ACGME President and CEO Announces Transition
ACGME President and Chief Executive Officer Thomas J. Nasca, MD, MACP announced he intends to step down from his current role on January 1, 2025, to establish the ACGME Center for Professionalism and the Future of Medicine. Dr. Nasca will serve as the initial Senior Fellow and Administrative Director. The ACGME Board of Directors will undertake a national search to identify the next President and CEO.

The Mission of the ACGME is to improve health care and population health by assessing and enhancing the quality of resident and fellow physicians' education through advancements in accreditation and education.

ACGME MISSION, VISION, and VALUES
Purpose of ACGME Accreditation

• Accreditation of Sponsoring Institutions and residency/fellowship programs by the ACGME is a voluntary process of evaluation and review.

• Accreditation benefits the public, protects the interests of residents and fellows, and improves the quality of teaching, learning, research, and professional practice.

• The accreditation processes are designed to evaluate, improve, and publicly recognize Sponsoring Institutions and graduate medical education programs that are in substantial compliance with standards of educational quality established by the ACGME.
ACGME Accreditation

The ACGME has a twofold purpose:

1. to establish and maintain accreditation standards that promote the educational quality of residency and fellowship education programs; and,

2. to promote residency/fellowship education that is sensitive to the quality and safety of patient care in an environment that fosters the well-being, learning, and professionalism of residents and fellows.

It is not the intent or purpose of the ACGME to establish numbers of physicians in any specialty.
ACGME Board of Directors and Review Committees

- Board sets policy and direction
- Board delegates authority to accredit programs/institutions to the Review Committees
- Board monitors Review/Recognition Committees
  - Monitoring Committee
- Board approves:
  - Institutional/specialty-specific/Recognition Requirements
  - Common Program Requirements
Differences Between the ACGME and the Certifying Boards

- Accredits education programs
- Develops Program Requirements for programs
- Evaluates programs through annual data review and site visits

- Certifies individual physicians
- Sets the standards residents and fellows must meet to gain certification
- Works with the ACGME to ensure alignment of Program and Certification Requirements
When to Notify the Review Committee of Program Changes

Submitted in the ACGME's Accreditation Data System (ADS), accessible from [www.acgme.org](http://www.acgme.org)

When *Not* to Notify the Review Committee

Exceptions for an individual’s education and training:

- Leaves of absence
- Extensions due to remediation
- Electives (including international)
- Other education/training not required by the Review Committee (including pathways)
  - *In these circumstances you should contact the certifying board*
  - ✓ *American Board of Psychiatry and Neurology – www.abpn.org*
There are 28 specialty Review Committees, including one for transitional year programs.

The Institutional Review Committee reviews and accredits institutions that sponsor graduate medical education (GME) programs.

Each Review Committee receives data on all accredited or applicant programs or institutions within its purview, and makes an accreditation status decision on each, annually.
Review Committee for Neurology Members

- Howard Goodkin, MD – (Chair)
- Christopher Boes, MD – (Vice Chair)
- Timothy Bernard, MD
- Deborah Bradshaw, MD
- Marc T. DiSabella, DO
- Patricia Graese, MD – (Resident Member)
- Zachary London, MD
- Anne Pawlak, DO – (AOA)
- Jose Posas, MD
- Erica Schuyler, MD
- Vicki Shanker, MD
- Karen Tilltson, DHSC, PA-C (Public Member)
- Renee B. Van Stavern, MD

Ex-Officio Members
- Jeffrey M. Lyness, MD (ABPN)
- Jason Ouimette (AOA)
- Mary Post, MBA, CAE (AAN)
- Monique Terrell (CNS)

Review Committee members are not allowed to discuss Review Committee activities, including accreditation decisions.
Review Committee for Neurology

Composition:
• 11 members*
• 1 resident/fellow member
• 1 public member
• 5 ex-officio members

Nominating Organizations:
• AAN (3)
• CNS (1)
• AMA (3)
• ABPN (3)
• AOA (1)

*With the exception of the resident/fellow member, Review Committee members are appointed to six-year terms (not renewable).

All members of a committee have full voting rights and may participate and vote on all matters (subject to the ACGME Policy regarding conflicts and dualities of interest).

Review Committee nominating organizations may be changed or deleted upon unanimous recommendation of the existing nominating organizations for that Review Committee and approval by the ACGME Board.

ACGME Resident/Fellow and Faculty Surveys

ACGME Faculty Survey

• Program directors are not asked to complete the Faculty Survey
• Core faculty members in specialty programs (physicians and non-physicians) are asked to complete the Faculty Survey
• All faculty members in subspecialty programs (physicians and non-physicians) will be scheduled to participate in the Faculty Survey
ACGME Resident/Fellow and Faculty Surveys

“How does the Review Committee use the Resident/Fellow Survey results in determining accreditation decisions?”

• The Review Committee reviews the program’s trend data from the survey results, which include information for each domain area versus individual questions.
• The Review Committee issues AFIs for non-compliance with specific areas from each domain.
• The Review Committee issues citations for the surveys if the program has received multiple AFIs in a particular domain area.
• The Review Committee will issue a citation for non-compliance in the domain area of Professionalism relative to the questions surrounding the ability to raise concerns without fear of intimidation or retaliation and satisfaction with process for dealing confidentially with problems and concerns.

Temporary Complement Increase Requests

Changes to Temporary Complement Increase Requests for Less than 90 Days
To reduce burden for the GME community and better align with the Institutional Requirements related to leaves of absence, Review Committees will allow extensions of education up to 90 days without requiring formal submission of a temporary complement increase request. **This change applies to all specialty/subspecialty programs except one-year programs, and is now in effect.** Requests for temporary changes in complement longer than 90 days are still required and must be approved by the designated institutional official prior to being submitted in ADS for Review Committee consideration.

Instructions have been updated in ADS in the “Complement Change Request” section to alert users of the change; guidance in the [Guide to the Common Program Requirements (Residency)](https://www.acgme.org/-/media/Portals/0/PFAssets/ProgramRequirements/Guide%20to%20the%20Common%20Program%20Requirements.pdf) for III.B., Resident Complement, also reflects the change. Review Committees are updating guidance on this process in specialty-specific documents, which will be available on the Documents and Resources tab of the respective specialty section of the website and announced via the e-Communication.

Email questions to [accreditation@acgme.org](mailto:accreditation@acgme.org).
<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
</table>
| When should a program request a temporary increase in resident complement versus a permanent increase in resident complement? [Program Requirements: III.B. and III.B.1.] | The Review Committee for Neurology defines temporary and permanent complement increases as follows:  
**Temporary Complement Increases**  
Temporary complement increases are intended to address only a few extenuating circumstances, usually involving a current resident needing to extend education and training. This could be due to resident performance concerns (e.g., resident needing remediation before graduating) or excessive time away from the program (e.g., extended medical leave during residency) that impact the achievement of competence. Temporary increases must not be multi-year requests or submitted with intent to annually renew. Temporary increases are intended to extend the training for current residents who need to finish the program off cycle. The Review Committee's Executive Director reviews temporary increase requests for a three-month duration or less. Requests for greater than three months require Committee review.  
Under special circumstances, such as a program's participation in the ACGME's Advancing Innovation in Residency Education (AIRE) program or similar initiatives, temporary increases will be reviewed and approved by the Review Committee on a case-by-case basis.  
**Permanent Complement Increases**  
Permanent complement increases should be requested when the program desires to expand the total resident complement in an ongoing manner to a total higher than currently approved (as published on the ACGME's Accreditation Data System (ADS) public site). This type of request should occur only after the program director carefully weighs the educational impact of adding residents to the currently approved complement and obtains institutional support for the proposed complement expansion. It is imperative that programs plan well in advance for permanent complement increases. Candidates must not be matched into a program before such a request is approved by the Review Committee. |

NEW! Program Site Visit Update

As part of its ongoing commitment to program improvement, the ACGME will conduct site visits annually for approximately one to two percent of programs with the status of Continued Accreditation. Programs will be selected through a random sampling process. The site visits will help assess program compliance with the Common Program Requirements and applicable specialty-specific Program Requirements in support of the ACGME’s Mission.

Email questions to accreditation@acgme.org.

• Programs identified in this process include: 2 Neurology; 1 Neurodevelopmental Disabilities; 1 Vascular Neurology

Requirements

• Purpose: Facilitate an environment in which residents/fellows can interact with patients under the guidance and supervision of qualified faculty members who give value, context, and meaning to those interactions.

• Set the context within the clinical learning environment for development of skills, knowledge, and attitudes necessary to take personal responsibility for the individual care of patients.

• Programs are accountable to both Common Program Requirements and the applicable specialty-specific Program Requirements.
Neurology/Child Neurology Subspecialty Program Requirements

• The Review Committee for Neurology is undergoing a major revision of the Program Requirements for the subspecialties of clinical neurophysiology, epilepsy, neurodevelopmental disabilities, neuromuscular medicine, and vascular neurology.

• The proposed neurology subspecialty Program Requirements will be posted on the ACGME website spring 2024 for the 45-day public comment period.

• The proposed subspecialty Program Requirements are tentatively scheduled for review at the September 2024, ACGME Committee or Requirements meeting.

• The subspecialty Program Requirements are anticipated to become effective July 1, 2025.
Neurology/Child Neurology
“Shaping GME” Revision

Specialty-Specific Program Requirements and Revisions
Requirements Revisions

Requirements must be reviewed with potential for **Major Revisions every 10 years**.

**Shaping GME** (scenario-based strategic planning): Review Committees and relevant specialty communities are asked to think rigorously and creatively about what the specialty will look like in the future, well beyond 10-year increments, recognizing that the future is marked with significant uncertainty. **Neurology and Child Neurology are currently slated to undergo this process in 2027**

**Interim revisions** may be considered at scheduled intervals between major revisions, which will **typically be every three years**.

On rare occasions, with approval of the ACGME Board, revisions may be considered between these scheduled intervals.

### Requirements for Review and Comment

https://www.acgme.org/programs-and-institutions/programs/review-and-comment/
Institutional Requirements – Guiding Principles: Vacation and Leaves of Absence

- Address medical, parental, and caregiver leave
- Six weeks of paid leave once during program, with one-week additional vacation time in same year
- Health insurance available during leave
- Equitable treatment of residents under leave policies (e.g., call responsibilities, promotion/renewal)
- Flexibility of scheduling, time off utilization, and fellowship start dates
- Policies widely available for prospective residents
- Policies consistent with board requirements
- Address extended leaves or multiple episodes of leave
Institutional Requirements

IV.H. Vacation and Leaves of Absence

IV.H.1. The Sponsoring Institution must have a policy for vacation and leaves of absence, consistent with applicable laws. This policy must: (Core)

IV.H.1.a) provide residents/fellows with a minimum of six weeks of approved medical, parental, and caregiver leave(s) of absence for qualifying reasons that are consistent with applicable laws at least once and at any time during an ACGME-accredited program, starting the day the resident/fellow is required to report; (Core)

IV.H.1.b) provide residents/fellows with at least the equivalent of 100 percent of their salary for the first six weeks of the first approved medical, parental, or caregiver leave(s) of absence taken; (Core)

IV.H.1.c) provide residents/fellows with a minimum of one week of paid time off reserved for use outside of the first six weeks of the first approved medical, parental, or caregiver leave(s) of absence taken; (Core)

IV.H.1.d) ensure the continuation of health and disability insurance benefits for residents/fellows and their eligible dependents during any approved medical, parental, or caregiver leave(s) of absence; (Core)

IV.H.1.e) describe the process for submitting and approving requests for leaves of absence; (Core)

IV.H.1.f) be available for review by residents/fellows at all times; and (Core)

IV.H.1.g) This policy must ensure that each of its ACGME-accredited programs provides its residents/fellows with accurate information regarding the impact of an extended leave of absence upon the criteria for satisfactory completion of the program and upon a resident’s/fellow’s eligibility to participate in examinations by the relevant certifying board(s). (Core)

Competency-Based Medical Education (CBME)

The ACGME and ABMS have been conducting symposia with the goal to accelerate the development of and transition CBME in GME.

These working conferences are to develop a set of actions by the certification boards and the Review Committees to support advancing CBME within GME.

Teams consist of Member Board executives, Review Committee Chairs, one learner from the specialty, one or two representatives (such as a specialty society leaders or others to be selected jointly by the Member Board and Review Committee representatives)
Objectives included:

- Recognizing the role and importance of the five essential core components of CBME in GME.
- Identifying the policy, financial, and administrative facilitators that have empowered spread and innovation in CBME.
- Identifying the policy, financial, and administrative barriers that inhibit the growth of CBME.
- Recommending changes in ACGME and ABMS policies and procedures that promote innovation and reduce or eliminate barriers to CBME.
- Working within and across specialties, create an action plan to support innovations and the widespread implementation of CBME.
Outcomes-Based Education: What Is It?

- Central tenet: *start with the end in mind*
  - Focus on what type of physician will be produced
  - Structure and process flow from the outcomes
- Educational outcomes should be “clearly and unambiguously specified”
- These educational outcomes determine:
  - Curriculum, assessment processes, and the learning environment

© AAFP: Collaboration Improves Patient Outcomes, Lowers Cost (aafp.org)

Slide provided by Dr. Eric Holmboe
Implementing Outcomes-Based Medical Education: Enter CBME

• "An approach to preparing physicians for practice
  • that is fundamentally oriented to graduate outcome abilities
    • and organized around competencies
  • derived from an analysis of societal and patient needs.

It de-emphasizes [fixed] time-based training and promises greater accountability, flexibility and learner-centeredness”

Medically Underserved Areas/Populations and GME

Consistent with its mission to improve health care and population health, the ACGME seeks to enhance physician workforce development in communities that face physician shortages in various specialties.

As part of this effort, the ACGME developed a framework to encourage the development of graduate medical education (GME) that will result in enhanced access to and availability of health care in medically underserved areas (MUAs) and medically underserved populations (MUPs). Medically underserved areas and populations (MUAs/Ps) are places or communities in which groups of people have unmet health or health care needs.

This framework outlines initial actions addressing graduate medical education in MUAs/Ps.
Medically Underserved Areas and Populations

The following processes are available to obtain ACGME Rural Track Program (RTP) designation:

• Permanent complement increase and identification of new rural site(s) for an existing program
• Application for a new program*

*New programs may share resources and overlapping resident/fellow experiences with an already existing ACGME-accredited program. Requests for RTP designation during the program application process may identify an existing program as a Rural Track Related Program (definition available on the website; email muap@acgme.org with questions).
