1 **ACGME Program Requirements for Graduate Medical Education**
2 **in Complex General Surgical Oncology**

3
4 **Common Program Requirements (Fellowship) are in BOLD**

5
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.
9

10 **Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.**

11 The “Subspecialty Background and Intent” text in the boxes below provide detail regarding the intention behind specific requirements, as well as guidance on how to implement the requirements in a way that supports excellence in residency education. Programs will note that the Surgery Subspecialty FAQs companion document has been integrated into this document and, where appropriate, guidance is given on additional Review Committee resource information.

12 **Introduction**

13
14 **Int.A. *Fellowship is advanced graduate medical education beyond a core residency program for physicians who desire to enter more specialized practice. Fellowship-trained physicians serve the public by providing subspecialty care, which may also include core medical care, acting as a community resource for expertise in their field, creating and integrating new knowledge into practice, and educating future generations of physicians. Graduate medical education values the strength that a diverse group of physicians brings to medical care.***

15
16
17
18
19
20
21
22
23 ***Fellows who have completed residency are able to practice independently in their core specialty. The prior medical experience and expertise of fellows distinguish them from physicians entering into residency training. The fellow’s care of patients within the subspecialty is undertaken with appropriate faculty supervision and conditional independence. Faculty members serve as role models of excellence, compassion, professionalism, and scholarship. The fellow develops deep medical knowledge, patient care skills, and expertise applicable to their focused area of practice. Fellowship is an intensive program of subspecialty clinical and didactic education that focuses on the multidisciplinary care of patients. Fellowship education is often physically, emotionally, and intellectually demanding, and occurs in a variety of clinical learning environments committed to graduate medical education and the well-being of patients, residents, fellows, faculty members, students, and all members of the health care team.***

24
25
26
27
28
29
30
31
32
33
34
35
36
37
38
39 ***In addition to clinical education, many fellowship programs advance fellows’ skills as physician-scientists. While the ability to create new knowledge within medicine is not exclusive to fellowship-educated***

42 *physicians, the fellowship experience expands a physician's abilities to*
43 *pursue hypothesis-driven scientific inquiry that results in contributions to*
44 *the medical literature and patient care. Beyond the clinical subspecialty*
45 *expertise achieved, fellows develop mentored relationships built on an*
46 *infrastructure that promotes collaborative research.*

47
48 **Int.B. Definition of Subspecialty**

49
50 A surgical oncologist is a well-qualified surgeon who has obtained additional
51 education and experience in the multidisciplinary approach to the prevention,
52 diagnosis, treatment, and rehabilitation of cancer patients, and who devotes a
53 major portion of his or her professional practice to these activities and to cancer
54 research. Surgical oncologists interact with other oncologic disciplines and
55 provide leadership to the surgical, medical, and lay communities in matters
56 pertaining to cancer.

57
58 **Int.C. Length of Educational Program**

59
60 The educational program in complex general surgical oncology must be at least
61 24 months in length. (Core)*

62
63 **I. Oversight**

64
65 **I.A. Sponsoring Institution**

66
67 *The Sponsoring Institution is the organization or entity that assumes the*
68 *ultimate financial and academic responsibility for a program of graduate*
69 *medical education consistent with the ACGME Institutional Requirements.*

70
71 *When the Sponsoring Institution is not a rotation site for the program, the*
72 *most commonly utilized site of clinical activity for the program is the*
73 *primary clinical site.*

74
Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

75
76 **I.A.1. The program must be sponsored by one ACGME-accredited**
77 **Sponsoring Institution. (Core)***

78
79 **I.B. Participating Sites**

80
81 *A participating site is an organization providing educational experiences or*
82 *educational assignments/rotations for fellows.*

- 84 **I.B.1. The program, with approval of its Sponsoring Institution, must**
85 **designate a primary clinical site.** ^(Core)
86
- 87 I.B.1.a) The complex general surgical oncology program must be
88 sponsored by an institution that (1) also sponsors an ACGME-
89 accredited medical oncology residency program, or (2) is an
90 affiliated site for an ACGME-accredited medical oncology
91 residency program. ~~affiliated with an ACGME-accredited medical~~
92 ~~oncology program.~~ ^(Core)
93
- 94 **I.B.2. There must be a program letter of agreement (PLA) between the**
95 **program and each participating site that governs the relationship**
96 **between the program and the participating site providing a required**
97 **assignment.** ^(Core)
98
- 99 I.B.2.a) The PLA must:
- 100
- 101 I.B.2.a).(1) be renewed at least every 10 years; and, ^(Core)
102
- 103 I.B.2.a).(2) be approved by the designated institutional official
104 (DIO). ^(Core)
105
- 106 **I.B.3. The program must monitor the clinical learning and working**
107 **environment at all participating sites.** ^(Core)
108
- 109 I.B.3.a) At each participating site there must be one faculty member,
110 designated by the program director, who is accountable for
111 fellow education for that site, in collaboration with the
112 program director. ^(Core)
113

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- **Identifying the faculty members who will assume educational and supervisory responsibility for fellows**
- **Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows**
- **Specifying the duration and content of the educational experience**
- **Stating the policies and procedures that will govern fellow education during the assignment**

- 114
115 **I.B.4.** **The program director must submit any additions or deletions of**
116 **participating sites routinely providing an educational experience,**
117 **required for all fellows, of one month full time equivalent (FTE) or**
118 **more through the ACGME’s Accreditation Data System (ADS). ^(Core)**
119
- 120 **I.B.5.** **For each participating site, the program director must: ^(Core) ~~Sites that are~~**
121 **~~integrated with the sponsoring institution must have an integration~~**
122 **~~agreement specifying that the program director must:~~ ^(Detail)**
123
- 124 **I.B.5.a)** **appoint the members of the faculty; ^(Detail) ^(Core)**
125
- 126 **I.B.5.b)** **appoint all fellows in the program; and ^(Detail)**
127
- 128 **I.B.5.c)** **determine all rotations and assignments for both fellows and**
129 **faculty supervisors. ^(Core)**
130
- 131 **I.B.6.** **The Review Committee must approve all participating sites in advance.**
132 **^(Core)**
133
- 134 **I.B.7.** **Participating sites should be in close geographic proximity to allow all**
135 **fellows to attend joint conferences, basic science lectures, and morbidity**
136 **and mortality reviews regularly and in a central location. ^(Detail)**
137
- 138 **I.C.** **The program, in partnership with its Sponsoring Institution, must engage in**
139 **practices that focus on mission-driven, ongoing, systematic recruitment**
140 **and retention of a diverse and inclusive workforce of residents (if present),**
141 **fellows, faculty members, senior administrative staff members, and other**
142 **relevant members of its academic community. ^(Core)**
143

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution’s mission and aims. The program’s annual evaluation must include an assessment of the program’s efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

- 144
145 **I.D.** **Resources**
146
- 147 **I.D.1.** **The program, in partnership with its Sponsoring Institution, must**
148 **ensure the availability of adequate resources for fellow education.**
149 **^(Core)**
150
- 151 **I.D.1.a)** **Each participating site must provide the following resources:**
152
- 153 **I.D.1.a).(1)** **inpatient surgical admissions services; ^(Core)**
154
- 155 **I.D.1.a).(2)** **intensive care units; and, ^(Core)**
156

157 I.D.1.a).(3) services, including medical oncology services, emergency
158 services, interventional radiology, pathology, and
159 radiology. ^(Core)
160

161 I.D.1.b) Fellows must have access to consultative radiation oncology
162 services. ^(Core)
163

164 **I.D.2. The program, in partnership with its Sponsoring Institution, must**
165 **ensure healthy and safe learning and working environments that**
166 **promote fellow well-being and provide for:** ^(Core)
167

168 **I.D.2.a) access to food while on duty;** ^(Core)
169

170 **I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available**
171 **and accessible for fellows with proximity appropriate for safe**
172 **patient care;** ^(Core)
173

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

174
175 **I.D.2.c) clean and private facilities for lactation that have refrigeration**
176 **capabilities, with proximity appropriate for safe patient care;**
177 ^(Core)
178

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

179
180 **I.D.2.d) security and safety measures appropriate to the participating**
181 **site; and,** ^(Core)
182

183 **I.D.2.e) accommodations for fellows with disabilities consistent with**
184 **the Sponsoring Institution's policy.** ^(Core)
185

186 **I.D.3. Fellows must have ready access to subspecialty-specific and other**
187 **appropriate reference material in print or electronic format. This**
188 **must include access to electronic medical literature databases with**
189 **full text capabilities.** ^(Core)
190

- 191 I.D.4. The program’s educational and clinical resources must be adequate
192 to support the number of fellows appointed to the program. (Core)
193
- 194 I.E. *A fellowship program usually occurs in the context of many learners and
195 other care providers and limited clinical resources. It should be structured
196 to optimize education for all learners present.*
197
- 198 I.E.1. Fellows should contribute to the education of residents in core
199 programs, if present. (Core)
200
- 201 I.E.2. Programs must define the responsibilities of residents versus fellows. (Core)
202
- 203 I.E.3. The presence of other learners, including residents from other specialties,
204 subspecialty fellows, PhD students, and nurse practitioners, in the
205 program must not interfere with the appointed fellows’ education. The
206 program director must report the presence of other learners to the DIO
207 and GMEC in accordance with sponsoring institution guidelines. (Detail)(Core)
208

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows’ education is not compromised by the presence of other providers and learners, and that fellows’ education does not compromise core residents’ education.

- 209
- 210 II. Personnel
- 211
- 212 II.A. Program Director
- 213
- 214 II.A.1. There must be one faculty member appointed as program director
215 with authority and accountability for the overall program, including
216 compliance with all applicable program requirements. (Core)
217
- 218 II.A.1.a) The Sponsoring Institution’s Graduate Medical Education
219 Committee (GMEC) must approve a change in program
220 director. (Core)
221
- 222 II.A.1.b) Final approval of the program director resides with the
223 Review Committee. (Core)
224

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual’s responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director’s nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

225

226 **II.A.2. The program director must be provided with support adequate for**
227 **administration of the program based upon its size and configuration.**
228 (Core)

229
230 **II.A.2.a) At a minimum, the program director must be provided with the**
231 **salary support required to devote 10 percent FTE of non-clinical**
232 **time to the administration of the program. Additional support must**
233 **be provided based on program size as follows:** (Core)
234

<u>Number of approved fellow positions</u>	<u>Minimum FTE</u>
<u>1-5</u>	<u>0.1</u>
<u>6-10</u>	<u>0.15</u>
<u>11 or more</u>	<u>0.2</u>

235

Background and Intent: Ten percent FTE is defined as one half day per week.

“Administrative time” is defined as non-clinical time spent meeting the responsibilities of the program director as detailed in requirements II.A.4.-II.A.4.a).(16).

The requirement does not address the source of funding required to provide the specified salary support.

236
237 **II.A.3. Qualifications of the program director:**

238
239 **II.A.3.a) must include subspecialty expertise and qualifications**
240 **acceptable to the Review Committee; and,** (Core)

241
242 **II.A.3.b) must include current certification in the subspecialty for**
243 **which they are the program director by the American Board**
244 **of Surgery or subspecialty qualifications that are acceptable**
245 **to the Review Committee.** (Core)

246
247 [Note that while the Common Program Requirements deem
248 certification by a certifying board of the American Osteopathic
249 Association (AOA) acceptable, there is no AOA board that offers
250 certification in this subspecialty]

251
252 **II.A.3.c) acceptable qualifications include successful completion of a**
253 **surgical oncology program sponsored by the Society of Surgical**
254 **Oncology or a complex general surgical oncology program**
255 **accredited by the ACGME.** (Core)
256

Subspecialty Background and Intent: As a senior leader and role model, the program director is expected to be an expert in the specific field of the program, and is expected to be actively engaged in the practice of surgery at the clinical site where the program is located. Current board certification is the minimum benchmark of expertise. However, the Review Committee recognizes that Sponsoring Institutions may wish to appoint physicians with board certification in specialties other than complex general surgical oncology (e.g., head and neck surgeons,

colon and rectal surgeons, etc.) as program directors. The Review Committee will review requests for appointment and the qualification of these individuals individually.

In order to be prepared to function as a new program director, an individual should already have a comprehensive understanding of and ability in educational and evaluation methods, active experience in managing and administering a complex organization/environment, and leadership and communication skills. It is recommended that individuals appointed as new program directors should have served for at least five years as a GME faculty member, and when possible, have at least two years of experience at the institution at which he or she is being appointed as program director and have served in a GME leadership capacity for at least one year.

257
258

263
264
265
266
267
268
269

II.A.4. Program Director Responsibilities

The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and promotion of fellows, and disciplinary action; supervision of fellows; and fellow education in the context of patient care. ^(Core)

II.A.4.a) The program director must:

II.A.4.a).(1) be a role model of professionalism; ^(Core)

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

270
271
272
273
274
275

II.A.4.a).(2) design and conduct the program in a fashion consistent with the needs of the community, the mission(s) of the Sponsoring Institution, and the mission(s) of the program; ^(Core)

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

276
277
278
279
280

II.A.4.a).(3) administer and maintain a learning environment conducive to educating the fellows in each of the ACGME Competency domains; ^(Core)

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

- 281
282
283
284
285
286
287
288
289
290
291
292
293
294
295
296
297
298
- II.A.4.a).(4)** develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the fellowship program education and at least annually thereafter, as outlined in V.B.; ^(Core)
- II.A.4.a).(5)** have the authority to approve program faculty members for participation in the fellowship program education at all sites; ^(Core)
- II.A.4.a).(6)** have the authority to remove program faculty members from participation in the fellowship program education at all sites; ^(Core)
- II.A.4.a).(7)** have the authority to remove fellows from supervising interactions and/or learning environments that do not meet the standards of the program; ^(Core)

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

- 299
300
301
302

309
310
311
312
313
314
315
316
- II.A.4.a).(8)** submit accurate and complete information required and requested by the DIO, GMEC, and ACGME; ^(Core)
- II.A.4.a).(9)** provide applicants who are offered an interview with information related to the applicant's eligibility for the relevant subspecialty board examination(s); ^(Core)
- II.A.4.a).(10)** provide a learning and working environment in which fellows have the opportunity to raise concerns and provide feedback in a confidential manner as appropriate, without fear of intimidation or retaliation; ^(Core)
- II.A.4.a).(11)** ensure the program's compliance with the Sponsoring Institution's policies and procedures related to grievances and due process; ^(Core)

317 II.A.4.a).(12) ensure the program's compliance with the Sponsoring
318 Institution's policies and procedures for due process
319 when action is taken to suspend or dismiss, not to
320 promote, or not to renew the appointment of a fellow;
321 (Core)
322

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

323
324 II.A.4.a).(13) ensure the program's compliance with the Sponsoring
325 Institution's policies and procedures on employment
326 and non-discrimination; (Core)
327

328 II.A.4.a).(13).(a) Fellows must not be required to sign a non-
329 competition guarantee or restrictive covenant.
330 (Core)
331

332 II.A.4.a).(14) document verification of program completion for all
333 graduating fellows within 30 days; (Core)
334

335 II.A.4.a).(15) provide verification of an individual fellow's
336 completion upon the fellow's request, within 30 days;
337 and, (Core)
338

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

339
340 II.A.4.a).(16) obtain review and approval of the Sponsoring
341 Institution's DIO before submitting information or
342 requests to the ACGME, as required in the Institutional
343 Requirements and outlined in the ACGME Program
344 Director's Guide to the Common Program
345 Requirements. (Core)
346

347 **II.B. Faculty**

348
349 *Faculty members are a foundational element of graduate medical education*
350 *– faculty members teach fellows how to care for patients. Faculty members*
351 *provide an important bridge allowing fellows to grow and become practice*
352 *ready, ensuring that patients receive the highest quality of care. They are*
353 *role models for future generations of physicians by demonstrating*
354 *compassion, commitment to excellence in teaching and patient care,*
355 *professionalism, and a dedication to lifelong learning. Faculty members*
356 *experience the pride and joy of fostering the growth and development of*
357 *future colleagues. The care they provide is enhanced by the opportunity to*

358 *teach. By employing a scholarly approach to patient care, faculty members,*
359 *through the graduate medical education system, improve the health of the*
360 *individual and the population.*

361
362 *Faculty members ensure that patients receive the level of care expected*
363 *from a specialist in the field. They recognize and respond to the needs of*
364 *the patients, fellows, community, and institution. Faculty members provide*
365 *appropriate levels of supervision to promote patient safety. Faculty*
366 *members create an effective learning environment by acting in a*
367 *professional manner and attending to the well-being of the fellows and*
368 *themselves.*
369

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment or salary support.

370
371 **II.B.1. For each participating site, there must be a sufficient number of**
372 **faculty members with competence to instruct and supervise all**
373 **fellows at that location. ^(Core)**

374
375 **II.B.1.a) In addition to the program director, the faculty must include:**

376
377 **II.B.1.a).(1) at least one full-time physician faculty member for each**
378 **approved fellowship position whose major function is to**
379 **support the fellowship program; and, ^(Core)**

380
381 **II.B.1.a).(2) at least one faculty member who is ABMS-certified, AOA-**
382 **certified, or who possesses qualifications acceptable to the**
383 **Review Committee in each of the following areas: breast**
384 **oncology, hepatobiliary/pancreatic, non-hepatobiliary – GI,**
385 **endocrine, melanoma/soft tissue, medical oncology,**
386 **interventional radiology; and radiation oncology; or**
387 **possess qualifications acceptable to the Review**
388 **Committee. ^(Core)**
389

Subspecialty Background and Intent: Faculty members demonstrating more than one focus of clinical specialty may count as faculty members in each of the specialties. In other words, if a faculty member’s clinical focus is breast oncology and melanoma/soft tissue, the program may identify these areas of focus in the faculty member’s CV and may identify that faculty member for both defined area of focus as it pertains to the required number of faculty members for the program.

The Review Committee considers the Society of Surgical Oncology an acceptable faculty qualification.

390
391 **II.B.2. Faculty members must:**

392
393 **II.B.2.a) be role models of professionalism; ^(Core)**

394
395 **II.B.2.b) demonstrate commitment to the delivery of safe, quality,**
396 **cost-effective, patient-centered care; ^(Core)**

397

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

398

399 **II.B.2.c) demonstrate a strong interest in the education of fellows;** (Core)

400

401 **II.B.2.d) devote sufficient time to the educational program to fulfill**
402 **their supervisory and teaching responsibilities;** (Core)

403

404 **II.B.2.e) administer and maintain an educational environment**
405 **conducive to educating fellows;** (Core)

406

407 **II.B.2.f) regularly participate in organized clinical discussions,**
408 **rounds, journal clubs, and conferences; and,** (Core)

409

410 **II.B.2.g) pursue faculty development designed to enhance their skills**
411 **at least annually.** (Core)

412

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

413

414 **II.B.3. Faculty Qualifications**

415

416 **II.B.3.a) Faculty members must have appropriate qualifications in**
417 **their field and hold appropriate institutional appointments.**
418 (Core)

419

420 **II.B.3.b) Subspecialty physician faculty members must:**

421

422 **II.B.3.b).(1) have current certification in the subspecialty by the**
423 **American Board of Surgery or possess qualifications**
424 **judged acceptable to the Review Committee.** (Core)

425

426 [Note that while the Common Program Requirements
427 deem certification by a certifying board of the American
428 Osteopathic Association (AOA) acceptable, there is no
429 AOA board that offers certification in this subspecialty]

430

431 ~~II.B.3.b).(1).a) Surgical faculty members have successfully~~
432 ~~completed a complex general surgical oncology~~
433 ~~program accredited by the ACGME or possess~~
434 ~~other qualifications found acceptable to the Review~~

435
436
437
438
439
440

Committee-Acceptable qualifications include successful completion of a surgical oncology program sponsored by the Society of Surgical Oncology or a complex general surgical oncology program accredited by the ACGME. ^(Core)

Subspecialty Background and Intent: The Review Committee recognizes that programs may wish to appoint physicians with board certification in specialties other than complex general surgical oncology (e.g., head and neck surgeons, colon and rectal surgeons, etc.) as faculty members. The Review Committee will review the qualifications of these individuals individually.

441
442
443
444
445

II.B.3.c) Any non-physician faculty members who participate in fellowship program education must be approved by the program director. ^(Core)

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

446

Subspecialty Background and Intent: Non-physician faculty members may include other doctoral-level faculty members, nurses, and nurse practitioners. Programs should ensure that non-physician faculty members who participate in clinical activities have the required licensure and credentials to provide clinical care. When possible, non-physician faculty members are recommended to hold a faculty appointment.

447
448
449
450
451
452
453
454
455
456
457
458
459
460
461
462

II.B.3.d) Any other specialty physician faculty members must have current certification in their specialty by the appropriate American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board, or possess qualifications judged acceptable to the Review Committee. ^(Core)

II.B.4. Core Faculty

Core faculty members must have a significant role in the education and supervision of fellows and must devote a significant portion of their entire effort to fellow education and/or administration, and must, as a component of their activities, teach, evaluate, and provide formative feedback to fellows. ^(Core)

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their

broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.

463
464
465
466
467
468
469
470
471
472
473
474
475
476
477
478
479
480
481
482
483
484
485

II.B.4.a) Core faculty members must be designated by the program director. ^(Core)

II.B.4.b) Core faculty members must complete the annual ACGME Faculty Survey. ^(Core)

II.B.4.c) There must be at least one core faculty member in each of the defined areas for surgery, medical oncology, and radiation oncology, as outlined in II.B.1.a).(2). ^(Core)

II.C. Program Coordinator

II.C.1. There must be a program coordinator. ^(Core)

II.C.2. The program coordinator must be provided with support adequate for administration of the program based upon its size and configuration. ^(Core)

II.C.2.a) At a minimum, the program coordinator must be supported at 25 percent FTE for administration of the program. Additional support must be provided based on program size as follows: ^(Core)

<u>Number of approved fellow positions</u>	<u>Minimum FTE coordinator(s) required</u>
<u>1-5</u>	<u>0.25</u>
<u>6-10</u>	<u>0.5</u>
<u>11-20</u>	<u>1.0</u>
<u>21 or more</u>	<u>1.25</u>

486

Background and Intent: Twenty-five percent FTE is defined as 1.25 days per week.

The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge of the ACGME and Program Requirements, policies, and procedures. Program

coordinators assist the program director in accreditation efforts, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

487
488
489
490
491
492
493

II.D. Other Program Personnel

The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. ^(Core)

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

494

508
509

III. Fellow Appointments

III.A. Eligibility Criteria

III.A.1. Eligibility Requirements – Fellowship Programs

All required clinical education for entry into ACGME-accredited fellowship programs must be completed in an ACGME-accredited residency program, an AOA-approved residency program, a program with ACGME International (ACGME-I) Advanced Specialty Accreditation, or a Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of Canada (CFPC)-accredited residency program located in Canada. ^(Core)

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

510
511
512
513
514
515
516
517
518
519
520
521

III.A.1.a) Fellowship programs must receive verification of each entering fellow's level of competence in the required field, upon matriculation, using ACGME, ACGME-I, or CanMEDS Milestones evaluations from the core residency program. ^(Core)

III.A.1.b) Prior to appointment in the program, fellows must meet at least one of the following:

III.A.1.b).(1) satisfactory completion of a general surgery program that satisfies the requirements in III.A.1.; ^(Core)

522 III.A.1.b).(2) be admissible to examination by the American Board of
523 Surgery or the American Osteopathic Board of Surgery; or,
524 (Core)

525
526 III.A.1.b).(3) be certified in general surgery by the American Board of
527 Surgery or by the American Osteopathic Board of Surgery.
528 (Core)

529
530 **III.B. The program director must not appoint more fellows than approved by the**
531 **Review Committee.** (Core)

532
533 **III.B.1. All complement increases must be approved by the Review**
534 **Committee.** (Core)

535

<u>Subspecialty Background and Intent: The Review Committee approves fellow positions for each year. Any increase in fellow complement in any one year of the educational program must be approved in advance of the fellow's appointment or extension of education.</u>
--

536
537 **III.C. Fellow Transfers**

538
539 **The program must obtain verification of previous educational experiences**
540 **and a summative competency-based performance evaluation prior to**
541 **acceptance of a transferring fellow, and Milestones evaluations upon**
542 **matriculation.** (Core)

543
544 **III.C.1. Fellow transfers must be approved in advance of appointment by the**
545 **Review Committee.** (Core)

546
547 **IV. Educational Program**

548
549 ***The ACGME accreditation system is designed to encourage excellence and***
550 ***innovation in graduate medical education regardless of the organizational***
551 ***affiliation, size, or location of the program.***

552
553 ***The educational program must support the development of knowledgeable, skillful***
554 ***physicians who provide compassionate care.***

555
556 ***In addition, the program is expected to define its specific program aims consistent***
557 ***with the overall mission of its Sponsoring Institution, the needs of the community***
558 ***it serves and that its graduates will serve, and the distinctive capabilities of***
559 ***physicians it intends to graduate. While programs must demonstrate substantial***
560 ***compliance with the Common and subspecialty-specific Program Requirements, it***
561 ***is recognized that within this framework, programs may place different emphasis***
562 ***on research, leadership, public health, etc. It is expected that the program aims***
563 ***will reflect the nuanced program-specific goals for it and its graduates; for***
564 ***example, it is expected that a program aiming to prepare physician-scientists will***
565 ***have a different curriculum from one focusing on community health.***

566
567 **IV.A. The curriculum must contain the following educational components:** (Core)

568

569 **IV.A.1.** a set of program aims consistent with the Sponsoring Institution’s
570 mission, the needs of the community it serves, and the desired
571 distinctive capabilities of its graduates; ^(Core)
572

573 **IV.A.1.a)** The program’s aims must be made available to program
574 applicants, fellows, and faculty members. ^(Core)
575

576 **IV.A.2.** competency-based goals and objectives for each educational
577 experience designed to promote progress on a trajectory to
578 autonomous practice in their subspecialty. These must be
579 distributed, reviewed, and available to fellows and faculty members;
580 ^(Core)
581

582 **IV.A.3.** delineation of fellow responsibilities for patient care, progressive
583 responsibility for patient management, and graded supervision in
584 their subspecialty; ^(Core)
585

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

586
587 **IV.A.4.** structured educational activities beyond direct patient care; and,
588 ^(Core)
589

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

590
591 **IV.A.5.** advancement of fellows’ knowledge of ethical principles
592 foundational to medical professionalism. ^(Core)
593

594 **IV.B. ACGME Competencies**
595

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

596
597 **IV.B.1.** The program must integrate the following ACGME Competencies
598 into the curriculum: ^(Core)
599

600 **IV.B.1.a) Professionalism**
601
602 **Fellows must demonstrate a commitment to professionalism**
603 **and an adherence to ethical principles.** (Core)
604

605 **IV.B.1.b) Patient Care and Procedural Skills**
606

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality*. *Health Affairs*. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

607
608 **IV.B.1.b).(1) Fellows must be able to provide patient care that is**
609 **compassionate, appropriate, and effective for the**
610 **treatment of health problems and the promotion of**
611 **health.** (Core)
612

613 **IV.B.1.b).(1).(a)** Fellows must demonstrate competence in
614 evaluating patients pre-operatively, making
615 appropriate provisional diagnoses, initiating
616 diagnostic procedures, and forming preliminary
617 treatment plans; (Core)
618

619 **IV.B.1.b).(2) Fellows must be able to perform all medical,**
620 **diagnostic, and surgical procedures considered**
621 **essential for the area of practice.** (Core)
622

623 **IV.B.1.b).(2).(a)** Fellows must demonstrate competence in
624 oncologic surgical peri-operative management,
625 including: (Core)
626

627 **IV.B.1.b).(2).(a).(i)** advanced laparoscopic techniques; (Core)
628

629 **IV.B.1.b).(2).(a).(ii)** broadly-based oncologic surgical
630 procedures, including those for breast,
631 endocrine, gastrointestinal, gynecological,
632 head and neck, melanoma, and sarcoma
633 conditions; (Core)
634

635 **IV.B.1.b).(2).(a).(iii)** endoscopy; and, (Core)
636

637 **IV.B.1.b).(2).(a).(iv)** staging methodologies and procedures for
638 all common surgical malignancies. (Core)
639

640	IV.B.1.b).(2).(b)	Fellows must demonstrate competence in the care of critically-ill surgical patients, including: ^(Core)
641		
642		
643	IV.B.1.b).(2).(b).(i)	applying sound principles of pharmacology for each form of therapy; ^(Core)
644		
645		
646	IV.B.1.b).(2).(b).(ii)	evaluating and managing patients receiving chemotherapy, hormonal therapy, and immunotherapy; and, ^(Core)
647		
648		
649		
650	IV.B.1.b).(2).(b).(iii)	providing supportive care to cancer patients, including pain management. ^(Core)
651		
652		
653	IV.B.1.b).(2).(c)	Fellows must demonstrate competence in performing cancer-related operative procedures. ^(Core)
654		
655		
656		
657	IV.B.1.b).(2).(c).(i)	<u>Each fellow must perform</u> a minimum of 450 <u>240 cancer-related operative procedures must be performed.</u> ^(Core)
658		
659		
660		

Subspecialty Background and Intent: The minimum case requirement as either a Primary Surgeon or Teaching Assistant on surgical oncology cases can be found on the Surgery section of the ACGME website (<http://www.acgme.org/Specialties/Case-Log-Information/pfcetid/24/Surgery>). Oncologic cases are those involving neoplastic diseases, performed for the presumptive or known diagnosis of cancer, involving pre-malignant processes, and/or carried out for cancer prevention.

661		
662	IV.B.1.b).(2).(d)	Fellows must demonstrate competence in the surgical management of patients undergoing predominantly medical therapy, including: ^(Core)
663		
664		
665		
666	IV.B.1.b).(2).(d).(i)	endoscopic procedures of the aerodigestive tract; ^(Core)
667		
668		
669	IV.B.1.b).(2).(d).(ii)	insertion of indwelling access devices for systemic or regional chemotherapy; ^(Core)
670		
671		
672	IV.B.1.b).(2).(d).(iii)	surgical management of distant metastatic disease, including resection; and, ^(Core)
673		
674		
675	IV.B.1.b).(2).(d).(iv)	minimally invasive surgery, particularly as it applies to the staging of cancer. ^(Core)
676		
677		
678	IV.B.1.b).(2).(e)	Fellows must demonstrate competence in providing state-of-the-art surgical care to patients with complex or recurrent neoplasms, including: ^(Core)
679		
680		
681		
682	IV.B.1.b).(2).(e).(i)	diagnosis and management of rare or unusual tumors based on knowledge of the natural history of such cancers; and, ^(Core)
683		
684		

685		
686	IV.B.1.b).(2).(e).(i).(a)	This must include determining the disease stage and treatment options for individual cancer patients at the time of diagnosis and throughout the disease course. ^(Detail)
687		
688		
689		
690		
691		
692	IV.B.1.b).(2).(e).(ii)	selecting patients for surgical therapy in combination with other forms of cancer treatment; <u>and</u> . ^(Core)
693		
694		
695		
696	IV.B.1.b).(2).(e).(ii).(a)	This must include performing palliative surgical procedures appropriate for each patient. ^(Detail)
697		
698		
699		
700	IV.B.1.b).(2).(e).(iii)	<u>involvement at the multidisciplinary conferences in which the cases are discussed.</u> ^(Core)
701		
702		
703		

Subspecialty Background and Intent: Multidisciplinary cases are patient case discussions in a multidisciplinary forum involving surgical and non-surgical disciplines regarding patients in whose clinical care the fellow is directly involved. The clinical encounter does not have to involve a surgical procedure. Multidisciplinary cases that involve surgical procedures can also be counted as a surgical case in addition to a multidisciplinary case.

704		
705	IV.B.1.c)	Medical Knowledge
706		
707		Fellows must demonstrate knowledge of established and evolving biomedical, clinical, epidemiological and social-behavioral sciences, as well as the application of this knowledge to patient care. ^(Core)
708		
709		
710		
711		
712	IV.B.1.c).(1)	Fellows must demonstrate competence in their knowledge of:
713		
714		
715	IV.B.1.c).(1).(a)	the benefits and risks associated with a multidisciplinary approach; ^(Core)
716		
717		
718	IV.B.1.c).(1).(b)	the fundamental biology of cancer, clinical pharmacology, tumor immunology, and endocrinology, as well as potential complications of multimodality therapy; ^(Core)
719		
720		
721		
722		
723	IV.B.1.c).(1).(b).(i)	This must include the biologic, pharmacologic, and physiologic rationale for each form of therapy, as well as the indications, risks, and benefits of regional and systemic therapy in the adjuvant and advanced disease settings. ^(Detail)
724		
725		
726		
727		
728		
729		

- 730 IV.B.1.c).(1).(c) non-surgical cancer treatment modalities, including
 731 radiotherapy, chemotherapy, immunotherapy,
 732 interventional radiology, and endocrine therapy;
 733 (Core)
 734
 735 IV.B.1.c).(1).(d) non-surgical palliative treatments; (Core)
 736
 737 IV.B.1.c).(1).(e) rehabilitative services in various settings, including
 738 reconstructive surgery and physical rehabilitation;
 739 and, (Core)
 740
 741 IV.B.1.c).(1).(f) tumor biology, carcinogenesis, epidemiology, tumor
 742 markers, and tumor pathology. (Core)
 743
 744 **IV.B.1.d) Practice-based Learning and Improvement**
 745
 746 **Fellows must demonstrate the ability to investigate and**
 747 **evaluate their care of patients, to appraise and assimilate**
 748 **scientific evidence, and to continuously improve patient care**
 749 **based on constant self-evaluation and lifelong learning. (Core)**
 750

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

- 751
 752 **IV.B.1.e) Interpersonal and Communication Skills**
 753
 754 **Fellows must demonstrate interpersonal and communication**
 755 **skills that result in the effective exchange of information and**
 756 **collaboration with patients, their families, and health**
 757 **professionals. (Core)**
 758
 759 **IV.B.1.f) Systems-based Practice**
 760
 761 **Fellows must demonstrate an awareness of and**
 762 **responsiveness to the larger context and system of health**
 763 **care, including the social determinants of health, as well as**
 764 **the ability to call effectively on other resources to provide**
 765 **optimal health care. (Core)**
 766
 767 **IV.C. Curriculum Organization and Fellow Experiences**
 768
 769 **IV.C.1. The curriculum must be structured to optimize fellow educational**
 770 **experiences, the length of these experiences, and supervisory**
 771 **continuity. (Core)**
 772

- 773 IV.C.1.a) Rotations exceeding two months in duration must have a mid-
774 rotation evaluation. ^(Core) *[Moved here from V.A.1.a).(2)]*
775
- 776 **IV.C.2. The program must provide instruction and experience in pain
777 management if applicable for the subspecialty, including recognition
778 of the signs of addiction.** ^(Core)
779
- 780 IV.C.3. The curriculum must provide at least:
781
- 782 IV.C.3.a) 12 months of education in clinical surgical oncology; and, ^(Core)
783
- 784 IV.C.3.b) four months of clinical or laboratory research. ^(Core)
785
- 786 IV.C.3.b).(1) Fellows must have access to faculty members who can
787 mentor them in basic science research and must have time
788 for such an experience if desired. ^(Detail)
789
- 790 IV.C.4. The curriculum should include a minimum of one month each in medical
791 oncology, pathology, and radiation oncology, or provide alternative
792 experiences acceptable to the Review Committee. ^(Core)
793
- 794 IV.C.5. The didactic curriculum must include:
795
- 796 IV.C.5.a) a structured series of conferences in the basic and clinical
797 sciences fundamental to oncologic surgery, monthly surgical
798 grand round, and twice-monthly morbidity and mortality
799 conferences; ^{(Detail)(Core)}
800
- 801 IV.C.5.a).(1) Fellows must organize the formal surgical oncology
802 conferences, grand rounds, and morbidity and mortality
803 conferences, and present a significant share of these
804 conferences. ^(Detail)
805
- 806 IV.C.5.b) at least weekly teaching rounds by oncologic surgical faculty
807 members; ^{(Detail)(Core)}
808
- 809 IV.C.5.c) education in the basic methodology for conducting clinical trials,
810 including biostatistics, clinical research design, ethics, and
811 implementation of computerized databases; and, ^{(Detail)(Core)}
812
- 813 IV.C.5.d) monthly relevant multidisciplinary conferences. ^{(Detail)(Core)}
814
- 815 IV.C.6. Each organized clinical discussion, round, journal club, and conference
816 must include participation by at least one member of the faculty. ^{(Detail)(Core)}
817
- 818 IV.C.7. Fellow Experiences
819
- 820 IV.C.7.a) Clinical assignments should include experiences in general
821 surgical oncology, including breast, gastrointestinal oncology,
822 melanoma, sarcoma, and head and neck. ^(Core)
823

824	IV.C.7.b)	Fellows must provide outpatient follow-up care for surgical patients. <small>(Core)</small>
825		
826		
827	IV.C.7.b).(1)	Follow-up care should include short- and long-term evaluation and progress, particularly with complex, multidisciplinary cancer management. <small>(DetailCore)</small>
828		
829		
830		
831	IV.C.7.b).(2)	Fellows must have documented outpatient experience one day per week. <small>(DetailCore)</small>
832		
833		
834	IV.C.7.c)	Each fellow must have experiences acting as a teaching assistant in the operating room when documented operative experience justifies a teaching role. <small>(DetailCore)</small>
835		
836		
837		
838	IV.C.7.d)	Fellows must not share primary responsibility for patients with the surgery chief resident. <small>(Core)</small>
839		
840		
841	IV.C.7.e)	Fellows must have significant teaching responsibilities for surgery residents, medical students, or other learners. <small>(Core)</small>
842		
843		
844	IV.C.7.f)	Fellows must be provided with experience in:
845		
846	IV.C.7.f).(1)	educating students and physicians in the multimodality management of cancer patients; <small>(OutcomeCore)</small>
847		
848		
849	IV.C.7.f).(2)	educating non-physicians (physician assistants, oncology nurses, enterostomal therapists, etc.) in specialized cancer care; and, <small>(OutcomeCore)</small>
850		
851		
852		
853	IV.C.7.f).(3)	organizing and conducting cancer-related public education programs. <small>(OutcomeCore)</small>
854		
855		
856	IV.C.7.g)	Fellow's education must include experience acting as a consultants across the oncologic continuity of care. <small>(OutcomeCore)</small>
857		
858		
859	IV.C.7.h)	Fellows experience must include opportunities to develop leadership skills to develop and support:
860		
861		
862	IV.C.7.h).(1)	institutional policies regarding cancer programs and problems; <small>(OutcomeCore)</small>
863		
864		
865	IV.C.7.h).(2)	institutional programs relating to cancer, including a tumor registry and psychosocial and rehabilitative programs for cancer patients and their families; and, <small>(OutcomeCore)</small>
866		
867		
868		
869	IV.C.7.h).(3)	interdisciplinary meetings and discussions to include cancer topics, patient care, and the oncology research program. <small>(OutcomeCore)</small>
870		
871		
872		
873	IV.D. Scholarship	
874		

875 **Medicine is both an art and a science. The physician is a humanistic**
876 **scientist who cares for patients. This requires the ability to think critically,**
877 **evaluate the literature, appropriately assimilate new knowledge, and**
878 **practice lifelong learning. The program and faculty must create an**
879 **environment that fosters the acquisition of such skills through fellow**
880 **participation in scholarly activities as defined in the subspecialty-specific**
881 **Program Requirements. Scholarly activities may include discovery,**
882 **integration, application, and teaching.**

883
884 **The ACGME recognizes the diversity of fellowships and anticipates that**
885 **programs prepare physicians for a variety of roles, including clinicians,**
886 **scientists, and educators. It is expected that the program's scholarship will**
887 **reflect its mission(s) and aims, and the needs of the community it serves.**
888 **For example, some programs may concentrate their scholarly activity on**
889 **quality improvement, population health, and/or teaching, while other**
890 **programs might choose to utilize more classic forms of biomedical**
891 **research as the focus for scholarship.**

892
893 **IV.D.1. Program Responsibilities**

894
895 **IV.D.1.a) The program must demonstrate evidence of scholarly**
896 **activities, consistent with its mission(s) and aims. (Core)**

897
898 **IV.D.1.a).(1) Physician faculty members must establish and maintain an**
899 **environment of inquiry and scholarship with an active**
900 **research component. (Core)**

901
902 **IV.D.1.b) The program in partnership with its Sponsoring Institution,**
903 **must allocate adequate resources to facilitate fellow and**
904 **faculty involvement in scholarly activities. (Core)**

905
906 **IV.D.2. Faculty Scholarly Activity**

907
908 **IV.D.2.a) Among their scholarly activity, programs must demonstrate**
909 **accomplishments in at least three of the following domains:**
910 **(Core)**

- 911
912
913
914
915
916
917
918
919
920
921
922
923
924
- **Research in basic science, education, translational science, patient care, or population health**
 - **Peer-reviewed grants**
 - **Quality improvement and/or patient safety initiatives**
 - **Systematic reviews, meta-analyses, review articles, chapters in medical textbooks, or case reports**
 - **Creation of curricula, evaluation tools, didactic educational activities, or electronic educational materials**
 - **Contribution to professional committees, educational organizations, or editorial boards**
 - **Innovations in education**

925 IV.D.2.b) The program must demonstrate dissemination of scholarly
926 activity within and external to the program by the following
927 methods:
928

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the fellows’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

929
930 IV.D.2.b).(1) faculty participation in grand rounds, posters,
931 workshops, quality improvement presentations,
932 podium presentations, grant leadership, non-peer-
933 reviewed print/electronic resources, articles or
934 publications, book chapters, textbooks, webinars,
935 service on professional committees, or serving as a
936 journal reviewer, journal editorial board member, or
937 editor; (Outcome)‡
938

939 IV.D.2.b).(2) peer-reviewed publication. (Outcome)
940

941 IV.D.3. Fellow Scholarly Activity
942

943 IV.D.3.a) Each fellow must complete a course on clinical research on
944 human subjects, such as the courses approved by the National
945 Institutes of Health Office for Human Research Protections, or an
946 institution-based equivalent. (Core)
947

948 IV.D.3.b) Fellows must demonstrate the ability to: design and implement a
949 prospective data base; conduct clinical cancer research,
950 especially prospective clinical trials; use statistical methods to
951 properly evaluate results of published research studies; guide
952 other learners or other personnel in laboratory or clinical oncology
953 research; and navigate the interface of basic science with clinical
954 cancer care to facilitate translational research. (Outcome)
955

956 V. Evaluation
957

958 V.A. Fellow Evaluation
959

960 V.A.1. Feedback and Evaluation
961

Background and Intent: Feedback is ongoing information provided regarding aspects of one’s performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- fellows identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

962
963
964
965
966
967
968
969

V.A.1.a) Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. (Core)

V.A.1.a).(1) The fellow's semiannual review must include review of the fellow's operative performance and data. (Core)

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

970
971
972
973
974
975
976
977
978
979
980
981
982

V.A.1.b) Evaluation must be documented at the completion of the assignment. (Core)

V.A.1.b).(1) For block rotations of greater than three months in duration, evaluation must be documented at least every three months. (Core)

V.A.1.b).(2) Longitudinal experiences such as continuity clinic in the context of other clinical responsibilities must be evaluated at least every three months and at completion. (Core)

- 983 V.A.1.c) The program must provide an objective performance
984 evaluation based on the Competencies and the subspecialty-
985 specific Milestones, and must: ^(Core)
986
987 V.A.1.c).(1) use multiple evaluators (e.g., faculty members, peers,
988 patients, self, and other professional staff members);
989 and, ^(Core)
990
991 V.A.1.c).(2) provide that information to the Clinical Competency
992 Committee for its synthesis of progressive fellow
993 performance and improvement toward unsupervised
994 practice. ^(Core)
995

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

- 996
997 V.A.1.d) The program director or their designee, with input from the
998 Clinical Competency Committee, must:
999
1000 V.A.1.d).(1) meet with and review with each fellow their
1001 documented semi-annual evaluation of performance,
1002 including progress along the subspecialty-specific
1003 Milestones. ^(Core)
1004
1005 V.A.1.d).(2) assist fellows in developing individualized learning
1006 plans to capitalize on their strengths and identify areas
1007 for growth; and, ^(Core)
1008
1009 V.A.1.d).(3) develop plans for fellows failing to progress, following
1010 institutional policies and procedures. ^(Core)
1011

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a

faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

- 1012
1013 **V.A.1.e)** At least annually, there must be a summative evaluation of
1014 each fellow that includes their readiness to progress to the
1015 next year of the program, if applicable. ^(Core)
1016
- 1017 **V.A.1.f)** The evaluations of a fellow's performance must be accessible
1018 for review by the fellow. ^(Core)
1019
- 1020 **V.A.2.** **Final Evaluation**
1021
- 1022 **V.A.2.a)** The program director must provide a final evaluation for each
1023 fellow upon completion of the program. ^(Core)
1024
- 1025 **V.A.2.a).(1)** The subspecialty-specific Milestones, and when
1026 applicable the subspecialty-specific Case Logs, must
1027 be used as tools to ensure fellows are able to engage
1028 in autonomous practice upon completion of the
1029 program. ^(Core)
1030
- 1031 **V.A.2.a).(2)** The final evaluation must:
1032
- 1033 **V.A.2.a).(2).(a)** become part of the fellow's permanent record
1034 maintained by the institution, and must be
1035 accessible for review by the fellow in
1036 accordance with institutional policy; ^(Core)
1037
- 1038 **V.A.2.a).(2).(b)** verify that the fellow has demonstrated the
1039 knowledge, skills, and behaviors necessary to
1040 enter autonomous practice; ^(Core)
1041
- 1042 **V.A.2.a).(2).(c)** consider recommendations from the Clinical
1043 Competency Committee; and, ^(Core)
1044
- 1045 **V.A.2.a).(2).(d)** be shared with the fellow upon completion of
1046 the program. ^(Core)
1047
- 1048 **V.A.3.** **A Clinical Competency Committee must be appointed by the**
1049 **program director.** ^(Core)
1050
- 1051 **V.A.3.a)** At a minimum the Clinical Competency Committee must
1052 include three members, at least one of whom is a core faculty
1053 member. Members must be faculty members from the same
1054 program or other programs, or other health professionals
1055 who have extensive contact and experience with the
1056 program's fellows. ^(Core)
1057

- 1058 **V.A.3.b) The Clinical Competency Committee must:**
 1059
 1060 **V.A.3.b).(1) review all fellow evaluations at least semi-annually;**
 1061 **(Core)**
 1062
 1063 **V.A.3.b).(2) determine each fellow’s progress on achievement of**
 1064 **the subspecialty-specific Milestones; and, (Core)**
 1065
 1066 **V.A.3.b).(3) meet prior to the fellows’ semi-annual evaluations and**
 1067 **advise the program director regarding each fellow’s**
 1068 **progress. (Core)**
 1069
 1070 **V.B. Faculty Evaluation**
 1071
 1072 **V.B.1. The program must have a process to evaluate each faculty**
 1073 **member’s performance as it relates to the educational program at**
 1074 **least annually. (Core)**
 1075

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program’s faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 1076
 1077 **V.B.1.a) This evaluation must include a review of the faculty member’s**
 1078 **clinical teaching abilities, engagement with the educational**
 1079 **program, participation in faculty development related to their**
 1080 **skills as an educator, clinical performance, professionalism,**
 1081 **and scholarly activities. (Core)**
 1082
 1083 **V.B.1.b) This evaluation must include written, confidential evaluations**
 1084 **by the fellows. (Core)**
 1085
 1086 **V.B.2. Faculty members must receive feedback on their evaluations at least**
 1087 **annually. (Core)**
 1088

1089 V.B.3. Results of the faculty educational evaluations should be
1090 incorporated into program-wide faculty development plans. (Core)
1091

Background and Intent: The quality of the faculty’s teaching and clinical care is a determinant of the quality of the program and the quality of the fellows’ future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members’ teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program’s faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

1092
1093 V.C. Program Evaluation and Improvement
1094

1095 V.C.1. The program director must appoint the Program Evaluation
1096 Committee to conduct and document the Annual Program
1097 Evaluation as part of the program’s continuous improvement
1098 process. (Core)
1099

1100 V.C.1.a) The Program Evaluation Committee must be composed of at
1101 least two program faculty members, at least one of whom is a
1102 core faculty member, and at least one fellow. (Core)
1103

1104 V.C.1.b) Program Evaluation Committee responsibilities must include:

1105
1106 V.C.1.b).(1) acting as an advisor to the program director, through
1107 program oversight; (Core)
1108

1109 V.C.1.b).(2) review of the program’s self-determined goals and
1110 progress toward meeting them; (Core)
1111

1112 V.C.1.b).(3) guiding ongoing program improvement, including
1113 development of new goals, based upon outcomes;
1114 and, (Core)
1115

1116 V.C.1.b).(4) review of the current operating environment to identify
1117 strengths, challenges, opportunities, and threats as
1118 related to the program’s mission and aims. (Core)
1119

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program’s progress toward achievement of its goals and aims.

1120
1121 V.C.1.c) The Program Evaluation Committee should consider the
1122 following elements in its assessment of the program:
1123

1124 V.C.1.c).(1) curriculum; (Core)
1125

1126 V.C.1.c).(2) outcomes from prior Annual Program Evaluation(s);
1127 (Core)

1128		
1129	V.C.1.c).(3)	ACGME letters of notification, including citations, Areas for Improvement, and comments; ^(Core)
1130		
1131		
1132	V.C.1.c).(4)	quality and safety of patient care; ^(Core)
1133		
1134	V.C.1.c).(5)	aggregate fellow and faculty:
1135		
1136	V.C.1.c).(5).(a)	well-being; ^(Core)
1137		
1138	V.C.1.c).(5).(b)	recruitment and retention; ^(Core)
1139		
1140	V.C.1.c).(5).(c)	workforce diversity; ^(Core)
1141		
1142	V.C.1.c).(5).(d)	engagement in quality improvement and patient safety; ^(Core)
1143		
1144		
1145	V.C.1.c).(5).(e)	scholarly activity; ^(Core)
1146		
1147	V.C.1.c).(5).(f)	ACGME Resident/Fellow and Faculty Surveys (where applicable); and, ^(Core)
1148		
1149		
1150	V.C.1.c).(5).(g)	written evaluations of the program. ^(Core)
1151		
1152	V.C.1.c).(6)	aggregate fellow:
1153		
1154	V.C.1.c).(6).(a)	achievement of the Milestones; ^(Core)
1155		
1156	V.C.1.c).(6).(b)	in-training examinations (where applicable); ^(Core)
1157		
1158		
1159	V.C.1.c).(6).(c)	board pass and certification rates; and, ^(Core)
1160		
1161	V.C.1.c).(6).(d)	graduate performance. ^(Core)
1162		
1163	V.C.1.c).(7)	aggregate faculty:
1164		
1165	V.C.1.c).(7).(a)	evaluation; and, ^(Core)
1166		
1167	V.C.1.c).(7).(b)	professional development ^(Core)
1168		
1169	V.C.1.d)	The Program Evaluation Committee must evaluate the program's mission and aims, strengths, areas for improvement, and threats. ^(Core)
1170		
1171		
1172		
1173	V.C.1.e)	The annual review, including the action plan, must:
1174		
1175	V.C.1.e).(1)	be distributed to and discussed with the members of the teaching faculty and the fellows; and, ^(Core)
1176		
1177		
1178	V.C.1.e).(2)	be submitted to the DIO. ^(Core)

1179
1180 **V.C.2.** The program must participate in a Self-Study prior to its 10-Year
1181 Accreditation Site Visit. *(Core)*

1182
1183 **V.C.2.a)** A summary of the Self-Study must be submitted to the DIO.
1184 *(Core)*
1185

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

1186
1187 **V.C.3.** *One goal of ACGME-accredited education is to educate physicians*
1188 *who seek and achieve board certification. One measure of the*
1189 *effectiveness of the educational program is the ultimate pass rate.*

1190
1191 *The program director should encourage all eligible program*
1192 *graduates to take the certifying examination offered by the*
1193 *applicable American Board of Medical Specialties (ABMS) member*
1194 *board or American Osteopathic Association (AOA) certifying board.*

1195
1196 **V.C.3.a)** For subspecialties in which the ABMS member board and/or
1197 AOA certifying board offer(s) an annual written exam, in the
1198 preceding three years, the program's aggregate pass rate of
1199 those taking the examination for the first time must be higher
1200 than the bottom fifth percentile of programs in that
1201 subspecialty. *(Outcome)*

1202
1203 **V.C.3.b)** For subspecialties in which the ABMS member board and/or
1204 AOA certifying board offer(s) a biennial written exam, in the
1205 preceding six years, the program's aggregate pass rate of
1206 those taking the examination for the first time must be higher
1207 than the bottom fifth percentile of programs in that
1208 subspecialty. *(Outcome)*

1209
1210 **V.C.3.c)** For subspecialties in which the ABMS member board and/or
1211 AOA certifying board offer(s) an annual oral exam, in the
1212 preceding three years, the program's aggregate pass rate of
1213 those taking the examination for the first time must be higher
1214 than the bottom fifth percentile of programs in that
1215 subspecialty. *(Outcome)*

1216
1217 **V.C.3.d)** For subspecialties in which the ABMS member board and/or
1218 AOA certifying board offer(s) a biennial oral exam, in the

1219 preceding six years, the program's aggregate pass rate of
1220 those taking the examination for the first time must be higher
1221 than the bottom fifth percentile of programs in that
1222 subspecialty. *(Outcome)*

1223
1224 **V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program
1225 whose graduates over the time period specified in the
1226 requirement have achieved an 80 percent pass rate will have
1227 met this requirement, no matter the percentile rank of the
1228 program for pass rate in that subspecialty. *(Outcome)*
1229

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

1230
1231 **V.C.3.f)** Programs must report, in ADS, board certification status
1232 annually for the cohort of board-eligible fellows that
1233 graduated seven years earlier. *(Core)*
1234

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

1235
1236 **VI. The Learning and Working Environment**

1237
1238 *Fellowship education must occur in the context of a learning and working*
1239 *environment that emphasizes the following principles:*

- 1240
1241 • *Excellence in the safety and quality of care rendered to patients by fellows*
1242 *today*
1243

- 1244 • *Excellence in the safety and quality of care rendered to patients by today's*
- 1245 *fellows in their future practice*
- 1246
- 1247 • *Excellence in professionalism through faculty modeling of:*
- 1248
- 1249 ○ *the effacement of self-interest in a humanistic environment that supports*
- 1250 *the professional development of physicians*
- 1251
- 1252 ○ *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
- 1253
- 1254 • *Commitment to the well-being of the students, residents, fellows, faculty*
- 1255 *members, and all members of the health care team*
- 1256

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

- 1257
- 1258 **VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability**
- 1259
- 1260 **VI.A.1. Patient Safety and Quality Improvement**
- 1261
- 1262 *All physicians share responsibility for promoting patient safety and*
- 1263 *enhancing quality of patient care. Graduate medical education must*
- 1264 *prepare fellows to provide the highest level of clinical care with*
- 1265 *continuous focus on the safety, individual needs, and humanity of*
- 1266 *their patients. It is the right of each patient to be cared for by fellows*
- 1267 *who are appropriately supervised; possess the requisite knowledge,*
- 1268 *skills, and abilities; understand the limits of their knowledge and*
- 1269 *experience; and seek assistance as required to provide optimal*
- 1270 *patient care.*

1271
1272 *Fellows must demonstrate the ability to analyze the care they*
1273 *provide, understand their roles within health care teams, and play an*
1274 *active role in system improvement processes. Graduating fellows*
1275 *will apply these skills to critique their future unsupervised practice*
1276 *and effect quality improvement measures.*

1277
1278 *It is necessary for fellows and faculty members to consistently work*
1279 *in a well-coordinated manner with other health care professionals to*
1280 *achieve organizational patient safety goals.*

1281
1282 **VI.A.1.a) Patient Safety**

1283
1284 **VI.A.1.a).(1) Culture of Safety**

1285
1286 *A culture of safety requires continuous identification*
1287 *of vulnerabilities and a willingness to transparently*
1288 *deal with them. An effective organization has formal*
1289 *mechanisms to assess the knowledge, skills, and*
1290 *attitudes of its personnel toward safety in order to*
1291 *identify areas for improvement.*

1292
1293 **VI.A.1.a).(1).(a)** The program, its faculty, residents, and fellows
1294 must actively participate in patient safety
1295 systems and contribute to a culture of safety.
1296 (Core)

1297
1298 **VI.A.1.a).(1).(b)** The program must have a structure that
1299 promotes safe, interprofessional, team-based
1300 care. (Core)

1301
1302 **VI.A.1.a).(2) Education on Patient Safety**

1303
1304 Programs must provide formal educational activities
1305 that promote patient safety-related goals, tools, and
1306 techniques. (Core)

1307
Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.

1308
1309 **VI.A.1.a).(3) Patient Safety Events**

1310
1311 *Reporting, investigation, and follow-up of adverse*
1312 *events, near misses, and unsafe conditions are pivotal*
1313 *mechanisms for improving patient safety, and are*
1314 *essential for the success of any patient safety*
1315 *program. Feedback and experiential learning are*
1316 *essential to developing true competence in the ability*
1317 *to identify causes and institute sustainable systems-*
1318 *based changes to ameliorate patient safety*
1319 *vulnerabilities.*

1320		
1321	VI.A.1.a).(3).(a)	Residents, fellows, faculty members, and other clinical staff members must:
1322		
1323		
1324	VI.A.1.a).(3).(a).(i)	know their responsibilities in reporting patient safety events at the clinical site;
1325		(Core)
1326		
1327		
1328	VI.A.1.a).(3).(a).(ii)	know how to report patient safety events, including near misses, at the clinical site; and,
1329		(Core)
1330		
1331		
1332	VI.A.1.a).(3).(a).(iii)	be provided with summary information of their institution’s patient safety reports.
1333		(Core)
1334		
1335		
1336	VI.A.1.a).(3).(b)	Fellows must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions.
1337		(Core)

1342		
1343	VI.A.1.a).(4)	Fellow Education and Experience in Disclosure of Adverse Events
1344		
1345		
1346		<i>Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for fellows to develop and apply.</i>
1347		
1348		
1349		
1350		
1351		
1352	VI.A.1.a).(4).(a)	All fellows must receive training in how to disclose adverse events to patients and families.
1353		(Core)
1354		
1355		
1356	VI.A.1.a).(4).(b)	Fellows should have the opportunity to participate in the disclosure of patient safety events, real or simulated.
1357		(Detail)†
1358		
1359		
1360	VI.A.1.b)	Quality Improvement
1361		
1362	VI.A.1.b).(1)	Education in Quality Improvement
1363		
1364		<i>A cohesive model of health care includes quality-related goals, tools, and techniques that are necessary in order for health care professionals to achieve quality improvement goals.</i>
1365		
1366		
1367		
1368		

1369 VI.A.1.b).(1).(a) Fellows must receive training and experience in
1370 quality improvement processes, including an
1371 understanding of health care disparities. ^(Core)
1372

1373 VI.A.1.b).(2) Quality Metrics

1374
1375 *Access to data is essential to prioritizing activities for*
1376 *care improvement and evaluating success of*
1377 *improvement efforts.*
1378

1379 VI.A.1.b).(2).(a) Fellows and faculty members must receive data
1380 on quality metrics and benchmarks related to
1381 their patient populations. ^(Core)
1382

1383 VI.A.1.b).(3) Engagement in Quality Improvement Activities

1384
1385 *Experiential learning is essential to developing the*
1386 *ability to identify and institute sustainable systems-*
1387 *based changes to improve patient care.*
1388

1389 VI.A.1.b).(3).(a) Fellows must have the opportunity to
1390 participate in interprofessional quality
1391 improvement activities. ^(Core)
1392

1393 VI.A.1.b).(3).(a).(i) This should include activities aimed at
1394 reducing health care disparities. ^(Detail)
1395

1396 VI.A.2. Supervision and Accountability

1397
1398 VI.A.2.a) *Although the attending physician is ultimately responsible for*
1399 *the care of the patient, every physician shares in the*
1400 *responsibility and accountability for their efforts in the*
1401 *provision of care. Effective programs, in partnership with*
1402 *their Sponsoring Institutions, define, widely communicate,*
1403 *and monitor a structured chain of responsibility and*
1404 *accountability as it relates to the supervision of all patient*
1405 *care.*
1406

1407 *Supervision in the setting of graduate medical education*
1408 *provides safe and effective care to patients; ensures each*
1409 *fellow's development of the skills, knowledge, and attitudes*
1410 *required to enter the unsupervised practice of medicine; and*
1411 *establishes a foundation for continued professional growth.*
1412

1413 VI.A.2.a).(1) Each patient must have an identifiable and
1414 appropriately-credentialed and privileged attending
1415 physician (or licensed independent practitioner as
1416 specified by the applicable Review Committee) who is
1417 responsible and accountable for the patient's care.
1418 ^(Core)
1419

- 1420 VI.A.2.a).(1).(a) This information must be available to fellows,
1421 faculty members, other members of the health
1422 care team, and patients. ^(Core)
1423
- 1424 VI.A.2.a).(1).(b) Fellows and faculty members must inform each
1425 patient of their respective roles in that patient's
1426 care when providing direct patient care. ^(Core)
1427
- 1428 VI.A.2.b) *Supervision may be exercised through a variety of methods.
1429 For many aspects of patient care, the supervising physician
1430 may be a more advanced fellow. Other portions of care
1431 provided by the fellow can be adequately supervised by the
1432 appropriate availability of the supervising faculty member or
1433 fellow, either on site or by means of telecommunication
1434 technology. Some activities require the physical presence of
1435 the supervising faculty member. In some circumstances,
1436 supervision may include post-hoc review of fellow-delivered
1437 care with feedback.*
1438

Background and Intent: There are circumstances where direct supervision without physical presence does not fulfill the requirements of the specific Review Committee. Review Committees will further specify what is meant by direct supervision without physical presence in specialties where allowed. "Physically present" is defined as follows: The teaching physician is located in the same room (or partitioned or curtained area, if the room is subdivided to accommodate multiple patients) as the patient and/or performs a face-to-face service.

- 1439
- 1440 VI.A.2.b).(1) The program must demonstrate that the appropriate
1441 level of supervision in place for all fellows is based on
1442 each fellow's level of training and ability, as well as
1443 patient complexity and acuity. Supervision may be
1444 exercised through a variety of methods, as appropriate
1445 to the situation. ^(Core)
1446
- 1447 VI.A.2.b).(2) The program must define when physical presence of a
1448 supervising physician is required. ^(Core)
1449
- 1450 VI.A.2.c) **Levels of Supervision**
1451
1452 To promote appropriate fellow supervision while providing
1453 for graded authority and responsibility, the program must use
1454 the following classification of supervision: ^(Core)
1455
- 1456 VI.A.2.c).(1) **Direct Supervision:**
1457
- 1458 VI.A.2.c).(1).(a) the supervising physician is physically present
1459 with the fellow during the key portions of the
1460 patient interaction. ^(Core)
1461
- 1462 VI.A.2.c).(2) **Indirect Supervision:** the supervising physician is not
1463 providing physical or concurrent visual or audio

- 1464 supervision but is immediately available to the fellow
 1465 for guidance and is available to provide appropriate
 1466 direct supervision. ^(Core)
 1467
 1468 **VI.A.2.c).(3)** Oversight – the supervising physician is available to
 1469 provide review of procedures/encounters with
 1470 feedback provided after care is delivered. ^(Core)
 1471
 1472 **VI.A.2.d)** The privilege of progressive authority and responsibility,
 1473 conditional independence, and a supervisory role in patient
 1474 care delegated to each fellow must be assigned by the
 1475 program director and faculty members. ^(Core)
 1476
 1477 **VI.A.2.d).(1)** The program director must evaluate each fellow’s
 1478 abilities based on specific criteria, guided by the
 1479 Milestones. ^(Core)
 1480
 1481 **VI.A.2.d).(2)** Faculty members functioning as supervising
 1482 physicians must delegate portions of care to fellows
 1483 based on the needs of the patient and the skills of
 1484 each fellow. ^(Core)
 1485
 1486 **VI.A.2.d).(3)** Fellows should serve in a supervisory role to junior
 1487 fellows and residents in recognition of their progress
 1488 toward independence, based on the needs of each
 1489 patient and the skills of the individual resident or
 1490 fellow. ^(Detail)
 1491
 1492 **VI.A.2.e)** Programs must set guidelines for circumstances and events
 1493 in which fellows must communicate with the supervising
 1494 faculty member(s). ^(Core)
 1495
 1496 **VI.A.2.e).(1)** Each fellow must know the limits of their scope of
 1497 authority, and the circumstances under which the
 1498 fellow is permitted to act with conditional
 1499 independence. ^(Outcome)
 1500

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

- 1501
 1502 **VI.A.2.f)** Faculty supervision assignments must be of sufficient
 1503 duration to assess the knowledge and skills of each fellow
 1504 and to delegate to the fellow the appropriate level of patient
 1505 care authority and responsibility. ^(Core)
 1506
 1507 **VI.B. Professionalism**
 1508
 1509 **VI.B.1.** Programs, in partnership with their Sponsoring Institutions, must
 1510 educate fellows and faculty members concerning the professional
 1511 responsibilities of physicians, including their obligation to be

1512 appropriately rested and fit to provide the care required by their
1513 patients. ^(Core)

1514
1515 **VI.B.2.** The learning objectives of the program must:

1516
1517 **VI.B.2.a)** be accomplished through an appropriate blend of supervised
1518 patient care responsibilities, clinical teaching, and didactic
1519 educational events; ^(Core)

1520
1521 **VI.B.2.b)** be accomplished without excessive reliance on fellows to
1522 fulfill non-physician obligations; and, ^(Core)
1523

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1524
1525 **VI.B.2.c)** ensure manageable patient care responsibilities. ^(Core)
1526

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1527
1528 **VI.B.3.** The program director, in partnership with the Sponsoring Institution,
1529 must provide a culture of professionalism that supports patient
1530 safety and personal responsibility. ^(Core)
1531

1532 **VI.B.4.** Fellows and faculty members must demonstrate an understanding
1533 of their personal role in the:

1534
1535 **VI.B.4.a)** provision of patient- and family-centered care; ^(Outcome)
1536

1537 **VI.B.4.b)** safety and welfare of patients entrusted to their care,
1538 including the ability to report unsafe conditions and adverse
1539 events; ^(Outcome)
1540

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

1541

1542 VI.B.4.c) assurance of their fitness for work, including: (Outcome)
1543

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

1544
1545 VI.B.4.c).(1) management of their time before, during, and after
1546 clinical assignments; and, (Outcome)
1547
1548 VI.B.4.c).(2) recognition of impairment, including from illness,
1549 fatigue, and substance use, in themselves, their peers,
1550 and other members of the health care team. (Outcome)
1551

1552 VI.B.4.d) commitment to lifelong learning; (Outcome)

1553 VI.B.4.e) monitoring of their patient care performance improvement
1554 indicators; and, (Outcome)
1555

1556 VI.B.4.f) accurate reporting of clinical and educational work hours,
1557 patient outcomes, and clinical experience data. (Outcome)
1558

1559 VI.B.5. All fellows and faculty members must demonstrate responsiveness
1560 to patient needs that supersedes self-interest. This includes the
1561 recognition that under certain circumstances, the best interests of
1562 the patient may be served by transitioning that patient's care to
1563 another qualified and rested provider. (Outcome)
1564

1565 VI.B.6. Programs, in partnership with their Sponsoring Institutions, must
1566 provide a professional, equitable, respectful, and civil environment
1567 that is free from discrimination, sexual and other forms of
1568 harassment, mistreatment, abuse, or coercion of students, fellows,
1569 faculty, and staff. (Core)
1570

1571 VI.B.7. Programs, in partnership with their Sponsoring Institutions, should
1572 have a process for education of fellows and faculty regarding
1573 unprofessional behavior and a confidential process for reporting,
1574 investigating, and addressing such concerns. (Core)
1575

1576 VI.C. Well-Being

1577
1578 *Psychological, emotional, and physical well-being are critical in the*
1579 *development of the competent, caring, and resilient physician and require*
1580 *proactive attention to life inside and outside of medicine. Well-being*
1581 *requires that physicians retain the joy in medicine while managing their*
1582 *own real life stresses. Self-care and responsibility to support other*
1583 *members of the health care team are important components of*
1584 *professionalism; they are also skills that must be modeled, learned, and*
1585 *nurtured in the context of other aspects of fellowship training.*
1586

1587
1588
1589
1590
1591
1592
1593
1594
1595
1596
1597
1598

Fellows and faculty members are at risk for burnout and depression. Programs, in partnership with their Sponsoring Institutions, have the same responsibility to address well-being as other aspects of resident competence. Physicians and all members of the health care team share responsibility for the well-being of each other. For example, a culture which encourages covering for colleagues after an illness without the expectation of reciprocity reflects the ideal of professionalism. A positive culture in a clinical learning environment models constructive behaviors, and prepares fellows with the skills and attitudes needed to thrive throughout their careers.

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

1610
1611
1612
1613
1614
1615

- VI.C.1.** The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:
- VI.C.1.a)** efforts to enhance the meaning that each fellow finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; (Core)
- VI.C.1.b)** attention to scheduling, work intensity, and work compression that impacts fellow well-being; (Core)
- VI.C.1.c)** evaluating workplace safety data and addressing the safety of fellows and faculty members; (Core)

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

1616

1617 VI.C.1.d) policies and programs that encourage optimal fellow and
1618 faculty member well-being; and, (Core)
1619

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

1620
1621 VI.C.1.d).(1) Fellows must be given the opportunity to attend
1622 medical, mental health, and dental care appointments,
1623 including those scheduled during their working hours.
1624 (Core)
1625

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

1626
1627 VI.C.1.e) attention to fellow and faculty member burnout, depression,
1628 and substance abuse. The program, in partnership with its
1629 Sponsoring Institution, must educate faculty members and
1630 fellows in identification of the symptoms of burnout,
1631 depression, and substance abuse, including means to assist
1632 those who experience these conditions. Fellows and faculty
1633 members must also be educated to recognize those
1634 symptoms in themselves and how to seek appropriate care.
1635 The program, in partnership with its Sponsoring Institution,
1636 must: (Core)
1637

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance abuse. Materials and more information are available on the Physician Well-being section of the ACGME website (<http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being>).

1638
1639 VI.C.1.e).(1) encourage fellows and faculty members to alert the
1640 program director or other designated personnel or
1641 programs when they are concerned that another
1642 fellow, resident, or faculty member may be displaying
1643 signs of burnout, depression, substance abuse,
1644 suicidal ideation, or potential for violence; (Core)
1645

Background and Intent: Individuals experiencing burnout, depression, substance abuse, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate

access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

- 1646
1647 VI.C.1.e).(2) provide access to appropriate tools for self-screening;
1648 and, (Core)
1649
1650 VI.C.1.e).(3) provide access to confidential, affordable mental
1651 health assessment, counseling, and treatment,
1652 including access to urgent and emergent care 24
1653 hours a day, seven days a week. (Core)
1654

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

- 1655
1656 VI.C.2. There are circumstances in which fellows may be unable to attend
1657 work, including but not limited to fatigue, illness, family
1658 emergencies, and parental leave. Each program must allow an
1659 appropriate length of absence for fellows unable to perform their
1660 patient care responsibilities. (Core)
1661
1662 VI.C.2.a) The program must have policies and procedures in place to
1663 ensure coverage of patient care. (Core)
1664
1665 VI.C.2.b) These policies must be implemented without fear of negative
1666 consequences for the fellow who is or was unable to provide
1667 the clinical work. (Core)
1668

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

- 1669
1670 VI.D. Fatigue Mitigation
1671
1672 VI.D.1. Programs must:
1673
1674 VI.D.1.a) educate all faculty members and fellows to recognize the
1675 signs of fatigue and sleep deprivation; (Core)
1676

1677 VI.D.1.b) educate all faculty members and fellows in alertness
1678 management and fatigue mitigation processes; and, (Core)

1679
1680 VI.D.1.c) encourage fellows to use fatigue mitigation processes to
1681 manage the potential negative effects of fatigue on patient
1682 care and learning. (Detail)

1683

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

1684

1685 VI.D.2. Each program must ensure continuity of patient care, consistent
1686 with the program's policies and procedures referenced in VI.C.2–
1687 VI.C.2.b), in the event that a fellow may be unable to perform their
1688 patient care responsibilities due to excessive fatigue. (Core)

1689

1690 VI.D.3. The program, in partnership with its Sponsoring Institution, must
1691 ensure adequate sleep facilities and safe transportation options for
1692 fellows who may be too fatigued to safely return home. (Core)

1693

1694 VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care

1695

1696 VI.E.1. Clinical Responsibilities

1697

1698 The clinical responsibilities for each fellow must be based on PGY
1699 level, patient safety, fellow ability, severity and complexity of patient
1700 illness/condition, and available support services. (Core)

1701

1702 VI.E.1.a) As fellows progress through levels of increasing competence and
1703 responsibility, work assignments must keep pace with their level of
1704 advancement. (Detail|Core)

1705

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be

distributed among the fellow team and interdisciplinary teams to minimize work compression.

1706		
1707	VI.E.2.	Teamwork
1708		
1709		Fellows must care for patients in an environment that maximizes communication. This must include the opportunity to work as a member of effective interprofessional teams that are appropriate to the delivery of care in the subspecialty and larger health system.
1710		
1711		
1712		
1713		(Core)
1714		
1715	VI.E.2.a)	During the fellow's education process, surgical teams should be made up of attending surgeons, fellows, residents at various PG levels, medical students (when appropriate), and other health care providers. (Detail)
1716		
1717		
1718		
1719		
1720	VI.E.2.b)	The work of the caregiver team should be assigned to team members based on each member's level of education, experience, and competence. (Detail)
1721		
1722		
1723		
1724	VI.E.2.c)	Fellows must collaborate with fellow surgical residents, and especially with faculty members, other physicians outside of their subspecialty, and non-traditional health care providers, to best formulate treatment plans for an increasingly diverse patient population. (DetailCore)
1725		
1726		
1727		
1728		
1729		
1730	VI.E.2.d)	Fellows must assume personal responsibility to complete all tasks to which they are assigned (or which they voluntarily assume) in a timely fashion. These tasks must be completed in the hours assigned, or, if that is not possible, residents must learn and utilize the established methods for handing off remaining tasks to another member of the health care team so that patient care is not compromised. (DetailCore)

1735		
1736		
1737		
1738	VI.E.3.	Transitions of Care
1739		
1740	VI.E.3.a)	Programs must design clinical assignments to optimize transitions in patient care, including their safety, frequency, and structure. (Core)
1741		
1742		
1743		
1744	VI.E.3.b)	Programs, in partnership with their Sponsoring Institutions, must ensure and monitor effective, structured hand-over processes to facilitate both continuity of care and patient safety. (Core)
1745		
1746		
1747		
1748		
1749	VI.E.3.c)	Programs must ensure that fellows are competent in communicating with team members in the hand-over process. (Outcome)
1750		
1751		
1752		

1753 VI.E.3.d) Programs and clinical sites must maintain and communicate
1754 schedules of attending physicians and fellows currently
1755 responsible for care. ^(Core)
1756

1757 VI.E.3.e) Each program must ensure continuity of patient care,
1758 consistent with the program’s policies and procedures
1759 referenced in VI.C.2-VI.C.2.b), in the event that a fellow may
1760 be unable to perform their patient care responsibilities due to
1761 excessive fatigue or illness, or family emergency. ^(Core)
1762

1763 VI.F. Clinical Experience and Education

1764
1765 *Programs, in partnership with their Sponsoring Institutions, must design*
1766 *an effective program structure that is configured to provide fellows with*
1767 *educational and clinical experience opportunities, as well as reasonable*
1768 *opportunities for rest and personal activities.*
1769

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

1770
1771 VI.F.1. Maximum Hours of Clinical and Educational Work per Week

1772
1773 Clinical and educational work hours must be limited to no more than
1774 80 hours per week, averaged over a four-week period, inclusive of all
1775 in-house clinical and educational activities, clinical work done from
1776 home, and all moonlighting. ^(Core)
1777

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

1780
1781
1782
1783
1784
1785

VI.F.2. Mandatory Time Free of Clinical Work and Education

- VI.F.2.a) The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. ^(Core)**

1786 VI.F.2.b) Fellows should have eight hours off between scheduled
1787 clinical work and education periods. ^(Detail)

1788
1789 VI.F.2.b).(1) There may be circumstances when fellows choose to
1790 stay to care for their patients or return to the hospital
1791 with fewer than eight hours free of clinical experience
1792 and education. This must occur within the context of
1793 the 80-hour and the one-day-off-in-seven
1794 requirements. ^(Detail)
1795

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1796
1797 VI.F.2.c) Fellows must have at least 14 hours free of clinical work and
1798 education after 24 hours of in-house call. ^(Core)
1799

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1800
1801 VI.F.2.d) Fellows must be scheduled for a minimum of one day in
1802 seven free of clinical work and required education (when
1803 averaged over four weeks). At-home call cannot be assigned
1804 on these free days. ^(Core)
1805

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

1806
1807 VI.F.3. Maximum Clinical Work and Education Period Length
1808

- 1809 VI.F.3.a) Clinical and educational work periods for fellows must not
 1810 exceed 24 hours of continuous scheduled clinical
 1811 assignments. ^(Core)
 1812
 1813 VI.F.3.a).(1) Up to four hours of additional time may be used for
 1814 activities related to patient safety, such as providing
 1815 effective transitions of care, and/or fellow education.
 1816 ^(Core)
 1817
 1818 VI.F.3.a).(1).(a) Additional patient care responsibilities must not
 1819 be assigned to a fellow during this time. ^(Core)
 1820

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

- 1821
 1822 VI.F.4. Clinical and Educational Work Hour Exceptions
 1823
 1824 VI.F.4.a) In rare circumstances, after handing off all other
 1825 responsibilities, a fellow, on their own initiative, may elect to
 1826 remain or return to the clinical site in the following
 1827 circumstances:
 1828
 1829 VI.F.4.a).(1) to continue to provide care to a single severely ill or
 1830 unstable patient; ^(Detail)
 1831
 1832 VI.F.4.a).(2) humanistic attention to the needs of a patient or
 1833 family; or, ^(Detail)
 1834
 1835 VI.F.4.a).(3) to attend unique educational events. ^(Detail)
 1836
 1837 VI.F.4.b) These additional hours of care or education will be counted
 1838 toward the 80-hour weekly limit. ^(Detail)
 1839

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

- 1840
 1841 VI.F.4.c) A Review Committee may grant rotation-specific exceptions
 1842 for up to 10 percent or a maximum of 88 clinical and

1843 educational work hours to individual programs based on a
1844 sound educational rationale.

1845
1846 The Review Committee for General Surgery will not consider
1847 requests for exceptions to the 80-hour limit to the fellow's work
1848 week.

1849
1850 **VI.F.4.c).(1)** In preparing a request for an exception, the program
1851 director must follow the clinical and educational work
1852 hour exception policy from the *ACGME Manual of*
1853 *Policies and Procedures.* (Core)

1854
1855 **VI.F.4.c).(2)** Prior to submitting the request to the Review
1856 Committee, the program director must obtain approval
1857 from the Sponsoring Institution's GMEC and DIO. (Core)
1858

Background and Intent: The provision for exceptions for up to 88 hours per week has been modified to specify that exceptions may be granted for specific rotations if the program can justify the increase based on criteria specified by the Review Committee. As in the past, Review Committees may opt not to permit exceptions. The underlying philosophy for this requirement is that while it is expected that all fellows should be able to train within an 80-hour work week, it is recognized that some programs may include rotations with alternate structures based on the nature of the specialty. DIO/GMEC approval is required before the request will be considered by the Review Committee.

1859
1860 **VI.F.5. Moonlighting**

1861
1862 **VI.F.5.a)** Moonlighting must not interfere with the ability of the fellow
1863 to achieve the goals and objectives of the educational
1864 program, and must not interfere with the fellow's fitness for
1865 work nor compromise patient safety. (Core)

1866
1867 **VI.F.5.b)** Time spent by fellows in internal and external moonlighting
1868 (as defined in the ACGME Glossary of Terms) must be
1869 counted toward the 80-hour maximum weekly limit. (Core)
1870

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

1871
1872 **VI.F.6. In-House Night Float**

1873
1874 **Night float must occur within the context of the 80-hour and one-**
1875 **day-off-in-seven requirements.** (Core)

1876
1877 **VI.F.6.a)** The total amount of night float for any fellow must be no more than
1878 two months per PG year. (Detail)(Core)
1879

Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

- VI.F.7. Maximum In-House On-Call Frequency**
- Fellows must be scheduled for in-house call no more frequently than every third night (when averaged over a four-week period). ^(Core)**
- VI.F.8. At-Home Call**
- VI.F.8.a) Time spent on patient care activities by fellows on at-home call must count toward the 80-hour maximum weekly limit. The frequency of at-home call is not subject to the every-third-night limitation, but must satisfy the requirement for one day in seven free of clinical work and education, when averaged over four weeks. ^(Core)**
- VI.F.8.a).(1) At-home call must not be so frequent or taxing as to preclude rest or reasonable personal time for each fellow. ^(Core)**
- VI.F.8.b) Fellows are permitted to return to the hospital while on at-home call to provide direct care for new or established patients. These hours of inpatient patient care must be included in the 80-hour maximum weekly limit. ^(Detail)**

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
