1 **ACGME Program Requirements for Graduate Medical Education**
2 **in Neurodevelopmental Disabilities**

3
4 **Common Program Requirements (Fellowship) are in BOLD**

5
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.
9

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

10
11 **Introduction**

12
13 **Int.A.** *Fellowship is advanced graduate medical education beyond a core*
14 *residency program for physicians who desire to enter more specialized*
15 *practice. Fellowship-trained physicians serve the public by providing*
16 *subspecialty care, which may also include core medical care, acting as a*
17 *community resource for expertise in their field, creating and integrating*
18 *new knowledge into practice, and educating future generations of*
19 *physicians. Graduate medical education values the strength that a diverse*
20 *group of physicians brings to medical care.*

21
22 *Fellows who have completed residency are able to practice independently*
23 *in their core specialty. The prior medical experience and expertise of*
24 *fellows distinguish them from physicians entering into residency training.*
25 *The fellow’s care of patients within the subspecialty is undertaken with*
26 *appropriate faculty supervision and conditional independence. Faculty*
27 *members serve as role models of excellence, compassion,*
28 *professionalism, and scholarship. The fellow develops deep medical*
29 *knowledge, patient care skills, and expertise applicable to their focused*
30 *area of practice. Fellowship is an intensive program of subspecialty clinical*
31 *and didactic education that focuses on the multidisciplinary care of*
32 *patients. Fellowship education is often physically, emotionally, and*
33 *intellectually demanding, and occurs in a variety of clinical learning*
34 *environments committed to graduate medical education and the well-being*
35 *of patients, residents, fellows, faculty members, students, and all members*
36 *of the health care team.*

37
38 *In addition to clinical education, many fellowship programs advance*
39 *fellows’ skills as physician-scientists. While the ability to create new*
40 *knowledge within medicine is not exclusive to fellowship-educated*
41 *physicians, the fellowship experience expands a physician’s abilities to*
42 *pursue hypothesis-driven scientific inquiry that results in contributions to*
43 *the medical literature and patient care. Beyond the clinical subspecialty*
44 *expertise achieved, fellows develop mentored relationships built on an*
45 *infrastructure that promotes collaborative research.*

46
47 **Int.B.** **Definition of Subspecialty**

48 The purpose of the program is to prepare the physician for independent practice
49 as a neurodevelopmental disabilities specialist. The program must combine
50 education in the relevant basic sciences with supervised clinical education in the
51 comprehensive and integrated diagnosis and care of children with
52 neurodevelopmental disabilities across the life spectrum.
53
54

55 **Int.C. Length of Educational Program**

56
57 ~~The educational program in neurodevelopmental disabilities must be 48 months~~
58 ~~in length.~~^{(Core)*} The educational program in neurodevelopmental disabilities must
59 be provided in one of these formats:
60

61 Int.C.1. Neurodevelopmental disabilities (NDD): 48 months of education in
62 neurodevelopmental disabilities. ^{(Core)*}
63

64 Int.C.2. Child neurology and neurodevelopmental disabilities (CH-NDD): 12
65 months of education in neurodevelopmental disabilities, preceded by 36
66 months of residency education in child neurology and at least 24 months
67 of residency education in pediatrics. ^(Core)
68

69 **I. Oversight**

70
71 **I.A. Sponsoring Institution**

72
73 *The Sponsoring Institution is the organization or entity that assumes the*
74 *ultimate financial and academic responsibility for a program of graduate*
75 *medical education consistent with the ACGME Institutional Requirements.*
76

77 *When the Sponsoring Institution is not a rotation site for the program, the*
78 *most commonly utilized site of clinical activity for the program is the*
79 *primary clinical site.*
80

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

81
82 **I.A.1. The program must be sponsored by one ACGME-accredited**
83 **Sponsoring Institution.** ^(Core)
84

85 **I.B. Participating Sites**

86
87 *A participating site is an organization providing educational experiences or*
88 *educational assignments/rotations for fellows.*
89

- 90 **I.B.1. The program, with approval of its Sponsoring Institution, must**
91 **designate a primary clinical site.** ^(Core)
92
- 93 I.B.1.a) The Sponsoring Institution must also sponsor Accreditation
94 Council for Graduate Medical Education (ACGME)-accredited
95 residency programs in child neurology, neurology, and pediatrics.
96 ^(Core)
97
- 98 I.B.1.b) The program must be within a department or division with an
99 ACGME-accredited program in neurology or pediatrics located at
100 the Sponsoring Institution. ^(Core)
101
- 102 **I.B.2. There must be a program letter of agreement (PLA) between the**
103 **program and each participating site that governs the relationship**
104 **between the program and the participating site providing a required**
105 **assignment.** ^(Core)
106
- 107 I.B.2.a) The PLA must:
- 108
- 109 I.B.2.a).(1) be renewed at least every 10 years; and, ^(Core)
110
- 111 I.B.2.a).(2) be approved by the designated institutional official
112 (DIO). ^(Core)
113
- 114 **I.B.3. The program must monitor the clinical learning and working**
115 **environment at all participating sites.** ^(Core)
116
- 117 I.B.3.a) At each participating site there must be one faculty member,
118 designated by the program director, who is accountable for
119 fellow education for that site, in collaboration with the
120 program director. ^(Core)
121

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- **Identifying the faculty members who will assume educational and supervisory responsibility for fellows**
- **Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows**
- **Specifying the duration and content of the educational experience**

- **Stating the policies and procedures that will govern fellow education during the assignment**

137
138
139
140
141
142

- I.B.4.** The program director must submit any additions or deletions of participating sites routinely providing an educational experience, required for all fellows, of one month full time equivalent (FTE) or more through the ACGME’s Accreditation Data System (ADS). ^(Core)
- I.B.5.** Participating sites should provide clinical resources not available to the Sponsoring Institution for the program.
- I.B.5.a)** There should be no more than two participating sites for rotations. ^{(Detail)†}
- I.B.5.b)** Faculty members must have full-time status at the primary clinical site. ^(Detail)
- I.C.** The program, in partnership with its Sponsoring Institution, must engage in practices that focus on mission-driven, ongoing, systematic recruitment and retention of a diverse and inclusive workforce of residents (if present), fellows, faculty members, senior administrative staff members, and other relevant members of its academic community. ^(Core)

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution’s mission and aims. The program’s annual evaluation must include an assessment of the program’s efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

159
160
161
162
163
164

- I.D. Resources**
- I.D.1.** The program, in partnership with its Sponsoring Institution, must ensure the availability of adequate resources for fellow education. ^(Core)
- I.D.1.a) Facilities**
- I.D.1.a).(1)** There must be adequate inpatient and outpatient facilities, examining areas, chart and record-keeping systems for use in patient treatment, conference rooms, and research laboratories. ^(Core)
- I.D.1.a).(2)** There must be adequate space for offices for faculty and staff members and ~~residents~~ fellows. ^(Core)
- I.D.1.a).(3)** Space for study, chart work, and dictation must be available for the ~~residents~~ fellows. ^(Core)
- I.D.1.a).(4)** There must be state-of-the-art clinical laboratory facilities that rapidly report the results of necessary laboratory

165 evaluations, including clinical-pathological,
166 electrophysiological, imaging, and other studies needed by
167 neurological services. ^(Core)

168
169 I.D.1.a).(5) There must be space and equipment for the educational
170 program, including meeting rooms, classrooms with
171 audiovisual and other educational aids, and diagnostic,
172 therapeutic, and research facilities. ^(Detail)

173
174 **I.D.2. The program, in partnership with its Sponsoring Institution, must**
175 **ensure healthy and safe learning and working environments that**
176 **promote fellow well-being and provide for:** ^(Core)

177
178 **I.D.2.a) access to food while on duty;** ^(Core)

179
180 **I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available**
181 **and accessible for fellows with proximity appropriate for safe**
182 **patient care;** ^(Core)

183
Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

184
185 **I.D.2.c) clean and private facilities for lactation that have refrigeration**
186 **capabilities, with proximity appropriate for safe patient care;**
187 ^(Core)

188
Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

189
190 **I.D.2.d) security and safety measures appropriate to the participating**
191 **site; and,** ^(Core)

192
193 **I.D.2.e) accommodations for fellows with disabilities consistent with**
194 **the Sponsoring Institution's policy.** ^(Core)

195
196 **I.D.3. Fellows must have ready access to subspecialty-specific and other**
197 **appropriate reference material in print or electronic format. This**
198 **must include access to electronic medical literature databases with**
199 **full text capabilities.** ^(Core)

- 200
201 **I.D.4. The program’s educational and clinical resources must be adequate**
202 **to support the number of fellows appointed to the program.** (Core)
203
204 I.D.4.a) There must be patients ranging in age from infancy through
205 adulthood. (Core)
206
207 I.D.4.b) The patient population must include both new and follow-up
208 patients that include children and adults with neurodevelopmental
209 disabilities of genetic, metabolic, vascular, infectious, immunologic
210 and unknown etiologies. (Core)
211
212 I.D.4.c) The number and type of patients must support resident-fellow
213 education. (Core)
214
215 I.D.4.d) The patient population must be diverse as to gender, cognitive
216 and developmental capacities and short- and long-term
217 neurological problems. (Core)
218
219 **I.E. *A fellowship program usually occurs in the context of many learners and***
220 ***other care providers and limited clinical resources. It should be structured***
221 ***to optimize education for all learners present.***
222
223 **I.E.1. Fellows should contribute to the education of residents in core**
224 **programs, if present.** (Core)
225

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows’ education is not compromised by the presence of other providers and learners, and that fellows’ education does not compromise core residents’ education.

- 226
227 **II. Personnel**
228
229 **II.A. Program Director**
230
231 **II.A.1. There must be one faculty member appointed as program director**
232 **with authority and accountability for the overall program, including**
233 **compliance with all applicable program requirements.** (Core)
234
235 **II.A.1.a) The Sponsoring Institution’s Graduate Medical Education**
236 **Committee (GMEC) must approve a change in program**
237 **director.** (Core)
238
239 **II.A.1.b) Final approval of the program director resides with the**
240 **Review Committee.** (Core)
241

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as

program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual's responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director's nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

242
243
244
245
246
247
248
249
250
251

II.A.2. The program director must be provided with support adequate for administration of the program based upon its size and configuration.
(Core)

II.A.2.a) At a minimum, the program director must be provided with the dedicated time and support specified below ~~salary support~~ required to devote 20 percent FTE of non-clinical time to the ~~for~~ administration of the program. (Core)

<u>Number of Approved Fellow Positions</u>	<u>Minimum Support Required (FTE)</u>
<u>1-3</u>	<u>0.1</u>
<u>4 or more</u>	<u>0.15</u>

252

Background and Intent: Ten percent FTE is defined as one half-day per week.

“Administrative time” is defined as non-clinical time spent meeting the responsibilities of the program director as detailed in requirements II.A.4.-II.A.4.a).(16).

The requirement does not address the source of funding required to provide the specified salary support.

253

266
267
268
269
270
271
272
273
274

II.A.3. Qualifications of the program director:

II.A.3.a) must include subspecialty expertise and qualifications acceptable to the Review Committee; and, (Core)

II.A.3.b) must include current certification in the subspecialty for which they are the program director by the American Board of Psychiatry and Neurology or the American Board of Pediatrics, or subspecialty qualifications that are acceptable to the Review Committee. (Core)

[Note that while the Common Program Requirements deem certification by a certifying board of the American Osteopathic Association (AOA) acceptable, there is no AOA board that offers certification in this subspecialty]

II.A.4. Program Director Responsibilities

The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and

275 promotion of fellows, and disciplinary action; supervision of fellows;
276 and fellow education in the context of patient care. ^(Core)

277
278 **II.A.4.a) The program director must:**

279
280 **II.A.4.a).(1) be a role model of professionalism;** ^(Core)
281

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

282
283 **II.A.4.a).(2) design and conduct the program in a fashion**
284 **consistent with the needs of the community, the**
285 **mission(s) of the Sponsoring Institution, and the**
286 **mission(s) of the program;** ^(Core)
287

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

288
289 **II.A.4.a).(3) administer and maintain a learning environment**
290 **conducive to educating the fellows in each of the**
291 **ACGME Competency domains;** ^(Core)
292

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

293
294 **II.A.4.a).(4) develop and oversee a process to evaluate candidates**
295 **prior to approval as program faculty members for**
296 **participation in the fellowship program education and**
297 **at least annually thereafter, as outlined in V.B.;** ^(Core)
298

299 **II.A.4.a).(5) have the authority to approve program faculty**
300 **members for participation in the fellowship program**
301 **education at all sites;** ^(Core)
302

303 **II.A.4.a).(6) have the authority to remove program faculty**
304 **members from participation in the fellowship program**
305 **education at all sites;** ^(Core)

306
307 **II.A.4.a).(7)** have the authority to remove fellows from supervising
308 interactions and/or learning environments that do not
309 meet the standards of the program; ^(Core)
310

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

311
312 **II.A.4.a).(8)** submit accurate and complete information required
313 and requested by the DIO, GMEC, and ACGME; ^(Core)
314

315 **II.A.4.a).(9)** provide applicants who are offered an interview with
316 information related to the applicant's eligibility for the
317 relevant subspecialty board examination(s); ^(Core)
318

319 **II.A.4.a).(10)** provide a learning and working environment in which
320 fellows have the opportunity to raise concerns and
321 provide feedback in a confidential manner as
322 appropriate, without fear of intimidation or retaliation;
323 ^(Core)
324

325 **II.A.4.a).(11)** ensure the program's compliance with the Sponsoring
326 Institution's policies and procedures related to
327 grievances and due process; ^(Core)
328

329 **II.A.4.a).(12)** ensure the program's compliance with the Sponsoring
330 Institution's policies and procedures for due process
331 when action is taken to suspend or dismiss, not to
332 promote, or not to renew the appointment of a fellow;
333 ^(Core)
334

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

335
336 **II.A.4.a).(13)** ensure the program's compliance with the Sponsoring
337 Institution's policies and procedures on employment
338 and non-discrimination; ^(Core)
339

340 **II.A.4.a).(13).(a)** Fellows must not be required to sign a non-
341 competition guarantee or restrictive covenant.
342 ^(Core)
343

344 II.A.4.a).(14) document verification of program completion for all
345 graduating fellows within 30 days; ^(Core)

346
347 II.A.4.a).(15) provide verification of an individual fellow's
348 completion upon the fellow's request, within 30 days;
349 and, ^(Core)
350

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

351
352 II.A.4.a).(16) obtain review and approval of the Sponsoring
353 Institution's DIO before submitting information or
354 requests to the ACGME, as required in the Institutional
355 Requirements and outlined in the ACGME Program
356 Director's Guide to the Common Program
357 Requirements. ^(Core)
358

359 **II.B. Faculty**

360
361 *Faculty members are a foundational element of graduate medical education*
362 *– faculty members teach fellows how to care for patients. Faculty members*
363 *provide an important bridge allowing fellows to grow and become practice*
364 *ready, ensuring that patients receive the highest quality of care. They are*
365 *role models for future generations of physicians by demonstrating*
366 *compassion, commitment to excellence in teaching and patient care,*
367 *professionalism, and a dedication to lifelong learning. Faculty members*
368 *experience the pride and joy of fostering the growth and development of*
369 *future colleagues. The care they provide is enhanced by the opportunity to*
370 *teach. By employing a scholarly approach to patient care, faculty members,*
371 *through the graduate medical education system, improve the health of the*
372 *individual and the population.*

373
374 *Faculty members ensure that patients receive the level of care expected*
375 *from a specialist in the field. They recognize and respond to the needs of*
376 *the patients, fellows, community, and institution. Faculty members provide*
377 *appropriate levels of supervision to promote patient safety. Faculty*
378 *members create an effective learning environment by acting in a*
379 *professional manner and attending to the well-being of the fellows and*
380 *themselves.*
381

Background and Intent: "Faculty" refers to the entire teaching force responsible for educating fellows. The term "faculty," including "core faculty," does not imply or require an academic appointment or salary support.

382
383 **II.B.1. For each participating site, there must be a sufficient number of**
384 **faculty members with competence to instruct and supervise all**
385 **fellows at that location. ^(Core)**

386
387
388
389
390
391
392
393

II.B.2. Faculty members must:

II.B.2.a) be role models of professionalism; ^(Core)

II.B.2.b) demonstrate commitment to the delivery of safe, quality, cost-effective, patient-centered care; ^(Core)

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

394
395
396
397
398
399
400
401
402
403
404
405
406
407
408

II.B.2.c) demonstrate a strong interest in the education of fellows; ^(Core)

II.B.2.d) devote sufficient time to the educational program to fulfill their supervisory and teaching responsibilities; ^(Core)

II.B.2.e) administer and maintain an educational environment conducive to educating fellows; ^(Core)

II.B.2.f) regularly participate in organized clinical discussions, rounds, journal clubs, and conferences; and, ^(Core)

II.B.2.g) pursue faculty development designed to enhance their skills at least annually. ^(Core)

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

422

II.B.3. Faculty Qualifications

II.B.3.a) Faculty members must have appropriate qualifications in their field and hold appropriate institutional appointments. ^(Core)

II.B.3.b) Subspecialty physician faculty members must:

II.B.3.b).(1) have current certification in the subspecialty by the American Board of Psychiatry and Neurology or the American Board of Pediatrics, or possess qualifications judged acceptable to the Review Committee. ^(Core)

423 [Note that while the Common Program Requirements
424 deem certification by a certifying board of the American
425 Osteopathic Association (AOA) acceptable, there is no
426 AOA board that offers certification in this subspecialty]

427
428 **II.B.3.c) Any non-physician faculty members who participate in**
429 **fellowship program education must be approved by the**
430 **program director.** ^(Core)
431

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

432
433 **II.B.3.d) Any other specialty physician faculty members must have**
434 **current certification in their specialty by the appropriate**
435 **American Board of Medical Specialties (ABMS) member**
436 **board or American Osteopathic Association (AOA) certifying**
437 **board, or possess qualifications judged acceptable to the**
438 **Review Committee.** ^(Core)
439

440 **II.B.3.d).(1)** Additional faculty members must include specialists in child
441 and adolescent psychiatry, dentistry, genetics, metabolism,
442 neonatology, neurology, neurological surgery,
443 ophthalmology, orthopaedic surgery, otolaryngology,
444 pediatrics and its related subspecialties, physical medicine
445 and rehabilitation, and psychiatry. ^(Detail)
446

447 **II.B.4. Core Faculty**
448
449 **Core faculty members must have a significant role in the education**
450 **and supervision of fellows and must devote a significant portion of**
451 **their entire effort to fellow education and/or administration, and**
452 **must, as a component of their activities, teach, evaluate, and provide**
453 **formative feedback to fellows.** ^(Core)
454

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.

455
456 **II.B.4.a) Core faculty members must be designated by the program**
457 **director.** ^(Core)
458

459 **II.B.4.b) Core faculty members must complete the annual ACGME**
460 **Faculty Survey.** ^(Core)

461
462 **II.B.4.c)** ~~Including the program director, the core faculty must include at~~
463 ~~least two individuals who have appropriate educational~~
464 ~~qualifications in neurodevelopmental disabilities as determined by~~
465 ~~the Review Committee. The program must have at least two core~~
466 ~~faculty members, including the program director, who have~~
467 ~~completed education in and are certified by the ABPN or the ABP~~
468 ~~in neurodevelopmental disabilities.~~ ^(Core)

469
470 **II.B.4.c).(1)** A core faculty to fellow ratio of at least one to one must be
471 maintained in programs with two or more fellows. The
472 program director may be counted as one of the faculty
473 members in determining the ratio. ^(Core)

474
475 **II.C. Program Coordinator**

476
477 **II.C.1. There must be a program coordinator.** ^(Core)

478
479 **II.C.2. The program coordinator must be provided with support adequate**
480 **for administration of the program based upon its size and**
481 **configuration.** ^(Core)

482

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge of the ACGME and Program Requirements, policies, and procedures. Program coordinators assist the program director in accreditation efforts, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

483
484 **II.D. Other Program Personnel**

485
486 **The program, in partnership with its Sponsoring Institution, must jointly**
487 **ensure the availability of necessary personnel for the effective**
488 **administration of the program.** ^(Core)

489

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

490
491 II.D.1. There must be specialists in audiology, nutrition, occupational therapy,
492 physical therapy, neuropsychology, speech pathology, special and early
493 education, social work, and vocational rehabilitation. ^(Detail)
494

495 **III. Fellow Appointments**

496
497 **III.A. Eligibility Criteria**

498
499 **III.A.1. Eligibility Requirements – Fellowship Programs**

500
501 **All required clinical education for entry into ACGME-accredited**
502 **fellowship programs must be completed in an ACGME-accredited**
503 **residency program, an AOA-approved residency program, a**
504 **program with ACGME International (ACGME-I) Advanced Specialty**
505 **Accreditation, or a Royal College of Physicians and Surgeons of**
506 **Canada (RCPSC)-accredited or College of Family Physicians of**
507 **Canada (CFPC)-accredited residency program located in Canada.**
508 ^(Core)
509

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

510
511 **III.A.1.a) Fellowship programs must receive verification of each**
512 **entering fellow’s level of competence in the required field,**
513 **upon matriculation, using ACGME, ACGME-I, or CanMEDS**
514 **Milestones evaluations from the core residency program. ^(Core)**
515

516 **III.A.1.b) Prior to appointment in the program, residents must have**
517 **successfully completed 24 months in a pediatric residency**
518 **program that satisfies the requirements in III.A.1. ^(Core)**
519

520 **III.A.1.b).(1) residents in the NDD track must have successfully**
521 **completed 24 months in a pediatric residency program that**
522 **satisfies the requirements in III.A.1. ^(Core)**
523

524 **III.A.1.b).(2) residents in the CN-NDD track must have successfully**
525 **completed 24 months in a pediatric residency and 36**
526 **months in a child neurology residency that satisfy the**
527 **requirements in III.A.1. ^(Core)**
528

529 **III.A.1.c) Fellow Eligibility Exception**

530
531 **The Review Committee for Neurology will allow the following**
532 **exception to the fellowship eligibility requirements:**

- 533
534 ~~III.A.1.c).(1) — An ACGME-accredited fellowship program may accept~~
535 ~~an exceptionally qualified international graduate~~
536 ~~applicant who does not satisfy the eligibility~~
537 ~~requirements listed in III.A.1., but who does meet all of~~
538 ~~the following additional qualifications and conditions:~~
539 ~~(Core)~~
- 540
- 541 ~~III.A.1.c).(1).(a) evaluation by the program director and~~
542 ~~fellowship selection committee of the~~
543 ~~applicant's suitability to enter the program,~~
544 ~~based on prior training and review of the~~
545 ~~summative evaluations of training in the core~~
546 ~~specialty; and, (Core)~~
547
- 548 ~~III.A.1.c).(1).(b) review and approval of the applicant's~~
549 ~~exceptional qualifications by the GMEC; and,~~
550 ~~(Core)~~
551
- 552 ~~III.A.1.c).(1).(c) verification of Educational Commission for~~
553 ~~Foreign Medical Graduates (ECFMG)~~
554 ~~certification. (Core)~~
555
- 556 ~~III.A.1.c).(2) — Applicants accepted through this exception must have~~
557 ~~an evaluation of their performance by the Clinical~~
558 ~~Competency Committee within 12 weeks of~~
559 ~~matriculation. (Core)~~
560

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

- 561
- 562 **III.B. The program director must not appoint more fellows than approved by the**
563 **Review Committee. (Core)**
564
- 565 **III.B.1. All complement increases must be approved by the Review**
566 **Committee. (Core)**
567

568 III.C. Fellow Transfers
569
570 The program must obtain verification of previous educational experiences
571 and a summative competency-based performance evaluation prior to
572 acceptance of a transferring fellow, and Milestones evaluations upon
573 matriculation. ^(Core)
574

575 IV. Educational Program
576

577 *The ACGME accreditation system is designed to encourage excellence and*
578 *innovation in graduate medical education regardless of the organizational*
579 *affiliation, size, or location of the program.*

580
581 *The educational program must support the development of knowledgeable, skillful*
582 *physicians who provide compassionate care.*
583

584 *In addition, the program is expected to define its specific program aims consistent*
585 *with the overall mission of its Sponsoring Institution, the needs of the community*
586 *it serves and that its graduates will serve, and the distinctive capabilities of*
587 *physicians it intends to graduate. While programs must demonstrate substantial*
588 *compliance with the Common and subspecialty-specific Program Requirements, it*
589 *is recognized that within this framework, programs may place different emphasis*
590 *on research, leadership, public health, etc. It is expected that the program aims*
591 *will reflect the nuanced program-specific goals for it and its graduates; for*
592 *example, it is expected that a program aiming to prepare physician-scientists will*
593 *have a different curriculum from one focusing on community health.*
594

595 IV.A. The curriculum must contain the following educational components: ^(Core)
596

597 IV.A.1. a set of program aims consistent with the Sponsoring Institution's
598 mission, the needs of the community it serves, and the desired
599 distinctive capabilities of its graduates; ^(Core)
600

601 IV.A.1.a) The program's aims must be made available to program
602 applicants, fellows, and faculty members. ^(Core)
603

604 IV.A.2. competency-based goals and objectives for each educational
605 experience designed to promote progress on a trajectory to
606 autonomous practice in their subspecialty. These must be
607 distributed, reviewed, and available to fellows and faculty members;
608 ^(Core)
609

610 IV.A.3. delineation of fellow responsibilities for patient care, progressive
611 responsibility for patient management, and graded supervision in
612 their subspecialty; ^(Core)
613

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility

independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

614
615
616
617

IV.A.4. structured educational activities beyond direct patient care; and, (Core)

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

618
619
620
621
622
623

IV.A.5. advancement of fellows' knowledge of ethical principles foundational to medical professionalism. (Core)

IV.B. ACGME Competencies

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

624
625
626
627
628
629
630
631
632
633
634

IV.B.1. The program must integrate the following ACGME Competencies into the curriculum: (Core)

IV.B.1.a) Professionalism

Fellows must demonstrate a commitment to professionalism and an adherence to ethical principles. (Core)

IV.B.1.b) Patient Care and Procedural Skills

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs*. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

635
636
637

IV.B.1.b).(1) Fellows must be able to provide patient care that is compassionate, appropriate, and effective for the

 763
- 764 IV.B.1.c).(4).(f) intellectual disability; ^(Core)
 765
- 766 IV.B.1.c).(4).(g) metabolic disorders; and, ^(Core)
 767
- 768 IV.B.1.c).(4).(h) mitochondrial disorders. ^(Core)
 769
- 770 **IV.B.1.d) Practice-based Learning and Improvement**
 771
 772 **Fellows must demonstrate the ability to investigate and**
 773 **evaluate their care of patients, to appraise and assimilate**
 774 **scientific evidence, and to continuously improve patient care**
 775 **based on constant self-evaluation and lifelong learning.** ^(Core)
 776

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

- 777
- 778 **IV.B.1.e) Interpersonal and Communication Skills**
 779
 780 **Fellows must demonstrate interpersonal and communication**
 781 **skills that result in the effective exchange of information and**

- 782 collaboration with patients, their families, and health
 783 professionals. ^(Core)
 784
- 785 **IV.B.1.f) Systems-based Practice**
 786
 787 **Fellows must demonstrate an awareness of and**
 788 **responsiveness to the larger context and system of health**
 789 **care, including the social determinants of health, as well as**
 790 **the ability to call effectively on other resources to provide**
 791 **optimal health care.** ^(Core)
 792
- 793 **IV.C. Curriculum Organization and Fellow Experiences**
 794
- 795 **IV.C.1. The curriculum must be structured to optimize fellow educational**
 796 **experiences, the length of these experiences, and supervisory**
 797 **continuity.** ^(Core)
 798
- 799 IV.C.1.a) Assignment of rotations must be structured to minimize the
 800 frequency of rotational transitions, and rotations must be of
 801 sufficient length to provide a quality educational experience,
 802 defined by continuity of patient care, ongoing supervision,
 803 longitudinal relationships with faculty members, and high-quality
 804 assessment and feedback. ^(Core)
 805
- 806 IV.C.1.b) Clinical experiences must be structured to facilitate learning in a
 807 manner that allows the fellows to function as part of an effective
 808 health care team that works together longitudinally with shared
 809 goals of patient safety and quality improvement. ^(Core)
 810
- 811 **IV.C.2. The program must provide instruction and experience in pain**
 812 **management if applicable for the subspecialty, including recognition**
 813 **of the signs of addiction.** ^(Core)
 814
- 815 IV.C.3. Programs must provide fellows with patient care experiences in both the
 816 inpatient and outpatient settings. ^(Core)
 817
- 818 IV.C.4. The program director must, with assistance from the members of the
 819 faculty, develop and implement the academic and clinical program of
 820 ~~resident-fellow~~ education by: ^(Detail)
 821
- 822 IV.C.4.a) preparing and implementing a comprehensive, well-organized,
 823 and effective curriculum which includes the presentation of core
 824 subspecialty knowledge supplemented by the addition of current
 825 information; and, ^(Detail)
 826
- 827 IV.C.4.b) providing ~~residents-fellows~~ with direct experience in progressive
 828 responsibility for patient management. ^(Detail)
 829
- 830 IV.C.5. The NDD curriculum must be organized to provide:
 831
- 832 IV.C.5.a) ~~year-~~at least 12 FTE months of adult neurology that do not need to

833		be contiguous, including: ^(Core)
834		
835	IV.C.5.a).(1)	six months on inpatient rotations (an inpatient rotation is defined as one that requires more than 50 percent of time spent managing patients admitted to an inpatient service requiring neurologic care); ^(Detail)
836		
837		
838		
839		
840	IV.C.5.a).(2)	three months of outpatient clinical adult neurology (an outpatient rotation is defined as any rotation that requires more than 50 percent of time spent managing patients in an outpatient clinical setting); and, ^(Core)
841		
842		
843		
844		
845	IV.C.5.a).(3)	three months elective adult neurology clinical experiences. Rotations on subspecialty areas of neurology, including neuroradiology, neuropathology, and neurophysiology, may be counted toward this requirement. ^(Detail)

 938 seminars, journal clubs, lectures, didactic courses, and meetings
 939 of local and national neurological and neurodevelopmental
 940 societies. ^(Core)
 941
 942 IV.C.7.k) ~~Residents-Fellows~~ must be responsible for the design and
 943 presentation of periodic clinical conferences. ^(Detail)
 944
 945 IV.C.7.l) Attendance must be documented for faculty members and
 946 ~~residents-fellows~~ at all mandatory conferences. ^(Detail)
 947

948 **IV.D. Scholarship**

949
 950 ***Medicine is both an art and a science. The physician is a humanistic***
 951 ***scientist who cares for patients. This requires the ability to think critically,***
 952 ***evaluate the literature, appropriately assimilate new knowledge, and***
 953 ***practice lifelong learning. The program and faculty must create an***
 954 ***environment that fosters the acquisition of such skills through fellow***
 955 ***participation in scholarly activities as defined in the subspecialty-specific***
 956 ***Program Requirements. Scholarly activities may include discovery,***
 957 ***integration, application, and teaching.***

958
 959 ***The ACGME recognizes the diversity of fellowships and anticipates that***
 960 ***programs prepare physicians for a variety of roles, including clinicians,***
 961 ***scientists, and educators. It is expected that the program's scholarship will***
 962 ***reflect its mission(s) and aims, and the needs of the community it serves.***
 963 ***For example, some programs may concentrate their scholarly activity on***
 964 ***quality improvement, population health, and/or teaching, while other***
 965 ***programs might choose to utilize more classic forms of biomedical***
 966 ***research as the focus for scholarship.***

967
 968 **IV.D.1. Program Responsibilities**

969
 970 **IV.D.1.a) The program must demonstrate evidence of scholarly**
 971 **activities, consistent with its mission(s) and aims. ^(Core)**

972
 973 **IV.D.1.b) The program in partnership with its Sponsoring Institution,**
 974 **must allocate adequate resources to facilitate fellow and**
 975 **faculty involvement in scholarly activities. ^(Core)**

976
 977 **IV.D.2. Faculty Scholarly Activity**

978
 979 **IV.D.2.a) Among their scholarly activity, programs must demonstrate**
 980 **accomplishments in at least three of the following domains:**
 981 **^(Core)**

- 982
- 983 • **Research in basic science, education, translational**
- 984 **science, patient care, or population health**
- 985 • **Peer-reviewed grants**

- 986 • Quality improvement and/or patient safety initiatives
- 987 • Systematic reviews, meta-analyses, review articles,
- 988 chapters in medical textbooks, or case reports
- 989 • Creation of curricula, evaluation tools, didactic
- 990 educational activities, or electronic educational
- 991 materials
- 992 • Contribution to professional committees, educational
- 993 organizations, or editorial boards
- 994 • Innovations in education

996 **IV.D.2.b)** The program must demonstrate dissemination of scholarly
 997 activity within and external to the program by the following
 998 methods:
 999

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the fellows’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

1000
 1001 **IV.D.2.b).(1)** faculty participation in grand rounds, posters,
 1002 workshops, quality improvement presentations,
 1003 podium presentations, grant leadership, non-peer-
 1004 reviewed print/electronic resources, articles or
 1005 publications, book chapters, textbooks, webinars,
 1006 service on professional committees, or serving as a
 1007 journal reviewer, journal editorial board member, or
 1008 editor; (Outcome)‡
 1009

1010 **IV.D.2.b).(2)** peer-reviewed publication. (Outcome)

1011
 1012 **IV.D.3. Fellow Scholarly Activity**

1013
 1014 **IV.D.3.a)** The curriculum must advance fellows’ knowledge of the basic
 1015 principles of evidence-based medicine and research, including
 1016 how research is conducted, evaluated, explained to patients, and
 1017 applied to patient care. (Core)
 1018

1019 **IV.D.3.b)** Fellows should participate in scholarly activity under the
 1020 mentorship of program faculty members. (Core)
 1021

1022 **IV.D.3.c)** The sponsoring institution and the program should allocate
 1023 adequate educational resources to facilitate fellow involvement in
 1024 scholarly activity. (Core)
 1025

1026 **IV.D.3.d)** Fellows should receive support to attend one regional, national, or

1027 international professional conference during the program. (Detail)

1028

1029 **V. Evaluation**

1030

1031 **V.A. Fellow Evaluation**

1032

1033 **V.A.1. Feedback and Evaluation**

1034

Background and Intent: Feedback is ongoing information provided regarding aspects of one’s performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- fellows identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is *evaluating a fellow’s learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

1035

1036 **V.A.1.a) Faculty members must directly observe, evaluate, and**
1037 **frequently provide feedback on fellow performance during**
1038 **each rotation or similar educational assignment. (Core)**

1039

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

1040

1041 **V.A.1.b) Evaluation must be documented at the completion of the**
1042 **assignment. (Core)**

1043

- 1044 **V.A.1.b).(1)** For block rotations of greater than three months in
 1045 duration, evaluation must be documented at least
 1046 every three months. ^(Core)
 1047
- 1048 **V.A.1.b).(2)** Longitudinal experiences such as continuity clinic in
 1049 the context of other clinical responsibilities must be
 1050 evaluated at least every three months and at
 1051 completion. ^(Core)
 1052
- 1053 **V.A.1.c)** The program must provide an objective performance
 1054 evaluation based on the Competencies and the subspecialty-
 1055 specific Milestones, and must: ^(Core)
 1056
- 1057 **V.A.1.c).(1)** use multiple evaluators (e.g., faculty members, peers,
 1058 patients, self, and other professional staff members);
 1059 and, ^(Core)
 1060
- 1061 **V.A.1.c).(2)** provide that information to the Clinical Competency
 1062 Committee for its synthesis of progressive fellow
 1063 performance and improvement toward unsupervised
 1064 practice. ^(Core)
 1065

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

- 1066
- 1067 **V.A.1.d)** The program director or their designee, with input from the
 1068 Clinical Competency Committee, must:
 1069
- 1070 **V.A.1.d).(1)** meet with and review with each fellow their
 1071 documented semi-annual evaluation of performance,
 1072 including progress along the subspecialty-specific
 1073 Milestones. ^(Core)
 1074
- 1075 **V.A.1.d).(2)** assist fellows in developing individualized learning
 1076 plans to capitalize on their strengths and identify areas
 1077 for growth; and, ^(Core)
 1078
- 1079 **V.A.1.d).(3)** develop plans for fellows failing to progress, following
 1080 institutional policies and procedures. ^(Core)
 1081

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those

evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

1082		
1083	V.A.1.e)	At least annually, there must be a summative evaluation of
1084		each fellow that includes their readiness to progress to the
1085		next year of the program, if applicable. (Core)
1086		
1087	V.A.1.f)	The evaluations of a fellow’s performance must be accessible
1088		for review by the fellow. (Core)
1089		
1090	V.A.2.	Final Evaluation
1091		
1092	V.A.2.a)	The program director must provide a final evaluation for each
1093		fellow upon completion of the program. (Core)
1094		
1095	V.A.2.a).(1)	The subspecialty-specific Milestones, and when
1096		applicable the subspecialty-specific Case Logs, must
1097		be used as tools to ensure fellows are able to engage
1098		in autonomous practice upon completion of the
1099		program. (Core)
1100		
1101	V.A.2.a).(2)	The final evaluation must:
1102		
1103	V.A.2.a).(2).(a)	become part of the fellow’s permanent record
1104		maintained by the institution, and must be
1105		accessible for review by the fellow in
1106		accordance with institutional policy; (Core)
1107		
1108	V.A.2.a).(2).(b)	verify that the fellow has demonstrated the
1109		knowledge, skills, and behaviors necessary to
1110		enter autonomous practice; (Core)
1111		
1112	V.A.2.a).(2).(c)	consider recommendations from the Clinical
1113		Competency Committee; and, (Core)
1114		
1115	V.A.2.a).(2).(d)	be shared with the fellow upon completion of
1116		the program. (Core)
1117		

- 1118 **V.A.3.** **A Clinical Competency Committee must be appointed by the**
 1119 **program director. (Core)**
 1120
 1121 **V.A.3.a)** **At a minimum the Clinical Competency Committee must**
 1122 **include three members, at least one of whom is a core faculty**
 1123 **member. Members must be faculty members from the same**
 1124 **program or other programs, or other health professionals**
 1125 **who have extensive contact and experience with the**
 1126 **program’s fellows. (Core)**
 1127
 1128 **V.A.3.b)** **The Clinical Competency Committee must:**
 1129
 1130 **V.A.3.b).(1)** **review all fellow evaluations at least semi-annually;**
 1131 **(Core)**
 1132
 1133 **V.A.3.b).(2)** **determine each fellow’s progress on achievement of**
 1134 **the subspecialty-specific Milestones; and, (Core)**
 1135
 1136 **V.A.3.b).(3)** **meet prior to the fellows’ semi-annual evaluations and**
 1137 **advise the program director regarding each fellow’s**
 1138 **progress. (Core)**
 1139
 1140 **V.B. Faculty Evaluation**
 1141
 1142 **V.B.1.** **The program must have a process to evaluate each faculty**
 1143 **member’s performance as it relates to the educational program at**
 1144 **least annually. (Core)**
 1145

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program’s faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 1146
 1147 **V.B.1.a)** **This evaluation must include a review of the faculty member’s**
 1148 **clinical teaching abilities, engagement with the educational**
 1149 **program, participation in faculty development related to their**

- 1150 skills as an educator, clinical performance, professionalism,
 1151 and scholarly activities. ^(Core)
 1152
 1153 **V.B.1.b)** This evaluation must include written, confidential evaluations
 1154 by the fellows. ^(Core)
 1155
 1156 **V.B.2.** Faculty members must receive feedback on their evaluations at least
 1157 annually. ^(Core)
 1158
 1159 **V.B.3.** Results of the faculty educational evaluations should be
 1160 incorporated into program-wide faculty development plans. ^(Core)
 1161

Background and Intent: The quality of the faculty’s teaching and clinical care is a determinant of the quality of the program and the quality of the fellows’ future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members’ teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program’s faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

- 1162
 1163 **V.C. Program Evaluation and Improvement**
 1164
 1165 **V.C.1.** The program director must appoint the Program Evaluation
 1166 Committee to conduct and document the Annual Program
 1167 Evaluation as part of the program’s continuous improvement
 1168 process. ^(Core)
 1169
 1170 **V.C.1.a)** The Program Evaluation Committee must be composed of at
 1171 least two program faculty members, at least one of whom is a
 1172 core faculty member, and at least one fellow. ^(Core)
 1173
 1174 **V.C.1.b)** Program Evaluation Committee responsibilities must include:
 1175
 1176 **V.C.1.b).(1)** acting as an advisor to the program director, through
 1177 program oversight; ^(Core)
 1178
 1179 **V.C.1.b).(2)** review of the program’s self-determined goals and
 1180 progress toward meeting them; ^(Core)
 1181
 1182 **V.C.1.b).(3)** guiding ongoing program improvement, including
 1183 development of new goals, based upon outcomes;
 1184 and, ^(Core)
 1185
 1186 **V.C.1.b).(4)** review of the current operating environment to identify
 1187 strengths, challenges, opportunities, and threats as
 1188 related to the program’s mission and aims. ^(Core)
 1189

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for

itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.

- 1190
1191 **V.C.1.c)** **The Program Evaluation Committee should consider the**
1192 **following elements in its assessment of the program:**
1193
1194 **V.C.1.c).(1)** **curriculum;** ^(Core)
1195
1196 **V.C.1.c).(2)** **outcomes from prior Annual Program Evaluation(s);**
1197 ^(Core)
1198
1199 **V.C.1.c).(3)** **ACGME letters of notification, including citations,**
1200 **Areas for Improvement, and comments;** ^(Core)
1201
1202 **V.C.1.c).(4)** **quality and safety of patient care;** ^(Core)
1203

1208 **V.C.1.c).(5).(b)** **recruitment and retention;** ^(Core)
1209
1210 **V.C.1.c).(5).(c)** **workforce diversity;** ^(Core)
1211
1212 **V.C.1.c).(5).(d)** **engagement in quality improvement and patient**
1213 **safety;** ^(Core)
1214
1215 **V.C.1.c).(5).(e)** **scholarly activity;** ^(Core)
1216
1217 **V.C.1.c).(5).(f)** **ACGME Resident/Fellow and Faculty Surveys**
1218 **(where applicable); and,** ^(Core)
1219
1220 **V.C.1.c).(5).(g)** **written evaluations of the program.** ^(Core)
1221
1222 **V.C.1.c).(6)** **aggregate fellow:**
1223
1224 **V.C.1.c).(6).(a)** **achievement of the Milestones;** ^(Core)
1225
1226 **V.C.1.c).(6).(b)** **in-training examinations (where applicable);**
1227 ^(Core)
1228
1229 **V.C.1.c).(6).(c)** **board pass and certification rates; and,** ^(Core)
1230
1231 **V.C.1.c).(6).(d)** **graduate performance.** ^(Core)
1232
1233 **V.C.1.c).(7)** **aggregate faculty:**
1234
1235 **V.C.1.c).(7).(a)** **evaluation; and,** ^(Core)
1236
1237 **V.C.1.c).(7).(b)** **professional development** ^(Core)
1238

- 1239 V.C.1.d) The Program Evaluation Committee must evaluate the
 1240 program’s mission and aims, strengths, areas for
 1241 improvement, and threats. ^(Core)
 1242
- 1243 V.C.1.e) The annual review, including the action plan, must:
 1244
- 1245 V.C.1.e).(1) be distributed to and discussed with the members of
 1246 the teaching faculty and the fellows; and, ^(Core)
 1247
- 1248 V.C.1.e).(2) be submitted to the DIO. ^(Core)
 1249
- 1250 V.C.2. The program must participate in a Self-Study prior to its 10-Year
 1251 Accreditation Site Visit. ^(Core)
 1252
- 1253 V.C.2.a) A summary of the Self-Study must be submitted to the DIO.
 1254 ^(Core)
 1255

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

- 1256
- 1257 V.C.3. *One goal of ACGME-accredited education is to educate physicians*
 1258 *who seek and achieve board certification. One measure of the*
 1259 *effectiveness of the educational program is the ultimate pass rate.*
 1260
- 1261 *The program director should encourage all eligible program*
 1262 *graduates to take the certifying examination offered by the*
 1263 *applicable American Board of Medical Specialties (ABMS) member*
 1264 *board or American Osteopathic Association (AOA) certifying board.*
 1265
- 1266 V.C.3.a) For subspecialties in which the ABMS member board and/or
 1267 AOA certifying board offer(s) an annual written exam, in the
 1268 preceding three years, the program’s aggregate pass rate of
 1269 those taking the examination for the first time must be higher
 1270 than the bottom fifth percentile of programs in that
 1271 subspecialty. ^(Outcome)
 1272
- 1273 V.C.3.b) For subspecialties in which the ABMS member board and/or
 1274 AOA certifying board offer(s) a biennial written exam, in the
 1275 preceding six years, the program’s aggregate pass rate of
 1276 those taking the examination for the first time must be higher
 1277 than the bottom fifth percentile of programs in that
 1278 subspecialty. ^(Outcome)

- 1279
- 1280 **V.C.3.c)** For subspecialties in which the ABMS member board and/or
- 1281 AOA certifying board offer(s) an annual oral exam, in the
- 1282 preceding three years, the program’s aggregate pass rate of
- 1283 those taking the examination for the first time must be higher
- 1284 than the bottom fifth percentile of programs in that
- 1285 subspecialty. ^(Outcome)
- 1286
- 1287 **V.C.3.d)** For subspecialties in which the ABMS member board and/or
- 1288 AOA certifying board offer(s) a biennial oral exam, in the
- 1289 preceding six years, the program’s aggregate pass rate of
- 1290 those taking the examination for the first time must be higher
- 1291 than the bottom fifth percentile of programs in that
- 1292 subspecialty. ^(Outcome)
- 1293
- 1294 **V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program
- 1295 whose graduates over the time period specified in the
- 1296 requirement have achieved an 80 percent pass rate will have
- 1297 met this requirement, no matter the percentile rank of the
- 1298 program for pass rate in that subspecialty. ^(Outcome)
- 1299

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

- 1300
- 1301 **V.C.3.f)** Programs must report, in ADS, board certification status
- 1302 annually for the cohort of board-eligible fellows that
- 1303 graduated seven years earlier. ^(Core)
- 1304

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates’ performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

1305

1306 VI. The Learning and Working Environment

1307
1308 *Fellowship education must occur in the context of a learning and working*
1309 *environment that emphasizes the following principles:*

- 1310
- 1311 • *Excellence in the safety and quality of care rendered to patients by fellows*
1312 *today*
 - 1313
 - 1314 • *Excellence in the safety and quality of care rendered to patients by today's*
1315 *fellows in their future practice*
 - 1316
 - 1317 • *Excellence in professionalism through faculty modeling of:*
1318
 - 1319 ○ *the effacement of self-interest in a humanistic environment that supports*
1320 *the professional development of physicians*
 - 1321
 - 1322 ○ *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
1323
 - 1324 • *Commitment to the well-being of the students, residents, fellows, faculty*
1325 *members, and all members of the health care team*
1326

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

1327 VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

1328
1329
1330 VI.A.1. Patient Safety and Quality Improvement

1331

1332 **All physicians share responsibility for promoting patient safety and**
1333 **enhancing quality of patient care. Graduate medical education must**
1334 **prepare fellows to provide the highest level of clinical care with**
1335 **continuous focus on the safety, individual needs, and humanity of**
1336 **their patients. It is the right of each patient to be cared for by fellows**
1337 **who are appropriately supervised; possess the requisite knowledge,**
1338 **skills, and abilities; understand the limits of their knowledge and**
1339 **experience; and seek assistance as required to provide optimal**
1340 **patient care.**

1341
1342 **Fellows must demonstrate the ability to analyze the care they**
1343 **provide, understand their roles within health care teams, and play an**
1344 **active role in system improvement processes. Graduating fellows**
1345 **will apply these skills to critique their future unsupervised practice**
1346 **and effect quality improvement measures.**

1347
1348 **It is necessary for fellows and faculty members to consistently work**
1349 **in a well-coordinated manner with other health care professionals to**
1350 **achieve organizational patient safety goals.**

1351
1352 **VI.A.1.a) Patient Safety**

1353
1354 **VI.A.1.a).(1) Culture of Safety**

1355 **A culture of safety requires continuous identification**
1356 **of vulnerabilities and a willingness to transparently**
1357 **deal with them. An effective organization has formal**
1358 **mechanisms to assess the knowledge, skills, and**
1359 **attitudes of its personnel toward safety in order to**
1360 **identify areas for improvement.**

1361
1362
1363 **VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows**
1364 **must actively participate in patient safety**
1365 **systems and contribute to a culture of safety.**
1366 **(Core)**

1367
1368 **VI.A.1.a).(1).(b) The program must have a structure that**
1369 **promotes safe, interprofessional, team-based**
1370 **care. (Core)**

1371
1372 **VI.A.1.a).(2) Education on Patient Safety**

1373 **Programs must provide formal educational activities**
1374 **that promote patient safety-related goals, tools, and**
1375 **techniques. (Core)**

1376
1377 **Background and Intent: Optimal patient safety occurs in the setting of a coordinated**
interprofessional learning and working environment.

1378
1379 **VI.A.1.a).(3) Patient Safety Events**

1380

Reporting, investigation, and follow-up of adverse events, near misses, and unsafe conditions are pivotal mechanisms for improving patient safety, and are essential for the success of any patient safety program. Feedback and experiential learning are essential to developing true competence in the ability to identify causes and institute sustainable systems-based changes to ameliorate patient safety vulnerabilities.

1426
1427
1428
1429
1430
1431

VI.A.1.a).(3).(a)

Residents, fellows, faculty members, and other clinical staff members must:

VI.A.1.a).(3).(a).(i)

**know their responsibilities in reporting patient safety events at the clinical site;
(Core)**

VI.A.1.a).(3).(a).(ii)

know how to report patient safety events, including near misses, at the clinical site; and, (Core)

VI.A.1.a).(3).(a).(iii)

be provided with summary information of their institution's patient safety reports. (Core)

VI.A.1.a).(3).(b)

Fellows must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions. (Core)

VI.A.1.a).(4)

Fellow Education and Experience in Disclosure of Adverse Events

Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for fellows to develop and apply.

VI.A.1.a).(4).(a)

All fellows must receive training in how to disclose adverse events to patients and families. (Core)

VI.A.1.a).(4).(b)

Fellows should have the opportunity to participate in the disclosure of patient safety events, real or simulated. (Detail)

VI.A.1.b)

Quality Improvement

1432	VI.A.1.b).(1)	Education in Quality Improvement
1433		
1434		<i>A cohesive model of health care includes quality-</i>
1435		<i>related goals, tools, and techniques that are necessary</i>
1436		<i>in order for health care professionals to achieve</i>
1437		<i>quality improvement goals.</i>
1438		
1439	VI.A.1.b).(1).(a)	Fellows must receive training and experience in
1440		quality improvement processes, including an
1441		understanding of health care disparities. ^(Core)
1442		
1443	VI.A.1.b).(2)	Quality Metrics
1444		
1445		<i>Access to data is essential to prioritizing activities for</i>
1446		<i>care improvement and evaluating success of</i>
1447		<i>improvement efforts.</i>
1448		
1449	VI.A.1.b).(2).(a)	Fellows and faculty members must receive data
1450		on quality metrics and benchmarks related to
1451		their patient populations. ^(Core)
1452		
1453	VI.A.1.b).(3)	Engagement in Quality Improvement Activities
1454		
1455		<i>Experiential learning is essential to developing the</i>
1456		<i>ability to identify and institute sustainable systems-</i>
1457		<i>based changes to improve patient care.</i>
1458		
1459	VI.A.1.b).(3).(a)	Fellows must have the opportunity to
1460		participate in interprofessional quality
1461		improvement activities. ^(Core)
1462		
1463	VI.A.1.b).(3).(a).(i)	This should include activities aimed at
1464		reducing health care disparities. ^(Detail)
1465		
1466	VI.A.2.	Supervision and Accountability
1467		
1468	VI.A.2.a)	<i>Although the attending physician is ultimately responsible for</i>
1469		<i>the care of the patient, every physician shares in the</i>
1470		<i>responsibility and accountability for their efforts in the</i>
1471		<i>provision of care. Effective programs, in partnership with</i>
1472		<i>their Sponsoring Institutions, define, widely communicate,</i>
1473		<i>and monitor a structured chain of responsibility and</i>
1474		<i>accountability as it relates to the supervision of all patient</i>
1475		<i>care.</i>
1476		
1477		<i>Supervision in the setting of graduate medical education</i>
1478		<i>provides safe and effective care to patients; ensures each</i>
1479		<i>fellow's development of the skills, knowledge, and attitudes</i>
1480		<i>required to enter the unsupervised practice of medicine; and</i>
1481		<i>establishes a foundation for continued professional growth.</i>
1482		

1483 VI.A.2.a).(1) Each patient must have an identifiable and
1484 appropriately-credentialed and privileged attending
1485 physician (or licensed independent practitioner as
1486 specified by the applicable Review Committee) who is
1487 responsible and accountable for the patient’s care.
1488 (Core)

1490 VI.A.2.a).(1).(a) This information must be available to fellows,
1491 faculty members, other members of the health
1492 care team, and patients. (Core)

1494 VI.A.2.a).(1).(b) Fellows and faculty members must inform each
1495 patient of their respective roles in that patient’s
1496 care when providing direct patient care. (Core)

1498 VI.A.2.b) *Supervision may be exercised through a variety of methods.
1499 For many aspects of patient care, the supervising physician
1500 may be a more advanced fellow. Other portions of care
1501 provided by the fellow can be adequately supervised by the
1502 appropriate availability of the supervising faculty member or
1503 fellow, either on site or by means of telecommunication
1504 technology. Some activities require the physical presence of
1505 the supervising faculty member. In some circumstances,
1506 supervision may include post-hoc review of fellow-delivered
1507 care with feedback.*

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

1509 VI.A.2.b).(1) The program must demonstrate that the appropriate
1510 level of supervision in place for all fellows is based on
1511 each fellow’s level of training and ability, as well as
1512 patient complexity and acuity. Supervision may be
1513 exercised through a variety of methods, as appropriate
1514 to the situation. (Core)

1517 VI.A.2.b).(2) The program must define when physical presence of a
1518 supervising physician is required. (Core)

1520 VI.A.2.c) **Levels of Supervision**
1521
1522 To promote appropriate fellow supervision while providing
1523 for graded authority and responsibility, the program must use
1524 the following classification of supervision: (Core)

1525		
1526	VI.A.2.c).(1)	Direct Supervision:
1527		
1528	VI.A.2.c).(1).(a)	the supervising physician is physically present with the fellow during the key portions of the patient interaction; or, ^(Core)
1529		
1530		
1531		
1532	VI.A.2.c).(1).(b)	the supervising physician and/or patient is not physically present with the fellow and the supervising physician is concurrently monitoring the patient care through appropriate telecommunication technology. ^(Core)
1533		
1534		
1535		
1536		
1537		
1538	VI.A.2.c).(2)	Indirect Supervision: the supervising physician is not providing physical or concurrent visual or audio supervision but is immediately available to the fellow for guidance and is available to provide appropriate direct supervision. ^(Core)
1539		
1540		
1541		
1542		
1543		
1544	VI.A.2.c).(3)	Oversight – the supervising physician is available to provide review of procedures/encounters with feedback provided after care is delivered. ^(Core)
1545		
1546		
1547		
1548	VI.A.2.d)	The privilege of progressive authority and responsibility, conditional independence, and a supervisory role in patient care delegated to each fellow must be assigned by the program director and faculty members. ^(Core)
1549		
1550		
1551		
1552		
1553	VI.A.2.d).(1)	The program director must evaluate each fellow’s abilities based on specific criteria, guided by the Milestones. ^(Core)
1554		
1555		
1556		
1557	VI.A.2.d).(2)	Faculty members functioning as supervising physicians must delegate portions of care to fellows based on the needs of the patient and the skills of each fellow. ^(Core)
1558		
1559		
1560		
1561		
1562	VI.A.2.d).(3)	Fellows should serve in a supervisory role to junior fellows and residents in recognition of their progress toward independence, based on the needs of each patient and the skills of the individual resident or fellow. ^(Detail)
1563		
1564		
1565		
1566		
1567		
1568	VI.A.2.e)	Programs must set guidelines for circumstances and events in which fellows must communicate with the supervising faculty member(s). ^(Core)
1569		
1570		
1571		
1572	VI.A.2.e).(1)	Each fellow must know the limits of their scope of authority, and the circumstances under which the fellow is permitted to act with conditional independence. ^(Outcome)
1573		
1574		
1575		

1576

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

1577

1578

VI.A.2.f) Faculty supervision assignments must be of sufficient duration to assess the knowledge and skills of each fellow and to delegate to the fellow the appropriate level of patient care authority and responsibility. (Core)

1579

1580

1581

1582

1583

VI.B. Professionalism

1584

1585

VI.B.1. Programs, in partnership with their Sponsoring Institutions, must educate fellows and faculty members concerning the professional responsibilities of physicians, including their obligation to be appropriately rested and fit to provide the care required by their patients. (Core)

1586

1587

1588

1589

1590

VI.B.2. The learning objectives of the program must:

1591

1592

VI.B.2.a) be accomplished through an appropriate blend of supervised patient care responsibilities, clinical teaching, and didactic educational events; (Core)

1593

1594

1595

1596

VI.B.2.b) be accomplished without excessive reliance on fellows to fulfill non-physician obligations; and, (Core)

1597

1598

1599

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1600

VI.B.2.c) ensure manageable patient care responsibilities. (Core)

1601

1602

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1603

1604 VI.B.3. The program director, in partnership with the Sponsoring Institution,
1605 must provide a culture of professionalism that supports patient
1606 safety and personal responsibility. ^(Core)
1607

1608 VI.B.4. Fellows and faculty members must demonstrate an understanding
1609 of their personal role in the:
1610

1611 VI.B.4.a) provision of patient- and family-centered care; ^(Outcome)
1612

1613 VI.B.4.b) safety and welfare of patients entrusted to their care,
1614 including the ability to report unsafe conditions and adverse
1615 events; ^(Outcome)
1616

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

1617 VI.B.4.c) assurance of their fitness for work, including: ^(Outcome)
1618
1619

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

1620 VI.B.4.c).(1) management of their time before, during, and after
1621 clinical assignments; and, ^(Outcome)
1622

1623 VI.B.4.c).(2) recognition of impairment, including from illness,
1624 fatigue, and substance use, in themselves, their peers,
1625 and other members of the health care team. ^(Outcome)
1626

1627 VI.B.4.d) commitment to lifelong learning; ^(Outcome)
1628

1629 VI.B.4.e) monitoring of their patient care performance improvement
1630 indicators; and, ^(Outcome)
1631

1632 VI.B.4.f) accurate reporting of clinical and educational work hours,
1633 patient outcomes, and clinical experience data. ^(Outcome)
1634

1635 VI.B.5. All fellows and faculty members must demonstrate responsiveness
1636 to patient needs that supersedes self-interest. This includes the
1637 recognition that under certain circumstances, the best interests of
1638 the patient may be served by transitioning that patient's care to
1639 another qualified and rested provider. ^(Outcome)
1640

1641 VI.B.6. Programs, in partnership with their Sponsoring Institutions, must
1642 provide a professional, equitable, respectful, and civil environment
1643 that is free from discrimination, sexual and other forms of
1644

1645 harassment, mistreatment, abuse, or coercion of students, fellows,
1646 faculty, and staff. ^(Core)

1647
1648 **VI.B.7.** Programs, in partnership with their Sponsoring Institutions, should
1649 have a process for education of fellows and faculty regarding
1650 unprofessional behavior and a confidential process for reporting,
1651 investigating, and addressing such concerns. ^(Core)

1652
1653 **VI.C.** Well-Being

1654
1655 *Psychological, emotional, and physical well-being are critical in the*
1656 *development of the competent, caring, and resilient physician and require*
1657 *proactive attention to life inside and outside of medicine. Well-being*
1658 *requires that physicians retain the joy in medicine while managing their*
1659 *own real life stresses. Self-care and responsibility to support other*
1660 *members of the health care team are important components of*
1661 *professionalism; they are also skills that must be modeled, learned, and*
1662 *nurtured in the context of other aspects of fellowship training.*

1663
1664 *Fellows and faculty members are at risk for burnout and depression.*
1665 *Programs, in partnership with their Sponsoring Institutions, have the same*
1666 *responsibility to address well-being as other aspects of resident*
1667 *competence. Physicians and all members of the health care team share*
1668 *responsibility for the well-being of each other. For example, a culture which*
1669 *encourages covering for colleagues after an illness without the expectation*
1670 *of reciprocity reflects the ideal of professionalism. A positive culture in a*
1671 *clinical learning environment models constructive behaviors, and prepares*
1672 *fellows with the skills and attitudes needed to thrive throughout their*
1673 *careers.*

1674
Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

1675
1676 **VI.C.1.** The responsibility of the program, in partnership with the
1677 Sponsoring Institution, to address well-being must include:

1678
1679 **VI.C.1.a)** efforts to enhance the meaning that each fellow finds in the
1680 experience of being a physician, including protecting time
1681 with patients, minimizing non-physician obligations,

1682 providing administrative support, promoting progressive
1683 autonomy and flexibility, and enhancing professional
1684 relationships; ^(Core)

1685
1686 VI.C.1.b) attention to scheduling, work intensity, and work
1687 compression that impacts fellow well-being; ^(Core)
1688

1689 VI.C.1.c) evaluating workplace safety data and addressing the safety of
1690 fellows and faculty members; ^(Core)
1691

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

1692
1693 VI.C.1.d) policies and programs that encourage optimal fellow and
1694 faculty member well-being; and, ^(Core)
1695

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

1696
1697 VI.C.1.d).(1) Fellows must be given the opportunity to attend
1698 medical, mental health, and dental care appointments,
1699 including those scheduled during their working hours.
1700 ^(Core)
1701

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

1702
1703 VI.C.1.e) attention to fellow and faculty member burnout, depression,
1704 and substance use disorder. The program, in partnership with
1705 its Sponsoring Institution, must educate faculty members and
1706 fellows in identification of the symptoms of burnout,
1707 depression, and substance use disorder, including means to
1708 assist those who experience these conditions. Fellows and
1709 faculty members must also be educated to recognize those
1710 symptoms in themselves and how to seek appropriate care.
1711 The program, in partnership with its Sponsoring Institution,
1712 must: ^(Core)
1713

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance use disorder. Materials and more information are available on the Physician

Well-being section of the ACGME website (<http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being>).

VI.C.1.e).(1) encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another fellow, resident, or faculty member may be displaying signs of burnout, depression, a substance use disorder, suicidal ideation, or potential for violence;
(Core)

Background and Intent: Individuals experiencing burnout, depression, substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

1730
1731

VI.C.1.e).(2) provide access to appropriate tools for self-screening; and,
(Core)

VI.C.1.e).(3) provide access to confidential, affordable mental health assessment, counseling, and treatment, including access to urgent and emergent care 24 hours a day, seven days a week.
(Core)

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

1733
1734
1735
1736
1737

VI.C.2. There are circumstances in which fellows may be unable to attend work, including but not limited to fatigue, illness, family emergencies, and parental leave. Each program must allow an appropriate length of absence for fellows unable to perform their patient care responsibilities.
(Core)

- 1738
 1739 **VI.C.2.a)** **The program must have policies and procedures in place to**
 1740 **ensure coverage of patient care.** ^(Core)
 1741
 1742 **VI.C.2.b)** **These policies must be implemented without fear of negative**
 1743 **consequences for the fellow who is or was unable to provide**
 1744 **the clinical work.** ^(Core)
 1745

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

- 1746
 1747 **VI.D. Fatigue Mitigation**
 1748
 1749 **VI.D.1. Programs must:**
 1750
 1751 **VI.D.1.a)** **educate all faculty members and fellows to recognize the**
 1752 **signs of fatigue and sleep deprivation;** ^(Core)
 1753
 1754 **VI.D.1.b)** **educate all faculty members and fellows in alertness**
 1755 **management and fatigue mitigation processes; and,** ^(Core)
 1756
 1757 **VI.D.1.c)** **encourage fellows to use fatigue mitigation processes to**
 1758 **manage the potential negative effects of fatigue on patient**
 1759 **care and learning.** ^(Detail)
 1760

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

- 1761
 1762 **VI.D.2.** **Each program must ensure continuity of patient care, consistent**
 1763 **with the program’s policies and procedures referenced in VI.C.2–**

 1771 **VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care**
 1772
 1773 **VI.E.1. Clinical Responsibilities**
 1774
 1775 **The clinical responsibilities for each fellow must be based on PGY**
 1776 **level, patient safety, fellow ability, severity and complexity of patient**
 1777 **illness/condition, and available support services. (Core)**
 1778

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

1779
 1780 **VI.E.2. Teamwork**
 1781
 1782 **Fellows must care for patients in an environment that maximizes**
 1783 **communication. This must include the opportunity to work as a**

 1812

1813 VI.F. Clinical Experience and Education

1814

1815 *Programs, in partnership with their Sponsoring Institutions, must design*
1816 *an effective program structure that is configured to provide fellows with*
1817 *educational and clinical experience opportunities, as well as reasonable*
1818 *opportunities for rest and personal activities.*
1819

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

1820

1821 VI.F.1. Maximum Hours of Clinical and Educational Work per Week

1822

1823 Clinical and educational work hours must be limited to no more than
1824 80 hours per week, averaged over a four-week period, inclusive of all
1825 in-house clinical and educational activities, clinical work done from
1826 home, and all moonlighting. ^(Core)
1827

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

- 1828
- 1829 **VI.F.2. Mandatory Time Free of Clinical Work and Education**
- 1830
- 1831 **VI.F.2.a) The program must design an effective program structure that**
- 1832 **is configured to provide fellows with educational**
- 1833 **opportunities, as well as reasonable opportunities for rest**
- 1834 **and personal well-being. ^(Core)**
- 1835
- 1836 **VI.F.2.b) Fellows should have eight hours off between scheduled**
- 1837 **clinical work and education periods. ^(Detail)**
- 1838
- 1839 **VI.F.2.b).(1) There may be circumstances when fellows choose to**
- 1840 **stay to care for their patients or return to the hospital**
- 1841 **with fewer than eight hours free of clinical experience**
- 1842 **and education. This must occur within the context of**
- 1843 **the 80-hour and the one-day-off-in-seven**
- 1844 **requirements. ^(Detail)**
- 1845

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1846
1847
1848
1849

VI.F.2.c) Fellows must have at least 14 hours free of clinical work and education after 24 hours of in-house call. (Core)

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1850
1851
1852
1853
1854
1855

VI.F.2.d) Fellows must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. (Core)

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

VI.F.3. Maximum Clinical Work and Education Period Length

VI.F.3.a) Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical assignments. (Core)

VI.F.3.a).(1) Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or fellow education. (Core)

VI.F.3.a).(1).(a) Additional patient care responsibilities must not be assigned to a fellow during this time. (Core)

1870

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

1871

VI.F.4. Clinical and Educational Work Hour Exceptions

1872

1873

1874

VI.F.4.a) In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:

1875

1876

1877

1878

VI.F.4.a).(1) to continue to provide care to a single severely ill or unstable patient; (Detail)

1879

1880

1881

VI.F.4.a).(2) humanistic attention to the needs of a patient or family; or, (Detail)

1882

1883

1884

VI.F.4.a).(3) to attend unique educational events. (Detail)

1885

1886

VI.F.4.b) These additional hours of care or education will be counted toward the 80-hour weekly limit. (Detail)

1887

1888

1889

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

1890

VI.F.4.c) A Review Committee may grant rotation-specific exceptions for up to 10 percent or a maximum of 88 clinical and educational work hours to individual programs based on a sound educational rationale.

1891

1892

1893

1894

1895

The Review Committee for Neurology will not consider requests for exceptions to the 80-hour limit to the fellows' work week.

1896

1897

1898

VI.F.5. Moonlighting

1899

1900

VI.F.5.a) Moonlighting must not interfere with the ability of the fellow to achieve the goals and objectives of the educational program, and must not interfere with the fellow's fitness for work nor compromise patient safety. (Core)

1901

1902

1903

1904

1905
1906 **VI.F.5.b) Time spent by fellows in internal and external moonlighting**
1907 **(as defined in the ACGME Glossary of Terms) must be**
1908 **counted toward the 80-hour maximum weekly limit. ^(Core)**
1909

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

1910
1911 **VI.F.6. In-House Night Float**
1912
1913 **Night float must occur within the context of the 80-hour and one-**
1914 **day-off-in-seven requirements. ^(Core)**
1915

Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

1916
1917 **VI.F.7. Maximum In-House On-Call Frequency**
1918
1919 **Fellows must be scheduled for in-house call no more frequently than**
1920 **every third night (when averaged over a four-week period). ^(Core)**
1921

1922 **VI.F.8. At-Home Call**
1923

1924 **VI.F.8.a) Time spent on patient care activities by fellows on at-home**
1925 **call must count toward the 80-hour maximum weekly limit.**
1926 **The frequency of at-home call is not subject to the every-**
1927 **third-night limitation, but must satisfy the requirement for one**
1928 **day in seven free of clinical work and education, when**
1929 **averaged over four weeks. ^(Core)**
1930

1931 **VI.F.8.a).(1) At-home call must not be so frequent or taxing as to**
1932 **preclude rest or reasonable personal time for each**
1933 **fellow. ^(Core)**
1934

1935 **VI.F.8.b) Fellows are permitted to return to the hospital while on at-**
1936 **home call to provide direct care for new or established**
1937 **patients. These hours of inpatient patient care must be**
1938 **included in the 80-hour maximum weekly limit. ^(Detail)**
1939

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
