VI.F. Clinical Experience and Education .....	50

48  
49 Emergency medical services is a clinical specialty that includes the care of  
50 patients in all environments outside of traditional medical care facilities, including  
51 clinics, offices, and hospitals. It includes evaluation and treatment of acute injury  
52 and illness in all age groups, planning and prevention, monitoring, and team  
53 oversight.

54  
55 **Int.C. Length of Educational Program**

56  
57 The educational program in emergency medical services must be 12 months.  
58 (Core)\*

59  
60 **I. Oversight**

61  
62 **I.A. Sponsoring Institution**

63  
64 *The Sponsoring Institution is the organization or entity that assumes the*  
65 *ultimate financial and academic responsibility for a program of graduate*  
66 *medical education consistent with the ACGME Institutional Requirements.*

67  
68 *When the Sponsoring Institution is not a rotation site for the program, the*  
69 *most commonly utilized site of clinical activity for the program is the*  
70 *primary clinical site.*

71  
**Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.**

72  
73 **I.A.1. The program must be sponsored by one ACGME-accredited**  
74 **Sponsoring Institution. (Core)**

75  
76 **I.B. Participating Sites**

77  
78 *A participating site is an organization providing educational experiences or*  
79 *educational assignments/rotations for fellows.*

80  
81 **I.B.1. The program, with approval of its Sponsoring Institution, must**  
82 **designate a primary clinical site. (Core)**

83  
84 **I.B.1.a) The Sponsoring Institution must also sponsor an Accreditation**  
85 **Council for Graduate Medical Education (ACGME)-accredited**  
86 **residency program in emergency medicine. (Core)**

87  
88 **I.B.2. There must be a program letter of agreement (PLA) between the**  
89 **program and each participating site that governs the relationship**

- 90 between the program and the participating site providing a required  
91 assignment. <sup>(Core)</sup>  
92
- 93 **I.B.2.a) The PLA must:**
- 94
- 95 **I.B.2.a).(1) be renewed at least every 10 years; and,** <sup>(Core)</sup>  
96
- 97 **I.B.2.a).(2) be approved by the designated institutional official**  
98 **(DIO).** <sup>(Core)</sup>  
99
- 100 **I.B.3. The program must monitor the clinical learning and working**  
101 **environment at all participating sites.** <sup>(Core)</sup>  
102
- 103 **I.B.3.a) At each participating site there must be one faculty member,**  
104 **designated by the program director, who is accountable for**  
105 **fellow education for that site, in collaboration with the**  
106 **program director.** <sup>(Core)</sup>  
107

**Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.**

**Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:**

- **Identifying the faculty members who will assume educational and supervisory responsibility for fellows**
- **Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows**
- **Specifying the duration and content of the educational experience**
- **Stating the policies and procedures that will govern fellow education during the assignment**

- 108
- 109 **I.B.4. The program director must submit any additions or deletions of**  
110 **participating sites routinely providing an educational experience,**  
111 **required for all fellows, of one month full time equivalent (FTE) or**  
112 **more through the ACGME's Accreditation Data System (ADS).** <sup>(Core)</sup>  
113
- 114 **I.B.5. The program should be based at the primary clinical site.** <sup>(Core)</sup>  
115
- 116 **I.B.6. Required rotations to participating sites that are geographically distant**  
117 **from the sponsoring institution should offer special resources unavailable**  
118 **locally that significantly augment the overall educational experience of the**  
119 **program.** <sup>(Detail)†</sup>

120  
121 I.B.7. The number and location of participating sites must not preclude the  
122 satisfactory participation by all residents in conferences and other  
123 educational experiences. <sup>(Core)</sup>  
124

125 **I.C. The program, in partnership with its Sponsoring Institution, must engage in**  
126 **practices that focus on mission-driven, ongoing, systematic recruitment**  
127 **and retention of a diverse and inclusive workforce of residents (if present),**  
128 **fellows, faculty members, senior administrative staff members, and other**  
129 **relevant members of its academic community.** <sup>(Core)</sup>  
130

**Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).**

131  
132 **I.D. Resources**

133  
134 **I.D.1. The program, in partnership with its Sponsoring Institution, must**  
135 **ensure the availability of adequate resources for fellow education.**  
136 <sup>(Core)</sup>  
137

138 I.D.1.a) Adult and pediatric medical transports in all types of settings  
139 outside of traditional medical care settings must be available. <sup>(Core)</sup>  
140

141 I.D.1.b) The following must be available at the primary clinical site or  
142 at a participating site: The primary clinical site must provide:  
143

144 I.D.1.b).(1) an emergency service that has access to adult and  
145 pediatric patients; <sup>(Core)</sup>  
146

147 I.D.1.b).(2) access to adult and pediatric inpatient facilities; <sup>(Core)</sup>  
148

149 I.D.1.b).(3) disaster planning and response programs; and, <sup>(Core)</sup>  
150

151 I.D.1.b).(4) two-way communications between the primary clinical site  
152 and surrounding medical transportation services for  
153 provision of direct medical oversight. <sup>(Core)</sup>  
154

155 I.D.1.c) The primary clinical site should organize and ensure provision of  
156 transportation for fellows to provide pre-hospital patient care. <sup>(Core)</sup>  
157

158 I.D.1.d) There should be an air medical evacuation and inter-facility  
159 transportation service accessible from the primary clinical site. <sup>(Core)</sup>  
160

161 I.D.1.e) There must be a patient population that includes patients of all  
162 ages and genders, with a wide variety of clinical problems, and  
163 that is adequate in number and variety to meet the educational

- 164 needs of the program. (Core)  
165  
166 I.D.1.f) Fellows must be provided with prompt, reliable systems for  
167 communication and interactions with supervisory physicians. (Core)  
168  
169 **I.D.2. The program, in partnership with its Sponsoring Institution, must**  
170 **ensure healthy and safe learning and working environments that**  
171 **promote fellow well-being and provide for:** (Core)  
172  
173 **I.D.2.a) access to food while on duty;** (Core)  
174  
175 **I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available**  
176 **and accessible for fellows with proximity appropriate for safe**  
177 **patient care;** (Core)  
178

**Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.**

- 179  
180 **I.D.2.c) clean and private facilities for lactation that have refrigeration**  
181 **capabilities, with proximity appropriate for safe patient care;**  
182 (Core)  
183

**Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).**

- 184  
185 **I.D.2.d) security and safety measures appropriate to the participating**  
186 **site; and,** (Core)  
187  
188 **I.D.2.e) accommodations for fellows with disabilities consistent with**  
189 **the Sponsoring Institution's policy.** (Core)  
190  
191 **I.D.3. Fellows must have ready access to subspecialty-specific and other**  
192 **appropriate reference material in print or electronic format. This**  
193 **must include access to electronic medical literature databases with**  
194 **full text capabilities.** (Core)  
195  
196 **I.D.4. The program's educational and clinical resources must be adequate**  
197 **to support the number of fellows appointed to the program.** (Core)  
198

199 I.E. *A fellowship program usually occurs in the context of many learners and*  
200 *other care providers and limited clinical resources. It should be structured*  
201 *to optimize education for all learners present.*

203 I.E.1. Fellows should contribute to the education of residents in core  
204 programs, if present. <sup>(Core)</sup>  
205

**Background and Intent:** The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

206  
207 II. Personnel

208  
209 II.A. Program Director

210  
211 II.A.1. There must be one faculty member appointed as program director  
212 with authority and accountability for the overall program, including  
213 compliance with all applicable program requirements. <sup>(Core)</sup>  
214

215 II.A.1.a) The Sponsoring Institution's Graduate Medical Education  
216 Committee (GMEC) must approve a change in program  
217 director. <sup>(Core)</sup>  
218

219 II.A.1.b) Final approval of the program director resides with the  
220 Review Committee. <sup>(Core)</sup>  
221

**Background and Intent:** While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual's responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director's nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

222  
223 II.A.2. The program director must be provided with support adequate for  
224 administration of the program based upon its size and configuration.  
225 <sup>(Core)</sup>  
226

227 II.A.2.a) ~~At a minimum, the program director must be provided with the~~  
228 ~~salary support required to devote 25 percent FTE of non-clinical~~  
229 ~~time to the administration of the program.~~ <sup>(Core)</sup>  
230

231 II.A.2.b) At a minimum, the program director must be provided with the  
232 dedicated time and support specified below for administration of  
233 the program. <sup>(Core)</sup>  
234

<u>Number of Approved Fellow Positions</u>	<u>Minimum Support Required (FTE)</u>
<u>0-3</u>	<u>0.2</u>
<u>4-6</u>	<u>0.2</u>
<u>7-9</u>	<u>0.3</u>
<u>10 or more</u>	<u>0.35</u>

235

**Background and Intent: Twenty percent FTE is defined as one day per week.**

**“Administrative time” is defined as non-clinical time spent meeting the responsibilities of the program director as detailed in requirements II.A.4.-II.A.4.a).(16).**

**The requirement does not address the source of funding required to provide the specified salary support.**

236

237

**II.A.3. Qualifications of the program director:**

238

239

**II.A.3.a) must include subspecialty expertise and qualifications acceptable to the Review Committee; <sup>(Core)</sup>**

240

241

242

**II.A.3.a).(1) This must include at least three years’ experience as a core physician faculty member in an ACGME-accredited emergency medicine program or emergency medical services program; <sup>(Core)(Detail)</sup>**

243

244

245

246

247

**II.A.3.b) must include current certification in the subspecialty for which they are the program director by the American Board of Emergency Medicine or by the American Osteopathic Board of Emergency Medicine, or subspecialty qualifications that are acceptable to the Review Committee; <sup>(Core)</sup>**

248

249

250

251

252

253

**II.A.3.c) continuation in his or her position for a length of time adequate to maintain continuity of leadership and program stability; <sup>(Detail)</sup>**

254

255

256

**II.A.3.d) must include current clinical activity in the practice of emergency medical services; and, <sup>(Core)</sup>**

257

258

259

**II.A.3.e) ~~must demonstrate an average of 10 hours per week of his or her professional effort dedicated to the fellowship, with sufficient time for administration of the program; and, <sup>(Core)</sup>~~**

260

261

262

263

**II.A.3.f) should include demonstrated participation in academic societies and educational programs designed to enhance his or her educational and administrative skills. <sup>(Core)(Detail)</sup>**

264

265

266

267

**II.A.4. Program Director Responsibilities**

268

269

**The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and**

270

271

272 promotion of fellows, and disciplinary action; supervision of fellows;  
273 and fellow education in the context of patient care. <sup>(Core)</sup>

274  
275 **II.A.4.a) The program director must:**

276  
277 **II.A.4.a).(1) be a role model of professionalism;** <sup>(Core)</sup>  
278

**Background and Intent:** The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

279  
280 **II.A.4.a).(2) design and conduct the program in a fashion**  
281 **consistent with the needs of the community, the**  
282 **mission(s) of the Sponsoring Institution, and the**  
283 **mission(s) of the program;** <sup>(Core)</sup>  
284

**Background and Intent:** The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

285  
286 **II.A.4.a).(3) administer and maintain a learning environment**  
287 **conducive to educating the fellows in each of the**  
288 **ACGME Competency domains;** <sup>(Core)</sup>  
289

**Background and Intent:** The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

290  
291 **II.A.4.a).(4) develop and oversee a process to evaluate candidates**  
292 **prior to approval as program faculty members for**  
293 **participation in the fellowship program education and**  
294 **at least annually thereafter, as outlined in V.B.;** <sup>(Core)</sup>  
295

296 **II.A.4.a).(5) have the authority to approve program faculty**  
297 **members for participation in the fellowship program**  
298 **education at all sites;** <sup>(Core)</sup>  
299

300 **II.A.4.a).(6) have the authority to remove program faculty**  
301 **members from participation in the fellowship program**  
302 **education at all sites;** <sup>(Core)</sup>

303  
304 **II.A.4.a).(7)** have the authority to remove fellows from supervising  
305 interactions and/or learning environments that do not  
306 meet the standards of the program; <sup>(Core)</sup>  
307

**Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.**

**There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.**

308  
309 **II.A.4.a).(8)** submit accurate and complete information required  
310 and requested by the DIO, GMEC, and ACGME; <sup>(Core)</sup>  
311

312 **II.A.4.a).(9)** provide applicants who are offered an interview with  
313 information related to the applicant's eligibility for the  
314 relevant subspecialty board examination(s); <sup>(Core)</sup>  
315

316 **II.A.4.a).(10)** provide a learning and working environment in which  
317 fellows have the opportunity to raise concerns and  
318 provide feedback in a confidential manner as  
319 appropriate, without fear of intimidation or retaliation;  
320 <sup>(Core)</sup>  
321

322 **II.A.4.a).(11)** ensure the program's compliance with the Sponsoring  
323 Institution's policies and procedures related to  
324 grievances and due process; <sup>(Core)</sup>  
325

326 **II.A.4.a).(12)** ensure the program's compliance with the Sponsoring  
327 Institution's policies and procedures for due process  
328 when action is taken to suspend or dismiss, not to  
329 promote, or not to renew the appointment of a fellow;  
330 <sup>(Core)</sup>  
331

**Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.**

332  
333 **II.A.4.a).(13)** ensure the program's compliance with the Sponsoring  
334 Institution's policies and procedures on employment  
335 and non-discrimination; <sup>(Core)</sup>  
336

337 **II.A.4.a).(13).(a)** Fellows must not be required to sign a non-  
338 competition guarantee or restrictive covenant.  
339 <sup>(Core)</sup>  
340

341 II.A.4.a).(14) document verification of program completion for all  
342 graduating fellows within 30 days; <sup>(Core)</sup>

343  
344 II.A.4.a).(15) provide verification of an individual fellow's  
345 completion upon the fellow's request, within 30 days;  
346 and, <sup>(Core)</sup>  
347

**Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.**

348  
349 II.A.4.a).(16) obtain review and approval of the Sponsoring  
350 Institution's DIO before submitting information or  
351 requests to the ACGME, as required in the Institutional  
352 Requirements and outlined in the ACGME Program  
353 Director's Guide to the Common Program  
354 Requirements. <sup>(Core)</sup>  
355

356 II.B. Faculty

357  
358 *Faculty members are a foundational element of graduate medical education*  
359 *– faculty members teach fellows how to care for patients. Faculty members*  
360 *provide an important bridge allowing fellows to grow and become practice*  
361 *ready, ensuring that patients receive the highest quality of care. They are*  
362 *role models for future generations of physicians by demonstrating*  
363 *compassion, commitment to excellence in teaching and patient care,*  
364 *professionalism, and a dedication to lifelong learning. Faculty members*  
365 *experience the pride and joy of fostering the growth and development of*  
366 *future colleagues. The care they provide is enhanced by the opportunity to*  
367 *teach. By employing a scholarly approach to patient care, faculty members,*  
368 *through the graduate medical education system, improve the health of the*  
369 *individual and the population.*

370  
371 *Faculty members ensure that patients receive the level of care expected*  
372 *from a specialist in the field. They recognize and respond to the needs of*  
373 *the patients, fellows, community, and institution. Faculty members provide*  
374 *appropriate levels of supervision to promote patient safety. Faculty*  
375 *members create an effective learning environment by acting in a*  
376 *professional manner and attending to the well-being of the fellows and*  
377 *themselves.*  
378

**Background and Intent: "Faculty" refers to the entire teaching force responsible for educating fellows. The term "faculty," including "core faculty," does not imply or require an academic appointment or salary support.**

379  
380 II.B.1. For each participating site, there must be a sufficient number of  
381 faculty members with competence to instruct and supervise all  
382 fellows at that location. <sup>(Core)</sup>

- 383  
 384 II.B.1.a) There must be at least two subspecialty physician faculty  
 385 members, in addition to the program director, who devote a  
 386 minimum of five hours per week of their time to supervision of the  
 387 fellows. <sup>(Core)</sup>  
 388  
 389 II.B.1.b) Consultants and/or program faculty members should be available  
 390 for consultation and academic lectures. <sup>(Detail)</sup>  
 391  
 392 II.B.1.b).(1) Consultants and/or program faculty members should  
 393 include those with special expertise in air medical services,  
 394 biostatistics, cardiology, critical care, disaster and mass  
 395 casualty incident management, epidemiology, forensics,  
 396 hazardous materials and mass exposure to toxins, mass  
 397 gatherings, neurology, pediatrics, pharmacology,  
 398 psychiatry, public health, pulmonary medicine,  
 399 resuscitation, toxicology, and trauma surgery. <sup>(Detail)</sup>

400  
 401 **II.B.2. Faculty members must:**

402  
 403 **II.B.2.a) be role models of professionalism;** <sup>(Core)</sup>

404  
 405 **II.B.2.b) demonstrate commitment to the delivery of safe, quality,**  
 406 **cost-effective, patient-centered care;** <sup>(Core)</sup>  
 407

**Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.**

- 408  
 409 **II.B.2.c) demonstrate a strong interest in the education of fellows;** <sup>(Core)</sup>  
 410  
 411 **II.B.2.d) devote sufficient time to the educational program to fulfill**  
 412 **their supervisory and teaching responsibilities;** <sup>(Core)</sup>  
 413  
 414 **II.B.2.e) administer and maintain an educational environment**  
 415 **conducive to educating fellows;** <sup>(Core)</sup>  
 416  
 417 **II.B.2.f) regularly participate in organized clinical discussions,**  
 418 **rounds, journal clubs, and conferences; and,** <sup>(Core)</sup>  
 419  
 420 **II.B.2.g) pursue faculty development designed to enhance their skills**  
 421 **at least annually.** <sup>(Core)</sup>  
 422

**Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be**

specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

423  
424 II.B.2.g).(1) Faculty members should participate in faculty development  
425 programs designed to enhance the effectiveness of their  
426 teaching. <sup>(Detail)</sup>  
427

428 **II.B.3. Faculty Qualifications**

429  
430 **II.B.3.a) Faculty members must have appropriate qualifications in**  
431 **their field and hold appropriate institutional appointments.**  
432 <sup>(Core)</sup>  
433

434 ~~II.B.3.a).(1) Program faculty members must have appropriate faculty~~  
435 ~~appointments at the medical school. <sup>(Core)</sup>~~  
436

437 **II.B.3.b) Subspecialty physician faculty members must:**

438  
439 **II.B.3.b).(1) have current certification in the subspecialty by the**  
440 **American Board of Emergency Medicine or the**  
441 **American Osteopathic Board of Emergency Medicine, or**  
442 **possess qualifications judged acceptable to the**  
443 **Review Committee. <sup>(Core)</sup>**  
444

445 **II.B.3.c) Any non-physician faculty members who participate in**  
446 **fellowship program education must be approved by the**  
447 **program director. <sup>(Core)</sup>**  
448

**Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.**

449  
450 **II.B.3.d) Any other specialty physician faculty members must have**  
451 **current certification in their specialty by the appropriate**  
452 **American Board of Medical Specialties (ABMS) member**  
453 **board or American Osteopathic Association (AOA) certifying**  
454 **board, or possess qualifications judged acceptable to the**  
455 **Review Committee. <sup>(Core)</sup>**  
456

457 **II.B.4. Core Faculty**

458  
459 **Core faculty members must have a significant role in the education**  
460 **and supervision of fellows and must devote a significant portion of**  
461 **their entire effort to fellow education and/or administration, and**  
462 **must, as a component of their activities, teach, evaluate, and provide**  
463 **formative feedback to fellows. <sup>(Core)</sup>**

**Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.**

465

466 **II.B.4.a) Core faculty members must be designated by the program**  
 467 **director.** <sup>(Core)</sup>

468

469 **II.B.4.b) Core faculty members must complete the annual ACGME**  
 470 **Faculty Survey.** <sup>(Core)</sup>

471

472 **II.B.4.c)** In addition to the program director there must be at least two core  
 473 physician faculty members with EMS board certification  
 474 ~~experience~~ whose practice makes them available for consultation  
 475 by fellows. <sup>(Core)</sup>~~(Detail)~~

476

477 **II.C. Program Coordinator**

478

479 **II.C.1. There must be a program coordinator.** <sup>(Core)</sup>

480

481 **II.C.2. The program coordinator must be provided with support adequate**  
 482 **for administration of the program based upon its size and**  
 483 **configuration.** <sup>(Core)</sup>

484

485 **II.C.2.a)** At a minimum, the program coordinator(s) must be supported at  
 486 20 percent FTE for the administration of the program. <sup>(Core)</sup>

487

**Background and Intent: Twenty percent FTE is defined as one day per week.**

**The requirement does not address the source of funding required to provide the specified salary support.**

**Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.**

**The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge of the ACGME and Program Requirements, policies, and procedures. Program coordinators assist the program director in accreditation efforts, educational programming, and support of fellows.**

**Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities**

for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

488  
489  
490  
491  
492  
493  
494

**II.D. Other Program Personnel**

The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. <sup>(Core)</sup>

**Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.**

495

509  
510

**III. Fellow Appointments**

**III.A. Eligibility Criteria**

**III.A.1. Eligibility Requirements – Fellowship Programs**

All required clinical education for entry into ACGME-accredited fellowship programs must be completed in an ACGME-accredited residency program, an AOA-approved residency program, a program with ACGME International (ACGME-I) Advanced Specialty Accreditation, or a Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of Canada (CFPC)-accredited residency program located in Canada. <sup>(Core)</sup>

**Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).**

511  
512  
513  
514  
515  
516  
517  
518  
519  
520  
521  
522  
523  
524  
525

**III.A.1.a) Fellowship programs must receive verification of each entering fellow's level of competence in the required field, upon matriculation, using ACGME, ACGME-I, or CanMEDS Milestones evaluations from the core residency program. <sup>(Core)</sup>**

**III.A.1.b) Prior to entry into the program fellows must have successfully completed a residency program that satisfies III.A.1., excluding transitional year programs. <sup>(Core)</sup>**

**III.A.1.c) Fellow Eligibility Exception**

**The Review Committee for Emergency Medicine will allow the following exception to the fellowship eligibility requirements:**

Specialty-Specific Background and Intent: When exercising the eligibility exception for an exceptionally qualified candidate seeking board certification, note that completion of an

ACGME-accredited fellowship program may not by itself be sufficient to meet the eligibility requirements for subspecialty certification. Direct contact with the applicable certifying board to determine an applicant's eligibility for certification is advised.

- 526  
527 **III.A.1.c).(1)** **An ACGME-accredited fellowship program may accept**  
528 **an exceptionally qualified international graduate**  
529 **applicant who does not satisfy the eligibility**  
530 **requirements listed in III.A.1., but who does meet all of**  
531 **the following additional qualifications and conditions:**  
532 **(Core)**  
533  
534 **III.A.1.c).(1).(a)** **evaluation by the program director and**  
535 **fellowship selection committee of the**  
536 **applicant's suitability to enter the program,**  
537 **based on prior training and review of the**  
538 **summative evaluations of training in the core**  
539 **specialty; and, (Core)**  
540  
541 **III.A.1.c).(1).(b)** **review and approval of the applicant's**  
542 **exceptional qualifications by the GMEC; and,**  
543 **(Core)**  
544  
545 **III.A.1.c).(1).(c)** **verification of Educational Commission for**  
546 **Foreign Medical Graduates (ECFMG)**  
547 **certification. (Core)**  
548  
549 **III.A.1.c).(2)** **Applicants accepted through this exception must have**  
550 **an evaluation of their performance by the Clinical**  
551 **Competency Committee within 12 weeks of**  
552 **matriculation. (Core)**  
553

**Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.**

**In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.**

- 554  
555 **III.B.** **The program director must not appoint more fellows than approved by the**  
556 **Review Committee. (Core)**  
557

558 III.B.1. All complement increases must be approved by the Review  
559 Committee. <sup>(Core)</sup>

560  
561 III.C. Fellow Transfers

562  
563 The program must obtain verification of previous educational experiences  
564 and a summative competency-based performance evaluation prior to  
565 acceptance of a transferring fellow, and Milestones evaluations upon  
566 matriculation. <sup>(Core)</sup>

567  
568 IV. Educational Program

569  
570 *The ACGME accreditation system is designed to encourage excellence and*  
571 *innovation in graduate medical education regardless of the organizational*  
572 *affiliation, size, or location of the program.*

573  
574 *The educational program must support the development of knowledgeable, skillful*  
575 *physicians who provide compassionate care.*

576  
577 *In addition, the program is expected to define its specific program aims consistent*  
578 *with the overall mission of its Sponsoring Institution, the needs of the community*  
579 *it serves and that its graduates will serve, and the distinctive capabilities of*  
580 *physicians it intends to graduate. While programs must demonstrate substantial*  
581 *compliance with the Common and subspecialty-specific Program Requirements, it*  
582 *is recognized that within this framework, programs may place different emphasis*  
583 *on research, leadership, public health, etc. It is expected that the program aims*  
584 *will reflect the nuanced program-specific goals for it and its graduates; for*  
585 *example, it is expected that a program aiming to prepare physician-scientists will*  
586 *have a different curriculum from one focusing on community health.*

587  
588 IV.A. The curriculum must contain the following educational components: <sup>(Core)</sup>

589  
590 IV.A.1. a set of program aims consistent with the Sponsoring Institution's  
591 mission, the needs of the community it serves, and the desired  
592 distinctive capabilities of its graduates; <sup>(Core)</sup>

593  
594 IV.A.1.a) The program's aims must be made available to program  
595 applicants, fellows, and faculty members. <sup>(Core)</sup>

596  
597 IV.A.2. competency-based goals and objectives for each educational  
598 experience designed to promote progress on a trajectory to  
599 autonomous practice in their subspecialty. These must be  
600 distributed, reviewed, and available to fellows and faculty members;  
601 <sup>(Core)</sup>

602  
603 IV.A.3. delineation of fellow responsibilities for patient care, progressive  
604 responsibility for patient management, and graded supervision in  
605 their subspecialty; <sup>(Core)</sup>

606

<b>Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical</b>
--

Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

607  
608  
609  
610

**IV.A.4. structured educational activities beyond direct patient care; and,**  
(Core)

**Background and Intent:** Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

611  
612  
613  
614  
615  
616

**IV.A.5. advancement of fellows' knowledge of ethical principles**  
foundational to medical professionalism. (Core)

**IV.B. ACGME Competencies**

**Background and Intent:** The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

617  
618  
619  
620  
621  
622  
623  
624  
625  
626  
627

**IV.B.1. The program must integrate the following ACGME Competencies**  
into the curriculum: (Core)

**IV.B.1.a) Professionalism**

Fellows must demonstrate a commitment to professionalism and an adherence to ethical principles. (Core)

**IV.B.1.b) Patient Care and Procedural Skills**

**Background and Intent:** Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs.* 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

628

851		<u>must occur bi-weekly, on average.</u> <sup>(Core)</sup>
852		
853	IV.C.3.c)	<u>Fellows must attend a minimum of three hours of departmental or</u>
854		<u>interdepartmental conferences per week, on average, dedicated to</u>
855		<u>EMS and developed by the program faculty members, which</u>
856		<u>may include conferences with EMS provider organizations and</u>
857		<u>EMS training programs. The curriculum must provide an average</u>
858		<u>of at least three hours per week of planned didactic experiences</u>
859		<u>developed by the program faculty members.</u> <sup>(Core)</sup>
860		
861	IV.C.3.c).(1)	Fellows must participate, on average, in at least 70 percent
862		of the planned didactic experiences offered. <sup>(Core)</sup>
863		
864	IV.C.3.c).(2)	Fellows must participate in planning and conducting
865		didactic experiences, and delivery of didactic experiences
866		to the core emergency medicine program. <sup>(Core)(Detail)</sup>
867		
868	IV.C.3.c).(3)	All planned didactic experiences must be supervised by
869		faculty members. <sup>(Detail)(Core)</sup>
870		
871	IV.C.3.c).(3).(a)	Each core physician faculty member must attend,
872		on average, at least 25 percent of planned didactic

- 873 experiences. <sup>(Core)(Detail)</sup>
- 874
- 875 IV.C.3.c).(3).(b) Faculty members must present more than 50
- 876 percent of planned didactic experiences. <sup>(Core)(Detail)</sup>
- 877
- 878 IV.C.4. Fellow Experiences
- 879
- 880 Fellows' experiences must include the following:
- 881
- 882 IV.C.4.a) 12 months as the primary or consulting physician responsible for
- 883 providing direct patient evaluation and management in the pre-
- 884 hospital setting, as well as supervision of care provided by all
- 885 allied health providers in the pre-hospital setting; <sup>(Core)</sup>
- 886
- 887 IV.C.4.b) experience with regional and state offices of emergency medical
- 888 services and other regulatory bodies that affect the care of
- 889 patients in the pre-hospital setting; <sup>(Core)</sup>
- 890
- 891 IV.C.4.c) ensure exposure and education in medical direction of air medical
- 892 transports or an experience that would include supervision of air
- 893 medical crews during medical transports; <sup>(Core)</sup>
- 894
- 895 IV.C.4.d) participating in administrative components of an emergency
- 896 medical services system to determine functioning, designs, and
- 897 processes to ensure quality of patient care in the pre-hospital
- 898 setting; <sup>(Core)</sup>
- 899
- 900 IV.C.4.e) providing exposure to clinical services in a variety of emergency
- 901 medical services systems, including third-service, and fire-based,
- 902 governmental, and for-profit services; <sup>(Core)</sup>
- 903
- 904 IV.C.4.f) providing direct medical oversight of patient care by emergency
- 905 medical services personnel, including; <sup>(Core)</sup>
- 906
- 907 IV.C.4.f).(1) experience in an emergency communications center and a
- 908 public safety answering point utilizing emergency medical
- 909 dispatching guidelines. <sup>(Core)</sup>
- 910
- 911 IV.C.4.g) providing evaluations and management of both adult and pediatric
- 912 aged acutely-ill and injured patients in the pre-hospital setting; <sup>(Core)</sup>
- 913
- 914 IV.C.4.h) a unified educational experience. <sup>(Detail)</sup>
- 915
- 916 IV.C.5. Fellow experiences with key index procedures must at least meet the
- 917 procedural minimums defined by the Review Committee where indicated.
- 918 <sup>(Core)</sup>
- 919
- 920 **IV.D. Scholarship**
- 921
- 922 ***Medicine is both an art and a science. The physician is a humanistic***
- 923 ***scientist who cares for patients. This requires the ability to think critically,***

924 *evaluate the literature, appropriately assimilate new knowledge, and*  
925 *practice lifelong learning. The program and faculty must create an*  
926 *environment that fosters the acquisition of such skills through fellow*  
927 *participation in scholarly activities as defined in the subspecialty-specific*  
928 *Program Requirements. Scholarly activities may include discovery,*  
929 *integration, application, and teaching.*

930  
931 *The ACGME recognizes the diversity of fellowships and anticipates that*  
932 *programs prepare physicians for a variety of roles, including clinicians,*  
933 *scientists, and educators. It is expected that the program's scholarship will*  
934 *reflect its mission(s) and aims, and the needs of the community it serves.*  
935 *For example, some programs may concentrate their scholarly activity on*  
936 *quality improvement, population health, and/or teaching, while other*  
937 *programs might choose to utilize more classic forms of biomedical*  
938 *research as the focus for scholarship.*

939  
940 **IV.D.1. Program Responsibilities**

941  
942 **IV.D.1.a) The program must demonstrate evidence of scholarly**  
943 **activities, consistent with its mission(s) and aims. (Core)**

944  
945 **IV.D.1.b) The program in partnership with its Sponsoring Institution,**  
946 **must allocate adequate resources to facilitate fellow and**  
947 **faculty involvement in scholarly activities. (Core)**

948  
949 **IV.D.2. Faculty Scholarly Activity**

950  
951 **IV.D.2.a) Among their scholarly activity, programs must demonstrate**  
952 **accomplishments in at least three of the following domains:**  
953 **(Core)**

- 954  
955
  - 956 • **Research in basic science, education, translational**
  - 957 **science, patient care, or population health**
  - 958 • **Peer-reviewed grants**
  - 959 • **Quality improvement and/or patient safety initiatives**
  - 960 • **Systematic reviews, meta-analyses, review articles,**
  - 961 **chapters in medical textbooks, or case reports**
  - 962 • **Creation of curricula, evaluation tools, didactic**
  - 963 **educational activities, or electronic educational**
  - 964 **materials**
  - 965 • **Contribution to professional committees, educational**
  - 966 **organizations, or editorial boards**
  - 967 • **Innovations in education**

968 **IV.D.2.b) The program must demonstrate dissemination of scholarly**  
969 **activity within and external to the program by the following**  
970 **methods:**

**Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program's effectiveness in the creation of an**

**environment of inquiry that advances the fellows' scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.**

972		
973	<b>IV.D.2.b).(1)</b>	<b>faculty participation in grand rounds, posters, workshops, quality improvement presentations, podium presentations, grant leadership, non-peer-reviewed print/electronic resources, articles or publications, book chapters, textbooks, webinars, service on professional committees, or serving as a journal reviewer, journal editorial board member, or editor;</b> (Outcome)

991		
992		
993		
994	IV.D.2.b).(2).(b).(i)	At minimum, this must include one scientific peer-reviewed publication for every two core physician faculty members per year, averaged over the previous five-year period. (Core)(Detail)
995		
996		
997		
998		
999		
1000	<b>IV.D.3.</b>	<b>Fellow Scholarly Activity</b>
1001		
1002	IV.D.3.a)	The curriculum must advance fellows' knowledge of the basic principles of research, including how research is conducted, evaluated, explained to patients, and applied to patient care. (Core)
1003		
1004		
1005		
1006	IV.D.3.b)	Fellows must participate in scholarly activity that includes at least one of the following:
1007		
1008		
1009	IV.D.3.b).(1)	peer-reviewed funding and research; (Outcome)
1010		
1011	IV.D.3.b).(2)	publication of original research or review articles; or, (Outcome)
1012		
1013		
1014	IV.D.3.b).(3)	presentations at local, regional, or national professional and scientific society meetings. (Outcome)
1015		

1016  
1017 **IV.E. Fellowship programs may assign fellows to engage in the independent**  
1018 **practice of their core specialty during their fellowship program.**

1019  
1020 **IV.E.1. If programs permit their fellows to utilize the independent practice**  
1021 **option, it must not exceed 20 percent of their time per week or 10**  
1022 **weeks of an academic year.** <sup>(Core)</sup>

**Background and Intent: Fellows who have previously completed residency programs have demonstrated sufficient competence to enter autonomous practice within their core specialty. This option is designed to enhance fellows' maturation and competence in their core specialty. This enables fellows to occupy a dual role in the health system: as learners in their subspecialty, and as credentialed practitioners in their core specialty. Hours worked in independent practice during fellowship still fall under the clinical and educational work hour limits. See Program Directors' Guide for more details.**

1024  
1025 **IV.E.2. Fellows should maintain their primary Board skills during their fellowships.**  
1026 <sup>(Core)(Detail)</sup> [Moved from IV.C.5.]

1027  
1028 **IV.E.2.a) ~~Fellows must not provide more than 12 hours per week of clinical~~**  
1029 **~~practice unrelated to emergency medical services averaged over~~**  
1030 **~~four weeks.~~** <sup>(Detail)</sup> [Moved from IV.C.5.a)]

**Specialty-Specific Background and Intent: The Review Committee for Emergency Medicine considers the requirements above to be exclusive of moonlighting. Additional time spent by the fellows in the engagement of independent practice of their core specialty beyond the maximum stated in the Requirements will be considered moonlighting, and will be counted toward the 80-hour maximum clinical time per week.**

1032  
1033 **V. Evaluation**

1034  
1035 **V.A. Fellow Evaluation**

1036  
1037 **V.A.1. Feedback and Evaluation**

**Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.**

**Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:**

- **fellows identify their strengths and weaknesses and target areas that need work**
- **program directors and faculty members recognize where fellows are struggling and address problems immediately**

**Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.**

**End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.**

**Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.**

- 1039  
1040 **V.A.1.a) Faculty members must directly observe, evaluate, and**  
1041 **frequently provide feedback on fellow performance during**  
1042 **each rotation or similar educational assignment. (Core)**  
1043  
1044 **V.A.1.a).(1) Faculty members must review evaluations with each fellow**  
1045 **at least every six months. (Core)**  
1046

**Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.**

- 1047  
1048 **V.A.1.b) Evaluation must be documented at the completion of the**  
1049 **assignment. (Core)**  
1050  
1051 **V.A.1.b).(1) For block rotations of greater than three months in**  
1052 **duration, evaluation must be documented at least**  
1053 **every three months. (Core)**  
1054  
1055 **V.A.1.b).(2) Longitudinal experiences such as continuity clinic in**  
1056 **the context of other clinical responsibilities must be**  
1057 **evaluated at least every three months and at**  
1058 **completion. (Core)**  
1059  
1060 **V.A.1.c) The program must provide an objective performance**  
1061 **evaluation based on the Competencies and the subspecialty-**  
1062 **specific Milestones, and must: (Core)**  
1063  
1064 **V.A.1.c).(1) use multiple evaluators (e.g., faculty members, peers,**  
1065 **patients, self, and other professional staff members);**  
1066 **and, (Core)**  
1067  
1068 **V.A.1.c).(2) provide that information to the Clinical Competency**  
1069 **Committee for its synthesis of progressive fellow**

1070  
1071  
1072

performance and improvement toward unsupervised practice. <sup>(Core)</sup>

**Background and Intent:** The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

1073  
1074  
1075  
1076  
1077  
1078  
1079  
1080  
1081  
1082  
1083  
1084  
1085  
1086  
1087  
1088

- V.A.1.d)** The program director or their designee, with input from the Clinical Competency Committee, must:
- V.A.1.d).(1)** meet with and review with each fellow their documented semi-annual evaluation of performance, including progress along the subspecialty-specific Milestones. <sup>(Core)</sup>
- V.A.1.d).(2)** assist fellows in developing individualized learning plans to capitalize on their strengths and identify areas for growth; and, <sup>(Core)</sup>
- V.A.1.d).(3)** develop plans for fellows failing to progress, following institutional policies and procedures. <sup>(Core)</sup>

**Background and Intent:** Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

1089  
1090  
1091  
1092  
1093

- V.A.1.e)** At least annually, there must be a summative evaluation of each fellow that includes their readiness to progress to the next year of the program, if applicable. <sup>(Core)</sup>

1094	<b>V.A.1.f)</b>	<b>The evaluations of a fellow’s performance must be accessible for review by the fellow. (Core)</b>

1123		
1124		
1125	<b>V.A.3.</b>	<b>A Clinical Competency Committee must be appointed by the program director. (Core)</b>
1126		
1127		
1128	<b>V.A.3.a)</b>	<b>At a minimum the Clinical Competency Committee must include three members, at least one of whom is a core faculty member. Members must be faculty members from the same program or other programs, or other health professionals who have extensive contact and experience with the program’s fellows. (Core)</b>
1129		
1130		
1131		
1132		
1133		
1134		
1135	<b>V.A.3.b)</b>	<b>The Clinical Competency Committee must:</b>
1136		
1137	<b>V.A.3.b).(1)</b>	<b>review all fellow evaluations at least semi-annually; (Core)</b>
1138		
1139		
1140	<b>V.A.3.b).(2)</b>	<b>determine each fellow’s progress on achievement of the subspecialty-specific Milestones; and, (Core)</b>
1141		
1142		

1143 **V.A.3.b).(3)** meet prior to the fellows' semi-annual evaluations and  
1144 advise the program director regarding each fellow's  
1145 progress. <sup>(Core)</sup>  
1146

1147 **V.B. Faculty Evaluation**  
1148

1149 **V.B.1.** The program must have a process to evaluate each faculty  
1150 member's performance as it relates to the educational program at  
1151 least annually. <sup>(Core)</sup>  
1152

**Background and Intent:** The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

1153 **V.B.1.a)** This evaluation must include a review of the faculty member's  
1154 clinical teaching abilities, engagement with the educational  
1155 program, participation in faculty development related to their  
1156 skills as an educator, clinical performance, professionalism,  
1157 and scholarly activities. <sup>(Core)</sup>  
1158

1159 **V.B.1.b)** This evaluation must include written, confidential evaluations  
1160 by the fellows. <sup>(Core)</sup>  
1161

1162 **V.B.2.** Faculty members must receive feedback on their evaluations at least  
1163 annually. <sup>(Core)</sup>  
1164

1165 **V.B.3.** Results of the faculty educational evaluations should be  
1166 incorporated into program-wide faculty development plans. <sup>(Core)</sup>  
1167  
1168

**Background and Intent:** The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

- 1169  
1170 **V.C. Program Evaluation and Improvement**  
1171  
1172 **V.C.1. The program director must appoint the Program Evaluation**  
1173 **Committee to conduct and document the Annual Program**  
1174 **Evaluation as part of the program’s continuous improvement**  
1175 **process. (Core)**  
1176  
1177 **V.C.1.a) The Program Evaluation Committee must be composed of at**  
1178 **least two program faculty members, at least one of whom is a**  
1179 **core faculty member, and at least one fellow. (Core)**  
1180  
1181 **V.C.1.b) Program Evaluation Committee responsibilities must include:**  
1182  
1183 **V.C.1.b).(1) acting as an advisor to the program director, through**  
1184 **program oversight; (Core)**  
1185  
1186 **V.C.1.b).(2) review of the program’s self-determined goals and**  
1187 **progress toward meeting them; (Core)**  
1188  
1189 **V.C.1.b).(3) guiding ongoing program improvement, including**  
1190 **development of new goals, based upon outcomes;**  
1191 **and, (Core)**  
1192  
1193 **V.C.1.b).(4) review of the current operating environment to identify**  
1194 **strengths, challenges, opportunities, and threats as**  
1195 **related to the program’s mission and aims. (Core)**  
1196

**Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program’s progress toward achievement of its goals and aims.**

- 1197  
1198 **V.C.1.c) The Program Evaluation Committee should consider the**

<p><b>Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective,</b></p>
--

comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

- V.C.3.d)** For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial oral exam, in the preceding six years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)
- 1301  
1302  
1303
- V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program whose graduates over the time period specified in the requirement have achieved an 80 percent pass rate will have

1304  
1305  
1306

met this requirement, no matter the percentile rank of the program for pass rate in that subspecialty. (Outcome)

**Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.**

**There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.**

1307  
1308  
1309  
1310  
1311

**V.C.3.f)**

**Programs must report, in ADS, board certification status annually for the cohort of board-eligible fellows that graduated seven years earlier. (Core)**

**Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.**

**The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.**

**In the future, the ACGME may establish parameters related to ultimate board certification rates.**

## **VI. The Learning and Working Environment**

***Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:***

- ***Excellence in the safety and quality of care rendered to patients by fellows today***
- ***Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice***
- ***Excellence in professionalism through faculty modeling of:***
  - ***the effacement of self-interest in a humanistic environment that supports the professional development of physicians***
  - ***the joy of curiosity, problem-solving, intellectual rigor, and discovery***

1330  
1331  
1332  
1333

- ***Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team***

**Background and Intent:** The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

**VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability**

**VI.A.1. Patient Safety and Quality Improvement**

***All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.***

***Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating fellows will apply these skills to critique their future unsupervised practice and effect quality improvement measures.***

1355 *It is necessary for fellows and faculty members to consistently work*  
1356 *in a well-coordinated manner with other health care professionals to*  
1357 *achieve organizational patient safety goals.*

1358  
1359 **VI.A.1.a) Patient Safety**

1360  
1361 **VI.A.1.a).(1) Culture of Safety**

1362  
1363 *A culture of safety requires continuous identification*  
1364 *of vulnerabilities and a willingness to transparently*  
1365 *deal with them. An effective organization has formal*  
1366 *mechanisms to assess the knowledge, skills, and*  
1367 *attitudes of its personnel toward safety in order to*  
1368 *identify areas for improvement.*

1369  
1370 **VI.A.1.a).(1).(a)** The program, its faculty, residents, and fellows  
1371 must actively participate in patient safety  
1372 systems and contribute to a culture of safety.  
1373 (Core)

1374  
1375 **VI.A.1.a).(1).(b)** The program must have a structure that  
1376 promotes safe, interprofessional, team-based  
1377 care. (Core)

1378  
1379 **VI.A.1.a).(2) Education on Patient Safety**

1380  
1381 Programs must provide formal educational activities  
1382 that promote patient safety-related goals, tools, and  
1383 techniques. (Core)

**Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.**

1385  
1386 **VI.A.1.a).(3) Patient Safety Events**

1387  
1388 *Reporting, investigation, and follow-up of adverse*  
1389 *events, near misses, and unsafe conditions are pivotal*  
1390 *mechanisms for improving patient safety, and are*  
1391 *essential for the success of any patient safety*  
1392 *program. Feedback and experiential learning are*  
1393 *essential to developing true competence in the ability*  
1394 *to identify causes and institute sustainable systems-*  
1395 *based changes to ameliorate patient safety*  
1396 *vulnerabilities.*

1397  
1398 **VI.A.1.a).(3).(a)** Residents, fellows, faculty members, and other  
1399 clinical staff members must:

1400  
1401 **VI.A.1.a).(3).(a).(i)** know their responsibilities in reporting  
1402 patient safety events at the clinical site;

1484		<i>Supervision in the setting of graduate medical education provides safe and effective care to patients; ensures each fellow's development of the skills, knowledge, and attitudes required to enter the unsupervised practice of medicine; and establishes a foundation for continued professional growth.</i>
1485		
1486		
1487		
1488		
1489		
1490	VI.A.2.a).(1)	Each patient must have an identifiable and appropriately-credentialed and privileged attending physician (or licensed independent practitioner as specified by the applicable Review Committee) who is responsible and accountable for the patient's care. <sup>(Core)</sup>
1491		
1492		
1493		
1494		
1495		
1496		
1497	VI.A.2.a).(1).(a)	This information must be available to fellows, faculty members, other members of the health care team, and patients. <sup>(Core)</sup>
1498		
1499		
1500		
1501	VI.A.2.a).(1).(b)	Fellows and faculty members must inform each patient of their respective roles in that patient's care when providing direct patient care. <sup>(Core)</sup>
1502		
1503		
1504		

1505 VI.A.2.b) *Supervision may be exercised through a variety of methods.*  
 1506 *For many aspects of patient care, the supervising physician*  
 1507 *may be a more advanced fellow. Other portions of care*  
 1508 *provided by the fellow can be adequately supervised by the*  
 1509 *appropriate availability of the supervising faculty member or*  
 1510 *fellow, either on site or by means of telecommunication*  
 1511 *technology. Some activities require the physical presence of*  
 1512 *the supervising faculty member. In some circumstances,*  
 1513 *supervision may include post-hoc review of fellow-delivered*  
 1514 *care with feedback.*  
 1515

**Background and Intent:** Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

1516  
 1517 VI.A.2.b).(1) The program must demonstrate that the appropriate  
 1518 level of supervision in place for all fellows is based on  
 1519 each fellow’s level of training and ability, as well as  
 1520 patient complexity and acuity. Supervision may be  
 1521 exercised through a variety of methods, as appropriate  
 1522 to the situation. <sup>(Core)</sup>  
 1523  
 1524 VI.A.2.b).(2) The program must define when physical presence of a  
 1525 supervising physician is required. <sup>(Core)</sup>  
 1526  
 1527 VI.A.2.c) Levels of Supervision  
 1528  
 1529 To promote appropriate fellow supervision while providing  
 1530 for graded authority and responsibility, the program must use  
 1531 the following classification of supervision: <sup>(Core)</sup>  
 1532  
 1533 VI.A.2.c).(1) Direct Supervision:  
 1534  
 1535 VI.A.2.c).(1).(a) the supervising physician is physically present  
 1536 with the fellow during the key portions of the  
 1537 patient interaction; or, <sup>(Core)</sup>  
 1538  
 1539 VI.A.2.c).(1).(b) the supervising physician and/or patient is not  
 1540 physically present with the fellow and the  
 1541 supervising physician is concurrently  
 1542 monitoring the patient care through appropriate  
 1543 telecommunication technology. <sup>(Core)</sup>  
 1544  
 1545 VI.A.2.c).(1).(b).(i) The program must have clear guidelines  
 1546 that delineate which Competencies must be

1547 met to determine when a fellow can  
1548 progress to be supervised indirectly. (Core)  
1549

Specialty-Specific Background and Intent: When delineating the Competencies necessary for fellow progression to be supervised indirectly, the Review Committee suggests the Competencies include Milestones or other program-derived assessments.

1550  
1551 VI.A.2.c).(1).(b).(ii) The program director must ensure that clear  
1552 expectations exist and are communicated to  
1553 the fellows, and that these expectations  
1554 outline specific situations in which a fellow  
1555 would still require direct supervision. (Core)  
1556

1557 **VI.A.2.c).(2) Indirect Supervision: the supervising physician is not**  
1558 **providing physical or concurrent visual or audio**  
1559 **supervision but is immediately available to the fellow**  
1560 **for guidance and is available to provide appropriate**  
1561 **direct supervision. (Core)**  
1562

1563 **VI.A.2.c).(3) Oversight – the supervising physician is available to**  
1564 **provide review of procedures/encounters with**  
1565 **feedback provided after care is delivered. (Core)**  
1566

1567 **VI.A.2.d) The privilege of progressive authority and responsibility,**  
1568 **conditional independence, and a supervisory role in patient**  
1569 **care delegated to each fellow must be assigned by the**  
1570 **program director and faculty members. (Core)**  
1571

1572 **VI.A.2.d).(1) The program director must evaluate each fellow’s**  
1573 **abilities based on specific criteria, guided by the**  
1574 **Milestones. (Core)**  
1575

1576 **VI.A.2.d).(2) Faculty members functioning as supervising**  
1577 **physicians must delegate portions of care to fellows**  
1578 **based on the needs of the patient and the skills of**  
1579 **each fellow. (Core)**  
1580

1581 **VI.A.2.d).(3) Fellows should serve in a supervisory role to junior**  
1582 **fellows and residents in recognition of their progress**  
1583 **toward independence, based on the needs of each**  
1584 **patient and the skills of the individual resident or**  
1585 **fellow. (Detail)**  
1586

1587 **VI.A.2.e) Programs must set guidelines for circumstances and events**  
1588 **in which fellows must communicate with the supervising**  
1589 **faculty member(s). (Core)**  
1590

1591 **VI.A.2.e).(1) Each fellow must know the limits of their scope of**  
1592 **authority, and the circumstances under which the**  
1593 **fellow is permitted to act with conditional**  
1594 **independence. (Outcome)**

1595

**Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.**

1596

1597

**VI.A.2.f) Faculty supervision assignments must be of sufficient duration to assess the knowledge and skills of each fellow and to delegate to the fellow the appropriate level of patient care authority and responsibility. (Core)**

1598

1599

1600

1601

1602

**VI.B. Professionalism**

1603

1604

**VI.B.1. Programs, in partnership with their Sponsoring Institutions, must educate fellows and faculty members concerning the professional responsibilities of physicians, including their obligation to be appropriately rested and fit to provide the care required by their patients. (Core)**

1605

1606

1607

1608

1609

1610

**VI.B.2. The learning objectives of the program must:**

1611

1612

**VI.B.2.a) be accomplished through an appropriate blend of supervised patient care responsibilities, clinical teaching, and didactic educational events; (Core)**

1613

1614

1615

1616

**VI.B.2.b) be accomplished without excessive reliance on fellows to fulfill non-physician obligations; and, (Core)**

1617

1618

**Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.**

1619

1620

**VI.B.2.c) ensure manageable patient care responsibilities. (Core)**

1621

**Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.**

1622

1623 VI.B.3. The program director, in partnership with the Sponsoring Institution,  
1624 must provide a culture of professionalism that supports patient  
1625 safety and personal responsibility. <sup>(Core)</sup>  
1626

1627 VI.B.4. Fellows and faculty members must demonstrate an understanding  
1628 of their personal role in the:  
1629

1630 VI.B.4.a) provision of patient- and family-centered care; <sup>(Outcome)</sup>  
1631

1632 VI.B.4.b) safety and welfare of patients entrusted to their care,  
1633 including the ability to report unsafe conditions and adverse  
1634 events; <sup>(Outcome)</sup>  
1635

**Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.**

1636 VI.B.4.c) assurance of their fitness for work, including: <sup>(Outcome)</sup>  
1637  
1638

**Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.**

1639 VI.B.4.c).(1) management of their time before, during, and after  
1640 clinical assignments; and, <sup>(Outcome)</sup>  
1641

1642 VI.B.4.c).(2) recognition of impairment, including from illness,  
1643 fatigue, and substance use, in themselves, their peers,  
1644 and other members of the health care team. <sup>(Outcome)</sup>  
1645

1646 VI.B.4.d) commitment to lifelong learning; <sup>(Outcome)</sup>  
1647

1648 VI.B.4.e) monitoring of their patient care performance improvement  
1649 indicators; and, <sup>(Outcome)</sup>  
1650

1651 VI.B.4.f) accurate reporting of clinical and educational work hours,  
1652 patient outcomes, and clinical experience data. <sup>(Outcome)</sup>  
1653

1654 VI.B.5. All fellows and faculty members must demonstrate responsiveness  
1655 to patient needs that supersedes self-interest. This includes the  
1656 recognition that under certain circumstances, the best interests of  
1657 the patient may be served by transitioning that patient's care to  
1658 another qualified and rested provider. <sup>(Outcome)</sup>  
1659

1660 VI.B.6. Programs, in partnership with their Sponsoring Institutions, must  
1661 provide a professional, equitable, respectful, and civil environment  
1662 that is free from discrimination, sexual and other forms of  
1663

1664 harassment, mistreatment, abuse, or coercion of students, fellows,  
1665 faculty, and staff. <sup>(Core)</sup>

1666  
1667 **VI.B.7.** Programs, in partnership with their Sponsoring Institutions, should  
1668 have a process for education of fellows and faculty regarding  
1669 unprofessional behavior and a confidential process for reporting,  
1670 investigating, and addressing such concerns. <sup>(Core)</sup>

1671  
1672 **VI.C.** Well-Being

1673  
1674 *Psychological, emotional, and physical well-being are critical in the*  
1675 *development of the competent, caring, and resilient physician and require*  
1676 *proactive attention to life inside and outside of medicine. Well-being*  
1677 *requires that physicians retain the joy in medicine while managing their*  
1678 *own real life stresses. Self-care and responsibility to support other*  
1679 *members of the health care team are important components of*  
1680 *professionalism; they are also skills that must be modeled, learned, and*  
1681 *nurtured in the context of other aspects of fellowship training.*

1682  
1683 *Fellows and faculty members are at risk for burnout and depression.*  
1684 *Programs, in partnership with their Sponsoring Institutions, have the same*  
1685 *responsibility to address well-being as other aspects of resident*  
1686 *competence. Physicians and all members of the health care team share*  
1687 *responsibility for the well-being of each other. For example, a culture which*  
1688 *encourages covering for colleagues after an illness without the expectation*  
1689 *of reciprocity reflects the ideal of professionalism. A positive culture in a*  
1690 *clinical learning environment models constructive behaviors, and prepares*  
1691 *fellows with the skills and attitudes needed to thrive throughout their*  
1692 *careers.*

**Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.**

**As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.**

1694  
1695 **VI.C.1.** The responsibility of the program, in partnership with the  
1696 Sponsoring Institution, to address well-being must include:

1697  
1698 **VI.C.1.a)** efforts to enhance the meaning that each fellow finds in the  
1699 experience of being a physician, including protecting time  
1700 with patients, minimizing non-physician obligations,

1701 providing administrative support, promoting progressive  
1702 autonomy and flexibility, and enhancing professional  
1703 relationships; <sup>(Core)</sup>

1704  
1705 VI.C.1.b) attention to scheduling, work intensity, and work  
1706 compression that impacts fellow well-being; <sup>(Core)</sup>

1707  
1708 VI.C.1.c) evaluating workplace safety data and addressing the safety of  
1709 fellows and faculty members; <sup>(Core)</sup>

**Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.**

1711  
1712 VI.C.1.d) policies and programs that encourage optimal fellow and  
1713 faculty member well-being; and, <sup>(Core)</sup>

**Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.**

1715  
1716 VI.C.1.d).(1) Fellows must be given the opportunity to attend  
1717 medical, mental health, and dental care appointments,  
1718 including those scheduled during their working hours.  
1719 <sup>(Core)</sup>

**Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.**

1721  
1722 VI.C.1.e) attention to fellow and faculty member burnout, depression,  
1723 and substance use disorder. The program, in partnership with  
1724 its Sponsoring Institution, must educate faculty members and  
1725 fellows in identification of the symptoms of burnout,  
1726 depression, and substance use disorder, including means to  
1727 assist those who experience these conditions. Fellows and  
1728 faculty members must also be educated to recognize those  
1729 symptoms in themselves and how to seek appropriate care.  
1730 The program, in partnership with its Sponsoring Institution,  
1731 must: <sup>(Core)</sup>

**Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance use disorder. Materials and more information are available on the Physician**

Well-being section of the ACGME website (<http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being>).

1733  
1734  
1735  
1736  
1737  
1738  
1739  
1740  
1741

VI.C.1.e).(1) encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another fellow, resident, or faculty member may be displaying signs of burnout, depression, a substance use disorder, suicidal ideation, or potential for violence;  
(Core)

**Background and Intent:** Individuals experiencing burnout, depression, substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

1742

1745  
1746  
1747  
1748  
1749  
1750

VI.C.1.e).(2) provide access to appropriate tools for self-screening; and,  
(Core)

VI.C.1.e).(3) provide access to confidential, affordable mental health assessment, counseling, and treatment, including access to urgent and emergent care 24 hours a day, seven days a week.  
(Core)

**Background and Intent:** The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

1751  
1752  
1753  
1754  
1755  
1756

VI.C.2. There are circumstances in which fellows may be unable to attend work, including but not limited to fatigue, illness, family emergencies, and parental leave. Each program must allow an appropriate length of absence for fellows unable to perform their patient care responsibilities.  
(Core)

- 1757  
1758 **VI.C.2.a)**                    **The program must have policies and procedures in place to**  
1759                                    **ensure coverage of patient care.** <sup>(Core)</sup>  
1760  
1761 **VI.C.2.b)**                    **These policies must be implemented without fear of negative**  
1762                                    **consequences for the fellow who is or was unable to provide**  
1763                                    **the clinical work.** <sup>(Core)</sup>  
1764

**Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.**

- 1765  
1766 **VI.D.                    Fatigue Mitigation**  
1767  
1768 **VI.D.1.                    Programs must:**  
1769  
1770 **VI.D.1.a)**                    **educate all faculty members and fellows to recognize the**  
1771                                    **signs of fatigue and sleep deprivation;** <sup>(Core)</sup>  
1772  
1773 **VI.D.1.b)**                    **educate all faculty members and fellows in alertness**  
1774                                    **management and fatigue mitigation processes; and,** <sup>(Core)</sup>  
1775  
1776 **VI.D.1.c)**                    **encourage fellows to use fatigue mitigation processes to**  
1777                                    **manage the potential negative effects of fatigue on patient**  
1778                                    **care and learning.** <sup>(Detail)</sup>  
1779

**Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.**

**This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.**

- 1780  
1781 **VI.D.2.**                    **Each program must ensure continuity of patient care, consistent**  
1782                                    **with the program’s policies and procedures referenced in VI.C.2–**  
1783                                    **VI.C.2.b), in the event that a fellow may be unable to perform their**  
1784                                    **patient care responsibilities due to excessive fatigue.** <sup>(Core)</sup>  
1785  
1786 **VI.D.3.**                    **The program, in partnership with its Sponsoring Institution, must**  
1787                                    **ensure adequate sleep facilities and safe transportation options for**  
1788                                    **fellows who may be too fatigued to safely return home.** <sup>(Core)</sup>

1789  
 1790 **VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care**  
 1791  
 1792 **VI.E.1. Clinical Responsibilities**  
 1793  
 1794 **The clinical responsibilities for each fellow must be based on PGY**  
 1795 **level, patient safety, fellow ability, severity and complexity of patient**  
 1796 **illness/condition, and available support services. (Core)**  
 1797

**Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.**

1798  
 1799 **VI.E.2. Teamwork**  
 1800  
 1801 **Fellows must care for patients in an environment that maximizes**  
 1802 **communication. This must include the opportunity to work as a**  
 1803 **member of effective interprofessional teams that are appropriate to**  
 1804 **the delivery of care in the subspecialty and larger health system.**  
 1805 **(Core)**  
 1806  
 1807 **VI.E.2.a)** Contributors to effective interprofessional teams may include  
 1808 consulting physicians, paramedics, emergency medical  
 1809 technicians, nurses, firefighters, police officers, and other  
 1810 professional and paraprofessional personnel involved in the  
 1811 assessment and treatment of patients. **(Detail)**  
 1812  
 1813 **VI.E.3. Transitions of Care**  
 1814  
 1815 **VI.E.3.a)** **Programs must design clinical assignments to optimize**  
 1816 **transitions in patient care, including their safety, frequency,**  
 1817 **and structure. (Core)**  
 1818  
 1819 **VI.E.3.b)** **Programs, in partnership with their Sponsoring Institutions,**  
 1820 **must ensure and monitor effective, structured hand-over**  
 1821 **processes to facilitate both continuity of care and patient**  
 1822 **safety. (Core)**  
 1823  
 1824 **VI.E.3.c)** **Programs must ensure that fellows are competent in**  
 1825 **communicating with team members in the hand-over process.**  
 1826 **(Outcome)**  
 1827  
 1828 **VI.E.3.d)** **Programs and clinical sites must maintain and communicate**  
 1829 **schedules of attending physicians and fellows currently**  
 1830 **responsible for care. (Core)**  
 1831

1832 VI.E.3.e) Each program must ensure continuity of patient care,  
1833 consistent with the program’s policies and procedures  
1834 referenced in VI.C.2-VI.C.2.b), in the event that a fellow may  
1835 be unable to perform their patient care responsibilities due to  
1836 excessive fatigue or illness, or family emergency. <sup>(Core)</sup>  
1837

1838 VI.F. Clinical Experience and Education  
1839

1840 *Programs, in partnership with their Sponsoring Institutions, must design*  
1841 *an effective program structure that is configured to provide fellows with*  
1842 *educational and clinical experience opportunities, as well as reasonable*  
1843 *opportunities for rest and personal activities.*  
1844

**Background and Intent:** In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

1845  
1846 VI.F.1. Maximum Hours of Clinical and Educational Work per Week  
1847

1848 Clinical and educational work hours must be limited to no more than  
1849 80 hours per week, averaged over a four-week period, inclusive of all  
1850 in-house clinical and educational activities, clinical work done from  
1851 home, and all moonlighting. <sup>(Core)</sup>  
1852

**Background and Intent:** Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

**Scheduling**

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

**Oversight**

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour

maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

***Work from Home***

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

1854  
1855  
1856  
1857  
1858  
1859  
1860  
1861  
1862  
1863

**VI.F.2. Mandatory Time Free of Clinical Work and Education**

**VI.F.2.a) The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. <sup>(Core)</sup>**

**VI.F.2.b) Fellows should have eight hours off between scheduled clinical work and education periods. <sup>(Detail)</sup>**

1864 VI.F.2.b).(1) There may be circumstances when fellows choose to  
1865 stay to care for their patients or return to the hospital  
1866 with fewer than eight hours free of clinical experience  
1867 and education. This must occur within the context of  
1868 the 80-hour and the one-day-off-in-seven  
1869 requirements. <sup>(Detail)</sup>  
1870

**Background and Intent:** While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1871  
1872 VI.F.2.c) Fellows must have at least 14 hours free of clinical work and  
1873 education after 24 hours of in-house call. <sup>(Core)</sup>  
1874

**Background and Intent:** Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1875  
1876 VI.F.2.d) Fellows must be scheduled for a minimum of one day in  
1877 seven free of clinical work and required education (when  
1878 averaged over four weeks). At-home call cannot be assigned  
1879 on these free days. <sup>(Core)</sup>  
1880

**Background and Intent:** The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

1881  
1882 VI.F.3. Maximum Clinical Work and Education Period Length

1883  
1884 VI.F.3.a) Clinical and educational work periods for fellows must not  
1885 exceed 24 hours of continuous scheduled clinical  
1886 assignments. <sup>(Core)</sup>  
1887

1888 VI.F.3.a).(1) Up to four hours of additional time may be used for  
1889 activities related to patient safety, such as providing  
1890 effective transitions of care, and/or fellow education.  
1891 (Core)

1892  
1893 VI.F.3.a).(1).(a) Additional patient care responsibilities must not  
1894 be assigned to a fellow during this time. (Core)  
1895

**Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.**

1896  
1897 VI.F.4. Clinical and Educational Work Hour Exceptions

1898  
1899 VI.F.4.a) In rare circumstances, after handing off all other  
1900 responsibilities, a fellow, on their own initiative, may elect to  
1901 remain or return to the clinical site in the following  
1902 circumstances:

1903  
1904 VI.F.4.a).(1) to continue to provide care to a single severely ill or  
1905 unstable patient; (Detail)

1906  
1907 VI.F.4.a).(2) humanistic attention to the needs of a patient or  
1908 family; or, (Detail)

1909  
1910 VI.F.4.a).(3) to attend unique educational events. (Detail)

1911  
1912 VI.F.4.b) These additional hours of care or education will be counted  
1913 toward the 80-hour weekly limit. (Detail)  
1914

**Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.**

1915  
1916 VI.F.4.c) A Review Committee may grant rotation-specific exceptions  
1917 for up to 10 percent or a maximum of 88 clinical and  
1918 educational work hours to individual programs based on a  
1919 sound educational rationale.

1920  
1921 The Review Committee for Emergency Medicine will not consider  
1922 requests for exceptions to the 80-hour limit to the fellows' work

1923 week.

1924

1925 **VI.F.5. Moonlighting**

1926

1927 **VI.F.5.a) Moonlighting must not interfere with the ability of the fellow to achieve the goals and objectives of the educational program, and must not interfere with the fellow's fitness for work nor compromise patient safety. (Core)**

1928

1929 **VI.F.5.b) Time spent by fellows in internal and external moonlighting (as defined in the ACGME Glossary of Terms) must be counted toward the 80-hour maximum weekly limit. (Core)**

1930

1931

**Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).**

1936

1937 **VI.F.6. In-House Night Float**

1938

1939 **Night float must occur within the context of the 80-hour and one-day-off-in-seven requirements. (Core)**

1940

1941

**Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.**

1942

1943 **VI.F.7. Maximum In-House On-Call Frequency**

1944

1945 **Fellows must be scheduled for in-house call no more frequently than every third night (when averaged over a four-week period). (Core)**

1946

1947

1948 **VI.F.8. At-Home Call**

1949

1950 **VI.F.8.a) Time spent on patient care activities by fellows on at-home call must count toward the 80-hour maximum weekly limit. The frequency of at-home call is not subject to the every-third-night limitation, but must satisfy the requirement for one day in seven free of clinical work and education, when averaged over four weeks. (Core)**

1951

1952 **VI.F.8.a).(1) At-home call must not be so frequent or taxing as to preclude rest or reasonable personal time for each fellow. (Core)**

1953

1954 **VI.F.8.b) Fellows are permitted to return to the hospital while on at-home call to provide direct care for new or established patients. These hours of inpatient patient care must be included in the 80-hour maximum weekly limit. (Detail)**

1955

1956

**Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour**

maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.

\*\*\*

**\*Core Requirements:** Statements that define structure, resource, or process elements essential to every graduate medical educational program.

**†Detail Requirements:** Statements that describe a specific structure, resource, or process, for achieving compliance with a Core Requirement. Programs and sponsoring institutions in substantial compliance with the Outcome Requirements may utilize alternative or innovative approaches to meet Core Requirements.

**‡Outcome Requirements:** Statements that specify expected measurable or observable attributes (knowledge, abilities, skills, or attitudes) of residents or fellows at key stages of their graduate medical education.

### **Osteopathic Recognition**

For programs with or applying for Osteopathic Recognition, the Osteopathic Recognition Requirements also apply ([www.acgme.org/OsteopathicRecognition](http://www.acgme.org/OsteopathicRecognition)).
