1 **ACGME Program Requirements for Graduate Medical Education**
2 **in Clinical Neurophysiology**

3
4 **Common Program Requirements (Fellowship) are in BOLD**

5
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.
9

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

10
11 **Introduction**

12
13 **Int.A.** *Fellowship is advanced graduate medical education beyond a core*
14 *residency program for physicians who desire to enter more specialized*
15 *practice. Fellowship-trained physicians serve the public by providing*
16 *subspecialty care, which may also include core medical care, acting as a*
17 *community resource for expertise in their field, creating and integrating*
18 *new knowledge into practice, and educating future generations of*
19 *physicians. Graduate medical education values the strength that a diverse*
20 *group of physicians brings to medical care.*

21
22 *Fellows who have completed residency are able to practice independently*
23 *in their core specialty. The prior medical experience and expertise of*
24 *fellows distinguish them from physicians entering into residency training.*
25 *The fellow's care of patients within the subspecialty is undertaken with*
26 *appropriate faculty supervision and conditional independence. Faculty*
27 *members serve as role models of excellence, compassion,*
28 *professionalism, and scholarship. The fellow develops deep medical*
29 *knowledge, patient care skills, and expertise applicable to their focused*
30 *area of practice. Fellowship is an intensive program of subspecialty clinical*
31 *and didactic education that focuses on the multidisciplinary care of*
32 *patients. Fellowship education is often physically, emotionally, and*
33 *intellectually demanding, and occurs in a variety of clinical learning*
34 *environments committed to graduate medical education and the well-being*
35 *of patients, residents, fellows, faculty members, students, and all members*
36 *of the health care team.*

37
38 *In addition to clinical education, many fellowship programs advance*
39 *fellows' skills as physician-scientists. While the ability to create new*
40 *knowledge within medicine is not exclusive to fellowship-educated*
41 *physicians, the fellowship experience expands a physician's abilities to*
42 *pursue hypothesis-driven scientific inquiry that results in contributions to*
43 *the medical literature and patient care. Beyond the clinical subspecialty*
44 *expertise achieved, fellows develop mentored relationships built on an*
45 *infrastructure that promotes collaborative research.*

46
47 **Int.B.** **Definition of Subspecialty**

48 Clinical neurophysiology is an area of medicine in which selected neurological
49 disorders involving electrophysiology of the central, peripheral, and autonomic
50 nervous systems are assessed and monitored.

51
52 **Int.C. Length of Educational Program**

53
54 The educational program in clinical neurophysiology must be 12 months in
55 length. ^{(Core)*}

56
57 **I. Oversight**

58
59 **I.A. Sponsoring Institution**

60
61 *The Sponsoring Institution is the organization or entity that assumes the*
62 *ultimate financial and academic responsibility for a program of graduate*
63 *medical education consistent with the ACGME Institutional Requirements.*

64
65 *When the Sponsoring Institution is not a rotation site for the program, the*
66 *most commonly utilized site of clinical activity for the program is the*
67 *primary clinical site.*

68

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

69
70 **I.A.1. The program must be sponsored by one ACGME-accredited**
71 **Sponsoring Institution. ^(Core)**

72
73 **I.B. Participating Sites**

74
75 *A participating site is an organization providing educational experiences or*
76 *educational assignments/rotations for fellows.*

77
78 **I.B.1. The program, with approval of its Sponsoring Institution, must**
79 **designate a primary clinical site. ^(Core)**

80
81 **I.B.1.a) Relation to Core Program**

82
83 The Sponsoring Institution must also sponsor an Accreditation
84 Council for Graduate Medical Education (ACGME)-accredited
85 residency program in child neurology or neurology. ^(Core)

86
87 **I.B.2. There must be a program letter of agreement (PLA) between the**
88 **program and each participating site that governs the relationship**

- 89 **between the program and the participating site providing a required**
90 **assignment.** ^(Core)
91
92 **I.B.2.a) The PLA must:**
93
94 **I.B.2.a).(1) be renewed at least every 10 years; and,** ^(Core)
95
96 **I.B.2.a).(2) be approved by the designated institutional official**
97 **(DIO).** ^(Core)
98
99 **I.B.3. The program must monitor the clinical learning and working**
100 **environment at all participating sites.** ^(Core)
101
102 **I.B.3.a) At each participating site there must be one faculty member,**
103 **designated by the program director, who is accountable for**
104 **fellow education for that site, in collaboration with the**
105 **program director.** ^(Core)
106

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- **Identifying the faculty members who will assume educational and supervisory responsibility for fellows**
- **Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows**
- **Specifying the duration and content of the educational experience**
- **Stating the policies and procedures that will govern fellow education during the assignment**

- 107
108 **I.B.4. The program director must submit any additions or deletions of**
109 **participating sites routinely providing an educational experience,**
110 **required for all fellows, of one month full time equivalent (FTE) or**
111 **more through the ACGME's Accreditation Data System (ADS).** ^(Core)
112
113 **I.C. The program, in partnership with its Sponsoring Institution, must engage in**
114 **practices that focus on mission-driven, ongoing, systematic recruitment**
115 **and retention of a diverse and inclusive workforce of residents (if present),**
116 **fellows, faculty members, senior administrative staff members, and other**
117 **relevant members of its academic community.** ^(Core)
118

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

119
120
121
122
123
124
125
126

132
133
134
135
136
137
138
139
140

I.D. Resources

I.D.1. The program, in partnership with its Sponsoring Institution, must ensure the availability of adequate resources for fellow education.
(Core)

I.D.1.a) There must be space and equipment for the educational program, including meeting rooms, classrooms with audiovisual and other educational aids, office space for staff members and fellows, and diagnostic, therapeutic, and research facilities. (Core)

I.D.2. The program, in partnership with its Sponsoring Institution, must ensure healthy and safe learning and working environments that promote fellow well-being and provide for: (Core)

I.D.2.a) access to food while on duty; (Core)

I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available and accessible for fellows with proximity appropriate for safe patient care; (Core)

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

141
142
143
144
145

I.D.2.c) clean and private facilities for lactation that have refrigeration capabilities, with proximity appropriate for safe patient care;
(Core)

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

146

- 147 **I.D.2.d)** security and safety measures appropriate to the participating
 148 site; and, ^(Core)
 149
 150 **I.D.2.e)** accommodations for fellows with disabilities consistent with
 151 the Sponsoring Institution’s policy. ^(Core)
 152
 153 **I.D.3.** Fellows must have ready access to subspecialty-specific and other
 154 appropriate reference material in print or electronic format. This
 155 must include access to electronic medical literature databases with
 156 full text capabilities. ^(Core)
 157
 158 **I.D.4.** The program’s educational and clinical resources must be adequate
 159 to support the number of fellows appointed to the program. ^(Core)
 160
 161 **I.D.4.a)** The number of patients must be adequate to provide an
 162 educational program with diversity related to age, gender, acute or
 163 chronic neurological problems, and inpatient and outpatient
 164 population. ^(Core)
 165
 166 **I.E.** *A fellowship program usually occurs in the context of many learners and
 167 other care providers and limited clinical resources. It should be structured
 168 to optimize education for all learners present.*
 169
 170 **I.E.1.** Fellows should contribute to the education of residents in core
 171 programs, if present. ^(Core)
 172

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows’ education is not compromised by the presence of other providers and learners, and that fellows’ education does not compromise core residents’ education.

- 173
 174 **II. Personnel**
 175
 176 **II.A. Program Director**
 177
 178 **II.A.1.** There must be one faculty member appointed as program director
 179 with authority and accountability for the overall program, including
 180 compliance with all applicable program requirements. ^(Core)
 181
 182 **II.A.1.a)** The Sponsoring Institution’s Graduate Medical Education
 183 Committee (GMEC) must approve a change in program
 184 director. ^(Core)
 185
 186 **II.A.1.b)** Final approval of the program director resides with the
 187 Review Committee. ^(Core)
 188

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as

program director and have overall responsibility for the program. The program director's nomination is reviewed and approved by the GMEC. Final approval of the program director resides with the applicable ACGME Review Committee.

189
190
191
192
193
194
195
196
197
198
199

II.A.2. The program director and, as applicable, the program's leadership team, must be provided with support adequate for administration of the program based upon its size and configuration. ^(Core)

II.A.2.a) Program leadership, in aggregate, must be provided with support equal to a dedicated minimum time specified below for administration of the program. This may be time spent by the program director only or divided between the program director and one or more associate (or assistant) program directors. ^(Core)

<u>Number of Approved Fellow Positions</u>	<u>Minimum FTE</u>
<u>1-3</u>	<u>0.1</u>
<u>4-6</u>	<u>0.15</u>
<u>7-9</u>	<u>0.2</u>
<u>10-12</u>	<u>0.25</u>
<u>13-15</u>	<u>0.3</u>

200
201
202
203
204
205

~~At a minimum, the program director must be provided with the salary support required to devote 10 percent FTE of non-clinical time to the administration of the program. Additional support must be provided based on program size as follows:~~ ^(Core)

Number of approved fellow positions	Minimum FTE
1-3	0.1
4 or more	0.15

206

Background and Intent: To achieve successful graduate medical education, individuals serving as education and administrative leaders of fellowship programs, as well as those significantly engaged in the education, supervision, evaluation, and mentoring of fellows, must have sufficient dedicated professional time to perform the vital activities required to sustain an accredited program.

The ultimate outcome of graduate medical education is excellence in fellow education and patient care.

The program director and, as applicable, the program leadership team, devote a portion of their professional effort to the oversight and management of the fellowship program, as defined in II.A.4.-II.A.4.a).(16). Both provision of support for the time required for the leadership effort and flexibility regarding how this support is provided are important. Programs, in partnership with their Sponsoring Institutions, may provide support for this time in a variety of ways. Examples of support may include, but are not limited to, salary support, supplemental compensation, educational value units, or relief of time from other professional duties.

Program directors and, as applicable, members of the program leadership team, who are new to the role may need to devote additional time to program oversight and management initially as they learn and become proficient in administering the program. It is suggested that during this initial period the support described above be increased as needed.

226
227
228
229
230
231
232
233
234

II.A.3. Qualifications of the program director:

II.A.3.a) must include subspecialty expertise and qualifications acceptable to the Review Committee; and, ^(Core)

II.A.3.b) must include current certification in the subspecialty for which they are the program director by the American Board of Psychiatry and Neurology (ABPN) or by the American Osteopathic Board of Neurology and Psychiatry (AOBNP), or subspecialty qualifications that are acceptable to the Review Committee. ^(Core)

II.A.3.b).(1) The Review Committee only accepts current ABPN or AOBNP certification in clinical neurophysiology. ^(Core)

II.A.4. Program Director Responsibilities

The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and promotion of fellows, and disciplinary action; supervision of fellows; and fellow education in the context of patient care. ^(Core)

II.A.4.a) The program director must:

II.A.4.a).(1) be a role model of professionalism; ^(Core)

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

235
236
237
238
239
240

II.A.4.a).(2) design and conduct the program in a fashion consistent with the needs of the community, the mission(s) of the Sponsoring Institution, and the mission(s) of the program; ^(Core)

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that

vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

241
242
243
244
245

- II.A.4.a).(3) administer and maintain a learning environment conducive to educating the fellows in each of the ACGME Competency domains; ^(Core)

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

246
247
248
249
250
251
252
253
254
255
256
257
258
259
260
261
262
263

- II.A.4.a).(4) develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the fellowship program education and at least annually thereafter, as outlined in V.B.; ^(Core)
- II.A.4.a).(5) have the authority to approve program faculty members for participation in the fellowship program education at all sites; ^(Core)
- II.A.4.a).(6) have the authority to remove program faculty members from participation in the fellowship program education at all sites; ^(Core)
- II.A.4.a).(7) have the authority to remove fellows from supervising interactions and/or learning environments that do not meet the standards of the program; ^(Core)

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

264
265
266
267
268
269
270
271
272
273

- II.A.4.a).(8) submit accurate and complete information required and requested by the DIO, GMEC, and ACGME; ^(Core)
- II.A.4.a).(9) provide applicants who are offered an interview with information related to the applicant's eligibility for the relevant subspecialty board examination(s); ^(Core)
- II.A.4.a).(10) provide a learning and working environment in which fellows have the opportunity to raise concerns and

- 274 provide feedback in a confidential manner as
 275 appropriate, without fear of intimidation or retaliation;
 276 (Core)
 277
 278 **II.A.4.a).(11)** ensure the program’s compliance with the Sponsoring
 279 Institution’s policies and procedures related to
 280 grievances and due process; (Core)
 281
 282 **II.A.4.a).(12)** ensure the program’s compliance with the Sponsoring
 283 Institution’s policies and procedures for due process
 284 when action is taken to suspend or dismiss, not to
 285 promote, or not to renew the appointment of a fellow;
 286 (Core)
 287

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution’s policies and procedures, and will ensure they are followed by the program’s leadership, faculty members, support personnel, and fellows.

- 288
 289 **II.A.4.a).(13)** ensure the program’s compliance with the Sponsoring
 290 Institution’s policies and procedures on employment
 291 and non-discrimination; (Core)
 292
 293 **II.A.4.a).(13).(a)** Fellows must not be required to sign a non-
 294 competition guarantee or restrictive covenant.
 295 (Core)
 296
 297 **II.A.4.a).(14)** document verification of program completion for all
 298 graduating fellows within 30 days; (Core)
 299
 300 **II.A.4.a).(15)** provide verification of an individual fellow’s
 301 completion upon the fellow’s request, within 30 days;
 302 and, (Core)
 303

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

- 304
 305 **II.A.4.a).(16)** obtain review and approval of the Sponsoring
 306 Institution’s DIO before submitting information or
 307 requests to the ACGME, as required in the Institutional
 308 Requirements and outlined in the ACGME Program
 309 Director’s Guide to the Common Program
 310 Requirements. (Core)
 311
 312 **II.B. Faculty**
 313

314 *Faculty members are a foundational element of graduate medical education*
315 *– faculty members teach fellows how to care for patients. Faculty members*
316 *provide an important bridge allowing fellows to grow and become practice*
317 *ready, ensuring that patients receive the highest quality of care. They are*
318 *role models for future generations of physicians by demonstrating*
319 *compassion, commitment to excellence in teaching and patient care,*
320 *professionalism, and a dedication to lifelong learning. Faculty members*
321 *experience the pride and joy of fostering the growth and development of*
322 *future colleagues. The care they provide is enhanced by the opportunity to*
323 *teach. By employing a scholarly approach to patient care, faculty members,*
324 *through the graduate medical education system, improve the health of the*
325 *individual and the population.*

327 *Faculty members ensure that patients receive the level of care expected*
328 *from a specialist in the field. They recognize and respond to the needs of*
329 *the patients, fellows, community, and institution. Faculty members provide*
330 *appropriate levels of supervision to promote patient safety. Faculty*
331 *members create an effective learning environment by acting in a*
332 *professional manner and attending to the well-being of the fellows and*
333 *themselves.*

334

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment.

335

336 **II.B.1. For each participating site, there must be a sufficient number of**
337 **faculty members with competence to instruct and supervise all**
338 **fellows at that location.** ^(Core)

339

340 **II.B.1.a)** Faculty members or consultants with special expertise in all the
341 disciplines related to neurology, including behavioral neurology,
342 child neurology, clinical neurophysiology, epilepsy, headache,
343 movement disorders, neurocritical care, neurogenetics,
344 neuroimaging, neurology of aging, neuromuscular medicine,
345 neuro-oncology, neuro-ophthalmology, neuropathology, pain
346 management, psychiatry, sleep disorders, and vascular neurology,
347 should be available to the fellows. ^(Detail)

348

349 **II.B.2. Faculty members must:**

350

351 **II.B.2.a) be role models of professionalism;** ^(Core)

352

353 **II.B.2.b) demonstrate commitment to the delivery of safe, quality,**
354 **cost-effective, patient-centered care;** ^(Core)

355

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

356

- 357 **II.B.2.c)** demonstrate a strong interest in the education of fellows; ^(Core)
 358
 359 **II.B.2.d)** devote sufficient time to the educational program to fulfill
 360 their supervisory and teaching responsibilities; ^(Core)
 361
 362 **II.B.2.e)** administer and maintain an educational environment
 363 conducive to educating fellows; ^(Core)
 364
 365 **II.B.2.f)** regularly participate in organized clinical discussions,
 366 rounds, journal clubs, and conferences; and, ^(Core)
 367
 368 **II.B.2.g)** pursue faculty development designed to enhance their skills
 369 at least annually. ^(Core)
 370

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

- 371
 372 **II.B.3. Faculty Qualifications**
 373
 374 **II.B.3.a)** Faculty members must have appropriate qualifications in
 375 their field and hold appropriate institutional appointments.
 376 ^(Core)
 377
 378 **II.B.3.b)** Subspecialty physician faculty members must:
 379
 380 **II.B.3.b).(1)** have current certification in the subspecialty by the
 381 **American Board of Psychiatry and Neurology or the**
 382 **American Osteopathic Board of Neurology and**
 383 **Psychiatry, or possess qualifications judged acceptable**
 384 **to the Review Committee.** ^(Core)
 385
 386 **II.B.3.c)** Any non-physician faculty members who participate in
 387 fellowship program education must be approved by the
 388 program director. ^(Core)
 389

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

- 390
 391 **II.B.3.d)** Any other specialty physician faculty members must have
 392 current certification in their specialty by the appropriate

393 American Board of Medical Specialties (ABMS) member
394 board or American Osteopathic Association (AOA) certifying
395 board, or possess qualifications judged acceptable to the
396 Review Committee. ^(Core)
397

398 **II.B.4. Core Faculty**
399

400 Core faculty members must have a significant role in the education
401 and supervision of fellows and must devote a significant portion of
402 their entire effort to fellow education and/or administration, and
403 must, as a component of their activities, teach, evaluate, and provide
404 formative feedback to fellows. ^(Core)
405

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum, mentoring fellows, and assessing fellows' progress toward achievement of competence in and the independent practice of the specialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program. Core faculty members may also be selected for their specific expertise and unique contribution to the program. Core faculty members are engaged in a broad range of activities, which may vary across programs and specialties. Core faculty members provide clinical teaching and supervision of fellows, and also participate in non-clinical activities related to fellow education and program administration. Examples of these non-clinical activities include, but are not limited to, interviewing and selecting fellow applicants, providing didactic instruction, mentoring fellows, simulation exercises, completing the annual ACGME Faculty Survey, and participating on the program's Clinical Competency Committee, Program Evaluation Committee, and other GME committees.

406
407 **II.B.4.a) Core faculty members must be designated by the program**
408 **director.** ^(Core)
409

410 **II.B.4.b) Core faculty members must complete the annual ACGME**
411 **Faculty Survey.** ^(Core)
412

413 **II.B.4.c)** The program must have at least two core faculty members,
414 including the program director, who have completed education in
415 and are board certified by the ABPN or the AOBPN in clinical
416 neurophysiology. ^(Core)
417

418 **II.B.4.d)** A core faculty-to-fellow ratio of at least 1:1 must be maintained in
419 programs with two or more fellows. ^(Core)
420

421 **II.C. Program Coordinator**
422

423 **II.C.1. There must be a program coordinator.** ^(Core)
424

425 **II.C.2. The program coordinator must be provided with dedicated time and**
426 **support adequate for administration of the program based upon its**
427 **size and configuration.** ^(Core)
428

429 II.C.2.a) At a minimum, the program coordinator must be provided with the
 430 dedicated time and support specified below for administration of
 431 the program:(Core)

432

<u>Number of Approved Fellow Positions</u>	<u>Minimum FTE</u>
<u>1-3</u>	<u>0.2</u>
<u>4-6</u>	<u>0.2</u>
<u>7-9</u>	<u>0.2</u>
<u>10-12</u>	<u>0.25</u>
<u>13-15</u>	<u>0.3</u>

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as otherwise titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison and facilitator between the learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a key member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management appropriate to the complexity of the program. Program coordinators are expected to develop in-depth knowledge of the ACGME and Program Requirements, including policies and procedures. Program coordinators assist the program director in meeting accreditation requirements, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

433

434 **II.D. Other Program Personnel**

435

436 **The program, in partnership with its Sponsoring Institution, must jointly**
 437 **ensure the availability of necessary personnel for the effective**
 438 **administration of the program. (Core)**

439

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

440

441 **III. Fellow Appointments**

442

443 **III.A. Eligibility Criteria**

444

445 **III.A.1. Eligibility Requirements – Fellowship Programs**

446

447

448

449

450

451

452

453

454

455

All required clinical education for entry into ACGME-accredited fellowship programs must be completed in an ACGME-accredited residency program, an AOA-approved residency program, a program with ACGME International (ACGME-I) Advanced Specialty Accreditation, or a Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of Canada (CFPC)-accredited residency program located in Canada.

(Core)

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

456

457 **III.A.1.a)**

458

459

460

461

Fellowship programs must receive verification of each entering fellow's level of competence in the required field, upon matriculation, using ACGME, ACGME-I, or CanMEDS Milestones evaluations from the core residency program. *(Core)*

462 **III.A.1.b)**

463

464

465

466

Prior to appointment in the program, fellows must have successfully completed a program in neurology, child neurology, neurodevelopment disabilities, or psychiatry that satisfies the requirements in III.A.1. *(Core)*

467 **III.B.**

468

469

The program director must not appoint more fellows than approved by the Review Committee. *(Core)*

470 **III.B.1.**

471

472

All complement increases must be approved by the Review Committee. *(Core)*

473 **III.C.**

474

Fellow Transfers

475

476

477

478

The program must obtain verification of previous educational experiences and a summative competency-based performance evaluation prior to acceptance of a transferring fellow, and Milestones evaluations upon matriculation. *(Core)*

479

480 **IV. Educational Program**

481

482

483

484

The ACGME accreditation system is designed to encourage excellence and innovation in graduate medical education regardless of the organizational affiliation, size, or location of the program.

485

486

487

488

The educational program must support the development of knowledgeable, skillful physicians who provide compassionate care.

489

490

In addition, the program is expected to define its specific program aims consistent with the overall mission of its Sponsoring Institution, the needs of the community

491 *it serves and that its graduates will serve, and the distinctive capabilities of*
492 *physicians it intends to graduate. While programs must demonstrate substantial*
493 *compliance with the Common and subspecialty-specific Program Requirements, it*
494 *is recognized that within this framework, programs may place different emphasis*
495 *on research, leadership, public health, etc. It is expected that the program aims*
496 *will reflect the nuanced program-specific goals for it and its graduates; for*
497 *example, it is expected that a program aiming to prepare physician-scientists will*
498 *have a different curriculum from one focusing on community health.*

499
500 **IV.A.** The curriculum must contain the following educational components: (Core)

501
502 **IV.A.1.** a set of program aims consistent with the Sponsoring Institution's
503 mission, the needs of the community it serves, and the desired
504 distinctive capabilities of its graduates; (Core)

505
506 **IV.A.1.a)** The program's aims must be made available to program
507 applicants, fellows, and faculty members. (Core)

508
509 **IV.A.2.** competency-based goals and objectives for each educational
510 experience designed to promote progress on a trajectory to
511 autonomous practice in their subspecialty. These must be
512 distributed, reviewed, and available to fellows and faculty members;
513 (Core)

514
515 **IV.A.3.** delineation of fellow responsibilities for patient care, progressive
516 responsibility for patient management, and graded supervision in
517 their subspecialty; (Core)

518

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

519

520 **IV.A.4.** structured educational activities beyond direct patient care; and,
521 (Core)

522

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

523

524 **IV.A.5.** advancement of fellows' knowledge of ethical principles
525 foundational to medical professionalism. (Core)

526

527

528 **IV.B.** ACGME Competencies

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

529
530
531
532
533
534
535
536
537
538
539

IV.B.1. The program must integrate the following ACGME Competencies into the curriculum: ^(Core)

IV.B.1.a) Professionalism

Fellows must demonstrate a commitment to professionalism and an adherence to ethical principles. ^(Core)

IV.B.1.b) Patient Care and Procedural Skills

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality*. *Health Affairs*. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

540
541
542
543
544
545
546
547
548
549
550
551
552
553
554
555
556
557
558
559
560

IV.B.1.b).(1) Fellows must be able to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health. ^(Core)

IV.B.1.b).(1).(a) Fellows must demonstrate competence in developing and executing an appropriate plan for electrodiagnosis. ^(Core)

IV.B.1.b).(2) Fellows must be able to perform all medical, diagnostic, and surgical procedures considered essential for the area of practice. ^(Core)

IV.B.1.b).(2).(a) Fellows must demonstrate competence in at least two of the following:

IV.B.1.b).(2).(a).(i) interpretation and reporting of electroencephalography (EEG) and video EEG; ^(Detail)

- 561 IV.B.1.b).(2).(a).(ii) performance, interpretation, and reporting of
562 electromyography (EMG) and nerve
563 conduction studies; ^(Detail)
564
565 IV.B.1.b).(2).(a).(iii) interpretation of intra-operative monitoring
566 studies; and, ^(Detail)
567
568 IV.B.1.b).(2).(a).(iv) interpretation and reporting of sleep studies.
569 ^(Detail)
570
571 IV.B.1.b).(2).(b) Fellows must demonstrate competence in the
572 application of electrical, magnetic, and mechanical
573 methods to evaluate a wide range of diseases
574 salient to a fellow's two or more areas of clinical
575 neurophysiology experience. ^(Core)
576

577 **IV.B.1.c) Medical Knowledge**

578
579 **Fellows must demonstrate knowledge of established and**
580 **evolving biomedical, clinical, epidemiological and social-**
581 **behavioral sciences, as well as the application of this**
582 **knowledge to patient care.** ^(Core)
583

- 584 IV.B.1.c).(1) Fellows must demonstrate competence in their knowledge
585 of:

- 586
587 IV.B.1.c).(1).(a) the normal electrophysiology of the nervous
588 system; and, ^(Core)
589

- 590 IV.B.1.c).(1).(b) disease states involving abnormal
591 electrophysiology of the nervous system. ^(Core)
592

593 **IV.B.1.d) Practice-based Learning and Improvement**

594
595 **Fellows must demonstrate the ability to investigate and**
596 **evaluate their care of patients, to appraise and assimilate**
597 **scientific evidence, and to continuously improve patient care**
598 **based on constant self-evaluation and lifelong learning.** ^(Core)
599

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

- 600
601 **IV.B.1.e) Interpersonal and Communication Skills**
602

603 **Fellows must demonstrate interpersonal and communication**
604 **skills that result in the effective exchange of information and**
605 **collaboration with patients, their families, and health**
606 **professionals. (Core)**

607
608 **IV.B.1.f) Systems-based Practice**

609
610 **Fellows must demonstrate an awareness of and**
611 **responsiveness to the larger context and system of health**
612 **care, including the social determinants of health, as well as**
613 **the ability to call effectively on other resources to provide**
614 **optimal health care. (Core)**

615
616 **IV.C. Curriculum Organization and Fellow Experiences**

617
618 **IV.C.1. The curriculum must be structured to optimize fellow educational**
619 **experiences, the length of these experiences, and supervisory**
620 **continuity. (Core)**

621
622 **IV.C.1.a)** Assignment of rotations must be structured to minimize the
623 frequency of rotational transitions and rotations must be of
624 sufficient length to provide a quality educational experience,
625 defined by continuity of patient care, ongoing supervision,
626 longitudinal relationships with faculty members, and high-quality
627 assessment and feedback. (Core)

628
629 **IV.C.1.b)** Clinical experiences must be structured to facilitate learning in a
630 manner that allows the fellows to function as part of an effective
631 health care team that works together longitudinally with shared
632 goals of patient safety and quality improvement. (Core)

633
634 **IV.C.2. The program must provide instruction and experience in pain**
635 **management if applicable for the subspecialty, including recognition**
636 **of the signs of addiction. (Core)**

637
638 **IV.C.3.** The program director must, with assistance from the members of the
639 faculty, develop and implement the academic and clinical education
640 program by:

641
642 **IV.C.3.a)** preparing and implementing a comprehensive, well-organized,
643 and effective curriculum, both academic and clinical, which
644 includes the presentation of core subspecialty knowledge
645 supplemented by the addition of current information; and, (Core)

646
647 **IV.C.3.b)** providing fellows with direct experience in progressive
648 responsibility for patient management. (Core)

649
650 **IV.C.4.** The program must provide a broad education in clinical neurophysiology,
651 including: (Core)

652
653 **IV.C.4.a)** EEG, to include video and intracranial monitoring; (Core)

- 654
- 655 IV.C.4.b) electromyography (EMG) and nerve conduction studies; ^(Core)
- 656
- 657 IV.C.4.c) evoked potential studies; ^(Core)
- 658
- 659 IV.C.4.d) intra-operative monitoring and analysis; ^(Core)
- 660
- 661 IV.C.4.e) movement disorder assessment, to include dystonia; ^(Core)
- 662
- 663 IV.C.4.f) polysomnography and assessment of disorders of sleep; ^(Core)
- 664
- 665 IV.C.4.g) single fiber EMG; ^(Core)
- 666
- 667 IV.C.4.h) testing of autonomic function; and, ^(Core)
- 668
- 669 IV.C.4.i) video EEG monitoring. ^(Core)
- 670

671 IV.C.5. The program must include clinical experience in at least two of the
 672 following: ^(Core)

- 673
- 674 IV.C.5.a) EEG; ^(Detail)
- 675
- 676 IV.C.5.b) EMG and nerve conduction studies; ^(Detail)
- 677
- 678 IV.C.5.c) intra-operative monitoring; or, ^(Detail)
- 679
- 680 IV.C.5.d) polysomnography and assessment of disorders of sleep. ^(Detail)
- 681

682 IV.C.6. If clinical education emphasizes one experience, the duration of the
 683 second experience must be at least two months. ^(Core)

684 **IV.D. Scholarship**

685

686

687 ***Medicine is both an art and a science. The physician is a humanistic***
 688 ***scientist who cares for patients. This requires the ability to think critically,***
 689 ***evaluate the literature, appropriately assimilate new knowledge, and***
 690 ***practice lifelong learning. The program and faculty must create an***
 691 ***environment that fosters the acquisition of such skills through fellow***
 692 ***participation in scholarly activities as defined in the subspecialty-specific***
 693 ***Program Requirements. Scholarly activities may include discovery,***
 694 ***integration, application, and teaching.***

695

696 ***The ACGME recognizes the diversity of fellowships and anticipates that***
 697 ***programs prepare physicians for a variety of roles, including clinicians,***
 698 ***scientists, and educators. It is expected that the program's scholarship will***
 699 ***reflect its mission(s) and aims, and the needs of the community it serves.***
 700 ***For example, some programs may concentrate their scholarly activity on***
 701 ***quality improvement, population health, and/or teaching, while other***
 702 ***programs might choose to utilize more classic forms of biomedical***
 703 ***research as the focus for scholarship.***

704

705	IV.D.1.	Program Responsibilities
706		
707	IV.D.1.a)	The program must demonstrate evidence of scholarly activities, consistent with its mission(s) and aims. ^(Core)
708		
709		
710	IV.D.1.b)	The program in partnership with its Sponsoring Institution, must allocate adequate resources to facilitate fellow and faculty involvement in scholarly activities. ^(Core)
711		
712		
713		
714	IV.D.2.	Faculty Scholarly Activity
715		
716	IV.D.2.a)	Among their scholarly activity, programs must demonstrate accomplishments in at least three of the following domains: ^(Core)
717		
718		
719		
720		<ul style="list-style-type: none"> • Research in basic science, education, translational science, patient care, or population health
721		<ul style="list-style-type: none"> • Peer-reviewed grants
722		<ul style="list-style-type: none"> • Quality improvement and/or patient safety initiatives
723		<ul style="list-style-type: none"> • Systematic reviews, meta-analyses, review articles, chapters in medical textbooks, or case reports
724		<ul style="list-style-type: none"> • Creation of curricula, evaluation tools, didactic educational activities, or electronic educational materials
725		<ul style="list-style-type: none"> • Contribution to professional committees, educational organizations, or editorial boards
726		<ul style="list-style-type: none"> • Innovations in education
727		
728		
729		
730		
731		
732		
733	IV.D.2.b)	The program must demonstrate dissemination of scholarly activity within and external to the program by the following methods:
734		
735		
736		

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the fellows’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

737		
738	IV.D.2.b).(1)	faculty participation in grand rounds, posters, workshops, quality improvement presentations, podium presentations, grant leadership, non-peer-reviewed print/electronic resources, articles or publications, book chapters, textbooks, webinars, service on professional committees, or serving as a journal reviewer, journal editorial board member, or editor; ^{(Outcome)‡}
739		
740		
741		
742		
743		
744		
745		

746		
747	IV.D.2.b).(2)	peer-reviewed publication. (Outcome)
748		
749	IV.D.3.	Fellow Scholarly Activity
750		
751	IV.D.3.a)	The curriculum must advance fellows' knowledge of the basic principles of evidence-based medicine and research, including how research is conducted, evaluated, explained to patients, and applied to patient care. (Core)
752		
753		
754		
755		
756	IV.D.3.b)	Fellows must participate in scholarly activity under the mentorship of program faculty members. (Core)
757		
758		
759	IV.D.3.c)	The sponsoring institution and program must allocate adequate educational resources to facilitate fellow involvement in scholarly activities. (Core)
760		
761		
762		
763	IV.D.3.d)	Fellows should receive support to attend one regional, national, or international professional conference during the program. (Detail)
764		
765		
766	V.	Evaluation
767		
768	V.A.	Fellow Evaluation
769		
770	V.A.1.	Feedback and Evaluation
771		

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- **fellows identify their strengths and weaknesses and target areas that need work**
- **program directors and faculty members recognize where fellows are struggling and address problems immediately**

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

772
773
774
775
776

V.A.1.a) Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. (Core)

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

797
798
799
800
801
802

V.A.1.b) Evaluation must be documented at the completion of the assignment. (Core)

V.A.1.b).(1) For block rotations of greater than three months in duration, evaluation must be documented at least every three months. (Core)

V.A.1.b).(2) Longitudinal experiences such as continuity clinic in the context of other clinical responsibilities must be evaluated at least every three months and at completion. (Core)

V.A.1.c) The program must provide an objective performance evaluation based on the Competencies and the subspecialty-specific Milestones, and must: (Core)

V.A.1.c).(1) use multiple evaluators (e.g., faculty members, peers, patients, self, and other professional staff members); and, (Core)

V.A.1.c).(2) provide that information to the Clinical Competency Committee for its synthesis of progressive fellow performance and improvement toward unsupervised practice. (Core)

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

- 803
804 **V.A.1.d)** The program director or their designee, with input from the
805 Clinical Competency Committee, must:
806
- 807 **V.A.1.d).(1)** meet with and review with each fellow their
808 documented semi-annual evaluation of performance,
809 including progress along the subspecialty-specific
810 Milestones. ^(Core)
811
- 812 **V.A.1.d).(2)** assist fellows in developing individualized learning
813 plans to capitalize on their strengths and identify areas
814 for growth; and, ^(Core)
815
- 816 **V.A.1.d).(3)** develop plans for fellows failing to progress, following
817 institutional policies and procedures. ^(Core)
818

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

- 819
820 **V.A.1.e)** At least annually, there must be a summative evaluation of
821 each fellow that includes their readiness to progress to the
822 next year of the program, if applicable. ^(Core)
823
- 824 **V.A.1.f)** The evaluations of a fellow's performance must be accessible
825 for review by the fellow. ^(Core)
826
- 827 **V.A.2.** Final Evaluation
828
- 829 **V.A.2.a)** The program director must provide a final evaluation for each
830 fellow upon completion of the program. ^(Core)
831
- 832 **V.A.2.a).(1)** The subspecialty-specific Milestones, and when
833 applicable the subspecialty-specific Case Logs, must
834 be used as tools to ensure fellows are able to engage
835 in autonomous practice upon completion of the
836 program. ^(Core)

- 837
- 838 **V.A.2.a).(2)** **The final evaluation must:**
- 839
- 840 **V.A.2.a).(2).(a)** **become part of the fellow’s permanent record**
- 841 **maintained by the institution, and must be**
- 842 **accessible for review by the fellow in**
- 843 **accordance with institutional policy;** ^(Core)
- 844
- 845 **V.A.2.a).(2).(b)** **verify that the fellow has demonstrated the**
- 846 **knowledge, skills, and behaviors necessary to**
- 847 **enter autonomous practice;** ^(Core)
- 848
- 849 **V.A.2.a).(2).(c)** **consider recommendations from the Clinical**
- 850 **Competency Committee; and,** ^(Core)
- 851
- 852 **V.A.2.a).(2).(d)** **be shared with the fellow upon completion of**
- 853 **the program.** ^(Core)
- 854
- 855 **V.A.3.** **A Clinical Competency Committee must be appointed by the**
- 856 **program director.** ^(Core)
- 857
- 858 **V.A.3.a)** **At a minimum the Clinical Competency Committee must**
- 859 **include three members, at least one of whom is a core faculty**
- 860 **member. Members must be faculty members from the same**
- 861 **program or other programs, or other health professionals**
- 862 **who have extensive contact and experience with the**
- 863 **program’s fellows.** ^(Core)
- 864
- 865 **V.A.3.b)** **The Clinical Competency Committee must:**
- 866
- 867 **V.A.3.b).(1)** **review all fellow evaluations at least semi-annually;**
- 868 ^(Core)
- 869
- 870 **V.A.3.b).(2)** **determine each fellow’s progress on achievement of**
- 871 **the subspecialty-specific Milestones; and,** ^(Core)
- 872
- 873 **V.A.3.b).(3)** **meet prior to the fellows’ semi-annual evaluations and**
- 874 **advise the program director regarding each fellow’s**
- 875 **progress.** ^(Core)
- 876
- 877 **V.B.** **Faculty Evaluation**
- 878
- 879 **V.B.1.** **The program must have a process to evaluate each faculty**
- 880 **member’s performance as it relates to the educational program at**
- 881 **least annually.** ^(Core)
- 882

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a

strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 883
884 **V.B.1.a)** This evaluation must include a review of the faculty member's
885 clinical teaching abilities, engagement with the educational
886 program, participation in faculty development related to their
887 skills as an educator, clinical performance, professionalism,
888 and scholarly activities. (Core)
889
890 **V.B.1.b)** This evaluation must include written, confidential evaluations
891 by the fellows. (Core)
892
893 **V.B.2.** Faculty members must receive feedback on their evaluations at least
894 annually. (Core)
895
896 **V.B.3.** Results of the faculty educational evaluations should be
897 incorporated into program-wide faculty development plans. (Core)
898

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

- 899
900 **V.C. Program Evaluation and Improvement**
901
902 **V.C.1.** The program director must appoint the Program Evaluation
903 Committee to conduct and document the Annual Program
904 Evaluation as part of the program's continuous improvement
905 process. (Core)
906
907 **V.C.1.a)** The Program Evaluation Committee must be composed of at
908 least two program faculty members, at least one of whom is a
909 core faculty member, and at least one fellow. (Core)
910
911 **V.C.1.b)** Program Evaluation Committee responsibilities must include:
912

- 913 **V.C.1.b).(1)** acting as an advisor to the program director, through
 914 program oversight; ^(Core)
 915
 916 **V.C.1.b).(2)** review of the program’s self-determined goals and
 917 progress toward meeting them; ^(Core)
 918
 919 **V.C.1.b).(3)** guiding ongoing program improvement, including
 920 development of new goals, based upon outcomes;
 921 and, ^(Core)
 922
 923 **V.C.1.b).(4)** review of the current operating environment to identify
 924 strengths, challenges, opportunities, and threats as
 925 related to the program’s mission and aims. ^(Core)
 926

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program’s progress toward achievement of its goals and aims.

- 927
 928 **V.C.1.c)** The Program Evaluation Committee should consider the
 929 following elements in its assessment of the program:
 930
 931 **V.C.1.c).(1)** curriculum; ^(Core)
 932
 933 **V.C.1.c).(2)** outcomes from prior Annual Program Evaluation(s);
 934 ^(Core)
 935
 936 **V.C.1.c).(3)** ACGME letters of notification, including citations,
 937 Areas for Improvement, and comments; ^(Core)
 938
 939 **V.C.1.c).(4)** quality and safety of patient care; ^(Core)
 940
 941 **V.C.1.c).(5)** aggregate fellow and faculty:
 942
 943 **V.C.1.c).(5).(a)** well-being; ^(Core)
 944
 945 **V.C.1.c).(5).(b)** recruitment and retention; ^(Core)
 946
 947 **V.C.1.c).(5).(c)** workforce diversity; ^(Core)
 948
 949 **V.C.1.c).(5).(d)** engagement in quality improvement and patient
 950 safety; ^(Core)
 951
 952 **V.C.1.c).(5).(e)** scholarly activity; ^(Core)
 953
 954 **V.C.1.c).(5).(f)** ACGME Resident/Fellow and Faculty Surveys
 955 (where applicable); and, ^(Core)
 956
 957 **V.C.1.c).(5).(g)** written evaluations of the program. ^(Core)

- 958
959 **V.C.1.c).(6)** **aggregate fellow:**
960
961 **V.C.1.c).(6).(a)** **achievement of the Milestones;** ^(Core)
962
963 **V.C.1.c).(6).(b)** **in-training examinations (where applicable);**
964 ^(Core)
965
966 **V.C.1.c).(6).(c)** **board pass and certification rates; and,** ^(Core)
967
968 **V.C.1.c).(6).(d)** **graduate performance.** ^(Core)
969
970 **V.C.1.c).(7)** **aggregate faculty:**
971
972 **V.C.1.c).(7).(a)** **evaluation; and,** ^(Core)
973
974 **V.C.1.c).(7).(b)** **professional development** ^(Core)
975
976 **V.C.1.d)** **The Program Evaluation Committee must evaluate the**
977 **program’s mission and aims, strengths, areas for**
978 **improvement, and threats.** ^(Core)
979
980 **V.C.1.e)** **The annual review, including the action plan, must:**
981
982 **V.C.1.e).(1)** **be distributed to and discussed with the members of**
983 **the teaching faculty and the fellows; and,** ^(Core)
984
985 **V.C.1.e).(2)** **be submitted to the DIO.** ^(Core)
986
987 **V.C.2.** **The program must participate in a Self-Study prior to its 10-Year**
988 **Accreditation Site Visit.** ^(Core)
989
990 **V.C.2.a)** **A summary of the Self-Study must be submitted to the DIO.**
991 ^(Core)
992

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

- 993
994 **V.C.3.** ***One goal of ACGME-accredited education is to educate physicians***
995 ***who seek and achieve board certification. One measure of the***
996 ***effectiveness of the educational program is the ultimate pass rate.***
997

998 *The program director should encourage all eligible program*
999 *graduates to take the certifying examination offered by the*
1000 *applicable American Board of Medical Specialties (ABMS) member*
1001 *board or American Osteopathic Association (AOA) certifying board.*

1002
1003 **V.C.3.a)** For subspecialties in which the ABMS member board and/or
1004 AOA certifying board offer(s) an annual written exam, in the
1005 preceding three years, the program's aggregate pass rate of
1006 those taking the examination for the first time must be higher
1007 than the bottom fifth percentile of programs in that
1008 subspecialty. (Outcome)

1009
1010 **V.C.3.b)** For subspecialties in which the ABMS member board and/or
1011 AOA certifying board offer(s) a biennial written exam, in the
1012 preceding six years, the program's aggregate pass rate of
1013 those taking the examination for the first time must be higher
1014 than the bottom fifth percentile of programs in that
1015 subspecialty. (Outcome)

1016
1017 **V.C.3.c)** For subspecialties in which the ABMS member board and/or
1018 AOA certifying board offer(s) an annual oral exam, in the
1019 preceding three years, the program's aggregate pass rate of
1020 those taking the examination for the first time must be higher
1021 than the bottom fifth percentile of programs in that
1022 subspecialty. (Outcome)

1023
1024 **V.C.3.d)** For subspecialties in which the ABMS member board and/or
1025 AOA certifying board offer(s) a biennial oral exam, in the
1026 preceding six years, the program's aggregate pass rate of
1027 those taking the examination for the first time must be higher
1028 than the bottom fifth percentile of programs in that
1029 subspecialty. (Outcome)

1030
1031 **V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program
1032 whose graduates over the time period specified in the
1033 requirement have achieved an 80 percent pass rate will have
1034 met this requirement, no matter the percentile rank of the
1035 program for pass rate in that subspecialty. (Outcome)
1036

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

1037

1038
1039
1040
1041

V.C.3.f) Programs must report, in ADS, board certification status annually for the cohort of board-eligible fellows that graduated seven years earlier. ^(Core)

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

VI. The Learning and Working Environment

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

- *Excellence in the safety and quality of care rendered to patients by fellows today*
- *Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice*
- *Excellence in professionalism through faculty modeling of:*
 - *the effacement of self-interest in a humanistic environment that supports the professional development of physicians*
 - *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
- *Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team*

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In

addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating fellows will apply these skills to critique their future unsupervised practice and effect quality improvement measures.

It is necessary for fellows and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.

VI.A.1.a) Patient Safety

VI.A.1.a).(1) Culture of Safety

A culture of safety requires continuous identification of vulnerabilities and a willingness to transparently deal with them. An effective organization has formal mechanisms to assess the knowledge, skills, and attitudes of its personnel toward safety in order to identify areas for improvement.

VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows must actively participate in patient safety

1102 systems and contribute to a culture of safety.
1103 (Core)

1104
1105 VI.A.1.a).(1).(b) The program must have a structure that
1106 promotes safe, interprofessional, team-based
1107 care. (Core)

1108
1109 VI.A.1.a).(2) Education on Patient Safety
1110
1111 Programs must provide formal educational activities
1112 that promote patient safety-related goals, tools, and
1113 techniques. (Core)

Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.

1115
1116 VI.A.1.a).(3) Patient Safety Events
1117
1118 *Reporting, investigation, and follow-up of adverse*
1119 *events, near misses, and unsafe conditions are pivotal*
1120 *mechanisms for improving patient safety, and are*
1121 *essential for the success of any patient safety*
1122 *program. Feedback and experiential learning are*
1123 *essential to developing true competence in the ability*
1124 *to identify causes and institute sustainable systems-*
1125 *based changes to ameliorate patient safety*
1126 *vulnerabilities.*

1127
1128 VI.A.1.a).(3).(a) Residents, fellows, faculty members, and other
1129 clinical staff members must:

1130
1131 VI.A.1.a).(3).(a).(i) know their responsibilities in reporting
1132 patient safety events at the clinical site;
1133 (Core)

1134
1135 VI.A.1.a).(3).(a).(ii) know how to report patient safety
1136 events, including near misses, at the
1137 clinical site; and, (Core)

1138
1139 VI.A.1.a).(3).(a).(iii) be provided with summary information
1140 of their institution's patient safety
1141 reports. (Core)

1142
1143 VI.A.1.a).(3).(b) Fellows must participate as team members in
1144 real and/or simulated interprofessional clinical
1145 patient safety activities, such as root cause
1146 analyses or other activities that include
1147 analysis, as well as formulation and
1148 implementation of actions. (Core)

1149

1150	VI.A.1.a).(4)	Fellow Education and Experience in Disclosure of Adverse Events
1151		
1152		
1153		<i>Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for fellows to develop and apply.</i>

1224		
1225		
1226		
1227	VI.A.2.a).(1).(a)	This information must be available to fellows, faculty members, other members of the health care team, and patients. ^(Core)
1228		
1229		
1230		
1231	VI.A.2.a).(1).(b)	Fellows and faculty members must inform each patient of their respective roles in that patient's care when providing direct patient care. ^(Core)
1232		
1233		
1234		
1235	VI.A.2.b)	<i>Supervision may be exercised through a variety of methods. For many aspects of patient care, the supervising physician may be a more advanced fellow. Other portions of care provided by the fellow can be adequately supervised by the appropriate availability of the supervising faculty member or fellow, either on site or by means of telecommunication technology. Some activities require the physical presence of the supervising faculty member. In some circumstances, supervision may include post-hoc review of fellow-delivered care with feedback.</i>
1236		
1237		
1238		
1239		
1240		
1241		
1242		
1243		
1244		
1245		

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the

same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

- 1246
1247 **VI.A.2.b).(1)** The program must demonstrate that the appropriate
1248 level of supervision in place for all fellows is based on
1249 each fellow's level of training and ability, as well as
1250 patient complexity and acuity. Supervision may be
1251 exercised through a variety of methods, as appropriate
1252 to the situation. ^(Core)
1253
- 1254 **VI.A.2.b).(2)** The program must define when physical presence of a
1255 supervising physician is required. ^(Core)
1256
- 1257 **VI.A.2.c)** Levels of Supervision
1258
1259 To promote appropriate fellow supervision while providing
1260 for graded authority and responsibility, the program must use
1261 the following classification of supervision: ^(Core)
1262
- 1263 **VI.A.2.c).(1)** Direct Supervision:
1264
- 1265 **VI.A.2.c).(1).(a)** the supervising physician is physically present
1266 with the fellow during the key portions of the
1267 patient interaction; or, ^(Core)
1268
- 1269 **VI.A.2.c).(1).(b)** the supervising physician and/or patient is not
1270 physically present with the fellow and the
1271 supervising physician is concurrently
1272 monitoring the patient care through appropriate
1273 telecommunication technology. ^(Core)
1274
- 1275 **VI.A.2.c).(2)** Indirect Supervision: the supervising physician is not
1276 providing physical or concurrent visual or audio
1277 supervision but is immediately available to the fellow
1278 for guidance and is available to provide appropriate
1279 direct supervision. ^(Core)
1280
- 1281 **VI.A.2.c).(3)** Oversight – the supervising physician is available to
1282 provide review of procedures/encounters with
1283 feedback provided after care is delivered. ^(Core)
1284
- 1285 **VI.A.2.d)** The privilege of progressive authority and responsibility,
1286 conditional independence, and a supervisory role in patient
1287 care delegated to each fellow must be assigned by the
1288 program director and faculty members. ^(Core)
1289
- 1290 **VI.A.2.d).(1)** The program director must evaluate each fellow's
1291 abilities based on specific criteria, guided by the
1292 Milestones. ^(Core)

- 1293
- 1294 VI.A.2.d).(2) Faculty members functioning as supervising
1295 physicians must delegate portions of care to fellows
1296 based on the needs of the patient and the skills of
1297 each fellow. ^(Core)
- 1298
- 1299 VI.A.2.d).(3) Fellows should serve in a supervisory role to junior
1300 fellows and residents in recognition of their progress
1301 toward independence, based on the needs of each
1302 patient and the skills of the individual resident or
1303 fellow. ^(Detail)
- 1304
- 1305 VI.A.2.e) Programs must set guidelines for circumstances and events
1306 in which fellows must communicate with the supervising
1307 faculty member(s). ^(Core)
- 1308
- 1309 VI.A.2.e).(1) Each fellow must know the limits of their scope of
1310 authority, and the circumstances under which the
1311 fellow is permitted to act with conditional
1312 independence. ^(Outcome)
- 1313

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

- 1314
- 1315 VI.A.2.f) Faculty supervision assignments must be of sufficient
1316 duration to assess the knowledge and skills of each fellow
1317 and to delegate to the fellow the appropriate level of patient
1318 care authority and responsibility. ^(Core)
- 1319
- 1320 VI.B. Professionalism
- 1321
- 1322 VI.B.1. Programs, in partnership with their Sponsoring Institutions, must
1323 educate fellows and faculty members concerning the professional
1324 responsibilities of physicians, including their obligation to be
1325 appropriately rested and fit to provide the care required by their
1326 patients. ^(Core)
- 1327
- 1328 VI.B.2. The learning objectives of the program must:
- 1329
- 1330 VI.B.2.a) be accomplished through an appropriate blend of supervised
1331 patient care responsibilities, clinical teaching, and didactic
1332 educational events; ^(Core)
- 1333
- 1334 VI.B.2.b) be accomplished without excessive reliance on fellows to
1335 fulfill non-physician obligations; and, ^(Core)
- 1336

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are

performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1337
1338
1339

VI.B.2.c) ensure manageable patient care responsibilities. ^(Core)

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1363

VI.B.4.c).(1) management of their time before, during, and after clinical assignments; and, ^(Outcome)

VI.B.4.c).(2) recognition of impairment, including from illness, fatigue, and substance use, in themselves, their peers, and other members of the health care team. ^(Outcome)

- 1364
1365 **VI.B.4.d)** commitment to lifelong learning; ^(Outcome)
1366
1367 **VI.B.4.e)** monitoring of their patient care performance improvement
1368 indicators; and, ^(Outcome)
1369
1370 **VI.B.4.f)** accurate reporting of clinical and educational work hours,
1371 patient outcomes, and clinical experience data. ^(Outcome)
1372
1373 **VI.B.5.** All fellows and faculty members must demonstrate responsiveness
1374 to patient needs that supersedes self-interest. This includes the
1375 recognition that under certain circumstances, the best interests of
1376 the patient may be served by transitioning that patient's care to
1377 another qualified and rested provider. ^(Outcome)
1378
1379 **VI.B.6.** Programs, in partnership with their Sponsoring Institutions, must
1380 provide a professional, equitable, respectful, and civil environment
1381 that is free from discrimination, sexual and other forms of
1382 harassment, mistreatment, abuse, or coercion of students, fellows,
1383 faculty, and staff. ^(Core)
1384
1385 **VI.B.7.** Programs, in partnership with their Sponsoring Institutions, should
1386 have a process for education of fellows and faculty regarding
1387 unprofessional behavior and a confidential process for reporting,
1388 investigating, and addressing such concerns. ^(Core)
1389

1411

<p>Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for</p>

physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

VI.C.1.e).(1) encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another fellow, resident, or faculty member may be displaying signs of burnout, depression, a substance use disorder, suicidal ideation, or potential for violence; ^(Core)

Background and Intent: Individuals experiencing burnout, depression, substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

VI.C.1.e).(2) provide access to appropriate tools for self-screening; and, ^(Core)

VI.C.1.e).(3) provide access to confidential, affordable mental health assessment, counseling, and treatment, including access to urgent and emergent care 24 hours a day, seven days a week. ^(Core)

1468

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

VI.D. Fatigue Mitigation

VI.D.1. Programs must:

VI.D.1.a) educate all faculty members and fellows to recognize the signs of fatigue and sleep deprivation; (Core)

VI.D.1.b) educate all faculty members and fellows in alertness management and fatigue mitigation processes; and, (Core)

VI.D.1.c) encourage fellows to use fatigue mitigation processes to manage the potential negative effects of fatigue on patient care and learning. (Detail)

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

- VI.D.2. Each program must ensure continuity of patient care, consistent with the program’s policies and procedures referenced in VI.C.2–VI.C.2.b), in the event that a fellow may be unable to perform their patient care responsibilities due to excessive fatigue. (Core)**
 - VI.D.3. The program, in partnership with its Sponsoring Institution, must ensure adequate sleep facilities and safe transportation options for fellows who may be too fatigued to safely return home. (Core)**
 - VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care**
 - VI.E.1. Clinical Responsibilities**
 - The clinical responsibilities for each fellow must be based on PGY level, patient safety, fellow ability, severity and complexity of patient illness/condition, and available support services. (Core)**

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

- VI.E.2. Teamwork**
 - Fellows must care for patients in an environment that maximizes communication. This must include the opportunity to work as a member of effective interprofessional teams that are appropriate to the delivery of care in the subspecialty and larger health system. (Core)**
 - VI.E.3. Transitions of Care**
 - VI.E.3.a) Programs must design clinical assignments to optimize transitions in patient care, including their safety, frequency, and structure. (Core)**

- 1531 VI.E.3.b) Programs, in partnership with their Sponsoring Institutions,
 1532 must ensure and monitor effective, structured hand-over
 1533 processes to facilitate both continuity of care and patient
 1534 safety. ^(Core)
 1535
- 1536 VI.E.3.c) Programs must ensure that fellows are competent in
 1537 communicating with team members in the hand-over process.
 1538 ^(Outcome)
 1539
- 1540 VI.E.3.d) Programs and clinical sites must maintain and communicate
 1541 schedules of attending physicians and fellows currently
 1542 responsible for care. ^(Core)
 1543
- 1544 VI.E.3.e) Each program must ensure continuity of patient care,
 1545 consistent with the program’s policies and procedures
 1546 referenced in VI.C.2-VI.C.2.b), in the event that a fellow may
 1547 be unable to perform their patient care responsibilities due to
 1548 excessive fatigue or illness, or family emergency. ^(Core)
 1549
- 1550 VI.F. Clinical Experience and Education
 1551
 1552 *Programs, in partnership with their Sponsoring Institutions, must design*
 1553 *an effective program structure that is configured to provide fellows with*
 1554 *educational and clinical experience opportunities, as well as reasonable*
 1555 *opportunities for rest and personal activities.*
 1556

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

- 1557
 1558 VI.F.1. Maximum Hours of Clinical and Educational Work per Week
 1559
 1560 Clinical and educational work hours must be limited to no more than
 1561 80 hours per week, averaged over a four-week period, inclusive of all
 1562 in-house clinical and educational activities, clinical work done from
 1563 home, and all moonlighting. ^(Core)
 1564

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling
 While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-

week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules

are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

VI.F.2. Mandatory Time Free of Clinical Work and Education

VI.F.2.a) The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. ^(Core)

VI.F.2.b) Fellows should have eight hours off between scheduled clinical work and education periods. ^(Detail)

VI.F.2.b).(1) There may be circumstances when fellows choose to stay to care for their patients or return to the hospital with fewer than eight hours free of clinical experience and education. This must occur within the context of the 80-hour and the one-day-off-in-seven requirements. ^(Detail)

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1584
1585
1586

VI.F.2.c) Fellows must have at least 14 hours free of clinical work and education after 24 hours of in-house call. ^(Core)

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1588
1589
1590
1591
1592

VI.F.2.d) Fellows must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. ^(Core)

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two

consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as “one (1) continuous 24-hour period free from all administrative, clinical, and educational activities.”

VI.F.3. Maximum Clinical Work and Education Period Length

VI.F.3.a) Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical assignments. ^(Core)

VI.F.3.a).(1) Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or fellow education. ^(Core)

VI.F.3.a).(1).(a) Additional patient care responsibilities must not be assigned to a fellow during this time. ^(Core)

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

VI.F.4. Clinical and Educational Work Hour Exceptions

VI.F.4.a) In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:

VI.F.4.a).(1) to continue to provide care to a single severely ill or unstable patient; ^(Detail)

VI.F.4.a).(2) humanistic attention to the needs of a patient or family; or, ^(Detail)

VI.F.4.a).(3) to attend unique educational events. ^(Detail)

VI.F.4.b) These additional hours of care or education will be counted toward the 80-hour weekly limit. ^(Detail)

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in

the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

VI.F.4.c) **A Review Committee may grant rotation-specific exceptions for up to 10 percent or a maximum of 88 clinical and educational work hours to individual programs based on a sound educational rationale.**

The Review Committee for Neurology will not consider requests for exceptions to the 80-hour limit to the fellows' work week.

VI.F.5. Moonlighting

VI.F.5.a) **Moonlighting must not interfere with the ability of the fellow to achieve the goals and objectives of the educational program, and must not interfere with the fellow's fitness for work nor compromise patient safety. ^(Core)**

VI.F.5.b) **Time spent by fellows in internal and external moonlighting (as defined in the ACGME Glossary of Terms) must be counted toward the 80-hour maximum weekly limit. ^(Core)**

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

VI.F.6. In-House Night Float

Night float must occur within the context of the 80-hour and one-day-off-in-seven requirements. ^(Core)

Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

VI.F.7. Maximum In-House On-Call Frequency

Fellows must be scheduled for in-house call no more frequently than every third night (when averaged over a four-week period). ^(Core)

VI.F.8. At-Home Call

VI.F.8.a) **Time spent on patient care activities by fellows on at-home call must count toward the 80-hour maximum weekly limit. The frequency of at-home call is not subject to the every-third-night limitation, but must satisfy the requirement for one day in seven free of clinical work and education, when averaged over four weeks. ^(Core)**

1667
1668 **VI.F.8.a).(1)** **At-home call must not be so frequent or taxing as to**
1669 **preclude rest or reasonable personal time for each**
1670 **fellow. ^(Core)**

1671
1672 **VI.F.8.b)** **Fellows are permitted to return to the hospital while on at-**
1673 **home call to provide direct care for new or established**
1674 **patients. These hours of inpatient patient care must be**
1675 **included in the 80-hour maximum weekly limit. ^(Detail)**
1676

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
