VI.F. Clinical Experience and Education .....	45

1                   **ACGME Program Requirements for Graduate Medical Education**  
2   **in Epilepsy**

3  
4                   **Common Program Requirements (Fellowship) are in BOLD**

5  
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that  
7 section. These philosophic statements are not program requirements and are therefore not  
8 citable.  
9

**Background and Intent:** These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

10  
11 **Introduction**

12  
13 **Int.A.**       *Fellowship is advanced graduate medical education beyond a core  
14 residency program for physicians who desire to enter more specialized  
15 practice. Fellowship-trained physicians serve the public by providing  
16 subspecialty care, which may also include core medical care, acting as a  
17 community resource for expertise in their field, creating and integrating  
18 new knowledge into practice, and educating future generations of  
19 physicians. Graduate medical education values the strength that a diverse  
20 group of physicians brings to medical care.*

21  
22                   *Fellows who have completed residency are able to practice independently  
23 in their core specialty. The prior medical experience and expertise of  
24 fellows distinguish them from physicians entering into residency training.  
25 The fellow’s care of patients within the subspecialty is undertaken with  
26 appropriate faculty supervision and conditional independence. Faculty  
27 members serve as role models of excellence, compassion,  
28 professionalism, and scholarship. The fellow develops deep medical  
29 knowledge, patient care skills, and expertise applicable to their focused  
30 area of practice. Fellowship is an intensive program of subspecialty clinical  
31 and didactic education that focuses on the multidisciplinary care of  
32 patients. Fellowship education is often physically, emotionally, and  
33 intellectually demanding, and occurs in a variety of clinical learning  
34 environments committed to graduate medical education and the well-being  
35 of patients, residents, fellows, faculty members, students, and all members  
36 of the health care team.*

37  
38                   *In addition to clinical education, many fellowship programs advance  
39 fellows’ skills as physician-scientists. While the ability to create new  
40 knowledge within medicine is not exclusive to fellowship-educated  
41 physicians, the fellowship experience expands a physician’s abilities to  
42 pursue hypothesis-driven scientific inquiry that results in contributions to  
43 the medical literature and patient care. Beyond the clinical subspecialty  
44 expertise achieved, fellows develop mentored relationships built on an  
45 infrastructure that promotes collaborative research.*

46  
47 **Int.B.**       **Definition of Subspecialty**

48  
49           Epilepsy is a discipline within neurology that includes evaluation and treatment of  
50 adults and children with seizures and seizure disorders. Specialists in epilepsy  
51 possess specialized knowledge in the science, pathology, clinical evaluation,  
52 diagnosis, and management of these disorders at a level beyond that expected  
53 of a general or child neurologist.  
54

55 **Int.C.           Length of Educational Program**

56  
57           The educational program in epilepsy must be 12 months in length. (Core)\*  
58

59 **I.           Oversight**

60  
61 **I.A.           Sponsoring Institution**

62  
63           *The Sponsoring Institution is the organization or entity that assumes the*  
64 *ultimate financial and academic responsibility for a program of graduate*  
65 *medical education consistent with the ACGME Institutional Requirements.*  
66

67           *When the Sponsoring Institution is not a rotation site for the program, the*  
68 *most commonly utilized site of clinical activity for the program is the*  
69 *primary clinical site.*  
70

**Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.**

71  
72 **I.A.1.           The program must be sponsored by one ACGME-accredited**  
73 **Sponsoring Institution. (Core)**  
74

75 **I.B.           Participating Sites**

76  
77           *A participating site is an organization providing educational experiences or*  
78 *educational assignments/rotations for fellows.*  
79

80 **I.B.1.           The program, with approval of its Sponsoring Institution, must**  
81 **designate a primary clinical site. (Core)**  
82

83 **I.B.1.a)           The Sponsoring Institution must also sponsor an Accreditation**  
84 **Council for Graduate Medical Education (ACGME)-accredited**  
85 **residency program in child neurology or neurology. (Core)**  
86

87 **I.B.2.           There must be a program letter of agreement (PLA) between the**  
88 **program and each participating site that governs the relationship**

- 89                                    **between the program and the participating site providing a required**  
90                                    **assignment.** <sup>(Core)</sup>  
91  
92    **I.B.2.a)                                    The PLA must:**  
93  
94    **I.B.2.a).(1)                                    be renewed at least every 10 years; and,** <sup>(Core)</sup>  
95  
96    **I.B.2.a).(2)                                    be approved by the designated institutional official**  
97                                    **(DIO).** <sup>(Core)</sup>  
98  
99    **I.B.3.                                    The program must monitor the clinical learning and working**  
100                                    **environment at all participating sites.** <sup>(Core)</sup>  
101  
102    **I.B.3.a)                                    At each participating site there must be one faculty member,**  
103                                    **designated by the program director, who is accountable for**  
104                                    **fellow education for that site, in collaboration with the**  
105                                    **program director.** <sup>(Core)</sup>  
106

**Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.**

**Suggested elements to be considered in PLAs will be found in the ACGME Program Director’s Guide to the Common Program Requirements. These include:**

- **Identifying the faculty members who will assume educational and supervisory responsibility for fellows**
- **Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows**
- **Specifying the duration and content of the educational experience**
- **Stating the policies and procedures that will govern fellow education during the assignment**

- 107  
108    **I.B.4.                                    The program director must submit any additions or deletions of**  
109                                    **participating sites routinely providing an educational experience,**  
110                                    **required for all fellows, of one month full time equivalent (FTE) or**  
111                                    **more through the ACGME’s Accreditation Data System (ADS).** <sup>(Core)</sup>  
112  
113    **I.C.                                    The program, in partnership with its Sponsoring Institution, must engage in**  
114                                    **practices that focus on mission-driven, ongoing, systematic recruitment**  
115                                    **and retention of a diverse and inclusive workforce of residents (if present),**  
116                                    **fellows, faculty members, senior administrative staff members, and other**  
117                                    **relevant members of its academic community.** <sup>(Core)</sup>  
118

**Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution’s mission and aims. The program’s annual evaluation must include an assessment of the program’s efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).**

119  
120  
121  
122  
123  
124  
125  
126  
127  
128  
129  
130  
131  
132  
133  
134  
135  
136  
137  
138  
139  
140  
141  
142  
143  
144

**I.D. Resources**

**I.D.1. The program, in partnership with its Sponsoring Institution, must ensure the availability of adequate resources for fellow education.**  
(Core)

I.D.1.a) There must be adequate inpatient and outpatient facilities, examining areas, conference rooms, and office space for faculty members and fellows. (Core)

I.D.1.b) There must be adequate diagnostic resources, including structural and functional neuroimaging, an electroencephalography (EEG) laboratory, an Epilepsy Monitoring Unit (EMU), and an epilepsy surgery program. (Core)

**I.D.2. The program, in partnership with its Sponsoring Institution, must ensure healthy and safe learning and working environments that promote fellow well-being and provide for:** (Core)

**I.D.2.a) access to food while on duty;** (Core)

**I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available and accessible for fellows with proximity appropriate for safe patient care;** (Core)

**Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.**

145  
146  
147  
148  
149

**I.D.2.c) clean and private facilities for lactation that have refrigeration capabilities, with proximity appropriate for safe patient care;**  
(Core)

**Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients,**

such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

- 150  
151 I.D.2.d) security and safety measures appropriate to the participating  
152 site; and, <sup>(Core)</sup>  
153  
154 I.D.2.e) accommodations for fellows with disabilities consistent with  
155 the Sponsoring Institution's policy. <sup>(Core)</sup>  
156  
157 I.D.3. Fellows must have ready access to subspecialty-specific and other  
158 appropriate reference material in print or electronic format. This  
159 must include access to electronic medical literature databases with  
160 full text capabilities. <sup>(Core)</sup>  
161  
162 I.D.4. The program's educational and clinical resources must be adequate  
163 to support the number of fellows appointed to the program. <sup>(Core)</sup>  
164  
165 I.D.4.a) The patient population must reflect the full spectrum of seizures  
166 and epilepsy across the lifespan, including patients seen in both  
167 the outpatient and inpatient settings. <sup>(Core)</sup>  
168  
169 I.E. *A fellowship program usually occurs in the context of many learners and  
170 other care providers and limited clinical resources. It should be structured  
171 to optimize education for all learners present.*  
172  
173 I.E.1. Fellows should contribute to the education of residents in core  
174 programs, if present. <sup>(Core)</sup>  
175

**Background and Intent:** The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

- 176  
177 II. Personnel  
178  
179 II.A. Program Director  
180  
181 II.A.1. There must be one faculty member appointed as program director  
182 with authority and accountability for the overall program, including  
183 compliance with all applicable program requirements. <sup>(Core)</sup>  
184  
185 II.A.1.a) The Sponsoring Institution's Graduate Medical Education  
186 Committee (GMEC) must approve a change in program  
187 director. <sup>(Core)</sup>  
188  
189 II.A.1.b) Final approval of the program director resides with the  
190 Review Committee. <sup>(Core)</sup>

191

**Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and have overall responsibility for the program. The program director’s nomination is reviewed and approved by the GMEC. Final approval of the program director resides with the applicable ACGME Review Committee.**

192

**II.A.2. The program director and, as applicable, the program’s leadership team, must be provided with support adequate for administration of the program based upon its size and configuration. <sup>(Core)</sup>**

193

194

195

196

**II.A.2.a) Program leadership, in aggregate, must be provided with support equal to a dedicated minimum time specified below for administration of the program. This may be time spent by the program director only or divided between the program director and one or more associate (or assistant) program directors. <sup>(Core)</sup>**

197

198

199

200

201

202

<u>Number of Approved Fellow Positions</u>	<u>Minimum FTE</u>
<u>1-3</u>	<u>0.1</u>
<u>4-6</u>	<u>0.15</u>
<u>7-9</u>	<u>0.2</u>
<u>10-12</u>	<u>0.25</u>
<u>13-15</u>	<u>0.3</u>

203

204

205

206

207

208

~~At a minimum, the program director must be provided with the salary support required to devote 10 percent FTE of non-clinical time to the administration of the program. Additional support must be provided based on program size as follows: <sup>(Core)</sup>~~

<del>Number of approved fellow positions</del>	<del>Minimum FTE</del>
<del>1-3</del>	<del>0.1</del>
<del>4 or more</del>	<del>0.15</del>

209

**Background and Intent: To achieve successful graduate medical education, individuals serving as education and administrative leaders of fellowship programs, as well as those significantly engaged in the education, supervision, evaluation, and mentoring of fellows, must have sufficient dedicated professional time to perform the vital activities required to sustain an accredited program.**

**The ultimate outcome of graduate medical education is excellence in fellow education and patient care.**

**The program director and, as applicable, the program leadership team, devote a portion of their professional effort to the oversight and management of the fellowship program, as defined in II.A.4.-II.A.4.a).(16). Both provision of support for the time required for the leadership effort and flexibility regarding how this support is provided are important. Programs, in partnership with their Sponsoring Institutions, may provide support for this time in a variety of ways. Examples of support may include, but are not limited to, salary**

support, supplemental compensation, educational value units, or relief of time from other professional duties.

Program directors and, as applicable, members of the program leadership team, who are new to the role may need to devote additional time to program oversight and management initially as they learn and become proficient in administering the program. It is suggested that during this initial period the support described above be increased as needed.

239  
240  
241  
242  
243

**II.A.3. Qualifications of the program director:**

**II.A.3.a) must include subspecialty expertise and qualifications acceptable to the Review Committee; and, <sup>(Core)</sup>**

**II.A.3.b) must include current certification in the subspecialty for which they are the program director by the American Board of Psychiatry and Neurology (ABPN) or by the American Osteopathic Board of Neurology and Psychiatry, or subspecialty qualifications that are acceptable to the Review Committee. <sup>(Core)</sup>**

**II.A.3.b).(1) The Review Committee only accepts current ABPN or AOBNP certification in epilepsy. <sup>(Core)</sup>**

**II.A.4. Program Director Responsibilities**

**The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and promotion of fellows, and disciplinary action; supervision of fellows; and fellow education in the context of patient care. <sup>(Core)</sup>**

**II.A.4.a) The program director must:**

**II.A.4.a).(1) be a role model of professionalism; <sup>(Core)</sup>**

**Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.**

**II.A.4.a).(2) design and conduct the program in a fashion consistent with the needs of the community, the mission(s) of the Sponsoring Institution, and the mission(s) of the program; <sup>(Core)</sup>**

**Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.**

244  
245  
246  
247  
248

- II.A.4.a).(3) administer and maintain a learning environment conducive to educating the fellows in each of the ACGME Competency domains; <sup>(Core)</sup>

**Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.**

249  
250  
251  
252  
253  
254  
255  
256  
257  
258  
259  
260  
261  
262  
263  
264  
265  
266

- II.A.4.a).(4) develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the fellowship program education and at least annually thereafter, as outlined in V.B.; <sup>(Core)</sup>
- II.A.4.a).(5) have the authority to approve program faculty members for participation in the fellowship program education at all sites; <sup>(Core)</sup>
- II.A.4.a).(6) have the authority to remove program faculty members from participation in the fellowship program education at all sites; <sup>(Core)</sup>
- II.A.4.a).(7) have the authority to remove fellows from supervising interactions and/or learning environments that do not meet the standards of the program; <sup>(Core)</sup>

**Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.**

**There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.**

267  
268  
269  
270  
271  
272  
273  
274

- II.A.4.a).(8) submit accurate and complete information required and requested by the DIO, GMEC, and ACGME; <sup>(Core)</sup>
- II.A.4.a).(9) provide applicants who are offered an interview with information related to the applicant's eligibility for the relevant subspecialty board examination(s); <sup>(Core)</sup>

- 275 II.A.4.a).(10) provide a learning and working environment in which  
 276 fellows have the opportunity to raise concerns and  
 277 provide feedback in a confidential manner as  
 278 appropriate, without fear of intimidation or retaliation;  
 279 (Core)  
 280
- 281 II.A.4.a).(11) ensure the program’s compliance with the Sponsoring  
 282 Institution’s policies and procedures related to  
 283 grievances and due process; (Core)  
 284
- 285 II.A.4.a).(12) ensure the program’s compliance with the Sponsoring  
 286 Institution’s policies and procedures for due process  
 287 when action is taken to suspend or dismiss, not to  
 288 promote, or not to renew the appointment of a fellow;  
 289 (Core)  
 290

**Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution’s policies and procedures, and will ensure they are followed by the program’s leadership, faculty members, support personnel, and fellows.**

- 291
- 292 II.A.4.a).(13) ensure the program’s compliance with the Sponsoring  
 293 Institution’s policies and procedures on employment  
 294 and non-discrimination; (Core)  
 295
- 296 II.A.4.a).(13).(a) Fellows must not be required to sign a non-  
 297 competition guarantee or restrictive covenant.  
 298 (Core)  
 299
- 300 II.A.4.a).(14) document verification of program completion for all  
 301 graduating fellows within 30 days; (Core)  
 302
- 303 II.A.4.a).(15) provide verification of an individual fellow’s  
 304 completion upon the fellow’s request, within 30 days;  
 305 and, (Core)  
 306

**Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.**

- 307
- 308 II.A.4.a).(16) obtain review and approval of the Sponsoring  
 309 Institution’s DIO before submitting information or  
 310 requests to the ACGME, as required in the Institutional  
 311 Requirements and outlined in the ACGME Program  
 312 Director’s Guide to the Common Program  
 313 Requirements. (Core)  
 314
- 315 **II.B. Faculty**

316  
317 **Faculty members are a foundational element of graduate medical education**  
318 **– faculty members teach fellows how to care for patients. Faculty members**  
319 **provide an important bridge allowing fellows to grow and become practice**  
320 **ready, ensuring that patients receive the highest quality of care. They are**  
321 **role models for future generations of physicians by demonstrating**  
322 **compassion, commitment to excellence in teaching and patient care,**  
323 **professionalism, and a dedication to lifelong learning. Faculty members**  
324 **experience the pride and joy of fostering the growth and development of**  
325 **future colleagues. The care they provide is enhanced by the opportunity to**  
326 **teach. By employing a scholarly approach to patient care, faculty members,**  
327 **through the graduate medical education system, improve the health of the**  
328 **individual and the population.**

329  
330 **Faculty members ensure that patients receive the level of care expected**  
331 **from a specialist in the field. They recognize and respond to the needs of**  
332 **the patients, fellows, community, and institution. Faculty members provide**  
333 **appropriate levels of supervision to promote patient safety. Faculty**  
334 **members create an effective learning environment by acting in a**  
335 **professional manner and attending to the well-being of the fellows and**  
336 **themselves.**

**Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment.**

- 338  
339 **II.B.1. For each participating site, there must be a sufficient number of**  
340 **faculty members with competence to instruct and supervise all**  
341 **fellows at that location.** <sup>(Core)</sup>  
342  
343 II.B.1.a) Faculty members must demonstrate competence in both clinical  
344 care and teaching. <sup>(Core)</sup>  
345  
346 II.B.1.b) Faculty members or consultants with special expertise in all the  
347 disciplines related to neurology, including behavioral neurology,  
348 child neurology, clinical neurophysiology, epilepsy, headache,  
349 movement disorders, neurocritical care, neurogenetics,  
350 neuroimaging, neurology of aging, neuromuscular medicine,  
351 neuro-oncology, neuro-ophthalmology, neuropathology, pain  
352 management, psychiatry, sleep disorders, and vascular neurology,  
353 should be available to epilepsy fellows. <sup>(Detail)</sup>  
354  
355 II.B.1.c) Faculty members with expertise in the performance and  
356 interpretation of routine EEG, video EEG monitoring, and  
357 intracranial EEG recording must be available to instruct fellows.  
358 <sup>(Core)</sup>  
359  
360 **II.B.2. Faculty members must:**  
361  
362 **II.B.2.a) be role models of professionalism;** <sup>(Core)</sup>  
363

364 **II.B.2.b)** demonstrate commitment to the delivery of safe, quality,  
365 cost-effective, patient-centered care; <sup>(Core)</sup>  
366

**Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.**

367  
368 **II.B.2.c)** demonstrate a strong interest in the education of fellows; <sup>(Core)</sup>  
369

370 **II.B.2.d)** devote sufficient time to the educational program to fulfill  
371 their supervisory and teaching responsibilities; <sup>(Core)</sup>  
372

373 **II.B.2.e)** administer and maintain an educational environment  
374 conducive to educating fellows; <sup>(Core)</sup>  
375

376 **II.B.2.f)** regularly participate in organized clinical discussions,  
377 rounds, journal clubs, and conferences; and, <sup>(Core)</sup>  
378

379 **II.B.2.g)** pursue faculty development designed to enhance their skills  
380 at least annually. <sup>(Core)</sup>  
381

**Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.**

382  
383 **II.B.3. Faculty Qualifications**  
384

385 **II.B.3.a)** Faculty members must have appropriate qualifications in  
386 their field and hold appropriate institutional appointments.  
387 <sup>(Core)</sup>  
388

389 **II.B.3.b)** Subspecialty physician faculty members must:

390  
391 **II.B.3.b).(1)** have current certification in the subspecialty by the  
392 American Board of Psychiatry and Neurology or the  
393 American Osteopathic Board of Neurology and  
394 Psychiatry, or possess qualifications judged acceptable  
395 to the Review Committee. <sup>(Core)</sup>  
396

397 **II.B.3.c)** Any non-physician faculty members who participate in  
398 fellowship program education must be approved by the  
399 program director. <sup>(Core)</sup>  
400

**Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.**

401  
402 **II.B.3.d) Any other specialty physician faculty members must have**  
403 **current certification in their specialty by the appropriate**  
404 **American Board of Medical Specialties (ABMS) member**  
405 **board or American Osteopathic Association (AOA) certifying**  
406 **board, or possess qualifications judged acceptable to the**  
407 **Review Committee. (Core)**

408  
409 **II.B.4. Core Faculty**  
410  
411 **Core faculty members must have a significant role in the education**  
412 **and supervision of fellows and must devote a significant portion of**  
413 **their entire effort to fellow education and/or administration, and**  
414 **must, as a component of their activities, teach, evaluate, and provide**  
415 **formative feedback to fellows. (Core)**  
416

**Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum, mentoring fellows, and assessing fellows' progress toward achievement of competence in and the independent practice of the specialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program. Core faculty members may also be selected for their specific expertise and unique contribution to the program. Core faculty members are engaged in a broad range of activities, which may vary across programs and specialties. Core faculty members provide clinical teaching and supervision of fellows, and also participate in non-clinical activities related to fellow education and program administration. Examples of these non-clinical activities include, but are not limited to, interviewing and selecting fellow applicants, providing didactic instruction, mentoring fellows, simulation exercises, completing the annual ACGME Faculty Survey, and participating on the program's Clinical Competency Committee, Program Evaluation Committee, and other GME committees.**

417  
418 **II.B.4.a) Core faculty members must be designated by the program**  
419 **director. (Core)**

420  
421 **II.B.4.b) Core faculty members must complete the annual ACGME**  
422 **Faculty Survey. (Core)**

423  
424 **II.B.4.c) A core faculty-to-fellow ratio of at least one to one must be**  
425 **maintained in programs with two or more fellows. The program**  
426 **director may be counted as one of the faculty members in**  
427 **determining the ratio. (Core)**  
428

429 II.B.4.d) The program must have at least two core faculty members,  
430 including the program director, who have completed education in  
431 and are board certified by the ABPN in epilepsy. (Core)  
432

433 **II.C. Program Coordinator**

434  
435 **II.C.1. There must be a program coordinator. (Core)**

436  
437 **II.C.2. The program coordinator must be provided with dedicated time and**  
438 **support adequate for administration of the program based upon its**  
439 **size and configuration. (Core)**

440  
441 **II.C.2.a)** At a minimum, the program coordinator must be provided with the  
442 dedicated time and support specified below for administration of  
443 the program:(Core)

<u>Number of Approved Fellow Positions</u>	<u>Minimum FTE</u>
1-3	<u>0.2</u>
4-6	<u>0.2</u>
7-9	<u>0.2</u>
10-12	<u>0.25</u>
13-15	<u>0.3</u>

**Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.**

**Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as otherwise titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison and facilitator between the learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.**

**The program coordinator is a key member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management appropriate to the complexity of the program. Program coordinators are expected to develop in-depth knowledge of the ACGME and Program Requirements, including policies and procedures. Program coordinators assist the program director in meeting accreditation requirements, educational programming, and support of fellows.**

**Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.**

452  
453 **II.D. Other Program Personnel**  
454

455 The program, in partnership with its Sponsoring Institution, must jointly  
456 ensure the availability of necessary personnel for the effective  
457 administration of the program. <sup>(Core)</sup>  
458

**Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.**

459  
460 **III. Fellow Appointments**

461  
462 **III.A. Eligibility Criteria**

463  
464 **III.A.1. Eligibility Requirements – Fellowship Programs**

465  
466 All required clinical education for entry into ACGME-accredited  
467 fellowship programs must be completed in an ACGME-accredited  
468 residency program, an AOA-approved residency program, a  
469 program with ACGME International (ACGME-I) Advanced Specialty  
470 Accreditation, or a Royal College of Physicians and Surgeons of  
471 Canada (RCPSC)-accredited or College of Family Physicians of  
472 Canada (CFPC)-accredited residency program located in Canada.  
473 <sup>(Core)</sup>  
474

**Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).**

475  
476 **III.A.1.a) Fellowship programs must receive verification of each**  
477 **entering fellow’s level of competence in the required field,**  
478 **upon matriculation, using ACGME, ACGME-I, or CanMEDS**  
479 **Milestones evaluations from the core residency program. <sup>(Core)</sup>**  
480

481 **III.A.1.b)** Prior to appointment in the program, fellows must have  
482 successfully completed a program in neurology, child neurology,  
483 or neurodevelopment disabilities that satisfies the requirements in  
484 III.A.1. <sup>(Core)</sup>  
485

486 **III.B. The program director must not appoint more fellows than approved by the**  
487 **Review Committee. <sup>(Core)</sup>**  
488

489 **III.B.1. All complement increases must be approved by the Review**  
490 **Committee. <sup>(Core)</sup>**  
491

492 **III.C. Fellow Transfers**

493  
494 The program must obtain verification of previous educational experiences  
495 and a summative competency-based performance evaluation prior to  
496 acceptance of a transferring fellow, and Milestones evaluations upon  
497 matriculation. <sup>(Core)</sup>

498  
499

537

**IV. Educational Program**

*The ACGME accreditation system is designed to encourage excellence and innovation in graduate medical education regardless of the organizational affiliation, size, or location of the program.*

*The educational program must support the development of knowledgeable, skillful physicians who provide compassionate care.*

*In addition, the program is expected to define its specific program aims consistent with the overall mission of its Sponsoring Institution, the needs of the community it serves and that its graduates will serve, and the distinctive capabilities of physicians it intends to graduate. While programs must demonstrate substantial compliance with the Common and subspecialty-specific Program Requirements, it is recognized that within this framework, programs may place different emphasis on research, leadership, public health, etc. It is expected that the program aims will reflect the nuanced program-specific goals for it and its graduates; for example, it is expected that a program aiming to prepare physician-scientists will have a different curriculum from one focusing on community health.*

**IV.A. The curriculum must contain the following educational components:** <sup>(Core)</sup>

**IV.A.1. a set of program aims consistent with the Sponsoring Institution’s mission, the needs of the community it serves, and the desired distinctive capabilities of its graduates;** <sup>(Core)</sup>

**IV.A.1.a) The program’s aims must be made available to program applicants, fellows, and faculty members.** <sup>(Core)</sup>

**IV.A.2. competency-based goals and objectives for each educational experience designed to promote progress on a trajectory to autonomous practice in their subspecialty. These must be distributed, reviewed, and available to fellows and faculty members;** <sup>(Core)</sup>

**IV.A.3. delineation of fellow responsibilities for patient care, progressive responsibility for patient management, and graded supervision in their subspecialty;** <sup>(Core)</sup>

**Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.**

**IV.A.4. structured educational activities beyond direct patient care; and,** <sup>(Core)</sup>

538  
539  
540  
541

**Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.**

542  
543  
544  
545  
546  
547

**IV.A.5. advancement of fellows' knowledge of ethical principles foundational to medical professionalism. (Core)**

**IV.B. ACGME Competencies**

**Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.**

548  
549  
550  
551  
552  
553  
554  
555  
556  
557  
558

**IV.B.1. The program must integrate the following ACGME Competencies into the curriculum: (Core)**

**IV.B.1.a) Professionalism**

**Fellows must demonstrate a commitment to professionalism and an adherence to ethical principles. (Core)**

**IV.B.1.b) Patient Care and Procedural Skills**

**Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs*. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.**

**These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.**

559  
560  
561  
562  
563  
564  
565  
566  
567

**IV.B.1.b).(1) Fellows must be able to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health. (Core)**

**IV.B.1.b).(1).(a) Fellows must demonstrate competence in:**

**IV.B.1.b).(1).(a).(i) the diagnostic evaluation, medical**

568		management, and surgical evaluation of
569		patients with epilepsy and seizures; (Core)
570		
571	IV.B.1.b).(1).(a).(ii)	interviewing and examining patients with
572		epilepsy and seizures; (Core)
573		
574	IV.B.1.b).(1).(a).(iii)	determining the differential diagnosis of the
575		various clinical presentations of epilepsy
576		and seizures; (Core)
577		
578	IV.B.1.b).(1).(a).(iv)	determining the appropriate investigations
579		for the diagnosis of epilepsy and seizures,
580		including laboratory, pathologic, radiologic,
581		and neurophysiologic testing; (Core)
582		
583	IV.B.1.b).(1).(a).(iv).(a)	This experience must include both
584		medical and surgical investigations.
585		(Core)
586		
587	IV.B.1.b).(1).(a).(v)	inpatient and outpatient management of
588		patients with epilepsy and seizures; and,
589		(Core)
590		
591	IV.B.1.b).(1).(a).(v).(a)	This experience must provide
592		management to patients being
593		treated medically and surgically. (Core)
594		
595	IV.B.1.b).(1).(a).(vi)	working in multidisciplinary teams and
596		coordinating patient care. (Core)
597		
598	<b>IV.B.1.b).(2)</b>	<b>Fellows must be able to perform all medical,</b>
599		<b>diagnostic, and surgical procedures considered</b>
600		<b>essential for the area of practice. (Core)</b>
601		
602	<b>IV.B.1.c)</b>	<b>Medical Knowledge</b>
603		
604		<b>Fellows must demonstrate knowledge of established and</b>
605		<b>evolving biomedical, clinical, epidemiological and social-</b>
606		<b>behavioral sciences, as well as the application of this</b>
607		<b>knowledge to patient care. (Core)</b>
608		
609	IV.B.1.c).(1)	Fellows must demonstrate competence in their knowledge
610		of:
611		
612	IV.B.1.c).(1).(a)	the basic science of epilepsy and seizures; (Core)
613		
614	IV.B.1.c).(1).(b)	the genetics of epilepsy and seizures; (Core)
615		
616	IV.B.1.c).(1).(c)	the epidemiology of epilepsy and seizures; (Core)
617		

- 618 IV.B.1.c).(1).(d) neuroimaging and other diagnostic modalities in  
619 epilepsy; <sup>(Core)</sup>  
620  
621 IV.B.1.c).(1).(e) neuropsychology; <sup>(Core)</sup>  
622  
623 IV.B.1.c).(1).(f) pharmacologic treatment of epilepsy; <sup>(Core)</sup>  
624  
625 IV.B.1.c).(1).(g) non-pharmacologic treatments of epilepsy; <sup>(Core)</sup>  
626  
627 IV.B.1.c).(1).(h) co-morbidity in epilepsy and seizures; <sup>(Core)</sup>  
628  
629 IV.B.1.c).(1).(i) ictal and interictal EEG patterns across the lifespan;  
630 and, <sup>(Core)</sup>  
631  
632 IV.B.1.c).(1).(j) prognosis in epilepsy and seizures. <sup>(Core)</sup>  
633

634 **IV.B.1.d) Practice-based Learning and Improvement**

635  
636 **Fellows must demonstrate the ability to investigate and**  
637 **evaluate their care of patients, to appraise and assimilate**  
638 **scientific evidence, and to continuously improve patient care**  
639 **based on constant self-evaluation and lifelong learning.** <sup>(Core)</sup>  
640

**Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.**

**The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.**

- 641  
642 **IV.B.1.e) Interpersonal and Communication Skills**  
643  
644 **Fellows must demonstrate interpersonal and communication**  
645 **skills that result in the effective exchange of information and**  
646 **collaboration with patients, their families, and health**  
647 **professionals.** <sup>(Core)</sup>  
648  
649 **IV.B.1.f) Systems-based Practice**  
650  
651 **Fellows must demonstrate an awareness of and**  
652 **responsiveness to the larger context and system of health**  
653 **care, including the social determinants of health, as well as**  
654 **the ability to call effectively on other resources to provide**  
655 **optimal health care.** <sup>(Core)</sup>  
656  
657 **IV.C. Curriculum Organization and Fellow Experiences**  
658

- 659 **IV.C.1. The curriculum must be structured to optimize fellow educational**  
660 **experiences, the length of these experiences, and supervisory**  
661 **continuity.** <sup>(Core)</sup>  
662
- 663 IV.C.1.a) Assignment of rotations must be structured to minimize the  
664 frequency of rotational transitions and rotations must be of  
665 sufficient length to provide a quality educational experience,  
666 defined by continuity of patient care, ongoing supervision,  
667 longitudinal relationships with faculty members, and high-quality  
668 assessment and feedback. <sup>(Core)</sup>  
669
- 670 IV.C.1.b) Clinical experiences must be structured to facilitate learning in a  
671 manner that allows the fellows to function as part of an effective  
672 health care team that works together longitudinally with shared  
673 goals of patient safety and quality improvement. <sup>(Core)</sup>  
674
- 675 **IV.C.2. The program must provide instruction and experience in pain**  
676 **management if applicable for the subspecialty, including recognition**  
677 **of the signs of addiction.** <sup>(Core)</sup>  
678
- 679 IV.C.3. The program director must, with assistance from faculty members,  
680 develop and implement the academic and clinical educational program  
681 by: <sup>(Core)</sup>  
682
- 683 IV.C.3.a) preparing and implementing a comprehensive, well organized,  
684 and effective curriculum, both academic and clinical, which  
685 includes the presentation of core specialty knowledge  
686 supplemented by the addition of current information; and, <sup>(Core)</sup>  
687
- 688 IV.C.3.b) providing fellows with direct experience in progressive  
689 responsibility for patient management. <sup>(Core)</sup>  
690
- 691 IV.C.4. The curriculum must include the equivalent of at least six months of full-  
692 time patient care in inpatient and outpatient epilepsy. <sup>(Core)</sup>  
693
- 694 IV.C.4.a) Time spent in the EMU may be counted toward the six-month  
695 minimum if a fellow's clinical experience involves patient  
696 management. <sup>(Detail)</sup>  
697
- 698 IV.C.4.b) This must include a minimum of three months of EEG and video-  
699 EEG monitoring, and must include: <sup>(Core)</sup>  
700
- 701 IV.C.4.b).(1) routine EEGs: 50 as the primary reviewer, including  
702 responsibility for the main writing of the report; <sup>(Core)</sup>  
703
- 704 IV.C.4.b).(2) Phase 1 scalp monitoring (prolonged, overnight studies):  
705 20 as the primary reviewer, including responsibility for the  
706 report; and, <sup>(Core)</sup>  
707
- 708 IV.C.4.b).(3) Phase 2 intracranial monitoring, including subdural grid,  
709 depth, and intra-operative electrocorticograph recordings:

710		five as the primary reviewer, including responsibility for the
711		report. <sup>(Core)</sup>
712		
713	IV.C.4.b).(4)	A minimum of one month of elective time must be
714		provided. <sup>(Core)</sup>
715		
716	IV.C.4.b).(5)	The remaining time should include additional experience in
717		the care of patients with epilepsy and seizures, or epilepsy
718		research, or neuropsychology, or psychiatry, or
719		neuroimaging. <sup>(Detail)</sup>
720		
721	IV.C.5.	Programs may be primarily child or adult epilepsy programs, but fellows
722		must have experience in the care of both adults and children. <sup>(Core)</sup>
723		
724	IV.C.5.a)	A program that is primarily adult-based must include a minimum of
725		one month of clinical exposure to the care of children with epilepsy
726		and seizures. <sup>(Core)</sup>
727		
728	IV.C.5.b)	A program that is primarily child-based must include a minimum of
729		one month of clinical exposure to the care of adults with epilepsy
730		and seizures. <sup>(Core)</sup>
731		
732	IV.C.6.	Fellows must attend required seminars, conferences, and journal clubs.
733		<sup>(Core)</sup>
734		
735	IV.C.7.	Seminars and conferences must include the full spectrum of epilepsy and
736		seizures across the lifespan. <sup>(Core)</sup>
737		
738	<b>IV.D.</b>	<b>Scholarship</b>
739		
740		<b><i>Medicine is both an art and a science. The physician is a humanistic</i></b>
741		<b><i>scientist who cares for patients. This requires the ability to think critically,</i></b>
742		<b><i>evaluate the literature, appropriately assimilate new knowledge, and</i></b>
743		<b><i>practice lifelong learning. The program and faculty must create an</i></b>
744		<b><i>environment that fosters the acquisition of such skills through fellow</i></b>
745		<b><i>participation in scholarly activities as defined in the subspecialty-specific</i></b>
746		<b><i>Program Requirements. Scholarly activities may include discovery,</i></b>
747		<b><i>integration, application, and teaching.</i></b>
748		
749		<b><i>The ACGME recognizes the diversity of fellowships and anticipates that</i></b>
750		<b><i>programs prepare physicians for a variety of roles, including clinicians,</i></b>
751		<b><i>scientists, and educators. It is expected that the program's scholarship will</i></b>
752		<b><i>reflect its mission(s) and aims, and the needs of the community it serves.</i></b>
753		<b><i>For example, some programs may concentrate their scholarly activity on</i></b>
754		<b><i>quality improvement, population health, and/or teaching, while other</i></b>
755		<b><i>programs might choose to utilize more classic forms of biomedical</i></b>
756		<b><i>research as the focus for scholarship.</i></b>
757		
758	<b>IV.D.1.</b>	<b>Program Responsibilities</b>
759		

760	<b>IV.D.1.a)</b>	<b>The program must demonstrate evidence of scholarly activities, consistent with its mission(s) and aims. (Core)</b>
761		
762		
763	<b>IV.D.1.b)</b>	<b>The program in partnership with its Sponsoring Institution, must allocate adequate resources to facilitate fellow and faculty involvement in scholarly activities. (Core)</b>
764		
765		
766		
767	<b>IV.D.2.</b>	<b>Faculty Scholarly Activity</b>
768		
769	<b>IV.D.2.a)</b>	<b>Among their scholarly activity, programs must demonstrate accomplishments in at least three of the following domains: (Core)</b>
770		
771		
772		
773		<ul style="list-style-type: none"> <li>• <b>Research in basic science, education, translational science, patient care, or population health</b></li> </ul>
774		<ul style="list-style-type: none"> <li>• <b>Peer-reviewed grants</b></li> </ul>
775		<ul style="list-style-type: none"> <li>• <b>Quality improvement and/or patient safety initiatives</b></li> </ul>
776		<ul style="list-style-type: none"> <li>• <b>Systematic reviews, meta-analyses, review articles, chapters in medical textbooks, or case reports</b></li> </ul>
777		<ul style="list-style-type: none"> <li>• <b>Creation of curricula, evaluation tools, didactic educational activities, or electronic educational materials</b></li> </ul>
778		<ul style="list-style-type: none"> <li>• <b>Contribution to professional committees, educational organizations, or editorial boards</b></li> </ul>
779		<ul style="list-style-type: none"> <li>• <b>Innovations in education</b></li> </ul>
780		
781		
782		
783		
784

786	<b>IV.D.2.b)</b>	<b>The program must demonstrate dissemination of scholarly activity within and external to the program by the following methods:</b>
787		
788		
789		
<p><b>Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the fellows’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.</b></p>		
790		
791	<b>IV.D.2.b).(1)</b>	<b>faculty participation in grand rounds, posters, workshops, quality improvement presentations, podium presentations, grant leadership, non-peer-reviewed print/electronic resources, articles or publications, book chapters, textbooks, webinars, service on professional committees, or serving as a journal reviewer, journal editorial board member, or editor; (Outcome)‡</b>
792		
793		
794		
795		
796		
797		
798		
799		
800	<b>IV.D.2.b).(2)</b>	<b>peer-reviewed publication. (Outcome)</b>

801		
802	<b>IV.D.3.</b>	<b>Fellow Scholarly Activity</b>
803		
804	IV.D.3.a)	The curriculum must advance fellows' knowledge of the basic principles of evidence-based medicine and research, including how research is conducted, evaluated, explained to patients, and applied to patient care. <sup>(Core)</sup>
805		
806		
807		
808		
809	IV.D.3.b)	Fellows should participate in scholarly activity under the mentorship of program faculty members. <sup>(Detail)</sup>
810		
811		
812	IV.D.3.c)	The Sponsoring Institution and program should allocate adequate educational resources to facilitate fellow involvement in scholarly activities. <sup>(Detail)</sup>
813		
814		
815		
816	IV.D.3.d)	Fellows should receive support to attend one regional, national, or international professional conference during the program. <sup>(Detail)</sup>
817		
818		
819	<b>V.</b>	<b>Evaluation</b>
820		
821	<b>V.A.</b>	<b>Fellow Evaluation</b>
822		
823	<b>V.A.1.</b>	<b>Feedback and Evaluation</b>
824		

**Background and Intent:** Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- fellows identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

825  
826 **V.A.1.a)** Faculty members must directly observe, evaluate, and  
827 frequently provide feedback on fellow performance during  
828 each rotation or similar educational assignment. <sup>(Core)</sup>  
829

**Background and Intent:** Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

830  
831 **V.A.1.b)** Evaluation must be documented at the completion of the  
832 assignment. <sup>(Core)</sup>  
833

834 **V.A.1.b).(1)** For block rotations of greater than three months in  
835 duration, evaluation must be documented at least  
836 every three months. <sup>(Core)</sup>  
837

838 **V.A.1.b).(2)** Longitudinal experiences such as continuity clinic in  
839 the context of other clinical responsibilities must be  
840 evaluated at least every three months and at  
841 completion. <sup>(Core)</sup>  
842

843 **V.A.1.c)** The program must provide an objective performance  
844 evaluation based on the Competencies and the subspecialty-  
845 specific Milestones, and must: <sup>(Core)</sup>  
846

847 **V.A.1.c).(1)** use multiple evaluators (e.g., faculty members, peers,  
848 patients, self, and other professional staff members);  
849 and, <sup>(Core)</sup>  
850

851 **V.A.1.c).(2)** provide that information to the Clinical Competency  
852 Committee for its synthesis of progressive fellow  
853 performance and improvement toward unsupervised  
854 practice. <sup>(Core)</sup>  
855

**Background and Intent:** The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

856  
857 **V.A.1.d)** The program director or their designee, with input from the  
858 Clinical Competency Committee, must:  
859

- 860 V.A.1.d).(1) meet with and review with each fellow their  
861 documented semi-annual evaluation of performance,  
862 including progress along the subspecialty-specific  
863 Milestones. <sup>(Core)</sup>  
864
- 865 V.A.1.d).(2) assist fellows in developing individualized learning  
866 plans to capitalize on their strengths and identify areas  
867 for growth; and, <sup>(Core)</sup>  
868
- 869 V.A.1.d).(3) develop plans for fellows failing to progress, following  
870 institutional policies and procedures. <sup>(Core)</sup>  
871

**Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.**

**Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.**

- 872
- 873 V.A.1.e) At least annually, there must be a summative evaluation of  
874 each fellow that includes their readiness to progress to the  
875 next year of the program, if applicable. <sup>(Core)</sup>  
876
- 877 V.A.1.f) The evaluations of a fellow's performance must be accessible  
878 for review by the fellow. <sup>(Core)</sup>  
879
- 880 V.A.2. Final Evaluation
- 881
- 882 V.A.2.a) The program director must provide a final evaluation for each  
883 fellow upon completion of the program. <sup>(Core)</sup>  
884
- 885 V.A.2.a).(1) The subspecialty-specific Milestones, and when  
886 applicable the subspecialty-specific Case Logs, must  
887 be used as tools to ensure fellows are able to engage  
888 in autonomous practice upon completion of the  
889 program. <sup>(Core)</sup>  
890
- 891 V.A.2.a).(2) The final evaluation must:  
892

- 893 V.A.2.a).(2).(a) become part of the fellow’s permanent record  
894 maintained by the institution, and must be  
895 accessible for review by the fellow in  
896 accordance with institutional policy; <sup>(Core)</sup>  
897
- 898 V.A.2.a).(2).(b) verify that the fellow has demonstrated the  
899 knowledge, skills, and behaviors necessary to  
900 enter autonomous practice; <sup>(Core)</sup>  
901
- 902 V.A.2.a).(2).(c) consider recommendations from the Clinical  
903 Competency Committee; and, <sup>(Core)</sup>  
904
- 905 V.A.2.a).(2).(d) be shared with the fellow upon completion of  
906 the program. <sup>(Core)</sup>  
907
- 908 V.A.3. A Clinical Competency Committee must be appointed by the  
909 program director. <sup>(Core)</sup>  
910
- 911 V.A.3.a) At a minimum the Clinical Competency Committee must  
912 include three members, at least one of whom is a core faculty  
913 member. Members must be faculty members from the same  
914 program or other programs, or other health professionals  
915 who have extensive contact and experience with the  
916 program’s fellows. <sup>(Core)</sup>  
917
- 918 V.A.3.b) The Clinical Competency Committee must:  
919
- 920 V.A.3.b).(1) review all fellow evaluations at least semi-annually;  
921 <sup>(Core)</sup>  
922
- 923 V.A.3.b).(2) determine each fellow’s progress on achievement of  
924 the subspecialty-specific Milestones; and, <sup>(Core)</sup>  
925
- 926 V.A.3.b).(3) meet prior to the fellows’ semi-annual evaluations and  
927 advise the program director regarding each fellow’s  
928 progress. <sup>(Core)</sup>  
929
- 930 V.B. Faculty Evaluation  
931
- 932 V.B.1. The program must have a process to evaluate each faculty  
933 member’s performance as it relates to the educational program at  
934 least annually. <sup>(Core)</sup>  
935

**Background and Intent:** The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback

on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 936  
937  
938  
939  
940  
941  
942  
943  
944  
945  
946  
947  
948  
949  
950  
951
- V.B.1.a)** This evaluation must include a review of the faculty member's clinical teaching abilities, engagement with the educational program, participation in faculty development related to their skills as an educator, clinical performance, professionalism, and scholarly activities. (Core)
  - V.B.1.b)** This evaluation must include written, confidential evaluations by the fellows. (Core)
  - V.B.2.** Faculty members must receive feedback on their evaluations at least annually. (Core)
  - V.B.3.** Results of the faculty educational evaluations should be incorporated into program-wide faculty development plans. (Core)

**Background and Intent:** The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

- V.C. Program Evaluation and Improvement**
  - V.C.1.** The program director must appoint the Program Evaluation Committee to conduct and document the Annual Program Evaluation as part of the program's continuous improvement process. (Core)
  - V.C.1.a)** The Program Evaluation Committee must be composed of at least two program faculty members, at least one of whom is a core faculty member, and at least one fellow. (Core)
  - V.C.1.b)** Program Evaluation Committee responsibilities must include:
  - V.C.1.b).(1)** acting as an advisor to the program director, through program oversight; (Core)

- 969 **V.C.1.b).(2)** review of the program’s self-determined goals and  
 970 progress toward meeting them; <sup>(Core)</sup>  
 971  
 972 **V.C.1.b).(3)** guiding ongoing program improvement, including  
 973 development of new goals, based upon outcomes;  
 974 and, <sup>(Core)</sup>  
 975  
 976 **V.C.1.b).(4)** review of the current operating environment to identify  
 977 strengths, challenges, opportunities, and threats as  
 978 related to the program’s mission and aims. <sup>(Core)</sup>  
 979

**Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program’s progress toward achievement of its goals and aims.**

- 980  
 981 **V.C.1.c)** The Program Evaluation Committee should consider the  
 982 following elements in its assessment of the program:  
 983  
 984 **V.C.1.c).(1)** curriculum; <sup>(Core)</sup>  
 985  
 986 **V.C.1.c).(2)** outcomes from prior Annual Program Evaluation(s);

 1041 **Accreditation Site Visit.** <sup>(Core)</sup>  
 1042  
 1043 V.C.2.a) **A summary of the Self-Study must be submitted to the DIO.**  
 1044 <sup>(Core)</sup>  
 1045

**Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.**

1086  
1087  
1088  
1089

**V.C.3.a)**

For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) an annual written exam, in the preceding three years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. <sup>(Outcome)‡</sup>

**V.C.3.b)**

For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial written exam, in the preceding six years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. <sup>(Outcome)</sup>

**V.C.3.c)**

For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) an annual oral exam, in the preceding three years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. <sup>(Outcome)</sup>

**V.C.3.d)**

For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial oral exam, in the preceding six years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. <sup>(Outcome)</sup>

**V.C.3.e)**

For each of the exams referenced in V.C.3.a)-d), any program whose graduates over the time period specified in the requirement have achieved an 80 percent pass rate will have met this requirement, no matter the percentile rank of the program for pass rate in that subspecialty. <sup>(Outcome)</sup>

**Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.**

**There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.**

1090  
1091  
1092  
1093

**V.C.3.f)**

Programs must report, in ADS, board certification status annually for the cohort of board-eligible fellows that graduated seven years earlier. <sup>(Core)</sup>

**Background and Intent:** It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

1095

1096

## VI. The Learning and Working Environment

1097

1098

*Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:*

1099

1100

1101

- *Excellence in the safety and quality of care rendered to patients by fellows today*

1102

1103

1104

- *Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice*

1105

1106

1107

- *Excellence in professionalism through faculty modeling of:*

1108

1109

- *the effacement of self-interest in a humanistic environment that supports the professional development of physicians*

1110

1111

1112

- *the joy of curiosity, problem-solving, intellectual rigor, and discovery*

1113

1114

- *Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team*

1115

1116

**Background and Intent:** The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

1156  
1157

**VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability**

**VI.A.1. Patient Safety and Quality Improvement**

*All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.*

*Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating fellows will apply these skills to critique their future unsupervised practice and effect quality improvement measures.*

*It is necessary for fellows and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.*

**VI.A.1.a Patient Safety**

**VI.A.1.a).(1) Culture of Safety**

*A culture of safety requires continuous identification of vulnerabilities and a willingness to transparently deal with them. An effective organization has formal mechanisms to assess the knowledge, skills, and attitudes of its personnel toward safety in order to identify areas for improvement.*

**VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows must actively participate in patient safety systems and contribute to a culture of safety.**  
(Core)

1158 VI.A.1.a).(1).(b) The program must have a structure that  
1159 promotes safe, interprofessional, team-based  
1160 care. <sup>(Core)</sup>

1161  
1162 VI.A.1.a).(2) Education on Patient Safety  
1163  
1164 Programs must provide formal educational activities  
1165 that promote patient safety-related goals, tools, and  
1166 techniques. <sup>(Core)</sup>  
1167

**Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.**

1168  
1169 VI.A.1.a).(3) Patient Safety Events  
1170  
1171 *Reporting, investigation, and follow-up of adverse*  
1172 *events, near misses, and unsafe conditions are pivotal*  
1173 *mechanisms for improving patient safety, and are*  
1174 *essential for the success of any patient safety*  
1175 *program. Feedback and experiential learning are*  
1176 *essential to developing true competence in the ability*  
1177 *to identify causes and institute sustainable systems-*  
1178 *based changes to ameliorate patient safety*  
1179 *vulnerabilities.*

1180  
1181 VI.A.1.a).(3).(a) Residents, fellows, faculty members, and other  
1182 clinical staff members must:

1183  
1184 VI.A.1.a).(3).(a).(i) know their responsibilities in reporting  
1185 patient safety events at the clinical site;  
1186 <sup>(Core)</sup>

1187  
1188 VI.A.1.a).(3).(a).(ii) know how to report patient safety  
1189 events, including near misses, at the  
1190 clinical site; and, <sup>(Core)</sup>

1191  
1192 VI.A.1.a).(3).(a).(iii) be provided with summary information  
1193 of their institution's patient safety  
1194 reports. <sup>(Core)</sup>  
1195

1196 VI.A.1.a).(3).(b) Fellows must participate as team members in  
1197 real and/or simulated interprofessional clinical  
1198 patient safety activities, such as root cause  
1199 analyses or other activities that include  
1200 analysis, as well as formulation and  
1201 implementation of actions. <sup>(Core)</sup>  
1202

1203 VI.A.1.a).(4) Fellow Education and Experience in Disclosure of  
1204 Adverse Events  
1205

1206		<i>Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for fellows to develop and apply.</i>
1207		
1208		
1209		
1210		
1211		
1212	VI.A.1.a).(4).(a)	All fellows must receive training in how to disclose adverse events to patients and families. <sup>(Core)</sup>
1213		
1214		
1215		
1216	VI.A.1.a).(4).(b)	Fellows should have the opportunity to participate in the disclosure of patient safety events, real or simulated. <sup>(Detail)</sup>
1217		
1218		
1219		
1220	VI.A.1.b)	Quality Improvement
1221		
1222	VI.A.1.b).(1)	Education in Quality Improvement
1223		
1224		<i>A cohesive model of health care includes quality-related goals, tools, and techniques that are necessary in order for health care professionals to achieve quality improvement goals.</i>
1225		
1226		
1227		
1228		
1229	VI.A.1.b).(1).(a)	Fellows must receive training and experience in quality improvement processes, including an understanding of health care disparities. <sup>(Core)</sup>
1230		
1231		
1232		
1233	VI.A.1.b).(2)	Quality Metrics
1234		
1235		<i>Access to data is essential to prioritizing activities for care improvement and evaluating success of improvement efforts.</i>
1236		
1237		
1238		
1239	VI.A.1.b).(2).(a)	Fellows and faculty members must receive data on quality metrics and benchmarks related to their patient populations. <sup>(Core)</sup>
1240		
1241		
1242		
1243	VI.A.1.b).(3)	Engagement in Quality Improvement Activities
1244		
1245		<i>Experiential learning is essential to developing the ability to identify and institute sustainable systems-based changes to improve patient care.</i>
1246		
1247		
1248		
1249	VI.A.1.b).(3).(a)	Fellows must have the opportunity to participate in interprofessional quality improvement activities. <sup>(Core)</sup>
1250		
1251		
1252		
1253	VI.A.1.b).(3).(a).(i)	This should include activities aimed at reducing health care disparities. <sup>(Detail)</sup>
1254		
1255		
1256	VI.A.2.	Supervision and Accountability

1257		
1258	<b>VI.A.2.a)</b>	<b><i>Although the attending physician is ultimately responsible for the care of the patient, every physician shares in the responsibility and accountability for their efforts in the provision of care. Effective programs, in partnership with their Sponsoring Institutions, define, widely communicate, and monitor a structured chain of responsibility and accountability as it relates to the supervision of all patient care.</i></b>
1259		
1260		
1261		
1262		
1263		
1264		
1265		
1266		
1267		<b><i>Supervision in the setting of graduate medical education provides safe and effective care to patients; ensures each fellow's development of the skills, knowledge, and attitudes required to enter the unsupervised practice of medicine; and establishes a foundation for continued professional growth.</i></b>
1268		
1269		
1270		
1271		
1272		
1273	<b>VI.A.2.a).(1)</b>	<b>Each patient must have an identifiable and appropriately-credentialed and privileged attending physician (or licensed independent practitioner as specified by the applicable Review Committee) who is responsible and accountable for the patient's care.</b>
1274		
1275		
1276		
1277		
1278		<b>(Core)</b>
1279		
1280	<b>VI.A.2.a).(1).(a)</b>	<b>This information must be available to fellows, faculty members, other members of the health care team, and patients. <b>(Core)</b></b>
1281		
1282		
1283		
1284	<b>VI.A.2.a).(1).(b)</b>	<b>Fellows and faculty members must inform each patient of their respective roles in that patient's care when providing direct patient care. <b>(Core)</b></b>
1285		
1286		
1287		
1288	<b>VI.A.2.b)</b>	<b><i>Supervision may be exercised through a variety of methods. For many aspects of patient care, the supervising physician may be a more advanced fellow. Other portions of care provided by the fellow can be adequately supervised by the appropriate availability of the supervising faculty member or fellow, either on site or by means of telecommunication technology. Some activities require the physical presence of the supervising faculty member. In some circumstances, supervision may include post-hoc review of fellow-delivered care with feedback.</i></b>
1289		
1290		
1291		
1292		
1293		
1294		
1295		
1296		
1297		
1298		

**Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.**

1299		
1300	<b>VI.A.2.b).(1)</b>	<b>The program must demonstrate that the appropriate level of supervision in place for all fellows is based on each fellow’s level of training and ability, as well as patient complexity and acuity. Supervision may be exercised through a variety of methods, as appropriate to the situation. <sup>(Core)</sup></b>
1301		
1302		
1303		
1304		
1305		
1306		
1307	<b>VI.A.2.b).(2)</b>	<b>The program must define when physical presence of a supervising physician is required. <sup>(Core)</sup></b>
1308		
1309		
1310	<b>VI.A.2.c)</b>	<b>Levels of Supervision</b>
1311		
1312		<b>To promote appropriate fellow supervision while providing for graded authority and responsibility, the program must use the following classification of supervision: <sup>(Core)</sup></b>
1313		
1314		
1315		
1316	<b>VI.A.2.c).(1)</b>	<b>Direct Supervision:</b>
1317		
1318	<b>VI.A.2.c).(1).(a)</b>	<b>the supervising physician is physically present with the fellow during the key portions of the patient interaction; or, <sup>(Core)</sup></b>
1319		
1320		
1321		
1322	<b>VI.A.2.c).(1).(b)</b>	<b>the supervising physician and/or patient is not physically present with the fellow and the supervising physician is concurrently monitoring the patient care through appropriate telecommunication technology. <sup>(Core)</sup></b>
1323		
1324		
1325		
1326		
1327		
1328	<b>VI.A.2.c).(2)</b>	<b>Indirect Supervision: the supervising physician is not providing physical or concurrent visual or audio supervision but is immediately available to the fellow for guidance and is available to provide appropriate direct supervision. <sup>(Core)</sup></b>
1329		
1330		
1331		
1332		
1333		
1334	<b>VI.A.2.c).(3)</b>	<b>Oversight – the supervising physician is available to provide review of procedures/encounters with feedback provided after care is delivered. <sup>(Core)</sup></b>
1335		
1336		
1337		
1338	<b>VI.A.2.d)</b>	<b>The privilege of progressive authority and responsibility, conditional independence, and a supervisory role in patient care delegated to each fellow must be assigned by the program director and faculty members. <sup>(Core)</sup></b>
1339		
1340		
1341		
1342		
1343	<b>VI.A.2.d).(1)</b>	<b>The program director must evaluate each fellow’s abilities based on specific criteria, guided by the Milestones. <sup>(Core)</sup></b>
1344		
1345		
1346		
1347	<b>VI.A.2.d).(2)</b>	<b>Faculty members functioning as supervising physicians must delegate portions of care to fellows</b>
1348		

1349 based on the needs of the patient and the skills of  
1350 each fellow. <sup>(Core)</sup>

1351  
1352 VI.A.2.d).(3) Fellows should serve in a supervisory role to junior  
1353 fellows and residents in recognition of their progress  
1354 toward independence, based on the needs of each  
1355 patient and the skills of the individual resident or  
1356 fellow. <sup>(Detail)</sup>

1357  
1358 VI.A.2.e) Programs must set guidelines for circumstances and events  
1359 in which fellows must communicate with the supervising  
1360 faculty member(s). <sup>(Core)</sup>

1361  
1362 VI.A.2.e).(1) Each fellow must know the limits of their scope of  
1363 authority, and the circumstances under which the  
1364 fellow is permitted to act with conditional  
1365 independence. <sup>(Outcome)</sup>

1366

**Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.**

1367  
1368 VI.A.2.f) Faculty supervision assignments must be of sufficient  
1369 duration to assess the knowledge and skills of each fellow  
1370 and to delegate to the fellow the appropriate level of patient  
1371 care authority and responsibility. <sup>(Core)</sup>

1372  
1373 VI.B. Professionalism

1374  
1375 VI.B.1. Programs, in partnership with their Sponsoring Institutions, must  
1376 educate fellows and faculty members concerning the professional  
1377 responsibilities of physicians, including their obligation to be  
1378 appropriately rested and fit to provide the care required by their  
1379 patients. <sup>(Core)</sup>

1380  
1381 VI.B.2. The learning objectives of the program must:

1382  
1383 VI.B.2.a) be accomplished through an appropriate blend of supervised  
1384 patient care responsibilities, clinical teaching, and didactic  
1385 educational events; <sup>(Core)</sup>

1386  
1387 VI.B.2.b) be accomplished without excessive reliance on fellows to  
1388 fulfill non-physician obligations; and, <sup>(Core)</sup>

1389

**Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests;**

routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1390  
1391  
1392

VI.B.2.c) ensure manageable patient care responsibilities. (Core)

**Background and Intent:** The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1393  
1394  
1395  
1396  
1397  
1398  
1399  
1400  
1401  
1402  
1403  
1404  
1405  
1406

VI.B.3. The program director, in partnership with the Sponsoring Institution, must provide a culture of professionalism that supports patient safety and personal responsibility. (Core)

VI.B.4. Fellows and faculty members must demonstrate an understanding of their personal role in the:

VI.B.4.a) provision of patient- and family-centered care; (Outcome)

VI.B.4.b) safety and welfare of patients entrusted to their care, including the ability to report unsafe conditions and adverse events; (Outcome)

**Background and Intent:** This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

1407  
1408  
1409

VI.B.4.c) assurance of their fitness for work, including: (Outcome)

**Background and Intent:** This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

1410  
1411  
1412  
1413  
1414  
1415  
1416  
1417  
1418  
1419

VI.B.4.c).(1) management of their time before, during, and after clinical assignments; and, (Outcome)

VI.B.4.c).(2) recognition of impairment, including from illness, fatigue, and substance use, in themselves, their peers, and other members of the health care team. (Outcome)

VI.B.4.d) commitment to lifelong learning; (Outcome)

- 1420 VI.B.4.e) monitoring of their patient care performance improvement  
 1421 indicators; and, <sup>(Outcome)</sup>  
 1422
- 1423 VI.B.4.f) accurate reporting of clinical and educational work hours,  
 1424 patient outcomes, and clinical experience data. <sup>(Outcome)</sup>  
 1425
- 1426 VI.B.5. All fellows and faculty members must demonstrate responsiveness  
 1427 to patient needs that supersedes self-interest. This includes the  
 1428 recognition that under certain circumstances, the best interests of  
 1429 the patient may be served by transitioning that patient's care to  
 1430 another qualified and rested provider. <sup>(Outcome)</sup>  
 1431
- 1432 VI.B.6. Programs, in partnership with their Sponsoring Institutions, must  
 1433 provide a professional, equitable, respectful, and civil environment  
 1434 that is free from discrimination, sexual and other forms of  
 1435 harassment, mistreatment, abuse, or coercion of students, fellows,  
 1436 faculty, and staff. <sup>(Core)</sup>  
 1437
- 1438 VI.B.7. Programs, in partnership with their Sponsoring Institutions, should  
 1439 have a process for education of fellows and faculty regarding  
 1440 unprofessional behavior and a confidential process for reporting,  
 1441 investigating, and addressing such concerns. <sup>(Core)</sup>  
 1442
- 1443 VI.C. Well-Being  
 1444
- 1445 *Psychological, emotional, and physical well-being are critical in the*  
 1446 *development of the competent, caring, and resilient physician and require*  
 1447 *proactive attention to life inside and outside of medicine. Well-being*  
 1448 *requires that physicians retain the joy in medicine while managing their*  
 1449 *own real life stresses. Self-care and responsibility to support other*  
 1450 *members of the health care team are important components of*  
 1451 *professionalism; they are also skills that must be modeled, learned, and*  
 1452 *nurtured in the context of other aspects of fellowship training.*
- 1453
- 1454 *Fellows and faculty members are at risk for burnout and depression.*  
 1455 *Programs, in partnership with their Sponsoring Institutions, have the same*  
 1456 *responsibility to address well-being as other aspects of resident*  
 1457 *competence. Physicians and all members of the health care team share*  
 1458 *responsibility for the well-being of each other. For example, a culture which*  
 1459 *encourages covering for colleagues after an illness without the expectation*  
 1460 *of reciprocity reflects the ideal of professionalism. A positive culture in a*  
 1461 *clinical learning environment models constructive behaviors, and prepares*  
 1462 *fellows with the skills and attitudes needed to thrive throughout their*  
 1463 *careers.*  
 1464

**Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and**

collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website: [www.acgme.org/physicianwellbeing](http://www.acgme.org/physicianwellbeing).

The ACGME also created a repository for well-being materials, assessments, presentations, and more on the [Well-Being Tools and Resources page](#) in Learn at ACGME for programs seeking to develop or strengthen their own well-being initiatives. There are many activities that programs can implement now to assess and support physician well-being. These include the distribution and analysis of culture of safety surveys, ensuring the availability of counseling services, and paying attention to the safety of the entire health care team.

1465  
1466

1475  
1476  
1477  
1478  
1479  
1480  
1481

**VI.C.1. The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:**

**VI.C.1.a) efforts to enhance the meaning that each fellow finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; <sup>(Core)</sup>**

**VI.C.1.b) attention to scheduling, work intensity, and work compression that impacts fellow well-being; <sup>(Core)</sup>**

**VI.C.1.c) evaluating workplace safety data and addressing the safety of fellows and faculty members; <sup>(Core)</sup>**

**Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.**

1482  
1483  
1484  
1485

**VI.C.1.d) policies and programs that encourage optimal fellow and faculty member well-being; and, <sup>(Core)</sup>**

**Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.**

1486  
1487  
1488  
1489  
1490  
1491

**VI.C.1.d).(1) Fellows must be given the opportunity to attend medical, mental health, and dental care appointments, including those scheduled during their working hours. <sup>(Core)</sup>**

**Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with**

time away from the program as needed to access care, including appointments scheduled during their working hours.

**VI.C.1.e).(1)** encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another fellow, resident, or faculty member may be displaying signs of burnout, depression, a substance use disorder, suicidal ideation, or potential for violence; <sup>(Core)</sup>

**Background and Intent:** Individuals experiencing burnout, depression, substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

**VI.D. Fatigue Mitigation**

**VI.D.1. Programs must:**

**VI.D.1.a) educate all faculty members and fellows to recognize the signs of fatigue and sleep deprivation; (Core)**

**VI.D.1.b) educate all faculty members and fellows in alertness management and fatigue mitigation processes; and, (Core)**

**VI.D.1.c) encourage fellows to use fatigue mitigation processes to manage the potential negative effects of fatigue on patient care and learning. (Detail)**

**Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.**

**This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.**

- 1551  
1552 **VI.D.2.** Each program must ensure continuity of patient care, consistent  
1553 with the program’s policies and procedures referenced in VI.C.2–  
1554 VI.C.2.b), in the event that a fellow may be unable to perform their  
1555 patient care responsibilities due to excessive fatigue. <sup>(Core)</sup>  
1556
- 1557 **VI.D.3.** The program, in partnership with its Sponsoring Institution, must  
1558 ensure adequate sleep facilities and safe transportation options for  
1559 fellows who may be too fatigued to safely return home. <sup>(Core)</sup>  
1560
- 1561 **VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care**
- 1562 **VI.E.1. Clinical Responsibilities**
- 1563  
1564 The clinical responsibilities for each fellow must be based on PGY  
1565 level, patient safety, fellow ability, severity and complexity of patient  
1566 illness/condition, and available support services. <sup>(Core)</sup>  
1567  
1568

**Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.**

- 1569  
1570 **VI.E.2. Teamwork**  
1571  
1572 Fellows must care for patients in an environment that maximizes  
1573 communication. This must include the opportunity to work as a  
1574 member of effective interprofessional teams that are appropriate to  
1575 the delivery of care in the subspecialty and larger health system.  
1576 <sup>(Core)</sup>  
1577
- 1578 **VI.E.3. Transitions of Care**  
1579
- 1580 **VI.E.3.a)** Programs must design clinical assignments to optimize  
1581 transitions in patient care, including their safety, frequency,  
1582 and structure. <sup>(Core)</sup>  
1583

- 1584 VI.E.3.b) Programs, in partnership with their Sponsoring Institutions,  
 1585 must ensure and monitor effective, structured hand-over  
 1586 processes to facilitate both continuity of care and patient  
 1587 safety. <sup>(Core)</sup>  
 1588
- 1589 VI.E.3.c) Programs must ensure that fellows are competent in  
 1590 communicating with team members in the hand-over process.  
 1591 <sup>(Outcome)</sup>  
 1592
- 1593 VI.E.3.d) Programs and clinical sites must maintain and communicate  
 1594 schedules of attending physicians and fellows currently  
 1595 responsible for care. <sup>(Core)</sup>  
 1596
- 1597 VI.E.3.e) Each program must ensure continuity of patient care,  
 1598 consistent with the program’s policies and procedures  
 1599 referenced in VI.C.2-VI.C.2.b), in the event that a fellow may  
 1600 be unable to perform their patient care responsibilities due to  
 1601 excessive fatigue or illness, or family emergency. <sup>(Core)</sup>  
 1602

1603 VI.F. Clinical Experience and Education

1604 *Programs, in partnership with their Sponsoring Institutions, must design*  
 1605 *an effective program structure that is configured to provide fellows with*  
 1606 *educational and clinical experience opportunities, as well as reasonable*  
 1607 *opportunities for rest and personal activities.*  
 1608  
 1609

**Background and Intent:** In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

- 1610
- 1611 VI.F.1. Maximum Hours of Clinical and Educational Work per Week
- 1612
- 1613 Clinical and educational work hours must be limited to no more than  
 1614 80 hours per week, averaged over a four-week period, inclusive of all  
 1615 in-house clinical and educational activities, clinical work done from  
 1616 home, and all moonlighting. <sup>(Core)</sup>  
 1617

**Background and Intent:** Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

**Scheduling**

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-

week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

### ***Oversight***

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

### ***Work from Home***

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules

are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

1632  
1633  
1634  
1635

**VI.F.2. Mandatory Time Free of Clinical Work and Education**

**VI.F.2.a)** The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. <sup>(Core)</sup>

**VI.F.2.b)** Fellows should have eight hours off between scheduled clinical work and education periods. <sup>(Detail)</sup>

**VI.F.2.b).(1)** There may be circumstances when fellows choose to stay to care for their patients or return to the hospital with fewer than eight hours free of clinical experience and education. This must occur within the context of the 80-hour and the one-day-off-in-seven requirements. <sup>(Detail)</sup>

**Background and Intent:** While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1636  
1637  
1638  
1639

**VI.F.2.c)** Fellows must have at least 14 hours free of clinical work and education after 24 hours of in-house call. <sup>(Core)</sup>

**Background and Intent:** Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1640  
1641  
1642  
1643  
1644  
1645

**VI.F.2.d)** Fellows must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. <sup>(Core)</sup>

**Background and Intent:** The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two

consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as “one (1) continuous 24-hour period free from all administrative, clinical, and educational activities.”

- VI.F.3. Maximum Clinical Work and Education Period Length**
- VI.F.3.a) Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical assignments. <sup>(Core)</sup>**
- VI.F.3.a).(1) Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or fellow education. <sup>(Core)</sup>**
- VI.F.3.a).(1).(a) Additional patient care responsibilities must not be assigned to a fellow during this time. <sup>(Core)</sup>**

**Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.**

1678  
1679

- VI.F.4. Clinical and Educational Work Hour Exceptions**
- VI.F.4.a) In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:**
- VI.F.4.a).(1) to continue to provide care to a single severely ill or unstable patient; <sup>(Detail)</sup>**
- VI.F.4.a).(2) humanistic attention to the needs of a patient or family; or, <sup>(Detail)</sup>**
- VI.F.4.a).(3) to attend unique educational events. <sup>(Detail)</sup>**
- VI.F.4.b) These additional hours of care or education will be counted toward the 80-hour weekly limit. <sup>(Detail)</sup>**

**Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in**

the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

1717  
1718  
1719

**VI.F.7.                      Maximum In-House On-Call Frequency**

**Fellows must be scheduled for in-house call no more frequently than every third night (when averaged over a four-week period). <sup>(Core)</sup>**

**VI.F.8.                      At-Home Call**

**VI.F.8.a)**                      **Time spent on patient care activities by fellows on at-home call must count toward the 80-hour maximum weekly limit. The frequency of at-home call is not subject to the every-third-night limitation, but must satisfy the requirement for one day in seven free of clinical work and education, when averaged over four weeks. <sup>(Core)</sup>**

1720  
1721 **VI.F.8.a).(1)** **At-home call must not be so frequent or taxing as to**  
1722 **preclude rest or reasonable personal time for each**  
1723 **fellow.** (Core)

1724  
1725 **VI.F.8.b)** **Fellows are permitted to return to the hospital while on at-**  
1726 **home call to provide direct care for new or established**  
1727 **patients. These hours of inpatient patient care must be**  
1728 **included in the 80-hour maximum weekly limit.** (Detail)  
1729

**Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.**

**In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.**

1730  
1731 **\*\*\***

1732  
1733 **\*Core Requirements:** Statements that define structure, resource, or process elements  
1734 essential to every graduate medical educational program.

1735  
1736 **†Detail Requirements:** Statements that describe a specific structure, resource, or process, for  
1737 achieving compliance with a Core Requirement. Programs and sponsoring institutions in  
1738 substantial compliance with the Outcome Requirements may utilize alternative or innovative  
1739 approaches to meet Core Requirements.

1740  
1741 **‡Outcome Requirements:** Statements that specify expected measurable or observable  
1742 attributes (knowledge, abilities, skills, or attitudes) of residents or fellows at key stages of their  
1743 graduate medical education.

1744  
1745 **Osteopathic Recognition**

1746 For programs with or applying for Osteopathic Recognition, the Osteopathic Recognition  
1747 Requirements also apply ([www.acgme.org/OsteopathicRecognition](http://www.acgme.org/OsteopathicRecognition)).
