1 **ACGME Program Requirements for Graduate Medical Education**
2 **in Pulmonary Disease and Critical Care Medicine**

3
4 **Common Program Requirements (Fellowship) are in BOLD**

5
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.
9

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

10
11 **Introduction**

12
13 **Int.A.** *Fellowship is advanced graduate medical education beyond a core*
14 *residency program for physicians who desire to enter more specialized*
15 *practice. Fellowship-trained physicians serve the public by providing*
16 *subspecialty care, which may also include core medical care, acting as a*
17 *community resource for expertise in their field, creating and integrating*
18 *new knowledge into practice, and educating future generations of*
19 *physicians. Graduate medical education values the strength that a diverse*
20 *group of physicians brings to medical care.*

21
22 *Fellows who have completed residency are able to practice independently*
23 *in their core specialty. The prior medical experience and expertise of*
24 *fellows distinguish them from physicians entering into residency training.*
25 *The fellow's care of patients within the subspecialty is undertaken with*
26 *appropriate faculty supervision and conditional independence. Faculty*
27 *members serve as role models of excellence, compassion,*
28 *professionalism, and scholarship. The fellow develops deep medical*
29 *knowledge, patient care skills, and expertise applicable to their focused*
30 *area of practice. Fellowship is an intensive program of subspecialty clinical*
31 *and didactic education that focuses on the multidisciplinary care of*
32 *patients. Fellowship education is often physically, emotionally, and*
33 *intellectually demanding, and occurs in a variety of clinical learning*
34 *environments committed to graduate medical education and the well-being*
35 *of patients, residents, fellows, faculty members, students, and all members*
36 *of the health care team.*

37
38 *In addition to clinical education, many fellowship programs advance*
39 *fellows' skills as physician-scientists. While the ability to create new*
40 *knowledge within medicine is not exclusive to fellowship-educated*
41 *physicians, the fellowship experience expands a physician's abilities to*
42 *pursue hypothesis-driven scientific inquiry that results in contributions to*
43 *the medical literature and patient care. Beyond the clinical subspecialty*
44 *expertise achieved, fellows develop mentored relationships built on an*
45 *infrastructure that promotes collaborative research.*

46
47 **Int.B.** **Definition of Subspecialty**

48
49 Pulmonary medicine focuses on the etiology, diagnosis, prevention, and
50 treatment of diseases affecting the lungs and related organs. Critical care
51 medicine is concerned with the diagnosis, management, and prevention of
52 complications in patients who are severely ill and who usually require intensive
53 monitoring and/or organ system support. Pulmonary disease and critical care
54 medicine fellowships provide advanced education to allow fellows to acquire
55 competence in these subspecialties with sufficient expertise to act as an
56 independent consultant. ^{(Core)*}

57
58 **Int.C. Length of Educational Program**

59
60 The educational program in pulmonary disease and critical care medicine must
61 be 36 months in length. ^(Core)

62
63 **I. Oversight**

64
65 **I.A. Sponsoring Institution**

66
67 *The Sponsoring Institution is the organization or entity that assumes the*
68 *ultimate financial and academic responsibility for a program of graduate*
69 *medical education consistent with the ACGME Institutional Requirements.*

70
71 *When the Sponsoring Institution is not a rotation site for the program, the*
72 *most commonly utilized site of clinical activity for the program is the*
73 *primary clinical site.*

74

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

75
76 **I.A.1. The program must be sponsored by one ACGME-accredited**
77 **Sponsoring Institution.** ^(Core)

78
79 **I.B. Participating Sites**

80
81 *A participating site is an organization providing educational experiences or*
82 *educational assignments/rotations for fellows.*

83
84 **I.B.1. The program, with approval of its Sponsoring Institution, must**
85 **designate a primary clinical site.** ^(Core)

86
87 **I.B.1.a)** A pulmonary disease and critical care medicine fellowship must
88 function as an integral part of an ACGME-accredited residency in
89 internal medicine. ^(Core)

- 90
- 91 I.B.1.b) Located at the primary clinical site, there should be at least three
 92 ACGME-accredited internal medicine subspecialty programs from
 93 among the following disciplines: cardiovascular disease,
 94 gastroenterology, infectious diseases, nephrology, or pulmonary
 95 disease. ^{(Detail)†}
 96
- 97 I.B.1.c) The Sponsoring Institution must establish the pulmonary disease
 98 and critical care medicine fellowship within a department of
 99 internal medicine or an administrative unit with the primary
 100 mission to advance internal medicine subspecialty education and
 101 patient care. ^(Detail)
 102
- 103 I.B.1.d) The Sponsoring Institution must ensure there is a reporting
 104 relationship with the program director of the internal medicine
 105 residency program to ensure compliance with ACGME
 106 accreditation requirements. ^(Core)
 107
- 108 **I.B.2. There must be a program letter of agreement (PLA) between the
 109 program and each participating site that governs the relationship
 110 between the program and the participating site providing a required
 111 assignment. ^(Core)**
 112
- 113 **I.B.2.a) The PLA must:**
- 114
- 115 **I.B.2.a).(1) be renewed at least every 10 years; and, ^(Core)**
 116
- 117 **I.B.2.a).(2) be approved by the designated institutional official
 118 (DIO). ^(Core)**
 119
- 120 **I.B.3. The program must monitor the clinical learning and working
 121 environment at all participating sites. ^(Core)**
 122
- 123 **I.B.3.a) At each participating site there must be one faculty member,
 124 designated by the program director, who is accountable for
 125 fellow education for that site, in collaboration with the
 126 program director. ^(Core)**
 127

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for fellows
- Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern fellow education during the assignment

131
132
133
134
135
136
137
138
139

I.B.4. The program director must submit any additions or deletions of participating sites routinely providing an educational experience, required for all fellows, of one month full time equivalent (FTE) or more through the ACGME’s Accreditation Data System (ADS). ^(Core)

I.C. The program, in partnership with its Sponsoring Institution, must engage in practices that focus on mission-driven, ongoing, systematic recruitment and retention of a diverse and inclusive workforce of residents (if present), fellows, faculty members, senior administrative staff members, and other relevant members of its academic community. ^(Core)

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution’s mission and aims. The program’s annual evaluation must include an assessment of the program’s efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

163
164

I.D. Resources

I.D.1. The program, in partnership with its Sponsoring Institution, must ensure the availability of adequate resources for fellow education. ^(Core)

I.D.1.a) Space and Equipment

There must be space and equipment for the program, including meeting rooms, examination rooms, computers, visual and other educational aids, and work/study space. ^(Core)

I.D.1.b) Facilities

I.D.1.b).(1) Inpatient and outpatient systems must be in place to prevent fellows from performing routine clerical functions, such as scheduling tests and appointments, and retrieving records and letters. ^(Detail)

I.D.1.b).(2) The Sponsoring Institution must provide the broad range of facilities and clinical support services required to provide comprehensive care of adult patients. ^(Core)

I.D.1.b).(3) Fellows must have access to a lounge facility during

165		assigned duty hours. ^(Detail)
166		
167	I.D.1.b).(4)	When fellows are in the hospital, assigned night duty, or called in from home, they must be provided with a secure space for their belongings. ^(Detail)
168		
169		
170		
171	I.D.1.c)	Laboratory and Imaging Services
172		
173		The following must be available at the primary clinical site:
174		
175	I.D.1.c).(1)	a supporting laboratory that provides complete and prompt laboratory evaluation; ^(Core)
176		
177		
178	I.D.1.c).(2)	a pulmonary function testing laboratory; ^(Core)
179		
180	I.D.1.c).(3)	timely bedside imaging services for patients in the critical care units; ^(Core)
181		
182		
183	I.D.1.c).(4)	computed tomography (CT) imaging, including CT angiography; and, ^(Core)
184		
185		
186	I.D.1.c).(5)	a bronchoscopy suite, including appropriate space and staffing for pulmonary procedures. ^(Core)
187		
188		
189	I.D.1.d)	Other Support Services
190		
191	I.D.1.d).(1)	The following must be available:
192		
193	I.D.1.d).(1).(a)	an active open heart surgery program; ^(Core)
194		
195	I.D.1.d).(1).(b)	a diagnostic laboratory for sleep disorders; ^(Core)
196		
197	I.D.1.d).(1).(c)	pathology services, including exfoliative cytology; ^(Core)
198		
199		
200	I.D.1.d).(1).(d)	thoracic surgery service; ^(Core)
201		
202	I.D.1.d).(1).(e)	an active emergency service; ^(Core)
203		
204	I.D.1.d).(1).(f)	postoperative care and respiratory care services; and, ^(Core)
205		
206		
207	I.D.1.d).(1).(g)	nutritional support services. ^(Core)
208		
209	I.D.1.d).(2)	Critical care unit(s) must be located in a designated area within the hospital, and must be constructed and designed specifically for the care of critically-ill patients. ^(Core)
210		
211		
212		
213	I.D.1.d).(2).(a)	Whether operating in separate locations or in combined facilities, the program must provide the equivalent of a medical intensive care unit (MICU),
214		
215		

- 216 a surgical intensive care unit (SICU), and a
 217 coronary intensive care unit (CICU). ^(Detail)
 218
 219 I.D.1.d).(3) The MICU or its equivalent must be at the primary clinical
 220 site, and should be the focus of a teaching service. ^(Core)
 221
 222 I.D.1.d).(4) There must be facilities to care for patients with acute
 223 myocardial infarction, severe trauma, shock, recent open
 224 heart surgery, recent major thoracic or abdominal surgery,
 225 and severe neurologic and neurosurgical conditions. ^(Core)
 226
 227 I.D.1.d).(5) Other services should be available, including
 228 anesthesiology, immunology, laboratory medicine,
 229 microbiology, occupational medicine, otolaryngology,
 230 pathology, physical medicine and rehabilitation, and
 231 radiology. ^(Core)
 232
 233 I.D.1.e) Medical Records
 234
 235 Access to an electronic health record should be provided. In the
 236 absence of an existing electronic health record, institutions must
 237 demonstrate institutional commitment to its development, and
 238 progress towards its implementation. ^(Core)
 239
 240 **I.D.2. The program, in partnership with its Sponsoring Institution, must**
 241 **ensure healthy and safe learning and working environments that**
 242 **promote fellow well-being and provide for:** ^(Core)
 243
 244 **I.D.2.a) access to food while on duty;** ^(Core)
 245
 246 **I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available**
 247 **and accessible for fellows with proximity appropriate for safe**
 248 **patient care;** ^(Core)
 249

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

- 250
 251 I.D.2.c) **clean and private facilities for lactation that have refrigeration**
 252 **capabilities, with proximity appropriate for safe patient care;**
 253 ^(Core)
 254

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support

within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

292
293
294
295
296
297
- I.D.2.d) security and safety measures appropriate to the participating site; and, ^(Core)
 - I.D.2.e) accommodations for fellows with disabilities consistent with the Sponsoring Institution's policy. ^(Core)
 - I.D.3. **Fellows must have ready access to subspecialty-specific and other appropriate reference material in print or electronic format. This must include access to electronic medical literature databases with full text capabilities.** ^(Core)
 - I.D.4. **The program's educational and clinical resources must be adequate to support the number of fellows appointed to the program.** ^(Core)
 - I.D.4.a) Patient Population
 - I.D.4.a).(1) The patient population must have a variety of clinical problems and stages of diseases. ^(Core)
 - I.D.4.a).(2) There must be patients of each gender, with a broad age range, including geriatric patients. ^(Core)
 - I.D.4.a).(3) A sufficient number of patients must be available to enable each fellow to achieve the required educational outcomes. ^(Core)
 - I.D.4.a).(4) Because critical care medicine is multidisciplinary in nature, the program must provide opportunities to manage adult patients with a wide variety of serious illnesses and injuries requiring treatment in a critical care setting. ^(Detail)
 - I.D.4.a).(5) There must be an average daily census of at least five patients per fellow during assignments to critical care units. ^(Detail)
 - I.E. ***A fellowship program usually occurs in the context of many learners and other care providers and limited clinical resources. It should be structured to optimize education for all learners present.***
 - I.E.1. **Fellows should contribute to the education of residents in core programs, if present.** ^(Core)

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning

environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

II. Personnel

II.A. Program Director

II.A.1. There must be one faculty member appointed as program director with authority and accountability for the overall program, including compliance with all applicable program requirements. (Core)

II.A.1.a) The Sponsoring Institution's Graduate Medical Education Committee (GMEC) must approve a change in program director. (Core)

II.A.1.b) Final approval of the program director resides with the Review Committee. (Core)

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and have overall responsibility for the program. The program director's nomination is reviewed and approved by the GMEC. Final approval of the program director resides with the applicable ACGME Review Committee.

314
315
316
317
318
319
320
321
322
323
324
325
326

II.A.2. The program director and, as applicable, the program's leadership team, must be provided with support adequate for administration of the program based upon its size and configuration. (Core)

II.A.2.a) ~~At a minimum, the program director must be provided with the salary support required to devote 20-50 percent FTE of non-clinical time to the administration of the program. (Core)~~

At a minimum, the program director must be provided with the dedicated time and support specified below for administration of the program: (Core)

<u>Number of Approved Fellow Positions</u>	<u>Minimum Support Required (FTE)</u>
<u><7</u>	<u>.2</u>
<u>7-9</u>	<u>.25</u>
<u>10-12</u>	<u>.3</u>
<u>13-15</u>	<u>.35</u>
<u>16-18</u>	<u>.4</u>
<u>19-21</u>	<u>.45</u>
<u>>21</u>	<u>.5</u>

327
328
329
330

II.A.2.b) Programs must appoint at least one of the subspecialty-certified core faculty members to be associate program director(s). The associate program directors(s) must be provided with support

331
332
333

equal to a dedicated minimum time for administration of the program as follows: (Core)

<u>Number of Approved Fellow Positions</u>	<u>Minimum Support Required (FTE)</u>
<u><7</u>	<u>0</u>
<u>7-9</u>	<u>.13</u>
<u>10-12</u>	<u>.14</u>
<u>13-15</u>	<u>.15</u>
<u>16-18</u>	<u>.16</u>
<u>19-21</u>	<u>.17</u>
<u>22-24</u>	<u>.18</u>
<u>25-27</u>	<u>.24</u>
<u>28-30</u>	<u>.30</u>
<u>31-33</u>	<u>.36</u>
<u>34-36</u>	<u>.42</u>
<u>37-39</u>	<u>.48</u>

334

Background and Intent: To achieve successful graduate medical education, individuals serving as education and administrative leaders of fellowship programs, as well as those significantly engaged in the education, supervision, evaluation, and mentoring of fellows, must have sufficient dedicated professional time to perform the vital activities required to sustain an accredited program.

The ultimate outcome of graduate medical education is excellence in fellow education and patient care.

The program director and, as applicable, the program leadership team, devote a portion of their professional effort to the oversight and management of the fellowship program, as defined in II.A.4.-II.A.4.a).(16). Both provision of support for the time required for the leadership effort and flexibility regarding how this support is provided are important. Programs, in partnership with their Sponsoring Institutions, may provide support for this time in a variety of ways. Examples of support may include, but are not limited to, salary support, supplemental compensation, educational value units, or relief of time from other professional duties.

Program directors and, as applicable, members of the program leadership team, who are new to the role may need to devote additional time to program oversight and management initially as they learn and become proficient in administering the program. It is suggested that during this initial period the support described above be increased as needed.

335

Subspecialty-Specific Background and Intent: For instance, a program with an approved complement of 12 fellows is required to have at least 30 percent FTE support for the Program Director and at least 14 percent FTE support for the associate program director(s). Because an associate program director is also a core faculty member, the minimum dedicated time requirements for associate program directors are inclusive of core faculty activities. An additional 10 percent FTE for the core faculty position is not required. For example, if one core faculty member is named the associate program director for a 12-fellow program, the required minimum

support for that position is 14 percent FTE. Further, the Review Committee allows the minimum required FTE support to be shared among multiple associate program directors, as delegated by and at the discretion of the program director.

- 336 **II.A.3. Qualifications of the program director:**
337
- 338 **II.A.3.a) must include subspecialty expertise and qualifications**
339 **acceptable to the Review Committee; and, (Core)**
340
- 341 II.A.3.a).(1) The program director must have administrative experience
342 and at least three years of participation as an active faculty
343 member in an ACGME-accredited internal medicine
344 residency or pulmonary disease or critical care medicine
345 fellowship. (Core)
346
- 347 **II.A.3.b) must include current certification in the subspecialty for**
348 **which they are the program director by the American Board**
349 **of Internal Medicine (ABIM) or by the American Osteopathic**
350 **Board of Internal Medicine (AOBIM), or subspecialty**
351 **qualifications that are acceptable to the Review Committee.**
352 **(Core)**
353
- 354 II.A.3.b).(1) The Review Committee only accepts current ABIM or
355 AOBIM certification in pulmonary disease or critical care
356 medicine. (Core)
357
- 358 II.A.3.b).(2) If the program director has ABIM or AOBIM certification in
359 only one of the subspecialties, a faculty member certified in
360 the other subspecialty by the ABIM or AOBIM must be
361 appointed Associate Program Director, be responsible for
362 the educational program in that second area, and assist
363 the program director with the administrative and clinical
364 oversight of the program. (Core)
365
- 366 **II.A.4. Program Director Responsibilities**
367
- 368 **The program director must have responsibility, authority, and**
369 **accountability for: administration and operations; teaching and**
370 **scholarly activity; fellow recruitment and selection, evaluation, and**
371 **promotion of fellows, and disciplinary action; supervision of fellows;**
372 **and fellow education in the context of patient care. (Core)**
373
- 374 **II.A.4.a) The program director must:**
375
- 376 **II.A.4.a).(1) be a role model of professionalism; (Core)**
377

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality

patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

378
379
380
381
382
383

- II.A.4.a).(2) design and conduct the program in a fashion consistent with the needs of the community, the mission(s) of the Sponsoring Institution, and the mission(s) of the program; ^(Core)

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

384
385
386
387
388

- II.A.4.a).(3) administer and maintain a learning environment conducive to educating the fellows in each of the ACGME Competency domains; ^(Core)

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

- II.A.4.a).(4) develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the fellowship program education and at least annually thereafter, as outlined in V.B.; ^(Core)

- II.A.4.a).(5) have the authority to approve program faculty members for participation in the fellowship program education at all sites; ^(Core)

- II.A.4.a).(6) have the authority to remove program faculty members from participation in the fellowship program education at all sites; ^(Core)

- II.A.4.a).(7) have the authority to remove fellows from supervising interactions and/or learning environments that do not meet the standards of the program; ^(Core)

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

- II.A.4.a).(8)** submit accurate and complete information required and requested by the DIO, GMEC, and ACGME; ^(Core)
- II.A.4.a).(9)** provide applicants who are offered an interview with information related to the applicant's eligibility for the relevant subspecialty board examination(s); ^(Core)
- II.A.4.a).(10)** provide a learning and working environment in which fellows have the opportunity to raise concerns and provide feedback in a confidential manner as appropriate, without fear of intimidation or retaliation; ^(Core)
- II.A.4.a).(11)** ensure the program's compliance with the Sponsoring Institution's policies and procedures related to grievances and due process; ^(Core)
- II.A.4.a).(12)** ensure the program's compliance with the Sponsoring Institution's policies and procedures for due process when action is taken to suspend or dismiss, not to promote, or not to renew the appointment of a fellow; ^(Core)

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

- II.A.4.a).(13)** ensure the program's compliance with the Sponsoring Institution's policies and procedures on employment and non-discrimination; ^(Core)
- II.A.4.a).(13).(a)** **Fellows must not be required to sign a non-competition guarantee or restrictive covenant.** ^(Core)
- II.A.4.a).(14)** document verification of program completion for all graduating fellows within 30 days; ^(Core)
- II.A.4.a).(15)** provide verification of an individual fellow's completion upon the fellow's request, within 30 days; and, ^(Core)

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who

have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

obtain review and approval of the Sponsoring Institution's DIO before submitting information or requests to the ACGME, as required in the Institutional Requirements and outlined in the ACGME Program Director's Guide to the Common Program Requirements. ^(Core)

II.B. Faculty

Faculty members are a foundational element of graduate medical education – faculty members teach fellows how to care for patients. Faculty members provide an important bridge allowing fellows to grow and become practice ready, ensuring that patients receive the highest quality of care. They are role models for future generations of physicians by demonstrating compassion, commitment to excellence in teaching and patient care, professionalism, and a dedication to lifelong learning. Faculty members experience the pride and joy of fostering the growth and development of future colleagues. The care they provide is enhanced by the opportunity to teach. By employing a scholarly approach to patient care, faculty members, through the graduate medical education system, improve the health of the individual and the population.

Faculty members ensure that patients receive the level of care expected from a specialist in the field. They recognize and respond to the needs of the patients, fellows, community, and institution. Faculty members provide appropriate levels of supervision to promote patient safety. Faculty members create an effective learning environment by acting in a professional manner and attending to the well-being of the fellows and themselves.

Background and Intent: "Faculty" refers to the entire teaching force responsible for educating fellows. The term "faculty," including "core faculty," does not imply or require an academic appointment.

481
482
483
484
485
486
487
488
489

II.B.1.

For each participating site, there must be a sufficient number of faculty members with competence to instruct and supervise all fellows at that location. ^(Core)

II.B.2.

Faculty members must:

II.B.2.a)

be role models of professionalism; ^(Core)

II.B.2.b)

demonstrate commitment to the delivery of safe, quality, cost-effective, patient-centered care; ^(Core)

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed

during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

- 490
491 **II.B.2.c)** demonstrate a strong interest in the education of fellows; ^(Core)
492
493 **II.B.2.d)** devote sufficient time to the educational program to fulfill
494 their supervisory and teaching responsibilities; ^(Core)
495
496 **II.B.2.e)** administer and maintain an educational environment
497 conducive to educating fellows; ^(Core)
498
499 **II.B.2.f)** regularly participate in organized clinical discussions,
500 rounds, journal clubs, and conferences; and, ^(Core)
501
502 **II.B.2.g)** pursue faculty development designed to enhance their skills
503 at least annually. ^(Core)
504

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

- 505
506 **II.B.3. Faculty Qualifications**
507
508 **II.B.3.a)** Faculty members must have appropriate qualifications in
509 their field and hold appropriate institutional appointments.
510 ^(Core)
511
512 **II.B.3.b)** Subspecialty physician faculty members must:
513
514 **II.B.3.b).(1)** have current certification in the subspecialty by the
515 **American Board of Internal Medicine or the American**
516 **Osteopathic Board of Internal Medicine, or possess**
517 **qualifications judged acceptable to the Review**
518 **Committee.** ^(Core)
519
520 **II.B.3.c)** Any non-physician faculty members who participate in
521 fellowship program education must be approved by the
522 program director. ^(Core)
523

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to

the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

II.B.3.d) Any other specialty physician faculty members must have current certification in their specialty by the appropriate American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board, or possess qualifications judged acceptable to the Review Committee. ^(Core)

II.B.3.d).(1) Other Faculty

II.B.3.d).(1).(a) ABIM- or AOBIM-certified clinical faculty members in nephrology, gastroenterology, cardiology, infectious disease, hematology, and oncology must participate in the program. ^(Core)

II.B.3.d).(1).(b) Faculty from several related disciplines, including general surgery, thoracic surgery, urology, orthopaedic surgery, obstetrics and gynecology, neurology, neurological surgery, emergency medicine, anesthesiology, cardiovascular surgery, and vascular surgery must be available to participate in the program. ^(Core)

II.B.4. Core Faculty

Core faculty members must have a significant role in the education and supervision of fellows and must devote a significant portion of their entire effort to fellow education and/or administration, and must, as a component of their activities, teach, evaluate, and provide formative feedback to fellows. ^(Core)

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum, mentoring fellows, and assessing fellows' progress toward achievement of competence in and the independent practice of the specialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program. Core faculty members may also be selected for their specific expertise and unique contribution to the program. Core faculty members are engaged in a broad range of activities, which may vary across programs and specialties. Core faculty members provide clinical teaching and supervision of fellows, and also participate in non-clinical activities related to fellow education and program administration. Examples of these non-clinical activities include, but are not limited to, interviewing and selecting fellow applicants, providing didactic instruction, mentoring fellows, simulation exercises, completing the annual ACGME Faculty Survey, and participating on the program's Clinical Competency Committee, Program Evaluation Committee, and other GME committees.

555
556
557

II.B.4.a) Core faculty members must be designated by the program director. ^(Core)

558
559 **II.B.4.b) Core faculty members must complete the annual ACGME**
560 **Faculty Survey.** ^(Core)

561
562 II.B.4.c) In addition to the program director, there must be at least three
563 core faculty members certified in pulmonary disease or critical
564 care medicine by the ABIM or the AOBIM. ^(Core)
565

~~Specialty Background and Intent: The program must have a minimum number of ABIM- or AOBIM-certified pulmonary disease or critical care medicine faculty members who devote significant time to teaching, supervising, and advising residents, and working closely with the program director and associate program director. One way the pulmonary disease or critical care medicine-certified faculty members can demonstrate they are devoting a significant portion of their effort to resident education is by dedicating an average of 10 hours per week to the program.~~

566
567 II.B.4.d) There must be at least one core faculty member certified in
568 pulmonary disease and/or critical care medicine by the ABIM or
569 the AOBIM for every 1.5 fellows. ^(Core)
570

571 II.B.4.e) Among the program director and the required number of
572 subspecialty-certified core faculty members, at least 50 percent of
573 the individuals must be certified in pulmonary disease by the ABIM
574 or AOBIM, and at least 50 percent of the individuals must be
575 certified in critical care medicine by the ABIM or AOBIM. ^(Core)
576

577 II.B.4.f) ~~If an appointment has not been made in line with program~~
578 ~~requirement II.A.3.b).(2), one of the subspecialty-certified core~~
579 ~~faculty members must be appointed Associate Program Director to~~
580 ~~assist the program director with the administrative and clinical~~
581 ~~oversight of the program.~~ ^(Core)
582

583 At a minimum, the required core faculty members, in aggregate
584 and excluding members of the program leadership, must be
585 provided with support equal to an average dedicated minimum of
586 .1 FTE for educational and administrative responsibilities that do
587 not involve direct patient care. ^(Core)
588

Subspecialty-Specific Background and Intent: For instance, a program with an approved complement of 12 fellows is required to have a minimum of eight ABIM- or AOBIM- subspecialty-certified faculty members and an FTE of 10 percent each. Because an associate program director is also a core faculty member, the minimum dedicated time requirements for associate program directors are inclusive of core faculty activities. An additional 10 percent FTE for the core faculty position is not required. For example, if one core faculty member is named the associate program director for a 12-fellow program, the required minimum support for that position is 14 percent FTE.

589
590 **II.C. Program Coordinator**

591
592 **II.C.1. There must be a program coordinator.** ^(Core)
593

594 **II.C.2. The program coordinator must be provided with support adequate**
 595 **for administration of the program based upon its size and**
 596 **configuration.** ^(Core)

597
 598 **II.C.2.a) At a minimum, the program coordinator must be provided with the**
 599 **dedicated time and support specified below for administration of**
 600 **the program. Additional administrative support must be provided**
 601 **based on the program size as follows:** ^(Core)
 602

<u>Number of Approved Fellow Positions</u>	<u>Minimum FTE Required for Coordinator Support</u>	<u>Additional Aggregate FTE Required for Administration of the Program</u>
<u>1-3</u>	<u>.3</u>	<u>0</u>
<u>4-6</u>	<u>.3</u>	<u>.2</u>
<u>7-9</u>	<u>.3</u>	<u>.38</u>
<u>10-12</u>	<u>.3</u>	<u>.44</u>
<u>13-15</u>	<u>.3</u>	<u>.50</u>
<u>16-18</u>	<u>.3</u>	<u>.56</u>
<u>19-21</u>	<u>.3</u>	<u>.62</u>
<u>22-24</u>	<u>.3</u>	<u>.68</u>
<u>25-27</u>	<u>.3</u>	<u>.74</u>
<u>28-30</u>	<u>.3</u>	<u>.80</u>
<u>31-33</u>	<u>.3</u>	<u>.86</u>
<u>34-36</u>	<u>.3</u>	<u>.92</u>
<u>37-39</u>	<u>.3</u>	<u>.98</u>

603

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as otherwise titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison and facilitator between the learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a key member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management appropriate to the complexity of the program. Program coordinators are expected to develop in-depth knowledge of the ACGME and Program Requirements, including policies and procedures. Program coordinators assist the program director in meeting accreditation requirements, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

604

Subspecialty-Specific Background and Intent: For instance, a program with an approved complement of 12 fellows is required to have at least 74 percent FTE administrative support: 30 percent FTE for the program coordinator; and an additional 44 percent FTE aggregate support. This additional support may be for the program coordinator only or divided among the program coordinator and one or more other administrative personnel. The Review Committee has not specified how the FTE should be distributed to allow programs, in partnership with their Sponsoring Institution, to allocate the FTE as they see fit.

605 **II.D. Other Program Personnel**

606
607 **The program, in partnership with its Sponsoring Institution, must jointly**
608 **ensure the availability of necessary personnel for the effective**
609 **administration of the program.** (Core)
610

611 II.D.1. There must be services available from other health care professionals,
612 including dietitians, language interpreters, nurses, occupational
613 therapists, physical therapists, and social workers. (Detail)
614

615 II.D.2. Personnel must include nurses and technicians skilled in critical care
616 instrumentation, respiratory function, and laboratory medicine. (Detail)
617

618 II.D.3. There must be appropriate and timely consultation from other specialties.
619 (Detail)
620

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

621
622 **III. Fellow Appointments**

623
624 **III.A. Eligibility Criteria**

625
626 **III.A.1. Eligibility Requirements – Fellowship Programs**

627
628 **All required clinical education for entry into ACGME-accredited**
629 **fellowship programs must be completed in an ACGME-accredited**
630 **residency program, an AOA-approved residency program, a**
631 **program with ACGME International (ACGME-I) Advanced Specialty**
632 **Accreditation, or a Royal College of Physicians and Surgeons of**
633 **Canada (RCPSC)-accredited or College of Family Physicians of**
634 **Canada (CFPC)-accredited residency program located in Canada.**
635 (Core)
636

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

637

- 638 **III.A.1.a)** **Fellowship programs must receive verification of each**
639 **entering fellow’s level of competence in the required field,**
640 **upon matriculation, using ACGME, ACGME-I, or CanMEDS**
641 **Milestones evaluations from the core residency program.** ^(Core)
642
- 643 **III.A.1.b)** **Prior to appointment in the fellowship, fellows should have**
644 **completed an internal medicine program that satisfies the**
645 **requirements in III.A.1.** ^(Core)
646
- 647 **III.A.1.b).(1)** **Fellows who did not complete an internal medicine**
648 **program that satisfies the requirements in III.A.1. must**
649 **have completed at least three years of internal medicine**
650 **education prior to starting the fellowship as well as met all**
651 **of the criteria in the “Fellow Eligibility Exception” section**
652 **below.** ^(Core)
653
- 654 **III.A.1.c)** **Fellow Eligibility Exception**
655
656 **The Review Committee for Internal Medicine will allow the**
657 **following exception to the fellowship eligibility requirements:**
658
- 659 **III.A.1.c).(1)** **An ACGME-accredited fellowship program may accept**
660 **an exceptionally qualified international graduate**
661 **applicant who does not satisfy the eligibility**
662 **requirements listed in III.A.1., but who does meet all of**
663 **the following additional qualifications and conditions:**
664 ^(Core)
665
- 666 **III.A.1.c).(1).(a)** **evaluation by the program director and**
667 **fellowship selection committee of the**
668 **applicant’s suitability to enter the program,**
669 **based on prior training and review of the**
670 **summative evaluations of training in the core**
671 **specialty; and,** ^(Core)
672
- 673 **III.A.1.c).(1).(b)** **review and approval of the applicant’s**
674 **exceptional qualifications by the GMEC; and,**
675 ^(Core)
676
- 677 **III.A.1.c).(1).(c)** **verification of Educational Commission for**
678 **Foreign Medical Graduates (ECFMG)**
679 **certification.** ^(Core)
680
- 681 **III.A.1.c).(2)** **Applicants accepted through this exception must have**
682 **an evaluation of their performance by the Clinical**
683 **Competency Committee within 12 weeks of**
684 **matriculation.** ^(Core)
685

<p>Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and</p>

(2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

686
687 **III.B. The program director must not appoint more fellows than approved by the**
688 **Review Committee. (Core)**
689

690 **III.B.1. All complement increases must be approved by the Review**
691 **Committee. (Core)**
692

693 **III.B.2. The number of available fellow positions in the program must be at least**
694 **one per year. (Detail)**
695

696 **III.C. Fellow Transfers**
697

698 **The program must obtain verification of previous educational experiences**
699 **and a summative competency-based performance evaluation prior to**
700 **acceptance of a transferring fellow, and Milestones evaluations upon**
701 **matriculation. (Core)**
702

703 **IV. Educational Program**
704

705 ***The ACGME accreditation system is designed to encourage excellence and***
706 ***innovation in graduate medical education regardless of the organizational***
707 ***affiliation, size, or location of the program.***
708

709 ***The educational program must support the development of knowledgeable, skillful***
710 ***physicians who provide compassionate care.***
711

712 ***In addition, the program is expected to define its specific program aims consistent***
713 ***with the overall mission of its Sponsoring Institution, the needs of the community***
714 ***it serves and that its graduates will serve, and the distinctive capabilities of***
715 ***physicians it intends to graduate. While programs must demonstrate substantial***
716 ***compliance with the Common and subspecialty-specific Program Requirements, it***
717 ***is recognized that within this framework, programs may place different emphasis***
718 ***on research, leadership, public health, etc. It is expected that the program aims***
719 ***will reflect the nuanced program-specific goals for it and its graduates; for***
720 ***example, it is expected that a program aiming to prepare physician-scientists will***
721 ***have a different curriculum from one focusing on community health.***
722

723 **IV.A. The curriculum must contain the following educational components: (Core)**

- 724
725 **IV.A.1.** a set of program aims consistent with the Sponsoring Institution’s
726 mission, the needs of the community it serves, and the desired
727 distinctive capabilities of its graduates; ^(Core)
728
729 **IV.A.1.a)** The program’s aims must be made available to program
730 applicants, fellows, and faculty members. ^(Core)
731
732 **IV.A.2.** competency-based goals and objectives for each educational
733 experience designed to promote progress on a trajectory to
734 autonomous practice in their subspecialty. These must be
735 distributed, reviewed, and available to fellows and faculty members;
736 ^(Core)
737
738 **IV.A.3.** delineation of fellow responsibilities for patient care, progressive
739 responsibility for patient management, and graded supervision in
740 their subspecialty; ^(Core)
741

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

- 742
743 **IV.A.4.** structured educational activities beyond direct patient care; and,
744 ^(Core)
745

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

- 746
747 **IV.A.5.** advancement of fellows’ knowledge of ethical principles
748 foundational to medical professionalism. ^(Core)
749
750 **IV.B.** **ACGME Competencies**
751

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

- 752
753 **IV.B.1.** The program must integrate the following ACGME Competencies
754 into the curriculum: ^(Core)

755
756 **IV.B.1.a) Professionalism**
757
758 **Fellows must demonstrate a commitment to professionalism**
759 **and an adherence to ethical principles.** ^(Core)
760

761 **IV.B.1.b) Patient Care and Procedural Skills**
762

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs*. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

763
764 **IV.B.1.b).(1) Fellows must be able to provide patient care that is**
765 **compassionate, appropriate, and effective for the**
766 **treatment of health problems and the promotion of**
767 **health.** ^(Core)
768

769 IV.B.1.b).(1).(a) Fellows must demonstrate competence in the
770 practice of health promotion, disease prevention,
771 diagnosis, care, and treatment of patients of each
772 gender, from adolescence to old age, during health
773 and all stages of illness. ^(Core)
774

775 IV.B.1.b).(1).(b) Fellows must demonstrate competence in the
776 prevention, evaluation, and management of
777 inpatients and outpatients with:

779 IV.B.1.b).(1).(b).(i) acute lung injury, including radiation,
780 inhalation, and trauma; ^(Core)

782 IV.B.1.b).(1).(b).(ii) acute metabolic disturbances; ^(Core)

784 IV.B.1.b).(1).(b).(ii).(a) including overdosages and
785 intoxication syndromes; ^(Detail)

787 IV.B.1.b).(1).(b).(iii) anaphylaxis and acute allergic reactions in
788 the critical care unit; ^(Core)

790 IV.B.1.b).(1).(b).(iv) cardiovascular diseases in the critical care
791 unit; ^(Core)

793 IV.B.1.b).(1).(b).(v) circulatory failure; ^(Core)
794

795	IV.B.1.b).(1).(b).(vi)	detection and prevention of iatrogenic and nosocomial problems in critical care medicine; ^(Core)
796		
797		
798		
799	IV.B.1.b).(1).(b).(vii)	diffuse interstitial lung disease; ^(Core)
800		
801	IV.B.1.b).(1).(b).(viii)	disorders of the pleura and the mediastinum; ^(Core)
802		
803		
804	IV.B.1.b).(1).(b).(ix)	end of life issues and palliative care; ^(Core)
805		
806	IV.B.1.b).(1).(b).(x)	hypertensive emergencies; ^(Core)
807		
808	IV.B.1.b).(1).(b).(xi)	iatrogenic respiratory diseases; ^(Core)
809

844		
845		

846		infections); (Core)
847		
848	IV.B.1.b).(1).(b).(xxi)	pulmonary malignancy, both primary and metastatic;
849		
850		
851	IV.B.1.b).(1).(b).(xxii)	pulmonary manifestations of systemic diseases; (Core)
852		
853		
854	IV.B.1.b).(1).(b).(xxii).(a)	including collagen vascular disease and diseases that are primary in other organs. (Detail)
855		
856		
857		
858	IV.B.1.b).(1).(b).(xxiii)	pulmonary vascular disease; (Core)
859		
860	IV.B.1.b).(1).(b).(xxiii).(a)	including primary and secondary pulmonary hypertension and the vasculitis and pulmonary hemorrhage syndromes. (Detail)
861		
862		
863		
864		
865	IV.B.1.b).(1).(b).(xxiv)	renal disorders in the critical care unit, including electrolyte and acid-base disturbance and acute renal failure; (Core)
866		
867		
868		
869	IV.B.1.b).(1).(b).(xxv)	respiratory failure; (Core)
870		
871	IV.B.1.b).(1).(b).(xxv).(a)	including the acute respiratory distress syndrome, acute and chronic respiratory failure in obstructive lung diseases, and neuromuscular respiratory drive disorders. (Detail)
872		
873		
874		
875		
876		
877		
878	IV.B.1.b).(1).(b).(xxvi)	sepsis and sepsis syndrome; (Core)
879		
880	IV.B.1.b).(1).(b).(xxvii)	severe organ dysfunction resulting in critical illness to include disorders of the gastrointestinal, neurologic, endocrine, hematologic, musculoskeletal, and immune systems, as well as infections and malignancies; (Core)
881		
882		
883		
884		
885		
886		
887	IV.B.1.b).(1).(b).(xxviii)	shock syndromes; and, (Core)
888		
889	IV.B.1.b).(1).(b).(xxix)	sleep-disordered breathing. (Core)
890		
891	IV.B.1.b).(2)	Fellows must be able to perform all medical, diagnostic, and surgical procedures considered essential for the area of practice. (Core)
892		
893		
894		
895	IV.B.1.b).(2).(a)	Fellows must demonstrate competence in interpreting data derived from various bedside
896		

897		devices commonly employed to monitor patients,
898		and data from laboratory studies related to sputum,
899		bronchopulmonary secretions, pleural fluid. ^(Core)
900		
901	IV.B.1.b).(2).(b)	Fellows must demonstrate competence in
902		procedural and technical skills, including: ^(Core)
903		
904	IV.B.1.b).(2).(b).(i)	airway management; ^(Core)
905		
906	IV.B.1.b).(2).(b).(ii)	the use of a variety of positive pressure
907		ventilatory modes, including: ^(Core)
908		
909	IV.B.1.b).(2).(b).(ii).(a)	initiation and maintenance of
910		ventilatory support; ^(Detail)
911		
912	IV.B.1.b).(2).(b).(ii).(b)	respiratory care techniques; and,
913		^(Detail)
914		
915	IV.B.1.b).(2).(b).(ii).(c)	withdrawal of mechanical ventilatory
916		support. ^(Detail)
917		
918	IV.B.1.b).(2).(b).(iii)	the use of reservoir masks and continuous
919		positive airway pressure masks for delivery
920		of supplemental oxygen, humidifiers,
921		nebulizers, and incentive spirometry; ^(Core)
922		
923	IV.B.1.b).(2).(b).(iv)	flexible fiber-optic bronchoscopy
924		procedures, including those where
925		endobronchial and transbronchial biopsies,
926		and transbronchial needle aspiration are
927		performed; ^(Core)
928		
929	IV.B.1.b).(2).(b).(v)	pulmonary function tests to assess
930		respiratory mechanics and gas exchange;
931		^(Core)
932		
933	IV.B.1.b).(2).(b).(v).(a)	including spirometry, flow volume
934		studies, lung volumes, diffusing
935		capacity, arterial blood gas analysis,
936		exercise studies, and interpretation
937		of the results of bronchoprovocation
938		testing using methacholine or
939		histamine. ^(Detail)
940		
941	IV.B.1.b).(2).(b).(vi)	diagnostic and therapeutic procedures; ^(Core)
942		
943	IV.B.1.b).(2).(b).(vi).(a)	including paracentesis, lumbar
944		puncture, thoracentesis,
945		endotracheal intubation, and related
946		procedures. ^(Detail)
947		

- 948 IV.B.1.b).(2).(b).(vii) use of chest tubes and drainage systems;
949 (Core)
- 950
- 951 IV.B.1.b).(2).(b).(viii) operation of bedside hemodynamic
952 monitoring systems; (Core)
- 953
- 954 IV.B.1.b).(2).(b).(ix) emergency cardioversion; (Core)
- 955
- 956 IV.B.1.b).(2).(b).(x) interpretation of intracranial pressure
957 monitoring; (Core)
- 958
- 959 IV.B.1.b).(2).(b).(xi) nutritional support; (Core)
- 960
- 961 IV.B.1.b).(2).(b).(xii) use of ultrasound techniques to perform
962 thoracentesis and place intravascular and
963 intracavitary tubes and catheters; (Core)
- 964
- 965 IV.B.1.b).(2).(b).(xiii) use of transcutaneous pacemakers; and,
966 (Core)
- 967
- 968 IV.B.1.b).(2).(b).(xiv) the use of paralytic agents and sedative and
969 analgesic drugs in the critical care unit. (Core)
- 970

971 **IV.B.1.c)**

Medical Knowledge

972
973 **Fellows must demonstrate knowledge of established and**
974 **evolving biomedical, clinical, epidemiological and social-**
975 **behavioral sciences, as well as the application of this**
976 **knowledge to patient care. (Core)**

- 977
- 978 IV.B.1.c).(1) Fellows must demonstrate knowledge of the scientific
979 method of problem solving, and evidence-based decision
980 making. (Core)
- 981
- 982 IV.B.1.c).(2) Fellows must demonstrate knowledge of indications,
983 contraindications, limitations, complications, techniques,
984 and interpretation of results of those diagnostic and
985 therapeutic procedures integral to the discipline, including
986 the appropriate indication for and use of screening
987 tests/procedures. (Core)
- 988
- 989 IV.B.1.c).(3) Fellows must demonstrate knowledge in the indications,
990 contradictions, and complications of placement of arterial,
991 central venous, and pulmonary artery balloon flotation
992 catheters. (Core)
- 993
- 994 IV.B.1.c).(4) Fellows must demonstrate knowledge in the indications,
995 contraindications, and complications of placement of
996 percutaneous tracheostomies. (Core)
- 997
- 998 IV.B.1.c).(5) Fellows must demonstrate knowledge of:

999		
1000	IV.B.1.c).(5).(a)	imaging techniques commonly employed in the evaluation of patients with pulmonary disease or critical illness, including the use of ultrasound; ^(Core)
1001		
1002		
1003		
1004	IV.B.1.c).(5).(b)	monitoring and supervising special services, including: ^(Core)
1005		
1006		
1007	IV.B.1.c).(5).(b).(i)	respiratory care units; ^(Detail)
1008		
1009	IV.B.1.c).(5).(b).(ii)	pulmonary function laboratories, including quality control, quality assurance, and proficiency standards; and, ^(Detail)
1010		
1011		
1012		
1013	IV.B.1.c).(5).(b).(iii)	respiratory care techniques and services. ^(Detail)
1014		
1015		
1016	IV.B.1.c).(5).(c)	the basic sciences, with particular emphasis on: ^(Core)
1017		
1018		
1019	IV.B.1.c).(5).(c).(i)	genetics and molecular biology as they relate to pulmonary diseases; ^(Detail)
1020		
1021		
1022	IV.B.1.c).(5).(c).(ii)	developmental biology; ^(Detail)
1023		
1024	IV.B.1.c).(5).(c).(iii)	pulmonary physiology and pathophysiology in systemic diseases; and, ^(Detail)
1025		
1026		
1027	IV.B.1.c).(5).(c).(iv)	biochemistry and physiology, including cell and molecular biology and immunology, as they relate to pulmonary disease. ^(Detail)
1028		
1029		
1030		
1031	IV.B.1.c).(5).(d)	indications, complications, and outcomes of lung transplantation; ^(Core)
1032		
1033		
1034	IV.B.1.c).(5).(e)	pericardiocentesis; ^(Core)
1035		
1036	IV.B.1.c).(5).(f)	percutaneous needle biopsies; ^(Core)
1037		
1038	IV.B.1.c).(5).(g)	renal replacement therapy; ^(Core)
1039		
1040	IV.B.1.c).(5).(h)	pharmacokinetics, pharmacodynamics, and drug metabolism and excretion in critical illness; ^(Core)
1041		
1042		
1043	IV.B.1.c).(5).(i)	principles and techniques of administration and management of a MICU; ^(Core)
1044		
1045		
1046	IV.B.1.c).(5).(j)	ethical, economic, and legal aspects of critical illness; ^(Core)
1047		
1048		
1049	IV.B.1.c).(5).(k)	recognition and management of the critically ill from

1050 disasters; and, ^(Core)
1051
1052 IV.B.1.c).(5).(k).(i) including those caused by chemical and
1053 biological agents. ^(Detail)
1054
1055 IV.B.1.c).(5).(l) the psychosocial and emotional effects of critical
1056 illness on patients and their families. ^(Core)
1057

1058 **IV.B.1.d) Practice-based Learning and Improvement**

1059
1060 **Fellows must demonstrate the ability to investigate and**
1061 **evaluate their care of patients, to appraise and assimilate**
1062 **scientific evidence, and to continuously improve patient care**
1063 **based on constant self-evaluation and lifelong learning.** ^(Core)
1064

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

1065
1066 **IV.B.1.e) Interpersonal and Communication Skills**
1067
1068 **Fellows must demonstrate interpersonal and communication**
1069 **skills that result in the effective exchange of information and**
1070 **collaboration with patients, their families, and health**
1071 **professionals.** ^(Core)
1072

1073 **IV.B.1.f) Systems-based Practice**

1074
1075 **Fellows must demonstrate an awareness of and**
1076 **responsiveness to the larger context and system of health**
1077 **care, including the social determinants of health, as well as**
1078 **the ability to call effectively on other resources to provide**
1079 **optimal health care.** ^(Core)
1080

1081 **IV.C. Curriculum Organization and Fellow Experiences**

1082
1083 **IV.C.1. The curriculum must be structured to optimize fellow educational**
1084 **experiences, the length of these experiences, and supervisory**
1085 **continuity.** ^(Core)
1086

1087 IV.C.1.a) Assignment of rotations must be structured to minimize the
1088 frequency of rotational transitions, and rotations must be of
1089 sufficient length to provide a quality educational experience,
1090 defined by continuity of patient care, ongoing supervision,
1091 longitudinal relationships with faculty members, and meaningful
1092 assessment and feedback. ^(Core)

1093		
1094	IV.C.1.b)	Clinical experiences should be structured to facilitate learning in a manner that allows fellows to function as part of an effective interprofessional team that works together towards the shared goals of patient safety and quality improvement. ^(Core)
1095		
1096		
1097		
1098		
1099	IV.C.2.	The program must provide instruction and experience in pain management if applicable for the subspecialty, including recognition of the signs of addiction. ^(Core)
1100		
1101		
1102		
1103	IV.C.3.	Fellows must have at least 18 months of clinical experience. ^(Core)
1104		
1105		This must include:
1106		
1107	IV.C.3.a)	at least nine months of patient care responsibility for inpatients and outpatients with a wide variety of pulmonary diseases, with an educational emphasis on pulmonary physiology and its correlation with clinical disorders; ^(Core)
1108		
1109		
1110		
1111		
1112	IV.C.3.b)	at least nine months in critical care medicine, of which at least six months must be devoted to the care of critically ill medical patients (MICU/CICU or equivalent); ^(Core)
1113		
1114		
1115		
1116	IV.C.3.c)	at least three months devoted to the care of critically ill non-medical patients (SICU, Burn Unit, Transplant Unit, Neurointensive Care, or equivalent); and, ^(Core)
1117		
1118		
1119		
1120	IV.C.3.c).(1)	This experience should consist of at least one month of direct patient care activity, with the remainder being fulfilled with either consultative activities or with direct care of such patients. ^(Detail)
1121		
1122		
1123		
1124		
1125	IV.C.3.d)	not more than 15 months of required intensive care unit experiences in the three years of education. ^(Detail)
1126		
1127		
1128	IV.C.4.	24 months of clinical experience is suggested. ^(Detail)
1129		
1130	IV.C.5.	Fellows must participate in training using simulation. ^(Detail)
1131		
1132	IV.C.6.	Fellow experiences must include:
1133		
1134	IV.C.6.a)	continuing responsibility for both acutely and chronically ill pulmonary patients in order to learn both the natural history of pulmonary disease and the effectiveness of therapeutic programs; ^(Core)
1135		
1136		
1137		
1138		
1139	IV.C.6.b)	managing adult patients with a wide variety of serious illnesses and injuries requiring treatment in a critical care setting; ^(Core)
1140		
1141		
1142	IV.C.6.c)	clinical experience in the evaluation and management of patients: ^(Core)
1143		

1144		
1145	IV.C.6.c).(1)	with genetic and developmental disorders of the respiratory system, ^(Core)
1146		
1147		
1148	IV.C.6.c).(1).(a)	including cystic fibrosis; ^(Detail)
1149		
1150	IV.C.6.c).(2)	undergoing pulmonary rehabilitation; ^(Core)
1151		
1152	IV.C.6.c).(3)	with trauma; ^(Core)
1153		
1154	IV.C.6.c).(4)	with neurosurgical emergencies; ^(Core)
1155		
1156	IV.C.6.c).(5)	with critical obstetric and gynecologic disorders; and, ^(Core)
1157		
1158	IV.C.6.c).(6)	after discharge from the critical care unit. ^(Core)
1159		
1160	IV.C.7.	Fellows must have clinical experience in examination and interpretation of lung tissue for infectious agents, cytology, and histopathology. ^(Core)
1161		
1162		
1163	IV.C.8.	Experience with Continuity Ambulatory Patients
1164		
1165	IV.C.8.a)	Fellows must have a continuity ambulatory clinic experience that exposes them to the breadth and depth of the subspecialty. ^(Core)
1166		
1167		
1168	IV.C.8.b)	The ambulatory care clinic experience must occur throughout the 36 months of the fellowship. ^(Detail)
1169		
1170		
1171	IV.C.8.b).(1)	For programs with at least 24 months of clinical rotations, fellows must complete a minimum of 24 months of one half-day weekly ambulatory care clinic during the 36-month fellowship. ^(Detail)
1172		
1173		
1174		
1175		
1176	IV.C.8.b).(2)	For programs with 18-23 months of required clinical rotations, fellows must complete a minimum of 30 months of one half-day weekly ambulatory care clinic during the 36-month fellowship. ^(Detail)
1177		
1178		
1179		
1180		
1181	IV.C.8.c)	This experience must include an appropriate distribution of patients of each gender and a diversity of ages. ^(Core)
1182		
1183		
1184		This should be accomplished through either:
1185		
1186	IV.C.8.c).(1)	a continuity clinic which provides fellows the opportunity to learn the course of disease; or, ^(Detail)
1187		
1188		
1189	IV.C.8.c).(2)	consecutive selected blocks of at least six months duration for the length of the accredited fellowship. ^(Detail)
1190		
1191		
1192	IV.C.8.c).(2).(a)	If the above clinic blocks are interrupted by other clinical rotations, they must be extended so that their total duration is at least six months. ^(Detail)
1193		
1194		

1195		
1196	IV.C.8.d)	Each fellow should be responsible, on average, for four to eight patients during each half day session. <small>(Detail)</small>
1197		
1198		
1199	IV.C.8.e)	Up to six months may be exempted from ambulatory experiences during MICU rotations, other time-intensive rotations, or vacation. <small>(Detail)</small>
1200		
1201		
1202		
1203	IV.C.8.f)	Fellows should be informed of the status of their continuity patients when such patients are hospitalized, as clinically appropriate. <small>(Detail)</small>
1204		
1205		
1206		
1207	IV.C.9.	Procedures and Technical Skills
1208		
1209	IV.C.9.a)	Direct supervision of procedures performed by each fellow must occur until proficiency has been acquired and documented by the program director. <small>(Core)</small>
1210		
1211		
1212		
1213	IV.C.9.b)	Faculty members must teach and supervise the fellows in the performance and interpretation of procedures, which must be documented in each fellow's record, including indications, outcomes, diagnoses, and supervisor(s). <small>(Core)</small>
1214		
1215		
1216		
1217		
1218	IV.C.9.c)	It is suggested that fellows have clinical experience in the placement of percutaneous tracheostomies. <small>(Detail)</small>
1219		
1220		
1221	IV.C.9.d)	Fellows must have experience in the role of a pulmonary disease consultant in both the inpatient and outpatient settings and as a critical care medicine consultant in the inpatient setting. <small>(Core)</small>
1222		
1223		
1224		
1225	IV.C.10.	The core curriculum must include a didactic program based upon the core knowledge content in the subspecialty area. <small>(Core)</small>
1226		
1227		
1228	IV.C.10.a)	The program must afford each fellow an opportunity to review topics covered in conferences that he or she was unable to attend. <small>(Detail)</small>
1229		
1230		
1231		
1232	IV.C.10.b)	Fellows must participate in clinical case conferences, journal clubs, research conferences, and morbidity and mortality or quality improvement conferences. <small>(Detail)</small>
1233		
1234		
1235		
1236	IV.C.10.c)	All core conferences must have at least one faculty member present, and must be scheduled as to ensure peer-peer and peer-faculty interaction. <small>(Detail)</small>
1237		
1238		
1239

1276
 1277 **IV.D.1. Program Responsibilities**

1278
 1279 **IV.D.1.a) The program must demonstrate evidence of scholarly**
 1280 **activities, consistent with its mission(s) and aims. ^(Core)**

1281
 1282 **IV.D.1.b) The program in partnership with its Sponsoring Institution,**
 1283 **must allocate adequate resources to facilitate fellow and**
 1284 **faculty involvement in scholarly activities. ^(Core)**

1285
 1286 **IV.D.2. Faculty Scholarly Activity**

1287
 1288 **IV.D.2.a) Among their scholarly activity, programs must demonstrate**
 1289 **accomplishments in at least three of the following domains:**
 1290 **^(Core)**

- **Research in basic science, education, translational science, patient care, or population health**
- **Peer-reviewed grants**
- **Quality improvement and/or patient safety initiatives**

- 1296 • **Systematic reviews, meta-analyses, review articles,**
- 1297 **chapters in medical textbooks, or case reports**
- 1298 • **Creation of curricula, evaluation tools, didactic**
- 1299 **educational activities, or electronic educational**
- 1300 **materials**
- 1301 • **Contribution to professional committees, educational**
- 1302 **organizations, or editorial boards**
- 1303 • **Innovations in education**

1304
 1305 **IV.D.2.b) The program must demonstrate dissemination of scholarly**
 1306 **activity within and external to the program by the following**
 1307 **methods:**
 1308

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the fellows’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

1309
 1310 **IV.D.2.b).(1) faculty participation in grand rounds, posters,**
 1311 **workshops, quality improvement presentations,**
 1312 **podium presentations, grant leadership, non-peer-**
 1313 **reviewed print/electronic resources, articles or**
 1314 **publications, book chapters, textbooks, webinars,**
 1315 **service on professional committees, or serving as a**
 1316 **journal reviewer, journal editorial board member, or**
 1317 **editor; (Outcome)‡**
 1318

1319 **IV.D.2.b).(1).(a) At least 50 percent of the core faculty members**
 1320 **who are certified in critical care medicine or**
 1321 **pulmonary disease by the ABIM or AOBIM (see**
 1322 **Program Requirements II.B.4.c)-e)) must annually**
 1323 **engage in a variety of scholarly activities, as listed**
 1324 **in Program Requirement IV.D.2.b).(1). (Core)**
 1325

1326 **IV.D.3. Fellow Scholarly Activity**

1327
 1328 **IV.D.3.a) While in the program, at least 50 percent of a program’s fellows**
 1329 **must have engaged in more than one of the following scholarly**
 1330 **activities: participation in grand rounds, posters, workshops,**
 1331 **quality improvement presentations, podium presentations, grant**
 1332 **leadership, non-peer-reviewed print/electronic resources, articles**
 1333 **or publications, book chapters, textbooks, webinars, service on**
 1334 **professional committees, or serving as a journal reviewer, journal**
 1335 **editorial board member, or editor. (Outcome)**
 1336

1337 V. Evaluation
1338
1339 V.A. Fellow Evaluation
1340
1341 V.A.1. Feedback and Evaluation
1342

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- fellows identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

- 1343
1344 V.A.1.a) Faculty members must directly observe, evaluate, and
1345 frequently provide feedback on fellow performance during
1346 each rotation or similar educational assignment. ^(Core)
1347

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

- 1348
1349 V.A.1.a).(1) The faculty must discuss this evaluation with each fellow at
1350 the completion of each assignment. ^(Core)
1351

- 1352 V.A.1.a).(2) Assessment of procedural competence should include a
 1353 formal evaluation process and not be based solely on a
 1354 minimum number of procedures performed. ^(Detail)
 1355
 1356 **V.A.1.b)** **Evaluation must be documented at the completion of the**
 1357 **assignment.** ^(Core)
 1358
 1359 **V.A.1.b).(1)** **For block rotations of greater than three months in**
 1360 **duration, evaluation must be documented at least**
 1361 **every three months.** ^(Core)
 1362
 1363 **V.A.1.b).(2)** **Longitudinal experiences such as continuity clinic in**
 1364 **the context of other clinical responsibilities must be**
 1365 **evaluated at least every three months and at**
 1366 **completion.** ^(Core)
 1367
 1368 **V.A.1.c)** **The program must provide an objective performance**
 1369 **evaluation based on the Competencies and the subspecialty-**
 1370 **specific Milestones, and must:** ^(Core)
 1371
 1372 **V.A.1.c).(1)** **use multiple evaluators (e.g., faculty members, peers,**
 1373 **patients, self, and other professional staff members);**
 1374 **and,** ^(Core)
 1375
 1376 **V.A.1.c).(2)** **provide that information to the Clinical Competency**
 1377 **Committee for its synthesis of progressive fellow**
 1378 **performance and improvement toward unsupervised**
 1379 **practice.** ^(Core)
 1380

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

- 1381
 1382 **V.A.1.d)** **The program director or their designee, with input from the**
 1383 **Clinical Competency Committee, must:**
 1384
 1385 **V.A.1.d).(1)** **meet with and review with each fellow their**
 1386 **documented semi-annual evaluation of performance,**
 1387 **including progress along the subspecialty-specific**
 1388 **Milestones.** ^(Core)
 1389
 1390 **V.A.1.d).(2)** **assist fellows in developing individualized learning**
 1391 **plans to capitalize on their strengths and identify areas**
 1392 **for growth; and,** ^(Core)

1393
1394 V.A.1.d).(3) develop plans for fellows failing to progress, following
1395 institutional policies and procedures. ^(Core)
1396

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

1397
1398 V.A.1.e) At least annually, there must be a summative evaluation of
1399 each fellow that includes their readiness to progress to the
1400 next year of the program, if applicable. ^(Core)
1401
1402 V.A.1.f) The evaluations of a fellow's performance must be accessible
1403 for review by the fellow. ^(Core)
1404
1405 V.A.2. Final Evaluation
1406
1407 V.A.2.a) The program director must provide a final evaluation for each
1408 fellow upon completion of the program. ^(Core)
1409
1410 V.A.2.a).(1) The subspecialty-specific Milestones, and when
1411 applicable the subspecialty-specific Case Logs, must
1412 be used as tools to ensure fellows are able to engage
1413 in autonomous practice upon completion of the
1414 program. ^(Core)
1415
1416 V.A.2.a).(2) The final evaluation must:
1417
1418 V.A.2.a).(2).(a) become part of the fellow's permanent record
1419 maintained by the institution, and must be
1420 accessible for review by the fellow in
1421 accordance with institutional policy; ^(Core)
1422
1423 V.A.2.a).(2).(b) verify that the fellow has demonstrated the
1424 knowledge, skills, and behaviors necessary to
1425 enter autonomous practice; ^(Core)
1426

- 1427 V.A.2.a).(2).(c) consider recommendations from the Clinical
1428 Competency Committee; and, ^(Core)
1429
- 1430 V.A.2.a).(2).(d) be shared with the fellow upon completion of
1431 the program. ^(Core)
1432
- 1433 V.A.3. A Clinical Competency Committee must be appointed by the
1434 program director. ^(Core)
1435
- 1436 V.A.3.a) At a minimum the Clinical Competency Committee must
1437 include three members, at least one of whom is a core faculty
1438 member. Members must be faculty members from the same
1439 program or other programs, or other health professionals
1440 who have extensive contact and experience with the
1441 program's fellows. ^(Core)
1442
- 1443 V.A.3.b) The Clinical Competency Committee must:
1444
- 1445 V.A.3.b).(1) review all fellow evaluations at least semi-annually;
1446 ^(Core)
1447
- 1448 V.A.3.b).(2) determine each fellow's progress on achievement of
1449 the subspecialty-specific Milestones; and, ^(Core)
1450
- 1451 V.A.3.b).(3) meet prior to the fellows' semi-annual evaluations and
1452 advise the program director regarding each fellow's
1453 progress. ^(Core)
1454
- 1455 V.B. Faculty Evaluation
1456
- 1457 V.B.1. The program must have a process to evaluate each faculty
1458 member's performance as it relates to the educational program at
1459 least annually. ^(Core)
1460

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information.

The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 1461
1462 **V.B.1.a)** This evaluation must include a review of the faculty member's
1463 clinical teaching abilities, engagement with the educational
1464 program, participation in faculty development related to their
1465 skills as an educator, clinical performance, professionalism,
1466 and scholarly activities. (Core)
1467
1468 **V.B.1.b)** This evaluation must include written, confidential evaluations
1469 by the fellows. (Core)
1470
1471 **V.B.2.** Faculty members must receive feedback on their evaluations at least
1472 annually. (Core)
1473
1474 **V.B.3.** Results of the faculty educational evaluations should be
1475 incorporated into program-wide faculty development plans. (Core)
1476

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

- 1477
1478 **V.C. Program Evaluation and Improvement**
1479
1480 **V.C.1.** The program director must appoint the Program Evaluation
1481 Committee to conduct and document the Annual Program
1482 Evaluation as part of the program's continuous improvement
1483 process. (Core)
1484
1485 **V.C.1.a)** The Program Evaluation Committee must be composed of at
1486 least two program faculty members, at least one of whom is a
1487 core faculty member, and at least one fellow. (Core)
1488
1489 **V.C.1.b)** Program Evaluation Committee responsibilities must include:
1490
1491 **V.C.1.b).(1)** acting as an advisor to the program director, through
1492 program oversight; (Core)
1493
1494 **V.C.1.b).(2)** review of the program's self-determined goals and
1495 progress toward meeting them; (Core)
1496
1497 **V.C.1.b).(3)** guiding ongoing program improvement, including
1498 development of new goals, based upon outcomes;
1499 and, (Core)
1500
1501 **V.C.1.b).(4)** review of the current operating environment to identify
1502 strengths, challenges, opportunities, and threats as
1503 related to the program's mission and aims. (Core)

1504

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.

1505

1506

V.C.1.c) The Program Evaluation Committee should consider the following elements in its assessment of the program:

1507

1508

1509

V.C.1.c).(1) curriculum; (Core)

1510

1511

V.C.1.c).(2) outcomes from prior Annual Program Evaluation(s); (Core)

1512

1513

1514

V.C.1.c).(3) ACGME letters of notification, including citations, Areas for Improvement, and comments; (Core)

1515

1516

1517

V.C.1.c).(4) quality and safety of patient care; (Core)

1518

1519

V.C.1.c).(5) aggregate fellow and faculty:

1520

1521

V.C.1.c).(5).(a) well-being; (Core)

1522

1523

V.C.1.c).(5).(b) recruitment and retention; (Core)

1524

1525

V.C.1.c).(5).(c) workforce diversity; (Core)

1526

1527

V.C.1.c).(5).(d) engagement in quality improvement and patient safety; (Core)

1528

1529

1530

V.C.1.c).(5).(e) scholarly activity; (Core)

1531

1532

V.C.1.c).(5).(f) ACGME Resident/Fellow and Faculty Surveys (where applicable); and, (Core)

1533

1534

V.C.1.c).(5).(g) written evaluations of the program. (Core)

1535

1536

1537

V.C.1.c).(6) aggregate fellow:

1538

1539

V.C.1.c).(6).(a) achievement of the Milestones; (Core)

1540

1541

V.C.1.c).(6).(b) in-training examinations (where applicable); (Core)

1542

1543

1544

V.C.1.c).(6).(c) board pass and certification rates; and, (Core)

1545

1546

V.C.1.c).(6).(d) graduate performance. (Core)

1547

1548

V.C.1.c).(7) aggregate faculty:

- 1549
- 1550 V.C.1.c).(7).(a) evaluation; and, (Core)
- 1551
- 1552 V.C.1.c).(7).(b) professional development (Core)
- 1553
- 1554 V.C.1.d) The Program Evaluation Committee must evaluate the
- 1555 program's mission and aims, strengths, areas for
- 1556 improvement, and threats. (Core)
- 1557
- 1558 V.C.1.e) The annual review, including the action plan, must:
- 1559
- 1560 V.C.1.e).(1) be distributed to and discussed with the members of
- 1561 the teaching faculty and the fellows; and, (Core)
- 1562
- 1563 V.C.1.e).(2) be submitted to the DIO. (Core)
- 1564
- 1565 V.C.2. The program must participate in a Self-Study prior to its 10-Year
- 1566 Accreditation Site Visit. (Core)
- 1567
- 1568 V.C.2.a) A summary of the Self-Study must be submitted to the DIO.
- 1569 (Core)
- 1570

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

- 1571
- 1572 V.C.3. *One goal of ACGME-accredited education is to educate physicians*
- 1573 *who seek and achieve board certification. One measure of the*
- 1574 *effectiveness of the educational program is the ultimate pass rate.*
- 1575
- 1576 *The program director should encourage all eligible program*
- 1577 *graduates to take the certifying examination offered by the*
- 1578 *applicable American Board of Medical Specialties (ABMS) member*
- 1579 *board or American Osteopathic Association (AOA) certifying board.*
- 1580
- 1581 V.C.3.a) For subspecialties in which the ABMS member board and/or
- 1582 AOA certifying board offer(s) an annual written exam, in the
- 1583 preceding three years, the program's aggregate pass rate of
- 1584 those taking the examination for the first time must be higher
- 1585 than the bottom fifth percentile of programs in that
- 1586 subspecialty. (Outcome)
- 1587

- 1588 **V.C.3.b)** For subspecialties in which the ABMS member board and/or
 1589 AOA certifying board offer(s) a biennial written exam, in the
 1590 preceding six years, the program’s aggregate pass rate of
 1591 those taking the examination for the first time must be higher
 1592 than the bottom fifth percentile of programs in that
 1593 subspecialty. *(Outcome)*
 1594
- 1595 **V.C.3.c)** For subspecialties in which the ABMS member board and/or
 1596 AOA certifying board offer(s) an annual oral exam, in the
 1597 preceding three years, the program’s aggregate pass rate of
 1598 those taking the examination for the first time must be higher
 1599 than the bottom fifth percentile of programs in that
 1600 subspecialty. *(Outcome)*
 1601
- 1602 **V.C.3.d)** For subspecialties in which the ABMS member board and/or
 1603 AOA certifying board offer(s) a biennial oral exam, in the
 1604 preceding six years, the program’s aggregate pass rate of
 1605 those taking the examination for the first time must be higher
 1606 than the bottom fifth percentile of programs in that
 1607 subspecialty. *(Outcome)*
 1608
- 1609 **V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program
 1610 whose graduates over the time period specified in the
 1611 requirement have achieved an 80 percent pass rate will have
 1612 met this requirement, no matter the percentile rank of the
 1613 program for pass rate in that subspecialty. *(Outcome)*
 1614

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

- 1615
 1616 **V.C.3.f)** Programs must report, in ADS, board certification status
 1617 annually for the cohort of board-eligible fellows that
 1618 graduated seven years earlier. *(Core)*
 1619

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

VI. The Learning and Working Environment

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

- *Excellence in the safety and quality of care rendered to patients by fellows today*
- *Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice*
- *Excellence in professionalism through faculty modeling of:*
 - *the effacement of self-interest in a humanistic environment that supports the professional development of physicians*
 - *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
- *Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team*

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too

fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating fellows will apply these skills to critique their future unsupervised practice and effect quality improvement measures.

It is necessary for fellows and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.

VI.A.1.a) Patient Safety

VI.A.1.a).(1) Culture of Safety

A culture of safety requires continuous identification of vulnerabilities and a willingness to transparently deal with them. An effective organization has formal mechanisms to assess the knowledge, skills, and attitudes of its personnel toward safety in order to identify areas for improvement.

VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows must actively participate in patient safety systems and contribute to a culture of safety.
(Core)

VI.A.1.a).(1).(b) The program must have a structure that promotes safe, interprofessional, team-based care.
(Core)

VI.A.1.a).(2) Education on Patient Safety

1736

Programs must provide formal educational activities that promote patient safety-related goals, tools, and techniques. ^(Core)

Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.

VI.A.1.a).(3)

Patient Safety Events

Reporting, investigation, and follow-up of adverse events, near misses, and unsafe conditions are pivotal mechanisms for improving patient safety, and are essential for the success of any patient safety program. Feedback and experiential learning are essential to developing true competence in the ability to identify causes and institute sustainable systems-based changes to ameliorate patient safety vulnerabilities.

VI.A.1.a).(3).(a)

Residents, fellows, faculty members, and other clinical staff members must:

VI.A.1.a).(3).(a).(i)

know their responsibilities in reporting patient safety events at the clinical site; ^(Core)

VI.A.1.a).(3).(a).(ii)

know how to report patient safety events, including near misses, at the clinical site; and, ^(Core)

VI.A.1.a).(3).(a).(iii)

be provided with summary information of their institution’s patient safety reports. ^(Core)

VI.A.1.a).(3).(b)

Fellows must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions. ^(Core)

VI.A.1.a).(4)

Fellow Education and Experience in Disclosure of Adverse Events

Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for fellows to develop and apply.

1737	VI.A.1.a).(4).(a)	All fellows must receive training in how to disclose adverse events to patients and families. ^(Core)
1738

1781	VI.A.2.	Supervision and Accountability
1782		
1783	VI.A.2.a)	<i>Although the attending physician is ultimately responsible for the care of the patient, every physician shares in the responsibility and accountability for their efforts in the provision of care. Effective programs, in partnership with their Sponsoring Institutions, define, widely communicate,</i>
1784		
1785		
1786		
1787		

1788 *and monitor a structured chain of responsibility and*
1789 *accountability as it relates to the supervision of all patient*
1790 *care.*

1791
1792 *Supervision in the setting of graduate medical education*
1793 *provides safe and effective care to patients; ensures each*
1794 *fellow's development of the skills, knowledge, and attitudes*
1795 *required to enter the unsupervised practice of medicine; and*
1796 *establishes a foundation for continued professional growth.*

1797
1798 **VI.A.2.a).(1)** Each patient must have an identifiable and
1799 appropriately-credentialed and privileged attending
1800 physician (or licensed independent practitioner as
1801 specified by the applicable Review Committee) who is
1802 responsible and accountable for the patient's care.
1803 (Core)

1804
1805 **VI.A.2.a).(1).(a)** This information must be available to fellows,
1806 faculty members, other members of the health
1807 care team, and patients. (Core)

1808
1809 **VI.A.2.a).(1).(b)** Fellows and faculty members must inform each
1810 patient of their respective roles in that patient's
1811 care when providing direct patient care. (Core)

1812
1813 **VI.A.2.b)** *Supervision may be exercised through a variety of methods.*
1814 *For many aspects of patient care, the supervising physician*
1815 *may be a more advanced fellow. Other portions of care*
1816 *provided by the fellow can be adequately supervised by the*
1817 *appropriate availability of the supervising faculty member or*
1818 *fellow, either on site or by means of telecommunication*
1819 *technology. Some activities require the physical presence of*
1820 *the supervising faculty member. In some circumstances,*
1821 *supervision may include post-hoc review of fellow-delivered*
1822 *care with feedback.*

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

1824
1825 **VI.A.2.b).(1)** The program must demonstrate that the appropriate
1826 level of supervision in place for all fellows is based on
1827 each fellow's level of training and ability, as well as
1828 patient complexity and acuity. Supervision may be

1829		exercised through a variety of methods, as appropriate
1830		to the situation. ^(Core)
1831		
1832	VI.A.2.b).(2)	The program must define when physical presence of a
1833		supervising physician is required. ^(Core)
1834		
1835	VI.A.2.c)	Levels of Supervision
1836		
1837		To promote appropriate fellow supervision while providing
1838		for graded authority and responsibility, the program must use
1839		the following classification of supervision: ^(Core)
1840		
1841	VI.A.2.c).(1)	Direct Supervision:
1842		
1843	VI.A.2.c).(1).(a)	the supervising physician is physically present
1844		with the fellow during the key portions of the
1845		patient interaction; or, ^(Core)
1846		
1847	VI.A.2.c).(1).(b)	the supervising physician and/or patient is not
1848		physically present with the fellow and the
1849		supervising physician is concurrently
1850		monitoring the patient care through appropriate
1851		telecommunication technology. ^(Core)
1852		
1853	VI.A.2.c).(2)	Indirect Supervision: the supervising physician is not
1854		providing physical or concurrent visual or audio
1855		supervision but is immediately available to the fellow
1856		for guidance and is available to provide appropriate
1857		direct supervision. ^(Core)
1858		
1859	VI.A.2.c).(3)	Oversight – the supervising physician is available to
1860		provide review of procedures/encounters with
1861		feedback provided after care is delivered. ^(Core)
1862		
1863	VI.A.2.d)	The privilege of progressive authority and responsibility,
1864		conditional independence, and a supervisory role in patient
1865		care delegated to each fellow must be assigned by the
1866		program director and faculty members. ^(Core)
1867		
1868	VI.A.2.d).(1)	The program director must evaluate each fellow’s
1869		abilities based on specific criteria, guided by the
1870		Milestones. ^(Core)
1871		
1872	VI.A.2.d).(2)	Faculty members functioning as supervising
1873		physicians must delegate portions of care to fellows
1874		based on the needs of the patient and the skills of
1875		each fellow. ^(Core)
1876		
1877	VI.A.2.d).(3)	Fellows should serve in a supervisory role to junior
1878		fellows and residents in recognition of their progress
1879		toward independence, based on the needs of each

1880 patient and the skills of the individual resident or
1881 fellow. ^(Detail)

1882
1883 **VI.A.2.e) Programs must set guidelines for circumstances and events**
1884 **in which fellows must communicate with the supervising**
1885 **faculty member(s).** ^(Core)

1886
1887 **VI.A.2.e).(1) Each fellow must know the limits of their scope of**
1888 **authority, and the circumstances under which the**
1889 **fellow is permitted to act with conditional**
1890 **independence.** ^(Outcome)

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

1892
1893 **VI.A.2.f) Faculty supervision assignments must be of sufficient**
1894 **duration to assess the knowledge and skills of each fellow**
1895 **and to delegate to the fellow the appropriate level of patient**
1896 **care authority and responsibility.** ^(Core)

1897
1898 **VI.B. Professionalism**

1899
1900 **VI.B.1. Programs, in partnership with their Sponsoring Institutions, must**
1901 **educate fellows and faculty members concerning the professional**
1902 **responsibilities of physicians, including their obligation to be**
1903 **appropriately rested and fit to provide the care required by their**
1904 **patients.** ^(Core)

1905
1906 **VI.B.2. The learning objectives of the program must:**

1907
1908 **VI.B.2.a) be accomplished through an appropriate blend of supervised**
1909 **patient care responsibilities, clinical teaching, and didactic**
1910 **educational events;** ^(Core)

1911
1912 **VI.B.2.b) be accomplished without excessive reliance on fellows to**
1913 **fulfill non-physician obligations; and,** ^(Core)

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1914
1915
1916 **VI.B.2.c) ensure manageable patient care responsibilities.** ^(Core)

1917

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1918

1919

VI.B.3. The program director, in partnership with the Sponsoring Institution, must provide a culture of professionalism that supports patient safety and personal responsibility. ^(Core)

1920

1921

1922

1923

VI.B.4. Fellows and faculty members must demonstrate an understanding of their personal role in the:

1924

1925

1926

VI.B.4.a) provision of patient- and family-centered care; ^(Outcome)

1927

1928

VI.B.4.b) safety and welfare of patients entrusted to their care, including the ability to report unsafe conditions and adverse events; ^(Outcome)

1929

1930

1931

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

1932

1933

VI.B.4.c) assurance of their fitness for work, including: ^(Outcome)

1934

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

1935

1936

VI.B.4.c).(1) management of their time before, during, and after clinical assignments; and, ^(Outcome)

1937

1938

1939

VI.B.4.c).(2) recognition of impairment, including from illness, fatigue, and substance use, in themselves, their peers, and other members of the health care team. ^(Outcome)

1940

1941

1942

1943

VI.B.4.d) commitment to lifelong learning; ^(Outcome)

1944

1945

VI.B.4.e) monitoring of their patient care performance improvement indicators; and, ^(Outcome)

1946

1947

1948

VI.B.4.f) accurate reporting of clinical and educational work hours, patient outcomes, and clinical experience data. ^(Outcome)

1949

1950

1951 VI.B.5. All fellows and faculty members must demonstrate responsiveness
1952 to patient needs that supersedes self-interest. This includes the
1953 recognition that under certain circumstances, the best interests of
1954 the patient may be served by transitioning that patient's care to
1955 another qualified and rested provider. (Outcome)
1956

1957 VI.B.6. Programs, in partnership with their Sponsoring Institutions, must
1958 provide a professional, equitable, respectful, and civil environment
1959 that is free from discrimination, sexual and other forms of
1960 harassment, mistreatment, abuse, or coercion of students, fellows,
1961 faculty, and staff. (Core)
1962

1963 VI.B.7. Programs, in partnership with their Sponsoring Institutions, should
1964 have a process for education of fellows and faculty regarding
1965 unprofessional behavior and a confidential process for reporting,
1966 investigating, and addressing such concerns. (Core)
1967

1968 VI.C. Well-Being

1969 *Psychological, emotional, and physical well-being are critical in the*
1970 *development of the competent, caring, and resilient physician and require*
1971 *proactive attention to life inside and outside of medicine. Well-being*
1972 *requires that physicians retain the joy in medicine while managing their*
1973 *own real-life stresses. Self-care and responsibility to support other*
1974 *members of the health care team are important components of*
1975 *professionalism; they are also skills that must be modeled, learned, and*
1976 *nurtured in the context of other aspects of fellowship training.*

1977 *Fellows and faculty members are at risk for burnout and depression.*
1978 *Programs, in partnership with their Sponsoring Institutions, have the same*
1979 *responsibility to address well-being as other aspects of resident*
1980 *competence. Physicians and all members of the health care team share*
1981 *responsibility for the well-being of each other. For example, a culture which*
1982 *encourages covering for colleagues after an illness without the expectation*
1983 *of reciprocity reflects the ideal of professionalism. A positive culture in a*
1984 *clinical learning environment models constructive behaviors, and prepares*
1985 *fellows with the skills and attitudes needed to thrive throughout their*
1986 *careers.*
1987
1988
1989

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website: www.acgme.org/physicianwellbeing.

The ACGME also created a repository for well-being materials, assessments, presentations, and more on the [Well-Being Tools and Resources page](#) in Learn at ACGME for programs seeking to develop or strengthen their own well-being initiatives.

There are many activities that programs can implement now to assess and support physician well-being. These include the distribution and analysis of culture of safety surveys, ensuring the availability of counseling services, and paying attention to the safety of the entire health care team.

2043 health assessment, counseling, and treatment,
2044 including access to urgent and emergent care 24
2045 hours a day, seven days a week. ^(Core)
2046

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

- VI.D. Fatigue Mitigation
 - VI.D.1. Programs must:
 - VI.D.1.a) educate all faculty members and fellows to recognize the signs of fatigue and sleep deprivation; ^(Core)
 - VI.D.1.b) educate all faculty members and fellows in alertness management and fatigue mitigation processes; and, ^(Core)
 - VI.D.1.c) encourage fellows to use fatigue mitigation processes to manage the potential negative effects of fatigue on patient care and learning. ^(Detail)

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

- 2076
2077 **VI.D.2.** Each program must ensure continuity of patient care, consistent
2078 with the program's policies and procedures referenced in VI.C.2–
2079 VI.C.2.b), in the event that a fellow may be unable to perform their
2080 patient care responsibilities due to excessive fatigue. ^(Core)
2081
- 2082 **VI.D.3.** The program, in partnership with its Sponsoring Institution, must
2083 ensure adequate sleep facilities and safe transportation options for
2084 fellows who may be too fatigued to safely return home. ^(Core)
2085
- 2086 **VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care**
- 2087
- 2088 **VI.E.1. Clinical Responsibilities**
- 2089
- 2090 The clinical responsibilities for each fellow must be based on PGY
2091 level, patient safety, fellow ability, severity and complexity of patient
2092 illness/condition, and available support services. ^(Core)
2093

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

- 2094
- 2095 **VI.E.2. Teamwork**
- 2096
- 2097 Fellows must care for patients in an environment that maximizes
2098 communication. This must include the opportunity to work as a
2099 member of effective interprofessional teams that are appropriate to
2100 the delivery of care in the subspecialty and larger health system.
2101 ^(Core)
2102
- 2103 **VI.E.3. Transitions of Care**
- 2104
- 2105 **VI.E.3.a)** Programs must design clinical assignments to optimize
2106 transitions in patient care, including their safety, frequency,
2107 and structure. ^(Core)
2108
- 2109 **VI.E.3.b)** Programs, in partnership with their Sponsoring Institutions,
2110 must ensure and monitor effective, structured hand-over
2111 processes to facilitate both continuity of care and patient
2112 safety. ^(Core)
2113
- 2114 **VI.E.3.c)** Programs must ensure that fellows are competent in
2115 communicating with team members in the hand-over process.
2116 ^(Outcome)
2117

2118 VI.E.3.d) Programs and clinical sites must maintain and communicate
2119 schedules of attending physicians and fellows currently
2120 responsible for care. ^(Core)

2121
2122 VI.E.3.e) Each program must ensure continuity of patient care,
2123 consistent with the program's policies and procedures
2124 referenced in VI.C.2-VI.C.2.b), in the event that a fellow may
2125 be unable to perform their patient care responsibilities due to
2126 excessive fatigue or illness, or family emergency. ^(Core)

2127
2128 VI.F. Clinical Experience and Education

2129
2130 *Programs, in partnership with their Sponsoring Institutions, must design*
2131 *an effective program structure that is configured to provide fellows with*
2132 *educational and clinical experience opportunities, as well as reasonable*
2133 *opportunities for rest and personal activities.*

2134

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

2135
2136 VI.F.1. Maximum Hours of Clinical and Educational Work per Week

2137
2138 Clinical and educational work hours must be limited to no more than
2139 80 hours per week, averaged over a four-week period, inclusive of all
2140 in-house clinical and educational activities, clinical work done from
2141 home, and all moonlighting. ^(Core)

2142

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

2150

VI.F.2. Mandatory Time Free of Clinical Work and Education

VI.F.2.a) The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. ^(Core)

2151 VI.F.2.b) Fellows should have eight hours off between scheduled
2152 clinical work and education periods. ^(Detail)

2153
2154 VI.F.2.b).(1) There may be circumstances when fellows choose to
2155 stay to care for their patients or return to the hospital
2156 with fewer than eight hours free of clinical experience
2157 and education. This must occur within the context of
2158 the 80-hour and the one-day-off-in-seven
2159 requirements. ^(Detail)

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

2161 VI.F.2.c) Fellows must have at least 14 hours free of clinical work and
2162 education after 24 hours of in-house call. ^(Core)

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

2165 VI.F.2.d) Fellows must be scheduled for a minimum of one day in
2166 seven free of clinical work and required education (when
2167 averaged over four weeks). At-home call cannot be assigned
2168 on these free days. ^(Core)

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

2171 VI.F.3. Maximum Clinical Work and Education Period Length
2172
2173

- 2174 VI.F.3.a) Clinical and educational work periods for fellows must not
 2175 exceed 24 hours of continuous scheduled clinical
 2176 assignments. ^(Core)
 2177
- 2178 VI.F.3.a).(1) Up to four hours of additional time may be used for
 2179 activities related to patient safety, such as providing
 2180 effective transitions of care, and/or fellow education.
 2181 ^(Core)
 2182
- 2183 VI.F.3.a).(1).(a) Additional patient care responsibilities must not
 2184 be assigned to a fellow during this time. ^(Core)
 2185

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

- 2186 VI.F.4. Clinical and Educational Work Hour Exceptions
 2187
 2188
- 2189 VI.F.4.a) In rare circumstances, after handing off all other
 2190 responsibilities, a fellow, on their own initiative, may elect to
 2191 remain or return to the clinical site in the following
 2192 circumstances:
 2193
- 2194 VI.F.4.a).(1) to continue to provide care to a single severely ill or
 2195 unstable patient; ^(Detail)
 2196
- 2197 VI.F.4.a).(2) humanistic attention to the needs of a patient or
 2198 family; or, ^(Detail)
 2199
- 2200 VI.F.4.a).(3) to attend unique educational events. ^(Detail)
 2201
- 2202 VI.F.4.b) These additional hours of care or education will be counted
 2203 toward the 80-hour weekly limit. ^(Detail)
 2204

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

- 2205 VI.F.4.c) A Review Committee may grant rotation-specific exceptions
 2206 for up to 10 percent or a maximum of 88 clinical and
 2207

2208 educational work hours to individual programs based on a
2209 sound educational rationale.

2210
2211 The Review Committee for Internal Medicine will not consider
2212 requests for exceptions to the 80-hour limit to the fellows' work
2213 week.

2214
2215 **VI.F.5. Moonlighting**

2216
2217 **VI.F.5.a) Moonlighting must not interfere with the ability of the fellow
2218 to achieve the goals and objectives of the educational
2219 program, and must not interfere with the fellow's fitness for
2220 work nor compromise patient safety. (Core)**

2221
2222 **VI.F.5.b) Time spent by fellows in internal and external moonlighting
2223 (as defined in the ACGME Glossary of Terms) must be
2224 counted toward the 80-hour maximum weekly limit. (Core)**

2225

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

2226

2227 **VI.F.6. In-House Night Float**

2228
2229 **Night float must occur within the context of the 80-hour and one-
2230 day-off-in-seven requirements. (Core)**

2231

Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

2232

2233 **VI.F.7. Maximum In-House On-Call Frequency**

2234
2235 **Fellows must be scheduled for in-house call no more frequently than
2236 every third night (when averaged over a four-week period). (Core)**

2237

2238 **VI.F.7.a) Internal Medicine fellowships must not average in-house call over
2239 a four-week period. (Core)**

2240

2241 **VI.F.8. At-Home Call**

2242
2243 **VI.F.8.a) Time spent on patient care activities by fellows on at-home
2244 call must count toward the 80-hour maximum weekly limit.
2245 The frequency of at-home call is not subject to the every-
2246 third-night limitation, but must satisfy the requirement for one
2247 day in seven free of clinical work and education, when
2248 averaged over four weeks. (Core)**

2249

2250 **VI.F.8.a).(1) At-home call must not be so frequent or taxing as to
2251 preclude rest or reasonable personal time for each
2252 fellow. (Core)**

2253
2254
2255
2256
2257
2258

VI.F.8.b)

Fellows are permitted to return to the hospital while on at-home call to provide direct care for new or established patients. These hours of inpatient patient care must be included in the 80-hour maximum weekly limit. ^(Detail)

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
