned by the
1490 program director and faculty members. ^(Core)
1491
- 1492 **VI.A.2.d).(1)** The program director must evaluate each fellow’s
1493 abilities based on specific criteria, guided by the
1494 Milestones. ^(Core)
1495
- 1496 **VI.A.2.d).(2)** Faculty members functioning as supervising
1497 physicians must delegate portions of care to fellows
1498 based on the needs of the patient and the skills of
1499 each fellow. ^(Core)
1500
- 1501 **VI.A.2.d).(3)** Fellows should serve in a supervisory role to junior
1502 fellows and residents in recognition of their progress
1503 toward independence, based on the needs of each
1504 patient and the skills of the individual resident or
1505 fellow. ^(Detail)
1506
- 1507 **VI.A.2.e)** Programs must set guidelines for circumstances and events
1508 in which fellows must communicate with the supervising
1509 faculty member(s). ^(Core)
1510
- 1511 **VI.A.2.e).(1)** Each fellow must know the limits of their scope of
1512 authority, and the circumstances under which the
1513 fellow is permitted to act with conditional
1514 independence. ^(Outcome)
1515

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

- 1516
1517 **VI.A.2.f)** Faculty supervision assignments must be of sufficient
1518 duration to assess the knowledge and skills of each fellow

1519 and to delegate to the fellow the appropriate level of patient
1520 care authority and responsibility. ^(Core)

1521
1522 **VI.B. Professionalism**

1523
1524 **VI.B.1. Programs, in partnership with their Sponsoring Institutions, must**
1525 **educate fellows and faculty members concerning the professional**
1526 **responsibilities of physicians, including their obligation to be**
1527 **appropriately rested and fit to provide the care required by their**
1528 **patients. ^(Core)**

1529
1530 **VI.B.2. The learning objectives of the program must:**

1531
1532 **VI.B.2.a) be accomplished through an appropriate blend of supervised**
1533 **patient care responsibilities, clinical teaching, and didactic**
1534 **educational events; ^(Core)**

1535
1536 **VI.B.2.b) be accomplished without excessive reliance on fellows to**
1537 **fulfill non-physician obligations; and, ^(Core)**

1538

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1539
1540 **VI.B.2.c) ensure manageable patient care responsibilities. ^(Core)**

1541

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1542
1543 **VI.B.3. The program director, in partnership with the Sponsoring Institution,**
1544 **must provide a culture of professionalism that supports patient**
1545 **safety and personal responsibility. ^(Core)**

1546
1547 **VI.B.4. Fellows and faculty members must demonstrate an understanding**
1548 **of their personal role in the:**

1549
1550 **VI.B.4.a) provision of patient- and family-centered care; ^(Outcome)**

1551

1552 VI.B.4.b) safety and welfare of patients entrusted to their care,
1553 including the ability to report unsafe conditions and adverse
1554 events; (Outcome)
1555

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

1556 VI.B.4.c) assurance of their fitness for work, including: (Outcome)
1557
1558

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

1559 VI.B.4.c).(1) management of their time before, during, and after
1560 clinical assignments; and, (Outcome)
1561

1562 VI.B.4.c).(2) recognition of impairment, including from illness,
1563 fatigue, and substance use, in themselves, their peers,
1564 and other members of the health care team. (Outcome)
1565

1566 VI.B.4.d) commitment to lifelong learning; (Outcome)
1567

1568 VI.B.4.e) monitoring of their patient care performance improvement
1569 indicators; and, (Outcome)
1570

1571 VI.B.4.f) accurate reporting of clinical and educational work hours,
1572 patient outcomes, and clinical experience data. (Outcome)
1573

1574 VI.B.5. All fellows and faculty members must demonstrate responsiveness
1575 to patient needs that supersedes self-interest. This includes the
1576 recognition that under certain circumstances, the best interests of
1577 the patient may be served by transitioning that patient's care to
1578 another qualified and rested provider. (Outcome)
1579

1580 VI.B.6. Programs, in partnership with their Sponsoring Institutions, must
1581 provide a professional, equitable, respectful, and civil environment
1582 that is free from discrimination, sexual and other forms of
1583 harassment, mistreatment, abuse, or coercion of students, fellows,
1584 faculty, and staff. (Core)
1585

1586 VI.B.7. Programs, in partnership with their Sponsoring Institutions, should
1587 have a process for education of fellows and faculty regarding
1588 unprofessional behavior and a confidential process for reporting,
1589 investigating, and addressing such concerns. (Core)
1590

1591 VI.C. Well-Being
1592

1593
1594
1595
1596
1597
1598

1608
1609
1610
1611
1612
1613

Psychological, emotional, and physical well-being are critical in the development of the competent, caring, and resilient physician and require proactive attention to life inside and outside of medicine. Well-being requires that physicians retain the joy in medicine while managing their own real life stresses. Self-care and responsibility to support other members of the health care team are important components of professionalism; they are also skills that must be modeled, learned, and nurtured in the context of other aspects of fellowship training.

Fellows and faculty members are at risk for burnout and depression. Programs, in partnership with their Sponsoring Institutions, have the same responsibility to address well-being as other aspects of resident competence. Physicians and all members of the health care team share responsibility for the well-being of each other. For example, a culture which encourages covering for colleagues after an illness without the expectation of reciprocity reflects the ideal of professionalism. A positive culture in a clinical learning environment models constructive behaviors, and prepares fellows with the skills and attitudes needed to thrive throughout their careers.

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

1628
1629

- VI.C.1. The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:**
- VI.C.1.a) efforts to enhance the meaning that each fellow finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; (Core)**
- VI.C.1.b) attention to scheduling, work intensity, and work compression that impacts fellow well-being; (Core)**
- VI.C.1.c) evaluating workplace safety data and addressing the safety of fellows and faculty members; (Core)**

1630

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

1631
1632
1633
1634

VI.C.1.d) policies and programs that encourage optimal fellow and faculty member well-being; and, (Core)

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one’s own health, including adequate rest, healthy diet, and regular exercise.

1635
1636
1637
1638
1639
1640

VI.C.1.d).(1) Fellows must be given the opportunity to attend medical, mental health, and dental care appointments, including those scheduled during their working hours. (Core)

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

1641

1649
1650
1651
1652

VI.C.1.e) attention to fellow and faculty member burnout, depression, and substance abuse. The program, in partnership with its Sponsoring Institution, must educate faculty members and fellows in identification of the symptoms of burnout, depression, and substance abuse, including means to assist those who experience these conditions. Fellows and faculty members must also be educated to recognize those symptoms in themselves and how to seek appropriate care. The program, in partnership with its Sponsoring Institution, must: (Core)

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance abuse. Materials and more information are available on the Physician Well-being section of the ACGME website (<http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being>).

1653
1654
1655
1656
1657
1658
1659
1660

VI.C.1.e).(1) encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another fellow, resident, or faculty member may be displaying signs of burnout, depression, substance abuse, suicidal ideation, or potential for violence; (Core)

Background and Intent: Individuals experiencing burnout, depression, substance abuse, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

- 1661
1662 VI.C.1.e).(2) provide access to appropriate tools for self-screening;
1663 and, (Core)
1664
1665 VI.C.1.e).(3) provide access to confidential, affordable mental
1666 health assessment, counseling, and treatment,
1667 including access to urgent and emergent care 24
1668 hours a day, seven days a week. (Core)
1669

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

- 1670
1671 VI.C.2. There are circumstances in which fellows may be unable to attend
1672 work, including but not limited to fatigue, illness, family
1673 emergencies, and parental leave. Each program must allow an
1674 appropriate length of absence for fellows unable to perform their
1675 patient care responsibilities. (Core)
1676
1677 VI.C.2.a) The program must have policies and procedures in place to
1678 ensure coverage of patient care. (Core)
1679
1680 VI.C.2.b) These policies must be implemented without fear of negative
1681 consequences for the fellow who is or was unable to provide
1682 the clinical work. (Core)
1683

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

- 1684

1686
1687 **VI.D.1. Programs must:**
1688
1689 **VI.D.1.a) educate all faculty members and fellows to recognize the**
1690 **signs of fatigue and sleep deprivation; ^(Core)**
1691
1692 **VI.D.1.b) educate all faculty members and fellows in alertness**
1693 **management and fatigue mitigation processes; and, ^(Core)**
1694
1695 **VI.D.1.c) encourage fellows to use fatigue mitigation processes to**
1696 **manage the potential negative effects of fatigue on patient**
1697 **care and learning. ^(Detail)**
1698

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

- 1699
1700 **VI.D.2. Each program must ensure continuity of patient care, consistent**
1701 **with the program's policies and procedures referenced in VI.C.2–**

1710
1711 **VI.E.1. Clinical Responsibilities**
1712
1713 **The clinical responsibilities for each fellow must be based on PGY**
1714 **level, patient safety, fellow ability, severity and complexity of patient**
1715 **illness/condition, and available support services. ^(Core)**
1716

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty

members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

- VI.E.2. Teamwork**
- Fellows must care for patients in an environment that maximizes communication. This must include the opportunity to work as a member of effective interprofessional teams that are appropriate to the delivery of care in the subspecialty and larger health system.
(Core)
- VI.E.3. Transitions of Care**
- VI.E.3.a)** Programs must design clinical assignments to optimize transitions in patient care, including their safety, frequency, and structure. (Core)
- VI.E.3.b)** Programs, in partnership with their Sponsoring Institutions, must ensure and monitor effective, structured hand-over processes to facilitate both continuity of care and patient safety. (Core)
- VI.E.3.c)** Programs must ensure that fellows are competent in communicating with team members in the hand-over process.
(Outcome)
- VI.E.3.d)** Programs and clinical sites must maintain and communicate schedules of attending physicians and fellows currently responsible for care. (Core)
- VI.E.3.e)** Each program must ensure continuity of patient care, consistent with the program’s policies and procedures referenced in VI.C.2-VI.C.2.b), in the event that a fellow may be unable to perform their patient care responsibilities due to excessive fatigue or illness, or family emergency. (Core)
- VI.F. Clinical Experience and Education**
- Programs, in partnership with their Sponsoring Institutions, must design an effective program structure that is configured to provide fellows with educational and clinical experience opportunities, as well as reasonable opportunities for rest and personal activities.*

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been

made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

VI.F.1. Maximum Hours of Clinical and Educational Work per Week

Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting. ^(Core)

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the

following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

- VI.F.2. Mandatory Time Free of Clinical Work and Education**
- VI.F.2.a)** The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. ^(Core)
- VI.F.2.b)** Fellows should have eight hours off between scheduled clinical work and education periods. ^(Detail)
- VI.F.2.b).(1)** There may be circumstances when fellows choose to stay to care for their patients or return to the hospital with fewer than eight hours free of clinical experience and education. This must occur within the context of the 80-hour and the one-day-off-in-seven requirements. ^(Detail)

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1784
1785 VI.F.2.c) Fellows must have at least 14 hours free of clinical work and
1786 education after 24 hours of in-house call. (Core)
1787

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1788
1789 VI.F.2.d) Fellows must be scheduled for a minimum of one day in
1790 seven free of clinical work and required education (when
1791 averaged over four weeks). At-home call cannot be assigned
1792 on these free days. (Core)
1793

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

1794
1795 VI.F.3. Maximum Clinical Work and Education Period Length
1796

1797 VI.F.3.a) Clinical and educational work periods for fellows must not
1798 exceed 24 hours of continuous scheduled clinical
1799 assignments. (Core)
1800

1801 VI.F.3.a).(1) Up to four hours of additional time may be used for
1802 activities related to patient safety, such as providing
1803 effective transitions of care, and/or fellow education.
1804 (Core)
1805

1806 VI.F.3.a).(1).(a) Additional patient care responsibilities must not
1807 be assigned to a fellow during this time. (Core)
1808

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

1809
1810 VI.F.4. Clinical and Educational Work Hour Exceptions

- 1811
 1812 **VI.F.4.a)** In rare circumstances, after handing off all other
 1813 responsibilities, a fellow, on their own initiative, may elect to
 1814 remain or return to the clinical site in the following
 1815 circumstances:
 1816
- 1817 **VI.F.4.a).(1)** to continue to provide care to a single severely ill or
 1818 unstable patient; ^(Detail)
 1819
- 1820 **VI.F.4.a).(2)** humanistic attention to the needs of a patient or
 1821 family; or, ^(Detail)
 1822
- 1823 **VI.F.4.a).(3)** to attend unique educational events. ^(Detail)
 1824
- 1825 **VI.F.4.b)** These additional hours of care or education will be counted
 1826 toward the 80-hour weekly limit. ^(Detail)
 1827

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

- 1828
 1829 **VI.F.4.c)** A Review Committee may grant rotation-specific exceptions
 1830 for up to 10 percent or a maximum of 88 clinical and
 1831 educational work hours to individual programs based on a
 1832 sound educational rationale.
 1833
- 1834 The Review Committee for Internal Medicine will not consider
 1835 requests for exceptions to the 80-hour limit to the fellows' work
 1836 week.
 1837
- 1838 **VI.F.4.c).(1)** In preparing a request for an exception, the program
 1839 director must follow the clinical and educational work
 1840 hour exception policy from the *ACGME Manual of*
 1841 *Policies and Procedures.* ^(Core)
 1842
- 1843 **VI.F.4.c).(2)** Prior to submitting the request to the Review
 1844 Committee, the program director must obtain approval
 1845 from the Sponsoring Institution's GMEC and DIO. ^(Core)
 1846

Background and Intent: The provision for exceptions for up to 88 hours per week has been modified to specify that exceptions may be granted for specific rotations if the program can justify the increase based on criteria specified by the Review Committee. As in the past, Review Committees may opt not to permit exceptions. The underlying philosophy for this requirement is that while it is expected that all fellows should be

able to train within an 80-hour work week, it is recognized that some programs may include rotations with alternate structures based on the nature of the specialty. DIO/GMEC approval is required before the request will be considered by the Review Committee.

1878
1879
1880
1881
1882
1883
1884
1885
1886

VI.F.8.a).(1) At-home call must not be so frequent or taxing as to preclude rest or reasonable personal time for each fellow. (Core)

1887 VI.F.8.b) Fellows are permitted to return to the hospital while on at-
1888 home call to provide direct care for new or established
1889 patients. These hours of inpatient patient care must be
1890 included in the 80-hour maximum weekly limit. ^(Detail)
1891

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
