1 **ACGME Program Requirements for Graduate Medical Education**
2 **in Clinical Informatics**

3
4 **Common Program Requirements (Fellowship) are in BOLD**

5
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.
9

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

10
11 **Introduction**

12
13 **Int.A.** *Fellowship is advanced graduate medical education beyond a core*
14 *residency program for physicians who desire to enter more specialized*
15 *practice. Fellowship-trained physicians serve the public by providing*
16 *subspecialty care, which may also include core medical care, acting as a*
17 *community resource for expertise in their field, creating and integrating*
18 *new knowledge into practice, and educating future generations of*
19 *physicians. Graduate medical education values the strength that a diverse*
20 *group of physicians brings to medical care.*

21
22 *Fellows who have completed residency are able to practice independently*
23 *in their core specialty. The prior medical experience and expertise of*
24 *fellows distinguish them from physicians entering into residency training.*
25 *The fellow’s care of patients within the subspecialty is undertaken with*
26 *appropriate faculty supervision and conditional independence. Faculty*
27 *members serve as role models of excellence, compassion,*
28 *professionalism, and scholarship. The fellow develops deep medical*
29 *knowledge, patient care skills, and expertise applicable to their focused*
30 *area of practice. Fellowship is an intensive program of subspecialty clinical*
31 *and didactic education that focuses on the multidisciplinary care of*
32 *patients. Fellowship education is often physically, emotionally, and*
33 *intellectually demanding, and occurs in a variety of clinical learning*
34 *environments committed to graduate medical education and the well-being*
35 *of patients, residents, fellows, faculty members, students, and all members*
36 *of the health care team.*

37
38 *In addition to clinical education, many fellowship programs advance*
39 *fellows’ skills as physician-scientists. While the ability to create new*
40 *knowledge within medicine is not exclusive to fellowship-educated*
41 *physicians, the fellowship experience expands a physician’s abilities to*
42 *pursue hypothesis-driven scientific inquiry that results in contributions to*
43 *the medical literature and patient care. Beyond the clinical subspecialty*
44 *expertise achieved, fellows develop mentored relationships built on an*
45 *infrastructure that promotes collaborative research.*

46
47 **Int.B.** **Definition of Subspecialty**

48
49 Clinical informatics is the subspecialty of all medical specialties that transforms
50 health care by analyzing, designing, implementing, and evaluating information
51 and communication systems to improve patient care, enhance access to care,
52 advance individual and population health outcomes, and strengthen the clinician-
53 patient relationship.

54
55 Physicians who practice clinical informatics draw from the broader field of
56 biomedical and health information technology (IT) as they apply informatics
57 methods, concepts, and tools to the practice of medicine. Thus, they must
58 understand the culture, boundaries, and complexities of the field. Further, the
59 stakeholders, structures, and processes that constitute the health system affect
60 the information and knowledge needs of health care professionals and influence
61 the selection and implementation of clinical information processes and systems.

62
63 Physicians who practice clinical informatics collaborate with other health care
64 and IT professionals and provide consultative services that use their knowledge
65 of patient care combined with their understanding of informatics concepts,
66 methods, and health IT tools to improve clinical practice by:

67
68 Int.B.1. leading initiatives designed to enhance health care quality and access by
69 supporting and facilitating care coordination and transitions of care
70 through the procurement, customization, development, implementation,
71 management, evaluation, and continuous improvement of clinical
72 information systems;

73
74 Int.B.2. securing the legal and ethical use of clinical information;

75
76 Int.B.3. assessing information and knowledge needs of health care professionals
77 and patients;

78
79 Int.B.4. characterizing, evaluating, and refining clinical processes;

80
81 Int.B.5. analyzing, developing, implementing, and refining clinical decision
82 support systems; and,

83
84 Int.B.6. participating in projects designed to use technology to promote patient
85 care that is safe, efficient, effective, timely, patient-centered, and
86 equitable.

87
88 **Int.C. Length of Educational Program**

89
90 The educational program in clinical informatics (CI) must be 24 months in length.
91 (Core)*

92
93 Int.C.1. Fellows must complete the program within 48 months of matriculation.
94 (Core)

95
96 **I. Oversight**

97
98 **I.A. Sponsoring Institution**

99
100
101
102
103
104
105
106
107

The Sponsoring Institution is the organization or entity that assumes the ultimate financial and academic responsibility for a program of graduate medical education consistent with the ACGME Institutional Requirements.

When the Sponsoring Institution is not a rotation site for the program, the most commonly utilized site of clinical activity for the program is the primary clinical site.

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

131
132
133
134
135
136
137
138
139

I.A.1. The program must be sponsored by one ACGME-accredited Sponsoring Institution. ^(Core)

I.B. Participating Sites

A participating site is an organization providing educational experiences or educational assignments/rotations for fellows.

I.B.1. The program, with approval of its Sponsoring Institution, must designate a primary clinical site. ^(Core)

I.B.1.a) A clinical informatics fellowship must function as an integral part of an Accreditation Council for Graduate Medical Education (ACGME)-accredited residency program in anesthesiology, diagnostic radiology, emergency medicine, family medicine, internal medicine, medical genetics and genomics, pathology, pediatrics, or preventive medicine. ^(Core)

I.B.1.b) There must be an institutional policy governing the educational resources committed to the fellowship that ensures collaboration among the multiple disciplines and professions involved in educating fellows. ^(Core)

I.B.1.c) There may be only one ACGME-accredited clinical informatics program within a sponsoring institution. ^{(Detail)†}

I.B.1.d) The program structure should include participation of an academic informatics department. ^(Detail)

I.B.2. There must be a program letter of agreement (PLA) between the program and each participating site that governs the relationship

140 between the program and the participating site providing a required
141 assignment. ^(Core)

142
143 **I.B.2.a) The PLA must:**

144
145 **I.B.2.a).(1) be renewed at least every 10 years; and, ^(Core)**

146
147 **I.B.2.a).(2) be approved by the designated institutional official**
148 **(DIO). ^(Core)**

149
150 **I.B.3. The program must monitor the clinical learning and working**
151 **environment at all participating sites. ^(Core)**

152
153 **I.B.3.a) At each participating site there must be one faculty member,**
154 **designated by the program director, who is accountable for**
155 **fellow education for that site, in collaboration with the**
156 **program director. ^(Core)**

157

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for fellows**
- Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows**
- Specifying the duration and content of the educational experience**
- Stating the policies and procedures that will govern fellow education during the assignment**

158
159 **I.B.4. The program director must submit any additions or deletions of**
160 **participating sites routinely providing an educational experience,**
161 **required for all fellows, of one month full time equivalent (FTE) or**
162 **more through the ACGME's Accreditation Data System (ADS). ^(Core)**

163
164 **I.C. The program, in partnership with its Sponsoring Institution, must engage in**
165 **practices that focus on mission-driven, ongoing, systematic recruitment**
166 **and retention of a diverse and inclusive workforce of residents (if present),**
167 **fellows, faculty members, senior administrative staff members, and other**
168 **relevant members of its academic community. ^(Core)**

169

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution’s mission and aims. The program’s annual evaluation must include an assessment of the program’s efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

201

I.D. Resources

I.D.1. The program, in partnership with its Sponsoring Institution, must ensure the availability of adequate resources for fellow education.
(Core)

I.D.1.a) There must be space and equipment for the educational program, including meeting rooms, classrooms, computers, Internet access, visual and other educational aids, and work/study space. (Core)

I.D.1.b) The primary clinical site must operate a clinical information system that is able to: (Core)

I.D.1.b).(1) collect, store, retrieve, and manage health and wellness data and information; (Core)

I.D.1.b).(2) provide clinical decision support; and, (Core)

I.D.1.b).(3) support ambulatory, inpatient, and remote care settings, as needed. (Core)

I.D.2. The program, in partnership with its Sponsoring Institution, must ensure healthy and safe learning and working environments that promote fellow well-being and provide for: (Core)

I.D.2.a) access to food while on duty; (Core)

I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available and accessible for fellows with proximity appropriate for safe patient care; (Core)

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

202
203
204
205

I.D.2.c) clean and private facilities for lactation that have refrigeration capabilities, with proximity appropriate for safe patient care;
(Core)

206

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

207
208
209
210
211
212
213
214
215
216
217
218
219
220
221
222
223
224
225
226
227
228

- I.D.2.d) security and safety measures appropriate to the participating site; and, ^(Core)**
- I.D.2.e) accommodations for fellows with disabilities consistent with the Sponsoring Institution's policy. ^(Core)**
- I.D.3. Fellows must have ready access to subspecialty-specific and other appropriate reference material in print or electronic format. This must include access to electronic medical literature databases with full text capabilities. ^(Core)**
- I.D.4. The program's educational and clinical resources must be adequate to support the number of fellows appointed to the program. ^(Core)**
- I.E. *A fellowship program usually occurs in the context of many learners and other care providers and limited clinical resources. It should be structured to optimize education for all learners present.***
- I.E.1. Fellows should contribute to the education of residents in core programs, if present. ^(Core)**

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

229
230
231
232
233
234
235
236
237
238
239
240
241

- II. Personnel**
- II.A. Program Director**
- II.A.1. There must be one faculty member appointed as program director with authority and accountability for the overall program, including compliance with all applicable program requirements. ^(Core)**
- II.A.1.a) The Sponsoring Institution's Graduate Medical Education Committee (GMEC) must approve a change in program director. ^(Core)**

242 II.A.1.b) Final approval of the program director resides with the
243 Review Committee. (Core)
244

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual's responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director's nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

245
246 II.A.2. The program director must be provided with support adequate for
247 administration of the program based upon its size and configuration.
248 (Core)
249

250 II.A.2.a) At a minimum, the program director must be provided with support
251 equal to a dedicated minimum of 0.1 FTE for administration of the
252 program. (Core)
253

Background and Intent: Ten percent FTE is defined as one half-day per week.

“Administrative time” is defined as non-clinical time spent meeting the responsibilities of the program director as detailed in requirements II.A.4.-II.A.4.a).(16).

The requirement does not address the source of funding required to provide the specified salary support.

254
255 II.A.3. Qualifications of the program director:
256

257 II.A.3.a) must include subspecialty expertise and qualifications
258 acceptable to the Review Committee; and, (Core)
259

260 II.A.3.b) must include current certification in the subspecialty for
261 which they are the program director by a member board of the
262 American Board of Medical Specialties or by a certifying board of
263 the American Osteopathic Association, or subspecialty
264 qualifications that are acceptable to the Review Committee;
265 (Core)
266

267 II.A.3.c) must include at least three years of experience in clinical
268 informatics; and, (Core)
269

270 II.A.3.d) must include experience in clinical informatics education. (Core)
271

272 II.A.4. Program Director Responsibilities

273
274 The program director must have responsibility, authority, and
275 accountability for: administration and operations; teaching and
276 scholarly activity; fellow recruitment and selection, evaluation, and
277 promotion of fellows, and disciplinary action; supervision of fellows;
278 and fellow education in the context of patient care. (Core)

279
280
281
282
283

- II.A.4.a) The program director must:**
II.A.4.a).(1) be a role model of professionalism; ^(Core)

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

284
285
286
287
288
289

- II.A.4.a).(2) design and conduct the program in a fashion consistent with the needs of the community, the mission(s) of the Sponsoring Institution, and the mission(s) of the program;** ^(Core)

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

290
291
292
293
294

- II.A.4.a).(3) administer and maintain a learning environment conducive to educating the fellows in each of the ACGME Competency domains;** ^(Core)

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

295
296
297
298
299
300
301
302
303
304
305
306
307
308

- II.A.4.a).(4) develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the fellowship program education and at least annually thereafter, as outlined in V.B.;** ^(Core)
- II.A.4.a).(5) have the authority to approve program faculty members for participation in the fellowship program education at all sites;** ^(Core)
- II.A.4.a).(6) have the authority to remove program faculty members from participation in the fellowship program education at all sites;** ^(Core)

309 II.A.4.a).(7) have the authority to remove fellows from supervising
310 interactions and/or learning environments that do not
311 meet the standards of the program; ^(Core)
312

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

313
314 II.A.4.a).(8) submit accurate and complete information required
315 and requested by the DIO, GMEC, and ACGME; ^(Core)
316

317 II.A.4.a).(9) provide applicants who are offered an interview with
318 information related to the applicant's eligibility for the
319 relevant subspecialty board examination(s); ^(Core)
320

321 II.A.4.a).(10) provide a learning and working environment in which
322 fellows have the opportunity to raise concerns and
323 provide feedback in a confidential manner as
324 appropriate, without fear of intimidation or retaliation;
325 ^(Core)
326

327 II.A.4.a).(11) ensure the program's compliance with the Sponsoring
328 Institution's policies and procedures related to
329 grievances and due process; ^(Core)
330

331 II.A.4.a).(12) ensure the program's compliance with the Sponsoring
332 Institution's policies and procedures for due process
333 when action is taken to suspend or dismiss, not to
334 promote, or not to renew the appointment of a fellow;
335 ^(Core)
336

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

337
338 II.A.4.a).(13) ensure the program's compliance with the Sponsoring
339 Institution's policies and procedures on employment
340 and non-discrimination; ^(Core)
341

342 II.A.4.a).(13).(a) Fellows must not be required to sign a non-
343 competition guarantee or restrictive covenant.
344 ^(Core)
345

346 II.A.4.a).(14) document verification of program completion for all
347 graduating fellows within 30 days; ^(Core)

348
349 **II.A.4.a).(15)** provide verification of an individual fellow's
350 completion upon the fellow's request, within 30 days;
351 and, ^(Core)
352

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

353
354 **II.A.4.a).(16)** obtain review and approval of the Sponsoring
355 Institution's DIO before submitting information or
356 requests to the ACGME, as required in the Institutional
357 Requirements and outlined in the ACGME Program
358 Director's Guide to the Common Program
359 Requirements. ^(Core)
360

361 **II.B. Faculty**

362
363 *Faculty members are a foundational element of graduate medical education*
364 *– faculty members teach fellows how to care for patients. Faculty members*
365 *provide an important bridge allowing fellows to grow and become practice*
366 *ready, ensuring that patients receive the highest quality of care. They are*
367 *role models for future generations of physicians by demonstrating*
368 *compassion, commitment to excellence in teaching and patient care,*
369 *professionalism, and a dedication to lifelong learning. Faculty members*
370 *experience the pride and joy of fostering the growth and development of*
371 *future colleagues. The care they provide is enhanced by the opportunity to*
372 *teach. By employing a scholarly approach to patient care, faculty members,*
373 *through the graduate medical education system, improve the health of the*
374 *individual and the population.*

375
376 *Faculty members ensure that patients receive the level of care expected*
377 *from a specialist in the field. They recognize and respond to the needs of*
378 *the patients, fellows, community, and institution. Faculty members provide*
379 *appropriate levels of supervision to promote patient safety. Faculty*
380 *members create an effective learning environment by acting in a*
381 *professional manner and attending to the well-being of the fellows and*
382 *themselves.*
383

Background and Intent: "Faculty" refers to the entire teaching force responsible for educating fellows. The term "faculty," including "core faculty," does not imply or require an academic appointment or salary support.

384
385 **II.B.1.** For each participating site, there must be a sufficient number of
386 faculty members with competence to instruct and supervise all
387 fellows at that location. ^(Core)
388

389 **II.B.1.a)** In addition to the program director, there must be at least two

- 390 faculty members. ^(Core)
- 391
- 392 II.B.1.a).(1) The faculty members and program director should equal at
393 least two FTE. ^(Detail)
- 394
- 395 **II.B.2. Faculty members must:**
- 396
- 397 **II.B.2.a) be role models of professionalism;** ^(Core)
- 398
- 399 **II.B.2.b) demonstrate commitment to the delivery of safe, quality,**
400 **cost-effective, patient-centered care;** ^(Core)
- 401

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

- 402
- 403 **II.B.2.c) demonstrate a strong interest in the education of fellows;** ^(Core)
- 404
- 405 **II.B.2.d) devote sufficient time to the educational program to fulfill**
406 **their supervisory and teaching responsibilities;** ^(Core)
- 407
- 408 **II.B.2.e) administer and maintain an educational environment**
409 **conducive to educating fellows;** ^(Core)
- 410
- 411 **II.B.2.f) regularly participate in organized clinical discussions,**
412 **rounds, journal clubs, and conferences; and,** ^(Core)
- 413
- 414 **II.B.2.g) pursue faculty development designed to enhance their skills**
415 **at least annually.** ^(Core)
- 416

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

- 417
- 418 **II.B.3. Faculty Qualifications**
- 419
- 420 **II.B.3.a) Faculty members must have appropriate qualifications in**
421 **their field and hold appropriate institutional appointments.**
422 ^(Core)
- 423
- 424 **II.B.3.b) Subspecialty physician faculty members must:**
- 425
- 426 **II.B.3.b).(1) have current certification in the subspecialty by a**
427 **member board of the American Board of Medical**
428 **Specialties or by a certifying board of the American**

- 429 Osteopathic Association, or possess qualifications
 430 judged acceptable to the Review Committee; and, ^(Core)
 431
 432 II.B.3.b).(2) have at least two years of experience in clinical
 433 informatics. ^(Detail)
 434
 435 II.B.3.c) Any non-physician faculty members who participate in
 436 fellowship program education must be approved by the
 437 program director. ^(Core)
 438

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

- 439
 440 II.B.3.d) Any other specialty physician faculty members must have
 441 current certification in their specialty by the appropriate
 442 American Board of Medical Specialties (ABMS) member
 443 board or American Osteopathic Association (AOA) certifying
 444 board, or possess qualifications judged acceptable to the
 445 Review Committee. ^(Core)
 446
 447 II.B.4. Core Faculty
 448
 449 Core faculty members must have a significant role in the education
 450 and supervision of fellows and must devote a significant portion of
 451 their entire effort to fellow education and/or administration, and
 452 must, as a component of their activities, teach, evaluate, and provide
 453 formative feedback to fellows. ^(Core)
 454

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.

- 455
 456 II.B.4.a) Core faculty members must be designated by the program
 457 director. ^(Core)
 458
 459 II.B.4.b) Core faculty members must complete the annual ACGME
 460 Faculty Survey. ^(Core)
 461
 462 II.B.4.c) In addition to the program director, there must be at least two core
 463 faculty members. ^(Core)
 464
 465 II.C. Program Coordinator

466
467
468
469
470
471
472

II.C.1. There must be a program coordinator. ^(Core)

II.C.2. The program coordinator must be provided with support adequate for administration of the program based upon its size and configuration. ^(Core)

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge of the ACGME and Program Requirements, policies, and procedures. Program coordinators assist the program director in accreditation efforts, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

473
474
475
476
477
478
479

II.D. Other Program Personnel

The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. ^(Core)

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

III. Fellow Appointments

III.A. Eligibility Criteria

III.A.1. Eligibility Requirements – Fellowship Programs

All required clinical education for entry into ACGME-accredited fellowship programs must be completed in an ACGME-accredited residency program, an AOA-approved residency program, a program with ACGME International (ACGME-I) Advanced Specialty Accreditation, or a Royal College of Physicians and Surgeons of

492
493
494
495

Canada (RCPSC)-accredited or College of Family Physicians of
Canada (CFPC)-accredited residency program located in Canada.
(Core)

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

496
497
498
499

529
530
531
532
533
534
535
536
537
538
539

III.A.1.a) Fellowship programs must receive verification of each entering fellow’s level of competence in the required field, upon matriculation, using ACGME, ACGME-I, or CanMEDS Milestones evaluations from the core residency program. (Core)

III.A.1.b) Prior to appointment in the program, each fellow must have completed a residency program that satisfies the requirements in III.A.1. (Core)

III.A.1.c) Fellow Eligibility Exception
The Review Committees for Anesthesiology, Emergency Medicine, Family Medicine, Internal Medicine, Medical Genetics and Genomics, Pathology, Pediatrics, Preventive Medicine, and Radiology will allow the following exception to the fellowship eligibility requirements:

III.A.1.c).(1) An ACGME-accredited fellowship program may accept an exceptionally qualified international graduate applicant who does not satisfy the eligibility requirements listed in III.A.1., but who does meet all of the following additional qualifications and conditions: (Core)

III.A.1.c).(1).(a) evaluation by the program director and fellowship selection committee of the applicant’s suitability to enter the program, based on prior training and review of the summative evaluations of training in the core specialty; and, (Core)

III.A.1.c).(1).(b) review and approval of the applicant’s exceptional qualifications by the GMEC; and, (Core)

III.A.1.c).(1).(c) verification of Educational Commission for Foreign Medical Graduates (ECFMG) certification. (Core)

III.A.1.c).(2) Applicants accepted through this exception must have an evaluation of their performance by the Clinical Competency Committee within 12 weeks of matriculation. (Core)

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

541
542 **III.B.** The program director must not appoint more fellows than approved by the
543 Review Committee. *(Core)*

544
545 **III.B.1.** All complement increases must be approved by the Review
546 Committee. *(Core)*

547
548 **III.C.** Fellow Transfers

549
550 The program must obtain verification of previous educational experiences
551 and a summative competency-based performance evaluation prior to
552 acceptance of a transferring fellow, and Milestones evaluations upon
553 matriculation. *(Core)*

554
555 **IV.** Educational Program

556
557 *The ACGME accreditation system is designed to encourage excellence and*
558 *innovation in graduate medical education regardless of the organizational*
559 *affiliation, size, or location of the program.*

560
561 *The educational program must support the development of knowledgeable, skillful*
562 *physicians who provide compassionate care.*

563
564 *In addition, the program is expected to define its specific program aims consistent*
565 *with the overall mission of its Sponsoring Institution, the needs of the community*
566 *it serves and that its graduates will serve, and the distinctive capabilities of*
567 *physicians it intends to graduate. While programs must demonstrate substantial*
568 *compliance with the Common and subspecialty-specific Program Requirements, it*
569 *is recognized that within this framework, programs may place different emphasis*
570 *on research, leadership, public health, etc. It is expected that the program aims*
571 *will reflect the nuanced program-specific goals for it and its graduates; for*
572 *example, it is expected that a program aiming to prepare physician-scientists will*
573 *have a different curriculum from one focusing on community health.*

574

575 **IV.A.** The curriculum must contain the following educational components: ^(Core)

576
577 **IV.A.1.** a set of program aims consistent with the Sponsoring Institution's
578 mission, the needs of the community it serves, and the desired
579 distinctive capabilities of its graduates; ^(Core)

580
581 **IV.A.1.a)** The program's aims must be made available to program
582 applicants, fellows, and faculty members. ^(Core)

583
584 **IV.A.2.** competency-based goals and objectives for each educational
585 experience designed to promote progress on a trajectory to
586 autonomous practice in their subspecialty. These must be
587 distributed, reviewed, and available to fellows and faculty members;
588 ^(Core)

589
590 **IV.A.3.** delineation of fellow responsibilities for patient care, progressive
591 responsibility for patient management, and graded supervision in
592 their subspecialty; ^(Core)

593
Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

594
595 **IV.A.4.** structured educational activities beyond direct patient care; and,
596 ^(Core)

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

598
599 **IV.A.5.** advancement of fellows' knowledge of ethical principles
600 foundational to medical professionalism. ^(Core)

601
602 **IV.B.** **ACGME Competencies**

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

604

605 **IV.B.1. The program must integrate the following ACGME Competencies**
606 **into the curriculum:** (Core)

607
608 **IV.B.1.a) Professionalism**
609
610 **Fellows must demonstrate a commitment to professionalism**
611 **and an adherence to ethical principles.** (Core)

612
613 **IV.B.1.b) Patient Care and Procedural Skills**
614

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]’s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs*. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician’s well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

615
616 **IV.B.1.b).(1) Fellows must be able to provide patient care that is**
617 **compassionate, appropriate, and effective for the**
618 **treatment of health problems and the promotion of**
619 **health.** (Core)

620
621 **IV.B.1.b).(1).(a) Fellows must demonstrate competence in the**
622 **leverage of information and communication**
623 **technology to:** (Core)

624
625 **IV.B.1.b).(1).(a).(i) incorporate informatics principles across the**
626 **dimensions of health care including, health**
627 **promotion, disease prevention, diagnosis,**
628 **and treatment of individuals and their**
629 **families across the lifespan;** (Core)

630
631 **IV.B.1.b).(1).(a).(ii) use informatics tools to improve**
632 **assessment, interdisciplinary care planning,**
633 **management, coordination, and follow-up of**
634 **patients;** (Core)

635
636 **IV.B.1.b).(1).(a).(iii) use informatics tools, such as electronic**
637 **health records or personal health records, to**
638 **facilitate the coordination and**
639 **documentation of key events in patient care,**
640 **such as family communication, consultation**
641 **around goals of care, immunizations,**
642 **advance directive completion, and**
643 **involvement of multiple team members as**
644 **appropriate; and,** (Core)

645		
646	IV.B.1.b).(1).(a).(iv)	use informatics tools to promote
647		confidentiality and security of patient data.
648		(Core)
649		
650	IV.B.1.b).(1).(b)	Fellows must demonstrate skill in fundamental
651		programming, database design, and user interface
652		design. (Core)
653		
654	IV.B.1.b).(1).(c)	Fellows must demonstrate competence in project
655		management and software engineering related to
656		the development and management of IT projects
657		that are pertinent to patient care. (Core)
658		
659	IV.B.1.b).(1).(d)	Fellows must demonstrate competence in the
660		identification of changes needed in organizational
661		processes and clinician practices to optimize health
662		system operational effectiveness. (Core)
663		
664	IV.B.1.b).(1).(e)	Fellows must demonstrate competence in the
665		analysis of patient care workflow and processes to
666		identify information system features that will
667		support improved quality, efficiency, effectiveness,
668		and safety of clinical services. (Core)
669		
670	IV.B.1.b).(1).(f)	Fellows must demonstrate competence in the
671		assessment of user needs for a clinical information
672		or telecommunication system or application. (Core)
673		
674	IV.B.1.b).(1).(g)	Fellows must combine an understanding of
675		informatics concepts, methods, and health IT to
676		develop, implement, and refine clinical decision
677		support systems. (Core)
678		
679	IV.B.1.b).(1).(h)	Fellows must evaluate the impact of information
680		system implementation and use on patient care and
681		users. (Core)
682		
683	IV.B.1.b).(2)	Fellows must be able to perform all medical,
684		diagnostic, and surgical procedures considered
685		essential for the area of practice. (Core)
686		
687	IV.B.1.c)	Medical Knowledge
688		
689		Fellows must demonstrate knowledge of established and
690		evolving biomedical, clinical, epidemiological and social-
691		behavioral sciences, as well as the application of this
692		knowledge to patient care. (Core)
693		
694	IV.B.1.c).(1)	Fellows must demonstrate knowledge of:
695		

696	IV.B.1.c).(1).(a)	fundamental informatics vocabulary, concepts, models, and theories; ^(Core)
697		
698		
699	IV.B.1.c).(1).(b)	the health care environment, to include how business processes and financial considerations, including resourcing information technology, influence health care delivery and the flow of data among the major domains of the health system; ^(Core)
700		
701		
702		
703		
704		
705		
706	IV.B.1.c).(1).(c)	how information systems and processes enhance or compromise the decision making and actions of health care team members; ^(Core)
707		
708		
709		
710	IV.B.1.c).(1).(d)	process improvement or change management for health care processes; ^(Core)
711		
712		
713	IV.B.1.c).(1).(e)	information system management skills, including project management, the life cycle of information systems, the constantly evolving capabilities of IT and health care, and the technical and non-technical issues surrounding system implementation; ^(Core)
714		
715		
716		
717		
718		
719		
720	IV.B.1.c).(1).(f)	the impact of clinical information systems on users and patients; ^(Core)
721		
722		
723	IV.B.1.c).(1).(g)	strategies to support clinician users and promote clinician adoption of systems; ^(Core)
724		
725		
726	IV.B.1.c).(1).(h)	clinical decision design, support, use, and implementation; ^(Core)
727		
728		
729	IV.B.1.c).(1).(i)	evaluation of information systems to provide feedback for system improvement; ^(Core)
730		
731		
732	IV.B.1.c).(1).(j)	leadership in organizational change, fostering collaboration, communicating effectively, and managing large-scale projects related to clinical information systems; and, ^(Core)
733		
734		
735		
736		
737	IV.B.1.c).(1).(k)	risk management and mitigation related to patient safety and privacy. ^(Core)
738		
739		
740	IV.B.1.d)	Practice-based Learning and Improvement
741		
742		Fellows must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. ^(Core)
743		
744		
745		
746		

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

- 747
748 **IV.B.1.e) Interpersonal and Communication Skills**
749
750 **Fellows must demonstrate interpersonal and communication**
751 **skills that result in the effective exchange of information and**
752 **collaboration with patients, their families, and health**
753 **professionals. (Core)**
754
755 **IV.B.1.f) Systems-based Practice**
756
757 **Fellows must demonstrate an awareness of and**
758 **responsiveness to the larger context and system of health**
759 **care, including the social determinants of health, as well as**
760 **the ability to call effectively on other resources to provide**
761 **optimal health care. (Core)**
762
763 **IV.C. Curriculum Organization and Fellow Experiences**
764
765 **IV.C.1. The curriculum must be structured to optimize fellow educational**
766 **experiences, the length of these experiences, and supervisory**
767 **continuity. (Core)**
768
769 **IV.C.1.a) Assignment of rotations must be structured to minimize the**
770 **frequency of rotational transitions, and rotations must be of**
771 **sufficient length to provide a quality educational experience,**
772 **defined by continuity of patient care, ongoing supervision,**
773 **longitudinal relationships with faculty members, and meaningful**
774 **assessment and feedback. (Core)**
775
776 **IV.C.1.b) Clinical experiences should be structured to facilitate learning in a**
777 **manner that allows fellows to function as part of an effective**
778 **interprofessional team that works together towards the shared**
779 **goals of patient safety and quality improvement. (Core)**
780
781 **IV.C.2. The program must provide instruction and experience in pain**
782 **management if applicable for the subspecialty, including recognition**
783 **of the signs of addiction. (Core)**
784
785 **IV.C.3. Didactic sessions may be delivered at the primary clinical site or through**
786 **distance education with partnered and approved educational institutions.**
787 **(Detail)**
788
789 **IV.C.4. Fellows must participate in planning and in conducting conferences. (Core)**

- 790
791 IV.C.5. Fellows must have clearly defined, written descriptions of responsibilities
792 and a reporting structure for all educational assignments. ^(Core)
793
- 794 IV.C.6. Educational assignments must be designed to provide fellows with
795 exposure to different types of clinical and health information systems. ^(Core)
796
- 797 IV.C.7. Educational assignments should have a particular focus (or foci), such as:
798 ^(Detail)
799
- 800 IV.C.7.a) algorithm development; ^(Detail)
801
- 802 IV.C.7.b) bioinformatics/computational biology; ^(Detail)
803
- 804 IV.C.7.c) clinical translational research; ^(Detail)
805

865		
866		
867		<i>The ACGME recognizes the diversity of fellowships and anticipates that programs prepare physicians for a variety of roles, including clinicians, scientists, and educators. It is expected that the program's scholarship will reflect its mission(s) and aims, and the needs of the community it serves. For example, some programs may concentrate their scholarly activity on quality improvement, population health, and/or teaching, while other programs might choose to utilize more classic forms of biomedical research as the focus for scholarship.</i>
868		
869		
870		
871		
872		
873		
874		
875		
876	IV.D.1.	Program Responsibilities
877		
878	IV.D.1.a)	The program must demonstrate evidence of scholarly activities, consistent with its mission(s) and aims. ^(Core)
879		
880		
881	IV.D.1.b)	The program in partnership with its Sponsoring Institution, must allocate adequate resources to facilitate fellow and faculty involvement in scholarly activities. ^(Core)
882		
883		
884		
885	IV.D.2.	Faculty Scholarly Activity
886		
887	IV.D.2.a)	Among their scholarly activity, programs must demonstrate accomplishments in at least three of the following domains: ^(Core)
888		
889		
890		

- 891 • Research in basic science, education, translational
- 892 science, patient care, or population health
- 893 • Peer-reviewed grants
- 894 • Quality improvement and/or patient safety initiatives
- 895 • Systematic reviews, meta-analyses, review articles,
- 896 chapters in medical textbooks, or case reports
- 897 • Creation of curricula, evaluation tools, didactic
- 898 educational activities, or electronic educational
- 899 materials
- 900 • Contribution to professional committees, educational
- 901 organizations, or editorial boards
- 902 • Innovations in education

904 **IV.D.2.b)** The program must demonstrate dissemination of scholarly
 905 activity within and external to the program by the following
 906 methods:
 907

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the fellows’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

908
 909 **IV.D.2.b).(1)** faculty participation in grand rounds, posters,
 910 workshops, quality improvement presentations,
 911 podium presentations, grant leadership, non-peer-
 912 reviewed print/electronic resources, articles or
 913 publications, book chapters, textbooks, webinars,
 914 service on professional committees, or serving as a
 915 journal reviewer, journal editorial board member, or
 916 editor; ^{(Outcome)‡}

917
 918 **IV.D.2.b).(2)** peer-reviewed publication. ^(Outcome)

919
 920 **IV.D.3. Fellow Scholarly Activity**

921
 922 **IV.D.3.a)** Scholarly activity should include at least one of the following:

923
 924 **IV.D.3.a).(1)** peer-reviewed funding and research; ^(Detail)

925
 926 **IV.D.3.a).(2)** publication of original research or review articles; or, ^(Detail)

927
 928 **IV.D.3.a).(3)** presentations at local, regional, or national professional
 929 and scientific society meetings. ^(Detail)
 930

931 IV.E. **Fellowship programs may assign fellows to engage in the independent**
932 **practice of their core specialty during their fellowship program.**

933
934 IV.E.1. If programs permit their fellows to utilize the independent practice
935 option, it must not exceed 20 percent of their time per week or 10
936 weeks of an academic year. ^(Core)
937

Background and Intent: Fellows who have previously completed residency programs have demonstrated sufficient competence to enter autonomous practice within their core specialty. This option is designed to enhance fellows' maturation and competence in their core specialty. This enables fellows to occupy a dual role in the health system: as learners in their subspecialty, and as credentialed practitioners in their core specialty. Hours worked in independent practice during fellowship still fall under the clinical and educational work hour limits. See Program Director Guide for more details.

938
939 V. Evaluation

940
941 V.A. Fellow Evaluation

942
943 V.A.1. Feedback and Evaluation
944

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- **fellows identify their strengths and weaknesses and target areas that need work**
- **program directors and faculty members recognize where fellows are struggling and address problems immediately**

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

945

946 V.A.1.a) Faculty members must directly observe, evaluate, and
947 frequently provide feedback on fellow performance during
948 each rotation or similar educational assignment. ^(Core)
949

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

950
951 V.A.1.b) Evaluation must be documented at the completion of the
952 assignment. ^(Core)
953

954 V.A.1.b).(1) For block rotations of greater than three months in
955 duration, evaluation must be documented at least
956 every three months. ^(Core)
957

958 V.A.1.b).(2) Longitudinal experiences such as continuity clinic in
959 the context of other clinical responsibilities must be
960 evaluated at least every three months and at
961 completion. ^(Core)
962

963 V.A.1.c) The program must provide an objective performance
964 evaluation based on the Competencies and the subspecialty-
965 specific Milestones, and must: ^(Core)
966

967 V.A.1.c).(1) use multiple evaluators (e.g., faculty members, peers,
968 patients, self, and other professional staff members);
969 and, ^(Core)
970

971 V.A.1.c).(2) provide that information to the Clinical Competency
972 Committee for its synthesis of progressive fellow
973 performance and improvement toward unsupervised
974 practice. ^(Core)
975

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

976
977 V.A.1.d) The program director or their designee, with input from the
978 Clinical Competency Committee, must:
979

- 980 V.A.1.d).(1) meet with and review with each fellow their
 981 documented semi-annual evaluation of performance,
 982 including progress along the subspecialty-specific
 983 Milestones. ^(Core)
 984
- 985 V.A.1.d).(2) assist fellows in developing individualized learning
 986 plans to capitalize on their strengths and identify areas
 987 for growth; and, ^(Core)
 988
- 989 V.A.1.d).(3) develop plans for fellows failing to progress, following
 990 institutional policies and procedures. ^(Core)
 991

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

- 992
- 993 V.A.1.e) At least annually, there must be a summative evaluation of
 994 each fellow that includes their readiness to progress to the
 995 next year of the program, if applicable. ^(Core)
 996
- 997 V.A.1.f) The evaluations of a fellow's performance must be accessible
 998 for review by the fellow. ^(Core)
 999
- 1000 V.A.2. Final Evaluation
- 1001
- 1002 V.A.2.a) The program director must provide a final evaluation for each
 1003 fellow upon completion of the program. ^(Core)
 1004
- 1005 V.A.2.a).(1) The subspecialty-specific Milestones, and when
 1006 applicable the subspecialty-specific Case Logs, must
 1007 be used as tools to ensure fellows are able to engage
 1008 in autonomous practice upon completion of the
 1009 program. ^(Core)
 1010
- 1011 V.A.2.a).(2) The final evaluation must:
 1012

- 1013 **V.A.2.a).(2).(a)** become part of the fellow’s permanent record
- 1014 maintained by the institution, and must be
- 1015 accessible for review by the fellow in
- 1016 accordance with institutional policy; ^(Core)
- 1017
- 1018 **V.A.2.a).(2).(b)** verify that the fellow has demonstrated the
- 1019 knowledge, skills, and behaviors necessary to
- 1020 enter autonomous practice; ^(Core)
- 1021
- 1022 **V.A.2.a).(2).(c)** consider recommendations from the Clinical
- 1023 Competency Committee; and, ^(Core)
- 1024
- 1025 **V.A.2.a).(2).(d)** be shared with the fellow upon completion of
- 1026 the program. ^(Core)
- 1027
- 1028 **V.A.3.** **A Clinical Competency Committee must be appointed by the**
- 1029 **program director. ^(Core)**
- 1030
- 1031 **V.A.3.a)** **At a minimum the Clinical Competency Committee must**
- 1032 **include three members, at least one of whom is a core faculty**
- 1033 **member. Members must be faculty members from the same**
- 1034 **program or other programs, or other health professionals**
- 1035 **who have extensive contact and experience with the**
- 1036 **program’s fellows. ^(Core)**
- 1037
- 1038 **V.A.3.b)** **The Clinical Competency Committee must:**
- 1039
- 1040 **V.A.3.b).(1)** **review all fellow evaluations at least semi-annually;**
- 1041 **^(Core)**
- 1042
- 1043 **V.A.3.b).(2)** **determine each fellow’s progress on achievement of**
- 1044 **the subspecialty-specific Milestones; and, ^(Core)**
- 1045
- 1046 **V.A.3.b).(3)** **meet prior to the fellows’ semi-annual evaluations and**
- 1047 **advise the program director regarding each fellow’s**
- 1048 **progress. ^(Core)**
- 1049
- 1050 **V.B.** **Faculty Evaluation**
- 1051
- 1052 **V.B.1.** **The program must have a process to evaluate each faculty**
- 1053 **member’s performance as it relates to the educational program at**
- 1054 **least annually. ^(Core)**
- 1055

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback

on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 1056
1057
1058

1084
1085
1086
1087
1088
- V.C. Program Evaluation and Improvement**
- V.C.1.** The program director must appoint the Program Evaluation Committee to conduct and document the Annual Program Evaluation as part of the program's continuous improvement process. *(Core)*
- V.C.1.a)** The Program Evaluation Committee must be composed of at least two program faculty members, at least one of whom is a core faculty member, and at least one fellow. *(Core)*
- V.C.1.b)** Program Evaluation Committee responsibilities must include:
- V.C.1.b).(1)** acting as an advisor to the program director, through program oversight; *(Core)*

- 1089 **V.C.1.b).(2)** review of the program’s self-determined goals and
 1090 progress toward meeting them; ^(Core)
 1091
 1092 **V.C.1.b).(3)** guiding ongoing program improvement, including
 1093 development of new goals, based upon outcomes;
 1094 and, ^(Core)
 1095
 1096 **V.C.1.b).(4)** review of the current operating environment to identify
 1097 strengths, challenges, opportunities, and threats as
 1098 related to the program’s mission and aims. ^(Core)
 1099

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program’s progress toward achievement of its goals and aims.

- 1100
 1101 **V.C.1.c)** The Program Evaluation Committee should consider the
 1102 following elements in its assessment of the program:
 1103
 1104 **V.C.1.c).(1)** curriculum; ^(Core)
 1105
 1106 **V.C.1.c).(2)** outcomes from prior Annual Program Evaluation(s);
 1107 ^(Core)
 1108
 1109 **V.C.1.c).(3)** ACGME letters of notification, including citations,
 1110 Areas for Improvement, and comments; ^(Core)
 1111
 1112 **V.C.1.c).(4)** quality and safety of patient care; ^(Core)
 1113
 1114 **V.C.1.c).(5)** aggregate fellow and faculty:
 1115
 1116 **V.C.1.c).(5).(a)** well-being; ^(Core)
 1117
 1118 **V.C.1.c).(5).(b)** recruitment and retention; ^(Core)
 1119
 1120 **V.C.1.c).(5).(c)** workforce diversity; ^(Core)
 1121
 1122 **V.C.1.c).(5).(d)** engagement in quality improvement and patient
 1123 safety; ^(Core)
 1124
 1125 **V.C.1.c).(5).(e)** scholarly activity; ^(Core)
 1126
 1127 **V.C.1.c).(5).(f)** ACGME Resident/Fellow and Faculty Surveys
 1128 (where applicable); and, ^(Core)
 1129
 1130 **V.C.1.c).(5).(g)** written evaluations of the program. ^(Core)
 1131
 1132 **V.C.1.c).(6)** aggregate fellow:
 1133

- 1134 V.C.1.c).(6).(a) achievement of the Milestones; ^(Core)
 1135
 1136 V.C.1.c).(6).(b) in-training examinations (where applicable);
 1137 ^(Core)
 1138
 1139 V.C.1.c).(6).(c) board pass and certification rates; and, ^(Core)
 1140
 1141 V.C.1.c).(6).(d) graduate performance. ^(Core)
 1142
 1143 V.C.1.c).(7) aggregate faculty:
 1144
 1145 V.C.1.c).(7).(a) evaluation; and, ^(Core)
 1146
 1147 V.C.1.c).(7).(b) professional development ^(Core)
 1148
 1149 V.C.1.d) The Program Evaluation Committee must evaluate the
 1150 program's mission and aims, strengths, areas for
 1151 improvement, and threats. ^(Core)
 1152
 1153 V.C.1.e) The annual review, including the action plan, must:
 1154
 1155 V.C.1.e).(1) be distributed to and discussed with the members of
 1156 the teaching faculty and the fellows; and, ^(Core)
 1157
 1158 V.C.1.e).(2) be submitted to the DIO. ^(Core)
 1159
 1160 V.C.2. The program must participate in a Self-Study prior to its 10-Year
 1161 Accreditation Site Visit. ^(Core)
 1162
 1163 V.C.2.a) A summary of the Self-Study must be submitted to the DIO.
 1164 ^(Core)
 1165

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

- 1166
 1167 V.C.3. *One goal of ACGME-accredited education is to educate physicians*
 1168 *who seek and achieve board certification. One measure of the*
 1169 *effectiveness of the educational program is the ultimate pass rate.*
 1170
 1171 *The program director should encourage all eligible program*
 1172 *graduates to take the certifying examination offered by the*

applicable American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board.

1207
1208
1209

V.C.3.a)

For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) an annual written exam, in the preceding three years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. ^(Outcome)

V.C.3.b)

For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial written exam, in the preceding six years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. ^(Outcome)

V.C.3.c)

For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) an annual oral exam, in the preceding three years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. ^(Outcome)

V.C.3.d)

For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial oral exam, in the preceding six years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. ^(Outcome)

V.C.3.e)

For each of the exams referenced in V.C.3.a)-d), any program whose graduates over the time period specified in the requirement have achieved an 80 percent pass rate will have met this requirement, no matter the percentile rank of the program for pass rate in that subspecialty. ^(Outcome)

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

1210
1211
1212
1213

V.C.3.f)

Programs must report, in ADS, board certification status annually for the cohort of board-eligible fellows that graduated seven years earlier. ^(Core)

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

1215

1216

VI. The Learning and Working Environment

1217

1218

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

1219

1220

1221

- *Excellence in the safety and quality of care rendered to patients by fellows today*

1222

1223

1224

- *Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice*

1225

1226

1227

- *Excellence in professionalism through faculty modeling of:*

1228

1229

- *the effacement of self-interest in a humanistic environment that supports the professional development of physicians*

1230

1231

1232

- *the joy of curiosity, problem-solving, intellectual rigor, and discovery*

1233

1234

- *Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team*

1235

1236

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating fellows will apply these skills to critique their future unsupervised practice and effect quality improvement measures.

It is necessary for fellows and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.

VI.A.1.a) Patient Safety

VI.A.1.a).(1) Culture of Safety

A culture of safety requires continuous identification of vulnerabilities and a willingness to transparently deal with them. An effective organization has formal mechanisms to assess the knowledge, skills, and attitudes of its personnel toward safety in order to identify areas for improvement.

VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows must actively participate in patient safety systems and contribute to a culture of safety.
(Core)

1278 VI.A.1.a).(1).(b) The program must have a structure that
1279 promotes safe, interprofessional, team-based
1280 care. ^(Core)
1281

1282 VI.A.1.a).(2) Education on Patient Safety
1283
1284 Programs must provide formal educational activities
1285 that promote patient safety-related goals, tools, and
1286 techniques. ^(Core)
1287

Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.

1288
1289 VI.A.1.a).(3) Patient Safety Events
1290
1291 *Reporting, investigation, and follow-up of adverse*
1292 *events, near misses, and unsafe conditions are pivotal*
1293 *mechanisms for improving patient safety, and are*
1294 *essential for the success of any patient safety*
1295 *program. Feedback and experiential learning are*
1296 *essential to developing true competence in the ability*
1297 *to identify causes and institute sustainable systems-*
1298 *based changes to ameliorate patient safety*
1299 *vulnerabilities.*
1300

1301 VI.A.1.a).(3).(a) Residents, fellows, faculty members, and other
1302 clinical staff members must:

1303
1304 VI.A.1.a).(3).(a).(i) know their responsibilities in reporting
1305 patient safety events at the clinical site;
1306 ^(Core)
1307

1308 VI.A.1.a).(3).(a).(ii) know how to report patient safety
1309 events, including near misses, at the
1310 clinical site; and, ^(Core)
1311

1312 VI.A.1.a).(3).(a).(iii) be provided with summary information
1313 of their institution's patient safety
1314 reports. ^(Core)
1315

1316 VI.A.1.a).(3).(b) Fellows must participate as team members in
1317 real and/or simulated interprofessional clinical
1318 patient safety activities, such as root cause
1319 analyses or other activities that include
1320 analysis, as well as formulation and
1321 implementation of actions. ^(Core)
1322

1323 VI.A.1.a).(4) Fellow Education and Experience in Disclosure of
1324 Adverse Events
1325

1326		<i>Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for fellows to develop and apply.</i>
1327		
1328		
1329		
1330		
1331		
1332	VI.A.1.a).(4).(a)	All fellows must receive training in how to disclose adverse events to patients and families. ^(Core)
1333		
1334		
1335		
1336	VI.A.1.a).(4).(b)	Fellows should have the opportunity to participate in the disclosure of patient safety events, real or simulated. ^(Detail)
1337		
1338		
1339		
1340	VI.A.1.b)	Quality Improvement
1341		
1342	VI.A.1.b).(1)	Education in Quality Improvement
1343		
1344		<i>A cohesive model of health care includes quality-related goals, tools, and techniques that are necessary in order for health care professionals to achieve quality improvement goals.</i>
1345		
1346		
1347		
1348		
1349	VI.A.1.b).(1).(a)	Fellows must receive training and experience in quality improvement processes, including an understanding of health care disparities. ^(Core)
1350		
1351		
1352		
1353	VI.A.1.b).(2)	Quality Metrics
1354		
1355		<i>Access to data is essential to prioritizing activities for care improvement and evaluating success of improvement efforts.</i>
1356		
1357		
1358		
1359	VI.A.1.b).(2).(a)	Fellows and faculty members must receive data on quality metrics and benchmarks related to their patient populations. ^(Core)
1360		
1361		
1362		
1363	VI.A.1.b).(3)	Engagement in Quality Improvement Activities
1364		
1365		<i>Experiential learning is essential to developing the ability to identify and institute sustainable systems-based changes to improve patient care.</i>
1366		
1367		
1368		
1369	VI.A.1.b).(3).(a)	Fellows must have the opportunity to participate in interprofessional quality improvement activities. ^(Core)
1370		
1371		
1372		
1373	VI.A.1.b).(3).(a).(i)	This should include activities aimed at reducing health care disparities. ^(Detail)
1374		
1375		
1376	VI.A.2.	Supervision and Accountability

1377		
1378	VI.A.2.a)	<i>Although the attending physician is ultimately responsible for the care of the patient, every physician shares in the responsibility and accountability for their efforts in the provision of care. Effective programs, in partnership with their Sponsoring Institutions, define, widely communicate, and monitor a structured chain of responsibility and accountability as it relates to the supervision of all patient care.</i>
1379		
1380		
1381		
1382		
1383		
1384		
1385		
1386		
1387		<i>Supervision in the setting of graduate medical education provides safe and effective care to patients; ensures each fellow's development of the skills, knowledge, and attitudes required to enter the unsupervised practice of medicine; and establishes a foundation for continued professional growth.</i>
1388		
1389		
1390		
1391		
1392		
1393	VI.A.2.a).(1)	Each patient must have an identifiable and appropriately-credentialed and privileged attending physician (or licensed independent practitioner as specified by the applicable Review Committee) who is responsible and accountable for the patient's care.
1394		
1395		
1396		
1397		
1398		<small>(Core)</small>
1399		
1400	VI.A.2.a).(1).(a)	This information must be available to fellows, faculty members, other members of the health care team, and patients. <small>(Core)</small>
1401		
1402		
1403		
1404	VI.A.2.a).(1).(b)	Fellows and faculty members must inform each patient of their respective roles in that patient's care when providing direct patient care. <small>(Core)</small>
1405		
1406		
1407		
1408	VI.A.2.b)	<i>Supervision may be exercised through a variety of methods. For many aspects of patient care, the supervising physician may be a more advanced fellow. Other portions of care provided by the fellow can be adequately supervised by the appropriate availability of the supervising faculty member or fellow, either on site or by means of telecommunication technology. Some activities require the physical presence of the supervising faculty member. In some circumstances, supervision may include post-hoc review of fellow-delivered care with feedback.</i>
1409		
1410		
1411		
1412		
1413		
1414		
1415		
1416		
1417		
1418		

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

1419		
1420	VI.A.2.b).(1)	The program must demonstrate that the appropriate level of supervision in place for all fellows is based on each fellow’s level of training and ability, as well as patient complexity and acuity. Supervision may be exercised through a variety of methods, as appropriate to the situation. ^(Core)
1421		
1422		
1423		
1424		
1425		
1426		
1427	VI.A.2.b).(2)	The program must define when physical presence of a supervising physician is required. ^(Core)
1428		
1429		
1430	VI.A.2.c)	Levels of Supervision
1431		
1432		To promote appropriate fellow supervision while providing for graded authority and responsibility, the program must use the following classification of supervision: ^(Core)
1433		
1434		
1435		
1436	VI.A.2.c).(1)	Direct Supervision:
1437		
1438	VI.A.2.c).(1).(a)	the supervising physician is physically present with the fellow during the key portions of the patient interaction. ^(Core)
1439		
1440		
1441		
1442	VI.A.2.c).(2)	Indirect Supervision: the supervising physician is not providing physical or concurrent visual or audio supervision but is immediately available to the fellow for guidance and is available to provide appropriate direct supervision. ^(Core)
1443		
1444		
1445		
1446		
1447		
1448	VI.A.2.c).(3)	Oversight – the supervising physician is available to provide review of procedures/encounters with feedback provided after care is delivered. ^(Core)
1449		
1450		
1451		
1452	VI.A.2.d)	The privilege of progressive authority and responsibility, conditional independence, and a supervisory role in patient care delegated to each fellow must be assigned by the program director and faculty members. ^(Core)
1453		
1454		
1455		
1456		
1457	VI.A.2.d).(1)	The program director must evaluate each fellow’s abilities based on specific criteria, guided by the Milestones. ^(Core)
1458		
1459		
1460		
1461	VI.A.2.d).(2)	Faculty members functioning as supervising physicians must delegate portions of care to fellows based on the needs of the patient and the skills of each fellow. ^(Core)
1462		
1463		
1464		
1465		
1466	VI.A.2.d).(3)	Fellows should serve in a supervisory role to junior fellows and residents in recognition of their progress toward independence, based on the needs of each
1467		
1468		

1469 patient and the skills of the individual resident or
1470 fellow. ^(Detail)

1471
1472 **VI.A.2.e)** Programs must set guidelines for circumstances and events
1473 in which fellows must communicate with the supervising
1474 faculty member(s). ^(Core)

1475
1476 **VI.A.2.e).(1)** Each fellow must know the limits of their scope of
1477 authority, and the circumstances under which the
1478 fellow is permitted to act with conditional
1479 independence. ^(Outcome)

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

1481
1482 **VI.A.2.f)** Faculty supervision assignments must be of sufficient
1483 duration to assess the knowledge and skills of each fellow
1484 and to delegate to the fellow the appropriate level of patient
1485 care authority and responsibility. ^(Core)

1486
1487 **VI.B. Professionalism**

1488
1489 **VI.B.1.** Programs, in partnership with their Sponsoring Institutions, must
1490 educate fellows and faculty members concerning the professional
1491 responsibilities of physicians, including their obligation to be
1492 appropriately rested and fit to provide the care required by their
1493 patients. ^(Core)

1494
1495 **VI.B.2.** The learning objectives of the program must:

1496
1497 **VI.B.2.a)** be accomplished through an appropriate blend of supervised
1498 patient care responsibilities, clinical teaching, and didactic
1499 educational events; ^(Core)

1500
1501 **VI.B.2.b)** be accomplished without excessive reliance on fellows to
1502 fulfill non-physician obligations; and, ^(Core)

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1504
1505 **VI.B.2.c)** ensure manageable patient care responsibilities. ^(Core)

1506

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1507

1508

VI.B.3. The program director, in partnership with the Sponsoring Institution, must provide a culture of professionalism that supports patient safety and personal responsibility. ^(Core)

1509

1510

1511

1512

VI.B.4. Fellows and faculty members must demonstrate an understanding of their personal role in the:

1513

1514

VI.B.4.a) provision of patient- and family-centered care; ^(Outcome)

1515

1516

VI.B.4.b) safety and welfare of patients entrusted to their care, including the ability to report unsafe conditions and adverse events; ^(Outcome)

1517

1518

1519

1520

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

1521

1522

VI.B.4.c) assurance of their fitness for work, including: ^(Outcome)

1523

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

1524

1525

VI.B.4.c).(1) management of their time before, during, and after clinical assignments; and, ^(Outcome)

1526

1527

1528

VI.B.4.c).(2) recognition of impairment, including from illness, fatigue, and substance use, in themselves, their peers, and other members of the health care team. ^(Outcome)

1529

1530

1531

VI.B.4.d) commitment to lifelong learning; ^(Outcome)

1532

1533

VI.B.4.e) monitoring of their patient care performance improvement indicators; and, ^(Outcome)

1534

1535

1536

VI.B.4.f) accurate reporting of clinical and educational work hours, patient outcomes, and clinical experience data. ^(Outcome)

1537

1538

1539

1540 VI.B.5. All fellows and faculty members must demonstrate responsiveness
1541 to patient needs that supersedes self-interest. This includes the
1542 recognition that under certain circumstances, the best interests of
1543 the patient may be served by transitioning that patient's care to
1544 another qualified and rested provider. ^(Outcome)
1545

1546 VI.B.6. Programs, in partnership with their Sponsoring Institutions, must
1547 provide a professional, equitable, respectful, and civil environment
1548 that is free from discrimination, sexual and other forms of
1549 harassment, mistreatment, abuse, or coercion of students, fellows,
1550 faculty, and staff. ^(Core)
1551

1552 VI.B.7. Programs, in partnership with their Sponsoring Institutions, should
1553 have a process for education of fellows and faculty regarding
1554 unprofessional behavior and a confidential process for reporting,
1555 investigating, and addressing such concerns. ^(Core)
1556

1557 VI.C. Well-Being

1558 *Psychological, emotional, and physical well-being are critical in the*
1559 *development of the competent, caring, and resilient physician and require*
1560 *proactive attention to life inside and outside of medicine. Well-being*
1561 *requires that physicians retain the joy in medicine while managing their*
1562 *own real-life stresses. Self-care and responsibility to support other*
1563 *members of the health care team are important components of*
1564 *professionalism; they are also skills that must be modeled, learned, and*
1565 *nurtured in the context of other aspects of fellowship training.*

1566 *Fellows and faculty members are at risk for burnout and depression.*
1567 *Programs, in partnership with their Sponsoring Institutions, have the same*
1568 *responsibility to address well-being as other aspects of resident*
1569 *competence. Physicians and all members of the health care team share*
1570 *responsibility for the well-being of each other. For example, a culture which*
1571 *encourages covering for colleagues after an illness without the expectation*
1572 *of reciprocity reflects the ideal of professionalism. A positive culture in a*
1573 *clinical learning environment models constructive behaviors, and prepares*
1574 *fellows with the skills and attitudes needed to thrive throughout their*
1575 *careers.*
1576
1577
1578

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These

include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

1579
1580
1581

1588
1589
1590
1591
1592
1593
1594
1595

VI.C.1. The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:

VI.C.1.a) efforts to enhance the meaning that each fellow finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; ^(Core)

VI.C.1.b) attention to scheduling, work intensity, and work compression that impacts fellow well-being; ^(Core)

VI.C.1.c) evaluating workplace safety data and addressing the safety of fellows and faculty members; ^(Core)

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

1596
1597
1598
1599

VI.C.1.d) policies and programs that encourage optimal fellow and faculty member well-being; and, ^(Core)

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

1600
1601
1602
1603
1604
1605

VI.C.1.d).(1) Fellows must be given the opportunity to attend medical, mental health, and dental care appointments, including those scheduled during their working hours. ^(Core)

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

1606
1607
1608
1609
1610
1611
1612

VI.C.1.e) attention to fellow and faculty member burnout, depression, and substance use disorder. The program, in partnership with its Sponsoring Institution, must educate faculty members and fellows in identification of the symptoms of burnout, depression, and substance use disorder, including means to assist those who experience these conditions. Fellows and

1613
1614
1615
1616
1617

faculty members must also be educated to recognize those symptoms in themselves and how to seek appropriate care. The program, in partnership with its Sponsoring Institution, must: ^(Core)

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance use disorder. Materials and more information are available on the Physician Well-being section of the ACGME website (<http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being>).

1618
1619
1620
1621
1622
1623
1624
1625
1626

VI.C.1.e).(1) encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another fellow, resident, or faculty member may be displaying signs of burnout, depression, a substance use disorder, suicidal ideation, or potential for violence; ^(Core)

Background and Intent: Individuals experiencing burnout, depression, substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

1627

1631
1632
1633
1634
1635

VI.C.1.e).(2) provide access to appropriate tools for self-screening; and, ^(Core)

VI.C.1.e).(3) provide access to confidential, affordable mental health assessment, counseling, and treatment, including access to urgent and emergent care 24 hours a day, seven days a week. ^(Core)

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

1636
1637
1638
1639
1640
1641
1642
1643
1644
1645
1646
1647
1648
1649

- VI.C.2.** There are circumstances in which fellows may be unable to attend work, including but not limited to fatigue, illness, family emergencies, and parental leave. Each program must allow an appropriate length of absence for fellows unable to perform their patient care responsibilities. ^(Core)
- VI.C.2.a)** The program must have policies and procedures in place to ensure coverage of patient care. ^(Core)
- VI.C.2.b)** These policies must be implemented without fear of negative consequences for the fellow who is or was unable to provide the clinical work. ^(Core)

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

1650
1651
1652

1655
1656
1657
1658
1659
1660
1661
1662
1663
1664

- VI.D. Fatigue Mitigation**
- VI.D.1. Programs must:**
- VI.D.1.a)** educate all faculty members and fellows to recognize the signs of fatigue and sleep deprivation; ^(Core)
- VI.D.1.b)** educate all faculty members and fellows in alertness management and fatigue mitigation processes; and, ^(Core)
- VI.D.1.c)** encourage fellows to use fatigue mitigation processes to manage the potential negative effects of fatigue on patient care and learning. ^(Detail)

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

1665

- 1666 **VI.D.2.** Each program must ensure continuity of patient care, consistent
 1667 with the program’s policies and procedures referenced in VI.C.2–
 1668 VI.C.2.b), in the event that a fellow may be unable to perform their
 1669 patient care responsibilities due to excessive fatigue. ^(Core)
 1670
- 1671 **VI.D.3.** The program, in partnership with its Sponsoring Institution, must
 1672 ensure adequate sleep facilities and safe transportation options for
 1673 fellows who may be too fatigued to safely return home. ^(Core)
 1674
- 1675 **VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care**
 1676
- 1677 **VI.E.1. Clinical Responsibilities**
 1678
 1679 The clinical responsibilities for each fellow must be based on PGY
 1680 level, patient safety, fellow ability, severity and complexity of patient
 1681 illness/condition, and available support services. ^(Core)
 1682

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

- 1683
- 1684 **VI.E.2. Teamwork**
 1685
 1686 Fellows must care for patients in an environment that maximizes
 1687 communication. This must include the opportunity to work as a
 1688 member of effective interprofessional teams that are appropriate to
 1689 the delivery of care in the subspecialty and larger health system.
 1690 ^(Core)
 1691
- 1692 **VI.E.3. Transitions of Care**
 1693
- 1694 **VI.E.3.a)** Programs must design clinical assignments to optimize
 1695 transitions in patient care, including their safety, frequency,
 1696 and structure. ^(Core)
 1697
- 1698 **VI.E.3.b)** Programs, in partnership with their Sponsoring Institutions,
 1699 must ensure and monitor effective, structured hand-over
 1700 processes to facilitate both continuity of care and patient
 1701 safety. ^(Core)
 1702
- 1703 **VI.E.3.c)** Programs must ensure that fellows are competent in
 1704 communicating with team members in the hand-over process.
 1705 ^(Outcome)
 1706

1707 VI.E.3.d) Programs and clinical sites must maintain and communicate
1708 schedules of attending physicians and fellows currently
1709 responsible for care. ^(Core)

1710
1711 VI.E.3.e) Each program must ensure continuity of patient care,
1712 consistent with the program’s policies and procedures
1713 referenced in VI.C.2-VI.C.2.b), in the event that a fellow may
1714 be unable to perform their patient care responsibilities due to
1715 excessive fatigue or illness, or family emergency. ^(Core)

1716
1717 VI.F. Clinical Experience and Education

1718
1719 *Programs, in partnership with their Sponsoring Institutions, must design*
1720 *an effective program structure that is configured to provide fellows with*
1721 *educational and clinical experience opportunities, as well as reasonable*
1722 *opportunities for rest and personal activities.*

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

1724
1725 VI.F.1. Maximum Hours of Clinical and Educational Work per Week

1726
1727 Clinical and educational work hours must be limited to no more than
1728 80 hours per week, averaged over a four-week period, inclusive of all
1729 in-house clinical and educational activities, clinical work done from
1730 home, and all moonlighting. ^(Core)

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

1735
1736
1737
1738
1739

VI.F.2. Mandatory Time Free of Clinical Work and Education

VI.F.2.a) The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. ^(Core)

1740 VI.F.2.b) Fellows should have eight hours off between scheduled
1741 clinical work and education periods. ^(Detail)

1742
1743 VI.F.2.b).(1) There may be circumstances when fellows choose to
1744 stay to care for their patients or return to the hospital
1745 with fewer than eight hours free of clinical experience
1746 and education. This must occur within the context of
1747 the 80-hour and the one-day-off-in-seven
1748 requirements. ^(Detail)
1749

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1750 VI.F.2.c) Fellows must have at least 14 hours free of clinical work and
1751 education after 24 hours of in-house call. ^(Core)
1752
1753

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1754 VI.F.2.d) Fellows must be scheduled for a minimum of one day in
1755 seven free of clinical work and required education (when
1756 averaged over four weeks). At-home call cannot be assigned
1757 on these free days. ^(Core)
1758
1759

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

1760 VI.F.3. Maximum Clinical Work and Education Period Length
1761
1762

- 1763 VI.F.3.a) Clinical and educational work periods for fellows must not
 1764 exceed 24 hours of continuous scheduled clinical
 1765 assignments. ^(Core)
 1766
- 1767 VI.F.3.a).(1) Up to four hours of additional time may be used for
 1768 activities related to patient safety, such as providing
 1769 effective transitions of care, and/or fellow education.
 1770 ^(Core)
 1771
- 1772 VI.F.3.a).(1).(a) Additional patient care responsibilities must not
 1773 be assigned to a fellow during this time. ^(Core)
 1774

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

- 1775 VI.F.4. Clinical and Educational Work Hour Exceptions
 1776
 1777
- 1778 VI.F.4.a) In rare circumstances, after handing off all other
 1779 responsibilities, a fellow, on their own initiative, may elect to
 1780 remain or return to the clinical site in the following
 1781 circumstances:
 1782
- 1783 VI.F.4.a).(1) to continue to provide care to a single severely ill or
 1784 unstable patient; ^(Detail)
 1785
- 1786 VI.F.4.a).(2) humanistic attention to the needs of a patient or
 1787 family; or, ^(Detail)
 1788
- 1789 VI.F.4.a).(3) to attend unique educational events. ^(Detail)
 1790
- 1791 VI.F.4.b) These additional hours of care or education will be counted
 1792 toward the 80-hour weekly limit. ^(Detail)
 1793

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

- 1794 VI.F.4.c) A Review Committee may grant rotation-specific exceptions
 1795 for up to 10 percent or a maximum of 88 clinical and
 1796

1797 educational work hours to individual programs based on a
1798 sound educational rationale.

1799
1800 **VI.F.5. Moonlighting**

1801
1802 **VI.F.5.a) Moonlighting must not interfere with the ability of the fellow**
1803 **to achieve the goals and objectives of the educational**
1804 **program, and must not interfere with the fellow's fitness for**
1805 **work nor compromise patient safety. (Core)**

1806
1807 **VI.F.5.b) Time spent by fellows in internal and external moonlighting**
1808 **(as defined in the ACGME Glossary of Terms) must be**
1809 **counted toward the 80-hour maximum weekly limit. (Core)**
1810

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

1811
1812 **VI.F.6. In-House Night Float**

1813
1814 **Night float must occur within the context of the 80-hour and one-**
1815 **day-off-in-seven requirements. (Core)**
1816

Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

1817
1818 **VI.F.7. Maximum In-House On-Call Frequency**

1819
1820 **Fellows must be scheduled for in-house call no more frequently than**
1821 **every third night (when averaged over a four-week period). (Core)**
1822

1823 **VI.F.8. At-Home Call**

1824
1825 **VI.F.8.a) Time spent on patient care activities by fellows on at-home**
1826 **call must count toward the 80-hour maximum weekly limit.**
1827 **The frequency of at-home call is not subject to the every-**
1828 **third-night limitation, but must satisfy the requirement for one**
1829 **day in seven free of clinical work and education, when**
1830 **averaged over four weeks. (Core)**

1831
1832 **VI.F.8.a).(1) At-home call must not be so frequent or taxing as to**
1833 **preclude rest or reasonable personal time for each**
1834 **fellow. (Core)**

1835
1836 **VI.F.8.b) Fellows are permitted to return to the hospital while on at-**
1837 **home call to provide direct care for new or established**
1838 **patients. These hours of inpatient patient care must be**
1839 **included in the 80-hour maximum weekly limit. (Detail)**
1840

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
