1 **ACGME Program Requirements for Graduate Medical Education**
2 **in Hematology and Medical Oncology**

3
4 **Common Program Requirements (Fellowship) are in BOLD**
5

6 Where applicable, text in *italics* describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.
9

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

10 **Introduction**

11 **Int.A.** *Fellowship is advanced graduate medical education beyond a core residency program for physicians who desire to enter more specialized practice. Fellowship-trained physicians serve the public by providing subspecialty care, which may also include core medical care, acting as a community resource for expertise in their field, creating and integrating new knowledge into practice, and educating future generations of physicians. Graduate medical education values the strength that a diverse group of physicians brings to medical care.*

12
13 *Fellows who have completed residency are able to practice independently in their core specialty. The prior medical experience and expertise of fellows distinguish them from physicians entering into residency training. The fellow's care of patients within the subspecialty is undertaken with appropriate faculty supervision and conditional independence. Faculty members serve as role models of excellence, compassion, professionalism, and scholarship. The fellow develops deep medical knowledge, patient care skills, and expertise applicable to their focused area of practice. Fellowship is an intensive program of subspecialty clinical and didactic education that focuses on the multidisciplinary care of patients. Fellowship education is often physically, emotionally, and intellectually demanding, and occurs in a variety of clinical learning environments committed to graduate medical education and the well-being of patients, residents, fellows, faculty members, students, and all members of the health care team.*

14
15
16
17
18
19
20
21
22 *In addition to clinical education, many fellowship programs advance fellows' skills as physician-scientists. While the ability to create new knowledge within medicine is not exclusive to fellowship-educated physicians, the fellowship experience expands a physician's abilities to pursue hypothesis-driven scientific inquiry that results in contributions to the medical literature and patient care. Beyond the clinical subspecialty expertise achieved, fellows develop mentored relationships built on an infrastructure that promotes collaborative research.*

22 **Int.B. Definition of Subspecialty**

48
49 Hematology is the internal medicine subspecialty that focuses on the care of
50 patients with disorders of the blood and bone marrow and the lymphatic,
51 immunologic, hemostatic, and vascular systems. Medical oncology is the internal
52 medicine subspecialty that involves the diagnosis and management of benign
53 and malignant neoplasms.

54
55 **Int.C. Length of Educational Program**

56
57 The educational program in hematology and medical oncology must be 36
58 months in length. ^{(Core)*}

59
60 **I. Oversight**

61
62 **I.A. Sponsoring Institution**

63
64 ***The Sponsoring Institution is the organization or entity that assumes the***
65 ***ultimate financial and academic responsibility for a program of graduate***
66 ***medical education consistent with the ACGME Institutional Requirements.***

67
68 ***When the Sponsoring Institution is not a rotation site for the program, the***
69 ***most commonly utilized site of clinical activity for the program is the***
70 ***primary clinical site.***

71
72 **Background and Intent:** Participating sites will reflect the health care needs of the
73 community and the educational needs of the fellows. A wide variety of organizations
74 may provide a robust educational experience and, thus, Sponsoring Institutions and
75 participating sites may encompass inpatient and outpatient settings including, but not
76 limited to a university, a medical school, a teaching hospital, a nursing home, a
77 school of public health, a health department, a public health agency, an organized
78 health care delivery system, a medical examiner's office, an educational consortium, a
79 teaching health center, a physician group practice, federally qualified health center, or
80 an educational foundation.

81
82 **I.A.1. The program must be sponsored by one ACGME-accredited**
83 **Sponsoring Institution. ^(Core)**

84
85 **I.B. Participating Sites**

86
87 ***A participating site is an organization providing educational experiences or***
educational assignments/rotations for fellows.

88
89 **I.B.1. The program, with approval of its Sponsoring Institution, must**
designate a primary clinical site. ^(Core)

90
91 I.B.1.a) A hematology and medical oncology fellowship must function as
92 an integral part of an ACGME-accredited educational program in
93 internal medicine. ^(Core)

94
95 I.B.1.b) The Sponsoring Institution must establish the hematology and
96 medical oncology fellowship within a department of internal

medicine or an administrative unit with the primary mission to advance internal medicine subspecialty education and patient care. (Detail)†

I.B.1.c) The Sponsoring Institution must ensure that there is a reporting relationship with the program director of the internal medicine residency program to ensure compliance with ACGME accreditation requirements. (Core)

I.B.2. There must be a program letter of agreement (PLA) between the program and each participating site that governs the relationship between the program and the participating site providing a required assignment. (Core)

I.B.2.a) The PLA must:

I.B.2.a).(1) be renewed at least every 10 years; and, (Core)

I.B.2.a).(2) be approved by the designated institutional official (DIO). (Core)

I.B.3. The program must monitor the clinical learning and working environment at all participating sites. (Core)

I.B.3.a) At each participating site there must be one faculty member, designated by the program director, who is accountable for fellow education for that site, in collaboration with the program director. (Core)

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for fellows
 - Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows
 - Specifying the duration and content of the educational experience
 - Stating the policies and procedures that will govern fellow education during the assignment

- 120 **I.B.4.** **The program director must submit any additions or deletions of**
121 **participating sites routinely providing an educational experience,**
122 **required for all fellows, of one month full time equivalent (FTE) or**
123 **more through the ACGME's Accreditation Data System (ADS). ^(Core)**
124
- 125 **I.C.** **The program, in partnership with its Sponsoring Institution, must engage in**
126 **practices that focus on mission-driven, ongoing, systematic recruitment**
127 **and retention of a diverse and inclusive workforce of residents (if present),**
128 **fellows, faculty members, senior administrative staff members, and other**
129 **relevant members of its academic community. ^(Core)**
130

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

- 131
- 132 **I.D. Resources**
- 133
- 134 **I.D.1. The program, in partnership with its Sponsoring Institution, must**
135 **ensure the availability of adequate resources for fellow education.**
136 **^(Core)**
- 137
- 138 I.D.1.a) Space and Equipment
- 139
- 140 There must be space and equipment for the program, including
141 meeting rooms, examination rooms, computers, visual and other
142 educational aids, and work/study space. **^(Core)**
- 143
- 144 I.D.1.b) Facilities
- 145
- 146 I.D.1.b).(1) Inpatient and outpatient systems must be in place to
147 prevent fellows from performing routine clerical functions,
148 such as scheduling tests and appointments, and retrieving
149 records and letters. **^(Detail)**
- 150
- 151 I.D.1.b).(2) The sponsoring institution must provide the broad range of
152 facilities and clinical support services required to provide
153 comprehensive care of adult patients. **^(Core)**
- 154
- 155 I.D.1.b).(3) Fellows must have access to a lounge facility during
156 assigned duty hours. **^(Detail)**
- 157
- 158 I.D.1.b).(4) When fellows are in the hospital, assigned night duty, or
159 called in from home, they must be provided with a secure
160 space for their belongings. **^(Detail)**
- 161
- 162 I.D.1.b).(5) Radiation oncology facilities must be available. **^(Core)**
- 163
- 164 I.D.1.c) Laboratory and Imaging Services

- 165
166 I.D.1.c).(1) A hematology laboratory must be located at the primary
167 clinical site. ^(Core)
- 168
169 I.D.1.c).(2) Each of the following must be present at the primary
170 clinical or participating site(s):
- 171
172 I.D.1.c).(2).(a) specialized coagulation laboratory; ^(Core)
- 173
174 I.D.1.c).(2).(b) nuclear medicine imaging; ^(Core)
- 175
176 I.D.1.c).(2).(c) cross-sectional imaging, including coaxial
177 tomography (CT) and magnetic resonance imaging
178 (MRI); and, ^(Core)
- 179
180 I.D.1.c).(2).(d) positron emission tomography (PET) scan imaging.
181 ^(Core)
- 182
183 I.D.1.d) Other Support Services
- 184
185 There must be advanced pathology services, including:
- 186
187 I.D.1.d).(1) immunopathology; ^(Core)
- 188
189 I.D.1.d).(2) blood banking; and, ^(Core)
- 190
191 I.D.1.d).(3) transfusion and apheresis services. ^(Core)
- 192
193 I.D.1.e) Medical Records
- 194
195 Access to an electronic health record should be provided. In the
196 absence of an existing electronic health record, institutions must
197 demonstrate institutional commitment to its development, and
198 progress towards its implementation. ^(Core)
- 199
200 I.D.2. The program, in partnership with its Sponsoring Institution, must
201 ensure healthy and safe learning and working environments that
202 promote fellow well-being and provide for: ^(Core)
- 203
204 I.D.2.a) access to food while on duty; ^(Core)
- 205
206 I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available
207 and accessible for fellows with proximity appropriate for safe
208 patient care; ^(Core)

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be

stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

- I.D.2.c) clean and private facilities for lactation that have refrigeration capabilities, with proximity appropriate for safe patient care; (Core)**

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

- I.D.2.d) security and safety measures appropriate to the participating site; and, ^(Core)**

- I.D.2.e)** accommodations for fellows with disabilities consistent with the Sponsoring Institution's policy. (Core)

- I.D.3.** Fellows must have ready access to subspecialty-specific and other appropriate reference material in print or electronic format. This must include access to electronic medical literature databases with full text capabilities. (Core)

- I.D.4.** The program's educational and clinical resources must be adequate to support the number of fellows appointed to the program. (Core)

- #### I.D.4.a) Patient Population

- I.D.4.a).(1) The patient population must have a variety of clinical problems and stages of diseases. (Core)

- I.D.4.a).(2) There must be patients of each gender, with a broad age range, including geriatric patients. (Core)

- I.D.4.a).(3) A sufficient number of patients must be available to enable each fellow to achieve the required educational outcomes.
(Core)

- I.E.** *A fellowship program usually occurs in the context of many learners and other care providers and limited clinical resources. It should be structured to optimize education for all learners present.*

- I.E.1.** **Fellows should contribute to the education of residents in core programs, if present. (Core)**

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

249

250 **II. Personnel**

251

252 **II.A. Program Director**

253

254 **II.A.1.** There must be one faculty member appointed as program director
255 with authority and accountability for the overall program, including
256 compliance with all applicable program requirements. ^(Core)

257

258 **II.A.1.a)** The Sponsoring Institution's Graduate Medical Education
259 Committee (GMEC) must approve a change in program
260 director. ^(Core)

261

262 **II.A.1.b)** Final approval of the program director resides with the
263 Review Committee. ^(Core)

264

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and have overall responsibility for the program. The program director's nomination is reviewed and approved by the GMEC. Final approval of the program director resides with the applicable ACGME Review Committee.

265

266 **II.A.2.** The program director and, as applicable, the program's leadership
267 team, must be provided with support adequate for administration of
268 the program based upon its size and configuration. ^(Core)

269

270 II.A.2.a) At a minimum, the program director must be provided with the
271 salary support required to devote 20-50 percent FTE of non-
272 clinical time to the administration of the program. ^(Core)

273

274 At a minimum, the program director must be provided with the
275 dedicated time and support specified below for administration of
276 the program: ^(Core)

277

<u>Number of Approved Fellow Positions</u>	<u>Minimum Support Required (FTE)</u>
<u><7</u>	<u>.2</u>
<u>7-9</u>	<u>.25</u>
<u>10-12</u>	<u>.3</u>
<u>13-15</u>	<u>.35</u>
<u>16-18</u>	<u>.4</u>
<u>19-21</u>	<u>.45</u>
<u>>21</u>	<u>.5</u>

278
279 II.A.2.b)
280
281
282
283
284

Programs must appoint at least one of the subspecialty-certified core faculty members to be associate program director(s). The associate program directors(s) must be provided with support equal to a dedicated minimum time for administration of the program as follows: (Core)

<u>Number of Approved Fellow Positions</u>	<u>Minimum Support Required (FTE)</u>
<u><7</u>	<u>0</u>
<u>7-9</u>	<u>.13</u>
<u>10-12</u>	<u>.14</u>
<u>13-15</u>	<u>.15</u>
<u>16-18</u>	<u>.16</u>
<u>19-21</u>	<u>.17</u>
<u>22-24</u>	<u>.18</u>
<u>25-27</u>	<u>.24</u>
<u>28-30</u>	<u>.30</u>
<u>31-33</u>	<u>.36</u>
<u>34-36</u>	<u>.42</u>
<u>37-39</u>	<u>.48</u>
<u>40-42</u>	<u>.54</u>
<u>43-45</u>	<u>.60</u>
<u>46-48</u>	<u>.66</u>
<u>49-51</u>	<u>.72</u>
<u>52-54</u>	<u>.78</u>
<u>55-57</u>	<u>.84</u>
<u>58-60</u>	<u>.90</u>

285

Background and Intent: To achieve successful graduate medical education, individuals serving as education and administrative leaders of fellowship programs, as well as those significantly engaged in the education, supervision, evaluation, and mentoring of fellows, must have sufficient dedicated professional time to perform the vital activities required to sustain an accredited program.

The ultimate outcome of graduate medical education is excellence in fellow education and patient care.

The program director and, as applicable, the program leadership team, devote a portion of their professional effort to the oversight and management of the fellowship program, as defined in II.A.4.-II.A.4.a).(16). Both provision of support for the time required for the leadership effort and flexibility regarding how this support is provided are important. Programs, in partnership with their Sponsoring Institutions, may provide support for this time in a variety of ways. Examples of support may include, but are not limited to, salary support, supplemental compensation, educational value units, or relief of time from other professional duties.

Program directors and, as applicable, members of the program leadership team, who are new to the role may need to devote additional time to program oversight and

management initially as they learn and become proficient in administering the program. It is suggested that during this initial period the support described above be increased as needed.

286

Subspecialty-Specific Background and Intent: For instance, a program with an approved complement of 12 fellows is required to have at least 30 percent FTE support for the Program Director and at least 14 percent FTE support for the associate program director(s). Because an associate program director is also a core faculty member, the minimum dedicated time requirements for associate program directors are inclusive of core faculty activities. An additional 10 percent FTE for the core faculty position is not required. For example, if one core faculty member is named the associate program director for a 12-fellow program, the required minimum support for that position is 14 percent FTE. Further, the Review Committee allows the minimum required FTE support to be shared among multiple associate program directors, as delegated by and at the discretion of the program director.

287

II.A.3. Qualifications of the program director:

288

II.A.3.a) must include subspecialty expertise and qualifications acceptable to the Review Committee; and, ^(Core)

291

II.A.3.a).(1) The program director must have administrative experience and at least three years of participation as an active faculty member in an ACGME-accredited internal medicine residency or hematology or medical oncology fellowship. ^(Core)

297

II.A.3.b) must include current certification in the subspecialty for which they are the program director by the American Board of Internal Medicine (ABIM) or by the American Osteopathic Board of Internal Medicine (AOBIM), or subspecialty qualifications that are acceptable to the Review Committee. ^(Core)

304

II.A.3.b).(1) The Review Committee only accepts current ABIM or AOBIM certification in hematology or medical oncology. ^(Core)

308

II.A.3.b).(2) If the program director has ABIM or AOBIM certification in only one of the subspecialties, a faculty member certified by the ABIM or AOBIM in the other subspecialty must be appointed Associate Program Director, be responsible for the educational program in that second area, and assist the program director with the administrative and clinical oversight of the program. ^(Core)

316

II.A.4. Program Director Responsibilities

318

The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and

322 promotion of fellows, and disciplinary action; supervision of fellows;
323 and fellow education in the context of patient care. ^(Core)
324

325 II.A.4.a) The program director must:

326
327 II.A.4.a).(1) be a role model of professionalism; ^(Core)
328

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

329
330 II.A.4.a).(2) design and conduct the program in a fashion
331 consistent with the needs of the community, the
332 mission(s) of the Sponsoring Institution, and the
333 mission(s) of the program; ^(Core)
334

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

335
336 II.A.4.a).(3) administer and maintain a learning environment
337 conducive to educating the fellows in each of the
338 ACGME Competency domains; ^(Core)
339

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

340
341 II.A.4.a).(4) develop and oversee a process to evaluate candidates
342 prior to approval as program faculty members for
343 participation in the fellowship program education and
344 at least annually thereafter, as outlined in V.B.; ^(Core)
345

346 II.A.4.a).(5) have the authority to approve program faculty
347 members for participation in the fellowship program
348 education at all sites; ^(Core)
349

350 II.A.4.a).(6) have the authority to remove program faculty
351 members from participation in the fellowship program
352 education at all sites; ^(Core)

353
354 II.A.4.a).(7) have the authority to remove fellows from supervising
355 interactions and/or learning environments that do not
356 meet the standards of the program; ^(Core)
357

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

382
383 **II.A.4.a).(13)** ensure the program's compliance with the Sponsoring
384 Institution's policies and procedures on employment
385 and non-discrimination; ^(Core)
386
387 **II.A.4.a).(13).(a)** Fellows must not be required to sign a non-
388 competition guarantee or restrictive covenant.
389 ^(Core)
390

- 391 II.A.4.a).(14) document verification of program completion for all
392 graduating fellows within 30 days; ^(Core)
393
- 394 II.A.4.a).(15) provide verification of an individual fellow's
395 completion upon the fellow's request, within 30 days;
396 and, ^(Core)
397
- Background and Intent:** Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

- 398 III.A.4.a).(16) obtain review and approval of the Sponsoring
399 Institution's DIO before submitting information or
400 requests to the ACGME, as required in the Institutional
401 Requirements and outlined in the ACGME Program
402 Director's Guide to the Common Program
403 Requirements. ^(Core)
404

- 405 II.B. Faculty
406
- 407 *Faculty members are a foundational element of graduate medical education – faculty members teach fellows how to care for patients. Faculty members provide an important bridge allowing fellows to grow and become practice ready, ensuring that patients receive the highest quality of care. They are role models for future generations of physicians by demonstrating compassion, commitment to excellence in teaching and patient care, professionalism, and a dedication to lifelong learning. Faculty members experience the pride and joy of fostering the growth and development of future colleagues. The care they provide is enhanced by the opportunity to teach. By employing a scholarly approach to patient care, faculty members, through the graduate medical education system, improve the health of the individual and the population.*

- 408
409
410
411
412
413
414
415
416
417
418
419
420
421
422
423
424
425
426
427
428
- Faculty members ensure that patients receive the level of care expected from a specialist in the field. They recognize and respond to the needs of the patients, fellows, community, and institution. Faculty members provide appropriate levels of supervision to promote patient safety. Faculty members create an effective learning environment by acting in a professional manner and attending to the well-being of the fellows and themselves.*

Background and Intent: "Faculty" refers to the entire teaching force responsible for educating fellows. The term "faculty," including "core faculty," does not imply or require an academic appointment.

- 429
430 II.B.1. For each participating site, there must be a sufficient number of
431 faculty members with competence to instruct and supervise all
432 fellows at that location. ^(Core)

- 433
434 **II.B.2.** **Faculty members must:**
435
436 **II.B.2.a)** **be role models of professionalism;** ^(Core)
437
438 **II.B.2.b)** **demonstrate commitment to the delivery of safe, quality,**
439 **cost-effective, patient-centered care;** ^(Core)
440
- Background and Intent:** Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.
- 441
442 **II.B.2.c)** **demonstrate a strong interest in the education of fellows;** ^(Core)
443
444 **II.B.2.d)** **devote sufficient time to the educational program to fulfill**
445 **their supervisory and teaching responsibilities;** ^(Core)
446
447 **II.B.2.e)** **administer and maintain an educational environment**
448 **conducive to educating fellows;** ^(Core)
449
450 **II.B.2.f)** **regularly participate in organized clinical discussions,**
451 **rounds, journal clubs, and conferences; and,** ^(Core)
452
453 **II.B.2.g)** **pursue faculty development designed to enhance their skills**
454 **at least annually.** ^(Core)
- Background and Intent:** Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.
- 456
457 **II.B.3.** **Faculty Qualifications**
458
459 **II.B.3.a)** **Faculty members must have appropriate qualifications in**
460 **their field and hold appropriate institutional appointments.**
461 ^(Core)
462
463 **II.B.3.b)** **Subspecialty physician faculty members must:**
464
465 **II.B.3.b).(1)** **have current certification in the subspecialty by the**
466 **American Board of Internal Medicine or the American**
467 **Osteopathic Board of Internal Medicine, or possess**
468 **qualifications judged acceptable to the Review**
469 **Committee.** ^(Core)
470

471	II.B.3.c)	Any non-physician faculty members who participate in fellowship program education must be approved by the program director. ^(Core)
472	Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.	
473		
474		
475	II.B.3.d)	Any other specialty physician faculty members must have current certification in their specialty by the appropriate American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board, or possess qualifications judged acceptable to the Review Committee. ^(Core)
476		
477		
478		
479		
480		
481		
482	II.B.3.d).(1)	Faculty members who are ABIM- or AOBIM-certified in endocrinology, gastroenterology, infectious disease, nephrology, and pulmonary disease should be available to participate in the education of fellows. ^(Core)
483		
484		
485		
486		
487		
488	II.B.4.	Core Faculty
489		
490		
491		
492		
493		
494		
495		
496	Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum, mentoring fellows, and assessing fellows' progress toward achievement of competence in and the independent practice of the specialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program. Core faculty members may also be selected for their specific expertise and unique contribution to the program. Core faculty members are engaged in a broad range of activities, which may vary across programs and specialties. Core faculty members provide clinical teaching and supervision of fellows, and also participate in non-clinical activities related to fellow education and program administration. Examples of these non-clinical activities include, but are not limited to, interviewing and selecting fellow applicants, providing didactic instruction, mentoring fellows, simulation exercises, completing the annual ACGME Faculty Survey, and participating on the program's Clinical Competency Committee, Program Evaluation Committee, and other GME committees	
497	II.B.4.a)	Core faculty members must be designated by the program director. ^(Core)
498		

- 499
500 **II.B.4.b)** **Core faculty members must complete the annual ACGME**
501 **Faculty Survey.** ^(Core)
- 502
503 **II.B.4.c)** In addition to the program director, there must be at least three
504 core faculty members certified in hematology or medical oncology
505 by the ABIM or the AOBIM. ^(Core)
- 506
- ~~Specialty Background and Intent: The program must have a minimum number of ABIM or AOBIM certified hematology or medical oncology faculty members who devote significant time to teaching, supervising, and advising residents, and working closely with the program director and associate program director. One way the hematology or medical oncology certified faculty members can demonstrate they are devoting a significant portion of their effort to resident education is by dedicating an average of 10 hours per week to the program.~~
- 507
508 **II.B.4.d)** There must be at least one core faculty member certified in
509 hematology and/or medical oncology by the ABIM or the AOBIM
510 for every 1.5 fellows. ^(Core)
- 511
512 **II.B.4.e)** Among the program director and the required number of
513 subspecialty-certified core faculty members, at least 50 percent of
514 the individuals must be certified in hematology by the ABIM or
515 AOBIM, and at least 50 percent of the individuals must be certified
516 in medical oncology by the ABIM or AOBIM. ^(Core)
- 517
518 **II.B.4.f)** ~~If an appointment has not been made in line with Program Requirement II.A.3.b).(2), one of the subspecialty-certified core faculty members must be appointed Associate Program Director to assist the program director with the administrative and clinical oversight of the program. ^(Core) At a minimum, the required core faculty members, in aggregate and excluding members of the program leadership, must be provided with support equal to an average dedicated minimum of .1 FTE for educational and administrative responsibilities that do not involve direct patient care.~~ ^(Core)
- 519
520
521
522
523
524
525
526
527
528
- Subspecialty-Specific Background and Intent: For instance, a program with an approved complement of 12 fellows is required to have a minimum of eight ABIM- or AOBIM- subspecialty-certified faculty members and an FTE of 10 percent each. Because an associate program director is also a core faculty member, the minimum dedicated time requirements for associate program directors are inclusive of core faculty activities. An additional 10 percent FTE for the core faculty position is not required. For example, if one core faculty member is named the associate program director for a 12-fellow program, the required minimum support for that position is 14 percent FTE.
- 529
530 **II.C. Program Coordinator**
- 531
532 **II.C.1. There must be a program coordinator.** ^(Core)
- 533

534 **II.C.2.**
535 **The program coordinator must be provided with support adequate**
536 **for administration of the program based upon its size and**
537 **configuration. (Core)**

538 II.C.2.a) At a minimum, the program coordinator must be provided with the
539 dedicated time and support specified below for administration of
540 the program. Additional administrative support must be provided
541 based on the program size as follows: (Core)

<u>Number of Approved Fellow Positions</u>	<u>Minimum FTE Required for Coordinator Support</u>	<u>Additional Aggregate FTE Required for Administration of the Program</u>
<u>1-3</u>	<u>.3</u>	<u>0</u>
<u>4-6</u>	<u>.3</u>	<u>.2</u>
<u>7-9</u>	<u>.3</u>	<u>.38</u>
<u>10-12</u>	<u>.3</u>	<u>.44</u>
<u>13-15</u>	<u>.3</u>	<u>.50</u>
<u>16-18</u>	<u>.3</u>	<u>.56</u>
<u>19-21</u>	<u>.3</u>	<u>.62</u>
<u>22-24</u>	<u>.3</u>	<u>.68</u>
<u>25-27</u>	<u>.3</u>	<u>.74</u>
<u>28-30</u>	<u>.3</u>	<u>.80</u>
<u>31-33</u>	<u>.3</u>	<u>.86</u>
<u>34-36</u>	<u>.3</u>	<u>.92</u>
<u>37-39</u>	<u>.3</u>	<u>.98</u>
<u>40-42</u>	<u>.3</u>	<u>1.04</u>
<u>43-45</u>	<u>.3</u>	<u>1.10</u>
<u>46-48</u>	<u>.3</u>	<u>1.16</u>
<u>49-51</u>	<u>.3</u>	<u>1.22</u>
<u>52-54</u>	<u>.3</u>	<u>1.28</u>
<u>55-57</u>	<u>.3</u>	<u>1.34</u>
<u>58-60</u>	<u>.3</u>	<u>1.40</u>

543

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as otherwise titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison and facilitator between the learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a key member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management appropriate to the complexity of the program. Program coordinators are expected to develop in-depth knowledge of the ACGME and Program Requirements, including policies and procedures. Program coordinators assist

the program director in meeting accreditation requirements, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

544

Subspecialty-Specific Background and Intent: For instance, a program with an approved complement of 12 fellows is required to have at least 74 percent FTE administrative support: 30 percent FTE for the program coordinator; and an additional 44 percent FTE aggregate support. This additional support may be for the program coordinator only or divided among the program coordinator and one or more other administrative personnel. The Review Committee has not specified how the FTE should be distributed to allow programs, in partnership with their Sponsoring Institution, to allocate the FTE as they see fit.

545

II.D. Other Program Personnel

547

548

549

550

551

The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. (Core)

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

552

553 II.D.1. There must be services available from other health care professionals, including dietitians, language interpreters, nurses, occupational therapists, physical therapists, and social workers. (Detail)

554

555

556

557 II.D.2. The fellowship must have access to surgeons in general surgery and surgical specialties, including those with special interest in oncology. (Detail)

558

559

560

561 II.D.3. The fellowship must have access to other clinical specialists, including those in dermatology, obstetrics and gynecology, neurology, neurological surgery, orthopaedics, otolaryngology, and urology. (Detail)

562

563

564 II.D.4. There must be appropriate and timely consultation from other specialties. (Detail)

565

566

567 II.D.5. Expertise in the following disciplines should be available to the program to provide multidisciplinary patient care and fellow education:

568

569

570 II.D.5.a) genetic counseling; (Detail)

571

572

573 II.D.5.b) hospice and palliative care; (Detail)

574

II.D.5.c) oncologic nursing; (Detail)

- 575
576 II.D.5.d) pain management; (Detail)
577
578 II.D.5.e) psychiatry; and, (Detail)
579
580 II.D.5.f) rehabilitation medicine. (Detail)
581
- 582 **III. Fellow Appointments**
- 583
- 584 **III.A. Eligibility Criteria**
- 585
- 586 **III.A.1. Eligibility Requirements – Fellowship Programs**
- 587
- 588 All required clinical education for entry into ACGME-accredited
589 fellowship programs must be completed in an ACGME-accredited
590 residency program, an AOA-approved residency program, a
591 program with ACGME International (ACGME-I) Advanced Specialty
592 Accreditation, or a Royal College of Physicians and Surgeons of
593 Canada (RCPSC)-accredited or College of Family Physicians of
594 Canada (CFPC)-accredited residency program located in Canada.
595 (Core)
596
- Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a.(9).**
- 597
- 598 **III.A.1.a)** Fellowship programs must receive verification of each
599 entering fellow's level of competence in the required field,
600 upon matriculation, using ACGME, ACGME-I, or CanMEDS
601 Milestones evaluations from the core residency program. (Core)
602
- 603 **III.A.1.b)** Prior to appointment in the fellowship, fellows should have
604 completed an internal medicine program that satisfies the
605 requirements in III.A.1. (Core)
606
- 607 **III.A.1.b).(1)** Fellows who did not complete an internal medicine
608 program that satisfies the requirements in III.A.1. must
609 have completed at least three years of internal medicine
610 education prior to starting the fellowship as well as met all
611 of the criteria in the "Fellow Eligibility Exception" section
612 below. (Core)
613
- 614 **III.A.1.c)** **Fellow Eligibility Exception**
- 615
- 616 **The Review Committee for Internal Medicine will allow the**
617 **following exception to the fellowship eligibility requirements:**
618
- 619 **III.A.1.c).(1)** An ACGME-accredited fellowship program may accept
620 an exceptionally qualified international graduate
621 applicant who does not satisfy the eligibility
622 requirements listed in III.A.1., but who does meet all of

the following additional qualifications and conditions:
(Core)

III.A.1.c).(1).a) evaluation by the program director and fellowship selection committee of the applicant's suitability to enter the program, based on prior training and review of the summative evaluations of training in the core specialty; and, ^(Core)

III.A.1.c).(1).(b) review and approval of the applicant's exceptional qualifications by the GMEC; and, (Core)

III.A.1.c).(1).c) verification of Educational Commission for Foreign Medical Graduates (ECFMG) certification. (Core)

III.A.1.c).(2) Applicants accepted through this exception must have an evaluation of their performance by the Clinical Competency Committee within 12 weeks of matriculation. (Core)

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training.

Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

III.B. The program director must not appoint more fellows than approved by the Review Committee. (Core)

III.B.1. All complement increases must be approved by the Review Committee. (Core)

III.B.2. The number of available fellow positions in the program must be at least one per year. (Detail)

III C Fellow Transfers

III.C. Fellow Transfers

658 The program must obtain verification of previous educational experiences
659 and a summative competency-based performance evaluation prior to
660 acceptance of a transferring fellow, and Milestones evaluations upon
661 matriculation. ^(Core)
662

663 **IV. Educational Program**

664
665 *The ACGME accreditation system is designed to encourage excellence and
666 innovation in graduate medical education regardless of the organizational
667 affiliation, size, or location of the program.*

668
669 *The educational program must support the development of knowledgeable, skillful
670 physicians who provide compassionate care.*

671
672 *In addition, the program is expected to define its specific program aims consistent
673 with the overall mission of its Sponsoring Institution, the needs of the community
674 it serves and that its graduates will serve, and the distinctive capabilities of
675 physicians it intends to graduate. While programs must demonstrate substantial
676 compliance with the Common and subspecialty-specific Program Requirements, it
677 is recognized that within this framework, programs may place different emphasis
678 on research, leadership, public health, etc. It is expected that the program aims
679 will reflect the nuanced program-specific goals for it and its graduates; for
680 example, it is expected that a program aiming to prepare physician-scientists will
681 have a different curriculum from one focusing on community health.*

682
683 **IV.A. The curriculum must contain the following educational components:** ^(Core)

684
685 **IV.A.1. a set of program aims consistent with the Sponsoring Institution's
686 mission, the needs of the community it serves, and the desired
687 distinctive capabilities of its graduates;** ^(Core)

688
689 **IV.A.1.a) The program's aims must be made available to program
690 applicants, fellows, and faculty members.** ^(Core)

691
692 **IV.A.2. competency-based goals and objectives for each educational
693 experience designed to promote progress on a trajectory to
694 autonomous practice in their subspecialty. These must be
695 distributed, reviewed, and available to fellows and faculty members;** ^(Core)

696
697
698 **IV.A.3. delineation of fellow responsibilities for patient care, progressive
699 responsibility for patient management, and graded supervision in
700 their subspecialty;** ^(Core)

701 **Background and Intent:** These responsibilities may generally be described by PGY
level and specifically by Milestones progress as determined by the Clinical
Competency Committee. This approach encourages the transition to competency-
based education. An advanced learner may be granted more responsibility
independent of PGY level and a learner needing more time to accomplish a certain
task may do so in a focused rather than global manner.

IV.A.4. structured educational activities beyond direct patient care; and,
(Core)

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

IV.A.5. advancement of fellows' knowledge of ethical principles foundational to medical professionalism. (Core)

IV.B. ACGME Competencies

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

IV.B.1. The program must integrate the following ACGME Competencies into the curriculum: (Core)

IV.B.1.a) Professionalism

Fellows must demonstrate a commitment to professionalism and an adherence to ethical principles. (Core)

IV.B.1.b) Patient Care and Procedural Skills

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality.* *Health Affairs.* 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

IV.B.1.b).(1) Fellows must be able to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health. (Core)

729	IV.B.1.b).(1).(a)	Fellows must demonstrate competence in the practice of health promotion, disease prevention, diagnosis, care, and treatment of patients of each gender, from adolescence to old age, during health and all stages of illness. ^(Core)
730		
731		
732		
733		
734		
735	IV.B.1.b).(1).(b)	Fellows must demonstrate competence in the role of a consultant. ^(Core)
736		
737		
738	IV.B.1.b).(1).(c)	Fellows must demonstrate competence in the:
739		
740	IV.B.1.b).(1).(c).(i)	prevention, evaluation, diagnosis, cancer staging, and management of patients with hematologic and neoplastic disorders of the:
741		
742		
743		
744	IV.B.1.b).(1).(c).(i).(a)	breast; ^(Core)
745		
746	IV.B.1.b).(1).(c).(i).(b)	cancer family syndromes; and, ^(Core)
747		
748	IV.B.1.b).(1).(c).(i).(c)	central nervous system; ^(Core)
749		
750	IV.B.1.b).(1).(c).(i).(d)	gastrointestinal tract (esophagus, stomach, colon, rectum, anus); ^(Core)
751		
752		
753	IV.B.1.b).(1).(c).(i).(e)	genitourinary tract; ^(Core)

839 as measured by physical and radiologic
840 exam, and tumor markers; (Core)
841
842 IV.B.1.b).(2).(a).(x) assessment of hematologic disorders by
843 computed tomography, MRI, PET scanning,
844 and nuclear imaging techniques; (Core)
845
846 IV.B.1.b).(2).(a).(xi) assessment and interpretation of complete
847 blood count; (Core)
848
849 IV.B.1.b).(2).(a).(xii) interpretation of peripheral blood smears;
850 and, (Core)
851
852 IV.B.1.b).(2).(a).(xiii) performance of bone marrow biopsies and
853 aspirations. (Core)
854
855

IV.B.1.c) Medical Knowledge

856 **Fellows must demonstrate knowledge of established and**
857 **evolving biomedical, clinical, epidemiological and social-**
858 **behavioral sciences, as well as the application of this**
859 **knowledge to patient care.** (Core)

- 860 IV.B.1.c).(1) Fellows must demonstrate knowledge of the scientific
861 method of problem solving and evidence-based decision
862 making. (Core)
863
864 IV.B.1.c).(2) Fellows must demonstrate knowledge of indications,
865 contraindications, limitations, complications, techniques,
866 and interpretation of results of those diagnostic and
867 therapeutic procedures integral to the discipline, including
868 the appropriate indications for and use of screening
869 tests/procedures. (Core)
870
871 IV.B.1.c).(3) Fellows must demonstrate knowledge of pathogenesis,
872 diagnosis, and treatment of disease, including:
873
874 IV.B.1.c).(3).(a) basic molecular and pathophysiologic mechanisms,
875 diagnosis, and therapy of diseases of the blood,
876 including anemias, diseases of white blood cells
877 and stem cells, and disorders of hemostasis and
878 thrombosis; and, (Core)
879
880
881

- 882
883 IV.B.1.c).(3).(b) etiology, epidemiology, natural history, diagnosis,
884 pathology, staging, and management of neoplastic
885 diseases of the blood, blood-forming organs, and
886 lymphatic tissues. (Core)
887
- 888 IV.B.1.c).(4) Fellows must demonstrate knowledge of genetics and
889 developmental biology, including:
890
- 891 IV.B.1.c).(4).(a) molecular genetics; (Core)
892
- 893 IV.B.1.c).(4).(b) prenatal diagnosis; (Core)
894
- 895 IV.B.1.c).(4).(c) the nature of oncogenes and their products; and,
896 (Core)
897
- 898 IV.B.1.c).(4).(d) cytogenetics. (Core)
899
- 900 IV.B.1.c).(5) Fellows must demonstrate knowledge of physiology and
901 pathophysiology, including:
902
- 903 IV.B.1.c).(5).(a) cell and molecular biology; (Core)
904
- 905 IV.B.1.c).(5).(b) hematopiesis; (Core)
906
- 907 IV.B.1.c).(5).(c) principles of oncogenesis; (Core)
908
- 909 IV.B.1.c).(5).(d) tumor immunology; (Core)
910
- 911 IV.B.1.c).(5).(e) molecular mechanisms of hematopoietic and
912 lymphopoietic malignancies; (Core)
913
- 914 IV.B.1.c).(5).(f) basic and clinical pharmacology, pharmacokinetics,
915 and toxicity; and, (Core)
916
- 917 IV.B.1.c).(5).(g) pathophysiology and patterns of tumor metastases.
918 (Core)
919
- 920 IV.B.1.c).(6) Fellows must demonstrate knowledge of clinical
921 epidemiology and biostatistics, including clinical study and
922 experimental protocol design, data collection, and analysis.
923 (Core)
924
- 925 IV.B.1.c).(7) Fellows must demonstrate knowledge of:
926
- 927 IV.B.1.c).(7).(a) basic principles of laboratory and clinical testing,
928 quality control, quality assurance, and proficiency
929 standards; (Core)
930
- 931 IV.B.1.c).(7).(b) immune markers, immunophenotyping, flow
932 cytometry, cytochemical studies, and cytogenetic

- 933 and DNA analysis of neoplastic disorders; ^(Core)
934
935 IV.B.1.c).(7).(c)
936 malignant and hematologic complications of organ
937 transplantation; ^(Core)
938 IV.B.1.c).(7).(d)
939 gene therapy; ^(Core)
940 IV.B.1.c).(7).(e)
941 effects of systemic disorders and drugs on the
942 blood, blood-forming organs, and lymphatic tissues;
943 ^(Core)
944 IV.B.1.c).(7).(f)
945 transfusion medicine, including the evaluation of
946 antibodies, blood compatibility, and the indications
947 for and complications of blood component therapy
948 and methods of apheresis procedures; ^(Core)
949 IV.B.1.c).(7).(g)
950 acquired and congenital disorders of red cells,
951 white cells, platelets and stem cells; ^(Core)
952 IV.B.1.c).(7).(h)
953 hematopoietic and lymphopoietic malignancies,
954 including disorders of plasma cells; ^(Core)
955 IV.B.1.c).(7).(i)
956 functional characteristics, indications, risks, and
957 process of using indwelling venous access devices;
958 ^(Core)
959 IV.B.1.c).(7).(j)
960 preparation of blood smears, bone marrow
961 aspirates, and touch preparations; ^(Core)
962 IV.B.1.c).(7).(k)
963 indications, risks, and process of performing
964 therapeutic phlebotomy; ^(Core)
965 IV.B.1.c).(7).(l)
966 principles of multidisciplinary management of
967 organ-specific cancers; and, ^(Core)
968 IV.B.1.c).(7).(m)
969 the mechanisms of action, pharmacokinetics,
970 clinical indications, and limitations of
971 chemotherapeutic drugs, biologic products, and
972 growth factors, including their effects, toxicity, and
973 interactions. ^(Core)
974 IV.B.1.c).(8)
975 Fellows must demonstrate knowledge of, principles of,
976 indications for, and limitations of:
977 IV.B.1.c).(8).(a)
978 surgery in the treatment of cancer; and, ^(Core)
979 IV.B.1.c).(8).(b)
980 radiation therapy in the treatment of cancer. ^(Core)
981 IV.B.1.c).(9)
982 Fellows must demonstrate knowledge of principles of,
983 indications for, and complications of autologous and
allogeneic bone marrow or peripheral blood stem cell

984		transplantation. (Core)
985		
986	IV.B.1.c).(10)	Fellows must demonstrate knowledge of principles, indications for, and complications of peripheral stem cell harvests. (Core)
987		
988		
989		
990	IV.B.1.c).(11)	Fellows must demonstrate knowledge of the management of post-transplant complications. (Core)
991		
992		
993	IV.B.1.c).(12)	Fellows must demonstrate knowledge of the indications, complications, and risks and limitations associated with:
994		
995		
996	IV.B.1.c).(12).(a)	thoracentesis; (Core)
997		
998	IV.B.1.c).(12).(b)	paracentesis; (Core)
999		
1000	IV.B.1.c).(12).(c)	skin biopsies; and, (Core)
1001		
1002	IV.B.1.c).(12).(d)	lesion biopsies. (Core)
1003		
1004	IV.B.1.d)	Practice-based Learning and Improvement
1005		
1006		Fellows must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. (Core)
1007		
1008		
1009		
1010		

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

1011		
1012	IV.B.1.e)	Interpersonal and Communication Skills
1013		
1014		Fellows must demonstrate interpersonal and communication skills that result in the effective exchange of information and collaboration with patients, their families, and health professionals. (Core)
1015		
1016		
1017		
1018		
1019	IV.B.1.f)	Systems-based Practice
1020		
1021		Fellows must demonstrate an awareness of and responsiveness to the larger context and system of health care, including the social determinants of health, as well as the ability to call effectively on other resources to provide optimal health care. (Core)
1022		
1023		
1024		
1025		
1026		

- 1027 **IV.C. Curriculum Organization and Fellow Experiences**
- 1028
- 1029 **IV.C.1. The curriculum must be structured to optimize fellow educational experiences, the length of these experiences, and supervisory continuity. (Core)**
- 1030
- 1031
- 1032
- 1033 IV.C.1.a) Assignment of rotations must be structured to minimize the frequency of rotational transitions, and rotations must be of sufficient length to provide a quality educational experience, defined by continuity of patient care, ongoing supervision, longitudinal relationships with faculty members, and meaningful assessment and feedback. (Core)
- 1034
- 1035
- 1036
- 1037
- 1038
- 1039
- 1040 IV.C.1.b) Clinical experiences should be structured to facilitate learning in a manner that allows fellows to function as part of an effective interprofessional team that works together towards the shared goals of patient safety and quality improvement. (Core)
- 1041
- 1042
- 1043
- 1044
- 1045 **IV.C.2. The program must provide instruction and experience in pain management if applicable for the subspecialty, including recognition of the signs of addiction. (Core)**
- 1046
- 1047
- 1048
- 1049 IV.C.3. A minimum of 18 months must be devoted to clinical experience. (Core)
- 1050
- 1051 IV.C.3.a) Of this time, at least 12 months must be in the diagnosis and management of a broad spectrum of neoplastic diseases, including hematological malignancies, and at least six months must be in the diagnosis and management of a broad spectrum of non-neoplastic hematological disorders. (Core)
- 1052
- 1053
- 1054
- 1055
- 1056
- 1057 IV.C.3.b) At least 50 percent of the medical oncology clinical experience must occur in the outpatient setting. (Core)
- 1058
- 1059
- 1060 IV.C.3.c) The program must provide at least one month of clinical experience in autologous and allogeneic bone marrow transplantation. (Core)
- 1061
- 1062
- 1063
- 1064 IV.C.4. Fellows must participate in training using simulation. (Detail)
- 1065
- 1066 IV.C.5. Inpatient assignments should be of sufficient duration to permit continuing care of a majority of the patients throughout their hospitalization. (Detail)
- 1067
- 1068
- 1069 IV.C.6. Fellows must participate in multidisciplinary case management or tumor board conferences, and in protocol studies. (Core)
- 1070
- 1071
- 1072 IV.C.7. Fellows must assume continuing responsibility for acutely and chronically ill patients in order to observe and manage both inpatients and outpatients with a wide variety of blood and neoplastic disorders, and the benefits and adverse effects of therapy. (Core)
- 1073
- 1074
- 1075
- 1076
- 1077 IV.C.8. Fellows must participate in a multidisciplinary case management

- 1078 conference or discussion. ^(Core)
- 1079
- 1080 IV.C.9. Fellows should participate in the care of patients undergoing:
- 1081
- 1082 IV.C.9.a) apheresis procedures; and ^(Core)
- 1083
- 1084 IV.C.9.b) bone marrow or peripheral stem cell harvest for transplantation. ^(Core)
- 1085
- 1086
- 1087 IV.C.10. Fellows must be educated about, and should have experience with:
- 1088
- 1089 IV.C.10.a) performance and interpretation of partial thromboplastin time, prothrombin time, platelet aggregation, and bleeding time, as well as other standard and specialized coagulation assays; and, ^(Core)
- 1090
- 1091
- 1092 IV.C.10.b) test of hemostasis. ^(Core)
- 1093
- 1094
- 1095 IV.C.11. Experience with Continuity Ambulatory Patients
- 1096
- 1097 Fellows must have continuity ambulatory clinic experience that exposes them to the breadth and depth of the subspecialty. ^(Core)
- 1098
- 1099
- 1100 IV.C.11.a) This experience should average one half-day each week. ^(Detail)
- 1101
- 1102 IV.C.11.b) This experience must include an appropriate distribution of patients of each gender and a diversity of ages, ^(Core)
- 1103
- 1104
- 1105 This should be accomplished through either:
- 1106
- 1107 IV.C.11.b).(1) a continuity clinic which provides fellows the opportunity to learn the course of disease; or, ^(Detail)
- 1108
- 1109
- 1110 IV.C.11.b).(2) selected blocks of at least six months which address specific areas of blood and neoplastic disorders. ^(Detail)
- 1111
- 1112
- 1113 IV.C.11.c) Each fellow should, on average, be responsible for four to eight patients during each half-day session. ^(Detail)
- 1114
- 1115
- 1116 IV.C.11.d) The continuity patient care experience should not be interrupted by more than one month, excluding a fellow's vacation. ^(Detail)
- 1117
- 1118
- 1119 IV.C.11.e) Fellows should be informed of the status of their continuity patients when such patients are hospitalized, as clinically appropriate. ^(Detail)
- 1120
- 1121
- 1122
- 1123 IV.C.12. Procedures and Technical Skills
- 1124
- 1125 IV.C.12.a) Direct supervision of procedures performed by each fellow must occur until proficiency has been acquired and documented by the program director. ^(Core)
- 1126
- 1127
- 1128

- 1129 IV.C.12.b) Faculty members must teach and supervise the fellows in the
1130 performance and interpretation of procedures, which must be
1131 documented in each fellow's record, including indications,
1132 outcomes, diagnoses, and supervisor(s). ^(Core)
1133
- 1134 IV.C.12.c) It is suggested that fellows have the opportunity to develop
1135 competence in performing thoracentesis, paracentesis, skin
1136 biopsies, and lesion biopsies. ^(Detail)
1137
- 1138 IV.C.12.d) Additional training and experiences should be made available for
1139 those fellows who request the need to perform specified
1140 procedures in their post-training careers (e.g., training to achieve
1141 competence in: interpretation of bone marrow biopsies and/or
1142 aspirates; lumbar punctures for diagnosis and/or administration of
1143 intrathecal chemotherapy; administering therapeutics through
1144 Ommaya reservoirs, etc.). ^(Detail)
1145
- 1146 IV.C.13. The core curriculum must include a didactic program based on the core
1147 knowledge content in the subspecialty area. ^(Core)
1148
- 1149 IV.C.13.a) The program must afford each fellow an opportunity to review
1150 topics covered in conferences that he or she was unable to attend.
1151 ^(Detail)
1152
- 1153 IV.C.13.b) Fellows must participate in clinical case conferences, journal
1154 clubs, research conferences, and morbidity and mortality or quality
1155 improvement conferences. ^(Detail)
1156
- 1157 IV.C.13.c) All core conferences must have at least one faculty member
1158 present, and must be scheduled as to ensure peer-peer and peer-
1159 faculty interaction. ^(Detail)
1160
- 1161 IV.C.14. Patient-based teaching must include direct interaction between fellows
1162 and faculty members, bedside teaching, discussion of pathophysiology,
1163 and the use of current evidence in diagnostic and therapeutic decisions.
1164 ^(Core)
1165
- 1166 The teaching must be:
1167
- 1168 IV.C.14.a) formally conducted on all inpatient, outpatient and consultative
1169 services; and, ^(Detail)
1170
- 1171 IV.C.14.b) conducted with a frequency and duration that ensures a
1172 meaningful and continuous teaching relationship between the
1173 assigned supervising faculty member(s) and fellows. ^(Detail)
1174
- 1175 IV.C.15. Fellows must receive instruction in practice management relevant to
1176 hematology and medical oncology. ^(Detail)
1177
- 1178 **IV.D. Scholarship**
1179

1180 ***Medicine is both an art and a science. The physician is a humanistic***
1181 ***scientist who cares for patients. This requires the ability to think critically,***
1182 ***evaluate the literature, appropriately assimilate new knowledge, and***
1183 ***practice lifelong learning. The program and faculty must create an***
1184 ***environment that fosters the acquisition of such skills through fellow***
1185 ***participation in scholarly activities as defined in the subspecialty-specific***
1186 ***Program Requirements. Scholarly activities may include discovery,***
1187 ***integration, application, and teaching.***

1188
1189 ***The ACGME recognizes the diversity of fellowships and anticipates that***
1190 ***programs prepare physicians for a variety of roles, including clinicians,***
1191 ***scientists, and educators. It is expected that the program's scholarship will***

1196 ***research as the focus for scholarship.***

1197
1198 **IV.D.1. Program Responsibilities**

1199
1200 **IV.D.1.a)** The program must demonstrate evidence of scholarly
1201 activities, consistent with its mission(s) and aims. ^(Core)

1202
1203 **IV.D.1.b)** The program in partnership with its Sponsoring Institution,
1204 must allocate adequate resources to facilitate fellow and
1205 faculty involvement in scholarly activities. ^(Core)

1206
1207 **IV.D.2. Faculty Scholarly Activity**

1208
1209 **IV.D.2.a)** Among their scholarly activity, programs must demonstrate
1210 accomplishments in at least three of the following domains:
1211 ^(Core)

- 1212
1213 • Research in basic science, education, translational
1214 science, patient care, or population health
1215 • Peer-reviewed grants
1216 • Quality improvement and/or patient safety initiatives
1217 • Systematic reviews, meta-analyses, review articles,
1218 chapters in medical textbooks, or case reports
1219 • Creation of curricula, evaluation tools, didactic
1220 educational activities, or electronic educational
1221 materials
1222 • Contribution to professional committees, educational
1223 organizations, or editorial boards
1224 • Innovations in education

1225
1226 **IV.D.2.b)** The program must demonstrate dissemination of scholarly
1227 activity within and external to the program by the following
1228 methods:

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program's effectiveness in the creation of an environment of inquiry that advances the fellows' scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

1230

IV.D.2.b).(1)

faculty participation in grand rounds, posters, workshops, quality improvement presentations, podium presentations, grant leadership, non-peer-reviewed print/electronic resources, articles or publications, book chapters, textbooks, webinars, service on professional committees, or serving as a journal reviewer, journal editorial board member, or editor; (Outcome)‡

1239

IV.D.2.b).(1).(a)

At least 50 percent of the core faculty members who are certified in hematology or medical oncology by the ABIM or AOBIM (see Program Requirements II.B.4.c)-e)) must annually engage in a variety of scholarly activities, as listed in Program Requirement IV.D.2.b).(1). (Core)

1246

IV.D.3. Fellow Scholarly Activity

1248

IV.D.3.a)

While in the program, at least 50 percent of a program's fellows must have engaged in more than one of the following scholarly activities: participation in grand rounds, posters, workshops, quality improvement presentations, podium presentations, grant leadership, non-peer-reviewed print/electronic resources, articles or publications, book chapters, textbooks, webinars, service on professional committees, or serving as a journal reviewer, journal editorial board member, or editor. (Outcome)

1257

V. Evaluation

1259

V.A. Fellow Evaluation

1261

V.A.1. Feedback and Evaluation

1263

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is monitoring fellow learning and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- fellows identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is evaluating a fellow's learning by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

1264
1265
1266
1267
1268

V.A.1.a) Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. (Core)

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

1269

1281
1282
1283
1284
1285

V.A.1.a).(1) The faculty must discuss this evaluation with each fellow at the completion of each assignment. (Core)

V.A.1.a).(2) Assessment of procedural competence should include a formal evaluation process and not be based solely on a minimum number of procedures performed. (Detail)

V.A.1.b) Evaluation must be documented at the completion of the assignment. (Core)

V.A.1.b).(1) For block rotations of greater than three months in duration, evaluation must be documented at least every three months. (Core)

V.A.1.b).(2) Longitudinal experiences such as continuity clinic in the context of other clinical responsibilities must be

evaluated at least every three months and at completion. ^(Core)

V.A.1.c) The program must provide an objective performance evaluation based on the Competencies and the subspecialty-specific Milestones, and must: ^(Core)

V.A.1.c).(1) use multiple evaluators (e.g., faculty members, peers, patients, self, and other professional staff members); and, ^(Core)

V.A.1.c).(2) provide that information to the Clinical Competency Committee for its synthesis of progressive fellow performance and improvement toward unsupervised practice. ^(Core)

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

| 1360 | | |

who have extensive contact and experience with the program's fellows. (Core)

V.A.3.b)

The Clinical Competency Committee must:

V.A.3.b).(1)

review all fellow evaluations at least semi-annually;
(Core)

V A 3 b) (2)

determine each fellow's progress on achievement of the subspecialty-specific Milestones; and (Core)

V A 3 h) (3)

meet prior to the fellows' semi-annual evaluations and advise the program director regarding each fellow's progress. (Core)

VB

Faculty Evaluation

V B 1

The program must have a process to evaluate each faculty member's performance as it relates to the educational program at least annually. (Core)

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

V.B.1.a)

This evaluation must include a review of the faculty member's clinical teaching abilities, engagement with the educational program, participation in faculty development related to their skills as an educator, clinical performance, professionalism, and scholarly activities. (Core)

V.B.1.b)

This evaluation must include written, confidential evaluations by the fellows. (Core)

- 1392 **V.B.2.** Faculty members must receive feedback on their evaluations at least
1393 annually. ^(Core)
1394
- 1395 **V.B.3.** Results of the faculty educational evaluations should be
1396 incorporated into program-wide faculty development plans. ^(Core)
1397

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

- 1398
- 1399 **V.C.** **Program Evaluation and Improvement**
- 1400
- 1401 **V.C.1.** The program director must appoint the Program Evaluation Committee to conduct and document the Annual Program Evaluation as part of the program's continuous improvement process. ^(Core)
- 1402
- 1403
- 1404
- 1405
- 1406 **V.C.1.a)** The Program Evaluation Committee must be composed of at least two program faculty members, at least one of whom is a core faculty member, and at least one fellow. ^(Core)
- 1407
- 1408
- 1409
- 1410 **V.C.1.b)** Program Evaluation Committee responsibilities must include:
- 1411
- 1412 **V.C.1.b).(1)** acting as an advisor to the program director, through program oversight; ^(Core)
- 1413
- 1414
- 1415 **V.C.1.b).(2)** review of the program's self-determined goals and progress toward meeting them; ^(Core)
- 1416
- 1417
- 1418 **V.C.1.b).(3)** guiding ongoing program improvement, including development of new goals, based upon outcomes; and, ^(Core)
- 1419
- 1420
- 1421
- 1422 **V.C.1.b).(4)** review of the current operating environment to identify strengths, challenges, opportunities, and threats as related to the program's mission and aims. ^(Core)
- 1423
- 1424
- 1425

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.

- 1426
- 1427 **V.C.1.c)** The Program Evaluation Committee should consider the following elements in its assessment of the program:
- 1428
- 1429
- 1430 **V.C.1.c).(1)** curriculum; ^(Core)

1431	V.C.1.c).(2)	outcomes from prior Annual Program Evaluation(s); (Core)
1432	V.C.1.c).(3)	ACGME letters of notification, including citations, Areas for Improvement, and comments; (Core)
1433	V.C.1.c).(4)	quality and safety of patient care; (Core)
1434	V.C.1.c).(5)	aggregate fellow and faculty:
1435	V.C.1.c).(5).(a)	well-being; (Core)
1436	V.C.1.c).(5).(b)	recruitment and retention; (Core)
1437	V.C.1.c).(5).(c)	workforce diversity; (Core)
1438	V.C.1.c).(5).(d)	engagement in quality improvement and patient safety; (Core)
1439	V.C.1.c).(5).(e)	scholarly activity; (Core)
1440	V.C.1.c).(5).(f)	ACGME Resident/Fellow and Faculty Surveys (where applicable); and, (Core)
1441	V.C.1.c).(5).(g)	written evaluations of the program. (Core)
1442	V.C.1.c).(6)	aggregate fellow:
1443	V.C.1.c).(6).(a)	achievement of the Milestones; (Core)
1444	V.C.1.c).(6).(b)	in-training examinations (where applicable); (Core)
1445	V.C.1.c).(6).(c)	board pass and certification rates; and, (Core)
1446	V.C.1.c).(6).(d)	graduate performance. (Core)
1447	V.C.1.c).(7)	aggregate faculty:
1448	V.C.1.c).(7).(a)	evaluation; and, (Core)
1449	V.C.1.c).(7).(b)	professional development (Core)
1450	V.C.1.d)	The Program Evaluation Committee must evaluate the program's mission and aims, strengths, areas for improvement, and threats. (Core)
1451	V.C.1.e)	The annual review, including the action plan, must:

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

1492 V.C.3. *One goal of ACGME-accredited education is to educate physicians*
1493 *who seek and achieve board certification. One measure of the*
1494 *effectiveness of the educational program is the ultimate pass rate.*

1497 *The program director should encourage all eligible program*
1498 *graduates to take the certifying examination offered by the*
1499 *applicable American Board of Medical Specialties (ABMS) member*
1500 *board or American Osteopathic Association (AOA) certifying board.*

1502 V.C.3.a) For subspecialties in which the ABMS member board and/or
1503 AOA certifying board offer(s) an annual written exam, in the
1504 preceding three years, the program's aggregate pass rate of
1505 those taking the examination for the first time must be higher
1506 than the bottom fifth percentile of programs in that
1507 subspecialty. (Outcome)

1509 V.C.3.b) For subspecialties in which the ABMS member board and/or
1510 AOA certifying board offer(s) a biennial written exam, in the
1511 preceding six years, the program's aggregate pass rate of
1512 those taking the examination for the first time must be higher
1513 than the bottom fifth percentile of programs in that
1514 subspecialty. (Outcome)

1516 V.C.3.c) For subspecialties in which the ABMS member board and/or
1517 AOA certifying board offer(s) an annual oral exam, in the
1518 preceding three years, the program's aggregate pass rate of
1519 those taking the examination for the first time must be higher

- 1520 than the bottom fifth percentile of programs in that
1521 subspecialty. ^(Outcome)
- 1522
- 1523 **V.C.3.d)** For subspecialties in which the ABMS member board and/or
1524 AOA certifying board offer(s) a biennial oral exam, in the
1525 preceding six years, the program's aggregate pass rate of
1526 those taking the examination for the first time must be higher
1527 than the bottom fifth percentile of programs in that
1528 subspecialty. ^(Outcome)
- 1529
- 1530 **V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program
1531 whose graduates over the time period specified in the
1532 requirement have achieved an 80 percent pass rate will have
1533 met this requirement, no matter the percentile rank of the
1534 program for pass rate in that subspecialty. ^(Outcome)
- 1535

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

- 1536
- 1537 **V.C.3.f)** Programs must report, in ADS, board certification status
1538 annually for the cohort of board-eligible fellows that
1539 graduated seven years earlier. ^(Core)
- 1540

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

1541

1542 **VI. The Learning and Working Environment**

1543

1544 ***Fellowship education must occur in the context of a learning and working***
1545 ***environment that emphasizes the following principles:***

1546

- 1547 • ***Excellence in the safety and quality of care rendered to patients by fellows***
1548 ***today***
- 1549
- 1550 • ***Excellence in the safety and quality of care rendered to patients by today's***
1551 ***fellows in their future practice***
- 1552
- 1553 • ***Excellence in professionalism through faculty modeling of:***
- 1554
- 1555 ○ ***the effacement of self-interest in a humanistic environment that supports***
1556 ***the professional development of physicians***
- 1557
- 1558 ○ ***the joy of curiosity, problem-solving, intellectual rigor, and discovery***
- 1559
- 1560 • ***Commitment to the well-being of the students, residents, fellows, faculty***
1561 ***members, and all members of the health care team***
- 1562

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

1563
1564 **VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability**

1565
1566 **VI.A.1. Patient Safety and Quality Improvement**

1567
1568 ***All physicians share responsibility for promoting patient safety and***
1569 ***enhancing quality of patient care. Graduate medical education must***
1570 ***prepare fellows to provide the highest level of clinical care with***
1571 ***continuous focus on the safety, individual needs, and humanity of***
1572 ***their patients. It is the right of each patient to be cared for by fellows***
1573 ***who are appropriately supervised; possess the requisite knowledge,***

1730	VI.A.2.a).(1).(b)	Fellows and faculty members must inform each patient of their respective roles in that patient's care when providing direct patient care. ^(Core)
1731		
1732		
1733		
1734	VI.A.2.b)	<i>Supervision may be exercised through a variety of methods. For many aspects of patient care, the supervising physician may be a more advanced fellow. Other portions of care provided by the fellow can be adequately supervised by the appropriate availability of the supervising faculty member or fellow, either on site or by means of telecommunication technology. Some activities require the physical presence of the supervising faculty member. In some circumstances, supervision may include post-hoc review of fellow-delivered care with feedback.</i>
1735		
1736		
1737		
1738		
1739		
1740		
1741		
1742		
1743		
1744		
Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.		
1745		
1746	VI.A.2.b).(1)	The program must demonstrate that the appropriate level of supervision in place for all fellows is based on each fellow's level of training and ability, as well as patient complexity and acuity. Supervision may be exercised through a variety of methods, as appropriate to the situation. ^(Core)
1747		
1748		
1749		
1750		
1751		
1752		
1753	VI.A.2.b).(2)	The program must define when physical presence of a supervising physician is required. ^(Core)

1757		
1758		
1759		
1760		
1761		
1762	VI.A.2.c).(1)	Direct Supervision:
1763		
1764	VI.A.2.c).(1).(a)	the supervising physician is physically present with the fellow during the key portions of the patient interaction; or, ^(Core)
1765		
1766		

1767		
1768	VI.A.2.c).(1).(b)	the supervising physician and/or patient is not physically present with the fellow and the supervising physician is concurrently monitoring the patient care through appropriate telecommunication technology. ^(Core)
1769		
1770		
1771		
1772		
1773		
1774	VI.A.2.c).(2)	Indirect Supervision: the supervising physician is not providing physical or concurrent visual or audio supervision but is immediately available to the fellow for guidance and is available to provide appropriate direct supervision. ^(Core)
1775		
1776		
1777		
1778		
1779		
1780	VI.A.2.c).(3)	Oversight – the supervising physician is available to provide review of procedures/encounters with feedback provided after care is delivered. ^(Core)
1781		
1782		
1783		
1784	VI.A.2.d)	The privilege of progressive authority and responsibility, conditional independence, and a supervisory role in patient care delegated to each fellow must be assigned by the program director and faculty members. ^(Core)
1785		
1786		
1787		
1788		
1789	VI.A.2.d).(1)	The program director must evaluate each fellow's abilities based on specific criteria, guided by the Milestones. ^(Core)
1790		
1791		
1792		
1793	VI.A.2.d).(2)	Faculty members functioning as supervising physicians must delegate portions of care to fellows based on the needs of the patient and the skills of each fellow. ^(Core)
1794		
1795		
1796		
1797		
1798	VI.A.2.d).(3)	Fellows should serve in a supervisory role to junior fellows and residents in recognition of their progress toward independence, based on the needs of each patient and the skills of the individual resident or fellow. ^(Detail)
1799		
1800		
1801		
1802		
1803		
1804	VI.A.2.e)	Programs must set guidelines for circumstances and events in which fellows must communicate with the supervising faculty member(s). ^(Core)
1805		
1806		
1807		
1808	VI.A.2.e).(1)	Each fellow must know the limits of their scope of authority, and the circumstances under which the fellow is permitted to act with conditional independence. ^(Outcome)
1809		
1810		
1811		
1812		

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

1813

1814 VI.A.2.f) Faculty supervision assignments must be of sufficient
1815 duration to assess the knowledge and skills of each fellow
1816 and to delegate to the fellow the appropriate level of patient
1817 care authority and responsibility. ^(Core)

1818

1819 **VI.B. Professionalism**

1820

1821 VI.B.1. Programs, in partnership with their Sponsoring Institutions, must
1822 educate fellows and faculty members concerning the professional
1823 responsibilities of physicians, including their obligation to be
1824 appropriately rested and fit to provide the care required by their
1825 patients. ^(Core)

1826

1827 VI.B.2. The learning objectives of the program must:

1828

1829 VI.B.2.a) be accomplished through an appropriate blend of supervised
1830 patient care responsibilities, clinical teaching, and didactic
1831 educational events; ^(Core)

1832

1833 VI.B.2.b) be accomplished without excessive reliance on fellows to
1834 fulfill non-physician obligations; and, ^(Core)

1835

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1836

1837 VI.B.2.c) ensure manageable patient care responsibilities. ^(Core)

1838

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1839

1840 VI.B.3. The program director, in partnership with the Sponsoring Institution,
1841 must provide a culture of professionalism that supports patient
1842 safety and personal responsibility. ^(Core)

1843

1844 VI.B.4. Fellows and faculty members must demonstrate an understanding
1845 of their personal role in the:

- 1847 VI.B.4.a) provision of patient- and family-centered care; ^(Outcome)
- 1848
- 1849 VI.B.4.b) safety and welfare of patients entrusted to their care,
1850 including the ability to report unsafe conditions and adverse
1851 events; ^(Outcome)
- 1852
- Background and Intent:** This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.
- 1853
- 1854 VI.B.4.c) assurance of their fitness for work, including: ^(Outcome)
- 1855
- Background and Intent:** This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.
- 1856
- 1857 VI.B.4.c).(1) management of their time before, during, and after
1858 clinical assignments; and, ^(Outcome)
- 1859
- 1860 VI.B.4.c).(2) recognition of impairment, including from illness,
1861 fatigue, and substance use, in themselves, their peers,
1862 and other members of the health care team. ^(Outcome)
- 1863
- 1864 VI.B.4.d) commitment to lifelong learning; ^(Outcome)
- 1865
- 1866 VI.B.4.e) monitoring of their patient care performance improvement
1867 indicators; and, ^(Outcome)
- 1868
- 1869 VI.B.4.f) accurate reporting of clinical and educational work hours,
1870 patient outcomes, and clinical experience data. ^(Outcome)
- 1871
- 1872 VI.B.5. All fellows and faculty members must demonstrate responsiveness
1873 to patient needs that supersedes self-interest. This includes the
1874 recognition that under certain circumstances, the best interests of
1875 the patient may be served by transitioning that patient's care to
1876 another qualified and rested provider. ^(Outcome)
- 1877
- 1878 VI.B.6. Programs, in partnership with their Sponsoring Institutions, must
1879 provide a professional, equitable, respectful, and civil environment
1880 that is free from discrimination, sexual and other forms of
1881 harassment, mistreatment, abuse, or coercion of students, fellows,
1882 faculty, and staff. ^(Core)
- 1883
- 1884 VI.B.7. Programs, in partnership with their Sponsoring Institutions, should
1885 have a process for education of fellows and faculty regarding
1886 unprofessional behavior and a confidential process for reporting,
1887 investigating, and addressing such concerns. ^(Core)

1888		
1889	VI.C.	Well-Being
1890		
1891		<i>Psychological, emotional, and physical well-being are critical in the development of the competent, caring, and resilient physician and require proactive attention to life inside and outside of medicine. Well-being requires that physicians retain the joy in medicine while managing their own real-life stresses. Self-care and responsibility to support other members of the health care team are important components of professionalism; they are also skills that must be modeled, learned, and nurtured in the context of other aspects of fellowship training.</i>
1892		
1893		
1894		
1895		
1896		
1897		
1898		
1899		
1900		<i>Fellows and faculty members are at risk for burnout and depression. Programs, in partnership with their Sponsoring Institutions, have the same responsibility to address well-being as other aspects of resident competence. Physicians and all members of the health care team share responsibility for the well-being of each other. For example, a culture which encourages covering for colleagues after an illness without the expectation of reciprocity reflects the ideal of professionalism. A positive culture in a clinical learning environment models constructive behaviors, and prepares fellows with the skills and attitudes needed to thrive throughout their careers.</i>
1901		
1902		
1903		
1904		
1905		
1906		
1907		
1908		
1909		
1910		

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website: www.acgme.org/physicianwellbeing.

The ACGME also created a repository for well-being materials, assessments, presentations, and more on the [Well-Being Tools and Resources page](#) in Learn at ACGME for programs seeking to develop or strengthen their own well-being initiatives. There are many activities that programs can implement now to assess and support physician well-being. These include the distribution and analysis of culture of safety surveys, ensuring the availability of counseling services, and paying attention to the safety of the entire health care team.

1911		
1912	VI.C.1.	The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:
1913		
1914		
1915	VI.C.1.a)	efforts to enhance the meaning that each fellow finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; ^(Core)
1916		
1917		
1918		
1919		
1920		
1921		

1922	VI.C.1.b)	attention to scheduling, work intensity, and work compression that impacts fellow well-being; ^(Core)
1923		
1924		
1925	VI.C.1.c)	evaluating workplace safety data and addressing the safety of fellows and faculty members; ^(Core)
1926		
1927		
	Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.	
1928		
1929	VI.C.1.d)	policies and programs that encourage optimal fellow and faculty member well-being; and, ^(Core)
1930		
1931		
	Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.	
1932		
1933	VI.C.1.d).(1)	Fellows must be given the opportunity to attend medical, mental health, and dental care appointments, including those scheduled during their working hours. ^(Core)
1934		
1935		
1936		
1937		
	Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.	
1938		
1939	VI.C.1.e)	attention to fellow and faculty member burnout, depression, and substance use disorder. The program, in partnership with its Sponsoring Institution, must educate faculty members and fellows in identification of the symptoms of burnout, depression, and substance use disorder, including means to assist those who experience these conditions. Fellows and faculty members must also be educated to recognize those symptoms in themselves and how to seek appropriate care. The program, in partnership with its Sponsoring Institution, must: ^(Core)

1949		
	Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance use disorder. Materials and more information are available in Learn at ACGME (https://dl.acgme.org/pages/well-being-tools-resources).	
1950		
1951	VI.C.1.e).(1)	encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another
1952		
1953		

1954 fellow, resident, or faculty member may be displaying
1955 signs of burnout, depression, a substance use
1956 disorder, suicidal ideation, or potential for violence;
1957 (Core)
1958

Background and Intent: Individuals experiencing burnout, depression, substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

1959
1960 VI.C.1.e).(2) provide access to appropriate tools for self-screening;
1961 and, (Core)
1962
1963 VI.C.1.e).(3) provide access to confidential, affordable mental
1964 health assessment, counseling, and treatment,
1965 including access to urgent and emergent care 24
1966 hours a day, seven days a week. (Core)
1967

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

1968
1969 VI.C.2. There are circumstances in which fellows may be unable to attend
1970 work, including but not limited to fatigue, illness, family
1971 emergencies, and parental leave. Each program must allow an
1972 appropriate length of absence for fellows unable to perform their
1973 patient care responsibilities. (Core)
1974
1975 VI.C.2.a) The program must have policies and procedures in place to

1997		
1998	VI.D.2.	Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

educational and clinical experience opportunities, as well as reasonable opportunities for rest and personal activities.

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

VI.F.1. Maximum Hours of Clinical and Educational Work per Week

Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting. ^(Core)

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement.

Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements

acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

- VI.F.2. Mandatory Time Free of Clinical Work and Education**
- VI.F.2.a)** The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. (Core)
- VI.F.2.b)** Fellows should have eight hours off between scheduled clinical work and education periods. (Detail)
- VI.F.2.b).(1)** There may be circumstances when fellows choose to stay to care for their patients or return to the hospital with fewer than eight hours free of clinical experience and education. This must occur within the context of the 80-hour and the one-day-off-in-seven requirements. (Detail)

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their

scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

2082
2083
2084
2085

VI.F.2.c) Fellows must have at least 14 hours free of clinical work and education after 24 hours of in-house call. ^(Core)

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

2086
2087
2088
2089
2090
2091

VI.F.2.d) Fellows must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. ^(Core)

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

VI.F.3. Maximum Clinical Work and Education Period Length

VI.F.3.a) Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical assignments. ^(Core)

VI.F.3.a).(1) Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or fellow education. ^(Core)

VI.F.3.a).(1).(a) Additional patient care responsibilities must not be assigned to a fellow during this time. ^(Core)

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a

member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

- 2107
2108 **VI.F.4.** **Clinical and Educational Work Hour Exceptions**
2109
2110 **VI.F.4.a)** **In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:**
2111
2112
2113
2114
2115 **VI.F.4.a).(1)** **to continue to provide care to a single severely ill or unstable patient;** (Detail)
2116
2117
2118 **VI.F.4.a).(2)** **humanistic attention to the needs of a patient or family; or,** (Detail)
2119
2120
2121 **VI.F.4.a).(3)** **to attend unique educational events.** (Detail)
2122
2123 **VI.F.4.b)** **These additional hours of care or education will be counted toward the 80-hour weekly limit.** (Detail)
2124
2125

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

- 2126
2127 **VI.F.4.c)** **A Review Committee may grant rotation-specific exceptions for up to 10 percent or a maximum of 88 clinical and educational work hours to individual programs based on a sound educational rationale.**
2128
2129
2130
2131
2132 The Review Committee for Internal Medicine will not consider requests for exceptions to the 80-hour limit to the fellows' work week.
2133
2134
2135
2136 **VI.F.5.** **Moonlighting**
2137
2138 **VI.F.5.a)** **Moonlighting must not interfere with the ability of the fellow to achieve the goals and objectives of the educational program, and must not interfere with the fellow's fitness for work nor compromise patient safety.** (Core)
2139
2140
2141
2142

2143 VI.F.5.b) Time spent by fellows in internal and external moonlighting
2144 (as defined in the ACGME Glossary of Terms) must be
2145 counted toward the 80-hour maximum weekly limit. ^(Core)
2146

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

2147 VI.F.6. In-House Night Float
2148
2149
2150 Night float must occur within the context of the 80-hour and one-
2151 day-off-in-seven requirements. ^(Core)
2152

Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

2153 VI.F.7. Maximum In-House On-Call Frequency
2154
2155
2156 Fellows must be scheduled for in-house call no more frequently than
2157 every third night (when averaged over a four-week period). ^(Core)
2158

2159 VI.F.7.a) Internal Medicine fellowships must not average in-house call over
2160 a four-week period. ^(Core)

2161 VI.F.8. At-Home Call
2162

2163 VI.F.8.a) Time spent on patient care activities by fellows on at-home
2164 call must count toward the 80-hour maximum weekly limit.
2165 The frequency of at-home call is not subject to the every-
2166 third-night limitation, but must satisfy the requirement for one
2167 day in seven free of clinical work and education, when
2168 averaged over four weeks. ^(Core)
2169

2170 VI.F.8.a).(1) At-home call must not be so frequent or taxing as to
2171 preclude rest or reasonable personal time for each
2172 fellow. ^(Core)
2173

2174 VI.F.8.b) Fellows are permitted to return to the hospital while on at-
2175 home call to provide direct care for new or established
2176 patients. These hours of inpatient patient care must be
2177 included in the 80-hour maximum weekly limit. ^(Detail)
2178

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an
