1                   **ACGME Program Requirements for Graduate Medical Education**  
2   **in Medical Toxicology**

3  
4                   **Common Program Requirements (Fellowship) are in BOLD**

5  
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that  
7 section. These philosophic statements are not program requirements and are therefore not  
8 citable.  
9

**Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.**

10  
11 **Introduction**

12  
13 **Int.A.**       *Fellowship is advanced graduate medical education beyond a core*  
14 *residency program for physicians who desire to enter more specialized*  
15 *practice. Fellowship-trained physicians serve the public by providing*  
16 *subspecialty care, which may also include core medical care, acting as a*  
17 *community resource for expertise in their field, creating and integrating*  
18 *new knowledge into practice, and educating future generations of*  
19 *physicians. Graduate medical education values the strength that a diverse*  
20 *group of physicians brings to medical care.*

21  
22 *Fellows who have completed residency are able to practice independently*  
23 *in their core specialty. The prior medical experience and expertise of*  
24 *fellows distinguish them from physicians entering into residency training.*  
25 *The fellow's care of patients within the subspecialty is undertaken with*  
26 *appropriate faculty supervision and conditional independence. Faculty*  
27 *members serve as role models of excellence, compassion,*  
28 *professionalism, and scholarship. The fellow develops deep medical*  
29 *knowledge, patient care skills, and expertise applicable to their focused*  
30 *area of practice. Fellowship is an intensive program of subspecialty clinical*  
31 *and didactic education that focuses on the multidisciplinary care of*  
32 *patients. Fellowship education is often physically, emotionally, and*  
33 *intellectually demanding, and occurs in a variety of clinical learning*  
34 *environments committed to graduate medical education and the well-being*  
35 *of patients, residents, fellows, faculty members, students, and all members*  
36 *of the health care team.*

37  
38 *In addition to clinical education, many fellowship programs advance*  
39 *fellows' skills as physician-scientists. While the ability to create new*  
40 *knowledge within medicine is not exclusive to fellowship-educated*  
41 *physicians, the fellowship experience expands a physician's abilities to*  
42 *pursue hypothesis-driven scientific inquiry that results in contributions to*  
43 *the medical literature and patient care. Beyond the clinical subspecialty*  
44 *expertise achieved, fellows develop mentored relationships built on an*  
45 *infrastructure that promotes collaborative research.*

46  
47 **Int.B.**       **Definition of Subspecialty**

48  
49 Medical toxicology is a clinical specialty that includes the monitoring, prevention,  
50 evaluation, and treatment, in all age groups, of injury and illness due to  
51 occupational and environmental exposures, pharmaceutical agents, and  
52 unintentional and intentional poisoning. A medical toxicology fellowship provides  
53 fellows with experience in the clinical practice of medical toxicology and prepares  
54 physicians as practitioners, educators, researchers, and administrators capable  
55 of practicing medical toxicology in academic and clinical settings.  
56

57 **Int.C. Length of Educational Program**

58  
59 The educational program in medical toxicology must be 24 months in length. (Core)\*  
60

61 **I. Oversight**

62  
63 **I.A. Sponsoring Institution**

64  
65 *The Sponsoring Institution is the organization or entity that assumes the*  
66 *ultimate financial and academic responsibility for a program of graduate*  
67 *medical education consistent with the ACGME Institutional Requirements.*  
68

69 *When the Sponsoring Institution is not a rotation site for the program, the*  
70 *most commonly utilized site of clinical activity for the program is the*  
71 *primary clinical site.*  
72

**Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.**

73  
74 **I.A.1. The program must be sponsored by one ACGME-accredited**  
75 **Sponsoring Institution. (Core)**  
76

77 **I.B. Participating Sites**

78  
79 *A participating site is an organization providing educational experiences or*  
80 *educational assignments/rotations for fellows.*  
81

82 **I.B.1. The program, with approval of its Sponsoring Institution, must**  
83 **designate a primary clinical site. (Core)**  
84

85 **I.B.1.a)** The Sponsoring Institution must also sponsor an Accreditation  
86 Council for Graduate Medical Education (ACGME)-accredited  
87 residency program in emergency medicine or preventive  
88 medicine. (Core)  
89

- 90 I.B.2. There must be a program letter of agreement (PLA) between the  
91 program and each participating site that governs the relationship  
92 between the program and the participating site providing a required  
93 assignment. <sup>(Core)</sup>  
94
- 95 I.B.2.a) The PLA must:  
96
- 97 I.B.2.a).(1) be renewed at least every 10 years; and, <sup>(Core)</sup>  
98
- 99 I.B.2.a).(2) be approved by the designated institutional official  
100 (DIO). <sup>(Core)</sup>  
101
- 102 I.B.3. The program must monitor the clinical learning and working  
103 environment at all participating sites. <sup>(Core)</sup>  
104
- 105 I.B.3.a) At each participating site there must be one faculty member,  
106 designated by the program director, who is accountable for  
107 fellow education for that site, in collaboration with the  
108 program director. <sup>(Core)</sup>  
109

**Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.**

**Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:**

- Identifying the faculty members who will assume educational and supervisory responsibility for fellows
- Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern fellow education during the assignment

- 110
- 111 I.B.4. The program director must submit any additions or deletions of  
112 participating sites routinely providing an educational experience,  
113 required for all fellows, of one month full time equivalent (FTE) or  
114 more through the ACGME's Accreditation Data System (ADS). <sup>(Core)</sup>  
115
- 116 I.B.5. Programs using multiple participating sites must ensure the provision of a  
117 unified educational experience for the fellows. <sup>(Core)</sup>  
118
- 119 I.B.5.a) An acceptable educational rationale must be provided for each

- 120 participating site. <sup>(Core)</sup>
- 121
- 122 I.B.6. Any medical toxicology experience not available at the primary clinical
- 123 site or sponsoring institution must be provided through an affiliation with a
- 124 participating site. <sup>(Core)</sup>
- 125
- 126 I.B.7. Participating sites, including a poison center, should be in close physical
- 127 proximity to the primary clinical site unless they provide special resources
- 128 that are not available at the primary clinical site. <sup>(Detail)†</sup>
- 129
- 130 I.B.8. The primary clinical site must be a primary hospital (hereafter referred to
- 131 as the primary clinical site) or a poison center. <sup>(Core)</sup>
- 132
- 133 I.B.8.a) If the primary clinical site is a poison center, the program must
- 134 identify a hospital where the clinical experience will take place.
- 135 <sup>(Core)</sup>
- 136
- 137 **I.C. The program, in partnership with its Sponsoring Institution, must engage in**
- 138 **practices that focus on mission-driven, ongoing, systematic recruitment**
- 139 **and retention of a diverse and inclusive workforce of residents (if present),**
- 140 **fellows, faculty members, senior administrative staff members, and other**
- 141 **relevant members of its academic community.** <sup>(Core)</sup>
- 142

**Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).**

- 143
- 144 **I.D. Resources**
- 145
- 146 **I.D.1. The program, in partnership with its Sponsoring Institution, must**
- 147 **ensure the availability of adequate resources for fellow education.**
- 148 <sup>(Core)</sup>
- 149
- 150 I.D.1.a) Each participating site must provide appropriate support services,
- 151 personnel, and space to ensure that fellows have sufficient time to
- 152 carry out their clinical and educational functions. <sup>(Core)</sup>
- 153
- 154 I.D.1.b) There should be affiliations with the following to provide regular
- 155 didactic experience and consultation to the fellows: <sup>(Core)(Detail)</sup>
- 156
- 157 I.D.1.b).(1) a school of pharmacy or department of pharmacology;
- 158 <sup>(Core)(Detail)</sup>
- 159
- 160 I.D.1.b).(1).(a) In the absence of an affiliation with a school of
- 161 pharmacy or department of pharmacology, a Doctor
- 162 of Pharmacy or PhD pharmacologist should be
- 163 appointed to the teaching faculty. <sup>(Core)(Detail)</sup>
- 164

- 165 I.D.1.b).(1).(a).(i) Doctor of Pharmacy faculty members  
 166 should be certified by either the Board of  
 167 Pharmacy Specialties (BPS) or the  
 168 American Board of Applied Toxicology  
 169 (ABAT) or be ABAT/BPS-eligible. (Core)(Detail)  
 170
- 171 I.D.1.b).(2) a school of public health, department of health, department  
 172 of population health, department of community health, or  
 173 similar institution. (Core)(Detail)  
 174
- 175 I.D.1.c) The poison center or medical toxicology service must annually  
 176 have at least 1,500 encounters from the community that require  
 177 medical toxicologist consultation or intervention. (Core)  
 178
- 179 I.D.1.d) The patient population must include patients of all ages and both  
 180 genders, with a wide variety of clinical problems, and must be  
 181 adequate in number and variety to meet the educational needs of  
 182 the program. (Core)  
 183
- 184 I.D.1.e) Resources must be available to support the provision of clinical  
 185 experience in adult and pediatric critical care areas. (Core)  
 186
- 187 I.D.1.e).(1) The following must be available at the primary clinical site  
 188 or at an affiliated participating site:  
 189
- 190 I.D.1.e).(1).(a) emergency services for both adult and pediatric  
 191 patients; (Core)  
 192
- 193 I.D.1.e).(1).(b) adult and pediatric inpatient facilities; (Core)  
 194
- 195 I.D.1.e).(1).(c) adult and pediatric intensive care facilities; (Core)  
 196
- 197 I.D.1.e).(1).(d) adult and pediatric outpatient facilities. (Core)  
 198
- 199 I.D.1.e).(1).(e) toxicology laboratory services with 24-hour  
 200 availability; and, (Core)  
 201
- 202 I.D.1.e).(1).(f) renal dialysis services with 24-hour availability; (Core)  
 203
- 204 **I.D.2. The program, in partnership with its Sponsoring Institution, must**  
 205 **ensure healthy and safe learning and working environments that**  
 206 **promote fellow well-being and provide for:** (Core)  
 207
- 208 **I.D.2.a) access to food while on duty;** (Core)  
 209
- 210 **I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available**  
 211 **and accessible for fellows with proximity appropriate for safe**  
 212 **patient care;** (Core)  
 213

<p><b>Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at</b></p>
--

their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

- 214  
215 I.D.2.c) clean and private facilities for lactation that have refrigeration  
216 capabilities, with proximity appropriate for safe patient care;  
217 (Core)  
218

**Background and Intent:** Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

- 219  
220 I.D.2.d) security and safety measures appropriate to the participating  
221 site; and, (Core)  
222

- 223 I.D.2.e) accommodations for fellows with disabilities consistent with  
224 the Sponsoring Institution's policy. (Core)  
225

- 226 I.D.3. Fellows must have ready access to subspecialty-specific and other  
227 appropriate reference material in print or electronic format. This  
228 must include access to electronic medical literature databases with  
229 full text capabilities. (Core)  
230

- 231 I.D.4. The program's educational and clinical resources must be adequate  
232 to support the number of fellows appointed to the program. (Core)  
233

- 234 I.E. *A fellowship program usually occurs in the context of many learners and  
235 other care providers and limited clinical resources. It should be structured  
236 to optimize education for all learners present.*  
237

- 238 I.E.1. Fellows should contribute to the education of residents in core  
239 programs, if present. (Core)  
240

**Background and Intent:** The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

- 241  
242 II. Personnel

- 243  
244 **II.A. Program Director**  
245  
246 **II.A.1. There must be one faculty member appointed as program director**  
247 **with authority and accountability for the overall program, including**  
248 **compliance with all applicable program requirements.** <sup>(Core)</sup>  
249  
250 **II.A.1.a) The Sponsoring Institution’s Graduate Medical Education**  
251 **Committee (GMEC) must approve a change in program**  
252 **director.** <sup>(Core)</sup>  
253  
254 **II.A.1.b) Final approval of the program director resides with the**  
255 **Review Committee.** <sup>(Core)</sup>  
256

**Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual’s responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director’s nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.**

- 257  
258 **II.A.2. The program director must be provided with support adequate for**  
259 **administration of the program based upon its size and configuration.**  
260 <sup>(Core)</sup>  
261  
262 **II.A.2.a) At a minimum, the program director must be provided with the**  
263 **dedicated time and support specified below for administration of**  
264 **the program.** <sup>(Core)</sup>  
265

<u>Number of Approved Fellow Positions</u>	<u>Minimum Support Required (FTE)</u>
0-3	0.2
4-6	0.2
7-9	0.3
10 or more	0.35

266  
**Background and Intent: Twenty percent FTE is defined as one day per week.**  
  
**“Administrative time” is defined as non-clinical time spent meeting the responsibilities of the program director as detailed in requirements II.A.4.-II.A.4.a).(16).**  
  
**The requirement does not address the source of funding required to provide the specified salary support.**

- 267  
268 **II.A.3. Qualifications of the program director:**  
269  
270 **II.A.3.a) must include subspecialty expertise and qualifications**  
271 **acceptable to the Review Committee;** <sup>(Core)</sup>  
272

- 273 II.A.3.a).(1) This must include at least three years' experience as a  
 274 core physician faculty member in an ACGME-accredited  
 275 emergency medicine, pediatrics, preventive medicine, or  
 276 medical toxicology program; (Core)(Detail)  
 277
- 278 **II.A.3.b)** **must include current certification in the subspecialty for**  
 279 **which they are the program director by the American Board**  
 280 **of Emergency Medicine, the American Board of Pediatrics, or the**  
 281 **American Board of Preventive Medicine, or by the American**  
 282 **Osteopathic Board of Emergency Medicine, or subspecialty**  
 283 **qualifications that are acceptable to the Review Committee;**  
 284 **(Core)**  
 285
- 286 II.A.3.c) must include current clinical activity in the practice of medical  
 287 toxicology; (Core)  
 288
- 289 II.A.3.d) must include active involvement in scholarly activity; and, (Core)  
 290
- 291 II.A.3.e) ~~must include appropriate medical school faculty appointment; and,~~  
 292 (Core)  
 293
- 294 II.A.3.f) should include demonstrated participation in academic societies  
 295 and educational programs designed to enhance his or her  
 296 educational and administrative skills. (Core)(Detail)  
 297

298 **II.A.4. Program Director Responsibilities**  
 299

**The program director must have responsibility, authority, and  
 accountability for: administration and operations; teaching and  
 scholarly activity; fellow recruitment and selection, evaluation, and  
 promotion of fellows, and disciplinary action; supervision of fellows;  
 and fellow education in the context of patient care. (Core)**

306 **II.A.4.a) The program director must:**  
 307

308 **II.A.4.a).(1) be a role model of professionalism; (Core)**  
 309

**Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.**

310  
 311 **II.A.4.a).(2) design and conduct the program in a fashion**  
 312 **consistent with the needs of the community, the**  
 313 **mission(s) of the Sponsoring Institution, and the**  
 314 **mission(s) of the program; (Core)**  
 315

**Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.**

316  
317  
318  
319  
320

- II.A.4.a).(3) administer and maintain a learning environment conducive to educating the fellows in each of the ACGME Competency domains; (Core)**

**Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.**

321  
322  
323  
324  
325  
326  
327  
328  
329  
330  
331  
332  
333  
334  
335  
336  
337  
338

- II.A.4.a).(4) develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the fellowship program education and at least annually thereafter, as outlined in V.B.; (Core)**

- II.A.4.a).(5) have the authority to approve program faculty members for participation in the fellowship program education at all sites; (Core)**

- II.A.4.a).(6) have the authority to remove program faculty members from participation in the fellowship program education at all sites; (Core)**

- II.A.4.a).(7) have the authority to remove fellows from supervising interactions and/or learning environments that do not meet the standards of the program; (Core)**

**Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.**

**There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.**

339  
340  
341  
342  
343  
344  
345  
346

- II.A.4.a).(8) submit accurate and complete information required and requested by the DIO, GMEC, and ACGME; (Core)**

- II.A.4.a).(9) provide applicants who are offered an interview with information related to the applicant's eligibility for the relevant subspecialty board examination(s); (Core)**

- 347 **II.A.4.a).(10)** provide a learning and working environment in which  
 348 fellows have the opportunity to raise concerns and  
 349 provide feedback in a confidential manner as  
 350 appropriate, without fear of intimidation or retaliation;  
 351 (Core)  
 352
- 353 **II.A.4.a).(11)** ensure the program's compliance with the Sponsoring  
 354 Institution's policies and procedures related to  
 355 grievances and due process; (Core)  
 356
- 357 **II.A.4.a).(12)** ensure the program's compliance with the Sponsoring  
 358 Institution's policies and procedures for due process  
 359 when action is taken to suspend or dismiss, not to  
 360 promote, or not to renew the appointment of a fellow;  
 361 (Core)  
 362

**Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.**

- 363
- 364 **II.A.4.a).(13)** ensure the program's compliance with the Sponsoring  
 365 Institution's policies and procedures on employment  
 366 and non-discrimination; (Core)  
 367
- 368 **II.A.4.a).(13).(a)** Fellows must not be required to sign a non-  
 369 competition guarantee or restrictive covenant.  
 370 (Core)  
 371
- 372 **II.A.4.a).(14)** document verification of program completion for all  
 373 graduating fellows within 30 days; (Core)  
 374
- 375 **II.A.4.a).(15)** provide verification of an individual fellow's  
 376 completion upon the fellow's request, within 30 days;  
 377 and, (Core)  
 378

**Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.**

- 379
- 380 **II.A.4.a).(16)** obtain review and approval of the Sponsoring  
 381 Institution's DIO before submitting information or  
 382 requests to the ACGME, as required in the Institutional  
 383 Requirements and outlined in the ACGME Program  
 384 Director's Guide to the Common Program  
 385 Requirements. (Core)  
 386
- 387 **II.B. Faculty**

388  
389 ***Faculty members are a foundational element of graduate medical education***  
390 ***– faculty members teach fellows how to care for patients. Faculty members***  
391 ***provide an important bridge allowing fellows to grow and become practice***  
392 ***ready, ensuring that patients receive the highest quality of care. They are***  
393 ***role models for future generations of physicians by demonstrating***  
394 ***compassion, commitment to excellence in teaching and patient care,***  
395 ***professionalism, and a dedication to lifelong learning. Faculty members***  
396 ***experience the pride and joy of fostering the growth and development of***  
397 ***future colleagues. The care they provide is enhanced by the opportunity to***  
398 ***teach. By employing a scholarly approach to patient care, faculty members,***  
399 ***through the graduate medical education system, improve the health of the***  
400 ***individual and the population.***

401  
402 ***Faculty members ensure that patients receive the level of care expected***  
403 ***from a specialist in the field. They recognize and respond to the needs of***  
404 ***the patients, fellows, community, and institution. Faculty members provide***  
405 ***appropriate levels of supervision to promote patient safety. Faculty***  
406 ***members create an effective learning environment by acting in a***  
407 ***professional manner and attending to the well-being of the fellows and***  
408 ***themselves.***  
409

<p><b>Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment or salary support.</b></p>
--

- 410  
411 **II.B.1. For each participating site, there must be a sufficient number of**  
412 **faculty members with competence to instruct and supervise all**  
413 **fellows at that location.** <sup>(Core)</sup>  
414  
415 II.B.1.a) There must be a minimum of two medical toxicology physician  
416 faculty members based at the primary clinical site, including the  
417 program director, who together devote a minimum of 10 hours per  
418 week of direct instruction to the fellows, and who are readily  
419 available to the fellows for consultations on cases. <sup>(Core)</sup>  
420  
421 II.B.1.b) Consultants from appropriate medical specialties must be  
422 available for consultation and didactic sessions. <sup>(Core)</sup>  
423  
424 II.B.1.b).(1) Medical consultants should include, but not limited to,  
425 individuals with special expertise in the following areas:  
426 cardiology, dermatology, gastroenterology, hyperbaric  
427 medicine, immunology, nephrology, ophthalmology,  
428 pathology, pulmonary medicine, and surgical  
429 subspecialties. <sup>(Detail)</sup>  
430  
431 **II.B.2. Faculty members must:**  
432  
433 **II.B.2.a) be role models of professionalism;** <sup>(Core)</sup>  
434

435 **II.B.2.b)** demonstrate commitment to the delivery of safe, quality,  
436 cost-effective, patient-centered care; <sup>(Core)</sup>  
437

**Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.**

438  
439 **II.B.2.c)** demonstrate a strong interest in the education of fellows; <sup>(Core)</sup>  
440

441 **II.B.2.d)** devote sufficient time to the educational program to fulfill  
442 their supervisory and teaching responsibilities; <sup>(Core)</sup>  
443

444 **II.B.2.e)** administer and maintain an educational environment  
445 conducive to educating fellows; <sup>(Core)</sup>  
446

447 **II.B.2.f)** regularly participate in organized clinical discussions,  
448 rounds, journal clubs, and conferences; <sup>(Core)</sup>  
449

450 **II.B.2.g)** pursue faculty development designed to enhance their skills  
451 at least annually; and, <sup>(Core)</sup>  
452

**Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.**

453  
454 **II.B.2.g).(1)** Faculty members should participate in faculty development  
455 programs designed to enhance the effectiveness of their  
456 teaching, evaluation, and feedback. <sup>(Core)(Detail)</sup>  
457

458 **II.B.2.h)** supervise all fellows in their development of clinical, educational,  
459 research, advocacy, and administrative skills. <sup>(Core)</sup>  
460

461 **II.B.3. Faculty Qualifications**

462  
463 **II.B.3.a)** Faculty members must have appropriate qualifications in  
464 their field and hold appropriate institutional appointments.  
465 <sup>(Core)</sup>  
466

467 **II.B.3.b)** Subspecialty physician faculty members must:

468  
469 **II.B.3.b).(1)** have current certification in the subspecialty by the  
470 American Board of Emergency Medicine, the American  
471 Board of Pediatrics, or the American Board of Preventive  
472 Medicine, or the American Osteopathic Board of

473 Emergency Medicine, or possess qualifications judged  
474 acceptable to the Review Committee. <sup>(Core)</sup>

475  
476 **II.B.3.c) Any non-physician faculty members who participate in**  
477 **fellowship program education must be approved by the**  
478 **program director. <sup>(Core)</sup>**  
479

**Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.**

480  
481 **II.B.3.d) Any other specialty physician faculty members must have**  
482 **current certification in their specialty by the appropriate**  
483 **American Board of Medical Specialties (ABMS) member**  
484 **board or American Osteopathic Association (AOA) certifying**  
485 **board, or possess qualifications judged acceptable to the**  
486 **Review Committee. <sup>(Core)</sup>**

487  
488 **II.B.4. Core Faculty**  
489  
490 **Core faculty members must have a significant role in the education**  
491 **and supervision of fellows and must devote a significant portion of**  
492 **their entire effort to fellow education and/or administration, and**  
493 **must, as a component of their activities, teach, evaluate, and provide**  
494 **formative feedback to fellows. <sup>(Core)</sup>**  
495

**Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.**

496  
497 **II.B.4.a) Core faculty members must be designated by the program**  
498 **director. <sup>(Core)</sup>**

499  
500 **II.B.4.b) Core faculty members must complete the annual ACGME**  
501 **Faculty Survey. <sup>(Core)</sup>**

502  
503 **II.B.4.c) There must be a minimum of two medical toxicology core**  
504 **physician faculty members based at the primary clinical site,**  
505 **including the program director. <sup>(Core)</sup>**

506  
507 **II.C. Program Coordinator**

508  
509 **II.C.1. There must be a program coordinator. <sup>(Core)</sup>**

510  
511 **II.C.2. The program coordinator must be provided with support adequate**  
512 **for administration of the program based upon its size and**  
513 **configuration.** <sup>(Core)</sup>

514  
515 **II.C.2.a) At a minimum, the program coordinator(s) must be supported at**  
516 **20 percent FTE for the administration of the program.** <sup>(Core)</sup>  
517

**Background and Intent: Twenty percent FTE is defined as one day per week.**

**The requirement does not address the source of funding required to provide the specified salary support.**

**Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.**

**The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge of the ACGME and Program Requirements, policies, and procedures. Program coordinators assist the program director in accreditation efforts, educational programming, and support of fellows.**

**Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.**

518  
519 **II.D. Other Program Personnel**

520  
521 **The program, in partnership with its Sponsoring Institution, must jointly**  
522 **ensure the availability of necessary personnel for the effective**  
523 **administration of the program.** <sup>(Core)</sup>  
524

525 **II.D.1. Consultants from appropriate non-medical specialties must be available**  
526 **for consultation and didactic sessions.** <sup>(Core)</sup>  
527

528 **II.D.1.a) Non-medical consultants should include individuals with special**  
529 **expertise in the following areas: biostatistics, botany, disaster and**  
530 **mass casualty incident management, epidemiology,**  
531 **environmental toxicology, forensic toxicology, hazardous**  
532 **materials, herpetology, industrial hygiene, laboratory toxicology,**  
533 **mycology, occupational toxicology, pharmacology, public health,**  
534 **and zoology.** <sup>(Detail)</sup>  
535

**Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the**

program. These personnel may support more than one program in more than one discipline.

550  
551

**III. Fellow Appointments**

**III.A. Eligibility Criteria**

**III.A.1. Eligibility Requirements – Fellowship Programs**

All required clinical education for entry into ACGME-accredited fellowship programs must be completed in an ACGME-accredited residency program, an AOA-approved residency program, a program with ACGME International (ACGME-I) Advanced Specialty Accreditation, or a Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of Canada (CFPC)-accredited residency program located in Canada.  
(Core)

**Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).**

552  
553  
554  
555  
556  
557  
558  
559  
560  
561  
562  
563  
564  
565  
566  
567

**III.A.1.a) Fellowship programs must receive verification of each entering fellow’s level of competence in the required field, upon matriculation, using ACGME, ACGME-I, or CanMEDS Milestones evaluations from the core residency program.** (Core)

**III.A.1.b)** Prior to appointment in the program, fellows must have successfully completed a residency program that satisfies III.A.1., excluding transitional year programs. (Core)

**III.A.1.c) Fellow Eligibility Exception**  
**The Review Committees for Emergency Medicine and Preventive Medicine will allow the following exception to the fellowship eligibility requirements:**

Specialty-Specific Background and Intent: When exercising the eligibility exception for an exceptionally qualified candidate seeking board certification, note that completion of an ACGME-accredited fellowship program may not by itself be sufficient to meet the eligibility requirements for subspecialty certification. Direct contact with the applicable certifying board to determine an applicant’s eligibility for certification is advised.

568  
569  
570  
571  
572  
573  
574  
575

**III.A.1.c).(1) An ACGME-accredited fellowship program may accept an exceptionally qualified international graduate applicant who does not satisfy the eligibility requirements listed in III.A.1., but who does meet all of the following additional qualifications and conditions:**  
(Core)

- 576 III.A.1.c).(1).(a) evaluation by the program director and  
 577 fellowship selection committee of the  
 578 applicant's suitability to enter the program,  
 579 based on prior training and review of the  
 580 summative evaluations of training in the core  
 581 specialty; and, <sup>(Core)</sup>  
 582
- 583 III.A.1.c).(1).(b) review and approval of the applicant's  
 584 exceptional qualifications by the GMC; and,  
 585 <sup>(Core)</sup>  
 586
- 587 III.A.1.c).(1).(c) verification of Educational Commission for  
 588 Foreign Medical Graduates (ECFMG)  
 589 certification. <sup>(Core)</sup>  
 590
- 591 III.A.1.c).(2) Applicants accepted through this exception must have  
 592 an evaluation of their performance by the Clinical  
 593 Competency Committee within 12 weeks of  
 594 matriculation. <sup>(Core)</sup>  
 595

**Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.**

**In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.**

- 596
- 597 III.B. The program director must not appoint more fellows than approved by the  
 598 Review Committee. <sup>(Core)</sup>  
 599
- 600 III.B.1. All complement increases must be approved by the Review  
 601 Committee. <sup>(Core)</sup>  
 602
- 603 III.C. Fellow Transfers
- 604
- 605 The program must obtain verification of previous educational experiences  
 606 and a summative competency-based performance evaluation prior to  
 607 acceptance of a transferring fellow, and Milestones evaluations upon  
 608 matriculation. <sup>(Core)</sup>  
 609
- 610 IV. Educational Program

611  
612 ***The ACGME accreditation system is designed to encourage excellence and***  
613 ***innovation in graduate medical education regardless of the organizational***  
614 ***affiliation, size, or location of the program.***

615  
616 ***The educational program must support the development of knowledgeable, skillful***  
617 ***physicians who provide compassionate care.***

618  
619 ***In addition, the program is expected to define its specific program aims consistent***  
620 ***with the overall mission of its Sponsoring Institution, the needs of the community***  
621 ***it serves and that its graduates will serve, and the distinctive capabilities of***  
622 ***physicians it intends to graduate. While programs must demonstrate substantial***  
623 ***compliance with the Common and subspecialty-specific Program Requirements, it***  
624 ***is recognized that within this framework, programs may place different emphasis***  
625 ***on research, leadership, public health, etc. It is expected that the program aims***  
626 ***will reflect the nuanced program-specific goals for it and its graduates; for***  
627 ***example, it is expected that a program aiming to prepare physician-scientists will***  
628 ***have a different curriculum from one focusing on community health.***

629  
630 **IV.A. The curriculum must contain the following educational components:** (Core)

631  
632 **IV.A.1. a set of program aims consistent with the Sponsoring Institution's**  
633 **mission, the needs of the community it serves, and the desired**  
634 **distinctive capabilities of its graduates;** (Core)

635  
636 **IV.A.1.a) The program's aims must be made available to program**  
637 **applicants, fellows, and faculty members.** (Core)

638  
639 **IV.A.2. competency-based goals and objectives for each educational**  
640 **experience designed to promote progress on a trajectory to**  
641 **autonomous practice in their subspecialty. These must be**  
642 **distributed, reviewed, and available to fellows and faculty members;**  
643 **(Core)**

644  
645 **IV.A.3. delineation of fellow responsibilities for patient care, progressive**  
646 **responsibility for patient management, and graded supervision in**  
647 **their subspecialty;** (Core)

**Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.**

649  
650 **IV.A.4. structured educational activities beyond direct patient care; and,**  
651 **(Core)**

**Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the**

patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

653  
654  
655  
656  
657  
658

**IV.A.5.** advancement of fellows' knowledge of ethical principles foundational to medical professionalism. <sup>(Core)</sup>

**IV.B. ACGME Competencies**

**Background and Intent:** The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

659  
660  
661  
662  
663  
664  
665  
666  
667  
668  
669

**IV.B.1.** The program must integrate the following ACGME Competencies into the curriculum: <sup>(Core)</sup>

**IV.B.1.a) Professionalism**

Fellows must demonstrate a commitment to professionalism and an adherence to ethical principles. <sup>(Core)</sup>

**IV.B.1.b) Patient Care and Procedural Skills**

**Background and Intent:** Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs.* 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

859	IV.B.1.c).(1).(s)	the role of federal and international agencies in
860		toxicology; and, <sup>(Core)</sup>
861		
862	IV.B.1.c).(1).(t)	administrative aspects of the practice of medical
863		toxicology. <sup>(Core)</sup>

**IV.B.1.d)**

**Practice-based Learning and Improvement**

**Fellows must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. <sup>(Core)</sup>**

**Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.**

**The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.**

872  
873 **IV.B.1.e)**

**Interpersonal and Communication Skills**

**Fellows must demonstrate interpersonal and communication skills that result in the effective exchange of information and**

- 877 collaboration with patients, their families, and health  
 878 professionals. <sup>(Core)</sup>  
 879
- 880 **IV.B.1.f) Systems-based Practice**  
 881  
 882 **Fellows must demonstrate an awareness of and**  
 883 **responsiveness to the larger context and system of health**  
 884 **care, including the social determinants of health, as well as**  
 885 **the ability to call effectively on other resources to provide**  
 886 **optimal health care.** <sup>(Core)</sup>  
 887
- 888 **IV.C. Curriculum Organization and Fellow Experiences**  
 889
- 890 **IV.C.1. The curriculum must be structured to optimize fellow educational**  
 891 **experiences, the length of these experiences, and supervisory**  
 892 **continuity.** <sup>(Core)</sup>  
 893
- 894 **IV.C.1.a) Clinical experiences should be structured to facilitate learning in a**  
 895 **manner that allows the fellows to function as part of an effective**  
 896 **interprofessional team that works together towards the shared**  
 897 **goals of patient safety and quality improvement.** <sup>(Detail)</sup>  
 898
- 899 **IV.C.1.b) The program director must determine the length of clinical**  
 900 **experiences for the fellows for any rotation.** <sup>(Core)</sup>  
 901
- 902 **IV.C.2. The program must provide instruction and experience in pain**  
 903 **management if applicable for the subspecialty, including recognition**  
 904 **of the signs of addiction.** <sup>(Core)</sup>  
 905
- 906 **IV.C.3. Didactic Experiences**  
 907
- 908 **IV.C.3.a) The majority of didactic experiences should take place at the**  
 909 **primary clinical site.** <sup>(Core)(Detail)</sup>  
 910
- 911 **IV.C.3.a).(1) There must be at least four hours per week of planned**  
 912 **educational experiences focused on medical toxicology.**  
 913 <sup>(Core)</sup>  
 914
- 915 **IV.C.3.a).(1).(a) All planned didactic experiences must be**  
 916 **supervised by faculty members.** <sup>(Core)</sup>  
 917
- 918 **IV.C.3.a).(1).(b) Faculty members must present more than 50**  
 919 **percent of the planned didactic experiences.**  
 920 <sup>(Core)(Detail)</sup>  
 921
- 922 **IV.C.3.a).(2) Planned educational experiences should include**  
 923 **presentations based on the defined curriculum, morbidity**  
 924 **and mortality conferences, journal review, administrative**  
 925 **seminars, and research methods.** <sup>(Detail)</sup>  
 926
- 927 **IV.C.3.a).(2).(a) All planned didactic experiences should have an**

928		evaluative component to measure fellow
929		participation and educational effectiveness,
930		including faculty-fellow interaction. <sup>(Detail)</sup>
931		
932	IV.C.3.a).(3)	The program must ensure that fellows assigned to
933		participating sites will participate in required conferences
934		and other didactic activities at the primary clinical site.
935		<u>(Core)(Detail)</u>
936		
937	IV.C.3.b)	Fellows must attend required seminars, conferences, and journal
938		clubs. <sup>(Core)</sup>
939		
940	IV.C.3.c)	Fellows must actively participate in the planning and delivery of
941		didactic sessions. <sup>(Core)</sup>
942		
943	IV.C.4.	Fellow Experiences and Clinical Content
944		
945	IV.C.4.a)	The curriculum must include the following medical toxicology core
946		content areas:
947		
948	IV.C.4.a).(1)	analytical and forensic toxicology; <sup>(Core)</sup>
949		
950	IV.C.4.a).(2)	assessment and population health; <sup>(Core)</sup>
951		
952	IV.C.4.a).(3)	clinical assessment; <sup>(Core)</sup>
953		
954	IV.C.4.a).(4)	principles of toxicology; <sup>(Core)</sup>
955		
956	IV.C.4.a).(5)	therapeutics; and, <sup>(Core)</sup>
957		
958	IV.C.4.a).(6)	toxins and toxicants. <sup>(Core)</sup>
959		
960	IV.C.4.b)	All educational components of the fellowship must be related to
961		program goals and objectives. <sup>(Core)</sup>
962		
963	IV.C.4.c)	Programs must provide fellows a broad education, including the
964		basic skills and knowledge in medical toxicology, so that they may
965		function as specialists competent in providing comprehensive
966		patient care in medical toxicology, research, and teaching. <sup>(Core)</sup>
967		
968	IV.C.4.d)	Fellows must have patient experience with a diverse clinical
969		spectrum of diagnoses, for patients of all ages and both genders,
970		that enables them to develop and demonstrate competencies in
971		medical toxicology. <sup>(Core)</sup>
972		
973		This must include diagnoses resulting from patient exposure to:
974		
975	IV.C.4.d).(1)	drugs; <sup>(Core)</sup>
976		
977	IV.C.4.d).(2)	industrial, household, and environmental toxicants; <sup>(Core)</sup>
978		

979	IV.C.4.d).(3)	natural products; and, (Core)
980		
981	IV.C.4.d).(4)	other xenobiotics. (Core)
982		
983	IV.C.4.e)	Fellows must be provided hyperbaric oxygen therapy education
984		<del>and experience.</del> (Core)
985		
986	IV.C.4.f)	Fellows without prior experience in adult and pediatric critical care
987		must have at least one month in an adult intensive care unit and
988		one month in a pediatric intensive care unit experience. (Core)
989		
990	IV.C.4.g)	Fellows must have a minimum of 12 months of clinical experience
991		as the primary or consulting physician responsible for providing
992		direct/bedside patient evaluation, management, screening, and
993		preventive services. (Core)
994		
995	IV.C.4.h)	Fellows must be provided with experience in evaluating and
996		managing patients with workplace and environmental exposures
997		and must have experience in workplace evaluation, as well as in
998		an occupational medicine or toxicology clinic. (Core)
999		
1000	IV.C.4.i)	Clinical education must include experience in an industrial setting,
1001		an occupational medicine clinic, an outpatient medical toxicology
1002		setting, or a referral setting with access to occupational medicine
1003		patients. (Core)
1004		
1005	IV.C.4.i).(1)	Fellows must have the opportunity to evaluate and
1006		manage intoxicated patients in both industrial and referral
1007		settings, including responsibility for providing bedside
1008		evaluation, management, screening, and preventive
1009		services for a minimum of 12 months or its full-time
1010		equivalent; (Core)
1011		
1012	IV.C.4.j)	Fellows must have 24 months' experience with a referral
1013		population of poisoned patients under the supervision of a
1014		physician who is certified in medical toxicology, or who possess
1015		appropriate qualifications as determined by the Review
1016		Committee. (Core)
1017		
1018	IV.C.4.k)	The program must provide fellows with educational experiences in
1019		a regional poison center certified by the American Association of
1020		Poison Control Centers, or at a regional referral toxicology service
1021		that annually takes in at least 1500 calls that require physician
1022		telephone consultation or intervention. (Core)
1023		
1024	IV.C.4.l)	Fellows must be provided opportunities to teach and participate in
1025		undergraduate, graduate, and continuing education activities. (Core)
1026		
1027	IV.C.4.m)	Fellows must document required patient care experiences. (Core)
1028

***Medicine is both an art and a science. The physician is a humanistic scientist who cares for patients. This requires the ability to think critically, evaluate the literature, appropriately assimilate new knowledge, and practice lifelong learning. The program and faculty must create an environment that fosters the acquisition of such skills through fellow participation in scholarly activities as defined in the subspecialty-specific Program Requirements. Scholarly activities may include discovery, integration, application, and teaching.***

***The ACGME recognizes the diversity of fellowships and anticipates that programs prepare physicians for a variety of roles, including clinicians, scientists, and educators. It is expected that the program's scholarship will reflect its mission(s) and aims, and the needs of the community it serves. For example, some programs may concentrate their scholarly activity on quality improvement, population health, and/or teaching, while other programs might choose to utilize more classic forms of biomedical research as the focus for scholarship.***

**IV.D.1. Program Responsibilities**

**IV.D.1.a) The program must demonstrate evidence of scholarly activities, consistent with its mission(s) and aims. <sup>(Core)</sup>**

**IV.D.1.b) The program in partnership with its Sponsoring Institution, must allocate adequate resources to facilitate fellow and faculty involvement in scholarly activities. <sup>(Core)</sup>**

**IV.D.2. Faculty Scholarly Activity**

**IV.D.2.a) Among their scholarly activity, programs must demonstrate accomplishments in at least three of the following domains: <sup>(Core)</sup>**

- **Research in basic science, education, translational science, patient care, or population health**
- **Peer-reviewed grants**
- **Quality improvement and/or patient safety initiatives**
- **Systematic reviews, meta-analyses, review articles, chapters in medical textbooks, or case reports**
- **Creation of curricula, evaluation tools, didactic educational activities, or electronic educational materials**
- **Contribution to professional committees, educational organizations, or editorial boards**
- **Innovations in education**

**IV.D.2.b) The program must demonstrate dissemination of scholarly activity within and external to the program by the following methods:**

1080

**Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the fellows’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.**

**IV.D.2.b).(1)**

faculty participation in grand rounds, posters, workshops, quality improvement presentations, podium presentations, grant leadership, non-peer-reviewed print/electronic resources, articles or publications, book chapters, textbooks, webinars, service on professional committees, or serving as a journal reviewer, journal editorial board member, or editor; (Outcome)‡

**IV.D.2.b).(2)**

peer-reviewed publication. (Outcome)

**IV.D.2.b).(2).(a)**

All core faculty members must demonstrate significant contributions to the subspecialty of medical toxicology through scholarly activity. (Core)

**IV.D.2.b).(2).(a).(i)**

Each core physician faculty member must demonstrate at least one piece of scholarly activity per year, averaged over the past five years. (Core)

**IV.D.2.b).(2).(a).(ii)**

There should be at least one scientific peer-reviewed publication for every two core physician faculty members per year, averaged over the previous five years. (Detail)

**IV.D.3. Fellow Scholarly Activity**

**IV.D.3.a)**

The curriculum must advance fellows’ knowledge of the basic principles of research, including how research is conducted, evaluated, explained to patients, and applied to patient care. (Core)

**IV.D.3.b)**

Fellows must participate in research or scholarly activity that includes at least one of the following:

**IV.D.3.b).(1)**

peer-reviewed funding and research; (Outcome)

**IV.D.3.b).(2)**

publication of original research or review articles; or, (Outcome)

**IV.D.3.b).(3)**

presentations at local, regional, or national professional

and scientific society meetings. (Outcome)

1122  
1123  
1124 IV.D.3.c) Fellows must complete a scholarly project prior to graduation.  
1125 (Outcome)  
1126

1127 **IV.E. Fellowship programs may assign fellows to engage in the independent**  
1128 **practice of their core specialty during their fellowship program.**  
1129

1130 **IV.E.1. If programs permit their fellows to utilize the independent practice**  
1131 **option, it must not exceed 20 percent of their time per week or 10**  
1132 **weeks of an academic year.** (Core)  
1133

**Background and Intent: Fellows who have previously completed residency programs have demonstrated sufficient competence to enter autonomous practice within their core specialty. This option is designed to enhance fellows' maturation and competence in their core specialty. This enables fellows to occupy a dual role in the health system: as learners in their subspecialty, and as credentialed practitioners in their core specialty. Hours worked in independent practice during fellowship still fall under the clinical and educational work hour limits. See Program Directors' Guide for more details.**

1134  
1135 IV.E.2. Fellows should maintain their primary specialty Board skills during the  
1136 fellowship. (Core)(Detail) [Moved from IV.C.5.]  
1137

1138 IV.E.2.a) ~~Fellows should not provide more than 12 hours per week of~~  
1139 ~~clinical practice unrelated to medical toxicology averaged over~~  
1140 ~~four weeks.~~ (Detail) [Moved from IV.C.5.a)]  
1141

**Specialty-Specific Background and Intent: The Review Committee for Emergency Medicine considers the requirements above to be exclusive of moonlighting. Additional time spent by the fellows in the engagement of independent practice of their core specialty beyond the maximum stated in the requirements will be considered moonlighting, and will be counted toward the 80-hour maximum clinical time per week.**

1142  
1143 **V. Evaluation**

1144  
1145 **V.A. Fellow Evaluation**

1146  
1147 **V.A.1. Feedback and Evaluation**  
1148

**Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.**

**Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:**

- fellows identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

1149  
1150  
1151  
1152  
1153

- V.A.1.a)** Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. <sup>(Core)</sup>

**Background and Intent:** Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

1154  
1155  
1156  
1157  
1158  
1159  
1160

1163  
1164  
1165  
1166  
1167  
1168  
1169  
1170  
1171  
1172  
1173  
1174

- V.A.1.b)** Evaluation must be documented at the completion of the assignment. <sup>(Core)</sup>
- V.A.1.b).(1)** For block rotations of greater than three months in duration, evaluation must be documented at least every three months. <sup>(Core)</sup>
- V.A.1.b).(2)** Longitudinal experiences such as continuity clinic in the context of other clinical responsibilities must be evaluated at least every three months and at completion. <sup>(Core)</sup>
- V.A.1.c)** The program must provide an objective performance evaluation based on the Competencies and the subspecialty-specific Milestones, and must: <sup>(Core)</sup>
- V.A.1.c).(1)** use multiple evaluators (e.g., faculty members, peers, patients, self, and other professional staff members); and, <sup>(Core)</sup>

1175 V.A.1.c).(2) provide that information to the Clinical Competency  
1176 Committee for its synthesis of progressive fellow  
1177 performance and improvement toward unsupervised  
1178 practice. <sup>(Core)</sup>  
1179

**Background and Intent:** The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

1180  
1181 V.A.1.d) The program director or their designee, with input from the  
1182 Clinical Competency Committee, must:  
1183

1184 V.A.1.d).(1) meet with and review with each fellow their  
1185 documented semi-annual evaluation of performance,  
1186 including progress along the subspecialty-specific  
1187 Milestones. <sup>(Core)</sup>  
1188

1189 V.A.1.d).(2) assist fellows in developing individualized learning  
1190 plans to capitalize on their strengths and identify areas  
1191 for growth; and, <sup>(Core)</sup>  
1192

1193 V.A.1.d).(3) develop plans for fellows failing to progress, following  
1194 institutional policies and procedures. <sup>(Core)</sup>  
1195

**Background and Intent:** Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

1196

1197	<b>V.A.1.e)</b>	<b>At least annually, there must be a summative evaluation of each fellow that includes their readiness to progress to the next year of the program, if applicable.</b> <sup>(Core)</sup>

1245		
1246		

- 1247 **V.A.3.b).(2)** determine each fellow’s progress on achievement of  
 1248 the subspecialty-specific Milestones; and, <sup>(Core)</sup>  
 1249  
 1250 **V.A.3.b).(3)** meet prior to the fellows’ semi-annual evaluations and  
 1251 advise the program director regarding each fellow’s  
 1252 progress. <sup>(Core)</sup>  
 1253  
 1254 **V.B. Faculty Evaluation**  
 1255  
 1256 **V.B.1.** The program must have a process to evaluate each faculty  
 1257 member’s performance as it relates to the educational program at  
 1258 least annually. <sup>(Core)</sup>  
 1259

**Background and Intent:** The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program’s faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 1260  
 1261 **V.B.1.a)** This evaluation must include a review of the faculty member’s  
 1262 clinical teaching abilities, engagement with the educational  
 1263 program, participation in faculty development related to their  
 1264 skills as an educator, clinical performance, professionalism,  
 1265 and scholarly activities. <sup>(Core)</sup>  
 1266  
 1267 **V.B.1.b)** This evaluation must include written, confidential evaluations  
 1268 by the fellows. <sup>(Core)</sup>  
 1269  
 1270 **V.B.2.** Faculty members must receive feedback on their evaluations at least  
 1271 annually. <sup>(Core)</sup>  
 1272  
 1273 **V.B.3.** Results of the faculty educational evaluations should be  
 1274 incorporated into program-wide faculty development plans. <sup>(Core)</sup>  
 1275

**Background and Intent:** The quality of the faculty’s teaching and clinical care is a determinant of the quality of the program and the quality of the fellows’ future clinical care. Therefore, the program has the responsibility to evaluate and improve the

**program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.**

- 1276  
1277 **V.C. Program Evaluation and Improvement**  
1278  
1279 **V.C.1. The program director must appoint the Program Evaluation**  
1280 **Committee to conduct and document the Annual Program**  
1281 **Evaluation as part of the program's continuous improvement**  
1282 **process. (Core)**  
1283  
1284 **V.C.1.a) The Program Evaluation Committee must be composed of at**  
1285 **least two program faculty members, at least one of whom is a**  
1286 **core faculty member, and at least one fellow. (Core)**  
1287  
1288 **V.C.1.b) Program Evaluation Committee responsibilities must include:**  
1289  
1290 **V.C.1.b).(1) acting as an advisor to the program director, through**  
1291 **program oversight; (Core)**  
1292  
1293 **V.C.1.b).(2) review of the program's self-determined goals and**  
1294 **progress toward meeting them; (Core)**  
1295  
1296 **V.C.1.b).(3) guiding ongoing program improvement, including**  
1297 **development of new goals, based upon outcomes;**  
1298 **and, (Core)**  
1299  
1300 **V.C.1.b).(4) review of the current operating environment to identify**  
1301 **strengths, challenges, opportunities, and threats as**  
1302 **related to the program's mission and aims. (Core)**  
1303

**Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.**

- 1304  
1305 **V.C.1.c) The Program Evaluation Committee should consider the**  
1306 **following elements in its assessment of the program:**

1366		
1367	<b>V.C.2.a)</b>	<b>A summary of the Self-Study must be submitted to the DIO.</b> <sup>(Core)</sup>
1368		

**Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.**

1370

1371

**V.C.3. *One goal of ACGME-accredited education is to educate physicians who seek and achieve board certification. One measure of the effectiveness of the educational program is the ultimate pass rate.***

1372

1373

1374

1375

***The program director should encourage all eligible program graduates to take the certifying examination offered by the applicable American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board.***

1376

1377

1378

1379

1380 **V.C.3.a)**

**For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) an annual written exam, in the preceding three years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)**

1381

1382

1383

1384

1385

1386

1387 **V.C.3.b)**

**For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial written exam, in the preceding six years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)**

1388

1389

1390

1391

1392

1393

1394 **V.C.3.c)**

**For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) an annual oral exam, in the preceding three years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)**

1395

1396

1397

1398

1399

1400

1401 **V.C.3.d)**

**For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial oral exam, in the preceding six years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)**

1402

1403

1404

1405

1406

1407

1408 V.C.3.e) For each of the exams referenced in V.C.3.a)-d), any program  
1409 whose graduates over the time period specified in the  
1410 requirement have achieved an 80 percent pass rate will have  
1411 met this requirement, no matter the percentile rank of the  
1412 program for pass rate in that subspecialty. <sup>(Outcome)</sup>  
1413

**Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.**

**There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.**

1414  
1415 V.C.3.f) Programs must report, in ADS, board certification status  
1416 annually for the cohort of board-eligible fellows that  
1417 graduated seven years earlier. <sup>(Core)</sup>  
1418

**Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.**

**The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.**

**In the future, the ACGME may establish parameters related to ultimate board certification rates.**

1419  
1420 VI. The Learning and Working Environment

1421  
1422 *Fellowship education must occur in the context of a learning and working*  
1423 *environment that emphasizes the following principles:*

- 1424
- 1425 • *Excellence in the safety and quality of care rendered to patients by fellows*  
1426 *today*
  - 1427
  - 1428 • *Excellence in the safety and quality of care rendered to patients by today's*  
1429 *fellows in their future practice*
  - 1430
  - 1431 • *Excellence in professionalism through faculty modeling of:*  
1432

- 1433 ○ *the effacement of self-interest in a humanistic environment that supports*
- 1434 *the professional development of physicians*
- 1435
- 1436 ○ *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
- 1437
- 1438 ● *Commitment to the well-being of the students, residents, fellows, faculty*
- 1439 *members, and all members of the health care team*
- 1440

**Background and Intent:** The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

- 1441
- 1442 **VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability**
- 1443
- 1444 **VI.A.1. Patient Safety and Quality Improvement**
- 1445
- 1446 *All physicians share responsibility for promoting patient safety and*
- 1447 *enhancing quality of patient care. Graduate medical education must*
- 1448 *prepare fellows to provide the highest level of clinical care with*
- 1449 *continuous focus on the safety, individual needs, and humanity of*
- 1450 *their patients. It is the right of each patient to be cared for by fellows*
- 1451 *who are appropriately supervised; possess the requisite knowledge,*
- 1452 *skills, and abilities; understand the limits of their knowledge and*
- 1453 *experience; and seek assistance as required to provide optimal*
- 1454 *patient care.*
- 1455
- 1456 *Fellows must demonstrate the ability to analyze the care they*
- 1457 *provide, understand their roles within health care teams, and play an*
- 1458 *active role in system improvement processes. Graduating fellows*

1459 *will apply these skills to critique their future unsupervised practice*  
1460 *and effect quality improvement measures.*

1461  
1462 *It is necessary for fellows and faculty members to consistently work*  
1463 *in a well-coordinated manner with other health care professionals to*  
1464 *achieve organizational patient safety goals.*

1465  
1466 **VI.A.1.a) Patient Safety**

1467  
1468 **VI.A.1.a).(1) Culture of Safety**

1469  
1470 *A culture of safety requires continuous identification*  
1471 *of vulnerabilities and a willingness to transparently*  
1472 *deal with them. An effective organization has formal*  
1473 *mechanisms to assess the knowledge, skills, and*  
1474 *attitudes of its personnel toward safety in order to*  
1475 *identify areas for improvement.*

1476  
1477 **VI.A.1.a).(1).(a)** The program, its faculty, residents, and fellows  
1478 must actively participate in patient safety  
1479 systems and contribute to a culture of safety.  
1480 (Core)

1481  
1482 **VI.A.1.a).(1).(b)** The program must have a structure that  
1483 promotes safe, interprofessional, team-based  
1484 care. (Core)

1485  
1486 **VI.A.1.a).(2) Education on Patient Safety**

1487  
1488 Programs must provide formal educational activities  
1489 that promote patient safety-related goals, tools, and  
1490 techniques. (Core)

**Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.**

1492  
1493 **VI.A.1.a).(3) Patient Safety Events**

1494  
1495 *Reporting, investigation, and follow-up of adverse*  
1496 *events, near misses, and unsafe conditions are pivotal*  
1497 *mechanisms for improving patient safety, and are*  
1498 *essential for the success of any patient safety*  
1499 *program. Feedback and experiential learning are*  
1500 *essential to developing true competence in the ability*  
1501 *to identify causes and institute sustainable systems-*  
1502 *based changes to ameliorate patient safety*  
1503 *vulnerabilities.*

1504  
1505 **VI.A.1.a).(3).(a)** Residents, fellows, faculty members, and other  
1506 clinical staff members must:

1507

1508	VI.A.1.a).(3).(a).(i)	know their responsibilities in reporting patient safety events at the clinical site; (Core)

1567	<b>VI.A.1.b).(3)</b>	<b>Engagement in Quality Improvement Activities</b>
1568		
1569		<b><i>Experiential learning is essential to developing the ability to identify and institute sustainable systems-based changes to improve patient care.</i></b>
1570		
1571		
1572		
1573	<b>VI.A.1.b).(3).(a)</b>	<b>Fellows must have the opportunity to participate in interprofessional quality improvement activities. <sup>(Core)</sup></b>
1574		
1575		
1576		
1577	<b>VI.A.1.b).(3).(a).(i)</b>	<b>This should include activities aimed at reducing health care disparities. <sup>(Detail)</sup></b>
1578		
1579		
1580	<b>VI.A.2.</b>	<b>Supervision and Accountability</b>
1581		
1582	<b>VI.A.2.a)</b>	<b><i>Although the attending physician is ultimately responsible for the care of the patient, every physician shares in the responsibility and accountability for their efforts in the provision of care. Effective programs, in partnership with their Sponsoring Institutions, define, widely communicate, and monitor a structured chain of responsibility and accountability as it relates to the supervision of all patient care.</i></b>
1583		
1584		
1585		
1586		
1587		
1588		
1589		
1590		
1591		<b><i>Supervision in the setting of graduate medical education provides safe and effective care to patients; ensures each fellow's development of the skills, knowledge, and attitudes required to enter the unsupervised practice of medicine; and establishes a foundation for continued professional growth.</i></b>
1592		
1593		
1594		
1595		
1596		
1597	<b>VI.A.2.a).(1)</b>	<b>Each patient must have an identifiable and appropriately-credentialed and privileged attending physician (or licensed independent practitioner as specified by the applicable Review Committee) who is responsible and accountable for the patient's care. <sup>(Core)</sup></b>
1598		
1599		
1600		
1601		
1602		
1603		
1604	<b>VI.A.2.a).(1).(a)</b>	<b>This information must be available to fellows, faculty members, other members of the health care team, and patients. <sup>(Core)</sup></b>
1605		
1606		
1607		

1608 VI.A.2.a).(1).(b) Fellows and faculty members must inform each  
1609 patient of their respective roles in that patient's  
1610 care when providing direct patient care. <sup>(Core)</sup>  
1611

1612 VI.A.2.b) *Supervision may be exercised through a variety of methods.*  
1613 *For many aspects of patient care, the supervising physician*  
1614 *may be a more advanced fellow. Other portions of care*  
1615 *provided by the fellow can be adequately supervised by the*  
1616 *appropriate availability of the supervising faculty member or*  
1617 *fellow, either on site or by means of telecommunication*  
1618 *technology. Some activities require the physical presence of*  
1619 *the supervising faculty member. In some circumstances,*  
1620 *supervision may include post-hoc review of fellow-delivered*  
1621 *care with feedback.*  
1622

**Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.**

1623  
1624 VI.A.2.b).(1) The program must demonstrate that the appropriate  
1625 level of supervision in place for all fellows is based on  
1626 each fellow's level of training and ability, as well as  
1627 patient complexity and acuity. Supervision may be  
1628 exercised through a variety of methods, as appropriate  
1629 to the situation. <sup>(Core)</sup>  
1630

1631 VI.A.2.b).(1).(a) Fellows must be provided with prompt, reliable  
1632 systems for communication and interactions with  
1633 supervisory physicians. <sup>(Core)</sup>  
1634

1635 VI.A.2.b).(2) The program must define when physical presence of a  
1636 supervising physician is required. <sup>(Core)</sup>  
1637

1638 VI.A.2.c) Levels of Supervision  
1639

1640 To promote appropriate fellow supervision while providing  
1641 for graded authority and responsibility, the program must use  
1642 the following classification of supervision: <sup>(Core)</sup>  
1643

1644 VI.A.2.c).(1) Direct Supervision:

1645  
1646 VI.A.2.c).(1).(a) the supervising physician is physically present  
1647 with the fellow during the key portions of the  
1648 patient interaction; or, <sup>(Core)</sup>  
1649

1650 VI.A.2.c).(1).(b) the supervising physician and/or patient is not  
1651 physically present with the fellow and the  
1652 supervising physician is concurrently  
1653 monitoring the patient care through appropriate  
1654 telecommunication technology. <sup>(Core)</sup>  
1655

1656 VI.A.2.c).(1).(b).(i) The program must have clear guidelines  
1657 that delineate which Competencies must be  
1658 met to determine when a fellow can  
1659 progress to be supervised indirectly. <sup>(Core)</sup>  
1660

Specialty-Specific Background and Intent: When delineating the Competencies necessary for fellow progression to be supervised indirectly, the Review Committee suggests the Competencies include Milestones or other program-derived assessments.

1661  
1662 VI.A.2.c).(1).(b).(ii) The program director must ensure that clear  
1663 expectations exist and are communicated to  
1664 the fellows, and that these expectations  
1665 outline specific situations in which a fellow  
1666 would still require direct supervision. <sup>(Core)</sup>  
1667

1668 VI.A.2.c).(2) **Indirect Supervision: the supervising physician is not**  
1669 **providing physical or concurrent visual or audio**  
1670 **supervision but is immediately available to the fellow**  
1671 **for guidance and is available to provide appropriate**  
1672 **direct supervision.** <sup>(Core)</sup>  
1673

1674 VI.A.2.c).(3) **Oversight – the supervising physician is available to**  
1675 **provide review of procedures/encounters with**  
1676 **feedback provided after care is delivered.** <sup>(Core)</sup>  
1677

1678 VI.A.2.d) **The privilege of progressive authority and responsibility,**  
1679 **conditional independence, and a supervisory role in patient**  
1680 **care delegated to each fellow must be assigned by the**  
1681 **program director and faculty members.** <sup>(Core)</sup>  
1682

1683 VI.A.2.d).(1) **The program director must evaluate each fellow’s**  
1684 **abilities based on specific criteria, guided by the**  
1685 **Milestones.** <sup>(Core)</sup>  
1686

1687 VI.A.2.d).(2) **Faculty members functioning as supervising**  
1688 **physicians must delegate portions of care to fellows**  
1689 **based on the needs of the patient and the skills of**  
1690 **each fellow.** <sup>(Core)</sup>  
1691

1692 VI.A.2.d).(3) **Fellows should serve in a supervisory role to junior**  
1693 **fellows and residents in recognition of their progress**  
1694 **toward independence, based on the needs of each**  
1695 **patient and the skills of the individual resident or**  
1696 **fellow.** <sup>(Detail)</sup>  
1697

1698 VI.A.2.e) Programs must set guidelines for circumstances and events  
1699 in which fellows must communicate with the supervising  
1700 faculty member(s). <sup>(Core)</sup>

1701  
1702 VI.A.2.e).(1) Each fellow must know the limits of their scope of  
1703 authority, and the circumstances under which the  
1704 fellow is permitted to act with conditional  
1705 independence. <sup>(Outcome)</sup>  
1706

**Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.**

1707  
1708 VI.A.2.f) Faculty supervision assignments must be of sufficient  
1709 duration to assess the knowledge and skills of each fellow  
1710 and to delegate to the fellow the appropriate level of patient  
1711 care authority and responsibility. <sup>(Core)</sup>  
1712

1713 VI.B. Professionalism

1714  
1715 VI.B.1. Programs, in partnership with their Sponsoring Institutions, must  
1716 educate fellows and faculty members concerning the professional  
1717 responsibilities of physicians, including their obligation to be  
1718 appropriately rested and fit to provide the care required by their  
1719 patients. <sup>(Core)</sup>  
1720

1721 VI.B.2. The learning objectives of the program must:

1722  
1723 VI.B.2.a) be accomplished through an appropriate blend of supervised  
1724 patient care responsibilities, clinical teaching, and didactic  
1725 educational events; <sup>(Core)</sup>  
1726

1727 VI.B.2.b) be accomplished without excessive reliance on fellows to  
1728 fulfill non-physician obligations; and, <sup>(Core)</sup>  
1729

**Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.**

1730  
1731 VI.B.2.c) ensure manageable patient care responsibilities. <sup>(Core)</sup>  
1732

**Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY**

level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1746
- VI.B.3. The program director, in partnership with the Sponsoring Institution, must provide a culture of professionalism that supports patient safety and personal responsibility. <sup>(Core)</sup>
  - VI.B.4. Fellows and faculty members must demonstrate an understanding of their personal role in the:
    - VI.B.4.a) provision of patient- and family-centered care; <sup>(Outcome)</sup>
    - VI.B.4.b) safety and welfare of patients entrusted to their care, including the ability to report unsafe conditions and adverse events; <sup>(Outcome)</sup>

**Background and Intent:** This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

- 1747  
1748  
1749
- VI.B.4.c) assurance of their fitness for work, including: <sup>(Outcome)</sup>

**Background and Intent:** This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

1765  
1766  
1767  
1768
- VI.B.4.c).(1) management of their time before, during, and after clinical assignments; and, <sup>(Outcome)</sup>
  - VI.B.4.c).(2) recognition of impairment, including from illness, fatigue, and substance use, in themselves, their peers, and other members of the health care team. <sup>(Outcome)</sup>
  - VI.B.4.d) commitment to lifelong learning; <sup>(Outcome)</sup>
  - VI.B.4.e) monitoring of their patient care performance improvement indicators; and, <sup>(Outcome)</sup>
  - VI.B.4.f) accurate reporting of clinical and educational work hours, patient outcomes, and clinical experience data. <sup>(Outcome)</sup>
  - VI.B.5. All fellows and faculty members must demonstrate responsiveness to patient needs that supersedes self-interest. This includes the recognition that under certain circumstances, the best interests of

- 1769 the patient may be served by transitioning that patient's care to  
 1770 another qualified and rested provider. (Outcome)  
 1771  
 1772 **VI.B.6.** Programs, in partnership with their Sponsoring Institutions, must  
 1773 provide a professional, equitable, respectful, and civil environment  
 1774 that is free from discrimination, sexual and other forms of  
 1775 harassment, mistreatment, abuse, or coercion of students, fellows,  
 1776 faculty, and staff. (Core)  
 1777  
 1778 **VI.B.7.** Programs, in partnership with their Sponsoring Institutions, should  
 1779 have a process for education of fellows and faculty regarding  
 1780 unprofessional behavior and a confidential process for reporting,  
 1781 investigating, and addressing such concerns. (Core)  
 1782  
 1783 **VI.C. Well-Being**  
 1784  
 1785 *Psychological, emotional, and physical well-being are critical in the*  
 1786 *development of the competent, caring, and resilient physician and require*  
 1787 *proactive attention to life inside and outside of medicine. Well-being*  
 1788 *requires that physicians retain the joy in medicine while managing their*  
 1789 *own real life stresses. Self-care and responsibility to support other*  
 1790 *members of the health care team are important components of*  
 1791 *professionalism; they are also skills that must be modeled, learned, and*  
 1792 *nurtured in the context of other aspects of fellowship training.*  
 1793  
 1794 *Fellows and faculty members are at risk for burnout and depression.*  
 1795 *Programs, in partnership with their Sponsoring Institutions, have the same*  
 1796 *responsibility to address well-being as other aspects of resident*  
 1797 *competence. Physicians and all members of the health care team share*  
 1798 *responsibility for the well-being of each other. For example, a culture which*  
 1799 *encourages covering for colleagues after an illness without the expectation*  
 1800 *of reciprocity reflects the ideal of professionalism. A positive culture in a*  
 1801 *clinical learning environment models constructive behaviors, and prepares*  
 1802 *fellows with the skills and attitudes needed to thrive throughout their*  
 1803 *careers.*  
 1804

**Background and Intent:** The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

**As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.**

1805

1806 VI.C.1. The responsibility of the program, in partnership with the  
1807 Sponsoring Institution, to address well-being must include:

1808  
1809 VI.C.1.a) efforts to enhance the meaning that each fellow finds in the  
1810 experience of being a physician, including protecting time  
1811 with patients, minimizing non-physician obligations,  
1812 providing administrative support, promoting progressive  
1813 autonomy and flexibility, and enhancing professional  
1814 relationships; (Core)

1815  
1816 VI.C.1.b) attention to scheduling, work intensity, and work  
1817 compression that impacts fellow well-being; (Core)

1818  
1819 VI.C.1.c) evaluating workplace safety data and addressing the safety of  
1820 fellows and faculty members; (Core)

1821

**Background and Intent:** This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

1822  
1823 VI.C.1.d) policies and programs that encourage optimal fellow and  
1824 faculty member well-being; and, (Core)

1825

**Background and Intent:** Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

1826  
1827 VI.C.1.d).(1) Fellows must be given the opportunity to attend  
1828 medical, mental health, and dental care appointments,  
1829 including those scheduled during their working hours.  
1830 (Core)

1831

**Background and Intent:** The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

1832  
1833 VI.C.1.e) attention to fellow and faculty member burnout, depression,  
1834 and substance use disorder. The program, in partnership with  
1835 its Sponsoring Institution, must educate faculty members and  
1836 fellows in identification of the symptoms of burnout,  
1837 depression, and substance use disorder, including means to  
1838 assist those who experience these conditions. Fellows and  
1839 faculty members must also be educated to recognize those  
1840 symptoms in themselves and how to seek appropriate care.

1841  
1842  
1843

The program, in partnership with its Sponsoring Institution, must: <sup>(Core)</sup>

**Background - and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance use disorder. Materials and more information are available on the Physician Well-being section of the ACGME website (<http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being>).**

1844  
1845  
1846  
1847  
1848  
1849  
1850  
1851  
1852

**VI.C.1.e).(1)**

**encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another fellow, resident, or faculty member may be displaying signs of burnout, depression, a substance use disorder, suicidal ideation, or potential for violence;**  
<sup>(Core)</sup>

**Background and Intent: Individuals experiencing burnout, depression, substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.**

1853  
1854  
1855  
1856  
1857  
1858  
1859  
1860  
1861

**VI.C.1.e).(2)**

**provide access to appropriate tools for self-screening; and,** <sup>(Core)</sup>

**VI.C.1.e).(3)**

**provide access to confidential, affordable mental health assessment, counseling, and treatment, including access to urgent and emergent care 24 hours a day, seven days a week.** <sup>(Core)</sup>

**Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.**

**The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.**

- 1862  
1863 **VI.C.2.** There are circumstances in which fellows may be unable to attend  
1864 work, including but not limited to fatigue, illness, family  
1865 emergencies, and parental leave. Each program must allow an  
1866 appropriate length of absence for fellows unable to perform their  
1867 patient care responsibilities. <sup>(Core)</sup>  
1868
- 1869 **VI.C.2.a)** The program must have policies and procedures in place to  
1870 ensure coverage of patient care. <sup>(Core)</sup>  
1871
- 1872 **VI.C.2.b)** These policies must be implemented without fear of negative  
1873 consequences for the fellow who is or was unable to provide  
1874 the clinical work. <sup>(Core)</sup>  
1875

**Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.**

- 1876  
1877 **VI.D. Fatigue Mitigation**  
1878
- 1879 **VI.D.1. Programs must:**
- 1880
- 1881 **VI.D.1.a)** educate all faculty members and fellows to recognize the  
1882 signs of fatigue and sleep deprivation; <sup>(Core)</sup>  
1883
- 1884 **VI.D.1.b)** educate all faculty members and fellows in alertness  
1885 management and fatigue mitigation processes; and, <sup>(Core)</sup>  
1886
- 1887 **VI.D.1.c)** encourage fellows to use fatigue mitigation processes to  
1888 manage the potential negative effects of fatigue on patient  
1889 care and learning. <sup>(Detail)</sup>

**Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.**

**This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.**

- 1891  
1892 **VI.D.2.** Each program must ensure continuity of patient care, consistent  
1893 with the program's policies and procedures referenced in VI.C.2–

- 1894 VI.C.2.b), in the event that a fellow may be unable to perform their  
 1895 patient care responsibilities due to excessive fatigue. <sup>(Core)</sup>  
 1896  
 1897 VI.D.3. The program, in partnership with its Sponsoring Institution, must  
 1898 ensure adequate sleep facilities and safe transportation options for  
 1899 fellows who may be too fatigued to safely return home. <sup>(Core)</sup>  
 1900  
 1901 VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care  
 1902  
 1903 VI.E.1. Clinical Responsibilities  
 1904  
 1905 The clinical responsibilities for each fellow must be based on PGY  
 1906 level, patient safety, fellow ability, severity and complexity of patient  
 1907 illness/condition, and available support services. <sup>(Core)</sup>  
 1908  
 1909 VI.E.1.a) The program must provide progressive responsibility for and  
 1910 experience in the management of clinical problems. <sup>(Core)</sup>  
 1911

**Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.**

- 1912  
 1913 VI.E.2. Teamwork  
 1914  
 1915 Fellows must care for patients in an environment that maximizes  
 1916 communication. This must include the opportunity to work as a  
 1917 member of effective interprofessional teams that are appropriate to  
 1918 the delivery of care in the subspecialty and larger health system.  
 1919 <sup>(Core)</sup>  
 1920  
 1921 VI.E.2.a) Contributors to effective interprofessional teams may include  
 1922 consulting physicians, nurses, pharmacologists, botanists,  
 1923 herpetologists, mycologists, police officers, and other professional  
 1924 and paraprofessional personnel involved in the assessment and  
 1925 treatment of patients. <sup>(Detail)</sup>  
 1926  
 1927 VI.E.3. Transitions of Care  
 1928  
 1929 VI.E.3.a) Programs must design clinical assignments to optimize  
 1930 transitions in patient care, including their safety, frequency,  
 1931 and structure. <sup>(Core)</sup>  
 1932  
 1933 VI.E.3.b) Programs, in partnership with their Sponsoring Institutions,  
 1934 must ensure and monitor effective, structured hand-over  
 1935 processes to facilitate both continuity of care and patient  
 1936 safety. <sup>(Core)</sup>

1937		
1938	VI.E.3.c)	<b>Programs must ensure that fellows are competent in communicating with team members in the hand-over process.</b>
1939		(Outcome)
1940		
1941		
1942	VI.E.3.d)	<b>Programs and clinical sites must maintain and communicate schedules of attending physicians and fellows currently responsible for care.</b> (Core)
1943		
1944		
1945		
1946	VI.E.3.e)	<b>Each program must ensure continuity of patient care, consistent with the program’s policies and procedures referenced in VI.C.2-VI.C.2.b), in the event that a fellow may be unable to perform their patient care responsibilities due to excessive fatigue or illness, or family emergency.</b> (Core)

1951		
1952	VI.F.	<b>Clinical Experience and Education</b>
1953		
1954		<i>Programs, in partnership with their Sponsoring Institutions, must design an effective program structure that is configured to provide fellows with educational and clinical experience opportunities, as well as reasonable opportunities for rest and personal activities.</i>
1955		
1956		
1957		
1958		

**Background and Intent:** In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

1959		
1960	VI.F.1.	<b>Maximum Hours of Clinical and Educational Work per Week</b>
1961		
1962		<b>Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting.</b> (Core)
1963		
1964		
1965		
1966		

**Background and Intent:** Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

**Scheduling**

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to

work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

### ***Oversight***

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

### ***Work from Home***

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

1969

## **VI.F.2. Mandatory Time Free of Clinical Work and Education**

- 1970 VI.F.2.a) The program must design an effective program structure that  
 1971 is configured to provide fellows with educational  
 1972 opportunities, as well as reasonable opportunities for rest  
 1973 and personal well-being. <sup>(Core)</sup>  
 1974
- 1975 VI.F.2.b) Fellows should have eight hours off between scheduled  
 1976 clinical work and education periods. <sup>(Detail)</sup>  
 1977
- 1978 VI.F.2.b).(1) There may be circumstances when fellows choose to  
 1979 stay to care for their patients or return to the hospital  
 1980 with fewer than eight hours free of clinical experience  
 1981 and education. This must occur within the context of  
 1982 the 80-hour and the one-day-off-in-seven  
 1983 requirements. <sup>(Detail)</sup>  
 1984

**Background and Intent:** While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

- 1985
- 1986 VI.F.2.c) Fellows must have at least 14 hours free of clinical work and  
 1987 education after 24 hours of in-house call. <sup>(Core)</sup>  
 1988

**Background and Intent:** Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

- 1989
- 1990 VI.F.2.d) Fellows must be scheduled for a minimum of one day in  
 1991 seven free of clinical work and required education (when  
 1992 averaged over four weeks). At-home call cannot be assigned  
 1993 on these free days. <sup>(Core)</sup>  
 1994

**Background and Intent:** The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is

defined in the ACGME Glossary of Terms as “one (1) continuous 24-hour period free from all administrative, clinical, and educational activities.”

**VI.F.3. Maximum Clinical Work and Education Period Length**

**VI.F.3.a) Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical assignments. <sup>(Core)</sup>**

**VI.F.3.a).(1) Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or fellow education. <sup>(Core)</sup>**

**VI.F.3.a).(1).(a) Additional patient care responsibilities must not be assigned to a fellow during this time. <sup>(Core)</sup>**

**Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.**

**VI.F.4. Clinical and Educational Work Hour Exceptions**

**VI.F.4.a) In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:**

**VI.F.4.a).(1) to continue to provide care to a single severely ill or unstable patient; <sup>(Detail)</sup>**

**VI.F.4.a).(2) humanistic attention to the needs of a patient or family; or, <sup>(Detail)</sup>**

**VI.F.4.a).(3) to attend unique educational events. <sup>(Detail)</sup>**

**VI.F.4.b) These additional hours of care or education will be counted toward the 80-hour weekly limit. <sup>(Detail)</sup>**

**Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and**

that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

2069  
2070

**VI.F.7.**                      **Maximum In-House On-Call Frequency**

**Fellows must be scheduled for in-house call no more frequently than every third night (when averaged over a four-week period). <sup>(Core)</sup>**

**VI.F.8.**                      **At-Home Call**

**VI.F.8.a)**                      **Time spent on patient care activities by fellows on at-home call must count toward the 80-hour maximum weekly limit. The frequency of at-home call is not subject to the every-third-night limitation, but must satisfy the requirement for one day in seven free of clinical work and education, when averaged over four weeks. <sup>(Core)</sup>**

2071 VI.F.8.a).(1) At-home call must not be so frequent or taxing as to  
2072 preclude rest or reasonable personal time for each  
2073 fellow. <sup>(Core)</sup>

2074  
2075 VI.F.8.b) Fellows are permitted to return to the hospital while on at-  
2076 home call to provide direct care for new or established  
2077 patients. These hours of inpatient patient care must be  
2078 included in the 80-hour maximum weekly limit. <sup>(Detail)</sup>  
2079

**Background and Intent:** This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

**In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.**
