48
49 Nephrology is the subspecialty of internal medicine that focuses on the diagnosis
50 and treatment of diseases of the kidney. Nephrology fellowships provide
51 advanced education to allow a fellow to acquire competency in the subspecialty
52 with sufficient expertise to act as an independent consultant.
53

54 **Int.C. Length of Educational Program**

55
56 The educational program in nephrology must be 24 months in length. (Core)*
57

58 **I. Oversight**

59
60 **I.A. Sponsoring Institution**

61
62 *The Sponsoring Institution is the organization or entity that assumes the*
63 *ultimate financial and academic responsibility for a program of graduate*
64 *medical education consistent with the ACGME Institutional Requirements.*
65

66 *When the Sponsoring Institution is not a rotation site for the program, the*
67 *most commonly utilized site of clinical activity for the program is the*
68 *primary clinical site.*
69

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

70
71 **I.A.1. The program must be sponsored by one ACGME-accredited**
72 **Sponsoring Institution. (Core)**
73

74 **I.B. Participating Sites**

75
76 *A participating site is an organization providing educational experiences or*
77 *educational assignments/rotations for fellows.*
78

79 **I.B.1. The program, with approval of its Sponsoring Institution, must**
80 **designate a primary clinical site. (Core)**
81

82 **I.B.1.a)** The nephrology fellowship must function as an integral part of an
83 ACGME-accredited program in internal medicine. (Core)

84
85 **I.B.1.b)** The sponsoring institution must establish the nephrology
86 fellowship within a department of internal medicine or an
87 administrative unit whose primary mission is the advancement of
88 internal medicine subspecialty education and patient care. (Detail)†
89

- 90 I.B.1.c) The Sponsoring Institution must ensure that there is a reporting
91 relationship with the program director of the parent internal
92 medicine residency program to ensure compliance with ACGME
93 accreditation requirements. ^(Core)
94
- 95 **I.B.2. There must be a program letter of agreement (PLA) between the
96 program and each participating site that governs the relationship
97 between the program and the participating site providing a required
98 assignment. ^(Core)**
99
- 100 **I.B.2.a) The PLA must:**
- 101
- 102 **I.B.2.a).(1) be renewed at least every 10 years; and, ^(Core)**
103
- 104 **I.B.2.a).(2) be approved by the designated institutional official
105 (DIO). ^(Core)**
106
- 107 **I.B.3. The program must monitor the clinical learning and working
108 environment at all participating sites. ^(Core)**
109
- 110 **I.B.3.a) At each participating site there must be one faculty member,
111 designated by the program director, who is accountable for
112 fellow education for that site, in collaboration with the
113 program director. ^(Core)**
114

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- **Identifying the faculty members who will assume educational and supervisory responsibility for fellows**
- **Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows**
- **Specifying the duration and content of the educational experience**
- **Stating the policies and procedures that will govern fellow education during the assignment**

- 115
- 116 **I.B.4. The program director must submit any additions or deletions of
117 participating sites routinely providing an educational experience,
118 required for all fellows, of one month full time equivalent (FTE) or
119 more through the ACGME's Accreditation Data System (ADS). ^(Core)**

120
121 **I.C. The program, in partnership with its Sponsoring Institution, must engage in**
122 **practices that focus on mission-driven, ongoing, systematic recruitment**
123 **and retention of a diverse and inclusive workforce of residents (if present),**
124 **fellows, faculty members, senior administrative staff members, and other**
125 **relevant members of its academic community.** ^(Core)
126

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

127
128 **I.D. Resources**

129
130 **I.D.1. The program, in partnership with its Sponsoring Institution, must**
131 **ensure the availability of adequate resources for fellow education.**
132 ^(Core)

133
134 I.D.1.a) Space and Equipment

135
136 There must be space and equipment for the program, including
137 meeting rooms, examination rooms, computers, visual and other
138 educational aids, and work/study space. ^(Core)

139
140 I.D.1.b) Facilities

141
142 I.D.1.b).(1) Inpatient and outpatient systems must be in place to
143 prevent fellows from performing routine clerical functions,
144 such as scheduling tests and appointments, and retrieving
145 records and letters. ^(Detail)

146
147 I.D.1.b).(2) The sponsoring institution must provide the broad range of
148 facilities and clinical support services required to provide
149 comprehensive care of adult patients. ^(Core)

150
151 I.D.1.b).(3) Fellows must have access to a lounge facility during
152 assigned duty hours. ^(Detail)

153
154 I.D.1.b).(4) When fellows are in the hospital, assigned night duty, or
155 called in from home, they must be provided with a secure
156 space for their belongings. ^(Detail)

157
158 I.D.1.c) Laboratory Services

159
160 I.D.1.c).(1) The following must be available at the primary clinical site
161 or at participating sites:

162
163 I.D.1.c).(1).(a) biochemistry and serologic laboratories; and, ^(Core)
164

- 165 I.D.1.c).(1).(b) imaging services, including ultrasound,
 166 computerized tomography, magnetic resonance
 167 imaging, and a diagnostic radionuclide laboratory.
 168 (Core)
 169
 170 I.D.1.d) Other Support Services
 171
 172 I.D.1.d).(1) There must be surgical and pathological support available
 173 for the modern practice of nephrology, including an active
 174 renal transplant service. (Core)
 175
 176 I.D.1.d).(2) Surgery for vascular and peritoneal dialysis access must
 177 be available. (Core)
 178
 179 I.D.1.d).(3) The primary clinical site must be approved to perform renal
 180 transplantation, or must have a formal written agreement
 181 with such an institution, ensuring that nephrology fellows
 182 receive the requisite experience with renal transplantation.
 183 (Core)
 184
 185 I.D.1.d).(4) Electron and immunofluorescence microscopy, and other
 186 special studies for the preparation and evaluation of renal
 187 biopsy material must be available. (Core)
 188
 189 I.D.1.d).(5) The program must provide acute and chronic
 190 hemodialysis, continuous renal replacement therapy,
 191 peritoneal dialysis, and renal biopsy. (Core)
 192
 193 I.D.1.e) Medical Records
 194
 195 Access to an electronic health record should be provided. In the
 196 absence of an existing electronic health record, institutions must
 197 demonstrate institutional commitment to its development and
 198 progress toward its implementation. (Core)
 199
 200 **I.D.2. The program, in partnership with its Sponsoring Institution, must**
 201 **ensure healthy and safe learning and working environments that**
 202 **promote fellow well-being and provide for:** (Core)
 203
 204 **I.D.2.a) access to food while on duty;** (Core)
 205
 206 **I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available**
 207 **and accessible for fellows with proximity appropriate for safe**
 208 **patient care;** (Core)
 209

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be

stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

210
211
212
213
214

- I.D.2.c) clean and private facilities for lactation that have refrigeration capabilities, with proximity appropriate for safe patient care; (Core)

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

243
244
245
246
247
248
249

- I.D.2.d) security and safety measures appropriate to the participating site; and, (Core)

- I.D.2.e) accommodations for fellows with disabilities consistent with the Sponsoring Institution's policy. (Core)

- I.D.3. Fellows must have ready access to subspecialty-specific and other appropriate reference material in print or electronic format. This must include access to electronic medical literature databases with full text capabilities. (Core)

- I.D.4. The program's educational and clinical resources must be adequate to support the number of fellows appointed to the program. (Core)

- I.D.4.a) Patient Population

- I.D.4.a).(1) The patient population must have a variety of clinical problems and stages of diseases. (Core)

- I.D.4.a).(1).(a) The program should be of sufficient size to ensure fellows' adequate exposure to patients with acute kidney injury, and chronic dialysis both hemodialysis and peritoneal dialysis including patients who utilize home dialysis treatment modalities, in order to ensure adequate education and experience in chronic dialysis. (Detail)

- I.D.4.a).(2) There must be patients of each gender, with a broad age range, including geriatric patients. (Core)

- I.D.4.a).(3) A sufficient number of patients must be available to enable each fellow to achieve the required educational outcomes. (Core)

250 I.D.4.a).(3).(a) Each fellow must see at least 10 new renal
251 transplant patients during the course of his or her
252 fellowship. ^(Detail)
253

254 I.E. ***A fellowship program usually occurs in the context of many learners and
255 other care providers and limited clinical resources. It should be structured
256 to optimize education for all learners present.***
257

258 I.E.1. **Fellows should contribute to the education of residents in core
259 programs, if present. ^(Core)**
260

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

261 II. **Personnel**
262

263 II.A. **Program Director**
264

265 II.A.1. **There must be one faculty member appointed as program director
266 with authority and accountability for the overall program, including
267 compliance with all applicable program requirements. ^(Core)**
268

269 II.A.1.a) **The Sponsoring Institution's Graduate Medical Education
270 Committee (GMEC) must approve a change in program
271 director. ^(Core)**
272

273 II.A.1.b) **Final approval of the program director resides with the
274 Review Committee. ^(Core)**
275
276

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual's responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director's nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

277 II.A.2. **The program director must be provided with support adequate for
278 administration of the program based upon its size and configuration.
279 ^(Core)**
280

281 II.A.2.a) **At a minimum, the program director must be provided with the
282 salary support required to devote 25-50 percent FTE of non-
283 clinical time to the administration of the program. ^(Detail)**
284
285

Background and Intent: Twenty five percent FTE is defined as one and one quarter (1.25) days per week.

“Administrative time” is defined as non-clinical time spent meeting the responsibilities of the program director as detailed in requirements II.A.4.-II.A.4.a).(16).

The requirement does not address the source of funding required to provide the specified salary support.

314
315
316
317

II.A.3. Qualifications of the program director:

II.A.3.a) must include subspecialty expertise and qualifications acceptable to the Review Committee; and, (Core)

II.A.3.a).(1) The program director must have administrative experience and at least ~~five~~ three years of participation as an active faculty member in an ACGME-accredited internal medicine residency or nephrology fellowship. (Detail Core)

II.A.3.b) must include current certification in the subspecialty for which they are the program director by the American Board of Internal Medicine (ABIM) or by the American Osteopathic Board of Internal Medicine, or subspecialty qualifications that are acceptable to the Review Committee. (Core)

II.A.3.b).(1) The Review Committee only accepts current ABIM or AOBIM certification in nephrology. (Core)

II.A.4. Program Director Responsibilities

The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and promotion of fellows, and disciplinary action; supervision of fellows; and fellow education in the context of patient care. (Core)

II.A.4.a) The program director must:

II.A.4.a).(1) be a role model of professionalism; (Core)

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

318
319
320

II.A.4.a).(2) design and conduct the program in a fashion consistent with the needs of the community, the

321
322
323

mission(s) of the Sponsoring Institution, and the mission(s) of the program; ^(Core)

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

324
325
326
327
328

II.A.4.a).(3) administer and maintain a learning environment conducive to educating the fellows in each of the ACGME Competency domains; ^(Core)

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

329
330
331

333
334
335
336
337
338
339
340
341
342
343
344
345
346

II.A.4.a).(4) develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the fellowship program education and at least annually thereafter, as outlined in V.B.; ^(Core)

II.A.4.a).(5) have the authority to approve program faculty members for participation in the fellowship program education at all sites; ^(Core)

II.A.4.a).(6) have the authority to remove program faculty members from participation in the fellowship program education at all sites; ^(Core)

II.A.4.a).(7) have the authority to remove fellows from supervising interactions and/or learning environments that do not meet the standards of the program; ^(Core)

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

347
348
349
350

II.A.4.a).(8) submit accurate and complete information required and requested by the DIO, GMEC, and ACGME; ^(Core)

- 351 **II.A.4.a).(9)** provide applicants who are offered an interview with
 352 information related to the applicant's eligibility for the
 353 relevant subspecialty board examination(s); ^(Core)
 354
 355 **II.A.4.a).(10)** provide a learning and working environment in which
 356 fellows have the opportunity to raise concerns and
 357 provide feedback in a confidential manner as
 358 appropriate, without fear of intimidation or retaliation;
 359 ^(Core)
 360
 361 **II.A.4.a).(11)** ensure the program's compliance with the Sponsoring
 362 Institution's policies and procedures related to
 363 grievances and due process; ^(Core)
 364
 365 **II.A.4.a).(12)** ensure the program's compliance with the Sponsoring
 366 Institution's policies and procedures for due process
 367 when action is taken to suspend or dismiss, not to
 368 promote, or not to renew the appointment of a fellow;
 369 ^(Core)
 370

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

- 371
 372 **II.A.4.a).(13)** ensure the program's compliance with the Sponsoring
 373 Institution's policies and procedures on employment
 374 and non-discrimination; ^(Core)
 375
 376 **II.A.4.a).(13).(a)** Fellows must not be required to sign a non-
 377 competition guarantee or restrictive covenant.
 378 ^(Core)
 379
 380 **II.A.4.a).(14)** document verification of program completion for all
 381 graduating fellows within 30 days; ^(Core)
 382
 383 **II.A.4.a).(15)** provide verification of an individual fellow's
 384 completion upon the fellow's request, within 30 days;
 385 and, ^(Core)
 386

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

- 387
 388 **II.A.4.a).(16)** obtain review and approval of the Sponsoring
 389 Institution's DIO before submitting information or
 390 requests to the ACGME, as required in the Institutional
 391 Requirements and outlined in the ACGME Program

Director's Guide to the Common Program Requirements. ^(Core)

II.B. Faculty

Faculty members are a foundational element of graduate medical education – faculty members teach fellows how to care for patients. Faculty members provide an important bridge allowing fellows to grow and become practice ready, ensuring that patients receive the highest quality of care. They are role models for future generations of physicians by demonstrating compassion, commitment to excellence in teaching and patient care, professionalism, and a dedication to lifelong learning. Faculty members experience the pride and joy of fostering the growth and development of future colleagues. The care they provide is enhanced by the opportunity to teach. By employing a scholarly approach to patient care, faculty members, through the graduate medical education system, improve the health of the individual and the population.

Faculty members ensure that patients receive the level of care expected from a specialist in the field. They recognize and respond to the needs of the patients, fellows, community, and institution. Faculty members provide appropriate levels of supervision to promote patient safety. Faculty members create an effective learning environment by acting in a professional manner and attending to the well-being of the fellows and themselves.

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment or salary support.

II.B.1. For each participating site, there must be a sufficient number of faculty members with competence to instruct and supervise all fellows at that location. ^(Core)

II.B.2. Faculty members must:

II.B.2.a) be role models of professionalism; ^(Core)

II.B.2.b) demonstrate commitment to the delivery of safe, quality, cost-effective, patient-centered care; ^(Core)

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

II.B.2.c) demonstrate a strong interest in the education of fellows; ^(Core)

II.B.2.d) devote sufficient time to the educational program to fulfill their supervisory and teaching responsibilities; ^(Core)

- 435
436 **II.B.2.e)** administer and maintain an educational environment
437 conducive to educating fellows; ^(Core)
438
439 **II.B.2.f)** regularly participate in organized clinical discussions,
440 rounds, journal clubs, and conferences; and, ^(Core)
441
442 **II.B.2.g)** pursue faculty development designed to enhance their skills
443 at least annually. ^(Core)
444

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

- 445
446 **II.B.3. Faculty Qualifications**
447
448 **II.B.3.a)** Faculty members must have appropriate qualifications in
449 their field and hold appropriate institutional appointments.
450 ^(Core)
451
452 **II.B.3.b)** Subspecialty physician faculty members must:
453
454 **II.B.3.b).(1)** have current certification in the subspecialty by the
455 **American Board of Internal Medicine or the American**
456 **Osteopathic Board of Internal Medicine, or possess**
457 **qualifications judged acceptable to the Review**
458 **Committee.** ^(Core)
459
460 **II.B.3.c)** Any non-physician faculty members who participate in
461 fellowship program education must be approved by the
462 program director. ^(Core)
463

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

- 464
465 **II.B.3.d)** Any other specialty physician faculty members must have
466 current certification in their specialty by the appropriate

II.B.4. Core Faculty

Core faculty members must have a significant role in the education and supervision of fellows and must devote a significant portion of their entire effort to fellow education and/or administration, and must, as a component of their activities, teach, evaluate, and provide formative feedback to fellows. ^(Core)

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.

II.B.4.a) Core faculty members must be designated by the program director. ^(Core)

II.B.4.b) Core faculty members must complete the annual ACGME Faculty Survey. ^(Core)

II.B.4.c) In addition to the program director, there must be at least two core faculty members certified in nephrology by the ABIM or the AOBIM. ^(Core)

II.B.4.d) For programs approved for more than four fellows, there must be at least one core faculty member certified in nephrology by the ABIM or the AOBIM for every 1.5 fellows. ^(Core)

II.C. Program Coordinator

II.C.1. There must be a program coordinator. ^(Core)

II.C.2. The program coordinator must be provided with support adequate for administration of the program based upon its size and configuration. ^(Core)

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge of the ACGME and Program Requirements, policies, and procedures. Program

coordinators assist the program director in accreditation efforts, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

506
507
508
509

II.D. Other Program Personnel

The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. ^(Core)

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

II.D.1. There must be services available from other health care professionals, including dietitians, language interpreters, nurses, occupational therapists, physical therapists, and social workers. ^(Detail)

II.D.2. There must be a close working relationship with dietary and/or nutrition services and social services, as well as with specialists in diagnostic radiology, general surgery, obstetrics and gynecology, pathology, psychiatry, and urology. ^(Detail)

II.D.3. There must be appropriate and timely consultation from other specialties. ^(Detail)

III. Fellow Appointments

III.A. Eligibility Criteria

III.A.1. Eligibility Requirements – Fellowship Programs

All required clinical education for entry into ACGME-accredited fellowship programs must be completed in an ACGME-accredited residency program, an AOA-approved residency program, a program with ACGME International (ACGME-I) Advanced Specialty Accreditation, or a Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of Canada (CFPC)-accredited residency program located in Canada. ^(Core)

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

538
539 **III.A.1.a)** **Fellowship programs must receive verification of each**
540 **entering fellow’s level of competence in the required field,**
541 **upon matriculation, using ACGME, ACGME-I, or CanMEDS**
542 **Milestones evaluations from the core residency program.** ^(Core)
543
544 **III.A.1.b)** **Prior to appointment in the fellowship, fellows should have**
545 **completed an internal medicine program that satisfies the**
546 **requirements in III.A.1.** ^(Core)
547
548 **III.A.1.b).(1)** **Fellows who did not complete an internal medicine**
549 **program that satisfies the requirements in III.A.1. must**

579 **Foreign Medical Graduates (ECFMG)**
580 **certification.** ^(Core)
581
582 **III.A.1.c).(2)** **Applicants accepted through this exception must have**
583 **an evaluation of their performance by the Clinical**
584 **Competency Committee within 12 weeks of**
585 **matriculation.** ^(Core)
586

<p>Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United</p>

States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

III.B. The program director must not appoint more fellows than approved by the Review Committee. *(Core)*

III.B.1. All complement increases must be approved by the Review Committee. *(Core)*

III.B.2. The number of available fellow positions in the program must be at least one per year. *(Detail)*

III.C. Fellow Transfers

The program must obtain verification of previous educational experiences and a summative competency-based performance evaluation prior to acceptance of a transferring fellow, and Milestones evaluations upon matriculation. *(Core)*

IV. Educational Program

The ACGME accreditation system is designed to encourage excellence and innovation in graduate medical education regardless of the organizational affiliation, size, or location of the program.

The educational program must support the development of knowledgeable, skillful physicians who provide compassionate care.

In addition, the program is expected to define its specific program aims consistent with the overall mission of its Sponsoring Institution, the needs of the community it serves and that its graduates will serve, and the distinctive capabilities of physicians it intends to graduate. While programs must demonstrate substantial compliance with the Common and subspecialty-specific Program Requirements, it is recognized that within this framework, programs may place different emphasis on research, leadership, public health, etc. It is expected that the program aims will reflect the nuanced program-specific goals for it and its graduates; for example, it is expected that a program aiming to prepare physician-scientists will have a different curriculum from one focusing on community health.

624 **IV.A.** The curriculum must contain the following educational components: ^(Core)

625
626 **IV.A.1.** a set of program aims consistent with the Sponsoring Institution's
627 mission, the needs of the community it serves, and the desired
628 distinctive capabilities of its graduates; ^(Core)

629
630 **IV.A.1.a)** The program's aims must be made available to program
631 applicants, fellows, and faculty members. ^(Core)

632
633 **IV.A.2.** competency-based goals and objectives for each educational
634 experience designed to promote progress on a trajectory to
635 autonomous practice in their subspecialty. These must be
636 distributed, reviewed, and available to fellows and faculty members;
637 ^(Core)

638
639 **IV.A.3.** delineation of fellow responsibilities for patient care, progressive
640 responsibility for patient management, and graded supervision in
641 their subspecialty; ^(Core)

642
Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

643
644 **IV.A.4.** structured educational activities beyond direct patient care; and,
645 ^(Core)

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

647
648 **IV.A.5.** advancement of fellows' knowledge of ethical principles
649 foundational to medical professionalism. ^(Core)

650
651 **IV.B.** **ACGME Competencies**

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

653

654 **IV.B.1. The program must integrate the following ACGME Competencies**
655 **into the curriculum:** ^(Core)

656
657 **IV.B.1.a) Professionalism**
658
659 **Fellows must demonstrate a commitment to professionalism**
660 **and an adherence to ethical principles.** ^(Core)
661

662 **IV.B.1.b) Patient Care and Procedural Skills**
663

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs*. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

664
665 **IV.B.1.b).(1) Fellows must be able to provide patient care that is**
666 **compassionate, appropriate, and effective for the**
667 **treatment of health problems and the promotion of**
668 **health.** ^(Core)
669

670 **IV.B.1.b).(1).(a)** Fellows must demonstrate competence in the
671 practice of health promotion, disease prevention,
672 diagnosis, care, and treatment of men and women
673 from adolescence to old age, during health and all
674 stages of illness; ^(Core)
675

676 **IV.B.1.b).(1).(b)** Fellows must demonstrate competence in the
677 evaluation and management of:

678
679 **IV.B.1.b).(1).(b).(i)** acute kidney injury; ^(Core)

680
681 **IV.B.1.b).(1).(b).(ii)** chronic kidney disease; ^(Core)

682
683 **IV.B.1.b).(1).(b).(iii)** disorders of fluid, electrolyte, and acid-base
684 regulation; ^(Core)

685
686 **IV.B.1.b).(1).(b).(iv)** disorders of mineral metabolism, including
687 nephrolithiasis and renal osteodystrophy;
688 ^(Core)

689

866

867 **IV.B.1.d)**

Practice-based Learning and Improvement

868
869 **Fellows must demonstrate the ability to investigate and**
870 **evaluate their care of patients, to appraise and assimilate**
871 **scientific evidence, and to continuously improve patient care**
872 **based on constant self-evaluation and lifelong learning.** ^(Core)
873

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

874
875 **IV.B.1.e)**

Interpersonal and Communication Skills

876
877 **Fellows must demonstrate interpersonal and communication**
878 **skills that result in the effective exchange of information and**
879 **collaboration with patients, their families, and health**
880 **professionals.** ^(Core)

881
882 **IV.B.1.f)**

Systems-based Practice

883
884 **Fellows must demonstrate an awareness of and**
885 **responsiveness to the larger context and system of health**
886 **care, including the social determinants of health, as well as**
887 **the ability to call effectively on other resources to provide**
888 **optimal health care.** ^(Core)
889

- 890 **IV.C. Curriculum Organization and Fellow Experiences**
- 891
- 892 **IV.C.1. The curriculum must be structured to optimize fellow educational**
- 893 **experiences, the length of these experiences, and supervisory**
- 894 **continuity.** ^(Core)
- 895
- 896 IV.C.1.a) Assignment of rotations must be structured to minimize the
- 897 frequency of rotational transitions, and rotations must be of
- 898 sufficient length to provide a quality educational experience,
- 899 defined by continuity of patient care, ongoing supervision,
- 900 longitudinal relationships with faculty members, and meaningful
- 901 assessment and feedback. ^(Core)
- 902
- 903 IV.C.1.b) Clinical experiences should be structured to facilitate learning in a
- 904 manner that allows fellows to function as part of an effective
- 905 interprofessional team that works together towards the shared
- 906 goals of patient safety and quality improvement. ^(Core)
- 907
- 908 **IV.C.2. The program must provide instruction and experience in pain**
- 909 **management if applicable for the subspecialty, including recognition**
- 910 **of the signs of addiction.** ^(Core)
- 911
- 912 IV.C.3. A minimum of 12 months must be devoted to clinical experience. ^(Core)
- 913
- 914 IV.C.3.a) Fellows should have at least four months of experience with
- 915 dialysis therapies, both hemodialysis and peritoneal dialysis. ^(Detail)
- 916
- 917 IV.C.3.b) Fellows must have at least two months of clinical experience on
- 918 an active renal transplant service. ^(Detail)
- 919
- 920 IV.C.4. Fellows must participate in training using simulation. ^(Detail)
- 921
- 922 IV.C.5. Experience with Continuity Ambulatory Patients
- 923
- 924 IV.C.5.a) Fellows must have continuity ambulatory clinic experience that
- 925 exposes them to the breadth and depth of the subspecialty. ^(Core)
- 926
- 927 IV.C.5.b) This experience should average one half-day each week. ^(Detail)
- 928
- 929 IV.C.5.c) This experience must include an appropriate distribution of
- 930 patients of each gender and a diversity of ages, ^(Core)
- 931
- 932 This should be accomplished through either:
- 933
- 934 IV.C.5.c).(1) a continuity clinic which provides fellows the opportunity to
- 935 learn the course of disease; or, ^(Detail)
- 936
- 937 IV.C.5.c).(2) selected blocks of at least six months which address
- 938 specific areas of nephrology. ^(Detail)
- 939
- 940 IV.C.5.d) Each fellow should, on average, be responsible for four to eight

- 941 patients during each half-day session. ^(Detail)
- 942
- 943 IV.C.5.e) The continuing ambulatory patient care experience should not be
944 interrupted by more than one month, excluding a fellow's vacation.
945 ^(Detail)
- 946
- 947 IV.C.5.f) Fellows should be informed of the status of their continuity
948 patients when such patients are hospitalized, as clinically
949 appropriate. ^(Detail)
- 950
- 951 IV.C.6. Clinical experience must include supervised involvement in dialysis
952 therapy, including: ^(Core)
- 953
- 954 IV.C.6.a) assessment of hemodialysis and peritoneal dialysis efficiency;
955 ^(Detail)
- 956
- 957 IV.C.6.b) the complications of hemodialysis and peritoneal dialysis; ^(Detail)
- 958
- 959 IV.C.6.c) determining special nutritional requirements of patients
960 undergoing hemodialysis and peritoneal dialysis; ^(Detail)
- 961
- 962 IV.C.6.d) end-of-life care and pain management for patients undergoing
963 chronic hemodialysis and peritoneal dialysis; ^(Detail)
- 964
- 965 IV.C.6.e) evaluation of end-stage renal disease patients for peritoneal
966 dialysis and hemodialysis, and their instruction regarding these
967 treatment options; ^(Detail)
- 968
- 969 IV.C.6.f) evaluation and management of medical complications in patients
970 during and between hemodialysis and peritoneal dialyses; ^(Detail)
- 971
- 972 IV.C.6.g) evaluation and selection of patients for acute hemodialysis or
973 continuous renal replacement therapies; ^(Detail)
- 974
- 975 IV.C.6.h) long-term follow-up of patients undergoing chronic hemodialysis
976 and peritoneal dialysis; ^(Detail)

- 978 IV.C.6.i) modification of drug dosage during hemodialysis and peritoneal
979 dialysis; and, ^(Detail)
- 980
- 981 IV.C.6.j) writing a hemodialysis and peritoneal dialysis prescription and
982 how to assess dialysis adequacy. ^(Detail)
- 983
- 984 IV.C.7. Clinical experience must include supervised involvement in pre- and post-
985 transplant care, including: ^(Core)
- 986
- 987 IV.C.7.a) clinical and laboratory diagnosis of all forms of rejection; ^(Detail)
- 988
- 989 IV.C.7.b) evaluation and selection of transplant candidates; ^(Detail)
- 990
- 991 IV.C.7.c) immediate postoperative management of transplant recipients,

992		including administration of immunosuppressants to a minimum of
993		10 new renal transplant recipients; ^(Detail)
994		
995	IV.C.7.d)	management in the ambulatory setting for at least three months of
996		at least 20 patients per fellow; ^(Detail)
997		
998	IV.C.7.e)	management in the intensive care unit setting for patients with
999		renal disorder; ^(Detail)
1000		
1001	IV.C.7.f)	medical management of rejection, including use of
1002		immunosuppressive drugs and other agents; ^(Detail)
1003		
1004	IV.C.7.g)	preoperative evaluation and preparation of transplant recipients
1005		and donors; ^(Detail)
1006		
1007	IV.C.7.h)	psychosocial and ethical issues of renal transplantation; and, ^(Detail)
1008		
1009	IV.C.7.i)	recognition and medical management of the surgical and
1010		nonsurgical complications of transplantations. ^(Detail)
1011		
1012	IV.C.8.	Procedures and Technical Skills
1013		
1014	IV.C.8.a)	Direct supervision of procedures performed by each fellow must
1015		occur until proficiency has been acquired and documented by the
1016		program director. ^(Core)
1017		
1018	IV.C.8.b)	Faculty members must teach and supervise the fellows in the
1019		performance and interpretation of procedures, which must be
1020		documented in each fellow's record, including indications,
1021		outcomes, diagnoses, and supervisor(s). ^(Core)
1022		
1023	IV.C.8.c)	Fellows must have formal instruction regarding indications for and
1024		in interpretation of the results of:
1025		
1026	IV.C.8.c).(1)	balloon angioplasty of vascular access and other
1027		procedures utilized in the maintenance of chronic vascular
1028		access patency; ^(Core)
1029		
1030	IV.C.8.c).(2)	management of peritoneal catheters; ^(Core)
1031		
1032	IV.C.8.c).(3)	radiology of vascular access; ^(Core)
1033		
1034	IV.C.8.c).(4)	renal imaging; and ^(Core)
1035		
1036	IV.C.8.c).(5)	therapeutic plasmapheresis. ^(Core)
1037		
1038	IV.C.8.d)	Fellows must have experience in the role of a nephrology
1039		consultant in both the inpatient and outpatient settings. ^(Core)
1040		
1041	IV.C.9.	The core curriculum must include a didactic program based upon the core
1042		knowledge content in the subspecialty area. ^(Core)

- 1043
 1044 IV.C.9.a) The program must afford each fellow an opportunity to review
 1045 topics covered in conferences that he or she was unable to attend.
 1046 (Detail)
 1047
 1048 IV.C.9.b) Fellows must participate in clinical case conferences, journal
 1049 clubs, research conference, and morbidity and mortality or quality
 1050 improvement conferences. (Detail)
 1051
 1052 IV.C.9.c) All core conferences must have at least one faculty member
 1053 present, and must be scheduled as to ensure peer-peer and peer-
 1054 faculty interaction. (Detail)
 1055
 1056 IV.C.10. Patient-based teaching must include direct interaction between fellows
 1057 and faculty members, bedside teaching, discussion of pathophysiology,
 1058 and the use of current evidence in diagnostic and therapeutic decisions.
 1059 (Core)
 1060
 1061 The teaching must be:
 1062
 1063 IV.C.10.a) formally conducted on all inpatient, outpatient, and consultative
 1064 services; and, (Detail)
 1065
 1066 IV.C.10.b) conducted with a frequency and duration that ensures a
 1067 meaningful and continuous teaching relationship between the
 1068 assigned supervising faculty member(s) and fellows. (Detail)
 1069
 1070 IV.C.11. Fellows must receive instruction in practice management relevant to
 1071 nephrology. (Detail)
 1072
 1073 **IV.D. Scholarship**
 1074
 1075 ***Medicine is both an art and a science. The physician is a humanistic***
 1076 ***scientist who cares for patients. This requires the ability to think critically,***
 1077 ***evaluate the literature, appropriately assimilate new knowledge, and***
 1078 ***practice lifelong learning. The program and faculty must create an***
 1079 ***environment that fosters the acquisition of such skills through fellow***
 1080 ***participation in scholarly activities as defined in the subspecialty-specific***
 1081 ***Program Requirements. Scholarly activities may include discovery,***
 1082 ***integration, application, and teaching.***
 1083
 1084 ***The ACGME recognizes the diversity of fellowships and anticipates that***
 1085 ***programs prepare physicians for a variety of roles, including clinicians,***
 1086 ***scientists, and educators. It is expected that the program's scholarship will***
 1087 ***reflect its mission(s) and aims, and the needs of the community it serves.***
 1088 ***For example, some programs may concentrate their scholarly activity on***
 1089 ***quality improvement, population health, and/or teaching, while other***
 1090 ***programs might choose to utilize more classic forms of biomedical***
 1091 ***research as the focus for scholarship.***
 1092
 1093 **IV.D.1. Program Responsibilities**

- 1094
1095 **IV.D.1.a)** **The program must demonstrate evidence of scholarly**
1096 **activities, consistent with its mission(s) and aims. (Core)**
1097
1098 **IV.D.1.b)** **The program in partnership with its Sponsoring Institution,**
1099 **must allocate adequate resources to facilitate fellow and**
1100 **faculty involvement in scholarly activities. (Core)**
1101
1102 **IV.D.2.** **Faculty Scholarly Activity**
1103
1104 **IV.D.2.a)** **Among their scholarly activity, programs must demonstrate**
1105 **accomplishments in at least three of the following domains:**
1106 **(Core)**
1107
1108 • **Research in basic science, education, translational**
1109 **science, patient care, or population health**
1110 • **Peer-reviewed grants**
1111 • **Quality improvement and/or patient safety initiatives**
1112 • **Systematic reviews, meta-analyses, review articles,**
1113 **chapters in medical textbooks, or case reports**
1114 • **Creation of curricula, evaluation tools, didactic**
1115 **educational activities, or electronic educational**
1116 **materials**
1117 • **Contribution to professional committees, educational**
1118 **organizations, or editorial boards**
1119 • **Innovations in education**
1120
1121 **IV.D.2.b)** **The program must demonstrate dissemination of scholarly**
1122 **activity within and external to the program by the following**
1123 **methods:**
1124

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the fellows’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

- 1125
1126 **IV.D.2.b).(1)** **faculty participation in grand rounds, posters,**
1127 **workshops, quality improvement presentations,**
1128 **podium presentations, grant leadership, non-peer-**
1129 **reviewed print/electronic resources, articles or**
1130 **publications, book chapters, textbooks, webinars,**
1131 **service on professional committees, or serving as a**
1132 **journal reviewer, journal editorial board member, or**
1133 **editor. (Outcome)‡**
1134

1135 IV.D.2.b).(1).(a) At least 50 percent of the core faculty members
1136 who are certified in nephrology by the ABIM or
1137 AOBIM (see II.B.4.c.-d.) must annually engage in a
1138 variety of scholarly activities, as listed in
1139 IV.D.2.b).(1). ^(Core)
1140

1141 **IV.D.3. Fellow Scholarly Activity**

1142
1143 IV.D.3.a) While in the program, at least 50 percent of a program's fellows
1144 must engage in more than one of the following scholarly activities:
1145 participation in grand rounds; posters; workshops; quality
1146 improvement presentations; podium presentations; grant
1147 leadership; non-peer-reviewed print/electronic resources; articles
1148 or publications; book chapters; textbooks; webinars; service on
1149 professional committees; or serving as a journal reviewer, journal
1150 editorial board member, or editor. ^(Outcome)
1151

1152 IV.D.3.b) ~~The majority of fellows must demonstrate evidence of scholarship~~
1153 ~~conducted during the fellowship.~~ ^(Outcome)

1154
1155 This should be achieved through one or more of the following:

1156
1157 IV.D.3.b).(1) ~~publication of articles, book chapters, abstracts, or case~~
1158 ~~reports in peer-reviewed journals;~~ ^(Detail)

1159
1160 IV.D.3.b).(2) ~~publication of peer-reviewed performance improvement or~~
1161 ~~education research;~~ ^(Detail)

1162
1163 IV.D.3.b).(3) ~~peer-reviewed funding; or,~~ ^(Detail)

1164
1165 IV.D.3.b).(4) ~~peer-reviewed abstracts presented at regional, state, or~~
1166 ~~national specialty meetings.~~ ^(Detail)
1167

1168 **V. Evaluation**

1169
1170 **V.A. Fellow Evaluation**

1171
1172 **V.A.1. Feedback and Evaluation**
1173

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- **fellows identify their strengths and weaknesses and target areas that need work**

- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

1174		
1175	V.A.1.a)	Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. ^(Core)
1176		
1177		
1178		
1179	V.A.1.a).(1)	The faculty must discuss this evaluation with each fellow at the completion of each assignment. ^(Core)
1180		
1181		
1182	V.A.1.a).(2)	Assessment of procedural competence should include a formal evaluation process and not be based solely on a minimum number of procedures performed. ^(Detail)
1183		
1184		
1185		

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

1186		
1187	V.A.1.b)	Evaluation must be documented at the completion of the assignment. ^(Core)
1188		
1189		
1190	V.A.1.b).(1)	For block rotations of greater than three months in duration, evaluation must be documented at least every three months. ^(Core)
1191		
1192		
1193		
1194	V.A.1.b).(2)	Longitudinal experiences such as continuity clinic in the context of other clinical responsibilities must be evaluated at least every three months and at completion. ^(Core)
1195		
1196		
1197		
1198		
1199	V.A.1.c)	The program must provide an objective performance evaluation based on the Competencies and the subspecialty-specific Milestones, and must: ^(Core)
1200		
1201		
1202		

- 1203 V.A.1.c).(1) use multiple evaluators (e.g., faculty members, peers,
 1204 patients, self, and other professional staff members);
 1205 and, ^(Core)
 1206
 1207 V.A.1.c).(2) provide that information to the Clinical Competency
 1208 Committee for its synthesis of progressive fellow
 1209 performance and improvement toward unsupervised
 1210 practice. ^(Core)
 1211

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

- 1212
 1213 V.A.1.d) The program director or their designee, with input from the
 1214 Clinical Competency Committee, must:
 1215
 1216 V.A.1.d).(1) meet with and review with each fellow their
 1217 documented semi-annual evaluation of performance,
 1218 including progress along the subspecialty-specific
 1219 Milestones. ^(Core)
 1220
 1221 V.A.1.d).(2) assist fellows in developing individualized learning
 1222 plans to capitalize on their strengths and identify areas
 1223 for growth; and, ^(Core)
 1224
 1225 V.A.1.d).(3) develop plans for fellows failing to progress, following
 1226 institutional policies and procedures. ^(Core)
 1227

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow

progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

- 1228
1229 **V.A.1.e)** At least annually, there must be a summative evaluation of
1230 each fellow that includes their readiness to progress to the
1231 next year of the program, if applicable. ^(Core)
1232
- 1233 **V.A.1.f)** The evaluations of a fellow's performance must be accessible
1234 for review by the fellow. ^(Core)
1235
- 1236 **V.A.2.** Final Evaluation
1237
- 1238 **V.A.2.a)** The program director must provide a final evaluation for each
1239 fellow upon completion of the program. ^(Core)
1240
- 1241 **V.A.2.a).(1)** The subspecialty-specific Milestones, and when
1242 applicable the subspecialty-specific Case Logs, must
1243 be used as tools to ensure fellows are able to engage
1244 in autonomous practice upon completion of the
1245 program. ^(Core)
1246
- 1247 **V.A.2.a).(2)** The final evaluation must:
1248
- 1249 **V.A.2.a).(2).(a)** become part of the fellow's permanent record
1250 maintained by the institution, and must be
1251 accessible for review by the fellow in
1252 accordance with institutional policy; ^(Core)
1253
- 1254 **V.A.2.a).(2).(b)** verify that the fellow has demonstrated the
1255 knowledge, skills, and behaviors necessary to
1256 enter autonomous practice; ^(Core)
1257
- 1258 **V.A.2.a).(2).(c)** consider recommendations from the Clinical
1259 Competency Committee; and, ^(Core)
1260
- 1261 **V.A.2.a).(2).(d)** be shared with the fellow upon completion of
1262 the program. ^(Core)
1263
- 1264 **V.A.3.** A Clinical Competency Committee must be appointed by the
1265 program director. ^(Core)
1266
- 1267 **V.A.3.a)** At a minimum the Clinical Competency Committee must
1268 include three members, at least one of whom is a core faculty
1269 member. Members must be faculty members from the same
1270 program or other programs, or other health professionals
1271 who have extensive contact and experience with the
1272 program's fellows. ^(Core)
1273
- 1274 **V.A.3.b)** The Clinical Competency Committee must:
1275

- 1276 **V.A.3.b).(1)** review all fellow evaluations at least semi-annually;
1277 (Core)
- 1278
- 1279 **V.A.3.b).(2)** determine each fellow’s progress on achievement of
1280 the subspecialty-specific Milestones; and, (Core)
- 1281
- 1282 **V.A.3.b).(3)** meet prior to the fellows’ semi-annual evaluations and
1283 advise the program director regarding each fellow’s
1284 progress. (Core)
- 1285
- 1286 **V.B. Faculty Evaluation**
- 1287
- 1288 **V.B.1.** The program must have a process to evaluate each faculty
1289 member’s performance as it relates to the educational program at
1290 least annually. (Core)
- 1291

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program’s faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 1292
- 1293 **V.B.1.a)** This evaluation must include a review of the faculty member’s
1294 clinical teaching abilities, engagement with the educational
1295 program, participation in faculty development related to their
1296 skills as an educator, clinical performance, professionalism,
1297 and scholarly activities. (Core)
- 1298
- 1299 **V.B.1.b)** This evaluation must include written, confidential evaluations
1300 by the fellows. (Core)
- 1301
- 1302 **V.B.2.** Faculty members must receive feedback on their evaluations at least
1303 annually. (Core)
- 1304
- 1305 **V.B.3.** Results of the faculty educational evaluations should be
1306 incorporated into program-wide faculty development plans. (Core)
- 1307

Background and Intent: The quality of the faculty’s teaching and clinical care is a determinant of the quality of the program and the quality of the fellows’ future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members’ teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program’s faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

- 1308
1309 **V.C. Program Evaluation and Improvement**
1310
1311 **V.C.1. The program director must appoint the Program Evaluation**
1312 **Committee to conduct and document the Annual Program**
1313 **Evaluation as part of the program’s continuous improvement**
1314 **process. (Core)**
1315
1316 **V.C.1.a) The Program Evaluation Committee must be composed of at**
1317 **least two program faculty members, at least one of whom is a**
1318 **core faculty member, and at least one fellow. (Core)**
1319
1320 **V.C.1.b) Program Evaluation Committee responsibilities must include:**
1321
1322 **V.C.1.b).(1) acting as an advisor to the program director, through**
1323 **program oversight; (Core)**
1324
1325 **V.C.1.b).(2) review of the program’s self-determined goals and**
1326 **progress toward meeting them; (Core)**
1327
1328 **V.C.1.b).(3) guiding ongoing program improvement, including**
1329 **development of new goals, based upon outcomes;**
1330 **and, (Core)**
1331
1332 **V.C.1.b).(4) review of the current operating environment to identify**
1333 **strengths, challenges, opportunities, and threats as**
1334 **related to the program’s mission and aims. (Core)**
1335

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program’s progress toward achievement of its goals and aims.

- 1336
1337 **V.C.1.c) The Program Evaluation Committee should consider the**
1338 **following elements in its assessment of the program:**
1339
1340 **V.C.1.c).(1) curriculum; (Core)**
1341
1342 **V.C.1.c).(2) outcomes from prior Annual Program Evaluation(s);**
1343 **(Core)**
1344
1345 **V.C.1.c).(3) ACGME letters of notification, including citations,**
1346 **Areas for Improvement, and comments; (Core)**

1384		
1385	V.C.1.d)	The Program Evaluation Committee must evaluate the
1386		program’s mission and aims, strengths, areas for
1387		improvement, and threats. ^(Core)
1388		
1389	V.C.1.e)	The annual review, including the action plan, must:
1390		
1391	V.C.1.e).(1)	be distributed to and discussed with the members of
1392		the teaching faculty and the fellows; and, ^(Core)
1393		
1394	V.C.1.e).(2)	be submitted to the DIO. ^(Core)
1395		
1396	V.C.2.	The program must participate in a Self-Study prior to its 10-Year
1397		Accreditation Site Visit. ^(Core)

1398
1399
1400
1401

V.C.2.a) **A summary of the Self-Study must be submitted to the DIO.**
(Core)

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

1402
1403
1404

1406
1407
1408
1409
1410
1411

V.C.3. *One goal of ACGME-accredited education is to educate physicians who seek and achieve board certification. One measure of the effectiveness of the educational program is the ultimate pass rate.*

The program director should encourage all eligible program graduates to take the certifying examination offered by the applicable American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board.

1412
1413
1414
1415
1416
1417
1418

V.C.3.a) For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) an annual written exam, in the preceding three years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)

1419
1420
1421
1422
1423
1424
1425

V.C.3.b) For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial written exam, in the preceding six years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)

1426
1427
1428
1429
1430
1431
1432

V.C.3.c) For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) an annual oral exam, in the preceding three years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)

1433
1434
1435
1436

V.C.3.d) For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial oral exam, in the preceding six years, the program's aggregate pass rate of those taking the examination for the first time must be higher

1437 than the bottom fifth percentile of programs in that
1438 subspecialty. ^(Outcome)
1439
1440 V.C.3.e) For each of the exams referenced in V.C.3.a)-d), any program
1441 whose graduates over the time period specified in the
1442 requirement have achieved an 80 percent pass rate will have
1443 met this requirement, no matter the percentile rank of the
1444 program for pass rate in that subspecialty. ^(Outcome)
1445

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

1446
1447 V.C.3.f) Programs must report, in ADS, board certification status
1448 annually for the cohort of board-eligible fellows that
1449 graduated seven years earlier. ^(Core)
1450

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

1451
1452 VI. The Learning and Working Environment
1453

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

- ***Excellence in the safety and quality of care rendered to patients by fellows today***
- ***Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice***

1463
1464
1465
1466
1467
1468
1469
1470
1471
1472

- ***Excellence in professionalism through faculty modeling of:***
 - ***the effacement of self-interest in a humanistic environment that supports the professional development of physicians***
 - ***the joy of curiosity, problem-solving, intellectual rigor, and discovery***
- ***Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team***

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program’s accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an

1490 *active role in system improvement processes. Graduating fellows*
1491 *will apply these skills to critique their future unsupervised practice*
1492 *and effect quality improvement measures.*

1493
1494 *It is necessary for fellows and faculty members to consistently work*
1495 *in a well-coordinated manner with other health care professionals to*
1496 *achieve organizational patient safety goals.*

1497
1498 **VI.A.1.a) Patient Safety**

1499
1500 **VI.A.1.a).(1) Culture of Safety**

1501
1502 *A culture of safety requires continuous identification*
1503 *of vulnerabilities and a willingness to transparently*
1504 *deal with them. An effective organization has formal*
1505 *mechanisms to assess the knowledge, skills, and*
1506 *attitudes of its personnel toward safety in order to*
1507 *identify areas for improvement.*

1508
1509 **VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows**
1510 **must actively participate in patient safety**
1511 **systems and contribute to a culture of safety.**
1512 **(Core)**

1513
1514 **VI.A.1.a).(1).(b) The program must have a structure that**
1515 **promotes safe, interprofessional, team-based**
1516 **care. (Core)**

1517
1518 **VI.A.1.a).(2) Education on Patient Safety**

1519
1520 **Programs must provide formal educational activities**
1521 **that promote patient safety-related goals, tools, and**
1522 **techniques. (Core)**

1523

Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.

1524
1525 **VI.A.1.a).(3) Patient Safety Events**

1526
1527 *Reporting, investigation, and follow-up of adverse*
1528 *events, near misses, and unsafe conditions are pivotal*
1529 *mechanisms for improving patient safety, and are*
1530 *essential for the success of any patient safety*
1531 *program. Feedback and experiential learning are*
1532 *essential to developing true competence in the ability*
1533 *to identify causes and institute sustainable systems-*
1534 *based changes to ameliorate patient safety*
1535 *vulnerabilities.*

1536
1537 **VI.A.1.a).(3).(a) Residents, fellows, faculty members, and other**
1538 **clinical staff members must:**

1539		
1540	VI.A.1.a).(3).(a).(i)	know their responsibilities in reporting patient safety events at the clinical site;
1541		(Core)
1542		
1543		
1544	VI.A.1.a).(3).(a).(ii)	know how to report patient safety events, including near misses, at the clinical site; and,
1545		(Core)
1546		
1547		
1548	VI.A.1.a).(3).(a).(iii)	be provided with summary information of their institution's patient safety reports.
1549		(Core)
1550		
1551		
1552	VI.A.1.a).(3).(b)	Fellows must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions.
1553		(Core)
1554		
1555		
1556		
1557		
1558		
1559	VI.A.1.a).(4)	Fellow Education and Experience in Disclosure of Adverse Events
1560		
1561		
1562		<i>Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for fellows to develop and apply.</i>
1563		
1564		
1565		
1566		
1567		
1568	VI.A.1.a).(4).(a)	All fellows must receive training in how to disclose adverse events to patients and families.
1569		(Core)
1570		
1571		
1572	VI.A.1.a).(4).(b)	Fellows should have the opportunity to participate in the disclosure of patient safety events, real or simulated.
1573		(Detail)†
1574		
1575		
1576	VI.A.1.b)	Quality Improvement
1577		
1578	VI.A.1.b).(1)	Education in Quality Improvement
1579		
1580		<i>A cohesive model of health care includes quality-related goals, tools, and techniques that are necessary in order for health care professionals to achieve quality improvement goals.</i>
1581		
1582		
1583		
1584		
1585	VI.A.1.b).(1).(a)	Fellows must receive training and experience in quality improvement processes, including an understanding of health care disparities.
1586		(Core)
1587		
1588		
1589	VI.A.1.b).(2)	Quality Metrics

1590		
1591		<i>Access to data is essential to prioritizing activities for</i>
1592		<i>care improvement and evaluating success of</i>
1593		<i>improvement efforts.</i>
1594		
1595	VI.A.1.b).(2).(a)	Fellows and faculty members must receive data
1596		on quality metrics and benchmarks related to
1597		their patient populations. ^(Core)
1598		
1599	VI.A.1.b).(3)	Engagement in Quality Improvement Activities
1600		
1601		<i>Experiential learning is essential to developing the</i>
1602		<i>ability to identify and institute sustainable systems-</i>
1603		<i>based changes to improve patient care.</i>
1604		
1605	VI.A.1.b).(3).(a)	Fellows must have the opportunity to
1606		participate in interprofessional quality
1607		improvement activities. ^(Core)
1608		
1609	VI.A.1.b).(3).(a).(i)	This should include activities aimed at
1610		reducing health care disparities. ^(Detail)
1611		
1612	VI.A.2.	Supervision and Accountability
1613		
1614	VI.A.2.a)	<i>Although the attending physician is ultimately responsible for</i>
1615		<i>the care of the patient, every physician shares in the</i>
1616		<i>responsibility and accountability for their efforts in the</i>
1617		<i>provision of care. Effective programs, in partnership with</i>
1618		<i>their Sponsoring Institutions, define, widely communicate,</i>
1619		<i>and monitor a structured chain of responsibility and</i>
1620		<i>accountability as it relates to the supervision of all patient</i>
1621		<i>care.</i>
1622		
1623		<i>Supervision in the setting of graduate medical education</i>
1624		<i>provides safe and effective care to patients; ensures each</i>
1625		<i>fellow’s development of the skills, knowledge, and attitudes</i>
1626		<i>required to enter the unsupervised practice of medicine; and</i>
1627		<i>establishes a foundation for continued professional growth.</i>
1628		
1629	VI.A.2.a).(1)	Each patient must have an identifiable and
1630		appropriately-credentialed and privileged attending
1631		physician (or licensed independent practitioner as
1632		specified by the applicable Review Committee) who is
1633		responsible and accountable for the patient’s care.
1634		^(Core)
1635		
1636	VI.A.2.a).(1).(a)	This information must be available to fellows,
1637		faculty members, other members of the health
1638		care team, and patients. ^(Core)
1639		

1640 VI.A.2.a).(1).(b) Fellows and faculty members must inform each
1641 patient of their respective roles in that patient's
1642 care when providing direct patient care. ^(Core)
1643

1644 VI.A.2.b) *Supervision may be exercised through a variety of methods.*
1645 *For many aspects of patient care, the supervising physician*
1646 *may be a more advanced fellow. Other portions of care*
1647 *provided by the fellow can be adequately supervised by the*
1648 *appropriate availability of the supervising faculty member or*
1649 *fellow, either on site or by means of telecommunication*
1650 *technology. Some activities require the physical presence of*
1651 *the supervising faculty member. In some circumstances,*
1652 *supervision may include post-hoc review of fellow-delivered*
1653 *care with feedback.*
1654

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

1655
1656 VI.A.2.b).(1) The program must demonstrate that the appropriate
1657 level of supervision in place for all fellows is based on
1658 each fellow's level of training and ability, as well as
1659 patient complexity and acuity. Supervision may be
1660 exercised through a variety of methods, as appropriate
1661 to the situation. ^(Core)
1662

1663 VI.A.2.b).(2) The program must define when physical presence of a
1664 supervising physician is required. ^(Core)
1665

1666 VI.A.2.c) Levels of Supervision
1667

1668 To promote appropriate fellow supervision while providing
1669 for graded authority and responsibility, the program must use
1670 the following classification of supervision: ^(Core)
1671

1672 VI.A.2.c).(1) Direct Supervision:

1673
1674 VI.A.2.c).(1).(a) the supervising physician is physically present
1675 with the fellow during the key portions of the
1676 patient interaction; or, ^(Core)
1677

1678 VI.A.2.c).(1).(b) the supervising physician and/or patient is not
1679 physically present with the fellow and the
1680 supervising physician is concurrently

1681 monitoring the patient care through appropriate
1682 telecommunication technology. ^(Core)
1683
1684 **VI.A.2.c).(2)** Indirect Supervision: the supervising physician is not
1685 providing physical or concurrent visual or audio
1686 supervision but is immediately available to the fellow
1687 for guidance and is available to provide appropriate
1688 direct supervision. ^(Core)
1689
1690 **VI.A.2.c).(3)** Oversight – the supervising physician is available to
1691 provide review of procedures/encounters with
1692 feedback provided after care is delivered. ^(Core)
1693
1694 **VI.A.2.d)** The privilege of progressive authority and responsibility,
1695 conditional independence, and a supervisory role in patient
1696 care delegated to each fellow must be assigned by the
1697 program director and faculty members. ^(Core)
1698
1699 **VI.A.2.d).(1)** The program director must evaluate each fellow’s
1700 abilities based on specific criteria, guided by the
1701 Milestones. ^(Core)
1702
1703 **VI.A.2.d).(2)** Faculty members functioning as supervising
1704 physicians must delegate portions of care to fellows
1705 based on the needs of the patient and the skills of
1706 each fellow. ^(Core)
1707
1708 **VI.A.2.d).(3)** Fellows should serve in a supervisory role to junior
1709 fellows and residents in recognition of their progress
1710 toward independence, based on the needs of each
1711 patient and the skills of the individual resident or
1712 fellow. ^(Detail)
1713
1714 **VI.A.2.e)** Programs must set guidelines for circumstances and events
1715 in which fellows must communicate with the supervising
1716 faculty member(s). ^(Core)
1717
1718 **VI.A.2.e).(1)** Each fellow must know the limits of their scope of
1719 authority, and the circumstances under which the
1720 fellow is permitted to act with conditional
1721 independence. ^(Outcome)
1722

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

1723
1724 **VI.A.2.f)** Faculty supervision assignments must be of sufficient
1725 duration to assess the knowledge and skills of each fellow
1726 and to delegate to the fellow the appropriate level of patient
1727 care authority and responsibility. ^(Core)
1728

- 1729 **VI.B. Professionalism**
 1730
 1731 **VI.B.1. Programs, in partnership with their Sponsoring Institutions, must**
 1732 **educate fellows and faculty members concerning the professional**
 1733 **responsibilities of physicians, including their obligation to be**
 1734 **appropriately rested and fit to provide the care required by their**
 1735 **patients. ^(Core)**
 1736
 1737 **VI.B.2. The learning objectives of the program must:**
 1738
 1739 **VI.B.2.a) be accomplished through an appropriate blend of supervised**
 1740 **patient care responsibilities, clinical teaching, and didactic**
 1741 **educational events; ^(Core)**
 1742
 1743 **VI.B.2.b) be accomplished without excessive reliance on fellows to**
 1744 **fulfill non-physician obligations; and, ^(Core)**
 1745

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

- 1746
 1747 **VI.B.2.c) ensure manageable patient care responsibilities. ^(Core)**
 1748

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

- 1749
 1750 **VI.B.3. The program director, in partnership with the Sponsoring Institution,**
 1751 **must provide a culture of professionalism that supports patient**
 1752 **safety and personal responsibility. ^(Core)**
 1753
 1754 **VI.B.4. Fellows and faculty members must demonstrate an understanding**
 1755 **of their personal role in the:**
 1756
 1757 **VI.B.4.a) provision of patient- and family-centered care; ^(Outcome)**
 1758
 1759 **VI.B.4.b) safety and welfare of patients entrusted to their care,**
 1760 **including the ability to report unsafe conditions and adverse**
 1761 **events; ^(Outcome)**

1762

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

1763

1764

1765

VI.B.4.c) assurance of their fitness for work, including: (Outcome)

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

1766

1767

1820

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

1821

1822 **VI.C.1. The responsibility of the program, in partnership with the**
1823 **Sponsoring Institution, to address well-being must include:**

1824

VI.C.1.e).(1) encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another fellow, resident, or faculty member may be displaying signs of burnout, depression, a substance use disorder, suicidal ideation, or potential for violence; ^(Core)

Background and Intent: Individuals experiencing burnout, depression, substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

1902
1903 **VI.D.1.c) encourage fellows to use fatigue mitigation processes to**
1904 **manage the potential negative effects of fatigue on patient**
1905 **care and learning. ^(Detail)**
1906

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

1922 **level, patient safety, fellow ability, severity and complexity of patient**
1923 **illness/condition, and available support services. ^(Core)**
1924

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty

members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

1962 ***an effective program structure that is configured to provide fellows with***
1963 ***educational and clinical experience opportunities, as well as reasonable***
1964 ***opportunities for rest and personal activities.***
1965

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been

made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

VI.F.1. Maximum Hours of Clinical and Educational Work per Week

Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting. ^(Core)

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the

following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

- VI.F.2. Mandatory Time Free of Clinical Work and Education**
- VI.F.2.a)** The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. ^(Core)
- VI.F.2.b)** Fellows should have eight hours off between scheduled clinical work and education periods. ^(Detail)
- VI.F.2.b).(1)** There may be circumstances when fellows choose to stay to care for their patients or return to the hospital with fewer than eight hours free of clinical experience and education. This must occur within the context of the 80-hour and the one-day-off-in-seven requirements. ^(Detail)

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1992
1993 VI.F.2.c) Fellows must have at least 14 hours free of clinical work and
1994 education after 24 hours of in-house call. (Core)
1995

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1996
1997 VI.F.2.d) Fellows must be scheduled for a minimum of one day in
1998 seven free of clinical work and required education (when
1999 averaged over four weeks). At-home call cannot be assigned
2000 on these free days. (Core)
2001

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

2002
2003 VI.F.3. Maximum Clinical Work and Education Period Length
2004

2005 VI.F.3.a) Clinical and educational work periods for fellows must not
2006 exceed 24 hours of continuous scheduled clinical
2007 assignments. (Core)
2008

2009 VI.F.3.a).(1) Up to four hours of additional time may be used for
2010 activities related to patient safety, such as providing
2011 effective transitions of care, and/or fellow education.
2012 (Core)
2013

2014 VI.F.3.a).(1).(a) Additional patient care responsibilities must not
2015 be assigned to a fellow during this time. (Core)
2016

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

2017
2018 VI.F.4. Clinical and Educational Work Hour Exceptions

2019		
2020	VI.F.4.a)	In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:
2021		
2022		
2023		
2024		
2025	VI.F.4.a).(1)	to continue to provide care to a single severely ill or unstable patient; ^(Detail)
2026		
2027		
2028	VI.F.4.a).(2)	humanistic attention to the needs of a patient or family; or, ^(Detail)
2029		
2030		
2031	VI.F.4.a).(3)	to attend unique educational events. ^(Detail)
2032		
2033	VI.F.4.b)	These additional hours of care or education will be counted toward the 80-hour weekly limit. ^(Detail)
2034		
2035		

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

2036		
2037	VI.F.4.c)	A Review Committee may grant rotation-specific exceptions for up to 10 percent or a maximum of 88 clinical and educational work hours to individual programs based on a sound educational rationale.
2038		
2039		
2040		
2041		
2042		The Review Committee for Internal Medicine will not consider requests for exceptions to the 80-hour limit to the fellows' work week.
2043		
2044		
2045		
2046	VI.F.5.	Moonlighting
2047		
2048	VI.F.5.a)	Moonlighting must not interfere with the ability of the fellow to achieve the goals and objectives of the educational program, and must not interfere with the fellow's fitness for work nor compromise patient safety. ^(Core)
2049		
2050		
2051		
2052		
2053	VI.F.5.b)	Time spent by fellows in internal and external moonlighting (as defined in the ACGME Glossary of Terms) must be counted toward the 80-hour maximum weekly limit. ^(Core)
2054		
2055		
2056		

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

2089

VI.F.8.b) Fellows are permitted to return to the hospital while on at-home call to provide direct care for new or established patients. These hours of inpatient patient care must be included in the 80-hour maximum weekly limit. ^(Detail)

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
