VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability	36
VI.B. Professionalism	42
VI.C. Well-Being	44
VI.D. Fatigue Mitigation	47
VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care	48
VI.F. Clinical Experience and Education	49

48
49 The subspecialty of undersea and hyperbaric medicine is a discipline that deals
50 with the prevention of injury and illness due to exposure to environments in which
51 the ambient pressure is increased, such as in diving or hyperbaric chamber
52 exposure, and the therapeutic use of high environmental pressure and the
53 delivery of oxygen under high pressure to treat disease. The scope of the
54 subspecialty emphasizes the occupational, environmental, safety, and clinical
55 aspects of diving, hyperbaric chamber operations, compressed air work, and
56 hyperbaric oxygen therapy.

57
58 **Int.C. Length of Educational Program**

59
60 The educational program in undersea and hyperbaric medicine must be 12
61 months in length. ^{(Core)*}

62
63 **I. Oversight**

64
65 **I.A. Sponsoring Institution**

66
67 *The Sponsoring Institution is the organization or entity that assumes the*
68 *ultimate financial and academic responsibility for a program of graduate*
69 *medical education consistent with the ACGME Institutional Requirements.*

70
71 *When the Sponsoring Institution is not a rotation site for the program, the*
72 *most commonly utilized site of clinical activity for the program is the*
73 *primary clinical site.*

74

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

75
76 **I.A.1. The program must be sponsored by one ACGME-accredited**
77 **Sponsoring Institution.** ^(Core)

78
79 **I.B. Participating Sites**

80
81 *A participating site is an organization providing educational experiences or*
82 *educational assignments/rotations for fellows.*

83
84 **I.B.1. The program, with approval of its Sponsoring Institution, must**
85 **designate a primary clinical site.** ^(Core)

86
87 **I.B.1.a)** The Sponsoring Institution should also sponsor an ACGME-
88 accredited residency program in emergency medicine or
89 preventive medicine. ^(Core)

- 90
91 **I.B.2.** There must be a program letter of agreement (PLA) between the
92 program and each participating site that governs the relationship
93 between the program and the participating site providing a required
94 assignment. ^(Core)
95
96 **I.B.2.a)** The PLA must:
97
98 **I.B.2.a).(1)** be renewed at least every 10 years; and, ^(Core)
99
100 **I.B.2.a).(2)** be approved by the designated institutional official
101 (DIO). ^(Core)
102
103 **I.B.3.** The program must monitor the clinical learning and working
104 environment at all participating sites. ^(Core)
105
106 **I.B.3.a)** At each participating site there must be one faculty member,
107 designated by the program director, who is accountable for
108 fellow education for that site, in collaboration with the
109 program director. ^(Core)
110

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for fellows
- Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern fellow education during the assignment

- 111
112 **I.B.4.** The program director must submit any additions or deletions of
113 participating sites routinely providing an educational experience,
114 required for all fellows, of one month full time equivalent (FTE) or
115 more through the ACGME's Accreditation Data System (ADS). ^(Core)
116
117 **I.B.5.** The program must be based at a primary hospital (hereafter referred to as
118 the primary clinical site). ^(Core)
119

- 120 I.B.6. Required experiences not available at the primary clinical site, including
 121 clinical experience in critical care areas, must be provided through a
 122 participating site. ^(Core)
 123
- 124 I.B.7. Programs using multiple participating sites must ensure a unified
 125 educational experience for the fellows. ^(Core)
 126
- 127 I.B.7.a) Each participating site must offer significant educational
 128 opportunities to the overall program. ^(Core)
 129
- 130 I.B.7.b) Required rotations to participating sites that are geographically
 131 distant from the Sponsoring Institution must offer educational
 132 opportunities, unavailable locally, that significantly augment the
 133 fellows' overall educational experience. ^{(Detail)†}
 134
- 135 I.B.8. The number and location of participating sites must not preclude fellows'
 136 participation in conferences and other educational experiences. ^(Core)
 137
- 138 **I.C. The program, in partnership with its Sponsoring Institution, must engage in**
 139 **practices that focus on mission-driven, ongoing, systematic recruitment**
 140 **and retention of a diverse and inclusive workforce of residents (if present),**
 141 **fellows, faculty members, senior administrative staff members, and other**
 142 **relevant members of its academic community.** ^(Core)
 143

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

- 144
- 145 **I.D. Resources**
- 146
- 147 **I.D.1. The program, in partnership with its Sponsoring Institution, must**
 148 **ensure the availability of adequate resources for fellow education.**
 149 ^(Core)
 150
- 151 I.D.1.a) All participating sites must provide appropriate support services to
 152 ensure an adequate educational experience. ^(Core)
 153
- 154 I.D.1.a).(1) This includes support personnel and physical resources to
 155 ensure that fellows have sufficient time and space to carry
 156 out their clinical and educational responsibilities. ^(Core)
 157
- 158 I.D.1.b) Space and Equipment
- 159
- 160 Adequate space must be available for faculty members to perform
 161 their educational, research, and administrative responsibilities.
 162 ^(Core)
 163

164	I.D.1.b).(1)	Adequate conference and teaching space must be available for didactic and case conferences. (Core) -(Detail)
165		
166		
167	I.D.1.c)	Inpatient, Ambulatory Care, Laboratory, and Other Clinical Facilities
168		
169		
170	I.D.1.c).(1)	A hyperbaric chamber capable of treatment of the full range of conditions amenable to hyperbaric oxygen therapy must be available. ^(Core)
171		
172		
173		
174	I.D.1.c).(2)	A full-service clinical laboratory that is capable of measurement of chemistry, blood indices, and microbiology of patients needing hyperbaric therapy must be available at all times. ^(Core)
175		
176		
177		
178		
179	I.D.1.c).(3)	Radiologic services must be available at all times within the primary clinical site. ^(Core)
180		
181		
182	I.D.1.c).(4)	Inpatient and outpatient facilities, including intensive care units capable of addressing the needs of patients with respiratory toxicants, gas forming infections, wound healing problems, gas embolism, and other conditions requiring hyperbaric treatment, must be available. ^(Core)
183		
184		
185		
186		
187		
188	I.D.1.d)	Patient Population
189		
190	I.D.1.d).(1)	There must be a sufficient number and variety of patients of all ages with medical and surgical conditions requiring hyperbaric therapy. ^(Core)
191		
192		
193		
194	I.D.1.d).(2)	The patient population at the primary clinical site must include the majority of emergent and elective indications for hyperbaric therapy. ^(Core)
195		
196		
197		
198	I.D.1.e)	Support Services
199		
200	I.D.1.e).(1)	Support services must include physical therapy, social services, occupational medicine, and psychologic and psychological testing services. ^(Core)
201		
202		
203		
204	I.D.1.e).(2)	<u>The following must be available at the primary clinical site or at a participating site:</u> The following services must be provided at the primary clinical site: ^(Core)
205		
206		
207		
208	I.D.1.e).(2).(a)	24-hour availability of hyperbaric medicine services with at least 100 consultations and 1000 patient treatments per year; ^(Core)
209		
210		
211		
212	I.D.1.e).(2).(b)	an emergency service for both adult and pediatric patients, adult and pediatric inpatient facilities, and
213		

214 adult and pediatric surgical and intensive care
215 facilities; and, ^(Core)

216
217 I.D.1.e).(2).(c) inpatient and outpatient facilities with staff members
218 who consult the hyperbaric medicine service. ^(Core)
219

220 **I.D.2. The program, in partnership with its Sponsoring Institution, must**
221 **ensure healthy and safe learning and working environments that**
222 **promote fellow well-being and provide for:** ^(Core)
223

224 **I.D.2.a) access to food while on duty;** ^(Core)
225

226 **I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available**
227 **and accessible for fellows with proximity appropriate for safe**
228 **patient care;** ^(Core)
229

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

230
231 **I.D.2.c) clean and private facilities for lactation that have refrigeration**
232 **capabilities, with proximity appropriate for safe patient care;**
233 ^(Core)
234

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

235
236 **I.D.2.d) security and safety measures appropriate to the participating**
237 **site; and,** ^(Core)
238

239 **I.D.2.e) accommodations for fellows with disabilities consistent with**
240 **the Sponsoring Institution's policy.** ^(Core)
241

242 **I.D.3. Fellows must have ready access to subspecialty-specific and other**
243 **appropriate reference material in print or electronic format. This**
244 **must include access to electronic medical literature databases with**
245 **full text capabilities.** ^(Core)
246

247 **I.D.4. The program's educational and clinical resources must be adequate**
248 **to support the number of fellows appointed to the program.** ^(Core)

249
250 **I.E.** *A fellowship program usually occurs in the context of many learners and*
251 *other care providers and limited clinical resources. It should be structured*
252 *to optimize education for all learners present.*

253
254 **I.E.1.** **Fellows should contribute to the education of residents in core**
255 **programs, if present.** ^(Core)
256

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

257
258 **II. Personnel**

259
260 **II.A. Program Director**

261
262 **II.A.1.** **There must be one faculty member appointed as program director**
263 **with authority and accountability for the overall program, including**
264 **compliance with all applicable program requirements.** ^(Core)
265

266 **II.A.1.a)** **The Sponsoring Institution's Graduate Medical Education**
267 **Committee (GMEC) must approve a change in program**
268 **director.** ^(Core)
269

270 **II.A.1.b)** **Final approval of the program director resides with the**
271 **Review Committee.** ^(Core)
272

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual's responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director's nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

273
274 **II.A.2.** **The program director must be provided with support adequate for**
275 **administration of the program based upon its size and configuration.**
276 ^(Core)
277

278 **II.A.2.a)** **At a minimum, the program director must be provided with the**
279 **dedicated time and support specified below** ~~salary support~~
280 ~~required to devote 10 percent FTE of non-clinical time to the for~~
281 **administration of the program.** ^(Core)
282

<u>Number of Approved Fellow Positions</u>	<u>Minimum Support Required (FTE)</u>
--	---

0-3	0.2
4-6	0.2
7-9	0.3
10 or more	0.35

283

Background and Intent: Twenty percent FTE is defined as one day per week.

“Administrative time” is defined as non-clinical time spent meeting the responsibilities of the program director as detailed in requirements II.A.4.-II.A.4.a).(16).

The requirement does not address the source of funding required to provide the specified salary support.

II.A.3. Qualifications of the program director:

II.A.3.a) must include subspecialty expertise and qualifications acceptable to the Review Committee; (Core)

II.A.3.a).(1) This must include at least three years’ experience as a physician faculty member in an ACGME-accredited program, as well as possession of adequate undersea and hyperbaric medicine experience judged to be acceptable by the Review Committee. (Core)

II.A.3.b) must include current certification in the subspecialty for which they are the program director by the American Board of Emergency Medicine, American Board of Preventive Medicine, or by the American Osteopathic Board of Emergency Medicine, American Osteopathic Board of Family Physicians, American Osteopathic Board of Preventive Medicine, or subspecialty qualifications that are acceptable to the Review Committee; (Core)

II.A.3.c) must include current clinical activity in the practice of undersea and hyperbaric medicine; and, (Core)

II.A.3.d) should include demonstrated participation in academic societies and educational programs designed to enhance his or her educational and administrative skills. (Core)-(Detail)

II.A.4. Program Director Responsibilities

The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and promotion of fellows, and disciplinary action; supervision of fellows; and fellow education in the context of patient care. (Core)

II.A.4.a) The program director must:

322 II.A.4.a).(1) be a role model of professionalism; (Core)
323

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

324
325 II.A.4.a).(2) design and conduct the program in a fashion
326 consistent with the needs of the community, the
327 mission(s) of the Sponsoring Institution, and the
328 mission(s) of the program; (Core)
329

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

330
331 II.A.4.a).(3) administer and maintain a learning environment
332 conducive to educating the fellows in each of the
333 ACGME Competency domains; (Core)
334

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

335
336 II.A.4.a).(4) develop and oversee a process to evaluate candidates
337 prior to approval as program faculty members for
338 participation in the fellowship program education and
339 at least annually thereafter, as outlined in V.B.; (Core)
340

341 II.A.4.a).(5) have the authority to approve program faculty
342 members for participation in the fellowship program
343 education at all sites; (Core)
344

345 II.A.4.a).(6) have the authority to remove program faculty
346 members from participation in the fellowship program
347 education at all sites; (Core)
348

349 II.A.4.a).(7) have the authority to remove fellows from supervising
350 interactions and/or learning environments that do not
351 meet the standards of the program; (Core)
352

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

375
376
- II.A.4.a).(8) submit accurate and complete information required and requested by the DIO, GMEC, and ACGME; ^(Core)
 - II.A.4.a).(9) provide applicants who are offered an interview with information related to the applicant's eligibility for the relevant subspecialty board examination(s); ^(Core)
 - II.A.4.a).(10) provide a learning and working environment in which fellows have the opportunity to raise concerns and provide feedback in a confidential manner as appropriate, without fear of intimidation or retaliation; ^(Core)
 - II.A.4.a).(11) ensure the program's compliance with the Sponsoring Institution's policies and procedures related to grievances and due process; ^(Core)
 - II.A.4.a).(12) ensure the program's compliance with the Sponsoring Institution's policies and procedures for due process when action is taken to suspend or dismiss, not to promote, or not to renew the appointment of a fellow; ^(Core)

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

- 377

388
389
390
391
- II.A.4.a).(13) ensure the program's compliance with the Sponsoring Institution's policies and procedures on employment and non-discrimination; ^(Core)
 - II.A.4.a).(13).(a) Fellows must not be required to sign a non-competition guarantee or restrictive covenant. ^(Core)
 - II.A.4.a).(14) document verification of program completion for all graduating fellows within 30 days; ^(Core)
 - II.A.4.a).(15) provide verification of an individual fellow's completion upon the fellow's request, within 30 days; and, ^(Core)

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

393

394

II.A.4.a).(16)

obtain review and approval of the Sponsoring Institution's DIO before submitting information or requests to the ACGME, as required in the Institutional Requirements and outlined in the ACGME Program Director's Guide to the Common Program Requirements. ^(Core)

421

422

423

Faculty members are a foundational element of graduate medical education – faculty members teach fellows how to care for patients. Faculty members provide an important bridge allowing fellows to grow and become practice ready, ensuring that patients receive the highest quality of care. They are role models for future generations of physicians by demonstrating compassion, commitment to excellence in teaching and patient care, professionalism, and a dedication to lifelong learning. Faculty members experience the pride and joy of fostering the growth and development of future colleagues. The care they provide is enhanced by the opportunity to teach. By employing a scholarly approach to patient care, faculty members, through the graduate medical education system, improve the health of the individual and the population.

Faculty members ensure that patients receive the level of care expected from a specialist in the field. They recognize and respond to the needs of the patients, fellows, community, and institution. Faculty members provide appropriate levels of supervision to promote patient safety. Faculty members create an effective learning environment by acting in a professional manner and attending to the well-being of the fellows and themselves.

Background and Intent: "Faculty" refers to the entire teaching force responsible for educating fellows. The term "faculty," including "core faculty," does not imply or require an academic appointment or salary support.

424

425

II.B.1.

For each participating site, there must be a sufficient number of faculty members with competence to instruct and supervise all fellows at that location. ^(Core)

426

427

428

429

II.B.1.a)

Consultants from appropriate medical subspecialties should be available for consultation and didactic teaching, including those with experience and understanding of anesthesiology, critical care, emergency medicine, infectious disease, ophthalmology, plastic surgery, preventive medicine, rehabilitative medicine,

430

431

432

433

434 vascular surgery, and other disciplines as they pertain to the
435 comprehensive treatment of the clinical hyperbaric patient. ^(Detail)
436

437 **II.B.2. Faculty members must:**
438

439 **II.B.2.a) be role models of professionalism;** ^(Core)
440

441 **II.B.2.b) demonstrate commitment to the delivery of safe, quality,**
442 **cost-effective, patient-centered care;** ^(Core)
443

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

444
445 **II.B.2.c) demonstrate a strong interest in the education of fellows;** ^(Core)
446

447 **II.B.2.d) devote sufficient time to the educational program to fulfill**
448 **their supervisory and teaching responsibilities;** ^(Core)
449

450 **II.B.2.e) administer and maintain an educational environment**
451 **conducive to educating fellows;** ^(Core)
452

453 **II.B.2.f) regularly participate in organized clinical discussions,**
454 **rounds, journal clubs, and conferences;** ^(Core)
455

456 **II.B.2.g) pursue faculty development designed to enhance their skills**
457 **at least annually;** ^(Core)
458

459 **II.B.2.h) demonstrate sound clinical and teaching abilities, a commitment to**
460 **their own continuing medical education; and,** ^(Core)
461

462 **II.B.2.i) regularly participate in clinical discussions, rounds, journal clubs,**
463 **and research conferences in a manner that promotes a spirit of**
464 **inquiry and scholarship and the provision of support for fellows'**
465 **participation, as appropriate, in scholarly activity.** ^(Core)
466

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

467
468 **II.B.3. Faculty Qualifications**
469

470 **II.B.3.a) Faculty members must have appropriate qualifications in**
471 **their field and hold appropriate institutional appointments.**
472 ^(Core)

484
485
486
487
488

II.B.3.b) Subspecialty physician faculty members must:

II.B.3.b).(1) have current certification in the subspecialty by the American Board of Emergency Medicine, American Board of Preventive Medicine, or the American Osteopathic Board of Emergency Medicine, American Osteopathic Board of Family Physicians, American Osteopathic Board of Preventive Medicine, or possess qualifications judged acceptable to the Review Committee. (Core)

II.B.3.c) Any non-physician faculty members who participate in fellowship program education must be approved by the program director. (Core)

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

501
502
503
504

II.B.3.d) Any other specialty physician faculty members must have current certification in their specialty by the appropriate American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board, or possess qualifications judged acceptable to the Review Committee. (Core)

II.B.4. Core Faculty

Core faculty members must have a significant role in the education and supervision of fellows and must devote a significant portion of their entire effort to fellow education and/or administration, and must, as a component of their activities, teach, evaluate, and provide formative feedback to fellows. (Core)

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.

505
506
507
508

II.B.4.a) Core faculty members must be designated by the program director. (Core)

- 509 **II.B.4.b) Core faculty members must complete the annual ACGME**
510 **Faculty Survey.** ^(Core)
511
- 512 **II.B.4.c)** There must be a minimum of two undersea and hyperbaric core
513 physician faculty members based at the primary clinical site,
514 including the program director. ^(Core)
515
- 516 **II.C. Program Coordinator**
- 517
- 518 **II.C.1. There must be a program coordinator.** ^(Core)
519
- 520 **II.C.2. The program coordinator must be provided with support adequate**
521 **for administration of the program based upon its size and**
522 **configuration.** ^(Core)
523
- 524 **II.C.2.a)** At a minimum, the program coordinator(s) must be supported at
525 20 percent FTE for the administration of the program. ^(Core)
526

Background and Intent: Twenty percent FTE is defined as one day per week.

The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge of the ACGME and Program Requirements, policies, and procedures. Program coordinators assist the program director in accreditation efforts, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

- 527
- 528 **II.D. Other Program Personnel**
- 529
- 530 **The program, in partnership with its Sponsoring Institution, must jointly**
531 **ensure the availability of necessary personnel for the effective**
532 **administration of the program.** ^(Core)
533

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the

program. These personnel may support more than one program in more than one discipline.

III. Fellow Appointments

III.A. Eligibility Criteria

III.A.1. Eligibility Requirements – Fellowship Programs

All required clinical education for entry into ACGME-accredited fellowship programs must be completed in an ACGME-accredited residency program, an AOA-approved residency program, a program with ACGME International (ACGME-I) Advanced Specialty Accreditation, or a Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of Canada (CFPC)-accredited residency program located in Canada.
(Core)

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

550
551
552
553
554
555
556
557
558
559
560
561
562
563
564
565
566

III.A.1.a) Fellowship programs must receive verification of each entering fellow’s level of competence in the required field, upon matriculation, using ACGME, ACGME-I, or CanMEDS Milestones evaluations from the core residency program. (Core)

III.A.1.b) Prior to entry in the program, fellows must have successfully completed a residency program that satisfies III.A.1. and that includes a minimum of 12 months of preventive, primary, surgical, and/or critical care training. (Core)

III.A.1.c) Fellow Eligibility Exception
The Review Committees for Emergency Medicine and Preventive Medicine will allow the following exception to the fellowship eligibility requirements:

Specialty Background and Intent: When exercising the Eligibility Exception for an exceptionally qualified candidate seeking board certification, note that completion of an ACGME-accredited fellowship program may not by itself be sufficient to meet the eligibility requirements for subspecialty certification. Direct contact with the applicable certifying board to determine an applicant’s eligibility for certification is advised.

567
568
569
570
571
572
573

III.A.1.c).(1) An ACGME-accredited fellowship program may accept an exceptionally qualified international graduate applicant who does not satisfy the eligibility requirements listed in III.A.1., but who does meet all of the following additional qualifications and conditions:
(Core)

- 574
575 **III.A.1.c).(1).(a)** evaluation by the program director and
576 fellowship selection committee of the
577 applicant's suitability to enter the program,
578 based on prior training and review of the
579 summative evaluations of training in the core
580 specialty; and, ^(Core)
581
582 **III.A.1.c).(1).(b)** review and approval of the applicant's
583 exceptional qualifications by the GMEC; and,
584 ^(Core)
585
586 **III.A.1.c).(1).(c)** verification of Educational Commission for
587 Foreign Medical Graduates (ECFMG)
588 certification. ^(Core)
589
590 **III.A.1.c).(2)** Applicants accepted through this exception must have
591 an evaluation of their performance by the Clinical
592 Competency Committee within 12 weeks of
593 matriculation. ^(Core)
594

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

- 595
596 **III.B.** The program director must not appoint more fellows than approved by the
597 Review Committee. ^(Core)
598
599 **III.B.1.** All complement increases must be approved by the Review
600 Committee. ^(Core)
601
602 **III.C.** Fellow Transfers
603
604 The program must obtain verification of previous educational experiences
605 and a summative competency-based performance evaluation prior to
606 acceptance of a transferring fellow, and Milestones evaluations upon
607 matriculation. ^(Core)
608

609 IV. Educational Program

610

611 *The ACGME accreditation system is designed to encourage excellence and*
612 *innovation in graduate medical education regardless of the organizational*
613 *affiliation, size, or location of the program.*

614

615 *The educational program must support the development of knowledgeable, skillful*
616 *physicians who provide compassionate care.*

617

618 *In addition, the program is expected to define its specific program aims consistent*
619 *with the overall mission of its Sponsoring Institution, the needs of the community*
620 *it serves and that its graduates will serve, and the distinctive capabilities of*
621 *physicians it intends to graduate. While programs must demonstrate substantial*
622 *compliance with the Common and subspecialty-specific Program Requirements, it*
623 *is recognized that within this framework, programs may place different emphasis*
624 *on research, leadership, public health, etc. It is expected that the program aims*
625 *will reflect the nuanced program-specific goals for it and its graduates; for*
626 *example, it is expected that a program aiming to prepare physician-scientists will*
627 *have a different curriculum from one focusing on community health.*

628

629 IV.A. The curriculum must contain the following educational components: (Core)

630

631 IV.A.1. a set of program aims consistent with the Sponsoring Institution's
632 mission, the needs of the community it serves, and the desired
633 distinctive capabilities of its graduates; (Core)

634

635 IV.A.1.a) The program's aims must be made available to program
636 applicants, fellows, and faculty members. (Core)

637

638 IV.A.2. competency-based goals and objectives for each educational
639 experience designed to promote progress on a trajectory to
640 autonomous practice in their subspecialty. These must be
641 distributed, reviewed, and available to fellows and faculty members;
642 (Core)

643

644 IV.A.3. delineation of fellow responsibilities for patient care, progressive
645 responsibility for patient management, and graded supervision in
646 their subspecialty; (Core)

647

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

648

649 IV.A.4. structured educational activities beyond direct patient care; and,
650 (Core)

651

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case

discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

652
653
654
655
656
657

IV.A.5. advancement of fellows' knowledge of ethical principles
foundational to medical professionalism. *(Core)*

IV.B. ACGME Competencies

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

658
659
660
661
662
663
664
665
666
667
668

IV.B.1. The program must integrate the following ACGME Competencies into the curriculum: *(Core)*

IV.B.1.a) Professionalism

Fellows must demonstrate a commitment to professionalism and an adherence to ethical principles. *(Core)*

IV.B.1.b) Patient Care and Procedural Skills

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs.* 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

669
670
671
672

700		
701		
702	IV.B.1.b).(1).(a).(vii)	assessment of patients with toxic gas exposure (e.g., carbon monoxide). (Core)
703		
704		
705	IV.B.1.b).(2)	Fellows must be able to perform all medical, diagnostic, and surgical procedures considered essential for the area of practice. (Core)
706		
707		
708		
709	IV.B.1.c)	Medical Knowledge
710		
711		Fellows must demonstrate knowledge of established and evolving biomedical, clinical, epidemiological and social-behavioral sciences, as well as the application of this knowledge to patient care. (Core)
712		
713		
714		
715		
716	IV.B.1.c).(1)	Fellows must demonstrate competence in their knowledge of the indications and contraindications for hyperbaric oxygen therapy and dive medicine. (Core)
717		
718		
719		
720	IV.B.1.d)	Practice-based Learning and Improvement
721		
722		Fellows must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. (Core)
723		
724		
725		
726		

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to

continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

- 727
728 **IV.B.1.e) Interpersonal and Communication Skills**
729
730 **Fellows must demonstrate interpersonal and communication**
731 **skills that result in the effective exchange of information and**
732 **collaboration with patients, their families, and health**
733 **professionals. (Core)**
734
735 **IV.B.1.f) Systems-based Practice**
736
737 **Fellows must demonstrate an awareness of and**
738 **responsiveness to the larger context and system of health**
739 **care, including the social determinants of health, as well as**
740 **the ability to call effectively on other resources to provide**
741 **optimal health care. (Core)**
742
743 **IV.C. Curriculum Organization and Fellow Experiences**

890 ***Medicine is both an art and a science. The physician is a humanistic***
891 ***scientist who cares for patients. This requires the ability to think critically,***
892 ***evaluate the literature, appropriately assimilate new knowledge, and***
893 ***practice lifelong learning. The program and faculty must create an***
894 ***environment that fosters the acquisition of such skills through fellow***
895 ***participation in scholarly activities as defined in the subspecialty-specific***
896 ***Program Requirements. Scholarly activities may include discovery,***
897 ***integration, application, and teaching.***

898
899 ***The ACGME recognizes the diversity of fellowships and anticipates that***
900 ***programs prepare physicians for a variety of roles, including clinicians,***
901 ***scientists, and educators. It is expected that the program's scholarship will***
902 ***reflect its mission(s) and aims, and the needs of the community it serves.***
903 ***For example, some programs may concentrate their scholarly activity on***
904 ***quality improvement, population health, and/or teaching, while other***
905 ***programs might choose to utilize more classic forms of biomedical***
906 ***research as the focus for scholarship.***

907
908 **IV.D.1. Program Responsibilities**

909
910 **IV.D.1.a) The program must demonstrate evidence of scholarly**
911 **activities, consistent with its mission(s) and aims. ^(Core)**

912
913 **IV.D.1.b) The program in partnership with its Sponsoring Institution,**
914 **must allocate adequate resources to facilitate fellow and**
915 **faculty involvement in scholarly activities. ^(Core)**

916
917 **IV.D.2. Faculty Scholarly Activity**

918
919 **IV.D.2.a) Among their scholarly activity, programs must demonstrate**
920 **accomplishments in at least three of the following domains:**
921 **^(Core)**

- 922
923
 - **Research in basic science, education, translational**
924
 - **science, patient care, or population health**

- 925 • Peer-reviewed grants
- 926 • Quality improvement and/or patient safety initiatives
- 927 • Systematic reviews, meta-analyses, review articles,
- 928 chapters in medical textbooks, or case reports
- 929 • Creation of curricula, evaluation tools, didactic
- 930 educational activities, or electronic educational
- 931 materials
- 932 • Contribution to professional committees, educational
- 933 organizations, or editorial boards
- 934 • Innovations in education

936 **IV.D.2.b) The program must demonstrate dissemination of scholarly**
 937 **activity within and external to the program by the following**
 938 **methods:**
 939

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the fellows’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

940
 941 **IV.D.2.b).(1) faculty participation in grand rounds, posters,**
 942 **workshops, quality improvement presentations,**
 943 **podium presentations, grant leadership, non-peer-**
 944 **reviewed print/electronic resources, articles or**
 945 **publications, book chapters, textbooks, webinars,**
 946 **service on professional committees, or serving as a**
 947 **journal reviewer, journal editorial board member, or**
 948 **editor; (Outcome)‡**
 949

950 **IV.D.2.b).(2) peer-reviewed publication. (Outcome)**

951
 952 **IV.D.2.b).(2).(a) While not all faculty members must be**
 953 **investigators, the faculty as a whole must**
 954 **demonstrate broad involvement in scholarly activity.**
 955 **(Core)**
 956

957 **IV.D.2.b).(2).(a).(i) The faculty as a whole must demonstrate at**
 958 **least one piece of scholarly activity per year,**
 959 **averaged over five years. (Core)**
 960

961 **IV.D.2.b).(2).(a).(ii) The responsibility for establishing and**
 962 **maintaining an environment of inquiry and**
 963 **scholarship rests with the faculty, and an**
 964 **active research component must be**
 965 **included in the program. (Core)**

- 966
967 **IV.D.3. Fellow Scholarly Activity**
968
969 IV.D.3.a) The curriculum must advance fellows' knowledge of the basic
970 principles of research, including how research is conducted,
971 evaluated, explained to patients, and applied to patient care. (Core)
972
973 IV.D.3.b) Fellows must participate in scholarly activity that includes at least
974 one of the following:
975
976 IV.D.3.b).(1) peer-reviewed funding and research; (Outcome)
977
978 IV.D.3.b).(2) publication of original research or review articles; or,
979 (Outcome)
980
981 IV.D.3.b).(3) presentations at local, regional, or national professional
982 and scientific society meetings. (Outcome)
983
984 **IV.E. Fellowship programs may assign fellows to engage in the independent**
985 **practice of their core specialty during their fellowship program.**
986
987 **IV.E.1. If programs permit their fellows to utilize the independent practice**
988 **option, it must not exceed 20 percent of their time per week or 10**
989 **weeks of an academic year.** (Core)
990

Background and Intent: Fellows who have previously completed residency programs have demonstrated sufficient competence to enter autonomous practice within their core specialty. This option is designed to enhance fellows' maturation and competence in their core specialty. This enables fellows to occupy a dual role in the health system: as learners in their subspecialty, and as credentialed practitioners in their core specialty. Hours worked in independent practice during fellowship still fall under the clinical and educational work hour limits. See Program Director Guide for more details.

- 991
992 IV.E.2. Fellows should maintain their primary Board skills during their fellowship.
993 (Core)(Detail) [Moved from IV.C.6.]
994
995 IV.E.2.a) ~~Fellows should not devote more than 12 hours per week,~~
996 ~~averaged over four weeks, to clinical practice unrelated to~~
997 ~~undersea and hyperbaric medicine.~~ (Detail) [Moved from IV.C.6.a)]
998

Specialty-Specific Background and Intent: The Review Committee for Emergency Medicine considers the requirements above to be exclusive of moonlighting. Additional time spent by the fellows in the engagement of independent practice of their core specialty beyond the maximum stated in the requirements will be considered moonlighting, and will be counted toward the 80-hour maximum clinical time per week.

- 999
1000 **V. Evaluation**
1001
1002 **V.A. Fellow Evaluation**
1003
1004 **V.A.1. Feedback and Evaluation**

1005

Background and Intent: Feedback is ongoing information provided regarding aspects of one’s performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- **fellows identify their strengths and weaknesses and target areas that need work**
- **program directors and faculty members recognize where fellows are struggling and address problems immediately**

Summative evaluation is *evaluating a fellow’s learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

1006
1007
1008
1009
1010
1011
1012
1013
1014
1015
1016
1017

V.A.1.a) Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. ^(Core)

V.A.1.a).(1) At least quarterly the fellows’ knowledge, skills, and professional growth, must be evaluated using appropriate criteria and procedures. ^(Core)

V.A.1.a).(2) These evaluations must be communicated to each fellow in a timely manner. ^(Core)

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

1018
1019
1020
1021

V.A.1.b) Evaluation must be documented at the completion of the assignment. ^(Core)

- 1022 **V.A.1.b).(1)** For block rotations of greater than three months in
 1023 duration, evaluation must be documented at least
 1024 every three months. ^(Core)
 1025
- 1026 **V.A.1.b).(2)** Longitudinal experiences such as continuity clinic in
 1027 the context of other clinical responsibilities must be
 1028 evaluated at least every three months and at
 1029 completion. ^(Core)
 1030
- 1031 **V.A.1.c)** The program must provide an objective performance
 1032 evaluation based on the Competencies and the subspecialty-
 1033 specific Milestones, and must: ^(Core)
 1034
- 1035 **V.A.1.c).(1)** use multiple evaluators (e.g., faculty members, peers,
 1036 patients, self, and other professional staff members);
 1037 and, ^(Core)
 1038
- 1039 **V.A.1.c).(2)** provide that information to the Clinical Competency
 1040 Committee for its synthesis of progressive fellow
 1041 performance and improvement toward unsupervised
 1042 practice. ^(Core)
 1043

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

- 1044
- 1045 **V.A.1.d)** The program director or their designee, with input from the
 1046 Clinical Competency Committee, must:
 1047
- 1048 **V.A.1.d).(1)** meet with and review with each fellow their
 1049 documented semi-annual evaluation of performance,
 1050 including progress along the subspecialty-specific
 1051 Milestones. ^(Core)
 1052
- 1053 **V.A.1.d).(2)** assist fellows in developing individualized learning
 1054 plans to capitalize on their strengths and identify areas
 1055 for growth; and, ^(Core)
 1056
- 1057 **V.A.1.d).(3)** develop plans for fellows failing to progress, following
 1058 institutional policies and procedures. ^(Core)
 1059

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those

evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

1060		
1061	V.A.1.e)	At least annually, there must be a summative evaluation of each fellow that includes their readiness to progress to the next year of the program, if applicable. (Core)
1062		
1063		
1064		
1065	V.A.1.f)	The evaluations of a fellow’s performance must be accessible for review by the fellow. (Core)
1066		
1067		
1068	V.A.2.	Final Evaluation
1069		
1070	V.A.2.a)	The program director must provide a final evaluation for each fellow upon completion of the program. (Core)
1071		
1072		
1073	V.A.2.a).(1)	The subspecialty-specific Milestones, and when applicable the subspecialty-specific Case Logs, must be used as tools to ensure fellows are able to engage in autonomous practice upon completion of the program. (Core)
1074		
1075		
1076		
1077		
1078		
1079	V.A.2.a).(2)	The final evaluation must:
1080		
1081	V.A.2.a).(2).(a)	become part of the fellow’s permanent record maintained by the institution, and must be accessible for review by the fellow in accordance with institutional policy; (Core)
1082		
1083		
1084		
1085		
1086	V.A.2.a).(2).(b)	verify that the fellow has demonstrated the knowledge, skills, and behaviors necessary to enter autonomous practice; (Core)
1087		
1088		
1089		
1090	V.A.2.a).(2).(c)	consider recommendations from the Clinical Competency Committee; and, (Core)
1091		
1092		
1093	V.A.2.a).(2).(d)	be shared with the fellow upon completion of the program. (Core)
1094		
1095		

- 1096 **V.A.3. A Clinical Competency Committee must be appointed by the**
 1097 **program director. (Core)**
 1098
 1099 **V.A.3.a) At a minimum the Clinical Competency Committee must**
 1100 **include three members, at least one of whom is a core faculty**
 1101 **member. Members must be faculty members from the same**
 1102 **program or other programs, or other health professionals**
 1103 **who have extensive contact and experience with the**
 1104 **program’s fellows. (Core)**
 1105
 1106 **V.A.3.b) The Clinical Competency Committee must:**
 1107
 1108 **V.A.3.b).(1) review all fellow evaluations at least semi-annually;**
 1109 **(Core)**
 1110
 1111 **V.A.3.b).(2) determine each fellow’s progress on achievement of**
 1112 **the subspecialty-specific Milestones; and, (Core)**
 1113
 1114 **V.A.3.b).(3) meet prior to the fellows’ semi-annual evaluations and**
 1115 **advise the program director regarding each fellow’s**
 1116 **progress. (Core)**
 1117
 1118 **V.B. Faculty Evaluation**
 1119
 1120 **V.B.1. The program must have a process to evaluate each faculty**
 1121 **member’s performance as it relates to the educational program at**
 1122 **least annually. (Core)**
 1123

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program’s faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 1124
 1125 **V.B.1.a) This evaluation must include a review of the faculty member’s**
 1126 **clinical teaching abilities, engagement with the educational**
 1127 **program, participation in faculty development related to their**

- 1128 skills as an educator, clinical performance, professionalism,
 1129 and scholarly activities. (Core)
 1130
 1131 **V.B.1.b)** This evaluation must include written, confidential evaluations
 1132 by the fellows. (Core)
 1133
 1134 **V.B.2.** Faculty members must receive feedback on their evaluations at least
 1135 annually. (Core)
 1136
 1137 **V.B.3.** Results of the faculty educational evaluations should be
 1138 incorporated into program-wide faculty development plans. (Core)
 1139

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

- 1140
 1141 **V.C. Program Evaluation and Improvement**
 1142
 1143 **V.C.1.** The program director must appoint the Program Evaluation
 1144 Committee to conduct and document the Annual Program
 1145 Evaluation as part of the program's continuous improvement
 1146 process. (Core)
 1147
 1148 **V.C.1.a)** The Program Evaluation Committee must be composed of at
 1149 least two program faculty members, at least one of whom is a
 1150 core faculty member, and at least one fellow. (Core)
 1151
 1152 **V.C.1.b)** Program Evaluation Committee responsibilities must include:
 1153
 1154 **V.C.1.b).(1)** acting as an advisor to the program director, through
 1155 program oversight; (Core)
 1156
 1157 **V.C.1.b).(2)** review of the program's self-determined goals and
 1158 progress toward meeting them; (Core)
 1159
 1160 **V.C.1.b).(3)** guiding ongoing program improvement, including
 1161 development of new goals, based upon outcomes;
 1162 and, (Core)
 1163
 1164 **V.C.1.b).(4)** review of the current operating environment to identify
 1165 strengths, challenges, opportunities, and threats as
 1166 related to the program's mission and aims. (Core)
 1167

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for

itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.

- 1168
1169 **V.C.1.c)** **The Program Evaluation Committee should consider the**
1170 **following elements in its assessment of the program:**
1171
1172 **V.C.1.c).(1)** **curriculum;** ^(Core)
1173
1174 **V.C.1.c).(2)** **outcomes from prior Annual Program Evaluation(s);**
1175 ^(Core)
1176
1177 **V.C.1.c).(3)** **ACGME letters of notification, including citations,**
1178 **Areas for Improvement, and comments;** ^(Core)
1179
1180 **V.C.1.c).(4)** **quality and safety of patient care;** ^(Core)
1181
1182 **V.C.1.c).(5)** **aggregate fellow and faculty:**
1183
1184 **V.C.1.c).(5).(a)** **well-being;** ^(Core)
1185
1186 **V.C.1.c).(5).(b)** **recruitment and retention;** ^(Core)
1187
1188 **V.C.1.c).(5).(c)** **workforce diversity;** ^(Core)
1189
1190 **V.C.1.c).(5).(d)** **engagement in quality improvement and patient**
1191 **safety;** ^(Core)
1192
1193 **V.C.1.c).(5).(e)** **scholarly activity;** ^(Core)
1194
1195 **V.C.1.c).(5).(f)** **ACGME Resident/Fellow and Faculty Surveys**
1196 **(where applicable); and,** ^(Core)
1197
1198 **V.C.1.c).(5).(g)** **written evaluations of the program.** ^(Core)
1199
1200 **V.C.1.c).(6)** **aggregate fellow:**
1201
1202 **V.C.1.c).(6).(a)** **achievement of the Milestones;** ^(Core)
1203
1204 **V.C.1.c).(6).(b)** **in-training examinations (where applicable);**
1205 ^(Core)
1206
1207 **V.C.1.c).(6).(c)** **board pass and certification rates; and,** ^(Core)
1208
1209 **V.C.1.c).(6).(d)** **graduate performance.** ^(Core)
1210
1211 **V.C.1.c).(7)** **aggregate faculty:**
1212
1213 **V.C.1.c).(7).(a)** **evaluation; and,** ^(Core)
1214
1215 **V.C.1.c).(7).(b)** **professional development** ^(Core)
1216

- 1217 V.C.1.d) The Program Evaluation Committee must evaluate the
 1218 program's mission and aims, strengths, areas for
 1219 improvement, and threats. ^(Core)
 1220
 1221 V.C.1.e) The annual review, including the action plan, must:
 1222
 1223 V.C.1.e).(1) be distributed to and discussed with the members of
 1224 the teaching faculty and the fellows; and, ^(Core)
 1225
 1226 V.C.1.e).(2) be submitted to the DIO. ^(Core)
 1227
 1228 V.C.2. The program must participate in a Self-Study prior to its 10-Year
 1229 Accreditation Site Visit. ^(Core)
 1230
 1231 V.C.2.a) A summary of the Self-Study must be submitted to the DIO.
 1232 ^(Core)
 1233

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the Self-Study process, as well as information on how to prepare for the 10-Year Accreditation Site Visit, is available on the ACGME website.

- 1234
 1235 V.C.3. *One goal of ACGME-accredited education is to educate physicians*
 1236 *who seek and achieve board certification. One measure of the*
 1237 *effectiveness of the educational program is the ultimate pass rate.*
 1238
 1239 *The program director should encourage all eligible program*
 1240 *graduates to take the certifying examination offered by the*
 1241 *applicable American Board of Medical Specialties (ABMS) member*
 1242 *board or American Osteopathic Association (AOA) certifying board.*
 1243
 1244 V.C.3.a) For subspecialties in which the ABMS member board and/or
 1245 AOA certifying board offer(s) an annual written exam, in the
 1246 preceding three years, the program's aggregate pass rate of
 1247 those taking the examination for the first time must be higher
 1248 than the bottom fifth percentile of programs in that
 1249 subspecialty. ^(Outcome)
 1250
 1251 V.C.3.b) For subspecialties in which the ABMS member board and/or
 1252 AOA certifying board offer(s) a biennial written exam, in the
 1253 preceding six years, the program's aggregate pass rate of
 1254 those taking the examination for the first time must be higher
 1255 than the bottom fifth percentile of programs in that
 1256 subspecialty. ^(Outcome)

- 1257
1258 **V.C.3.c)** For subspecialties in which the ABMS member board and/or
1259 AOA certifying board offer(s) an annual oral exam, in the
1260 preceding three years, the program's aggregate pass rate of
1261 those taking the examination for the first time must be higher
1262 than the bottom fifth percentile of programs in that
1263 subspecialty. ^(Outcome)
1264
- 1265 **V.C.3.d)** For subspecialties in which the ABMS member board and/or
1266 AOA certifying board offer(s) a biennial oral exam, in the
1267 preceding six years, the program's aggregate pass rate of
1268 those taking the examination for the first time must be higher
1269 than the bottom fifth percentile of programs in that
1270 subspecialty. ^(Outcome)
1271
- 1272 **V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program
1273 whose graduates over the time period specified in the
1274 requirement have achieved an 80 percent pass rate will have
1275 met this requirement, no matter the percentile rank of the
1276 program for pass rate in that subspecialty. ^(Outcome)
1277

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

- 1278
1279 **V.C.3.f)** Programs must report, in ADS, board certification status
1280 annually for the cohort of board-eligible fellows that
1281 graduated seven years earlier. ^(Core)
1282

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

1283

1284 VI. The Learning and Working Environment

1285
1286 *Fellowship education must occur in the context of a learning and working*
1287 *environment that emphasizes the following principles:*
1288

- 1289 • *Excellence in the safety and quality of care rendered to patients by fellows*
1290 *today*
- 1291
- 1292 • *Excellence in the safety and quality of care rendered to patients by today's*
1293 *fellows in their future practice*
- 1294
- 1295 • *Excellence in professionalism through faculty modeling of:*
1296
 - 1297 ○ *the effacement of self-interest in a humanistic environment that supports*
1298 *the professional development of physicians*
 - 1299
 - 1300 ○ *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
1301
- 1302 • *Commitment to the well-being of the students, residents, fellows, faculty*
1303 *members, and all members of the health care team*
1304

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

1305 VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

1306
1307 VI.A.1. Patient Safety and Quality Improvement
1308
1309

1310 *All physicians share responsibility for promoting patient safety and*
1311 *enhancing quality of patient care. Graduate medical education must*
1312 *prepare fellows to provide the highest level of clinical care with*
1313 *continuous focus on the safety, individual needs, and humanity of*
1314 *their patients. It is the right of each patient to be cared for by fellows*
1315 *who are appropriately supervised; possess the requisite knowledge,*
1316 *skills, and abilities; understand the limits of their knowledge and*
1317 *experience; and seek assistance as required to provide optimal*
1318 *patient care.*

1319
1320 *Fellows must demonstrate the ability to analyze the care they*
1321 *provide, understand their roles within health care teams, and play an*
1322 *active role in system improvement processes. Graduating fellows*
1323 *will apply these skills to critique their future unsupervised practice*
1324 *and effect quality improvement measures.*

1325
1326 *It is necessary for fellows and faculty members to consistently work*
1327 *in a well-coordinated manner with other health care professionals to*
1328 *achieve organizational patient safety goals.*

1329
1330 **VI.A.1.a) Patient Safety**

1331
1332 **VI.A.1.a).(1) Culture of Safety**

1333 *A culture of safety requires continuous identification*
1334 *of vulnerabilities and a willingness to transparently*
1335 *deal with them. An effective organization has formal*
1336 *mechanisms to assess the knowledge, skills, and*
1337 *attitudes of its personnel toward safety in order to*
1338 *identify areas for improvement.*

1339
1340
1341 **VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows**
1342 **must actively participate in patient safety**
1343 **systems and contribute to a culture of safety.**
1344 **(Core)**

1345
1346 **VI.A.1.a).(1).(b) The program must have a structure that**
1347 **promotes safe, interprofessional, team-based**
1348 **care. (Core)**

1349
1350 **VI.A.1.a).(2) Education on Patient Safety**

1351 **Programs must provide formal educational activities**
1352 **that promote patient safety-related goals, tools, and**
1353 **techniques. (Core)**

Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.

1356
1357 **VI.A.1.a).(3) Patient Safety Events**

1358

Reporting, investigation, and follow-up of adverse events, near misses, and unsafe conditions are pivotal mechanisms for improving patient safety, and are essential for the success of any patient safety program. Feedback and experiential learning are essential to developing true competence in the ability to identify causes and institute sustainable systems-based changes to ameliorate patient safety vulnerabilities.

1404
1405
1406
1407
1408
1409

VI.A.1.a).(3).(a)

Residents, fellows, faculty members, and other clinical staff members must:

VI.A.1.a).(3).(a).(i)

know their responsibilities in reporting patient safety events at the clinical site;
(Core)

VI.A.1.a).(3).(a).(ii)

know how to report patient safety events, including near misses, at the clinical site; and, (Core)

VI.A.1.a).(3).(a).(iii)

be provided with summary information of their institution's patient safety reports. (Core)

VI.A.1.a).(3).(b)

Fellows must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions. (Core)

VI.A.1.a).(4)

Fellow Education and Experience in Disclosure of Adverse Events

Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for fellows to develop and apply.

VI.A.1.a).(4).(a)

All fellows must receive training in how to disclose adverse events to patients and families. (Core)

VI.A.1.a).(4).(b)

Fellows should have the opportunity to participate in the disclosure of patient safety events, real or simulated. (Detail)

VI.A.1.b)

Quality Improvement

1410	VI.A.1.b).(1)	Education in Quality Improvement
1411		
1412		<i>A cohesive model of health care includes quality-</i>
1413		<i>related goals, tools, and techniques that are necessary</i>
1414		<i>in order for health care professionals to achieve</i>
1415		<i>quality improvement goals.</i>
1416		
1417	VI.A.1.b).(1).(a)	Fellows must receive training and experience in
1418		quality improvement processes, including an
1419		understanding of health care disparities. ^(Core)
1420		
1421	VI.A.1.b).(2)	Quality Metrics
1422		
1423		<i>Access to data is essential to prioritizing activities for</i>
1424		<i>care improvement and evaluating success of</i>
1425		<i>improvement efforts.</i>
1426		
1427	VI.A.1.b).(2).(a)	Fellows and faculty members must receive data
1428		on quality metrics and benchmarks related to
1429		their patient populations. ^(Core)
1430		
1431	VI.A.1.b).(3)	Engagement in Quality Improvement Activities
1432		
1433		<i>Experiential learning is essential to developing the</i>
1434		<i>ability to identify and institute sustainable systems-</i>
1435		<i>based changes to improve patient care.</i>
1436		
1437	VI.A.1.b).(3).(a)	Fellows must have the opportunity to
1438		participate in interprofessional quality
1439		improvement activities. ^(Core)
1440		
1441	VI.A.1.b).(3).(a).(i)	This should include activities aimed at
1442		reducing health care disparities. ^(Detail)
1443		
1444	VI.A.2.	Supervision and Accountability
1445		
1446	VI.A.2.a)	<i>Although the attending physician is ultimately responsible for</i>
1447		<i>the care of the patient, every physician shares in the</i>
1448		<i>responsibility and accountability for their efforts in the</i>
1449		<i>provision of care. Effective programs, in partnership with</i>
1450		<i>their Sponsoring Institutions, define, widely communicate,</i>
1451		<i>and monitor a structured chain of responsibility and</i>
1452		<i>accountability as it relates to the supervision of all patient</i>
1453		<i>care.</i>
1454		
1455		<i>Supervision in the setting of graduate medical education</i>
1456		<i>provides safe and effective care to patients; ensures each</i>
1457		<i>fellow's development of the skills, knowledge, and attitudes</i>
1458		<i>required to enter the unsupervised practice of medicine; and</i>
1459		<i>establishes a foundation for continued professional growth.</i>
1460		

1461 VI.A.2.a).(1) Each patient must have an identifiable and
1462 appropriately-credentialed and privileged attending
1463 physician (or licensed independent practitioner as
1464 specified by the applicable Review Committee) who is
1465 responsible and accountable for the patient’s care.
1466 (Core)

1467
1468 VI.A.2.a).(1).(a) This information must be available to fellows,
1469 faculty members, other members of the health
1470 care team, and patients. (Core)

1471
1472 VI.A.2.a).(1).(b) Fellows and faculty members must inform each
1473 patient of their respective roles in that patient’s
1474 care when providing direct patient care. (Core)

1475
1476 VI.A.2.b) *Supervision may be exercised through a variety of methods.
1477 For many aspects of patient care, the supervising physician
1478 may be a more advanced fellow. Other portions of care
1479 provided by the fellow can be adequately supervised by the
1480 appropriate availability of the supervising faculty member or
1481 fellow, either on site or by means of telecommunication
1482 technology. Some activities require the physical presence of
1483 the supervising faculty member. In some circumstances,
1484 supervision may include post-hoc review of fellow-delivered
1485 care with feedback.*

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

1487
1488 VI.A.2.b).(1) The program must demonstrate that the appropriate
1489 level of supervision in place for all fellows is based on
1490 each fellow’s level of training and ability, as well as
1491 patient complexity and acuity. Supervision may be
1492 exercised through a variety of methods, as appropriate
1493 to the situation. (Core)

1494
1495 VI.A.2.b).(2) The program must define when physical presence of a
1496 supervising physician is required. (Core)

1497
1498 VI.A.2.c) **Levels of Supervision**
1499
1500 To promote appropriate fellow supervision while providing
1501 for graded authority and responsibility, the program must use
1502 the following classification of supervision: (Core)

1503		
1504	VI.A.2.c).(1)	Direct Supervision:
1505		
1506	VI.A.2.c).(1).(a)	the supervising physician is physically present with the fellow during the key portions of the patient interaction; or, ^(Core)
1507		
1508		
1509		
1510	VI.A.2.c).(1).(b)	the supervising physician and/or patient is not physically present with the fellow and the supervising physician is concurrently monitoring the patient care through appropriate telecommunication technology. ^(Core)
1511		
1512		
1513		
1514		
1515		
1516	VI.A.2.c).(1).(b).(i)	<u>The program must have clear guidelines that delineate which Competencies must be met to determine when a fellow can progress to be supervised indirectly. ^(Core)</u>
1517		
1518		
1519		
1520		
<u>Specialty-Specific Background and Intent: When delineating the Competencies necessary for fellow progression to be supervised indirectly, the Review Committee suggests the Competencies include Milestones or other program-derived assessments.</u>		
1521		
1522	VI.A.2.c).(1).(b).(ii)	<u>The program director must ensure that clear expectations exist and are communicated to the fellows, and that these expectations outline specific situations in which a fellow would still require direct supervision. ^(Core)</u>
1523		
1524		
1525		
1526		
1527		
1528	VI.A.2.c).(2)	Indirect Supervision: the supervising physician is not providing physical or concurrent visual or audio supervision but is immediately available to the fellow for guidance and is available to provide appropriate direct supervision. ^(Core)
1529		
1530		
1531		
1532		
1533		
1534	VI.A.2.c).(3)	Oversight – the supervising physician is available to provide review of procedures/encounters with feedback provided after care is delivered. ^(Core)
1535		
1536		
1537		
1538	VI.A.2.d)	The privilege of progressive authority and responsibility, conditional independence, and a supervisory role in patient care delegated to each fellow must be assigned by the program director and faculty members. ^(Core)
1539		
1540		
1541		
1542		
1543	VI.A.2.d).(1)	The program director must evaluate each fellow’s abilities based on specific criteria, guided by the Milestones. ^(Core)
1544		
1545		
1546		
1547	VI.A.2.d).(2)	Faculty members functioning as supervising physicians must delegate portions of care to fellows based on the needs of the patient and the skills of each fellow. ^(Core)
1548		
1549		
1550		

1551
1552 VI.A.2.d).(3) Fellows should serve in a supervisory role to junior
1553 fellows and residents in recognition of their progress
1554 toward independence, based on the needs of each
1555 patient and the skills of the individual resident or
1556 fellow. ^(Detail)

1557
1558 VI.A.2.e) Programs must set guidelines for circumstances and events
1559 in which fellows must communicate with the supervising
1560 faculty member(s). ^(Core)

1561
1562 VI.A.2.e).(1) Each fellow must know the limits of their scope of
1563 authority, and the circumstances under which the
1564 fellow is permitted to act with conditional
1565 independence. ^(Outcome)
1566

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

1567
1568 VI.A.2.f) Faculty supervision assignments must be of sufficient
1569 duration to assess the knowledge and skills of each fellow
1570 and to delegate to the fellow the appropriate level of patient
1571 care authority and responsibility. ^(Core)
1572

1573 VI.B. Professionalism

1574
1575 VI.B.1. Programs, in partnership with their Sponsoring Institutions, must
1576 educate fellows and faculty members concerning the professional
1577 responsibilities of physicians, including their obligation to be
1578 appropriately rested and fit to provide the care required by their
1579 patients. ^(Core)
1580

1581 VI.B.2. The learning objectives of the program must:

1582
1583 VI.B.2.a) be accomplished through an appropriate blend of supervised
1584 patient care responsibilities, clinical teaching, and didactic
1585 educational events; ^(Core)
1586

1587 VI.B.2.b) be accomplished without excessive reliance on fellows to
1588 fulfill non-physician obligations; and, ^(Core)
1589

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these

things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1590
1591
1592

VI.B.2.c) ensure manageable patient care responsibilities. (Core)

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

VI.B.4.c).(2) recognition of impairment, including from illness, fatigue, and substance use, in themselves, their peers, and other members of the health care team. (Outcome)

VI.B.4.d) commitment to lifelong learning; (Outcome)

VI.B.4.e) monitoring of their patient care performance improvement indicators; and, (Outcome)

- 1622
1623 **VI.B.4.f)** accurate reporting of clinical and educational work hours,
1624 patient outcomes, and clinical experience data. *(Outcome)*
1625
- 1626 **VI.B.5.** All fellows and faculty members must demonstrate responsiveness
1627 to patient needs that supersedes self-interest. This includes the
1628 recognition that under certain circumstances, the best interests of
1629 the patient may be served by transitioning that patient’s care to
1630 another qualified and rested provider. *(Outcome)*
1631
- 1632 **VI.B.6.** Programs, in partnership with their Sponsoring Institutions, must
1633 provide a professional, equitable, respectful, and civil environment
1634 that is free from discrimination, sexual and other forms of
1635 harassment, mistreatment, abuse, or coercion of students, fellows,
1636 faculty, and staff. *(Core)*
1637
- 1638 **VI.B.7.** Programs, in partnership with their Sponsoring Institutions, should
1639 have a process for education of fellows and faculty regarding
1640 unprofessional behavior and a confidential process for reporting,
1641 investigating, and addressing such concerns. *(Core)*
1642
- 1643 **VI.C. Well-Being**
1644
- 1645 *Psychological, emotional, and physical well-being are critical in the*
1646 *development of the competent, caring, and resilient physician and require*
1647 *proactive attention to life inside and outside of medicine. Well-being*
1648 *requires that physicians retain the joy in medicine while managing their*
1649 *own real life stresses. Self-care and responsibility to support other*
1650 *members of the health care team are important components of*
1651 *professionalism; they are also skills that must be modeled, learned, and*
1652 *nurtured in the context of other aspects of fellowship training.*
- 1653
- 1654 *Fellows and faculty members are at risk for burnout and depression.*
1655 *Programs, in partnership with their Sponsoring Institutions, have the same*
1656 *responsibility to address well-being as other aspects of resident*
1657 *competence. Physicians and all members of the health care team share*
1658 *responsibility for the well-being of each other. For example, a culture which*
1659 *encourages covering for colleagues after an illness without the expectation*
1660 *of reciprocity reflects the ideal of professionalism. A positive culture in a*
1661 *clinical learning environment models constructive behaviors, and prepares*
1662 *fellows with the skills and attitudes needed to thrive throughout their*
1663 *careers.*
1664

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians’ ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME’s ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

1680
1681
- VI.C.1. The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:**
- VI.C.1.a) efforts to enhance the meaning that each fellow finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; ^(Core)**
- VI.C.1.b) attention to scheduling, work intensity, and work compression that impacts fellow well-being; ^(Core)**
- VI.C.1.c) evaluating workplace safety data and addressing the safety of fellows and faculty members; ^(Core)**

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

- 1682
1683
1684
1685
- VI.C.1.d) policies and programs that encourage optimal fellow and faculty member well-being; and, ^(Core)**

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

- 1686
1687
1688
1689
1690
1691
- VI.C.1.d).(1) Fellows must be given the opportunity to attend medical, mental health, and dental care appointments, including those scheduled during their working hours. ^(Core)**

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

- 1692
1693
1694
- VI.C.1.e) attention to fellow and faculty member burnout, depression, and substance use disorder. The program, in partnership with**

1695 its Sponsoring Institution, must educate faculty members and
1696 fellows in identification of the symptoms of burnout,
1697 depression, and substance use disorder, including means to
1698 assist those who experience these conditions. Fellows and
1699 faculty members must also be educated to recognize those
1700 symptoms in themselves and how to seek appropriate care.
1701 The program, in partnership with its Sponsoring Institution,
1702 must: ^(Core)
1703

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance use disorder. Materials and more information are available on the Physician Well-being section of the ACGME website (<http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being>).

1704
1705 VI.C.1.e).(1) encourage fellows and faculty members to alert the
1706 program director or other designated personnel or
1707 programs when they are concerned that another
1708 fellow, resident, or faculty member may be displaying
1709 signs of burnout, depression, a substance use
1710 disorder, suicidal ideation, or potential for violence;
1711 ^(Core)
1712

Background and Intent: Individuals experiencing burnout, depression, substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

1713
1714 VI.C.1.e).(2) provide access to appropriate tools for self-screening;
1715 and, ^(Core)
1716
1717 VI.C.1.e).(3) provide access to confidential, affordable mental
1718 health assessment, counseling, and treatment,
1719 including access to urgent and emergent care 24
1720 hours a day, seven days a week. ^(Core)
1721

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health

issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

VI.D. Fatigue Mitigation

VI.D.1. Programs must:

VI.D.1.a) educate all faculty members and fellows to recognize the signs of fatigue and sleep deprivation; ^(Core)

VI.D.1.b) educate all faculty members and fellows in alertness management and fatigue mitigation processes; and, ^(Core)

VI.D.1.c) encourage fellows to use fatigue mitigation processes to manage the potential negative effects of fatigue on patient care and learning. ^(Detail)

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active

to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

- 1751
1752 **VI.D.2.** Each program must ensure continuity of patient care, consistent
1753 with the program's policies and procedures referenced in VI.C.2–
1754 VI.C.2.b), in the event that a fellow may be unable to perform their
1755 patient care responsibilities due to excessive fatigue. ^(Core)
1756
1757 **VI.D.3.** The program, in partnership with its Sponsoring Institution, must
1758 ensure adequate sleep facilities and safe transportation options for
1759 fellows who may be too fatigued to safely return home. ^(Core)
1760
1761 **VI.E.** Clinical Responsibilities, Teamwork, and Transitions of Care
1762
1763 **VI.E.1.** Clinical Responsibilities
1764
1765 The clinical responsibilities for each fellow must be based on PGY
1766 level, patient safety, fellow ability, severity and complexity of patient
1767 illness/condition, and available support services. ^(Core)
1768

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

- 1769
1770 **VI.E.2.** Teamwork
1771
1772 Fellows must care for patients in an environment that maximizes
1773 communication. This must include the opportunity to work as a
1774 member of effective interprofessional teams that are appropriate to
1775 the delivery of care in the subspecialty and larger health system.
1776 ^(Core)
1777
1778 **VI.E.3.** Transitions of Care
1779
1780 **VI.E.3.a)** Programs must design clinical assignments to optimize
1781 transitions in patient care, including their safety, frequency,
1782 and structure. ^(Core)
1783
1784 **VI.E.3.b)** Programs, in partnership with their Sponsoring Institutions,
1785 must ensure and monitor effective, structured hand-over
1786 processes to facilitate both continuity of care and patient
1787 safety. ^(Core)
1788

- 1789 VI.E.3.c) Programs must ensure that fellows are competent in
 1790 communicating with team members in the hand-over process.
 1791 (Outcome)
 1792
- 1793 VI.E.3.d) Programs and clinical sites must maintain and communicate
 1794 schedules of attending physicians and fellows currently
 1795 responsible for care. (Core)
 1796
- 1797 VI.E.3.e) Each program must ensure continuity of patient care,
 1798 consistent with the program’s policies and procedures
 1799 referenced in VI.C.2-VI.C.2.b), in the event that a fellow may
 1800 be unable to perform their patient care responsibilities due to
 1801 excessive fatigue or illness, or family emergency. (Core)
 1802
- 1803 VI.F. Clinical Experience and Education
 1804
- 1805 *Programs, in partnership with their Sponsoring Institutions, must design*
 1806 *an effective program structure that is configured to provide fellows with*
 1807 *educational and clinical experience opportunities, as well as reasonable*
 1808 *opportunities for rest and personal activities.*
 1809

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

- 1810
- 1811 VI.F.1. Maximum Hours of Clinical and Educational Work per Week
 1812
- 1813 Clinical and educational work hours must be limited to no more than
 1814 80 hours per week, averaged over a four-week period, inclusive of all
 1815 in-house clinical and educational activities, clinical work done from
 1816 home, and all moonlighting. (Core)
 1817

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling
 While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their

scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

1818
1819
1820

VI.F.2. Mandatory Time Free of Clinical Work and Education

1821 VI.F.2.a) The program must design an effective program structure that
1822 is configured to provide fellows with educational
1823 opportunities, as well as reasonable opportunities for rest
1824 and personal well-being. ^(Core)

1825
1826 VI.F.2.b) Fellows should have eight hours off between scheduled
1827 clinical work and education periods. ^(Detail)

1828
1829 VI.F.2.b).(1) There may be circumstances when fellows choose to
1830 stay to care for their patients or return to the hospital
1831 with fewer than eight hours free of clinical experience
1832 and education. This must occur within the context of
1833 the 80-hour and the one-day-off-in-seven
1834 requirements. ^(Detail)

1835
Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1836
1837 VI.F.2.c) Fellows must have at least 14 hours free of clinical work and
1838 education after 24 hours of in-house call. ^(Core)

1839
Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1840
1841 VI.F.2.d) Fellows must be scheduled for a minimum of one day in
1842 seven free of clinical work and required education (when
1843 averaged over four weeks). At-home call cannot be assigned
1844 on these free days. ^(Core)

1845
Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is

defined in the ACGME Glossary of Terms as “one (1) continuous 24-hour period free from all administrative, clinical, and educational activities.”

- VI.F.3. Maximum Clinical Work and Education Period Length**
- VI.F.3.a) Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical assignments. ^(Core)**
- VI.F.3.a).(1) Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or fellow education. ^(Core)**
- VI.F.3.a).(1).(a) Additional patient care responsibilities must not be assigned to a fellow during this time. ^(Core)**

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

- VI.F.4. Clinical and Educational Work Hour Exceptions**
- VI.F.4.a) In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:**
- VI.F.4.a).(1) to continue to provide care to a single severely ill or unstable patient; ^(Detail)**
- VI.F.4.a).(2) humanistic attention to the needs of a patient or family; or, ^(Detail)**
- VI.F.4.a).(3) to attend unique educational events. ^(Detail)**
- VI.F.4.b) These additional hours of care or education will be counted toward the 80-hour weekly limit. ^(Detail)**

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and

that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

VI.F.7. Maximum In-House On-Call Frequency

Fellows must be scheduled for in-house call no more frequently than every third night (when averaged over a four-week period). ^(Core)

VI.F.8. At-Home Call

VI.F.8.a) Time spent on patient care activities by fellows on at-home call must count toward the 80-hour maximum weekly limit. The frequency of at-home call is not subject to the every-third-night limitation, but must satisfy the requirement for one day in seven free of clinical work and education, when averaged over four weeks. ^(Core)

1922 VI.F.8.a).(1) At-home call must not be so frequent or taxing as to
1923 preclude rest or reasonable personal time for each
1924 fellow. ^(Core)

1925
1926 VI.F.8.b) Fellows are permitted to return to the hospital while on at-
1927 home call to provide direct care for new or established
1928 patients. These hours of inpatient patient care must be
1929 included in the 80-hour maximum weekly limit. ^(Detail)
1930

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
