<b>VI.F. Clinical Experience and Education.....</b>	<b>47</b>

1                   **ACGME Program Requirements for Graduate Medical Education**  
2                   **in Ophthalmic Plastic and Reconstructive Surgery**

3  
4                   **Common Program Requirements (Fellowship) are in BOLD**  
5

6                   Where applicable, text in italics describes the underlying philosophy of the requirements in that  
7                   section. These philosophic statements are not program requirements and are therefore not  
8                   citable.  
9

**Background and Intent:** These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

10                  **Introduction**

11                  **Int.A.**     *Fellowship is advanced graduate medical education beyond a core residency program for physicians who desire to enter more specialized practice. Fellowship-trained physicians serve the public by providing subspecialty care, which may also include core medical care, acting as a community resource for expertise in their field, creating and integrating new knowledge into practice, and educating future generations of physicians. Graduate medical education values the strength that a diverse group of physicians brings to medical care.*

12  
13                  *Fellows who have completed residency are able to practice independently in their core specialty. The prior medical experience and expertise of fellows distinguish them from physicians entering into residency training. The fellow's care of patients within the subspecialty is undertaken with appropriate faculty supervision and conditional independence. Faculty members serve as role models of excellence, compassion, professionalism, and scholarship. The fellow develops deep medical knowledge, patient care skills, and expertise applicable to their focused area of practice. Fellowship is an intensive program of subspecialty clinical and didactic education that focuses on the multidisciplinary care of patients. Fellowship education is often physically, emotionally, and intellectually demanding, and occurs in a variety of clinical learning environments committed to graduate medical education and the well-being of patients, residents, fellows, faculty members, students, and all members of the health care team.*

14  
15  
16  
17  
18  
19  
20  
21  
22                  *In addition to clinical education, many fellowship programs advance fellows' skills as physician-scientists. While the ability to create new knowledge within medicine is not exclusive to fellowship-educated physicians, the fellowship experience expands a physician's abilities to pursue hypothesis-driven scientific inquiry that results in contributions to the medical literature and patient care. Beyond the clinical subspecialty expertise achieved, fellows develop mentored relationships built on an infrastructure that promotes collaborative research.*

23                  **Int.B.**     **Definition of Subspecialty**

48  
49       The goal of fellowship education in ophthalmic plastic and reconstructive surgery  
50       is to complement the basic knowledge gained in the ophthalmology residency  
51       program and to provide greater exposure to a variety of diseases and ophthalmic  
52       plastic and reconstructive procedures.  
53

54       **Int.C. Length of Educational Program**

55  
56       The length of the educational program must be 24 months of full-time education.  
57       (Core)\*  
58

59       **I. Oversight**

60       **I.A. Sponsoring Institution**

61       *The Sponsoring Institution is the organization or entity that assumes the  
62       ultimate financial and academic responsibility for a program of graduate  
63       medical education consistent with the ACGME Institutional Requirements.*

64       *When the Sponsoring Institution is not a rotation site for the program, the  
65       most commonly utilized site of clinical activity for the program is the  
66       primary clinical site.*

67  
68  
69  
70       **Background and Intent:** Participating sites will reflect the health care needs of the  
71       community and the educational needs of the fellows. A wide variety of organizations  
72       may provide a robust educational experience and, thus, Sponsoring Institutions and  
73       participating sites may encompass inpatient and outpatient settings including, but not  
74       limited to a university, a medical school, a teaching hospital, a nursing home, a  
75       school of public health, a health department, a public health agency, an organized  
76       health care delivery system, a medical examiner's office, an educational consortium, a  
77       teaching health center, a physician group practice, federally qualified health center, or  
78       an educational foundation.

79  
80       **I.A.1. The program must be sponsored by one ACGME-accredited  
81       Sponsoring Institution. (Core)**

82       **I.B. Participating Sites**

83       *A participating site is an organization providing educational experiences or  
84       educational assignments/rotations for fellows.*

85       **I.B.1. The program, with approval of its Sponsoring Institution, must  
86       designate a primary clinical site. (Core)**

87       **I.B.2. There must be a program letter of agreement (PLA) between the  
88       program and each participating site that governs the relationship  
89       between the program and the participating site providing a required  
89       assignment. (Core)**

90       **I.B.2.a) The PLA must:**

- 90 I.B.2.a).(1) be renewed at least every 10 years; and, (Core)  
91  
92 I.B.2.a).(2) be approved by the designated institutional official  
93 (DIO). (Core)  
94  
95 I.B.3. The program must monitor the clinical learning and working  
96 environment at all participating sites. (Core)  
97  
98 I.B.3.a) At each participating site there must be one faculty member,  
99 designated by the program director, who is accountable for  
100 fellow education for that site, in collaboration with the  
101 program director. (Core)  
102

**Background and Intent:** While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for fellows
- Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern fellow education during the assignment

- 103  
104 I.B.4. The program director must submit any additions or deletions of  
105 participating sites routinely providing an educational experience,  
106 required for all fellows, of one month full time equivalent (FTE) or  
107 more through the ACGME's Accreditation Data System (ADS). (Core)  
108  
109 I.C. The program, in partnership with its Sponsoring Institution, must engage in  
110 practices that focus on mission-driven, ongoing, systematic recruitment  
111 and retention of a diverse and inclusive workforce of residents (if present),  
112 fellows, faculty members, senior administrative staff members, and other  
113 relevant members of its academic community. (Core)  
114

**Background and Intent:** It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must

include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

115

116       **I.D.           Resources**

117

118       **I.D.1.           The program, in partnership with its Sponsoring Institution, must**  
119           **ensure the availability of adequate resources for fellow education.**  
120           (Core)

121

122       I.D.1.a)           Clinic

123

124           The outpatient area of each participating site must have a  
125           minimum of one fully equipped examining room for each fellow in  
126           the clinic. There must be access to current diagnostic equipment.  
127           (Core)

128

129       I.D.1.b)           Operating Facilities

130

131           The surgical facilities at each participating site must include at  
132           least one operating facility appropriately equipped for ophthalmic  
133           plastic and reconstructive surgery. (Core)

134

135       I.D.1.c)           Inpatient Facilities

136

137           There must be inpatient facilities with access to sufficient space  
138           and beds for patient care. An eye examination room with a slit  
139           lamp should be easily accessible to fellows. (Core)

140

141       **I.D.2.           The program, in partnership with its Sponsoring Institution, must**  
142           **ensure healthy and safe learning and working environments that**  
143           **promote fellow well-being and provide for:** (Core)

144

145       I.D.2.a)           access to food while on duty; (Core)

146

147       I.D.2.b)           safe, quiet, clean, and private sleep/rest facilities available  
148           and accessible for fellows with proximity appropriate for safe  
149           patient care; (Core)

150

**Background and Intent:** Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

151

152       I.D.2.c)           clean and private facilities for lactation that have refrigeration  
153           capabilities, with proximity appropriate for safe patient care;  
154           (Core)

**Background and Intent:** Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d.(1).

157 I.D.2.d) security and safety measures appropriate to the participating  
 158 site; and, <sup>(Core)</sup>

160 I.D.2.e) accommodations for fellows with disabilities consistent with  
 161 the Sponsoring Institution's policy. <sup>(Core)</sup>

163 I.D.3. Fellows must have ready access to subspecialty-specific and other  
 164 appropriate reference material in print or electronic format. This  
 165 must include access to electronic medical literature databases with  
 166 full text capabilities. <sup>(Core)</sup>

168 I.D.4. The program's educational and clinical resources must be adequate  
 169 to support the number of fellows appointed to the program. <sup>(Core)</sup>

171 I.E. *A fellowship program usually occurs in the context of many learners and  
 172 other care providers and limited clinical resources. It should be structured  
 173 to optimize education for all learners present.*

175 I.E.1. Fellows should contribute to the education of residents in core  
 176 programs, if present. <sup>(Core)</sup>

**Background and Intent:** The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

## II. Personnel

### II.A. Program Director

181 II.A.1. There must be one faculty member appointed as program director  
 182 with authority and accountability for the overall program, including  
 183 compliance with all applicable program requirements. <sup>(Core)</sup>

185 II.A.1.a) The Sponsoring Institution's Graduate Medical Education  
 186 Committee (GMEC) must approve a change in program  
 187 director. <sup>(Core)</sup>

191	II.A.1.b)	<b>Final approval of the program director resides with the Review Committee.</b> <small>(Core)</small>
192	<b>Background and Intent:</b> While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and have overall responsibility for the program. The program director's nomination is reviewed and approved by the GMEC. Final approval of the program director resides with the applicable ACGME Review Committee.	
193		
<b>Background and Intent:</b> To achieve successful graduate medical education, individuals serving as education and administrative leaders of fellowship programs, as well as those significantly engaged in the education, supervision, evaluation, and mentoring of fellows, must have sufficient dedicated professional time to perform the vital activities required to sustain an accredited program.		
194	II.A.2.	<b>The program director and, as applicable, the program's leadership team, must be provided with support adequate for administration of the program based upon its size and configuration.</b> <small>(Core)</small>
195	II.A.2.a)	<u>At a minimum, the program director must be provided with support equal to a dedicated minimum of 0.1 FTE for administration of the program.</u> <small>(Core)</small>
196		
197		
198		
199		
200		
201		
202		
203		
204		
205		
206		
<b>The ultimate outcome of graduate medical education is excellence in fellow education and patient care.</b>		
<b>The program director and, as applicable, the program leadership team, devote a portion of their professional effort to the oversight and management of the fellowship program, as defined in II.A.4.-II.A.4.a).(16). Both provision of support for the time required for the leadership effort and flexibility regarding how this support is provided are important. Programs, in partnership with their Sponsoring Institutions, may provide support for this time in a variety of ways. Examples of support may include, but are not limited to, salary support, supplemental compensation, educational value units, or relief of time from other professional duties.</b>		
<b>Program directors and, as applicable, members of the program leadership team, who are new to the role may need to devote additional time to program oversight and management initially as they learn and become proficient in administering the program. It is suggested that during this initial period the support described above be increased as needed.</b>		
207	II.A.3.	<b>Qualifications of the program director:</b>
208	II.A.3.a)	<b>must include subspecialty expertise and qualifications acceptable to the Review Committee;</b> <small>(Core)</small>
209		
210		
211		
212		

213 II.A.3.b) must include current certification in the specialty by the  
214 American Board of Ophthalmology or by the American  
215 Osteopathic Board of Ophthalmology and Otolaryngology –  
216 Head and Neck Surgery, or subspecialty qualifications that are  
217 acceptable to the Review Committee; <sup>(Core)</sup>  
218

219 [Note that while the Common Program Requirements deem  
220 certification by a member board of the American Board of Medical  
221 Specialties (ABMS) or a certifying board of the American  
222 Osteopathic Association (AOA) acceptable, there is no ABMS or  
223 AOA board that offers certification in this subspecialty]  
224

225 II.A.3.c) must include completion of an ophthalmic plastic and  
226 reconstructive surgery fellowship; <sup>(Core)</sup>  
227

228 II.A.3.c).(1) If the program director completed a one-year ophthalmic  
229 plastic and reconstructive surgery fellowship, there must  
230 be a core faculty member who completed a two-year  
231 ophthalmic plastic and reconstructive surgery fellowship, or  
232 have qualifications that are acceptable to the Review  
233 Committee. <sup>(Core)</sup>  
234

235 II.A.3.d) must include at least three years clinical experience in ophthalmic  
236 plastic and reconstructive surgery following completion of an  
237 ophthalmic plastic and reconstructive surgery fellowship; <sup>(Core)</sup>  
238

239 II.A.3.e) must include clinical practice consisting predominantly of  
240 ophthalmic plastic and reconstructive surgery; and, <sup>(Core)</sup>  
241

242 II.A.3.f) must include engagement in ongoing research in the area of  
243 ophthalmic plastic and reconstructive surgery as demonstrated by  
244 regular publications in peer-reviewed journals and/or  
245 presentations of research material at national meetings. <sup>(Core)</sup>  
246

#### 247 II.A.4. Program Director Responsibilities

249 The program director must have responsibility, authority, and  
250 accountability for: administration and operations; teaching and  
251 scholarly activity; fellow recruitment and selection, evaluation, and  
252 promotion of fellows, and disciplinary action; supervision of fellows;  
253 and fellow education in the context of patient care. <sup>(Core)</sup>  
254

255 II.A.4.a) The program director must:

256 II.A.4.a).(1) be a role model of professionalism; <sup>(Core)</sup>  
257  
258

**Background and Intent:** The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality

patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

259  
260  
261  
262  
263  
264

- II.A.4.a).(2) design and conduct the program in a fashion consistent with the needs of the community, the mission(s) of the Sponsoring Institution, and the mission(s) of the program; <sup>(Core)</sup>

**Background and Intent:** The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

265  
266  
267  
268  
269

- II.A.4.a).(3) administer and maintain a learning environment conducive to educating the fellows in each of the ACGME Competency domains; <sup>(Core)</sup>

**Background and Intent:** The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

270  
271  
272  
273  
274  
275  
276  
277  
278  
279  
280  
281  
282  
283  
284  
285  
286  
287

- II.A.4.a).(4) develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the fellowship program education and at least annually thereafter, as outlined in V.B.; <sup>(Core)</sup>

- II.A.4.a).(5) have the authority to approve program faculty members for participation in the fellowship program education at all sites; <sup>(Core)</sup>

- II.A.4.a).(6) have the authority to remove program faculty members from participation in the fellowship program education at all sites; <sup>(Core)</sup>

- II.A.4.a).(7) have the authority to remove fellows from supervising interactions and/or learning environments that do not meet the standards of the program; <sup>(Core)</sup>

**Background and Intent:** The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

**There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.**

- II.A.4.a).(8) submit accurate and complete information required and requested by the DIO, GMEC, and ACGME; (Core)
  - II.A.4.a).(9) provide applicants who are offered an interview with information related to the applicant's eligibility for the relevant subspecialty board examination(s); (Core)
  - II.A.4.a).(10) provide a learning and working environment in which fellows have the opportunity to raise concerns and provide feedback in a confidential manner as appropriate, without fear of intimidation or retaliation; (Core)
  - II.A.4.a).(11) ensure the program's compliance with the Sponsoring Institution's policies and procedures related to grievances and due process; (Core)
  - II.A.4.a).(12) ensure the program's compliance with the Sponsoring Institution's policies and procedures for due process when action is taken to suspend or dismiss, not to promote, or not to renew the appointment of a fellow; (Core)

**Background and Intent:** A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

- II.A.4.a).(13)** ensure the program's compliance with the Sponsoring Institution's policies and procedures on employment and non-discrimination; <sup>(Core)</sup>
  - II.A.4.a).(13).a)** Fellows must not be required to sign a non-competition guarantee or restrictive covenant. <sup>(Core)</sup>
  - II.A.4.a).(14)** document verification of program completion for all graduating fellows within 30 days; <sup>(Core)</sup>
  - II.A.4.a).(15)** provide verification of an individual fellow's completion upon the fellow's request, within 30 days; and, <sup>(Core)</sup>

**Background and Intent:** Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who

have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

328  
329 II.A.4.a).(16) obtain review and approval of the Sponsoring  
330 Institution's DIO before submitting information or  
331 requests to the ACGME, as required in the Institutional  
332 Requirements and outlined in the ACGME Program  
333 Director's Guide to the Common Program  
334 Requirements. <sup>(Core)</sup>

335  
336 II.B. Faculty

338 *Faculty members are a foundational element of graduate medical education – faculty members teach fellows how to care for patients. Faculty members provide an important bridge allowing fellows to grow and become practice ready, ensuring that patients receive the highest quality of care. They are role models for future generations of physicians by demonstrating compassion, commitment to excellence in teaching and patient care, professionalism, and a dedication to lifelong learning. Faculty members experience the pride and joy of fostering the growth and development of future colleagues. The care they provide is enhanced by the opportunity to teach. By employing a scholarly approach to patient care, faculty members, through the graduate medical education system, improve the health of the individual and the population.*

351 *Faculty members ensure that patients receive the level of care expected from a specialist in the field. They recognize and respond to the needs of the patients, fellows, community, and institution. Faculty members provide appropriate levels of supervision to promote patient safety. Faculty members create an effective learning environment by acting in a professional manner and attending to the well-being of the fellows and themselves.*

Background and Intent: "Faculty" refers to the entire teaching force responsible for educating fellows. The term "faculty," including "core faculty," does not imply or require an academic appointment.

359  
360 II.B.1. For each participating site, there must be a sufficient number of  
361 faculty members with competence to instruct and supervise all  
362 fellows at that location. <sup>(Core)</sup>

363  
364 II.B.2. Faculty members must:

365  
366 II.B.2.a) be role models of professionalism; <sup>(Core)</sup>

367  
368 II.B.2.b) demonstrate commitment to the delivery of safe, quality,  
369 cost-effective, patient-centered care; <sup>(Core)</sup>

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed

during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

- II.B.2.c) demonstrate a strong interest in the education of fellows; <sup>(Core)</sup>
  - II.B.2.d) devote sufficient time to the educational program to fulfill their supervisory and teaching responsibilities; <sup>(Core)</sup>
  - II.B.2.e) administer and maintain an educational environment conducive to educating fellows; <sup>(Core)</sup>
  - II.B.2.f) regularly participate in organized clinical discussions, rounds, journal clubs, and conferences; and, <sup>(Core)</sup>
  - II.B.2.g) pursue faculty development designed to enhance their skills at least annually. <sup>(Core)</sup>

**Background and Intent:** Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

### **II.B.3. Faculty Qualifications**

- II.B.3.a)** **Faculty members must have appropriate qualifications in their field and hold appropriate institutional appointments.**  
**(Core)**

**II.B.3.b)** **Subspecialty physician faculty members must:**

**II.B.3.b).(1)** **have current certification in the specialty by the American Board of Ophthalmology or the American Osteopathic Board of Ophthalmology and Otolaryngology – Head and Neck Surgery, or possess qualifications judged acceptable to the Review Committee.**  
**(Core)**

[Note that while the Common Program Requirements deem certification by a member board of the American Board of Medical Specialties (ABMS) or a certifying board of the American Osteopathic Association (AOA) acceptable, there is no ABMS or AOA board that offers certification in this subspecialty]

**II.B.3.b).(2)** Faculty members in ophthalmic plastic and reconstructive surgery should have completed an ophthalmic plastic and reconstructive surgery fellowship; they may have part-time or voluntary faculty appointments.  
**(Detail)†**

412		
413	II.B.3.c)	<b>Any non-physician faculty members who participate in fellowship program education must be approved by the program director.</b> <sup>(Core)</sup>
414		
415		
416		
417		
418	II.B.3.d)	<b>Any other specialty physician faculty members must have current certification in their specialty by the appropriate American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board, or possess qualifications judged acceptable to the Review Committee.</b> <sup>(Core)</sup>
419		
420		
421		
422		
423		
424		
425	II.B.3.d).(1)	There should be designated faculty members from the specialties of otolaryngology, procedural dermatology, craniofacial surgery, plastic surgery, neuroradiology, ocular pathology, and neurology to supervise rotations in these specialties. <sup>(Detail)</sup>
426		
427		
428		
429		
430		
431	II.B.4.	<b>Core Faculty</b>
432		
433		<b>Core faculty members must have a significant role in the education and supervision of fellows and must devote a significant portion of their entire effort to fellow education and/or administration, and must, as a component of their activities, teach, evaluate, and provide formative feedback to fellows.</b> <sup>(Core)</sup>
434		
435		
436		
437		
438		
439		
		<b>Background and Intent:</b> Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum, mentoring fellows, and assessing fellows' progress toward achievement of competence in and the independent practice of the specialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program. Core faculty members may also be selected for their specific expertise and unique contribution to the program. Core faculty members are engaged in a broad range of activities, which may vary across programs and specialties. Core faculty members provide clinical teaching and supervision of fellows, and also participate in non-clinical activities related to fellow education and program administration. Examples of these non-clinical activities include, but are not limited to, interviewing and selecting fellow applicants, providing didactic instruction, mentoring fellows, simulation exercises, completing the annual ACGME Faculty Survey, and participating on the program's Clinical Competency Committee, Program Evaluation Committee, and other GME committees.

- 440 II.B.4.a) **Core faculty members must be designated by the program**  
441 **director. (Core)**

442

443 II.B.4.b) **Core faculty members must complete the annual ACGME**  
444 **Faculty Survey. (Core)**

445

446 II.B.4.c) In addition to the program director, there must be at least one  
447 ophthalmic plastic and reconstructive surgery fellowship-educated  
448 core faculty member. (Core)

449

450 II.C. **Program Coordinator**

451

452 II.C.1. **There must be a program coordinator. (Core)**

453

454 II.C.2. **The program coordinator must be provided with dedicated time and**  
455 **support adequate for administration of the program based upon its**  
456 **size and configuration. (Core)**

457

458 II.C.2.a) **The program coordinator must be provided with support equal to a**  
459 **dedicated minimum of 0.2 FTE for administration of the program.**  
460 **(Core)**

461

**Background and Intent:** The requirement does not address the source of funding required to provide the specified salary support.

**Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as otherwise titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison and facilitator between the learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.**

The program coordinator is a key member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management appropriate to the complexity of the program. Program coordinators are expected to develop in-depth knowledge of the ACGME and Program Requirements, including policies and procedures. Program coordinators assist the program director in meeting accreditation requirements, educational programming, and support of fellows.

**Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator: one coordinator may support more than one program.**

- 462  
463      **II.D.      Other Program Personnel**  
464  
465      The program, in partnership with its Sponsoring Institution, must jointly  
466      ensure the availability of necessary personnel for the effective  
467      administration of the program. <sup>(Core)</sup>  
468

**Background and Intent:** Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

469  
470

### III. Fellow Appointments

471  
472

#### III.A. Eligibility Criteria

473  
474

##### III.A.1. Eligibility Requirements – Fellowship Programs

475  
476

All required clinical education for entry into ACGME-accredited fellowship programs must be completed in an ACGME-accredited residency program, an AOA-approved residency program, a program with ACGME International (ACGME-I) Advanced Specialty Accreditation, or a Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of Canada (CFPC)-accredited residency program located in Canada.

477  
478  
479  
480  
481  
482  
483  
484

(Core)

**Background and Intent:** Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

485  
486

III.A.1.a) Fellowship programs must receive verification of each entering fellow's level of competence in the required field, upon matriculation, using ACGME, ACGME-I, or CanMEDS Milestones evaluations from the core residency program. <sup>(Core)</sup>

487  
488  
489  
490

III.A.1.b) Fellows entering ophthalmic plastic and reconstructive surgery fellowships must have satisfactorily completed an ophthalmology residency program that satisfies the requirements in III.A.1. <sup>(Core)</sup>

491  
492  
493  
494

#### III.A.1.c) Fellow Eligibility Exception

495  
496  
497  
498  
499

The Review Committee for Ophthalmology will allow the following exception to the fellowship eligibility requirements:

500  
501  
502  
503  
504  
505  
506

III.A.1.c).(1) An ACGME-accredited fellowship program may accept an exceptionally qualified international graduate applicant who does not satisfy the eligibility requirements listed in III.A.1., but who does meet all of the following additional qualifications and conditions: <sup>(Core)</sup>

507  
508  
509  
510

III.A.1.c).(1).(a) evaluation by the program director and fellowship selection committee of the applicant's suitability to enter the program, based on prior training and review of the

511	summative evaluations of training in the core
512	specialty; and, <sup>(Core)</sup>
513	
514	<b>III.A.1.c).(1).(b)</b>
515	review and approval of the applicant's
516	exceptional qualifications by the GMEC; and,
517	<sup>(Core)</sup>
518	<b>III.A.1.c).(1).(c)</b>
519	verification of Educational Commission for
520	Foreign Medical Graduates (ECFMG)
521	certification. <sup>(Core)</sup>
522	<b>III.A.1.c).(2)</b>
523	Applicants accepted through this exception must have
524	an evaluation of their performance by the Clinical
525	Competency Committee within 12 weeks of
526	matriculation. <sup>(Core)</sup>

**Background and Intent:** An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

**III.B.** The program director must not appoint more fellows than approved by the Review Committee. <sup>(Core)</sup>

**III.B.1.** All complement increases must be approved by the Review Committee. <sup>(Core)</sup>

**III.C.** Fellow Transfers

The program must obtain verification of previous educational experiences and a summative competency-based performance evaluation prior to acceptance of a transferring fellow, and Milestones evaluations upon matriculation. <sup>(Core)</sup>

**IV. Educational Program**

*The ACGME accreditation system is designed to encourage excellence and innovation in graduate medical education regardless of the organizational affiliation, size, or location of the program.*

546  
547       ***The educational program must support the development of knowledgeable, skillful***  
548       ***physicians who provide compassionate care.***

549  
550       *In addition, the program is expected to define its specific program aims consistent*  
551       *with the overall mission of its Sponsoring Institution, the needs of the community*  
552       *it serves and that its graduates will serve, and the distinctive capabilities of*  
553       *physicians it intends to graduate. While programs must demonstrate substantial*  
554       *compliance with the Common and subspecialty-specific Program Requirements, it*  
555       *is recognized that within this framework, programs may place different emphasis*  
556       *on research, leadership, public health, etc. It is expected that the program aims*  
557       *will reflect the nuanced program-specific goals for it and its graduates; for*  
558       *example, it is expected that a program aiming to prepare physician-scientists will*  
559       *have a different curriculum from one focusing on community health.*

560  
561       **IV.A.           The curriculum must contain the following educational components:** <sup>(Core)</sup>

562  
563       **IV.A.1.           a set of program aims consistent with the Sponsoring Institution's**  
564       **mission, the needs of the community it serves, and the desired**  
565       **distinctive capabilities of its graduates;** <sup>(Core)</sup>

566  
567       **IV.A.1.a)           The program's aims must be made available to program**  
568       **applicants, fellows, and faculty members.** <sup>(Core)</sup>

569  
570       **IV.A.2.           competency-based goals and objectives for each educational**  
571       **experience designed to promote progress on a trajectory to**  
572       **autonomous practice in their subspecialty. These must be**  
573       **distributed, reviewed, and available to fellows and faculty members;**  
574       **(Core)**

575  
576       **IV.A.3.           delineation of fellow responsibilities for patient care, progressive**  
577       **responsibility for patient management, and graded supervision in**  
578       **their subspecialty;** <sup>(Core)</sup>

579

**Background and Intent:** These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

580  
581       **IV.A.4.           structured educational activities beyond direct patient care; and,**  
582       **(Core)**

583

**Background and Intent:** Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

585 IV.A.5. advancement of fellows' knowledge of ethical principles  
586 foundational to medical professionalism. (Core)

588 IV.B. ACGME Competencies

**Background and Intent:** The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

**IV.B.1.** The program must integrate the following ACGME Competencies into the curriculum: (Core)

594 IV B 1 a) Professionalism

**Fellows must demonstrate a commitment to professionalism and an adherence to ethical principles. (Core)**

#### **599 IV.B.1.b) Patient Care and Procedural Skills**

**Background and Intent:** Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs.* 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

**These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.**

601  
602 **IV.B.1.b).(1)** **Fellows must be able to provide patient care that is**  
603 **compassionate, appropriate, and effective for the**  
604 **treatment of health problems and the promotion of**  
605 **health. (Core)**

607 IV.B.1.b).(1).(a) Fellows must directly evaluate, and provide  
608 diagnosis and treatment plans, for a minimum of  
609 1,200 patient encounters per year during the  
610 course of education. These patients must have  
611 ophthalmic plastic and reconstructive surgery  
612 related problems. The fellow must be able to  
613 demonstrate that the history and examination were  
614 accurate and appropriate, the use of laboratory and  
615 imaging tests was directed by the history and  
616 physical examination, and that the differential  
617 diagnosis and management were appropriate; and.

618	(Core)
619	
620 IV.B.1.b).(1).(b)	Fellows must demonstrate competence in teaching ophthalmic plastic and reconstructive surgery to ophthalmology residents. <sup>(Core)</sup>
621	
622	
623	
624 IV.B.1.b).(2)	<b>Fellows must be able to perform all medical, diagnostic, and surgical procedures considered essential for the area of practice.</b> <sup>(Core)</sup>
625	
626	
627	
628 IV.B.1.b).(2).(a)	Fellows must demonstrate competence in the following procedures:
629	
630	
631 IV.B.1.b).(2).(a).(i)	enucleation, evisceration, exenteration, and secondary implants of the orbit; <sup>(Core)</sup>
632	
633	
634 IV.B.1.b).(2).(a).(ii)	orbitotomy for exploration, biopsy, and tumor removal; anterior, lateral, medial and superior and orbital reconstruction for periorbital anomalies, including trauma; <sup>(Core)</sup>
635	
636	
637	
638	
639 IV.B.1.b).(2).(a).(iii)	eyelid retraction repair; <sup>(Core)</sup>
640	
641 IV.B.1.b).(2).(a).(iv)	blepharoptosis repair; <sup>(Core)</sup>
642	
643 IV.B.1.b).(2).(a).(v)	ectropion and entropion repair; <sup>(Core)</sup>
644	
645 IV.B.1.b).(2).(a).(vi)	blepharoplasty (upper and lower eyelids, functional and aesthetic); <sup>(Core)</sup>
646	
647	
648 IV.B.1.b).(2).(a).(vii)	eye lid reconstruction (following congenital defects, trauma or tumor excision); <sup>(Core)</sup>
649	
650	
651 IV.B.1.b).(2).(a).(viii)	repair or treatment of trichiasis (lid split, mucous membrane graft); <sup>(Core)</sup>
652	
653	
654 IV.B.1.b).(2).(a).(ix)	conjunctivoplasty; <sup>(Core)</sup>
655	
656 IV.B.1.b).(2).(a).(x)	trauma and laceration repairs; <sup>(Core)</sup>
657	
658 IV.B.1.b).(2).(a).(xi)	rhytidectomy related to periorbital processes; <sup>(Core)</sup>
659	
660	
661 IV.B.1.b).(2).(a).(xii)	dacryocystorhinostomy and other lacrimal procedures; <sup>(Core)</sup>
662	
663	
664 IV.B.1.b).(2).(a).(xiii)	excision of tumors involving the periorbital and adjacent regions-benign and malignant; <sup>(Core)</sup>
665	
666	
667	
668 IV.B.1.b).(2).(a).(xiv)	facial flaps and grafts related to the

669		management of periorbital processes; <sup>(Core)</sup>
670		
671	IV.B.1.b).(2).(a).(xv)	management of upper face and brow conditions (e.g. brow ptosis repair); <sup>(Core)</sup>
672		
673		
674	IV.B.1.b).(2).(a).(xvi)	nasal and sinus endoscopy, partial inferior turbinectomy, and procedures related to the management of lacrimal and periorbital processes; and, <sup>(Core)</sup>
675		
676		
677		
678		
679	IV.B.1.b).(2).(a).(xvii)	use of neuromodulators (botulinum toxin), dermal fillers, other technologies (e.g. laser) and chemical/pharmaceutical agents for the management of contour and skin quality abnormalities (functional and aesthetic). <sup>(Core)</sup>
680		
681		
682		
683		
684		
685		
686	<b>IV.B.1.c)</b>	<b>Medical Knowledge</b>
687		
688		<b>Fellows must demonstrate knowledge of established and evolving biomedical, clinical, epidemiological and social-behavioral sciences, as well as the application of this knowledge to patient care.</b> <sup>(Core)</sup>
689		
690		
691		
692		
693	IV.B.1.c).(1)	Fellows must demonstrate knowledge of:
694		
695	IV.B.1.c).(1).(a)	anatomy and physiology of the orbit, eyelids, lacrimal system, nose, sinuses, and head and neck as it relates to the orbits and adnexa; <sup>(Core)</sup>
696		
697		
698		
699	IV.B.1.c).(1).(b)	orbit; <sup>(Core)</sup>
700		
701	IV.B.1.c).(1).(b).(i)	common orbital problems of children, including: congenital anomalies, cellulitis, benign and malignant tumors, and orbital inflammations; <sup>(Core)</sup>
702		
703		
704		
705		
706	IV.B.1.c).(1).(b).(ii)	common orbital disorders of adults including orbital cellulitis, thyroid orbitopathy, and pseudotumor, vasculitis, congenital tumors, vascular tumors, neural tumors, lacrimal gland tumors, fibro-osseus tumors, histiocytic diseases, lymphoid tumors, metastatic tumors, trauma, anophthalmic socket problems, and skull base disease; <sup>(Core)</sup>

- blepharospasm, facial nerve palsy, eyebrow, midface and lower face function, and aesthetics; (<sup>Core</sup>)
- lacrimal system, including congenital tearing, acquired tearing, and trauma; (<sup>Core</sup>)
- ocular surface pathology, including cicatricial processes affecting the bulbar and palpebral conjunctiva, management of corneal and conjunctival exposure, and relationship of the lids, mid-face and brow to ocular exposure; (<sup>Core</sup>)
- regional anatomy, including graft sites frequently used such as cranial bone, ear, nose, temporal area, mouth and neck, abdomen, buttocks, legs, supraclavicular area, and arm; (<sup>Core</sup>)
- fundamentals of ocular and orbital anatomy, chemistry, physiology, microbiology, immunology, and wound healing; (<sup>Core</sup>)
- histology and pathology to interpret ocular, cutaneous, and periocular pathology and dermatopathology. This should include ten hours of pathology slide review with clinical correlation; (<sup>Core</sup>)
- diagnostic and therapeutic procedures with comprehensive examination of the eyelids and periorbital region; (<sup>Core</sup>)
- examination of the lacrimal system, and nasal exam with speculum and endoscope; (<sup>Core</sup>)
- examination of the eyebrow and face, including assessment of the eyebrow position for brow ptosis, paralysis, and its relation to upper eyelid dermatochalasis, for facial paralysis and evaluation of the effects of mid-face cicatricial, paralytic and involutional changes on lower eyelid position. Also an assessment of the face for the harmonious aesthetic units and evaluation of the inter-relationships of each; (<sup>Core</sup>)
- examination and measurement of orbital structures and functions; and, (<sup>Core</sup>)
- the principles of plain films, CT, MRI, and ultrasound imaging relating to the head and neck with particular emphasis on the orbit. (<sup>Core</sup>)

771	<b>IV.B.1.d)</b>	<b>Practice-based Learning and Improvement</b>
772		
773		<b>Fellows must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.</b> <sup>(Core)</sup>
774		
775		
776		
777		
		<b>Background and Intent:</b> Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.
		<b>The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.</b>
778		
779	<b>IV.B.1.e)</b>	<b>Interpersonal and Communication Skills</b>
780		
781		<b>Fellows must demonstrate interpersonal and communication skills that result in the effective exchange of information and collaboration with patients, their families, and health professionals.</b> <sup>(Core)</sup>
782		
783		
784		
785		
786	<b>IV.B.1.f)</b>	<b>Systems-based Practice</b>
787		
788		<b>Fellows must demonstrate an awareness of and responsiveness to the larger context and system of health care, including the social determinants of health, as well as the ability to call effectively on other resources to provide optimal health care.</b> <sup>(Core)</sup>
789		
790		
791		
792

794	<b>IV.C.</b>	<b>Curriculum Organization and Fellow Experiences</b>
795		
796	<b>IV.C.1.</b>	<b>The curriculum must be structured to optimize fellow educational experiences, the length of these experiences, and supervisory continuity.</b> <sup>(Core)</sup>
797		
798		
799		
800	<b>IV.C.1.a)</b>	Fellows must participate in pre-operative decision making and subsequent operative procedures, as well as post-surgical care and follow-up evaluation of their patients. <sup>(Core)</sup>
801		
802		
803		
804	<b>IV.C.1.b)</b>	The program must prepare and distribute a written policy describing fellow responsibility for the care of patients and faculty members' responsibilities for supervision. <sup>(Detail)</sup>
805		
806		
807		
808	<b>IV.C.1.c)</b>	Assignments at participating sites must provide opportunities for continuity of care. <sup>(Detail)</sup>
809		
810		
811	<b>IV.C.2.</b>	<b>The program must provide instruction and experience in pain management if applicable for the subspecialty, including recognition of the signs of addiction.</b> <sup>(Core)</sup>
812		
813		

- 814  
815 IV.C.3. Fellows must prepare and present teaching conferences and participate  
816 in the teaching of fellows, residents and/or medical students. <sup>(Core)</sup>  
817  
818 IV.C.4. The fellow must participate in a minimum of 80 hours of didactic  
819 instruction, including seminars, lectures, approved basic science courses,  
820 and hands-on skilled courses of which at least 40 hours must be  
821 intramural. These should include the following: <sup>(Core)</sup>  
822  
823 IV.C.4.a) attendance at grand rounds: the fellow should actively participate  
824 in case presentation conferences and discussions of patients with  
825 ophthalmic plastic and reconstructive surgery; <sup>(Detail)</sup>  
826  
827 IV.C.4.b) mandatory attendance at regularly scheduled case presentation  
828 conferences: the fellow must prepare and present a minimum of  
829 two case presentations per year; <sup>(Detail)</sup>  
830  
831 IV.C.4.c) attendance at lectures on ophthalmic plastic and reconstructive  
832 surgery topics given by the faculty during the fellowship teaching  
833 program, including at least six lecture hours per year. The fellow  
834 should prepare and present a minimum of two didactic lectures  
835 per year on the diagnosis/treatment of entities afflicting the  
836 eyelids, tear system, orbit, or face, to be presented to faculty  
837 members, other fellows, and residents; <sup>(Detail)</sup>  
838  
839 IV.C.4.d) active participation, along with the members of the ophthalmic  
840 plastic and reconstructive surgery faculty, in a journal club where  
841 fellows and faculty members present and critically discuss  
842 selections from the current literature; <sup>(Detail)</sup>  
843  
844 IV.C.4.e) attendance at, and preparation of case presentation for, at least  
845 one ophthalmic plastic and reconstructive surgery visiting  
846 professor conference per two years; and, <sup>(Detail)</sup>  
847  
848 IV.C.4.f) attendance and participation in at least two courses devoted to  
849 ophthalmic plastic and reconstructive surgery, tumor resection,  
850 lacrimal disease, or cosmetic surgery. <sup>(Detail)</sup>  
851  
852 IV.C.5. Fellows must have instruction in ethics related to patient care and human  
853 and animal research. <sup>(Core)</sup>  
854  
855 IV.C.6. Fellows must have instruction in the use of information technology for  
856 study of reference material, including electronic searching and retrieval of  
857 relevant articles, monographs, and abstracts. <sup>(Detail)</sup>  
858  
859 IV.C.7. Fellows must participate in one orbital dissection during their 24-month  
860 program. <sup>(Core)</sup>  
861  
862 IV.C.8. Fellows must learn the fundamentals of cosmetic surgery and its  
863 complications with emphasis on brows and mid-face, as well as alloplastic  
864 inserts. <sup>(Core)</sup>

- 865  
866 IV.C.9. Fellows must learn the team approach to orbital and periorbital trauma.  
867 (Core)  
868  
869 IV.C.10. Patient Care Curriculum  
870  
871 Fellows:  
872  
873 IV.C.10.a) must document a minimum number of 300 operative procedures  
874 in an operating room or equivalent facility, plus 150 minor office-  
875 based procedures, such as biopsies and incision/curettage; (Core)  
876  
877 IV.C.10.b) must document in the ACGME Case Log system a sufficient  
878 number and distribution of complex cases for Surgeon (fellow as  
879 the primary surgeon) and Assistant (fellow as the first assistant),  
880 as determined by the Review Committee, for the achievement of  
881 adequate operative skill and surgical judgment; (Core)  
882  
883 IV.C.10.c) must actively participate in the preoperative and postoperative  
884 management of surgical cases in which they are part of the  
885 surgical team; and, (Core)  
886  
887 IV.C.10.d) must participate in planned rotations to procedural dermatology,  
888 otolaryngology, neuro-ophthalmology and plastic surgery in order  
889 to understand how other specialties approach the management of  
890 diseases of the head and neck that directly affect the  
891 management of ocular and periocular disease, with a set of  
892 measurable goals and objectives to be attained at the end of each  
893 rotation. (Core)  
894  
895 IV.D. **Scholarship**  
896  
897 *Medicine is both an art and a science. The physician is a humanistic  
898 scientist who cares for patients. This requires the ability to think critically,  
899 evaluate the literature, appropriately assimilate new knowledge, and  
900 practice lifelong learning. The program and faculty must create an  
901 environment that fosters the acquisition of such skills through fellow  
902 participation in scholarly activities as defined in the subspecialty-specific  
903 Program Requirements. Scholarly activities may include discovery,  
904 integration, application, and teaching.*  
905  
906 *The ACGME recognizes the diversity of fellowships and anticipates that  
907 programs prepare physicians for a variety of roles, including clinicians,  
908 scientists, and educators. It is expected that the program's scholarship will  
909 reflect its mission(s) and aims, and the needs of the community it serves.  
910 For example, some programs may concentrate their scholarly activity on  
911 quality improvement, population health, and/or teaching, while other  
912 programs might choose to utilize more classic forms of biomedical  
913 research as the focus for scholarship.*  
914  
915 IV.D.1. **Program Responsibilities**

- 916  
917     **IV.D.1.a)**     The program must demonstrate evidence of scholarly  
918         activities, consistent with its mission(s) and aims. <sup>(Core)</sup>  
919  
920     **IV.D.1.b)**     The program in partnership with its Sponsoring Institution,  
921         must allocate adequate resources to facilitate fellow and  
922         faculty involvement in scholarly activities. <sup>(Core)</sup>  
923  
924     **IV.D.2.**              **Faculty Scholarly Activity**  
925  
926     **IV.D.2.a)**     Among their scholarly activity, programs must demonstrate  
927         accomplishments in at least three of the following domains:  
928                            <sup>(Core)</sup>  
929  
930
  - Research in basic science, education, translational  
931                            science, patient care, or population health
  - Peer-reviewed grants
  - Quality improvement and/or patient safety initiatives
  - Systematic reviews, meta-analyses, review articles,  
934                            chapters in medical textbooks, or case reports
  - Creation of curricula, evaluation tools, didactic  
935                            educational activities, or electronic educational  
936                            materials
  - Contribution to professional committees, educational  
937                            organizations, or editorial boards
  - Innovations in education  
938  
939  
940  
941  
942  
943     **IV.D.2.b)**     The program must demonstrate dissemination of scholarly  
944         activity within and external to the program by the following  
945         methods:  
946
- Background and Intent:** For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program's effectiveness in the creation of an environment of inquiry that advances the fellows' scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.
- 947  
948     **IV.D.2.b).(1)**     faculty participation in grand rounds, posters,  
949                            workshops, quality improvement presentations,  
950                            podium presentations, grant leadership, non-peer-  
951                            reviewed print/electronic resources, articles or  
952                            publications, book chapters, textbooks, webinars,  
953                            service on professional committees, or serving as a  
954                            journal reviewer, journal editorial board member, or  
955                            editor; <sup>(Outcome)</sup>  
956

957	<b>IV.D.2.b).(2)</b>	peer-reviewed publication. <small>(Outcome)</small>
958		
959	<b>IV.D.3.</b>	<b>Fellow Scholarly Activity</b>
960		
961	IV.D.3.a)	Fellows must participate in scholarly activity. <small>(Core)</small>
962		
963	IV.D.3.a).(1)	Research activities should include participation in clinical trials, prospective and retrospective studies, case reports, and/or basic science research whenever feasible. <small>(Core)</small>
964		
965		
966		
967	IV.D.3.a).(2)	Fellows should attend local and regional conferences relevant to ophthalmic plastic and reconstructive surgery. <small>(Core)</small>
968		
969		
970		
971	IV.D.3.a).(3)	Each fellow should be a lead author of one peer-reviewed publication related to ophthalmic surgery during fellowship education. <small>(Core)</small>
972		
973		
974		
975	IV.D.3.a).(4)	Each fellow must maintain a log of attendance at conferences, lectures given, journal clubs attended, involvement in research activities, publications, and meetings attended, to be reviewed by the program director during fellowship education. <small>(Core)</small>
976		
977		
978		
979		
980		

## 981      **V.      Evaluation**

### 982      **V.A.      Fellow Evaluation**

#### 985      **V.A.1.      Feedback and Evaluation**

986 **Background and Intent:** Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- fellows identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when

fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

987  
988  
989  
990  
991

V.A.1.a) Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. <sup>(Core)</sup>

992  
993  
994  
995  
996  
997  
998  
999  
1000  
1001  
1002  
1003  
1004  
1005  
1006  
1007  
1008  
1009  
1010  
1011  
1012  
1013  
1014  
1015  
1016  
1017

**Background and Intent:** Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

V.A.1.b) Evaluation must be documented at the completion of the assignment. <sup>(Core)</sup>

V.A.1.b).(1) For block rotations of greater than three months in duration, evaluation must be documented at least every three months. <sup>(Core)</sup>

V.A.1.b).(2) Longitudinal experiences such as continuity clinic in the context of other clinical responsibilities must be evaluated at least every three months and at completion. <sup>(Core)</sup>

V.A.1.c) The program must provide an objective performance evaluation based on the Competencies and the subspecialty-specific Milestones, and must:

V.A.1.c).(1) use multiple evaluators (e.g., faculty members, peers, patients, self, and other professional staff members); and, <sup>(Core)</sup>

V.A.1.c).(2) provide that information to the Clinical Competency Committee for its synthesis of progressive fellow performance and improvement toward unsupervised practice. <sup>(Core)</sup>

**Background and Intent:** The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are

considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

**Background and Intent:** Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

1049	V.A.2.	Final Evaluation
1050	V.A.2.a)	The program director must provide a final evaluation for each fellow upon completion of the program. <sup>(Core)</sup>
1051	V.A.2.a).(1)	The subspecialty-specific Milestones, and when applicable the subspecialty-specific Case Logs, must be used as tools to ensure fellows are able to engage in autonomous practice upon completion of the program. <sup>(Core)</sup>
1052	V.A.2.a).(2)	The final evaluation must:
1053	V.A.2.a).(2).(a)	become part of the fellow's permanent record maintained by the institution, and must be accessible for review by the fellow in accordance with institutional policy; <sup>(Core)</sup>
1054	V.A.2.a).(2).(b)	verify that the fellow has demonstrated the knowledge, skills, and behaviors necessary to enter autonomous practice; <sup>(Core)</sup>
1055	V.A.2.a).(2).(c)	consider recommendations from the Clinical Competency Committee; and, <sup>(Core)</sup>
1056	V.A.2.a).(2).(d)	be shared with the fellow upon completion of the program. <sup>(Core)</sup>
1057	V.A.3.	A Clinical Competency Committee must be appointed by the program director. <sup>(Core)</sup>
1058	V.A.3.a)	At a minimum the Clinical Competency Committee must include three members, at least one of whom is a core faculty member. Members must be faculty members from the same program or other programs, or other health professionals who have extensive contact and experience with the program's fellows. <sup>(Core)</sup>
1059	V.A.3.b)	The Clinical Competency Committee must:
1060	V.A.3.b).(1)	review all fellow evaluations at least semi-annually; <sup>(Core)</sup>
1061	V.A.3.b).(2)	determine each fellow's progress on achievement of the subspecialty-specific Milestones; and, <sup>(Core)</sup>
1062	V.A.3.b).(3)	meet prior to the fellows' semi-annual evaluations and advise the program director regarding each fellow's progress. <sup>(Core)</sup>
1063	V.B.	Faculty Evaluation

1100  
1101     **V.B.1.**     The program must have a process to evaluate each faculty  
1102                         member's performance as it relates to the educational program at  
1103                         least annually. <sup>(Core)</sup>  
1104

**Background and Intent:** The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

1105  
1106     **V.B.1.a)**     This evaluation must include a review of the faculty member's  
1107                         clinical teaching abilities, engagement with the educational  
1108                         program, participation in faculty development related to their  
1109                         skills as an educator, clinical performance, professionalism,  
1110                         and scholarly activities. <sup>(Core)</sup>  
1111  
1112     **V.B.1.b)**     This evaluation must include written, confidential evaluations  
1113                         by the fellows. <sup>(Core)</sup>  
1114  
1115     **V.B.2.**     Faculty members must receive feedback on their evaluations at least  
1116                         annually. <sup>(Core)</sup>  
1117  
1118     **V.B.3.**     Results of the faculty educational evaluations should be  
1119                         incorporated into program-wide faculty development plans. <sup>(Core)</sup>  
1120

**Background and Intent:** The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

1121  
1122     **V.C.**             Program Evaluation and Improvement  
1123  
1124     **V.C.1.**          The program director must appoint the Program Evaluation  
1125                         Committee to conduct and document the Annual Program

### **Evaluation as part of the program's continuous improvement process. (Core)**

**V.C.1.a)** The Program Evaluation Committee must be composed of at least two program faculty members, at least one of whom is a core faculty member, and at least one fellow. (Core)

## **Program Evaluation Committee responsibilities must include:**

**acting as an advisor to the program director, through program oversight; (Core)**

**review of the program's self-determined goals and progress toward meeting them; (Core)**

**V.C.1.b).(3) guiding ongoing program improvement, including development of new goals, based upon outcomes; and, (Core)**

**V.C.1.b.(4) review of the current operating environment to id**

**Review of the current operating environment to factually assess the program's strengths, challenges, opportunities, and threats and to relate to the program's mission and aims.** <sup>(Core)</sup>

**Background and Intent:** In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.

**V.C.1.c) The Program Evaluation Committee should consider the following elements in its assessment of the program:**

V.C.1.c).(1) curriculum: (Core)

**V.C.1.c).(2) outcomes from prior Annual Program Evaluation(s);  
(Core)**

**V.C.1.c).(3) ACGME letters of notification, including citations, Areas for Improvement, and comments: <sup>(Core)</sup>**

V.C.1.c) (4) quality and safety of patient care: (Core)

V C 1 c) (5) aggregate fellow and faculty:

V.C.1.c) (5)(a) well-being: (Core)

V.C.1.c)(5)(b) recruitment and retention: (Core)

V.C.1.c)(5)(c) workforce diversity: (Core)

1171 V.C.1.c).(5).(d) engagement in quality improvement and patient  
1172 safety; <sup>(Core)</sup>

1173

1174 V.C.1.c).(5).(e) scholarly activity; <sup>(Core)</sup>

1175

1176 V.C.1.c).(5).(f) ACGME Resident/Fellow and Faculty Surveys  
1177 (where applicable); and, <sup>(Core)</sup>

1178

1179 V.C.1.c).(5).(g) written evaluations of the program. <sup>(Core)</sup>

1180

1181 V.C.1.c).(6) aggregate fellow:

1182

1183 V.C.1.c).(6).(a) achievement of the Milestones; <sup>(Core)</sup>

1184

1185 V.C.1.c).(6).(b) in-training examinations (where applicable);  
1186 <sup>(Core)</sup>

1187

1188 V.C.1.c).(6).(c) board pass and certification rates; and, <sup>(Core)</sup>

1189

1190 V.C.1.c).(6).(d) graduate performance. <sup>(Core)</sup>

1191

1192 V.C.1.c).(7) aggregate faculty:

1193

1194 V.C.1.c).(7).(a) evaluation; and, <sup>(Core)</sup>

1195

1196 V.C.1.c).(7).(b) professional development <sup>(Core)</sup>

1197

1198 V.C.1.d) The Program Evaluation Committee must evaluate the  
1199 program's mission and aims, strengths, areas for  
1200 improvement, and threats. <sup>(Core)</sup>

1201

1202 V.C.1.e) The annual review, including the action plan, must:

1203

1204 V.C.1.e).(1) be distributed to and discussed with the members of  
1205 the teaching faculty and the fellows; and, <sup>(Core)</sup>

1206

1207 V.C.1.e).(2) be submitted to the DIO. <sup>(Core)</sup>

1208

1209 V.C.2) The program must participate in a Self-Study prior to its 10-Year  
1210 Accreditation Site Visit. <sup>(Core)</sup>

1211

1212 V.C.2.a) A summary of the Self-Study must be submitted to the DIO.  
1213 <sup>(Core)</sup>

1214

**Background and Intent:** Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the

1215  
1216     **Self-Study and the 10-Year Accreditation Site Visit are provided in the ACGME Manual**  
1217     **of Policies and Procedures.** Additionally, a description of the [Self-Study process](#), as  
1218     well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is  
1219     available on the ACGME website.

1220  
1221     **VI. The Learning and Working Environment**  
1222

1223     *Fellowship education must occur in the context of a learning and working*  
1224     *environment that emphasizes the following principles:*

- 1225     • *Excellence in the safety and quality of care rendered to patients by fellows*  
1226     *today*  
1227     • *Excellence in the safety and quality of care rendered to patients by today's*  
1228     *fellows in their future practice*  
1229     • *Excellence in professionalism through faculty modeling of:*  
1230        ○ *the effacement of self-interest in a humanistic environment that supports*  
1231        *the professional development of physicians*  
1232        ○ *the joy of curiosity, problem-solving, intellectual rigor, and discovery*  
1233     • *Commitment to the well-being of the students, residents, fellows, faculty*  
1234     *members, and all members of the health care team*  
1235

1236 **Background and Intent:** The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

1238 VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

1239  
1240 VI.A.1. Patient Safety and Quality Improvement

1241  
1242 *All physicians share responsibility for promoting patient safety and*  
1243 *enhancing quality of patient care. Graduate medical education must*  
1244 *prepare fellows to provide the highest level of clinical care with*  
1245 *continuous focus on the safety, individual needs, and humanity of*  
1246 *their patients. It is the right of each patient to be cared for by fellows*  
1247 *who are appropriately supervised; possess the requisite knowledge,*  
1248 *skills, and abilities; understand the limits of their knowledge and*  
1249 *experience; and seek assistance as required to provide optimal*  
1250 *patient care.*

1251  
1252 *Fellows must demonstrate the ability to analyze the care they*  
1253 *provide, understand their roles within health care teams, and play an*  
1254 *active role in system improvement processes. Graduating fellows*  
1255 *will apply these skills to critique their future unsupervised practice*  
1256 *and effect quality improvement measures.*

1257  
1258 *It is necessary for fellows and faculty members to consistently work*  
1259 *in a well-coordinated manner with other health care professionals to*  
1260 *achieve organizational patient safety goals.*

1261  
1262 VI.A.1.a) Patient Safety

1263  
1264 VI.A.1.a).(1) Culture of Safety

1265  
1266 *A culture of safety requires continuous identification*  
1267 *of vulnerabilities and a willingness to transparently*  
1268 *deal with them. An effective organization has formal*  
1269 *mechanisms to assess the knowledge, skills, and*  
1270 *attitudes of its personnel toward safety in order to*  
1271 *identify areas for improvement.*

1272  
1273 VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows  
1274 must actively participate in patient safety  
1275 systems and contribute to a culture of safety.  
(Core)

1276  
1277 VI.A.1.a).(1).(b) The program must have a structure that  
1278 promotes safe, interprofessional, team-based  
1279 care. (Core)

1280  
1281 VI.A.1.a).(2) Education on Patient Safety

1282  
1283  
1284 Programs must provide formal educational activities  
1285 that promote patient safety-related goals, tools, and  
1286 techniques. (Core)

**Background and Intent:** Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.

	<b>VI.A.1.a).(3)</b>	<b>Patient Safety Events</b>
1291 1292 1293 1294 1295 1296 1297 1298 1299 1300		<i>Reporting, investigation, and follow-up of adverse events, near misses, and unsafe conditions are pivotal mechanisms for improving patient safety, and are essential for the success of any patient safety program. Feedback and experiential learning are essential to developing true competence in the ability to identify causes and institute sustainable systems-based changes to ameliorate patient safety vulnerabilities.</i>
1301 1302 1303	<b>VI.A.1.a).(3).(a)</b>	Residents, fellows, faculty members, and other clinical staff members must:
1304 1305 1306 1307	<b>VI.A.1.a).(3).(a).(i)</b>	know their responsibilities in reporting patient safety events at the clinical site; <sup>(Core)</sup>
1308 1309 1310 1311	<b>VI.A.1.a).(3).(a).(ii)</b>	know how to report patient safety events, including near misses, at the clinical site; and, <sup>(Core)</sup>
1312 1313 1314 1315	<b>VI.A.1.a).(3).(a).(iii)</b>	be provided with summary information of their institution's patient safety reports. <sup>(Core)</sup>
1316 1317 1318 1319 1320 1321 1322	<b>VI.A.1.a).(3).(b)</b>	Fellows must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions. <sup>(Core)</sup>
1323 1324 1325	<b>VI.A.1.a).(4)</b>	<b>Fellow Education and Experience in Disclosure of Adverse Events</b>
1326 1327 1328 1329 1330 1331		<i>Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for fellows to develop and apply.</i>
1332 1333 1334 1335	<b>VI.A.1.a).(4).(a)</b>	All fellows must receive training in how to disclose adverse events to patients and families. <sup>(Core)</sup>

1336	<b>VI.A.1.a).(4).(b)</b>	<b>Fellows should have the opportunity to participate in the disclosure of patient safety events, real or simulated.</b> <small>(Detail)†</small>

1415  
1416  
1417  
1418  
1419  
1420  
1421  
1422  
1423  
1424  
1425  
1426

**Each patient must have an identifiable and appropriately-credentialed and privileged attending physician (or licensed independent practitioner as specified by the applicable Review Committee) who is responsible and accountable for the patient's care. (Core)**

**VI.A.2.a).(1).(a)**

This information must be available to fellows, faculty members, other members of the health care team, and patients. (Core)

**VI.A.2.a).(1).(b)**

Fellows and faculty members must inform each patient of their respective roles in that patient's care when providing direct patient care. (Core)

**VI.A.2.b)**

***Supervision may be exercised through a variety of methods. For many aspects of patient care, the supervising physician may be a more advanced fellow. Other portions of care provided by the fellow can be adequately supervised by the appropriate availability of the supervising faculty member or fellow, either on site or by means of telecommunication technology. Some activities require the physical presence of the supervising faculty member. In some circumstances, supervision may include post-hoc review of fellow-delivered care with feedback.***

**Background and Intent:** Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

**VI.A.2.b).(1)**

The program must demonstrate that the appropriate level of supervision in place for all fellows is based on each fellow's level of training and ability, as well as patient complexity and acuity. Supervision may be exercised through a variety of methods, as appropriate to the situation. (Core)

- 1427 VI.A.2.b).(2) The program must define when physical presence of a  
1428 supervising physician is required. <sup>(Core)</sup>
- 1429
- 1430 VI.A.2.c) **Levels of Supervision**
- 1431
- 1432 To promote appropriate fellow supervision while providing  
1433 for graded authority and responsibility, the program must use  
1434 the following classification of supervision: <sup>(Core)</sup>
- 1435
- 1436 VI.A.2.c).(1) **Direct Supervision:**
- 1437
- 1438 VI.A.2.c).(1).(a) the supervising physician is physically present  
1439 with the fellow during the key portions of the  
1440 patient interaction. <sup>(Core)</sup>
- 1441
- 1442 VI.A.2.c).(2) **Indirect Supervision:** the supervising physician is not  
1443 providing physical or concurrent visual or audio  
1444 supervision but is immediately available to the fellow  
1445 for guidance and is available to provide appropriate  
1446 direct supervision. <sup>(Core)</sup>
- 1447
- 1448 VI.A.2.c).(3) **Oversight** – the supervising physician is available to  
1449 provide review of procedures/encounters with  
1450 feedback provided after care is delivered. <sup>(Core)</sup>
- 1451
- 1452 VI.A.2.d) **The privilege of progressive authority and responsibility,**  
1453 **conditional independence, and a supervisory role in patient**  
1454 **care delegated to each fellow must be assigned by the**  
1455 **program director and faculty members.** <sup>(Core)</sup>
- 1456
- 1457 VI.A.2.d).(1) **The program director must evaluate each fellow's**  
1458 **abilities based on specific criteria, guided by the**  
1459 **Milestones.** <sup>(Core)</sup>
- 1460
- 1461 VI.A.2.d).(2) **Faculty members functioning as supervising**  
1462 **physicians must delegate portions of care to fellows**  
1463 **based on the needs of the patient and the skills of**  
1464 **each fellow.** <sup>(Core)</sup>
- 1465
- 1466 VI.A.2.d).(3) **Fellows should serve in a supervisory role to junior**  
1467 **fellows and residents in recognition of their progress**  
1468 **toward independence, based on the needs of each**  
1469 **patient and the skills of the individual resident or**  
1470 **fellow.** <sup>(Detail)</sup>
- 1471
- 1472 VI.A.2.e) **Programs must set guidelines for circumstances and events**  
1473 **in which fellows must communicate with the supervising**  
1474 **faculty member(s).** <sup>(Core)</sup>
- 1475

1476 VI.A.2.e).(1) Each fellow must know the limits of their scope of  
1477 authority, and the circumstances under which the  
1478 fellow is permitted to act with conditional  
1479 independence. <sup>(Outcome)</sup>  
1480

**Background and Intent:** The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

1481  
1482 VI.A.2.f) Faculty supervision assignments must be of sufficient  
1483 duration to assess the knowledge and skills of each fellow  
1484 and to delegate to the fellow the appropriate level of patient  
1485 care authority and responsibility. <sup>(Core)</sup>  
1486

1487 VI.B. Professionalism  
1488

1489 VI.B.1. Programs, in partnership with their Sponsoring Institutions, must  
1490 educate fellows and faculty members concerning the professional  
1491 responsibilities of physicians, including their obligation to be  
1492 appropriately rested and fit to provide the care required by their  
1493 patients. <sup>(Core)</sup>  
1494

1495 VI.B.2. The learning objectives of the program must:  
1496

1497 VI.B.2.a) be accomplished through an appropriate blend of supervised  
1498 patient care responsibilities, clinical teaching, and didactic  
1499 educational events; <sup>(Core)</sup>  
1500

1501 VI.B.2.b) be accomplished without excessive reliance on fellows to  
1502 fulfill non-physician obligations; and, <sup>(Core)</sup>  
1503

**Background and Intent:** Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1504  
1505 VI.B.2.c) ensure manageable patient care responsibilities. <sup>(Core)</sup>  
1506

**Background and Intent:** The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully

**assess how the assignment of patient care responsibilities can affect work compression.**

1507  
1508 VI.B.3. The program director, in partnership with the Sponsoring Institution,  
1509 must provide a culture of professionalism that supports patient  
1510 safety and personal responsibility. (Core)

**VI.B.4.** Fellows and faculty members must demonstrate an understanding of their personal role in the:

**1515 VI.B.4.a) provision of patient- and family-centered care; (Outcome)**

1516  
1517 VI.B.4.b) safety and welfare of patients entrusted to their care,  
1518 including the ability to report unsafe conditions and adverse  
1519 events: (Outcome)

**Background and Intent:** This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

**1521** **VI.B.4.c)** **assurance of their fitness for work, including:** (Outcome)  
**1522** **1523**

**Background and Intent:** This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

1524  
1525 VI.B.4.c).(1) management of their time before, during, and after  
1526 clinical assignments: and. (Outcome)

1527  
1528 VI.B.4.c).(2) recognition of impairment, including from illness,  
1529 fatigue, and substance use, in themselves, their peers,  
1530 and other members of the health care team. (Outcome)

1531  
1532 VI B 4 d) commitment to lifelong learning: (Outcome)

1533 VI.B.4.e) monitoring of their patient care performance improvement  
1534 indicators; and (Outcome)  
1535

1536  
1537 VI.B.4.f) accurate reporting of clinical and educational work hours,  
1538 patient outcomes, and clinical experience data. (Outcome)

**VI.B.5.** All fellows and faculty members must demonstrate responsiveness to patient needs that supersedes self-interest. This includes the recognition that under certain circumstances, the best interests of the patient may be served by transitioning that patient's care to another qualified and rested provider. (Outcome)

- 1546 VI.B.6. Programs, in partnership with their Sponsoring Institutions, must  
1547 provide a professional, equitable, respectful, and civil environment  
1548 that is free from discrimination, sexual and other forms of  
1549 harassment, mistreatment, abuse, or coercion of students, fellows,  
1550 faculty, and staff. <sup>(Core)</sup>
- 1551 VI.B.7. Programs, in partnership with their Sponsoring Institutions, should  
1552 have a process for education of fellows and faculty regarding  
1553 unprofessional behavior and a confidential process for reporting,  
1554 investigating, and addressing such concerns. <sup>(Core)</sup>
- 1555  
1556  
1557 VI.C. Well-Being
- 1558  
1559 *Psychological, emotional, and physical well-being are critical in the*  
1560 *development of the competent, caring, and resilient physician and require*  
1561 *proactive attention to life inside and outside of medicine. Well-being*  
1562 *requires that physicians retain the joy in medicine while managing their*  
1563 *own real life stresses. Self-care and responsibility to support other*  
1564 *members of the health care team are important components of*  
1565 *professionalism; they are also skills that must be modeled, learned, and*  
1566 *nurtured in the context of other aspects of fellowship training.*
- 1567  
1568 *Fellows and faculty members are at risk for burnout and depression.*  
1569 *Programs, in partnership with their Sponsoring Institutions, have the same*  
1570 *responsibility to address well-being as other aspects of resident*  
1571 *competence. Physicians and all members of the health care team share*  
1572 *responsibility for the well-being of each other. For example, a culture which*  
1573 *encourages covering for colleagues after an illness without the expectation*  
1574 *of reciprocity reflects the ideal of professionalism. A positive culture in a*  
1575 *clinical learning environment models constructive behaviors, and prepares*  
1576 *fellows with the skills and attitudes needed to thrive throughout their*  
1577 *careers.*
- 1578

**Background and Intent:** The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website: [www.acgme.org/physicianwellbeing](http://www.acgme.org/physicianwellbeing).

The ACGME also created a repository for well-being materials, assessments, presentations, and more on the [Well-Being Tools and Resources page](#) in Learn at ACGME for programs seeking to develop or strengthen their own well-being initiatives. There are many activities that programs can implement now to assess and support physician well-being. These include the distribution and analysis of culture of safety surveys, ensuring the availability of counseling services, and paying attention to the safety of the entire health care team.

- 1580 VI.C.1. The responsibility of the program, in partnership with the  
1581 Sponsoring Institution, to address well-being must include:  
1582
- 1583 VI.C.1.a) efforts to enhance the meaning that each fellow finds in the  
1584 experience of being a physician, including protecting time  
1585 with patients, minimizing non-physician obligations,  
1586 providing administrative support, promoting progressive  
1587 autonomy and flexibility, and enhancing professional  
1588 relationships; <sup>(Core)</sup>
- 1589
- 1590 VI.C.1.b) attention to scheduling, work intensity, and work  
1591 compression that impacts fellow well-being; <sup>(Core)</sup>
- 1592
- 1593 VI.C.1.c) evaluating workplace safety data and addressing the safety of  
1594 fellows and faculty members; <sup>(Core)</sup>
- 1595

**Background and Intent:** This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

- 1596 VI.C.1.d) policies and programs that encourage optimal fellow and  
1597 faculty member well-being; and, <sup>(Core)</sup>
- 1598
- 1599

**Background and Intent:** Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

- 1600 VI.C.1.d).(1) Fellows must be given the opportunity to attend  
1601 medical, mental health, and dental care appointments,  
1602 including those scheduled during their working hours.  
1603 <sup>(Core)</sup>
- 1604
- 1605

**Background and Intent:** The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

- 1606 VI.C.1.e) attention to fellow and faculty member burnout, depression,  
1607 and substance use disorder. The program, in partnership with  
1608 its Sponsoring Institution, must educate faculty members and  
1609 fellows in identification of the symptoms of burnout,  
1610 depression, and substance use disorder, including means to  
1611 assist those who experience these conditions. Fellows and  
1612 faculty members must also be educated to recognize those  
1613 symptoms in themselves and how to seek appropriate care.
- 1614

1615  
1616  
1617

**The program, in partnership with its Sponsoring Institution, must:** *(Core)*

**Background and Intent:** Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance use disorder. Materials and more information are available in Learn at ACGME (<https://dl.acgme.org/pages/well-being-tools-resources>).

1618  
1619  
1620  
1621  
1622  
1623  
1624  
1625  
1626

**VI.C.1.e).(1)** encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another fellow, resident, or faculty member may be displaying signs of burnout, depression, a substance use disorder, suicidal ideation, or potential for violence; (Core)

**Background and Intent:** Individuals experiencing burnout, depression, substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

1627  
1628  
1629  
1630  
1631  
1632  
1633  
1634  
1635

**VI.C.1.e).(2) provide access to appropriate tools for self-screening; and.** (Core)

**VI.C.1.e).(3)** provide access to confidential, affordable mental health assessment, counseling, and treatment, including access to urgent and emergent care 24 hours a day, seven days a week. (Core)

**Background and Intent:** The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

**The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.**

1636

- 1637 VI.C.2. There are circumstances in which fellows may be unable to attend  
1638 work, including but not limited to fatigue, illness, family  
1639 emergencies, and parental leave. Each program must allow an  
1640 appropriate length of absence for fellows unable to perform their  
1641 patient care responsibilities. <sup>(Core)</sup>  
1642
- 1643 VI.C.2.a) The program must have policies and procedures in place to  
1644 ensure coverage of patient care. <sup>(Core)</sup>  
1645
- 1646 VI.C.2.b) These policies must be implemented without fear of negative  
1647 consequences for the fellow who is or was unable to provide  
1648 the clinical work. <sup>(Core)</sup>  
1649

**Background and Intent:** Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

- 1650
- 1651 VI.D. Fatigue Mitigation
- 1652
- 1653 VI.D.1. Programs must:
- 1654
- 1655 VI.D.1.a) educate all faculty members and fellows to recognize the  
1656 signs of fatigue and sleep deprivation; <sup>(Core)</sup>
- 1657
- 1658 VI.D.1.b) educate all faculty members and fellows in alertness  
1659 management and fatigue mitigation processes; and, <sup>(Core)</sup>
- 1660
- 1661 VI.D.1.c) encourage fellows to use fatigue mitigation processes to  
1662 manage the potential negative effects of fatigue on patient  
1663 care and learning. <sup>(Detail)</sup>
- 1664

**Background and Intent:** Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

- 1665
- 1666 VI.D.2. Each program must ensure continuity of patient care, consistent  
1667 with the program's policies and procedures referenced in VI.C.2–

- 1668 VI.C.2.b), in the event that a fellow may be unable to perform their  
1669 patient care responsibilities due to excessive fatigue. <sup>(Core)</sup>
- 1670
- 1671 VI.D.3. The program, in partnership with its Sponsoring Institution, must  
1672 ensure adequate sleep facilities and safe transportation options for  
1673 fellows who may be too fatigued to safely return home. <sup>(Core)</sup>
- 1674
- 1675 VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care
- 1676
- 1677 VI.E.1. Clinical Responsibilities
- 1678
- 1679 The clinical responsibilities for each fellow must be based on PGY  
1680 level, patient safety, fellow ability, severity and complexity of patient  
1681 illness/condition, and available support services. <sup>(Core)</sup>
- 1682
- Background and Intent:** The changing clinical care environment of medicine has meant  
that work compression due to high complexity has increased stress on fellows. Faculty  
members and program directors need to make sure fellows function in an environment  
that has safe patient care and a sense of fellow well-being. Some Review Committees  
have addressed this by setting limits on patient admissions, and it is an essential  
responsibility of the program director to monitor fellow workload. Workload should be  
distributed among the fellow team and interdisciplinary teams to minimize work  
compression.
- 1683
- 1684 VI.E.2. Teamwork
- 1685
- 1686 Fellows must care for patients in an environment that maximizes  
1687 communication. This must include the opportunity to work as a  
1688 member of effective interprofessional teams that are appropriate to  
1689 the delivery of care in the subspecialty and larger health system.  
1690 <sup>(Core)</sup>
- 1691
- 1692 VI.E.2.a) Programs must provide a team-oriented learning environment for  
1693 patient care which incorporates both outpatient and inpatient  
1694 exposure. The team may include faculty members and residents  
1695 in ophthalmology, referring physicians, consultant physicians in  
1696 dermatology, neurological surgery, otolaryngology, pathology, and  
1697 plastic surgery, laboratory and administrative staff members,  
1698 medical students, nurses, and technicians, among others. <sup>(Core)</sup>
- 1699
- 1700 VI.E.2.a).(1) Education in effective communication among team  
1701 members must be provided. <sup>(Detail)</sup>
- 1702
- 1703 VI.E.3. Transitions of Care
- 1704
- 1705 VI.E.3.a) Programs must design clinical assignments to optimize  
1706 transitions in patient care, including their safety, frequency,  
1707 and structure. <sup>(Core)</sup>
- 1708
- 1709 VI.E.3.b) Programs, in partnership with their Sponsoring Institutions,  
1710 must ensure and monitor effective, structured hand-over

1711	processes to facilitate both continuity of care and patient safety. <sup>(Core)</sup>
1712	
1713	
1714 VI.E.3.c)	<b>Programs must ensure that fellows are competent in communicating with team members in the hand-over process.</b> <sup>(Outcome)</sup>
1715	
1716	
1717	
1718 VI.E.3.d)	<b>Programs and clinical sites must maintain and communicate schedules of attending physicians and fellows currently responsible for care.</b> <sup>(Core)</sup>
1719	
1720	
1721	
1722 VI.E.3.e)	<b>Each program must ensure continuity of patient care, consistent with the program's policies and procedures referenced in VI.C.2-VI.C.2.b), in the event that a fellow may be unable to perform their patient care responsibilities due to excessive fatigue or illness, or family emergency.</b> <sup>(Core)</sup>
1723	
1724	
1725	
1726	
1727	
1728 VI.F.	<b>Clinical Experience and Education</b>
1729	
1730	<i>Programs, in partnership with their Sponsoring Institutions, must design an effective program structure that is configured to provide fellows with educational and clinical experience opportunities, as well as reasonable opportunities for rest and personal activities.</i>
1731	
1732	
1733	
1734	

**Background and Intent:** In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

1735	VI.F.1.	<b>Maximum Hours of Clinical and Educational Work per Week</b>
1736		
1737		
1738		<b>Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting.</b> <sup>(Core)</sup>
1739		
1740		
1741		
1742		

**Background and Intent:** Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

#### **Scheduling**

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed

**the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.**

#### ***Oversight***

**With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.**

#### ***Work from Home***

**While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.**

**During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.**

1744	<b>VI.F.2.</b>	<b>Mandatory Time Free of Clinical Work and Education</b>
1745		
1746	<b>VI.F.2.a)</b>	<b>The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being.</b> <small>(Core)</small>
1747		
1748		
1749		
1750		
1751	<b>VI.F.2.b)</b>	<b>Fellows should have eight hours off between scheduled clinical work and education periods.</b> <small>(Detail)</small>
1752		
1753		
1754	<b>VI.F.2.b).(1)</b>	<b>There may be circumstances when fellows choose to stay to care for their patients or return to the hospital with fewer than eight hours free of clinical experience and education. This must occur within the context of the 80-hour and the one-day-off-in-seven requirements.</b> <small>(Detail)</small>
1755		
1756		
1757		
1758		
1759		
1760		

**Background and Intent:** While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1761	<b>VI.F.2.c)</b>	<b>Fellows must have at least 14 hours free of clinical work and education after 24 hours of in-house call.</b> <small>(Core)</small>
1762		
1763		
1764		

**Background and Intent:** Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1765	<b>VI.F.2.d)</b>	<b>Fellows must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days.</b> <small>(Core)</small>
1766		
1767		
1768		
1769		
1770		

**Background and Intent:** The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes

**fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as “one (1) continuous 24-hour period free from all administrative, clinical, and educational activities.”**

1771	VI.F.3.	<b>Maximum Clinical Work and Education Period Length</b>
1772		
1773		
1774	VI.F.3.a)	<b>Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical assignments.</b> <small>(Core)</small>
1775		
1776		
1777		
1778	VI.F.3.a).(1)	<b>Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or fellow education.</b> <small>(Core)</small>
1779		
1780		
1781		
1782		
1783	VI.F.3.a).(1).(a)	<b>Additional patient care responsibilities must not be assigned to a fellow during this time.</b> <small>(Core)</small>
1784		
1785		

**Background and Intent:** The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

1786	VI.F.4.	<b>Clinical and Educational Work Hour Exceptions</b>
1787		
1788		
1789	VI.F.4.a)	<b>In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:</b>
1790		
1791		
1792		
1793		
1794	VI.F.4.a).(1)	<b>to continue to provide care to a single severely ill or unstable patient;</b> <small>(Detail)</small>
1795		
1796		
1797	VI.F.4.a).(2)	<b>humanistic attention to the needs of a patient or family; or,</b> <small>(Detail)</small>
1798		
1799		
1800	VI.F.4.a).(3)	<b>to attend unique educational events.</b> <small>(Detail)</small>
1801		
1802	VI.F.4.b)	<b>These additional hours of care or education will be counted toward the 80-hour weekly limit.</b> <small>(Detail)</small>
1803		
1804		

**Background and Intent:** This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and

**that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.**

1805  
1806     **VI.F.4.c)**           **A Review Committee may grant rotation-specific exceptions**  
1807                           **for up to 10 percent or a maximum of 88 clinical and**  
1808                           **educational work hours to individual programs based on a**  
1809                           **sound educational rationale.**

1810  
1811                        The Review Committee for Ophthalmology will not consider  
1812                        requests for exceptions to the 80-hour limit to the fellows' work  
1813                        week.

1814  
1815     **VI.F.5.**           **Moonlighting**

1816  
1817     **VI.F.5.a)**           **Moonlighting must not interfere with the ability of the fellow**  
1818                           **to achieve the goals and objectives of the educational**  
1819                           **program, and must not interfere with the fellow's fitness for**  
1820                           **work nor compromise patient safety.** <sup>(Core)</sup>

1821  
1822     **VI.F.5.b)**           **Time spent by fellows in internal and external moonlighting**  
1823                           **(as defined in the ACGME Glossary of Terms) must be**  
1824                           **counted toward the 80-hour maximum weekly limit.** <sup>(Core)</sup>

**Background and Intent:** For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

1826  
1827     **VI.F.6.**           **In-House Night Float**

1828  
1829                       **Night float must occur within the context of the 80-hour and one-**  
1830                        **day-off-in-seven requirements.** <sup>(Core)</sup>

**Background and Intent:** The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

1832  
1833     **VI.F.7.**           **Maximum In-House On-Call Frequency**

1834  
1835                       **Fellows must be scheduled for in-house call no more frequently than**  
1836                        **every third night (when averaged over a four-week period).** <sup>(Core)</sup>

1837  
1838     **VI.F.8.**           **At-Home Call**

1839  
1840     **VI.F.8.a)**           **Time spent on patient care activities by fellows on at-home**  
1841                        **call must count toward the 80-hour maximum weekly limit.**  
1842                        **The frequency of at-home call is not subject to the every-**  
1843                        **third-night limitation, but must satisfy the requirement for one**  
1844                        **day in seven free of clinical work and education, when**  
1845                        **averaged over four weeks.** <sup>(Core)</sup>

1847	<b>VI.F.8.a).(1)</b>	<b>At-home call must not be so frequent or taxing as to preclude rest or reasonable personal time for each fellow.</b> <small>(Core)</small>
1848		
1849		
1850		
1851	<b>VI.F.8.b)</b>	<b>Fellows are permitted to return to the hospital while on at-home call to provide direct care for new or established patients. These hours of inpatient patient care must be included in the 80-hour maximum weekly limit.</b> <small>(Detail)</small>
1852		
1853		
1854		
1855		

**Background and Intent:** This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
