VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care	48
VI.F. Clinical Experience and Education	49

48
49 Infectious disease medicine is the subspecialty of internal medicine that focuses
50 on diagnosing and managing infections.

51
52 **Int.C. Length of Educational Program**

53
54 The educational program in infectious disease must be 24 months in length. (Core)*

55
56 **I. Oversight**

57
58 **I.A. Sponsoring Institution**

59
60 *The Sponsoring Institution is the organization or entity that assumes the*
61 *ultimate financial and academic responsibility for a program of graduate*
62 *medical education consistent with the ACGME Institutional Requirements.*

63
64 *When the Sponsoring Institution is not a rotation site for the program, the*
65 *most commonly utilized site of clinical activity for the program is the*
66 *primary clinical site.*

67

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

68
69 **I.A.1. The program must be sponsored by one ACGME-accredited**
70 **Sponsoring Institution. (Core)***

71
72 **I.B. Participating Sites**

73
74 *A participating site is an organization providing educational experiences or*
75 *educational assignments/rotations for fellows.*

76
77 **I.B.1. The program, with approval of its Sponsoring Institution, must**
78 **designate a primary clinical site. (Core)**

79
80 **I.B.1.a)** An infectious disease fellowship must function as an integral part
81 of an ACGME-accredited program in internal medicine. (Core)

82
83 **I.B.1.b)** The Sponsoring Institution must establish the infectious disease
84 fellowship within a department of internal medicine or an
85 administrative unit whose primary mission is the advancement of
86 internal medicine subspecialty education and patient care. (Detail)

87
88 **I.B.1.c)** The Sponsoring Institution must ensure that there is a reporting
89 relationship with the program director of the internal medicine

90 residency program to ensure compliance with the ACGME
91 accreditation requirements. ^(Core)
92

93 **I.B.2. There must be a program letter of agreement (PLA) between the**
94 **program and each participating site that governs the relationship**
95 **between the program and the participating site providing a required**
96 **assignment. ^(Core)**
97

98 **I.B.2.a) The PLA must:**
99

100 **I.B.2.a).(1) be renewed at least every 10 years; and, ^(Core)**
101

102 **I.B.2.a).(2) be approved by the designated institutional official**
103 **(DIO). ^(Core)**
104

105 **I.B.3. The program must monitor the clinical learning and working**
106 **environment at all participating sites. ^(Core)**
107

108 **I.B.3.a) At each participating site there must be one faculty member,**
109 **designated by the program director, who is accountable for**
110 **fellow education for that site, in collaboration with the**
111 **program director. ^(Core)**
112

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- **Identifying the faculty members who will assume educational and supervisory responsibility for fellows**
- **Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows**
- **Specifying the duration and content of the educational experience**
- **Stating the policies and procedures that will govern fellow education during the assignment**

113 **I.B.4. The program director must submit any additions or deletions of**
114 **participating sites routinely providing an educational experience,**
115 **required for all fellows, of one month full time equivalent (FTE) or**
116 **more through the ACGME's Accreditation Data System (ADS). ^(Core)**
117
118

119 **I.C. The program, in partnership with its Sponsoring Institution, must engage in**
120 **practices that focus on mission-driven, ongoing, systematic recruitment**
121 **and retention of a diverse and inclusive workforce of residents (if present),**
122 **fellows, faculty members, senior administrative staff members, and other**
123 **relevant members of its academic community.** ^(Core)
124

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution’s mission and aims. The program’s annual evaluation must include an assessment of the program’s efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

125
126 **I.D. Resources**

127
128 **I.D.1. The program, in partnership with its Sponsoring Institution, must**
129 **ensure the availability of adequate resources for fellow education.**
130 ^(Core)

131
132 I.D.1.a) Space and Equipment

133
134 There must be space and equipment for the program, including
135 meeting rooms, examination rooms, computers, visual and other
136 educational aids, and work/study space. ^(Core)
137

138 I.D.1.b) Facilities

139
140 I.D.1.b).(1) Inpatient and outpatient systems must be in place to
141 prevent fellows from performing routine clerical functions,
142 such as scheduling tests and appointments, and retrieving
143 records and letters. ^(Detail)
144

145 I.D.1.b).(2) The Sponsoring Institution must provide the broad range of
146 facilities and clinical support services required to provide
147 comprehensive care of adult patients. ^(Core)
148

149 I.D.1.b).(3) Fellows must have access to a lounge facility during
150 assigned duty hours. ^(Detail)
151

152 I.D.1.b).(4) When fellows are in the hospital, assigned night duty, or
153 called in from home, they must be provided with a secure
154 space for their belongings. ^(Detail)
155

156 I.D.1.b).(5) Fellows must have convenient access to a laboratory for
157 clinical microbiology, such that direct and frequent
158 interaction with microbiology laboratory personnel is readily
159 available. ^(Core)
160

161 I.D.1.b).(6) Facilities for the isolation of patients with infectious
162 diseases must be available. ^(Core)
163

- 164 I.D.1.c) Other Support Services
 165
 166 It is suggested that clinical education be conducted in settings that
 167 also have ACGME-accredited programs in general surgery,
 168 obstetrics and gynecology, pediatrics, and other medical and
 169 surgical subspecialties. ^(Detail)
 170
 171 I.D.1.d) Medical Records
 172
 173 Access to an electronic health record should be provided. In the
 174 absence of an existing electronic health record, institutions must
 175 demonstrate institutional commitment to its development and
 176 progress toward its implementation. ^(Core)
 177
 178 **I.D.2. The program, in partnership with its Sponsoring Institution, must**
 179 **ensure healthy and safe learning and working environments that**
 180 **promote fellow well-being and provide for:** ^(Core)
 181
 182 **I.D.2.a) access to food while on duty;** ^(Core)
 183
 184 **I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available**
 185 **and accessible for fellows with proximity appropriate for safe**
 186 **patient care;** ^(Core)
 187

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

- 188
 189 I.D.2.c) clean and private facilities for lactation that have refrigeration
 190 capabilities, with proximity appropriate for safe patient care;
 191 ^(Core)
 192

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

- 193
 194 I.D.2.d) security and safety measures appropriate to the participating
 195 site; and, ^(Core)
 196
 197 I.D.2.e) accommodations for fellows with disabilities consistent with
 198 the Sponsoring Institution's policy. ^(Core)

- 199
200 **I.D.3.** **Fellows must have ready access to subspecialty-specific and other**
201 **appropriate reference material in print or electronic format. This**
202 **must include access to electronic medical literature databases with**
203 **full text capabilities.** (Core)
204
205 **I.D.4.** **The program’s educational and clinical resources must be adequate**
206 **to support the number of fellows appointed to the program.** (Core)
207
208 I.D.4.a) Patient Population
209
210 I.D.4.a).(1) The patient population must have a variety of clinical
211 problems and stages of diseases. (Core)
212
213 I.D.4.a).(2) There must be patients of each gender, with a broad age
214 range, including geriatric patients. (Core)
215
216 I.D.4.a).(3) A sufficient number of patients must be available to enable
217 each fellow to achieve the required educational outcomes.
218 (Core)
219
220 **I.E.** ***A fellowship program usually occurs in the context of many learners and***
221 ***other care providers and limited clinical resources. It should be structured***
222 ***to optimize education for all learners present.***
223
224 **I.E.1.** **Fellows should contribute to the education of residents in core**
225 **programs, if present.** (Core)
226

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows’ education is not compromised by the presence of other providers and learners, and that fellows’ education does not compromise core residents’ education.

- 227
228 **II. Personnel**
229
230 **II.A. Program Director**
231
232 **II.A.1.** **There must be one faculty member appointed as program director**
233 **with authority and accountability for the overall program, including**
234 **compliance with all applicable program requirements.** (Core)
235
236 **II.A.1.a)** **The Sponsoring Institution’s Graduate Medical Education**
237 **Committee (GMEC) must approve a change in program**
238 **director.** (Core)
239
240 **II.A.1.b)** **Final approval of the program director resides with the**
241 **Review Committee.** (Core)
242

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and have overall responsibility for the program. The program director's nomination is reviewed and approved by the GMEC. Final approval of the program director resides with the applicable ACGME Review Committee.

243
244
245
246
247
248
249
250
251
252
253
254
255

II.A.2. The program director and, as applicable, the program's leadership team, must be provided with support adequate for administration of the program based upon its size and configuration. ^(Core)

II.A.2.a) At a minimum, the program director must be provided with the salary support required to devote 20-50 percent FTE of non-clinical time to the administration of the program. ^(Core)

At a minimum, the program director must be provided with the dedicated time and support specified below for administration of the program: ^(Core)

<u>Number of Approved Fellow Positions</u>	<u>Minimum Support Required (FTE)</u>
<u><7</u>	<u>.2</u>
<u>7-9</u>	<u>.25</u>
<u>10-12</u>	<u>.3</u>
<u>13-15</u>	<u>.35</u>
<u>16-18</u>	<u>.4</u>
<u>19-21</u>	<u>.45</u>
<u>>21</u>	<u>.5</u>

256
257
258
259
260
261
262

II.A.2.b) Programs must appoint at least one of the subspecialty-certified core faculty members to be associate program director(s). The associate program directors(s) must be provided with support equal to a dedicated minimum time for administration of the program as follows: ^(Core)

<u>Number of Approved Fellow Positions</u>	<u>Minimum Support Required (FTE)</u>
<u><7</u>	<u>0</u>
<u>7-9</u>	<u>.13</u>
<u>10-12</u>	<u>.14</u>
<u>13-15</u>	<u>.15</u>
<u>16-18</u>	<u>.16</u>
<u>19-21</u>	<u>.17</u>
<u>22-24</u>	<u>.18</u>
<u>25-27</u>	<u>.24</u>

263

Background and Intent: To achieve successful graduate medical education, individuals serving as education and administrative leaders of fellowship programs, as well as those significantly engaged in the education, supervision, evaluation, and mentoring of fellows, must have sufficient dedicated professional time to perform the vital activities required to

sustain an accredited program.

The ultimate outcome of graduate medical education is excellence in fellow education and patient care.

The program director and, as applicable, the program leadership team, devote a portion of their professional effort to the oversight and management of the fellowship program, as defined in II.A.4.-II.A.4.a).(16). Both provision of support for the time required for the leadership effort and flexibility regarding how this support is provided are important. Programs, in partnership with their Sponsoring Institutions, may provide support for this time in a variety of ways. Examples of support may include, but are not limited to, salary support, supplemental compensation, educational value units, or relief of time from other professional duties.

Program directors and, as applicable, members of the program leadership team, who are new to the role may need to devote additional time to program oversight and management initially as they learn and become proficient in administering the program. It is suggested that during this initial period the support described above be increased as needed.

264

Subspecialty-Specific Background and Intent: For instance, a program with an approved complement of 12 fellows is required to have at least 30 percent FTE support for the Program Director and at least 14 percent FTE support for the associate program director(s). Because an associate program director is also a core faculty member, the minimum dedicated time requirements for associate program directors are inclusive of core faculty activities. An additional 10 percent FTE for the core faculty position is not required. For example, if one core faculty member is named the associate program director for a 12-fellow program, the required minimum support for that position is 14 percent FTE. Further, the Review Committee allows the minimum required FTE support to be shared among multiple associate program directors, as delegated by and at the discretion of the program director.

265

266

II.A.3. Qualifications of the program director:

267

268

II.A.3.a) must include subspecialty expertise and qualifications acceptable to the Review Committee; and, ^(Core)

269

270

271

II.A.3.a).(1) The program director must have administrative experience and at least three years of participation as an active faculty member in an ACGME-accredited internal medicine residency or infectious disease fellowship. ^(Core)

272

273

274

275

276

II.A.3.b) must include current certification in the subspecialty for which they are the program director by the American Board of Internal Medicine (ABIM) or by the American Osteopathic Board of Internal Medicine (AOBIM), or subspecialty qualifications that are acceptable to the Review Committee. ^(Core)

277

278

279

280

281

282

283

II.A.3.b).(1) The Review Committee only accepts current ABIM or AOBIM certification in infectious disease. ^(Core)

284

285
286
287
288
289
290
291
292
293
294
295
296
297

II.A.4. Program Director Responsibilities

The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and promotion of fellows, and disciplinary action; supervision of fellows; and fellow education in the context of patient care. ^(Core)

II.A.4.a) The program director must:

II.A.4.a).(1) be a role model of professionalism; ^(Core)

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

298
299
300
301
302
303

II.A.4.a).(2) design and conduct the program in a fashion consistent with the needs of the community, the mission(s) of the Sponsoring Institution, and the mission(s) of the program; ^(Core)

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

304
305
306
307
308

II.A.4.a).(3) administer and maintain a learning environment conducive to educating the fellows in each of the ACGME Competency domains; ^(Core)

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

309
310
311
312
313
314

II.A.4.a).(4) develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the fellowship program education and at least annually thereafter, as outlined in V.B.; ^(Core)

- 315 **II.A.4.a).(5)** have the authority to approve program faculty
316 members for participation in the fellowship program
317 education at all sites; ^(Core)
318
319 **II.A.4.a).(6)** have the authority to remove program faculty
320 members from participation in the fellowship program
321 education at all sites; ^(Core)
322
323 **II.A.4.a).(7)** have the authority to remove fellows from supervising
324 interactions and/or learning environments that do not
325 meet the standards of the program; ^(Core)
326

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

- 327
328 **II.A.4.a).(8)** submit accurate and complete information required
329 and requested by the DIO, GMEC, and ACGME; ^(Core)
330
331 **II.A.4.a).(9)** provide applicants who are offered an interview with
332 information related to the applicant's eligibility for the
333 relevant subspecialty board examination(s); ^(Core)
334
335 **II.A.4.a).(10)** provide a learning and working environment in which
336 fellows have the opportunity to raise concerns and
337 provide feedback in a confidential manner as
338 appropriate, without fear of intimidation or retaliation;
339 ^(Core)
340
341 **II.A.4.a).(11)** ensure the program's compliance with the Sponsoring
342 Institution's policies and procedures related to
343 grievances and due process; ^(Core)
344
345 **II.A.4.a).(12)** ensure the program's compliance with the Sponsoring
346 Institution's policies and procedures for due process
347 when action is taken to suspend or dismiss, not to
348 promote, or not to renew the appointment of a fellow;
349 ^(Core)
350

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

351

- 352 II.A.4.a).(13) ensure the program’s compliance with the Sponsoring
 353 Institution’s policies and procedures on employment
 354 and non-discrimination; (Core)
 355
 356 II.A.4.a).(13).(a) Fellows must not be required to sign a non-
 357 competition guarantee or restrictive covenant.
 358 (Core)
 359
 360 II.A.4.a).(14) document verification of program completion for all
 361 graduating fellows within 30 days; (Core)
 362
 363 II.A.4.a).(15) provide verification of an individual fellow’s
 364 completion upon the fellow’s request, within 30 days;
 365 and, (Core)
 366

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

- 367
 368 II.A.4.a).(16) obtain review and approval of the Sponsoring
 369 Institution’s DIO before submitting information or
 370 requests to the ACGME, as required in the Institutional
 371 Requirements and outlined in the ACGME Program
 372 Director’s Guide to the Common Program
 373 Requirements. (Core)
 374

375 **II.B. Faculty**

376
 377 *Faculty members are a foundational element of graduate medical education*
 378 *– faculty members teach fellows how to care for patients. Faculty members*
 379 *provide an important bridge allowing fellows to grow and become practice*
 380 *ready, ensuring that patients receive the highest quality of care. They are*
 381 *role models for future generations of physicians by demonstrating*
 382 *compassion, commitment to excellence in teaching and patient care,*
 383 *professionalism, and a dedication to lifelong learning. Faculty members*
 384 *experience the pride and joy of fostering the growth and development of*
 385 *future colleagues. The care they provide is enhanced by the opportunity to*
 386 *teach. By employing a scholarly approach to patient care, faculty members,*
 387 *through the graduate medical education system, improve the health of the*
 388 *individual and the population.*

389
 390 *Faculty members ensure that patients receive the level of care expected*
 391 *from a specialist in the field. They recognize and respond to the needs of*
 392 *the patients, fellows, community, and institution. Faculty members provide*
 393 *appropriate levels of supervision to promote patient safety. Faculty*
 394 *members create an effective learning environment by acting in a*
 395 *professional manner and attending to the well-being of the fellows and*
 396 *themselves.*

397

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment.

398

399

II.B.1. For each participating site, there must be a sufficient number of faculty members with competence to instruct and supervise all fellows at that location. ^(Core)

400

401

402

403

II.B.2. Faculty members must:

404

405

II.B.2.a) be role models of professionalism; ^(Core)

406

407

II.B.2.b) demonstrate commitment to the delivery of safe, quality, cost-effective, patient-centered care; ^(Core)

408

409

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

410

411

II.B.2.c) demonstrate a strong interest in the education of fellows; ^(Core)

412

413

II.B.2.d) devote sufficient time to the educational program to fulfill their supervisory and teaching responsibilities; ^(Core)

414

415

416

II.B.2.e) administer and maintain an educational environment conducive to educating fellows; ^(Core)

417

418

419

II.B.2.f) regularly participate in organized clinical discussions, rounds, journal clubs, and conferences; and, ^(Core)

420

421

422

II.B.2.g) pursue faculty development designed to enhance their skills at least annually. ^(Core)

423

424

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

425

426

II.B.3. Faculty Qualifications

427

428

II.B.3.a) Faculty members must have appropriate qualifications in their field and hold appropriate institutional appointments. ^(Core)

429

436
437
438
439
440
441
442
443

- II.B.3.b) Subspecialty physician faculty members must:**
- II.B.3.b).(1) have current certification in the subspecialty by the American Board of Internal Medicine or the American Osteopathic Board of Internal Medicine, or possess qualifications judged acceptable to the Review Committee. (Core)**
- II.B.3.c) Any non-physician faculty members who participate in fellowship program education must be approved by the program director. (Core)**

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

459

- II.B.3.d) Any other specialty physician faculty members must have current certification in their specialty by the appropriate American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board, or possess qualifications judged acceptable to the Review Committee. (Core)**
- II.B.4. Core Faculty**
- Core faculty members must have a significant role in the education and supervision of fellows and must devote a significant portion of their entire effort to fellow education and/or administration, and must, as a component of their activities, teach, evaluate, and provide formative feedback to fellows. (Core)**

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum, mentoring fellows, and assessing fellows' progress toward achievement of competence in and the independent practice of the specialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program. Core faculty members may also be selected for their specific expertise and unique contribution to the program. Core faculty members are engaged in a broad range of activities, which may vary across programs and specialties. Core faculty members provide clinical teaching and supervision of fellows, and also participate in non-clinical activities related to fellow education and program administration. Examples of these non-clinical activities include, but are not limited to, interviewing and selecting fellow applicants, providing didactic instruction, mentoring fellows, simulation exercises, completing the annual ACGME Faculty Survey, and participating on the program's Clinical Competency Committee, Program Evaluation Committee, and other GME committees.

- 460
461 **II.B.4.a) Core faculty members must be designated by the program**
462 **director.** ^(Core)
463
464 **II.B.4.b) Core faculty members must complete the annual ACGME**
465 **Faculty Survey.** ^(Core)
466
467 II.B.4.c) In addition to the program director, there must be at least one core
468 faculty member certified in infectious disease by the ABIM or the
469 AOBIM. ^(Core)
470
471 II.B.4.d) In programs approved for more than three fellows, there must be
472 at least one core faculty member certified in infectious disease by
473 the ABIM or the AOBIM for every 1.5 fellows. ^(Core)
474
475 II.B.4.e) At a minimum, the required core faculty members, in aggregate
476 and excluding members of the program leadership, must be
477 provided with support equal to an average dedicated minimum of
478 .1 FTE for educational and administrative responsibilities that do
479 not involve direct patient care. ^(Core)
480

~~Specialty Background and Intent: The program must have a minimum number of ABIM- or AOBIM-certified infectious disease faculty members who devote significant time to teaching, supervising, and advising residents, and working closely with the program director. One way the infectious disease-certified faculty members can demonstrate they are devoting a significant portion of their effort to resident education is by dedicating an average of 10 hours per week to the program.~~

481

Subspecialty-Specific Background and Intent: For instance, a program with an approved complement of 12 fellows is required to have a minimum of eight ABIM- or AOBIM-subspecialty-certified faculty members and an FTE of 10 percent each. Because an associate program director is also a core faculty member, the minimum dedicated time requirements for associate program directors are inclusive of core faculty activities. An additional 10 percent FTE for the core faculty position is not required. For example, if one core faculty member is named the associate program director for a 12-fellow program, the required minimum support for that position is 14 percent FTE.

- 482
483 **II.C. Program Coordinator**
484
485 **II.C.1. There must be a program coordinator.** ^(Core)
486
487 **II.C.2. The program coordinator must be provided with support adequate**
488 **for administration of the program based upon its size and**
489 **configuration.** ^(Core)
490
491 II.C.2.a) At a minimum, the program coordinator must be provided with the
492 dedicated time and support specified below for administration of
493 the program. Additional administrative support must be provided
494 based on the program size as follows: ^(Core)
495

<u>Number of Approved Fellow Positions</u>	<u>Minimum FTE Required for Coordinator Support</u>	<u>Additional Aggregate FTE Required for Administration of the Program</u>
<u>1-3</u>	<u>.3</u>	<u>0</u>
<u>4-6</u>	<u>.3</u>	<u>.2</u>
<u>7-9</u>	<u>.3</u>	<u>.38</u>
<u>10-12</u>	<u>.3</u>	<u>.44</u>
<u>13-15</u>	<u>.3</u>	<u>.50</u>
<u>16-18</u>	<u>.3</u>	<u>.56</u>
<u>19-21</u>	<u>.3</u>	<u>.62</u>
<u>22-24</u>	<u>.3</u>	<u>.68</u>
<u>25-27</u>	<u>.3</u>	<u>.74</u>

496

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as otherwise titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison and facilitator between the learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a key member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management appropriate to the complexity of the program. Program coordinators are expected to develop in-depth knowledge of the ACGME and Program Requirements, including policies and procedures. Program coordinators assist the program director in meeting accreditation requirements, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

497

Subspecialty-Specific Background and Intent: For instance, a program with an approved complement of 12 fellows is required to have at least 74 percent FTE administrative support: 30 percent FTE for the program coordinator; and an additional 44 percent FTE aggregate support. This additional support may be for the program coordinator only or divided among the program coordinator and one or more other administrative personnel. The Review Committee has not specified how the FTE should be distributed to allow programs, in partnership with their Sponsoring Institution, to allocate the FTE as they see fit.

498

499

II.D. Other Program Personnel

500

501

The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. ^(Core)

502

503

504

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

- 505
506 II.D.1. There must be services available from other health care professionals,
507 including dietitians, language interpreters, nurses, occupational
508 therapists, physical therapists, and social workers. (Detail)
509
510 II.D.2. There must be appropriate and timely consultation from other specialties.
511 (Detail)
512

513 III. Fellow Appointments

514 III.A. Eligibility Criteria

515 III.A.1. Eligibility Requirements – Fellowship Programs

516
517
518 **All required clinical education for entry into ACGME-accredited**
519 **fellowship programs must be completed in an ACGME-accredited**
520 **residency program, an AOA-approved residency program, a**
521 **program with ACGME International (ACGME-I) Advanced Specialty**
522 **Accreditation, or a Royal College of Physicians and Surgeons of**
523 **Canada (RCPSC)-accredited or College of Family Physicians of**
524 **Canada (CFPC)-accredited residency program located in Canada.**
525 (Core)
526
527

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

- 528
529 III.A.1.a) **Fellowship programs must receive verification of each**
530 **entering fellow’s level of competence in the required field,**
531 **upon matriculation, using ACGME, ACGME-I, or CanMEDS**
532 **Milestones evaluations from the core residency program. (Core)**
533
534 III.A.1.b) Prior to appointment in the fellowship, fellows should have
535 completed an internal medicine program that satisfies the
536 requirements in III.A.1. (Core)
537
538 III.A.1.b).(1) Fellows who did not complete an internal medicine
539 program that satisfies the requirements in III.A.1. must
540 have completed at least three years of internal medicine
541 education prior to starting the fellowship as well as met all
542 of the criteria in the “Fellow Eligibility Exception” section
543 below. (Core)
544
545 III.A.1.c) **Fellow Eligibility Exception**
546

547 **The Review Committee for Internal Medicine will allow the**
548 **following exception to the fellowship eligibility requirements:**

549
550 **III.A.1.c).(1)** **An ACGME-accredited fellowship program may accept**
551 **an exceptionally qualified international graduate**
552 **applicant who does not satisfy the eligibility**
553 **requirements listed in III.A.1., but who does meet all of**
554 **the following additional qualifications and conditions:**
555 **(Core)**

556
557 **III.A.1.c).(1).(a)** **evaluation by the program director and**
558 **fellowship selection committee of the**
559 **applicant's suitability to enter the program,**
560 **based on prior training and review of the**
561 **summative evaluations of training in the core**
562 **specialty; and, (Core)**

563
564 **III.A.1.c).(1).(b)** **review and approval of the applicant's**
565 **exceptional qualifications by the GMEC; and,**
566 **(Core)**

567
568 **III.A.1.c).(1).(c)** **verification of Educational Commission for**
569 **Foreign Medical Graduates (ECFMG)**
570 **certification. (Core)**

571
572 **III.A.1.c).(2)** **Applicants accepted through this exception must have**
573 **an evaluation of their performance by the Clinical**
574 **Competency Committee within 12 weeks of**
575 **matriculation. (Core)**
576

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

577
578 **III.B.** **The program director must not appoint more fellows than approved by the**
579 **Review Committee. (Core)**
580

581 **III.B.1. All complement increases must be approved by the Review**
582 **Committee.** (Core)

583
584 **III.B.2. The number of available fellow positions in the program must be at least**
585 **one per year.** (Detail)

586
587 **III.C. Fellow Transfers**
588
589 **The program must obtain verification of previous educational experiences**
590 **and a summative competency-based performance evaluation prior to**
591 **acceptance of a transferring fellow, and Milestones evaluations upon**
592 **matriculation.** (Core)

593
594 **IV. Educational Program**

595
596 ***The ACGME accreditation system is designed to encourage excellence and***
597 ***innovation in graduate medical education regardless of the organizational***
598 ***affiliation, size, or location of the program.***

599
600 ***The educational program must support the development of knowledgeable, skillful***
601 ***physicians who provide compassionate care.***

602
603 ***In addition, the program is expected to define its specific program aims consistent***
604 ***with the overall mission of its Sponsoring Institution, the needs of the community***
605 ***it serves and that its graduates will serve, and the distinctive capabilities of***
606 ***physicians it intends to graduate. While programs must demonstrate substantial***
607 ***compliance with the Common and subspecialty-specific Program Requirements, it***
608 ***is recognized that within this framework, programs may place different emphasis***
609 ***on research, leadership, public health, etc. It is expected that the program aims***
610 ***will reflect the nuanced program-specific goals for it and its graduates; for***
611 ***example, it is expected that a program aiming to prepare physician-scientists will***
612 ***have a different curriculum from one focusing on community health.***

613
614 **IV.A. The curriculum must contain the following educational components:** (Core)

615
616 **IV.A.1. a set of program aims consistent with the Sponsoring Institution’s**
617 **mission, the needs of the community it serves, and the desired**
618 **distinctive capabilities of its graduates;** (Core)

619
620 **IV.A.1.a) The program’s aims must be made available to program**
621 **applicants, fellows, and faculty members.** (Core)

622
623 **IV.A.2. competency-based goals and objectives for each educational**
624 **experience designed to promote progress on a trajectory to**
625 **autonomous practice in their subspecialty. These must be**
626 **distributed, reviewed, and available to fellows and faculty members;**
627 (Core)

628
629 **IV.A.3. delineation of fellow responsibilities for patient care, progressive**
630 **responsibility for patient management, and graded supervision in**
631 **their subspecialty;** (Core)

632

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

633

634

635

636

IV.A.4. structured educational activities beyond direct patient care; and,
(Core)

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

637

638

639

640

641

642

IV.A.5. advancement of fellows' knowledge of ethical principles
foundational to medical professionalism. (Core)

IV.B. ACGME Competencies

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

643

644

645

646

647

648

649

650

651

652

653

IV.B.1. The program must integrate the following ACGME Competencies into the curriculum: (Core)

IV.B.1.a) Professionalism

Fellows must demonstrate a commitment to professionalism and an adherence to ethical principles. (Core)

IV.B.1.b) Patient Care and Procedural Skills

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs.* 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

654		
655	IV.B.1.b).(1)	Fellows must be able to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health. ^(Core)
656		
657		
658		
659		
660	IV.B.1.b).(1).(a)	Fellows must demonstrate competence in the practice of health promotion, disease prevention, diagnosis, care, and treatment of patients of each gender from adolescence to old age, during health and all stages of illness; and, ^(Core)
661		
662		
663		
664		
665		
666	IV.B.1.b).(1).(b)	Fellows must demonstrate competence in the diagnosis and management of the following infectious disease areas:
667		
668		
669		
670	IV.B.1.b).(1).(b).(i)	bacterial infections; ^(Core)
671

691		
692	IV.B.1.b).(1).(b).(xi)	sepsis syndromes; ^(Core)
693		
694	IV.B.1.b).(1).(b).(xii)	sexually transmitted infections; and, ^(Core)
695		
696	IV.B.1.b).(1).(b).(xiii)	viral infections. ^(Core)
697		
698	IV.B.1.b).(2)	Fellows must be able to perform all medical, diagnostic, and surgical procedures considered essential for the area of practice. ^(Core)
699		
700		
701		

702	IV.B.1.c)	Medical Knowledge
703		
704		Fellows must demonstrate knowledge of established and
705		evolving biomedical, clinical, epidemiological and social-
706		behavioral sciences, as well as the application of this
707		knowledge to patient care. ^(Core)
708		
709	IV.B.1.c).(1)	Fellows must demonstrate knowledge of the scientific
710		method of problem solving and evidence-based decision
711		making; ^(Core)
712		
713	IV.B.1.c).(2)	Fellows must demonstrate knowledge of indications,
714		contraindications, limitations, complications, techniques,
715		and interpretation of results of those diagnostic and
716		therapeutic procedures integral to the discipline, including
717		the appropriate indications for and use of screening
718		tests/procedures; ^(Core)
719		
720	IV.B.1.c).(3)	Fellows must demonstrate knowledge of:
721		
722	IV.B.1.c).(3).(a)	the mechanisms of action and adverse reactions of
723		antimicrobial agents, antimicrobial and antiviral
724		resistance, drug-drug interactions between
725		antimicrobial agents and other compounds; ^(Core)
726		
727	IV.B.1.c).(3).(b)	the appropriate use and management of
728		antimicrobial agents in a variety of clinical settings,
729		including the hospital, ambulatory practice, non-
730		acute-care units, and the home; ^(Core)
731		
732	IV.B.1.c).(3).(c)	the appropriate procedures for specimen collection
733		relevant to infectious disease, including but not
734		limited to bronchoscopy, thoracentesis,
735		arthrocentesis, lumbar puncture, and aspiration of
736		abscess cavities; ^(Core)
737		
738	IV.B.1.c).(3).(d)	the principles of prophylaxis and
739		immunoprophylaxis to enhance resistance to
740		infection; ^(Core)
741		
742	IV.B.1.c).(3).(e)	the characteristics, use, and complications of
743		antiretroviral agents, mechanisms and clinical
744		significance of viral resistance to antiretroviral
745		agents, and recognition and management of
746		opportunistic infections in patients with HIV/AIDS;
747		and, ^(Core)
748		
749	IV.B.1.c).(3).(f)	the fundamentals of host defense and mechanisms
750		of microorganism pathogenesis. ^(Core)
751		
752	IV.B.1.c).(4)	Fellows must demonstrate knowledge of the development

753 of appropriate antibiotic utilizations and restriction policies;
754 and, ^(Core)

755
756 IV.B.1.c).(5) Fellows must demonstrate knowledge of infection control
757 and hospital epidemiology. ^(Core)

758
759 **IV.B.1.d) Practice-based Learning and Improvement**

760
761 **Fellows must demonstrate the ability to investigate and**
762 **evaluate their care of patients, to appraise and assimilate**
763 **scientific evidence, and to continuously improve patient care**
764 **based on constant self-evaluation and lifelong learning.** ^(Core)
765

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

766
767 **IV.B.1.e) Interpersonal and Communication Skills**

768
769 **Fellows must demonstrate interpersonal and communication**
770 **skills that result in the effective exchange of information and**
771 **collaboration with patients, their families, and health**
772 **professionals.** ^(Core)

773
774 **IV.B.1.f) Systems-based Practice**

775
776 **Fellows must demonstrate an awareness of and**
777 **responsiveness to the larger context and system of health**
778 **care, including the social determinants of health, as well as**
779 **the ability to call effectively on other resources to provide**
780 **optimal health care.** ^(Core)

781
782 **IV.C. Curriculum Organization and Fellow Experiences**

783
784 **IV.C.1. The curriculum must be structured to optimize fellow educational**
785 **experiences, the length of these experiences, and supervisory**
786 **continuity.** ^(Core)

787
788 IV.C.1.a) Assignment of rotations must be structured to minimize the
789 frequency of rotational transitions, and rotations must be of
790 sufficient length to provide a quality educational experience,
791 defined by continuity of patient care, ongoing supervision,
792 longitudinal relationships with faculty members, and meaningful
793 assessment and feedback. ^(Core)
794

- 795 IV.C.1.b) Clinical experiences should be structured to facilitate learning in a
796 manner that allows fellows to function as part of an effective
797 interprofessional team that works together towards the shared
798 goals of patient safety and quality improvement. ^(Core)
799
- 800 **IV.C.2. The program must provide instruction and experience in pain**
801 **management if applicable for the subspecialty, including recognition**
802 **of the signs of addiction.** ^(Core)
803
- 804 IV.C.3. A minimum of 12 months must be devoted to clinical experience. ^(Core)
805
- 806 IV.C.4. Fellows must participate in the management of outpatient antibiotic
807 therapy, including interaction with pharmacy, nursing, and other home
808 care services. ^(Core)
809
- 810 IV.C.5. Fellows must participate in training using simulation. ^(Detail)
811
- 812 IV.C.6. Experience with Continuity Ambulatory Patients
- 813
- 814 IV.C.6.a) Fellows must have continuity ambulatory clinic experience that
815 exposes them fellows to the breadth and depth of the
816 subspecialty. ^(Core)
817
- 818 IV.C.6.b) This experience should average one half-day each week. ^(Detail)
819
- 820 IV.C.6.c) This experience must include an appropriate distribution of
821 patients of each gender and a diversity of ages; ^(Core)
822
- 823 This should be accomplished through either:
- 824
- 825 IV.C.6.c).(1) a continuity clinic which provides fellows the opportunity to
826 learn the course of disease; or, ^(Detail)
827
- 828 IV.C.6.c).(2) selected blocks of at least six months which address
829 specific areas of infectious disease. ^(Detail)
830
- 831 IV.C.6.d) Ambulatory experience must include the longitudinal care of
832 patients with HIV infection under the supervision of a physician
833 experienced in the management of HIV infection. ^(Core)
834
- 835 IV.C.6.d).(1) Fellows must be assigned to an HIV clinic for a period of at
836 least 12 months. ^(Detail)
837
- 838 IV.C.6.e) Each fellow should, on average, be responsible for four to eight
839 patients during each half-day session. ^(Detail)
840
- 841 IV.C.6.f) The continuity patient care experience should not be interrupted
842 by more than one month, excluding a fellow's vacation. ^(Detail)
843
- 844 IV.C.6.g) Fellows should be informed of the status of their continuity
845 patients when such patients are hospitalized, as clinically

- 846 appropriate. ^(Detail)
- 847
- 848 IV.C.7. Consultations
- 849
- 850 IV.C.7.a) Each fellow must provide patient care consultations or directly
851 oversee students or residents performing consultations totaling at
852 least 250 new patient consults with infectious disease problems.
853 ^(Core)
- 854
- 855 IV.C.7.b) Experience with pediatric infectious diseases is suggested. ^(Detail)
- 856
- 857 IV.C.8. The core curriculum must include a didactic program based upon the core
858 knowledge content in the subspecialty area. ^(Core)
- 859
- 860 IV.C.8.a) The program must afford each fellow an opportunity to review
861 topics covered in conferences that he or she was unable to attend.
862 ^(Detail)
- 863
- 864 IV.C.8.b) Fellows must participate in clinical case conferences, journal
865 clubs, research conferences, and morbidity and mortality or quality
866 improvement conferences. ^(Detail)
- 867
- 868 IV.C.8.c) All core conferences must have at least one faculty member
869 present, and must be scheduled as to ensure peer-peer and peer-
870 faculty interaction. ^(Detail)
- 871
- 872 IV.C.9. Patient-based teaching must include direct interaction between fellows
873 and faculty members, bedside teaching, discussion of pathophysiology,
874 and the use of current evidence in diagnostic and therapeutic decisions.
875 ^(Core)
- 876
- 877 The teaching must be:
- 878
- 879 IV.C.9.a) formally conducted on all inpatient, outpatient, and consultative
880 services; and, ^(Detail)
- 881
- 882 IV.C.9.b) conducted with a frequency and duration that ensures a
883 meaningful and continuous teaching relationship between the
884 assigned supervising faculty member(s) and fellows. ^(Detail)
- 885
- 886 IV.C.10. Fellows must receive instruction in practice management relevant to
887 infectious disease. ^(Detail)
- 888
- 889 **IV.D. Scholarship**
- 890
- 891 ***Medicine is both an art and a science. The physician is a humanistic***
- 892 ***scientist who cares for patients. This requires the ability to think critically,***
- 893 ***evaluate the literature, appropriately assimilate new knowledge, and***
- 894 ***practice lifelong learning. The program and faculty must create an***
- 895 ***environment that fosters the acquisition of such skills through fellow***
- 896 ***participation in scholarly activities as defined in the subspecialty-specific***

897 **Program Requirements. Scholarly activities may include discovery,**
898 **integration, application, and teaching.**

899
900 **The ACGME recognizes the diversity of fellowships and anticipates that**
901 **programs prepare physicians for a variety of roles, including clinicians,**
902 **scientists, and educators. It is expected that the program’s scholarship will**
903 **reflect its mission(s) and aims, and the needs of the community it serves.**
904 **For example, some programs may concentrate their scholarly activity on**
905 **quality improvement, population health, and/or teaching, while other**
906 **programs might choose to utilize more classic forms of biomedical**
907 **research as the focus for scholarship.**

908
909 **IV.D.1. Program Responsibilities**

910
911 **IV.D.1.a) The program must demonstrate evidence of scholarly**
912 **activities, consistent with its mission(s) and aims. (Core)**

913
914 **IV.D.1.b) The program in partnership with its Sponsoring Institution,**
915 **must allocate adequate resources to facilitate fellow and**
916 **faculty involvement in scholarly activities. (Core)**

917
918 **IV.D.2. Faculty Scholarly Activity**

919
920 **IV.D.2.a) Among their scholarly activity, programs must demonstrate**
921 **accomplishments in at least three of the following domains:**
922 **(Core)**

- 923
924
 - **Research in basic science, education, translational**
 - **science, patient care, or population health**
 - **Peer-reviewed grants**
 - **Quality improvement and/or patient safety initiatives**
 - **Systematic reviews, meta-analyses, review articles,**
 - **chapters in medical textbooks, or case reports**
 - **Creation of curricula, evaluation tools, didactic**
 - **educational activities, or electronic educational**
 - **materials**
 - **Contribution to professional committees, educational**
 - **organizations, or editorial boards**
 - **Innovations in education**

926
927
928
929
930
931
932
933
934
935
936
937 **IV.D.2.b) The program must demonstrate dissemination of scholarly**
938 **activity within and external to the program by the following**
939 **methods:**

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the fellows’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the

creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

IV.D.2.b).(1) faculty participation in grand rounds, posters, workshops, quality improvement presentations, podium presentations, grant leadership, non-peer-reviewed print/electronic resources, articles or publications, book chapters, textbooks, webinars, service on professional committees, or serving as a journal reviewer, journal editorial board member, or editor; (Outcome)‡

IV.D.2.b).(1).(a) At least 50 percent of the core faculty members who are certified in infectious disease by the ABIM or AOBIM (see Program Requirements II.B.4.c)-d) must annually engage in a variety of scholarly activities, as listed in Program Requirement IV.D.2.b).(1). (Core)

IV.D.3. Fellow Scholarly Activity

IV.D.3.a) While in the program, at least 50 percent of a program's fellows must engage in more than one of the following scholarly activities: participation in grand rounds, posters, workshops, quality improvement presentations, podium presentations, grant leadership, non-peer-reviewed print/electronic resources, articles or publications, book chapters, textbooks, webinars, service on professional committees, or serving as a journal reviewer, journal editorial board member, or editor. (Outcome)

V. Evaluation

V.A. Fellow Evaluation

V.A.1. Feedback and Evaluation

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- **fellows identify their strengths and weaknesses and target areas that need work**
- **program directors and faculty members recognize where fellows are struggling and address problems immediately**

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

975
976
977
978
979
980
981
982
983
984
985
986

V.A.1.a) Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. ^(Core)

V.A.1.a).(1) The faculty must discuss this evaluation with each fellow at the completion of each assignment. ^(Core)

V.A.1.a).(2) Assessment of procedural competence should include a formal evaluation process and not be based solely on a minimum number of procedures performed. ^(Detail)

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

987
988
989
990
991
992
993
994
995
996
997
998
999
1000
1001
1002
1003

V.A.1.b) Evaluation must be documented at the completion of the assignment. ^(Core)

V.A.1.b).(1) For block rotations of greater than three months in duration, evaluation must be documented at least every three months. ^(Core)

V.A.1.b).(2) Longitudinal experiences such as continuity clinic in the context of other clinical responsibilities must be evaluated at least every three months and at completion. ^(Core)

V.A.1.c) The program must provide an objective performance evaluation based on the Competencies and the subspecialty-specific Milestones, and must: ^(Core)

- 1004 V.A.1.c).(1) use multiple evaluators (e.g., faculty members, peers,
 1005 patients, self, and other professional staff members);
 1006 and, ^(Core)
 1007
 1008 V.A.1.c).(2) provide that information to the Clinical Competency
 1009 Committee for its synthesis of progressive fellow
 1010 performance and improvement toward unsupervised
 1011 practice. ^(Core)
 1012

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

- 1013
 1014 V.A.1.d) The program director or their designee, with input from the
 1015 Clinical Competency Committee, must:
 1016
 1017 V.A.1.d).(1) meet with and review with each fellow their
 1018 documented semi-annual evaluation of performance,
 1019 including progress along the subspecialty-specific
 1020 Milestones. ^(Core)
 1021
 1022 V.A.1.d).(2) assist fellows in developing individualized learning
 1023 plans to capitalize on their strengths and identify areas
 1024 for growth; and, ^(Core)
 1025
 1026 V.A.1.d).(3) develop plans for fellows failing to progress, following
 1027 institutional policies and procedures. ^(Core)
 1028

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow

progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

- 1029
1030 **V.A.1.e)** At least annually, there must be a summative evaluation of
1031 each fellow that includes their readiness to progress to the
1032 next year of the program, if applicable. ^(Core)
1033
- 1034 **V.A.1.f)** The evaluations of a fellow's performance must be accessible
1035 for review by the fellow. ^(Core)
1036
- 1037 **V.A.2.** Final Evaluation
1038
- 1039 **V.A.2.a)** The program director must provide a final evaluation for each
1040 fellow upon completion of the program. ^(Core)
1041
- 1042 **V.A.2.a).(1)** The subspecialty-specific Milestones, and when
1043 applicable the subspecialty-specific Case Logs, must
1044 be used as tools to ensure fellows are able to engage
1045 in autonomous practice upon completion of the
1046 program. ^(Core)
1047
- 1048 **V.A.2.a).(2)** The final evaluation must:
1049
- 1050 **V.A.2.a).(2).(a)** become part of the fellow's permanent record
1051 maintained by the institution, and must be
1052 accessible for review by the fellow in
1053 accordance with institutional policy; ^(Core)
1054
- 1055 **V.A.2.a).(2).(b)** verify that the fellow has demonstrated the
1056 knowledge, skills, and behaviors necessary to
1057 enter autonomous practice; ^(Core)
1058
- 1059 **V.A.2.a).(2).(c)** consider recommendations from the Clinical
1060 Competency Committee; and, ^(Core)
1061
- 1062 **V.A.2.a).(2).(d)** be shared with the fellow upon completion of
1063 the program. ^(Core)
1064
- 1065 **V.A.3.** A Clinical Competency Committee must be appointed by the
1066 program director. ^(Core)
1067
- 1068 **V.A.3.a)** At a minimum the Clinical Competency Committee must
1069 include three members, at least one of whom is a core faculty
1070 member. Members must be faculty members from the same
1071 program or other programs, or other health professionals
1072 who have extensive contact and experience with the
1073 program's fellows. ^(Core)
1074
- 1075 **V.A.3.b)** The Clinical Competency Committee must:
1076

- 1077 **V.A.3.b).(1)** review all fellow evaluations at least semi-annually;
 1078 (Core)
 1079
 1080 **V.A.3.b).(2)** determine each fellow's progress on achievement of
 1081 the subspecialty-specific Milestones; and, (Core)
 1082
 1083 **V.A.3.b).(3)** meet prior to the fellows' semi-annual evaluations and
 1084 advise the program director regarding each fellow's
 1085 progress. (Core)
 1086
 1087 **V.B. Faculty Evaluation**
 1088
 1089 **V.B.1.** The program must have a process to evaluate each faculty
 1090 member's performance as it relates to the educational program at
 1091 least annually. (Core)
 1092

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 1093
 1094 **V.B.1.a)** This evaluation must include a review of the faculty member's
 1095 clinical teaching abilities, engagement with the educational
 1096 program, participation in faculty development related to their
 1097 skills as an educator, clinical performance, professionalism,
 1098 and scholarly activities. (Core)
 1099
 1100 **V.B.1.b)** This evaluation must include written, confidential evaluations
 1101 by the fellows. (Core)
 1102
 1103 **V.B.2.** Faculty members must receive feedback on their evaluations at least
 1104 annually. (Core)
 1105
 1106 **V.B.3.** Results of the faculty educational evaluations should be
 1107 incorporated into program-wide faculty development plans. (Core)
 1108

Background and Intent: The quality of the faculty’s teaching and clinical care is a determinant of the quality of the program and the quality of the fellows’ future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members’ teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program’s faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

- 1109
1110 **V.C. Program Evaluation and Improvement**
1111
1112 **V.C.1. The program director must appoint the Program Evaluation**
1113 **Committee to conduct and document the Annual Program**
1114 **Evaluation as part of the program’s continuous improvement**
1115 **process. (Core)**
1116
1117 **V.C.1.a) The Program Evaluation Committee must be composed of at**
1118 **least two program faculty members, at least one of whom is a**
1119 **core faculty member, and at least one fellow. (Core)**
1120
1121 **V.C.1.b) Program Evaluation Committee responsibilities must include:**
1122
1123 **V.C.1.b).(1) acting as an advisor to the program director, through**
1124 **program oversight; (Core)**
1125
1126 **V.C.1.b).(2) review of the program’s self-determined goals and**
1127 **progress toward meeting them; (Core)**
1128
1129 **V.C.1.b).(3) guiding ongoing program improvement, including**
1130 **development of new goals, based upon outcomes;**
1131 **and, (Core)**
1132
1133 **V.C.1.b).(4) review of the current operating environment to identify**
1134 **strengths, challenges, opportunities, and threats as**
1135 **related to the program’s mission and aims. (Core)**
1136

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program’s progress toward achievement of its goals and aims.

- 1137
1138 **V.C.1.c) The Program Evaluation Committee should consider the**
1139 **following elements in its assessment of the program:**
1140
1141 **V.C.1.c).(1) curriculum; (Core)**
1142
1143 **V.C.1.c).(2) outcomes from prior Annual Program Evaluation(s);**
1144 **(Core)**
1145
1146 **V.C.1.c).(3) ACGME letters of notification, including citations,**
1147 **Areas for Improvement, and comments; (Core)**

1194		
1195	V.C.1.e).(2)	be submitted to the DIO. ^(Core)
1196		
1197	V.C.2.	The program must participate in a Self-Study prior to its 10-Year Accreditation Site Visit. ^(Core)
1198		

1199
1200
1201
1202

V.C.2.a) **A summary of the Self-Study must be submitted to the DIO.**
(Core)

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

1203

V.C.3. *One goal of ACGME-accredited education is to educate physicians who seek and achieve board certification. One measure of the effectiveness of the educational program is the ultimate pass rate.*

1239 subspecialty. ^(Outcome)
1240
1241 **V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program
1242 whose graduates over the time period specified in the
1243 requirement have achieved an 80 percent pass rate will have
1244 met this requirement, no matter the percentile rank of the
1245 program for pass rate in that subspecialty. ^(Outcome)
1246

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

1247
1248 **V.C.3.f)** Programs must report, in ADS, board certification status
1249 annually for the cohort of board-eligible fellows that
1250 graduated seven years earlier. ^(Core)
1251

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

1252
1253 **VI. The Learning and Working Environment**
1254

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

- *Excellence in the safety and quality of care rendered to patients by fellows today*
- *Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice*

1263

1264
1265
1266
1267
1268
1269
1270
1271
1272
1273

- ***Excellence in professionalism through faculty modeling of:***
 - ***the effacement of self-interest in a humanistic environment that supports the professional development of physicians***
 - ***the joy of curiosity, problem-solving, intellectual rigor, and discovery***
- ***Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team***

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program’s accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an

1291 *active role in system improvement processes. Graduating fellows*
1292 *will apply these skills to critique their future unsupervised practice*
1293 *and effect quality improvement measures.*

1294
1295 *It is necessary for fellows and faculty members to consistently work*
1296 *in a well-coordinated manner with other health care professionals to*
1297 *achieve organizational patient safety goals.*

1298
1299 **VI.A.1.a) Patient Safety**

1300
1301 **VI.A.1.a).(1) Culture of Safety**

1302
1303 *A culture of safety requires continuous identification*
1304 *of vulnerabilities and a willingness to transparently*
1305 *deal with them. An effective organization has formal*
1306 *mechanisms to assess the knowledge, skills, and*
1307 *attitudes of its personnel toward safety in order to*
1308 *identify areas for improvement.*

1309
1310 **VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows**
1311 **must actively participate in patient safety**
1312 **systems and contribute to a culture of safety.**
1313 **(Core)**

1314
1315 **VI.A.1.a).(1).(b) The program must have a structure that**
1316 **promotes safe, interprofessional, team-based**
1317 **care. (Core)**

1318
1319 **VI.A.1.a).(2) Education on Patient Safety**

1320
1321 **Programs must provide formal educational activities**
1322 **that promote patient safety-related goals, tools, and**
1323 **techniques. (Core)**

1324

Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.

1325
1326 **VI.A.1.a).(3) Patient Safety Events**

1327
1328 *Reporting, investigation, and follow-up of adverse*
1329 *events, near misses, and unsafe conditions are pivotal*
1330 *mechanisms for improving patient safety, and are*
1331 *essential for the success of any patient safety*
1332 *program. Feedback and experiential learning are*
1333 *essential to developing true competence in the ability*
1334 *to identify causes and institute sustainable systems-*
1335 *based changes to ameliorate patient safety*
1336 *vulnerabilities.*

1337
1338 **VI.A.1.a).(3).(a) Residents, fellows, faculty members, and other**
1339 **clinical staff members must:**

1340		
1341	VI.A.1.a).(3).(a).(i)	know their responsibilities in reporting patient safety events at the clinical site;
1342		(Core)
1343		
1344		
1345	VI.A.1.a).(3).(a).(ii)	know how to report patient safety events, including near misses, at the clinical site; and,
1346		(Core)
1347		
1348		
1349	VI.A.1.a).(3).(a).(iii)	be provided with summary information of their institution's patient safety reports.
1350		(Core)
1351		
1352		
1353	VI.A.1.a).(3).(b)	Fellows must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions.
1354		(Core)
1355		
1356		
1357		
1358		
1359		
1360	VI.A.1.a).(4)	Fellow Education and Experience in Disclosure of Adverse Events
1361		
1362		
1363		<i>Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for fellows to develop and apply.</i>
1364		
1365		
1366		
1367		
1368		
1369	VI.A.1.a).(4).(a)	All fellows must receive training in how to disclose adverse events to patients and families.
1370		(Core)
1371		
1372		
1373	VI.A.1.a).(4).(b)	Fellows should have the opportunity to participate in the disclosure of patient safety events, real or simulated.
1374		(Detail)†
1375		
1376		
1377	VI.A.1.b)	Quality Improvement
1378		
1379	VI.A.1.b).(1)	Education in Quality Improvement
1380		
1381		<i>A cohesive model of health care includes quality-related goals, tools, and techniques that are necessary in order for health care professionals to achieve quality improvement goals.</i>
1382		
1383		
1384		
1385		
1386	VI.A.1.b).(1).(a)	Fellows must receive training and experience in quality improvement processes, including an understanding of health care disparities.
1387		(Core)
1388		
1389		
1390	VI.A.1.b).(2)	Quality Metrics

1391		
1392		<i>Access to data is essential to prioritizing activities for</i>
1393		<i>care improvement and evaluating success of</i>
1394		<i>improvement efforts.</i>
1395		
1396	VI.A.1.b).(2).(a)	Fellows and faculty members must receive data
1397		on quality metrics and benchmarks related to
1398		their patient populations. ^(Core)
1399		
1400	VI.A.1.b).(3)	Engagement in Quality Improvement Activities
1401		
1402		<i>Experiential learning is essential to developing the</i>
1403		<i>ability to identify and institute sustainable systems-</i>
1404		<i>based changes to improve patient care.</i>
1405		
1406	VI.A.1.b).(3).(a)	Fellows must have the opportunity to
1407		participate in interprofessional quality
1408		improvement activities. ^(Core)
1409		
1410	VI.A.1.b).(3).(a).(i)	This should include activities aimed at
1411		reducing health care disparities. ^(Detail)
1412		
1413	VI.A.2.	Supervision and Accountability
1414		
1415	VI.A.2.a)	<i>Although the attending physician is ultimately responsible for</i>
1416		<i>the care of the patient, every physician shares in the</i>
1417		<i>responsibility and accountability for their efforts in the</i>
1418		<i>provision of care. Effective programs, in partnership with</i>
1419		<i>their Sponsoring Institutions, define, widely communicate,</i>
1420		<i>and monitor a structured chain of responsibility and</i>
1421		<i>accountability as it relates to the supervision of all patient</i>
1422		<i>care.</i>
1423		
1424		<i>Supervision in the setting of graduate medical education</i>
1425		<i>provides safe and effective care to patients; ensures each</i>
1426		<i>fellow’s development of the skills, knowledge, and attitudes</i>
1427		<i>required to enter the unsupervised practice of medicine; and</i>
1428		<i>establishes a foundation for continued professional growth.</i>
1429		
1430	VI.A.2.a).(1)	Each patient must have an identifiable and
1431		appropriately-credentialed and privileged attending
1432		physician (or licensed independent practitioner as
1433		specified by the applicable Review Committee) who is
1434		responsible and accountable for the patient’s care.
1435		^(Core)
1436		
1437	VI.A.2.a).(1).(a)	This information must be available to fellows,
1438		faculty members, other members of the health
1439		care team, and patients. ^(Core)
1440		

1441 VI.A.2.a).(1).(b) Fellows and faculty members must inform each
1442 patient of their respective roles in that patient's
1443 care when providing direct patient care. ^(Core)
1444

1445 VI.A.2.b) *Supervision may be exercised through a variety of methods.*
1446 *For many aspects of patient care, the supervising physician*
1447 *may be a more advanced fellow. Other portions of care*
1448 *provided by the fellow can be adequately supervised by the*
1449 *appropriate availability of the supervising faculty member or*
1450 *fellow, either on site or by means of telecommunication*
1451 *technology. Some activities require the physical presence of*
1452 *the supervising faculty member. In some circumstances,*
1453 *supervision may include post-hoc review of fellow-delivered*
1454 *care with feedback.*
1455

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

1456
1457 VI.A.2.b).(1) The program must demonstrate that the appropriate
1458 level of supervision in place for all fellows is based on
1459 each fellow's level of training and ability, as well as
1460 patient complexity and acuity. Supervision may be
1461 exercised through a variety of methods, as appropriate
1462 to the situation. ^(Core)
1463

1464 VI.A.2.b).(2) The program must define when physical presence of a
1465 supervising physician is required. ^(Core)
1466

1467 VI.A.2.c) Levels of Supervision
1468
1469 To promote appropriate fellow supervision while providing
1470 for graded authority and responsibility, the program must use
1471 the following classification of supervision: ^(Core)
1472

1473 VI.A.2.c).(1) Direct Supervision:

1474
1475 VI.A.2.c).(1).(a) the supervising physician is physically present
1476 with the fellow during the key portions of the
1477 patient interaction; or, ^(Core)
1478

1479 VI.A.2.c).(1).(b) the supervising physician and/or patient is not
1480 physically present with the fellow and the
1481 supervising physician is concurrently

1482		monitoring the patient care through appropriate
1483		telecommunication technology. ^(Core)
1484		
1485	VI.A.2.c).(2)	Indirect Supervision: the supervising physician is not
1486		providing physical or concurrent visual or audio
1487		supervision but is immediately available to the fellow
1488		for guidance and is available to provide appropriate
1489		direct supervision. ^(Core)
1490		
1491	VI.A.2.c).(3)	Oversight – the supervising physician is available to
1492		provide review of procedures/encounters with
1493		feedback provided after care is delivered. ^(Core)
1494		
1495	VI.A.2.d)	The privilege of progressive authority and responsibility,
1496		conditional independence, and a supervisory role in patient
1497		care delegated to each fellow must be assigned by the
1498		program director and faculty members. ^(Core)
1499		
1500	VI.A.2.d).(1)	The program director must evaluate each fellow’s
1501		abilities based on specific criteria, guided by the
1502		Milestones. ^(Core)
1503		
1504	VI.A.2.d).(2)	Faculty members functioning as supervising
1505		physicians must delegate portions of care to fellows
1506		based on the needs of the patient and the skills of
1507		each fellow. ^(Core)
1508		
1509	VI.A.2.d).(3)	Fellows should serve in a supervisory role to junior
1510		fellows and residents in recognition of their progress
1511		toward independence, based on the needs of each
1512		patient and the skills of the individual resident or
1513		fellow. ^(Detail)
1514		
1515	VI.A.2.e)	Programs must set guidelines for circumstances and events
1516		in which fellows must communicate with the supervising
1517		faculty member(s). ^(Core)
1518		
1519	VI.A.2.e).(1)	Each fellow must know the limits of their scope of
1520		authority, and the circumstances under which the
1521		fellow is permitted to act with conditional
1522		independence. ^(Outcome)
1523		

<p>Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.</p>

1524		
1525	VI.A.2.f)	Faculty supervision assignments must be of sufficient
1526		duration to assess the knowledge and skills of each fellow
1527		and to delegate to the fellow the appropriate level of patient
1528		care authority and responsibility. ^(Core)
1529		

- 1530 **VI.B. Professionalism**
- 1531
- 1532 **VI.B.1. Programs, in partnership with their Sponsoring Institutions, must**
- 1533 **educate fellows and faculty members concerning the professional**
- 1534 **responsibilities of physicians, including their obligation to be**
- 1535 **appropriately rested and fit to provide the care required by their**
- 1536 **patients. ^(Core)**
- 1537
- 1538 **VI.B.2. The learning objectives of the program must:**
- 1539
- 1540 **VI.B.2.a) be accomplished through an appropriate blend of supervised**
- 1541 **patient care responsibilities, clinical teaching, and didactic**
- 1542 **educational events; ^(Core)**
- 1543
- 1544 **VI.B.2.b) be accomplished without excessive reliance on fellows to**
- 1545 **fulfill non-physician obligations; and, ^(Core)**
- 1546

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

- 1547
- 1548 **VI.B.2.c) ensure manageable patient care responsibilities. ^(Core)**
- 1549

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

- 1550
- 1551 **VI.B.3. The program director, in partnership with the Sponsoring Institution,**
- 1552 **must provide a culture of professionalism that supports patient**
- 1553 **safety and personal responsibility. ^(Core)**
- 1554
- 1555 **VI.B.4. Fellows and faculty members must demonstrate an understanding**
- 1556 **of their personal role in the:**
- 1557
- 1558 **VI.B.4.a) provision of patient- and family-centered care; ^(Outcome)**
- 1559
- 1560 **VI.B.4.b) safety and welfare of patients entrusted to their care,**
- 1561 **including the ability to report unsafe conditions and adverse**
- 1562 **events; ^(Outcome)**

1563

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

1564

1565

1566

VI.B.4.c) assurance of their fitness for work, including: (Outcome)

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

1567

1568

1569

1570

VI.B.4.c).(1) management of their time before, during, and after clinical assignments; and, (Outcome)

1571

1572

1573

1574

VI.B.4.c).(2) recognition of impairment, including from illness, fatigue, and substance use, in themselves, their peers, and other members of the health care team. (Outcome)

1575

1576

VI.B.4.d) commitment to lifelong learning; (Outcome)

1577

1578

1579

VI.B.4.e) monitoring of their patient care performance improvement indicators; and, (Outcome)

1580

1581

1582

VI.B.4.f) accurate reporting of clinical and educational work hours, patient outcomes, and clinical experience data. (Outcome)

1583

1584

1585

1586

1587

1588

VI.B.5. All fellows and faculty members must demonstrate responsiveness to patient needs that supersedes self-interest. This includes the recognition that under certain circumstances, the best interests of the patient may be served by transitioning that patient's care to another qualified and rested provider. (Outcome)

1589

1590

1591

1592

1593

1594

VI.B.6. Programs, in partnership with their Sponsoring Institutions, must provide a professional, equitable, respectful, and civil environment that is free from discrimination, sexual and other forms of harassment, mistreatment, abuse, or coercion of students, fellows, faculty, and staff. (Core)

1595

1596

1597

1598

1599

VI.B.7. Programs, in partnership with their Sponsoring Institutions, should have a process for education of fellows and faculty regarding unprofessional behavior and a confidential process for reporting, investigating, and addressing such concerns. (Core)

1600

1601

1602

1603

VI.C. Well-Being

Psychological, emotional, and physical well-being are critical in the development of the competent, caring, and resilient physician and require

1604 *proactive attention to life inside and outside of medicine. Well-being*
1605 *requires that physicians retain the joy in medicine while managing their*
1606 *own real-life stresses. Self-care and responsibility to support other*
1607 *members of the health care team are important components of*
1608 *professionalism; they are also skills that must be modeled, learned, and*
1609 *nurtured in the context of other aspects of fellowship training.*

1611 *Fellows and faculty members are at risk for burnout and depression.*
1612 *Programs, in partnership with their Sponsoring Institutions, have the same*
1613 *responsibility to address well-being as other aspects of resident*
1614 *competence. Physicians and all members of the health care team share*
1615 *responsibility for the well-being of each other. For example, a culture which*
1616 *encourages covering for colleagues after an illness without the expectation*
1617 *of reciprocity reflects the ideal of professionalism. A positive culture in a*
1618 *clinical learning environment models constructive behaviors, and prepares*
1619 *fellows with the skills and attitudes needed to thrive throughout their*
1620 *careers.*

1621

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website: www.acgme.org/physicianwellbeing.

The ACGME also created a repository for well-being materials, assessments, presentations, and more on the [Well-Being Tools and Resources page](#) in Learn at ACGME for programs seeking to develop or strengthen their own well-being initiatives. There are many activities that programs can implement now to assess and support physician well-being. These include the distribution and analysis of culture of safety surveys, ensuring the availability of counseling services, and paying attention to the safety of the entire health care team.

- 1622
- 1623 **VI.C.1.** **The responsibility of the program, in partnership with the**
1624 **Sponsoring Institution, to address well-being must include:**
- 1625
- 1626 **VI.C.1.a)** **efforts to enhance the meaning that each fellow finds in the**
1627 **experience of being a physician, including protecting time**
1628 **with patients, minimizing non-physician obligations,**
1629 **providing administrative support, promoting progressive**
1630 **autonomy and flexibility, and enhancing professional**
1631 **relationships;** ^(Core)
- 1632
- 1633 **VI.C.1.b)** **attention to scheduling, work intensity, and work**
1634 **compression that impacts fellow well-being;** ^(Core)
- 1635
- 1636 **VI.C.1.c)** **evaluating workplace safety data and addressing the safety of**
1637 **fellows and faculty members;** ^(Core)
- 1638

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

1639
1640
1641
1642

VI.C.1.d) policies and programs that encourage optimal fellow and faculty member well-being; and, (Core)

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

1643
1644
1645
1646
1647
1648

VI.C.1.d).(1) Fellows must be given the opportunity to attend medical, mental health, and dental care appointments, including those scheduled during their working hours. (Core)

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

VI.C.1.e) attention to fellow and faculty member burnout, depression, and substance use disorder. The program, in partnership with its Sponsoring Institution, must educate faculty members and fellows in identification of the symptoms of burnout, depression, and substance use disorder, including means to assist those who experience these conditions. Fellows and faculty members must also be educated to recognize those symptoms in themselves and how to seek appropriate care. The program, in partnership with its Sponsoring Institution, must: (Core)

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance use disorder. Materials and more information are available in Learn at ACGME (<https://dl.acgme.org/pages/well-being-tools-resources>).

VI.C.1.e).(1) encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another fellow, resident, or faculty member may be displaying signs of burnout, depression, a substance use disorder, suicidal ideation, or potential for violence (Core)

Background and Intent: Individuals experiencing burnout, depression, substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

- 1670
1671 VI.C.1.e).(2) provide access to appropriate tools for self-screening;
1672 and, (Core)
1673
1674 VI.C.1.e).(3) provide access to confidential, affordable mental
1675 health assessment, counseling, and treatment,
1676 including access to urgent and emergent care 24
1677 hours a day, seven days a week. (Core)
1678

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

- 1679
1680 VI.C.2. There are circumstances in which fellows may be unable to attend
1681 work, including but not limited to fatigue, illness, family
1682 emergencies, and parental leave. Each program must allow an
1683 appropriate length of absence for fellows unable to perform their
1684 patient care responsibilities. (Core)
1685
1686 VI.C.2.a) The program must have policies and procedures in place to
1687 ensure coverage of patient care. (Core)
1688
1689 VI.C.2.b) These policies must be implemented without fear of negative
1690 consequences for the fellow who is or was unable to provide
1691 the clinical work. (Core)
1692

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

- 1693
1694 **VI.D. Fatigue Mitigation**
1695
1696 **VI.D.1. Programs must:**
1697
1698 **VI.D.1.a) educate all faculty members and fellows to recognize the**
1699 **signs of fatigue and sleep deprivation; ^(Core)**
1700
1701 **VI.D.1.b) educate all faculty members and fellows in alertness**
1702 **management and fatigue mitigation processes; and, ^(Core)**
1703
1704 **VI.D.1.c) encourage fellows to use fatigue mitigation processes to**
1705 **manage the potential negative effects of fatigue on patient**
1706 **care and learning. ^(Detail)**
1707

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

- 1708
1709 **VI.D.2. Each program must ensure continuity of patient care, consistent**
1710 **with the program’s policies and procedures referenced in VI.C.2–**
1711 **VI.C.2.b), in the event that a fellow may be unable to perform their**
1712 **patient care responsibilities due to excessive fatigue. ^(Core)**
1713
1714 **VI.D.3. The program, in partnership with its Sponsoring Institution, must**
1715 **ensure adequate sleep facilities and safe transportation options for**
1716 **fellows who may be too fatigued to safely return home. ^(Core)**

1719
1720 **VI.E.1. Clinical Responsibilities**
1721
1722 **The clinical responsibilities for each fellow must be based on PGY**
1723 **level, patient safety, fellow ability, severity and complexity of patient**
1724 **illness/condition, and available support services. ^(Core)**
1725

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty

members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

- VI.E.2. Teamwork**
- Fellows must care for patients in an environment that maximizes communication. This must include the opportunity to work as a member of effective interprofessional teams that are appropriate to the delivery of care in the subspecialty and larger health system.
(Core)
- VI.E.3. Transitions of Care**
- VI.E.3.a)** Programs must design clinical assignments to optimize transitions in patient care, including their safety, frequency, and structure. (Core)
- VI.E.3.b)** Programs, in partnership with their Sponsoring Institutions, must ensure and monitor effective, structured hand-over processes to facilitate both continuity of care and patient safety. (Core)
- VI.E.3.c)** Programs must ensure that fellows are competent in communicating with team members in the hand-over process. (Outcome)
- VI.E.3.d)** Programs and clinical sites must maintain and communicate schedules of attending physicians and fellows currently responsible for care. (Core)
- VI.E.3.e)** Each program must ensure continuity of patient care, consistent with the program’s policies and procedures referenced in VI.C.2-VI.C.2.b), in the event that a fellow may be unable to perform their patient care responsibilities due to excessive fatigue or illness, or family emergency. (Core)
- VI.F. Clinical Experience and Education**
- Programs, in partnership with their Sponsoring Institutions, must design an effective program structure that is configured to provide fellows with educational and clinical experience opportunities, as well as reasonable opportunities for rest and personal activities.*

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been

made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

1774

VI.F.1. Maximum Hours of Clinical and Educational Work per Week

Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting. ^(Core)

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the

following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

- VI.F.2. Mandatory Time Free of Clinical Work and Education**
- VI.F.2.a)** The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. ^(Core)
- VI.F.2.b)** Fellows should have eight hours off between scheduled clinical work and education periods. ^(Detail)
- VI.F.2.b).(1)** There may be circumstances when fellows choose to stay to care for their patients or return to the hospital with fewer than eight hours free of clinical experience and education. This must occur within the context of the 80-hour and the one-day-off-in-seven requirements. ^(Detail)

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1793
1794 VI.F.2.c) Fellows must have at least 14 hours free of clinical work and
1795 education after 24 hours of in-house call. (Core)
1796

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1797
1798 VI.F.2.d) Fellows must be scheduled for a minimum of one day in
1799 seven free of clinical work and required education (when
1800 averaged over four weeks). At-home call cannot be assigned
1801 on these free days. (Core)
1802

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

1803
1804 VI.F.3. Maximum Clinical Work and Education Period Length
1805

1806 VI.F.3.a) Clinical and educational work periods for fellows must not
1807 exceed 24 hours of continuous scheduled clinical
1808 assignments. (Core)
1809

1810 VI.F.3.a).(1) Up to four hours of additional time may be used for
1811 activities related to patient safety, such as providing
1812 effective transitions of care, and/or fellow education.
1813 (Core)
1814

1815 VI.F.3.a).(1).(a) Additional patient care responsibilities must not
1816 be assigned to a fellow during this time. (Core)
1817

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

1818
1819 VI.F.4. Clinical and Educational Work Hour Exceptions

- 1820
1821 **VI.F.4.a)** In rare circumstances, after handing off all other
1822 responsibilities, a fellow, on their own initiative, may elect to
1823 remain or return to the clinical site in the following
1824 circumstances:
1825
- 1826 **VI.F.4.a).(1)** to continue to provide care to a single severely ill or
1827 unstable patient; ^(Detail)
1828
- 1829 **VI.F.4.a).(2)** humanistic attention to the needs of a patient or
1830 family; or, ^(Detail)
1831
- 1832 **VI.F.4.a).(3)** to attend unique educational events. ^(Detail)
1833
- 1834 **VI.F.4.b)** These additional hours of care or education will be counted
1835 toward the 80-hour weekly limit. ^(Detail)
1836

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

- 1837
1838 **VI.F.4.c)** A Review Committee may grant rotation-specific exceptions
1839 for up to 10 percent or a maximum of 88 clinical and
1840 educational work hours to individual programs based on a
1841 sound educational rationale.
1842
- 1843 The Review Committee for Internal Medicine will not consider
1844 requests for exceptions to the 80-hour limit to the fellows' work
1845 week.
1846
- 1847 **VI.F.5. Moonlighting**
- 1848
- 1849 **VI.F.5.a)** Moonlighting must not interfere with the ability of the fellow
1850 to achieve the goals and objectives of the educational
1851 program, and must not interfere with the fellow's fitness for
1852 work nor compromise patient safety. ^(Core)
1853
- 1854 **VI.F.5.b)** Time spent by fellows in internal and external moonlighting
1855 (as defined in the ACGME Glossary of Terms) must be
1856 counted toward the 80-hour maximum weekly limit. ^(Core)
1857

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

1858
1859 **VI.F.6. In-House Night Float**
1860
1861 **Night float must occur within the context of the 80-hour and one-**
1862 **day-off-in-seven requirements. (Core)**
1863

Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

1864
1865 **VI.F.7. Maximum In-House On-Call Frequency**
1866
1867 **Fellows must be scheduled for in-house call no more frequently than**
1868 **every third night (when averaged over a four-week period). (Core)**
1869

1870 VI.F.7.a) Internal Medicine fellowships must not average in-house call over
1871 a four-week period. (Core)

1872
1873 **VI.F.8. At-Home Call**

1874
1875 **VI.F.8.a) Time spent on patient care activities by fellows on at-home**
1876 **call must count toward the 80-hour maximum weekly limit.**
1877 **The frequency of at-home call is not subject to the every-**
1878 **third-night limitation, but must satisfy the requirement for one**
1879 **day in seven free of clinical work and education, when**
1880 **averaged over four weeks. (Core)**

1881
1882 **VI.F.8.a).(1) At-home call must not be so frequent or taxing as to**
1883 **preclude rest or reasonable personal time for each**
1884 **fellow. (Core)**

1885
1886 **VI.F.8.b) Fellows are permitted to return to the hospital while on at-**
1887 **home call to provide direct care for new or established**
1888 **patients. These hours of inpatient patient care must be**
1889 **included in the 80-hour maximum weekly limit. (Detail)**
1890

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
