1 **ACGME Program Requirements for Graduate Medical Education**  
2 **in Endocrinology, Diabetes, and Metabolism**

3  
4 **Common Program Requirements (Fellowship) are in BOLD**

5  
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that  
7 section. These philosophic statements are not program requirements and are therefore not  
8 citable.  
9

**Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.**

10  
11 **Introduction**

12  
13 **Int.A.** *Fellowship is advanced graduate medical education beyond a core  
14 residency program for physicians who desire to enter more specialized  
15 practice. Fellowship-trained physicians serve the public by providing  
16 subspecialty care, which may also include core medical care, acting as a  
17 community resource for expertise in their field, creating and integrating  
18 new knowledge into practice, and educating future generations of  
19 physicians. Graduate medical education values the strength that a diverse  
20 group of physicians brings to medical care.*

21  
22 *Fellows who have completed residency are able to practice independently  
23 in their core specialty. The prior medical experience and expertise of  
24 fellows distinguish them from physicians entering into residency training.  
25 The fellow's care of patients within the subspecialty is undertaken with  
26 appropriate faculty supervision and conditional independence. Faculty  
27 members serve as role models of excellence, compassion,  
28 professionalism, and scholarship. The fellow develops deep medical  
29 knowledge, patient care skills, and expertise applicable to their focused  
30 area of practice. Fellowship is an intensive program of subspecialty clinical  
31 and didactic education that focuses on the multidisciplinary care of  
32 patients. Fellowship education is often physically, emotionally, and  
33 intellectually demanding, and occurs in a variety of clinical learning  
34 environments committed to graduate medical education and the well-being  
35 of patients, residents, fellows, faculty members, students, and all members  
36 of the health care team.*

37  
38 *In addition to clinical education, many fellowship programs advance  
39 fellows' skills as physician-scientists. While the ability to create new  
40 knowledge within medicine is not exclusive to fellowship-educated  
41 physicians, the fellowship experience expands a physician's abilities to  
42 pursue hypothesis-driven scientific inquiry that results in contributions to  
43 the medical literature and patient care. Beyond the clinical subspecialty  
44 expertise achieved, fellows develop mentored relationships built on an  
45 infrastructure that promotes collaborative research.*

46  
47 **Int.B.** **Definition of Subspecialty**

48  
49 Endocrinology, diabetes, and metabolism is the subspecialty of internal medicine  
50 that focuses on the diagnosis and care of disorders of the endocrine (glandular)  
51 system and the associated metabolic dysfunction.  
52

53 **Int.C. Length of Educational Program**

54  
55 The educational program in endocrinology, diabetes and metabolism must be 24  
56 months in length. <sup>(Core)\*</sup>  
57

58 **I. Oversight**

59  
60 **I.A. Sponsoring Institution**

61  
62 *The Sponsoring Institution is the organization or entity that assumes the*  
63 *ultimate financial and academic responsibility for a program of graduate*  
64 *medical education consistent with the ACGME Institutional Requirements.*  
65

66 *When the Sponsoring Institution is not a rotation site for the program, the*  
67 *most commonly utilized site of clinical activity for the program is the*  
68 *primary clinical site.*  
69

**Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.**

70  
71 **I.A.1. The program must be sponsored by one ACGME-accredited**  
72 **Sponsoring Institution.** <sup>(Core)</sup>  
73

74 **I.B. Participating Sites**

75  
76 *A participating site is an organization providing educational experiences or*  
77 *educational assignments/rotations for fellows.*  
78

79 **I.B.1. The program, with approval of its Sponsoring Institution, must**  
80 **designate a primary clinical site.** <sup>(Core)</sup>  
81

82 **I.B.1.a)** An endocrinology, diabetes and metabolism fellowship must  
83 function as an integral part of an ACGME-accredited residency in  
84 internal medicine. <sup>(Core)</sup>  
85

86 **I.B.1.b)** The Sponsoring Institution must establish the endocrinology,  
87 diabetes and metabolism fellowship within a department of  
88 internal medicine or an administrative unit whose primary mission  
89 is the advancement of internal medicine subspecialty education

- 90 and patient care. <sup>(Detail)†</sup>
- 91
- 92 I.B.1.c) The Sponsoring Institution must ensure that there is a reporting
- 93 relationship with the program director of the internal medicine
- 94 residency program to ensure compliance with ACGME
- 95 accreditation requirements. <sup>(Core)</sup>
- 96
- 97 **I.B.2. There must be a program letter of agreement (PLA) between the**
- 98 **program and each participating site that governs the relationship**
- 99 **between the program and the participating site providing a required**
- 100 **assignment. <sup>(Core)</sup>**
- 101
- 102 **I.B.2.a) The PLA must:**
- 103
- 104 **I.B.2.a).(1) be renewed at least every 10 years; and, <sup>(Core)</sup>**
- 105
- 106 **I.B.2.a).(2) be approved by the designated institutional official**
- 107 **(DIO). <sup>(Core)</sup>**
- 108
- 109 **I.B.3. The program must monitor the clinical learning and working**
- 110 **environment at all participating sites. <sup>(Core)</sup>**
- 111
- 112 **I.B.3.a) At each participating site there must be one faculty member,**
- 113 **designated by the program director, who is accountable for**
- 114 **fellow education for that site, in collaboration with the**
- 115 **program director. <sup>(Core)</sup>**
- 116

**Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.**

**Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:**

- **Identifying the faculty members who will assume educational and supervisory responsibility for fellows**
- **Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows**
- **Specifying the duration and content of the educational experience**
- **Stating the policies and procedures that will govern fellow education during the assignment**

- 117
- 118 **I.B.4. The program director must submit any additions or deletions of**
- 119 **participating sites routinely providing an educational experience,**

120 required for all fellows, of one month full time equivalent (FTE) or  
121 more through the ACGME's Accreditation Data System (ADS). (Core)  
122

123 I.C. The program, in partnership with its Sponsoring Institution, must engage in  
124 practices that focus on mission-driven, ongoing, systematic recruitment  
125 and retention of a diverse and inclusive workforce of residents (if present),  
126 fellows, faculty members, senior administrative staff members, and other  
127 relevant members of its academic community. (Core)  
128

**Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).**

129  
130 I.D. Resources  
131

132 I.D.1. The program, in partnership with its Sponsoring Institution, must  
133 ensure the availability of adequate resources for fellow education.  
134 (Core)

135  
136 I.D.1.a) Space and Equipment  
137

138 There must be space and equipment for the program, including  
139 meeting rooms, examination rooms, computers, visual and other  
140 educational aids, and work/study space. (Core)  
141

142 I.D.1.b) Facilities  
143

144 I.D.1.b).(1) Inpatient and outpatient systems must be in place to  
145 prevent fellows from performing routine clerical functions,  
146 such as scheduling tests and appointments, and retrieving  
147 records and letters. (Detail)  
148

149 I.D.1.b).(2) The sponsoring institution must provide the broad range of  
150 facilities and clinical support services required to provide  
151 comprehensive care of adult patients. (Core)  
152

153 I.D.1.b).(3) Fellows must have access to a lounge facility during  
154 assigned duty hours. (Detail)  
155

156 I.D.1.b).(4) When fellows are in the hospital, assigned night duty, or  
157 called in from home, they must be provided with a secure  
158 space for their belongings. (Detail)  
159

160 I.D.1.c) Laboratory and Imaging Services  
161

162 I.D.1.c).(1) There must be a complete biochemistry laboratory and  
163 facilities for hormone immunoassays. (Core)  
164

165 I.D.1.c).(2) There must be access to karyotyping and  
166 immunohistologic studies. (Core)

167  
168 I.D.1.c).(3) Imaging services must include nuclear, ultrasound, and  
169 radiologic facilities, including bone density. (Core)

170  
171 I.D.1.d) Medical Records  
172  
173 Access to an electronic health record should be provided. In the  
174 absence of an existing electronic health record, institutions must  
175 demonstrate institutional commitment to its development and  
176 progress toward its implementation. (Core)

177  
178 **I.D.2. The program, in partnership with its Sponsoring Institution, must**  
179 **ensure healthy and safe learning and working environments that**  
180 **promote fellow well-being and provide for:** (Core)

181  
182 **I.D.2.a) access to food while on duty;** (Core)

183  
184 **I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available**  
185 **and accessible for fellows with proximity appropriate for safe**  
186 **patient care;** (Core)

187

**Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.**

188

189 **I.D.2.c) clean and private facilities for lactation that have refrigeration**  
190 **capabilities, with proximity appropriate for safe patient care;**  
191 **(Core)**

192

**Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).**

193

194 **I.D.2.d) security and safety measures appropriate to the participating**  
195 **site; and,** (Core)

196

197 **I.D.2.e) accommodations for fellows with disabilities consistent with**  
198 **the Sponsoring Institution's policy.** (Core)

199

200 **I.D.3.** **Fellows must have ready access to subspecialty-specific and other**  
201 **appropriate reference material in print or electronic format. This**  
202 **must include access to electronic medical literature databases with**  
203 **full text capabilities.** <sup>(Core)</sup>  
204

205 **I.D.4.** **The program's educational and clinical resources must be adequate**  
206 **to support the number of fellows appointed to the program.** <sup>(Core)</sup>  
207

208 I.D.4.a) Patient Population

209  
210 I.D.4.a).(1) The patient population must have a variety of clinical  
211 problems and stages of diseases. <sup>(Core)</sup>  
212

213 I.D.4.a).(2) There must be patients of each gender, with a broad age  
214 range, including geriatric patients. <sup>(Core)</sup>  
215

216 I.D.4.a).(3) A sufficient number of patients must be available to enable  
217 each fellow to achieve the required educational outcomes.  
218 <sup>(Core)</sup>  
219

220 **I.E.** ***A fellowship program usually occurs in the context of many learners and***  
221 ***other care providers and limited clinical resources. It should be structured***  
222 ***to optimize education for all learners present.***  
223

224 **I.E.1.** **Fellows should contribute to the education of residents in core**  
225 **programs, if present.** <sup>(Core)</sup>  
226

**Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.**

227  
228 **II. Personnel**  
229

230 **II.A. Program Director**  
231

232 **II.A.1.** **There must be one faculty member appointed as program director**  
233 **with authority and accountability for the overall program, including**  
234 **compliance with all applicable program requirements.** <sup>(Core)</sup>  
235

236 **II.A.1.a)** **The Sponsoring Institution's Graduate Medical Education**  
237 **Committee (GMEC) must approve a change in program**  
238 **director.** <sup>(Core)</sup>  
239

240 **II.A.1.b)** **Final approval of the program director resides with the**  
241 **Review Committee.** <sup>(Core)</sup>  
242

**Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and have overall responsibility for the program. The program director's nomination is reviewed and approved by the GMEC. Final approval of the program director resides with the applicable ACGME Review Committee.**

243  
244  
245  
246  
247  
248  
249  
250  
251  
252  
253  
254  
255

**II.A.2. The program director and, as applicable, the program's leadership team, must be provided with support adequate for administration of the program based upon its size and configuration. <sup>(Core)</sup>**

II.A.2.a) At a minimum, the program director must be provided with the salary support required to devote 20-50 percent FTE of non-clinical time to the administration of the program. <sup>(Core)</sup>

At a minimum, the program director must be provided with the dedicated time and support specified below for administration of the program: <sup>(Core)</sup>

<u>Number of Approved Fellow Positions</u>	<u>Minimum Support Required (FTE)</u>
<u>&lt;7</u>	<u>.2</u>
<u>7-9</u>	<u>.25</u>
<u>10-12</u>	<u>.3</u>
<u>13-15</u>	<u>.35</u>
<u>16-18</u>	<u>.4</u>

256  
257  
258  
259  
260  
261  
262

II.A.2.b) Programs must appoint at least one of the subspecialty-certified core faculty members to be associate program director(s). The associate program directors(s) must be provided with support equal to a dedicated minimum time for administration of the program as follows: <sup>(Core)</sup>

<u>Number of Approved Fellow Positions</u>	<u>Minimum Support Required (FTE)</u>
<u>&lt;7</u>	<u>0</u>
<u>7-9</u>	<u>.13</u>
<u>10-12</u>	<u>.14</u>
<u>13-15</u>	<u>.15</u>
<u>16-18</u>	<u>.16</u>

263

**Background and Intent: To achieve successful graduate medical education, individuals serving as education and administrative leaders of fellowship programs, as well as those significantly engaged in the education, supervision, evaluation, and mentoring of fellows, must have sufficient dedicated professional time to perform the vital activities required to sustain an accredited program.**

**The ultimate outcome of graduate medical education is excellence in fellow education and patient care.**

The program director and, as applicable, the program leadership team, devote a portion of their professional effort to the oversight and management of the fellowship program, as defined in II.A.4.-II.A.4.a).(16). Both provision of support for the time required for the leadership effort and flexibility regarding how this support is provided are important. Programs, in partnership with their Sponsoring Institutions, may provide support for this time in a variety of ways. Examples of support may include, but are not limited to, salary support, supplemental compensation, educational value units, or relief of time from other professional duties.

Program directors and, as applicable, members of the program leadership team, who are new to the role may need to devote additional time to program oversight and management initially as they learn and become proficient in administering the program. It is suggested that during this initial period the support described above be increased as needed.

264

Subspecialty-Specific Background and Intent: For instance, a program with an approved complement of 12 fellows is required to have at least 30 percent FTE support for the Program Director and at least 14 percent FTE support for the associate program director(s). Because an associate program director is also a core faculty member, the minimum dedicated time requirements for associate program directors are inclusive of core faculty activities. An additional 10 percent FTE for the core faculty position is not required. For example, if one core faculty member is named the associate program director for a 12-fellow program, the required minimum support for that position is 14 percent FTE. Further, the Review Committee allows the minimum required FTE support to be shared among multiple associate program directors, as delegated by and at the discretion of the program director.

- 265 **II.A.3. Qualifications of the program director:**  
266  
267 **II.A.3.a) must include subspecialty expertise and qualifications**  
268 **acceptable to the Review Committee; and, <sup>(Core)</sup>**  
269  
270 II.A.3.a).(1) The program director must have administrative experience  
271 and at least three years of participation as an active faculty  
272 member in an ACGME-accredited internal medicine  
273 residency or endocrinology, diabetes, and metabolism  
274 fellowship. <sup>(Core)</sup>  
275  
276 **II.A.3.b) must include current certification in the subspecialty for**  
277 **which they are the program director by the American Board**  
278 **of Internal Medicine (ABIM) or by the American Osteopathic**  
279 **Board of Internal Medicine (AOBIM), or subspecialty**  
280 **qualifications that are acceptable to the Review Committee.**  
281 <sup>(Core)</sup>  
282  
283 II.A.3.b).(1) The Review Committee only accepts current ABIM or  
284 AOBIM certification in endocrinology, diabetes and  
285 metabolism. <sup>(Core)</sup>  
286  
287 **II.A.4. Program Director Responsibilities**  
288

289 The program director must have responsibility, authority, and  
290 accountability for: administration and operations; teaching and  
291 scholarly activity; fellow recruitment and selection, evaluation, and  
292 promotion of fellows, and disciplinary action; supervision of fellows;  
293 and fellow education in the context of patient care. <sup>(Core)</sup>  
294

295 **II.A.4.a) The program director must:**

296 **II.A.4.a).(1) be a role model of professionalism;** <sup>(Core)</sup>  
297  
298

**Background and Intent:** The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

299  
300 **II.A.4.a).(2) design and conduct the program in a fashion**  
301 **consistent with the needs of the community, the**  
302 **mission(s) of the Sponsoring Institution, and the**  
303 **mission(s) of the program;** <sup>(Core)</sup>  
304

**Background and Intent:** The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

305  
306 **II.A.4.a).(3) administer and maintain a learning environment**  
307 **conducive to educating the fellows in each of the**  
308 **ACGME Competency domains;** <sup>(Core)</sup>  
309

**Background and Intent:** The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

310  
311 **II.A.4.a).(4) develop and oversee a process to evaluate candidates**  
312 **prior to approval as program faculty members for**  
313 **participation in the fellowship program education and**  
314 **at least annually thereafter, as outlined in V.B.;** <sup>(Core)</sup>  
315

316 **II.A.4.a).(5) have the authority to approve program faculty**  
317 **members for participation in the fellowship program**  
318 **education at all sites;** <sup>(Core)</sup>  
319

- 320 II.A.4.a).(6) have the authority to remove program faculty  
321 members from participation in the fellowship program  
322 education at all sites; <sup>(Core)</sup>  
323  
324 II.A.4.a).(7) have the authority to remove fellows from supervising  
325 interactions and/or learning environments that do not  
326 meet the standards of the program; <sup>(Core)</sup>  
327

**Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.**

**There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.**

- 328  
329 II.A.4.a).(8) submit accurate and complete information required  
330 and requested by the DIO, GMEC, and ACGME; <sup>(Core)</sup>  
331  
332 II.A.4.a).(9) provide applicants who are offered an interview with  
333 information related to the applicant's eligibility for the  
334 relevant subspecialty board examination(s); <sup>(Core)</sup>  
335  
336 II.A.4.a).(10) provide a learning and working environment in which  
337 fellows have the opportunity to raise concerns and  
338 provide feedback in a confidential manner as  
339 appropriate, without fear of intimidation or retaliation;  
340 <sup>(Core)</sup>  
341  
342 II.A.4.a).(11) ensure the program's compliance with the Sponsoring  
343 Institution's policies and procedures related to  
344 grievances and due process; <sup>(Core)</sup>  
345  
346 II.A.4.a).(12) ensure the program's compliance with the Sponsoring  
347 Institution's policies and procedures for due process  
348 when action is taken to suspend or dismiss, not to  
349 promote, or not to renew the appointment of a fellow;  
350 <sup>(Core)</sup>  
351

**Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.**

- 352  
353 II.A.4.a).(13) ensure the program's compliance with the Sponsoring  
354 Institution's policies and procedures on employment  
355 and non-discrimination; <sup>(Core)</sup>  
356

- 357 **II.A.4.a).(13).(a)** **Fellows must not be required to sign a non-**  
358 **competition guarantee or restrictive covenant.**  
359 **(Core)**  
360  
361 **II.A.4.a).(14)** **document verification of program completion for all**  
362 **graduating fellows within 30 days; (Core)**  
363  
364 **II.A.4.a).(15)** **provide verification of an individual fellow’s**  
365 **completion upon the fellow’s request, within 30 days;**  
366 **and, (Core)**  
367

**Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.**

- 368  
369 **II.A.4.a).(16)** **obtain review and approval of the Sponsoring**  
370 **Institution’s DIO before submitting information or**  
371 **requests to the ACGME, as required in the Institutional**  
372 **Requirements and outlined in the ACGME Program**  
373 **Director’s Guide to the Common Program**  
374 **Requirements. (Core)**  
375

376 **II.B. Faculty**

377  
378 ***Faculty members are a foundational element of graduate medical education***  
379 ***– faculty members teach fellows how to care for patients. Faculty members***  
380 ***provide an important bridge allowing fellows to grow and become practice***  
381 ***ready, ensuring that patients receive the highest quality of care. They are***  
382 ***role models for future generations of physicians by demonstrating***  
383 ***compassion, commitment to excellence in teaching and patient care,***  
384 ***professionalism, and a dedication to lifelong learning. Faculty members***  
385 ***experience the pride and joy of fostering the growth and development of***  
386 ***future colleagues. The care they provide is enhanced by the opportunity to***  
387 ***teach. By employing a scholarly approach to patient care, faculty members,***  
388 ***through the graduate medical education system, improve the health of the***  
389 ***individual and the population.***

390  
391 ***Faculty members ensure that patients receive the level of care expected***  
392 ***from a specialist in the field. They recognize and respond to the needs of***  
393 ***the patients, fellows, community, and institution. Faculty members provide***  
394 ***appropriate levels of supervision to promote patient safety. Faculty***  
395 ***members create an effective learning environment by acting in a***  
396 ***professional manner and attending to the well-being of the fellows and***  
397 ***themselves.***  
398

**Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment.**

399  
400 **II.B.1.** For each participating site, there must be a sufficient number of  
401 faculty members with competence to instruct and supervise all  
402 fellows at that location. <sup>(Core)</sup>  
403

404 **II.B.2.** Faculty members must:

405  
406 **II.B.2.a)** be role models of professionalism; <sup>(Core)</sup>  
407

408 **II.B.2.b)** demonstrate commitment to the delivery of safe, quality,  
409 cost-effective, patient-centered care; <sup>(Core)</sup>  
410

**Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.**

411  
412 **II.B.2.c)** demonstrate a strong interest in the education of fellows; <sup>(Core)</sup>  
413

414 **II.B.2.d)** devote sufficient time to the educational program to fulfill  
415 their supervisory and teaching responsibilities; <sup>(Core)</sup>  
416

417 **II.B.2.e)** administer and maintain an educational environment  
418 conducive to educating fellows; <sup>(Core)</sup>  
419

420 **II.B.2.f)** regularly participate in organized clinical discussions,  
421 rounds, journal clubs, and conferences; and, <sup>(Core)</sup>  
422

423 **II.B.2.g)** pursue faculty development designed to enhance their skills  
424 at least annually. <sup>(Core)</sup>  
425

**Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.**

426  
427 **II.B.3.** Faculty Qualifications  
428

429 **II.B.3.a)** Faculty members must have appropriate qualifications in  
430 their field and hold appropriate institutional appointments.  
431 <sup>(Core)</sup>  
432

433 **II.B.3.b)** Subspecialty physician faculty members must:

434  
435 **II.B.3.b).(1)** have current certification in the subspecialty by the  
436 American Board of Internal Medicine or the American  
437 Osteopathic Board of Internal Medicine, or possess

438  
439  
440  
441  
442  
443  
444

qualifications judged acceptable to the Review  
Committee. <sup>(Core)</sup>

**II.B.3.c) Any non-physician faculty members who participate in  
fellowship program education must be approved by the  
program director. <sup>(Core)</sup>**

**Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.**

445  
446  
447  
448  
449  
450  
451  
452

**II.B.3.d) Any other specialty physician faculty members must have  
current certification in their specialty by the appropriate  
American Board of Medical Specialties (ABMS) member  
board or American Osteopathic Association (AOA) certifying  
board, or possess qualifications judged acceptable to the  
Review Committee. <sup>(Core)</sup>**

453  
454  
455  
456  
457  
458  
459  
460

**II.B.4. Core Faculty**

**Core faculty members must have a significant role in the education  
and supervision of fellows and must devote a significant portion of  
their entire effort to fellow education and/or administration, and  
must, as a component of their activities, teach, evaluate, and provide  
formative feedback to fellows. <sup>(Core)</sup>**

**Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum, mentoring fellows, and assessing fellows' progress toward achievement of competence in and the independent practice of the specialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program. Core faculty members may also be selected for their specific expertise and unique contribution to the program. Core faculty members are engaged in a broad range of activities, which may vary across programs and specialties. Core faculty members provide clinical teaching and supervision of fellows, and also participate in non-clinical activities related to fellow education and program administration. Examples of these non-clinical activities include, but are not limited to, interviewing and selecting fellow applicants, providing didactic instruction, mentoring fellows, simulation exercises, completing the annual ACGME Faculty Survey, and participating on the program's Clinical Competency Committee, Program Evaluation Committee, and other GME committees.**

461  
462  
463  
464

**II.B.4.a) Core faculty members must be designated by the program  
director. <sup>(Core)</sup>**

- 465 **II.B.4.b) Core faculty members must complete the annual ACGME**  
 466 **Faculty Survey.** <sup>(Core)</sup>  
 467  
 468 **II.B.4.c)** In addition to the program director, there must be at least one core  
 469 faculty member certified in endocrinology, diabetes, and  
 470 metabolism by the ABIM or the AOBIM. <sup>(Core)</sup>  
 471  
 472 **II.B.4.d)** In programs approved for more than three fellows, there must be  
 473 at least one core faculty member certified in endocrinology,  
 474 diabetes, and metabolism by the ABIM or the AOBIM for every 1.5  
 475 fellows. <sup>(Core)</sup>  
 476  
 477 **II.B.4.e)** At a minimum, the required core faculty members, in aggregate  
 478 and excluding members of the program leadership, must be  
 479 provided with support equal to an average dedicated minimum of  
 480 .1 FTE for educational and administrative responsibilities that do  
 481 not involve direct patient care. <sup>(Core)</sup>  
 482

~~Specialty Background and Intent: The program must have a minimum number of ABIM- or AOBIM-certified endocrinology, diabetes, and metabolism faculty members who devote significant time to teaching, supervising, and advising residents, and working closely with the program director. One way the endocrinology, diabetes, and metabolism-certified faculty members can demonstrate they are devoting a significant portion of their effort to resident education is by dedicating an average of 10 hours per week to the program.~~

483

Subspecialty-Specific Background and Intent: For instance, a program with an approved complement of 12 fellows is required to have a minimum of eight ABIM- or AOBIM-subspecialty-certified faculty members and an FTE of 10 percent each. Because an associate program director is also a core faculty member, the minimum dedicated time requirements for associate program directors are inclusive of core faculty activities. An additional 10 percent FTE for the core faculty position is not required. For example, if one core faculty member is named the associate program director for a 12-fellow program, the required minimum support for that position is 14 percent FTE.

- 484 **II.C. Program Coordinator**  
 485  
 486 **II.C.1. There must be a program coordinator.** <sup>(Core)</sup>  
 487  
 488 **II.C.2. The program coordinator must be provided with support adequate**  
 489 **for administration of the program based upon its size and**  
 490 **configuration.** <sup>(Core)</sup>  
 491  
 492 **II.C.2.a)** At a minimum, the program coordinator must be provided with the  
 493 dedicated time and support specified below for administration of  
 494 the program. Additional administrative support must be provided  
 495 based on the program size as follows: <sup>(Core)</sup>  
 496

<u>Number of Approved Fellow Positions</u>	<u>Minimum FTE Required for Coordinator Support</u>	<u>Additional Aggregate FTE Required for Administration of the Program</u>
--	---	--

<u>1-3</u>	<u>.3</u>	<u>0</u>
<u>4-6</u>	<u>.3</u>	<u>.2</u>
<u>7-9</u>	<u>.3</u>	<u>.38</u>
<u>10-12</u>	<u>.3</u>	<u>.44</u>
<u>13-15</u>	<u>.3</u>	<u>.50</u>
<u>16-18</u>	<u>.3</u>	<u>.56</u>

497

**Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.**

**Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as otherwise titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison and facilitator between the learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.**

**The program coordinator is a key member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management appropriate to the complexity of the program. Program coordinators are expected to develop in-depth knowledge of the ACGME and Program Requirements, including policies and procedures. Program coordinators assist the program director in meeting accreditation requirements, educational programming, and support of fellows.**

**Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.**

498

Subspecialty-Specific Background and Intent: For instance, a program with an approved complement of 12 fellows is required to have at least 74 percent FTE administrative support: 30 percent FTE for the program coordinator; and an additional 44 percent FTE aggregate support. This additional support may be for the program coordinator only or divided among the program coordinator and one or more other administrative personnel. The Review Committee has not specified how the FTE should be distributed to allow programs, in partnership with their Sponsoring Institution, to allocate the FTE as they see fit.

499

500

**II.D. Other Program Personnel**

501

502

**The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. <sup>(Core)</sup>**

503

504

505

**Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.**

506

- 507 II.D.1. There must be services available from other health care professionals,  
 508 including dietitians, language interpreters, nurses, occupational  
 509 therapists, physical therapists, and social workers. <sup>(Detail)</sup>  
 510  
 511 II.D.2. There must be a close working relationship with dietary and/or nutrition  
 512 services, as well as with specialists in general surgery, nephrology,  
 513 neurological surgery, neurology, obstetrics and gynecology,  
 514 ophthalmology, pediatrics, podiatry, and urology. <sup>(Detail)</sup>  
 515  
 516 II.D.3. There must be appropriate and timely consultation from other specialties.  
 517 <sup>(Detail)</sup>  
 518

519 **III. Fellow Appointments**

520 **III.A. Eligibility Criteria**

521 **III.A.1. Eligibility Requirements – Fellowship Programs**

522  
 523 **All required clinical education for entry into ACGME-accredited**  
 524 **fellowship programs must be completed in an ACGME-accredited**  
 525 **residency program, an AOA-approved residency program, a**  
 526 **program with ACGME International (ACGME-I) Advanced Specialty**  
 527 **Accreditation, or a Royal College of Physicians and Surgeons of**  
 528 **Canada (RCPSC)-accredited or College of Family Physicians of**  
 529 **Canada (CFPC)-accredited residency program located in Canada.**  
 530 <sup>(Core)</sup>  
 531  
 532  
 533

**Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).**

- 534  
 535 **III.A.1.a) Fellowship programs must receive verification of each**  
 536 **entering fellow’s level of competence in the required field,**  
 537 **upon matriculation, using ACGME, ACGME-I, or CanMEDS**  
 538 **Milestones evaluations from the core residency program.** <sup>(Core)</sup>  
 539  
 540 III.A.1.b) Prior to appointment in the fellowship, fellows should have  
 541 completed an internal medicine program that satisfies the  
 542 requirements in III.A.1. <sup>(Core)</sup>  
 543  
 544 III.A.1.b).(1) Fellows who did not complete an internal medicine  
 545 program that satisfies the requirements in III.A.1. must  
 546 have at least three years of internal medicine education  
 547 prior to starting the fellowship as well as met all of the  
 548 criteria in the “Fellow Eligibility Exception” section below.  
 549 <sup>(Core)</sup>  
 550  
 551 **III.A.1.c) Fellow Eligibility Exception**  
 552  
 553 **The Review Committee for Internal Medicine will allow the**  
 554 **following exception to the fellowship eligibility requirements:**

- 555  
556 **III.A.1.c).(1)** **An ACGME-accredited fellowship program may accept**  
557 **an exceptionally qualified international graduate**  
558 **applicant who does not satisfy the eligibility**  
559 **requirements listed in III.A.1., but who does meet all of**  
560 **the following additional qualifications and conditions:**  
561 **(Core)**
- 562  
563 **III.A.1.c).(1).(a)** **evaluation by the program director and**  
564 **fellowship selection committee of the**  
565 **applicant’s suitability to enter the program,**  
566 **based on prior training and review of the**  
567 **summative evaluations of training in the core**  
568 **specialty; and, (Core)**
- 569  
570 **III.A.1.c).(1).(b)** **review and approval of the applicant’s**  
571 **exceptional qualifications by the GMC; and,**  
572 **(Core)**
- 573  
574 **III.A.1.c).(1).(c)** **verification of Educational Commission for**  
575 **Foreign Medical Graduates (ECFMG)**  
576 **certification. (Core)**
- 577  
578 **III.A.1.c).(2)** **Applicants accepted through this exception must have**  
579 **an evaluation of their performance by the Clinical**  
580 **Competency Committee within 12 weeks of**  
581 **matriculation. (Core)**  
582

**Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.**

**In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.**

- 583  
584 **III.B.** **The program director must not appoint more fellows than approved by the**  
585 **Review Committee. (Core)**
- 586  
587 **III.B.1.** **All complement increases must be approved by the Review**  
588 **Committee. (Core)**  
589

590 III.B.2. The number of available fellow positions in the program must be at least  
591 one per year. <sup>(Detail)</sup>

592  
593 **III.C. Fellow Transfers**

594  
595 **The program must obtain verification of previous educational experiences**  
596 **and a summative competency-based performance evaluation prior to**  
597 **acceptance of a transferring fellow, and Milestones evaluations upon**  
598 **matriculation. <sup>(Core)</sup>**

599  
600 **IV. Educational Program**

601  
602 ***The ACGME accreditation system is designed to encourage excellence and***  
603 ***innovation in graduate medical education regardless of the organizational***  
604 ***affiliation, size, or location of the program.***

605  
606 ***The educational program must support the development of knowledgeable, skillful***  
607 ***physicians who provide compassionate care.***

608  
609 ***In addition, the program is expected to define its specific program aims consistent***  
610 ***with the overall mission of its Sponsoring Institution, the needs of the community***  
611 ***it serves and that its graduates will serve, and the distinctive capabilities of***  
612 ***physicians it intends to graduate. While programs must demonstrate substantial***  
613 ***compliance with the Common and subspecialty-specific Program Requirements, it***  
614 ***is recognized that within this framework, programs may place different emphasis***  
615 ***on research, leadership, public health, etc. It is expected that the program aims***  
616 ***will reflect the nuanced program-specific goals for it and its graduates; for***  
617 ***example, it is expected that a program aiming to prepare physician-scientists will***  
618 ***have a different curriculum from one focusing on community health.***

619  
620 **IV.A. The curriculum must contain the following educational components: <sup>(Core)</sup>**

621  
622 **IV.A.1. a set of program aims consistent with the Sponsoring Institution's**  
623 **mission, the needs of the community it serves, and the desired**  
624 **distinctive capabilities of its graduates; <sup>(Core)</sup>**

625  
626 **IV.A.1.a) The program's aims must be made available to program**  
627 **applicants, fellows, and faculty members. <sup>(Core)</sup>**

628  
629 **IV.A.2. competency-based goals and objectives for each educational**  
630 **experience designed to promote progress on a trajectory to**  
631 **autonomous practice in their subspecialty. These must be**  
632 **distributed, reviewed, and available to fellows and faculty members;**  
633 **<sup>(Core)</sup>**

634  
635 **IV.A.3. delineation of fellow responsibilities for patient care, progressive**  
636 **responsibility for patient management, and graded supervision in**  
637 **their subspecialty; <sup>(Core)</sup>**

638  

<b>Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical</b>
--

Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

639  
640  
641  
642

IV.A.4. structured educational activities beyond direct patient care; and,  
(Core)

**Background and Intent:** Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

643  
644  
645  
646  
647  
648

IV.A.5. advancement of fellows' knowledge of ethical principles  
foundational to medical professionalism. (Core)

IV.B. ACGME Competencies

**Background and Intent:** The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

649  
650  
651  
652  
653  
654  
655  
656  
657  
658  
659

IV.B.1. The program must integrate the following ACGME Competencies  
into the curriculum: (Core)

IV.B.1.a) Professionalism

Fellows must demonstrate a commitment to professionalism  
and an adherence to ethical principles. (Core)

IV.B.1.b) Patient Care and Procedural Skills

**Background and Intent:** Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs.* 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

660

661	<b>IV.B.1.b).(1)</b>	<b>Fellows must be able to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health.</b> <sup>(Core)</sup>
662		
663		
664		
665		
666	IV.B.1.b).(1).(a)	Fellows must demonstrate competence in the practice of health promotion, disease prevention, diagnosis, care, and treatment of patients of each gender, from adolescence to old age, during health and all stages of illness; <sup>(Core)</sup>
667		
668		
669

833		
834	IV.B.1.c).(3).(g)	genetics as it relates to endocrine diseases; <sup>(Core)</sup>
835		
836	IV.B.1.c).(3).(h)	pathogenesis and epidemiology of diabetes mellitus; <sup>(Core)</sup>
837		
838		
839	IV.B.1.c).(3).(i)	signal transduction pathways and biology of hormone receptors; and, <sup>(Core)</sup>
840		
841		
842	IV.B.1.c).(3).(j)	whole organ and islet cell pancreatic transplantation. <sup>(Core)</sup>
843		
844		

**IV.B.1.d)**

**Practice-based Learning and Improvement**

**Fellows must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. <sup>(Core)</sup>**

**Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.**

**The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.**

852  
853 **IV.B.1.e)**

**Interpersonal and Communication Skills**

**Fellows must demonstrate interpersonal and communication skills that result in the effective exchange of information and**

857		<b>collaboration with patients, their families, and health</b>
858		<b>professionals.</b> <small>(Core)</small>
859		
860	<b>IV.B.1.f)</b>	<b>Systems-based Practice</b>
861		
862		<b>Fellows must demonstrate an awareness of and</b>
863		<b>responsiveness to the larger context and system of health</b>
864		<b>care, including the social determinants of health, as well as</b>
865		<b>the ability to call effectively on other resources to provide</b>
866		<b>optimal health care.</b> <small>(Core)</small>
867		
868	<b>IV.C.</b>	<b>Curriculum Organization and Fellow Experiences</b>
869		
870	<b>IV.C.1.</b>	<b>The curriculum must be structured to optimize fellow educational</b>
871		<b>experiences, the length of these experiences, and supervisory</b>
872		<b>continuity.</b> <small>(Core)</small>
873		
874	IV.C.1.a)	Assignment of rotations must be structured to minimize the
875		frequency of rotational transitions, and rotations must be of
876		sufficient length to provide a quality educational experience,
877		defined by continuity of patient care, ongoing supervision,
878		longitudinal relationships with faculty members, and meaningful
879		assessment and feedback. <small>(Core)</small>
880		
881	IV.C.1.b)	Clinical experiences should be structured to facilitate learning in a
882		manner that allows fellows to function as part of an effective
883		interprofessional team that works together towards the shared
884		goals of patient safety and quality improvement. <small>(Core)</small>
885		
886	<b>IV.C.2.</b>	<b>The program must provide instruction and experience in pain</b>
887		<b>management if applicable for the subspecialty, including recognition</b>
888		<b>of the signs of addiction.</b> <small>(Core)</small>
889		
890	IV.C.3.	A minimum of 12 months must be devoted to clinical experience. <small>(Core)</small>
891		
892	IV.C.4.	Fellows must participate in training using simulation. <small>(Detail)</small>
893		
894	IV.C.5.	Experience with Continuity Ambulatory Patients
895		
896	IV.C.5.a)	Fellows must have continuity ambulatory clinic experience that
897		exposes them to the breadth and depth of the subspecialty. <small>(Core)</small>
898		
899	IV.C.5.b)	This experience should average one half-day each week. <small>(Detail)</small>
900		
901	IV.C.5.b).(1)	The program must include a minimum of two half-days of
902		ambulatory care per week, averaged over the two years of
903		education, which includes the continuity ambulatory
904		experience. <small>(Detail)</small>
905		
906	IV.C.5.b).(2)	Three half-days of ambulatory care per week is suggested.
907		<small>(Detail)</small>

908		
909	IV.C.5.c)	This experience must include an appropriate distribution of patients of each gender and a diversity of ages. <sup>(Core)</sup>
910		
911		
912		This should be accomplished through either:
913		
914	IV.C.5.c).(1)	a continuity clinic which provides fellows the opportunity to learn the course of disease; or, <sup>(Detail)</sup>
915		
916		
917	IV.C.5.c).(2)	selected blocks of at least six months which address specific areas of endocrine disease. <sup>(Detail)</sup>
918		
919		
920	IV.C.5.d)	Each fellow should, on average, be responsible for four to eight patients during each half-day session. <sup>(Detail)</sup>
921		
922		
923	IV.C.5.e)	The continuity patient care experience should not be interrupted by more than one month, excluding a fellow's vacation. <sup>(Detail)</sup>
924		
925		
926	IV.C.5.f)	Fellows should be informed of the status of their continuity patients when such patients are hospitalized, as clinically appropriate. <sup>(Detail)</sup>
927		
928		
929		
930	IV.C.6.	Procedures and Technical Skills
931		
932	IV.C.6.a)	Direct supervision of procedures performed by each fellow must occur until proficiency has been acquired and documented by the program director. <sup>(Core)</sup>
933		
934		
935		
936	IV.C.6.b)	Faculty members must teach and supervise the fellows in the performance and interpretation of procedures, which must be documented in each fellow's record, including indications, outcomes, diagnoses, and supervisor(s). <sup>(Core)</sup>
937		
938		
939		
940		
941	IV.C.7.	Fellows must have experience in the role of an endocrinology consultant in both the inpatient and outpatient settings. <sup>(Core)</sup>
942		
943		
944	IV.C.8.	The core curriculum must include a didactic program based upon the core knowledge content in the subspecialty area. <sup>(Core)</sup>
945		
946		
947	IV.C.8.a)	The program must afford each fellow an opportunity to review topics covered in conferences that he or she was unable to attend. <sup>(Detail)</sup>
948		
949		
950		
951	IV.C.8.b)	Fellows must participate in clinical case conferences, journal clubs, research conferences, and morbidity and mortality or quality improvement conferences. <sup>(Detail)</sup>
952		
953		
954		
955	IV.C.8.c)	All core conferences must have at least one faculty member present, and must be scheduled as to ensure peer-peer and peer-faculty interaction. <sup>(Detail)</sup>
956		
957		
958		

959 IV.C.9. Patient-based teaching must include direct interaction between fellows  
960 and faculty members, bedside teaching, discussion of pathophysiology,  
961 and the use of current evidence in diagnostic and therapeutic decisions.  
962 (Core)

963  
964 The teaching must be:

965  
966 IV.C.9.a) formally conducted on all inpatient, outpatient, and consultative  
967 services; and, (Detail)

968  
969 IV.C.9.b) conducted with a frequency and duration that ensures a  
970 meaningful and continuous teaching relationship between the  
971 assigned supervising faculty member(s) and fellows. (Detail)

972  
973 IV.C.10. Fellows must receive instruction in practice management relevant to  
974 endocrinology, diabetes, and metabolism. (Detail)

975  
976 **IV.D. Scholarship**

977  
978 ***Medicine is both an art and a science. The physician is a humanistic***  
979 ***scientist who cares for patients. This requires the ability to think critically,***  
980 ***evaluate the literature, appropriately assimilate new knowledge, and***  
981 ***practice lifelong learning. The program and faculty must create an***  
982 ***environment that fosters the acquisition of such skills through fellow***  
983 ***participation in scholarly activities as defined in the subspecialty-specific***  
984 ***Program Requirements. Scholarly activities may include discovery,***  
985 ***integration, application, and teaching.***

986  
987 ***The ACGME recognizes the diversity of fellowships and anticipates that***  
988 ***programs prepare physicians for a variety of roles, including clinicians,***  
989 ***scientists, and educators. It is expected that the program's scholarship will***  
990 ***reflect its mission(s) and aims, and the needs of the community it serves.***  
991 ***For example, some programs may concentrate their scholarly activity on***  
992 ***quality improvement, population health, and/or teaching, while other***  
993 ***programs might choose to utilize more classic forms of biomedical***  
994 ***research as the focus for scholarship.***

995  
996 **IV.D.1. Program Responsibilities**

997  
998 **IV.D.1.a) The program must demonstrate evidence of scholarly**  
999 **activities, consistent with its mission(s) and aims. (Core)**

1000  
1001 **IV.D.1.b) The program in partnership with its Sponsoring Institution,**  
1002 **must allocate adequate resources to facilitate fellow and**  
1003 **faculty involvement in scholarly activities. (Core)**

1004  
1005 **IV.D.2. Faculty Scholarly Activity**

1006  
1007 **IV.D.2.a) Among their scholarly activity, programs must demonstrate**  
1008 **accomplishments in at least three of the following domains:**  
1009 **(Core)**

- 1010
  - 1011
  - 1012
  - 1013
  - 1014
  - 1015
  - 1016
  - 1017
  - 1018
  - 1019
  - 1020
  - 1021
  - 1022
  - 1023
  - 1024
  - 1025
  - 1026
  - 1027
- Research in basic science, education, translational science, patient care, or population health
  - Peer-reviewed grants
  - Quality improvement and/or patient safety initiatives
  - Systematic reviews, meta-analyses, review articles, chapters in medical textbooks, or case reports
  - Creation of curricula, evaluation tools, didactic educational activities, or electronic educational materials
  - Contribution to professional committees, educational organizations, or editorial boards
  - Innovations in education

**IV.D.2.b) The program must demonstrate dissemination of scholarly activity within and external to the program by the following methods:**

**Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the fellows’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.**

1028

1029 **IV.D.2.b).(1)** faculty participation in grand rounds, posters, workshops, quality improvement presentations, podium presentations, grant leadership, non-peer-reviewed print/electronic resources, articles or publications, book chapters, textbooks, webinars, service on professional committees, or serving as a journal reviewer, journal editorial board member, or editor. (Outcome)‡

1030

1032

1033

1034

1035

1036

1037

1038 **IV.D.2.b).(2)** At least 50 percent of the core faculty members who are certified in endocrinology, diabetes, and metabolism by the ABIM or AOBIM (see Program Requirements II.B.4.c)-d) must annually engage in a variety of scholarly activities, as listed in Program Requirement IV.D.2.b).(1). (Core)

1039

1040

1041

1042

1043

**IV.D.3. Fellow Scholarly Activity**

1044

1045

1046 **IV.D.3.a)** While in the program, at least 50 percent of a program’s fellows must engage in more than one of the following scholarly activities: participation in grand rounds, posters, workshops, quality improvement presentations, podium presentations, grant leadership, non-peer-reviewed print/electronic resources, articles

1047

1048

1049

1050

1051 or publications, book chapters, textbooks, webinars, service on  
1052 professional committees, or serving as a journal reviewer, journal  
1053 editorial board member, or editor. (Outcome)

1054  
1055 **V. Evaluation**

1056  
1057 **V.A. Fellow Evaluation**

1058  
1059 **V.A.1. Feedback and Evaluation**  
1060

**Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.**

**Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:**

- **fellows identify their strengths and weaknesses and target areas that need work**
- **program directors and faculty members recognize where fellows are struggling and address problems immediately**

**Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.**

**End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.**

**Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.**

1061  
1062 **V.A.1.a) Faculty members must directly observe, evaluate, and**  
1063 **frequently provide feedback on fellow performance during**  
1064 **each rotation or similar educational assignment. (Core)**

1065  
1066 V.A.1.a).(1) The faculty must discuss this evaluation with each fellow at  
1067 the completion of each assignment. (Core)

1068  
1069 V.A.1.a).(2) Assessment of procedural competence should include a  
1070 formal evaluation process and not be based solely on a  
1071 minimum number of procedures performed. (Detail)

1072

**Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.**

- 1073  
1074 **V.A.1.b)** Evaluation must be documented at the completion of the  
1075 assignment. <sup>(Core)</sup>  
1076  
1077 **V.A.1.b).(1)** For block rotations of greater than three months in  
1078 duration, evaluation must be documented at least  
1079 every three months. <sup>(Core)</sup>  
1080  
1081 **V.A.1.b).(2)** Longitudinal experiences such as continuity clinic in  
1082 the context of other clinical responsibilities must be  
1083 evaluated at least every three months and at  
1084 completion. <sup>(Core)</sup>  
1085  
1086 **V.A.1.c)** The program must provide an objective performance  
1087 evaluation based on the Competencies and the subspecialty-  
1088 specific Milestones, and must: <sup>(Core)</sup>  
1089  
1090 **V.A.1.c).(1)** use multiple evaluators (e.g., faculty members, peers,  
1091 patients, self, and other professional staff members);  
1092 and, <sup>(Core)</sup>  
1093  
1094 **V.A.1.c).(2)** provide that information to the Clinical Competency  
1095 Committee for its synthesis of progressive fellow  
1096 performance and improvement toward unsupervised  
1097 practice. <sup>(Core)</sup>  
1098

**Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.**

- 1099  
1100 **V.A.1.d)** The program director or their designee, with input from the  
1101 Clinical Competency Committee, must:  
1102  
1103 **V.A.1.d).(1)** meet with and review with each fellow their  
1104 documented semi-annual evaluation of performance,  
1105 including progress along the subspecialty-specific  
1106 Milestones. <sup>(Core)</sup>  
1107

- 1108 V.A.1.d).(2) assist fellows in developing individualized learning  
 1109 plans to capitalize on their strengths and identify areas  
 1110 for growth; and, <sup>(Core)</sup>  
 1111  
 1112 V.A.1.d).(3) develop plans for fellows failing to progress, following  
 1113 institutional policies and procedures. <sup>(Core)</sup>  
 1114

**Background and Intent:** Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

- 1115  
 1116 V.A.1.e) At least annually, there must be a summative evaluation of  
 1117 each fellow that includes their readiness to progress to the  
 1118 next year of the program, if applicable. <sup>(Core)</sup>  
 1119  
 1120 V.A.1.f) The evaluations of a fellow's performance must be accessible  
 1121 for review by the fellow. <sup>(Core)</sup>  
 1122  
 1123 V.A.2. Final Evaluation  
 1124  
 1125 V.A.2.a) The program director must provide a final evaluation for each  
 1126 fellow upon completion of the program. <sup>(Core)</sup>  
 1127  
 1128 V.A.2.a).(1) The subspecialty-specific Milestones, and when  
 1129 applicable the subspecialty-specific Case Logs, must  
 1130 be used as tools to ensure fellows are able to engage  
 1131 in autonomous practice upon completion of the  
 1132 program. <sup>(Core)</sup>  
 1133  
 1134 V.A.2.a).(2) The final evaluation must:  
 1135  
 1136 V.A.2.a).(2).(a) become part of the fellow's permanent record  
 1137 maintained by the institution, and must be  
 1138 accessible for review by the fellow in  
 1139 accordance with institutional policy; <sup>(Core)</sup>  
 1140

- 1141 V.A.2.a).(2).(b) verify that the fellow has demonstrated the  
 1142 knowledge, skills, and behaviors necessary to  
 1143 enter autonomous practice; <sup>(Core)</sup>  
 1144
- 1145 V.A.2.a).(2).(c) consider recommendations from the Clinical  
 1146 Competency Committee; and, <sup>(Core)</sup>  
 1147
- 1148 V.A.2.a).(2).(d) be shared with the fellow upon completion of  
 1149 the program. <sup>(Core)</sup>  
 1150
- 1151 V.A.3. A Clinical Competency Committee must be appointed by the  
 1152 program director. <sup>(Core)</sup>  
 1153
- 1154 V.A.3.a) At a minimum the Clinical Competency Committee must  
 1155 include three members, at least one of whom is a core faculty  
 1156 member. Members must be faculty members from the same  
 1157 program or other programs, or other health professionals  
 1158 who have extensive contact and experience with the  
 1159 program's fellows. <sup>(Core)</sup>  
 1160
- 1161 V.A.3.b) The Clinical Competency Committee must:
- 1162
- 1163 V.A.3.b).(1) review all fellow evaluations at least semi-annually;  
 1164 <sup>(Core)</sup>  
 1165
- 1166 V.A.3.b).(2) determine each fellow's progress on achievement of  
 1167 the subspecialty-specific Milestones; and, <sup>(Core)</sup>  
 1168
- 1169 V.A.3.b).(3) meet prior to the fellows' semi-annual evaluations and  
 1170 advise the program director regarding each fellow's  
 1171 progress. <sup>(Core)</sup>  
 1172
- 1173 V.B. Faculty Evaluation
- 1174
- 1175 V.B.1. The program must have a process to evaluate each faculty  
 1176 member's performance as it relates to the educational program at  
 1177 least annually. <sup>(Core)</sup>  
 1178

**Background and Intent:** The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should

have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 1179  
1180 **V.B.1.a)** This evaluation must include a review of the faculty member's  
1181 clinical teaching abilities, engagement with the educational  
1182 program, participation in faculty development related to their  
1183 skills as an educator, clinical performance, professionalism,  
1184 and scholarly activities. (Core)  
1185  
1186 **V.B.1.b)** This evaluation must include written, confidential evaluations  
1187 by the fellows. (Core)  
1188  
1189 **V.B.2.** Faculty members must receive feedback on their evaluations at least  
1190 annually. (Core)  
1191  
1192 **V.B.3.** Results of the faculty educational evaluations should be  
1193 incorporated into program-wide faculty development plans. (Core)  
1194

**Background and Intent:** The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

- 1195  
1196 **V.C. Program Evaluation and Improvement**  
1197  
1198 **V.C.1.** The program director must appoint the Program Evaluation  
1199 Committee to conduct and document the Annual Program  
1200 Evaluation as part of the program's continuous improvement  
1201 process. (Core)  
1202  
1203 **V.C.1.a)** The Program Evaluation Committee must be composed of at  
1204 least two program faculty members, at least one of whom is a  
1205 core faculty member, and at least one fellow. (Core)  
1206  
1207 **V.C.1.b)** Program Evaluation Committee responsibilities must include:  
1208  
1209 **V.C.1.b).(1)** acting as an advisor to the program director, through  
1210 program oversight; (Core)  
1211  
1212 **V.C.1.b).(2)** review of the program's self-determined goals and  
1213 progress toward meeting them; (Core)  
1214  
1215 **V.C.1.b).(3)** guiding ongoing program improvement, including  
1216 development of new goals, based upon outcomes;  
1217 and, (Core)

1218  
 1219 **V.C.1.b).(4)** review of the current operating environment to identify  
 1220 strengths, challenges, opportunities, and threats as  
 1221 related to the program’s mission and aims. <sup>(Core)</sup>  
 1222

**Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program’s progress toward achievement of its goals and aims.**

1223  
 1224 **V.C.1.c)** The Program Evaluation Committee should consider the  
 1225 following elements in its assessment of the program:  
 1226  
 1227 **V.C.1.c).(1)** curriculum; <sup>(Core)</sup>  
 1228  
 1229 **V.C.1.c).(2)** outcomes from prior Annual Program Evaluation(s);  
 1230 <sup>(Core)</sup>  
 1231  
 1232 **V.C.1.c).(3)** ACGME letters of notification, including citations,  
 1233 Areas for Improvement, and comments; <sup>(Core)</sup>  
 1234  
 1235 **V.C.1.c).(4)** quality and safety of patient care; <sup>(Core)</sup>  
 1236  
 1237 **V.C.1.c).(5)** aggregate fellow and faculty:  
 1238  
 1239 **V.C.1.c).(5).(a)** well-being; <sup>(Core)</sup>  
 1240  
 1241 **V.C.1.c).(5).(b)** recruitment and retention; <sup>(Core)</sup>  
 1242  
 1243 **V.C.1.c).(5).(c)** workforce diversity; <sup>(Core)</sup>  
 1244  
 1245 **V.C.1.c).(5).(d)** engagement in quality improvement and patient  
 1246 safety; <sup>(Core)</sup>  
 1247  
 1248 **V.C.1.c).(5).(e)** scholarly activity; <sup>(Core)</sup>  
 1249  
 1250 **V.C.1.c).(5).(f)** ACGME Resident/Fellow and Faculty Surveys  
 1251 (where applicable); and, <sup>(Core)</sup>  
 1252  
 1253 **V.C.1.c).(5).(g)** written evaluations of the program. <sup>(Core)</sup>  
 1254  
 1255 **V.C.1.c).(6)** aggregate fellow:  
 1256  
 1257 **V.C.1.c).(6).(a)** achievement of the Milestones; <sup>(Core)</sup>  
 1258  
 1259 **V.C.1.c).(6).(b)** in-training examinations (where applicable);  
 1260 <sup>(Core)</sup>  
 1261  
 1262 **V.C.1.c).(6).(c)** board pass and certification rates; and, <sup>(Core)</sup>

- 1263
- 1264 V.C.1.c).(6).(d) graduate performance. (Core)
- 1265
- 1266 V.C.1.c).(7) aggregate faculty:
- 1267
- 1268 V.C.1.c).(7).(a) evaluation; and, (Core)
- 1269
- 1270 V.C.1.c).(7).(b) professional development (Core)
- 1271
- 1272 V.C.1.d) The Program Evaluation Committee must evaluate the
- 1273 program's mission and aims, strengths, areas for
- 1274 improvement, and threats. (Core)
- 1275
- 1276 V.C.1.e) The annual review, including the action plan, must:
- 1277
- 1278 V.C.1.e).(1) be distributed to and discussed with the members of
- 1279 the teaching faculty and the fellows; and, (Core)
- 1280
- 1281 V.C.1.e).(2) be submitted to the DIO. (Core)
- 1282
- 1283 V.C.2. The program must participate in a Self-Study prior to its 10-Year
- 1284 Accreditation Site Visit. (Core)
- 1285
- 1286 V.C.2.a) A summary of the Self-Study must be submitted to the DIO.
- 1287 (Core)
- 1288

**Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.**

- 1289
- 1290 V.C.3. *One goal of ACGME-accredited education is to educate physicians*
- 1291 *who seek and achieve board certification. One measure of the*
- 1292 *effectiveness of the educational program is the ultimate pass rate.*
- 1293
- 1294 *The program director should encourage all eligible program*
- 1295 *graduates to take the certifying examination offered by the*
- 1296 *applicable American Board of Medical Specialties (ABMS) member*
- 1297 *board or American Osteopathic Association (AOA) certifying board.*
- 1298
- 1299 V.C.3.a) For subspecialties in which the ABMS member board and/or
- 1300 AOA certifying board offer(s) an annual written exam, in the
- 1301 preceding three years, the program's aggregate pass rate of
- 1302 those taking the examination for the first time must be higher

- 1303 than the bottom fifth percentile of programs in that  
 1304 subspecialty. <sup>(Outcome)</sup>  
 1305  
 1306 **V.C.3.b)** For subspecialties in which the ABMS member board and/or  
 1307 AOA certifying board offer(s) a biennial written exam, in the  
 1308 preceding six years, the program’s aggregate pass rate of  
 1309 those taking the examination for the first time must be higher  
 1310 than the bottom fifth percentile of programs in that  
 1311 subspecialty. <sup>(Outcome)</sup>  
 1312  
 1313 **V.C.3.c)** For subspecialties in which the ABMS member board and/or  
 1314 AOA certifying board offer(s) an annual oral exam, in the  
 1315 preceding three years, the program’s aggregate pass rate of  
 1316 those taking the examination for the first time must be higher  
 1317 than the bottom fifth percentile of programs in that  
 1318 subspecialty. <sup>(Outcome)</sup>  
 1319  
 1320 **V.C.3.d)** For subspecialties in which the ABMS member board and/or  
 1321 AOA certifying board offer(s) a biennial oral exam, in the  
 1322 preceding six years, the program’s aggregate pass rate of  
 1323 those taking the examination for the first time must be higher  
 1324 than the bottom fifth percentile of programs in that  
 1325 subspecialty. <sup>(Outcome)</sup>  
 1326  
 1327 **V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program  
 1328 whose graduates over the time period specified in the  
 1329 requirement have achieved an 80 percent pass rate will have  
 1330 met this requirement, no matter the percentile rank of the  
 1331 program for pass rate in that subspecialty. <sup>(Outcome)</sup>  
 1332

**Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.**

**There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.**

- 1333  
 1334 **V.C.3.f)** Programs must report, in ADS, board certification status  
 1335 annually for the cohort of board-eligible fellows that  
 1336 graduated seven years earlier. <sup>(Core)</sup>  
 1337

**Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME**

will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

## VI. The Learning and Working Environment

*Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:*

- *Excellence in the safety and quality of care rendered to patients by fellows today*
- *Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice*
- *Excellence in professionalism through faculty modeling of:*
  - *the effacement of self-interest in a humanistic environment that supports the professional development of physicians*
  - *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
- *Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team*

**Background and Intent:** The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and

**fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.**

**VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability**

**VI.A.1. Patient Safety and Quality Improvement**

*All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.*

*Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating fellows will apply these skills to critique their future unsupervised practice and effect quality improvement measures.*

*It is necessary for fellows and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.*

**VI.A.1.a Patient Safety**

**VI.A.1.a).(1) Culture of Safety**

*A culture of safety requires continuous identification of vulnerabilities and a willingness to transparently deal with them. An effective organization has formal mechanisms to assess the knowledge, skills, and attitudes of its personnel toward safety in order to identify areas for improvement.*

**VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows must actively participate in patient safety systems and contribute to a culture of safety.**  
(Core)

**VI.A.1.a).(1).(b) The program must have a structure that promotes safe, interprofessional, team-based care.**  
(Core)

**VI.A.1.a).(2) Education on Patient Safety**

1407  
1408  
1409  
1410

Programs must provide formal educational activities that promote patient safety-related goals, tools, and techniques. <sup>(Core)</sup>

**Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.**

1454

**VI.A.1.a).(3)**

**Patient Safety Events**

*Reporting, investigation, and follow-up of adverse events, near misses, and unsafe conditions are pivotal mechanisms for improving patient safety, and are essential for the success of any patient safety program. Feedback and experiential learning are essential to developing true competence in the ability to identify causes and institute sustainable systems-based changes to ameliorate patient safety vulnerabilities.*

**VI.A.1.a).(3).(a)**

**Residents, fellows, faculty members, and other clinical staff members must:**

**VI.A.1.a).(3).(a).(i)**

**know their responsibilities in reporting patient safety events at the clinical site;** <sup>(Core)</sup>

**VI.A.1.a).(3).(a).(ii)**

**know how to report patient safety events, including near misses, at the clinical site; and,** <sup>(Core)</sup>

**VI.A.1.a).(3).(a).(iii)**

**be provided with summary information of their institution's patient safety reports.** <sup>(Core)</sup>

**VI.A.1.a).(3).(b)**

**Fellows must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions.** <sup>(Core)</sup>

**VI.A.1.a).(4)**

**Fellow Education and Experience in Disclosure of Adverse Events**

*Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for fellows to develop and apply.*

1455	VI.A.1.a).(4).(a)	All fellows must receive training in how to disclose adverse events to patients and families. <sup>(Core)</sup>
1456		
1457		
1458

1501	VI.A.2.a)	<i>Although the attending physician is ultimately responsible for the care of the patient, every physician shares in the responsibility and accountability for their efforts in the provision of care. Effective programs, in partnership with their Sponsoring Institutions, define, widely communicate,</i>
1502		
1503		
1504		
1505		

1506 *and monitor a structured chain of responsibility and*  
1507 *accountability as it relates to the supervision of all patient*  
1508 *care.*

1509  
1510 *Supervision in the setting of graduate medical education*  
1511 *provides safe and effective care to patients; ensures each*  
1512 *fellow's development of the skills, knowledge, and attitudes*  
1513 *required to enter the unsupervised practice of medicine; and*  
1514 *establishes a foundation for continued professional growth.*

1515  
1516 **VI.A.2.a).(1)** Each patient must have an identifiable and  
1517 appropriately-credentialed and privileged attending  
1518 physician (or licensed independent practitioner as  
1519 specified by the applicable Review Committee) who is  
1520 responsible and accountable for the patient's care.  
1521 (Core)

1522  
1523 **VI.A.2.a).(1).(a)** This information must be available to fellows,  
1524 faculty members, other members of the health  
1525 care team, and patients. (Core)

1526  
1527 **VI.A.2.a).(1).(b)** Fellows and faculty members must inform each  
1528 patient of their respective roles in that patient's  
1529 care when providing direct patient care. (Core)

1530  
1531 **VI.A.2.b)** *Supervision may be exercised through a variety of methods.*  
1532 *For many aspects of patient care, the supervising physician*  
1533 *may be a more advanced fellow. Other portions of care*  
1534 *provided by the fellow can be adequately supervised by the*  
1535 *appropriate availability of the supervising faculty member or*  
1536 *fellow, either on site or by means of telecommunication*  
1537 *technology. Some activities require the physical presence of*  
1538 *the supervising faculty member. In some circumstances,*  
1539 *supervision may include post-hoc review of fellow-delivered*  
1540 *care with feedback.*

**Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.**

1542  
1543 **VI.A.2.b).(1)** The program must demonstrate that the appropriate  
1544 level of supervision in place for all fellows is based on  
1545 each fellow's level of training and ability, as well as  
1546 patient complexity and acuity. Supervision may be

1547 exercised through a variety of methods, as appropriate  
1548 to the situation. <sup>(Core)</sup>  
1549  
1550 **VI.A.2.b).(2)** The program must define when physical presence of a  
1551 supervising physician is required. <sup>(Core)</sup>  
1552  
1553 **VI.A.2.c)** Levels of Supervision  
1554  
1555 To promote appropriate fellow supervision while providing  
1556 for graded authority and responsibility, the program must use  
1557 the following classification of supervision: <sup>(Core)</sup>  
1558  
1559 **VI.A.2.c).(1)** Direct Supervision:  
1560  
1561 **VI.A.2.c).(1).(a)** the supervising physician is physically present  
1562 with the fellow during the key portions of the  
1563 patient interaction; or, <sup>(Core)</sup>  
1564  
1565 **VI.A.2.c).(1).(b)** the supervising physician and/or patient is not  
1566 physically present with the fellow and the  
1567 supervising physician is concurrently  
1568 monitoring the patient care through appropriate  
1569 telecommunication technology. <sup>(Core)</sup>  
1570  
1571 **VI.A.2.c).(2)** Indirect Supervision: the supervising physician is not  
1572 providing physical or concurrent visual or audio  
1573 supervision but is immediately available to the fellow  
1574 for guidance and is available to provide appropriate  
1575 direct supervision. <sup>(Core)</sup>  
1576  
1577 **VI.A.2.c).(3)** Oversight – the supervising physician is available to  
1578 provide review of procedures/encounters with  
1579 feedback provided after care is delivered. <sup>(Core)</sup>  
1580  
1581 **VI.A.2.d)** The privilege of progressive authority and responsibility,  
1582 conditional independence, and a supervisory role in patient  
1583 care delegated to each fellow must be assigned by the  
1584 program director and faculty members. <sup>(Core)</sup>  
1585  
1586 **VI.A.2.d).(1)** The program director must evaluate each fellow’s  
1587 abilities based on specific criteria, guided by the  
1588 Milestones. <sup>(Core)</sup>  
1589  
1590 **VI.A.2.d).(2)** Faculty members functioning as supervising  
1591 physicians must delegate portions of care to fellows  
1592 based on the needs of the patient and the skills of  
1593 each fellow. <sup>(Core)</sup>  
1594  
1595 **VI.A.2.d).(3)** Fellows should serve in a supervisory role to junior  
1596 fellows and residents in recognition of their progress  
1597 toward independence, based on the needs of each

1598 patient and the skills of the individual resident or  
1599 fellow. <sup>(Detail)</sup>

1600  
1601 **VI.A.2.e)** Programs must set guidelines for circumstances and events  
1602 in which fellows must communicate with the supervising  
1603 faculty member(s). <sup>(Core)</sup>

1604  
1605 **VI.A.2.e).(1)** Each fellow must know the limits of their scope of  
1606 authority, and the circumstances under which the  
1607 fellow is permitted to act with conditional  
1608 independence. <sup>(Outcome)</sup>

**Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.**

1610  
1611 **VI.A.2.f)** Faculty supervision assignments must be of sufficient  
1612 duration to assess the knowledge and skills of each fellow  
1613 and to delegate to the fellow the appropriate level of patient  
1614 care authority and responsibility. <sup>(Core)</sup>

1615  
1616 **VI.B. Professionalism**

1617  
1618 **VI.B.1.** Programs, in partnership with their Sponsoring Institutions, must  
1619 educate fellows and faculty members concerning the professional  
1620 responsibilities of physicians, including their obligation to be  
1621 appropriately rested and fit to provide the care required by their  
1622 patients. <sup>(Core)</sup>

1623  
1624 **VI.B.2.** The learning objectives of the program must:

1625  
1626 **VI.B.2.a)** be accomplished through an appropriate blend of supervised  
1627 patient care responsibilities, clinical teaching, and didactic  
1628 educational events; <sup>(Core)</sup>

1629  
1630 **VI.B.2.b)** be accomplished without excessive reliance on fellows to  
1631 fulfill non-physician obligations; and, <sup>(Core)</sup>

**Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.**

1633  
1634 **VI.B.2.c)** ensure manageable patient care responsibilities. <sup>(Core)</sup>

1635

**Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.**

1636

1637

**VI.B.3. The program director, in partnership with the Sponsoring Institution, must provide a culture of professionalism that supports patient safety and personal responsibility. <sup>(Core)</sup>**

1638

1639

1640

1641

**VI.B.4. Fellows and faculty members must demonstrate an understanding of their personal role in the:**

1642

1643

**VI.B.4.a) provision of patient- and family-centered care; <sup>(Outcome)</sup>**

1644

1645

**VI.B.4.b) safety and welfare of patients entrusted to their care, including the ability to report unsafe conditions and adverse events; <sup>(Outcome)</sup>**

1646

1647

1648

1649

**Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.**

1650

1651

**VI.B.4.c) assurance of their fitness for work, including: <sup>(Outcome)</sup>**

1652

**Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.**

1653

1654

**VI.B.4.c).(1) management of their time before, during, and after clinical assignments; and, <sup>(Outcome)</sup>**

1655

1656

1657

**VI.B.4.c).(2) recognition of impairment, including from illness, fatigue, and substance use, in themselves, their peers, and other members of the health care team. <sup>(Outcome)</sup>**

1658

1659

1660

**VI.B.4.d) commitment to lifelong learning; <sup>(Outcome)</sup>**

1661

1662

**VI.B.4.e) monitoring of their patient care performance improvement indicators; and, <sup>(Outcome)</sup>**

1663

1664

1665

**VI.B.4.f) accurate reporting of clinical and educational work hours, patient outcomes, and clinical experience data. <sup>(Outcome)</sup>**

1666

1667

1668

1669 VI.B.5. All fellows and faculty members must demonstrate responsiveness  
1670 to patient needs that supersedes self-interest. This includes the  
1671 recognition that under certain circumstances, the best interests of  
1672 the patient may be served by transitioning that patient's care to  
1673 another qualified and rested provider. (Outcome)  
1674

1675 VI.B.6. Programs, in partnership with their Sponsoring Institutions, must  
1676 provide a professional, equitable, respectful, and civil environment  
1677 that is free from discrimination, sexual and other forms of  
1678 harassment, mistreatment, abuse, or coercion of students, fellows,  
1679 faculty, and staff. (Core)  
1680

1681 VI.B.7. Programs, in partnership with their Sponsoring Institutions, should  
1682 have a process for education of fellows and faculty regarding  
1683 unprofessional behavior and a confidential process for reporting,  
1684 investigating, and addressing such concerns. (Core)  
1685

1686 VI.C. Well-Being

1687 *Psychological, emotional, and physical well-being are critical in the*  
1688 *development of the competent, caring, and resilient physician and require*  
1689 *proactive attention to life inside and outside of medicine. Well-being*  
1690 *requires that physicians retain the joy in medicine while managing their*  
1691 *own real-life stresses. Self-care and responsibility to support other*  
1692 *members of the health care team are important components of*  
1693 *professionalism; they are also skills that must be modeled, learned, and*  
1694 *nurtured in the context of other aspects of fellowship training.*

1695 *Fellows and faculty members are at risk for burnout and depression.*  
1696 *Programs, in partnership with their Sponsoring Institutions, have the same*  
1697 *responsibility to address well-being as other aspects of resident*  
1698 *competence. Physicians and all members of the health care team share*  
1699 *responsibility for the well-being of each other. For example, a culture which*  
1700 *encourages covering for colleagues after an illness without the expectation*  
1701 *of reciprocity reflects the ideal of professionalism. A positive culture in a*  
1702 *clinical learning environment models constructive behaviors, and prepares*  
1703 *fellows with the skills and attitudes needed to thrive throughout their*  
1704 *careers.*

**Background and Intent:** The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website: [www.acgme.org/physicianwellbeing](http://www.acgme.org/physicianwellbeing).

The ACGME also created a repository for well-being materials, assessments, presentations, and more on the [Well-Being Tools and Resources page](#) in Learn at ACGME for programs seeking to develop or strengthen their own well-being initiatives.

**There are many activities that programs can implement now to assess and support physician well-being. These include the distribution and analysis of culture of safety surveys, ensuring the availability of counseling services, and paying attention to the safety of the entire health care team.**

1708  
1709  
1710  
1711  
1712  
1713  
1714  
1715  
1716  
1717  
1718  
1719  
1720  
1721  
1722  
1723  
1724

**VI.C.1. The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:**

**VI.C.1.a) efforts to enhance the meaning that each fellow finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; (Core)**

**VI.C.1.b) attention to scheduling, work intensity, and work compression that impacts fellow well-being; (Core)**

**VI.C.1.c) evaluating workplace safety data and addressing the safety of fellows and faculty members; (Core)**

**Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.**

1725  
1726  
1727  
1728

**VI.C.1.d) policies and programs that encourage optimal fellow and faculty member well-being; and, (Core)**

**Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.**

1729  
1730  
1731  
1732  
1733  
1734

**VI.C.1.d).(1) Fellows must be given the opportunity to attend medical, mental health, and dental care appointments, including those scheduled during their working hours. (Core)**

**Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.**

1735  
1736  
1737  
1738  
1739

**VI.C.1.e) attention to fellow and faculty member burnout, depression, and substance use disorder. The program, in partnership with its Sponsoring Institution, must educate faculty members and fellows in identification of the symptoms of burnout,**

1740 depression, and substance use disorder, including means to  
1741 assist those who experience these conditions. Fellows and  
1742 faculty members must also be educated to recognize those  
1743 symptoms in themselves and how to seek appropriate care.  
1744 The program, in partnership with its Sponsoring Institution,  
1745 must: <sup>(Core)</sup>  
1746

**Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance use disorder. Materials and more information are available in Learn at ACGME (<https://dl.acgme.org/pages/well-being-tools-resources>).**

1747  
1748 **VI.C.1.e).(1)** encourage fellows and faculty members to alert the  
1749 program director or other designated personnel or  
1750 programs when they are concerned that another  
1751 fellow, resident, or faculty member may be displaying  
1752 signs of burnout, depression, a substance use  
1753 disorder, suicidal ideation, or potential for violence;  
1754 <sup>(Core)</sup>  
1755

**Background and Intent: Individuals experiencing burnout, depression, substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.**

1756  
1757 **VI.C.1.e).(2)** provide access to appropriate tools for self-screening;  
1758 and, <sup>(Core)</sup>  
1759  
1760 **VI.C.1.e).(3)** provide access to confidential, affordable mental  
1761 health assessment, counseling, and treatment,  
1762 including access to urgent and emergent care 24  
1763 hours a day, seven days a week. <sup>(Core)</sup>  
1764

**Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.**

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

1765  
1766  
1767  
1768  
1769  
1770  
1771  
1772  
1773  
1774  
1775  
1776  
1777  
1778

- VI.C.2.** There are circumstances in which fellows may be unable to attend work, including but not limited to fatigue, illness, family emergencies, and parental leave. Each program must allow an appropriate length of absence for fellows unable to perform their patient care responsibilities. <sup>(Core)</sup>
- VI.C.2.a)** The program must have policies and procedures in place to ensure coverage of patient care. <sup>(Core)</sup>
- VI.C.2.b)** These policies must be implemented without fear of negative consequences for the fellow who is or was unable to provide the clinical work. <sup>(Core)</sup>

**Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.**

1779  
1780  
1781  
1782  
1783  
1784  
1785  
1786  
1787  
1788  
1789  
1790  
1791  
1792  
1793

- VI.D. Fatigue Mitigation**
- VI.D.1. Programs must:**
- VI.D.1.a)** educate all faculty members and fellows to recognize the signs of fatigue and sleep deprivation; <sup>(Core)</sup>
- VI.D.1.b)** educate all faculty members and fellows in alertness management and fatigue mitigation processes; and, <sup>(Core)</sup>
- VI.D.1.c)** encourage fellows to use fatigue mitigation processes to manage the potential negative effects of fatigue on patient care and learning. <sup>(Detail)</sup>

**Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.**

**This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.**

- 1794  
1795 **VI.D.2.** Each program must ensure continuity of patient care, consistent  
1796 with the program’s policies and procedures referenced in VI.C.2–  
1797 VI.C.2.b), in the event that a fellow may be unable to perform their  
1798 patient care responsibilities due to excessive fatigue. <sup>(Core)</sup>  
1799
- 1800 **VI.D.3.** The program, in partnership with its Sponsoring Institution, must  
1801 ensure adequate sleep facilities and safe transportation options for  
1802 fellows who may be too fatigued to safely return home. <sup>(Core)</sup>  
1803
- 1804 **VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care**
- 1805
- 1806 **VI.E.1. Clinical Responsibilities**
- 1807
- 1808 The clinical responsibilities for each fellow must be based on PGY  
1809 level, patient safety, fellow ability, severity and complexity of patient  
1810 illness/condition, and available support services. <sup>(Core)</sup>  
1811

**Background and Intent:** The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

- 1812
- 1813 **VI.E.2. Teamwork**
- 1814
- 1815 Fellows must care for patients in an environment that maximizes  
1816 communication. This must include the opportunity to work as a  
1817 member of effective interprofessional teams that are appropriate to  
1818 the delivery of care in the subspecialty and larger health system.  
1819 <sup>(Core)</sup>  
1820
- 1821 **VI.E.3. Transitions of Care**
- 1822
- 1823 **VI.E.3.a)** Programs must design clinical assignments to optimize  
1824 transitions in patient care, including their safety, frequency,  
1825 and structure. <sup>(Core)</sup>  
1826
- 1827 **VI.E.3.b)** Programs, in partnership with their Sponsoring Institutions,  
1828 must ensure and monitor effective, structured hand-over  
1829 processes to facilitate both continuity of care and patient  
1830 safety. <sup>(Core)</sup>  
1831
- 1832 **VI.E.3.c)** Programs must ensure that fellows are competent in  
1833 communicating with team members in the hand-over process.  
1834 <sup>(Outcome)</sup>  
1835

1836 VI.E.3.d) Programs and clinical sites must maintain and communicate  
1837 schedules of attending physicians and fellows currently  
1838 responsible for care. <sup>(Core)</sup>

1839  
1840 VI.E.3.e) Each program must ensure continuity of patient care,  
1841 consistent with the program’s policies and procedures  
1842 referenced in VI.C.2-VI.C.2.b), in the event that a fellow may  
1843 be unable to perform their patient care responsibilities due to  
1844 excessive fatigue or illness, or family emergency. <sup>(Core)</sup>

1845  
1846 VI.F. Clinical Experience and Education

1847  
1848 *Programs, in partnership with their Sponsoring Institutions, must design*  
1849 *an effective program structure that is configured to provide fellows with*  
1850 *educational and clinical experience opportunities, as well as reasonable*  
1851 *opportunities for rest and personal activities.*

**Background and Intent:** In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

1853  
1854 VI.F.1. Maximum Hours of Clinical and Educational Work per Week

1855  
1856 Clinical and educational work hours must be limited to no more than  
1857 80 hours per week, averaged over a four-week period, inclusive of all  
1858 in-house clinical and educational activities, clinical work done from  
1859 home, and all moonlighting. <sup>(Core)</sup>

**Background and Intent:** Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

**Scheduling**

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

***Oversight***

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

***Work from Home***

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

1867  
1868

**VI.F.2. Mandatory Time Free of Clinical Work and Education**

**VI.F.2.a) The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. <sup>(Core)</sup>**

1869 VI.F.2.b) Fellows should have eight hours off between scheduled  
1870 clinical work and education periods. <sup>(Detail)</sup>

1871  
1872 VI.F.2.b).(1) There may be circumstances when fellows choose to  
1873 stay to care for their patients or return to the hospital  
1874 with fewer than eight hours free of clinical experience  
1875 and education. This must occur within the context of  
1876 the 80-hour and the one-day-off-in-seven  
1877 requirements. <sup>(Detail)</sup>  
1878

**Background and Intent:** While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1879  
1880 VI.F.2.c) Fellows must have at least 14 hours free of clinical work and  
1881 education after 24 hours of in-house call. <sup>(Core)</sup>  
1882

**Background and Intent:** Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1883  
1884 VI.F.2.d) Fellows must be scheduled for a minimum of one day in  
1885 seven free of clinical work and required education (when  
1886 averaged over four weeks). At-home call cannot be assigned  
1887 on these free days. <sup>(Core)</sup>  
1888

**Background and Intent:** The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

1889  
1890 VI.F.3. Maximum Clinical Work and Education Period Length  
1891

- 1892 VI.F.3.a) Clinical and educational work periods for fellows must not  
 1893 exceed 24 hours of continuous scheduled clinical  
 1894 assignments. <sup>(Core)</sup>  
 1895  
 1896 VI.F.3.a).(1) Up to four hours of additional time may be used for  
 1897 activities related to patient safety, such as providing  
 1898 effective transitions of care, and/or fellow education.  
 1899 <sup>(Core)</sup>  
 1900  
 1901 VI.F.3.a).(1).(a) Additional patient care responsibilities must not  
 1902 be assigned to a fellow during this time. <sup>(Core)</sup>  
 1903

**Background and Intent:** The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

- 1904  
 1905 VI.F.4. Clinical and Educational Work Hour Exceptions  
 1906  
 1907 VI.F.4.a) In rare circumstances, after handing off all other  
 1908 responsibilities, a fellow, on their own initiative, may elect to  
 1909 remain or return to the clinical site in the following  
 1910 circumstances:  
 1911  
 1912 VI.F.4.a).(1) to continue to provide care to a single severely ill or  
 1913 unstable patient; <sup>(Detail)</sup>  
 1914  
 1915 VI.F.4.a).(2) humanistic attention to the needs of a patient or  
 1916 family; or, <sup>(Detail)</sup>  
 1917  
 1918 VI.F.4.a).(3) to attend unique educational events. <sup>(Detail)</sup>  
 1919  
 1920 VI.F.4.b) These additional hours of care or education will be counted  
 1921 toward the 80-hour weekly limit. <sup>(Detail)</sup>  
 1922

**Background and Intent:** This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

- 1923  
 1924 VI.F.4.c) A Review Committee may grant rotation-specific exceptions  
 1925 for up to 10 percent or a maximum of 88 clinical and

1926 educational work hours to individual programs based on a  
1927 sound educational rationale.

1928  
1929 The Review Committee for Internal Medicine will not consider  
1930 requests for exceptions to the 80-hour limit to the fellows' work  
1931 week.

1932  
1933 **VI.F.5. Moonlighting**

1934  
1935 **VI.F.5.a) Moonlighting must not interfere with the ability of the fellow  
1936 to achieve the goals and objectives of the educational  
1937 program, and must not interfere with the fellow's fitness for  
1938 work nor compromise patient safety. (Core)**

1939  
1940 **VI.F.5.b) Time spent by fellows in internal and external moonlighting  
1941 (as defined in the ACGME Glossary of Terms) must be  
1942 counted toward the 80-hour maximum weekly limit. (Core)**

1943  
**Background and Intent: For additional clarification of the expectations related to  
moonlighting, please refer to the Common Program Requirement FAQs (available at  
<http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).**

1944  
1945 **VI.F.6. In-House Night Float**

1946  
1947 **Night float must occur within the context of the 80-hour and one-  
1948 day-off-in-seven requirements. (Core)**

**Background and Intent: The requirement for no more than six consecutive nights of  
night float was removed to provide programs with increased flexibility in scheduling.**

1950  
1951 **VI.F.7. Maximum In-House On-Call Frequency**

1952  
1953 **Fellows must be scheduled for in-house call no more frequently than  
1954 every third night (when averaged over a four-week period). (Core)**

1955  
1956 **VI.F.7.a) Internal Medicine fellowships must not average in-house call over  
1957 a four-week period. (Core)**

1958  
1959 **VI.F.8. At-Home Call**

1960  
1961 **VI.F.8.a) Time spent on patient care activities by fellows on at-home  
1962 call must count toward the 80-hour maximum weekly limit.  
1963 The frequency of at-home call is not subject to the every-  
1964 third-night limitation, but must satisfy the requirement for one  
1965 day in seven free of clinical work and education, when  
1966 averaged over four weeks. (Core)**

1967  
1968 **VI.F.8.a).(1) At-home call must not be so frequent or taxing as to  
1969 preclude rest or reasonable personal time for each  
1970 fellow. (Core)**

1971  
1972  
1973  
1974  
1975  
1976

**VI.F.8.b)**

**Fellows are permitted to return to the hospital while on at-home call to provide direct care for new or established patients. These hours of inpatient patient care must be included in the 80-hour maximum weekly limit. <sup>(Detail)</sup>**

**Background and Intent:** This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

**In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.**

\*\*\*

**\*Core Requirements:** Statements that define structure, resource, or process elements essential to every graduate medical educational program.

**†Detail Requirements:** Statements that describe a specific structure, resource, or process, for achieving compliance with a Core Requirement. Programs and sponsoring institutions in substantial compliance with the Outcome Requirements may utilize alternative or innovative approaches to meet Core Requirements.

**‡Outcome Requirements:** Statements that specify expected measurable or observable attributes (knowledge, abilities, skills, or attitudes) of residents or fellows at key stages of their graduate medical education.

**Osteopathic Recognition**

For programs with or applying for Osteopathic Recognition, the Osteopathic Recognition Requirements also apply ([www.acgme.org/OsteopathicRecognition](http://www.acgme.org/OsteopathicRecognition)).
