1 **ACGME Program Requirements for Graduate Medical Education**
2 **in Obstetrics and Gynecology**

3
4 **Common Program Requirements (Residency) are in BOLD**

5
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.

9
10 **Introduction**

11
12 **Int.A.** *Graduate medical education is the crucial step of professional*
13 *development between medical school and autonomous clinical practice. It*
14 *is in this vital phase of the continuum of medical education that residents*
15 *learn to provide optimal patient care under the supervision of faculty*
16 *members who not only instruct, but serve as role models of excellence,*
17 *compassion, professionalism, and scholarship.*

18
19 *Graduate medical education transforms medical students into physician*
20 *scholars who care for the patient, family, and a diverse community; create*
21 *and integrate new knowledge into practice; and educate future generations*
22 *of physicians to serve the public. Practice patterns established during*
23 *graduate medical education persist many years later.*

24
25 *Graduate medical education has as a core tenet the graded authority and*
26 *responsibility for patient care. The care of patients is undertaken with*
27 *appropriate faculty supervision and conditional independence, allowing*
28 *residents to attain the knowledge, skills, attitudes, and empathy required*
29 *for autonomous practice. Graduate medical education develops physicians*
30 *who focus on excellence in delivery of safe, equitable, affordable, quality*
31 *care; and the health of the populations they serve. Graduate medical*
32 *education values the strength that a diverse group of physicians brings to*
33 *medical care.*

34
35 *Graduate medical education occurs in clinical settings that establish the*
36 *foundation for practice-based and lifelong learning. The professional*
37 *development of the physician, begun in medical school, continues through*
38 *faculty modeling of the effacement of self-interest in a humanistic*
39 *environment that emphasizes joy in curiosity, problem-solving, academic*
40 *rigor, and discovery. This transformation is often physically, emotionally,*
41 *and intellectually demanding and occurs in a variety of clinical learning*
42 *environments committed to graduate medical education and the well-being*
43 *of patients, residents, fellows, faculty members, students, and all members*
44 *of the health care team.*

45
46 **Int.B.** **Definition of Specialty**

47
48 Obstetrician gynecologists are physicians who, by virtue of satisfactory
49 completion of a defined course of graduate medical education, possess special
50 knowledge, skills, and professional capability in the medical and surgical care of
51 the female reproductive system across the life span and women's health

52 conditions, such that it distinguishes them from other physicians and enables
53 them to serve as primary physicians for women, and as consultants to other
54 physicians.

55
56 **Int.C. Length of Educational Program**

57
58 The educational program in obstetrics and gynecology must be 48 months in
59 length. ^{(Core)*}

60
61 **I. Oversight**

62
63 **I.A. Sponsoring Institution**

64
65 *The Sponsoring Institution is the organization or entity that assumes the*
66 *ultimate financial and academic responsibility for a program of graduate*
67 *medical education, consistent with the ACGME Institutional Requirements.*

68
69 *When the Sponsoring Institution is not a rotation site for the program, the*
70 *most commonly utilized site of clinical activity for the program is the*
71 *primary clinical site.*

72

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the residents. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

73
74 **I.A.1. The program must be sponsored by one ACGME-accredited**
75 **Sponsoring Institution.** ^(Core)

76
77 **I.B. Participating Sites**
78
79 *A participating site is an organization providing educational experiences or*
80 *educational assignments/rotations for residents.*

81
82 **I.B.1. The program, with approval of its Sponsoring Institution, must**
83 **designate a primary clinical site.** ^(Core)

84
85 I.B.1.a) ~~The sponsoring institution must also sponsor Accreditation for~~
86 ~~Graduate Medical Education (ACGME)-accredited programs in at~~
87 ~~least one of the following specialties: family medicine, internal~~
88 ~~medicine, pediatrics, or surgery.~~ ^(Core)

89
90 I.B.1.b) The primary clinical site should also be the clinical site for at least
91 one other ACGME-accredited residency program in another
92 specialty. ^(Core)

93

- 94 **I.B.2.** There must be a program letter of agreement (PLA) between the
95 program and each participating site that governs the relationship
96 between the program and the participating site providing a required
97 assignment. ^(Core)
98
- 99 **I.B.2.a)** The PLA must:
- 100
- 101 **I.B.2.a).(1)** be renewed at least every 10 years; and, ^(Core)
102
- 103 **I.B.2.a).(2)** be approved by the designated institutional official
104 (DIO). ^(Core)
105
- 106 **I.B.3.** The program must monitor the clinical learning and working
107 environment at all participating sites. ^(Core)
108
- 109 **I.B.3.a)** At each participating site there must be one faculty member,
110 designated by the program director as the site director, who
111 is accountable for resident education at that site, in
112 collaboration with the program director. ^(Core)
113

Background and Intent: While all residency programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites the program must ensure the quality of the educational experience. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for residents
- Specifying the responsibilities for teaching, supervision, and formal evaluation of residents
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern resident education during the assignment

- 114
- 115 **I.B.4.** The program director must submit any additions or deletions of
116 participating sites routinely providing an educational experience,
117 required for all residents, of one month full time equivalent (FTE) or
118 more through the ACGME's Accreditation Data System (ADS). ^(Core)
119
- 120 **I.C.** The program, in partnership with its Sponsoring Institution, must engage in
121 practices that focus on mission-driven, ongoing, systematic recruitment
122 and retention of a diverse and inclusive workforce of residents, fellows (if
123 present), faculty members, senior administrative staff members, and other
124 relevant members of its academic community. ^(Core)
125

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution’s mission and aims. The program’s annual evaluation must include an assessment of the program’s efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

I.D. Resources

I.D.1. The program, in partnership with its Sponsoring Institution, must ensure the availability of adequate resources for resident education.
(Core)

I.D.1.a) ~~There must be medical and laboratory data retrieval capabilities accessible from all outpatient and inpatient facilities to enable efficient and effective patient care.~~ (Core)

I.D.1.b) ~~Clinical support services must include pathology and radiology with laboratory and radiologic information retrieval systems that allow rapid access to results.~~ (Core)

I.D.1.c) Inpatient facilities, including a labor and delivery unit, operating rooms, recovery room(s), intensive care unit(s), blood bank(s), diagnostic laboratories, and imaging services, must be regularly available and accessible on an emergency basis. (Core)

I.D.1.d) Ambulatory care facilities must be regularly available and adequately equipped. (Core)

I.D.1.e) Residents must have access to hospital-based consultative services in the major medical and surgical disciplines. (Core)

Specialty-Specific Background and Intent: It is expected that programs that depend on nearby facility(ies) to provide medical and surgical critical care have established a clear threshold for the transfer of patient care, plans for the transfer of patient care, and have current written agreement(s) in place with the accepting facility(ies).

I.D.1.f) ~~There must be space and equipment for the educational program, including office space for residents which must include computer workstations that provide access to electronic health records and space for interprofessional discussions regarding patient care to maintain patient confidentiality, classroom space for educational activities, and access to simulation resources, including meeting rooms and classrooms with audiovisual and other educational aids, simulation capabilities, and office space for staff members.~~ (Core)

I.D.1.g) ~~Clinical facilities must include adequate inpatient and outpatient facilities, and office space accessible to residents.~~ (Core)

170 I.D.1.h) The patient population on which the educational program is based
171 must be sufficient in volume and variety so that the broad
172 spectrum of experiences necessary to meet the educational
173 objectives will be provided. ~~Any major changes in these resources~~
174 ~~must be reported to the Review Committee.~~ (Core)
175

176 **I.D.2. The program, in partnership with its Sponsoring Institution, must**
177 **ensure healthy and safe learning and working environments that**
178 **promote resident well-being and provide for:** (Core)
179

180 **I.D.2.a) access to food while on duty;** (Core)
181

182 **I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available**
183 **and accessible for residents with proximity appropriate for**
184 **safe patient care;** (Core)
185

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that residents function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while residents are working. Residents should have access to refrigeration where food may be stored. Food should be available when residents are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued resident.

186
187 **I.D.2.c) clean and private facilities for lactation that have refrigeration**
188 **capabilities, with proximity appropriate for safe patient care;**
189 (Core)
190

Background and Intent: Sites must provide private and clean locations where residents may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the resident with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the resident and the resident's family, as outlined in VI.C.1.d).(1).

191
192 **I.D.2.d) security and safety measures appropriate to the participating**
193 **site; and,** (Core)
194

195 **I.D.2.e) accommodations for residents with disabilities consistent**
196 **with the Sponsoring Institution's policy.** (Core)
197

198 **I.D.3. Residents must have ready access to specialty-specific and other**
199 **appropriate reference material in print or electronic format. This**
200 **must include access to electronic medical literature databases with**
201 **full text capabilities.** (Core)
202

- 203 I.D.4. The program’s educational and clinical resources must be adequate
204 to support the number of residents appointed to the program. (Core)
205
- 206 I.E. The presence of other learners and other care providers, including, but not
207 limited to, residents from other programs, subspecialty fellows, and
208 advanced practice providers, must enrich the appointed residents’
209 education. (Core)
210
- 211 I.E.1. The program must report circumstances when the presence of other
212 learners has interfered with the residents’ education to the DIO and
213 Graduate Medical Education Committee (GMEC). (Core)
214

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that residents’ education is not compromised by the presence of other providers and learners.

- 215
- 216 II. Personnel
217
- 218 II.A. Program Director
219
- 220 II.A.1. There must be one faculty member appointed as program director
221 with authority and accountability for the overall program, including
222 compliance with all applicable program requirements. (Core)
223
- 224 II.A.1.a) The Sponsoring Institution’s GMEC must approve a change in
225 program director. (Core)
226
- 227 II.A.1.b) Final approval of the program director resides with the
228 Review Committee. (Core)
229

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a residency, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the residency, and it is this individual’s responsibility to communicate with the residents, faculty members, DIO, GMEC, and the ACGME. The program director’s nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

- 230
- 231 II.A.1.c) The program must demonstrate retention of the program
232 director for a length of time adequate to maintain continuity
233 of leadership and program stability. (Core)
234

Background and Intent: The success of residency programs is generally enhanced by continuity in the program director position. The professional activities required of a program director are unique and complex and take time to master. All programs are encouraged to undertake succession planning to facilitate program stability when there is necessary turnover in the program director position.

235
236 **II.A.2.** **At a minimum, the program director must be provided with the**
237 **salary support required to devote 50 percent FTE of non-clinical**
238 **time to the administration of the program.** ^(Core)
239

240 *[The ACGME Board of Directors approved a revision to II.A.2., effective July 1, 2022. Please*
241 *see the revised requirement under the “Future Effective Date” heading on the Program*
242 *Requirements and FAQs and Applications page of the Obstetrics and Gynecology section of the*
243 *ACGME website.]*
244

Background and Intent: Fifty percent FTE is defined as two-and-one-half (2.5) days per week.

“Administrative time” is defined as non-clinical time spent meeting the responsibilities of the program director as detailed in requirements II.A.4.-II.A.4.a).(16).

The requirement does not address the source of funding required to provide the specified salary support.

245
246 **II.A.3.** **Qualifications of the program director:**
247

248 **II.A.3.a)** **must include specialty expertise and at least three years of**
249 **documented educational and/or administrative experience, or**
250 **qualifications acceptable to the Review Committee;** ^(Core)
251

Background and Intent: Leading a program requires knowledge and skills that are established during residency and subsequently further developed. The time period from completion of residency until assuming the role of program director allows the individual to cultivate leadership abilities while becoming professionally established. The three-year period is intended for the individual's professional maturation.

The broad allowance for educational and/or administrative experience recognizes that strong leaders arise through diverse pathways. These areas of expertise are important when identifying and appointing a program director. The choice of a program director should be informed by the mission of the program and the needs of the community.

In certain circumstances, the program and Sponsoring Institution may propose and the Review Committee may accept a candidate for program director who fulfills these goals but does not meet the three-year minimum.

252
253 **II.A.3.b)** **must include current certification in the specialty for which**
254 **they are the program director by the American Board of**
255 **Obstetrics and Gynecology (ABOG) or by the American**
256 **Osteopathic Board of Obstetrics and Gynecology, or specialty**
257 **qualifications that are acceptable to the Review Committee;**
258 ^(Core)
259

260 **II.A.3.c)** **must include current medical licensure and appropriate**
261 **medical staff appointment; and,** ^(Core)
262

263 **II.A.3.d)** **must include ongoing clinical activity.** ^(Core)

264

Background and Intent: A program director is a role model for faculty members and residents. The program director must participate in clinical activity consistent with the specialty. This activity will allow the program director to role model the Core Competencies for the faculty members and residents.

265

266

II.A.3.e) ~~The program director should be a member of the staff of the sponsoring institution or a major participating site.~~ ^{(Detail)†}

267

268

269

II.A.4. Program Director Responsibilities

270

271

272

273

274

275

The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; resident recruitment and selection, evaluation, and promotion of residents, and disciplinary action; supervision of residents; and resident education in the context of patient care. ^(Core)

276

277

II.A.4.a) **The program director must:**

278

279

II.A.4.a).(1) **be a role model of professionalism; ^(Core)**

280

Background and Intent: The program director, as the leader of the program, must serve as a role model to residents in addition to fulfilling the technical aspects of the role. As residents are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

281

282

II.A.4.a).(2) **design and conduct the program in a fashion consistent with the needs of the community, the mission(s) of the Sponsoring Institution, and the mission(s) of the program; ^(Core)**

283

284

285

286

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

287

288

II.A.4.a).(3) **administer and maintain a learning environment conducive to educating the residents in each of the ACGME Competency domains; ^(Core)**

289

290

291

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Residency programs can be highly complex. In a complex organization, the leader typically has the ability to delegate

authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

- 292
293 **II.A.4.a).(4)** **develop and oversee a process to evaluate candidates**
294 **prior to approval as program faculty members for**
295 **participation in the residency program education and**
296 **at least annually thereafter, as outlined in V.B.; (Core)**
297
298 **II.A.4.a).(5)** **have the authority to approve program faculty**
299 **members for participation in the residency program**
300 **education at all sites; (Core)**
301
302 **II.A.4.a).(6)** **have the authority to remove program faculty**
303 **members from participation in the residency program**
304 **education at all sites; (Core)**
305
306 **II.A.4.a).(7)** **have the authority to remove residents from**
307 **supervising interactions and/or learning environments**
308 **that do not meet the standards of the program; (Core)**
309

Background and Intent: The program director has the responsibility to ensure that all who educate residents effectively role model the Core Competencies. Working with a resident is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

- 310
311 **II.A.4.a).(8)** **submit accurate and complete information required**
312 **and requested by the DIO, GMEC, and ACGME; (Core)**
313
314 **II.A.4.a).(9)** **provide applicants who are offered an interview with**
315 **information related to the applicant's eligibility for the**
316 **relevant specialty board examination(s); (Core)**
317
318 **II.A.4.a).(10)** **provide a learning and working environment in which**
319 **residents have the opportunity to raise concerns and**
320 **provide feedback in a confidential manner as**
321 **appropriate, without fear of intimidation or retaliation;**
322 **(Core)**
323
324 **II.A.4.a).(11)** **ensure the program's compliance with the Sponsoring**
325 **Institution's policies and procedures related to**
326 **grievances and due process; (Core)**
327
328 **II.A.4.a).(12)** **ensure the program's compliance with the Sponsoring**
329 **Institution's policies and procedures for due process**
330 **when action is taken to suspend or dismiss, not to**

331 promote, or not to renew the appointment of a
332 resident; ^(Core)
333

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and residents.

334
335 **II.A.4.a).(13)** ensure the program's compliance with the Sponsoring
336 Institution's policies and procedures on employment
337 and non-discrimination; ^(Core)
338

339 **II.A.4.a).(13).(a)** Residents must not be required to sign a non-
340 competition guarantee or restrictive covenant.
341 ^(Core)
342

343 **II.A.4.a).(14)** document verification of program completion for all
344 graduating residents within 30 days; ^(Core)
345

346 **II.A.4.a).(15)** provide verification of an individual resident's
347 completion upon the resident's request, within 30
348 days; and, ^(Core)
349

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of residents who have previously completed the program. Residents who leave the program prior to completion also require timely documentation of their summative evaluation.

350
351 **II.A.4.a).(16)** obtain review and approval of the Sponsoring
352 Institution's DIO before submitting information or
353 requests to the ACGME, as required in the Institutional
354 Requirements and outlined in the ACGME Program
355 Director's Guide to the Common Program
356 Requirements. ^(Core)
357

358 **II.B. Faculty**

359 *Faculty members are a foundational element of graduate medical education*
360 *– faculty members teach residents how to care for patients. Faculty*
361 *members provide an important bridge allowing residents to grow and*
362 *become practice-ready, ensuring that patients receive the highest quality of*
363 *care. They are role models for future generations of physicians by*
364 *demonstrating compassion, commitment to excellence in teaching and*
365 *patient care, professionalism, and a dedication to lifelong learning. Faculty*
366 *members experience the pride and joy of fostering the growth and*
367 *development of future colleagues. The care they provide is enhanced by*
368 *the opportunity to teach. By employing a scholarly approach to patient*
369 *care, faculty members, through the graduate medical education system,*
370 *improve the health of the individual and the population.*
371

372
373
374
375
376
377
378
379
380

Faculty members ensure that patients receive the level of care expected from a specialist in the field. They recognize and respond to the needs of the patients, residents, community, and institution. Faculty members provide appropriate levels of supervision to promote patient safety. Faculty members create an effective learning environment by acting in a professional manner and attending to the well-being of the residents and themselves.

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating residents. The term “faculty,” including “core faculty,” does not imply or require an academic appointment or salary support.

411
412

II.B.1. At each participating site, there must be a sufficient number of faculty members with competence to instruct and supervise all residents at that location. ^(Core)

II.B.1.a) The program director should identify a qualified individual as a Subspecialty Faculty Educator in each of the following subspecialties of obstetrics and gynecology: complex family planning; female pelvic medicine and reconstructive surgery; gynecologic oncology; maternal-fetal medicine; and reproductive endocrinology and infertility. ^(Detail)

II.B.1.a).(1) The Subspecialty Faculty Educator should be:

II.B.1.a).(1).(a) currently certified in the subspecialty by ABOG, or AOBOG, or possess qualifications that are acceptable to the Review Committee, and, ^(Detail)

II.B.1.a).(1).(b) ~~accountable to the program director for the coordination of the residents’ educational experiences in the respective in order to accomplish the goals and objectives in the subspecialty, in collaboration with the program director.~~ ^(Detail)

II.B.2. Faculty members must:

II.B.2.a) be role models of professionalism; ^(Core)

II.B.2.b) demonstrate commitment to the delivery of safe, quality, cost-effective, patient-centered care; ^(Core)

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

413

- 414 **II.B.2.c)** **demonstrate a strong interest in the education of residents;**
 415 **(Core)**
- 416
- 417 **II.B.2.d)** **devote sufficient time to the educational program to fulfill**
 418 **their supervisory and teaching responsibilities; (Core)**
- 419
- 420 **II.B.2.e)** **administer and maintain an educational environment**
 421 **conducive to educating residents; (Core)**
- 422
- 423 **II.B.2.f)** **regularly participate in organized clinical discussions,**
 424 **rounds, journal clubs, and conferences; and, (Core)**
- 425
- 426 **II.B.2.g)** **pursue faculty development designed to enhance their skills**
 427 **at least annually: (Core)**
- 428

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the residency program faculty in the aggregate.

- 429
- 430 **II.B.2.g).(1)** **as educators; (Core)**
- 431
- 432 **II.B.2.g).(2)** **in quality improvement and patient safety; (Core)**
- 433
- 434 **II.B.2.g).(3)** **in fostering their own and their residents' well-being;**
 435 **and, (Core)**
- 436
- 437 **II.B.2.g).(4)** **in patient care based on their practice-based learning**
 438 **and improvement efforts. (Core)**
- 439

Background and Intent: Practice-based learning serves as the foundation for the practice of medicine. Through a systematic analysis of one's practice and review of the literature, one is able to make adjustments that improve patient outcomes and care. Thoughtful consideration to practice-based analysis improves quality of care, as well as patient safety. This allows faculty members to serve as role models for residents in practice-based learning.

- 440
- 441 **II.B.2.h)** **provide on-site physician faculty member ~~physician~~ supervision**
 442 **when residents are on duty in the inpatient hospital ~~or ambulatory~~**
 443 **site. (Core)**
- 444
- 445 **II.B.2.h).(1)** **On the labor and delivery unit, on-site physician faculty**
 446 **member supervision must be provided by an obstetrics and**
 447 **gynecology physician. (Core)**
- 448
- 449 **II.B.2.h).(2)** **The Members of the physician faculty must be immediately**
 450 **available to a resident if clinical activity is taking place in**
 451 **the operating rooms and/or labor and delivery areas; and,**

- 452 (Core)
- 453
- 454 II.B.2.h).(3) If the program director judges that the size and nature of
- 455 the patient population does not require a 24-hour on-site
- 456 presence of residents or physician faculty members, this
- 457 situation must be carefully defined, and must receive prior
- 458 approval from the Review Committee. (Core)
- 459
- 460 II.B.2.i) ~~The physician faculty should be within easy walking distance of~~
- 461 ~~patient care units.~~ (Detail)
- 462
- 463 **II.B.3. Faculty Qualifications**
- 464
- 465 **II.B.3.a) Faculty members must have appropriate qualifications in**
- 466 **their field and hold appropriate institutional appointments.**
- 467 (Core)
- 468
- 469 **II.B.3.b) Physician faculty members must:**
- 470
- 471 **II.B.3.b).(1) have current certification in the specialty by the**
- 472 **American Board of Obstetrics and Gynecology (ABOG)**
- 473 **or the American Osteopathic Board of Obstetrics and**
- 474 **Gynecology, or possess qualifications judged**
- 475 **acceptable to the Review Committee.** (Core)
- 476
- 477 **II.B.3.c) Any non-physician faculty members who participate in**
- 478 **residency program education must be approved by the**
- 479 **program director.** (Core)
- 480
- 481 ~~II.B.3.c).(1) Other health professional with appropriate certification,~~
- 482 ~~such as Certified Nurse Midwife, Nurse Practitioner, or~~
- 483 ~~Physician Assistant, may be listed as faculty.~~ (Core)
- 484

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of residents by non-physician educators enables the resident to better manage patient care and provides valuable advancement of the residents' knowledge. Furthermore, other individuals contribute to the education of the resident in the basic science of the specialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the residents, the program director may designate the individual as a program faculty member or a program core faculty member.

- 485
- 486 **II.B.4. Core Faculty**
- 487
- 488 **Core faculty members must have a significant role in the education**
- 489 **and supervision of residents and must devote a significant portion**
- 490 **of their entire effort to resident education and/or administration, and**
- 491 **must, as a component of their activities, teach, evaluate, and**
- 492 **provide formative feedback to residents.** (Core)
- 493

Background and Intent: Core faculty members are critical to the success of resident education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing residents' progress toward achievement of competence in the specialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.

517
518
519
520

II.B.4.a) Core faculty members must be designated by the program director. ^(Core)

II.B.4.b) Core faculty members must complete the annual ACGME Faculty Survey. ^(Core)

II.B.4.c) Programs with 12 or fewer residents must have a minimum of three core physician faculty members in addition to the program director. ^(Core)

II.B.4.d) Programs with more than 12 residents must have a minimum of one core physician faculty member, in addition to the program director, for every four residents. ^(Core)

II.C. Program Coordinator

II.C.1. There must be a program coordinator. ^(Core)

II.C.2. At a minimum, the program coordinator must be supported at 100 percent FTE for administration of the program. ^(Core)

[The ACGME Board of Directors approved a revision to II.C.2., effective July 1, 2022. Please see the revised requirement under the "Future Effective Date" heading on the Program Requirements and FAQs and Applications page of the Obstetrics and Gynecology section of the ACGME website.]

Background and Intent: Seventy-five percent FTE is defined as three-and-three-quarters days per week.

The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge of the ACGME and Program Requirements, policies, and procedures. Program coordinators assist the program director in accreditation efforts, educational programming, and support of residents.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer residents may not require a full-time coordinator; one coordinator may support more than one program.

521
522
523
524
525
526
527

II.D. Other Program Personnel

The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. ^(Core)

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

528
529

III. Resident Appointments

530
531

III.A. Eligibility Requirements

532
533

III.A.1. An applicant must meet one of the following qualifications to be eligible for appointment to an ACGME-accredited program: ^(Core)

534
535

III.A.1.a) graduation from a medical school in the United States or Canada, accredited by the Liaison Committee on Medical Education (LCME) or graduation from a college of osteopathic medicine in the United States, accredited by the American Osteopathic Association Commission on Osteopathic College Accreditation (AOACOCA); or, ^(Core)

536
537

III.A.1.b) graduation from a medical school outside of the United States or Canada, and meeting one of the following additional qualifications: ^(Core)

538
539

III.A.1.b).(1) holding a currently valid certificate from the Educational Commission for Foreign Medical Graduates (ECFMG) prior to appointment; or, ^(Core)

540
541

III.A.1.b).(2) holding a full and unrestricted license to practice medicine in the United States licensing jurisdiction in which the ACGME-accredited program is located. ^(Core)

542
543

III.A.2. All prerequisite post-graduate clinical education required for initial entry or transfer into ACGME-accredited residency programs must be completed in ACGME-accredited residency programs, AOA-approved residency programs, Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of Canada (CFPC)-accredited residency programs

544
545

546
547

548
549

550
551

552
553

554
555

556
557

558
559

560

561 located in Canada, or in residency programs with ACGME
562 International (ACGME-I) Advanced Specialty Accreditation. ^(Core)

563
564 **III.A.2.a)** Residency programs must receive verification of each
565 resident's level of competency in the required clinical field
566 using ACGME, CanMEDS, or ACGME-I Milestones evaluations
567 from the prior training program upon matriculation. ^(Core)
568

Background and Intent: Programs with ACGME-I Foundational Accreditation or from institutions with ACGME-I accreditation do not qualify unless the program has also achieved ACGME-I Advanced Specialty Accreditation. To ensure entrants into ACGME-accredited programs from ACGME-I programs have attained the prerequisite milestones for this training, they must be from programs that have ACGME-I Advanced Specialty Accreditation.

569
570 **III.A.3.** A physician who has completed a residency program that was not
571 accredited by ACGME, AOA, RCPSC, CFPC, or ACGME-I (with
572 Advanced Specialty Accreditation) may enter an ACGME-accredited
573 residency program in the same specialty at the PGY-1 level and, at
574 the discretion of the program director of the ACGME-accredited
575 program and with approval by the GMEC, may be advanced to the
576 PGY-2 level based on ACGME Milestones evaluations at the ACGME-
577 accredited program. This provision applies only to entry into
578 residency in those specialties for which an initial clinical year is not
579 required for entry. ^(Core)
580

581 **III.B.** The program director must not appoint more residents than approved by
582 the Review Committee. ^(Core)
583

584 **III.B.1.** All complement increases must be approved by the Review
585 Committee. ^(Core)
586

587 **III.B.2.** There should be at least three approved categorical positions per PGY
588 level. ^(Detail|Core)
589

590 **III.C. Resident Transfers**

591
592 The program must obtain verification of previous educational experiences
593 and a summative competency-based performance evaluation prior to
594 acceptance of a transferring resident, and Milestones evaluations upon
595 matriculation. ^(Core)
596

597 **IV. Educational Program**

598
599 *The ACGME accreditation system is designed to encourage excellence and*
600 *innovation in graduate medical education regardless of the organizational*
601 *affiliation, size, or location of the program.*
602

603 *The educational program must support the development of knowledgeable, skillful*
604 *physicians who provide compassionate care.*
605

606 *In addition, the program is expected to define its specific program aims consistent*
607 *with the overall mission of its Sponsoring Institution, the needs of the community*
608 *it serves and that its graduates will serve, and the distinctive capabilities of*
609 *physicians it intends to graduate. While programs must demonstrate substantial*
610 *compliance with the Common and specialty-specific Program Requirements, it is*
611 *recognized that within this framework, programs may place different emphasis on*
612 *research, leadership, public health, etc. It is expected that the program aims will*
613 *reflect the nuanced program-specific goals for it and its graduates; for example, it*
614 *is expected that a program aiming to prepare physician-scientists will have a*
615 *different curriculum from one focusing on community health.*

617 **IV.A. The curriculum must contain the following educational components: (Core)**

618
619 **IV.A.1. a set of program aims consistent with the Sponsoring Institution’s**
620 **mission, the needs of the community it serves, and the desired**
621 **distinctive capabilities of its graduates; (Core)**

622
623 **IV.A.1.a) The program’s aims must be made available to program**
624 **applicants, residents, and faculty members. (Core)**

625
626 **IV.A.2. competency-based goals and objectives for each educational**
627 **experience designed to promote progress on a trajectory to**
628 **autonomous practice. These must be distributed, reviewed, and**
629 **available to residents and faculty members; (Core)**

630

Background and Intent: The trajectory to autonomous practice is documented by Milestones evaluation. The Milestones detail the progress of a resident in attaining skill in each competency domain. They are developed by each specialty group and allow evaluation based on observable behaviors. Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific resident.

631
632 **IV.A.3. delineation of resident responsibilities for patient care, progressive**
633 **responsibility for patient management, and graded supervision; (Core)**

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

635
636 **IV.A.4. a broad range of structured didactic activities; (Core)**

637
638 **IV.A.4.a) Residents must be provided with protected time to participate**
639 **in core didactic activities. (Core)**

640

Background and Intent: It is intended that residents will participate in structured didactic activities. It is recognized that there may be circumstances in which this is

not possible. Programs should define core didactic activities for which time is protected and the circumstances in which residents may be excused from these didactic activities. Didactic activities may include, but are not limited to, lectures, conferences, courses, labs, asynchronous learning, simulations, drills, case discussions, grand rounds, didactic teaching, and education in critical appraisal of medical evidence.

- 641
642 **IV.A.5.** advancement of residents' knowledge of ethical principles
643 foundational to medical professionalism; and, ^(Core)
644
645 **IV.A.6.** advancement in the residents' knowledge of the basic principles of
646 scientific inquiry, including how research is designed, conducted,
647 evaluated, explained to patients, and applied to patient care. ^(Core)
648
649 **IV.B. ACGME Competencies**
650

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each specialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each specialty.

- 651
652 **IV.B.1.** The program must integrate the following ACGME Competencies
653 into the curriculum: ^(Core)
654
655 **IV.B.1.a) Professionalism**
656
657 Residents must demonstrate a commitment to
658 professionalism and an adherence to ethical principles. ^(Core)
659
660 **IV.B.1.a).(1) Residents must demonstrate competence in:**
661
662 **IV.B.1.a).(1).(a) compassion, integrity, and respect for others;**
663 ^(Core)
664
665 **IV.B.1.a).(1).(b) responsiveness to patient needs that**
666 **supersedes self-interest;** ^(Core)
667

Background and Intent: This includes the recognition that under certain circumstances, the interests of the patient may be best served by transitioning care to another provider. Examples include fatigue, conflict or duality of interest, not connecting well with a patient, or when another physician would be better for the situation based on skill set or knowledge base.

- 668
669 **IV.B.1.a).(1).(c) respect for patient privacy and autonomy;** ^(Core)
670
671 **IV.B.1.a).(1).(d) accountability to patients, society, and the**
672 **profession;** ^(Core)
673

- 674 **IV.B.1.a).(1).(e)** respect and responsiveness to diverse patient
675 populations, including but not limited to
676 diversity in gender, age, culture, race, religion,
677 disabilities, national origin, socioeconomic
678 status, and sexual orientation; ^(Core)
679
- 680 **IV.B.1.a).(1).(f)** ability to recognize and develop a plan for one's
681 own personal and professional well-being; and,
682 ^(Core)
683
- 684 **IV.B.1.a).(1).(g)** appropriately disclosing and addressing
685 conflict or duality of interest. ^(Core)
686
- 687 **IV.B.1.b) Patient Care and Procedural Skills**
688

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs. 2008; 27(3):759-769.*) In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

- 689 **IV.B.1.b).(1)** Residents must be able to provide patient care that is
690 compassionate, appropriate, and effective for the
691 treatment of health problems and the promotion of
692 health. ^(Core)
693
- 694
- 695 **IV.B.1.b).(1).(a)** Residents must develop and ultimately
696 demonstrate the ability to manage patients:
697
- 698 **IV.B.1.b).(1).(a).(i)** in the medical and surgical care of the
699 female reproductive system and associated
700 disorders, and as the primary physician of
701 women; ^(Core)
702
- 703 **IV.B.1.b).(1).(a).(ii)** in a variety of roles within health systems,
704 with progressive responsibility to include
705 serving as the direct provider, the leader or
706 member of a multi-disciplinary team of
707 providers, a consultant to other physicians,
708 and an educational resource to the patient
709 and other members of the health care team;
710 and, ^(Core)
711

- 712 IV.B.1.b).(1).(a).(iii) in a variety of health care settings to include
 713 the inpatient unit, labor and delivery,
 714 operating room, critical care units, and
 715 emergency and ambulatory settings. ^(Core)
 716
- 717 **IV.B.1.b).(2)** **Residents must be able to perform all medical,**
 718 **diagnostic, and surgical procedures considered**
 719 **essential for the area of practice.** ^(Core)
 720
- 721 IV.B.1.b).(2).(a) Residents must develop and ultimately
 722 demonstrate proficiency in obstetric and
 723 gynecologic procedures essential for specialty
 724 board certification. ^(Core)
 725
- 726 **IV.B.1.c)** **Medical Knowledge**
- 727
- 728 **Residents must demonstrate knowledge of established and**
 729 **evolving biomedical, clinical, epidemiological and social-**
 730 **behavioral sciences, as well as the application of this**
 731 **knowledge to patient care.** ^(Core)
 732
- 733 IV.B.1.c).(1) Resident must develop and ultimately demonstrate
 734 knowledge of the core and subspecialty content of
 735 obstetrics and gynecology, and topics related to women's
 736 health care appropriate for the unsupervised practice of
 737 obstetrics and gynecology. ^(Core)
 738
- 739 **IV.B.1.d)** **Practice-based Learning and Improvement**
- 740
- 741 **Residents must demonstrate the ability to investigate and**
 742 **evaluate their care of patients, to appraise and assimilate**
 743 **scientific evidence, and to continuously improve patient care**
 744 **based on constant self-evaluation and lifelong learning.** ^(Core)
 745

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a physician develop the habits of mind required to continuously pursue quality improvement, well past the completion of residency.

- 746
- 747 **IV.B.1.d).(1)** **Residents must demonstrate competence in:**
- 748
- 749 **IV.B.1.d).(1).(a)** **identifying strengths, deficiencies, and limits in**
 750 **one's knowledge and expertise;** ^(Core)
 751
- 752 **IV.B.1.d).(1).(b)** **setting learning and improvement goals;** ^(Core)
 753

754	IV.B.1.d).(1).(c)	identifying and performing appropriate learning activities; ^(Core)
755		
756		
757	IV.B.1.d).(1).(d)	systematically analyzing practice using quality improvement methods, and implementing changes with the goal of practice improvement;
758		
759		^(Core)
760		
761		
762	IV.B.1.d).(1).(e)	incorporating feedback and formative evaluation into daily practice; ^(Core)
763		
764		
765	IV.B.1.d).(1).(f)	locating, appraising, and assimilating evidence from scientific studies related to their patients' health problems; and, ^(Core)
766		
767		
768		
769	IV.B.1.d).(1).(g)	using information technology to optimize learning. ^(Core)
770		
771		
772	IV.B.1.e)	Interpersonal and Communication Skills
773		
774		Residents must demonstrate interpersonal and communication skills that result in the effective exchange of information and collaboration with patients, their families, and health professionals. ^(Core)
775		
776		
777		
778		
779	IV.B.1.e).(1)	Residents must demonstrate competence in:
780		
781	IV.B.1.e).(1).(a)	communicating effectively with patients, families, and the public, as appropriate, across a broad range of socioeconomic and cultural backgrounds; ^(Core)
782		
783		
784		
785		
786	IV.B.1.e).(1).(b)	communicating effectively with physicians, other health professionals, and health-related agencies; ^(Core)
787		
788		
789		
790	IV.B.1.e).(1).(c)	working effectively as a member or leader of a health care team or other professional group;
791		
792		^(Core)
793		
794	IV.B.1.e).(1).(d)	educating patients, families, students, residents, and other health professionals; ^(Core)
795		
796		
797	IV.B.1.e).(1).(e)	acting in a consultative role to other physicians and health professionals; ^(Core)
798		
799		
800	IV.B.1.e).(1).(f)	maintaining comprehensive, timely, and legible medical records, if applicable; ^(Core)
801		
802		
803	IV.B.1.e).(1).(g)	providing counseling, engaging in shared decision making, and obtaining informed consent for
804		

805 procedures, including the alternatives, risks,
806 benefits, complications, and peri-operative course
807 of those procedures; and, ^(Core)

808
809 IV.B.1.e).(1).(h) discussing adverse events. ^(Core)
810

811 **IV.B.1.e).(2) Residents must learn to communicate with patients**
812 **and families to partner with them to assess their care**
813 **goals, including, when appropriate, end-of-life goals.**
814 ^(Core)
815

Background and Intent: When there are no more medications or interventions that can achieve a patient's goals or provide meaningful improvements in quality or length of life, a discussion about the patient's goals, values, and choices surrounding the end of life is one of the most important conversations that can occur. Residents must learn to participate effectively and compassionately in these meaningful human interactions, for the sake of their patients and themselves.

Programs may teach this skill through direct clinical experience, simulation, or other means of active learning.

816
817 **IV.B.1.f) Systems-based Practice**
818

819 **Residents must demonstrate an awareness of and**
820 **responsiveness to the larger context and system of health**
821 **care, including the social determinants of health, as well as**
822 **the ability to call effectively on other resources to provide**
823 **optimal health care.** ^(Core)
824

825 **IV.B.1.f).(1) Residents must demonstrate competence in:**

826
827 **IV.B.1.f).(1).(a) working effectively in various health care**
828 **delivery settings and systems relevant to their**
829 **clinical specialty;** ^(Core)
830

Background and Intent: Medical practice occurs in the context of an increasingly complex clinical care environment where optimal patient care requires attention to compliance with external and internal administrative and regulatory requirements.

831
832 **IV.B.1.f).(1).(b) coordinating patient care across the health care**
833 **continuum and beyond as relevant to their**
834 **clinical specialty;** ^(Core)
835

Background and Intent: Every patient deserves to be treated as a whole person. Therefore it is recognized that any one component of the health care system does not meet the totality of the patient's needs. An appropriate transition plan requires coordination and forethought by an interdisciplinary team. The patient benefits from proper care and the system benefits from proper use of resources.

836

- 837 **IV.B.1.f).(1).(c)** **advocating for quality patient care and optimal**
838 **patient care systems;** ^(Core)
839
840 **IV.B.1.f).(1).(d)** **working in interprofessional teams to enhance**
841 **patient safety and improve patient care quality;**
842 ^(Core)
843
844 **IV.B.1.f).(1).(e)** **participating in identifying system errors and**
845 **implementing potential systems solutions;** ^(Core)
846
847 **IV.B.1.f).(1).(f)** **incorporating considerations of value, cost**
848 **awareness, delivery and payment, and risk-**
849 **benefit analysis in patient and/or population-**
850 **based care as appropriate; and,** ^(Core)
851
852 **IV.B.1.f).(1).(g)** **understanding health care finances and its**
853 **impact on individual patients' health decisions.**
854 ^(Core)
855
856 **IV.B.1.f).(2)** **Residents must learn to advocate for patients within**
857 **the health care system to achieve the patient's and**
858 **family's care goals, including, when appropriate, end-**
859 **of-life goals.** ^(Core)
860
861 **IV.C. Curriculum Organization and Resident Experiences**
862
863 **IV.C.1. The curriculum must be structured to optimize resident educational**
864 **experiences, the length of these experiences, and supervisory**
865 **continuity.** ^(Core)
866
867 **IV.C.1.a)** Assignment of rotations must be structured to minimize the
868 frequency of rotational transitions, and rotations must be of
869 sufficient length to provide a quality educational experience,
870 defined by continuity of patient care, ongoing supervision,
871 longitudinal relationships with faculty members, and meaningful
872 assessment and feedback. ^(Core)
873
874 **IV.C.1.b)** Clinical experiences should be structured to facilitate learning in a
875 manner that allows the residents to function as part of an effective
876 interprofessional team that works together towards the shared
877 goals of patient safety and quality improvement. ^(Core)
878
879 **IV.C.1.c)** Programs must have schedules that minimize conflicting inpatient
880 and outpatient responsibilities. ^(Core)
881

Background and Intent: In some specialties, frequent rotational transitions, inadequate continuity of faculty member supervision, and dispersed patient locations within the hospital have adversely affected optimal resident education and effective team-based care. The need for patient care continuity varies from specialty to specialty and by clinical situation, and may be addressed by the individual Review Committee.

- 882
883 **IV.C.2. The program must provide instruction and experience in pain**
884 **management if applicable for the specialty, including recognition of**
885 **the signs of addiction.** ^(Core)
886
- 887 IV.C.3. An educational program in obstetrics and gynecology must provide an
888 opportunity for resident physicians to achieve the knowledge, skills, and
889 attitudes essential to the practice of obstetrics and gynecology and
890 ambulatory health care for women. The program must provide opportunity
891 for increasing responsibility, appropriate supervision, formal instruction,
892 critical evaluation, and feedback for residents. ^(Core)
893
- 894 IV.C.4. Chief Resident Experience:
895
- 896 IV.C.4.a) Within the final 24 months of education, residents must serve at
897 least 12 months as a chief resident. ^(Core)
898
- 899 IV.C.4.b) The clinical and academic experience as a chief resident should
900 be structured to prepare the resident for an independent practice
901 of obstetrics and gynecology. This chief resident experience, with
902 appropriate supervision, should promote a high level of
903 responsibility and independence, and should include development
904 of technical competence and proficiency in the management of
905 patients with complex gynecological conditions, management of
906 complicated pregnancies, and the performance of advanced
907 procedures. ^(DetailCore)
908
- 909 IV.C.5. Ambulatory ~~Longitudinal~~ Care Experience
910
- 911 IV.C.5.a) Continuity of care is a recognized core value of the specialty of
912 obstetrics and gynecology and must be a priority in each program.
913 ~~Continuity may pertain to individuals, groups of residents, or to a~~
914 ~~team of providers in its entirety.~~ ^(Core)
915
- 916 IV.C.5.b) Resident experience in the provision of ambulatory care must be
917 structured to include a minimum of 120 distinct half-day sessions
918 over the course of the program. ^(Core)
919
- 920 IV.C.5.c) ~~Ambulatory care experiences must include longitudinal care for a~~
921 ~~group of patients whose obstetric, gynecologic, or primary care is~~
922 ~~the primary responsibility of the residents.~~ ^(Core)
923
- 924 IV.C.5.d) Each resident's ambulatory care longitudinal experience must
925 include:
926
- 927 IV.C.5.d).(1) continuity clinics, and/or maternal-fetal medicine clinics,
928 and/or gynecologic clinics that provide appropriate
929 continuity of patient care; ^(Core)
930
- 931 IV.C.5.d).(1).(a) Clinics must include a panel of patients cared for by
932 individual residents or a team of residents. ^(Core)

933		
934	IV.C.5.d).(1).(b)	<u>The distance between residents' ambulatory care assignment(s) and concurrent rotation(s) should not be so great as to impede residents' ability to easily travel between these educational experiences.</u> (Core)
935		
936		
937		
938		
939	IV.C.5.d).(2)	<u>sufficient experiences to allow residents to learn to address acute problems and follow them to resolution, and to stabilize chronic problems;</u> (Core)
940		
941		
942		
943	IV.C.5.d).(3)	evaluation of performance data for the resident's patients relating to <u>problem-oriented</u> and preventive health care;
944		(Core)
945		
946		
947	IV.C.5.d).(3).(a)	faculty member guidance for developing an action plan to improve patient care outcomes based on performance data, and evaluation of this plan at least twice per year; (Core)
948		
949		
950		
951		
952	IV.C.5.d).(4)	resident participation in coordination of care within and across hospital-based and outpatient health care settings; and, (Core)
953		
954		
955		
956	IV.C.5.d).(5)	availability to participate in the management of their continuity patients between outpatient visits. (Core)
957		
958		
959	IV.C.5.d).(5).(a)	There must be systems of care to provide coverage of urgent problems when a resident is not readily available. (Core)
960		
961		
962		
963	IV.C.6.	<u>Peri-operative Management Procedural Experience</u>
964		
965	IV.C.6.a)	The opportunity to demonstrate proficiency in peri-operative management must be included in the residents' clinical experience. (Core)
966		
967		
968		
969	IV.C.6.b)	The program must ensure that residents' clinical <u>Residents' procedural</u> experience <u>emphasizes must include</u> appropriate involvement in the process that leads to selection of the surgical or therapeutic option, the pre-operative assessment, and the post-operative care of the patients for whom they share surgical <u>responsibility.</u> (Core)
970		
971		
972		
973		
974		
975		
976	IV.C.6.c)	<u>Each graduating resident must perform the minimum number of cases as established by the Review Committee.</u> (Outcome)
977		
978		
979	IV.C.6.c).(1)	<u>Performance of the minimum number of cases by a graduating resident must not be interpreted as equivalent to the achievement of competence.</u> (Core)
980		
981		
982		
983	IV.C.6.d)	<u>PGY-1 Gynecology Experiences</u>

- 984
 985 IV.C.6.d).(1) PGY-1 residents must have formal training in basic
 986 surgical skills, which may be provided longitudinally or as a
 987 dedicated rotation. The basic surgical skill curriculum must
 988 teach: (Core)
 989
 990 IV.C.6.d).(1).(a) basic operative skills, including incision
 991 management, soft tissue management, and
 992 suturing; and, (Core)
 993
 994 IV.C.6.d).(1).(b) the fundamentals of endoscopic surgical
 995 equipment, and safe use of electrosurgical
 996 equipment. (Core)
 997

998 Specialty-Specific Background and Intent: The basic surgical skills curriculum during the PGY-1
 999 is expected to provide a foundation for skills training in subsequent PGYs and prepare residents
 1000 to participate in major gynecologic surgery cases in PGY-2.

- 1001
 1002 IV.C.7. Family Planning and Contraception
 1003
 1004 IV.C.7.a) Programs must provide training or access to training in the
 1005 provision of abortions, and this must be part of the planned
 1006 curriculum. (Core)
 1007
 1008 IV.C.7.b) Residents who have a religious or moral objection may opt out
 1009 and must not be required to participate in training in or performing
 1010 induced abortions. (Core)
 1011
 1012 IV.C.7.c) Programs must ensure residents' clinical experience includes
 1013 involvement in educating patients on the surgical and medical
 1014 therapeutic options related to the provision of abortions. (Core)
 1015
 1016 IV.C.7.d) ~~Residents must have experience in managing~~ participate in the
 1017 management of complications of abortions and training in all forms
 1018 of contraception, including reversible methods and sterilization.
 1019 (OutcomeCore) ‡
 1020
 1021 IV.C.7.e) Residents must have training in all forms of contraception. (Core)
 1022
 1023 IV.C.8. Didactic Education
 1024
 1025 IV.C.9. Educational sessions in obstetrics and gynecology must be structured
 1026 and regularly scheduled and held. (Core)
 1027
 1028 IV.C.10. Didactic Education
 1029
 1030 IV.C.10.a) These sessions ~~should~~ must consist of patient clinical teaching
 1031 rounds, case conferences, simulation training, journal clubs, and
 1032 protected time for educational activities covering all aspects of
 1033 obstetrics and gynecology, including basic sciences pertinent to

- 1034 the specialty. (DetailCore)
- 1035
- 1036 IV.C.10.b) Interdisciplinary and interprofessional sessions ~~should~~ must occur
- 1037 and include health care providers from appropriate specialties.
- 1038 (DetailCore)
- 1039
- 1040 IV.C.10.c) Educational sessions in racial and ethnic health disparities must
- 1041 be held and include disparate maternal morbidity and mortality
- 1042 causes and prevention, and impact of social determinants of
- 1043 health and understanding of racism, privilege, and bias. (Core)
- 1044

- 1063
- 1064 **IV.D.1. Program Responsibilities**
- 1065
- 1066 **IV.D.1.a) The program must demonstrate evidence of scholarly**
- 1067 **activities consistent with its mission(s) and aims.** (Core)
- 1068
- 1069 **IV.D.1.b) The program, in partnership with its Sponsoring Institution,**
- 1070 **must allocate adequate resources to facilitate resident and**
- 1071 **faculty involvement in scholarly activities.** (Core)
- 1072
- 1073 **IV.D.1.c) The program must advance residents' knowledge and**
- 1074 **practice of the scholarly approach to evidence-based patient**
- 1075 **care.** (Core)
- 1076

Background and Intent: The scholarly approach can be defined as a synthesis of teaching, learning, and research with the aim of encouraging curiosity and critical thinking based on an understanding of physiology, pathophysiology, differential diagnosis, treatments, treatment alternatives, efficiency of care, and patient safety. While some faculty members are responsible for fulfilling the traditional elements of scholarship through research, integration, and teaching, all faculty members are responsible for advancing residents' scholarly approach to patient care.

Elements of a scholarly approach to patient care include:

- **Asking meaningful questions to stimulate residents to utilize learning resources to create a differential diagnosis, a diagnostic algorithm, and treatment plan**
- **Challenging the evidence that the residents use to reach their medical decisions so that they understand the benefits and limits of the medical literature**
- **When appropriate, dissemination of scholarly learning in a peer-reviewed manner (publication or presentation)**
- **Improving resident learning by encouraging them to teach using a scholarly approach**

The scholarly approach to patient care begins with curiosity, is grounded in the principles of evidence-based medicine, expands the knowledge base through dissemination, and develops the habits of lifelong learning by encouraging residents to be scholarly teachers.

IV.D.2. Faculty Scholarly Activity

**IV.D.2.a) Among their scholarly activity, programs must demonstrate accomplishments in at least three of the following domains:
(Core)**

- **Research in basic science, education, translational science, patient care, or population health**
- **Peer-reviewed grants**
- **Quality improvement and/or patient safety initiatives**
- **Systematic reviews, meta-analyses, review articles, chapters in medical textbooks, or case reports**
- **Creation of curricula, evaluation tools, didactic educational activities, or electronic educational materials**
- **Contribution to professional committees, educational organizations, or editorial boards**
- **Innovations in education**

IV.D.2.b) The program must demonstrate dissemination of scholarly activity within and external to the program by the following methods:

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program's effectiveness in the creation of an environment of inquiry that advances the residents' scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

1101
1102
1103

IV.D.2.b).(1) faculty participation in grand rounds, posters, workshops, quality improvement presentations,

1104 podium presentations, grant leadership, non-peer-
1105 reviewed print/electronic resources, articles or
1106 publications, book chapters, textbooks, webinars,
1107 service on professional committees, or serving as a
1108 journal reviewer, journal editorial board member, or
1109 editor; (Outcome)‡

1110
1111 IV.D.2.b).(2) peer-reviewed publication. (Outcome)

1112
1113 IV.D.3. Resident Scholarly Activity

1114
1115 IV.D.3.a) Residents must participate in scholarship. (Core)

1116
1117 V. Evaluation

1118
1119 V.A. Resident Evaluation

1120
1121 V.A.1. Feedback and Evaluation

1122

Background and Intent: Feedback is ongoing information provided regarding aspects of one’s performance, knowledge, or understanding. The faculty empower residents to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring resident learning* and providing ongoing feedback that can be used by residents to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- residents identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where residents are struggling and address problems immediately

Summative evaluation is *evaluating a resident’s learning* by comparing the residents against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when residents or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the residency program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a neophyte physician to one with growing expertise.

1123
1124 V.A.1.a) Faculty members must directly observe, evaluate, and
1125 frequently provide feedback on resident performance during
1126 each rotation or similar educational assignment. (Core)

1127

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Residents require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for residents who have deficiencies that may result in a poor final rotation evaluation.

1128

1129 **V.A.1.b)** Evaluation must be documented at the completion of the
1130 assignment. ^(Core)

1131

1132 **V.A.1.b).(1)** For block rotations of greater than three months in
1133 duration, evaluation must be documented at least
1134 every three months. ^(Core)

1135

1136 **V.A.1.b).(2)** Longitudinal experiences, such as continuity clinic in
1137 the context of other clinical responsibilities, must be
1138 evaluated at least every three months and at
1139 completion. ^(Core)

1140

1141 **V.A.1.c)** The program must provide an objective performance
1142 evaluation based on the Competencies and the specialty-
1143 specific Milestones, and must: ^(Core)

1144

1145 **V.A.1.c).(1)** use multiple evaluators (e.g., faculty members, peers,
1146 patients, self, and other professional staff members);
1147 and, ^(Core)

1148

1149 **V.A.1.c).(2)** provide that information to the Clinical Competency
1150 Committee for its synthesis of progressive resident
1151 performance and improvement toward unsupervised
1152 practice. ^(Core)

1153

1154 **V.A.1.d)** The program director or their designee, with input from the
1155 Clinical Competency Committee, must:

1156

1157 **V.A.1.d).(1)** meet with and review with each resident their
1158 documented semi-annual evaluation of performance,
1159 including progress along the specialty-specific
1160 Milestones; ^(Core)

1161

1162 **V.A.1.d).(1).(a)** The semiannual evaluation must include review,
1163 with each resident, of progress along the Milestone
1164 continuum and of the record of operative
1165 experience to ensure breadth and depth of
1166 experience and continuing growth in technical and
1167 clinical competence. ^(Core)

1168

1169 **V.A.1.d).(2)** assist residents in developing individualized learning
1170 plans to capitalize on their strengths and identify areas
1171 for growth; and, ^(Core)

- 1206 accessible for review by the resident in
 1207 accordance with institutional policy; ^(Core)
 1208
 1209 **V.A.2.a).(2).(b)** verify that the resident has demonstrated the
 1210 knowledge, skills, and behaviors necessary to
 1211 enter autonomous practice; ^(Core)
 1212
 1213 **V.A.2.a).(2).(c)** consider recommendations from the Clinical
 1214 Competency Committee; and, ^(Core)
 1215
 1216 **V.A.2.a).(2).(d)** be shared with the resident upon completion of
 1217 the program. ^(Core)
 1218
 1219 **V.A.3.** **A Clinical Competency Committee must be appointed by the**
 1220 **program director.** ^(Core)
 1221
 1222 **V.A.3.a)** **At a minimum, the Clinical Competency Committee must**
 1223 **include three members of the program faculty, at least one of**
 1224 **whom is a core faculty member.** ^(Core)
 1225
 1226 **V.A.3.a).(1)** **Additional members must be faculty members from**
 1227 **the same program or other programs, or other health**
 1228 **professionals who have extensive contact and**
 1229 **experience with the program’s residents.** ^(Core)
 1230

Background and Intent: The requirements regarding the Clinical Competency Committee do not preclude or limit a program director’s participation on the Clinical Competency Committee. The intent is to leave flexibility for each program to decide the best structure for its own circumstances, but a program should consider: its program director’s other roles as resident advocate, advisor, and confidante; the impact of the program director’s presence on the other Clinical Competency Committee members’ discussions and decisions; the size of the program faculty; and other program-relevant factors. The program director has final responsibility for resident evaluation and promotion decisions.

Program faculty may include more than the physician faculty members, such as other physicians and non-physicians who teach and evaluate the program’s residents. There may be additional members of the Clinical Competency Committee. Chief residents who have completed core residency programs in their specialty may be members of the Clinical Competency Committee.

- 1231
 1232 **V.A.3.b)** **The Clinical Competency Committee must:**
 1233
 1234 **V.A.3.b).(1)** **review all resident evaluations at least semi-annually;**
 1235 ^(Core)
 1236
 1237 **V.A.3.b).(2)** **determine each resident’s progress on achievement of**
 1238 **the specialty-specific Milestones; and,** ^(Core)
 1239

1240 **V.A.3.b).(3)** meet prior to the residents' semi-annual evaluations
1241 and advise the program director regarding each
1242 resident's progress. ^(Core)
1243

1244 **V.B. Faculty Evaluation**
1245

1246 **V.B.1.** The program must have a process to evaluate each faculty
1247 member's performance as it relates to the educational program at
1248 least annually. ^(Core)
1249

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term "faculty" may be applied to physicians within a given institution for other reasons, it is applied to residency program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the resident and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with residents desire feedback on their education, clinical care, and research. If a faculty member does not interact with residents, feedback is not required. With regard to the diverse operating environments and configurations, the residency program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the residents in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

1250
1251 **V.B.1.a)** This evaluation must include a review of the faculty member's
1252 clinical teaching abilities, engagement with the educational
1253 program, participation in faculty development related to their
1254 skills as an educator, clinical performance, professionalism,
1255 and scholarly activities. ^(Core)
1256

1257 **V.B.1.b)** This evaluation must include written, anonymous, and
1258 confidential evaluations by the residents. ^(Core)
1259

1260 **V.B.2.** Faculty members must receive feedback on their evaluations at least
1261 annually. ^(Core)
1262

1263 **V.B.3.** Results of the faculty educational evaluations should be
1264 incorporated into program-wide faculty development plans. ^(Core)
1265

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the residents' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

- 1266
1267 **V.C. Program Evaluation and Improvement**
1268
1269 **V.C.1. The program director must appoint the Program Evaluation**
1270 **Committee to conduct and document the Annual Program**
1271 **Evaluation as part of the program’s continuous improvement**
1272 **process. (Core)**
1273
1274 **V.C.1.a) The Program Evaluation Committee must be composed of at**
1275 **least two program faculty members, at least one of whom is a**
1276 **core faculty member, and at least one resident. (Core)**
1277
1278 **V.C.1.b) Program Evaluation Committee responsibilities must include:**
1279
1280 **V.C.1.b).(1) acting as an advisor to the program director, through**
1281 **program oversight; (Core)**
1282
1283 **V.C.1.b).(2) review of the program’s self-determined goals and**
1284 **progress toward meeting them; (Core)**
1285
1286 **V.C.1.b).(3) guiding ongoing program improvement, including**
1287 **development of new goals, based upon outcomes;**
1288 **and, (Core)**
1289
1290 **V.C.1.b).(4) review of the current operating environment to identify**
1291 **strengths, challenges, opportunities, and threats as**
1292 **related to the program’s mission and aims. (Core)**
1293

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of residents and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program’s progress toward achievement of its goals and aims.

- 1294
1295 **V.C.1.c) The Program Evaluation Committee should consider the**
1296 **following elements in its assessment of the program:**
1297
1298 **V.C.1.c).(1) curriculum; (Core)**
1299
1300 **V.C.1.c).(2) outcomes from prior Annual Program Evaluation(s);**
1301 **(Core)**

1401
- V.C.3.** *One goal of ACGME-accredited education is to educate physicians who seek and achieve board certification. One measure of the effectiveness of the educational program is the ultimate pass rate.*
- The program director should encourage all eligible program graduates to take the certifying examination offered by the applicable American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board.*
- V.C.3.a)** For specialties in which the ABMS member board and/or AOA certifying board offer(s) an annual written exam, in the preceding three years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that specialty. (Outcome)
- V.C.3.b)** For specialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial written exam, in the preceding six years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that specialty. (Outcome)
- V.C.3.c)** For specialties in which the ABMS member board and/or AOA certifying board offer(s) an annual oral exam, in the preceding three years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that specialty. (Outcome)
- V.C.3.d)** For specialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial oral exam, in the preceding six years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that specialty. (Outcome)
- V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program whose graduates over the time period specified in the requirement have achieved an 80 percent pass rate will have met this requirement, no matter the percentile rank of the program for pass rate in that specialty. (Outcome)

1402

Background and Intent: Setting a single standard for pass rate that works across specialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are specialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

1403

1404

V.C.3.f)

Programs must report, in ADS, board certification status annually for the cohort of board-eligible residents that graduated seven years earlier. ^(Core)

1405

1406

1407

Background and Intent: It is essential that residency programs demonstrate knowledge and skill transfer to their residents. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from residency graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

1408

1409

VI. The Learning and Working Environment

1410

Residency education must occur in the context of a learning and working environment that emphasizes the following principles:

1411

1412

1413

- ***Excellence in the safety and quality of care rendered to patients by residents today***

1414

1415

1416

- ***Excellence in the safety and quality of care rendered to patients by today's residents in their future practice***

1417

1418

1419

- ***Excellence in professionalism through faculty modeling of:***

1420

1421

- ***the effacement of self-interest in a humanistic environment that supports the professional development of physicians***

1422

1423

1424

- ***the joy of curiosity, problem-solving, intellectual rigor, and discovery***

1425

1426

1427
1428
1429

- **Commitment to the well-being of the students, residents, faculty members, and all members of the health care team**

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and residents more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and residents to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, resident education, and resident well-being. The requirements are intended to support the development of a sense of professionalism by encouraging residents to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for residents to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and resident and faculty member well-being. The requirements are intended to support programs and residents as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and residents. With this flexibility comes a responsibility for residents and faculty members to recognize the need to hand off care of a patient to another provider when a resident is too fatigued to provide safe, high quality care and for programs to ensure that residents remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare residents to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by residents who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Residents must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating residents will apply these skills to critique their future unsupervised practice and effect quality improvement measures.

1451 *It is necessary for residents and faculty members to consistently*
1452 *work in a well-coordinated manner with other health care*
1453 *professionals to achieve organizational patient safety goals.*

1454
1455 **VI.A.1.a) Patient Safety**

1456
1457 **VI.A.1.a).(1) Culture of Safety**

1458
1459 *A culture of safety requires continuous identification*
1460 *of vulnerabilities and a willingness to transparently*
1461 *deal with them. An effective organization has formal*
1462 *mechanisms to assess the knowledge, skills, and*
1463 *attitudes of its personnel toward safety in order to*
1464 *identify areas for improvement.*

1465
1466 **VI.A.1.a).(1).(a)** The program, its faculty, residents, and fellows
1467 must actively participate in patient safety
1468 systems and contribute to a culture of safety.
1469 (Core)

1470
1471 **VI.A.1.a).(1).(b)** The program must have a structure that
1472 promotes safe, interprofessional, team-based
1473 care. (Core)

1474
1475 **VI.A.1.a).(2) Education on Patient Safety**

1476
1477 Programs must provide formal educational activities
1478 that promote patient safety-related goals, tools, and
1479 techniques. (Core)

Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.

1481
1482 **VI.A.1.a).(3) Patient Safety Events**

1483
1484 *Reporting, investigation, and follow-up of adverse*
1485 *events, near misses, and unsafe conditions are pivotal*
1486 *mechanisms for improving patient safety, and are*
1487 *essential for the success of any patient safety*
1488 *program. Feedback and experiential learning are*
1489 *essential to developing true competence in the ability*
1490 *to identify causes and institute sustainable systems-*
1491 *based changes to ameliorate patient safety*
1492 *vulnerabilities.*

1493
1494 **VI.A.1.a).(3).(a)** Residents, fellows, faculty members, and other
1495 clinical staff members must:

1496
1497 **VI.A.1.a).(3).(a).(i)** know their responsibilities in reporting
1498 patient safety events at the clinical site;
1499 (Core)

1500		
1501	VI.A.1.a).(3).(a).(ii)	know how to report patient safety events, including near misses, at the clinical site; and, ^(Core)
1502		
1503		
1504		
1505	VI.A.1.a).(3).(a).(iii)	be provided with summary information of their institution's patient safety reports. ^(Core)
1506		
1507		
1508		
1509	VI.A.1.a).(3).(b)	Residents must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions. ^(Core)
1510		
1511		
1512		
1513		
1514		
1515		
1516	VI.A.1.a).(4)	Resident Education and Experience in Disclosure of Adverse Events
1517		
1518		
1519		<i>Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for residents to develop and apply.</i>
1520		
1521		
1522		
1523		
1524		
1525	VI.A.1.a).(4).(a)	All residents must receive training in how to disclose adverse events to patients and families. ^(Core)
1526		
1527		
1528		
1529	VI.A.1.a).(4).(b)	Residents should have the opportunity to participate in the disclosure of patient safety events, real or simulated. ^(Detail)

1531		
1532		
1533	VI.A.1.b)	Quality Improvement
1534		
1535	VI.A.1.b).(1)	Education in Quality Improvement
1536		
1537		<i>A cohesive model of health care includes quality-related goals, tools, and techniques that are necessary in order for health care professionals to achieve quality improvement goals.</i>
1538		
1539		
1540		
1541		
1542	VI.A.1.b).(1).(a)	Residents must receive training and experience in quality improvement processes, including an understanding of health care disparities. ^(Core)
1543		
1544		
1545		
1546	VI.A.1.b).(2)	Quality Metrics
1547		
1548		<i>Access to data is essential to prioritizing activities for care improvement and evaluating success of improvement efforts.</i>
1549		
1550		

1551		
1552	VI.A.1.b).(2).(a)	Residents and faculty members must receive data on quality metrics and benchmarks related to their patient populations. ^(Core)
1553		
1554		
1555		
1556	VI.A.1.b).(3)	Engagement in Quality Improvement Activities
1557		
1558		<i>Experiential learning is essential to developing the ability to identify and institute sustainable systems-based changes to improve patient care.</i>
1559		
1560		
1561		
1562	VI.A.1.b).(3).(a)	Residents must have the opportunity to participate in interprofessional quality improvement activities. ^(Core)
1563		
1564		
1565		
1566	VI.A.1.b).(3).(a).(i)	This should include activities aimed at reducing health care disparities. ^(Detail)
1567		
1568		
1569	VI.A.2.	Supervision and Accountability
1570		
1571	VI.A.2.a)	<i>Although the attending physician is ultimately responsible for the care of the patient, every physician shares in the responsibility and accountability for their efforts in the provision of care. Effective programs, in partnership with their Sponsoring Institutions, define, widely communicate, and monitor a structured chain of responsibility and accountability as it relates to the supervision of all patient care.</i>
1572		
1573		
1574		
1575		
1576		
1577		
1578		
1579		
1580		<i>Supervision in the setting of graduate medical education provides safe and effective care to patients; ensures each resident's development of the skills, knowledge, and attitudes required to enter the unsupervised practice of medicine; and establishes a foundation for continued professional growth.</i>
1581		
1582		
1583		
1584		
1585		
1586	VI.A.2.a).(1)	Each patient must have an identifiable and appropriately-credentialed and privileged attending physician (or licensed independent practitioner as specified by the applicable Review Committee) who is responsible and accountable for the patient's care. ^(Core)
1587		
1588		
1589		
1590		
1591		
1592		
1593	VI.A.2.a).(1).(a)	This information must be available to residents, faculty members, other members of the health care team, and patients. ^(Core)
1594		
1595		
1596		
1597	VI.A.2.a).(1).(b)	Residents and faculty members must inform each patient of their respective roles in that patient's care when providing direct patient care. ^(Core)
1598		
1599		
1600		
1601		

1602 **VI.A.2.b)** *Supervision may be exercised through a variety of methods.*
 1603 *For many aspects of patient care, the supervising physician*
 1604 *may be a more advanced resident or fellow. Other portions of*
 1605 *care provided by the resident can be adequately supervised*
 1606 *by the appropriate availability of the supervising faculty*
 1607 *member, fellow, or senior resident physician, either on site or*
 1608 *by means of telecommunication technology. Some activities*
 1609 *require the physical presence of the supervising faculty*
 1610 *member. In some circumstances, supervision may include*
 1611 *post-hoc review of resident-delivered care with feedback.*
 1612

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of resident patient interactions, education and training locations, and resident skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a resident gains more experience, even with the same patient condition or procedure. All residents have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

1613
 1614 **VI.A.2.b).(1)** **The program must demonstrate that the appropriate**
 1615 **level of supervision in place for all residents is based**
 1616 **on each resident’s level of training and ability, as well**
 1617 **as patient complexity and acuity. Supervision may be**
 1618 **exercised through a variety of methods, as appropriate**
 1619 **to the situation.** ^(Core)
 1620

1621 **VI.A.2.b).(1).(a)** Physician faculty member supervision of residents
 1622 must comply with II.B.2.h)-II.B.2.h).(2). ^(Core)
 1623

1624 **VI.A.2.b).(2)** **The program must define when physical presence of a**
 1625 **supervising physician is required.** ^(Core)
 1626

1627 **VI.A.2.c)** **Levels of Supervision**
 1628
 1629 **To promote appropriate resident supervision while providing**
 1630 **for graded authority and responsibility, the program must use**
 1631 **the following classification of supervision:** ^(Core)
 1632

1633 **VI.A.2.c).(1)** **Direct Supervision:**

1634
 1635 **VI.A.2.c).(1).(a)** **the supervising physician is physically present**
 1636 **with the resident during the key portions of the**
 1637 **patient interaction; or,** ^(Core)
 1638

1639 **VI.A.2.c).(1).(a).(i)** **PGY-1 residents must initially be**
 1640 **supervised directly, only as described in**
 1641 **VI.A.2.c).(1).(a).** ^(Core)
 1642

1643	VI.A.2.c).(1).(b)	the supervising physician and/or patient is not
1644		physically present with the resident and the
1645		supervising physician is concurrently
1646		monitoring the patient care through appropriate
1647		telecommunication technology. (Core)
1648		
1649	VI.A.2.c).(1).(b).(i)	<u>Telecommunication technology for direct</u>
1650		<u>supervision must not be used for the</u>
1651		<u>management of labor and delivery or with</u>
1652		<u>invasive procedures. (Core)</u>
1653		
1654	VI.A.2.c).(2)	Indirect Supervision: the supervising physician is not
1655		providing physical or concurrent visual or audio
1656		supervision but is immediately available to the
1657		resident for guidance and is available to provide
1658		appropriate direct supervision. (Core)
1659		
1660	VI.A.2.c).(3)	Oversight – the supervising physician is available to
1661		provide review of procedures/encounters with
1662		feedback provided after care is delivered. (Core)
1663		
1664	VI.A.2.d)	The privilege of progressive authority and responsibility,
1665		conditional independence, and a supervisory role in patient
1666		care delegated to each resident must be assigned by the
1667		program director and faculty members. (Core)
1668		
1669	VI.A.2.d).(1)	The program director must evaluate each resident’s
1670		abilities based on specific criteria, guided by the
1671		Milestones. (Core)
1672		
1673	VI.A.2.d).(2)	Faculty members functioning as supervising
1674		physicians must delegate portions of care to residents
1675		based on the needs of the patient and the skills of
1676		each resident. (Core)
1677		
1678	VI.A.2.d).(3)	Senior residents or fellows should serve in a
1679		supervisory role to junior residents in recognition of
1680		their progress toward independence, based on the
1681		needs of each patient and the skills of the individual
1682		resident or fellow. (Detail)
1683		
1684	VI.A.2.e)	Programs must set guidelines for circumstances and events
1685		in which residents must communicate with the supervising
1686		faculty member(s). (Core)
1687		
1688	VI.A.2.e).(1)	Each resident must know the limits of their scope of
1689		authority, and the circumstances under which the
1690		resident is permitted to act with conditional
1691		independence. (Outcome)
1692		

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

1693
1694 **VI.A.2.f) Faculty supervision assignments must be of sufficient**
1695 **duration to assess the knowledge and skills of each resident**
1696 **and to delegate to the resident the appropriate level of patient**
1697 **care authority and responsibility. (Core)**

1698
1699 **VI.B. Professionalism**

1700
1701 **VI.B.1. Programs, in partnership with their Sponsoring Institutions, must**
1702 **educate residents and faculty members concerning the professional**
1703 **responsibilities of physicians, including their obligation to be**
1704 **appropriately rested and fit to provide the care required by their**
1705 **patients. (Core)**

1706
1707 **VI.B.2. The learning objectives of the program must:**

1708
1709 **VI.B.2.a) be accomplished through an appropriate blend of supervised**
1710 **patient care responsibilities, clinical teaching, and didactic**
1711 **educational events; (Core)**

1712
1713 **VI.B.2.b) be accomplished without excessive reliance on residents to**
1714 **fulfill non-physician obligations; and, (Core)**

1715
Background and Intent: Routine reliance on residents to fulfill non-physician obligations increases work compression for residents and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that residents may be expected to do any of these things on occasion when the need arises, these activities should not be performed by residents routinely and must be kept to a minimum to optimize resident education.

1716
1717 **VI.B.2.c) ensure manageable patient care responsibilities. (Core)**

1718
Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression, especially at the PGY-1 level.

1719
1720 **VI.B.3. The program director, in partnership with the Sponsoring Institution,**
1721 **must provide a culture of professionalism that supports patient**
1722 **safety and personal responsibility. (Core)**

- 1723
1724 **VI.B.4. Residents and faculty members must demonstrate an understanding**
1725 **of their personal role in the:**
1726
1727 **VI.B.4.a) provision of patient- and family-centered care;** (Outcome)
1728
1729 **VI.B.4.b) safety and welfare of patients entrusted to their care,**
1730 **including the ability to report unsafe conditions and adverse**
1731 **events;** (Outcome)
1732

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the resident.

- 1733
1734 **VI.B.4.c) assurance of their fitness for work, including:** (Outcome)
1735

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and residents to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, residents, and other members of the care team to be observant, to intervene, and/or to escalate their concern about resident and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

- 1736
1737 **VI.B.4.c).(1) management of their time before, during, and after**
1738 **clinical assignments; and,** (Outcome)
1739
1740 **VI.B.4.c).(2) recognition of impairment, including from illness,**
1741 **fatigue, and substance use, in themselves, their peers,**
1742 **and other members of the health care team.** (Outcome)
1743
1744 **VI.B.4.d) commitment to lifelong learning;** (Outcome)
1745
1746 **VI.B.4.e) monitoring of their patient care performance improvement**
1747 **indicators; and,** (Outcome)
1748
1749 **VI.B.4.f) accurate reporting of clinical and educational work hours,**
1750 **patient outcomes, and clinical experience data.** (Outcome)
1751
1752 **VI.B.5. All residents and faculty members must demonstrate**
1753 **responsiveness to patient needs that supersedes self-interest. This**
1754 **includes the recognition that under certain circumstances, the best**
1755 **interests of the patient may be served by transitioning that patient's**
1756 **care to another qualified and rested provider.** (Outcome)
1757
1758 **VI.B.6. Programs, in partnership with their Sponsoring Institutions, must**
1759 **provide a professional, equitable, respectful, and civil environment**
1760 **that is free from discrimination, sexual and other forms of**
1761 **harassment, mistreatment, abuse, or coercion of students,**
1762 **residents, faculty, and staff.** (Core)
1763

1764 VI.B.7. Programs, in partnership with their Sponsoring Institutions, should
1765 have a process for education of residents and faculty regarding
1766 unprofessional behavior and a confidential process for reporting,
1767 investigating, and addressing such concerns. ^(Core)
1768

1787 *clinical learning environment models constructive behaviors, and prepares*
1788 *residents with the skills and attitudes needed to thrive throughout their*
1789 *careers.*
1790

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

1791
1792 VI.C.1. The responsibility of the program, in partnership with the
1793 Sponsoring Institution, to address well-being must include:
1794

1795 VI.C.1.a) efforts to enhance the meaning that each resident finds in the
1796 experience of being a physician, including protecting time
1797 with patients, minimizing non-physician obligations,
1798 providing administrative support, promoting progressive
1799 autonomy and flexibility, and enhancing professional
1800 relationships; ^(Core)

- 1801
1802 VI.C.1.b) attention to scheduling, work intensity, and work
1803 compression that impacts resident well-being; ^(Core)
1804
1805 VI.C.1.c) evaluating workplace safety data and addressing the safety of
1806 residents and faculty members; ^(Core)
1807

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance resident and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

- 1808
1809 VI.C.1.d) policies and programs that encourage optimal resident and
1810 faculty member well-being; and, ^(Core)
1811

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

- 1812
1813 VI.C.1.d).(1) Residents must be given the opportunity to attend
1814 medical, mental health, and dental care appointments,
1815 including those scheduled during their working hours.
1816 ^(Core)
1817

Background and Intent: The intent of this requirement is to ensure that residents have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Residents must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

- 1818
1819 VI.C.1.e) attention to resident and faculty member burnout,
1820 depression, and substance use disorders. The program, in
1821 partnership with its Sponsoring Institution, must educate
1822 faculty members and residents in identification of the
1823 symptoms of burnout, depression, and substance use
1824 disorders, including means to assist those who experience
1825 these conditions. Residents and faculty members must also
1826 be educated to recognize those symptoms in themselves and
1827 how to seek appropriate care. The program, in partnership
1828 with its Sponsoring Institution, must: ^(Core)
1829

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance use disorders. Materials and more information are available on the Physician Well-being section of the ACGME website (<http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being>).

1830

1831 VI.C.1.e).(1) encourage residents and faculty members to alert the
1832 program director or other designated personnel or
1833 programs when they are concerned that another
1834 resident, fellow, or faculty member may be displaying
1835 signs of burnout, depression, a substance use
1836 disorder, suicidal ideation, or potential for violence;
1837 (Core)
1838

Background and Intent: Individuals experiencing burnout, depression, a substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that residents and faculty members are able to report their concerns when another resident or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Residents and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

1839 VI.C.1.e).(2) provide access to appropriate tools for self-screening;
1840 and, (Core)
1841

1842 VI.C.1.e).(3) provide access to confidential, affordable mental
1843 health assessment, counseling, and treatment,
1844 including access to urgent and emergent care 24
1845 hours a day, seven days a week. (Core)
1846
1847

Background and Intent: The intent of this requirement is to ensure that residents have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

1848 VI.C.2. There are circumstances in which residents may be unable to attend
1849 work, including but not limited to fatigue, illness, family
1850 emergencies, and parental leave. Each program must allow an
1851 appropriate length of absence for residents unable to perform their
1852 patient care responsibilities. (Core)
1853
1854

- 1855 VI.C.2.a) The program must have policies and procedures in place to
 1856 ensure coverage of patient care. ^(Core)
 1857
 1858 VI.C.2.b) These policies must be implemented without fear of negative
 1859 consequences for the resident who is or was unable to
 1860 provide the clinical work. ^(Core)
 1861

Background and Intent: Residents may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

- 1862
 1863 VI.D. **Fatigue Mitigation**
 1864
 1865 VI.D.1. **Programs must:**
 1866
 1867 VI.D.1.a) educate all faculty members and residents to recognize the
 1868 signs of fatigue and sleep deprivation; ^(Core)
 1869
 1870 VI.D.1.b) educate all faculty members and residents in alertness
 1871 management and fatigue mitigation processes; and, ^(Core)
 1872
 1873 VI.D.1.c) encourage residents to use fatigue mitigation processes to
 1874 manage the potential negative effects of fatigue on patient
 1875 care and learning. ^(Detail)
 1876

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares residents for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

- 1877
 1878 VI.D.2. Each program must ensure continuity of patient care, consistent
 1879 with the program's policies and procedures referenced in VI.C.2–
 1880 VI.C.2.b), in the event that a resident may be unable to perform their
 1881 patient care responsibilities due to excessive fatigue. ^(Core)
 1882
 1883 VI.D.3. The program, in partnership with its Sponsoring Institution, must
 1884 ensure adequate sleep facilities and safe transportation options for
 1885 residents who may be too fatigued to safely return home. ^(Core)

 1888
 1889 **VI.E.1. Clinical Responsibilities**
 1890
 1891 **The clinical responsibilities for each resident must be based on PGY**
 1892 **level, patient safety, resident ability, severity and complexity of**
 1893 **patient illness/condition, and available support services. (Core)**
 1894

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on residents. Faculty members and program directors need to make sure residents function in an environment that has safe patient care and a sense of resident well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor resident workload. Workload should be distributed among the resident team and interdisciplinary teams to minimize work compression.

1895
 1896 **VI.E.2. Teamwork**
 1897
 1898 **Residents must care for patients in an environment that maximizes**
 1899 **communication. This must include the opportunity to work as a**

1933
1934

Programs, in partnership with their Sponsoring Institutions, must design an effective program structure that is configured to provide residents with educational and clinical experience opportunities, as well as reasonable opportunities for rest and personal activities.

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that residents’ duty to “clock out” on time superseded their duty to their patients.

1937
1938
1939
1940
1941
1942

VI.F.1. Maximum Hours of Clinical and Educational Work per Week

Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting. ^(Core)

Background and Intent: Programs and residents have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing residents to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a resident may work in excess of 80 hours in a given week, all programs and residents utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule residents to work 80 hours per week and still permit residents to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that residents are scheduled to work fewer than 80 hours per week, which would allow residents to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for residents to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that residents are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work residents choose to do from home. The requirement provides flexibility for residents to do this while ensuring that the time spent by residents completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Resident decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the resident's supervisor. In such circumstances, residents should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a resident spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the resident need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by residents. The new requirements are not an attempt to micromanage this process. Residents are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual resident. Programs will need to factor in time residents are spending on clinical work at home when schedules are developed to ensure that residents are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that residents report their time from home and that schedules are structured to ensure that residents are not working in excess of 80 hours per week, averaged over four weeks.

PGY-1 and PGY-2 Residents

PGY-1 and PGY-2 residents may not have the experience to make decisions about when it is appropriate to utilize flexibility or may feel pressured to use it when unnecessary. Programs are responsible for ensuring that residents are provided with manageable workloads that can be accomplished during scheduled work hours. This includes ensuring that a resident's assigned direct patient load is manageable, that residents have appropriate support from their clinical teams, and that residents are not overburdened with clerical work and/or other non-physician duties.

1950

VI.F.2. Mandatory Time Free of Clinical Work and Education

VI.F.2.a) The program must design an effective program structure that is configured to provide residents with educational opportunities, as well as reasonable opportunities for rest and personal well-being. ^(Core)

1951 VI.F.2.b) Residents should have eight hours off between scheduled
1952 clinical work and education periods. ^(Detail)

1953
1954 VI.F.2.b).(1) There may be circumstances when residents choose
1955 to stay to care for their patients or return to the
1956 hospital with fewer than eight hours free of clinical
1957 experience and education. This must occur within the
1958 context of the 80-hour and the one-day-off-in-seven
1959 requirements. ^(Detail)
1960

Background and Intent: While it is expected that resident schedules will be structured to ensure that residents are provided with a minimum of eight hours off between scheduled work periods, it is recognized that residents may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for residents to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1961
1962 VI.F.2.c) Residents must have at least 14 hours free of clinical work
1963 and education after 24 hours of in-house call. ^(Core)
1964

Background and Intent: Residents have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, residents are encouraged to prioritize sleep over other discretionary activities.

1965
1966 VI.F.2.d) Residents must be scheduled for a minimum of one day in
1967 seven free of clinical work and required education (when
1968 averaged over four weeks). At-home call cannot be assigned
1969 on these free days. ^(Core)
1970

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and resident needs. It is strongly recommended that residents' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some residents may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide residents with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes resident well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

1971
1972 VI.F.3. Maximum Clinical Work and Education Period Length
1973

1974
1975
1976
1977

VI.F.3.a)

Clinical and educational work periods for residents must not exceed 24 hours of continuous scheduled clinical assignments. (Core)

Background and Intent: The Task Force examined the question of “consecutive time on task.” It examined the research supporting the current limit of 16 consecutive hours of time on task for PGY-1 residents; the range of often conflicting impacts of this requirement on patient safety, clinical care, and continuity of care by resident teams; and resident learning found in the literature. Finally, it heard a uniform request by the specialty societies, certifying boards, membership societies and organizations, and senior residents to repeal this requirement. It heard conflicting perspectives from resident unions, a medical student association, and a number of public advocacy groups, some arguing for continuation of the requirement, others arguing for extension of the requirement to all residents.

Of greatest concern to the Task Force were the observations of disruption of team care and patient care continuity brought about with residents beyond the PGY-1 level adhering to differing requirements. The graduate medical education community uniformly requested that the Task Force remove this requirement. The most frequently-cited reason for this request was the complete disruption of the team, separating the PGY-1 from supervisory faculty members and residents who were best able to judge the ability of the resident and customize the supervision of patient care for each PGY-1. Cited nearly as frequently was the separation of the PGY-1 from the team, delaying maturation of clinical skills, and threatening to create a “shift” mentality in disciplines where overnight availability to patients is essential in delivery of care.

The Task Force examined the impact of the request to consider 16-consecutive-hour limits for all residents, and rejected the proposition. It found that model incompatible with the actual practice of medicine and surgery in many specialties, excessively limiting in configuration of clinical services in many disciplines, and potentially disruptive of the inculcation of responsibility and professional commitment to altruism and placing the needs of patients above those of the physician.

After careful consideration of the information available, the testimony and position of all parties submitting information, and presentations to the Task Force, the Task Force removed the 16-hour-consecutive-time-on-task requirement for PGY-1 residents. It remains crucial that programs ensure that PGY-1 residents are supervised in compliance with the applicable Program Requirements, and that resident well-being is prioritized as described in Section VI.C. of these requirements.

VI.F.3.a).(1)

Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or resident education. (Core)

VI.F.3.a).(1).(a)

Additional patient care responsibilities must not be assigned to a resident during this time. (Core)

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the resident continue to function as

a member of the team in an environment where other members of the team can assess resident fatigue, and that supervision for post-call residents is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

- VI.F.4. Clinical and Educational Work Hour Exceptions**
- VI.F.4.a)** In rare circumstances, after handing off all other responsibilities, a resident, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:
- VI.F.4.a).(1)** to continue to provide care to a single severely ill or unstable patient; ^(Detail)
- VI.F.4.a).(2)** humanistic attention to the needs of a patient or family; or, ^(Detail)
- VI.F.4.a).(3)** to attend unique educational events. ^(Detail)
- VI.F.4.b)** These additional hours of care or education will be counted toward the 80-hour weekly limit. ^(Detail)

Background and Intent: This requirement is intended to provide residents with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a resident may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Residents must not be required to stay. Programs allowing residents to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the resident and that residents are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

- VI.F.4.c)** A Review Committee may grant rotation-specific exceptions for up to 10 percent or a maximum of 88 clinical and educational work hours to individual programs based on a sound educational rationale.
- However, the Review Committee for Obstetrics and Gynecology does not allow requests for exceptions to the 80-hour per week limitation on resident duty hours.
- VI.F.5. Moonlighting**
- VI.F.5.a)** Moonlighting must not interfere with the ability of the resident to achieve the goals and objectives of the educational program, and must not interfere with the resident's fitness for work nor compromise patient safety. ^(Core)

- 2023 VI.F.5.b) Time spent by residents in internal and external moonlighting
 2024 (as defined in the ACGME Glossary of Terms) must be
 2025 counted toward the 80-hour maximum weekly limit. ^(Core)
 2026
 2027 VI.F.5.c) PGY-1 residents are not permitted to moonlight. ^(Core)
 2028

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

- 2029
 2030 VI.F.6. In-House Night Float
 2031
 2032 Night float must occur within the context of the 80-hour and one-
 2033 day-off-in-seven requirements. ^(Core)
 2034

Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

- 2035
 2036 VI.F.7. Maximum In-House On-Call Frequency
 2037
 2038 Residents must be scheduled for in-house call no more frequently
 2039 than every third night (when averaged over a four-week period). ^(Core)
 2040 VI.F.8. At-Home Call

- 2041
 2042 VI.F.8.a) Time spent on patient care activities by residents on at-home
 2043 call must count toward the 80-hour maximum weekly limit.
 2044 The frequency of at-home call is not subject to the every-
 2045 third-night limitation, but must satisfy the requirement for one
 2046 day in seven free of clinical work and education, when
 2047 averaged over four weeks. ^(Core)
 2048

- 2049 VI.F.8.a).(1) At-home call must not be so frequent or taxing as to
 2050 preclude rest or reasonable personal time for each
 2051 resident. ^(Core)
 2052

- 2053 VI.F.8.b) Residents are permitted to return to the hospital while on at-
 2054 home call to provide direct care for new or established
 2055 patients. These hours of inpatient patient care must be
 2056 included in the 80-hour maximum weekly limit. ^(Detail)
 2057

Background and Intent: This requirement has been modified to specify that clinical work done from home when a resident is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time residents devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in residents routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of residency/fellowship programs, Review Committees will look at the overall impact of at-home call on resident/fellow rest and personal time.

***Core Requirements:** Statements that define structure, resource, or process elements essential to every graduate medical educational program.

†Detail Requirements: Statements that describe a specific structure, resource, or process, for achieving compliance with a Core Requirement. Programs and sponsoring institutions in substantial compliance with the Outcome Requirements may utilize alternative or innovative approaches to meet Core Requirements.

‡Outcome Requirements: Statements that specify expected measurable or observable attributes (knowledge, abilities, skills, or attitudes) of residents or fellows at key stages of their graduate medical education.

Osteopathic Recognition

For programs with or applying for Osteopathic Recognition, the Osteopathic Recognition Requirements also apply (www.acgme.org/OsteopathicRecognition).
